Salt Lake City, .............................................. 190

Prof. W. J. Kerr,
President Agricultural College, Logan,

Dear Sir,

If the vacancy in the Poultry Department of the Experiment Station, caused by the absence of Prof. Graden, has not been filled, I kindly ask you to consider my name as an applicant for that position.

As to my likely ability to fill the same I would refer you to Prof. J. A. Paul, President of the L.D.S. U., at Salt Lake City, or J. E. Palgrave, Jos. Nelson, Cashier Utah National Bank, Salt Lake City. As to my integrity and knowledge of business in detail I would refer to Mr. E. W. Rich, Sup. Gen. M. D. Salt Lake City, or Mr. J. R. Woolley, B. Dept. Gen. M. D. Salt Lake City. (Where I am at present employed) I might also refer you to the Editor of Farm Poultry, 232 Summer St., Boston, Mass.

With the exception of Prof. Paul none of these parties have been consulted with in regard to this matter.

I have never made any pretense as a writer for publication, but inclose two of a number of articles I wrote to the Deseret News and which was published without change. Should you consider this application favorably and desire any further information I will gladly furnish it if it is possible for me to do so.

Yours truly,

Duncan

Facts for Cataract Sufferers.

Catarrh is an excessive congestion, caused by an accumulation of mucus in the lungs. It is due to the fact that the lungs are not properly drained of the excess mucus, and that the eyes are sensitive to catarrh. This causes a burning sensation in the eyes and a dryness of the nose. The nose becomes dry and the eyes become red and sore. It is best treated by the use of a warm compress on the nostrils and the application of a cold compress on the eyes. It is also advisable to take a cold bath and to avoid exposure to cold drafts.

PERSPRING, HUMAN HAND.

Old age is replaced by modern mechanization, in the manufacture of food. Everything clean and sanitary, to be eaten on every day. All goods are produced as they are needed. The laborer is paid according to the work he does, and not according to the amount of money he earns. The government provides for the care of the aged and the disabled, and the poor. The poor are given a means of support, and the sick are provided for.
and growing another. The moulting season is quickly at hand, and the
breeder. Among your dozen or more best layers if it is eggs you want.
