Nine Bloomberg Terminals Are Available to Huntsman Students

Nicole Foregren-Velasquez, new faculty member with a joint appointment in the School of Accountancy and Management Information Systems departments, recently learned that her proposal to study knowledge management at NASA has received approval and funding in the amount of \$15,000. This research engagement will investigate the use and impacts of knowledge management systems by system administrators, and recommend future directions for development and implementation. This is a particularly interesting project because the different NASA sites have drastically different cultures and norms. Outcomes of this project will include full academic publishing rights. The project will be completed over the summer.
