Pesticides Fact Sheet

PESTICIDE AND TOXIC SUBSTANCE ANALYSIS

Howard M. Deer, Extension Pesticide Specialist Utah State University, Logan UT 84322-4620

December 1999 AG/Pesticides/12

The pesticide and environmental toxicology programs at Utah State University receive a broad range of inquiries from a variety of sources. One recurring request is the availability of laboratory analysis for the detection of a chemical substance or substances in a sample which could be food, plant material, animal tissue, soil, water, etc. Often the chemical to be analyzed for is a pesticide, animal drug, plant toxin, environmental contaminant, or other toxic substance. Following is a list of those laboratories in Utah and neighboring states that advertise the capability of performing such analyses:

DataChem Laboratories 960 West LeVoy Drive Salt Lake City, UT 84123 801-266-7700

Chemtech-Ford 6100 S. Stratler Murray, UT 84107 801-262-7299

National Testing Laboratories 6555 Wilson Mills Cleveland, OH 44143 1-800-458-3330 Quanterra, Inc. 880 Riverside Parkway West Sacramento, CA 95605 916-372-1393 or 1-800-753-4225

Harris 624 Peach Street P.O. Box 80837 Lincoln, NE 68501 402-476-2811

The Utah Department of Agriculture, 801-538-7168, Utah Department of Health, 801-584-8400, and Utah Department of Environmental Quality, 801-536-4400, also provide analytical services but only under certain circumstances, such as the contamination of drinking water, contamination of human food or animal feed, misuse of pesticides or other agricultural chemicals, misbranded or adulterated products offered for sale, environmental accidents and spills, and morbidities and mortalities of man or animals from unknown causes.

PRECAUTIONARY STATEMENT

All pesticides have both benefits and risks. Benefits can be maximized and risks minimized by reading and following the labeling. Pay close attention to the directions for use and the precautionary statements. The information on pesticide labels contains both instructions and limitations. Pesticide labels are legal documents and it is a violation of both federal and state laws to use a pesticide inconsistent with its labeling. The pesticide applicator is legally responsible for proper use. Always read and follow the label.

Utah State University Extension and its employees are not responsible for the use, misuse or damage caused by application or misapplication of the products or information in this publication, and make no endorsement explicitly or implicitly of this publication or information listed herein.

Utah State University Extension is an affirmative action/equal employment opportunity employer and educational organization. We offer our programs to persons regardless of race, color, national origin, sex, religion, age or disability.

Issued in furtherance of Cooperative Extension work, Acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture, Robert L. Gilliland, Vice-President and Director, Cooperative Extension Service, Utah State University, Logan, Utah. (EP/DF/02-2000)
