What **information literacy skills** do faculty at **your institution** say students lack?

libguides.unco.edu/bridgethegap
Faculty interviewed at the University of Rochester felt students could find information but that they struggled with evaluating and interpreting sources, a tendency to summarize rather than analyze, and plagiarism (Alvarez & Dimmock, 2007).
Student Experience

Roughly a third of college students surveyed by *Project Information Literacy* report **difficulty in reading, pulling together, and citing the sources** they’ve found (Head & Eisenberg, 2010).
Student Experience

Most had written only one “real research paper” in high school (p. 12) and many had never seen or read peer-reviewed journal articles before college. (Head, 2013).
What we want these assignments to do

--**teach** students the IL skills that other faculty are noticing they lack: reading academic sources, source synthesis, and annotation writing.

--**demystify** academic language and expectations and make assignment demands clearer and more transparent in their goals.

--**empower** students with assignments that reinforce practical, repeatable, no-surprises IL skills.

Annotated Source Sheets

libguides.unco.edu/bridgethegap
Annotated Source Sheets

What is the goal?

--want students to work on annotations throughout the semester, **not wait until last minute** to write bibliographies

--want students to better understand mechanics of annotations to **help reduce plagiarism**
Source Sheet for Articles & Online Publications

Your name: ____________________________

This sheet provides the basic outline for gathering the information you’ll need to properly write an evaluative annotation. Complete one of these forms for each of the online publications (news articles, PDFs, documents, and government reports) you find and use.

For more info on formatting APA citations, see: http://libguides.unco.edu/apa

**Part the First:** Information about the item you selected

**Author or authors:**

____________________________________

**Corporate or Government author (if applicable):**

____________________________________

**Date the item was published:**

____________________________________

**Title of the article, web document, or report:**

____________________________________

**Title of the journal this article was published in, or, if this is a newspaper article, write the title of the newspaper in which it was published:**

____________________________________

**DOI or web site retrieved from (Do not write Summon: Write the database name):**

____________________________________

**TIPS on APA Formatting**

Remember to end each section with a period.

**Authors:** For one author, use the author’s last name and first initial. Example: Hudson, J.

For articles with two authors, follow the same format, using first initial only, separating authors with an “&” (ampersand). Example: Timberlake, J. & Lion, S.

**Date:** Write the date as (Year, Month Day). If there isn’t a date listed, use (n.d.) for no date or just list the year. Example: (2006, March 15).

**Article titles:** Only capitalize the beginnings of sentences and proper nouns, not every word in the title. Examples: The politics of “fracking”, regulating natural gas drilling practices in Colorado and Texas. Relationship between Facebook use and problematic Internet use among college students.

**Newspaper titles** should be capitalized and italicized. If a newspaper has a common name, include information necessary to locate the source in square brackets after the title. Examples: The New York Times. The Mirror [Greely, CO].

**Retrieved from** should include the full web address for the newspaper, web document or report. If the article has a DOI (digital object identifier), use that instead. Examples:

doi:10.1080/17404622.2013.700721
http://www.nytimes.com/
**Part the Second:** Describe the item in detail so your audience knows what it's about.

Annotations are usually composed of three or more sentences about a particular source. Writing this is easier than it might appear.

**Sentence #1:** What is it about?

Pro Tip: Avoid using the first person (words like I, me, you, etc.) here. Be as **objective** as possible, and **specific** describe the studies made, the affected or interested parties, and what was revealed through the research. Use sample data and selected quotes to back up your points.

</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

**Sentence #2:** What **conclusions** are reached, and how does the author **support** them? Give an **example** from the data presented that best illustrates the value of this source.

Pro Tip: Be as **objective** as possible, and **specific** about its findings so that your audience understands its value.

<p>| |</p>

You've just given yourself a head start to write an entry in an annotated bibliography. The rest is mostly formatting. Congrats!
Annotated Source Sheets

How is it used?

--First use sets **framework for expectations**

--Students **peer review** their writing & ask questions on clarity of the content and source

--Sentences combined into paragraphs; bibliographic info **formatted to APA**

--Students free to return to sheets at any point for **guidance and clarity**; allow continued use if APA citations also included
Annotated Source Sheets

Use in library one-shots & other courses

--PSCI 110 Global Issues

--ENG 123 College Research Paper

--Nutrition & Dietetics program are adopting

--LIB 150, 151, & 160
Summary Table
Summary Table

What is the goal?

--give students strategies for **making sense of peer-reviewed articles**

--introduce students to **the difference between summary and synthesis**
Parts of a research study

How to understand scholarly, peer-reviewed articles.

</table>

**Abstract**

Incivility occurs frequently in college classrooms. However, recommendations to teachers for handling student incivility are based on anecdotal evidence. To address this gap in knowledge, students (N = 150) in the current study assessed the effectiveness of several teacher responses to classroom incivility. Behaviors of incivility, described in vignettes, varied in discourtesy and harmfulness. Students perceived ignoring incivility as the only ineffective response. Direct confrontation of uncivil students in class or outside of class received the highest overall ratings of effectiveness, and students tended to see immediate reduction in disruptive behavior when teachers were calibrated. These results suggest that students perceive teachers having a responsibility to manage classroom incivility, especially when it disrupts classroom order.

**Keywords**

classroom management, incivility, classroom bias

St. Cloud State University |

Classroom incivility is a major concern in higher education today. Yet little study has been done of student perceptions of behavior in the classroom. Based on a survey of 316 students at a Midwest public university, the present study provides useful information to faculty and administrators about the behaviors students find most uncivil and how frequently they are experiencing these behaviors. In general, it appears that students are experiencing a fair amount of at least moderately uncivil behavior in their classes. These results have implications for how faculty and administrators develop policies and guidelines for students with appropriate behavior.

**Keywords**

educational environments, research, student behavior, teacher-student relationship

---

Over the past decade, much has been written about the decline of civil society in the U.S.—everything from the loss of civility in the workplace to the absence of manners on mass transit (Jaccoby 1999; Landay 2007). Higher education has focused primarily on declining civility in the classroom (Alexander-Snow 2004; Dechter 2007; Feldman 2001; Scheckel 1994). Discussions about classroom incivility are often focused on the need to curb incivility by students, because such behavior can interfere with classroom learning, harm the learning environment, and even weaken students’ respect for and attachment to their institutions (Feldman 2001; Hirsch 1986; Rehling 2004; Morrisette 2001). There are also clear indications that students themselves are tired of disruptive behavior and desire a more civil classroom (Bentley 2000; Carlson 1999).

To deal with such matters, institutions of higher education have begun to create new student programs, codes of conduct, and other measures aimed at educating students about appropriate behavior and informing them of the possible consequences of incivility (Duchett 2007; Young 2003).

In discussions of classroom incivility, professors are repeatedly advised to include specific expectations for classroom conduct in their syllabus and to address classroom conduct early in the course (Alexander-Snow 2004; Carlson 1999; Morrisette 2001; Nissen 1998; Scheckel 1994). When specific behaviors by students are identified through the discussions, the behaviors discussed are typically drawn from reports by faculty about problematic behaviors (Ananda 1999; Carlson 1999). Yet, classroom incivility is a slippery concept. What one faculty member may experience as problematic in a classroom may not bother another. What faculty may experience as troublesome and see as irritating with classroom learning may not mirror the experience of the students they teach. One faculty member may not mind if students quietly eat their lunch or sip coffee during class, while another may find such behavior annoying. Students may notice the student sleeping in the back row as interrupting their learning, but a faculty member may see it as very uncivil. One step toward better understanding the dynamics of incivility in the classroom is to focus on student perceptions of the issue.

To date, what little has been written about students’ perceptions of classroom incivility has been anecdotal (Boice 1996), discipline-specific (Clark & Spigner 2007), or done by specific institutions for their internal distribution and use (Young, 2003). There is no data on scale-published study about students’ experience of classroom incivility. The purpose of the present study is to fill this gap and provide information about students’ perceptions of incivility in the classroom. Specifically, the study aims to answer two questions: What classroom behaviors do students find most uncivil? And which potentially uncivil behaviors do students observe most frequently in their classes?
## Reading a Scholarly Journal Article

Complete the table for the journal article you’ve been given. The first row has been completed as an example. When you are done, share your findings with your partner(s).

<table>
<thead>
<tr>
<th>Article Citation</th>
<th>Research Question or Hypothesis</th>
<th>Key Findings (answer to research question)</th>
<th>Participants/Data Sources</th>
<th>How was the study conducted?</th>
<th>Study Concerns</th>
</tr>
</thead>
<tbody>
<tr>
<td>McKinne, M., &amp; Martin, B. N. (2010). Higher education faculty and student perceptions of classroom incivility. <em>Journal of College and Character</em>, 11(2), 5-17.</td>
<td>Is there a difference between faculty and student perceptions of the types and frequency of classroom incivility? Is there a difference in faculty and student perceptions of the effectiveness of a teacher’s interpersonal and pedagogical skills and the amount of perceived incivility?</td>
<td>Faculty perceived more behaviors as uncivil than students. For example, faculty view being unprepared for class as uncivil behavior while students did not. Students perceived some uncivil behaviors (groans, sarcasm, side conversations, and cell phones) more frequently than faculty. Both faculty and students agreed that the behavior and actions of the instructor had a greater impact on classroom incivility than student actions. The need for instructors to show respect was a recurring theme in both student and faculty responses.</td>
<td>197 students from 4 Midwestern Universities (education and psychology majors) 52 faculty from 4 Midwestern Universities</td>
<td>Complete a survey on their perceptions of classroom incivility. 10 students and 10 faculty then completed a follow-up questionnaire on the relationship between instructor behavior and incivility.</td>
<td></td>
</tr>
</tbody>
</table>
**Synthesizing Multiple Sources**

Work with your partner to look for similarities and differences between the three articles. Together, write a short paragraph synthesizing the sources that addresses the following questions:

*To what extent do students and faculty view classroom incivility as a problem? What can be done to address classroom incivility?*

Paragraphs can be typed or (legibly) handwritten. Include both of your names on your paragraph. Don’t take text straight from the article. Write it in your own words. Don’t worry about citing sources for now; we’ll talk about that later.

**EXAMPLE:**

<table>
<thead>
<tr>
<th><strong>SINGLE ARTICLE SUMMARY</strong></th>
<th><strong>MULTIPLE ARTICLE SYNTHESIS</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>This investigation examined perceptions of undergraduate students and faculty of incidents of classroom incivility; of the perceived effectiveness of faculty in circumventing classroom incivility; and of the effectiveness of polices addressing incivility. Findings revealed there is a statistically significant difference between faculty and student perceptions of the type and frequency of incidents of classroom incivility. Findings also revealed a difference between faculty and students as to whether a teacher’s interpersonal/pedagogical skill could affect classroom incivility. Implications include a dialogue between faculty and students regarding classroom incivility, a refinement of pedagogy/interpersonal skills for the professorate, and development of policies.</td>
<td>Both students and faculty perceive classroom incivility be problematic but they have differing views on the problem. Thus there needs to be a dialogue between professors and students to define properly classroom incivility. There is strong debate and discrepancy as to what exactly constitutes acts of incivility (Hernandez &amp; Fister, 2001; Meyers, 2003; Seidman, 2005; Young, 2003). Moreover, this conversation should not be a “global” event, meaning the dialogue would not be best served in a campus-wide workshop or symposium (Twale &amp; DeLuca, 2008). These conversations need to be at the “local” level, in the classrooms of individual instructors. Bruffee (1999) underscored the importance of collaboration in higher education. Collaboration between faculty and students would be a powerful tool to address classroom incivility. Additionally, the literature supports the concept that faculty must address classroom incivility head on and not shirk from such responsibilities (Braxton &amp; Mann, 2004; Hannah, 2006).</td>
</tr>
</tbody>
</table>
