In Lesson 4, you learned how to make drop and bar cookies. Now it’s time to learn how to make molded, refrigerated and rolled cookies. These cookies take more time to make, but are still fun and easy.

**Need to Know:**

Before you start:

- **√** Read the whole recipe.
- **√** Assemble your ingredients.
- **√** Measure accurately—never guess.
- **√** Check oven racks and place them in position before you turn on the oven. If baking one cookie sheet at a time, place the rack so the pan will be in the center of the oven to allow even air circulation.
- **√** Use a broad spatula or pancake turner to lift the cookies from the cookie sheet onto the wire rack to cool.

**Molded Cookies** - are made from stiff cookie dough in which the ingredients are mixed and molded into shapes with your hands or with a cookie press. The cookie is placed on a baking sheet and baked.

**Refrigerator Cookies** - are a stiff dough that needs to be refrigerated before baking. These cookies should be very thin and very crispy - just mix, shape into a roll, refrigerate, slice, place on a baking sheet and bake.

**Rolled Cookies** - are made from stiff dough that is mixed, sometimes chilled, rolled out, cut into fun shapes with cookie cutter and bake.
