Urban Agriculture Needs Assessment and Natural Resource Conservation Service Employee Workflow Development

A Plan B Thesis Project in Fulfillment of a Master of Technology and Engineering Education

By

Jennifer Long

Department of Applied Sciences, Technology, and Education

Utah State University

Logan, UT
Chapter 1: Introduction

Background and setting

Urban agriculture has been expanding over the past few decades and one driving factor is all communities wanting access to fresh, healthy food options (Grebitus, 2021). The increase in small community gardens can nourish the health and social fabric of communities along with creating economic opportunities for farmers and neighborhoods (United States Department of Agriculture (USDA), 2016). Urban agriculture can include the cultivation, processing, and distribution of agricultural products in urban and suburban areas.

The Natural Resources Conservation Service (NRCS) serves all agriculture – large to small, conventional to organic, rural and urban – and helps farmers care for the natural resources on their land – soil, water, air, plant, and animals – by providing technical and financial assistance (NRCS, n.d.-a). NRCS can provide technical and financial assistance to growers in areas such as soil health, irrigation and water conservation, weeds and pests, and high tunnels. NRCS can help urban growers conserve water by assisting with things like drip irrigation, help with pest and weed management by planting various buffers for beneficial insects, through mulching, and using cover crops. Financial assistance is available to purchase high tunnels, used to extend the growing season and protect plants from harsh weather, air pollution, and pests (NRCS, n.d.-c). As NRCS expands their efforts in urban agriculture the need for expanding training and educational materials, and outreach efforts arises.

Problem statement: A factor that the NRCS faces in expanding urban agriculture across larger cities is the lack of definition of what an urban area is and what it is not, which can be a barrier in assisting established farmers, organizations, and individuals interested in establishing or expanding gardens. Through personal communication with NRCS leadership employees,
USDA has explained that by not defining what urban agriculture is, they are ensuring to not exclude any individuals or groups including small or historically underserved farmers. While NRCS has plenty of resources on how to assist the traditional large-scale producer, there is a need to provide new resources for NRCS employees to allow them to better serve non-traditional customers that are looking for urban agriculture related assistance. Through public a forum discussion, held on March 8, 2023 at the St. Louis NRCS Urban Service Center, it was identified that there is a need to address scale-based questions, such as urban farmers or community garden leaders tend to be looking for assistance on square footage versus the more traditional customer who would have large acreage.

**Purpose and Objectives of the Project**

This project will use a survey to determine what resources need to be developed for both NRCS staff and the community on urban agriculture and small acreage assistance. The objective of this project is to develop a workflow of resources for NRCS employees based on the needs identified in the survey. The workflow will include guidance for how to help an interested customer in the first steps of seeking assistance, information for resources available at the state level, and national assistance available.

**Definition of terms:** According to the USDA, urban agriculture includes the cultivation, processing, and distribution of agricultural products in urban areas (NRCS, n.d.-c). The USDA can provide assistance to urban, small-scale, and innovative producers by providing technical and financial assistance for a variety of growing operations, including community gardens, rooftop farms, hydroponic, aeroponic and aquaponic facilities, and vertical production (USDA, n.d.-c).
Farm: is defined as any place from which $1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the year (USDA Economic Research Service, 2022).

Urban: is a territory encompassing at least 2,000 housing units or a population of at least 5,000 (United States Census Bureau, n.d.).

Urban Area: a statistical geographic entity delineated by the Census Bureau, which represents densely developed territory, and encompasses residential, commercial, and other non-residential urban land uses. For purposes of delineating metropolitan statistical areas (MSAs), at least one Urban Area of 50,000 or more population is required; for purposes of delineating micropolitan statistical areas µSAs, at least one Urban Area of 10,000 to 49,999 population is required (Office of Management and Budget, 2021).

Home garden: is a garden less than one acre in size that is maintained by one or more individuals who reside in a dwelling unit on the subject property who grow and harvest food or horticultural products for either personal consumption or for sale or donation (Missouri Coalition for the Environment (MCE), 2019).

Community garden: are collaborative projects on shared open spaces where participants share in the maintenance and products of the garden, including healthful and affordable fresh fruits and vegetables (USDA National Agricultural Library, 2018).

Urban farms: is an area, land or structure, of one or more acre that is managed and maintained by an individual, group, or organization where homegrown products are produced to be sold or donated. An urban farm includes but is not limited to outdoor growing operations, indoor growing operations, vertical farms, aquaponics, aquaculture, hydroponics, and rooftop farms (MCE, 2019).
**Food deserts**: urban neighborhoods and rural towns without ready access to fresh, healthy, and affordable food. Instead of supermarkets and grocery stores, these communities may have no food access or are served only by fast food restaurants and convenience stores that offer few healthy, affordable food options (USDA National Agricultural Library, 2018).

**Food justice**: ensures the benefits and risks of where, what, and how food is grown and produced, transported and distributed, and accessed and eaten are shared fairly. Food justice represents a transformation of the current food system, including but not limited to eliminating disparities and inequities (Robertson, et al., 2012).

**Sustainable Food Systems (SFF)**: a food system that delivers food security and nutrition for all in such a way that the economic, social, and environmental bases generate food security and nutrition for future generations are not compromised (Nguyen, 2018)

**Limitations**

The survey audience is limited to employees in counties deemed urban and it is voluntary for them to share with individuals involved in agriculture. Since the target audience is limited, the survey responses are limited as well. The small sample size only provides a glimpse into the partners opinions and could be leaving out some insightful input.

**Significance of the project**

Urban agriculture pioneers are taking action in their communities, growing not only fresh, healthy produce, but increasing opportunity and knowledge and improving the beauty of their neighborhoods. Through community gardens, produce is being grown and donated to those who need it, and children and adults are learning about agriculture first-hand (NRCS, n.d.-c). Farmer’s markets are offering easy access to fresh foods in areas considered Food Deserts and are providing new income streams for residents (NRCS, n.d.-c). As American agriculture
continues to grow in new directions, NRCS conservation assistance is growing along with it by bringing cultivation and opportunity to both rural and urban producers.

**Chapter II: Literature Review**

Urban agriculture is a growing trend that promotes local and SFS. Urban agriculture can be a tool for community building, economic empowerment, and food security (National Agricultural Library, n.d.). It also provides green space and access to fresh food that can feed urban communities, including historically underserved communities and areas considered to be food deserts. Making space for urban agriculture can bring about change by acknowledging the factors that contribute to the community’s need for access to affordable, fresh produce. This approach of bringing about change by addressing the factors contributing to the community’s needs is known as food justice: the idea that everyone deserves access to healthy, affordable, culturally appropriate food (MCE, 2019). By working for equity, urban agriculturists can ensure their positive impact goes beyond just the fresh produce that they provide (MCE, 2019).

Community gardens and greenspaces have multiple benefits to urban areas. Connecting with nature has shown to increase individual’s overall wellbeing and gardening is one of the top ways to connect with nature (Soga et al., 2016). This is important in urban areas where greenspace is not always prevalent. Previous studies have shown that gardening increases individual’s life satisfaction, vigor, psychological wellbeing, sense of community, and cognitive function (Gigliotti & Jarrott, 2005; Gonzalez et al., 2010; van den Berg et al., 2010; Wakefield et al., 2007; Wichrowski et al., 2005; Wood et al., 2016). Gardening can improve physical, psychological, and social health, which can prevent and alleviate many long-term health issues (Soga et al., 2016).
Urban agriculture faces its own set of unique challenges. Using information discovered through discussions in various open public forums held both in person in St. Louis, MO, and on national virtual calls, NRCS has determined that the challenges for urban agriculturalists vary from engineering and design issues including small-scale design and access to water, zoning and policy issues, to labor and marketing issues. It was expressed in the public forums, that one of the biggest challenges that most urban producers have in common is lack of resources whether that is land, labor, or funding.

The 2018 Farm Bill directed the United States Department of Agriculture (USDA) to extend and support building frameworks to support urban agriculture along with addressing issues of equity, climate resistance, and nutrition access. The Office of Urban Agriculture and Innovative Production (OUAIP) was established through the 2018 Farm Bill and is led by NRCS while working in partnership with Farm Service Agency (FSA) and numerous USDA agencies that support urban agriculture. The mission of OUAIP is to encourage and promote urban, indoor, and other emerging agriculture practices, including community composting and food waste reduction by providing grants and cooperative agreements to support urban production (USDA, n.d.-c). The Office of Urban Agriculture and Innovative Production oversees the Federal Advisory Committee for Urban Agriculture and Innovative Production. The committee members represent a diverse set of expertise including urban production, innovative production, higher education, non-profit, finance, business and economic development, supply chain, and other areas related to urban, indoor, and other emerging agriculture production practices. The committee hosts public meetings at least three times a year to deliberate on advice and recommendations to the Secretary of Agriculture on ways that the USDA can support urban agriculture and innovative production (USDA, n.d.-b).
The People’s Garden Initiative is one way that the USDA is promoting urban agriculture. The People’s Garden Initiative was originally launched in 2009 by Secretary of Agriculture Tom Vilsack who named it in honor of Abraham Lincoln who created the USDA and nicknamed it the “People’s Department”. President Lincoln made the scope of USDA broad by design and it still resonates to this day. He directed the USDA to “acquire and to diffuse among the people of the United States useful information on subjects connected with agriculture in the most general and comprehensive sense of the word (An Act to establish a Department of Agriculture, 1872).” In short, USDA is to provide accessible information, not only in terms of availability but in a format that is understandable. The People’s Garden Initiative aims to do just that. President Lincoln set up the Department in this way because he understood the importance of agriculture to the country’s prosperity, and while agriculture has radically changed since Lincoln’s time, there are certain core principles that remain today – the importance of food to sustain people and bring communities together (USDA, n.d.-e).

To expand urban agriculture across the United States, the USDA has established seventeen urban hub locations with a flagship People’s Garden in: Phoenix, AZ; Atlanta, GA; New Orleans, LA; Minneapolis-St. Paul, MN; St. Louis, MO; Albuquerque, NM; Cleveland, OH; Portland, OR; Philadelphia, PA; Dallas, TX; Richmond, VA; Chicago, IL; New York, NY; Detroit, MI; Grand Rapids, MI; Los Angeles, CA; Oakland, CA. These gardens grow using sustainable practices that benefit people and wildlife and are used to teach about local, resilient food systems (USDA, n.d.-e). In Missouri, the People’s Garden Initiative and the designation of the St. Louis Urban Hub have been tools for NRCS to use to communicate with the public and connect with the urban agriculture community.

Chapter III: Methodology
The objectives of this project are:

1. Gather data through surveys and forums to inform the development of a workflow for NRCS employees on urban and small-scale assistance.

2. Create a workflow for NRCS employees to use as a guide to best provide assistance to urban and small acreage farmers.

Two surveys were conducted asking both NRCS employees and customers about their experiences and perceptions of urban agriculture and NRCS. There were limited responses for both surveys. In addition, response rates from urban agriculture customers and producers were lower due in part to the difficulty in identifying participants and distributing the survey.

The survey questions were developed in conversation with the NRCS Missouri State Conservationist (STC) to form the surveys “Urban Agriculture Questionnaire for NRCS Staff” and “Experience with NRCS and Urban Agriculture Resources Questionnaire.” It is important to note that NRCS as an agency does not conduct research so there are not official protocols in place for how long a survey needs to be opened for or when and if reminders should be sent. The employee survey was sent out to employees \((n = 48)\) working in the counties near larger cities in Missouri. The cities used were St. Joseph, Kansas City, Joplin, Springfield, Columbia, Jefferson City, Cape Girardeau, and St. Louis, MO based off a map created by the Missouri NRCS State GIS Specialist. Employees who received the employee survey were asked to share the partner survey “Experience with NRCS and Urban Agriculture Resources Questionnaire” with organizations and partners that they had experience working with or saw fit to give input. The employee survey was open for seven days and the public survey was open for fourteen days. Employees were sent a reminder email two days before the employee survey closed reminding them to complete the survey and distribute the public survey.
The employee survey “Urban Agriculture Questionnaire for NRCS Staff” was presented to employees as a tool to gather information on successful experiences with urban agriculture outreach, obstacles to it, and how to overcome them with the results to be used for creating a guide to Missouri urban agriculture. Multiple response questions included: What outreach efforts are in place to find urban conservation participants or customers? What is the typical application process for urban agriculture participants that are interested? What are the barriers seen from the NRCS processing side and how do we overcome them? Questions were followed by an open response section if they selected other as a question response.

The partner survey “Experience with NRCS and Urban Agriculture Resources Questionnaire” was designed to gather information to successfully assist and connect with interested participants. Employees who received the employee survey were asked to distribute the partner survey to customers or organizations that they had experience working with. Questions included: What resources do you think could be beneficial from NRCS? If you have applied for funding, did you have any of the following obstacles in applying? Open answer spaces were provided for additional feedback.

In addition to the two surveys sent out, an open forum was held in St. Louis on March 8, 2023. The forum was hosted by the University of Missouri through funding from USDA’s Outreach and Assistance for Socially Disadvantaged Veteran Farmers and Rancher Program, also known as the 2501 Program, which helps beginning farmers and others evaluate and plan their farm enterprises. Participants were invited to express resources needed and concerns that they have related to NRCS resources and assistance. Along with local forums, the Federal Advisory Committee for Urban Agriculture and Innovative Production also holds quarterly
meetings that are open for public comment. These meetings provided an opportunity for individuals to vocalize any concerns that they would like to see addressed.

**Chapter IV: Results**

**Results for Objective One**

Results for objective 1. Gather data through surveys and forums to inform the development of a workflow for NRCS employees on urban and small-scale assistance: The response rate to the employee survey was 14.5% (n = 7). In response to what outreach efforts are in place to find urban conservation participants and customers, 85.7% (n = 6) selected field office efforts, 57.14% (n = 4) selected partnership programs, social media, outreach events, and news releases (Figure 1). NRCS employees expressed that they did not feel as though outreach efforts were in place and that their field office did not specifically advertise to urban agriculture entities.

**Figure 1**

Response to question one in the employee survey.

All respondents (n=7) who took the survey said that contacting the field office for additional information was the most typical application process for urban agriculture participants that are interested. The next most selected answers (n = 4) were applying after being contacted
by a NRCS staff member and applying online/by mail after seeing funding opportunity advertised (Figure 2).

**Figure 2**

Response to question three in the employee survey.

3. What is the typical application process for urban agriculture participants that are interested?

- Contact field office for additional information: 7
- Contact area office for additional information: 0
- Be referred to NRCS through personal connection: 2
- Apply after being contacted by NRCS: 3
- Apply online/by mail after seeing NRCS Funding Opportunity Announcement: 4
- Other: 0

When asked to choose from a list of barriers seen from the NRCS processing side and how to overcome them, the number one barrier was identifying interested applications ($n = 5$) (Figure 3). When elaborated upon, one NRCS employee responded that “I think that urban ag applicants might have different needs than our traditional landowners. For example, urban ag applicants might want to put a high tunnel on an empty lot. This does not fit our program requirements.”
Figure 3

Response to question five in the employee survey.

5. What are the barriers seen from the NRCS processing side and how do we overcome them?

Another employee responded “If you do not fall into the drawn urban zone applications don’t rank high enough to get funding. Planning and zoning sometimes cause problems. Some apply for permits, and some do not.”

It is unknown how many individuals were invited to participate in the public survey “Experience with NRCS and Urban Agriculture Resources Questionnaire.” Each participant ($n = 4$) indicated that training materials, outreach materials, and technical guidance from NRCS would be beneficial (Figure 4). In response to the question regarding any obstacles in applying for funding, each participant ($n = 4$) selected other and were given the opportunity to expand upon by open response. One individual stated that they had not applied before and one participant stated that there was too much red tape involved (Figure 5).
Figure 4
Response to question one in partner survey.

1. What resources do you think could be beneficial from NRCS?

Items and practices needed included: fence/gates and sheds/storage space for storing tools and equipment and to prevent theft; shallow water for pollinators (rain gardens for example are a practice that is being adjusted so that it can be offered to urban producers); water access (many
farmers expressed having to hook up from the edge of the road or use fire hydrants for water); rain barrels; tarps for solarization; remediation of soil; and permaculture.

When farmers and producers were asked how NRCS could be of help to them, responses included: assistance with planning and zoning issues at the farm sites; assistance with filling out the paperwork; education on sustainable urban farming practices; increased understanding and education on people and economics as a resource concern; explanations of the obligations that come with a NRCS contract; assistance for becoming USDA certified Organic; and marketing assistance.

The Federal Advisory Committee for Urban Agriculture and Innovative Production’s holds quarterly meetings that are open to the public for comment. The meeting held on February 23, 2023, allowed the public to submit requests for oral comments prior to the meeting. One attendee commented they are “a minority farmer in rural America. (They) live in Arkansas and (are) currently dealing with my local NRCS office feeling super marginalized and it all seems to be tied to the fact that (they’re) not performing industrial scale agriculture so (their) concern is the word urban because rural America farmers can be marginalized also.” The attendee goes on to say that they “currently farm thirty acres of land and as they try to procure help with the Environmental Quality Incentives Program (EQIP) it just seems like the reasoning that (they’re) given for why these practices won’t work for (them) is because (they’re) small scaled and not industrial sized. (FarmersGov, 2023). This attendee provides evidence that there are individuals out there attempting to receive assistance but being turned away and supports the USDA’s decision to not define the term urban agriculture to not exclude any historically underserved groups.

**Results for Objective Two**
Results for objective 2. Create a workflow for NRCS employees to use as a guide to best provide assistance to urban and small acreage farmers. Findings have shown the need for a concise workflow of employee resources to better serve the urban or small acreage farmer. This workflow will consist of first steps to applying for USDA assistance (Appendix A), resources available at the local/state level, and national level resources as seen in Appendices A through D.

**Resources Available at the State Level**

The next step in obtaining NRCS assistance would be to work with a service center to identify concerns that the customer would like to have addressed by filling out a Missouri Urban and Small Agriculture Service Questionnaire (Appendix B). NRCS can help determine if they are a good fit for either Environmental Quality Incentives Program (EQIP) or Conservation Stewardship Program (CSP), both of which are funded at the state level.

**Environmental Quality Incentives Program**

EQIP offers technical and financial assistance for working lands, including field crops, specialty crops, organic, confined livestock and grazing, and non-industrial private forest land. Select EQIP practices and scenarios have been adjusted for the small-scale or urban producer. Some important things about EQIP worth clarifying to interested customers are:

- EQIP eligibility is determined by producer, land, and resource concern eligibility.
- There is no minimum agricultural income requirement or agricultural product value requirement for determining land and/or producer eligibility. People who produce food, fiber, livestock, or other agricultural products solely to provide for their families, friends, neighbors, and/or communities, and who do not sell, market, or distribute their products may be eligible for EQIP. Land managed for subsistence activities may also be eligible for EQIP.
Anyone who is producing food, fiber, livestock, or other agricultural products at the time the program application is submitted may be considered an agricultural producer.

Community agriculture and/or gardens may be eligible for EQIP.

There is no minimum cropping duration requirement. However, the applicant is responsible for providing documentation to establish and document EQIP land eligibility.

When installing irrigation-related practices two out of the last 5 years. Examples of reasonable and inclusive documentation methods include municipal water bills, verbal confirmation from the participant, aerial imagery, existing irrigation infrastructure (including garden hoses or watering cans), and evidence of irrigation activities. Any form of irrigation is acceptable for irrigation history. Oscillating sprinklers, hand watering with watering cans, garden hoses with hand wands, and other backyard forms of watering are irrigation and are acceptable.

All persons considered for most USDA financial assistance programs must comply with highly erodible land (HEL) and wetland compliance (WC) requirements. Upon request by the producer, the Farm Service Agency (FSA) may grant an exemption under HEL for the noncommercial production of agricultural commodities on an area of 2 acres or less, but there is no similar exemption under the WC requirements.

Missouri EQIP Program Policy is a list of practices/scenarios available in Missouri for EQIP financial assistance. EQIP program policy is not posted online but is available for the public when working with your local NRCS office. A table of practices with small scale scenarios offered in EQIP can be found in Appendix C.

Conservation Stewardship Program
The Conservation Stewardship Program (CSP) is an additional program available, and it helps agricultural producers maintain and improve their existing conservation systems and adopt additional conservation activities to address priority resource concerns. CSP is designed to compensate agricultural and forest producers who agree to increase their level of conservation by adopting additional conservation activities all while maintaining their baseline level of conservation (NRCS, n.d.-b). Increased financial assistance for conservation practices, dedicated conservation funding, and access to advance payments for conservation practice implementation are offered to farmers, ranchers, and forest landowners that fit into any of the following historically underserved groups:

- Limited Resource Farmer or Rancher
- Beginning Farmer or Rancher
- Socially Disadvantaged Farmer or Rancher
- Veteran Farmer or Rancher

First Steps in Obtaining USDA Financial Assistance

To participate in NRCS programs an individual or entity must first obtain a farm and tract number though the Farm Service Agency (FSA). FSA serves farmers, ranchers, and agricultural partners through delivering various agricultural programs (FSA, n.d.). A guide to what forms are required and what materials you will need to complete the forms can be found in Appendix D. These forms are included in the workflow so that they can be accessed easily and walked through with the customer to help make the application process easier. The following forms can also be found in Appendix D: AD-2047 - Customer Data Worksheet (Figure D2 and Figure D3), CCC-901- Member’s Information (Figure D4 and D5), CCC-941 – Average Adjusted Gross Income (AGI) Certification and Consent to Disclosure of Tax Information (Figures D6-D8), and AD-1026
– Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification (Figures D9-D13).

**National Resources Available**

Funding available at the national level in the form of grants and agreements include Urban Agriculture and Innovation Production (UAIP) competitive grants and Composting and Food Waste Reduction (CFWR) cooperative agreements.

- UAIP competitive grants initiate or expand efforts of farmers, gardeners, citizens, government officials, schools, and other stakeholders in urban areas and suburbs. Projects may target areas of food access; education; business and start-up costs for new farmers; and development of policies related to zoning and other needs of urban production (USDA, n.d.-c).

- Composting and Food Waste Reduction (CFWR) cooperative agreements assist local and municipal governments with projects that develop and test strategies for planning and implementing municipal compost plans and food waste reduction plans. Implementation activities will increase access to compost for agricultural producers, improve soil quality and encourages innovative, scalable waste management plans that reduce and divert food waste from landfills (USDA, n.d.-a).

Get Started! is a guide to USDA Resources for Historically Underserved Farmers and Ranchers (USDA, 2022). It includes a comprehensive guide to help customers get started and should be provided to new customers when they visit a service center. The Urban Agriculture at a Glance brochure is another resource available, and it provides an overview of USDA agencies and programs and resources available to customers, partners, entities, and their communities
(Farmers, n.d.). Urban Agriculture at a Glance covers all forms of technical and financial assistance available including loan opportunities.

**Discussion**

Conducting the two surveys provided an opportunity to receive feedback from employees and partners and from there work towards finding solutions for improvement. In response to employees expressing that they did not feel as though outreach efforts were in place and that their field office did not specifically advertise to urban agriculture entities, different types of outreach materials and avenues are being explored to reach new demographics. For example, staff in St. Louis are beginning to hold open office hours once a month at a St. Louis Public Library location to make them more accessible to the public. The feedback about the need for NRCS practices be more applicable for the urban and small farmer from the open forum held in St. Louis on March 8, 2023, is being used to adjust payment scenarios for NRCS to deliver practices to urban and small farmers.

NRCS is taking all feedback into consideration, is aware of many of the issues, and is currently working on internal training for the field offices on how to serve all customers. One step towards better serving the urban and small customer is the creation of the workflow for NRCS employees on serving the urban and small customer. The workflow will be located on the Missouri NRCS internal SharePoint site and employees will learn about it through statewide updates. This is an important tool that will improve the current system in place by making sure that urban and small producers do not get overlooked. Having the resources all available in one place makes coming to request assistance a more welcoming experience. The Urban and Small Agriculture Service Questionnaire is a tool to help identify the customers’ needs and what program they would be a fit for to receive assistance. The urban and small farmers and
producers are a new targeted demographic for NRCS and they may not be familiar with the process of going to a NRCS service center. All information provided in the workflow and on development can be found in a PowerPoint presentation (Appendix E) posted in the NRCS SharePoint for employees to use for reference and training.

Appendix B

Urban and Small Agriculture Service Questionnaire

1. Where do you currently grow/operate?

2. Do you own or rent the land?

3. Are you specifically interested in either receiving technical assistance, financial assistance, or both?

4. What do you currently grow/produce?

5. What do you want to grow/produce?

6. What is your vision/goal?

7. Are you facing any challenges?

8. Do you need on-farm guidance or help conserving natural resources?

9. Are you interested in extending the growing season with a high tunnel/low tunnel?

10. Do you want to compost or vermicompost?

11. Are you experiencing erosion or any soil health concerns?

12. Do you want to incorporate mulching or cover crops?

13. Are you experiencing any irrigation or water access concerns?

14. Are you interested in incorporating a well or install a better irrigation system?

15. Are you wanting to use organic practices or get certified as organic?

16. Are you interested in getting basic farming guidance from Cooperative Extension, Beginning Farmer Development Program grants, or USDA’s Beginning Farmer and Rancher Program?

17. Are you interested in exploring opportunities for an innovative project to benefit your farm and similar farms?

Note. This questionnaire was created by the author with input from the Urban Conservationist out of the St. Louis Urban Service Center.

Figure B1. *Note.* This table was created by the author to summarize the forms found in Appendix B.
Figure B2. Form AD-2047 – Customer Data Worksheet, Page 1
In accordance with Federal civil rights laws and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, age, handicap, or political beliefs. Remedies and complaint filing deadlines vary by program or activity.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA’s TARGET Center (800-275-4265) or contact USDA through the Federal Relay Service (800-877-8339). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at http://www.ascr.usda.gov/complaint_filing_cust.html and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email program.intake@usda.gov. USDA is an equal opportunity provider, employer, and lender.

MEMBER’S INFORMATION

NOTE: This information is collected in accordance with the Privacy Act of 1974 (5 U.S.C. 552a, as amended). The authority for requesting the information identified on this form is 7 CFR Part 1400, the Commodity Credit Corporation Charter Act (18 U.S.C. 714 et seq.), the Agricultural Act of 2014 (Pub. L. 113-79), and the Agriculture Improvement Act of 2018 (Pub. L. 115-334). The information will be used to identify members of a legal entity. The information collected on this form may be disclosed to other Federal, State, Local government agencies, Tribal agencies, and nongovernmental entities that have been authorized access to the information by statute or regulation and/or as described in applicable privacy laws. The information will be used in the System of Records known as C/FER/PR/01, Farm Records File (Automated). Providing the requested information is voluntary. However, failure to furnish the requested information will result in a determination of ineligibility for program benefits.

Paperwork Reduction Act (PRA) Statement: This information collection is approved by OMB as specified in 7 U.S.C. 552a(b)(2). Public Burden Statement: For CPAP 30 and GLA only, public reporting burden for this collection is estimated to average 20 minutes per response, including reviewing instructions, gathering and maintaining the data needed, and completing and submitting the information. The total annual burden hours are 3,300.

PART A - For each individual or entity who is a member of this entity, list the member’s name, social security/employer identification number, address and percentage share of ownership. If a member has both types of identification numbers, list both.

Name of Legal Entity ____________________________ Complete Tax ID Number ________________

1. Member’s Name ____________________________ Social Security Number ________________
   SSN or Tax ID Number ______________________
   (Last 4 digits if already on file)

2. Address __________________________________

3. Percent Share ____________________________

4. Does this member have signature authority for the legal entity? (Yes or No)
   % YES NO

5. __________________________________________

PART B - Embedded Entities: For any member listed in Part A, who is an entity, list such embedded entity's name and list the requested information for each member of such entity. If a member has both types of identification numbers, list both. If more than one member, Part B is an entity, provide the requested information for each entity on supplemental sheets.

Name of Embedded Legal Entity ____________________________ Complete Tax ID Number ________________

1. Member’s Name ____________________________ Social Security Number ________________
   SSN or Tax ID Number ______________________
   (Last 4 digits if already on file)

2. Address __________________________________

3. Percent Share ____________________________

4. Does this member have signature authority for the legal entity? (Yes or No)
   % YES NO

5. __________________________________________

Figure B4. Form CCC-901 - Member’s Information, Page 1
### PART C - Embedded Entities

For any member listed in Part B, who is an entity, list such embedded entity’s name and list the requested information for each member of such entity. If a member has both types of identification numbers, list both. If more than one member, listed in Part B is an entity, provide the requested information for each entity on supplemental sheets.

6. Separate Status of Minors

(a) Is any minor a producer on a farm in which the parent or guardian has no interest?  
   - TYPE A: YES | NO

(b) Does any minor maintain a separate household from the parent or guardian and personally carry out farming activities with respect to the minor's farming operation, including maintaining separate accounting?  
   - TYPE B: YES | NO

(c) Does any minor who is represented by a court-appointed guardian or conservator responsible for the minor:  
   - live in a household other than the parents' household(s), and  
   - have a vested ownership in the farm?  
   - TYPE C: YES | NO

(d) If any minor with an interest in this farming operation can answer "YES" to items 6(a)-6(c), list that minor's name:  

### Part E - Foreign Persons

For any Member or Shareholder who is a foreign person, provide the following:

7A. Citizenship Status - Is each Member and Shareholder of the legal entity identified in Part A, and any embedded entity identified in Parts C, D and E a U.S. Citizen?  
   - TYPE D: YES | NO

7B. For each member or shareholder (direct or embedded) who is not a U.S. Citizen, provide the following:

<table>

### PART F - CERTIFICATION - By Signing

- I certify that I have signature authority for the entity identified in Part A and all information entered on this document is true and correct.
- I understand that furnishing incorrect information will result in forfeiture of payments and benefits.
- I will timely provide written notification to the Farm Service Agency committees for the county and State listed on this form of any changes in the information provided.

1. Representative’s Signature (By)  
2. Title/Relationship of Individual Signing in the Representative  
3. Date (MM-DD-YYYY)

| FAX Number:  
(Name, address and fax number of PSA county office or USDA Service Center) |

**NOTE:** The following information is made available in accordance with the Privacy Act of 1974, 5 U.C.S. § 552a – as amended. The Authority for collecting the information is found in 7 U.S.C. § 9012 et seq. and 7 CFR 1300 et seq. The information will be used to determine eligibility for program benefits. The information collected on this form will be retained for a period of not less than 1 year from the date the last entry was made. The information will be used in the process of federal program operations. The information will be shared with United States Department of Agriculture, State and Local governments (including their agencies and contractors), and private parties under certain circumstances. Your refusal to provide the requested information will result in a determination of ineligibility for program benefits.

**Payment Evaluation Act (PGA) Statement:** This information collection is exempt from the Paperwork Reduction Act, 5 U.S.C. § 552a(c)(5)(A).

**Public Reporting burden**: For OMB control number 0584-0072, the estimated annual public reporting burden is 88 minutes for this collection. This is an information collection activity required by law, Title 7 of the U.S. Code, 7 CFR Part 400 and 7 CFR Part 2000. The purpose of this collection is to provide the USDA with the information necessary to determine eligibility for program benefits. **PLEASE RETURN COMPLETED FORM TO PSA AT THE ABOVE ADDRESS.**

(Use the same name and address as used for the tax return specified in Part B.)

### PART A – CERTIFICATION OF AVERAGE ADJUSTED GROSS INCOME

4. The program year for payment eligibility

| A. 20 | Enter the year for which program benefits are requested. The period for calculation of the average AGI will be the three taxable years preceding the most immediately preceding complete taxable year for which benefits are requested. For example, the 3-year period for the calculation of the average AGI for 2019 would be the taxable years of 2017, 2016 and 2015. |

| B. | |

| A. | Less than (or equal to) $500,000 |

| B. | More than $500,000 |

### PART B – CONSENT TO DISCLOSURE OF TAX INFORMATION

Pursuant to 26 U.S.C. §6103, I hereby authorize the Internal Revenue Service (IRS) to review the following items of "return information" (as defined in 26 U.S.C. §6103(b)(2)) from the returns (as specified below) of the individual or legal entity identified in Item 2 for the taxable years indicated in Item 4:

| Form 1040 and 1040NR filers: farm income or loss; adjusted gross income | Form 1120, 1120A, 1120C filers: charitable contributions, taxable income |
| Form 1041 filers: farm income or loss, charitable contributions, income distribution, deductions, exemptions, adjusted total income; total income | Form 1120S filers: ordinary business income |
| Form 1065 filers: guaranteed payments to partners, ordinary business income | Form 990T: unrelated business taxable income |

I understand the IRS will review these items of return information in order to perform calculations, the results of which I authorize to be disclosed to officers and employees of the United States Department of Agriculture (USDA) for use in determining the individual’s or legal entity’s eligibility for specified payments for various commodity and conservation programs. The calculations performed by the IRS use a methodology prescribed by the USDA. In addition, I am aware that the USDA may use the information received for compliance purposes related to this eligibility determination, including referrals to the Department of Justice.

Specifically, the IRS will disclose to the USDA the individual’s or legal entity’s name and TIN, and inform the USDA if, pursuant to its calculations, the average Adjusted Gross Income (AGI) is above or below eligibility requirements as prescribed by the Agricultural Act of 2014 or Agriculture Improvement Act of 2018. The IRS will also disclose to the USDA the type of return from which the information used for the calculations was obtained.

If the IRS is unable to locate a return that matches the taxpayer identification information provided above, or if IRS records indicate that the specified return has not been filed, for any of the taxable years indicated, the IRS may disclose that it was unable to locate a return, or that a return was not filed, for those years, whichever is applicable.

I understand the Internal Revenue Code §6103(c), limits disclosure and use of return information provided pursuant to a taxpayer’s consent and holds the recipient subject to penalties, brought by private right of action, for any unauthorized access, other use, or disclosure without the taxpayer’s express permission or request.

An executed Power of Attorney (Form PSA-211) on file with USDA cannot be used as evidence of signature authority when completing this form.

By signing this form:
- I acknowledge that I have read and reviewed all definitions and requirements on Page 2 of this form;
- I certify that all information contained within this certification is true and correct; and is consistent with the tax returns filed with the IRS;
- I agree that the IRS may obtain tax data from the IRS for ADP compliance verification purposes by filing this form;
- I understand that without this consent to disclose, the returns and return Information of the individual or legal entity identified in Item 2 are confidential and are protected by law under the Internal Revenue Code;
- I certify that I am authorized under applicable state law to execute this consent on behalf of the legal entity identified in Item 2 (for legal entity only).

8. Date (MM-DD-YYYY)

Date Stamp

---

**Figure B6. CCC-941 – Average Adjusted Gross Income (AGI) Certification and Consent to Disclosure of Tax Information, Page 1**
GENERAL INFORMATION ON AVERAGE ADJUSTED GROSS INCOME – PART A

Individuals or legal entities that receive benefits under most programs administered by CCC have incomes that exceed a certain limit set by law. For entities, both the entity itself, and its members cannot exceed the income limitation. If a member, whether an individual or an entity, of an entity exceeds the limitation, payments to that entity will be commensurately reduced according to that member’s direct or indirect ownership share in the entity. (All members of the entity must also submit this form to verify income the limitation is met.)

Adjusted Gross Income is the individual’s or legal entity’s IRS-reported adjusted gross income consisting of both farm and nonfarm income. A three-year average of that income will be computed for the three years of the relevant base period identified on the first page of this form to determine eligibility for the applicable program year. Individuals or legal entities with average adjusted gross income greater than $900,000 shall be ineligible for all payments and benefits under the commodity, price support, disaster assistance, and conservation programs.

HOW TO DETERMINE ADJUSTED GROSS INCOME (AGI)

Individual – Internal Revenue Service (IRS) Form 1040 filers, specific lines on that form represent the adjusted gross income and the income from farming, ranching, or forestry operations.

Trust or Estate – the adjusted gross income is the total income and charitable contributions reported to IRS.

Corporation – the adjusted gross income is the total of the final taxable income and any charitable contributions reported to IRS.

Limited Partnership (LP), Limited Liability Company (LLC), Limited Liability Partnership (LLP) or Similar Entity – the adjusted gross income is the total income from trade or business activities plus guaranteed payments to the members as reported to the IRS.

Tax-exempt Organization – the adjusted gross income is the unrelated business taxable income excluding any income from non-commercial activities as reported to the IRS.

HOW TO DETERMINE AVERAGE ADJUSTED GROSS INCOME

The period for calculation of the average AGI will be of the three taxable years preceding the most immediately preceding complete taxable year for which benefits are requested. This table shows examples for applicable years to be used in determining average AGI.

<table>
<thead>
<tr>

GENERAL INFORMATION ON CONSENT TO DISCLOSURE OF TAX INFORMATION – PART B

This consent allows IRS’s access to, and use of, certain items of return information to perform calculations, using a methodology prescribed by the USDA, that will assist USDA in its verification of a program participant’s compliance with the adjusted gross income (AGI) limitations necessary for participation in, and receipt of, commodity, conservation, price support or disaster program benefits. This consent also permits the USDA to receive certain items of return information for its eligibility determination.

This consent authorizes the disclosure of these items of return information for only the time period specified. Each item of information requested on this form is needed for the IRS to (1) locate, and verify, your tax information; (2) perform the requisite Average AGI calculations; and (3) provide the USDA with the legal entity’s name and Taxpayer Identification Number (TIN), the type of return from which the specified items were located for use in the calculation, and whether or not the average AGI is above or below eligibility requirements. The IRS will not provide the USDA with any of the items specified on this consent form that it uses to perform the calculations or the average AGI figure.

This form can only be signed by the person authorized under state law to sign this consent for the legal entity identified in item 2. An approved Power of Attorney (Form FSA-211) on file with USDA cannot be used as evidence of a signature authority when completing this form.

Internal Revenue Code, §6103(c), limits disclosure and use of return information received pursuant to the taxpayer’s consent and holds the recipient subject to penalties for any unauthorized access, other use, or redisclosure without the taxpayer’s express permission or request.

INSTRUCTIONS FOR COMPLETION OF CCC-941

<td>1. Return Completed Form To Enter the name, address and fax number of the FSA county office or USDA service center where the completed CCC-941 will be submitted.</td>
<td></td>
</tr>
<tr>
<td>2. Person or Legal Entity’s Name and Address</td>
<td>Enter the person’s or legal entity’s name and address for commodity, conservation, price support, or disaster program benefits. Enter the name and address as it appeared on the IRS tax returns filed for the taxable years specified in item 4.</td>
</tr>
<tr>
<td>3. Taxpayer Identification Number</td>
<td>In the format provided, enter the complete taxpayer identification number of the person or legal entity identified in item 2. This will be either a Social Security Number or Taxpayer Identification Number.</td>
</tr>
<tr>
<td>4. Program Year</td>
<td>Enter the year for which program benefits are being requested. The program year entered determines the 3-year period used for the calculation of the average adjusted gross income (AGI) for payment eligibility and the years for which this consent allows access to tax information.</td>
</tr>
<tr>
<td>5. Average Adjusted Gross Income</td>
<td>Enter the box next to the response that describes the average adjusted gross income for the applicable 3-year period for the program year entered in item 4. Select only one response.</td>
</tr>
<tr>
<td>6. Signature</td>
<td>Read the acknowledgments, responsibilities and authorizations, before affixing your signature. Power of Attorney (Form FSA-211) on file with USDA cannot be used as evidence of signature authority.</td>
</tr>
<tr>
<td>7. Title/Relationship</td>
<td>Enter title or relationship to the legal entity identified in item 2.</td>
</tr>
<tr>
<td>8. Date</td>
<td>Enter the signature date in month, day and year. This form must be returned to FSA within 90 days of the signature date for the consent to be valid.</td>
</tr>
</tbody>
</table>
In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA’s TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at http://www.ascr.usda.gov/complaint_filing_cust.html and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture Office of the Assistant Secretary for Civil Rights 1400 Independence Avenue, SW Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov. USDA is an equal opportunity provider, employer, and lender.

Figure B8. CCC-941 – Average Adjusted Gross Income (AGI) Certification and Consent to Disclosure of Tax Information, Page 3
### PART A – BASIC INFORMATION

<table>
<thead>
<tr>
<th>1. Name of Producer</th>
<th>2. Tax Identification Number (Last 4 digits)</th>
<th>3. Crop Year</th>
</tr>
</thead>
</table>

4. Names of affiliated persons with farming interests. Enter “None,” if applicable.

Affiliated persons with farming interests must also file an AD-1026. See Item 7 in the Appendix for a definition of an affiliated person.

5. Check one of these boxes if the statement applies; otherwise continue to Part B:

   A. The producer in Part A does not have interest in land devoted to agriculture. Examples include bee keepers who place their hives on another person’s land, producers of crops grown in greenhouses, and producers of aquaculture and these producers do not own/lease any agricultural land themselves. Note: Do not check this box if the producer shares in a crop.

   B. The producer in Part A meets all three of the following:
      - does not participate in any USDA program that is subject to HELC and WC compliance except Federal Crop Insurance.
      - only has interest in land devoted to agriculture which is exclusively used for perennial crops, except sugarcane, and
      - has not converted a wetland after February 7, 2014.

Perennial crops include, but are not limited to, tree fruit, tree nuts, grapes, olives, native pasture and perennial forage. A producer that produces alfalfa should contact the Natural Resources Conservation Service at the nearest USDA Service Center to determine whether such production qualifies as production of a perennial crop.

Note: If either box is checked, and the producer in Part A does not participate in Farm Service Agency (FSA) or Natural Resources Conservation Service (NRCS) programs, the full tax identification number of the producer must be provided, but establishment of detailed farm records with FSA is not required. Go to Part D and sign and date.

### PART B – HELC/WC COMPLIANCE QUESTIONS

Indicate YES or NO to each question. If you are unsure of whether a HELC determination, wetland determination, or NRCS evaluation has been completed, contact your local USDA Service Center.

<table>
<thead>
<tr>
<th>YES</th>
<th>NO</th>
</tr>
</thead>
</table>

B. Did the crop year entered in Part A or the term of a requested USDA loan, or will the producer in Part A plant or produce an agricultural commodity (including sugarcane) on land for which an HELC determination has not been made?

C. Has anyone performed since December 20, 1988, or will anyone perform any activities to:

   A. Create or modify existing drainage systems, conduct land leveling, filling, dredging, land clearing, or excavation that has NOT been evaluated by NRCS? If "YES", indicate the year(s): __________  

   B. Improve or modify an existing drainage system that has NOT been evaluated by NRCS? If "YES", indicate the year(s): __________  

   C. Maintain an existing drainage system that has NOT been evaluated by NRCS? If "YES", indicate the year(s): __________  

Note: Maintenance is the repair, rehabilitation, or replacement of the capacity of existing drainage systems to allow for the continued use of wetlands currently in agricultural production and the continued management of other areas as they were used before December 23, 1985. This allows a person to reconstruct or maintain the capacity of the original system or install a replacement system that is more durable or will realize lower maintenance or costs.

Note: If "YES" is checked for Item 7A or 7B, then Part C must be completed to authorize NRCS to make an HELC/WC and/or certified wetland determination for the identified land. If "YES" is checked for Item 7C, NRCS does not have to conduct a certified wetland determination.

8. Check one or both boxes, if applicable; otherwise, continue to Part C or D.

   A. Check this box only if the producer in Part A has FCS reinsured crop insurance and filing this form represents the first time the producer in Part A, including any affiliated person, has been subject to HELC and WC provisions.

   B. Check this box if either of the following applies to the producer and crop year entered in Part A:
      - Is a tenant on a farm that is not in compliance with HELC and WC provisions because the landlord refuses to allow compliance, but all other farms not associated with that tenant are in compliance. (AD-1026B, Tenant Exemption Request, must be completed).
      - Is a landlord of a farm that is not in compliance with HELC and WC provisions because of a violation by the tenant on that farm, but all other farms not associated with that tenant are in compliance. (AD-1026C, Landlord or Landowner Exemption Request, must be completed).

### PART C – ADDITIONAL INFORMATION

9. If "YES" was checked in Item 6 or 7, provide the following information for the land to which the answer applies:

   A. Farm and/ or tracts/field number:

   B. Activity:

   C. Current land use (specify crops):

   D. County:
### PART D – CERTIFICATION OF COMPLIANCE

I have received and read the AD-1026. I agree and understand and agree to the terms and conditions therein on all land in which I (or the producer in Part A, if different) and any affiliated person have or will have an interest. I understand that eligibility for certain USDA program benefits is contingent upon this certification of compliance with HELC and WC provisions. I am responsible for any non-compliance. I understand and agree that this certification of compliance is considered continuous and will remain in effect unless revoked or a violation is determined. I further understand and agree that:

- all applicable payments must be refunded if a determination of ineligibility is made for a violation of HELC or WC provisions.
- NRCS may verify whether a HELC violation or WC has occurred.
- Only Form AD-1026 must be filed if there are any operation changes or activities that may affect compliance with the HELC and WC provisions. I understand that failure to file Form AD-1026 may result in ineligibility for certain USDA program benefits or other consequences.
- Affiliates are also subject to compliance with HELC and WC provisions and their failure to comply with Form AD-1026 will result in loss of eligibility for applicable benefits to any individuals or entities with whom they are considered affiliated.

### Producer’s Certification:

I hereby certify that the information on this form is true and correct to the best of my knowledge.

### IMPORTANT:

If you are unsure about the applicability of HELC and WC provisions to your land, contact your local USDA Service Center for details concerning the location of any highly erodible land or wetlands and any restrictions applying to your land. According to NRCS determinations, any change in agricultural or forestry practice (e.g., cultivation, herbicide application, or livestock grazing) may affect eligibility for USDA program benefits.

The following statement is made in accordance with the Privacy Act of 1974 (5 U.S.C. 552a – as amended). The authority for requesting the information identified on this form is 7 CFR Part 12, the Food Security Act of 1985 (Pub. L. 99-198), and the Agricultural Act of 2014 (Pub. L. 113-79). The information will be used to certify compliance with HELC and WC provisions and to determine producer eligibility to participate in and receive benefits under programs administered by USDA agencies. The information collected on this form may be disclosed to other Federal, State, Local government agencies, Tribal agencies, and non-governmental entities that have been authorized access to the information by statute or regulation and as described in applicable Routine Uses identified in the System of Records Notice for USDA/FS/A2, Farm Records File (Automated and USDA/FSA-14, Applicant/Non-Agricultural Provider). Providing the requested information is voluntary. However, failure to furnish the requested information will result in a determination of producer ineligibility to participate in and receive benefits under programs administered by USDA agencies.

This information collection is exempted from the Paperwork Reduction Act as specified in the Agricultural Act of 2014 (Pub. L. 113-79, Title II, Subtitle G, Funding and Administration). The provisions of appropriate criminal and civil statutes, including those related to fraud and abuse, are applicable to the information provided.

RETURN THIS COMPLETED FORM AD-1026 TO YOUR COUNTY FARM SERVICE AGENCY (FSA) OFFICE.

The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers, employees, and applicants for employment on the basis of race, color, national origin, sex, age, disability, or religion. If you believe that this program has violated any provisions of this statement, please contact USDA’s TARGET Center at (202) 720-2600 (voice and TDD) or contact USDA through the Federal Relay Service at (800) 877-8339 or (800) 845-6135 (in Spanish).

If you wish to file a Civil Rights program complaint of discrimination, complete the USDA Program Discrimination Complaint Form, found online at [http://www.ascr.usda.gov/complaint_filing_cust.html](http://www.ascr.usda.gov/complaint_filing_cust.html), or at any USDA office, or call (866) 632-9992 to request the form. You may also write a letter containing all of the information requested in the form. Send your completed complaint form or letter to U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or to USDA’s TARGET Center at (202) 720-2600 (voice and TDD).

USDA is an equal opportunity provider and employer.
1. Overview

The following conditions of eligibility are required for a producer to receive any U.S. Department of Agriculture (USDA) loans or other program benefits that are subject to the highly erodible land conservation (HELC) and wetland conservation (WC) provisions. Unless an exemption has been granted by USDA, the producer agrees to all of the following on all farms in which the producer, and any affiliated person to the producer (as specified in 7 CFR Part 12), has an interest:

- NOT to plant or produce an agricultural commodity on highly erodible land or fields unless being farmed in accordance with a conservation plan or system approved by the Natural Resources Conservation Service.
- NOT to plant or produce an agricultural commodity on a wetland that was converted after December 23, 1985.
- NOT to have converted a wetland after November 28, 1990, for the purpose, or to have the effect, of making the production of an agricultural commodity possible on such converted wetland.
- NOT to convert a wetland by draining, dredging, filling, leveling, removing woody vegetation, or any other activity that results in impairing or reducing the flow and circulation of water in a way that would allow the planting of an agricultural commodity.
- NOT to use proceeds from any Farm Service Agency farm loan, insured or guaranteed, or any USDA financial assistance program, in such a way that might result in negative impacts to a wetland, except for those projects evaluated and approved by Natural Resources Conservation Service.

2. Statutory and Regulatory Authority

The Food Security Act of 1985, as amended, requires producers participating in most programs administered by the Farm Service Agency (FSA), Natural Resources Conservation Service (NRCS), and the Risk Management Agency (RMA) to comply with HELC and WC provisions on all land owned or farmed that is considered highly erodible or a wetland unless USDA determines an exemption applies. Producers participating in these programs, and any individual or entity considered to be an affiliated person of a participating producer, are subject to these provisions. The regulations covering these provisions are set forth at 7 CFR Part 12; all such provisions, whether or not explicitly stated herein, shall apply.

3. Explanation of Terms

Agricultural commodity is any crop planted and produced by annual tilling of the soil, including tilling by one-trip planters, or sugarcane.

Highly erodible land is any land that has an erodibility index of 8 or more.

Highly erodible fields are fields where either:
- 33.33 percent or more of the total field acreage is identified as soil map units that are highly erodible; or
- 50 or more acres in such field are identified as soil map units that are highly erodible.

Perennial crop is any crop that is planted once and produces crops over multiple years. Go to www.nrcs.usda.gov/compliance for a list of perennial and annual crops.

Wetland is an area that:
- has a predominance of hydric soils (wet soils);
- is inundated or saturated by surface or groundwater (hydrology) at a frequency and duration sufficient to support a prevalence of hydrophytic (water tolerant) vegetation typically adapted for life in saturated soil conditions; and
- under normal circumstances supports a prevalence of such vegetation, except that this term does not include lands in Alaska identified as having a high potential for agricultural development and a predominance of permafrost soils.
4. NRCS and FSA Determinations

When making HELC and WC compliance determinations:
- NRCS makes technical determinations; these include:
  - For HELC compliance:
    - whether land is considered highly erodible;
    - establishing conservation plans or systems; and
    - whether highly erodible fields are being farmed in accordance with a conservation plan or system approved by NRCS.
  - For WC compliance:
    - whether land is a wetland and if certain technical exemptions apply, such as prior converted;
    - whether a wetland conversion has occurred.
- FSA’s responsibilities include:
  - making eligibility determinations, such as who is ineligible based upon NRCS technical determinations of non-compliance;
  - acting on requests for application of certain eligibility exemptions, such as the good faith relief exemption.
  - maintaining the official USDA records of highly erodible land and wetland determinations. The determinations are recorded both within the geographic information system and the automated farm and tract records maintained by FSA; however, it is important to know that determinations may not include all of a producer’s land. If a producer is uncertain of the highly erodible land and wetland determinations applicable to any of the producer’s land, the producer should contact the appropriate USDA Service Center for assistance.

5. HELC and WC Non-Compliance - FSA and NRCS Programs

Producers who are not in compliance with HELC and WC provisions are not eligible to receive benefits for most programs administered by FSA and NRCS. If a producer received program benefits and is later found to be non-compliant, the producer may be required to refund all benefits received and/or may be assessed a penalty.

In particular, unless exemptions apply, a producer participating in FSA and NRCS programs must: not plant or produce an agricultural commodity on a highly erodible field unless such production is in compliance with a conservation plan or system approved by NRCS; not have planted or produced an agricultural commodity on a wetland converted after December 31, 1985; and, after November 30, 1990, must not have converted a wetland for the purpose, or to have the effect, of making the production of an agricultural commodity possible on such converted wetland.

A producer who violates HELC or WC provisions is ineligible for applicable FSA and NRCS benefits for the year(s) in violation. A planting violation, whether on highly erodible land or a converted wetland, results in eligibility for benefits for the year(s) when the planting occurred. A wetland conversion violation results in eligibility beginning with the year in which the conversion occurred and concluding for subsequent years, unless the converted wetland is restored or mitigated before January 1st of the subsequent year.

6. HELC and WC Non-Compliance - Risk Management Agency - Crop Insurance Policies Reinsured by the Federal Crop Insurance Corporation

Producers obtaining federally reinsured crop insurance will not be eligible for any premium subsidy paid by the Federal Crop Insurance Corporation (FCIC) for any policy or plan of insurance if the producer:
- has not filed a completed Form AD-1026 with FSA certifying compliance with HELC and WC provisions; or
- is not in compliance with HELC and WC provisions.

Unless an exemption applies, a producer must:
- not plant or produce an agricultural commodity on a highly erodible field, unless such production is in compliance with a conservation plan approved by NRCS;
- not plant or produce an agricultural commodity on a wetland converted after February 7, 2014; and
- not have converted a wetland for the purpose, or to have the effect, of making the production of an agricultural commodity possible on such converted wetland after February 7, 2014.

Figure B12. AD-1026 – Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification, Page 4
A producer is ineligible for any premium subsidy paid by FCIC on all policies and plans of insurance for the reinsurance year (July 1 – June 30) following the reinsurance year of a final determination of a violation of HELC or WC provisions, including all administrative appeals, unless specific exemptions apply. Further, a producer will be ineligible for any premium subsidy paid by FCIC on all policies and plans of insurance for a reinsurance year if they do not have a completed Form AD-1026 on file with FSA certifying compliance on or before the June 1 prior to the beginning of the subsequent reinsurance year (July 1), unless otherwise exempted. RMA will contact FSA to determine compliance with HELC and WC provisions and the filing of Form AD-1026 prior to the beginning of a reinsurance year, which begins on July 1. If the producer is not in compliance and is not exempt, the producer will be ineligible for premium subsidy for all crops with a sales closing date between the following July 1 through the next June 30.

7. Affiliated Persons

Any affiliated person of a producer requesting benefits subject to HELC and WC provisions must also be in compliance with those provisions. Ineligibility of a producer will also apply to affiliated persons of that producer. If an affiliated person has a farming interest (as owner, operator, or other producer on any farm), the affiliated person must also file Form AD-1026 certifying compliance with HELC and WC provisions in order for the producer requesting benefits to be eligible.

Use this table to determine affiliated persons who must be in compliance with HELC and WC provisions and file Form AD-1026. If you are unsure about an affiliated person determination, please contact FSA at your local USDA Service Center for assistance.

**IMPORTANT NOTICE:**
Signature on Form AD-1026 gives representatives of USDA authorization to enter upon and inspect all farms in which the producer in Part A of Form AD-1026 has an interest for the purpose of confirming HELC and WC compliance.

| NOTE: The following statement is made in accordance with the Privacy Act of 1974 (5 U.S.C. 552a, et seq.). The authority for requesting the information identified on this form is 7 CFR Part 12, the Food Security Act of 1985 (Pub. L. 99-198), and the Agricultural Act of 2014 (Pub. L. 113-79). The information will be used to certify compliance with HELC and WC provisions and to determine producer eligibility to participate in and receive benefits under programs administered by USDA agencies. The information collected on this form may be disclosed to other Federal, State, Local government agencies, Tribal agencies, and nongovernmental entities that have been authorized access to the information by statute or regulation and/or as described in applicable Routine Uses identified in the System of Records Notice for USDA/RS2 Farm Records File (Automated) and USDA/RS2-14, Applicant/Recipient. Providing the requested information is voluntary. However, failure to furnish the requested information will result in a determination of producer ineligibility to participate in and receive benefits under programs administered by USDA agencies.

This information collection is exempted from the Paperwork Reduction Act as specified in the Agricultural Act of 2014 (Pub. L. 113-79, Title II, Subtitle G. Funding and Administration). The provisions of appropriate criminal and civil fraud, privacy, and other statutes may be applicable to the information provided. RETURN THE COMPLETED FORM AD-1026 TO YOUR COUNTY FARM SERVICE AGENCY (FSA) OFFICE.

The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers, employees, and applicants for employment on the basis of race, color, national origin, sex, age, disability, creed or ancestry, former or present military service,orda affiliation or any other status protected by applicable federal, state, or local law.

If you believe you have been discriminated against in any USDA program, file a complaint at http://www.ascr.usda.gov/complaint_filing_cust.html, or call (866) 632-9992 (Toll-free) to request more information on filing a complaint, or write to USDA, USDA Target Center, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 (this list of contact information is not intended to create a legal obligation).

You may also send a written complaint or letter to: USDA, Office of Civil Rights, 1401 Independence Avenue, S.W., Washington, D.C. 20250-9410; by fax (202) 690-7442; or email at program.intake@usda.gov. USDA is an equal opportunity provider and employer.

Registered People’s Gardens
- Overcoming Challenges: Traditional vs Urban

Figure E2. Slides six through twelve of PowerPoint on Urban Agriculture Needs Assessment and NRCS Employee Workflow Development
Definitions – USDA - NRCS

Urban – modifier used when land is managed for food and/or fiber production within a landscape predominated by residential, commercial, industrial and transportation uses.

Small Farm – a farm or ranch that grosses less than $250,000 in farm sales annually.

Urban Definition

- USDA has emphasized the desire to remain as inclusive as possible and to minimize the chance of excluding key stakeholders or historically underserved communities.
- Thus, to date, USDA has decided not to define “urban ag”

Objectives

Objective 1. Gather data through surveys and forums to inform the development of a workflow for NRCS employees on urban and small-scale assistance.

Objective 2. Create a workflow for NRCS employees to use as a guide to best provide assistance to urban and small acreage farmers.

Targeted Survey Areas
