ZUCCHINI - CHAMELEON OF THE SQUASH WORLD

The term squash is used for several different members of the "cucurbita" family which includes the squash, pumpkin and gourds all of which are native to the western hemisphere. Today the term squash is used for several quite different members of the family, which are divided roughly into summer and winter squashes.

**SUMMER SQUASH:** There are three varieties ordinarily found in markets. The flat white disk-shaped squash is known as White Scallop or Cymling. The yellow squashes are generally long and Crooknecked. The green or green-striped varieties are known as vegetable marrow, Italian squash or Zucchini.

**WINTER SQUASH:** There are three main varieties. The Acorn squash is small and fluted, dark green in color, and generally shaped like an acorn. The Hubbard squash is the largest and has dark green, rough skin sometimes touched with orange. The Buttercup and Butternut varieties are medium sized and pale in color. The winter squash has a very hard thick skin that cannot be pierced with a fingernail. This results from being allowed to remain on the vine until fully ripe.

**PURCHASING HINTS:**

- **Summer squash** is usually picked and marketed before it is fully mature. At this time the seeds and skin are tender, and the whole squash may be cooked without peeling. For this reason they should be clean and free from blemish, and the skin should be easily pierceable with the nail. The squash should be heavy for its size. Overripe summer squash, with its hard rind, will have hard seeds and fibrous flesh.

- **Winter squash**, on the contrary, is allowed to develop on the vine until fully ripe. The rind is therefore very hard and cannot be pierced with a fingernail. The seeds are also hard and are discarded in preparing the squash.

**STORING:** Summer squash should be stored in the refrigerator. Cure Winter squash in a warm, dry place for about 10 days at 77-85 degrees. Then store in a cool dry place at 50-55 degrees. Wipe with slightly oily cloth and examine every few weeks for mold. Under prime conditions will store up to 5 months.

**PREPARATION HINTS:** Like most other vegetables, squash should be steamed, never boiled. This is particularly true of the **Summer squash**, which have a sweet delicate flavor which is entirely lost when it is cooked in large quantities of water. A medium-sized summer squash will yield 1 ½ cups of cooked squash. The strained pulp of the **Winter squash** makes an excellent substitute for pumpkin in pies or puddings.

- **BAKE** - Cut winter squash in half, remove seeds, place in bottom of baking dish with a little water and bake at 375 degrees for 45-60 minutes.

- **STEAM** - Prepare the same as baked, put in pan with a little water and cover, steam over low heat until tender (20-30 minutes).

- **MICROWAVE** - Prepare as above, wrap each section in plastic wrap, microwave on High for 8-10 minutes (rotate at 4 minutes). Let stand 10 minutes. One pound of winter squash will give one cup of cooked squash.

**FREEZING:**

- **Summer squash** - Choose young squash with tender skin. Wash; slice; scald 3 minutes. Cool; drain; and pack in freezer containers. **Zucchini** can be shredded and immediately frozen.

- **Winter squash** - Harvest fully mature with hard rind. Bake as in baking preparation above; scoop out pulp; put through food mill; cool and pack in freezer containers.

**ZUCCHINI FREEZER PICKLES**

- 2 qts. zucchini, peeled & thinly sliced
1 small onion, sliced  
2 tablespoons salt  
1 cup white vinegar  
1 cup sugar

Mix zucchini, onion and salt in non-metal bowl and let stand 2 hours; drain and rinse thoroughly with cold water. Dissolve sugar in vinegar, add to zucchini mixture; mix well. Let stand for 30 minutes at room temperature. Place in freezer containers, leaving 1" head space; freeze. Will also keep in refrigerator for several weeks.

ZUCCHINI PICKLES

2 lbs. fresh firm zucchini  
1 large onion  
¼ cup salt  
2 cups sugar  
2 teaspoons mustard seed  
1 teaspoon celery salt  
1 teaspoon turmeric  
3 cups vinegar

Wash zucchini and cut in thin slices. Cut onions in quarters, slice very thinly; add to zucchini. Cover with 1" water and add salt; let stand 2 hours; drain thoroughly. Bring remaining ingredients to boiling; pour over zucchini & onions; let stand 2 hours; bring to boil and heat 5 minutes. Pack hot into hot jars, leaving ¼" head space. Process 20 minutes in boiling water bath. Yield: 4 half-pints.

ZUCCHINI RELISH (5-6 pints)

10 cups finely chopped zucchini  
4 large onions, peel and quarter  
4 green bell peppers, seeded  
4 red bell peppers, seeded  
½ cup salt  
2 ½ cups white vinegar  
4 cups white sugar  
2 tablespoons cornstarch  
1 teaspoon ground nutmeg  
1 teaspoon turmeric  
2 teaspoons celery seed  
½ teaspoon ground black pepper

Wash, peel zucchini, removing stems and blossom ends; remove seeds if squash is cut in large chunks for grinding. Put vegetables through food grinder; put into crockery or stainless-steel bowl, stir in the salt; cover with weighted plate; let stand overnight in brine. The next day, drain and rinse vegetables with cold water. Mix cornstarch with sugar and last four seasonings; add to cold vinegar, blending well. Over medium heat, bring to boiling, stirring well to prevent lumping. When syrup is clear, add vegetables; simmer 30 minutes, stirring often. Pour into hot jars, leaving ½" headroom. Process in boiling water bath for 15 minutes. *Courtesy of Putting Food By, Hertzberg, Vaughan, Greene.

ZUCCHINI REFRIGERATOR PRESERVES

14 medium zucchini (8 cups), shredded and firmly packed  
4 cups sugar  
½ cup lemon juice  
8 ¼ oz. can crushed pineapple, drained  
6 oz. apricot or peach flavored gelatin

In large kettle combine zucchini, sugar, lemon juice and pineapple. Bring to a boil and cook gently until reduced to 8 cups (about 12 minutes); stir frequently. Remove from heat and stir in gelatin. Cool; spoon into containers. Cover and store in refrigerator up to 1 month. Makes about 8 cups.
