

Five-A-Day

The Food Guide Pyramid recommends eating at least 5 servings of fruit and vegetables a day (3-5 servings of vegetables and 2-4 servings of fruit a day so 3 vegetables + 2 fruits = 5 servings of fruits and vegetables).

Why?

- Low in calories and fat
- High in vitamins, minerals, and other healthy ingredients
- High in fiber
- Help to prevent cancer, heart disease, and other chronic diseases
- Easy to fix and serve
- Lots of choices that taste great

Points to remember

- Eat at least one vitamin A rich choice (such as cantaloupe, carrots, spinach, or a sweet potato) every day.
- Eat at least one vitamin C rich choice (such as grapefruit, oranges, cauliflower, or peppers) every day.
- Eat at least one high fiber choice (such as winter squash, corn, potatoes with skin, or apples) every day.
- Eat cabbage family vegetables (such as cabbage, broccoli, Brussels sprouts, or cauliflower) several times a week.
