Academic Heraldry

The history of academic heraldry reaches back into the early days of the university. A statute of 1321 required that all "Doctors, Licentiates, and Bachelors" of the University of Coimbra wear gowns. In England, in the fourteenth century, the statutes of certain colleges forbade "excess in apparel" and prescribed the wearing of a long gown, which may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods were used to cover the head until later replaced by the skull cap and eventually by academic caps. Both Cambridge and Oxford have made academic dress a matter of university control to the inclusion of even its minor details; and in Laudian days in Oxford, any tailor who changed the authorized design "even by a nail's breadth" was punished by the vice-chancellor of the University.

When American colleges and universities desired to adopt some suitable system of academic apparel, it seemed best to agree on a system which all might follow. Accordingly, there was held on May 16, 1895, at Columbia University, a conference of representatives of the boards of various interested institutions. From that meeting came a code of academic dress for the colleges and universities of the United States, which most institutions of higher learning have adopted.

Gowns

The academic gown for the bachelors degree has pointed sleeves and is designed to be worn closed. The gown for the masters degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut, and the front part has an arc cut away. The gown is so designed to be worn open or closed. The gown for the doctors degree has bell-shaped sleeves and may be worn open or closed.

Colors

For all academic purposes, including trimmings of doctoral gowns, edging of hoods, and tassels of caps, the colors associated with the different academic disciplines are as follows:

Agriculture	Maize
Business	Drab
Education	Light Blue
Family Life	Maroon
Engineering	Orange
Humanities, Arts and Social Sciences	White

Natural Resources Science	Russett Gold-Yellow
School of Graduate Studies (EdD, PhD)	Gold

The white ribbon with the Greek Key on the robe of a graduate identifies an unductee into Phi Kappa Phi, the National Scholastic Society. Gray collars worn with the robes indicate a member of the Mortar Board, the National Academic & Service Society.

Hoods

Academic hoods are worn by recipients of advanced degrees. The master degree hoods are three-and-one-half feet in length and are lined with the official color or colors of the college or university conferring the degree, which at Utah State University are navy blue and white, displayed in a heraldic chevron. The doctoral hood consists of a larger and longer assemblage of institutional color draped over the recipient's shoulders and falling well down the back. The binding or edging of the hoods is of velvet or velveteen, three inches wide and five inches wide for the masters and doctors degree, respectively.

Caps

Academic caps come in two forms: the traditional mortarboard (from Oxford), a square cap; and a soft cap which resembles an oversized beret (the Cambridge model). The mortarboard, used by Utah State University, is worn with a tassel. Black tassels designate any degree; colored tassels designate major field of learning, and gold tassels indicate doctors and governing officials of institutions.

Academic Procession

The commencement procession originates at the Taggart Student Center and the line of march extends through the campus to the Spectrum. The procession is composed of three divisions: (1) color guard, University president, Regents and Institutional Council members, administrative officers, and special guests; (2) the faculty; and (3) candidates for degrees, with candidates for advanced degrees in the lead and others in groups according to the degrees for which they are candidates. The procession will stop at the tunnel entrance to the Spectrum, the first two divisions dividing so that the candidates for graduation pass between them and enter the hall first.

Honorary Degree

*M*anfred Eigen

won a Nobel prize in chemical kinetics at the young scientific age of 40. His early work dealt with the development of a new method for studying the mechanism of extremely fast chemical reactions. Since then his research has evolved into investigating how large biological molecules come about, and how they process, store, preserve and gain information. His theoretical and experimental work has led him into some of the most compelling intellectual efforts of our times – artificial intelligence, neural networks, viral infection, and the origin and evolution of life. His early work led him to establish the Max Planck Institute for Biophysical Chemistry in Göttingen, and his vital and creative contributions in advancing scientific thinking continue to be recognized internationally by prestigious prizes, awards and medals. He is a foreign member of England's Royal Society, the Royal Society of Edinburgh, the Royal Danish Academy, the USSR Academy of Sciences, the U.S. National Academy of Sciences and the American Academy of Arts and Sciences. He has received honorary doctorates from Hebrew University, the University of Hull, England, Washington University, Harvard University and the University of Chicago, among others. Dr. Eigen's interests are broad-ranging. He is an accomplished pianist and graces the institutions he visits by occasional concerts. Utah State University is proud to confer upon Manfred Eigen the honorary degree, *DOCTOR OF SCIENCE*.

Honorary Degree

Claire Falkenstein

is one of America's best known artists. For five decades, her drawings, paintings, collages, etchings, cast paper, jewelry, and works in wood, glass, metal, ceramics, plastic and materials have been viewed in more than 135 major exhibits in the United States and around the world. Commissioned works by Falkenstein grace the Museum of Modern Art, Venice, Italy; Musée de Marseille, France; and the Solomon R. Guggenheim Museums in Venice, Italy and New York. Her design for the Saint Basil Church in Los Angeles comprised fifteen three-dimensional window screens of stain glass and steel, an eighty foot high Nave, three tower windows, the highest of which was one hundred and thirty feet, and eight bronze doors. Ms. Falkenstein was born in Coos Bay, Oregon, and maintains ties with her Northwest heritage, though she has lived and worked in Paris more than a decade and is currently based in California. She received an A.B. degree in Arts and Letters from the University of California, Berkeley, majoring in art and minoring in anthropology and philosophy. Her reputation is that of a great explorer and adventuress, who knows no boundaries. In her work, Falkenstein uses every available material. She has been ahead of her time, prominent since the 1960s for monumental fountains and works directly related to architecture. She has received many awards and honors, including "Woman of the Year in Art" *Los Angeles Times*, a Guggenheim Fellowship, National Women's Caucus for Art Award, and the Vista Award, Woman Artist of the Year, Los Angeles. Utah State University is proud to confer upon Claire Falkenstein the honorary degree, DOCTOR OF FINE ARTS.

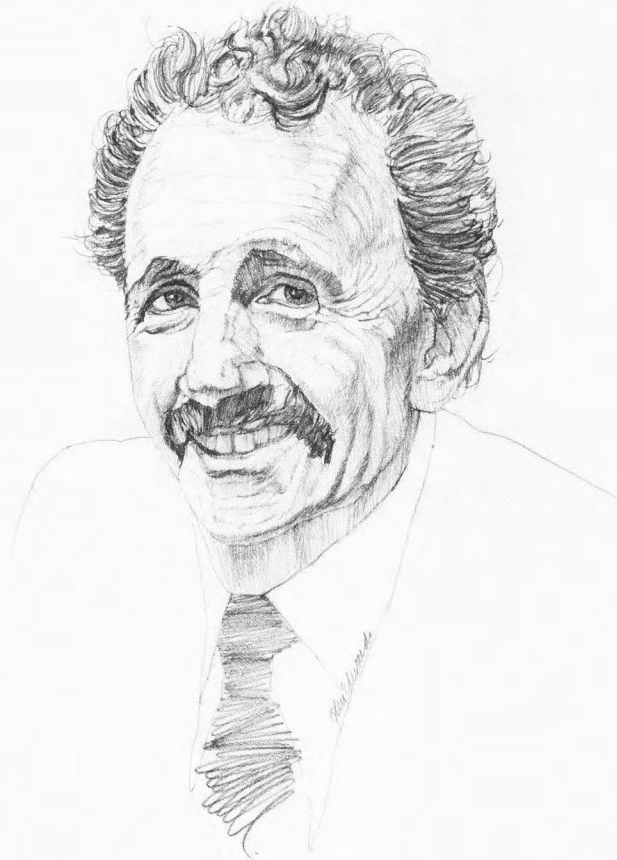

Honorary Degree

Jonathan Roberts Tyson Hughes

is honored for more than four decades of contribution in economic history. Hughes is considered one of the fathers of cliometrics, and his professional activity is at the forefront of the development of New Economic History. After graduating from Utah State University in 1950, he continued his studies at the University of Washington and then at Oxford University, where he received his Doctor of Philosophy degree in 1955. First at Purdue University and then at Northwestern, Dr. Hughes began publishing in the most prestigious economics journals his observations and evaluations of entrepreneurship and American economic development. He was also associated with the Federal Reserve Bank, served on the editorial board of the *Journal of Economic History* and President of the Economic History Association. His book, *The Vital Few*, broke new ground in American entrepreneurial history and a recently updated edition includes chapters on two historic Utah figures – Brigham Young and Marriner Eccles. Another book, *American Economic History*, is one of the standard college texts in economic history. Dr. Hughes was elected to the Faculty Honor Roll by the Graduate Management Association of the Kellogg Graduate School of Management. His recognitions include a Fulbright Student Fellowship, Visitor of Nuffield College, Oxford, Ford Foundation Faculty Fellow, and the J. S. Guggenheim Memorial Fellowship. Known throughout the profession for his wit, his brilliant analyses and his superb teaching and writing, Jonathan Hughes was recognized by his peers last fall at a special session of the Economic History Association honoring his contributions to the understanding of economic processes. Utah State University is proud to confer on Jonathan Roberts Tyson Hughes the honorary degree, DOCTOR OF SOCIAL SCIENCE.

Honorary Degree

Philip Levine

is one of America's distinguished and internationally known poets. From the White House to the Library of Congress, his work has been recognized. In 1980 he was among a select group of poets invited to the White House to read his poetry for the first national day honoring American poetry. During the American Bicentennial year, Mr. Levine was among six national artists selected for an exchange with Great Britain, sponsored by the Library of Congress. He has written fourteen books of poetry. Mr. Levine's poetry has received many of this country's most prestigious awards: The American Literary Anthology Award in 1971; the Lenore Marshall Award given by the New Hope Foundation and *The Saturday Review*, for the best book of poetry published by an American in 1976; the American Book Award in 1980; the National Book Critics Circle Award for two books; a Guggenheim Fellowship; The Wallace Stegner Fellowship at Stanford University; The Chapelbrook Foundation Award for Poetry; the National Endowment for the Arts Award, and the Harriet Monroe Poetry Award at the University of Chicago. In 1987 the American Council for the Arts and the Modern Poetry Association presented Mr. Levine with the largest American award for poetry, the Ruth Lilly Poetry Prize, "in recognition of outstanding poetry achievement." Utah State University is proud to confer upon Philip Levine the honorary degree, DOCTOR OF LETTERS.

Honorary Degree

*E*ldrow "Dutch" Reeve

is an outstanding example of the dynamic synergism between America's public education institutions, its agricultural businesses and its corporate organizations. Dr. Reeve, a farm boy from Hurricane, Utah, obtained a Baccalaureate and Masters degree in Plant Science at Utah State University and a doctorate from Rutgers. His wife, Marge Seely, also received a baccalaureate degree in Home Economics from Utah State University. Since obtaining that solid academic preparation, Dutch has provided nearly five decades of extraordinary service to agricultural science and technology throughout the world. In the process, he has become one of America's premier leaders in agricultural business. During 37 years with the Campbell Soup Company, he served in research leadership roles, ending as Vice President of Research for 22 of those years. He has also provided exceptional service to the Utah Idaho Sugar Company, the U. S. Department of Agriculture and to various agricultural development programs in 16 foreign countries. Dr. Reeve has received numerous national and international awards and honors including being elected a Fellow of the American Association for the Advancement of Science. Not limiting his talents to his career, he has given generously as a long-time member of USU's National Advisory Council. Utah State University is pleased to recognize an American agricultural leader and truly distinguished "Aggie" by confirming upon him, the Honorary Degree, DOCTOR OF AGRIBUSINESS.

D. Wynne Thorne Research Awards

R. John Hanks

a soil physicist, has had an extremely productive and distinguished career. He is internationally known and respected for his research on the complex interactions of soils, water and crop yields in arid and semiarid lands, and his work has been characterized by highly theoretical as well as eminently practical aspects. Known for his creativity, yet "one foot in the field" approach, he has developed computer models of interactions of crop water use and crop production, innovative soil-water measuring devices, and water application methods that have been used by researchers, extension projects of more than 40 students at Utah State University, has sponsored a number of postdoctoral scholars, and has collaborated with researchers in many countries. He holds a bachelor's degree from Brigham Young University and master's and Ph.D. degrees from the University of Wisconsin. He has more than 200 scientific publications to his credit. Recognizing the excellence of his career contributions, Utah State University designates R. John Hanks recipient of the D. Wynne Thorne Research Award.

Thomas Jefferson Lyon

is an eminent scholar of American nature writing and a giant in the field of Western American Literature. His career has been characterized by leadership in the academic community and in the community of American letters. As editor of the highly respected journal *Western American Literature* for more than 15 years, Professor Lyon has set standards that have attracted the best scholars to its pages. *A Literary History of the American West*, for which he is a senior editor and contributor, is a major reference book. His own works on Frank Waters and John Muir have become classics in the field and his most recent book, *This Incomparable Land: A Handbook of American Nature Writing*, is a comprehensive study that is acclaimed for its "authority style" and "clean and graceful" scholarly writing. He received bachelor's and master's degrees from Utah State University and has done graduate study at the University of Utah and the University of California, Berkeley. For his example of excellence and ethical commitment to sound scholarship, Utah State University is pleased to present the D. Wynne Thorne Research Award to Thomas J. Lyon.

E. G. Peterson Extension Award

V. Philip Rasmussen

has provided dynamic leadership for Utah farmers in soil and water conservation, conservation tillage practices and computer practices and computer applications. Under Dr. Rasmussen's guiding hand, the number of acres in water-and-soil conserving tillage in Utah has increased from 7,500 in 1984 to nearly 125,000 today, saving farmers millions of dollars. He is also a leader in Utah in the practice of low input sustainable agriculture. He has developed a new miniature microwave soil moisture sensor and initiated a new program in low-level remote sensing. Dr. Rasmussen is an expert in microcomputer applications and has provided computer guidance for the staff of the USU Cooperative Extension Service and for the College of Agriculture. He serves as assistant head of the Department of Soil Science, Plant Science and Biometeorology and associate professor. Dr. Rasmussen received his BS and MS from USU and his PhD from Kansas State University. For his superb contributions to Utah's agricultural community and the state's environmental quality, Utah State University honors V. Philip Rasmussen with the E. G. Peterson Extension Award.

Eldon J. Gardner Teaching Award

Von T. Mendenhall

consistently receives exceptionally high student evaluations for his teaching. Since he joined the Utah State University faculty in 1972, he has made significant contributions in research and extension work and has written numerous papers for professional meetings and journals. In addition he has taught specialized, upper-division courses, but his fame as a teacher mushroomed when he began teaching an undergraduate course that enrolled 25 students per quarter when he began and has increased to more than 230 students last quarter. Dr. Mendenhall became known as a professor who loves teaching, who enhances his natural teaching talents with hard work and who helps recruit and advise students and takes a personal interest in every one. "A genius in the art of teaching" one student evaluator wrote. "Professor Mendenhall is a treasure. Please make him at least king" another pleaded. Professional colleagues, former students, leaders in the food industry and those he has taught in extension programs all add their support for honors to Dr. Mendenhall. He received his BS and MS degrees at Utah State and PhD at Oregon State University.

Teaching Excellence Awards

Through an extensive selection process involving both students and faculty in the various academic colleges, eight members of the faculty have been designated for special recognition for excellence in teaching representing the eight colleges of the University: Agriculture; Business; Education; Engineering; Family Life; Humanities, Arts and Social Sciences; Natural Resources; and Science. From among the eight, the Eldon J. Gardner University Teaching Award recipient is chosen; the seven remaining follow:

College of Agriculture

J'Wayne McArthur

joined the faculty of the Department of Animal, Dairy and Veterinary Sciences in 1969 and has developed a popular horsemanship program, designed to meet the needs of students and the public. He teaches horse packing, judging, fitting and showing, and horse breaking. He also conducts an annual Rodeo Queen Clinic which attracts young women to USU from several western states. J'Wayne is dedicated to his students and they express respect and appreciation for what and how he teaches. His writing includes a column for newspapers, articles for magazines, a book on riding and cowboy poetry.

College of Business

Dwight Israelsen

is a graduate of USU, where he was Robins Awards Man of the Year in 1969. He studied Slavic languages at Harvard, and has a Ph.D. in Economics from MIT. Currently an Associate Professor of Economics, Dr. Israelsen has also taught at BYU, Harvard, and MIT. Known for his depth and breadth of knowledge, concern for students, and effectiveness in teaching complex material, he regularly teaches a variety of undergraduate and graduate courses in economic history, systems, theory, and methodology and has added to the curriculum courses in Russian economic history and Soviet economics. He has 40 scholarly publications and has presented 50 papers at professional conferences, twice winning the Annual Paper Competition of the American Economic Association.

College of Education

K. Richard Young

joined the faculty in 1978 and is an Associate Professor in the Department of Special Education. He teaches courses in intervention strategies, teaching social skills, precision teaching, diagnostic programming of instruction, educational strategies, and remediating behavior problems and social deficits. He motivates and challenges his students and actively involves them in learning. His teaching evaluations reflect the fact that the students appreciate his interest, knowledge, and approach to teaching. He is a tireless worker, with a record of innovative and important contributions to the field of special education. Dr. Young received his B.S., M.S. and Ph.D. degrees from the University of Utah.

College of Engineering

Robert W. Gunderson

joined Utah State University 22 years ago. He served for 20 years in the Mathematics Department and the past two years as a full professor in the Electrical Engineering Department. Over the years he has taught mathematics and engineering courses in an innovative and comprehensive manner. Because of his extensive background in solving controls and optimization problems, engineering and science students have sought to enroll in his courses. He is motivated in his own research and this excitement carries over into the classroom. He has consistently demonstrated a rare ability to make abstract theoretical concepts come to life in solving real-world problems. One student wrote, "Dr. Gunderson really cares about the students-he cares that they learn and about them personally."

College of Humanities, Arts and Social Sciences

Jon Anderson

has served USU's students well during his 26 years of teaching. In 1964 when he joined the Art faculty in commercial art, advertising, graphic design and illustration, there were ten students. Today, there are 189. He sent sets of slides of USU art work to high schools in Utah and Idaho, arranged workshops and gave demonstrations in drawing and illustration. Jon continues to visit one high school a month on his own time. He instituted summer workshops for arts students to develop their talent under USU faculty. He conducted tours to Los Angeles and San Francisco for his students to visit major art agencies to examine the commercial art profession and make contacts for future employment. He has brought over 200 recognized commercial artists to USU. The success of Jon's recruiting and teaching is exemplified by the many USU graduates who now occupy prestigious positions. In addition, Jon is a talented commercial artist and has numerous awards and distinctions.

College of Natural Resources

Ted J. Alsop

has been a member of the USU faculty since 1984. Students attest that his lectures are stimulating, challenging and filled with humor. Professor Alsop makes difficult concepts understandable and holds review and discussion sessions beyond the scheduled class time. He generates enthusiasm, understanding and awareness of the complex interrelationships of the physical environment. Professor Alsop is active in the Association of American Geographers, the Remote Sensing and Climatology specialty groups, American Society of Photogrammetry and Remote Sensing. He is also the faculty advisor for Gamma Theta Upsilon, the International Geography Honor Society.

College of Science

Lance Littlejohn

is honored primarily for his teaching, but he is also a premier research mathematician. He received his B.S. and M.A. degrees from the University of Western Ontario and a Ph.D. at Pennsylvania. He joined the USU faculty in 1983. His students consistently rank him high, and there is strong evidence that he has demanding standards. His teaching has included most of the undergraduate mathematics courses, but he has also taught extensively in the graduate program. Lance's many publications include some aimed at the undergraduate student and teacher. "A curious set of numbers," appeared in the *Fibonacci Quarterly* – and "The Easter Problem Revisited," co-authored with Cannon and Elich, is in preparation. Another paper is jointly written with an undergraduate student. Lance's research area encompasses topics in functional analysis, differential equations, and orthogonal polynomials.

Alma Mater Hymn

COMPOSED BY THEODORE M. BURTON

Across the quad at eventide the shadows softly fall,

The tower of Old Main appears and peace rests over
all.

The lighted "A" upon the hill stands out against the
blue;

Oh, Alma Mater, Utah State, my heart sings out to
you.

And through the years as time rolls on and student
friendships grow,

We'll ne'er forget the joys we had, those days we used
to know,

Thy mem'ries ever will be new, thy friends be ever
true.

Oh, Alma Mater, Utah State, my heart sings out to
you.
