Academic Heraldry

The history of academic heraldry reaches back into the early days of the university. A statute of 1321 required that all "Doctors, Licentiates, and Bachelors" of the University of Coimbra wear gowns. In England, in the fourteenth century, the statutes of certain colleges forbade "excess in apparel" and prescribed the wearing of a long gown, which may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods were used to cover the head until later replaced by the skull cap and eventually by academic caps. Both Cambridge and Oxford have made academic dress a matter of university control to the inclusion of even its minor details; and in Laudian days in Oxford, any tailor who changed the authorized design "even by a nail's breadth" was punished by the vice-chancellor of the University. When American colleges and universities desired to adopt some suitable system of academic apparel, it seemed best to agree on a system which all might follow. Accordingly, there was held on May 16, 1895, at Columbia University, a conference of representatives of the boards of various interested institutions. From that meeting came a code of academic dress for the colleges and universities of the United States, which most institutions of higher learning have adopted.

Gowns

The academic gown for the bachelors degree has pointed sleeves and is designed to be worn closed. The gown for the masters degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut, and the front part has an arc cut away. The gown is so designed to be worn open or closed. The gown for the doctors degree has bell-shaped sleeves and may be worn open or closed.

Colors

For all academic purposes, including trimmings of doctoral gowns, edging of hoods, and tassels of caps, the colors associated with the different academic disciplines are as follows:

Agriculture	Maize
Business	Drab
Education	Light Blue
Family Life	Maroon
Engineering	Orange
Humanities, Arts and Social Sciences	White
Natural Resources	Russett

Science	Gold-Yellow
School of Graduate Studies (EdD, PhD)	Gold

The white ribbon with the Greek Key on the robe of a graduate identifies an inductee into Phi Kappa Phi, the National Scholastic Society. Those wearing gray collars and a medallion are Mortar Board Senior Honor Society members, the National and Academic & Service Society. A gold braided cord draped over the cowl will distinguish a graduate of Honors.

Hoods

Academic hoods are worn by recipients of advanced degrees. The master degree hoods are three-and-one-half feet in length and are lined with the official color or colors of the college or university conferring the degree, which at Utah State University are navy blue and white, displayed in a heraldic chevron. The doctoral hood consists of a larger and longer assemblage of institutional color draped over the recipient's shoulders and falling well down the back. The binding or edging of the hoods is of velvet or velveteen, three inches wide and five inches wide for the masters and doctors degree, respectively.

Caps

Academic caps come in two forms: the traditional mortarboard (from Oxford), a square cap; and a soft cap which resembles an oversized beret (the Cambridge model). The mortarboard, used by Utah State University, is worn with a tassel. Black tassels designate any degree; colored tassels designate major field of learning, and gold tassels indicate doctors and governing officials of institutions.

Academic Procession

The commencement procession originates at Old Main and the line of march extends out the East Wing across the quad to the Library then north to the Spectrum. The procession is composed of three divisions: (1) color guard, University president, Regents and the Board of Trustees, administrative officers, and special guests; (2) the faculty; and (3) candidates for degrees, with candidates for advanced degrees in the lead and others in groups according to the degrees for which they are candidates. The procession will stop at the tunnel entrance to the Spectrum, the first two divisions dividing so that the candidates for graduation pass between them and enter the hall first.

Commencement Speaker Honorary Degree

William "Billy" Mills

has a life like a storybook with the message, "You can accomplish anything if you want it enough." □ Born into the Lakota band of Sioux on the Pine Ridge Reservation, he was an orphan before he was a teenager. Separated from his seven siblings and sent to an Indian boarding school in Kansas, he turned to sports, eventually gravitating to track. Championships three years in a row in the two-mile cross country and two years as state mile champion earned him a scholarship to the University of Kansas. □ In spite of the loneliness and isolation he felt in college, he set a conference record in the 10,000 meter race and was Big Eight cross country champion. □ After graduating, getting married and joining the Marine Corps, he competed again in interservice competition. In 1964 the Marines sent him to the Olympics in Tokyo for the 10,000 meter run. Leading the race in the last 300 yards, he stumbled after an accidental push, and dropped into third. With thoughts of the bravery of the great chiefs coursing through his brain, he charged ahead, grabbing one of the biggest upsets in Olympic history. He became the first and only American ever to win the 10,000 meter race. □ Earning the gold medal, he set a new Olympic record. Until that time, he was virtually unknown but an astonished world made him an international hero. □ In true hero fashion, he used that success to inspire others, particularly Native Americans. He and his wife wrote the script for the movie *Running Brave*, which told the story of his life up to the Olympic victory. He wrote a book about how to find happiness and self-understanding. Though he also spent time working for the Bureau of Indian Affairs and recently retired as president of a successful insurance agency, he has always given motivational talks whenever and wherever he could. □ Billy Mills, for helping people everywhere understand that dreams can be realized and for showing them how, Utah State University is proud to confer upon you the honorary degree, Doctor of Humanities.

Honorary Degree

Richard W. Anderson

has knowledge of electronics, computing and communications technology, when paired with his vision, integrity and leadership served to guide the Hewlett-Packard Company in pioneering many world-leading technologies. □ When he received his bachelor's degree from Utah State University in 1959, engineering students did calculations with slide rules. Today, one would be hard pressed to find an engineering student who does not use an HP calculator capable of doing calculations that would have required a roomful of computers in years' past. □ Early in his nearly four-decade career, he developed an important section of HP's first spectrum analyzer and other technologies for microwave measurements, making the company the market leader in spectrum analyzer sales. His research and presentations on computing memory quality were instrumental in raising industry standards for this critical technology. □ While managing many of HP's divisions, including engineering, automatic measurement and data systems, he oversaw the development of a number of first-of-their-kind products that made the company a dominant force in the market. He also developed a keen business sense, outstanding product strategy skills, and a reputation for uncompromising commitment to product quality. □ Equally important has been his commitment to developing people. During his career he has hired and inspired many young engineers. He devoted his time to HP's college recruiting activities, seeking out bright young minds and helping them build on his legacy of excellence. □ After what most would consider sufficient work and achievements for a lifetime, he has assumed chairmanship of the Executive Committee of Microelectronics Technology Incorporated, a microwave radio and wireless communications component manufacturer. □ For his exemplary contributions to technologies that touch all of our lives, and his ability to touch the lives of people who will shape our future, Utah State University is proud to present to Richard W. Anderson the degree, Doctor of Engineering.

Honorary Degree

Reed Bullen

is a business leader and has contributed his considerable talents in the political arena and to his church.

□ In the field of broadcasting he brought radio, and then cable television, to the people of Cache Valley. With his father, he was instrumental in establishing KVNK Radio in Logan in 1938. The station is cited as the sixth oldest in the state, one of only two radio stations outside the Salt Lake area at its birth. Announcer, producer, program director and general manager — he was active in every aspect of KVNK's operation until 1996 when he sold the station. He was known to many in Cache Valley as "The Man on the Street" thanks to his live Main Street broadcasts. He added his first FM station in 1983 and brought cable television to the valley with North Utah Community T.V. □ As a true pioneer of broadcasting in the state of Utah, he was inducted into the Utah Broadcaster Hall of Fame in 1985. □ During his six terms as a senator in the Utah State Legislature representing the people of Cache Valley, he distinguished himself as whip, majority leader and president. He also served three terms as a member of the Utah Legislative Council and one term as Chairman. He served three terms as chairman of the Legislative Higher Education Committee. □ His service to his church is remarkable, including his tenure as President of the Logan LDS Temple. □ His unflagging support of Utah State University has been lifelong, first at Utah State Agricultural College as a student, then as a lifetime member of the USAC Alumni Association. He has served as a member of the Board of Trustees and received a Distinguished Service Award from USU in 1977. □ Today, Utah State University is proud to present Reed Bullen the honorary degree, Doctor of Business.

Honorary Degree

*G*ordon Johnson Christensen

is a dentist's dentist. Since his early days studying pre-dentistry at USU 1954 through 1956, Christensen has worked his way through an illustrious career in all aspects of dental practice, research and teaching. □ He received his DDS at the University of Southern California, his MSD at the University of Washington and his PhD at the University of Denver. Since then he has presented more than 25,000 hours of continuing education throughout the world and has published hundreds of articles. □ He and his wife Rella are co-founders of Clinical Research Associates in Provo — which conducts research and publishes findings around the world. He also is currently both an adjunct professor at Brigham Young University and a clinical professor at the University of Utah. □ He has two sons and a son-in-law also in dental professions. □ Christensen is on the editorial boards of a dozen dentistry publications, was voted the Number one Dental Lecturer in the United States in 1989 and was elected to the University of Southern California Dentistry Hall of Fame in 1996. □ Utah State University proudly confers upon Gordon Johnson Christensen the honorary degree, Doctor of Science.

Honorary Degree

Winnifred C. Jardine

has a distinguished professional career that clearly defines her as one of the most important nutrition and food educators in Utah for more than four decades. □ She is a model citizen whose life is a combination of commitment to professional excellence, devotion to family and dedication to community service. □ She wrote a nutrition and food science column in the Deseret News for 36 years. Her insightful columns, feature articles and the numerous books she wrote about the food world preceded by many years society's current hunger for knowledge about food. □ She established herself as a reliable, up-to-date source of information on nutrition, food preparation and meal planning. Her writings were always well founded in fact and research, and she made frequent contacts with USU faculty to ensure accurate information and to promote USU as a resource for people who had difficult questions about food and nutrition. □ She is author of 10 books about food. Each of her books includes many recipes, but they also reflect Utah heritage and the changing cultural perspectives of the time. Winnifred's works truly are the work of an educator working to broaden the cultural vision of her audience. She also made her presence known in a number of professional and service organizations throughout the state. □ She has been a long-time active member in leadership roles in both the Utah Association of Family and Consumer Scientists and the Utah Home Economists in Business. She used these positions to become an influential force for strengthening families in Utah. □ Her personal life also reflects this same theme, as evidenced by the numerous church and civic responsibilities she undertook almost without relief. □ Winnifred Cannon Jardine represents model citizenry at every level of her life, and Utah State University is proud to bestow on her the degree, Doctor of Family and Consumer Food Sciences.

D. Wynne Thorne Research Awards

Richard W. Harris

had the demands of Department Head as well as the teaching duties of Professor in Electrical and Computer Engineering but he quickly became renowned at Utah State University for dynamic research and the solid research group that he spearheaded in image data compression. □ Under his visionary leadership from 1986 to 1998, the compression group produced at least 14 patents, 33 technical papers, 30 master's degrees, and four PhDs. Over 12 million dollars in external support was solicited for image compression technology for cable TV, reconnaissance, the medical industry, videophone hardware and software, and audio and video systems for distance education. □ By 1996, Dr. Harris's work in this area helped foster a spin-off company—Sorenson Vision Incorporated, a Cache Valley firm which employs over 50 people. □ Influential people from around the globe have flocked to see the breakthroughs in this technology which bore the mark of Rich's hand. He and his dedicated staff have met with authorities from the LDS church, the IBM Research Center, various industry leaders, and government officials from other countries in order to introduce the technologies generated in his lab. □ Before his untimely passing he was particularly concerned about finding a distance education method that would promote "interactivity" between teacher and students, and he was involved in actively demonstrating such a system. □ Therefore, it is a great honor to present the 1999 D. Wynne Thorne Research Award posthumously to Dr. Richard W. Harris.

Jan J. Sojka

is a Professor of Physics, the Assistant Director of the Center for Atmospheric and Space Sciences, and the Director of the Bear Lake Observatory. □ He is internationally recognized as one of the leading scientists engaged in modeling the Earth's upper atmosphere. □ His research has involved laboratory experiments, the analysis of rocket and satellite data, theory, numerical simulations, and project management. He has published more than 140 scientific papers in refereed journals and has presented or contributed to more than 180 talks at national and international meetings. □ Dr. Sojka has played a leading role in the development of time-dependent global models of the terrestrial ionosphere, which is the ionized region of the Earth's upper atmosphere. One of these computer models was selected to be the official Air Force model for forecasting space weather disturbances, which can adversely affect numerous civilian and military systems and operations. □ He has been a principal investigator, co-principal investigator, or leading scientist on numerous NSF, NASA, and Air Force grants. □ As a result, of his scientific competency and knowledge, Dr. Sojka is frequently asked to serve on NSF, NASA, and international review panels. He is currently serving on the prestigious NASA Sun-Earth-Connection Roadmap Committee, which is charged with planning NASA space science missions up to the year 2030. □ In addition, Dr. Sojka has been actively involved in several undergraduate research programs, including the Rocky Mountain Space Grant Consortium and the Get Away Special program, which provides an opportunity for students to fly experiments on the Space Shuttle. □ For his exceptional contributions to upper atmospheric research, for his mentoring of students, and for his service to the scientific community, Utah State University is proud to award Jan. J. Sojka the 1999 D. Wynne Thorne Research Award.

University Outstanding Graduate Mentor Award

Frederick D. Provenza

is world-renowned for his research on animal grazing behavior and nutrition, yet acclaimed by graduate students as a "real person" who cares about them as individuals and treats them as colleagues. □ Students praise Dr. Provenza's ability to share his scientific expertise and to model commitment to research, working closely with them from the conception of a research problem to the publication of results in professional journals--and along the way, participating enthusiastically in the "grunt work" of animal research, whether building fences and shelters, weighing animals, or gathering brush samples. □ Dr. Provenza's office door is always open to students, with "amazing" time for discussions of ideas, experiments, and personal concerns. □ His advising style is characterized as "gentle Persuasion," respectful, but firm, with an "uncanny ability to analyze the strengths and weaknesses of each student and provide personalized guidance." □ Dr. Provenza has advised international graduate students from 10 countries, caring for their personal well-being as well as their professional development. Dr. Provenza builds career opportunities for his students; he publishes with them--more than 50 refereed articles--and provides opportunities for them to present papers at professional meetings. It is not surprising that his former students, some now professors, remain in touch with Dr. Provenza as a research and career mentor and as a friend. □ Utah State University is proud to honor Frederick D. Provenza with the 1999 University Outstanding Graduate Mentor Award.

E. G. Peterson Extension Award

Becky Mitchell

is an Extension 4-H Youth Development Specialist who has been a guiding force in bringing together associations, businesses and diverse groups of people to work in a unified manner to help youth and volunteers develop their potential. □ Becky was instrumental in organizing the Utah 4-H Volunteers Association which sponsored innovative programs, such as an annual 4-H state calendar, Expressive Arts Camp, Space Camp, a Green Foods Cook-off at the State Fair and the State Fashion Show. They facilitate an annual Utah 4-H Leaders Forum in Salt Lake City for 800 leaders. □ In 1995 she coordinated the Western Region 4-H Leadership Congress in Salt Lake City for 300 youth. □ She has helped 4-H jump into the electronic age by utilizing satellite broadcasts throughout the state, bringing the state staff into county offices with an annual 4-H Family Night. □ For ten years, she was the state advisor to the Utah Future Homemakers of America and helped host their national convention for 2500 people. She has served on the National Teacher Education Task Force and served a three-year term on the National Board of Directors, including one year as chairperson. □ She has been the driving force behind the Character, Counts! Program in the state of Utah and has worked tirelessly with Extension offices, PTAs and school educators across the state to promote this character building program. □ Becky believes in youth and has dedicated her life to developing their potential by providing workshops focusing on leadership, creative thinking, and character and social skills. □ Utah State University is proud to award Rebecca Mitchell the 1999 E. G. Peterson Extension Award.

Eldon J. Gardner Teaching Award

James J. Kennedy

represents the highest standards of excellence of an educator. □ He is dedicated not only to his students but to the subject matter that he presents. Jim truly loves to teach. Since beginning his career at Utah State University in 1971, he has committed his efforts to the success of the students that pass through his classrooms. His sincere enthusiasm challenges students to learn more and to pursue topics outside the classroom. □ He radiates a level of energy when he enters the classroom that inspires his students to want to learn. His passion in the classroom—generated from his world-wide experiences—makes his subjects come alive. His lectures are packed with valuable information, very well organized, fun to attend, and even poetic at times. □ Because of his life-long study of the organizational culture of the natural resources management agencies, Jim is very sensitive in preparing his students to become part of those cultures as professionals—to become the future generation of “caretakers of the earth.” □ Jim is known for his standards of academic excellence as well as his congeniality to students beyond the traditional classroom setting. □ Jim is a teacher molded into mentor and friend. His students learn much more than can be found in a textbook or by taking notes. They learn about careers and life. He not only guides his students through required classroom material, but he also guides them through the process of making life-long choices. He follows his students beyond the completion of their degrees and maintains a commitment to their well being, fostering long-lasting relationships between the students and their alma mater. □ According to one of his students, Jim Kennedy taught me about forestry, and more importantly about living. He truly makes students believe they can make a difference. □ Utah State University is proud to honor James J. Kennedy with the 1999 Eldon J. Gardner Teaching Award.

Teaching Excellence Awards

Through an extensive selection process involving both students and faculty in the various academic colleges, eight members of the faculty have been designated for special recognition for excellence in teaching representing the eight colleges of the University: Agriculture; Business; Education; Engineering; Family Life; Humanities, Arts and Social Sciences; Natural Resources; and Science. From among the eight, The Eldon J. Gardner Teaching Award recipient is chosen; the seven remaining follow:

College of Agriculture

Janis Lynn Boettinger

has served as an exemplary teacher, mentor, and trusted faculty member in the Plants, Soils, and Biometeorology Department since 1992. She has been repeatedly honored as an enthusiastic, inspiring, and dedicated teacher with incomparable expertise in the area of soils genesis, morphology, classification, and interpretation. Her field laboratory excursions with students are legendary for their thought provoking commentaries on the edaphology and geomorphology of the Northern Utah landscape. Dr. Boettinger has an important impact on graduate education across the campus by serving on more than 20 graduate committees. She also keeps an extensive research program thriving with activities spanning the breadth from wetland soil determination to NASA-sponsored remote sensing of key soil indicators.

College of Business

Edward R. Stafford

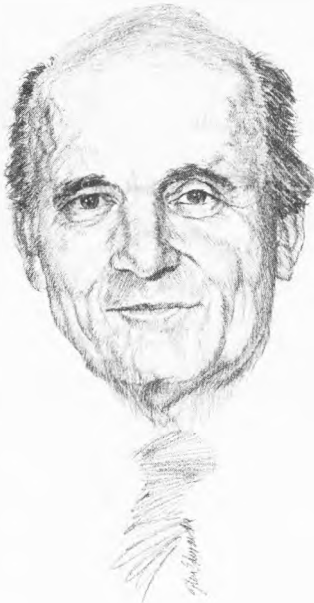

is a professor of marketing and has been teaching at USU since 1993. With a reputation as a student-oriented professor, Dr. Stafford has been recognized twice as the "Teacher of the Year" from the College of Business. After graduating from San Jose State University where he studied both marketing and opera, he earned a MBA from Santa Clara University. He obtained a PhD from Arizona State University, where he was awarded the 1993 Doctoral Teaching Award in his department. Dr. Stafford teaches the undergraduate and graduate-level marketing strategy courses, where students take on the role of consultants and conduct "hands-on" marketing audits for organizations. A strong emphasis is placed on using the Internet and electronic databases and applying strategy analysis frameworks to empower students with the ability to conduct similar projects on the job. He has authored many scholarly and professional articles, conference papers, and book chapters primarily in the area of international strategic alliances and environmental group-business collaboration.

College of Education

Beth E. Foley

has an outstanding record of teaching at USU since she joined the faculty in 1993. With a joint appointment in Communicative Disorders and Deaf Education and in the Center for Persons with Disabilities, Dr. Foley provides undergraduate interdisciplinary training in assistive technology and graduate course work in neuropathologies of speech and language, augmentative and alternative communication, and educational applications of assistive technology. Dr. Foley's research passion—exploring literacy development in persons who use augmentative and alternative communication—is communicated to her students through her enthusiasm, creativity, and humor. Clearly, Dr. Foley loves to teach. Students gravitate toward her as an adviser for master's degree theses and projects, and they seek out her courses which are alive with personal examples to supplement course content. Her dynamic presentation style is always complemented by practical, challenging assignments.

College of Engineering

J. Derle Thorpe

has been a True Aggie all of his life. He was student body president from 1958-59 and then joined the faculty in 1965. Students love, admire and respect him since he is an advocate and voice for them. He is their friend, a motivator, and an effective communicator as well as an excellent teacher. Professor Thorpe provides students with a jump start in their profession by helping them find summer employment in the engineering area. He works with high school students from 20 different high schools in northern Utah and southern Idaho for the High School Bridge Contest. He is heavily involved with Engineering State where high school students come to USU for a week. Professor Thorpe enjoys students and makes the world of learning fun and exciting.

College of Family Life

Tom C. Peterson

joined the Department of Human Environments in 1976 and has served as an exemplary educator ever since. He is constantly surrounded by students seeking advice and guidance outside the classroom. There are always comments from students with respect to his passion for teaching, his high level of preparation, and the fact that he manages to get students actively involved in the learning experience. Dr. Peterson's commitment to teaching can be seen in the recent development of one of the new University Studies courses on the "creative arts." This course focuses on a broad array of the arts, is of an experiential nature, and has grown from an initial enrollment of 20 three years ago, to more than 400 this spring semester. In addition to a variety of teaching responsibilities, he has also been active as an interior designer and has presented papers on his pedagogical styles and techniques at several national conferences. He is an invited member of the interior design accrediting organization, and has the opportunity to visit and review interior design programs through North America.

College of Humanities, Arts and Social Sciences

Phebe Jensen

joined the English faculty in 1995 as a scholar and teacher of British and Commonwealth Literature, with an emphasis in Renaissance Literature and Shakespeare. She has successfully taught a range of courses, including Literary Theory and Sixteenth Century British Literature. But by far her greatest love is teaching Shakespeare. She has introduced the bard to students of various levels and backgrounds, helping them all to become excited by the language and poetry of Shakespeare's work. Students describe Phebe as "dynamic," "enthusiastic," "exciting," "challenging," "awesome," and "caring." She is able to challenge and motivate students while fostering their engagement with the literature—making her classrooms among the most lively and dynamic on campus.

College of Science

J. R. Dennison

comes from a long line of teachers who instilled a great joy for learning. Since joining the Physics Department faculty in 1989, J. R. has taught a wide variety of formal classes at the introductory, lower and upper division undergraduate, and graduate levels. He has employed many formats including traditional lectures, laboratories, multimedia-based computer tutorials, seminars, summer workshops, in-service training for secondary teachers, outreach activities for secondary students, and research mentoring at both undergraduate and graduate levels. J. R. has been instrumental in course curriculum, and program development in the Physics Department at the introductory, major and graduate levels for more than a decade. Three key areas of emphasis have been the expansion, improvement and computerization of laboratories; development of curriculum using computer-assisted mathematics software and its incorporation throughout the physics program; and applications of Material Physics to practically oriented programs.
