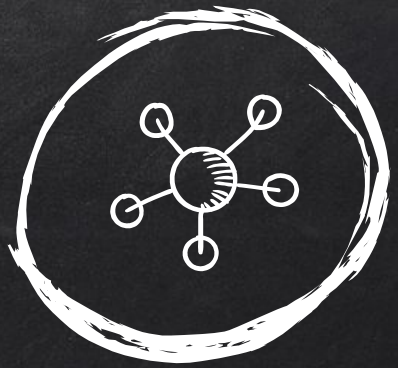
HELLO!

I am working on [insert project here]*

I wonder if anyone else has done this before?

* **Migrating** data
* **Claiming** serials
* **Cleaning** up records
* **Documenting** my work
* **Reconciling** data
* **Managing** a library project
* **Learning** to code
* **Developing** assessment methods



Someone, Somewhere...

...is doing (almost) the same thing you are.

Community

So, what if we shared our knowledge?

Introducing....

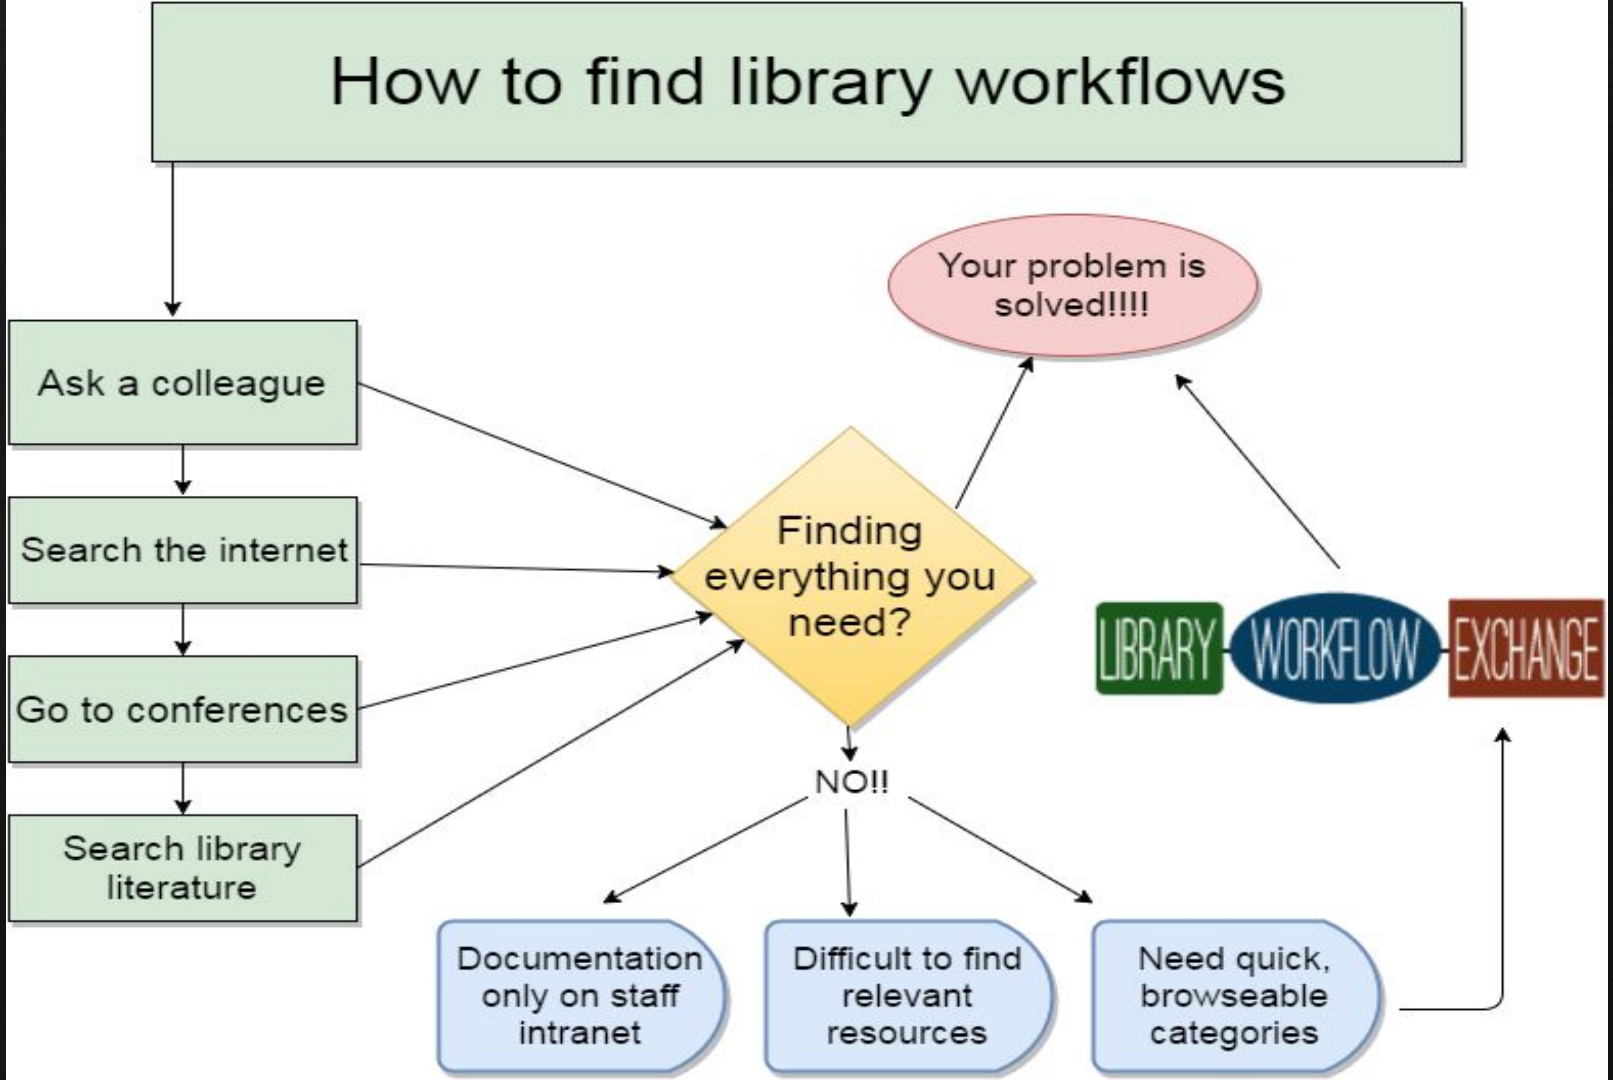
How to find library workflows



Workflows and documentation exist in many places.

- Staff intranets
- Blog posts
- Published articles
- Library websites
- Github

From Digital Commons to OCLC: A Tailored Approach for Harvesting and Transforming ETD Metadata into High-Quality Records

Posted on October 7, 2016 by Liz

by Marielle Veve, University of North Florida The following paper presents an extension of the semi-automated approach originally created by Deng and Reese, but customized and adapted to address the particular needs of the Digital Commons community and updated to integrate the latest Resource Description & Access (RDA) content standards for ETDs. Advantages and disadvantages…

Working with Linked Data in MarcEdit

Posted on September 29, 2016 by Liz

by the University Library of the University of Illinois at Urbana-Champaign

MarcEdit's linked data tool is somewhat experimental, but it allows users to automatically generate links to resolve access points from the LC or OCLC VIAF authority records. Using this tool, it is possible to append linked data to 1XX, 6XX, and 7XX fields. What follows is a brief demonstration of this functionality and a results comparison based on different options selected.

This workflow is one of many MarcEdit processes that are outlined in a LibGuide produced by the University of Illinois at Urbana-Champaign. The processes are linked individually in the Library Workflow Exchange to facilitate discovery of specific step-by-step workflows.

Available at this URL: http://guides.library.illinois.edu/c.php?g=463460&p=3168070

Impact/Benefits

- Centralized knowledgebase
- Rich searching
- Updates via social media
- Improves Google PageRank of original sites
- Flexible, with room to grow
