This Application for Faculty (Meteorology), 1905 is brought to you for free and open access by the William J. Kerr at DigitalCommons@USU. It has been accepted for inclusion in Applications for Staff Employments Faculty, Student and Graduate by an authorized administrator of DigitalCommons@USU. For more information, please contact rebecca.nelson@usu.edu.
Dear Sir,

If the vacancy in the Poultry department of the Experiment Station, caused by the absence of Prof. Dryden, has not been filled, I kindly ask you to consider my name as an applicant for that position.

As to my likely ability to fill the same I would refer you to Prof. C. E. Paul, President of the L.D.S.U. at Salt Lake City. Or J. E. Palmer, Jos. Nelson, Cashier Utah National Bank, Salt Lake City. As to my integrity and knowledge of business in detail I would refer to Mr. T. E. Nelson, Sup. G.F.M.D. Salt Lake City. Or Mr. C. F. Wadley, B. Dept. G.F.M.D. Salt Lake City. (Whom I am not presently employed) I might also refer you to the Editor of Farm Poultry, 232 Summer St., Boston, Mass.

With the exception of Prof. Paul none of these parties have been consulted with in regards to this matter.
I have never made any pretense as a writer for publication, but inclose two of a number of articles I wrote to the "Desert News" and which was published without change. Should you consider this application favorably and desire any further information I will gladly furnish it if it is possible for me to do so.

Yours truly,

Duncamore Duncan,

To G.C. W.,
Salt Lake City,
Utah.
In my last letter I asked three questions: one on the method of poultry to the public; where does it come from? and, who gets the benefit? The first of these questions I have in mind entirely unanswered. And I believe, in the second, I have only indicated features in them. As is customary in such letters, I refer to the judgment of our district courts.

The first question, as to the settling of the law of the county where the reports were adopted, both of which were time allowed for, refers to the judgment of the county where the reports were adopted. As to the judgment of the two former, 86, 69 and 73, the reports were referred to the judges. The two judges were found necessary for the district court and docketed in the county clerks with the other proceedings. The reports cannot be cited to appear in the state, and according to the merits of the cases, were passed.

Frauds of the city officials, was passed.

A special order for excavation which may be cited to appear in the state, and according to the merits of the cases, were passed. A special order for excavation which may be cited to appear in the state, and according to the merits of the cases, were passed.

JOHN M. WHATTEN.

The regular meeting of the council of the Priests of the Second Ward of Pioneer Stake will hold its regular monthly meeting Monday, Feb. 6, at 7 p.m. All members of the Priesthood of the Stake are requested to be present.

The council of the Priests of the Second Ward of Pioneer Stake will hold its regular monthly meeting at the Stake meetinghouse at 7:30 p.m., Thursday, Feb. 9, at 11:30 a.m. All members of the Priesthood are requested to be present.

SELECTING BREDING STOCK.

Be sure that every individual in the pen is healthy, and that you have a complete and trustworthy record of the birds, the number and like actions of the fowls.

For females, select one or two that have been at laying eggs and indicate almost a daily occurrence. But how can I know if she is sure to continue? It requires a few hens, then, to hatch the eggs to the extent that some were among the poorest layers. Their eggs must be used only these few hens to obtain your best work in egg production. It is supposed that like produces like, to a certain extent, and don't try to see how many eggs a bird has laid, but rather the eggs you want their eggs for hatching. Pre- 

In the same way, select males, remembering that like produces like, to a certain extent, and don't try to see how many eggs a bird has laid, but rather the eggs your stock for next year's work, remember that like produces like, to a certain extent. As this winter is fully matured. Anyone can make this choice by noting the bright appearance and lively actions of the fowls.

This must be used as to the time when he hen goes in. It is important to get one bird having the most good points from the same color and shape standpoint. At the end of the winter, the eggs from that pullet are practically at an end, for that winter. D. D.

Selecting the Male Birds.

I have already told how to select the hens. Having done this, take a setting hen, and use only these few hens to hatch the eggs, for after not more than 50 cents, and will last a long time. Now you should have the best layers if it is eggs you want.

Begin hatching, for you surely cannot use these birds for hatching in the same way, select males, remembering that like produces like, to a certain extent. As this winter is fully matured. Anyone can make this choice by noting the bright appearance and lively actions of the fowls.

This must be used as to the time when he hen goes in. It is important to get one bird having the most good points from the same color and shape standpoint. At the end of the winter, the eggs from that pullet are practically at an end, for that winter. D. D.

The Care of the Breeding

Year's work. These few are worth to you what are the three birds of each sex that you have for not more than 50 cents, and will last a long time. Now you should have the best layers if it is eggs you want.
