Academic Heraldry

The history of academic heraldry reaches back into the early days of the university. A statute of 1321 required that all "Doctors, Licentiates, and Bachelors" of the University of Coimbra wear gowns. In England, in the fourteenth century, the statutes of certain colleges forbade "excess in apparel" and prescribed the wearing of a long gown, which may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods were used to cover the head until later replaced by the skull cap and eventually by academic caps. Both Cambridge and Oxford have made academic dress a matter of university control to the inclusion of even its minor details; and in Laudian days in Oxford, any tailor who changed the authorized design "even by a nail's breadth" was punished by the vice-chancellor of the University. When American colleges and universities desired to adopt some suitable system of academic apparel, it seemed best to agree on a system which all might follow. Accordingly, there was held on May 16, 1895, at Columbia University, a conference of representatives of the boards of various interested institutions. From that meeting came a code of academic dress for the colleges and universities of the United States, which most institutions of higher learning have adopted.

Gowns

The academic gown for the bachelors degree has pointed sleeves and is designed to be worn closed. The gown for the masters degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut, and the front part has an arc cut away. The gown is so designed to be worn open or closed. The gown for the doctors degree has bell-shaped sleeves and may be worn open or closed.

Colors

For all academic purposes, including trimmings of doctoral gowns, edging of hoods, and tassels of caps, the colors associated with the different academic disciplines are as follows:

Agriculture	Maize
Business	Drab
Education	Light Blue
Family Life	Maroon
Engineering	Orange
Humanities, Arts and Social Sciences	White
Natural Resources	Russett

Science	Gold-Yellow
School of Graduate Studies (EdD, PhD)	Gold

The white ribbon with the Greek Key on the robe of a graduate identifies an inductee into Phi Kappa Phi, the National Scholastic Society. Those wearing gray collars and a medallion are Mortar Board Senior Honor Society members, the National and Academic & Service Society. A gold braided cord draped over the cowl will distinguish a graduate of Honors.

Hoods

Academic hoods are worn by recipients of advanced degrees. The master degree hoods are three-and-one-half feet in length and are lined with the official color or colors of the college or university conferring the degree, which at Utah State University are navy blue and white, displayed in a heraldic chevron. The doctoral hood consists of a larger and longer assemblage of institutional color draped over the recipient's shoulders and falling well down the back. The binding or edging of the hoods is of velvet or velveteen, three inches wide and five inches wide for the masters and doctors degree, respectively.

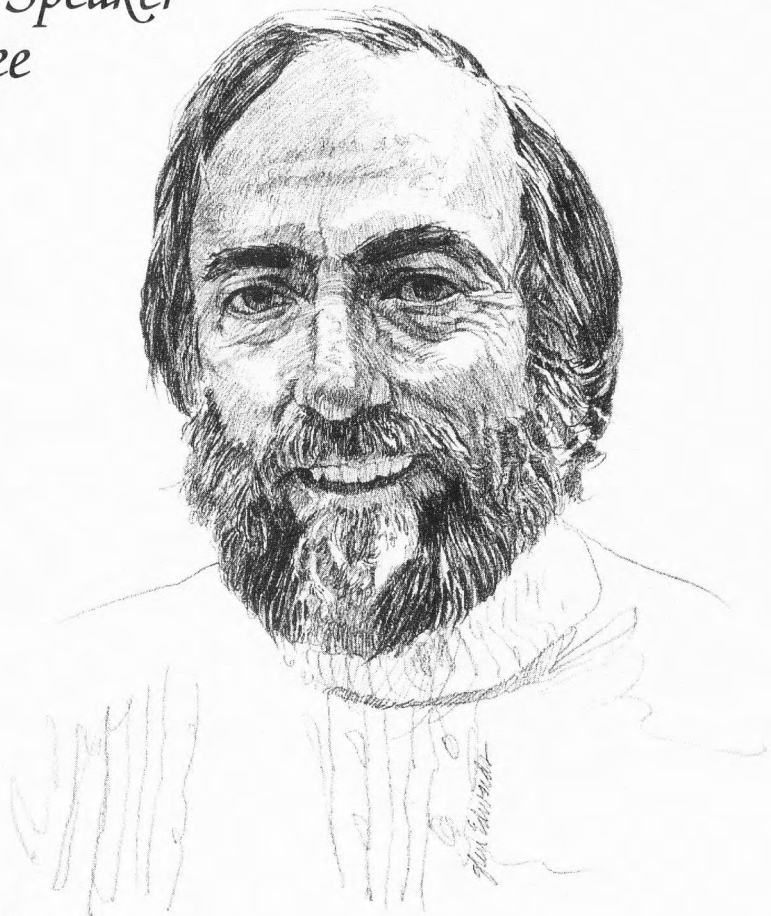

Caps

Academic caps come in two forms: the traditional mortarboard (from Oxford), a square cap; and a soft cap which resembles an oversized beret (the Cambridge model). The mortarboard, used by Utah State University, is worn with a tassel. Black tassels designate any degree; colored tassels designate major field of learning, and gold tassels indicate doctors and governing officials of institutions.

Academic Procession

The commencement procession originates at Old Main and the line of march extends out the East Wing across the quad to the Library then north to the Spectrum. The procession is composed of three divisions: (1) color guard, University president, Regents and the Board of Trustees, administrative officers, and special guests; (2) the faculty; and (3) candidates for degrees, with candidates for advanced degrees in the lead and others in groups according to the degrees for which they are candidates. The procession will stop at the tunnel entrance to the Spectrum, the first two divisions dividing so that the candidates for graduation pass between them and enter the hall first.

Honorary Degree*

Kip S. Thorne

*has made the physical universe more understandable for all of us. He is one of the preeminent theoretical physicists in the world. □ The son of former USU professors, D. Wynne and Alison Thorne, Kip received his Bachelor's degree in Physics from the California Institute of Technology 1962 and his PhD from Princeton University, a mere three years later in 1965. □ Thorne was a professor of theoretical physics at the California Institute of Technology from 1970 through 1991 and an adjunct professor at the University of Utah from 1971 through 1991. He currently is the Feynman Professor of theoretical Physics at The California Institute of Technology in Pasadena. □ His reputation stretches worldwide. Thorne has been a visiting lecturer in Italy, France, Canada, Germany, Chile and the former Soviet Union. □ He also holds honorary degrees from Illinois College and Moscow University and is a former O.C. Tanner Lecturer in Humanities at USU in 1994. □ For his continuing leadership and passion for scientific inquiry, Utah State University now confers upon Kip S. Thorne the honorary degree, **Doctor of Science**.*

Honorary Degree

William E. Leftwich, III

*oversees the equal opportunity policies of the Department of Defense worldwide. His efforts ensure equality of opportunity and treatment for all armed forces personnel regardless of race, religion, color, sex, age or national origin. □ His professional career has exhibited a deep respect for the rights and worth of each individual who has come under his leadership. During his tenure as superintendent of employment for the Chicago Park District, he was responsible for the well being of 7,500 employees, acted as affirmative action officer, oversaw compensation and benefits programs, developed and implemented the district's affirmative action/workplace diversity plan and served as the district's human rights officer and secretary to the district's personnel board. □ During his six years as principal advisor to the U.S. Department of Defense in matters of equality and fairness, he has labored to value and capitalize on diversity, to bring out each individual's strengths and maximize each person's contribution to common goals, and to ensure that each individual is respected. □ He serves as the Department of Defense project officer on the White House committee to develop and report on activities in support of "One America in the 21st Century: The President's Initiative on Race." He personally answered President Clinton's call to conduct roundtable discussions about race relations and has hosted nearly 50 discussions. □ For his efforts to unite all Americans, Utah State University is proud to bestow on William E. Leftwich, III, the honorary degree, **Doctor of Humanities**.*

Honorary Degree

Ray Marshall

has had an astonishingly productive career both as a scholar and as a public servant. □ He is author of more than 30 books and innumerable other publications dealing with labor and economic policy. Most recently, he held the Audre and Bernard Rapoport Centennial Chair in Economics and Public Affairs at the University of Texas at Austin. Prior to that he held professorships at the University of Kentucky, Louisiana State University, the University of Mississippi, and San Francisco State University. His record of scholarly accomplishments is truly remarkable. □ But he also has had a significant impact as a public servant. From 1977 through 1981, he was this nation's Secretary of Labor under the Carter administration. In this capacity, he administered laws and programs in such areas as employment and training, labor statistics, labor-management relations and other matters affecting the nation's work force. He has served on and chaired numerous boards and committees that dealt with international economics and labor relations. Currently, he chairs the board of trustees of the National Center on Education and the Economy, whose educational standards program is revolutionizing K-12 education in many of the nation's inner cities. He also is a board member of the Economic Policy Institute and a member of the Citizens' Commission on Civil Rights. □ For his life-long commitment to professional expertise and community service, Utah State University is proud to bestow this honorary degree, **Doctor of Economics**.

Honorary Degree

Donald B. Olsen's

career has been a metamorphosis from respected country veterinarian to one of the world's foremost authorities on the creation and implantation of artificial organs. □ Dr. Olsen received a bachelor's degree in animal nutrition and chemistry from the Utah Agricultural College and his doctor of veterinary medicine degree from Colorado A&M University. □ He returned to Cache Valley with the career goals, as he puts it, of "raising a family and Holstein cattle." Doc Olsen became a well-liked and respected veterinarian whose skills were highly prized in the dairy industry. □ In 1963 he left the valley to serve as Extension veterinarian at the University of Nevada. It was there that he became acquainted with the work of scientists working to develop artificial organs. He was the first in the world to successfully implant an artificial heart in a calf. □ He went to work at the University of Utah's Artificial Heart Institute and carried out more successful artificial heart implants in cattle. Doctor Olsen's growing expertise led one of his former students, Dr. William DeVries, to ask him to serve as the primary surgical consultant on the first implantation of an artificial heart in a human being. Since that day, he has been at the epicenter of research on artificial organs. □ He retired from the University of Utah's faculty last year, but his research continues to push the bounds of the world's knowledge. He remains involved in artificial heart research as president of the Utah Artificial Heart Institute, chairman of the board of Medquest, Incorporated and president of CardioWest. □ For his dedication to advancing the frontiers of medicine and his efforts to help others do more than just dream of living longer, healthier lives, Utah State University is proud to confer on Donald B. Olsen the honorary degree, **Doctor of Agriculture.**

Honorary Degree

Alison Comish Thorne

has been an agent of social change and economic justice for more than seven decades. □ She provides the model for lively intellectual life—as the first woman to receive a PhD in Consumption Economics from Iowa State University, as the mother of five youngsters who set aside seven hours each day to read in order to expand the limits that social and historical circumstances placed upon her life and to inspire her children as a champion of the status of women and the poor. □ Alison is the product of an era where few women achieved graduate degrees, and anti-nepotism laws prevented her from following the traditional scholarly path of teaching and publishing. Yet, instead of becoming resentful, she worked in all possible ways to improve the situation for other women. Her influence is strong in the four academic departments in which she taught, in the Logan Board of Education, Cache Migrant Council, Community Action Programs, the Governor's Commission on the Status of Women in Utah, the State Building Board, the State Department of Employment Security, the Governor's Committee on Children and Youth, and the Women's Center for Lifelong Learning, to name a few. □ Through her fortitude, quiet determination and unceasing quest for knowledge, Alison has been a powerful example of a life that combines caring for family with a larger sense of active caring—for the welfare of local and larger communities, for the disadvantaged, for her students. □ For a life of leadership, inspiration and service, Utah State University is proud to bestow upon Alison Comish Thorne the honorary degree, **Doctor of Family and Consumer Science.**

D. Wynne Thorne Research Awards

Richard S. Krannich

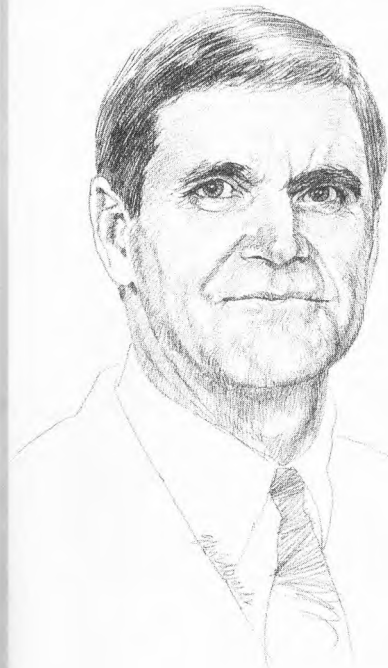

is Professor of Sociology and Forest Resources and Director of the Institute for Social Science Research on Natural Resources. Dr. Krannich's research examines community changes associated with natural resource use and development. He investigates how resource-use impacts the well-being of people living in rural communities. □ Dr. Krannich has been an influential researcher on public land and resource management issues. His work with the Utah Division of Wildlife Resources examines decision-making processes seeking to balance biological issues with public attitudes regarding land and resource use. □ Dr. Krannich's research on social dimensions of hazardous waste management spells out the role of various interest groups in the debate over hazardous waste siting in the Western U.S. He recently coauthored **Hazardous Wastes in Rural America**, a work that frames the debates over economic development and health concerns in a sociological context. □ On the basis of his reputation, he has been appointed to key consulting and policy positions. He was selected to serve on President Clinton's Forest Ecosystem Management Assessment Team. □ Dr. Krannich has opened numerous research opportunities for his graduate students. He has authored some 60 peer-reviewed articles in professional journals and book chapters; well over 20 of those were coauthored with his graduate students. □ For his outstanding contributions to research in rural social issues, Utah State University is proud to award Richard S. Krannich the 2000 D. Wynne Thorne Research Award.

University Outstanding Graduate Mentor Award

Brent C. Miller

is a professor and head of the Family and Human Development Department and a scholar who nurtures many graduate students and engages his own students in intensive, collegial learning experiences. □ Because graduate study is relatively less structured, his students especially appreciate Dr. Miller's regular planning with them, advising about program requirements and time lines, and thinking through their future professional decisions. □ Graduate students most closely associated with Dr. Miller become team members who collaboratively conduct and disseminate research through presentations and scholarly publications. His federally funded research provides many opportunities for students to present at national meetings, and Dr. Miller has published over 40 journal articles with graduate student coauthors. □ Dr. Miller strongly believes in the value of good writing. He is well known among students for his constructive editing of their written work. His own graduate students benefit from his liberal use of red pens. As coauthors, his students learn to evaluate opportunities for publishing their work, to accept manuscript rejection and revisions, and to appreciate their contributions to the scholarly literature. □ Although he is busy with national committees and administrative duties at USU, he has hosted social events and dinners at professional meetings for graduates of the Family and Human Development graduate programs. Among his former graduate students are senior research scientists, agency directors, and more than a dozen faculty members. □ Utah State University is proud to honor Brent C. Miller with the 2000 University Outstanding Graduate Mentor Award.

E. G. Peterson Extension Award

F. Dean Miner

has served Utah State University for 14 years. He is currently an Associate Professor serving as County Director in the Utah County Extension office. He earned his MS in Agricultural Economics/Natural Resources from Brigham Young University in 1986. Dean is currently the Vice-Chair of the Western Region Extension Programs Committee of the National Association of County Agricultural Agents. In this role, he provides national leadership for award programs relating many facets of agriculture. He is extremely innovative in developing programs to address critical issues. □ Through Dean's work on in-house composting of poultry waste, he saved cooperators over \$12,000 annually in pesticide used for fly control. His work has been used by growers in Utah and in at least seven other states. One of Dean's professional articles was published in the **Journal of Applied Poultry Research**. □ Sprayer Calibration is another example of a successful program. This program improves environmental quality while reducing costs to producers. □ PowerPay is a computer program developed to help consumers construct debt reduction plans. It is estimated that 23,603 of these families saved a total of \$41.6 million in interest costs. This program has been used in 37 Land Grant Universities and 106 Military Bases around the world. Seven states are currently using PowerPay in their County Extension offices. □ Since 1995, Dean has made it possible for approximately 20,000 youth to visit two farms in Utah County. The program gives youth in the 2nd and 3rd grades a chance to learn more about agriculture and information on raising animals. □ Dean Miner's programs definitely follow the mission of Utah State University in addressing critical issues in Utah County that can be applied in many other areas of the state, nation, and world. □ Utah State University is pleased to award the 2000 E. G. Peterson Extension Award to F. Dean Miner, Jr.

Eldon J. Gardner Teaching Award

Shelley K. Lindauer

represents the highest standards of excellence of an educator. She is a stimulating, challenging, gifted professor who is dedicated in all ways to the development of her students. □ Dr. Lindauer began her career at Utah State University in 1982 after completing her PhD degree at Oregon State University. She has served continuously since 1984 as Director of the Adele and Dale Young Child Development Laboratory within the Department of Family and Human Development. Under her leadership and administration, the Child Development Laboratory has become a model for other university programs wishing to integrate early childhood education research, teaching and community service through an on-site university child development laboratory. □ Each semester Shelley supervises over 50 student teachers, both undergraduate and graduate, and personally sees to the welfare and development of over 125 preschoolers. Her dedication to student development is truly remarkable. She has keen insight into "what it takes" to foster growth in students and is tireless in her efforts to do so. □ She has the astounding gift of being able to present theoretical esoterics in a comfortable, understandable and accessible fashion. Because she is a fine and respected scholar and has a keen grasp of the field, she presents even the hardest concepts in a way that students not only understand them but operationalize them in their lives as professionals. □ Shelley is a master teacher. She is always well prepared, cheerful and eager to deal with students, parents and children. All who know her, love and admire her. Her students leave Utah State able to make a difference and to improve the quality of life for countless children and parents. □ She is a fine role-model for students and colleagues alike. Because of her example, we are all more conscientious and sensitive teachers. □ Utah State University is proud to honor Shelley L. Knudsen Lindauer the 2000 Eldon J. Gardner Teaching Award.

Teaching Excellence Awards

Through an extensive selection process involving both students and faculty in the various academic colleges, eight members of the faculty have been designated for special recognition for excellence in teaching representing the eight colleges of the University: Agriculture; Business; Education; Engineering; Family Life; Humanities, Arts and Social Sciences; Natural Resources; and Science. From among the eight, The Eldon J. Gardner Teaching Award recipient is chosen; the seven remaining follow:

College of Agriculture

Gary Straquadine

currently serves as the Department Head for Agricultural Systems Technology and Education, one of five departments found in the College of Agriculture. Dr. Straquadine has completed 11 years of service to Utah State University. He has taught the majority of teacher preparation courses in the department, including the supervision of more than 100 student teachers in the last decade. He implemented the College of Agriculture technical writing course in 1988 and a Humanity in the Food Web course in 1999. His graduate teaching responsibilities include courses in agricultural extension principles and practices, program planning and evaluation, and research methods. Dr. Straquadine teaches by example, with enthusiasm, and with a focus on learning, not just content. Besides his administrative duties as a department head, Dr. Straquadine also advises all levels and types of students and conducts an active research program in agricultural education policies, standards, and competencies. His curriculum development efforts are utilized daily throughout Utah Agricultural Education. He has been awarded Teacher of the Year in the College of Agriculture in 1992 and 1998 and Advisor of the Year for the entire university in 1993. In 1999 Dr. Straquadine was named a Teaching Fellow by the National Association of Colleges and Teachers of Agriculture.

College of Business

Gaylen Chandler

is an Associate Professor of Management and Human Resources in the MHR Department and an internationally-recognized scholar in entrepreneurship. Gayle has been at USU since 1990 and has clearly made a mark in students' lives, the department, the MHR programs, and the international entrepreneurship community. He excels in his teaching, his research and his service to the department and university. He serves also as an excellent mentor and research collaborator with his colleagues and junior faculty in the department. Gaylen is also appreciated for his friendly presence, his humor, and his personableness. He brings visibility to USU through his regular participation in a grouping in Sweden of the top world scholars in entrepreneurship.

College of Education

Dennis Nelson

has served as an exemplary teacher, mentor, and trusted faculty member in the Health, Physical Education, and Recreation Department since 1986. He has been the curriculum chair of the Parks and Recreation Administration Program, been on the Boy Scouts of America National Curriculum Committee and Camp School Staff and has designed and restructured course curriculums and programs. His program at USU is one of the smallest nationally accredited programs in North America. He demonstrates consistency, creativity, and commitment in all areas of teaching endeavors. Dr. Nelson strives to maintain a high level of student involvement in his classes and expects the best from each and every student with stimulating projects and course assignments which challenge each student. He teaches his students to look "outside the box" in finding new and innovative ways to approach problems and develop programs.

College of Engineering

Cynthia Furse

joined the Electrical and Computer Engineering Department as an assistant professor in 1997, where she was tasked with developing an entirely new graduate and undergraduate curriculum in electromagnetic (EM) and wireless communication. EM, traditionally among the most difficult and "feared" subjects in ECE, has now become one of the most popular. Students find that EM is truly "Exciting and Magical," and the courses are overflowing. Students actively delve into electromagnetic research with Dr. Furse, through in-class, senior design, and graduate thesis projects. In addition, she is the faculty advisor for the Society of Women Engineers, which hosted the Western Region SWE Student Conference in 1998, a member of the IEEE Antennas and Propagation Education Committee, working to provide financial support for students studying electromagnetic, and an active participant in K-12 outreach programs, where she and her students assist Utah teachers with engineering-oriented science projects. Dr. Furse has been the ECE Teacher of the year two years in a row, and is known by her students for her excitement, ready smile, and attitude that "Engineering is Fun!"

College of Humanities, Arts and Social Sciences

Brian McCuskey

became a part of the Department of English in 1995, having earned a PhD from the University of Michigan. His teaching and research interests center on British literature of the nineteenth century, with primary emphasis on the Victorian novel, but he also teaches a range of courses in general education. His students typically praise not only the way he makes critical theories relevant to the works he teaches, but they also admire his intellectual integrity and the high demands he places on them. Dr. McCuskey's teaching is also distinguished by his interest in integrating technology into the traditional humanities classroom, an area where he has been a leader in the department and across the university. For him, the World Wide Web is not simply a resource for students to consult in addition to traditional classroom work; instead it is an integral part of the classroom. Class discussions are continued and developed on the class web site, and class work involves active consideration of Web materials. In other words, in addition to the resources of face-to-face dialogue and print, his students also have the resource of electronic media to enhance their learning; and they learn to read electronic information in the same sophisticated way they read print. All these successes simply point to the fact that Dr. McCuskey continually inspires his students through his commitment to innovative, exciting teaching.

College of Natural Resources

Dale J. Blahna

joined the faculty of the Forest Resources department in 1990, specializing in the human dimensions of natural resources and recreation resource management. He encourages his fellow faculty and CNR students to familiarize themselves with the vital role the social sciences play in every aspect of natural resources management. As a teacher, Dr. Blahna strives to provide lessons that have lifelong impact. He also realizes that students learn in many different ways. Thus, he incorporates many methods for teaching, including lectures, class dialogue, films, slides, group discussion, role playing, field trips, and group projects. Dr. Blahna forces his students to think. He structures his classes so that memorization, note taking, and tests are not the products, but merely part of the educational process. Dr. Blahna's students are forever haunted by the phrase, "Read and synthesize..." One of his former students observed that, "I remember grumbling, 'I'm paying tuition for this class to learn, not to think!' As a career-minded employee, I have had to live down that irony on a daily basis. And my once naive complaints have given way to gratitude worth the cost of tuition a hundred times over." Dr. Blahna has had a powerful positive effect on the lives of his students. He has influenced their career paths and has been an inspiration to many.

College of Science

E. Robert Heal

has served the students of the university for nearly 30 years, teaching courses at every level, bringing to every classroom experience the same dedication and attunement to student needs, the same infectious enthusiasm for mathematics and statistics. Dr. Heal has had an immense impact on his students. A number of graduating seniors in the College of Science, including three college valedictorians, have chosen Dr. Heal as the one person who had the greatest positive influence on their education at USU. In addition to on-campus courses, Dr. Heal has created mathematics courses for gifted high school students and for their teachers and has offered a variety of Extension courses throughout the state. His determination to deliver the highest quality educational experience to students is not limited to his own classroom. On campus, in addition to years of quality advising, he has inaugurated a number of curricular changes; off campus, he has led statewide efforts to improve the quality of preparation for elementary and secondary teachers. Following a leave at UC Berkeley, Dr. Heal made major contributions to the development of statistics programs and classes at USU. More recently, Dr. Heal has been a leader in efforts to incorporate suitable technology into mathematics education, culminating in a three year NSF grant to develop a national library of interactive computer-aided teaching tools for K-8 students and teachers. But even as he incorporates his latest teaching research into his courses, he retains his one-on-one effectiveness.
