Boston, Mass., June 15, 1903.

Pres. William J. Kerr,

Dear Sir:

We should like to call your attention to our facilities for filling teachers' positions in universities and colleges; also in schools of engineering, agriculture and mechanic arts. The accompanying Bulletin gives a general idea of our resources; the accompanying Map Circular, of the scope of our work. (See page 3)

We have a very extensive acquaintance with educators, and we have co-operating branches in well distributed cities. This makes it easy to find the right candidate to meet difficult requirements.

The Manager of our Boston Department of Science and Technical teachers was formerly a college professor, interested in Mathematical, Physical and Technical work. Frequent calls for teachers in this department, combined with visits to the institutions themselves, have enabled him to judge accurately concerning both qualifications and requirements.

It is a cardinal principle with us to carry out faithfully the known wishes of employers. We have had long experience in executing commissions of delicate responsibility; and we mean never to fail in being alert, energetic and trustworthy. It costs nothing to consult us. Our services are freely given, and no obligation is created thereby. If teachers are needed by you, we shall be pleased to recommend.

Very truly yours,  
Everett O. Fisk & Co., Boston, Mass.

## LIST OF TEACHERS

The teachers described in the following lists are nearly all specialists. We have many other equally desirable candidates, but these are thought to indicate sufficiently the quality of our resources. Teachers fitted for general educational work and grade schools are not included. High character, good personality, and successful experience are presupposed.

In the majority of cases candidates are teaching in positions similar to those sought. The salaries expected are stated. Under favorable conditions smaller salaries might be accepted.
