Academic Heraldry

The history of academic heraldry reaches back into the early days of the university. A statute of 1321 required that all "Doctors, Licentiates, and Bachelors" of the University of Coimbra wear gowns. In England, in the fourteenth century, the statutes of certain colleges forbade "excess in apparel" and prescribed the wearing of a long gown, which may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods were used to cover the head until later replaced by the skull cap and eventually by academic caps. Both Cambridge and Oxford have made academic dress a matter of university control to the inclusion of even its minor details; and in Laudian days in Oxford, any tailor who changed the authorized design "even by a nail's breadth" was punished by the vice-chancellor of the University. When American colleges and universities desired to adopt some suitable system of academic apparel, it seemed best to agree on a system which all might follow. Accordingly, there was held on May 16, 1895, at Columbia University, a conference of representatives of the boards of various interested institutions. From that meeting came a code of academic dress for the colleges and universities of the United States, which most institutions of higher learning have adopted.

Gowns

The academic gown for the bachelors degree has pointed sleeves and is designed to be worn closed. The gown for the masters degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut, and the front part has an arc cut away. The gown is so designed to be worn open or closed. The gown for the doctors degree has bell-shaped sleeves and may be worn open or closed.

Colors

For all academic purposes, including trimmings of doctoral gowns, edging of hoods, and tassels of caps, the colors associated with the different academic disciplines are as follows:

Agriculture	Maize
Business	Drab
Education	Light Blue
Family Life	Maroon
Engineering	Orange
Humanities, Arts and Social Sciences	White
Natural Resources	Russett

Science Gold-Yellow
School of Graduate
Studies (EdD, PhD) Gold

The white ribbon with the Greek Key on the robe of a graduate identifies an inductee into Phi Kappa Phi, the National Scholastic Society. Those wearing gray collars and a medallion are Mortar Board Senior Honor Society members, the National and Academic & Service Society. A gold braided cord draped over the cowl will distinguish a graduate of Honors.

Hoods

Academic hoods are worn by recipients of advanced degrees. The master degree hoods are three-and-one-half feet in length and are lined with the official color or colors of the college or university conferring the degree, which at Utah State University are navy blue and white, displayed in a heraldic chevron. The doctoral hood consists of a larger and longer assemblage of institutional color draped over the recipient's shoulders and falling well down the back. The binding or edging of the hoods is of velvet or velveteen, three inches wide and five inches wide for the masters and doctors degree, respectively.

Caps

Academic caps come in two forms: the traditional mortarboard (from Oxford), a square cap; and a soft cap which resembles an oversized beret (the Cambridge model). The mortarboard, used by Utah State University, is worn with a tassel. Black tassels designate any degree; colored tassels designate major field of learning, and gold tassels indicate doctors and governing officials of institutions.

Academic Procession

The commencement procession originates at Old Main and the line of march extends out the new East Wing across the quad to the Library then north to the Spectrum. The procession is composed of three divisions: (1) color guard, University president, Regents and the Board of Trustees, administrative officers, and special guests; (2) the faculty; and (3) candidates for degrees, with candidates for advanced degrees in the lead and others in groups according to the degrees for which they are candidates. The procession will stop at the tunnel entrance to the Spectrum, the first two divisions dividing so that the candidates for graduation pass between them and enter the hall first.

Spencer F. Eccles

*has taken a personal credo and turned it into a corporate philosophy. He truly believes in "giving 110 percent" to his profession and community. That conviction helps fire the economic engine of the region. □ Mr. Eccles is the Chairman and Chief Executive Officer of First Security Corporation. He has shown a lifetime of dedication to his career in banking following his early jobs as inventory clerk and "general floor sweeper" in his father's company. □ Born and reared in Ogden, Mr. Eccles completed his early education in the state prior to pursuing advanced study at the Columbia Graduate School of Business. □ He served his country honorably as a lieutenant in the United States Army Infantry. □ Whether supporting Olympic efforts, evaluating the future of Utah, or supporting numerous charitable efforts, Mr. Eccles gives tirelessly of his time, experience and expertise. □ He serves on countless boards and is the director of no less than seven foundations that give generously to the medical, educational, cultural and general welfare of Utah. □ His professional memberships and awards abound and are a testament to a life of "giving 110 percent." □ Utah State University is proud to add to these richly deserved honors by bestowing upon Spencer F. Eccles the honorary degree, **Doctor of Finance**.*

Boyd K. Packer

personifies devotion to principle. In a world of shifting values, he is a "watchman on the tower." As a noted religious leader for four decades, he has, without **apology** and in the face of great pressures, held a firm line against moral relativism. □ Elder Packer has lived a life of service--to his community, his country, and to millions of members of the Church of Jesus Christ of Latter-day Saints whom he serves as a general authority. □ We are proud to claim Boyd Packer as a native son of this region, and an alumnus of Utah State University, where he received both bachelor's and master's degrees and a Distinguished Alumni Award. □ He was born in Brigham City and served as a B-24 bomber pilot in World War II before returning home to begin a teaching career in the LDS Church's **educational** system. □ He has supervised the church's seminaries and institutes, directed its military relations efforts, advised its women's auxiliary, been a member of its Board of Education, and helped prepare an historic new edition of the church's canon of scripture. He has also authored several books. He served as Administrator of the Agricultural Research Service, the largest agricultural research organization in the world. □ His scientific insights and leadership are frequently sought in international agricultural affairs. He has represented the United States and the Department of Agriculture on assignments in Israel, Mexico, India, Japan, and many other countries. □ He served Utah State University as head of the Department of Animal, Dairy and Veterinary Science, spearheading a revision of the curriculum, and working vigorously to increase the level of research funding to the department. He oversaw construction of the University's Caine Dairy Research Center and secured a grant to study Bovine Somatotropin, the first commercial biotechnology product in the country. His own research has added significantly to our understanding of bovine genetics and dairy herd improvement. □ In recognition of his contributions to improving the lives of people everywhere through agricultural research, Utah State University is proud to confer on R. Dean Plowman the degree, **Doctor of Agricultural Sciences**.*

D. Wynne Thorne Research Award

W. John Raitt

Professor and Head of the Physics Department and member of the Center for Atmospheric and Space Sciences, is internationally recognized as one of the leading scientists engaged in space measurements. □ His research has involved instrument development, data analysis, theory, and project management. He has published over 100 scientific papers in refereed journals and has presented a similar number of talks at both national and international meetings, workshops, and symposia. □ Dr. Raitt is frequently asked to serve on NASA panels to help define future space missions. □ He has been either a principal investigator or leading scientist on several successful rocket, satellite, and space shuttle missions. He was project scientist on two flights of the Vehicle Charging and Potential (VACP) experiment on the space shuttle in 1982 and 1985. He was the principal investigator for a multi-year rocket program involving three rockets called SPEAR (Space Power Experiments Aboard Rockets). All three rockets were successfully launched and returned invaluable data on how the Earth's ionosphere interacts with exposed high-voltage power sources. He was also the principal investigator on an important experiment to measure the electric current in the electrodynamic tether that was recently flown on the space shuttle. □ Dr. Raitt has used his extensive research and teaching experience to greatly strengthen the undergraduate laboratory courses and to broaden the course selection at both the undergraduate and graduate levels in the Physics Department. □ He received his Bachelor of Science and PhD degrees from King's College, University of London. □ For his outstanding contributions to space science, Utah State University is proud to award W. John Raitt the D. Wynne Thorne Research Award.

E. G. Peterson Extension Award

N. Jean Kobayashi

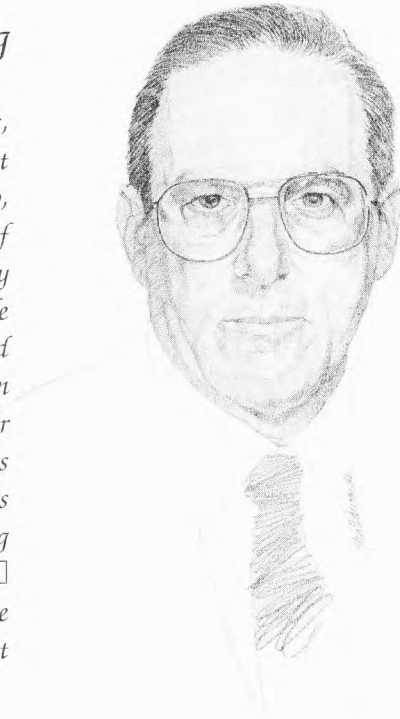

currently serves Utah State University Extension as Director for Salt Lake County, Home Economist and 4-H Educator/Agent. As County Director she provides overall leadership in organizing, managing and supervising the largest county Extension office in the state. □ She coordinates the 4-H Youth Development program which involves 1,516 volunteer leaders and over 20,000 youth in the county. She serves as the vital link for the working partnership and interface between the County Commission and Utah State University Extension Administration; clientele needs, community coalitions and the research based resources of Utah State University. □ She has developed educational materials; reviewed, revised and updated pamphlets and fact sheets to meet local conditions and requests; worked extensively with the media in publishing articles in newspapers and doing radio and television presentations, paving the way for other staff members in this area; presented educational and training programs for a variety of different clientele as well as working with a variety of community coalitions. □ Jean is professional in her work and yet very approachable. She is a people person who empowers others with encouragement, creative support and opportunities to develop their individual strengths and successful programs. She has a volunteering, creative, teachable, flexible attitude and has moved Extension programming into new avenues to meet the changing needs of the people in her county. □ Because of her dedicated service and positive impact on people, Utah State University honors N. Jean Kobayashi with the 1996 E. G. Peterson Extension Award.

University Outstanding Graduate Mentor Award

Charles L. Salzberg

Professor of Special Education, has served as mentor to many graduate students, including some who were not his advisees. □ Dr. Salzberg models a steadfast commitment to excellence, setting high standards of research and scholarship, asking challenging questions, and never allowing students to take the easy road of a simplistic research question or answer. □ He presents students with carefully monitored opportunities for teaching, research, grant writing, and publication. He critiques their work in a spirit of positive regard and respect, and demands increased independence until, at some often undefinable point, his relationship changes from mentor to colleague. □ Dr. Salzberg systematically assists students to consider their professional goals and opportunities, encourages and assists them to present papers at professional meetings, and prompts them to be active participants in campus activities beyond their graduate programs. □ Dr. Salzberg is also a friend, keeping in touch after graduation to encourage efforts or compliment accomplishments. □ Dr. Salzberg exemplifies excellence in the complex role of the mentor in graduate education, and Utah State is proud to honor Charles L. Salzberg as the first recipient of the University Outstanding Graduate Mentor Award in 1996.

Eldon J. Gardner Teaching Award

Kathryn Turner

joined the Department of Mathematics and Statistics in 1987. □ Throughout her teaching career, the students in her classes have always expressed their praise for her dedication and concern. While she expects a great deal in the difficult curriculum of Mathematics, both in time required and examination performance, she is so genuinely interested in students that all in her class respond with increased effort that results in greater learning. □ Kathryn has a unique teaching quality, simultaneously powerful and gentle, that produces an unusual but very meaningful statistic. □ Kathryn's classes have the highest student "survival rate" of any in the department, while her standards remain uniformly high. Students who have once been in her class often "camp out" at her door each quarter as they seek to enroll in subsequent courses. □ She received a "Top Prof" award from Mortar Board in 1995, an award given by graduating seniors to a small group of faculty who have had the most positive influence in their undergraduate studies. Her superb daily preparation, the open and friendly atmosphere of her class, her genuine interest and concern for students, and the often offered outside-of-class help are prima facie evidence of an outstanding university professor. She tries to lift all people up, especially those fortunate enough to call her teacher. □ Utah State University is proud to bestow the 1996 Eldon J. Gardner Teaching Award to Kathryn Turner.

Teaching Excellence Awards

Through an extensive selection process involving both students and faculty in the various academic colleges, eight members of the faculty have been designated for special recognition for excellence in teaching representing the eight colleges of the University: Agriculture; Business; Education; Engineering; Family Life; Humanities, Arts and Social Sciences; Natural Resources; and Science. From among the eight, The Eldon J. Gardner Teaching Award recipient is chosen; the seven remaining follow:

College of Agriculture

Nedra K. Christensen

has consistently received excellent teaching evaluations since her appointment at Utah State University in 1988. Her students describe her as energetic, empathetic, extremely knowledgeable, well-respected, funny and genuine. Dr. Christensen believes strongly that learning is accomplished best in an atmosphere of humor and enthusiasm, and is best reinforced by successfully meeting challenges. Her teaching is well organized and stimulates students to think critically. This, along with her work experience in diabetes education and community nutrition, brings the practical learning experiences to the classroom. Her teaching responsibilities include the traditional on campus classroom experiences, directing the dietetic internship for senior students and Extension Service education. She cares about each individual student and helps them develop their own talents and skills. Her concern for the welfare of her students extends well into their professional careers.

College of Business

L. Dwight Israelsen

is a truly dedicated and professional educator. He has compiled a long record and sterling reputation as a student-oriented, service-oriented professor. After graduating from USU, he studied Slavic Languages at Harvard, and earned a PhD in Economics from MIT. To have been instructed by him the students say is to study with a truly well-educated and articulate professor. The students' evaluation of his teaching have consistently ranked him at the top or near the top of his department and of the College of Business. Dr. Israelsen has authored 60 scholarly publications and has read 70 papers at professional conferences. Professor Israelsen has also taught at MIT, Harvard and BYU. He has taught 20 different courses at USU, both graduate and undergraduate, and developed many new courses, with emphasis on Russia/Eastern Europe. Dr. Israelsen has been extremely active in evening school, extension, con-net and honors courses. In this period of rapid international business development, particularly the economic transformation of Russia/Eastern Europe, it has been a rare opportunity for USU students to be tutored by an international scholar of Dr. Israelsen's quality.

College of Education

Deborah A. Byrnes

joined the faculty in the Department of Elementary Education in 1983. Since that time she has taught a wide array of courses in Early Childhood, Elementary Education and the area of social studies education. Dr. Byrnes has combined the three important areas of teaching, research, and service under one goal--that of being an excellent teacher. As stated by a colleague, "her research informs her teaching and her teaching, as evidenced by her many publications, clearly informs her research." Soft spoken in her mannerism and yet always in control of the class, her outstanding subject-matter knowledge, competence, and her ability to utilize the classroom environment to optimize the teaching learning process for all students, make her an envious model for both pre-service and in-service teachers. In addition, Dr. Byrnes is an outstanding citizen of the university community. Whether it be directing the Women and Gender Research Institute or serving on a departmental committee, her contributions are highly valued. Her work in values and specifically prejudice formation and reduction enjoys an international reputation. And yet Dr. Byrnes encourages individual students to set high standards for themselves--thus being a model "teacher's teacher" in the true sense of the phrase.

College of Engineering

Todd K. Moon

joined the faculty of the Electrical and Computer Engineering Department in 1991. Since that time he has earned the reputation of outstanding teacher and mentor from the students he teaches. He teaches both undergraduate and graduate courses each quarter in addition to doing this research. Several of his teaching assignments have involved new courses. When he was assigned to teach an unpopular student course, he accepted the challenge and made the course a resounding success. Dr. Moon is an excellent teacher establishing high standards for his students and providing valued insight and advice. Known as one of the toughest graders in the College of Engineering, his students value a good grade. Dr. Moon's research involves ten research proposals funded for approximately \$250,000. Since 1993 he has had nine professional journal articles published or accepted for publication and seven conference papers published. He also served as an active consultant to several local and state companies such as Campbell Scientific, AeroTrans, and WestTest Engineering.

College of Family Life

Jane McCullough

joined the department of Human Environments as a half-time instructor in 1967 while completing her masters degree. She has been a full-time instructor since 1968, a time when faculty in the department were expected to teach, not conduct research. Throughout the many changes in philosophy and expectation that have occurred, teaching has remained her number one priority. This has resulted in her selection as the College of Family Life Outstanding Teacher in 1977, 1987, and again this year. Student evaluations point out appreciation for Dr. McCullough's organization, fairness, humor, challenging and interesting assignments, and caring about them as individuals. Over the years she has served on almost every University committee that exists and was department head for eight years. She has served as a major professor for 25 masters students. Her research in household time use supports her teaching in family resource management and the consumer in the market areas.

*College of Humanities, Arts
and Social Sciences*

James R. Rogers

joined the faculty of the Intensive English Language Institute in 1990. As a teacher who creates a rich learning environment in his classroom, he is highly respected by his students and his colleagues. Jim's teaching techniques, which allow individual students to work from their own unique experience and perceptions, illustrates his sensitivity and adaptability. Jim creates an environment conducive to student interaction and language use; he provides this in his materials while showing understanding for their situation as learners in a culture other than their own. His teaching is relevant to his students' lives in Logan, acknowledging the values and customs they bring and the problems they face at Utah State University.

College of Natural Resources

Mark E. Ritchie

joined the faculty of the Department of Fisheries and Wildlife in 1991. His personal commitment is to educate students in problem solving and critical thinking, rather than just memorization of class material. He is well-known among the students for his "problem sets", which take the students to a new, higher plateau of insight and understanding. Dr. Ritchie has devised a method for teaching which keeps the material challenging for students. Many graduates have commented that the thinking and problem-solving skills he teaches were among the most valuable things they learned. According to his department head, "Mark has pulled off a difficult feat in teaching: he has brought an enthusiastic, common-sense approach together with a strong emphasis on problem-solving skills, quantitative material, logical thinking and intellectual flexibility.
