Lemons

Food \$ense Guide to Eating Fresh Fruits and Vegetables

Susan Haws, Extension Assistant Professor

Availability: Lemons can be found year round in supermarkets; however they are most plentiful and flavorful in the winter months. Lemons grow best in warm environments, such as California and Florida.

Eating: Lemons are an acidic fruit that is not generally eaten as a whole fruit, but more as a zest, a garnish or to add flavor to a favorite recipe. Lemons can be used with fish and salads, as well as in juices, cooking, baking, and desserts.

Selecting: For best quality in selecting lemons, choose lemons that are firm and have a bright yellow color. Lemons are the best if they have a shiny thin skin and are heavy for their size. A heavier lemon typically has more juice and flavor than a light airy lemon. Thin-skinned lemons generally have more juice.

Avoid: Avoid a lemon that is soft, spongy, wrinkled or has bumpy, rough or hard skin. Coarse, thick-skinned and light lemons will have less juice.

Two Varieties of Lemons:

- Acid: Eurekas and Lisbons
 - Grown commercially
- Sweet:
 - Grown mainly by home gardeners. The trees bloom continuously all year and can produce 500 to 600 lemons a year.
 -

Cleaning and Preparing: Wash the skin so that any dirt or bacteria residing on the surface will not be transferred to the fruits interior.

Lemons are often called for in a recipe in the form of juice. A lemon will produce more juice when warm. For best results juice lemons when they have been sitting at room temperature. Cut the lemon in half horizontally through the center. The juice can be extracted in a variety of ways. You can either use a juicer, reamer, or do it the old fashioned way, squeezing by hand.

Storing: Lemons can be stored at room temperature for about 2 weeks. They will keep for about 6 weeks in a plastic bag in the refrigerator. Use lemons as quickly as possible after cutting.

Cooking: Lemons can be used in a variety of dishes for an extra zip of flavor. Freshly squeezed lemon juice is great in fresh salsas, marinades for meats and vegetables, in salads and in drinks. Lemons are often used raw, but may be found in baked and grilled dishes.

Garnish: Slice the lemon in half and then slice into several sections. This will brighten up a dish and make it fun!

Dried Zest: If a recipe calls for lemon zest, use a zester, paring knife or vegetable peeler to remove the zest, which is the colored part of the peel. Make sure not to remove the white pith underneath, as it is bitter and should not be used. The zest can then be more finely chopped or diced as necessary.

Tips:

- Use lemon juice on apples and avocados to prevent browning after they are sliced.

- Lemon juice can remove odors from hands, pots and pans by rubbing them with a cut lemon and then washing.
- To get the most juice from a lemon, bring the fruit to room temperature and then roll on a hard surface while pressing down on the lemon.

Highlighting Nutrition in Lemons: Lemons are a citrus fruit, and therefore high in vitamin C. They are also fat free, cholesterol free, low in sodium and calories. Lemons are a good source of iron, calcium and fibers.

Preserving Lemons: Cut and juice lemons, slice and use as flavoring or garnish for meat, juices or desserts. Put fresh squeezed lemon juice in ice cube trays and freeze. When fully frozen store cubes in a plastic bag in the freezer. The lemon peel (zest) can be preserved by grating the yellow skin and drying. Dried lemon zest should be stored in a cool and dry place in an airtight container.

Lemon Chicken Pasta Salad

- 2 cups cooked pasta
- 8 oz cooked chicken breast, cooled and cut into bite size pieces
- 1 cup broccoli, cut into bite size pieces
- 1 cup carrots, sliced and lightly steamed
- 2 medium tomatoes cut in bite size pieces
- ¼ cup grated Parmesan cheese topping
- 1 lemon grated peel and juice
- 4 tbsp fresh basil, finely chopped
- ¼ cup fat-free Italian salad dressing
- ¼ tsp. black pepper, freshly ground

Mix together all ingredients. Chill thoroughly.

Bell Pepper and Lemon Fish

- ¼ cup olive oil
 - 2 cloves of garlic
 - 1 lemon, juiced
 - 1 pinch of salt
 - 2 fish fillets
 - ½ red bell pepper cut into strips
- In shallow dish mix olive oil, lemon juice, and salt. Marinate fish for at least 1 hour in olive oil mixture. Place fish on a large sheet of foil. Form a packet. Pour marinated mixture over fillets and top with peppers. Tightly seal packet, place in a baking dish, and bake at 375° for 35 minutes.

Utah State University is committed to providing an environment free from harassment and other forms of illegal discrimination based on race, color, religion, sex, national origin, age (40 and older), disability, and veteran’s status. USU’s policy also prohibits discrimination on the basis of sexual orientation in employment and academic related practices and decisions.

Utah State University employees and students cannot, because of race, color, religion, sex, national origin, age, disability, or veteran’s status, refuse to hire; discharge; promote; demote; terminate; discriminate in compensation; or discriminate regarding terms, privileges, or conditions of employment, against any person otherwise qualified. Employees and students also cannot discriminate in the classroom, residence halls, or in on/off campus, USU-sponsored events and activities.
