MESSAGE FROM PRESIDENT NOELLE E. COCKETT

Congratulations to the Utah State University class of 2021. You have completed an important life journey. I wish you great success in whatever comes next and trust that your experience at Utah State University has prepared you well for what is ahead.

As a graduate of Utah State University, you have been exposed to the three “pillars” of the land-grant university system – learning, discovery, and engagement. It is my hope these themes emerged during your time in school through unique academic experiences, hands-on research projects, and service opportunities. As you embark on the next chapter of your life, these moments have provided a foundation for a better life for you and those you encounter.

You are a different person today than you were when you first connected with USU. Over the years you have not only worked toward a degree, but you have grown intellectually and matured socially and emotionally. You are prepared to make the kind of positive impact that proud Aggie graduates before you have made and continue to make.

Your time at Utah State University has likely been filled with successes, but you have also faced obstacles. All of you dealt with unprecedented challenges over the last year as Aggies. It has been a difficult time as a university, a community, a nation, and a world. However, the class of 2021 is resilient. This will serve you well in the future as you seize exciting opportunities and make the world a better place.

I would like each of you to know what an incredible privilege and opportunity it is to serve as your president. Thank you for the special honor that has been mine to share in this significant part of your life. I am proud to be your president and part of the Aggie family.

A BRIEF HISTORY OF COLLEGIATE MACES

Maces have long been part of academic heraldry, though their function was not always ceremonial. Originally weapons of war, maces are featured often in ancient Egyptian art where kings are shown ritually smiting their foes. This original function has not been entirely lost. Campus officials in the Middle Ages more than once kept students in line by employing their university's mace in a manner recalling its primitive function.

University maces today are, for the most part, treated as decorative emblems symbolizing the institution's authority. Seen most often at commencement and other solemn occasions, they remind those in attendance of the deep traditions inherent in a student's journey through university studies. Like the word for the ceremony itself, "commencement"—which admonishes its participants to remember that this is a celebration of beginnings, not endings—the mace turns the eye forward to the life to come by recalling the rich academic heritage of higher learning and the promise of attainment that comes through education and self-betterment. Our mace, thus, combines elements of both the old and the new, traditional features like gems and stone enhanced with modern designs such as arcs of faceted crystal. Both an impressive work of art and a hallmark of the university's history, this mace brings to light everything that is best about Utah State University.

UTAH STATE UNIVERSITY'S CEREMONIAL MACE

The top of the mace depicts the circle of learning, the cycle of study, practice and tradition in which we learn, grow and teach. In the same way the students, alumni, professors and practitioners of Utah State University represent our highest achievements, the brushed copper disk emblazoned with the university's official seal crowns the mace and sends light upward in every direction, symbolizing the illumination of truth reaching out across our community, our state and our world.

The copper bezel has thirteen sunstones set into it. These symbolize the thirteen presidents who guided the institution through its first century.

The white oak shaft comes from wood that was originally part of the banisters of Old Main and was rescued from the building after the fire of 1983.

The base consists of limestone provided by The Church of Jesus Christ of Latter-day Saints and taken from the same quarry that was used to build the Logan Temple.

The mace of Utah State University envisions the very essence of our land-grant institution: seated in the bedrock of our community, striving and growing ever higher, sealed on top by a ring of metal, an emblem of our timeless quest for the merits born of learning.

ACADEMIC HERALDRY

The history of academic heraldry reaches back into the early days of the university. In England in the fourteenth century, the statutes of certain colleges forbade “excess in apparel” and prescribed the wearing of a long gown. Hoods were used to cover the head until replaced by the skull cap and later academic caps. When American colleges and universities decided to adopt some suitable system of academic apparel, it seemed best to agree on one that all might follow. Accordingly, there was held on May 16, 1895, at Columbia University, a conference of representatives of the boards of various interested institutions. From that meeting came a code of academic dress for the colleges and universities of the United States.

GOWNS

The academic gown for the associate and bachelor’s degrees has pointed sleeves and is designed to be worn closed. The gown for the master’s degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut, and the front part has an arc cut away. It is designed this way so that it can be worn open or closed. The gown for the doctoral degree has bell-shaped sleeves and may be worn open or closed.

HOODS

Academic hoods are worn by recipients of advanced degrees. The master’s degree hoods are three-and-one-half feet in length and are lined with the official color or colors of the college or university conferring the degree, which at Utah State University are navy blue and white, displayed in a heraldic chevron. The doctoral hood consists of a larger and longer assemblage of institutional color draped over the recipient’s shoulders and falling well down the back. The binding or edging of the hoods is of velvet or velveteen, three inches wide for the master’s degree and five inches wide for the doctoral degree.

CAPS

Academic caps come in two forms: the traditional mortarboard (from Oxford) or square cap; and a soft cap that resembles an oversized beret (from Cambridge). The mortarboard used by Utah State University is worn with a tassel. The color of the tassels designates the graduate’s major field of learning, and gold tassels indicate doctors and the governing officials of institutions.

COLORS

For all academic purposes, including trimmings of doctoral gowns, edging of hoods and tassels of caps, the colors associated with the different academic disciplines are as follows:

- Agriculture and Applied Sciences, *Maize*
- Arts, *Brown*
- Business, *Drab*
- Education and Human Services, *Light Blue*
- Engineering, *Orange*
- Humanities and Social Sciences, *White*
- Natural Resources, *Russet*
- Science, *Gold-Yellow*
- School of Graduate Studies, *Black*
- Associate and Integrated Studies Degrees, *Black*

COMMENCEMENT SPEAKER & HONORARY DOCTORAL DEGREE

JULIE ANN ROBINSON

What do humans need to survive? Air, water, nutrients, shelter, sleep? At first glance, it's a short and seemingly simple list. Yet, ensuring all of these needs are met becomes increasingly complex at closer observation – and, beyond the familiar confines of our planet.

Utah State University alumna Julie A. Robinson, as Chief Scientist for Human Exploration and Operations at NASA Headquarters, grapples with these questions on a daily basis. She has been a leader throughout her career and is known for her perseverance and curiosity.

In 1985, as a senior at Pocatello, Idaho's Highland High School, Robinson persisted in her plans to attend college despite financial hardships at home. She remained hopeful as she planned to pursue full-time work to fund her delayed educational plans. A call from Utah State University came, with an offer for a four-year, full tuition Presidential Scholarship.

In Logan the Honors student chose chemistry and biology as majors and immersed herself in undergraduate research. As an undergraduate, she participated in research before undergraduate research was formalized and as common as it is today, which provided a critical foundation for her career path and professional success. Key mentors, including the late Joseph K.-K. Li, along with Karen and Joseph Morse,

encouraged her to pursue graduate study. She earned a doctoral degree in ecology, evolution, and conservation biology from the University of Nevada, Reno in 1996.

Beginning her career with Lockheed Martin in the Image Science Laboratory at the Johnson Space Center, Robinson would go on to lead major NASA-sponsored scientific projects and facilitate a distribution network for global maps of coral reefs in the developing world.

Within two years of joining NASA as a civil servant at Houston's Johnson Space Center in 2004, Robinson was named deputy ISS program scientist. As a leader in the space agency's interdisciplinary process, she has grabbed the reins to prioritize countless research ideas and distill an integrated approach from concept to design, assembly, and use.. Her professional experience is highly interdisciplinary and has included virology, analytical chemistry, genetics, statistics, animal behavior, field biology, Earth science and remote sensing.

In 2007, Robinson became the International Space Station Program Chief Scientist and is now at NASA Headquarters as the Chief Scientist for Human Exploration and Operations. She provides science advice at the highest levels of the agency, promoting exploration research and demonstration strategies onboard the ISS and other human spaceflight platforms. She founded the ISS Program Science Forum, made up of her counterparts from each ISS partner agency, increasing international collaboration and effective use of ISS by scientists from more than 100 countries. In 2011, Robinson was awarded the NASA Outstanding Leadership Medal.

Robinson stands side by side with scientists and engineers at NASA who work synergistically and are driven by a passion for understanding the 'hows' and 'whys' of the universe. Her passion will drive advancements in human space travel, and allow people to explore and thrive beyond the Earth.

For her courage and willingness to take risks, her leadership, and for her work in the advancement of women in science, Utah State University is proud to bestow on Julie A. Robinson the honorary degree of Doctor of Science.

HONORARY DOCTORAL DEGREE

LINDA SKIDMORE DAINES

Linda Skidmore Daines is known for her passion for two worlds: the arts and business. An alumnus of Utah State University, Daines has risen to the upper echelons of high finance through her work at Goldman Sachs, but she has always retained her love of the arts and humanities.

A native of Logan, Utah, Daines majored in cello performance at USU and married Richard F. Daines. Together they moved to New York City where she worked at The Spence School, a leading private girls school, as a music teacher and music department chair. Her passion for self-education continued as she studied under Claus Adam of the Juilliard String Quartet and performed with The New Amsterdam Symphony

Orchestra. While raising three children, she also pursued a master's in arts administration and obtained an MBA from Columbia University.

In 1984, Daines joined Goldman Sachs and in 2001 became one of the first female Managing Directors in Private Wealth Management at the firm. Over her 35-year career at Goldman Sachs, she has advised significant families, foundations, endowments, private companies and pensions on their investments.

She serves as a trustee of The Chamber Music Society of Lincoln Center, The School of American Ballet, and The Utah Journalism Foundation. She also serves on the Board of Cache Valley Bank, the National Advisory Council for Brigham Young University and on USU's Leonard Arrington Council and the Dean's Advancement Council at the Caine College of the Arts.

Throughout her career in business and her pursuit of community impact, Daines has maintained extensive involvement with USU's Caine College of the Arts, committing her time and resources to scholars in all fields. Her dedication to preserving and celebrating history and heritage provides students a role model of passion, generosity, and community impact.

For her professional achievements, her contribution to the world as a humanitarian and lifelong learner, and her commitment to advancing women in the studies of both arts and business, Utah State University is proud to bestow upon Linda Skidmore Daines the honorary degree of Doctor of the Arts.

HONORARY DOCTORAL DEGREE

KAREN W. MORSE

Karen W. Morse is a proven leader thanks to an illustrious career that included numerous accolades from the scientific community due to her expertise in chemistry, but also because of her work alongside many peers to change the status of women on the university campus.

From a career beginning as a research chemist at the Ballistic Research Lab at the Aberdeen Proving Ground in Maryland, and culminating in her serving as the first female president of Western Washington University, Dr. Morse has been known as a trailblazer and inspiration for women pursuing science careers in academia.

Dr. Morse joined Utah State University's Department of Chemistry in 1968 as a part-time lecturer, one of only two female faculty in the College of Science at the time. Her time at the university would create many opportunities to lead in a time of great change. During her quarter of a century at USU, Dr. Morse was named the first female department head of chemistry, one of just three women in the United States at the time serving in that capacity in the area of the sciences; was the first female dean of science, the only female dean of science at a research university; and was the first female vice president and provost of academic affairs.

Throughout her career in academia, Dr. Morse continued to pursue and further her chemistry research. She has three

patents to her name, has been published extensively in the field of chemistry, and was actively involved with the American Chemical Society and the National Science Foundation, serving on numerous committees, boards, and review panels. In April 1997, Dr. Morse received the Francis P. Garvan-John M. Olin Award, one of the American Chemical Society's highest honors. She is also a fellow of the American Association for the Advancement of Science.

Involvement with female colleagues early on in her career led Dr. Morse to become an advocate for issues facing women in academia. She became an integral part of the USU Status of Women Committee in order to help improve the standing of female faculty and students. Dr. Morse's role as a mentor to fellow women on campus, including female students, would play an ever-increasing role throughout her life. Early in her career, she served as faculty advisor to the newly formed female physics students club, still in existence today as the USU Women in Physics Group. This passion would lead Dr. Morse and her husband Joseph, who served as director of Honors and as an associate professor of chemistry, to create the Morse Scholarship at USU, an endowment to assist future generations of students in the Honors Program. Later, at Western Washington University, Dr. Morse established the Karen W. Morse Institute for Leadership at Western Washington University to provide opportunities for students to learn about and develop their leadership potential through academic courses, professional speakers, and a collaborative learning and leading experience.

During Dr. Morse's tenure as president from 1993 to 2008, Western Washington University experienced tremendous growth – of the campus, the faculty, and the student body – while elevating its national reputation. She credits her success as a leader to the foundation Utah State University provided for her, particularly with its focus on student involvement in scholarly activity and excellence and commitment in the classroom.

For her inspirational leadership and success in research, as well as for her unwavering commitment to provide opportunities for supporting and advancing women in the studies of science, Utah State University is proud to bestow upon Karen W. Morse the honorary degree, Doctor of Science.

MESSAGE FROM PROVOST

FRANCIS D. GALEY

I would like to take this opportunity to congratulate and celebrate the accomplishments of our 2020-21 graduates. This is a milestone you have fought hard to achieve. But it is impossible to celebrate the success of graduates without recognizing, as well, their teachers. I am confident there are many within the faculty, administration, and even your parents, who would not have enjoyed present successes without the influence of great teachers in our lives. Author Pat Conroy put it this way: “If there is more important work than teaching, I hope to learn about it before I die.”

With this in mind, I’d like to take a moment to invite each graduate to think about the faculty, advisors, and staff who have helped you succeed in your goal to earn this degree. I challenge you to find a way to express your appreciation to them.

In the following pages you will read about the recipients of this year’s faculty awards encompassing teaching, research, extension, and service. These recipients aptly represent the mission of Utah State University to “serve the public through learning, discovery, and engagement.” We are very proud of them and acknowledge that they are faculty who are indicative of their peers.

As graduates, now is the time for you to apply all you have learned. It is my earnest hope that you have learned more than facts and figures or definitions and dates. I suspect you have also learned about compassion, leadership, critical thinking, teamwork, and so many other attributes and skills. The world needs thinking and feeling citizens. It needs “citizen scholars.”

Please remember that wherever you go, you will always take a bit of USU pride with you. Your heritage now includes a USU degree, and you’ve earned it! Congratulations, and Go Aggies!

Sincerely,

A handwritten signature in black ink that reads "F D Galey". The signature is written in a cursive, slightly stylized font.

CAZIER LIFETIME ACHIEVEMENT AWARD

R. RYAN DUPONT

Dr. Dupont has more than 38 years of experience teaching and conducting applied and basic research in environmental engineering at the Utah Water Research Laboratory. He received a BS in Civil Engineering, and an MS and PhD in Environmental Health Engineering from the University of Kansas. He is a Professor of Civil and Environmental Engineering, served as the Head of the Environmental Engineering Division, was instrumental in establishing an Undergraduate Program in Environmental Engineering at USU, and has been responsible for attracting more than \$6.8 million in extramural funding. Dr. Dupont was recognized as an Outstanding Young Engineering Educator by the American Society of Engineering Education in 1988 and used the stipend provided to establish a scholarship for women and minorities that has provided financial assistance to approximately 25 students. In 2015 he was the recipient of the Richard I. Stessel Waste Management Award, for “distinguished achievement as an educator in the field of waste management” from the Air and Waste Management Association.

Dr. Dupont has been actively involved in Engineers without Borders as a faculty advisor to the Mexico Team and supervised student research with biosand filters that have been implemented within the community of La Salitrera. His community-based research has also involved technical support to communities throughout Utah, including providing technical assistance in the implementation of a central sewer system in Smithfield, evaluation of water supply and wastewater reuse options for Cedar City, and analysis of the environmental impact of expansion of green waste recycling in Salt Lake County. In addition, Ryan has participated in three USU Community Bridge Initiative projects with Logan City providing a cost/benefit analysis of rural recycling in Cache Valley, evaluating energy recovery alternatives and analyzing options for nutrient removal process optimization at the new Logan Regional Wastewater Treatment Plant. Ryan served on the Solid Waste Management Council for Salt Lake County and the State of Utah Hazardous Waste Control Board and currently serves on the Cache County Solid Waste Advisory Board and Logan City Renewable Energy and Sustainability Advisory Board, all in the role as Technical Expert. He has been involved in Community Science and Technology Outreach activities with USU satellite campuses in Blanding and Moab and has participated in the Native American Student Program in the College of Science. Ryan’s most recent community outreach activities have focused on support of university actions to limit COVID spread on campus in the sampling of wastewater from on-campus student housing units.

D. WYNNE THORNE CAREER RESEARCH AWARD

RONALD SIMS

Dr. Ronald Sims, professor in the Biological Engineering Department, has been making his mark at Utah State University and beyond for nearly 40 years. Dr. Sims has proven himself dedicated to tackling the challenges of harmful algal blooms, agricultural sustainability, as well as sustainable energy. His focus on protecting public health and the environment through biological science-based engineering has been a critical component to his success. Dr. Sims received his bachelor's degree at the University of Dayton, and his first master's degree from the University of North Carolina at Chapel Hill, followed by his second master's at Washington State University. He received his Ph.D. from North Carolina State University. Even before he founded the Biological Engineering Department at USU, he taught, researched, and mentored students in the division of Environmental Engineering within the Department of Civil and Environmental Engineering when he was hired in 1982. Dr. Sims has served as the head of the Biological and Irrigation Engineering Department and was the founding head of the Biological Engineering Department. Dr. Sims was the director of the Utah Water Research Laboratory and has been the

co-director of the Sustainable Waste to Bioproduct Engineering Center for more than a decade. Dr. Sims' research has brought in over \$15 million of external funding, including nearly \$2 million granted by the U.S. Department of Energy in 2020 for his work on wastewater treatment. He has more than 260 publications to his name, and, according to Google Scholar, he has been cited nearly 9,000 times in other articles and books. He has been recognized as a fellow by both the American Institute for Medical and Biological Engineering—representing the top two percent of the medical and biological engineering community—and the Institute of Biological Engineering, of which he was president in 2012. He received the prestigious Utah Governor's Medal for Science and Technology in 1993. At USU, he has served in many capacities beyond educator and researcher. He mentors between 60 and 80 students each year and has served as faculty advisor or major professor for 52 Ph.D. and master's students. For his exceptional research, teaching and service achievements, Dr. Sims is highly deserving of the 2021 D. Wynne Thorne Career Research Award.

E. G. PETERSON EXTENSION AWARD

KATHY RIGGS

Kathy Riggs is an Extension professor, assisting those in Iron County with her professional skills, talents, and positivity. She began her Extension career in Juab County over 38 years ago.

Kathy provides leadership and support for family and consumer sciences and 4-H programs. She has obtained grant funding to support much needed after-school programs. She has developed many partnerships that promote positive youth development as she has served those in high-needs demographics.

Kathy has served on 29 promotion and tenure advisory committees. She has held leadership positions in all state and national professional associations, most recently as a member of the National Extension Association of Family and Consumer Sciences board. She recently completed a term on the National Association of Extension 4-H Youth Development board of trustees as Western Region director.

As the Extension representative, Kathy served for two terms on Faculty Senate. She currently serves Extension Home and Community faculty as assistant editor for the FastTrack publication tracking system. She also serves as a member of the Faculty and Staff Hiring, Retention and Success Working Group, which is part of President Cockett's Diversity and Inclusion Task Force.

Kathy has a history of motivating and being inclusive of both new and experienced faculty. Many Extension employees have benefited from her mentoring and support throughout their careers. Kathy is appreciated, respected, and admired, and she truly exemplifies the 4-H motto to "Make the Best Better."

The E. G. Peterson Extension Award honors the USU Extension faculty member who has provided outstanding service to the state. Kathy has done just that for those she serves in Extension, her community, and Utah.

FACULTY UNIVERSITY SERVICE AWARD

JOYCE KINKEAD

Not one segment of the tripartite mission of Utah State University—teaching, research, and service—has been overlooked by Joyce Kinkead, Distinguished Professor of English. Recognized nationally and locally as a teacher and researcher, she has never forgotten the responsibility and opportunity to serve USU. She follows a philosophy of “servant leadership,” the main goal of which is to build better organizations, enrich individual lives, and create a more caring world. She shares power and helps others develop as leaders. A cornerstone of shared governance is faculty involvement in decision-making. Her leadership of the General Education Reform Task Force in the mid-1990s exemplified this approach. In addition to the central committee, she created sub-committees involving nearly 100 faculty to provide input and advice.

Hired as Director of the Writing Center in 1982, almost immediately she became involved in faculty service when invited to join the Remedial Education Committee. It was a welcome opportunity to meet colleagues from across campus and form relationships. Faculty members are often in academic silos, but one of the most rewarding experiences for her proved to be serving on a small task force focused on retention in 2001. The group included institutional research and Student Services personnel. They called students who had not returned to USU, uncovered the reasons behind those decisions, and then set about enacting policies and practices to change retention numbers. That led to USU’s first comprehensive enrollment management and marketing initiative that literally changed the face of the institution as well as a national award for improved retention rates. This initiative to improve student success at USU was only the first in a steady stream of service initiatives. Fast-forward to 2020 as Dr. Kinkead concludes her role as co-chair of President Cockett’s Year of the Woman celebration, the evidence of which is visible in more than 80 news stories about Aggie women past and present as well as permanent signage on campus buildings named in honor of distinguished women. Over a nearly 40-year career at USU, on dozens of significant committees, Professor Kinkead has dedicated herself to having a positive impact on the institution and the lives of faculty and students.

FACULTY RESEARCHER OF THE YEAR AWARD

REGAN ZANE

Dr. Regan Zane is the first and only David G. and Diann L. Sant Endowed Professor in the College of Engineering at Utah State University. His research programs cover key aspects of electrified transportation charging systems and infrastructure, from battery, vehicle, and charging systems to grid integration, smart-charge management, demand response and distributed energy resources. While at USU, Dr. Zane has founded the USU Power Electronics Lab (UPEL), the Electric Vehicle and Roadway (EVR) research facility and test track—the first of its kind in the U.S.—and the Battery Limits and Survivability Test (BLAST) lab. He has published more than 200 journal articles and peer-reviewed papers—at least 100 during his time at USU—and has been awarded 17 patents in the same time frame, with a career total of 26. Dr. Zane’s research has brought tens of millions of dollars of state, federal, and private industry funding into USU, and he was awarded the Electrical and Computer Engineering Department’s Researcher of the Year Award in 2017. In addition to his research, Dr. Zane designed USU’s power electronics curriculum from the ground up, from general undergraduate to graduate-level courses. In 2020, Dr. Zane

was awarded a five-year, \$26 million grant from the National Science Foundation for an international engineering research center to transform transportation and electric utilities—the two largest industries in the U.S. The Advancing Sustainability through Powered Infrastructure for Roadway Electrification center (ASPIRE) brings together nine universities, 55 faculty, four national labs and more than 50 other industry partners. His direction of ASPIRE led to Dr. Zane being named the Utah Clean Cities Sustainability Partner of the Year in 2020. Dr. Zane’s innovation, vision, and dedication to a more sustainable future through research and partnerships make him highly deserving of the 2021 Utah State University Faculty Researcher of the Year Award.

ELDON J. GARDNER TEACHING AWARD

HELOISA RUTIGLIANO

Dr. Heloisa Rutigliano teaches complex subjects in clear and creative ways to students of animal science and future veterinarians in Utah State University's School of Veterinary Medicine. She is also an esteemed researcher whose teaching is not reserved for the classroom.

Dr. Rutigliano's lab welcomes students who are willing to learn and work—including those with little or no laboratory experience—and she guides them in making meaningful discoveries and contributions to the field of animal science.

She currently teaches courses in animal physiology, immunology, endocrinology, and veterinary ethics and professionalism. Dr. Rutigliano's students note that she begins each semester stressing her desire for them to succeed and making it clear that she welcomes their questions in and outside of class time. Students appreciate her use of activities such as case studies that let them apply and test their knowledge without negative effects on their grades and praise her interest and concern for each one of them as a whole person and not just their performance in her class.

In addition to her understanding of the demanding animal science subjects she teaches, Dr. Rutigliano is an avid student of evolving methods of learning and teaching. She established an Animal, Dairy and Veterinary Sciences Department Learning Circle where faculty come together to improve their teaching practices. In 2020, that included virtual gatherings of faculty who worked to improve their online teaching.

In 2017, Dr. Rutigliano was honored with the Outstanding Year-1 Teaching Award in the Washington-Idaho-Montana-Utah Regional Program in Veterinary Medicine. In 2019, she was named a Fellow of the Regional Teaching Academy of the Consortium of West Region Colleges of Veterinary Medicine. In 2011, she received the Outstanding Young Investigator Award from the American Society for Reproductive Immunology.

Dr. Rutigliano earned her Doctor of Veterinary Medicine degree at Sao Paulo State University in her native Brazil, and her master's and doctoral degrees at the University of California, Davis.

TEACHING EXCELLENCE AWARD

SARA BAKKER

Caine College of the Arts

Sara Bakker is Assistant Professor of Music in the Caine College of the Arts. Her passion for teaching impacts everything she does at Utah State University, from formal classroom teaching to community teaching opportunities, to research, and service.

In her classroom teaching, Dr. Bakker makes music theory applicable to students at a variety of levels, from non-music majors with limited background in music to undergraduate and graduate music majors with divergent program needs. She emphasizes student-choice in repertoire and format throughout the curriculum, helping students integrate their written and aural music theory skills into their regular musical practice. She creates stylistic composition projects and prose writing assignments to develop critical thinking and analyzes a variety of musical styles, from Western tonal music to jazz and popular music to contemporary art music by living composers. She draws especially on music by women and composers of

color, and engages students in social issues that are impacting the field of music, including access, representation, and climate change. To accommodate coronavirus safety, she developed a successful blend of synchronous and asynchronous learning in all of her classes, combining recorded mini-lectures, substantive group work, and synchronous, interactive lectures.

Outside of the classroom, Dr. Bakker models Public Music Theory for her students, offering informal learning opportunities for the broader Utah State University community. She has given preconcert lectures and written program notes for the Chamber Music Society of Logan, American Festival Chorus and Orchestra, and a variety of other concerts and events throughout the Music Department.

In her pedagogy research, Dr. Bakker focuses on practical ways the Scholarship of Teaching and Learning can impact the music theory classroom. She has published on how to use evaluation as a motivational tool, how to incorporate prose writing into the music theory curriculum, and how to create Bloom-inspired learning objectives for music theory. Currently, she is working on collaborative research with regional, national, and international scholars to make music theory teaching more effective based on findings about learning in cognitive science.

Finally, teaching also features prominently in Dr. Bakker's service portfolio. She is director of the Caine Scholars for Excellence Program, a competitive scholarship for students in music, theatre, and art and design. She develops annual themes, organizes biweekly discussion meetings, and plans experiences and travel that expand the life-experience of future leaders in the arts. She is also the Department's Honors Departmental Advisor in music, offering feedback on student-developed projects and helping them navigate ways to make the program meaningful to them. Additionally, Dr. Bakker serves on USU's Empowering Teaching Excellence Faculty Committee, is a textbook reviewer for Oxford and Routledge, and an editor for the music pedagogy journal *Engaging Students*.

TEACHING EXCELLENCE AWARD

JACKSON GRAHAM

College of Engineering

Jackson Graham is a Professional Practice Assistant Professor in USU's Department of Mechanical & Aerospace Engineering. He graduated with bachelor's and master's degrees from the University of Florida in Gainesville and joined USU in the spring of 2015 as a lab engineer and instructor. He implemented sweeping changes to the department, developing new laboratory experiments that reinforce mechanical engineering concepts and improve the lab experience for students. In 2016 he began teaching the engineering graphics course and an upper-level course on special problems in engineering. Today, Jackson leads the senior capstone program, a two-semester experiential learning course in which students develop solutions for real-world engineering problems.

Prior to joining USU, Jackson served in the United States Army from 2004 to 2008. He attended the Army's Ordnance Center and Schools at the Aberdeen Proving Ground in Maryland, which is recognized as one of the nation's most important research and development, testing, and evaluation facilities for military equipment. He was trained as a wheeled vehicle mechanic and received an additional skill identifier for electrical systems repair. He later served tours in Europe and the Middle East as a vehicle mechanic. He has also worked for the U.S. Forest Service as a trail crew technician, building trails in the Teton Wilderness Area using only hand tools and explosives.

Jackson is also a skilled designer. For his master's degree, he designed and manufactured a prototype of an emergency braking device for tractor trailers. He also designed an autonomous watercraft that has a novel rim-driven propulsion system. The vessel design earned him an innovation award at the 2014 Association for Unmanned Vehicle Systems International, or AUVSI, RoboBoat Competition for outstanding hull form and propulsion system design.

TEACHING EXCELLENCE AWARD

JEANNIE L. JOHNSON

College of Humanities and Social Science

Jeannie L. Johnson is the Director of the groundbreaking *Center for Anticipatory Intelligence* (CAI) on USU's campus. First in the nation, the Anticipatory Intelligence program she and her teaching team launched three years ago fuses STEM and social science expertise to tackle complex security concerns resulting from converging trends in emergent tech, bioengineering, data science, and a changing climate. Students involved in the program are immersed in a truly interdisciplinary environment—CAI's 90 students hail from over 35 different majors—and combine their diverse expertise and wide range of cognitive skills to create powerful problem-solving teams.

Dr. Johnson's courses have a reputation for being some of the most rigorous on campus. Students in her classes report both one of the most difficult semesters of their career and one of the most transformative. She and her teaching team deliver experiential learning infused with real-world simulations, relentless training in research and writing, and complex strategic thinking. Students develop a wide range of analytical tools to anticipate threats and design strategies of resilience. This combination of skills prepares CAI graduates for leadership within the US national security community and for placement in key roles across the private sector.

Dr. Johnson worked within the Central Intelligence Agency's Directorate of Intelligence from 1998-1999 and served with the US State Department in Embassies in Paris and Zagreb. She and CAI co-founder Matt Berrett designed the Cultural Topography Framework—a cultural analysis tool which remains the analytic method of choice across the US intelligence community. Dr. Johnson is an active consultant for the US intelligence community and advises intelligence and military communities in Britain and Canada. She participates in a variety of roles for the US State Department and military services in order to improve understanding of the cultural contexts in which we operate abroad.

Dr. Johnson received her doctorate in strategic studies from the University of Reading in 2013.

TEACHING EXCELLENCE AWARD

MICHAEL CHRISTIANSEN

College of Science

When students and alumni describe Mike Christiansen, associate professor of organic chemistry and chemistry education, they recount his patience and methodical skill in explaining complex concepts in engaging lectures. Teaching through in-person, IVC broadcast and online formats, Christiansen makes use of varied technologies to provide students with ready access to a vast library of learning materials. He has created nearly 750 online YouTube chemistry tutorials, which have garnered more than five million views. In addition, Christiansen is a prolific writer and actively publishes in the area of chemistry teaching. He recently published the online textbook, *Organic Chemistry Unleashed*, which covers concepts in both written and video form and has a question-and-answer bank with more than 1,200 answer videos. Christiansen leads the department in publishing papers in teaching pedagogy, with 13-peer reviewed papers and book chapters in chemical education. Beyond the classroom, Christiansen mentors aspiring researchers, and many of his students have earned awards, including the university's undergraduate research grants and "College of Science Undergraduate Researcher of the Year." More than a few alumni, who are now professionals in health care, research and education, confess they often return to Christiansen's lectures to refresh and hone their chemistry skills. They also credit Christiansen with encouraging them not to give up on ambitious academic and career plans. Many say they now hold the title "Doctor," because Christiansen instilled them with the knowledge, along with confidence, to pursue their dreams.

TEACHING EXCELLENCE AWARD

KIMBERLY H. LOTT

Emma Eccles Jones College of Education and Human Services

Creating Learners of Science: Dr. Kimberly H. Lott: Teacher of the Year

Honored as the Emma Eccles Jones College of Education and Human Services Teacher of the Year, Dr. Kimberly Lott believes in the power and impact of engaging science learning experiences. In both her career as a secondary science teacher and her role as an undergraduate instructor, she understands the value in students developing a deeper understanding of science and science teaching through their own engagement.

Dr. Lott taught secondary school science for six years before getting her doctorate in 2002. She joined the faculty at Utah State University in 2007, where she taught science teaching methods courses for both undergraduate and graduate students and was promoted to Associate Professor of Science Education in 2014. Her teaching philosophy is firmly rooted in a constructivist inquiry approach in which students actively build their own

knowledge through exploration and discussions. By experiencing the process of scientific discovery themselves, future teachers have a greater depth of knowledge to draw from to help their students make the same connections.

“I feel the biggest reward when students come to me after completing my course to tell me how much they learned and that now science is their favorite subject to teach,” Lott said. Her students are given ample opportunities to try new methodologies in real classrooms, giving them the confidence to teach science in their own classrooms later. “Dr. Lott has a great passion for education and preparing teachers to enter the classroom,” said Nicole Nielsen Brooksby, undergraduate student. “Through her experience-based learning approach in the college classroom, we had the opportunity to learn scientific concepts hands on. This approach left me and many of my peers with a knowledge and passion for teaching science.”

Dr. Lott currently serves as coordinator and initial advisor for all of the School of Teacher Education and Leadership’s master’s programs and students, and she also advises multiple students in the science doctoral program. In addition to her work at USU, Dr. Lott uses her expertise to support teachers throughout the state of Utah. Her recent grant from the Utah State Board of Education is focused on training teachers to integrate science and literacy skills. She is a frequent contributor to *Science and Children*, the world’s leading elementary science teacher practitioner journal.

TEACHING EXCELLENCE AWARD

BRET D. CRANE

Jon M. Huntsman School of Business

Dr. Bret Crane, Assistant Professor of Leadership at the Jon M. Huntsman School of Business and Associate Director of the Stephen R. Covey Leadership Center at Utah State University

Active learning is transformative. Guided by this philosophy, Assistant Professor of Leadership Bret Crane at Utah State University's Jon M. Huntsman School of Business emboldens students to become leaders that act with courage to make a difference in the world. Coming from a business background, Dr. Crane engages students in practical, real-time leadership experience, both in the classroom and in the community. As a teacher and as Associate Director of the Stephen R. Covey Leadership Center at Utah State University, Dr. Crane has developed a number of leadership programs and opportunities since joining USU's faculty in 2015. Nearly 1,500 students have participated in these programs, which include Strength-based Coaching (students receive one-on-one training to learn

how to lead by leveraging their individual strengths), the 7 Habits Journey (a cohort-based learning model that helps students set goals for personal improvement), the Leadership Challenge for Elementary Schools (USU students go into local schools to teach and train the next generation of principled leaders), the International Leadership Experience (students develop and practice leadership in a group setting and present solutions to companies in the United Kingdom), the Executive Challenge (a virtual leadership case competition, which will include international participants this year), and Leadership Week (daily activities, leadership - based service opportunities, and forums featuring executives from leading global businesses and organizations). In the words of his students, Dr. Crane "connects with each student in his class," and is known for learning all their names. He is among his students' "most trusted academic mentors" and "he also does more than just teach leadership principles; he also lives them." Dr. Crane has published over 8 articles across a variety of journals including *Journal of Business Ethics*, *Journal of World Business*, *Business & Society*, and *Human Resource Development Review*. Dr. Crane was previously a Visiting Professor at the George Washington School of Business in Washington, DC. Prior to entering academia, he worked in the technology and real estate industries. He has a Ph.D. in Business Administration from the Darden School of Business at the University of Virginia and an MBA and a BA from Brigham Young University.

TEACHING EXCELLENCE AWARD

MARK CHYNOWETH

S.J. & Jessie E. Quinney College of Natural Resources

Mark Chynoweth is an Assistant Professor in the Department of Wildland Resources in the Quinney College of Natural Resources. He joined QCNR in August of 2017 and has quickly become a teaching, mentoring force in the college. Located in the Uintah Basin, Mark teaches a full load while mentoring and building partnerships. He teaches six core courses across three different formats: face-to-face, broadcast, and online. His teaching abilities and talents have not been slowed down by the pandemic. Along with a heavy teaching load, he has also developed nine courses since joining QCNR that cover a wide breadth of topics. He excels at the challenges of delivering a great learning experience in different formats and topics.

After spending three years on Catalina Island working as a marine science instructor, teaching students in marine ecology, Mark completed his masters at the University of Hawaii at Manoa and, in 2017, his Ph.D. at the University of Utah, where he worked to increase protected areas for large carnivores. Never slowing down in his momentum, he has taken to his role in QCNR with enthusiasm and hard work. He has spent the last seven years conducting fieldwork in northeastern Turkey focused on brown bears, gray wolves, and Eurasian lynx; he is involved with the Wildlife Society and was recently elected to the executive board of their College and University Education Working Group; and he is engaged in building internship opportunities for the students in the Uinta Basin Mentoring Program.

Mark lives in Vernal, Utah with his wife, two dogs, and six chickens. In his free time, Mark enjoys human-powered exploration of the outdoors. He especially enjoys mountain biking (McCoy Flats), backcountry skiing (Ashley National Forest), and sailing (Flaming Gorge Reservoir). He is attempting to become a novice beekeeper on their historic Uintah County property.

MENTORSHIP AWARD RECIPIENTS

GRADUATE MENTOR OF THE YEAR AWARD

JR Dennison, *Physics; College of Science*

JR Dennison merged space research strengths at USU with his interest in electron scattering to establish the Materials Physics Group. Since arriving at Utah State in 1988, Dennison has mentored more than 40 graduate and 140 undergraduate student researchers. On average, his doctorate students are lead authors on three papers and secondary authors on an additional six.

UNDERGRADUATE FACULTY MENTOR OF THE YEAR AWARD

Brian Champagne, *Journalism and Communication; College of Humanities and Social Sciences*

Because he is uniquely situated in both the professional and academic worlds, Brian Champagne's students receive on-the-job mentoring and counsel for their future careers. Many assignments in his classes find their way on air at Utah Public Radio, or into the hands of newspaper editors and ultimately launch careers.

UNDERGRADUATE RESEARCH FACULTY MENTOR OF THE YEAR AWARD

Breanne Litts, *Instructional Technology and Learning Sciences; Emma Eccles Jones College of Education and Human Services*

Breanne Litts investigates how people learn through making, designing and producing at the intersection of the physical and digital worlds. Her lab draws a diverse set of undergraduate students from across the colleges at the university. Litts' mentees are encouraged and supported in developing their own projects and engage in peer-to-peer mentoring—something appreciated and celebrated by many of her students, both current and former.

MESSAGE FROM VICE PRESIDENT LAURENS H. SMITH

2020-2021 Graduates of USU Statewide Campuses

CONGRATULATIONS! You have completed your degree or credential program at one of Utah State University's Statewide campuses located throughout our beautiful state. As USU's Vice President of Statewide Campuses, it is my privilege and honor to recognize your achievement and celebrate your success with you. Your accomplishments are especially laudable because of the unprecedented challenges and measures imposed on you and USU, by COVID-19, for more than a year. While these disruptive changes were necessary to keep you and everyone at USU healthy and safe, you endured and overcame these hardships. I'm so very proud of each of you for getting through these difficult times and completing your program.

This year 1731 USU students are able to participate in the extraordinarily heartwarming commencement activities and celebrations taking place at USU's Statewide campuses. Your 2021 Class of Statewide graduates completed these numbers of degrees and credentials: 614 Bachelor's, 610 Associates, 318 Masters, 4 Doctoral, and 185 certificates. These impressive numbers reflect the mission and values of the USU Statewide system, which serves communities across Utah by providing outstanding opportunities for access to higher education and learning.

USU recognizes the great value you place on your education and attainment of this very special achievement. It is our hope that you are now positioned for a successful career and a prosperous, meaningful, and happy life. Thank you for choosing Utah State University for your college education. It has been our pleasure to serve you and USU will eagerly watch your future success with pride.

Once again, congratulations Statewide members of the USU Class of 2021!

Laurens H. Smith, PhD
Vice President of Statewide Campuses

MESSAGE FROM INTERIM VICE PROVOST OF GRADUATE EDUCATION

D. RICHARD CUTLER

Congratulations 2020-21 graduate degree recipients! We are proud of you and delighted with your achievements. We look forward to following your careers in the years to come, and are confident that you will be among the leaders in society.

The world that you are about to enter is quite different from the one that existed when you first started graduate studies at Utah State University. The COVID pandemic has been one of the great crises of a generation, and it is to your immense credit that you have been able to overcome the barriers and stresses caused by COVID in addition to your program requirements to complete your graduate degrees.

Graduate education is special in that you get to take a deep dive into an area of study that you are passionate about, learning methods, theories, and approaches at a very high level. It is exactly these attributes that will help you address the major crises we may face in the future, including global climate change, social inequity and, dare I say it, possible future pandemics. We hope that all the education you have received has made you a lifelong learner and that what you have learned in your graduate program will be a foundational rock for what you choose to do in the future.

As you leave USU and move forward with your careers, we hope you take time for a moment of reflection, of what you have seen and learned, of the many interactions with fellow graduate students, of the support of loved ones, and of your achievements.

Sincerely,

A handwritten signature in black ink that reads "D. R. Cutler". The signature is written in a cursive, flowing style.

D. Richard Cutler
Interim Vice Provost of Graduate Education

ALUMNI ASSOCIATION

Congratulations!

You did it! You are graduating with a degree that will open doors to many incredible adventures in your life. The tenacity and dedication that were required to persevere in the face of a worldwide pandemic will also serve you well throughout your life.

This year, I have thought often of Maya Angelou's beautiful words: "Do the best you can until you know better. Then when you know better, do better." I love this quote because it reminds me that am both enough, and can be more. This year we have learned to care for each other with more intention and grace. I firmly believe that your graduating class of 2021 is creating a better tomorrow.

The Dalai Lama said "Give the ones you love wings to fly, roots to come back and reasons to stay." As USU alumni, you are all part of the Aggie Family. You have roots here, and we celebrate your launch. As president of the Utah State University Alumni Association, I invite you to engage with the Alumni Association. USU will continue to provide opportunities for you to participate, connect and stay involved. You always have a home here. From Homecoming weekend and world-class arts events, to finding mentors in your field of work and staying connected with treasured classmates, the Aggie Family takes care of one another.

Engaging with fellow Aggies is key to making the most of your Utah State experience. Joining the Aggie Network (AggieNetwork.usu.edu) puts you in touch with USU alumni, faculty, staff and other professionals ready to offer career advice and help you expand your professional circle. A free service to all USU alumni, the Aggie Network gives you access to job and internship opportunities and provides helpful academic and employment resources as you begin your career.

As a new graduate, please consider showing your Aggie pride by purchasing an Aggie license plate, or using an Aggie affinity credit card. With proceeds going toward student scholarships, these are easy ways to give back and help future generations of students while showing you are a True Blue Aggie. Find out more about these opportunities at usu.edu/alumni.

There are more opportunities than ever to do things differently, to change the world for the better, to leave your mark. We wish you great success, and we look forward to staying in touch.

Go Aggies!

Amber Lynn Archibald is graduating with a BFA in graphic design and minor in entrepreneurship. She grew up in St. George where she discovered her love of art and design. That discovery led Amber to pursue an education in design at USU. Her time here has been defined by creativity, talent, drive, and passion that reflect in her commitment to her work and desire to continuously improve. Amber's accomplishments at USU include being a Presidential Scholar, Caine Scholar, Distinguished Service Award recipient, and "A" Pin Award recipient. She has been involved in graphic design with various organizations on campus, including the USUSA PR and Marketing Office, USU Office of Research, and USU Athletics Department. Following graduation, Amber seeks to pursue a career as a graphic designer using design to inform and inspire.

Assistant Professor,
Applied Economics

Jeffrey Austin has achieved outstanding academic success in the university's Department of Applied Economics and also became a well-rounded scholar as he pursued undergraduate research and Extension work in addition to his coursework. Jeff has received several academic scholarships, been on the Dean's List four times, and twice earned the "A" Pin Award—a highly esteemed academic honor that recognizes full-time students who maintain a 4.0 grade point average for two consecutive semesters. Jeff has worked for the university since May of 2018, engaging in Extension research with the primary intent of helping to identify water conservation opportunities on Utah cropland.

Jeff's love of the outdoors developed as he spent most of his free time traipsing around the woods, fishing, hunting, fur trapping, and exploring near the family farmstead in Minneapolis, Kansas, where his family had moved from their previous home in Murray, Utah, when he was very young. He also grew to love and admire his family's farming operation and aspired to be part of furthering its success. After graduating high school, Jeff left to serve a mission for the Church of Jesus Christ of Latter-day Saints in Salt Lake City. Upon completing his two-year missionary service, Jeff returned to Utah to pursue a degree in agribusiness at USU. In summer 2020, Jeff and his wife, Alex, moved to Nebraska where he completed an internship in grain origination and merchandising. Upon graduation, Jeff and Alex will return to Kansas where she will attend graduate school and he will continue to work in partnership with his brother to manage 320 acres of Kansas farmland.

Faculty Escort:

Dr. Patrick Singleton,
Civil & Environmental Engineering

Joshua Ward is graduating Summa Cum Laude with a bachelor's degree in Civil Engineering.

Following in the footsteps of his parents, Josh chose to attend Utah State University because of his desire to pursue engineering and the prestige of the USU College of Engineering. During his time at Utah State University, Josh conducted transportation research with Dr. Patrick Singleton, served as an Undergraduate Teaching Fellow for the Engineering Hydrology course, and worked as a student manager of the USU Engineering Tutoring Center. In 2021, Josh was selected to present travel behavior research at the 2021 Transportation Research Board Annual Meeting, the premier conference among transportation professionals. Josh was also selected as the department of Civil & Environmental Engineering's Outstanding Junior in 2020, the CEE Outstanding Senior in 2021, and the College of Engineering Undergraduate Researcher of the Year in 2021.

Josh's most memorable experiences during his undergraduate program include seeking to benefit his peers, professors, and clubs; transitioning the Engineering Tutoring Center to remote tutoring services over a weekend in March 2020; and working with fellow students to participate in a cardboard boat competition during the 2020 Engineers Week. Upon graduation, Josh plans to remain in Cache Valley with his wife and pursue a master's degree in Civil Engineering.

VALEDICTORIAN

Anny Spencer,
Dual Major
– *English,*
Communication Studies
Faculty Escort:
Clair Canfield,
LPCS

Anny Spencer never planned on being an Aggie. She grew up in a small town near Logan and always felt she needed to travel far from home to fully discover herself. However, she applied to Utah State, just in case. While attending an orientation event, she began to feel that this campus wanted her here. She went home that day and canceled all other campus tours. As Anny has described, “It was only because Utah State loved me first that I’m an Aggie today.”

She knew that she liked to spend time outdoors, but Utah State introduced her to hiking, rock climbing, and the long, beautiful walks from Old Main to the library. She’d always enjoyed making and enjoying treats, but Utah State gave her an obsession with Aggie Bull Tracks ice cream. She’d always loved reading, but Utah State showed her that she could also love coursework that challenged her to expand her ideas. Her desire for learning grew to include two majors: English and Communication Studies. She’d always enjoyed making connections with people, but Utah State gave her opportunities to find her voice and help others to do the same. Her passion for people led her to be involved in events around campus; meeting and marrying her spouse, Landon Spencer; and holding several jobs on campus including work as an office assistant, testing center proctor, TA and UTF for the Public Speaking class and CHaSS peer advisor. Because Utah State loved Anny, she has always worked to offer that same sense of belonging to others in return. This is why, wherever life takes Anny next, she plans on giving back the love that she has received here.

VALEDICTORIAN

Nicole Anderson,
Human Biology major,
minors *Chemistry*,
Japanese
Faculty Escort:
Dr. Justin Julander,
ADVS

A native of Pleasant Grove, Utah, Nicole “Nikki” Anderson, a Human Biology major with minors in Chemistry and Japanese, entered USU with a Presidential Scholarship. She is the recipient of multiple A-Pin awards, as well as placements on the Dean’s List. Anderson was selected as a member of the National Society of Leadership and Success, and was named an Undergraduate Research Scholar.

Anderson has served in a full-time leadership role in the USU’s Institute for Antiviral Research (IAVR), where she managed and participated in research to find solutions to the current SARS-CoV2 pandemic. In addition, her work has resulted in several publications on the Chikungunya and Zika viruses, as well as presentations at research symposiums. Anderson has served as president of the American Medical Student Association, the LDSSA Returned Missionary Committee, and as an Undergraduate Teaching Fellow in Human Physiology. She has coordinated the Red Cross Blood Drive, Culture Night, Medical Experience Fairs, Doc of the Month events and Mental Health First Aid Training. From the time she was 11, Anderson has studied Taekwondo, and will soon test for her 4th-degree black belt. She has also earned a National Championship in Sparring, a type of kickboxing. Anderson has served as a volunteer at a local hospital’s emergency department, as a counselor at Utah’s Camp Hobé Cancer Camp and as a medical worker in Tijuana, México. Anderson has been accepted to several medical schools and plans to begin medical studies this fall in preparation for a career in emergency medicine.

VALEDICTORIAN

Maegyn Ipsen,
*Special Education
and Rehabilitation
Counseling*
Faculty Escort:
Kimberly Snow,
SPERC

Maegyn Ipsen enjoys serving children in her community, particularly those with special needs. These service opportunities greatly influenced her decision to become a special education teacher. A favorite experience was volunteering at Jump the Moon, a Logan foundation that makes art accessible to those with special needs. Maegyn enjoyed her practicum placements and loved learning from creative teachers and school staff and applying her education in a real-world setting. Most of all, Maegyn enjoyed the students with whom she met and worked. Maegyn was on the Dean's List every year during her time at USU.

DEPARTMENT VALEDICTORIANS

Katherine Van Wagoner, *Communicative Disorders and Deaf Education*

Madison Thomas, *Human Development and Family Studies*

Victoria Hepworth, *Kinesiology and Health Science*

Brooke Meyer, *Nursing*

James Clayton, *Psychology*

Caitlin Thaxton, *School of Teacher Education and Leadership*

Maegyn Ipsen, *Special Education and Rehabilitation Counseling*

*The Emma Eccles Jones College of Education and Human Services expresses deep appreciation to our generous donors.

** The *U.S. News and World Report* has ranked the Emma Eccles Jones College of Education and Human Services 29th on its annual list of "Best Graduate Schools of Education" in the nation. USU has the only School of Education in Utah to place in the top 50. Our college took the No. 12 spot nationally for research funding, receiving \$41.8M to support research, teaching, and service projects that benefit our students, community, state, and nation.

VALEDICTORIAN

Jack DeSpain,
Finance and Economics
Faculty Escort:
Dr. Briggs Depew

Jack DeSpain is receiving degrees in both Finance and Economics, with a minor in Real Estate. Jack was born in Salt Lake City but grew up in Philadelphia, later returning to Utah to attend college.

Once on campus, he quickly became involved in several programs and extra-curricular activities at USU. He has been actively involved as a member of the Huntsman Scholar Program, a highly selective honors program within the business school. While attending the Huntsman School, Jack has grown to love economic theory, specifically the subjects of game theory and econometrics. Jack was a four-year member of the Club Baseball team, earning 2nd Team All-Region honors as a starting pitcher his freshman year. Later, Jack would serve as Club President, and help lead the team to multiple conference titles and regional tournaments.

Following graduation, Jack plans to work in data analytics for a software company in Salt Lake. His long-term goal is to start his own business. Jack credits all of his achievements to his loving parents, mentors, professors, and close friends.

VALEDICTORIAN

Maria Catalano,
*Conservation and
Restoration*

Faculty Escort:
Dr. Sarah Klain,
*Environment and
Society*

Maria is graduating
with a degree in
Conservation
and Restoration
Ecology and

minors in Spanish and Sociology. She grew up outside of Pittsburgh, Pennsylvania, and moved to Logan to attend USU. Throughout her time here, she has been actively involved in environmental clubs such as the Student Organization for Society and Natural Resources and Sunrise. She has been active in leadership roles by serving on the QCNR student council and is currently the USUSA student senator for the college. Outside of school, Maria spends her summers outdoors working on ecological research projects and exploring the West. She loves to get outside and is enamored by Utah's natural beauty. From the snow-capped mountains to the red-rock desert, she's loved every bit of the state she now calls home. After graduation, Maria will be working as an environmental organizer for Greens Corps and continue environmental work until going to graduate school.

ALMA MATER HYMN UTAH STATE UNIVERSITY

Theodore M. Burton

A - cross the quad at ev - en - tide as shad - ows soft - ly fall, the
(And) through the years as time rolls on, and stu - dent friend - ships grow, we'll

tow - er of 'Old Main' ap - pears, and peace rests o - ver all. The
ne'er for - get the joys we had, those days we used to know. Thy

light - ed "A" up - on the hill, stands out a - gainst the blue. Oh, Al - ma Mat - er,
men' - ries ev - er will be new, thy friends be ev - er true.

U - tah State, my heart sings out to you. And heart sings out to you. Oh,

Al - ma Mat - er U - tah State, my heart sings out to you.
