Salt Lake City, Utah, April 12, 1905.

To The Trustees of the Agricultural College of Utah.

In support of the accompanying application, permit me to say in regard to my qualifications for the position applied for,—that for many years I have been familiar with poultry keeping and for several years have given attention and study to the problems of modern methods of treatment and care of fowls.

On the subject of Meteorology my knowledge comes from study and observation for a number of years and by frequent visits to and correspondence with the officials of the U.S. Weather Bureau offices. On the question of my intelligent comprehension of this subject I am permitted to refer to Dr. R.J.Hyatt, Section Director, and to the official Observers in the Salt Lake City Weather Bureau Station.

I am also familiar with the best methods and practices of Agriculture and Horticulture. For several years I have resided on a place of five acres near Salt Lake City on which are varieties of tree fruits, small fruits and grapes together with land otherwise used. The care of this place has been under my personal supervision and much of the work has been done personally by me.

I desire to suggest further that the preparation of various written papers for many years, my residence in

2.

several different States, east and west; and my connection with different business matters, especially in relation to land. should be of great service in the position applied for.

Respectfully submitted,

Albert W Casey
