Welcome to Utah State University!

Whether you are registering or still checking us out, Utah State is a wonderful choice for students. This is a university where academics come first. Here you will receive a complete learning experience—friendly, award-winning teaching and an opportunity to do cutting-edge research at an institution ranked by the Carnegie Foundation in the top four percent of research universities.

Our programs literally stretch from under the soil to soaring in space. We are both a land-grant university, begun more than a century ago as an agricultural college, and a space-grant university, whose students and faculty have sent more payloads through the atmosphere than any other university in the world. In between are courses in seven academic colleges leading to more than 200 undergraduate and graduate options.

Inside this catalog is an array of classes, mostly taught by full-time faculty, not by teaching assistants as at many other large universities. I encourage you to browse through the catalog and find classes that will help prepare you to make a living, as well as courses that will help you enjoy life. Both are important.

Your experience here should not end in the classroom and lab. There are more than 200 student clubs and organizations, for just about every interest. We have a large intramural sports program, and you can cheer on Aggie varsity teams, which play in the top division of the NCAA.

Some 80 percent of our students live on campus or in student houses and apartment complexes in this friendly, picturesque city. Our University family is a community within a community. It does not take long to feel at home here.

Again, welcome, and have a great school year.

Stan L. Albrecht
President of Utah State University

Statement on Institutional Integrity

Utah State University adheres to the highest ethical standards in its representation to its constituencies and the public; in its teaching, scholarship, and service; in its treatment of its students, faculty, and staff; and in its relationships with regulatory and accrediting agencies.
Mission and Role Statement

Utah State University

The academic advantages of a large university, together with the friendliness of a small college, are offered at Utah State University. With a student body of more than 23,000, USU recognizes that the needs of the individual are of major importance, and many programs have been established to give the student the optimum of individual attention.

With 43 departments in seven academic colleges, more than 200 undergraduate options, a School of Graduate Studies, University Extension, and several research programs, Utah State University offers an excellent opportunity for students to study a wide range of subjects.

USU was founded in 1888 as part of the public educational system of Utah and operates under the constitution and laws of the state. It belongs to the family of institutions known as land-grant universities, which had their origin in 1862. The institution was originally called the Agricultural College of Utah, later becoming Utah State Agricultural College. The state legislature designated the name change to Utah State University in 1957.

An 18-member State Board of Regents governs the Utah state system of higher education. This board has the responsibility for state-wide master planning for higher education, assignment of roles to the several institutions in the state system, and control of operating and capital budgets for the institutions. USU has a 10-member Board of Trustees which is responsible for implementing the assigned roles, including the appointment of personnel and the enactment of rules and governing regulations.

Utah State University is one of two Tier One institutions in the state, the other being the University of Utah. Both universities are categorized as public research universities.

University Mission Statement

The mission of Utah State University is to be one of the nation’s premier student-centered land-grant and space-grant universities by fostering the principle that academics come first; by cultivating diversity of thought and culture; and by serving the public through learning, discovery, and engagement.

University Role Statement

Utah State University fulfills a unique role in the Utah System of Higher Education as the state’s land-grant and space-grant university. The land-grant designation makes Utah State responsible for statewide programs in agriculture, business, education, engineering, natural resources, sciences, family life, 4-H youth, and the traditional core of liberal learning: humanities, arts, and social sciences. The University gives particular emphasis to programs involving the interaction of land, people, and the environment.

Utah State University is also a "Doctoral/Research University-Extensive" institution, as designated by the Carnegie Corporation, meaning that, in selected areas historically associated with its designation as a land-grant and space-grant university, it provides doctoral and master’s level education and supports and expects of its faculty significant research efforts. The University offers a broad array of doctoral and master’s level degrees in areas appropriate to its mission. Hands-on learning is also a hallmark of its undergraduate programs.

As a space-grant institution, Utah State University plays a preeminent role in the development of the sciences and engineering associated with research and teaching about outer space. This includes the mission of the Space Dynamics Laboratory and its related components on the Innovation Campus.

Utah State develops knowledge as part of its discovery mission, as reflected in research generated by the Utah Agricultural Experiment Station and the Utah Water Research Laboratory, and disseminates this knowledge through technical assistance provided by Cooperative Extension in each of the state’s 29 counties. The land-grant mission also means that Utah State delivers degrees through Continuing Education programs, whether through on-site or technologically delivered, time-enhanced methods throughout the state.

Taken together, these designations as a land-grant and space-grant university also mean that Utah State University has a leading role in economic development of the state and the region. These goals are realized through the effective transfer of research from the laboratory to commercial enterprises. To that end, Utah State University has an aggressive position in the identification of intellectual property, the commercialization of new technologies, and the development of research programs that will be of benefit to the state. USU also brings government, business, and education together on its Innovation Campus with the goal of stimulating economic development.
Assessment

Director, Office of Analysis, Assessment, and Accreditation:
H. Craig Petersen
Location: Main 302, UMC 1437

Educational assessment involves gathering and analyzing information about learning activities with the goal of improving academic programs. In essence, assessment is what we do to assure that what we do is what we say we do.

Educational assessment is important for a number of reasons. First, Utah State University is accredited by the Northwest Commission on Colleges and Universities, as well as a number of discipline-specific accreditation bodies. USU must have a credible assessment program to satisfy the requirements of those organizations. Second, by documenting the effectiveness of its educational programs, USU demonstrates accountability of resource use to the USU Board of Trustees, the Utah State Board of Regents, and the Utah State Legislature. Finally and most important, faculty and administrators at USU have an innate curiosity about how well students are educationally prepared to meet the challenges of life. Faculty and administrators also have a strong desire to help USU students by making the institution better. To meet these objectives, the following policy on assessment has been formally approved by the USU Board of Trustees:

The University is committed to timely internal and external assessment of its programs to assist in productive academic planning and the fulfillment of its mission and goals. To meet this commitment, the University and all of its units shall gather, analyze, and publish data annually that relate to the planning for and evaluation of the accomplishment of the missions, goals, and objectives of the University and its units. Such assessments are intended to determine the extent to which University programs meet their goals and objectives and further the mission of the University; to establish a culture of evidence for assessment; and to meet the standards of the Regents, the Trustees, the Northwest Commission of Colleges and Universities, and USU. The assessment process shall be a continuous process which shall involve faculty and other concerned stakeholders in central roles. Furthermore, assessment results will directly inform planning and other decision-making activities. (USU Policy Manual, 103.7.4)

There are several aspects of good assessment. The first is that the focus should be on outcomes. The goal is to demonstrate that students actually develop needed competencies and significantly add to their knowledge as a result of attending USU. The second is that evidence derived from multiple sources is preferable to a single measure. The third is that academic units should have flexibility in formulating their assessment plans—"one size does not fit all." Finally, an effective assessment plan should be structured as a process, rather than as an event. Assessment must be an ongoing activity that contributes to institutional improvement.

Consistent with these guidelines, USU has implemented a comprehensive plan for educational assessment. This plan focuses on the following areas:

1. **Student Attitudes and Perceptions.** The Office of Analysis, Assessment, and Accreditation (AAA) conducts annual surveys of freshmen/sophomores, graduating seniors, and graduate students. Comparative surveys, such as the National Survey of Student Engagement, are also administered.

2. **Early to Mid-Program Assessments.** AAA is involved in ongoing analyses to evaluate USU’s freshman orientation program, measure improvements in writing and mathematics skills, and determine mastery of content in general education courses.

3. **End of Program Assessment.** This is the key component of USU’s assessment effort. Academic departments have been given the primary responsibility for evaluating the preparation of their graduates. Each department is expected to have an easily accessible and user-friendly assessment website that shows program learning objectives, the relationship between learning objectives and curriculum, outcomes data from several sources that demonstrate the extent to which students are mastering program objectives, a description of the process by which assessment data are used for decision-making, and examples of program changes made as a result of assessment efforts. AAA assists the departments in this endeavor by reviewing departmental progress, recommending changes, and providing "best practices."

4. **Alumni Satisfaction.** AAA conducts periodic surveys of alumni. Departments also obtain information from alumni through advisory groups and departmental surveys.

5. **Employment and/or Employer Satisfaction.** AAA conducts surveys of employment and participation in graduate education of recent graduates. At the academic department level, employers are contacted through surveys and/or employer advisory groups to determine the strengths and weaknesses of USU students they have hired.

6. **Facts and Figures Website.** The USU Facts and Figures website is a virtual “Factbook” that provides a broad range of information about the University. Of particular importance is the USU Performance Dashboard, which shows trends in key areas of institutional performance and serves as a key management information tool for University administrators.

Using This Catalog

Semester Calendar

USU maintains a semester system—three semesters or periods of classwork: fall, spring, and summer. Fall and spring semester are each of 15 weeks duration. Summer semester spans a total of 13 weeks and includes one four-week early session, followed by a workshop session, and one eight-week session, which will contain two four-week sessions.

Credit Enrollment

The semester credit hour is the unit upon which credit is computed. Normally, the credit hour standard is based upon 150 minutes of lecture per week, for the duration of one semester, for a three-credit class. For more specific information, refer to the current Schedule of Classes. To obtain credit, a student must be properly registered and pay fees for the course. For further information, see Number of Credits Awarded for Courses on page 38.

Course Numbering

Each course listed in the Course Descriptions section of the catalog has a number, given before the name of the course. For example:

ENGL 1120 Elements of Grammar (3)

This means the course, Elements of Grammar, is English 1120. The numbers are useful for reference and records.

Course Numbering Code

A standard code employed by all institutions in the State System of Higher Education was adopted by USU in 1970. Upon conversion to semesters, four-digit course numbers replaced the three-digit course numbers formerly used under the quarter system. The semester numbering system is as follows:

0010-0990 Remedial courses; will not satisfy baccalaureate requirements; nontransferable; not calculated in GPA.
1000-2790 Lower division (freshman and sophomore courses)
2800-2990 Lower division independent study designation (directed reading, individual projects, etc.)
3000-4790 Upper division (junior and senior courses)
4800-4990 Upper division independent study designations (directed reading, individual projects, festival, institutes, workshops, etc.)
5000-5990 Advanced upper division (may be used for a graduate degree with approval of the student’s supervisory committee)
6000-7990 Graduate courses (students without baccalaureate degrees must obtain special permission to enroll)
5900-5990 Independent study designations (directed reading, individual projects, theses, dissertations, etc.)
7900-7990 Graduate seminars (includes methodology and research seminars)

Course-Level Numbering and Acceptability

“H” following regular course designation indicates Honors Program courses.

Courses offered through Continuing Education Time Enhanced Learning are designated by a @ following the number of credits.

Freshmen or sophomores may take any lower-division course. If there is a prerequisite for a particular course, it will be so stated in the course description.

Juniors or seniors may take any lower- or upper-division course for which they have met the course requirements. Course requirements will be identified in the course description. Seniors may take graduate courses only upon written consent from the instructor. The use of undergraduate coursework for a graduate degree at USU is regulated by the School of Graduate Studies. See Split Form Policy (page 101) and Course-Level Numbering and Acceptability (page 102).

Graduate students may take any course for which they have met the course requirements, but only graduate courses and individually approved undergraduate courses may be used for a graduate degree, although all courses completed will appear on student transcripts.

Note: In some cases, additional college or departmental requirements (which may not be included in the course description) must be met before a student may take a particular course. For more information, students should consult their advisor or the department offering the course.

Following the title of each course, the number of credits given for the course is indicated. The semester(s) it will likely be taught are indicated in abbreviated form in parentheses, following the course description. For example: (F) indicates that the course will likely be taught fall semester. The designation (F,Sp,Su) indicates that the course will likely be taught all three semesters: fall, spring, and summer. It does not mean that the student has to take the class all three semesters, but rather that he or she has a choice of any semester. In some cases, such as (F,Sp), even though more than one semester is indicated, the course will not be offered each semester, but only one of these semesters, the exact one yet to be decided.

Some course listings do not indicate semester(s) offered. In some cases, these courses may be taken any semester (e.g., continuing graduate advisement, thesis, dissertation, or internship courses). In other cases, the semester(s) to be offered has not yet been determined (e.g., special topics courses, which are offered infrequently). For current information about semesters to be offered, consult the department offering the course.

For more definite up-to-date information, please refer to the University Schedule of Classes published prior to the beginning of each semester. All catalog listings are subject to change. The schedule will also update policies and practices of the University as changes occur. Catalog updates will also appear in the Online General Catalog.

Occasionally, two or more closely related courses (which usually have the same title) will be listed above one course description, such as MATH 6110 and MATH 6120. Differential Geometry. Following each course title, the number of credits approved for each course will be shown. At the end of the course description will be two or more parenthetical entries, indicating the semester(s) the courses may be taught. The first entry refers to the semester(s) taught for the first course, the second entry refers to the second course, and so forth.
Using This Catalog

In some classes, the amount of credit for which students register can be individually arranged. One student may take 2 credits, another student 3 credits, etc. Students are responsible to ensure they are registered for the desired number of credits. Online registration will always default to the lowest offered number of credits. Academic credit is identified following the course title: (e.g., 1-3).

Following some course titles in this catalog will be a single asterisk (*), a double asterisk (**), or a triple asterisk (***)]. Such courses are taught during alternate years, as explained in the footnotes. For more information, check the Schedule of Classes or consult the department offering the course.

Course Prefixes

Each course listing is preceded by one of the following prefixes:

- ACCT Accounting
- ADVS Animal, Dairy and Veterinary Sciences
- AG Agriculture, College of
- ANTH Anthropology

University Studies Depth Education Designations

Courses approved for University Studies Depth Education have one of the following designations, listed following the course number:

Intensive Courses
Communications Intensive, CI
Quantitative Intensive, QI

Depth Courses
Humanities and Creative Arts, DHA
Life and Physical Sciences, DSC
Social Sciences, DSS

Other Policies

Catalog Information

Catalog information and University requirements may change at any time. USU is not bound by requirements or regulations listed in this catalog. Information may change before a new catalog is issued, and students must adhere to changes. It is the student’s obligation to ascertain current rules, regulations, fees, and requirements.

Course descriptions in this catalog are an overview and generally reflect what will be taught, but students should not rely on them as a guarantee of what they will be taught during a given semester.

This catalog is also available on the Web, and can be accessed from the University Advising and Transfer Services Home Page: http://www.usu.edu/ats. Changes in catalog information will be entered on the Web.

To obtain a printed copy of this catalog, phone Express-a book at one of the following numbers: (800) 662-3950, (435) 797-3950, or FAX (435) 797-3793.

Materials for Persons with Disabilities

This catalog is available in large print, disk, audio, and braille format upon request to the Disability Resource Center, University Inn 101, (435) 797-2444 or (800) 259-2966 Voice or (435) 797-0740 TTY. Further information about the services offered by the Disability Resource Center can be found at: http://www.usu.edu/drc

Assumption of Risk

All classes, programs, and extracurricular activities within the University involve some risk, and certain ones involve travel. The University provides opportunities to participate in these programs on a voluntary basis. Therefore, students should not participate in them if they do not care to assume the risks. Students can ask the respective program leaders/sponsors about the possible risks a program may generate, and if students are not willing to assume the risks, they should not select that program. By voluntarily participating in classes, programs, and extracurricular activities, a student does so at his or her own risk. General information about University Risk Management policies, insurance coverage, vehicle use policies, and risk management forms can be found at: http://www.usu.edu/riskmgmt/

Equal Opportunity/Affirmative Action

Utah State University is an affirmative action employer and is committed to providing equal educational and employment opportunity regardless of race, color, religion, gender, national origin, age, disability, or veteran status. In addition, discrimination based on sexual orientation is prohibited in the hiring of employees or in evaluating employee or student performance. USU also has a policy prohibiting sexual harassment of students, faculty, and staff. Equal opportunity applies to all aspects of employment: recruitment, hiring, promotion, training, benefits, and salary. Equal educational opportunities include admission, access to course offerings, financial assistance, housing, and extracurricular activities.

Privacy Rights

In compliance with the Family Educational Rights and Privacy Act of 1974, Utah State University has developed policy guidelines which (1) provide that eligible students will have access to inspect and review their educational records, and (2) protect the rights of a student to privacy by limiting access to the educational record without express written consent. Note: There are restricted situations in this act where access to an educational record does not require the express written consent of the student. For further information, see the Privacy Rights section on page 38.

University Smoking Policy

Utah State University conforms to the provisions of the 1992 Utah House Bill No. 197—Clean Air in Government Buildings, Utah Code Section 76-10-106. The provisions of this bill include the following: (a) A person may not smoke in a building, or portion of a building, that is owned, leased, or occupied by the state or any state agency; (b) Designated smoking areas in buildings are prohibited under this subsection; and (c) This subsection takes precedence over any conflicting provision of this section.

It is the responsibility of all University staff and students to adhere to this policy and to appropriately inform campus visitors of its provisions. Deans, department heads, and other supervisory personnel are responsible for the enforcement of the policy.

Utah State University 2006-2007 General Catalog
### Summer Session 2006
- May 15–June 9: Early Session—4 weeks
- May 29: Holiday (Memorial Day)
- June 12–August 4: 8-week Session
- June 12–July 7: First 4-week Session
- July 4: Holiday (Independence Day)
- July 10–August 4: Second 4-week Session
- July 24: Holiday (Pioneer Day)
- August 4: Test Day

### Fall Semester 2006
- August 28: Classes Begin
- September 4: Holiday (Labor Day)
- October 20: Fall Break
- November 22-24: Holiday (Thanksgiving)
- December 4-8: No-test Days
- December 11-15: Final Examinations
- December 16: Graduation

### Spring Semester 2007
- January 8: Classes Begin
- January 15: Holiday (Martin Luther King, Jr. Day)
- February 19: Holiday (Presidents’ Day)
- March 12-16: Spring Break
- April 23-27: No-test Days
- April 27: Last Day of Classes
- April 30, May 1-4: Final Examinations
- May 4-5: Graduation

**Note:** See semester Schedule of Classes for registration and fee payment deadlines.
Degrees Offered at Utah State University

College of Agriculture

Agricultural Systems Technology and Education
Agricultural Education—BS
Agricultural Machinery Technology—One-year Certificate, AAS
Agricultural Systems Technology—BS, MS
Family and Consumer Sciences Education—BS

Animal, Dairy and Veterinary Sciences
Animal Science—BS, MS, PhD
Bovine Science—BS, MS, PhD
Dairy Herdsman (Vocational Tech)—One-year Certificate
Dairy Science—BS, MS

Economics
Agribusiness—BS
Agricultural Economics—BS
Applied Economics—MS
Economics—BS, BA, MS, MA, PhD
International Agribusiness—BA

Nutrition and Food Sciences
Dietetics Administration—MDA
Food Microbiology and Safety—MFMS
Nutrition and Food Sciences—BS, MS, PhD

Plants, Soils, and Biometeorology
Biometeorology—MS, PhD
Crop Science—BS, BA
Ecology—MS, PhD
Environmental Soil/Water Science—BS, BA
Horticulture—BS, BA
Horticulture, Professional Studies in—MPSH
Ornamental Horticulture—One-year Certificate, AAS
Plant Science—MS, PhD
Soil Science—MS, PhD

Interdepartmental Program
Toxicology—MS, PhD

College of Business

FAX: (435) 797-3708
E-mail: admil@usu.edu
WWW: http://www.usu.edu/admissions

Admission Requirements

The Utah State University admission policy is designed to admit undergraduate students who have the best chance to successfully complete a university program of study.

All freshmen, including transfer students with fewer than 24 semester hours of credit, must submit an official high school transcript and ACT/SAT scores as part of their application for admission.

Application for admission and credentials from schools previously attended should be received by the Admissions Office by April 1 for fall semester admission, by November 1 for spring semester admission, and by April 1 for summer semester admission. These materials should be sent to:

Admissions Office
Utah State University
0160 Old Main Hill
Logan UT 84322-0160

A student is admitted to the University on the basis of an index score, which is a reflection of high school grades and ACT/SAT scores when applicable. A processing fee of $20 is required of students applying for readmission. Students applying after the deadline will be assessed an additional $15 late fee. For application and general information, contact the Admissions Office at the address above; or by phone, fax, or e-mail as listed at the top of this page.

Students who have attended home schooling, charter high schools, or performance/outcome-based high schools will need to submit an Application for Admission, the application fee, and ACT/SAT results, and may need to have an interview as part of the admissions application process. Those students who have completed the GED must also submit a copy of the GED Certificate.

USU grants admission, without regard to race, color, creed, sex, or national origin, to those students who satisfy the admission requirements.

Students who have been denied admission to the University may initiate an appeal by contacting the Admissions Office.

Freshman Admission

Students attending the University for the first time are admitted on the basis of an index score, which is a reflection of high school grades and ACT or SAT scores. Entering students must have an acceptable index score in order to be admitted. (See Admission Index table on page 17.) USU regulations regarding the index score are as follows:

Students having an index score of 90 or higher are very likely to be admitted. Students must have an ACT composite score of 19 or higher, regardless of what their overall admission index score is. A cumulative grade point average of 2.5 or higher in high school coursework is also required. In cases where the applicant is younger than 25 years, official ACT/SAT results are also required. Exceptions to the preceding regulations will be made for applicants who have not graduated from high school, who may substitute results of the GED. Admission decisions are made on an individual basis. Note: These requirements are based on the 2006-2007 applicant pool.

High School Curriculum

Students who have graduated from high school and who desire to attend Utah State University must have completed a preparatory course of study, including the following:

English
Four years (units), emphasizing composition/literature.

Mathematics
Three years (units), selected from elementary algebra, geometry, intermediate algebra, trigonometry, college or advanced algebra, or calculus. It is strongly recommended that students take mathematics up to at least trigonometry.

Biological/Physical Science
Three years (units), which meet either state or local graduation requirements. At least one unit must provide a laboratory experience.

American History
One year (unit).

Additional Courses
Four years (units), chosen from at least two of the following: history, English, mathematics beyond intermediate algebra, laboratory science, foreign language, social science, and fine arts.

Foreign Language
Two years (units) recommended, which must be of the same foreign language.

Students who meet the minimum index requirements, but have less than the required number of units, will be admitted on the condition that the deficiency is satisfied at the University within the first 30 semester hours of study.

When the admission decision is made, an official letter of notification will be sent to the student. Admission status may also be checked online.

Early Admission

A high school student who has completed his or her junior year and maintained a superior scholastic record may be granted special consideration for admission. An applicant must satisfy the following requirements:

1. Submit an official application, ACT/SAT scores, a high school transcript, and a $40 application fee.
2. Submit letters of approval and recommendation from:
   (a) Superintendent or principal
   (b) Parent or guardian
3. Admission is not automatic, and will be determined by the admissions committee.
4. Applications for admission and credentials from the high school must be received by the University according to the deadline dates listed under General Admissions Policies.
Home-schooled Students

Home-schooled students applying for admission to Utah State University who submit a transcript from an accredited home-school organization will be evaluated the same as any traditional high school students. They must satisfy the University’s admission requirements of a minimum 2.5 grade point average, a minimum ACT score of 19 (or an equivalent SAT score of at least 900), and a minimum Admissions Index score of 90.

To be admitted to Utah State University, home-schooled students without transcripts must provide a list of classes they have completed, and must submit a minimum ACT score of 21 (SAT score of at least 980); or a minimum ACT score of 19 (SAT score of at least 900) and a minimum grade of C on the GED.

In consultation with the department of the student’s intended major, the Director of Admissions will review all materials and make a final decision.

Utah Basic Skills Competency Test (UBSCT)

Students with the Basic High School Diploma who meet the University’s admission standards of a 2.5 minimum GPA, ACT score of at least 19 (SAT score of at least 900), and an Admissions Index score of at least 90 will be admitted in good standing. If they satisfy the University’s admission standards, students having an Alternative Completion Diploma may be offered admission on a case-by-case basis. Students with a Certificate of Completion will be required to take the GED and pass with a battery score of at least 550 (equivalent to 55), and achieve a minimum ACT score of 19 (SAT score of at least 900). Effective Fall 2006, all seniors graduating from Utah high schools are required to pass the UBSCT.

Advanced Placement

Students who present Advanced Placement examination scores of 3, 4, or 5 may receive 4 to 8 University credits for each Advanced Placement examination. These credits may be used to fill General Education requirements and to meet specific course requirements.

Admission Deferment

Newly accepted freshman, transfer, or readmitted students who wish to defer their start date to a later semester may do so (without reapplying) by submitting an Admission Deferment Application to the Admissions Office. International students and graduate students may not use this form. The application is due no later than the first day of classes for the semester the student has been admitted to. Deferrals are generally granted for up to one year. However, they may be granted for up to two years for those participating in official assignments such as military, church, or humanitarian service. If requesting a deferment for more than one year, the student must submit an official letter of assignment. All deferment applications must be approved by the admissions committee. Admission Deferment Applications are available online at http://www.usu.edu/admissions/includes/forms/AdmissionDefermentApplication.pdf or by contacting the Admissions Office at (435) 797-1129.

General Studies

Students who do not qualify for enrollment into one of the academic colleges may be considered for enrollment in General Studies. These students include all those who have graduated from high school with an admission index score below 90. General Studies students are advised through University Advising and Transfer Services, Student Center 304.

When a student has demonstrated ability to maintain a GPA appropriate for the intended major, that student may apply for admission to an academic college and department. Regular college admissions evaluation procedures will then be followed, and if there are no admissions restrictions, the student will be admitted to the department of his or her choice.
Transfer Student Admission

Applicants with at least 24 semester credits earned at another accredited institution (or at one of USU’s continuing education centers) will be admitted if they have a transfer GPA of 2.50 or higher. Those transfer students having a GPA between 2.20 and 2.49 will be considered on an individual basis. Many USU undergraduate majors require a higher GPA for admission. For specific GPA requirements, refer to this catalog or consult the departments. In cases where the student is admissible to the University but does not meet the minimum GPA requirement for admission to the desired major, admission will be offered as an “undeclared” major. Applicants having fewer than 24 semester transfer credits must submit an official high school transcript and ACT or SAT results.

Official transcripts of credit must accompany applications for admission when submitted by students who have attended other collegiate institutions. Transcripts submitted for admission become the property of the University and are not returned. Transcripts from all institutions previously attended are required.

At its discretion, the University may accept transfer credit from accredited and nonaccredited institutions and miscellaneous sources. These may include:

1. Accredited institutions,
2. Foreign universities,
3. U.S. military credit for approved job and educational experiences,
4. Credit by examination,
5. Miscellaneous sources: internships, nontraditional learning experiences.

The following evaluation criteria for acceptance will be used:

1. Accreditation status of the institution,
2. Recognized national standards published by the American Association of Collegiate Registrars and by the American Council on Education,
3. Guidelines given by the State Board of Regents (including guidelines for CLEP and AP credit),
4. Recommendations given by various University units having appropriate academic competence, including: Faculty Senate, college and departmental curriculum committees.

Utah State University does not accept transfer credit from nonaccredited institutions in those cases where USU lacks an academic unit to evaluate such transfer credits.

Credit Transfer Policy of Utah System

An Associate of Arts or an Associate of Science degree earned at any institution within the Utah System of Higher Education, or at other non-Utah institutions with articulation agreements, will be considered as meeting the General Education requirement of any institution in the system. (At USU, this satisfies the General Education portion of the University Studies requirements, but not the Depth Education requirements as shown on pages 52-57.) When the General Education requirements of an institution not offering the Associate of Arts or Associate of Science degree have been met in earning a 60 to 63 semester credit hour diploma, a Registrar’s certification that the transferring student has completed baccalaureate-level General Education requirements at the sending institution will be accepted by the receiving USHE institution in lieu of the AA/AS degree. In the latter case, the Registrar at the sending institution will forward to the receiving institution an up-to-date description of the General Education requirements.

Credit for quarter courses numbered 100 or above, or for semester courses numbered 1000 or above, earned in the Utah System of Higher Education is transferable within the System and will be carried on the student’s transcript by the receiving institution. Acceptance of credit should not be confused with its application. Transfer credit may or may not apply to the graduation requirements of an institution, regardless of the number of credits transferred. Credit other than that intended wholly to meet the General Education requirements of the receiving institution will be applied on the basis of the appropriateness of credit to a particular institution’s specific degree program requirements as determined by the receiving institution.

For more transfer student information, including agreements with other states, see pages 67-70 of this catalog.

Transfer Student Admission Deferment

Transfer students who wish to defer their start date to a later semester may do so (without reapplying) by submitting an Admission Deferment Application to the Admissions Office. For further information, see Admission Deferment information on page 17.

Nontraditional Admission

An applicant who is not a high school graduate may be considered for admission by presenting satisfactory evidence of ability to do university work. This evidence may be demonstrated by scores on the General Education Development Test (GED). Admission will not be offered unless a student has a high school diploma or a GED Test score of 55 or higher and passes all subtests. (Students in this category include those whose high school class has graduated and those over the age of 18.) Students must also take the ACT/SAT if not previously taken. If the student has been out of high school for seven years or more, this requirement is waived.

Change of Campus Procedures

The following procedures apply to Utah State University Continuing Education (CE) students wishing to enroll at the Logan Main Campus.

Nonmatriculated CE Students Transferring to Main Campus

Students who have not been admitted through the USU Main Campus Admissions Office should submit a regular application for admissions to the USU Main Campus Admissions Office by the published application deadlines. Regular admissions standards will apply.

Matriculated “CE Only” Students Relocating to Main Campus

Students who have been admitted to a CE major, but not to a Main Campus major, should submit a Change of Campus Application to the Logan Main Campus Admissions Office by the published application deadlines. Students must have at least 24 earned post-high school credits and at least a 2.5 cumulative USU GPA. The Change of Campus Application is available online at: http://www.usu.edu/admissions/includes/forms/ChangeofCampusApplication.pdf or by contacting the Admissions Office at (435) 797-1129.

Matriculated CE Students Relocating to Main Campus

Students who have been admitted to a Main Campus major, but have been attending a CE site, should contact the Logan Main Campus Registration Office (Student Center 246, 1600 Old Main Hill, Logan UT 84332-1600) and request attendance at the Logan Main Campus.

Credit by Special Examination

Matriculated students may challenge a course for credit by taking a special examination available in the University Testing Center. The examination will survey knowledge of course content. University credit is awarded for examinations in courses the student has not already
Credit by Departmental Examination
Matriculated students may challenge a course for credit by taking a departmental examination. Departments will determine if a course is appropriate for challenge; students should contact the instructor and/or department. If a challenge exam is available, the instructor should advise the student as to whether he or she has a reasonable chance of passing. The examination will survey knowledge of the course content and may include papers, projects, portfolios, etc.

Students challenging a course for which they are registered must do so within the first two weeks of the course. Students not registered will be required to pay a fee (standard recording fee and course-specific examination fee). Students who take a departmental examination will receive the exam grade posted to their transcript for that course. Credits earned through departmental examination can be used to meet the minimum USU course requirement.

Standardized Examinations
Credits may be acquired through Advanced Placement (AP), College Level Examination Placement (CLEP), the International Baccalaureate Organization (IBO), and the DANTES Subject Standardized Tests (DSST). These credits may be used to fill General Education requirements, and may also be accepted as equivalent to specific courses. AP and CLEP credit combined may fulfill requirements for a maximum of four Breadth areas of General Education. For a list of examinations accepted and scores necessary to receive credit, see pages 62-66.

Individual departments and/or colleges may specify the exact courses required to fill their requirements and may require more than the minimum General Education requirements. Some departments and colleges require specific coursework for General Education, which the exams listed above may not satisfy.

If, prior to (or after) taking an AP, CLEP, IBO, or DSST examination, a student receives credit for any coursework equivalent to the subject matter of an AP, CLEP, IBO, or DSST examination, the credits earned from the course will be deducted from the credits awarded for the examination.

Other institutions have policies differing from those of USU regarding exam scores and credits granted for those scores. For transfer students, exam credit posted to another institution’s transcript is reevaluated based on USU’s standard.

Credit by Advanced Coursework (Language Credits)
Students who are proficient in a foreign language offered by Utah State University may earn lower-division credit through successfully passing a more advanced course. Applications for these credits should be made in the Department of Languages, Philosophy, and Speech Communication. Students who receive credit by advanced coursework will receive a grade posted to their transcript, with a designation that it was earned by advanced coursework. Credits earned through this option cannot be used to meet the minimum USU course requirement and are treated as transfer work.

International Baccalaureate
USU recognizes the International Baccalaureate diploma and awards credits for General Education requirements, excluding the Breadth American Institutions, Communications Literacy, and mathematics Quantitative Literacy requirements necessary for graduation.

Students who have not completed the International Baccalaureate diploma receive 8 credits for scores of 5, 6, or 7 achieved on the higher-level exams.

Credit achieved through the International Baccalaureate examinations may not be duplicated with AP credit.

For more information about the International Baccalaureate Organization, as well as a list of examinations accepted and scores necessary to receive credit, see pages 64-65.

Credit for Military Service
The University may grant credit to students currently enrolled at the University who have served in the armed forces. Applications for credit are made by submitting the DD214 or DD295 form to the Admissions Office.

Army/ACE Registry Transcript System (AARTS)
Enlisted soldiers who entered active duty on or after October 1, 1981 are eligible for an AARTS transcript. However, the AARTS transcript is not available to members of the U.S. Army Reserve, warrant officers, or commissioned officers. Those students who are eligible for an AARTS transcript and who are seeking credit for military service in the Army should provide the Admissions Office with an AARTS transcript instead of the DD214 or DD295 form. Eligible students may obtain transcript request forms from their Army education center counselors, or they may write directly to: Manager, AARTS Operations Center, 415 McPherson Avenue, Ft. Leavenworth KS 66027-1373. Each request must include the student’s name, basic active service date, social security number, and current mailing address.

Veterans Educational Benefits
Veterans or qualified dependents of disabled or deceased veterans who may be eligible for Veterans Educational Benefits should contact the Office of Veterans Services, or telephone (435) 797-1102 for information concerning their educational benefits. Veterans or eligible dependents must make application for admission and be matriculated in a degree program.

Graduate Admission
Any student who has graduated from USU or any other university must apply to the School of Graduate Studies for admission and present two copies of an official transcript. For further information, see pages 99-100.
Undergraduate Admission

Readmission

Students who were in attendance the previous spring semester are not required to reapply for fall semester unless the student withdrew from the University or if academic action (probation or suspension) or graduation occurred at the conclusion of the spring semester. Former students of the University returning after an absence of one year or longer are required to file an application for readmission, unless a Leave of Absence form was filed.

Readmission Deadlines

Students who desire to be readmitted following academic action (probation or suspension), must apply by March 1 in order to be considered for admission to fall semester, or by October 1 in order to be considered for admission to spring semester. All other students desiring readmission must apply by April 1 in order to be considered for admission to fall semester, or by November 1 in order to be considered for admission to spring semester.

International Undergraduate Student Admission

For information about admission procedures for international students, see pages 21-22.

Residency Policy and Appeal

Persons who have been classified as nonresident students and who feel they now satisfy the requirements for Utah Resident Status for Tuition Purposes must file an application with the Residency Office, Taggart Student Center 102. Applications are processed each semester. The deadline is the 10th calendar day of the semester. Applications received after this deadline will be considered for the next semester. The application will not be processed until the student is admitted to the University. There is no application fee.

If an application is denied by the Residency Office, the student may appeal to the Residency Appeals Committee no later than the 14th calendar day of the semester. Appeals cannot be considered after this deadline.

Regulations concerning residency are as follows:

1. Persons claiming residency on their application for admission, but who are coded nonresident, will be notified in writing of their nonresident status.

2. Utah Residency for Tuition Purposes

A person who has come to Utah and established residency for the purpose of attending an institution of higher education shall, prior to registration as a resident student:

(a) live in Utah while completing a minimum total of 60 semester credits at a regionally accredited institution of higher education in Utah or an equivalent number of applicable contact hours at the Utah College of Applied Technology. Utah semester credits should not be broken by attendance at another school of higher education outside the State of Utah (i.e., students may not attend summer classes in their home state). The 60 semester credits are not tied to a period of time.

(b) Individuals who would like to establish residency before beginning school may move to Utah and live and work in Utah for 24 continuous months prior to beginning school. Individuals who begin school before they have completed 24 continuous months as a nonstudent will need to complete 60 semester credits, or

(c) maintain continuous Utah residency for three years while attending school, regardless of the number of credits earned.

In addition, the person must demonstrate by additional objective evidence (e.g., Utah voter registration, Utah’s driver’s license, Utah vehicle registration, employment in Utah, payment of Utah resident income taxes, and Utah banking connections) the establishment of a domicile in Utah, and that the student does not maintain a residence elsewhere.

3. Aliens who are present in the United States on visitor, student, or other visas which authorize only temporary presence in this country do not have the capacity to intend to reside in Utah for an indefinite period of time and, therefore, must be classified as nonresident.

4. Aliens who have been granted immigrant or permanent resident status in the United States shall be classified for purposes of resident status according to the same criteria as U.S. citizens.

5. American Indians who are enrolled on the tribal rolls of a tribe whose reservation or trust lands lie partly or wholly within Utah or whose border is at any point contiguous with the border of Utah, or any American Indians who are members of a federally recognized or known Utah tribe and who have graduated from a high school in Utah, shall be entitled to resident status.

For further guidelines or exceptions, such as marriage, employment, military, and returning former residents, please contact the Admissions Office, Taggart Student Center 102, (435) 797-8144, or visit: http://www.usu.edu/admissions/information/residency.cfm

Western Undergraduate Exchange

Utah State University participates in the Western Undergraduate Exchange (WUE), a program of the Western Interstate Commission for Higher Education (WICHE). Through WUE, certain students who are not residents of the State of Utah may enroll at Utah State University by paying resident tuition plus 50 percent of that amount (plus other fees that are paid by all students). For further information, see WUE text in the Financial Aid and Scholarship Information section, page 26.
International Student Admission and Programs

Director of the Office of International Students and Scholars:
Jeannie Pacheco
Location: Student Center 313
Phone: (435) 797-1124
FAX: (435) 797-3522
E-mail: iss@cc.usu.edu
WWW: http://www.oiss.usu.edu/

The Office of International Students and Scholars (OISS) is committed to providing quality services to international students, scholars, and their families, and helping them to succeed, both academically and personally, in a caring and nurturing environment. OISS provides leadership and support to enhance the academic, social, and personal interactions of students and scholars while at USU, in the Logan community, and beyond. These services include, but are not limited to, international admissions, academic and cultural orientation programs, general advising, transportation, conflict resolution and mediation, immigration matters including SEVIS, peer mentoring, and cultural events planning. OISS also provides referrals to other campus units, including Student Health and Wellness Center, Counseling Center, Academic Resource Center, University Advising and Transfer Services, Housing and Dining Services, Intensive English Language Institute, Registrar’s Office, Cashiers Office, Student Employment, and Career Services, to ensure academic success through graduation.

Undergraduate Admission Requirements

International Undergraduate Student Admission
The following fees, documents, and information should be submitted to OISS four months (January 15, summer semester; April 15, fall semester; September 15, spring semester) prior to the beginning of the semester for which an international student wishes to be considered for admission:

1. Utah State University international application for admission and a $50 nonrefundable application fee. Applications submitted after the recommended filing date will be charged an additional $15 nonrefundable late fee.

2. Official transcripts and certificates or certified true copies for each secondary school, college, and university attended with official English translation of all documents.

3. Evidence of financial capability must be provided with the application, as specified on the application form.

4. International students must be proficient in the use of English. Proficiency is determined for undergraduates by a minimum TOEFL score of 500 on the manual (paper/pencil) test, 173 on the computerized test, 61 on the iBT (Internet-based TOEFL), a minimum IELTS score of 5.0, a Michigan test score of 80, or by passing level 4 (advanced level) of the Intensive English program at Utah State University.

Qualified students in level 4 (advanced level) of Intensive English may take one or more academic courses if approved by the Intensive English faculty and their academic advisor. Audited courses are not recognized by the U.S. Citizenship and Immigration Services (USCIS) toward the requirement of carrying a full course of study.

Failure to carry a full course of study (at least 12 credits per semester for undergraduates), failure to make satisfactory progress toward the receipt of an undergraduate or advanced degree, or failure to comply with any other immigration requirements for students attending USU will be grounds for suspension or dismissal in accordance with existing University policy.

SEVIS
SEVIS is an Internet-based system that allows schools and the U.S. Citizenship and Immigration Services (USCIS) to exchange data on the visa status of international students. Accurate and current information is transmitted electronically throughout an F-1 or J-1 student’s academic career and throughout a J-1 scholar’s stay in the United States. U.S. embassies and consulates will also have access to SEVIS.

The University is committed to assisting students in the following ways, to prevent status violations from occurring:

1. OISS will require mandatory orientation programs for all newly enrolled international students. The new rules and regulations will be thoroughly discussed and explained.

2. OISS will offer orientation for all newly arrived international scholars.

3. Informational sessions will be offered throughout the semester for students and scholars who are already on campus.

International Scholarships
Utah State University offers a limited amount of scholarships to international students. For more information, visit the OISS website: http://www.oiss.usu.edu/

Transfer Student Admission
Applicants with at least 24 semester credits earned at another recognized institution will be admitted if they have a transfer GPA of 2.50 or higher. Those transfer students having a GPA between 2.20 and 2.49 will be considered on an individual basis. Many USU undergraduate majors require a higher GPA for admission. For specific GPA requirements, refer to this catalog or consult the departments. In cases where the student is admissible to the University but does not meet the minimum GPA requirement for admission to the desired major, admission will be offered as an “undeclared” major. Applicants having fewer than 24 semester transfer credits must submit an official high school transcript (including a translated version). Official transcripts of credit must accompany applications for admission when submitted by students who have attended other collegiate institutions. Transcripts submitted for admission become the property of the University and are not returned. Transcripts from all institutions previously attended are required (including a translated version). At its discretion, the University may accept transfer credit from accredited and nonaccredited institutions and miscellaneous sources. Acceptance of credit should not be confused with its application. Transfer credit may or may not apply to the graduation requirements of an institution, regardless of the number of credits transferred. Students who would like their college or university work considered for transfer credit must include a course syllabus or description (translated into English) of this work.

Readmission
Students who have not been in attendance for a semester or more are required to reapply for admission for the next semester. They must also reapply for the next semester if they have withdrawn from the University or if suspension or graduation occurred at the conclusion of their previous semester. See page 20 for readmission deadlines.
**International Baccalaureate**

USU recognizes the International Baccalaureate diploma and awards credits for General Education requirements, excluding the Breadth American Institutions, Communications Literacy, and mathematics Quantitative Literacy requirements necessary for graduation. Students who have not completed the International Baccalaureate diploma receive 8 credits for scores of 5, 6, or 7 achieved on the higher-level exams.

Credit achieved through the International Baccalaureate examinations may not be duplicated with Advanced Placement (AP) credit.

**Graduate Admission**

Any student who has graduated from USU or any other university must apply to the School of Graduate Studies for admission and present two copies of official transcripts. Refer to pages 99-100 for further information.

**Required New International Student Orientation**

Newly admitted or readmitted students must participate in New International Student Orientation. This orientation is designed to assist students in making a successful transition to USU. In addition to registering for classes, students have the opportunity to receive individual advice about degree requirements, as well as vital information about immigration, health insurance, housing, student services, campus life, and athletics. This orientation also gives students a chance to make new friends. New and returning international students should be aware that a registration hold will be placed on their file until some form of orientation is completed. After admission to USU, students will receive information about New International Student Orientation.

New students who are required to take the IELI Placement Examination will be able to schedule an appointment at the orientation.

For further information, contact OISS by phone at (435) 797-1124 or by e-mail at iss@cc.usu.edu.

**Undergraduate Graduation Requirements**

For further information, refer to pages 58-61 in this catalog.

---

**Intensive English Language Institute**

The Intensive English Language Institute (IELI) is an academic program in the College of Humanities, Arts and Social Sciences. IELI teaches international students, residents, and refugees the English skills and cultural knowledge they need to be successful university students. IELI also trains international teaching assistants (ITAs) for USU. Information about the ITA training is available through the School of Graduate Studies. The IELI program accepts students seeking a degree at Utah State University, as well as students who want to study English for personal or professional reasons. Students may enroll to study only English.

Undergraduate students who apply to USU without a TOEFL score of at least 173 computerized, 500 manual (paper/pencil), or 61 iBT (Internet-based test), or a minimum IELTS score of 5.0; and graduate students applying without a minimum TOEFL score of 213 computerized, 550 manual (paper/pencil), or 79 iBT (Internet-based test), or a minimum IELTS score of 6.0, must take the IELI Placement Examination, given the first day of each semester, including the first day of the IELI summer session. Based on the examination results, students will be required to study in the IELI or exempted from further study and permitted to take classes in their major fields. For additional information, contact the Intensive English Language Institute (IELI) office by phone at (435) 797-2081 or by e-mail at ieli@cc.usu.edu.

**Summer Full-time Status**

To be considered as full-time students during the summer, international students may not take all of their courses during one short-term session. More specifically, international students must spread their credit load throughout the summer by taking a minimum of one course during the first four-week session and a minimum of one course during the eight-week session. Undergraduate students must complete a minimum of 12 credits, and graduate students must complete a minimum of 9 credits. A maximum of 3 credits of distance education (online or independent study classes) may count toward the 9- or 12-credit requirement per semester.

**Special Programs**

**Community and University Friends of International Students and Scholars (CUFISS)**

CUFISS is a collaboration between the University and community which helps facilitate with activities, as well as with cultural and educational opportunities. For additional information, contact OISS by phone at (435) 797-1124 or by e-mail at iss@cc.usu.edu.

**Study Abroad Programs**

The USU Study Abroad Office provides information on a range of programs offering opportunities for study all over the world. USU offers many study abroad exchanges for a semester, academic year, or summer term in conjunction with other universities. Students can complete major or minor requirements while on study abroad. For further information, refer to page 79 in this catalog.
Financial Aid and Scholarship Information

Counselor (C-F): Cedra H. Jensen
Counselor (G-J): Jacob R. Brazell
Counselor (K-M): Patti P. Kohler
Counselor (N-SL): Eric Flores
Counselor (SM-W): Amanda Alles
Scholarship Counselor: Taya Flores

Loan and Collection Officer:
Brent D. Sorenson, Student Center 246, (435) 797-1426,
bsorenson@cnr.usu.edu

Application for financial aid begins in January for any awarding anticipated during the following academic year. In most instances, early application benefits the applicant. Those who apply early have a greater chance of receiving more aid and of having aid available in time to meet school needs. Pell Grant and Stafford Loans are available throughout the year. Contact the Financial Aid Office for assistance. The free online application can be found at: http://www.fafsa.ed.gov

Scholarships are awarded to qualifying applicants who apply on or before February 1, prior to the academic year. Students should contact the Admissions Office or the department of their major for the exact deadline. For 2007 admission, the priority deadline for scholarship application is December 1, 2006.

Financial aid programs, policies, and procedures described herein reflect the latest information at publication. Changes may occur in response to state and federal requirements. Appropriate notice will be made whenever possible before any change takes effect.

For further information concerning financial assistance available for graduate students, see pages 98-99 of this catalog.

Grants, Work-Study, and Loans

Federal Pell Grant
Available to undergraduates. Grants do not need to be repaid.

Federal Supplemental Educational Opportunity (FSEOG) Grant
Available to undergraduates. Grants do not need to be repaid. The maximum award varies yearly. Awarding is based on need and funding.

Leveraging Educational Assistance Partnership (LEAP) Grant
Awarded to resident undergraduates who demonstrate exceptional need. Awards are based on availability of funds.

Utah Centennial Grant (UCOPE)
Available to undergraduate residents of Utah. Awards are based on availability of funds.

Other Grants and Special Benefits
Contact the Financial Aid Office for details concerning BIA or Tribal Grants.

Federal College Work-Study (FCWS)
Provides part-time on-campus employment to enable students to earn a portion of their educational expenses during the college year. Awarding is based on need and the availability of funds.

Federal Perkins Loan
Undergraduate students generally may borrow up to $3,000 per year, to a total school amount of not more than $15,000. Graduate students may borrow $4,000 per year, up to $30,000. Monthly payments and interest begin after graduation, withdrawal, or otherwise leaving school, or after dropping below 6 credits. A 5 percent simple interest rate applies. Awarding is based on need and funding.

Federal Stafford Loan
Low, variable interest loans. Freshmen may apply for up to $2,625 each regular school year; sophomores may apply for up to $3,500 a year; juniors, seniors, and second bachelor’s degree students may apply for up to $5,500 a year; and graduates may apply for up to $8,500 a year. Aggregate borrowing limits are $23,000 for undergraduates and second bachelor’s degree students, and $65,500 for graduates. Monthly repayment begins after completing or leaving school, or after dropping below 6 credits. Interest accrued prior to the beginning of repayment is paid by the federal government for "subsidized" Federal Stafford Loans. Maximum repayment period is generally 10 years.

PLUS Loans
PLUS loans are for parents who want to borrow for their children’s education. This loan provides additional funds for educational expenses. Repayment begins within 60 days after the last loan disbursement. This variable interest loan has an interest rate cap of 10 percent. This loan is available when other awarded federal aid to the student does not fully meet the school’s estimated cost of education.

Emergency Loan
An emergency loan for up to $400 is available for USU students with fees paid for at least 6 credits. Emergency loans are not available for tuition. The duration of emergency loans is ten weeks. A low rate of interest or service charge applies.

Method of Awarding Financial Aid
A student’s Estimated Family Contribution (EFC) is calculated from information provided by the student on the federal financial aid application. A student’s Financial Need is the difference between the estimated cost of education and the EFC. Financial aid is awarded to fill this need, as much as possible, using whatever funds are available.

**Financial Aid and Scholarship Information**

**Repayment of Federal Funds Policy**

Students who are withdrawing from the University and who have Federal Financial Aid must meet with their financial aid counselor prior to withdrawing.

Students who completely withdraw from the University during the course of a semester are required to return a percentage of their Federal Student Financial Aid. All types of Federal Financial Aid are included in the repayment, including: Pell Grants, Supplemental Grants, Perkins Loans, and Stafford Loans. The amount of repayment is based on the percentage of the semester completed. For example, if a student withdraws after completing 40% of the semester (calculated using calendar days), the student must return 60% of his or her Federal Student Aid. Students who withdraw, or cease attending, after completing 60% of the semester are not required to return aid. (However, they will still face suspension from financial aid for failing to complete the required number of credits.) If the student is eligible for a refund of tuition and fees, according to the University refund policy, the refund will be applied to the Federal Financial Aid obligation. A refund may or may not completely repay the obligation. Either way, the student will not be allowed to register for future classes, nor be eligible for future financial aid, until the debt is repaid.

For example, suppose a student has Federal Aid in the following amounts:

<table>
<thead>
<tr>
<th>Grant Type</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pell Grant</td>
<td>$1,500</td>
</tr>
<tr>
<td>Perkins Loan</td>
<td>$1,200</td>
</tr>
<tr>
<td>Stafford Loan</td>
<td>$2,750</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>$5,450</strong></td>
</tr>
</tbody>
</table>

If the semester has 115 calendar days and the student completely withdraws from the University on day 20, the repayment would be calculated as follows: 115/20 = 17% of the semester completed, and 83% not completed. Therefore, 83% of the Federal Aid must be repaid (i.e., $5,450 x 83% = $4,523.50).

Withdrawal on day 20 would allow a 50% refund of tuition and student fees. If the student paid $1,400, the refund would be $690 (i.e., $700 minus the $10 nonrefundable registration fee). Therefore, after $690 is applied to the repayment, an additional $3,842.50 must be repaid (i.e., $4,532.50 - $690 = $3,842.50).

Students who receive all Fs for the semester must document participation in an academic activity (including attending class, taking exams, turning in assignments, etc.) through the mid-point of the semester or will have to repay 50% of the federal funds received.

**Note:** Loan funds to be repaid will go into repayment according to the terms of the loan. Grant funds to be repaid must be repaid immediately. More details are available from the Financial Aid Office.

**Responsibility of Financial Aid Recipients**

Undergraduate financial aid recipients are expected to maintain a USU GPA of at least 2.0. Graduate students must maintain a USU GPA of 3.0. Students must also pass 70 percent of the credits they attempt.

Students either not passing the required amount of credits or not maintaining the required grade point average will be placed on financial aid probation for a minimum of one semester. Students not meeting the required minimums during the period of probation will be suspended from further aid. In exceptional circumstances, students may appeal to have the suspension lifted.

For additional details, visit [http://www.usu.edu/finaid/RAP.html](http://www.usu.edu/finaid/RAP.html)

In addition to maintaining academic progress as defined above, recipients may not owe a repayment on grants previously received, or be in default of any student loan fund at USU or any other institution.

**Scholarship Policy**

Scholarships for new undergraduate students and undergraduate transfer students are awarded by the Admissions Office. Scholarships for continuing students are awarded by the various colleges and academic departments.

**Scholarships for New Undergraduate Students**

To be considered for scholarships, applicants must be admitted to Utah State University, attend classes at the main Logan campus, and intend to graduate from USU. (Students majoring in programs sponsored by other academic institutions, such as the Cooperative Nursing Program with Weber State University, are not eligible for Utah State University sponsored scholarships.) Utah State University offers a variety of scholarships based on academic merit using the cumulative GPA (a four-point scale is used to determine cumulative GPA) and ACT or SAT score. Some other criteria may be used in determining eligibility, such as achievements, leadership, talent, family size and income, ethnicity, and first-generation college student status. The scholarship application deadline (as listed on the dual admissions and scholarship application) is different than the admissions deadline. To be considered for scholarships, students must apply by February 1. For 2007, all scholarships will be awarded on a first-come, first-served basis.

Therefore, applicants are encouraged to apply early. See pages 24-26 for information about scholarships available to new freshmen. For more information, contact the Admissions Office by phone at 1-800-488-8108 or (435) 797-1129, or by e-mail at: admitt@usu.edu.

**Scholarships for Home Schooled Students**

To be considered for scholarships, home schooled students must have a minimum ACT score of 25.

**Scholarships for Transfer Students**

To be considered for scholarships, a transfer student must submit the Undergraduate Admission and Scholarship application. Official transcript(s) must accompany the application. To be considered for transfer scholarships, transfer students must apply by April 1 and must have earned a minimum of 24 post high school graded semester credits. See page 26 for information about scholarships available to transfer students.

**Freshman Resident Scholarships**

The scholarships listed below are based on the 2006-2007 applicant pool and are subject to change without notice. For the latest information on freshman scholarships, visit: [http://www.usu.edu/scholarships](http://www.usu.edu/scholarships)

**Presidential Scholarship**

Awarded for four years, this scholarship is worth approximately $13,200. During eight semesters (four years), $1,650 per semester is awarded toward tuition. To be considered, applicants must have
Financial Aid and Scholarship Information

an admissions index score of 125 or higher, a minimum 3.5 GPA, and a minimum ACT score of 25 or SAT score of 1130. This award applies only to undergraduate coursework. To remain eligible for this scholarship, a student must enroll for and complete at least 15 credits each semester, for a total of 30 credits per year, and achieve a 3.5 GPA at the end of each academic year.

**Dean's Scholarship**
Awarded for this year, this scholarship is worth approximately $6,600. During eight semesters (four years), $825 per semester is awarded toward tuition. To be considered, applicants must have an admissions index score of 120 or higher, a minimum 3.5 GPA, and a minimum ACT score of 25 or SAT score of 1130. This award applies only to undergraduate coursework. To remain eligible for this scholarship, a student must enroll for and complete at least 15 credits each semester, for a total of 30 credits per year, and achieve a 3.5 GPA at the end of each academic year.

**Diversity Scholarship**
During eight semesters (four years), $1,650 per semester is awarded toward tuition. To be considered, applicants must have a minimum 3.0 GPA and a minimum ACT score of 20 or SAT score of 940, and must be admissible to USU. This award is based on financial need, first-generation college student status, and geographic location. Students apply by submitting an Application for Admission and Scholarship to USU.

**University Ambassador Program Scholarship**
During eight semesters (four years), $1,650 per semester is awarded toward tuition. To be considered, applicants must have a minimum 3.4 GPA and a minimum ACT score of 23 or SAT score of 1090. In addition to a separate application, applicants must submit an extensive recruitment portfolio and two letters of recommendation. This award applies only to undergraduate coursework. To remain eligible for this scholarship, a student must enroll for and complete at least 15 credits each semester, for a total of 30 credits per year, and achieve a 3.5 GPA at the end of each academic year.

**Alumni Chapter Scholarships**
To be considered for a chapter scholarship, a student must be (1) living in an area with a chartered alumni chapter, (2) an incoming freshman or transfer student (cannot have previously attended USU), and (3) a child or grandchild of a USU alumnus. The amount of each scholarship is based on the funds raised in each chapter. Therefore, the scholarships may be different each year. For information about these scholarships, contact the Alumni Office at (435) 797-2055, or visit [http://www.usu.edu/alumni/scholar.html](http://www.usu.edu/alumni/scholar.html)

**ROTC Scholarships**
For information about these scholarships, contact the Air Force ROTC Office at (435) 797-8723 or the Army ROTC Office at (435) 797-3637. Information is available on the Web at: [http://www.afrotc.com/scholarships](http://www.afrotc.com/scholarships) and [http://www.goarmy.com/rotc/scholarships.jsp](http://www.goarmy.com/rotc/scholarships.jsp)

**Freshman Nonresident Scholarships**
The scholarships listed below are based on the 2006-2007 applicant pool and are subject to change without notice. For the latest information on freshman scholarships, visit: [http://www.usu.edu/scholarships](http://www.usu.edu/scholarships)

**President Nonresident Scholarship**
Awarded for four years, this scholarship is worth approximately $20,600. During the first four semesters (two years), $3,500 per semester is awarded toward the out-of-state portion of tuition. During the remaining four semesters (two years), students receive $1,650 per semester. Students are encouraged to gain Utah residency during their first two years at USU. To be considered, applicants must have an admissions index score of at least 124, a minimum 3.5 GPA, and a minimum ACT score of 25 or SAT score of 1130. This award applies only to undergraduate coursework. To remain eligible for this scholarship, a student must enroll for and complete at least 15 credits each semester, for a total of 30 credits per year, and achieve a 3.5 GPA at the end of each academic year.

**Dean's Nonresident Scholarship**
Awarded for two years, this scholarship is worth approximately $7,000. During two years, $1,750 per semester is awarded toward the out-of-state portion of tuition. To be considered, applicants must have an admissions index score of at least 117, a minimum 3.5 GPA, and a minimum ACT score of 25 or SAT score of 1130. This award applies only to undergraduate coursework. To remain eligible for this scholarship, a student must enroll for and complete at least 15 credits each semester, for a total of 30 credits per year, and achieve a 3.5 GPA at the end of each academic year.

**Diversity Scholarship**
Awarded for four years, this scholarship is worth approximately $20,600. During the first four semesters (two years), $3,500 per semester is awarded toward the out-of-state portion of tuition. During the remaining four semesters (two years), students receive $1,650 per semester. Students are encouraged to gain Utah residency during their first two years at USU. To be considered, applicants must have an admissions index score of at least 117, a minimum 3.5 GPA, and a minimum ACT score of 19 or SAT score of 810, and must be admissible to USU. This award is based on financial need, first-generation college student status, and geographic location. Students apply by submitting an Application for Admission and Scholarship to USU.

**ISU/USU Scholarship**
This is worth approximately $14,000. During four semesters (two years), $3,500 per semester is awarded toward the out-of-state portion of tuition. To be considered, applicants must have an admissions index score of at least 117, a minimum 3.5 GPA, and a minimum ACT score of 25 or SAT score of 1130. This award applies only to undergraduate coursework. To remain eligible for this scholarship, a student must enroll for and complete at least 15 credits per semester, for a total of 30 credits per year, and achieve a 3.5 GPA at the end of each academic year.

**100-Mile Radius Scholarship**
This is worth approximately $7,000. During four semesters (two years), $1,750 per semester is awarded toward the out-of-state portion of tuition. To be considered, an applicant must live within 100 miles of Utah State’s Logan campus and must be admitted in good standing to the main campus in Logan.

**University Ambassador Program Scholarship**
During the first four semesters (two years), $3,500 per semester is awarded toward the out-of-state portion of tuition. During the remaining four semesters (two years), students receive $1,650 per semester. To be considered, applicants must have a minimum 3.4 GPA and a minimum ACT score of 23 or SAT score of 1090. In addition to a separate application, applicants must submit an extensive recruitment portfolio and two letters of recommendation. This award applies only to undergraduate coursework. To remain eligible for this scholarship, a
Financial Aid and Scholarship Information

A student must enroll for and complete at least 15 credits each semester, for a total of 30 credits per year. An application for this scholarship can be downloaded from: http://www.usu.edu/admissions/scholarships/ Ambassador-app.pdf

Western Undergraduate Exchange
Utah State University participates in the Western Undergraduate Exchange (WUE), a program of the Western Interstate Commission for Higher Education (WICHE). Through WUE, certain students who are not residents of the State of Utah may enroll at Utah State University by paying resident tuition plus 50 percent of that amount (plus other fees that are paid by all students).

Because Utah State University participates in the WUE program, residents of Utah may enroll under the same terms in designated institutions and programs in other participating states.

Information about and applications for WUE programs available at USU may be obtained from the USU Admissions Office, 0160 Old Main Hill, Logan UT 84322-0160, tel. (435) 797-1129 or (800) 489-8108.

Utah residents may obtain information about WUE programs in other states from the Certifying Officer for Utah WICHE Student Exchange Program, #3 Triad Center, Suite 550, 355 West North Temple, Salt Lake City UT 84180-1205, tel. (801) 321-7124 or from WICHE Student Exchange Program, P.O. Box 9752, Boulder CO 80301-9752, tel. (303) 541-0214 or 0210, FAX (303) 541-0291.

Transfer Resident Scholarships

Transfer Presidential Scholarship
Awarded for two years, this scholarship is worth approximately $6,600. During four semesters (two years), $1,650 per semester is awarded toward tuition. To be considered, applicants must have completed a minimum of 24 graded, transferable credits with a minimum 3.75 cumulative GPA.

Transfer Dean's Scholarship
Awarded for two years, this scholarship is worth approximately $3,300. During four semesters (two years), $825 per semester is awarded toward tuition. To be considered, applicants must have completed a minimum of 24 graded, transferable credits with a minimum 3.50 cumulative GPA.

Diversity Scholarship
This award is worth approximately $6,600. During four semesters (two years), $1,650 per semester is awarded toward tuition. To be considered, applicants must have completed a minimum of 24 graded, transferable credits with a minimum 2.75 cumulative GPA. This award is based on financial need, first-generation college student status, and geographic location. Students apply by submitting an Application for Admission and Scholarship to USU.

Transfer Ambassador Program Scholarship
During four semesters (two years), $1,650 per semester is awarded toward tuition. This scholarship is awarded to a select group of students who demonstrate leadership and recruiting skills through experience, activities, and involvement in both school and community. In addition to a separate application, applicants must submit an essay and two letters of recommendation. To be considered, applicants must have an associate degree and a minimum 3.2 cumulative GPA. The application deadline is February 1.

Transfer Nonresident Scholarships

President Nonresident Transfer Scholarship
This award is worth approximately $14,000. During four semesters (two years), $3,500 per semester is awarded toward the out-of-state portion of tuition. To be considered, applicants must have completed a minimum of 24 graded, transferable credits with a minimum 3.75 cumulative GPA.

Dean's Nonresident Transfer Scholarship
This award is worth approximately $7,000. During four semesters (two years), $1,750 per semester is awarded toward the out-of-state portion of tuition. To be considered, applicants must have completed a minimum of 24 graded, transferable credits with a minimum 3.5 cumulative GPA.

ISU/USU Scholarship
This award is worth approximately $14,000. During four semesters (two years), $3,500 per semester is awarded toward the out-of-state portion of tuition. To be considered, applicants must be a resident of Idaho, and must have a minimum of 24 graded, transferable credits with a minimum 3.0 cumulative GPA.

100-Mile Radius Scholarship
This award is worth approximately $7,000. During four semesters (two years), $1,750 per semester is awarded toward the out-of-state portion of tuition. To be considered, an applicant must live within 100 miles of Utah State’s Logan campus, and must have a minimum of 24 graded, transferable credits with a minimum 3.0 cumulative GPA.

Diversity Scholarship
This award is worth approximately $14,000. During four semesters (two years), $3,500 per semester is awarded toward the out-of-state portion of tuition. To be considered, applicants must have completed a minimum of 24 graded, transferable credits with a minimum 2.75 cumulative GPA. This award is based on financial need, first-generation college student status, and geographic location. Students apply by submitting an Application for Admission and Scholarship to USU.

Transfer Ambassador Program Scholarship
During four semesters (two years), $1,650 per semester is awarded toward the out-of-state portion of tuition. This scholarship is awarded to a select group of students who demonstrate leadership and recruiting skills through experience, activities, and involvement in both school and community. In addition to a separate application, applicants must submit an essay and two letters of recommendation. To be considered, applicants must have an associate degree and a minimum 3.2 cumulative GPA. The application deadline is February 1.

Western Undergraduate Exchange
Utah State University participates in the Western Undergraduate Exchange (WUE), a program of the Western Interstate Commission for Higher Education (WICHE). Through WUE, certain students who are not residents of the State of Utah may enroll at Utah State University by paying resident tuition plus 50 percent of that amount (plus other fees that are paid by all students). For further information, see WUE text in left column of this page.
New Century Scholarship

The New Century Scholarship is funded by the Utah legislature to assist with the costs of postsecondary education for students who complete the equivalent of an associate degree by September 1 of the year their class graduates from high school.

The scholarship covers 75 percent of tuition costs at a Utah state-operated institution of higher education.

Terms of the Scholarship

The scholarship may be used for two years of full-time equivalent enrollment (60 credits) or until the requirements for a baccalaureate degree have been met, whichever is shorter.

The scholarship may be used at any higher education institution in the state accredited by the Northwest Association of Schools and Colleges that offers baccalaureate programs.

Recipients have four years after graduation from high school to use the award.

Eligibility

The New Century Scholarship is open to applicants who have graduated from a regionally accredited high school in the year 1999 or later. The applicant must have completed the equivalent of an associate degree from Utah State University by September 1 of the year that their class graduates from high school.

At Utah State University, the equivalent of an associate degree is defined as:

1. Completion of the General Education portion of the University Studies requirements, and
2. Completion of 60 semester credits.

For more information on the classes needed to complete these requirements at Utah State University, contact:

Deborah Reece
Academic Advisor
University Advising and Transfer Services
Taggart Student Center, Room 304
0114 Old Main Hill
Logan UT 84322-0114
Phone: (435) 797-3373

Centennial Scholarship

The Centennial Scholarship is a full- or partial-tuition scholarship that can be used at any postsecondary institution in Utah that is accredited by the Northwest Association of Schools and Colleges. To be eligible for the scholarship, students must enroll in an eligible postsecondary institution within one year of graduation.

Amount Awarded

1. The student who graduates at the end of the eleventh grade year shall receive a full Centennial Scholarship.
2. The student who graduates at the end of the first quarter of the twelfth grade year shall receive 75 percent of the Centennial Scholarship.
3. The student who graduates at the end of the second quarter of the twelfth grade year shall receive 50 percent of the Centennial Scholarship.
4. The student who graduates at the end of the third quarter of the twelfth grade year shall receive 25 percent of the Centennial Scholarship.
5. The student who graduates at the end of the first trimester of the twelfth grade year shall receive 67 percent of the Centennial Scholarship.
6. The student who graduates at the end of the second trimester of the twelfth grade year shall receive 33 percent of the Centennial Scholarship.

Procedures for Using the Centennial Scholarship Certificate

1. Upon graduation, the student obtains a Centennial Scholarship for Early Graduation certificate from his or her high school counselor.
2. The high school principal verifies that the student is an early graduate and signs the certificate. The original certificate is kept by the student. Additional copies are for school and district records.
3. The student enrolls full-time in an approved post-secondary educational institution and presents the certificate to the registrar.
4. The postsecondary educational institution verifies the student’s enrollment. The registrar completes, signs, and seals the certificate. The registrar sends the original completed certificate to the Utah State Office of Education (USOE), noting the cost of tuition.
5. USOE receives the completed certificate. It is verified for completion and duplication. USOE approves the certificate for funding and issues a warrant request to Utah State Finance for scholarship funds. A check is sent directly to the postsecondary institution for the student. Checks are sent to institutions within four to six weeks.

University Research Fellowships

Utah State University is known nationally for its emphasis on hands-on learning in research, scholarship, and the creative arts. University Research Fellowships of $1,000 per year (renewable) are awarded to students who successfully compete in the application and interview process. Fellows are paired with a faculty member and begin inquiry in their fields of study as freshmen, which prepares them to compete for prestigious scholarships and entry into graduate studies. Presidential Scholars are eligible to compete for Research Fellowships.
Financial Aid and Scholarship Information

Continuing USU Student Scholarships

College Scholarships
Each college has its own scholarship application, which is available at the dean’s office and must be returned there by the given deadline. For most colleges, the application deadline is February 1.

Tuition waivers and other forms of academic scholarships are awarded to students who are or who have been students at USU. Such applicants compete with other students within their college. Students should check with their college for application requirements and deadlines.

Private Endowment Scholarships
Each of the seven colleges at USU awards scholarships to undergraduate and graduate students. Although most of these scholarships are awarded to students who have already attended USU for one or more semesters, a few of them are available to new freshmen who have already decided upon their major area of study. Application forms are available from the dean’s office of each college. Information about private endowment scholarships, including the qualifications for receiving each of them, is provided online at: http://www.usu.edu/ats/generalcatalog/scholarships/
New Student Orientation and Academic Advising

New Student Orientation

New Freshmen

Newly admitted first-year students must participate in a Student Orientation, Advising, and Registration (SOAR) session before being permitted to register for classes. SOAR is designed to assist students in making a successful transition to USU. In addition to registering for classes, students have the opportunity to receive individual advice about degree requirements, as well as vital information about student services, campus life, and athletics. SOAR also gives students a chance to make new friends.

New students should be aware that a registration hold is placed on their file until some form of orientation is completed. After admission to USU, students will receive information about SOAR programs.

University Deposit

All new freshmen are required to reserve their spot at USU by paying a $100 deposit. The $100 will be applied toward a student’s account. It will cover the cost of the SOAR option selected, and any remaining balance will go toward tuition and fees.

Early Registration Request

Students who pay the $100 deposit and register for SOAR prior to the posted deadline will be able to submit an Early Registration Request. The earlier students submit their deposit and register for SOAR, the more likely they are to get the classes of their choice and the orientation date of their choice. Students will not be allowed to modify their schedules until they participate in SOAR.

Students who miss the posted deadline must still pay the University deposit and register for SOAR. However, they will not be able to submit an Early Registration Request.

For further information or to receive more information about SOAR, call New Student Orientation at (435) 797-0283 or (800) 606-4878, or visit the SOAR website at: http://www.usu.edu/soar

New Transfer Students

New transfer students are required to contact their academic advisor before registering for classes. A student is considered to be a transfer student if he or she has completed at least 24 semester credits of post-high school work at another institution. This does not include concurrent enrollment or AP credits.

Academic Advising

Upon admission to USU, all new students are assigned to an academic advisor. During New Student Orientation, students meet with their advisors, plan their class schedules, and register for classes. Advising is the process encompassing development and delivery of accurate and up-to-date information regarding career options, educational programs, courses of instruction, resources, policies, and procedures to aid students in pursuing their educational goals.

Each student should consult with his or her academic advisor on a regular basis, and as needed, until the student’s program of study is completed. The advisor can help the student to select, plan, and complete a program of study which is consistent with the student’s interests, abilities, and needs, and can assist the student in selecting appropriate courses in the proper sequence to complete all requirements for graduation.

Each student is responsible for learning and completing graduation requirements for academic programs selected. Major Requirement Sheets showing University, college, and departmental requirements for each academic program are available on the University Advising and Transfer Services (UATS) website at: http://www.usu.edu/ats/majorsheets/

The College or Division Academic Service Centers provide students with information and advisement concerning academic requirements, policies, procedures, programs, and services of that college or division. A listing of Academic Service Centers is provided below:

University Advising and Transfer Services
Student Center 304, (435) 797-3373

College Academic Service Centers

College of Agriculture
Agricultural Science 218, (435) 797-2383

College of Business

Natural Resources 120, (435) 797-2448

College of Science
Eccles Science Learning Center 245, (435) 797-2478

An Advisor List by Major is available on the web at: http://www.usu.edu/ats/advisorlist.

E-mail Communication Policy

All students enrolled at USU are provided with a University e-mail account. University officials, including advisors, professors, administrators, and various office personnel, use a student’s e-mail account as an official means of communication.

It is the responsibility of all students to check their e-mail accounts on a regular basis. Students will be held accountable as being officially notified when any correspondence is sent by University representatives to their e-mail accounts. For verification and security reasons, once a student is enrolled at USU, only the USU e-mail account will be used for official communications.

Prior to students’ enrollment at USU, University officials may correspond with them electronically via other e-mail providers.
Glossary of University Terms

"A" Pin
Presented to undergraduate students who have received all A grades (4.0 GPA) for 15 or more graded credits each semester during two consecutive semesters in residency. Courses for which a P (Pass) grade is received do not qualify for graded credits.

A-Number (Banner ID Number)
A nine-character code that uniquely identifies each student. This number (which is not social security number based) always consists of a capital A, followed by eight numbers. To find out their assigned A-Number, students should follow the link found at: http://www.usu.edu/registrar/access/index.cfm

Academic Advising
Assistance to students in choosing courses by providing information about University Studies Requirements, majors, various academic programs, and academic policies and procedures. Advisors may also assist students in establishing their educational and career goals.

Academic Dismissal
The status of a student who becomes subject to suspension for a third time. Students who have been dismissed may apply for readmission to the University after a layout of five or more calendar years. See page 40 for more information.

Academic Probation
The status assigned to a sophomore, junior, or senior with a cumulative GPA of less than 2.0. See page 40 for more information.

Academic Record Adjustment
Students requesting an adjustment to their academic record for a prior term must submit a Petition for Academic Record Adjustment to the Registrar’s Office. For more information, see page 41.

Academic Renewal
Undergraduate students who have been admitted to Utah State University after an interruption in their collegiate education of five or more years may petition to have certain credits removed from the calculation of the GPA needed for credit. Further details about this procedure are found on pages 40-41.

Academic Standing
A student’s academic standing is determined jointly by the number of credit hours attempted and the number of quality points earned. There are five categories of academic standing: good standing, academic warning, academic probation, academic suspension, and academic dismissal. See page 40 for more information.

Academic Suspension
The change in status that occurs when a student on academic probation has a semester GPA of less than 2.0. Students who have been suspended once may apply for readmission after a two-semester layout. Students who have been suspended two times may apply for readmission to the University following a layout of one full calendar year. See page 40 for more information.

Academic Warning
The status assigned to a freshman student with a cumulative GPA of less than 2.0. See page 40 for more information.

Access (Banner) System
The web-based computer program which USU students can access for grades, transcripts, financial aid, and account information. The Access system (which is available 24 hours a day, 7 days a week, and can be accessed from any web-enabled system) allows students to register for, drop, and add classes.

Adjunct Faculty
Part-time certified instructors.

Advanced Placement (AP)
Exams offered at the high school level only. University credits may be acquired through the AP examinations. These credits may be used to fill General Education requirements, and may also be accepted as equivalent to specific courses. See page 62 for more information.

Advisor
A faculty or staff member who provides students with academic information about University, college, and departmental graduation requirements; assists students in the development of a course of study; helps students to understand the expected standards of achievement and likelihood of success in certain areas of study; and refers students to available campus resources to meet individual needs.

Alumni
Graduates or former students.

Articulation
A term that is used to indicate that a course taken at another institution is equivalent to a course at USU.

Articulation Agreements
Documents that formally acknowledge how credits or associate degrees from other institutions equate to USU courses and requirements.

Attempted Hours (AHRS)
The number of credit hours for which a student has enrolled. This includes current enrollments, as well as past enrollments.

Audit
Registration for and participation in all functions of a course except tests and other graded exercises. No credit is given for an audit (a grade of AU is assigned), but courses that students have audited will appear on the transcript and may be repeated for credit.

Bachelor of Arts Degree vs. Bachelor of Science Degree
The main difference between these two degrees is a foreign language requirement. Students who complete two years’ training or equivalent in an approved foreign language, or one year or equivalent in each of two foreign languages, may qualify for a Bachelor of Arts degree. See page 58 for further information. Most other baccalaureate degrees are awarded as a Bachelor of Science degree.

Bachelor’s Degree
A degree in an academic discipline which requires completion of a minimum of 120 semester credit hours. University Studies requirements, and a chosen major. Students must meet the minimum GPA requirements for their intended major.

Banner ID Number (A-Number)
A nine-character code that uniquely identifies each student. This number (which is not social security number based) always consists of a capital A, followed by eight numbers. To find out their assigned A-Number, students should follow the link found at: http://www.usu.edu/registrar/access/index.cfm

Breadth Requirements
Courses that are part of the General Education requirements, and are intended to introduce students to different disciplines. At USU, all students must take a least one course or its equivalent in each of the following six categories: American Institutions, Creative Arts, Humanities, Life Sciences, Physical Sciences, and Social Sciences.
Cashier
The financial officer of the University who receives payment of tuition and miscellaneous fees.

Certificate
A document certifying that one has fulfilled the requirements of and may practice in a certain vocation.

Class Rank
Student’s ranking of being a freshman (less than 30 credits), sophomore (30-59 credits), junior (60-89 credits), or senior (90 or more credits), based on the number of college-level credit hours earned.

Closed Class
A class that has been filled by the maximum number of students allowed for that class.

College
An academic division in a university. A college is composed of academic departments and is headed by a dean. USU has seven colleges: Agriculture; Business; Education and Human Services; Engineering; Humanities, Arts, and Social Sciences; Natural Resources; and Science.

College Level Examination Program (CLEP)
A standardized examination in college-level subject matter. Subject examinations cover material offered in specific advanced-level courses. Credits may be acquired through the CLEP examinations. These credits may be used to fill General Education requirements, and may also be accepted as equivalent to specific courses. See page 63 for more information.

College Work-Study
A form of financial aid based on need which provides students with paid employment while in school.

Competency Test
A test which is used to determine if a student has the acquired knowledge of a college-level course.

Complete Withdrawal
The process of withdrawing from all courses before a semester has ended. This must be done by meeting with the advisor in the Registrar’s Office.

Composite Major
When elements of two major programs are combined into one major program. For example, the Elementary Education/Special Education major is an approved composite of two different majors.

Computer and Information Literacy (CIL)
A computer examination that consists of six modules: information law and ethics, information resources, document processing, operating systems, spreadsheets, and electronic presentations. CIL is part of the General Education requirements.

Concurrent Enrollment
When a high school student is enrolled in a university course for which the student simultaneously receives high school and university credit.

Connections (University Connections Course)
An orientation and transition-to-college course.

Convocations
A lecture series.

Co-op
Two or more related internship work experiences.

Corequisites
Two or more courses which must be taken during the same semester, because the work in one course supplements or reinforces what is taught in the other.

Course Fee
A fee that is attached to a specific course, in addition to tuition.

Course Load
The number of credit hours carried by a student during a given semester. Students need to average a minimum of 15 credit hours per semester in order to graduate in four years.

Credit Hours
Credits are related to the number of hours of instruction per week during the academic term.

Credit Limit
Students registering for more than 18 credits must present their advisor’s signed authorization to the Registrar’s Office.

Course Reference Number (CRN Number)
A five-digit code that identifies a specific course. CRN numbers may be found in the Schedule of Classes.

Cum Laude
A Latin Scholastic Distinction designated for students who graduate with a cumulative GPA between 3.500 and 3.799.

Curriculum
A series of courses which meet a particular academic or vocational goal.

Curriculum Advising and Program Planning (CAPP)
This sub-system of the Access (Banner) System, which is used to generate unofficial degree evaluations, includes rules and requirements for degrees offered by Utah State University. CAPP uses these rules and requirements, along with the student’s academic history, to perform an unofficial degree evaluation. In the initial implementation, some majors and/or minors may not be coded and ready for use.

DANTES Standardized Subject Tests (DSST)
DSSTs provide an opportunity for people to obtain college credit for what they have learned in nontraditional ways. Designed originally for the military, DSSTs are available to civilian students and adult learners as well. Credits may be acquired through the DSST examinations. These credits may be used to fill General Education Requirements, and may also be accepted as equivalent to specific courses. For more information, as well as a list of available exams, see page 64.

Dean
College or university administrative official. An academic dean usually heads a college within the university.

Dean's List (Honor Roll)
A recognition given to students who earn a minimum 3.500 GPA in 15 or more graded credits, except for summer semester for which 12 or more graded credits are required.

Declaration of Major
A process whereby students formally notify the Registrar’s Office of the major which they choose to include in their degree program.
Deferred Admission
When a student is accepted for a specific term, but chooses to defer his or her admission until a future term.

Degree Evaluation
A summary of academic progress showing courses completed and courses needed. USU students can obtain an unofficial degree evaluation through the Access (Banner) System. Curriculum Advising and Program Planning (CAPP) is the Banner sub-system that generates the degree evaluations. After students have completed their application for graduation, the Registrar's Office performs an official degree evaluation.

Department Head
The administrative head of an academic department.

Depth Education Requirements
Courses that are part of the University Studies requirements and are intended to provide students with more in-depth background in different disciplines.

Discipline
A subject area. English, history, chemistry, and elementary education are examples of disciplines.

Dissertation
A written thesis by a candidate for a doctoral degree.

Drop/Add
The process used if students need to change a schedule for which they have already registered.

Dual Major
Any two majors that are completed at the same time. Students must complete all requirements for both majors. For example, a student may get a dual major in History and English.

Earned Hours (EHRS)
The number of credit hours in which a student earns an A, B, C, D, or P grade. Earned hours count toward the 120 credits needed for graduation.

Elective
A college-level course or subject taken by a student which counts as credit earned toward graduation requirements, but is not required for a major, minor, or University Studies.

Emeritus Faculty Member
A faculty member who has honorably retired from his or her position with a university.

Emphasis
An approved area of study, having a specific curriculum, within a particular undergraduate major. All emphases must be sanctioned by the Utah State Board of Regents.

Extension Programs
Outreach programs for students who do not attend traditional daytime classes on the main campus. Extension programs include Independent Study and Time Enhanced Learning, as well as courses offered at remote locations.

Family Educational Rights and Privacy Act (FERPA)
A law that (1) provides that students will have access to inspect or review their educational records and (2) protects the rights of a student to privacy by limiting access to the educational record without express written consent.

Financial Aid
Scholarships, grants, loans, and work assignments which are awarded to a student to help defray, in part or in whole, college-related expenses.

Full-Time Student
A student registered for 12 or more credit hours during a semester. In order to graduate after completing eight semesters of study, a student must register for an average of 15 credit hours per semester.

General Catalog
The official Utah State University document pertaining to academic, business, and extracurricular matters. It functions as a contract for graduation requirements for students upon their entry into the University.

General Education Requirements
A set of requirements that all candidates for a bachelor's degree, regardless of major, must satisfy. At USU, General Education is part of the University Studies Requirements. For more information, see pages 49-51.

General Studies Program
The administrative-academic unit maintained at USU for the enrollment of students who do not meet the admissions requirements of the seven academic colleges. The primary function of the program is to assist and encourage students in the improvement of their academic status, so they may transfer to the major of their choice. For more information, contact University Advising and Transfer Services, Student Center 304, (435) 797-3373.

GPA Hours
Credit hours in which a student earns an A, B, C, D, or F grade. GPA hours are credit hours used in the calculation of the grade point average.

Grade Point Average (GPA)
The ratio of the number of quality points earned divided by the number of GPA hours.

Graduate Student
A student who has earned a bachelor's degree and is working toward a master's, doctorate, or other advanced degree.

Graduation Guarantee Program
A program designed to assist students in completing their degrees in the most efficient and cost-effective manner.

Grant
Student financial aid based on need. Grants do not have to be repaid.

Hold
An official action taken by the University to prevent student registration or receipt of grades and transcripts until a student satisfies a requirement. For example, a registration hold is placed on a new student until he or she has met with an academic advisor.

Honor Roll (Dean's List)
A recognition given to students who earn a minimum 3.500 GPA in 15 or more graded credits, except for summer semester for which 12 or more graded credits are required.
Honors Program
A program for high-achieving students. Program members may work toward one of three different Honors degrees: Departmental Honors, Departmental Honors with Honors in University Studies, and University Honors.

Incomplete Grade (I)
A temporary grade that may be assigned when a student is unable to complete all of the work in a course due to extenuating circumstances, but not due to poor performance. An incomplete grade request is initiated by the student. The student is then required to complete the work by the time agreed upon, up to a maximum of 12 months. A written plan is required and is filed with the student, instructor, and department.

Independent Study Courses
Courses for which a student does not have regular class meetings. The student works independently and makes arrangements with the instructor for assignments and to take examinations. At USU, these courses are offered through Continuing Education Time Enhanced Learning, usually by online correspondence and/or CD.

Intent to Transfer Program
A program designed to assist transfer students in their transition to USU. Students sign up for the program while they are still attending another institution. These students complete a contract that is signed by both the advisor at their current institution and a USU advisor. The program is designed to ensure that students transfer with as many completed credits as possible that will count toward the USU University Studies and major requirements.

Internship
An opportunity for students to combine a career-related work experience with academic coursework.

Land Grant
A grant of land made by the government. USU belongs to a family of institutions known as land-grant universities.

Late Registration Fee
A $5 transaction fee for each course added will be assessed all undergraduate students beginning the 6th day of classes, and will be assessed all graduate students beginning the 16th day of classes. This fee does not apply to courses taught at Continuing Education centers.

Latin Scholastic Distinctions
To qualify for Latin Scholastic Distinctions at graduation (including Summa Cum Laude, Magna Cum Laude, and Cum Laude), a student must have completed a minimum of 40 USU semester credits. For details of how to earn these distinctions, see page 59.

Leave of Absence
A program for students who plan to leave USU before, during, or at the end of a semester, intend to return, and have an expected return date. This program is beneficial for students who intend to perform humanitarian service or serve in the military. Regulations concerning a leave of absence can be found on page 37.

Letter of Completion
A letter indicating that a student has completed the General Education requirements of a university. The letter is only used when a student transfers to another institution and needs verification that the General Education requirements have already been satisfied.

Loan
Loaned money which must be repaid over a period of time. Typically, a student must repay the loan amount plus interest.

Lower-Division Courses
Courses numbered at the 1000- and 2000-level that are usually taken during a student’s freshman and sophomore years.

Magna Cum Laude
A Latin Scholastic Distinction designated for students who graduate with a cumulative GPA between 3.800 and 3.949.

Major
An approved concentrated area of study, having a specific curriculum, in an academic discipline. A major usually requires 30 to 70 semester credit hours of coursework.

Matriculated Student
A student who enrolls or registers in a college or university as a degree candidate (necessary for financial aid).

Matriculation
The process of applying and gaining acceptance into a degree program at a college or university. Being matriculated is important for academic advisement and financial aid purposes, and allows students to take advantage of all services within the University.

Minor
An approved secondary or supplementary field of study. A minor does not require as much coursework as a major.

Nonmatriculated Student
An individual who may be enrolled in courses at a college or university, but is not working toward a degree.

Part-Time Student
A student who registers for fewer than 12 semester credit hours.

Pass (P), D+, D, F Option
Students may register for a Pass (P), D+, D, F option. The grade of Pass (P) indicates academic achievement of not less than C-. Credits for which the Pass (P) grade is received are not quality hours, and are therefore not used in the calculation of a student’s grade point average. At no future time may the student request a letter grade, once the P, D+, D, F option has been requested. (See page 39 for more information.)

Philanthropy
An active effort to promote human welfare. At USU, this term often refers to philanthropic gifts to the University to be used for purposes such as scholarships, research, or construction of buildings and other facilities.

PIN Number
A personal identification number that is used as a password. At USU, a student’s initial PIN Number is his or her birthdate (MMDDYY). To maintain security, students are encouraged to change their PIN Number.

Placement Test
A test given to determine the appropriate level at which to “place” a student in certain courses. At USU, the most common placement tests are used for mathematics.

Plateau Tuition
A flat rate of tuition assessed to students who register for 13 to 18 credits. In general, the tuition amount increases for each credit a student takes up through 13 credits. There is no tuition increase between 13 and 18 credits. The tuition amount increases again for students who enroll for more than 18 credit hours.
Glossary of University Terms

**Portfolio**
An arrangement of documents and/or drawings that are used in some majors and degree programs for admission decisions, assessment, or career placement.

**Practicum**
A course of study designed especially for the preparation of teachers and clinicians. A practicum involves the supervised practical application of previously studied theory.

**Prerequisite**
A course students must take prior to (and in preparation for) another course (which is usually more advanced). A different kind of prerequisite may require a student to be enrolled in a certain major or certain academic classification in order to qualify for enrollment in the course.

**Priority Registration**
The order in which students may register for classes. A priority registration schedule indicates the earliest possible day a student may register for classes. Priority is given first to graduate students, followed by seniors, juniors, sophomores, and freshmen, based on earned credit hours.

**Professional Ranks**
Faculty rank, including lecturer, instructor, assistant professor, associate professor, and professor. Some faculty ranks are preceded by “research” or “adjunct.”

**Provisional Admission**
Offers students not qualifying for admission into one of the academic colleges or the Undeclared Program a chance to prove themselves academically. Students who are admitted provisionally must sign an institutional agreement with University Advising and Transfer Services to indicate that they are fully aware of the provisions associated with their admission.

**Provost**
The chief academic officer of the University.

**Purge of Registration**
If a student has not paid tuition and fees in full, the Registrar’s Office may cancel (or “purge”) the student’s registration for the upcoming semester, meaning the student will no longer have a seat reserved in the classes he or she has chosen. However, the student is responsible to drop unwanted courses and should not rely on the purge. For policies governing the registration purge, see page 37.

**Quality Points (QPTS)**
The value assigned to each grade. For example, an A earns 4 quality points for each semester credit hour attempted. For a 3 semester credit hour course in which an A was earned, a student would receive 12 quality points.

**Recitation**
A class period especially in association with and for review of a lecture.

**Registrar**
The administrative officer who maintains enrollment records and certifies the academic standing, as well as the fulfillment of graduation requirements, for all enrolled students.

**Registration**
The process of enrolling in classes for an upcoming semester. Registration may be accomplished by submitting certain forms to the Registrar’s Office, or by using the Access (Banner) System.

**Remedial Course**
A course numbered lower than 1000. Remedial courses will not satisfy baccalaureate requirements, are not transferable, and are not calculated in a student’s grade point average or earned credits. USU offers remedial courses in English and mathematics. Students enrolling in a remedial course at USU must usually pay a remedial course fee, in addition to regular tuition.

**Residency**
A classification for tuition purposes. Utah residents pay lower tuition than nonresidents.

**Rhetoric Associates**
Students with outstanding communication skills in reading, writing, and speaking who are selected to help other students. Rhetoric Associates are assigned to serve as initial readers for 10-15 students in a class, following up their written comments with individual conferences.

**Sabbatical Leave**
A periodical leave of absence during which a person interrupts his or her normal work to wholly devote time to further intensive study. This term is usually applied to a sabbatical leave taken by a faculty member.

**Schedule of Classes**
The publication which includes course offerings for a specific term and year.

**Scholarship**
Student financial aid based on academic achievement, need, or a combination of factors. Scholarships do not have to be repaid, but philanthropy is encouraged. In addition, students who receive endowed scholarships are highly encouraged to express gratitude to donors.

**Semester**
An academic term of 15 weeks, followed by one week of final exams. At USU, there are two 15-week semesters, plus summer sessions, during each academic year.

**Service-Learning**
A credit-bearing educational experience where students: (1) gain a broader understanding of course content, (2) earn a deeper appreciation of the discipline, (3) help meet community needs, (4) reflect on service activities, and (5) develop an enhanced sense of civic responsibility. Service-Learning focuses on critical thinking, social development, and civic responsibility as part of a student’s formal academic studies.

**Service-Learning Scholar**
A student admitted to the Service-Learning Scholars program. Successful completion of program requirements results in the awarding of a Service-Learning Certificate upon graduation.

**Space Grant**
Funds distributed by the National Aeronautics and Space Administration (NASA) to USU as part of the National Space Grant College and Fellowship Program.

**Specialization**
An approved area of study, having a specific curriculum, within a particular graduate degree. All specializations must be sanctioned by the Utah State Board of Regents.

**Summa Cum Laude**
A Latin Scholastic Distinction designated for students who graduate with a cumulative GPA between 3.950 and 4.000.
**Glossary of University Terms**

**Supplemental Instruction (SI)**
A program in which a student who has successfully completed a University Studies class is hired to attend all class sessions and conduct review sessions. This student helps other students develop study strategies geared at enhancing academic achievement in that class.

**Syllabus**
The document that a professor provides as a course outline. A syllabus will usually include assignments, due dates, test dates, grading procedures, and attendance policies.

**Tenure**
A status granted to a faculty member after a trial period (usually six years). Tenure gives protection from summary dismissal. During the probationary period, faculty on a tenure track are reviewed on an annual basis. Tenured faculty are subject to post-tenure review as well.

**Thesis**
A contribution to the field of knowledge based on a student’s own research or a treatment and presentation of known subject matter from a new point of view.

**Transcript**
The official record of a student’s academic work at a university, listing credit courses, grades, and credit hours earned or attempted by a student. At USU, an official transcript may be obtained from the Registrar’s Office, and an unofficial transcript can be viewed from the Access (Banner) System.

**Transfer Credit**
Credit which was earned at another college or university, and which is accepted by USU.

**Transfer Student**
A student is considered to be a transfer student if he or she has completed at least 24 semester credits of post-high school work at another institution. This does not include concurrent enrollment or AP credits.

**Tuition**
The amount charged per semester credit hour for instruction at a college or university.

**Tuition Installment Plan (TIP)**
The Tuition Installment Plan (TIP) allows students to defer a portion of their tuition until later in the semester. To apply for the TIP, print the application found at: [http://www.usu.edu/registrar/cashier/index.cfm](http://www.usu.edu/registrar/cashier/index.cfm), and complete the information as directed on the form. For details about participation in the TIP, see page 43.

**Tuition Surcharge for Excessive Credits**
Students who have attempted 170 credits or more will be charged out-of-state tuition according to Board of Regents Policy. In some circumstances (as detailed on page 43), the surcharge may be waived.

**Tutor**
An individual who provides private instruction or coaching.

**Undeclared Major**
The category for exploratory students who have not yet decided upon a major program.

**Undergraduate**
A college or university student who has not yet earned a bachelor’s degree.

**Undergraduate Teaching Fellows**
A program offering outstanding students an opportunity to work in meaningful academic employment within their major field. Students chosen as Teaching Fellows are assigned to work with a faculty member in the classroom and are supervised by a faculty mentor.

**University Studies Requirements**
Requirements that all students, regardless of major, must satisfy in order to qualify for a bachelor’s degree. For more information, see pages 49-57.

**Upper-Division Courses**
Courses numbered at the 3000-level or higher that are usually taken during a student’s junior and senior years.

**Webmail**
USU’s e-mail system that can be accessed through the Worldwide Web.

Registration

Office of the Registrar: Student Center 246
Phone: (435) 797-1098
FAX: (435) 797-1110

All students attending classes must be registered. Students are officially registered when all tuition and fees have been paid in full. Failure to pay tuition and fees by the published fee payment deadline may result in courses being voided (see Registration Purge on page 37). Students are responsible for dropping courses for which they do not wish to receive a grade. Detailed registration instructions are printed in the University Schedule of Classes, which is published each semester.

Eligibility
Only eligible students may register for courses at the University. An eligible student is either continuing from the previous year or has been admitted or readmitted to the University.

Registration Procedures
The University Schedule of Classes lists each semester’s course offerings, dates, times, places, and procedures for registration and fee payment. It may be purchased at the University Bookstore or accessed at: http://www.usu.edu/registrar/catalogpdf/

Late Registration
A $5 transaction fee for each course added will be assessed all undergraduate students beginning the 6th day of classes, and will be assessed all graduate students beginning the 16th day of classes. This fee does not apply to courses taught at Continuing Education centers.

Assignment of Advisor
When undergraduate students have been admitted to the University and have indicated their proposed field of study, they are assigned an advisor according to their major. Students are initially assigned to the default advisor or advising office for their individual major. In some cases, the default advisor is a temporary advisor who may assign students to a permanent advisor after their initial meetings with each student. In some colleges, students may be assigned to one advisor until they complete their lower-division coursework, and then be assigned to another advisor when they begin working on their upper-division coursework. Advising systems vary from college to college within the University. Students may access a listing of advisors by major by going to: http://www.usu.edu/ats/advisorlist

Full-time Status
The minimum registration load for a full-time undergraduate student is 12 credits. Students who desire to graduate in four years (eight semesters) must average a semester load of at least 15 credits per semester. To be eligible for student body offices, students are required to be registered for 12 or more credits. To be eligible to receive financial aid, a student is required to register for 6 or more credits. Students on scholarships must be registered for 15 or more credits, unless otherwise indicated. Veterans and students eligible for a veteran’s educational allowance are required to be matriculated and registered for 12 or more credits (for undergraduate students) or 9 or more credits (for graduate students) to qualify for full educational benefits. Students registered for less than 12 credits should contact the Veterans Services Office to determine if they are eligible for partial benefits.

Credit Limit
Students registering for more than 18 credits must present their advisor’s signed authorization to the Registrar’s Office.

Auditing Classes
Admitted students who wish to audit a class must register as auditors. Auditing is dependent on space, resource availability, and instructor approval. No credit or grade points will be granted. The regular tuition and course fees will be assessed. At no future time may students request or receive credit for the audited course by any other means than by officially registering for the course and doing the required work. Audit requests, approved by the instructor, must be submitted to the Registrar’s Office and fees must be paid before class attendance is permitted. Students are not permitted to register as auditors during Early Registration.

House Bill 60 permits Utah residents 62 years of age or older to audit regular university classes offered during the day or offered through the Extension Class Division. However, space in many university classes is limited. Classes which are full at the time of an audit request are unavailable. Credit seeking, full-tuition paying students shall have first priority in the registration process. A flat fee of $10 per semester is charged for House Bill 60 registration.

Pass (P), D+, D, F Option
Students may register for a Pass (P), D+, D, F option. The grade of Pass (P) indicates academic achievement of not less than C-. Credits for which the Pass (P) grade is received are not quality hours, and are therefore not used in the calculation of a student’s grade point average. At no future time may the student request a letter grade, once the P, D+, D, F option has been requested. (See page 39 for more information.)

Adding Courses
Courses may be added for credit or audit. An instructor’s signature is required beginning the second week of the semester (sixth day of classes). Classes may be added through the first 20 percent of the class meetings. (Check the Semester at a Glance in the current Schedule of Classes for the exact date.) Following the add deadline, the Office of the Registrar must also approve any add request. All requests for audit registration must be approved by the instructor and must be submitted to the Office of the Registrar, Student Center 246.

Dropping Courses
Students who do not attend a class during the first week of the term or by the second class meeting, whichever comes first, may be dropped from the course by the instructor. (This does not remove responsibility from the student to drop courses which he or she does not plan to attend.)

Students may drop courses without notation on the permanent record through the first 20 percent of the class. If a student drops a course following the first 20 percent of the class, a W will be permanently affixed to the student’s record. After 60 percent of the class is completed, the student’s academic advisor must sign any drop request, and a W with a grade assigned by the instructor will be entered on the student’s permanent record. A student may not drop a course after 75 percent of the class is completed. (Check the Semester at a Glance in the current Schedule of Classes for exact dates.)

In the event that a student registers for a course which is later cancelled, it is the responsibility of the department to officially cancel the class with the Scheduling Office, and the student’s responsibility to drop the course for a full refund. It is the department’s responsibility to notify students of cancelled or rescheduled classes.

A student may not drop all of his or her classes without an official withdrawal from the University.
**Leave of Absence**

Students who wish to discontinue their studies for one or more semesters (other than summer semester) must file a Leave of Absence form with either the Financial Aid Office (SC 106) if the student has aid, a scholarship, or a tuition waiver, or with the Registrar’s Office (SC 246) for all other students. Leaves of Absence are generally granted and reviewed on a yearly basis for reasons relating to illness or health, military service, employment, humanitarian or church service, family responsibilities, and financial obligations. The standard leave period is one year. Allowances will be made for military activation, church or humanitarian service, and for those having extenuating circumstances.

A student must apply for a leave of absence for a current semester no later than the last day of classes for that semester. USU’s dropping courses policy explains how a leave of absence will affect a student’s transcript.

A student who takes a leave of absence must officially notify the Registrar’s Office of his or her intention to return to USU from leave. This must occur prior to registration. In most cases, the student will not need to apply for readmission.

**Complete Withdrawal from the University**

Complete withdrawal is initiated at the Financial Aid Office (SC 106) for those having financial aid, at the Veterans Services Office (SC 246) for those receiving veterans benefits, at the International Students and Scholars Office (SC 313) for all international students, or at the Registrar’s Office (SC 246) for all other students. No one will be permitted to withdraw from the University once final examinations have begun. The date of the official withdrawal is the date the withdrawal form or letter is received. A student who withdraws must be accepted for readmission before he or she may enroll again.

**No-test Days**

A five-day period designated as No-test Days precedes the five days of final examinations which are normally scheduled at the close of each academic semester. During No-test Days, no major examinations, including final examinations, will be given in order that students may concentrate on classwork, the completion of special assignments, writing projects, and other preparation for duly scheduled final examinations.

**Proof of Identification**

In order to receive University services, photo identification must be presented. Each admitted student who completes the registration process for a regular semester will be issued a student identification card. This photo identification card is valid for the duration of the student’s enrollment at Utah State University. Photo IDs are issued throughout the semester by the Card Office, Student Center 212.

**Change of Address**

It is the responsibility of the student to keep the Office of the Registrar informed of address changes by completing a Change of Address form available at the Registrar’s Office (SC 246) or by using the Access (Banner) System on the Web: [http://www.usu.edu/registrar/access/index.cfm](http://www.usu.edu/registrar/access/index.cfm)

**Registration Purge**

If a student has not paid tuition and fees in full, the Registrar’s Office may cancel (or “purge”) the student’s registration for the upcoming semester, meaning the student will no longer have a seat reserved in the classes he or she has chosen. Whether or not the student’s registration will be “purged” depends upon the balance owed, as well as the student’s class standing. Class fees, as well as other fees (such as parking fines and fees for overdue library books), are included in the balance owed.

The registration purge is governed by the following policies:

1. The purge will occur one week prior to the day classes begin. Any student owing a balance of $50 or greater will have his or her registration purged. Balance will be defined as any amount owed, minus any financial aid authorized, paid, or memoed. Students approved for participation in the Tuition Installment Plan (TIP) (see page 43) will not have their registration purged, provided they have paid the amount currently due under the TIP (unless other fees are owed totaling $50 or more).

2. After the third week, a hold will be placed on the account of any student who owes more than $50, preventing the student from registering for classes or receiving transcripts until he or she pays the balance owed, including preregistration for the next semester.

Prior to the purge, students owing $50 or more will be sent e-mails, including an electronic bill. All students having their registration purged will receive an e-mail informing them of this action.

Faculty members and advisors having questions concerning these policies should contact William E. Jensen, Associate Registrar, (435) 797-1076, bill.jensen@usu.edu. Students desiring more information about the registration purge should contact the Help Desk at (435) 797-1098.
Records

Office of the Registrar: Student Center 246
Phone: (435) 797-1116
FAX: (435) 797-1110

The custodian of educational records at Utah State University is the Office of the Registrar.

Student Classification
At the beginning of each semester, undergraduate students are classified for that semester as follows:

<table>
<thead>
<tr>
<th>Credit Hours Earned</th>
<th>Classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-29</td>
<td>Freshman</td>
</tr>
<tr>
<td>30-59</td>
<td>Sophomore</td>
</tr>
<tr>
<td>60-89</td>
<td>Junior</td>
</tr>
<tr>
<td>more than 89</td>
<td>Senior</td>
</tr>
</tbody>
</table>

Number of Credits Awarded for Courses

Traditional Courses
The standard for academic course credit, as identified by the Northwest Association of Schools and Colleges and followed by USU, is that one credit be awarded for three hours of student work per week during a 15-week semester. For traditional courses, this is interpreted as one 50-minute class period plus two hours of study per week for each credit. Note that one 50-minute period per week throughout a 15-week semester equals 12.5 contact hours per credit. This standard should be used in determining credits for courses which do not meet for 50-minute periods.

Nontraditional Courses
In addition to courses taught during regular academic terms, other educational experiences (such as workshops, institutes, short courses, and conferences) are offered at USU. Because of the short time period in which they are offered, these nontraditional courses may not require extensive out-of-class work by students. When little or no out-of-class work is required, the standard for such courses is 20 contact hours per credit.

Privacy Rights
The Family Educational Rights and Privacy Act, a federal law commonly referred to as FERPA or the Buckley Amendment, (1) provides that students will have access to inspect and review their educational records upon written request with identity verification and (2) protects the rights of a student to privacy by limiting access to the educational record without express written consent.

Definitions
A student is defined as any individual who is attending or has attended Utah State University. (Note: Certain rights are extended to the parent(s) of a dependent student, where dependency is defined by Section 152 of the Internal Revenue Code of 1954.) An educational record is any record (1) directly related to a student, and (2) maintained by Utah State University or by an agent of the University.

Notices
With respect to a student’s educational records, FERPA affords a student the right: (1) to inspect and review the student’s educational records; (2) to request the amendment of the student’s educational records to ensure that they are not inaccurate, misleading, or otherwise in violation of the student’s privacy or other rights; (3) to consent to disclosures of personally identifiable information contained in the student’s educational records, except to the extent that FERPA authorizes disclosure without consent; (4) to file with the U.S. Department of Education a complaint concerning alleged failures by Utah State University to comply with the requirements of FERPA, if a complaint cannot be resolved within the University; and (5) to obtain a copy of the Student Records Policy and Procedures for Utah State University.

Categories of Records
There are two categories of educational records under FERPA.

Directory information (or releasable information) is general information that may be released to anyone without the consent of the student, unless the student indicates otherwise. Personally identifiable information (or nonreleasable information) includes all information not defined as directory information and may not generally be released without consent of the student.

Utah State University has designated the following as directory information for a student:

Releasable Information/Directory Information
Name
Local and permanent address
Electronic mail address
Telephone number
Date of birth
Residency status
Degrees and awards received
Most recent institution attended by the student
Academic level
Major field of study
Department or college
Participation in officially recognized activities/sports
Dates of attendance and graduation
Weight/height of members of athletic teams
Current semester schedule of classes
Photographs

Nonreleasable Information
All Other Information

Release of Information
A Release of Information form is available online at:
http://www.usu.edu/registrar/forms/
This form may be completed by students wishing to grant access to their educational record to a third party (e.g., parents or spouse). Students accessing educational records must provide identification. It is important to note that, for educational purposes, University officials have access to all student records.

Grading
For work in graded courses, A shall denote exceptional performance, B above average performance, C satisfactory performance, D poor performance, and F failing performance. Letter grades may be modified by plus (+) or minus (-) symbols (no A+ or D-).

GPA Hours and Quality Points
A GPA hour is defined as a credit which is used in calculating a student’s grade point average (GPA). All graded credits, except for those in which the Pass (P) or Incomplete (I) grade is received, quality as GPA hours, unless otherwise noted. Quality points are assigned to each letter grade earned, as follows:

<table>
<thead>
<tr>
<th>Letter Grade</th>

</tbody>
</table>

Utah State University 2006-2007 General Catalog
A minimum of 72 of the 120 credits required for the baccalaureate degree must carry the "I" grade. The term "extenuating circumstances" includes: (1) incapacitating illness which prevents a student from attending classes for a minimum period of two weeks, (2) a death in the immediate family, (3) financial responsibilities requiring a student to alter course schedule to secure employment, (4) change in work schedule as required by employer, (5) judicial obligations, or (6) other emergencies deemed appropriate by the instructor. The student may petition the instructor for time beyond the end of the semester to finish the work. If the instructor agrees, two grades will be given, an "I" and a letter grade for the course computed as if the missing work were zero. An Incomplete Grade Documentation Form must be filed by the instructor in the Registrar's Office.

The student is required to complete the work by the time agreed upon (which may not be longer than 12 months). If no change of grade is submitted by the instructor within the prescribed period, the "I" will be removed and the letter grade originally submitted with the "I" will remain as the permanent grade for the course. Arrangements to complete the missing course work are to be made directly with the instructor awarding the "I" grade, and in accordance with departmental and other USU policies. In the absence of the original instructor, special circumstances must be handled by the department head. Documentation of the reasons for granting an "I" grade and required work to be completed in order to remove the "I" grade must be recorded on the Incomplete Grade Documentation Form, which must be filed with the department office and copied to the Registrar’s Office. Resolution of the "I" grade does not involve a complete repeat of the course, only the completion of missing coursework. A student does not reregister for the course. All "I" grades must be changed to letter grades prior to graduation, regardless of whether or not the course is required for the degree. Research and thesis courses taken for graduate work are exempted from this policy.

Repeating Courses
Students may repeat any course at USU for which they have previously registered. They may also retake a course originally taken at an institution where USU has an articulation agreement, if the agreement identifies a specific USU course as being equivalent to the one the student desires to replace. All other decisions dealing with retaking courses, including courses taken under the quarter system, will be determined by the department in which the course is offered.

The number of times a student can take the same class is limited to a total of three times (once, plus two repeats). Beyond three attempts, the student’s dean must approve additional registration for the class.

The total number of repeats allowed is limited to ten. Students who exceed this limit will have an academic hold placed on their registration. Beyond ten repeats, the student’s academic dean must approve additional registration.

This policy does not apply to courses repeatable for credit. When a course listed in the General Catalog is identified with the Repeat Symbol (®), the course may be taken more than once for credit.

When a course not designated as repeatable for credit is repeated, the most recent grade and GPA hours are used to recalculate the student’s grade point average. The previous grade and GPA hours for the same course will remain on the student’s academic record, but will not be calculated in the grade point average or total GPA hours completed, and will be designated on the student’s transcript with an E (exclude). A course designated as repeatable (®) may be repeated to receive a higher grade, and the most recent grade and GPA hours will be used in recalculating the student’s grade point average.

Change of Grades
The instructor of record of a course has the responsibility for any grade reported. Once a grade has been reported to the Office of the Registrar, it may be changed upon the signed authorization of the instructor of record who issued the original grade. In case the instructor...
is not available, the department head has authority to change the grade. This applies also to the grade of Incomplete (I). A change of grade after more than one year also requires the signature of the academic dean of the college in which the course is offered. (See USU Student Policy Handbook—Student Appeal Procedures.)

Final Grade Report
Final grades are available on Access at: http://www.usu.edu/registrar/access/index.cfm. Official transcripts may be obtained by submitting a signed request to the Registrar’s Office, in person at SC 246; by mail to Utah State University, 1600 Old Main Hill, Logan UT 84322-1600; or via the Internet at: http://www.usu.edu/registrar/access/index.cfm

Records Hold
A “Records Hold” will be placed on a student’s record when an outstanding financial obligation or disciplinary action has been reported.

When a “hold” is placed on a record, the following results may occur: (1) An official and/or unofficial transcript may not be issued; (2) registration privileges may be suspended; (3) other student services may be revoked. The “hold” will remain effective until removed by the initiating office. It is the student’s responsibility to clear the conditions causing the “hold.”

Transfer Credit
The grades which may be transferred and recorded for transfer students shall include A, A-, B+, B, B-, C+, C, C-, D+, D, and F, as well as P (Pass). Only grades earned at USU will be used in calculating USU grade point averages. Decisions concerning academic standing, once the student is admitted to USU, will be based solely on USU grades.

Remedial Courses
Courses numbered 0010-0990 will not satisfy baccalaureate requirements, are not transferable, are not calculated in a student’s grade point average, and do not count toward earned hours.

Academic Standing
An undergraduate student is considered by the University to be in good standing when he or her USU cumulative GPA is 2.0 or higher. An undergraduate student whose USU cumulative GPA is less than 2.0 is placed on academic warning or academic probation, based on the student’s class rank and the USU cumulative GPA. A freshman with a USU cumulative GPA of less than 2.0 is placed on academic warning. A sophomore, junior, or senior with a USU cumulative GPA of less than 2.0 is placed on academic probation.

Academic Warning
A freshman student placed on academic warning shall be notified in writing of that action by the dean of his or her college. The notation placed on warning is placed on the student’s transcript. The student remains on warning status as long as his or her semester GPA is 2.0 or higher and until his or her USU cumulative GPA rises to or exceeds 2.0; the student will then be in good standing. A student on academic warning shall be placed on academic probation at the end of any semester in which his or her semester GPA is less than 2.0. When a student’s class standing changes to sophomore, and his or her USU cumulative GPA is less than 2.0, the student is placed on academic probation. Students on academic warning will have a hold placed on their registration and must meet with their academic advisor.

Academic Probation
An undergraduate student placed on academic probation shall be notified in writing of that action by the dean of his or her college. The notation placed on probation is placed on the student’s transcript. The student is required to meet with his or her academic advisor before the end of the fifth week and to sign a statement acknowledging the terms of the probation. Signed statements shall be maintained in the academic dean’s office. The student remains on probation status as long as his or her semester GPA is 2.0 or higher until his or her USU cumulative GPA rises to or exceeds 2.0; the student will then be in good standing. A student on academic probation is placed on suspension at the end of any semester in which his or her semester GPA is less than 2.0.

Academic Suspension
An undergraduate student placed on academic suspension shall be notified in writing of that action by the Registrar. The notation academic suspension is placed on the student’s transcript. A student who is registered for classes in the semester immediately following the suspension will be dropped from those classes. Questions about the suspension should be directed to the student’s advisor.

Readmission Following Academic Suspension
Students who have been suspended once may apply for readmission after a two-semester layout. Students who have been suspended two times may apply for readmission to the University following a layout of one full calendar year.

Academic Dismissal
Students who become subject to suspension for a third time will receive notice of academic dismissal from the University and have the notation academic dismissal placed on their transcript. Students who have been dismissed may apply for readmission to the University following a layout of five or more calendar years.

Concurrent Enrollment Credit
For purposes of academic standing, students who have taken classes through concurrent enrollment, and who otherwise qualify for good standing at USU, shall not be denied such standing based on their concurrent enrollment credit.

Low-Scholarship Notification for Graduate Students
The dean of the School of Graduate Studies will notify students whose GPA is below 3.0 any semester. If the GPA falls below 3.0 for two consecutive semesters, the student may be placed on probationary status and his or her graduate program may be terminated. For further information, see Low-Scholarship Notification (page 103).

Academic Renewal
Undergraduate students who have been admitted to Utah State University after an interruption in their collegiate education of five or more years may petition to have certain credits removed from the calculation of the GPA needed for credit. The renewal procedure allows the student’s academic records to be reviewed for the purpose of eliminating from grade point average computation all grades of D or below that were entered on the academic transcript five or more calendar years prior to admission, including transfer credit. Petition forms are available in the Office of the Registrar and online. A $25 processing fee will be assessed.
Guidelines:

1. Academic renewal does not apply to graduate students nor to students pursuing a second undergraduate degree.

2. Academic renewal may be applied only once and is irreversible.

3. An absence of five or more years must have elapsed between admission and the last enrollment at an institution of higher education. (Note: Students must be currently enrolled at USU to apply for academic renewal.)

4. After admission, but before application for renewal, the student must have completed at least one of the following at Utah State University: (a) 10 semester credits with at least a 3.00 GPA; (b) 20 semester credits with at least a 2.75 GPA; (c) 30 semester credits with at least a 2.50 GPA.

5. Academic renewal applies only to courses having grades of D+, D, or F and taken prior to readmission. All such courses will remain unaltered on the transcript with the appropriate notation added to the transcript to indicate academic renewal. Courses designated in the petition will not count for computation of GPA for earned credits, nor for satisfying any graduation requirements.

6. Students may apply for this renewal after they have met the guidelines listed above. They are strongly encouraged to meet with their academic advisor prior to submitting their request.

7. Academic renewal will be effective as of the date of admission following the minimum five-year absence.

Academic Record Adjustment

Students requesting an academic record adjustment to a prior term must submit a Petition for Academic Record Adjustment to the Registrar’s Office. Adjustments will only be considered if extenuating circumstances exist. The term “extenuating circumstances” includes: (1) incapacitating illness which prevented a student from attending classes for a minimum period of two weeks and prevented the student from completing the desired adjustment during the term, (2) a death in the immediate family, or (3) other emergencies deemed appropriate. A maximum of two semesters may be adjusted per each degree. Petitions must be submitted within two years of the desired adjustment. The student must attach a typed appeal stating an explanation and justification for the desired adjustment. Supporting documentation confirming the extenuating circumstances must accompany the petition. The cost for the petition is $20, which is a nonrefundable processing fee and does not guarantee approval.

Academic Honesty

The University expects that students and faculty alike maintain the highest standards of academic honesty. For the benefit of students who may not be aware of specific standards of the University concerning academic honesty, the following information is quoted from The Code of Policies and Procedures for Students at Utah State University (revised April 2002), Article V, Section 3:

Section 3. University Standards

A. Academic Integrity—“The Honor System”

Each student has the right and duty to pursue his or her academic experience free of dishonesty. The Honor System is designed to establish the higher level of conduct expected and required of all Utah State University students.

The Honor Pledge—To enhance the learning environment at Utah State University and to develop student academic integrity, each student agrees to the following Honor Pledge: “I pledge, on my honor, to conduct myself with the foremost level of academic integrity.”

Acts of academic dishonesty include but are not limited to:

1. Cheating: (1) using or attempting to use or providing others with any unauthorized assistance in taking quizzes, tests, examinations, or in any other academic exercise or activity, including working in a group when the instructor has designated that the quiz, test, examination, or any other academic exercise or activity be done "individually"; (2) depending on the aid of sources beyond those authorized by the instructor in writing papers, preparing reports, solving problems, or carrying out other assignments; (3) substituting for another student, or permitting another student to substitute for oneself, in taking an examination or preparing academic work; (4) acquiring tests or other academic material belonging to a faculty member, staff member, or another student without express permission; (5) continuing to write after time has been called on a quiz, test, examination, or any other academic exercise or activity; (6) submitting substantially the same work or credit in more than one class, except with prior approval of the instructor; or (7) engaging in any form of research fraud.

2. Fabrication: altering or fabricating any information or citation in an academic exercise or activity.

3. Plagiarism: representing, by paraphrase or direct quotation, the published or unpublished work of another person as one’s own in any academic exercise or activity without full and clear acknowledgment. It also includes using materials prepared by another person or by an agency engaged in the sale of term papers or other academic materials.

Violations of the above policy will subject the offender to the University discipline procedures as outlined in Article VI, Section 1 (paragraphs A, E, F, and H) of the Code.

A. Academic Dishonesty—“The Honor System”

An instructor has full autonomy to evaluate a student’s academic performance in a course. If a student violates the Honor System, the instructor may sanction the student as part of the course evaluation. Such sanctions may include: (1) verbally warning the student; (2) giving the student a written reprimand; (3) requiring the student to rewrite a paper/assignment or to retake a test/examination; (4) adjusting the student’s grade—for either an assignment/test or the course; or (5) giving the student a failing grade for the course. A sanction by the instructor is not a disciplinary penalty. If the instructor believes that, in addition to any sanction, the student should be disciplined and a penalty imposed, the instructor shall refer the student for disciplinary proceedings.

The penalties which the University may impose on a student for an Honor System violation are:

1. Probation: continued participation in an academic program conditioned upon the student satisfying certain requirements as specified in a written notice of probation. Probation is for a designated period of time and includes the probability of more severe disciplinary penalties if the student does not comply with the specified requirements or is found to be violating the Honor System during the probationary period. The student must request termination of the probation in writing.

2. Suspension: temporary dismissal from an academic program or from the University for a specified time, after which the student is eligible to continue the program or return to the University. Conditions for continuance or readmission may be specified.

3. Expulsion: permanent dismissal either from an academic program or from the University.

4. Assigning a grade—either a course grade or a designation with a course grade indicating an Honor System violation involving academic dishonesty. Conditions for removal may be specified, but the designation remains on the student’s transcript for a minimum of one year; provided however, that once the student’s degree is posted to the transcript, the designation may not be removed thereafter.

5. Denial or revocation of degrees.

E. More than one of the penalties may be imposed for any single violation. Reference to “penalty” includes multiple penalties.

F. Imposition of the penalty of suspension or expulsion from the University must be approved by the president of the University. The president’s approval shall be given either at the conclusion of the 10-day appeal period if no appeal is filed, or as part of the president’s final decision if an appeal is filed.

G. When a student is suspended or expelled from the University, tuition and fees that have been paid for the semester during which the suspension or expulsion occurs are refundable in accordance with the standard refund policy as stated in the semester Schedule of Classes.

H. A hold on a student’s admission, registration, or financial aid is not an independent penalty, but may be utilized by the University for various purposes, including either (1) defer a student’s attention to, and subsequent participation in, a pending disciplinary grievance proceeding or (2) to obtain the student’s compliance with a penalty which has been imposed or other action which has been taken under the Student Code.
Records

Honor Roll (Dean’s List)
To qualify for the semester honor roll (Dean’s List), a student must earn a 3.5 GPA in 15 or more graded credits, except for summer semester for which 12 or more graded credits are required. Scholarship “A” pins are presented to undergraduate students who have received all A grades (4.0 GPA) for 15 or more graded credits each semester for two consecutive semesters in residence. Note: Courses for which a P (Pass) grade is received do not qualify for graded credits.
Tuition and fees provide an essential revenue source to Utah State University, although these comprise only 12 percent of the total budget. State appropriations provide 34 percent of the University’s revenue sources. USU strives to keep the institution as cost-effective as possible, and is noted for having low-cost resident and nonresident tuition amounts.

Tuition and fee amounts can be found at:
http://www.usu.edu/registrar/tuition

Registration for a semester is not complete until all fees have been paid in full. The University reserves the right to alter any tuition or fee charges without notice.

Visitor fee (audit) ................................................. same as classes with credit (except for persons 62 years of age or older who are permitted to audit free of charge after a recording fee of $10 per semester has been paid)

Late registration fee ........................................ $5 per course added (assessed beginning the 6th day of classes for undergraduates, and beginning the 16th day of classes for graduates, see page 36)

Continuing Graduate Advisement Courses (6990 and 7990)
There is no limit on the number of times a graduate student may register for 6990 or 7990 credit. Tuition will be charged according to the residency status of the student. Nonresident students may come to the Financial Aid Office to receive a waiver of the out-of-state portion of the Continuing Graduate Advisement tuition.

Continuous Graduate Registration Fee ............................................. $15

Tuition Surcharge for Excessive Credits
Students who have attempted 170 credits or more will be charged out-of-state tuition according to Board of Regents Policy. In the following circumstances the surcharge may be waived: (1) the excessive credits are necessary for the student to complete the student’s program of study; and (2) the excess credits are a result of circumstances where a substantial number of credits from a transferring institution could not be applied to the program of study; or (3) the excess credits are the result of a reasonable enhancement of the student’s major by the addition of a minor or emphasis to the program of study; or (4) the excess credits are the result of a reentry into the educational system by a student who may have accumulated a large number of credits, or even completed degrees, but where employment requirements obligate his or her return to college. Credits earned through concurrent enrollment and credits received through Advanced Placement (AP) and other examinations do not count toward the 170 credit total.

The student may obtain a petition to waive the surcharge at:
http://www.usu.edu/registrar/forms/Surcharge.pdf

Tuition Refund Policy
Refunds are computed as a percentage of the credits being dropped, and are not based solely upon the dollar amount paid. Published refunds will be automatically calculated.

Example: Tuition and Fees
Registered for 10 credits .................................................. $1,513.48
Dropping all credits at 90% Charged for 1 credit ................................................................. 456.39
Total Refund ........................................................................ $1,057.09

For exact dollar amounts, refer to Tuition and Fee Tables at:
http://www.usu.edu/registrar/catalogpdf/index.cfm

Fee Refunds
(1) A proportionate share of all fees paid may be refunded to any student who withdraws from school before the 15th day of classes.
(2) All refunds will be mailed to the student. (3) The application and evaluation fee for an undergraduate or graduate applicant is not refundable. (4) Activity fees will be pro-rated. (5) Students with financial aid need approval from the Financial Aid Office in order to receive a refund. (6) Complete withdrawal must be approved by the Financial Aid Office or by University Advising and Transfer Services.

Delinquent Financial Accounts
Students with outstanding financial obligations may be refused all University services until such obligations are paid. Services which may be denied include the following: registration, transcripts, grades, transfer of credit, graduation, and activity card.

ID Cards
An ID card will be prepared for new freshmen and transfer students upon proof of fee payment. However, electronic validation is required each semester before the ID card will be acceptable for admission to student activity attractions. Upon full payment of tuition and fees, students will automatically have their cards validated. A student who holds a validated card may purchase an additional validated card for his or her spouse for $36.50. Lost ID cards may be replaced for $10.00.

Tuition Installment Plan (TIP)
The Tuition Installment Plan (TIP) allows students to defer a portion of their tuition until later in the semester. Students who are approved for participation in TIP must pay 50 percent of their tuition, plus a $50 nonrefundable service charge, by the tuition and fee payment deadline. A second installment, for 25 percent of tuition, is due on the 30th day of the semester; and the remaining 25 percent is due on the 60th day of the semester. Since deferred payments are loans, students will be considered to be in default if their deferred payments are not received by the due dates. Students who drop classes after the 100 percent refund period has passed will still be obligated to pay the TIP in full. Withdrawal or dropping classes does not cancel these loans. If the loan amount is not paid in full by the due date, students must pay interest in the amount of 12 percent per annum from the date issued on any portion that is unpaid.

To apply for the TIP, print the application found at:
http://www.usu.edu/registrar/cashier/index.cfm, and complete the information as directed on the form. Because this is a promissory note, all signatures must be signed in front of a Registrar’s Office representative in the Registrar’s Office, Student Center 246.

Miscellaneous Payments
If any payment made to the University is unauthorized, incomplete, or received after the due date, registration fees will be considered as unpaid, and the student will not be officially registered.
Tuition, Fees, and Refunds

**Personal Checks**
Personal checks returned by the bank for any reason will subject the student to a service charge and, at the discretion of the Controllers Office, may result in the withholding of registration credit or immediate cancellation of the student’s classes. USU reserves the right to refuse personal checks for any transaction. Check cashing privileges and use of other University services using personal checks may be suspended for any individual who has a check returned to the University.

**Delinquent Financial Accounts**
In the event collection efforts become necessary, USU may refer a past due account to an outside collection agency. All referred accounts are subject to a collection fee, not to exceed 50 percent of the amount owed, plus all court costs and reasonable attorney fees. The collection agency and/or USU may report delinquent accounts to a credit-reporting agency.

**Sponsored Payments**
Students whose tuition and fees are paid by a sponsor may contact the Cashiers Office (Student Center 246) for authorization to complete registration. International students with a sponsor should also contact the Cashiers Office.

**Computer and Information Literacy Examination**
All students working toward a bachelor’s degree must pass this examination as part of the University Studies requirements. For additional information about this exam, see page 49.

**Special Fees**
Special fees, charged in addition to tuition and registration fees, are assessed on the Registration/Billing Statement. Carefully review the University Schedule of Classes to determine which courses require special fees.

**Parking Permits**
Parking permits are required Monday through Friday during the hours posted in each parking area. Although all vehicles parked on campus must display a valid parking permit, parking permits do not guarantee a place to park.

**Student Permits**
Students living off campus who wish to park a vehicle on campus have two permit options:

1. Purchase a Student B permit, which allows parking in the central campus area.
2. Purchase an Economy permit, which allows parking at the Stadium and below Old Main Hill.

**Student Housing**
Students living in campus residence halls are required to purchase a permit to park in the area adjacent to their respective residences. These permits are valid for the residence area specified, as well as all Economy parking areas.

Permit price information is available at [http://www.usu.edu/parking](http://www.usu.edu/parking). The parking staff is available to provide assistance at the Parking Office, Monday through Friday from 7:30 a.m. to 5:00 p.m. For general information, call (435) 797-3414 or visit the Parking Office at 840 East 1250 North (north of the softball diamond).

**Music**
Fees are charged for piano practice and private instruction. For information on amounts, contact the Music Department.

**Division of General Studies Fee**

- **$45 per semester**

**Health and Accident Insurance**
Health and Accident Insurance is available to all students for nominal costs at the time of registration. Additional insurance may be purchased for spouse and children. Students are encouraged to provide themselves with adequate protection in case of illness or serious injury. See University Schedule of Classes for premiums.

**Insurance Information/International Students**
Insurance coverage is mandatory for international students. All international students attending Utah State University are required to purchase one of the student health insurance plans offered at the University for themselves and accompanying dependents. Insurance coverage is required each semester.

International students are cautioned to purchase only temporary travel insurance to cover travel to the U.S.

**Admission Application and Evaluation Fee (nonrefundable):**

- **U.S. Residents (undergraduate) $40**
- **International Students (undergraduate) $50**

**Special Examination Fee**
$10 per course plus $5 per credit hour up to a maximum of $50 including the $10 examination fee. Fees for some of the special examinations offered by the Languages, Philosophy, and Speech Communication Department are higher; call (435) 797-1209 for specific fees.

**Graduation Fees**

- **One-year Certificate $10**
- **Two-year Diploma $10**
- **Associate of Applied Science Degree $10**
- **Bachelor’s Degree $10**
- **Graduate, PhD Degree $15**

*The $10 application fee applies only if the application is submitted prior to the term of graduation. If the application is submitted during the term of graduation, the applicant will need to pay a $50 fee.

**Cap and Gown Sales**
Graduation regalia can be purchased at the Graduation Fair prior to commencement. Those unable to attend the Graduation Fair may have a friend or colleague pick up their regalia, or can place their order by calling (800) 662-3950. All phone orders will be mailed and assessed a $6.50 shipping and handling charge. Please contact the USU Bookstore for current pricing or with any questions or concerns.

**Teacher Placement Registration** $10

**Transcript of Credits**
For transcript requests processed by the USU Registrar’s Office, the following information is needed: (1) student’s full name (including any previous names), (2) student ID number, (3) date of birth, (4) last date of attendance, (5) where the transcript is to be sent, and (6) student’s signature. The transcript fee is $2 per transcript. The fee is to be paid in the Office of the Registrar, Taggart Student Center 246.
Tuition, Fees, and Refunds

For a fee of $5 per location, transcripts may be faxed. (Note: Faxed transcripts may be considered unofficial copies by some receiving parties.) Send a fax to (435) 797-1110, along with the required information listed above and credit card information (card name, number, and expiration date).

Unofficial transcripts are available on the internet at:
http://www.usu.edu/compserv/stu_rec.html

University Publications
To purchase a Utah State University General Catalog or Semester Schedule of Classes, phone Express-a-book at one of the following numbers: (800) 662-3950, (435) 797-3950, or FAX (435) 797-3793.

Scholarships, Fellowships, and Assistantships
Information can be found in the Financial Aid and Scholarship Information section of this catalog (pages 23-28).

Housing Fees
Write for a Housing Bulletin; send request to the Office of Housing and Dining Services, Utah State University, 8600 Old Main Hill, Logan UT 84322-8600.

</table>

Note: Costs for room and board may vary, depending upon the housing and meal plan selected. Also, costs for books, supplies, and personal expenses may vary, depending upon a student’s chosen program of study and lifestyle. Students who choose to have a car will need to plan for transportation expenses. However, owning a car is not necessarily essential, since USU, Logan, and Cache Valley have free bus systems.

Tuition and Cost Disclosure
Full-time undergraduate resident students at Utah State University paying a semester tuition and fee amount of $1,836.01 contribute an estimated 35 percent to the full cost of instruction per full-time student of $5,308.16. The remaining support for the full cost of instruction is provided by $3,472.15 of state tax funds and no other institutional revenue sources.
Housing and Residence Life

Live and Learn

Students living on campus are at the heart of campus life. Each year Utah State data have confirmed that students living in residence halls do better academically, receive higher GPAs, and are able to carry heavier class loads than students living off campus. Research also shows that on-campus students tend to be more involved in academic and extracurricular activities, persist and graduate on time, and enjoy their overall collegiate experience. All students living within Housing communities have access to the following services to assist in their academic success: computer labs, high-speed Internet access, educational programming, peer tutors (math and writing), academic advising and career counseling, faculty mentoring, and leadership and service opportunities. A well-trained team of professional and peer staff also provides numerous opportunities for social and educational activities, which build the community and supplement and support formal classroom experiences. Also, live-in staff members are trained to assist students with a variety of issues, such as roommate conflicts, eating disorders and other mental health issues, and personal safety.

Theme Housing

The underlying principle of theme housing is to link residence halls with academic or general interest themes, and create communities of residents with shared interests and goals. Each theme community is supported by a peer mentor who provides on-site tutoring and advising, and who plans fun social programs. Theme housing options include the following:

Academic Lifestyles

These floors are sponsored by academic departments and colleges. Academic Lifestyles are very popular and have strong returning communities. The following floors are offered in South Campus: American Sign Language, World of Business, The Vector Floor (Engineering), Computer Science, Prehealth Professionals, and The Aldo Leopold Floor (Natural Resources). Academic Lifestyles in Honors is offered in the new Living/Learning Community.

Community Lifestyles

Community Lifestyles include Global Village (located in the Student Living Center) and Leadership House (located in the new Living/Learning Community). Both are sponsored by student clubs and organizations. Global Village is open to all students who want to live with international students coming for a semester or year through the study abroad program. Leadership House is open to all students interested in student government and community service and is a great opportunity for campus involvement.

Freshman Interest Groups (FIGs)

For making the transition to university life with all the benefits of a small college atmosphere, this is the ultimate freshman experience. Each theme-oriented FIG includes 16-18 students who live near each other, meet regularly for meals, and attend group activities. Students are assigned a peer mentor who joins them for meals, provides academic assistance, and serves as their guide to campus life. The following FIGs are currently offered: Appreciating the Arts, Elementary Education, Healthy Living, Outdoor Adventures, ROTC, and Science and Society.

Housing Communities

Central Campus

Bullen Hall, Mountain View Tower, Richards Hall, Valley View Tower

Central Campus is a close-knit community centered on lasting friendships, fun, and student achievement. This is the home of the FIGs (Freshman Interest Groups). A high percentage of first-year students live in this area and receive intensive staff support and community development to meet their needs.

Student Living Center

Davis Hall, Jones Hall, Morgan Hall, Rich Hall, Snow Hall, San Juan Hall, Summit Hall, Wasatch Hall

This community is an excellent location for students who want an academic setting surrounded by abundant green space. Shuttle buses take students to the center of campus in a matter of a few minutes. This is the home of the Community Lifestyles program. The fifth floor of Snow Hall is a returning resident floor. Summit Hall, which features private bedrooms, is reserved for upper-division and graduate students.

South Campus

Greaves Hall, Merrill Hall, Moen Hall, Reeder Hall

This community includes Leadership House and Honors floors. The fifth floor of Merrill Hall is designed to meet the needs of nonfreshmen.

Living/Learning Community—New

Located in the very heart of campus on the north end of Old Main Hill, this community includes a community center complete with meeting and program space, as well as clustered lounge spaces designed to take full advantage of the beautiful scenery of the campus and the valley below. The living space has been intentionally designed to provide privacy, while at the same time promoting important social interactions between roommates, between others living in the individual buildings, and throughout the community as a whole. The community includes Leadership House and Honors floors.

Aggie Village

Graduate/Upper Division

Located adjacent to the main campus, Aggie Village is the ideal getaway for those seeking privacy and quiet study time. Aggie Shuttle Buses are regularly scheduled to take students to the main campus in a matter of minutes. Students desiring to live in this area must have completed at least 60 credits or must be 25 years or older, in order to qualify to live in an upper-division apartment. Students enrolled in a master’s or doctorate program at Utah State qualify to live in graduate apartments.
Family Student Housing

Aggie Village, Mobile Home Park, Townhouses, West Stadium Villa
Family Housing communities are an ideal choice for student families seeking a productive learning and living environment. Residents enjoy the extra space, both indoors and outdoors. In the classroom located in the Community Area Office, both Housing and Utah State Extension offer numerous classes and programs for family students. Living options include spacious one-, two-, and three-bedroom apartments, as well as a mobile home park.

Each community offers slightly different opportunities and is designed with the student in mind. High-quality facilities with reasonable rates, service, and convenience are provided. All prices generally include: Internet access, local phone, cable TV, and free shuttle bus service. Single Housing apartment prices include all utilities, full kitchens, and furniture. Family Housing units have full kitchens and are rented unfurnished. Family Housing residents are responsible for payment of electric and gas utility bills.

For further information about the current price listings, style options, and availability, visit the housing website at: http://www.housing.usu.edu, or contact the Housing Office at (435) 797-3113, toll free at (800) 863-1085, or via e-mail at: info@housing.usu.edu.
Dining Services

Utah State University Dining Services is committed to creating an excellent college dining experience for students, staff, faculty, and guests. A wide variety of dining options, ranging from a full-service restaurant to a convenience store, are offered by Dining Services. For more information about dining options, call (435) 797-1701.

Diner's Account

A Diner’s Account is the most convenient way to pay for campus food purchases. With a Diner’s Account, students save 10 percent on all their purchases at the Hub, the Skyroom Restaurant, and the Quadside Café. The Diner’s Account may also be used at the Carousel Square, the Junction, and the Quickstop.

For more information or to add money to an account, visit Taggart Student Center 212 or http://www.usu.edu/usucard/

The Hub

Located on the first floor of the Taggart Student Center (the "hub" of campus), this food court offers many choices for students "on the go." A great social spot, the Hub provides a place to meet and eat on campus. A variety of menu options from many well-known chains, such as Pizza Hut, Café Ibis, Hogi Yogi, and Taco Time, are offered. The Hub also features daily specials and other great promotions.

Marketplace Eatery

Located on the second floor of the Taggart Student Center, Marketplace Eatery is the new residential dining facility. It offers a variety of different menu options, including Mongolian grill, pizza, pasta, salad bar, Mexican, rotisserie chicken, and much more.

The Skyroom

Located on the fourth floor of the Student Center, the Skyroom is USU's only full-service restaurant. It offers a wide variety of entrees prepared daily by professional chefs. Tuesdays feature an “all-you-care-to-eat” lunch buffet. A daily “all-you-care-to-eat” salad and soup bar is considered one of the best in Cache Valley.

The QuickStop

This campus convenience store, located on the first floor of the Student Center, offers a wide variety of snacks, soda, and candy, as well as a variety of grab-and-go items.

The QuadSide Café

The Quadside Café is a coffee shop and more. It features Cache Valley’s famous Café Ibis coffee, specialty drinks, pastries, sandwiches, salads, and soft drinks. The Quadside Café, conveniently located in the lobby of the Merrill-Cazier Library, is a great place to get something to eat before studying.

The Junction

The Junction is a residential on-campus dining hall. It features a full salad and soup bar, grill, sandwich bar, and entrees prepared daily by professional chefs. In order to meet individual lifestyles and budgets, the Junction provides several different meal plans.

USU Catering

USU Catering offers an extensive menu and provides food for buffets, served meals, barbecues, receptions, and any other event needing catering. USU Catering is available to create a special menu for any event, whether on or off campus.
General Education Requirements

Vice Provost for Undergraduate Studies and Research:
Joyce Kinkead
Location: Main 142
Phone: (435) 797-1706
FAX: (435) 797-3880
E-mail: joyce.kinkead@usu.edu
WWW: http://www.usu.edu/universitystudies

The General Education program, along with study in the major, is designed to assist students in achieving the Citizen Scholar Objectives (see page 52).

Transfer Students

Students who have received an AA or AS degree at any institution within the Utah System of Higher Education, or at another institution with which USU has an articulation agreement, will be considered to have fulfilled the General Education Requirements, but must still complete the University Studies Depth Education Requirements.

Students who transfer to Utah State University with less than an Associate Degree (and have not completed General Education requirements) or with an Associate of Applied Science degree will have their General Education courses evaluated on a course-by-course basis and may be required to take any additional courses necessary to satisfy the General Education requirements at Utah State University. However, if these students have taken equivalent General Education courses at the sending institution, these courses will be accepted toward satisfying General Education requirements at Utah State University.

Courses approved as fulfilling General Education requirements at a Utah System of Higher Education (USHE) institution will be acceptable to Utah State University as satisfying comparable General Education requirements. Coursework acceptability at other institutions will be determined by the student’s major department at Utah State University.

General Education Requirements (27-31 credits)

USU’s General Education program consists of two sets of requirements: Competency and Breadth.

Competency Requirements (9-13 credits)

The Citizen Scholar Objectives (see page 52) propose that students should be able to communicate effectively, utilize quantitative methods, make appropriate use of technology, and function effectively in groups. The competency requirements are structured to develop these skills.

Communications Literacy (CL1 and CL2) (6 credits)

ENGL 1010 (CL1) Introduction to Writing: Academic Prose ...............3

Or one of the following exams:
ACT English Test: Score of 29 or higher
SAT Verbal Test: Score of 640 or higher
AP English Language Test: Score of 3 or higher
AP English Literature Test: Score of 3 or higher

CLEP English Composition Test: Score of 50 or higher
CLEP Freshman College Composition Test: Score of 53 or higher

And
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode.........................................................3

Quantitative Literacy (QL) (3-4 credits)

One of the following courses:
MATH 1030 (QL) Quantitative Reasoning.................................3
MATH 1050 (QL) College Algebra........................................4
STAT 1040 (QL) Introduction to Statistics..............................3

Or
One Mathematics or Statistics course requiring MATH 1050 as a prerequisite, such as MATH 1100, 1210, 1220; or STAT 2300

Or one of the following exams:
AP Calculus AB Test: Score of 3 or higher
AP Calculus BC Test: Score of 3 or higher
CLEP Calculus Test: Score of 50 or higher
CLEP College Algebra Test: Score of 50 or higher

Computer and Information Literacy (CIL) (0-3 credits)

No specific course is required, but students must pass competency exams in computer and information literacy. Communications Literacy, Quantitative Literacy, and Breadth courses associated with General Education are intended to further develop these skills.

The Computer and Information Literacy requirement includes six exams:
1. Information Law and Ethics
2. Information Resources
3. Document Processing
4. Operating Systems
5. Spreadsheets
6. Electronic Presentations

Students must score 70 percent or higher on each exam to pass. A student has met the requirement only after he or she has passed all six examinations. There is no college credit associated with this requirement. While some college credit classes teach the required skills for the CIL exams, simply passing the class does not meet the requirement. Only by passing all of the six CIL tests is the CIL requirement met. It is strongly suggested that students complete the CIL requirement during their freshman year.

There is a $30 fee associated with this exam. Once the fee is paid, there is no limit to the number of times a student can take each test. Once a test is passed, a student may not retake that test. After all tests are passed, students must go to the CIL web page, select Recording on Transcript, and then complete and submit the form. The CIL information will then be posted to their transcripts.

To learn more about the CIL requirement, visit the following website: http://cil.usu.edu
## General Education Requirements

### Breadth Requirements (18 credits minimum)

General Education breadth requirements are intended to introduce students to the nature, history, and methods of different disciplines; and to help students understand the cultural, historical, and natural contexts shaping the human experience. Breadth courses also focus on the important cultural, socio-economic, scientific, and technological issues of today’s global community.

Students must take a minimum of 18 total credits, including at least one course from each of the six categories shown below.

At least two of the six breadth courses must be University Studies courses (USU 1300, 1320, 1330, 1340, 1350, and 1360). Students enrolled in the Honors Program may substitute HONR 1300H, 1320H, 1330H, 1340H, 1350H, and 1360H for USU 1300, 1320, 1330, 1340, 1350, and 1360.

Prerequisites are required for breadth courses having titles followed by (prereq.). For details, see course listings in the Course Descriptions section of this catalog.

### Breadth American Institutions (BAI) (3 credits minimum)

One of the following courses:
- USU 1300 (BAI) U.S. Institutions .................................................. 3
- ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles .................................................. 3
- HIST 1700 (BAI) American Civilization ........................................... 3
- HIST 2700 (BAI) United States to 1877 ........................................... 3
- HIST 2710 (BAI) United States 1877-Present ................................... 3
- HONR 1300H (BAI) U.S. Institutions .............................................. 3
- POLS 1100 (BAI) United States Government and Politics .................. 3

Or one of the following exams:
- AP Macroeconomics Test: Score of 3 or higher
- AP U.S. Government and Politics Test: Score of 3 or higher
- AP U.S. History Test: Score of 3 or higher
- CLEP American Government Test: Score of 60 or higher
- CLEP History of the U.S. I: Early to 1877 Test: Score of 50 or higher
- CLEP History of the U.S. II: 1865 to Present Test: Score of 50 or higher
- CLEP Principles of Macroeconomics Test: Score of 53 or higher

### Breadth Creative Arts (BCA) (3 credits minimum)

One of the following courses:
- USU 1330 (BCA) Civilization: Creative Arts .................................... 3
- ART 1010 (BCA) Exploring Art ..................................................... 3
- HONR 1330H (BCA) Civilization: Creative Arts .............................. 3
- ID 1750 (BCA) Design in Everyday Living ..................................... 3
- ID 1790 (BCA) Interior Design Theory .......................................... 3
- LAEP 1030 (BCA) Introduction to Landscape Architecture .............. 3
- MUSC 1010 (BCA) Introduction to Music ....................................... 3
- MUSC 1100 (BCA) Fundamentals of Music .................................... 3
- THEA 1013 (BCA) Understanding Theatre .................................... 3
- THEA 1023 (BCA) Introduction to Film ......................................... 3

Or one of the following exams:
- AP Music Theory Test: Score of 3 or higher
- AP Studio Art: Drawing: Score of 3 or higher
- AP Studio Art: 2-D Design: Score of 3 or higher
- AP Studio Art: 3-D Design: Score of 3 or higher

### Breadth Humanities (BHU) (3 credits minimum)

One of the following courses:
- USU 1320 (BHU) Civilization: Humanities .................................... 3
- ANTH 2210 (BHU) Introduction to Folklore ..................................... 3
- ARTH 2710 (BHU) Survey of Western Art: Prehistoric to Medieval .... 3
- ARTH 2720 (BHU) Survey of Western Art: Renaissance to Post-Modern 3
- ENGL 2200 (BHU) Understanding Literature .................................. 3
- ENGL 2210 (BHU) Introduction to Folklore ..................................... 3
- ENGL 2300 (BHU) Introduction to Shakespeare ............................... 3
- ENGL 2630 (BHU) American Culture and the Environment ............ 3
- HIST 1500 (BHU) Introduction to Islamic Civilization .................... 3
- HIST 1100 (BHU) Foundations of Western Civilization: Ancient and Medieval .................................................. 3
- HIST 1110 (BHU) Foundations of Western Civilization: Modern ..... 3
- HIST 1510 (BHU) The Modern World ............................................ 3
- HIST 2210 (BHU) Introduction to Folklore ..................................... 3
- HIST 1320H (BHU) Civilization: Humanities .................................. 3
- PHIL 1000 (BHU) Introduction to Philosophy .................................. 3
- PHIL 1120 (BHU) Social Ethics ..................................................... 3
- PHIL 1200 (BHU) Practical Logic ................................................... 3
- PHIL 2400 (BHU) Ethics ............................................................... 3
- THEA 1030 (BHU) Exploring Performance Through Aesthetic Texts .. 3

Or one of the following exams:
- AP Art History Test: Score of 3 or higher
- AP English Literature Test: Score of 3 or higher
- AP European History Test: Score of 3 or higher
- AP World History Test: Score of 3 or higher
- CLEP Analyzing and Interpreting Literature Test: Score of 52 or higher
- CLEP Western Civilization I: Ancient to 1648 Test: Score of 50 or higher
- CLEP Western Civilization II: 1648 to Present Test: Score of 50 or higher

### Breadth Life Sciences (BLS) (3 credits minimum)

One of the following courses:
- USU 1350 (BLS) Integrated Life Science ....................................... 3
- ANTH 1020 (BLS) Biological Anthropology .................................. 3
- AWER 1200 (BLS) Biodiversity: Its Conservation and Future .......... 3
General Education Requirements

BIOL 1010 (BLS) Biology and the Citizen ....................................3
BIOL 1300 (BLS) Of Maggots, Mites, and Men ...........................3
BIOL 1610 (BLS) Biology I (4 cr) and BIOL 3300 (BLS) General Microbiology (prereq.) (4 cr) ....8
(Both BIOL 1610 and 3300 must be taken. This option is available only to students majoring in Biological Engineering or Environmental Engineering.)
BIOL 1620 (BLS) Biology II (prereq.) ........................................4
(formerly BIOL 1220 BLS)
FRWS 2200 (BLS) Ecology of Our Changing World ....................3
HONR 1350H (BLS) Integrated Life Science .................................3
NFS 1020 (BLS) Science and Application of Human Nutrition ....3
PLSC 2100 (BLS) Introduction to Horticulture ............................3

Or one of the following exams:
AP Biology Test: Score of 3 or higher
AP Environmental Science Test: Score of 3 or higher
CLEP Biology Test: Score of 50 or higher

Breadth Physical Sciences (BPS) (3 credits minimum)

One of the following courses:
USU 1360 (BPS) Integrated Physical Science ...............................3
BMET 2000 (BPS) The Atmosphere and Weather ..........................3
CHEM 1010 (BPS) Introduction to Chemistry ..............................3
CHEM 1110 (BPS) General Chemistry I .....................................3
CHEM 1120 (BPS) General Chemistry II (prereq.) ........................4
CHEM 1220 (BPS) Principles of Chemistry II (prereq.) .................4
CS 1030 (BPS) Foundations of Computer Science ........................3
(formerly CS 1010 BPS)
GEO 1010 (BPS) Geology of National Parks:
Introduction to Geology .........................................................3
(formerly GEO 1100 BPS)
GEO 1060 (BPS) Introduction to Environmental Geoscience .........3
(formerly GEO 1200 BPS)
GEO 1110 (BPS) The Dynamic Earth: Physical Geology ..........4
(formerly GEO 1150 BPS)
GEOG 1000 (BPS) Physical Geography .................................3
(formerly GEOG 1130 BPS)
HONR 1360H (BPS) Integrated Physical Science .........................3
PHYS 1020 (BPS) Energy ...........................................................3
(formerly PHYX 1020 BPS)
PHYS 1040 (BPS) Introductory Astronomy ................................3
(formerly PHYX 1000 BPS)
PHYS 1080 (BPS) Intelligent Life in the Universe .......................3
(formerly PHYX 1030 BPS)
PHYS 1100 (BPS) Great Ideas in Physics ..................................3
(formerly PHYX 1100 BPS)
PHYS 1200 (BPS) Introduction to Physics by Hands-on Exploration ..4
(formerly PHYX 1200 BPS)
PHYS 1800 (BPS) Physics of Technology (prereq.) .........................4
(formerly PHYX 1800 BPS)
PHYS 2120 (BPS) The Physics of Living Systems II (prereq.) ........4
(formerly PHYX 2120 BPS)
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II .4
(formerly PHYX 2220 BPS/QI)
SOIL 2000 (BPS) Soils, Waters, and the Environment .................3

Or one of the following exams:
AP Chemistry Test: Score of 3 or higher
AP Physics B Test: Score of 3 or higher
AP Physics C: Electricity and Magnetism Test: Score of 3 or higher
CLEP Chemistry Test: Score of 60 or higher

Breadth Social Sciences (BSS) (3 credits minimum)

One of the following courses:
USU 1340 (BSS) Social Systems and Issues .................................3
ANTH 1010 (BSS) Cultural Anthropology ................................3
ANTH 2100 (BSS) Peoples of the Contemporary World ................3
(formerly ANTH 2100 BSS)
ANTH 2030 (BSS/QI) World Archaeology .................................3
(formerly ANTH 1030 BSS/QI)
ASTE 2900 (BSS) Humanity in the Food Web ............................3
ECON 1550 (BSS) Introduction to Environmental and Natural Resource Economics ..............................3
ECON 2010 (BSS) Introduction to Microeconomics (prereq.) ..........3
CLEP Introductory Sociology Test: Score of 55 or higher
CLEP Introductory Psychology Test: Score of 55 or higher
AP Psychology Test: Score of 3 or higher
Or one of the following exams:
SPED 1010 (BSS)
JCOM 1500 (BSS) Introduction to Mass Communication ...............3
(formerly JCOM 1000 BSS)
JCOM 2010 (BSS) Media Smarts: Making Sense of the Information Age ....3
(formerly JCOM 2000 BSS)
NR 1010 (BSS) Humans and the Changing Global Environment ....3
POLS 2200 (BSS) Comparative Politics ...................................3
PSY 1010 (BSS) General Psychology .......................................3
SOC 1010 (BSS) Introductory Sociology ....................................3
SPED 1010 (BSS) Disability in the American Experience .............3

Or one of the following exams:
AP Government and Politics: Comparative Test: Score of 3 or higher
AP Human Geography Test: Score of 3 or higher
AP Microeconomics Test: Score of 3 or higher
AP Psychology Test: Score of 3 or higher
CLEP Introductory Psychology Test: Score of 55 or higher
CLEP Introductory Sociology Test: Score of 55 or higher

Designation of Courses that Satisfy General Education Requirements

All courses approved for the General Education Requirements are clearly designated in this catalog and in the current Schedule of Classes. The designations used for General Education courses are as follows:

Competency Courses
Communications Literacy, CL1 and CL2
Quantitative Literacy, QL

Breadth Courses
American Institutions, BAI
Creative Arts, BCA
Humanities, BHU
Life Sciences, BLS
Physical Sciences, BPS
Social Sciences, BSS
University Studies Depth Education Requirements

University Studies Objectives: The Citizen Scholar

The mission of undergraduate education at Utah State University is to help students develop intellectually, personally, and culturally, so that they may serve the people of Utah, the nation, and the world. USU prepares citizen-scholars who participate and lead in local, regional, national, and global communities. University Studies is an integral part of every student’s experience—in both lower-division and upper-division courses. A solid University Studies foundation, combined with concentrated study in a major discipline and interdisciplinary studies, provides the breadth and depth of knowledge qualifying USU graduates as educated citizens.

The University Studies program is intended to help students learn how to learn—not just for the present, but also for the future. No individual can master all, or even a small portion, of society’s knowledge, but students can learn the basic patterns used to obtain and organize information, enabling them to discover or recover knowledge. University Studies involves a series of interrelated educational experiences which stimulate and assist students in becoming self-reliant scholars and individuals. The ultimate objective is for general and discipline-specific education to complement each other in helping students to:

1. understand processes of acquiring knowledge and information;
2. reason logically, critically, creatively, and independently, and be able to address problems in a broad context;
3. recognize different ways of thinking, creating, expressing, and communicating through a variety of media;
4. understand diversity in value systems and cultures in an interdependent world; and
5. develop a capacity for self-assessment and lifelong learning.

By introducing ideas and issues in human thought and experience, University Studies courses help students achieve the intellectual integration and awareness needed to meet the challenges they will face in their personal, social, and professional lives. University Studies courses emphasize how knowledge is achieved and applied in different domains. Collectively, they provide a foundation and perspective for:

1. understanding the nature, history, and methods of the arts and humanities, as well as the natural and physical sciences;
2. understanding the cultural, historical, and natural contexts shaping the human experience; and
3. interpreting the important cultural, socio-economic, scientific, and technological issues of the diverse global community in which we live.

A university education prepares students to work and live meaningfully in today’s rapidly changing global society. Together, general and discipline-specific education help students master the essential competencies making this goal possible. These competencies include:

1. reading, listening, and viewing for comprehension;
2. communicating effectively for various purposes and audiences;
3. understanding and applying mathematics and other quantitative reasoning techniques;
4. using various technologies competently; and
5. working effectively, both collaboratively and individually.

University Studies Components

The University Studies program, along with study in the major, is designed to assist students in achieving the Citizen Scholar Objectives. The program consists of two sets of requirements: General Education Requirements and Depth Education Requirements.

University Studies Depth Education Requirements

Beyond the General Education requirements, all students who receive a bachelor’s degree must complete two Communications Intensive, one Quantitative Intensive, and two Depth courses.

Communications Intensive (CI) (2 courses)

For most students, courses taken for the major will meet this requirement.

PSY 3300 (QI) Statistical Methods ......................................... 3
PSY 5100 (QI/CI) Linear Regression and Time Series ........... 3
PSY 5300 (QI) Statistical Process Control ............................. 3

Or one of the following exams:
AP Physics C: Electricity and Magnetism: Score of 3 or higher
AP Physics C: Mechanics: Score of 3 or higher
AP Statistics: Score of 3 or higher

Depth Course Requirements
(2 courses)

Students are required to take two upper-division courses outside of their major.

Approved 3000-level or above courses must be taken from two of the following three categories: Depth Humanities and Creative Arts (DHA), Depth Life and Physical Sciences (DSC), and Depth Social Sciences (DSS). Each student must select one course from each of the two categories which do not include his or her major (e.g., Sociology majors would select one 3000-level or above course from the Depth Humanities and Creative Arts and one 3000-level or above course from the Depth Life and Physical Sciences). Prerequisites are required for depth courses having titles followed by (prereq.). For details, see course listings in the Course Descriptions section of this catalog.

Depth Humanities and Creative Arts (DHA)

One course is required for all students whose major is not categorized as Humanities (HU) or Creative Arts (CA).

USU 3330 (DHA) Arts Symposium (prereq.) ......................... 1-2
(Two credits of USU 3330 are needed to fulfill DHA requirement.)
ART 3110 (DHA/CI) Ancient Near East (prereq.) ............... 3
ARTH 4510 (DHA) Islamic Visual Cultures ....................... 3
(PREviously ART 3720 DHA)

ARTH 4620 (DHA) Byzantine Art .............................................. 3
(PREviously ART 3130 DHA)
ARTH 4630 (DHA) Medieval Art .............................................. 3
(PREviously ART 3140 DHA)
BUS 4150 (DHA) History of Apparel and Textiles I ............... 3
BUS 4160 (DHA) History of Apparel and Textiles II ............... 3
CHIN 3100 (DHA) Readings in Contemporary Chinese Culture (prereq.) ......................................................... 3
ENGL 3020 (DHA) Perspectives in Linguistics ....................... 3
ENGL 3030 (DHA) Perspectives in Literature ...................... 3
ENGL 3040 (DHA) Perspectives in Writing and Rhetoric .......... 3
ENGL 3050 (DHA) Masterpieces of World Literature .......... 3
ENGL 3060 (DHA) British and Commonwealth Cultures .......... 3
ENGL 3070 (DHA) Perspectives in Folklore ......................... 3
FREN 3500 (DHA) Topics in French Literature in Translation ...... 3
FREN 3550 (DHA) French Civilization ................................. 3
FREN 4610 (DHA) Period Studies in French Literature (prereq.) ....... 3
FREN 4620 (DHA) Genre Studies in French Literature (prereq.) ....... 3
GERM 3000 (DHA) Introduction to German Studies (prereq.) ....... 3
GERM 3300 (DHA) Contemporary German Speaking
Cultures (prereq.) ................................................................. 3
GERM 3550 (DHA) Cultural History of German Speaking
Peoples (prereq.) ................................................................. 3

### Categorization of Majors

The courses that must be taken to satisfy University Studies Depth requirements depend on the classification of the student’s major. For example, Music is classified in the Creative Arts. Thus, a music major would not need to take a depth course in the Humanities and Creative Arts.

Following is the categorization of majors used for University Studies. These abbreviations are used: CA—Creative Arts, HU—Humanities, LS—Life Sciences, PS—Physical Sciences, and SS—Social Sciences.

#### College of Agriculture
- Agricultural Economics, SS
- Family and Consumer Sciences Education, SS
- Environmental Soil/Water Science, PS
  - All other majors, LS

#### College of Business
- All majors, SS

#### College of Education and Human Services
- Communicative Disorders and Deaf Education, SS
- Early Childhood Education, (category same as area of emphasis)
- Elementary Education, (category same as area of emphasis)
- Family and Consumer Sciences, SS
- Family, Consumer, and Human Development, SS
- Health Education Specialist, LS
- Instructional Technology, (no undergraduate degree)
- Parks and Recreation, SS
- Physical Education, LS
- Psychology, SS
- Secondary Education, (category same as teaching major category)
- Social Studies Composite Teaching, SS
- Special Education, (may use any category)

#### College of Engineering
- All majors, PS

### College of Humanities, Arts, and Social Sciences
- American Studies, HU
- Anthropology, SS
- Art, CA
- Asian Studies, HU
- English, HU
- French, HU
- German, HU
- History, HU
- Interior Design, CA
- International Studies, (category same as area of emphasis)
- Journalism, SS
- Landscape Architecture, CA
- Law and Constitutional Studies, SS
- Liberal Arts, HU
- Music, CA
- Music Therapy, CA
- Philosophy, HU
- Political Science, SS
- Social Work, SS
- Sociology, SS
- Spanish, HU
- Speech, HU
- Theatre Arts, CA

### College of Natural Resources
- Environmental Studies, SS
- Geography, SS
- Recreation Resource Management, SS
- Watershed and Earth Systems, PS
  - All other majors, LS

### College of Science
- Biology, LS
  - All other majors, PS

### Designation of Courses that Satisfy University Studies Depth Education Requirements

All courses approved for the University Studies Depth Education Requirements are clearly designated in this catalog and in the current Schedule of Classes. The designations used for University Studies Depth Education courses are as follows:

#### Intensive Courses
- Communications Intensive, CI
- Quantitative Intensive, QI

#### Depth Courses
- Humanities and Creative Arts, DHA
- Life and Physical Sciences, DSC
- Social Sciences, DSS

### Course Descriptions

University Studies (USU), page 726.
Undergraduate Graduation Requirements

At the undergraduate level, the University offers Associate of Science and Associate of Applied Science degrees, the degrees of Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Landscape Architecture, Bachelor of Music, and Bachelor of Science, and provides coursework which will satisfy requirements for all professional certificates issued by the State Board of Public Instruction. Certificates are offered for one-year programs in certain departments.

For information about graduate degrees and majors offered by USU, see page 97 of this catalog.

Certificates and Associate of Applied Science Degrees

Certificates and Associate of Applied Science degrees are awarded for completion of less-than-baccalaureate programs at Utah State University. An Associate of Science degree is offered through USU Continuing Education. As defined by the Utah State Board of Regents, a certificate is awarded upon the successful completion of a program directly oriented toward job entry when the program is of a duration of 18 months or less (1-48 semester credit hours). The Regents define an Associate of Applied Science or Associate of Science program as one directly oriented toward job entry when the program is of a duration of 19-36 months (49-96 semester credit hours).

The College of Agriculture offers one- and two-year programs leading to certificates and Associate of Applied Science degrees. One-year certificate programs are available in agricultural machinery technology, dairy herdsmen (vocational technology), and ornamental horticulture. Associate of Applied Science degrees include agricultural machinery technology and ornamental horticulture. An Associate of Applied Science degree in Office Systems Support is offered only through Continuing Education.

In most cases, the courses in the Associate of Applied Science programs are arranged so that, at a later date, the four-year baccalaureate program can be completed with a minimum loss of time.

Associate of Applied Science Degree

A minimum of 60 credit hours is required for an Associate of Applied Science (AAS) degree. Requirements include coursework in the following areas: primary area of study, related area, general education, and electives. Candidates for an AAS degree must complete at least 20 USU credits at USU’s Logan campus or designated centers, or through classes offered by distance education through USU.

See department offerings for specific requirements. AAS degrees are offered in the following areas: agricultural machinery technology, ornamental horticulture, and office systems support. (Note: The office systems support AAS degree is offered only through Continuing Education.)

Associate of Science Degree

The Associate of Science (AS) degree in general studies is offered through Continuing Education. A minimum of 60 credits is required for an AS degree. This degree is available at Continuing Education campuses and centers, as well as online, and is also delivered to several international locations. Requirements include coursework in general education, a primary or related area of study, and electives. Candidates for an AS degree must complete at least 20 USU credits at Utah State University.

Bachelor of Arts Degree

A Bachelor of Arts (BA) degree signifies proficiency in one or more foreign languages. Specifically, the BA requirement may be completed in one of the following ways:

1. Demonstration of proficiency in one foreign language by successful completion of one course at the 2020-level or higher (or its equivalent).
   Or
2. Demonstration of proficiency in two foreign languages by successful completion of the 1020 course level in one language and the 2010 course level in the second language (or its equivalent).
   Or
3. Completion of an upper-division (3000-level or higher) foreign language grammar or literature course requiring the 2020 course level (or its equivalent) as a prerequisite. Conversation courses cannot be considered for satisfying this requirement.

For nonnative English-speaking students only, the following options are available:

1. Successful completion of the Intensive English Language Institute (IELI) program for international students.
   Or
2. TOEFL, Michigan, or IELI placement scores high enough to meet the University admission criteria.
Undergraduate Graduation Requirements

Bachelor's Degree Requirements

Academic Program Requirement
All graduates are required to complete an approved academic program in one of the seven resident colleges.

American Institutions
All graduates are required to have an understanding of the fundamentals of the history, principles, form of government, and economic system of the United States. Students may meet this requirement in any one of the following ways: (a) receiving a passing grade on a special examination; (b) receiving a grade of three or better on the Advanced Placement Examination in American History; (c) satisfactory completion of: USU 1300 or HONR 1300H; ECON 1500; HIST 1700, 2700, or 2710; or POLS 1100; or (d) satisfactory completion of a transfer course equivalent to one of the courses in (c).

University Studies
Completion of the University Studies general education and depth education requirements. (See pages 49-57.)

Upper-Division Credits
Completion of a minimum of 40 credits numbered 3000 or above.

Total Credits
A minimum of 120 credits of acceptable collegiate work and a minimum of 100 credits with a grade of C- or better.

GPA
In order to graduate, students must meet all GPA requirements for their major. These requirements can be found in the Instructional Units and Programs section of this catalog. USU credits only are used in computing the GPA. The University requires a minimum GPA of 2.0 to be considered for good standing and for graduation, although the majority of degree programs require a higher GPA.

Major
Each student must complete all requirements for an approved program of study. This program is comprised of up to 80 credits, which include the major, licensure requirements, and all other required major coursework. The program of study for each major is described in the appropriate departmental section of this catalog and on the major requirement sheets, which can be obtained online at: http://www.usu.edu/ats/majorsheets/

Students should select a major subject upon entering the University or early the first year, but not later than entrance into the upper division. As soon as the major subject has been selected, the student should contact the department in which he or she has decided to major. A Change of Program form must be filed with the University Registrar. The head of the department will assign an advisor. Registration in succeeding semesters should be carefully checked and approved by the advisor to assure proper selection of courses for satisfying institutional and departmental requirements. If more than one major is being pursued concurrently, departmental and college authorization must be obtained.

Students who have completed at least 60 credits (not including AP, CLEP, and concurrent enrollment) and one USU semester must be accepted into a department or be admitted to General Studies before they are allowed to register for additional work. To enforce this policy, a hold will be placed on the student’s registration.

The selection of a major(s), the fulfillment of requirements, and a choice of a career or vocation are the responsibility of the student. The University does not assume responsibility for these choices nor for successful employment upon completion of University programs. However, to aid in these choices, the University provides advising, counseling, and testing services for self-evaluation and information about careers and employment opportunities. Career Services assists students in all aspects of their career search.

Students are encouraged to meet regularly with their advisor to establish a plan of study and confirm a graduation date as early as possible.

Changing a Program
When a change of degree, catalog year, major, minor, and/or emphasis is desired, a student must go to the department office in which he or she is presently enrolled to initiate the proper paperwork. If he or she is changing to a program within the same department, the department office may complete the required form, have it signed, and have it received by the Registrar’s Office. When a student is changing departments, signatures of both department heads are required on the form. After the form is received by the Registrar’s Office, the program is changed and the information becomes part of the student’s file.

Minor
USU does not require that all students complete a minor. However, some departments and/or programs do require completion of a minor, which is described in the catalog statement of the department or program.

USU Courses
Candidates for a bachelor’s degree must complete at least 30 credits at USU’s Logan campus or designated centers, or through classes offered by distance education through USU. A minimum of 20 of these credits must be completed in upper-division courses, of which at least 10 credits must be completed in courses required by the student’s major.

Candidates for an associate degree must complete at least 20 credits at USU’s Logan campus or designated centers, or through classes offered by distance education through USU.

Credit by Examination
Some noncollegiate experiences may permit credit through challenge and foreign language examinations. For further information, see pages 18-19.

Remedial Courses
Remedial courses (numbered below 1000), cannot be used to satisfy baccalaureate requirements. These credits do not count toward GPA or Earned Hours.

Latin Scholastic Distinctions
To qualify for Latin Scholastic Distinctions at graduation, a student must have completed a minimum of 40 USU semester credits. USU designated Latin Scholastic Distinctions at graduation are:

<table>
<thead>
<tr>
<th>Grade Point Average</th>
<th>Latin Scholastic Distinction</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.950 - 4.000 GPA</td>
<td>Summa Cum Laude</td>
</tr>
<tr>
<td>3.800 - 3.949 GPA</td>
<td>Magna Cum Laude</td>
</tr>
<tr>
<td>3.500 - 3.799 GPA</td>
<td>Cum Laude</td>
</tr>
</tbody>
</table>

These grade point averages are USU cumulative GPAs. Transfer credits are not considered in determining eligibility for these distinctions.
Undergraduate Graduation Requirements

Honors Degrees
In addition to Latin Scholaric Distinctions at graduation, USU offers honors degrees designed to fill a variety of student needs. Honors Program members may work toward one of three degree options: (1) Departmental Honors, (2) Departmental Honors with Honors in University Studies, or (3) University Honors. For further information, see page 338.

General Information

Extension and Independent Study
Applicants for degrees who have taken courses for credit through extension coursework or Independent Study courses are subject to regular University admission requirements and must file transcripts of all university credit with the Admissions Office.

Financial Obligations
Students are reminded that nonpayment of fees owed to the University may result in withholding of diplomas or certificates.

Independent Study
Grades for Independent Study courses must be completed and on file in the Registrar’s Office by the last day of classes (excluding finals) of the semester of intended graduation.

Incomplete Grades
Incomplete grades must be made up and on file in the Registrar’s Office no later than the last day of classes during the semester for which the candidate has applied for graduation.

Changes in Graduation Requirements
Students are expected to familiarize themselves with the rules and regulations of both the University and their specific major. Detailed information concerning graduation requirements is available in this catalog as part of the departmental descriptions. Responsibility for satisfying all graduation requirements rests upon the student. Utah State University reserves the right to change graduation requirements at any time.

Seven-Year Policy
Students who can complete a baccalaureate degree within seven years of enrollment at USU can qualify for graduation by meeting (1) the General Education or University Studies requirements in effect when they initially enrolled and (2) the major requirements in effect when they officially declared their major, even though there may have been changes in General Education, University Studies, and major requirements since that time. Students who have not completed the baccalaureate requirements within seven years of their initial enrollment at USU must have their General Education (or University Studies) and major requirements evaluated and approved by their department head and dean. Exceptions to this seven-year policy may be necessary for mandated changes in degree requirements.

Intent to Transfer Graduation Requirements
Students who did not initially enroll at USU, but have completed the Intent to Transfer process, will be obligated by the Seven-Year Policy for both the General Education (or University Studies) and major requirements in effect when their Intent to Transfer Education Plan was signed by representatives at both USU and the sending institution. Signatures from both institutions must be obtained during the same semester.

Applying for Graduation
Undergraduate candidates for graduation must have completed the application process by having an application on file and fees paid to the Registrar’s Office, Student Center 246. The application deadline is October 15 for spring semester graduates and February 15 for summer or fall semester graduates. Students who complete the application process prior to the term of graduation will be assessed a $10 application fee. However, a $50 fee will be required for students who complete the process during the term of graduation.

The application process is as follows: (1) Request an application from the Registrar’s Office, (2) Return with picture ID to the Registrar’s Office on the specified date and pick up the application for candidacy for graduation packet, (3) Carefully review the graduation application instructions, (4) Submit the application to departmental advisor and college dean for review and signatures (major must have the appropriate signatures for each major), (5) Complete the graduating student survey, and (6) Submit the graduation packet to the Registrar’s Office (Student Center 246) and pay the application fee of $10. Approximately six weeks is needed to complete the application process.

Names of the candidates will appear on the graduation lists and diplomas as they appear on the student’s transcript.

To change the name appearing on the transcript, the student must fill out the appropriate form in the Registrar’s Office and provide an official document (i.e., driver license, marriage certificate, etc.) with the new name on it.

Commencement
Candidates will attend commencement exercises at the end of the semester during which they complete their requirements (fall or spring). Those candidates completing requirements at the end of summer semester may choose to attend either the preceding spring or the following fall commencement exercises. Attendance at commencement is expected of all candidates. All students must either submit notification of intent to participate or be officially excused through the Registrar’s Office. This should be done via e-mail to: registrar@cc.usu.edu. Also, students who do not attend Commencement must notify the Registrar’s Office of the address to which the diploma is to be sent. All graduates will receive their diplomas through the mail.

Second Bachelor’s Degree
Applicants for a second bachelor’s degree must file an application with the Admissions Office and obtain the recommendation of their academic dean prior to being admitted. A second bachelor’s degree is available only to those on whom a first bachelor’s degree has been conferred. Students must complete a minimum of 30 USU credits beyond those applied toward the first bachelor’s degree, 18 of which must be earned in department-approved upper-division courses related to the major. USU credits may be earned in courses completed at USU’s Logan campus or at designated centers, or through classes offered by distance education through USU.

Candidates for a second bachelor’s degree must have met the American Institutions requirement in the first bachelor’s degree, or complete the requirement before receiving the second bachelor’s degree.

Note: The first bachelor’s degree must have been awarded by an accredited college or university.
Undergraduate Graduation Requirements

Split Form
Courses numbered 0010 through 4990 will be posted to an undergraduate transcript. Courses numbered 6000 through 7990 will be posted to a graduate transcript. Courses numbered 5000 through 5990 will be posted to either an undergraduate or graduate transcript, based on the primary program level of the student. In cases where an undergraduate has taken one or more graduate-level courses required for program completion, a form will need to be submitted to the Registrar’s Office, requesting that the course(s) be posted to the undergraduate transcript. Students should contact their undergraduate advisor for help with filing the appropriate form. In cases where a graduate student has taken one or more undergraduate-level courses as part of the approved program of study, a form will need to be submitted to the Registrar’s Office, requesting that the course(s) be posted to the graduate transcript. Students should contact their graduate advisor for help with filing the appropriate form.

Letter of Completion
Students who have completed the General Education portion of the University Studies Requirements at Utah State University, and who transfer to another institution, may receive a Letter of Completion from USU. If a student does not intend to return to USU for a bachelor’s degree, the requirement of two USU breadth courses may be waived, since the USU course requirement is unique to USU. Students are still required to complete at least one breadth course in each of the six breadth areas, as well as the Communications Literacy (CL), Quantitative Literacy (QL), and Computer and Information Literacy (CIL) requirements.

It is the student’s responsibility to initiate a request for this letter. The student’s advisor will determine whether or not the student has indeed satisfied all of the requirements. If so, the advisor may go to http://www.usu.edu/advising/forms.html and select the Letter of Completion Form. The advisor should complete the form, indicating how the student has met the requirements. The advisor should also indicate where the letter should be sent. Letters are typically sent to the Admissions Office at the transfer institution. After the advisor has completed the form, he or she should send the form to Lillian Tripp in the Registrar’s Office. Lillian Tripp will then generate an official letter on letterhead from the Registrar’s Office, and send the letter to the transfer institution.

On occasion, there may be circumstances in which a student has completed most of the General Education requirements at Utah State University, transferred to another institution where he or she has completed the last of the courses needed to complete the USU General Education requirements, and then requested a Letter of Completion from USU. Since the coursework was not completed at USU, USU may not submit a Letter of Completion, unless the coursework is posted to a USU transcript. To have this coursework posted to a USU transcript, a student should submit his or her transcript and a $15 posting fee to University Advising and Transfer Services (UATS), 0114 Old Main Hill, Logan UT 84322-0114. UATS will then post and evaluate the credit. If all requirements have been satisfied, UATS will complete the Letter of Completion Form and submit it to the Registrar’s Office for processing.
Credit by Examination

Advanced Placement (AP)

Advanced Placement examinations are offered at the high school level only. A number of examination areas are available; not all high schools offer all available AP examinations. Generally, the major areas chosen include English, American history, mathematics, chemistry, and physics.

Examinations are scored on a one-to-five scale. Students may receive 4 or 8 credits for a composite score of 3, 4, or 5 on any Advanced Placement examination. Earned credit may be applied toward the University Studies requirements. This information is summarized below.

<table>
<thead>
<tr>
<th>AP Score</th>
<th>USU Credits Granted</th>
</tr>
</thead>
<tbody>
<tr>
<td>0, 1, or 2</td>
<td>0</td>
</tr>
<tr>
<td>3, 4, or 5</td>
<td>4 or 8</td>
</tr>
</tbody>
</table>

Other institutions have policies differing from those of USU regarding AP scores and credits granted for those scores. For transfer students with less than an associate degree, AP credit posted to another institution’s transcript is reevaluated based on USU’s standard.

If, prior to (or after) taking an AP examination, a student receives credit for any coursework equivalent to the subject matter of an AP examination, the number of credits earned for the course will be deducted from the credits awarded for the examination.

To ensure that AP credits will be posted to their transcripts, students are responsible to submit their AP scores to the Admissions Office, Student Center 102. Efficient posting of AP credits helps advisors counsel students about requirements.

For further information regarding credits granted for AP examinations, contact University Advising and Transfer Services, Student Center 304, (435) 797-3373.

*The student/advisor may choose the CHEM 1010 or CHEM 1210 track according to what best suits the student’s major.

**The student/advisor may choose the PHYS 2110 or PHYS 2210 track according to what best suits the student’s major.
Credit by Examination

**College-Level Examination Program (CLEP)**

The CLEP examinations were designed for students who wish to utilize previous knowledge and experience in lieu of required coursework. CLEP is a national program of credit-by-examination, allowing students to obtain recognition for college-level achievement. This privilege is intended to measure information and training gained from practical experience that may be considered the equivalent of the experience and training received by students in an organized course given at the University.

Credits may be acquired through the CLEP examinations. These credits may be used to fill General Education Requirements and may also be accepted as equivalent to specific courses. Students interested in taking a CLEP exam should contact the University Testing Center, University Inn 115.

Individual departments and/or colleges may specify the exact courses required to fill their requirements and may require more than the minimum General Education requirements. Some departments and colleges require specific coursework for General Education, which the CLEP exams may not satisfy.

If, prior to (or after) taking a CLEP examination, a student receives credit (including AP credit) for any coursework equivalent to the subject matter of a CLEP examination, the credits earned for the course will be deducted from the credits awarded for the examination.

USU will accept a maximum of 30 total credits from CLEP, DANTES Standardized Subject Tests (DSST), and cooperative education/internship credit combined.

Other institutions have policies differing from those of USU regarding CLEP scores and credits granted for those scores. For transfer students with less than an associate degree, CLEP credit posted to another institution’s transcript is reevaluated based on USU’s standard.

**CLEP Tests Taken Prior to Fall 2001**

In Fall 2001, CLEP began using computer-based testing. The results of the computer-based tests are somewhat different for most of the exams. For historical data on how credits were accepted prior to Fall 2001, contact University Advising and Transfer Services at (435) 797-9303.

*The minimum score requirement for this exam is subject to change.
**Students who plan to use PSY 3660 for teacher licensure should contact the Teacher Education, Graduation, and Educator Licensing Office in Education 103, phone (435) 797-1443, prior to making arrangements for the examination.
Credit by Examination

DANTES Standardized Subject Tests (DSST)

DSSTs provide an opportunity for people to obtain college credit for what they have learned in nontraditional ways. Designed originally for the military, DSSTs are available to civilian students and adult learners as well. The DSST program is used by colleges and universities to award college credit to those who demonstrate that they have knowledge comparable to someone who completed a classroom course in the subject.

Credits may be acquired through the DSST examinations. These credits may be used to fill General Education Requirements, and may also be accepted as equivalent to specific courses.

Individual departments and/or colleges may specify the exact courses required to fill their requirements and may require more than the minimum General Education requirements. Some departments and colleges require specific coursework for General Education, which the DSST exams may not satisfy.

If, prior to (or after) taking a DSST examination, a student receives credit (including AP credit) for any coursework equivalent to the subject matter of a DSST examination, the number of credits earned for the course will be deducted from the credits awarded for the examination.

USU will accept a maximum of 30 total credits from CLEP, DSST, and cooperative education/internship credit combined.

Other institutions have policies differing from those of USU regarding DSST scores and credits granted for those scores. For transfer students with less than an associate degree, DSST credit posted to another institution’s transcript is reevaluated based on USU’s standard.

International Baccalaureate Organization (IBO)

The IBO is a nonprofit educational foundation based in Geneva, Switzerland.

It grew out of international schools’ efforts to establish a common curriculum and university entry credential. The schools were also motivated by an idealistic vision. They hoped that critical thinking and exposure to a variety of points of view would encourage intercultural understanding by young people.
They concentrated on the last two years of school before university studies in order to build a curriculum that would lead to what they called a “baccalaureate,” administered in any country and recognized by universities everywhere.

USU recognizes the International Baccalaureate program. Students who present an International Baccalaureate diploma will be awarded a maximum of 30 credits. These credits will waive the Breadth requirements, but students will still be required to complete the Communications Literacy, Quantitative Literacy, and Computer and Information Literacy requirements.

Students who have not completed the International Baccalaureate diploma may receive up to 8 credits for scores of 5, 6, or 7 achieved on higher-level exams, up to a maximum of 30 credits. No credits are awarded for subsidiary-level exams.

Individual departments and/or colleges may specify the exact courses required to fill their requirements and may require more than the minimum General Education requirements. Some departments and colleges require specific coursework for General Education, which the IBO exams may not satisfy.

If, prior to (or after) taking an IBO examination, a student receives credit (including AP credit) for any coursework equivalent to the subject matter of an IBO examination, the number of credits earned for the course will be deducted from the credits awarded for the examination.

Other institutions have policies differing from those of USU regarding IBO scores and credits granted for those scores. For transfer students with less than an associate degree, IBO credit posted to another institution’s transcript is reevaluated based on USU’s standard.

### Placement Tests

Following is a list of areas offering placement tests.

#### English
ACT test scores may be used as a placement tool for recommending the level of courses to be taken.

An ACT English score of 29 or higher, or an SAT Verbal score of 640 or higher, will waive English 1010 and qualify a student for placement in English 2010 after the student has earned 30 credits. Students with an English ACT score of 16 or lower will be required to take English 0010.

#### Mathematics and Statistics
The results of the ACT or SAT mathematics section, along with other pertinent information (high school coursework, etc.), are used as a basis for placing incoming freshman students in the proper mathematics or statistics course as follows:

Credit by Examination

Regardless of previous record, a student may take any of the mathematics and statistics placement tests up to twice per semester. Students should schedule an appointment in advance at the Testing Center, located in University Inn 115. A $5 fee will be required for each test, and results will be known within a few minutes. There are three different tests for placement into the following:

1. MATH 1010
2. MATH 1030, 1050, 1060, or STAT 1040
3. MATH 1100, 1210, 2020, or STAT 2300

Generally, students who receive an ACT score of 17 or lower are advised to take the MATH 1010 Placement Test to determine which entry-level course is needed. Based on the results of the test, MATH 1010 or 0900 will be recommended. MATH 0900 is a refresher course and has an additional fee. In addition, MATH 0900 does not count for college credit.

TOEFL
The Test of English as a Foreign Language (TOEFL) is required for international students (from countries in which English is not the official language) for admission to the University. It is not used for granting credit nor for waiver of the communications literacy requirement. International undergraduate students are required to complete the Intensive English course unless they receive a score of at least 500 (paper/pencil), at least 173 (computerized), or at least 61 (iBT) on the TOEFL examination, a Michigan score of 80 or higher, or a 5.0 or higher on the IELTS examination. (Note: iBT is the Internet-based TOEFL.)

Languages
Where basic skills in a language have been acquired by means other than college courses, up to 16 lower-division credits may be earned by special examination.

Students with skills in a language other than those offered by the department may earn up to 16 pass/fail credits by successfully performing on a special Languages, Philosophy, and Speech Communication Department examination. However, these examinations are no longer offered at USU. Interested students must make arrangements to take one of these exams at Brigham Young University.

Students with skills in a language that is offered by the Languages, Philosophy, and Speech Communication Department may earn credit by successfully performing on an examination or by successfully completing an upper-division (3000-level or above) language course with a grade of B or better. Students should contact the Languages, Philosophy, and Speech Communication Department in Main 204, 797-1209.

Credit by Special Examination
Matriculated students may challenge a course for credit by taking a special examination available in the University Testing Center. For more information about receiving credit by special examination, see pages 18-19.

Credit by Departmental Examination
Matriculated students may challenge a course for credit by taking a departmental examination. For a detailed explanation of how to challenge a course for credit, see page 19.

Credit by Advanced Coursework
(Language Credits)
Students who are proficient in a foreign language offered by Utah State University may earn lower-division credit through successfully passing a more advanced course. Instructions about how to apply for this credit can be found on page 19.
Transfer Credit Guidelines

Utah State University awards transfer credit for academic work completed at other academic institutions. Transfer and articulation is not based solely on the accreditation status of the transfer institution. Acceptance of credit should not be confused with its application. Transfer credit may or may not apply to the graduation requirements of Utah State University, regardless of the number of credits transferred.

In order to transfer credit to Utah State University, official transcripts of credit must be submitted to the Admissions Office. Submitted transcripts become the property of Utah State University, and will not be returned. Transcripts from all institutions previously attended are required.

Guidelines for Transferable Credit

Courses taken at institutions that are accredited by one of the six regional accrediting associations will be accepted as transfer credit by Utah State University.

The six regional accrediting associations are: (1) Middle States Association of Colleges and Schools, Commission on Higher Education (MSA); (2) Northwest Commission on Colleges and Universities (NWCCU); (3) North Central Association of Colleges and Schools, Higher Learning Commission (NCA); (4) New England Association of Schools and Colleges, Inc., Commission on Institutions of Higher Education (NEASC-CIHE); (5) Southern Association of Colleges and Schools, Commission on Colleges (SACS); and (6) Western Association of Schools and Colleges, Accrediting Commission for Senior Colleges and Universities (WASC-ACSCU).

Utah State University may award credit for academic work completed at institutions that are not regionally accredited if the courses:

1. articulate to University Studies or General Education requirements at USU,
2. correspond to recognized standards published by the American Association of Collegiate Registrars and Admissions Officers (AACRAO) and the American Council on Education (ACE), or
3. are approved by the department and college in which the subject matter is taught at Utah State University.

Utah State University does not accept transfer credit from nonregional-accredited institutions in those cases where USU lacks an academic unit to evaluate such transfer credit.

Subcollege-level courses which are developmental, remedial, or preparatory are not transferable.

Vocational-technical courses are generally not transferable. Exceptions may be made by individual departments if the coursework is pertinent to the student’s major.

Religion courses are generally not transferable. These courses will be evaluated based on the particular orientation of the course. In order to be considered, courses in religion must be listed on an official transcript from a regionally accredited institution.

Credit may be transferred from recognized international universities. Transcripts or documented evidence (translated into English) must be presented, indicating successful completion of coursework. Courses must be consistent in level, duration, and content with courses offered at American universities. For further information about the transferability of international credit, contact the Office of International Students and Scholars, Student Center 313, (435) 797-1124.

Credit may be granted to students currently enrolled at USU who have served in the armed forces. Applications for credit must be made through the Admissions Office.

Credit may be earned by taking general examinations or select subject examinations through the College Level Examination Program (CLEP). CLEP examinations taken at another institution are subject to reevaluation prior to awarding credit at USU. For further information about taking CLEP examinations, contact Testing Services, University Inn 115, (435) 797-1004. Questions about CLEP credit acceptance should be directed to University Advising and Transfer Services, Student Center 304, (435) 797-3373.

Students may earn credit by taking Advanced Placement (AP) Examinations while they are in high school. Prior to the awarding of credit, AP examination scores are subject to evaluation by Utah State University, to ensure credit is granted in accordance with USU policies.

For further information about transfer credit evaluation and articulation, visit the Transfer Student Services website at: http://www.usu.edu/ats/transfer/
Transfer Articulation Agreements

Students who transfer to Utah State University from one of the institutions listed below will have their coursework evaluated as follows:

1. Students who transfer to USU and have an Associate of Arts or an Associate of Science degree (or have completed the General Education requirements of one of the institutions listed below) will be deemed as having satisfied certain requirements, depending on their initial enrollment date at USU. Those who began attending USU prior to Fall 2000 are deemed as having satisfied all University Studies requirements. Those who began attending USU Fall 2000 and later will be deemed as having satisfied the General Education portion of the University Studies requirements, and will be required to complete the Depth Education requirements at USU.

A student who transfers without an Associate of Arts or Associate of Science degree will need a registrar’s certification stating that he or she has completed the General Education requirements at the sending institution.

2. Students who transfer to Utah State University with less than an Associate Degree (and have not completed General Education requirements) or with an Associate of Applied Science Degree will have their General Education courses evaluated on a course-by-course basis and may be required to take any additional courses necessary to satisfy the General Education requirements at Utah State University. However, if these students have taken equivalent General Education courses at the sending institution, these courses will be accepted toward satisfying General Education requirements at Utah State University.

Courses approved as fulfilling General Education requirements at a Utah System of Higher Education (USHE) institution will be acceptable to Utah State University as satisfying comparable General Education requirements. Coursework acceptability at other institutions will be determined by the student’s major department at Utah State University.

3. Coursework taken to fulfill requirements other than General Education will be reviewed by the appropriate department within Utah State University. Coursework acceptability will be determined by the student’s major department at Utah State University.

4. Utah State University will require students to satisfy the Breadth American Institutions requirement, if an equivalent course has not been completed. While the University generally accepts completed associate degrees as fulfillment of the General Education portion of the University Studies Requirements at USU, advisors are required to review the associate degree for certain general education categories, such as life sciences, physical sciences, etc. If the transcript from the transfer school does not have the required areas covered to meet USU standards, students will be asked to take a class at USU to complete these areas.

Students who transfer from an institution that is not listed above will have their General Education coursework evaluated by the student's major department at Utah State University.

For an institution to be considered for inclusion in the above articulation agreements, the institution's General Education requirements must be reviewed and approved by both the USU General Education Subcommittee and the Educational Policies Committee. Institution representatives should submit their requests, along with a copy of their institution's catalog, to: John Mortensen, Director, University Advising and Transfer Services, Utah State University, 0114 Old Main Hill, Logan UT 84322-0114.

Utah State University maintains annual course-by-course articulation agreements with the following institutions:

Boise State University
Brigham Young University
Brigham Young University (Hawaii)
Brigham Young University (Idaho)
College of Eastern Utah
College of Southern Idaho
Dixie State College of Utah
Idaho State University
LDS Business College
Salt Lake Community College
Snow College
Southern Utah University
University of Utah
Utah Valley State College
Weber State University
Western Wyoming Community College
Westminster College
Transfer Articulation Agreements

These course-by-course agreements show how courses taken at these institutions will be accepted and applied at Utah State University.

In addition to the course-by-course articulations, Utah State maintains general education articulation agreements with the same institutions as listed above. These agreements show how individual courses taken at these institutions will meet Utah State’s University Studies requirements.

These articulation agreements, as well as additional information about transferring to Utah State University, can be found at the Transfer Student Services website: http://www.usu.edu/ats/transfer/

*While the University generally accepts completed associate degrees as fulfillment of the General Education portion of the University Studies Requirements at USU, advisors are required to review the associate degree for certain general education categories, such as life sciences, physical sciences, etc. If the transcript from the transfer school does not have the required areas covered to meet USU standards, students will be asked to take a class at USU to complete these areas.*
Academic Resource Center

Student Center 305, (435) 797-1128
http://www.usu.edu/arc

The Academic Resource Center (ARC) provides services and programs that enhance students’ learning skills, strategies, and attitudes. Classes such as USU 1010, PSY 1730, PSY 1750, and SPED 0100 actively orient students to campus and involve them in gaining college-level academic skills. “Drop-in” math and statistics tutoring, as well as the Supplemental Instruction (SI) program, provide additional academic support. Individual consultations assist students with gaining course-specific learning strategies. The National Student Exchange promotes studying for one or two semesters at other U.S. colleges for cultural and academic diversity.

Admissions

Student Center 102, (435) 797-1129, or (800) 488-8108
http://www.usu.edu/admissions

The Admissions Office acts as a liaison between the University and high schools and community colleges. It functions as the first point of contact between the University and the public schools and is involved in personal visits to schools and institutions. Personnel in this office are glad to answer questions about the University, conduct tours, assist with arrangements, and help students make application for scholarships and admissions.

Advising and Transfer Services, University

Student Center 304, (435) 797-3373
http://www.usu.edu/ats

University Advising and Transfer Services (UATS) provides advising referrals and information regarding University requirements, academic policies and procedures, academic program planning, University Studies requirements, transfer articulation agreements, services, and resources of the University. UATS also facilitates the new Student Orientation, Advising, and Registration (SOAR) program; the Peer Advising program; Graduation Guarantee program; Intent to Transfer program; and transfer articulation agreements. Students who are designated as Undeclared, Undeclared Business, Undeclared Science, or General Studies are advised by UATS advisors.

Bookstore

Student Center 123, (435) 797-1666
http://www.bookstore.usu.edu

The USU Bookstore’s primary objective is to support students. The Bookstore’s focus centers on providing students with easy and timely access to textbooks, reference books, trade books, and other educational materials. In addition, there is a Gifts and Clothing Department which carries Aggie-related items, and a Supplies and Electronics Department.

Special services include: Express-A-Book (mail order), custom publishing (copyright clearance and production of course readers), accounts for scholarship and rehabilitation students, special orders on merchandise, textbook buyback, and scholarships.

Textbooks and merchandise can also be purchased at the Bookstore’s secure website.

Campus Recreation

Health, Physical Education and Recreation 126, (435) 797-7529
http://www.usu.edu/camprec

Campus Recreation houses and advises six major recreation and conservation programs: Intramurals, Outdoor Recreation Center, Utah Conservation Corps, Informal Recreation, Club Sports, and Recreation Instruction Program. These programs are run by professionals, students and volunteers. Campus Recreation sponsors numerous events, activities, and volunteer service projects throughout the year, including the following:

Intramurals
Intramural sports include basketball, racquetball, table tennis, badminton, soccer, volleyball, softball, and many more. The rejuvenation resulting from participating in intramurals is a crucial part of the college experience.

Outdoor Recreation Center (ORC)
The ORC is one of the nation’s premier University outdoor education and leadership programs serving students and the public through diverse educational programs and comprehensive rental services. The ORC provides rigorous experiential learning experiences fostering independent problem solving, leadership, and communication skills. It also promotes academic excellence, physical and personal development, and responsible involvement and service in the outdoors.

Utah Conservation Corps (UCC)
The UCC is dedicated to improving the quality of public natural resources and the community through partnership projects, community service-learning volunteer efforts, disaster relief, and environmental outreach education.

Informal Recreation
The HPER and Fieldhouse facilities, including pools, weight rooms, track, and fitness center, are areas where participants can engage in self-directed exercise.

Club Sports
Club sports are for students who wish to play in a competitive team environment at a high level. Some clubs are well-established and require tryouts. There are 16 club sports to choose from, including (but not limited to) ballroom dance, soccer, ultimate frisbee, rodeo, and lacrosse.

Recreation Instruction Program (RIP)
The RIP program offers various instructional programs fostering awareness of different cultures and their lifestyles. A few examples of Campus Recreation’s classes are yoga, aikido, and karate.

Card Office/Customer Service Center

USU ID Cards, Debit and Dining Accounts, Information, and Ticket Sales
Student Center 212, (435) 797-3852
http://www.usu.edu/usucard

The Card Office/Customer Service Center is the location where students receive their USU ID Card. The USU ID Card allows students access to many campus resources and events. In addition, it can be used for debit and dining accounts.
Career Employment

Career Services is the link between students and successful career employment. A dedicated group of professionals is ready to help by offering expertise in four broad areas related to career paths. These four areas are briefly outlined below.

Career Exploration
A variety of exploratory activities and assessments are available to help students develop self-awareness in selecting a major and focusing on career choices suiting their needs, interests, and abilities. PSY 1220 (3 credits), a Career and Life Planning course, is taught to help students more fully explore career options.

Co-op/Internships
Students who participate in this program can graduate with the experience employers are looking for. Students can receive pay and academic credit for one or more relevant work experiences in their field of study.

Career Employment
From on-campus recruiting to fairs, expos, and forums, a wide variety of services are offered to assist students in obtaining employment upon graduation. Students can meet their career advisor one-on-one to discuss resume/cover letter preparation, networking contacts (both employer and alumni), and personal career search strategies.

Testing
Undergraduates and graduates may want to take advantage of tests, such as the American College Test (ACT), the College Level Examination Program (CLEP) tests, the Test of English as a Foreign Language (TOEFL), the Graduate Record Examination (GRE), the Law School Admission Test (LSAT), the Medical College Admission Test (MCAT), and the Graduate Management Admission Test (GMAT). Test times can be scheduled directly by calling (435) 797-1004.

Children's House
862 East 900 North, (435) 797-3657
http://www.childrenshouse.usu.edu

Student parents attending the University may enroll their children at the Children’s House, an accredited quality early care and education program. Preschool and kindergarten age children (3-6 years) may be enrolled during fall and spring semesters, and children preschool through second grade (3-8 years) may be enrolled during summer semester. Professional staff provide a healthy, safe, and nurturing learning environment for children by promoting their physical, social, emotional, and intellectual development. There are several flexible full-day and part-day enrollment options from which parents can choose, as space is available.

Computer and Information Literacy (CIL)

Eccles Science Learning Center 131, (435) 797-2405
http://cil.usu.edu

As part of the University Studies Requirements, all students receiving a bachelor’s degree from USU must score 70 percent or higher on each of the following six computer and information literacy examinations: (1) Information Law and Ethics, (2) Information Resources, (3) Document Processing, (4) Operating Systems, (5) Spreadsheets, and (6) Electronic Presentations.

There is a $30 fee associated with this exam. Once the fee is paid, there is no limit to the number of times a student can take each test. Once a test is passed, a student may not retake that test. After all tests are passed, students must go to the CIL web page, select Recording on Transcript, and then complete and submit the form. The CIL information will then be posted to their transcripts.

Counseling Center

Student Center 306, (435) 797-1012
http://www.usu.edu/counsel

The Counseling Center assists students with personal growth and adjustment, mental health concerns, relationship issues, problem-solving, and career/academic adjustment. Services include individual, couples/relationship, and group therapy; outreach programs; problem-solving consultations; and psycho-educational assessments.

Common problems for which students may seek help include: symptoms of depression and anxiety, adjustment challenges, stress, eating and body image concerns, problems managing emotional reactions, social/interpersonal conflicts, trauma/grief, behavioral addictions, identity issues, and loneliness. Services are confidential and free for students enrolled in 6 or more credits on campus. (There is a nominal fee for psycho-educational assessment.)

For an appointment, call (435) 797-1012 or come to Student Center 306.

Disability Resource Center

University Inn 101, (435) 797-2444 or (800) 259-2966 Voice or (435) 797-0740 TTY
http://www.usu.edu/drc

The Disability Resource Center offers support, facilities, and services needed to ensure that students with disabilities can obtain an education at the University. A student needing an interpreter, reader, note-taker, or other services should contact this office. Assistance is also provided in counseling, registering, equipment acquisition, assistive technology lab, and referral information.

Financial Aid

Student Center 106, (435) 797-0173
http://www.usu.edu/finaid

The Financial Aid Office provides direction and counseling in the areas of scholarships, grants, loans (emergency and long-term), federal work aid (work-study), and general on-campus and off-campus temporary employment assistance. Help is available in preparing and submitting applications and supporting materials, and counseling students about
Living on campus gives students the opportunity to make the most of their collegiate experience. Studies show that those students who live on campus perform better academically, stay in school longer, and are more satisfied with their overall college experience. A well-rounded living/learning environment can have a significant influence on student education, and Utah State University Housing and Residence Life wants to help students succeed. Students may choose from traditional-style, apartment-style, and family-style living accommodations.

**Independent and Distance Education**

Eccles Conference Center 102, (435) 797-2137  
http://extension.usu.edu/continuinged

Independent and Distance Education offers University and Independent Study credits that are transferrable to many other institutions and are accepted in degree programs at Utah State University and throughout the world.

**International Students and Scholars**

Student Center 313, (435) 797-1124  
http://www.oiss.usu.edu/

The Office of International Students and Scholars (OISS) is committed to providing the necessary tools for students to succeed, both academically and personally. It provides the support to enhance the academic, social, and personal interactions of international students and scholars while at USU and in the Logan community. It serves as the primary link between the students and local and government agencies. The OISS staff is eager to assist with advising on immigration and other matters, such as personal and social adjustments. A main goal is to create a warm and inclusive environment in which all students can learn and interact in a cross-cultural environment. Throughout the year, OISS and the International Student Council (ISC) offer cultural and educational programs to enhance intercultural competencies and communication skills.

**Multicultural Student Services**

Student Center 309, (435) 797-1733  
http://multiculture.usu.edu

Multicultural Student Services contributes to the mission of the University and Student Services by advancing and encouraging the intellectual, personal, cultural, and professional development of Native-American, African-American, Asian-American, Oceanic, and Latino student populations. Student development is promoted by integrating experiences into the student’s total learning environment in the classroom and community that foster, in each individual, respect and responsibility for self and other members of the world around them.

Multicultural Student Services provides direction and leadership for Utah State University’s commitment to cultural diversity. This mission is carried out through programs of instruction, advisement, community service-learning, outreach, experiential education, cultural events, administration, and student support services.
Student Resources

Network and Computing Services
Science Engineering Research 301, (435) 797-2391
http://www.usu.edu/comperv

Network and Computing Services (NCS) provides computing and networking facilities and services for instructional, research, and administrative functions. A current description of these facilities and the access procedures for students and staff may be found on the NCS website.

The Help Desk is managed by NCS. This service is available from 7 a.m. to 8 p.m. by phone at (435) 797-4358 or by e-mail at helpdesk@cc.usu.edu, and from 8 a.m. to 5 p.m. for walk-in at Science Engineering Research 108 by students and staff. Online services and FAQs may be found on the web at: http://helpdesk.usu.edu

NCS coordinates Student Open Access labs and manages six of them. More than 800 computers are available for use by USU students upon presentation of their USU ID card. Lab locations, hours of operation, and lists of software and equipment available at each lab are described on the web at: http://www.sls.usu.edu

Parking and Transportation Services
840 East 1250 North, (435) 797-3414
http://www.usu.edu/parking

Students who are unfamiliar with the campus should contact this office for directions and parking instructions. Also available are faculty, staff, student, and visitor parking permits. This office also provides shuttle services from key perimeter parking areas to key central campus locations.

Records Office
(Office of the Registrar)
Student Center 246
http://www.usu.edu/registrar/records

This office processes and maintains student academic records. Students needing transcripts of academic records or needing to make changes to academic records should contact this office at: registrar@cc.usu.edu

Reentry Student Center
Student Center 315, (435) 797-1728
http://www.usu.edu/stuserv/womencen

The Reentry Student Center provides information, assistance, and referral concerning the resources available on campus and in the community to women and men who are returning to school after a gap in their education. The center serves as an informal gathering place for reentry students and facilitates their transition to university life through orientations, workshops, leadership opportunities, scholarships, and programs.

Registration Office
Student Center 246, (435) 797-1094
http://www.usu.edu/registrar/registration

This office prepares all registration materials and conducts registration.

Residency Office
(Admissions Office)
Student Center 102, (435) 797-8144
http://www.usu.edu/admissions/information/residency.cfm

Nonresident students who feel they have met the requirements for in-state resident status must file an official residency application with the Residency Office no later than 10 calendar days from the first class day. Those missing the application deadline will have residency considered for the next semester, provided that the next appropriate deadline is met with adequate updated documentation.

If an application is denied by the Residency Officer, the student may appeal to the Residency Appeals Committee no later than the 14th calendar day of the semester. Appeals cannot be considered after this deadline.

Information on residency requirements can be obtained from this office.

Sexual Assault and Anti-Violence Information (SAAVI)
Student Health and Wellness Center 119
(435) 797-1510 (General Information)
(435) 797-RAPE (7273) (Crisis Hotline)
http://studentlife.tsc.usu.edu/saavi/

The Sexual Assault and Anti-Violence Information (SAAVI) Office was created to promote an atmosphere of sexual and physical safety for all female and male students, faculty, and staff at Utah State University. It works to accomplish this task through an environment of education, as well as sensitive, competent response to those who have experienced violence.

SAAVI provides crisis help (i.e., support; assistance obtaining medical, counseling, academic, and legal aid in the aftermath of sexual assault or dating/domestic violence; etc); education (e.g., presentations to groups, clubs, classes, etc); and awareness events (e.g., Red Zone Week, Domestic Violence Awareness Month/ Clothesline, Sexual Assault Awareness Month, etc). SAAVI services are available to USU students, faculty, and staff; both women and men; both primary survivors (those who experience violence) and secondary survivors (friends/loved ones of those who experience violence).

The SAAVI Office is located in the Student Health and Wellness Center (north of Romney Football Stadium). For help, general information, questions, or to request a presentation, call (435) 797-1510. The SAAVI Office also maintains a crisis hotline: (435) 797-RAPE (7273) (available 24 hours per day, 7 days per week, 365 days per year). During nights, weekends, and holidays, the crisis line is answered by CAPSA (Community Abuse Prevention Services Agency), which is a SAAVI community partner.

Student Employment
(Financial Aid Office)
Student Center 106, (435) 797-0184
http://www.usu.edu/studemp

The Student Employment Office develops and posts on-campus part-time and off-campus full-time and part-time openings daily on the Job Board in the hallway outside the Financial Aid Office in the Taggart Student Center, as well as online at the address listed above. Summer
openings representing camps, resorts, ranches, government, and private industry across the United States are featured from January through May on display boards at the entrance to the Financial Aid Office. Additional information and assistance may be obtained at the Student Employment counter in the Financial Aid Office.

**Student Health and Wellness Center**

850 East 1200 North, (435) 797-1660
http://www.usu.edu/shshome

The Student Health and Wellness Center provides students and their families with care for illness and minor injuries, as well as health and wellness information for a variety of concerns. Help and information on topics such as depression, nutrition, time and stress management, healthy relationships, and prevention of sexual assault and date rape, as well as assessment, education, and referral for substance abuse, are available from a variety of specialists on the staff.

The services of physicians, nurses, and pharmacists, as well as laboratory, physical therapy, psychology, radiology, prevention, and dietitian services, are available on-site. General medical care and specialty care in sports medicine, emergencies, dermatology, gynecology, and psychiatry are provided through the center. Special services include physical exams for pilots, teachers, or missionaries, and x-ray and laboratory services are available. Peer educators, as well as office staff, are available to answer questions and provide support or information on health-related topics. Students gain leadership skills while involved in peer educator teams offering prevention activities and promoting healthy lifestyles. Prevention programs, research surveys, and educational classes are also available through this office. Educational presentations on health-related topics, which are excellent supplements to academic course material, can be scheduled by faculty members for inclusion in their classes.

Most of the costs for services of the Student Health and Wellness Center are covered by the Student Health Fee (paid at the time the student registers), or by a spouse/family member fee (paid during the first visit), but some procedures and classes may require a nominal fee. Although the Student Health and Wellness Center provides administrative oversight of the Student Health Insurance Plan, health insurance is not required to use the Student Health and Wellness Center.

**Student Involvement and Leadership Center**

Student Center 326, (435) 797-2912
http://a-station.usu.edu

The Student Involvement and Leadership Center strives to provide opportunities for students to receive life, leadership, and interpersonal skills by sponsoring events and activities that complement the academic curriculum and enhance the overall educational experience through the development of a wide range of programs, services, leadership development opportunities, and activities. These events strive to promote diversity, cultural appreciation, social interaction, community service, a sense of community, and effective student government representation.

The Student Involvement and Leadership Center includes the following: student government (ASUSU), fraternities and sororities, Leadership House, Fall Leadership, Mortar Board, Spirit Squad, and the Val R. Christensen Service Center.

Students who are interested in getting involved should visit the A-Station or go to Student Center 326.

**Student Support Services**

University Inn 103, (435) 797-3372
http://www.usu.edu/sss

Students meeting the low-income criteria established by the U.S. Commission of Higher Education and/or first-generation college students or disabled students may receive special assistance through the Student Support Services Office.

This office seeks to prepare and support students for the challenges of higher education by offering assistance in academic advising and guidance, tutoring on an individual basis, course selection, faculty/peer mentoring, reading and study skills enrichment, math instruction, financial aid planning, and early registration.

For more information, contact the Student Support Services Office.

**Testing Services**

(Career Services)
University Inn 115, ground level, (435) 797-1004
http://www.usu.edu/career/testing.html

Information and test times are available for academic admission tests, including the GED (a high school equivalency exam), the ACT for undergraduate admission, the GRE and MAT for graduate admission, the GMAT for business school, the LSAT for law school, the MCAT for medical school, and the TOEFL (Test of English as a Foreign Language, for international students entering at both graduate and undergraduate levels). Math placement tests are available for immediate placement into math classes. CLEP exams, which give students the chance to earn semester credits toward their University Studies requirements by exam, are offered. Test information and booklets are also available.

**Undeclared Program**

(Career Services)
University Advising and Transfer Services
Student Center 304, (435) 797-3373
http://www.usu.edu/ats/

The chief function of the Undeclared program is the advisement of students who have not yet decided upon a major or area of specialization. Students in the Undeclared program typically work on their University Studies requirements while exploring major options. This allows them to make progress toward overall degree requirements and provides them with extra time to make wise, informed decisions. Undeclared students are advised in the Office of University Advising and Transfer Services (UATS) until they choose a major.

Students who are enrolled in another department, but feel they have chosen their major wisely, may transfer to the Undeclared program upon receiving permission from an advisor in UATS.
No degree is offered through the Undeclared program. Most Undeclared students are freshmen or sophomores. Prior to the junior year, students should select a major and be taking major courses. Students should not remain in the Undeclared program beyond 60 credits or past the end of the sophomore year.

The Utah Statesman
Student Center 105, (435) 797-6397
http://www.utahstatesman.com

The Utah Statesman, USU’s student newspaper, is published three times each week. A large number of students are involved in producing this award-winning publication, which began publication more than a century ago.

Val R. Christensen Service Center
Student Center 332B, (435) 797-SERV (7378)
http://servicecenter.usu.edu/
vals@cc.usu.edu

The Val R. Christensen Service Center is a place where students can find opportunities to serve and can develop leadership skills. With more than 20 volunteer programs, students are bound to find service opportunities matching their desires and abilities. Mentoring, tutoring, environmental, and leadership programs are available. Time commitments range from one hour per month to three hours per week. The mission of the Service Center is to prepare students to make lifelong contributions through service; provide students with opportunities to serve; and promote positive attitudes, personal growth, and change through service to the community and the environment.

The Service-Learning Scholars Certificate Program provides an opportunity for students to combine service with their academic experiences. To learn more about how to receive academic credit through service experiences and how to receive this certificate upon graduation, students should visit the Service Center.

Veterans Services
(Office of the Registrar)
Student Center 246, (435) 797-1102

The Office of Veterans Services assists eligible veterans, qualified dependents of disabled veterans, and National Guard and Reservists in pursuing their educational, professional, or vocational objectives and receiving their appropriate educational benefits.

Women’s Center for Lifelong Learning
Student Center 315, (435) 797-1728
http://www.usu.edu/stuserv/womencen

The Women’s Center provides information, assistance, and referral concerning resources available on campus and in the community for personal, educational, and professional development of students (especially women and returning students), faculty, and staff. Programs and activities support greater understanding of gender-based issues, encourage an inclusive and equitable environment, and promote women’s leadership experiences.

Writing Center
Ray B. West 104, (435) 797-2712
http://writingcenter.usu.edu

The Writing Center provides help at any stage of the writing process and is open to all students. English course fees fund the Writing Center, so students in other disciplines are required to pay a small users fee before making an appointment. Please visit or call the Writing Center for more information on user fees. All appointments must be made online by going to the website listed above. Consultants are available for one-on-one counseling in the center or for online sessions. The Writing Center opens the second week of each semester and closes the last day of classes. Hours are from 9:30 a.m. to 3:30 p.m. Monday through Friday, and from 7:00 to 8:00 p.m. Monday through Thursday.
Academic Support Programs and Services

Academic Resource Center

The Academic Resource Center (ARC) provides services and programs that enhance students' learning skills, strategies, and attitudes. Classes such as USU 1010, PSY 1730, PSY 1750, and SPED 0100 actively orient students to campus and involve them in gaining college-level academic skills. “Drop-in” math and statistics tutoring, as well as Supplemental Instruction (SI) program, provide additional academic support. Individual consultations assist students with gaining course-specific learning strategies. The National Student Exchange promotes studying for one or two semesters at other U.S. colleges for cultural and academic diversity.

Courses

USU 1010, University Connections (1-3 credits), introduces students to the expectations and challenges of university life, as well as to the academic, geographic, social/communal, and procedural maps of the University. Connections also focuses on some of the learning strategies students will need to successfully achieve their goals at the University. The course explores issues which students commonly encounter during their transition from high school to university life, in an atmosphere encouraging the development of enduring connections with University faculty, staff, and students. The curriculum requires students to participate in a common literature experience. Before the semester begins, students receive information about the literature experience.

PSY 1730, Strategies for Academic Success (1-3 credits), involves application of important learning strategies. Topics include test preparation, note-taking, textbook reading, test-taking, etc.

PSY 1750, Comprehension Strategies for College Reading (1 credit), is designed for students who want to improve their college reading skills in the areas of comprehension, vocabulary, and retention of information. Students practice the reading strategies using textbooks from their other classes.

MHR 2160, Student Applied Leadership Training (1-3 credits), is designed to develop the skills of students working as tutors. This class meets the standards of the National Tutoring Certification Program.

SPED 0100, Strategies for Reading (1-3 credits), is a practical course with an emphasis on improvement of reading, writing, and comprehension skills that are essential for academic success. This is a remedial class not carrying USU or transfer credit.

Individual Assistance

Staff members provide individual consultation for students needing help with specific learning needs in one or more of their courses.

Workshops

Workshops are offered on a variety of learning topics for student groups and classes. To arrange for a workshop, call (435) 797-1128.

Supplemental Instruction

A program of Supplemental Instruction (SI) for General Education courses is sponsored by the center. A student who has successfully completed a General Education course is hired by the center to attend all class sessions and conduct review sessions. This student models effective study strategies for academic achievement in that class. SI classes and schedules are published each semester on the web: http://www.usu.edu/arc

Tutoring Programs

Drop-In Math and Statistics Tutoring
Free tutoring is provided by trained tutors at the center and other campus sites. Schedules can be picked up in Student Center 305 each semester or can be found on the Web-based Tutor Directory.

Tutor Advertiser
Students can hire a qualified tutor through the web-based Tutor Advertiser. These tutors are screened by the center and must be paid by the student receiving the tutoring.

Tutor Directory
The center publishes a directory of all on-campus free tutoring. The directory is available in Student Center 305 and through the center’s web page: http://www.usu.edu/arc

Idea Sheets

Free Idea Sheets on a variety of learning strategies are available in the center and through the center’s web page: http://www.usu.edu/arc

National Student Exchange

National Student Exchange (NSE), a group of more than 180 colleges and universities in the United States, is designed to: (1) provide students with options for educational travel and study at minimal increased cost, (2) provide educational opportunities in academic studies not available at USU, and (3) create an awareness of and appreciation for diverse ideas and value systems.

Students normally participate in NSE during their sophomore or junior year. For further information, contact the Academic Resource Center, Student Center 305, (435) 797-1132.

Video Viewing Library

The center has a collection of videos, which students may view in the center, relating to effective learning strategies.

Referral Resources

The center provides students with referral information for a variety of on-campus and off-campus services and agencies.

For more information, contact the Academic Resource Center, Student Center 305, (435) 797-1128.
Academic Support Programs and Services

Cooperative Education Internship Program

The Cooperative Education Internship Program offers both undergraduate and graduate students a unique opportunity to integrate career, social, and personal development into the educational process. The program is designed to allow students to alternate classroom study with a series of paid preprofessional work experiences related to their field of study. These experiences increase in complexity as the student’s background in a given field increases.

The program offers several specific benefits to students. It provides those students who have decided on an academic major an opportunity to obtain pregraduation work experience in their chosen career. The program provides those students who are unsure of their academic major an opportunity to explore several career possibilities. It provides them a chance to earn money for their education and credit toward their degree. Finally, it substantially improves the students’ opportunities for employment after graduation.

The Cooperative Education Internship Program option is available in all departments on the Utah State University campus. Generally speaking, students begin their work experiences in their sophomore or junior year, although seniors can take advantage of program benefits. Students can undertake either part- or full-time work experiences. Work experiences are available both during the academic year and during the summer. These work experiences may be with a single employer or with different employers; increasing complexity is the critical principle. Salaries vary with the field of work and the complexity of the job.

The amount of academic credit awarded for a given work experience varies, and depends upon the amount of work completed and upon the career-related nature of the experience. The decision regarding credit and the amount to be granted rests with the academic department, and specifically the faculty co-op coordinators. Students must make the credit arrangement with their faculty co-op coordinators prior to their work experience.

Students interested in entering or learning more about the program should contact their academic department; or visit Career Services, located in University Inn 102, ground level, tel. (435) 797-7777. Additional information can also be found online at: http://www.usu.edu/career/coopinfo.html

Cultural Exchange Program

More than 1,100 students and scholars from 83 countries are currently enrolled at Utah State University. Many of these students are in great demand by the community to visit various school, church, and civic functions. Students often bring from their countries videos, slides, photographs, artifacts, maps, music, and costumes which they share with the community. Other students are requested by various organizations to display their talents in song, dance, cooking, fashion shows, martial arts, and many other crafts and skills.

These outreach programs benefit the community, enhance the University, and also provide excellent opportunities for USU international students to learn how the community operates. It also gives internationals the occasion to develop friendships with Americans. The sometimes long-lasting and far-reaching friendships are valuable to developing peace and friendship across the globe. Also, these students further develop their talents and skills in communication and become familiar and comfortable with the American culture.

Those needing help in arranging programs with international students may call the Office of International Students and Scholars at (435) 797-1124.

Disability Resource Center

The mission of the Disability Resource Center is to provide supportive services to qualified individuals with disabilities, so they may participate equally in academic, employment, social, and cultural opportunities available at Utah State University.

Services offered by the Disability Resource Center include:
1. Campus orientation, architectural access, and modification.
2. Registration assistance, including interpreters, advisors, and escorts.
3. Equipment loan and Assistive Technology Laboratory, including FM amplification systems, tape recorders, aids for students with vision impairments, and adapted computer hardware and software.
4. Referral information regarding campus and community services, including a referral registry for nonacademic interpreters, readers, personal care attendants, and escorts.
5. Alternate-format textbooks and class materials for qualifying students.
6. Counseling for academic and personal needs.
7. Support service coordination with the Division of Vocational Rehabilitation.

The Disability Resource Center is located in University Inn 101 and can be reached by telephone by calling (435) 797-2444 or (800) 259-2966 (voice) or (435) 797-0740 (TTY).

General Studies Program

General Studies is the administrative-academic unit maintained at USU for the enrollment of students who do not meet the admissions requirements of the seven academic colleges. By state policy, admission of students to this category is limited. Students enrolled in the General Studies Program are assessed a fee of $45 per semester.

The primary function of the program is to assist and encourage students in the improvement of their academic status, so they may transfer to the major of their choice. To accomplish this purpose, participants are urged to limit their course loads each semester, satisfy remedial requirements when indicated, and meet frequently with an advisor. Students in General Studies are encouraged to take General Education and exploratory classes. Resources in the Academic Resource Center, the University Counseling Center, the Testing Center, and Career Services are available to assist such students with career, aptitude, life skills, and study skills counseling.

The Low Scholarship and Probation Policies of the University apply to students enrolled in General Studies. When a student has satisfied remedial course requirements and has demonstrated ability to maintain a 2.0 GPA, that student may apply for admission to an academic college and department or to the Undeclared Program. Regular college admissions evaluations procedures will then be followed, and if there are no admissions restrictions, the student will be enrolled in the department of his or her choice.
Academic Support Programs and Services

For more information, contact University Advising and Transfer Services, Student Center 304, (435) 797-3373.

Study Abroad Program

Overview

The USU Study Abroad Office provides information on a wide range of affordable programs providing USU students with opportunities for study throughout the world. Through exchange partner institutions or consortiums, students can study at more than 100 universities in more than 40 countries worldwide during a semester, academic year, or summer program. Exchange program costs are based on tuition and fees at USU. Students can earn credit toward their degree at USU while studying abroad. In many countries, even when the native language is not English, students can study in English, or have the opportunity to build language skills. Full immersion options are also available at selected sites, based on student language ability.

Exchange Programs

Students can study in Spanish or the Spanish language at all levels at ITESM University in Mexico. Regular semester coursework is also offered in Spanish at the University of Costa Rica. Another Spanish study opportunity is located at the University de la Rioja, in beautiful Logroño in northern Spain, and the newest opportunity is at Pontificia Universidad Católica de Valparaíso, in Valparaíso, Chile. Pontificia Universidad Católica in Rio de Janeiro, Brazil offers students the opportunity to study regular coursework in Portuguese or study the language. London Metropolitan University offers a wide variety of subjects, with students housed near historic Hyde Park. In addition, students can study at Leicester University in Leicester, England, as well as at University College Northampton in Northampton, England, both located just over an hour north of London. Other study abroad programs in English include: study in landscape architecture at University of Ljubljana, Slovenia; American studies at Innsbruck University in Austria; and study in fine arts at Southern Cross University, Australia. At Kansai Gaidai, Kobe, Gifu, and Yokohama National universities in Japan, all levels of Japanese are taught. Students may also earn credits in subjects taught in English at Kansai Gaidai or Yokohama. Keimyung University in Korea, as well as USU’s two new prestigious partners, Korea and Sungkyunkwan Universities in Seoul, provide classes taught in English and intensive Korean. Students may study the Thai language, as well as economics, business, and Thai studies courses taught in English, at Thammasat University in Bangkok, Thailand. College of Business students may participate in programs in Australia, Italy, the Netherlands, Sweden, and the United Kingdom. For graduate-level study in economics, exchanges are available in the United Kingdom, Spain, Portugal, Greece, France, or Germany. Students can now study Russian language and culture at St. Petersburg State University and Kazan State University in Russia.

The International Student Exchange Program (ISEP) is one of the most varied study abroad exchange consortium opportunities at USU. Through ISEP, students may study in Africa, Asia, Australia, Canada, Europe, Latin America, or Oceania. ISEP offers traditional European study abroad opportunities at some of the leading institutions in Austria, France, Germany, Hungary, Sweden, Finland, the Netherlands, and the United Kingdom. Other opportunities for study include such countries as Bulgaria, the Czech Republic, Latvia, Fiji, Iceland, Ghana, and South Africa. There are more than 100 universities to choose from in all. At many of these sites, coursework taught in English is available for semester, academic year, and summer placements. As ISEP participants, students matriculate directly into a host institution abroad. Direct matriculation means students register as regular students at their host institution, take the same courses, have the same assignments, and participate in the same activities as all other students at that institution.

Affiliated Programs

Further expansion of short-term or semester-long study opportunities is possible with the addition of the following affiliated program providers: AustraLearn, Council (CIEE), International Studies Abroad, Denmark’s International Studies Program, Middlesex University (England), and Study Abroad Italy.

Summer Programs

Students can participate in summer programs at Cambridge University and University of Northampton in England, and through ISEP in Korea, Thailand, the Netherlands, France, and other countries. These programs vary in length from two to six weeks.

USU Faculty-Led Study Abroad

Summer Programs

Faculty at USU take study abroad students to such destinations as Germany for art and drawing, Peru for an anthropology field school, and Switzerland for graphic design. New offerings include business Spanish and practicum in Argentina, business classes in English plus Spanish study in Chile, education in Mexico, and sculpture in Greece.

Summer language faculty-led programs include: a Spanish language and family home-stay program during May through June in Chile and/or Spain, French language and home-stay in Annecy, France, and an intensive German language program at the Goethe Institute in Freiburg, Germany.

For additional information about these and other programs, contact the Study Abroad Office, Student Center 313B, by phone at (435) 797-0601 or (435) 797-1253; or by e-mail at: stdyabrd@hass.usu.edu. Detailed information is available on the following website: http://www.usu.edu/stdyabrd

Student Support Services

Student Support Services is a special program financed through a federal grant and Utah State University with the purpose of providing additional support to students who meet particular qualifications. The Student Support Services Program seeks to prepare and support students for the challenges of higher education by offering assistance in:

1. academic advising and guidance,
2. tutoring on an individual basis,
3. course selection,
4. faculty/peer mentoring,
5. reading and study skills enrichment (PSY 1750, 1730),
6. math instruction (MATH 0900, 1010, 1050),
Academic Support Programs and Services

7. financial aid planning, and
8. early registration.

To qualify for these services, a student must be an American citizen or permanent resident of the United States, must be registered at Utah State University, must demonstrate academic need for services as defined by the institution, and must meet one of the following U.S. Department of Education criteria:

1. low income, as established by the U.S. Commission of Higher Education;
2. disabled, including physical disabilities and learning disabilities; or
3. first-generation college student, meaning that neither of the student's parents have graduated from a four-year institution of higher education.

For more information, contact Student Support Services, University Inn 103, (435) 797-3372.
Beta Gamma Sigma

Beta Gamma Sigma international honor society was founded in 1913 to recognize superior scholarship in business. It is the highest international recognition a business student anywhere in the world can receive. The USU chapter was established in 1975.

Membership is by invitation only and is limited to the top 20 percent of business graduate students, the top 10 percent of seniors with business majors, and the top 7 percent of juniors with business majors. Candidates must have completed one year of study at Utah State University.

Chapter Advisor: Stephanie Baldwin, Graduate Intern, Student Involvement and Leadership Center, Student Center 326, (435) 797-8222, stephanie.baldwin@usu.edu.

Golden Key International

Golden Key is an academic honor society which recognizes and encourages scholastic achievement and excellence among all juniors and seniors from all academic disciplines with a 3.5 or higher cumulative GPA. With more than 25 years of rich tradition, Golden Key remains committed to scholarship, career development, leadership and altruistic service.

Members are connected to exclusive career opportunities through Golden Key’s partnerships with major corporations and graduate programs. The society provides campus and community service opportunities enabling personal growth and leadership development, as well as collaborating with university faculty and administrators to develop and maintain high standards of education. A minimum of two scholarships are awarded annually to outstanding juniors and seniors at Utah State University.

Chapter Advisor: Amy Brazier, Ray B. West 201B, (435) 797-2734

Mortar Board

The Order of the Acorn chapter of Mortar Board has existed at USU since 1970. It was founded in 1918 as the first national organization honoring senior college women. Mortar Board opened its membership to men in 1975.

Mortar Board recognizes college seniors for distinguished abilities in scholarship, leadership, and service. Members continue to magnify these traits throughout membership by developing and carrying out activities, events, and service projects. New members are chosen during spring semester and must be in the top 35 percent of their class.

Chapter Advisor: Stephanie Baldwin, Graduate Intern, Student Involvement and Leadership Center, Student Center 326, (435) 797-8222, stephanie.baldwin@usu.edu.

National Society of Collegiate Scholars

The National Society of Collegiate Scholars is an honors organization founded on the principles of scholarship, leadership, and service. Each plays an important role in one’s personal development. Society members are encouraged to pursue each of these ideals with a sense of passion and dedication. The society’s mission is to:

1. Recognize and celebrate high achievement among first- and second-year college and university students across all academic disciplines.
2. Encourage and promote high standards throughout the collegiate experience.
3. Provide opportunities for personal growth and leadership development.
4. Organize and encourage community service.
5. Foster an overall appreciation for the value of higher education.

Chapter Advisor: William J. Popendorf, professor of Biology, Biology-Natural Resources 323, (435) 797-2566, popendorf@biology.usu.edu

Phi Alpha Theta

Phi Alpha Theta is a professional society whose purpose is to promote the study of history through the encouragement of research, good teaching, publication, and the exchange of learning and ideas among historians. It seeks to bring students, teachers, and writers of history together, both intellectually and socially; and it encourages and assists historical research and publication by its members in a variety of ways. The History Honor Society, Inc., Phi Alpha Theta, was organized at the University of Arkansas on March 17, 1921. Since that time, it has grown to more than 820 chapters and has initiated more than 275,000 members. The USU chapter was established in 1952.

Membership is open to those students who have completed 12 credits of history courses, with a 3.1 GPA in history coursework. A 3.0 overall GPA is required. Students need not be history majors to become Phi Alpha Theta members.

Chapter Advisor: Timothy S. Wolters, Assistant Professor of History, Main 323F, (435) 797-1295, twolters@hass.usu.edu.

Phi Kappa Phi

Phi Kappa Phi is a national honor society, founded in 1897 to recognize and encourage superior scholarship in all academic disciplines. Membership is based upon academic achievement and is proffered to undergraduate and graduate students who obtain a grade point average in the highest 10 percent of those graduating from each college at USU. The national organization awards 50 graduate school fellowships each year to students from throughout the country and sponsors undergraduates for internships and study abroad programs. Each year, the USU chapter also awards two to three scholarships to outstanding juniors and recognizes faculty members for their achievements.

Chapter Advisor: Mary E. Leavitt, secretary/treasurer, (director, College of HASS Advising Center), Student Center 302, (435) 797-3983.

Phi Sigma Iota

Phi Sigma Iota is an international foreign language honor society for juniors, seniors, and graduate students who excel in a foreign language, have a cumulative GPA of 3.0 or higher, and have earned a grade of B or better in a 3000- or 4000-level language course. Copies of transcript must be verified by the chapter advisor.
National Honor Societies with Chapters at USU

Phi Sigma Iota recognizes outstanding ability and high standards in the fields of foreign language, English as a second language, literature, and culture.

As the highest academic honor in the field of foreign languages, Phi Sigma Iota promotes international communication and understanding, as well as a sentiment of unity among nations. The society also helps students learn about themselves and their cultural heritage as they increase their understanding of other people.

Phi Sigma Iota stands for freedom of mind and democracy of learning. The society stimulates and supports scholarly programs nationwide, and also offers scholarships and graduation honors nationwide. To help members to further their training in foreign languages, the society promotes trips abroad. The USU chapter provides a job and internship list.

Chapter Advisor: Sarah Gordon, Assistant Professor of French, Main 204, (435) 797-8213, sgordon@cc.usu.edu.

Pinnacle

Pinnacle was founded at Murray State University in Kentucky in 1989 for the purpose of recognizing the achievements of adult and nontraditional students. The USU chapter was established that year, and the first members were inducted in 1990. Membership is open to no more than 15 percent of the junior and senior student population. Initiates must be 26 years of age or older, must have earned an overall USU GPA of 3.0 or higher, and must have been involved in campus and/or community activities. Applications are available at the Reentry Student Center.

Chapter Advisor: Janet L. Osborne, director, Women’s Center/Reentry Student Center, Student Center 315, (435) 797-1728.

Tau Sigma

Tau Sigma, founded at Auburn University in 1986, recognizes the academic achievement of students transferring to an institution of higher learning from another academic institution. This society encourages and promotes students’ involvement in the institution to which they are transferring. Membership is offered to undergraduate students who transfer to USU with the equivalent of at least one full year of academic credits (24 semester credits) from an institution of higher learning and who have at least a 3.5 cumulative grade point average during their first year at Utah State.

Chapter Advisor: Tracy L. Jones, Program Administrator for Articulation and Transfer Services, University Advising and Transfer Services, Student Center 304, (435) 797-3373, tracy.jones@usu.edu.
The football team has finished first or second in league play 12 times during its last 24 years of conference play. Three of the top five home attendance seasons have come in the last five years. With the entrance into the Western Athletic Conference, there are increased opportunities for post-season bowl games and added television exposure.

USU’s cross-country and track teams have been among the Big West’s best for a number of years, as the cross-country team has won four league titles and finished second seven times during the last 13 years. The track team has claimed seven Big West team championships during the last 11 years. During the inaugural fall season in the Western Athletics Conference, the men’s cross-country team won the league championship.

On the women’s side, USU has had success in a number of its sports. The gymnastics program has competed in the NCAA regionals during 24 of the last 27 years and has won four conference championships during the last 13 years.

The Aggie soccer team has made great strides every year since it started the program in 1996 and produced its best season in 2004. The team finished tied for second in the Western Athletics Conference during 2005.

The track teams continue to have success, as the women’s cross-country team was the Western Athletics Conference runner-up in 2005, while the track team won seven consecutive league titles beginning in 1993 in the Big West.

USU’s volleyball team advanced to consecutive NCAA tournaments in 2000 and 2001 and participated again in 2005.

USU reinstated its women’s basketball program ahead of the 2003-04 season. The program is quickly maturing into a competitive foe in the Western Athletics Conference.

Academically, Utah State is the leader of the Western Athletics Conference. USU’s graduation success rate is above those of the other Western Athletics Conference schools, and “academics first” is stressed in all USU programs.

USU has a strong history of athletic success. Among these successful athletes is Merlin Olsen, who won the Outland Trophy awarded to the nation’s top lineman in 1961. Olsen, who was selected into the NFL Hall of Fame, was also an academic All-American. Merlin’s brother, Phil, was also an athletic All-American at Utah State and had great success in the NFL.

USU has produced five Olympians and 27 All-Americans in track and field, including former world record holders L. Jay Silvester and Mark Enyeart. Jay Don Blake became USU’s first NCAA national champion in golf, winning the national title in 1980 and finishing second the following year.

Aggie basketball boasts the legacy of Wayne Estes, an All-American in the early 1960s before his untimely death prior to the conclusion of his senior season.

Three Aggie gymnasts have earned All-American honors and two others have represented their countries in the Olympics and World Championships. Seven different student-athletes have earned All-American honors in volleyball 12 times, and Elaine Roque and Karolyn Kirby have gone on to successful careers on the pro beach volleyball tour.
Intercollegiate Athletics

The softball team has produced four All-Americans, including three-time All-American Kelly Smith.

Facilities
Excellent training and competition facilities are provided in all sports.

E. L. “Dick” Romney Stadium, home of the Aggie football team for more than 30 years, seats 25,513. A state-of-the-art lighting system was installed prior to the 1993 season, and chair-back seating was added ahead of the 1997 season. The 1999 season saw expanded seating, two new scoreboards, and an improved sound system. A new synthetic turf was installed prior to the 2004 season, and a new end zone complex is planned to begin with the start of the 2007 football season. The multi-storied complex will include consolidated academic support, a new sports medicine area, new locker rooms, an equipment room, and a strength and conditioning room, as well as team meeting areas and coaches’ offices.

Basketball, gymnastics, and volleyball are played in the beautiful 10,270-seat Dee Glen Smith Spectrum. A $1.2 million scoreboard was installed prior to the 2002-03 academic year, and a new playing floor was installed during 2005. Basketball and volleyball practices are held in the Spectrum, while the HPER Building is the practice home for the gymnastics team.

The recently renovated gymnastics practice gym has been labeled as one of the nation’s finest, complete with vaulting pits and foam-spring exercise floor.

The $4.4 million Stan Laub Indoor Training Facility is one of the finest facilities in the nation. The building features a 95-yard football field that is regulation width and a vaulted ceiling that reaches 78 feet high. The building is perfect for off-season conditioning for all of Utah State’s sports.

The Nelson Fieldhouse is the home of the Aggie indoor track and field teams. The teams practice on a 200-meter tartan track. For the outdoor season, a recently resurfaced and renovated Ralph Maughan Stadium is the home for the men’s and women’s track teams.

The women’s softball team plays its home games at LaRee and LeGrand Johnson Field, an on-campus facility, for which a large scoreboard, new grass, and a new fence were added ahead of the 2004 season.

The women’s soccer team also has a new facility, the Chuck and Gloria Bell Soccer Field, which was built in 2003 and features a two-story press box.

The tennis teams play at the Sports Academy and Racquet Club, one of the finest indoor facilities in the West. The men’s golf team practices and plays at the Birch Creek Golf Course and at the Logan Golf and Country Club.

Scholarships
Utah State offers partial and full scholarships in each of its 16 sponsored sports. A student or prospective student desiring consideration for one of these awards may contact one of the coaches for further information about scholarship applications.

Registration and Eligibility
Registration for athletic participation in Aggie athletics may be accomplished by contacting any of the coaches or the athletics office. Eligibility for participation is governed by the rules and regulations established by the NCAA, by the Big West Conference, and by Utah State University.

Supervision
Supervision and direction for men and women is vested in the Director of Athletics and the Athletic Council, consisting of the President of the University, and members of the faculty, the alumni, and student organizations.
Information Technology

Administration

Interim Vice President for Information Technology/
Interim Chief Information Officer: M. Kay Jeppesen
Location: Main 161C
Phone: (435) 797-1134
FAX: (435) 797-2646
E-mail: m.k.jeppesen@usu.edu
WWW: http://www.usu.edu/cio

Business Manager:
Delia L. Weeder, Main 161D, (435) 797-0071, dee.weeder@usu.edu

Administrative Assistant:
Peggy P. Nixon, Main 161A, (435) 797-1134, peggy.nixon@usu.edu

Systems Administrator:
Merry Lu Zeller, Main 161B, (435) 797-7199, merrylu.zeller@usu.edu

The impact of information technology and “information appliances” yet to come is changing the basic structure and business operations of educational institutions. Major responsibilities of the Office of the Vice President for Information Technology are to anticipate, plan for, and manage new information requirements and applications; develop information systems that support such requirements and applications; acquire and manage existing and new data and information; and provide and maintain a University-wide information network and management system to deliver voice, data, and video services. The responsibility of the Chief Information Officer includes the design, development, implementation, and management of an integrated University-wide information management system, ensuring integration of technology.

Enterprise Resource Planning (ERP) Banner Project

Project Manager:
Rory J. Weaver, Science Engineering Research 310, (435) 797-1962, rory.weaver@usu.edu

Lead Data Base Administrator:
Duane E. Black, Science Engineering Research 324, (435) 797-2404, duane.black@usu.edu

Lead Programmer:
Doug Garrett, Science Engineering Research 301, (435) 797-2635, doug.garrett@usu.edu

Banner is a fully-integrated administrative data management system designed to support USU’s mission of delivering a quality educational experience to students. Banner is a relational database system which provides access to University data 24 hours per day, 7 days per week. Banner consists of the following four modules: Banner Finance, Banner Student, Banner Financial Aid, and Banner HR/Payroll. Banner is the official “system of record” for University information.

Classroom and Multimedia Services

Director:
Jonathan B. Kadis, Janet Quinney Lawson 201, (435) 797-3134, jon.kadis@usu.edu

Office Coordinator:
Dave Clark, Janet Quinney Lawson 102, (435) 797-2655, dave.clark@usu.edu

Manager/Classrooms and Engineering:
Rick D. Hughes, Quonset Hut 111, (435) 797-2706, rick.hughes@usu.edu

Manager, Multimedia:
D. Shane Thomas, Janet Quinney Lawson 202, (435) 797-0525, shane.thomas@usu.edu

Coordinator, Audiovisual:
Tara Gibbons, Janet Quinney Lawson 102, (435) 770-0629, tara.gibbons@usu.edu

Classroom and Multimedia Services (CMS) is a division of the Office of Information Technology. CMS supports Utah State University through four major functions: Mediated Classroom Services, Audiovisual Services, Multimedia Services, and Engineering/Big Blue Cable TV. Mediated Classroom Services provides leadership and oversight for the design, development, integration, and ongoing maintenance of the University’s classrooms. Audiovisual Services provides portable equipment to faculty and staff for use in classrooms, labs, conference rooms, and various off-campus locations.

Multimedia Services uses technology to support academic and nonacademic productions. It provides post-production capabilities using digital editing, DVD authoring, Podcasting, and video web-streaming capabilities.

Engineering/Big Blue Cable TV gives technical support to Multimedia Services, AV Services, and Classroom Services. It is also responsible for all campus video networks, including those required for distribution of commercial cable television service to academic and administrative venues.

Network and Computing Services

Director:
Kim A. Marshall, Science Engineering Research 301, (435) 797-2413, kim.marshall@usu.edu

Associate Director:
Robert (Bob) Bayn, Jr., Science Engineering Research 301, (435) 797-2396, bob.bayn@usu.edu

Associate Director:
Rory J. Weaver, Science Engineering Research 310, (435) 797-1962, rory.weaver@usu.edu

Administrative Assistant:
Peggy Baugh, Science Engineering Research 301, (435) 797-2402, peggy.baugh@usu.edu
Information Technology

Operations Supervisor:
Adrian Lundgren, Science Engineering Research 301, (435) 797-2414, adrian.lundgren@usu.edu

Manager, Student Computer Labs:
Gary D. Egbert, Science Engineering Research 324, (435) 797-1476, gary.egbert@usu.edu

Manager, Network Services:
Kevin L. Grover, Science Engineering Research 301, (435) 797-2401, kevin.grover@usu.edu

Manager, Licensing and Network Training:
Michelle M. Smith, Science Engineering Research 326, (435) 797-7313, michelle.m.smith@usu.edu

Manager, Help Desk:
Stephen Funk, Science Engineering Research 108, (435) 797-8181, stephen.funk@usu.edu

Network and Computing Services (NCS) manages the central computing facilities and services used by the campus to meet administrative, educational, and research needs, as well as the campus-wide data network that provides access to those services and provides connectivity for distributed services from other departments.

Administrative Data Services (ADS) maintains and customizes the business computing applications of the University, including the student information system (registration and records), the financial aid system (scholarships), the financial records system (accounting), the human resource system (personnel), the card reader system (ID and debit accounts), and the data warehouse (read-only access and reporting).

The Academic User Services (AUS) group provides end-user support for the facilities maintained by NCS. AUS manages six Open Access Computer Labs for all students on campus, as well as walk-up kiosks around campus for e-mail and web access. The Helpdesk provides walk-in, phone, e-mail, and office-call support to students and staff for hardware and software problems, including network connectivity in offices, as well as in on-campus and off-campus housing.

NCS manages the central computing equipment, including an IBM 7040 Series P670 Oracle Server for administrative computing applications; a cluster of five VMS Alphas for e-mail services, web page hosting, data analysis, and programming; network connections to the Internet and Internet-2; proxy servers; and utility servers for webmail, virus filtering, spam tagging, etc. An intra-campus fiber-optic network connects nearly all desktop computers, servers, printers, and card readers on campus. A modern pool of 276 modems provides dial-in access to the campus backbone and the Internet.

Licensing and Network Training staff provides leadership for the coordination of campus licensing initiatives, including campus-wide licensing purchases.

Telecommunications and Telephone Services

Director:
Scott N. Bradley, Science Engineering Research 101A, (435) 797-0022, scott.bradley@usu.edu

Associate Director:
Scott D. Wells, Science Engineering Research 102, (435) 797-3336, scott.wells@usu.edu

Business Manager:
Amy L. Kitchen, Science Engineering Research 101D, (435) 797-2910, amy.kitchen@usu.edu

USU’s Telecommunications and Telephone Services (TTS) is a “cost recovery” organization, tasked with the provision of all telephone and network-related services needed for the University to fulfill its mission. As telecommunication services are required by University entities, this office evaluates, procures, provides, and bills to the end-user organization the suitable technology solutions. Services provided include long-distance calling services, voice mail, teleconferencing, service/price negotiation with providers, accounts payable and receivable, operator services, calling cards, cellular telephone services, pagers, maintenance and support, help desk, training, etc. Individuals who reside on campus in USU Housing receive their telephone service from USU Telecommunications and Telephone Services and may elect to obtain long-distance calling access from this office. These services are provided to Utah State University by 16 staff members and 10 part-time students. University long-distance services are provided through Qwest.
Merrill-Cazier Library

Associate Director for Public Services:
John Elsweiler, (435) 797-2636

Associate Director for Technical Services:
Betty Rozum, (435) 797-2632

Associate Director for Special Collections and Archives:
Bradford R. Cole, (435) 797-8268

Reference Services: Flora G. Shrode, (435) 797-8033

Collection Development: Steven R. Harris, (435) 797-3861

Patron Services: Vicki Read, (435) 797-2914

Government Documents: John S. Walters, (435) 797-2683

Cataloging: Cheryl H. Adams, (435) 797-2667

Materials Acquisitions: Kevin K. Brewer, (435) 797-3961

Library Systems: R. Todd Hugie, (435) 797-2638

Digital Library: Cheryl D. Walters, (435) 797-2623

The new Merrill-Cazier Library opened during the 2005-2006 academic year, bringing all library resources and services under one roof. As a single comprehensive library facility, the Merrill-Cazier Library is the intellectual center of campus. The new Library features an environment rich in resources and technology, with a broad spectrum of study spaces that support the ways library users interact with information and with one another.

The Merrill-Cazier Library maintains an extensive collection of research materials, including more than 1.5 million books and periodicals. As a designated regional depository of federal documents, the Library has one of the outstanding government documents collections in the Intermountain West, including more than 1.2 million federal documents and 76,600 topographical maps. Among the many strengths in the Library’s print collection is a nationally-known collection of Beat Generation literary and artistic works.

In addition to maintaining print materials, the Library is a portal to a vast collection of electronic resources. The Library purchases and provides access to more than 18,000 electronic journals, indexes, and abstracts. These resources are crucial to research and the educational experience, and are available to all University students, faculty, and researchers.

The Library’s faculty and staff members are perhaps its greatest resources for students and faculty. With the rapid increase in available information today, it is more important than ever to have experts in the field to help find the best information available. Research specialists are available to assist patrons searching for information. To ensure that the Library’s collection excels in areas of the University’s specialization, Library faculty members are assigned to each of the academic colleges on campus.

The Library’s physical facilities are designed to enhance the experiences of students and faculty alike. The new state-of-the-art facility features plenty of public-access terminals to search the Library’s online catalog and access electronic resources, as well as wireless connectivity throughout the building.

The Library’s Special Collections and Archives division is a particularly valuable resource for research. The collections contain a significant body of primary source materials, including manuscripts and rare books for area studies and the historical archives of the University. Collections of particular note include one of the nation’s most comprehensive groups of Jack London’s writing, a photograph collection containing more than one million images featuring the Intermountain West, and the Fife Folklore Archives.

Faculty Assistance Center for Teaching (FACT)

Manager: Kevin L. Reeve
Location: Merrill-Cazier Library 202
Phone: (435) 797-9506 (main office) or (435) 797-0783
FAX: (435) 797-0793
E-mail: kevin.reeve@usu.edu
WWW: http://www.fact.usu.edu

The Faculty Assistance Center for Teaching (FACT) supports the faculty in the development of computer and web-based instructional materials, and in the use of technologies for teaching and learning. FACT maintains a design and development laboratory, where faculty can develop and test instructional support materials. The center also maintains PC and Mac workstations in a networked environment, supporting a broad range of software for authoring, presentation, and graphics. Working hand-in-hand with clients, instructional designers provide consultation and technical assistance in the design and development of online courses and other mediated forms of instructional materials. The center also provides faculty training and development workshops, utilizing state-of-the-art technologies.
Continuing Education

Associate Vice President and Associate Dean of Continuing Education: Weldon S. Sleight
Location: Eccles Conference Center 101B
Phone: (435) 797-2214
FAX: (435) 797-0039
E-mail: weldon.sleight@usu.edu
WWW: http://extension.usu.edu/continuinged

During the past two decades, University faculty and administration have strengthened service to residents through development and delivery of Continuing Education academic programs in partnership with University departments. Continuing Education provides opportunities for students to complete degrees and receive training that are time and place bound. This is accomplished through resident campuses around the State of Utah and through Independent and Distance Education (IDE). Continuing Education provides opportunities for professional and vocational learning, in addition to providing lifelong enrichment through social and cultural programs. Persons in all situations and of all ages can access learning opportunities that increase their knowledge and skills without disrupting their employment or lifestyles.

Degree and Credit Programs

A large number of people live in communities or areas remote from the University campus and desire to benefit from university training, but cannot come to Logan to attend classes on campus. For this group, courses and degree programs are made available to approximately 50 different communities around the state through on-site faculty, visiting faculty, and via an interactive broadcast system using a variety of technologies. In addition, some courses are available on the Internet.

Off-campus credit courses, which are equivalent in content hours of class instruction and preparation, meet the same requirements as comparable classes offered on the University campus. Programs and classes may meet the requirements for a bachelor’s degree, as determined by the individual departments and colleges. They also may meet the requirements for a master’s degree with approval of the School of Graduate Studies. All instructors in credit courses are either members of the regular University teaching faculty officially assigned to the teaching project concerned or nonresident members approved by the head of the department and by the college administration.

The registration fees charged for classes conform to regulations of the Board of Regents. Fees may not be less than the on-campus tuition and may be more if warranted by the additional expense of conducting the class off campus.

Center for Independent and Distance Learning (CIDL)

Degrees
The Center for Independent and Distance Learning (CIDL) administers the following degrees:

Associate of Science
Associate of Applied Science in Office Support Systems
(see pages xx-xx)

Degree Requirements

Center for Independent and Distance Learning Requirements
All students majoring in CIDL-administered degrees and programs must satisfy the CIDL requirements, provided below. Academic advising regarding these requirements is available in the CIDL Student Services Center, Eccles Conference Center 103, and at local Continuing Education centers.

Admission Requirements
When students apply, they need to indicate which campus they would like to attend. When students indicate they would like to attend a Continuing Education site or center, they will be identified as CIDL applicants and evaluated for admission. Nondegree seeking students and those students who have not been admitted may enroll in selected courses if they have met the prerequisites for those courses. Students who are admitted through the CIDL matriculation will be evaluated using the following criteria:

1. Students who apply directly through a CIDL site and meet the current USU/college-specific admission criteria will be admitted and matriculated into their specified college according to current policy and procedure.

2. First-time/freshman students who apply directly through a CIDL site/center and do not meet the University’s criteria will be admitted into the CIDL matriculation if they (a) have an index score of 85 or above or an ACT score of 16 or above, or (b) have been out of school for 5 or more years.

3. Students applying to a USU CIDL campus who have previous college experience (readmits/transfer students) and do not meet the University’s criteria for admission into their requested major will be evaluated through the CIDL matriculation criteria. The criteria for re-admits and transfer students are as follows: (a) have been out of school for at least three years, or (b) have a minimum college cumulative GPA of at least 2.0, or (c) have previous college experience, including concurrent enrollment credit GPA of 2.0 or above.

Students who have been admitted through CIDL and later determine they want to attend courses on the main campus will be required to either complete at least 24 credits with a minimum GPA of 2.5 or meet college-specific requirements. When a student meets the major/college-specific criteria, a change of major form will be processed.

Associate of Science

Objectives
Students may pursue an Associate of Science degree for any of the following reasons: (1) it may serve as a vehicle to complete the Utah State University General Education requirements, (2) it may enable a student to transfer to another institution, or (3) it may serve as a vehicle to transfer into a four-year degree program. While completing their associate degree, students are encouraged to complete the sophomore-level requirements for their major, so as to facilitate a smooth transition to upper-division courses within their major.
Graduation Requirements
1. 60 total credits
2. GPA of 2.0 or higher
3. Completion of 30-33 credits in University Studies courses, including:
   a. 6 credits of Communications Literacy (CL1) and (CL2)
   b. 3-4 credits of Quantitative Literacy (QL)
   c. 0-3 credits of Computer and Information Literacy (CIL)
   d. 12 credits of Breadth Requirements, including 3 each in Breadth American Institutions (BAI), Breadth Creative Arts (BCA), Breadth Humanities (BHU), Breadth Life Sciences (BSS), Breadth Physical Sciences (BSS), and Breadth Social Sciences (BSS). Students should take at least two approved courses with a USU prefix.
4. 27-30 credits in an area that will lead to junior-level status

Associate of Applied Science (AAS) in Office Systems Support
The AAS degree in Office Systems Support, which is available only through the Center for Independent and Distance Learning (CIDL), is offered at the Continuing Education centers located in Logan, Brigham City, Tooele, and the Uintah Basin. For information about admission requirements, degree requirements, and career opportunities, see the Office Systems Support AAS Degree section of this catalog on pages xx-xx.

Independent and Distance Education
Assistant Dean for Independent and Distance Education:
  Ronda R. Menlove
Location: Eccles Conference Center 102D
Phone: (435) 797-2137 or (800) 233-2137 (toll free)
E-mail: ronda.menlove@usu.edu
WWW: http://extension.usu.edu/continuinged

Independent and distance learning advances the University’s land-grant mission by taking academics and discovery to a diverse and under-served student population through electronic program and course delivery.

Online education allows students to accelerate their academic progress through high-quality interactive courses that fit their busy schedules. Students earn the same college credits working from their home computers as they would if they attended classes on campus. Most online courses are offered on a semester schedule and must be completed during regular USU semesters. For more information and to register for online courses, visit:
http://extension.usu.edu/continuinged

Independent Study courses allow students to reduce scheduling problems and earn college credit without attending campus classes. Independent Study courses are offered on an open-enrollment schedule. Students may register anytime and may take up to one year to complete the courses. To request a catalog and registration forms, call (800) 233-2137.

Concurrent Enrollment
Location: Eccles Conference Center 101
Phone: (435) 797-2134
WWW: http://logan.usu.edu/htm/concurrent/

Concurrent Enrollment is a cooperative program between public and higher education in the State of Utah. It is designed to help high school students who are planning to attend a postsecondary educational institution. Students in this program are eligible to earn high school credits, as well as credits which can be applied toward a college degree. Students completing courses offered as part of this program can receive credit at Utah State University or at another institution in the state, as well as at many out-of-state institutions.

These courses are the same courses as offered on the campus of Utah State University. Although courses are usually limited to 1000-level courses, 2000-level courses may occasionally be offered. Textbooks, testing, attendance, grading, and assignments are equivalent to that used in courses taught at USU, and are approved by each department. Some USU faculty members, as well as departmental-approved part-time faculty, teach in this program. At USU, concurrent enrollment is administered by Continuing Education.

USU delivers concurrent education in a variety of ways. Although USU often uses its own faculty members to teach concurrent enrollment classes, departmental-approved high school faculty members may be used to teach courses at local high schools. Classes are also offered to a wider audience through the Utah Education Network Satellite system, through EDNET, and through online or internet courses.

In order to become eligible for enrollment in concurrent education courses offered through USU, students should first meet with their high school counselors. Generally, students should be juniors or seniors in high school, and should be in good academic standing. Students should be aware that concurrent education generates a college transcript which will accompany them throughout their college career. Because these courses are academically rigorous, students should ensure they are ready to commit to meeting University standards.

Kellogg Life Span Learning Complex
The W. K. Kellogg foundation and other private funding sources have made it possible to build two structures, centrally located on the campus, for Continuing Education Programs. The University Inn contains 74 modern hotel rooms for housing those who visit campus for a variety of programs. The Conference Center provides spacious conference meeting rooms for conferences held on the University campus. The facilities feature satellite uplink and downlink capabilities, wireless Internet access in all meeting rooms, and state-of-the-art audiovisual presentation equipment. The conference facilities include 12 meeting rooms ranging from a 400-seat auditorium to small seminar rooms for 10 to 30 people.

Administrative offices and classrooms for Independent and Distance Education are also located in the Conference Center. Individuals and groups of all ages are encouraged to investigate this expanded resource at Utah State University as a means of pursuing their unique educational goals.

The policy of the University is to encourage and support research and all forms of creative, scholarly activities by faculty and staff members. Much of the research is supported by funds directly assigned to various administrative units of the University. Unrestricted funds for general support of research are administered through the Research Office. The Research Office serves as a coordinating center for all research associated with the University. General policies and procedures pertaining to research and the promotion of a coordinated research program are the responsibility of the University Research Council.

Research Support Units

Environmental Health and Safety: Steven C. Bilbao, (435) 797-2892

Utah Water Research Laboratory: Mac McKee
Undergraduate Research Program

Undergraduate research, scholarship, and creative activity offer Utah State University students unparalleled educational opportunities for hands-on learning, a hallmark of the institution. Students may begin a research track as early as their freshman year, preparing them to compete for prestigious scholarships, such as the Goldwater, Udall, and Rhodes, and getting them ready for graduate studies. Undergraduate Research and Creative Opportunity (URCO) Grant competitions are held twice annually, in February and October. The Research Office also supports the annual “Research on the Hill” event at the State Capitol, as well as “Student Showcase,” the spring celebration of undergraduate research. In addition, students selected to present at the National Conference on Undergraduate Research (NCUR) or the Council on Undergraduate Research (CUR) “Posters on the Hill” competition are also supported. For support of other travel to professional conferences and meetings, the Associated Students of Utah State University (ASUSU) allocates money to eligible undergraduates through the Academic Opportunity Fund.
International Affairs

Vice Provost for International Affairs:
Steven H. Hanks
Location: Main 148
Phone: (435) 797-1840
FAX: (435) 797-3880
WWW: http://www.usu.edu/aia/international

Director, International Program Development:
Morris D. Whitaker, Main 150, (435) 797-1842,
morris.whitaker@usu.edu

Members, International Academic Advisory Board (IAAB):
D. Layne Coppock, College of Natural Resources
Tilak R. Dhiman, College of Agriculture
Christopher Fawson, chair
Kay W. Forsyth, Study Abroad Office
Juan N. Franco, Vice President for Student Services
Michael K. Freeman, College of Education and Human Services
R. Edward Glatfelter, College of Humanities, Arts, and Social Sciences
Vijay R. Kannan, College of Business
Richard J. Mueller, College of Science
Shannon Peterson, representative at large
Edward M. Reeve, representative at large
Weldon S. Sleight, Extension
Maria Spicer-Escalante, Languages
Wynn R. Walker, College of Engineering
Veronica Ward, International Studies major and minor
Morris D. Whitaker, International Program Development

International Education
The Office of International Affairs is responsible for developing and implementing a wide variety of international education policies and activities at USU. The Vice Provost oversees the Office of International Students and Scholars, as well as the Study Abroad Office. He also serves as an institutional liaison for international education projects, the International Studies major and minor, Title VI program development, and international agreements and memoranda of understanding. The Vice Provost also works directly with University colleges and departments on international dimensions of teaching, research, and extension education. International Affairs is involved with entrepreneurial efforts to provide the resources necessary to support its mission and seeks to be a catalyst to help USU become a premier international university.

International Program Development

Director: Morris D. Whitaker
The Office of International Affairs provides technical support and assists faculty members interested in implementing collaborative international development projects around the globe. As a land-grant university, USU has long been involved in providing technical assistance and training to various countries around the world. Since the early 1950s, USU has implemented more than 125 major international technical assistance and training projects having a combined value of more than US$150 million. Much of USU’s experience and development has made the University an international leader in the areas associated with irrigation and water resources; arid-land agriculture; livestock production on rangelands; dairy production and processing; management of natural resources; institutional building in research, extension, and education; and planning and implementation of skills development programs.
University Advancement

Vice President for University Advancement: M. Scott Mietchen
Salt Lake City Office: Wells Fargo Center, 299 South Main Street, Suite 220, Salt Lake City UT 84111, (801) 961-1343, FAX (801) 961-1350, scott.mietchen@usu.edu
Campus Office: Main 101B, (435) 797-1158, FAX (435) 797-1364

Associate Vice President for University Advancement: David Driggs
Salt Lake City Office: Wells Fargo Center, 299 South Main Street, Suite 220, Salt Lake City, UT 84111, (801) 961-1345, FAX (801) 961-1350, david.draggs@usu.edu
Campus Office: Main 110, (435) 797-1239, FAX (435) 797-1364

Associate Vice President for University Advancement: Joan Scheffke, Main 101A, (435) 797-1158, FAX (435) 797-1364, joan.scheffke@usu.edu

Director of Stewardship Programs: Joyce Albrecht, Main 101G, (435) 797-1324, FAX (435) 797-1364, joyce.albrecht@usu.edu

Executive Director of Public Relations and Marketing: John DeVilbiss, Public Relations and Marketing 207, (435) 797-1358, FAX (435) 797-1250, john.devilbiss@usu.edu

Executive Director of Alumni Relations: To be appointed, David B. Haight Alumni Center, (435) 797-2018, FAX (435) 797-2591, alumni@cc.usu.edu

University Advancement is the public face of Utah State University, managing the University’s relationships with its alumni, friends, and the public. The Advancement Office has three components: the Alumni Association, Public Relations and Marketing, and Development. Alumni Relations’ charge is to build and maintain strong connections with its alumni around the globe. Public Relations and Marketing holds responsibility for the public image of the University, telling the University’s stories. The Office of Development provides resources for the University by securing private sources of funding.

The Office of Development’s responsibility for raising private funds includes every aspect of relationship building, from publishing magazines and newsletters that keep donors connected and informed to ensuring that gifts are stewarded properly and holding celebrations to thank donors for their contributions.

Private gifts to the University augment declining state support and enable the University to build up-to-date facilities, conduct cutting-edge research, create innovative academic programs, and showcase exciting performers and guest speakers. Moreover, private support provides scholarships for deserving students who otherwise would not be able to afford the cost of higher education.

University Advancement provides professional assistance to the Utah State University community in the area of charitable giving. For further information on how to transmit gifts of cash, securities, or in-kind property to the University through a number of tax-friendly strategies, contact Angelina Wilkinson at: University Advancement, Main 101D, 1440 Old Main Hill, Logan UT 84322-1440, (435) 797-3885 or toll-free (888) OLD-MAIN (653-6246).

University Alumni Association

President: Kellie Wood
Director of Alumni Relations:
To be appointed, David B. Haight Alumni Center, (435) 797-2055 or 800-291-2586

The mission of the Alumni Association is to promote the interests and welfare of Utah State University, as well as that of USU alumni, students, faculty, staff, and friends.

The governance of the association is vested in the Executive Board. The board is comprised of the president and vice president of the association, the vice president of University Advancement, the president of the Associated Students of USU, the president of the Emeriti, the president of the Young Alumni, the president of the Student Alumni Association, a College Alumni/Development representative, a University faculty representative, the University Athletic Director, the director of Alumni Relations, the immediate past president of the association, and representatives of regional alumni chapters selected by the Council of Chapter Presidents with the approval of the Executive Board.

The Alumni Association is the medium through which former students maintain contact with the University and are served after leaving the campus. Efforts are made to maintain a complete record of every former student throughout life, and his or her accomplishments and progress are recorded. The association maintains alumni volunteers and chapter organizations throughout Utah and in major areas where former students are located. Through the association, former students are kept in contact with each other, and they meet and participate in business and social activities. They likewise assist the University with special projects in their areas.

The Alumni Association takes the leadership in sponsoring such campus events as Homecoming, Founders Day, Distinguished Service Awards, Aggie Family Day, and reunions. The association also provides opportunities for travel through the alumni travel program, and aids in athletic and other school activities.
The vision statement of the Affirmative Action/Equal Opportunity (AA/EO) Office reads as follows:

"USU sees an environment in which every individual has an opportunity to learn, work, and contribute, and where full inclusion and respect for all people encourages creativity and productivity. The result will be students, faculty, and staff working together, serving and strengthening our local, national, and global communities."

In support of this vision, it is the policy of Utah State University to ensure equal educational and employment opportunity regardless of race, color, religion, sex (including sexual harassment), national origin, age, disability, or veteran status. In addition, discrimination based on sexual orientation is prohibited in the hiring of employees or in evaluating employee or student performance.

The AA/EO Office focuses on a variety of areas. The major responsibilities of the office include:

1. Developing affirmative action policies, plans, and programs at USU aimed at increasing employment opportunities for underrepresented groups of women, minorities, persons with disabilities, and veterans.

2. Monitoring the representation and status of women and minorities who are prospective or current faculty or staff.

3. Investigating, processing, and resolving discrimination and sexual harassment complaints.

4. Providing training on affirmative action/equal opportunity laws, policies, prevention of sexual harassment, and valuing diversity.

5. Enhancing awareness of and sensitivity toward diversity and "differences."

Utah State University is dedicated to providing equal opportunity in education and employment to all students, faculty, and staff. University members who feel their rights have been violated, want information, or just need some guidance relating to their course of action should contact the Affirmative Action/Equal Opportunity Office, located in Main 161, or call (435) 797-1266. Copies of the complete Affirmative Action Program, Affirmative Action/Equal Opportunity Policy, Sexual Harassment Policy, and Discrimination Complaint Policy, as well as information pertaining to other AA/EO-related laws and policies at the local (USU), state, and federal levels, are available in the AA/EO Office and on the AA/EO website: http://www.usu.edu/aaeo
Graduate General Information
Interim Dean of School of Graduate Studies: Laurens H. Smith, Jr.
Location: Main 164

FAX: (435) 797-1192
E-mail: gradsch@cc.usu.edu
WWW: http://www.usu.edu/gradsch

Graduate programs at USU are supervised by the dean of the School of Graduate Studies, assisted by the Graduate Council. The council consists of the dean, a faculty representative from each of the seven colleges of the University, a representative from the Faculty Senate, the Vice President for Information Technology, and two graduate students. Policies and regulations for graduate work are established by the Graduate Council with the approval of the Faculty Senate.

USU has awarded Master of Science degrees since 1914 and doctoral degrees since 1950. The School of Graduate Studies was formally organized in 1945. Forty-one of the University’s 43 departments participate in graduate degree programs, including several interdepartmental programs. Included are 90 master’s programs, 35 doctoral programs, 3 educational specialist programs, 1 engineering degree, and 3 interdisciplinary certificates. Nationally and internationally known scholars and research units participate in and support graduate studies at USU.

The School of Graduate Studies holds memberships in the Council of Graduate Schools in the United States and the Western Association of Graduate Schools.

Degrees, Majors, and Certificates

Utah State University offers the following graduate degrees:

- Master of Accounting (MAcc)
- Master of Arts (MA)
- Master of Business Administration (MBA)
- Master of Computer Science (MCS)
- Master of Dietetics Administration (MDA)
- Master of Education (MEd)
- Master of Engineering (ME)
- Master of Family and Human Development (MFHD)
- Master of Fine Arts (MFA)
- Master of Food Microbiology and Safety (MFMS)
- Master of Landscape Architecture (MLA)
- Master of Mathematics (MMath)
- Master of Natural Resources (MNR)
- Master of Professional Studies in Horticulture (MPSH)
- Master of Rehabilitation Counseling (MRC)
- Master of Science (MS)
- Master of Second Language Teaching (MSLT)
- Master of Social Sciences (MSS)
- Civil Engineer (CE)
- Educational Specialist (EdS)
- Doctor of Education (EdD)
- Doctor of Philosophy (PhD)
- Doctorate of Audiology (AuD)

Following is a list of the academic areas, or majors, within which degrees are offered and the degree(s) for each:

- Accounting .............................................................................................................. MA, MFA
- Agricultural Systems Technology ........................................................................ MS
- American Studies .................................................................................................. MA, MS
- Animal Science ..................................................................................................... MS, PhD
- Applied Economics ................................................................................................ MS
- Art ........................................................................................................................... MA, MFA
- Audiology ............................................................................................................... AuD
- Biochemistry .......................................................................................................... MS, PhD
- Biological Engineering ......................................................................................... MS
- Biology ................................................................................................................... MS, PhD
- Biometry ................................................................................................................. MS, PhD
- Bioregional Planning ............................................................................................. MS
- Biostatistics ............................................................................................................ MS
- Biotechnology ......................................................................................................... MS, PhD
- Business Administration ....................................................................................... MBA
- Business Information Systems ............................................................................... MS
- Chemistry ............................................................................................................... MS, PhD
- Civil and Environmental Engineering .................................................................. ME, MS, CE, PhD
- Communication .................................................................................................... MA, MS
- Communicative Disorders and Deaf Education .................................................. MEd, MA, MS, EdS
- Computer Science ................................................................................................ MS, MCA, PhD
- Dairy Science ......................................................................................................... MS
- Dietetics Administration ........................................................................................ MDA
- Disability Disciplines ............................................................................................ PhD
- Economics ............................................................................................................. MA, MS, PhD
- Education ............................................................................................................. EdS, PhD
- Electrical Engineering ......................................................................................... ME, MS, PhD
- Elementary Education ......................................................................................... ME, MA, MS
- Engineering and Technology Education ............................................................. MS
- English ................................................................................................................... MA, MS
- Family and Human Development ....................................................................... MFHD
- Family Consumer, and Human Development .................................................... MS, PhD
- Fisheries Biology .................................................................................................. MS, PhD
- Food Microbiology and Safety ............................................................................. MFMS
- Forestry .................................................................................................................. PhD
- Geography ............................................................................................................ MA, MS
- Geology ................................................................................................................. MA, MS, PhD
- Health, Physical Education and Recreation ....................................................... Med, MS
- History .................................................................................................................. MA, MS
- Horticulture, Professional Studies in ................................................................. MPSH
- Human Dimensions of Ecosystem Science and Management ......................... MS, PhD
- Human Resources ............................................................................................... MS
- Industrial Mathematics ........................................................................................ MS
- Instructional Technology ..................................................................................... MEd, MS, EdS, PhD
- Irrigation Engineering .......................................................................................... MS, PhD
- Landscape Architecture ....................................................................................... MLA
- Mathematics .......................................................................................................... MS, MMath
- Mechanical Engineering ..................................................................................... ME, MS, PhD
- Natural Resources ............................................................................................... MNR
- Nutrition and Food Sciences .............................................................................. MS, PhD
- Physics .................................................................................................................. MS, PhD
- Plant Science ......................................................................................................... MS, PhD
- Political Science .................................................................................................... MA, MS
- Psychology ............................................................................................................ MS, PhD
- Range Science ....................................................................................................... MS, PhD
- Recreation Resource Management ..................................................................... MS, PhD
- Rehabilitation Counseling .................................................................................. MRC
- Secondary Language Teaching ............................................................................. MSLT
- Secondary Education ............................................................................................ MEd, MA, MS
- Social Sciences ..................................................................................................... MSS
- Sociology .............................................................................................................. MA, MS, PhD
- Soil Science .......................................................................................................... MS, PhD
- Soil Science .......................................................................................................... MS, PhD
- Special Education ................................................................................................. MEd, MS, EdS
- Statistics ................................................................................................................ MS
- Theatre Arts ............................................................................................................ MA, MFA
- Theory and Practice of Professional Communication ....................................... PhD
- Toxicology ............................................................................................................. MS, PhD
- Watershed Science ............................................................................................... MS1, PhD
- Wildlife Biology ................................................................................................... MS, PhD

Certificates

- National Environmental Policy Act (NEPA)
- Natural Resource and Environmental Policy
- Natural Resources and Environmental Education (NREE)

1Interdisciplinary degree program.
2Interdisciplinary certificate program.
3The MS and PhD in Ecology are offered within each of the following departments: Biology; Plants, Soils, and Biometeorology; Watershed Sciences; and Wildland Resources.
School of Graduate Studies

Graduate Financial Assistance

Applications for assistantships, fellowships, and other financial aid should be made through departmental offices.

Along with most graduate schools in the United States, USU is a party to a resolution of the Council of Graduate Schools that establishes April 15 as the deadline for acceptance of offers of financial assistance. If a student accepts an offer before April 15 and then wishes to withdraw, a resignation of the appointment may be submitted in writing at any time through April 15. However, after April 15 a student is not to accept another offer without first obtaining a written release from the institution to which a commitment has been made.

Graduate Assistantships

Teaching, research, and other graduate assistantships are available in most of the departments of the University. A full-time assistantship is 20 hours per week. In the interest of timely degree completion, graduate students are generally employed by the University for no more than 20 hours per week. Employment for more than 20 hours per week must be approved by the student’s advisor, degree-program department head, and the graduate dean. Graduate assistants must be full-time, matriculated students. For students employed as graduate assistants, full-time status is based on the full-time equivalent or FTE. A 0.25 to 0.374 FTE requires a student to enroll for 9 graduate-level credits; a 0.375 to 0.50 FTE requires a student to enroll for 6 graduate-level credits (see also Student Classifications section, page 101).

Graduate assistants must maintain a cumulative grade point average (GPA) of 3.0 or higher for those courses included on their Program of Study. However, if a Program of Study has not been submitted to the School of Graduate Studies, a cumulative GPA is computed using all of the student’s coursework at USU since the prior degree. The GPA is checked by the School of Graduate Studies at the end of each semester. The cumulative GPA on the last 60 semester credits will be used to determine eligibility as a graduate assistant if the student has not yet started the graduate program. Graduate assistants may register for a maximum of 12 credits per semester. However, a research assistant whose assistantship involves his or her thesis or dissertation research may register for additional credits, as explained below.

Teaching Assistantships/Graduate Instructors

Graduate students may be teaching assistants or graduate instructors in departments. Teaching loads vary up to a maximum of 20 hours per week, and stipends vary depending on the department and the teaching load.

International students may be considered for teaching assistantships if they demonstrate adequate proficiency in English communication, as determined by Utah State University’s Intensive English Language Institute, and have participated in the required workshop.

All teaching assistants and graduate instructors are required to participate in a training workshop sponsored by the School of Graduate Studies prior to beginning their assistantships. The workshops help students gain the techniques and skills to be effective instructors in the university environment. The workshop for international students also aids students in understanding the American university culture and in improving communication. When a teaching assistant workshop has been successfully completed, 1 credit will be added to the student’s transcript. However, this credit cannot be applied toward a graduate degree program.

Research Assistantships

Stipends and workloads for research assistants vary, with a maximum workload of 20 hours per week. Students conducting research that will be used for their thesis or dissertation may register for 4 research or thesis credits above the 12-credit limit.

Federal College Work-Study Assistantships

Graduate students may apply for work-study support by completing an online application at http://www.fafsa.ed.gov.

Waiver of the Nonresident Portion of the Tuition Fee

A nonresident student who holds a graduate assistantship and is receiving at least $350 per month may be awarded a waiver of the nonresident portion of tuition for courses in the student’s degree program. Out-of-state, noninternational graduate students who receive nonresident tuition waivers must apply for Utah residency after completing 40 semester credits. It is important to note that graduate students who are seeking residency may count any credits at the 5000 level and above at 1.5 times the actual credit. For example, a 3-credit 5000-level class would count for 4.5 credits toward residency requirements only (not toward graduation requirements). Waivers cannot be used to audit classes. Waivers cannot be used for coursework below the 5000 level, unless the course is on the student’s Program of Study or required by the student’s supervisory committee, as indicated by a letter from the committee chair.

Resident Tuition Remission for Doctoral Students

A student who is matriculated in a doctoral degree program and is a graduate assistant or graduate fellow receiving at least $600 per month may be awarded a resident (instate) tuition remission. Full-time registration is required (see page 101). If credits other than those required for the doctoral degree are needed to meet the 9-credit requirement, registration must be for Dept. 7990 (Continuing Graduate Advisement). A doctoral in-state tuition remission cannot be used to audit classes or for coursework below the 5000 level.

Waiver/Remission

The designated departmental staff must submit an online waiver/remission request to the graduate dean for approval according to the deadlines outlined in the Tuition Waivers and Remissions Policy. The waiver and/or remission must be used before the last day for registering or adding classes in the semester for which it was awarded.

Portion of the Tuition Fee Waiver of the Nonresident Portion of the Tuition Fee

International students may register for additional credits, as explained below.

Residents of participating states may enroll in graduate programs approved as Western Regional Graduate Programs (WRGP) by the Western Interstate Commission for Higher Education (WICHE) without paying nonresident tuition. USU’s WRGP degrees are the MS and PhD in Toxicology and Watershed Science; and the MS in Physics, with a specialization in Upper Atmospheric Physics. Information is available in the School of Graduate Studies or at: http://wiche.edu/SEP/WRGP

Western Regional Graduate Programs (WRGP)

Residents of participating states may enroll in graduate programs approved as Western Regional Graduate Programs (WRGP) by the Western Interstate Commission for Higher Education (WICHE) without paying nonresident tuition. USU’s WRGP degrees are the MS and PhD in Toxicology and Watershed Science; and the MS in Physics, with a specialization in Upper Atmospheric Physics. Information is available in the School of Graduate Studies or at: http://wiche.edu/SEP/WRGP
Fellowships

Fellowship and scholarship awardees must be full-time, matriculated students enrolled in approved graduate-level coursework. Application for these, as well as for departmental fellowships and awards, is made through the departments, except for the Martin Luther King Fellowship and the Dinesh and Kalpana Patel Fellowship (see below).

Presidential Fellowships include a $12,000 stipend for the academic year, a waiver of the nonresident portion of tuition, and for doctoral students, the resident tuition remission. Criteria include a 3.50 GPA and quantitative and verbal GRE scores at the 70th percentile or above.

University Fellowships also include a $12,000 stipend for the academic year, a waiver of the nonresident portion of tuition, and for doctoral students, the resident tuition remission. Criteria are the same as for the Presidential Fellowships. In addition, the student must be in a research degree program that includes a master’s thesis or doctoral dissertation.

Vice President for Research Fellowships include a $15,000 stipend for the academic year, a waiver of the nonresident portion of tuition, and for doctoral students, the resident tuition remission. Criteria are the same as for the Presidential Fellowships.

Martin Luther King Fellowships are available to African-American students. The fellowship includes a waiver of the nonresident portion of tuition. The department usually awards an assistantship or other support, the amount of which varies. Application for this fellowship is made through the School of Graduate Studies.

Dinesh and Kalpana Patel Fellowships are available to doctoral students who are international students or students from an underrepresented group. The fellowship is typically for $5,000 and includes a waiver of the nonresident portion of tuition and a doctoral tuition remission. Recipients are required to maintain a cumulative GPA of 3.0. Students may not receive this award more than once. Preference will be given to students in the latter stages of their program. Application for this fellowship is made through the School of Graduate Studies.

Scholarships

Resident Tuition Scholarships

Scholarships covering the resident portion of tuition are available each semester on a competitive basis through the departments. Awardees must be full-time matriculated students and must maintain a 3.0 or higher GPA.

Seely-Hinckley Scholarships

Seely-Hinckley Scholarships are awarded each year to six graduate students with superior academic records. College deans nominate, for the following school year, outstanding scholars who would not be able to attend or would be delayed in attending USU without financial assistance.

Other Financial Assistance

Many students who do not receive assistantships or fellowships receive financial assistance by working for departments or other campus units. Graduate students are generally not employed by the University for more than 20 hours per week. Employment beyond 20 hours per week must be approved by the student’s advisor, degree-program department head, and the graduate dean.

Graduate students may apply for Federal Stafford Loans, Federal Perkins Loans, Federal Supplemental Loans for Students (SLS), Emergency Loans, and Federal College Work-Study through the Financial Aid Office. More information can be found in the Financial Aid and Scholarship Information section of this catalog, page 23, or by contacting: Financial Aid Office, Taggart Student Center 106, Utah State University, 1800 Old Main Hill, Logan UT 84322-1800, tel. (435) 797-0173. Also visit the following website: http://www.usu.edu/finaid/

For information about GI Bill Benefits, contact: Office of Veterans Services, Taggart Student Center 246, Utah State University, 1600 Old Main Hill, Logan UT 84322-1600, tel. (435) 797-1102.

Requirements

Application-for-admission forms are obtained online at:
http://www.usu.edu/gradsch/admission/

Note: The fee must be paid before an application will be evaluated.

Concurrent Degrees

If a student wishes to be considered for two degree programs, an application should be submitted for the first degree program. If admission is granted, the student may then apply for a second degree program after submitting a letter from the head of the department to which the student has been admitted. The letter should indicate that the department has no objection to the student applying for the second degree program. This application process applies to both separate and concurrent degree programs (see Concurrent Degrees, pages 107-108).

Bachelor’s Degree

A bachelor’s degree from an accredited college or university is required for admission to a graduate program. A three-year bachelor’s degree is generally not acceptable. A master’s degree may be required for admission to a doctoral program.

Grade Point Average

A minimum 3.0 GPA for the last 60 semester credits is required.

Transcripts

Each previously attended college and/or university, including USU, must be listed on the application form, and the applicant must have an official transcript from each institution (except USU) sent directly to the USU School of Graduate Studies. Transcripts accumulated on one record are not acceptable. Transcripts must be submitted for all coursework above the high-school level and all prior degrees. Transcripts not in English must be accompanied by a notarized translation.

Utah State University 2006-2007 General Catalog
Transcripts submitted as application credentials become the property of the School of Graduate Studies and will not be copied for or returned to the applicant.

Admissions Tests
An admission test is required of all applicants. Scores at or above the 40th percentile are required by the School of Graduate Studies. Departments may set higher criteria. Most applicants must take the Graduate Record Examination (GRE) general test (minimum of 40th percentile on the verbal and quantitative tests). At this time, the School of Graduate Studies does not require the Analytical Writing Score. However, since some departments may require the Analytical Writing Score, students should abide by the requirements of the department to which they are applying. Some departments will accept the Miller Analogies Test (MAT) for master’s degree applications. Applicants to the Master of Business Administration, the MS in Business Information Systems, and Master of Accounting programs are required to take the Graduate Management Admission Test (GMAT). Registration forms for the GRE and the GMAT are available at the School of Graduate Studies. Applicants should request that their test report be sent directly to the School of Graduate Studies. The official test report must be received before an application is considered complete.

Recommendation Letters
Three letters of recommendation are required; each must address the applicant’s potential for success in the proposed graduate degree program. If the applicant has been enrolled in school during the last five years, at least two of the letters must come from persons who are familiar with, and can make an authoritative assessment of, the applicant’s recent academic progress and success. The letters should be written on the forms provided on the School of Graduate Studies website: http://www.usu.edu/gradsch/forms/RECOMMENDATION.pdf

The letters of recommendation must be sent directly to the School of Graduate Studies by the writers.

All materials submitted as part of the application credentials become the property of the School of Graduate Studies and will not be copied or returned to the student.

International Applicants
International applicants from non-English-speaking countries must demonstrate competency in the English language. A minimum score on the Test of English as a Foreign Language (TOEFL) of 550 (paper based), 213 (computer based), or 80 (Internet based), or the equivalent score of 6.0 on the International English Language Testing System (IELTS) satisfies this requirement. Both tests are valid for only two years. If an international applicant has a degree from a university in an English-speaking country, the TOEFL is not required.

An applicant who is admitted with a TOEFL (or IELTS) score below the required minimum, and who has not obtained a degree in an English-speaking country, must take the English Language Placement Test given by the Intensive English Language Institute (IELI) at USU. The test must be taken before a student is allowed to register. The results of the exam are used to place students into one of three categories: (1) full-time study of English in the Intensive English Language Institute; (2) a combination of English-language study and academic study, if approved by the IELI director, the student’s advisor, and the graduate dean; or (3) full-time academic studies. Students placed in the Intensive English Program must remain in the program until the required English proficiency is attained. Those in category (1) are not allowed to register for non-IELI classes.

International students must also submit an I-20 application form and a financial guarantee. Because of immigration regulations, international students cannot be admitted to provisional matriculation.

Application Target Dates
Completed application forms, transcripts, letters of recommendation, test scores, and the application fee should be submitted on or before the following dates (some departments have different deadlines; see departmental descriptions). It may not be possible to process applications for the following semester when they are submitted after the target date.

March 15 for summer semester
June 15 for fall semester
October 15 for spring semester

As soon as an application is complete, a recommendation is made by the appropriate department to the graduate dean, who must approve all admissions. The official notification of acceptance or rejection is sent by the graduate dean.

Program Continuity
A fee of $20 is charged if a student begins a graduate program before or after the semester for which he or she was accepted. If a graduate student’s attendance is postponed for more than one semester, the department or the School of Graduate Studies may require the student to reapply for admission.

Multiple Degree Programs
With the approval of the cooperating departments and the graduate dean, students may pursue more than one degree program.

An applicant should apply for admission to the first degree program. If admission is granted, the student may then apply for a second degree program, after submitting a letter from the head of the department to which the student has been admitted. The letter should indicate that the department has no objection to the student applying for the second degree program.

Graduate General Regulations
Each graduate student is responsible to know the policies, regulations, and procedures of the School of Graduate Studies and of his or her department or program, and to see that they are followed and that the timelines are met. The policies and regulations stated in this catalog and in departmental handbooks may be changed between publication dates, and students are responsible to obtain up-to-date information.

Time Limit
A master’s degree must be completed within six years of matriculation. A doctorate must be completed within eight years of matriculation.

Coursework that is more than eight years old may not be used for a graduate degree. If permitted by the departmental or interdepartmental degree program policy, a supervisory committee may allow revalidation through testing, following a plan developed by the supervisory committee and approved by the dean of the School of Graduate Studies. The results must be verified in writing to the graduate dean by the student’s major professor or other person(s) responsible for
the testing. Work experience cannot be substituted for out-of-date coursework or used for revalidation.

Graduate credits from another institution that exceed the eight-year limit at the time of degree completion may be transferred to a USU graduate degree only if the student’s supervisory committee provides a justification acceptable to the graduate dean. Then, the revalidation procedures described above apply.

Student Classifications

A matriculated graduate student has been accepted by a department, with the concurrence of the dean of the School of Graduate Studies, to an approved graduate degree program and has enrolled at the University. A student may be accepted on a provisional matriculation basis when (1) information, such as GRE scores, is yet to be received by the School of Graduate Studies, or (2) when a missing prerequisite or academic deficiency must be remedied. The conditions and time limit for remedying these deficiencies must be specified to the student in writing at the time of admission. If the conditions are not met as specified, the student’s participation in the degree program will be terminated. International students cannot be admitted on provisional status.

A full-time matriculated graduate student must be one of the following:

1. Registered for 9 or more graduate credits; or
2. Registered for 6 or more graduate credits if employed as a graduate assistant for 15 hours per week or more; or
3. Registered for 3 graduate credits with all required coursework completed and only the research component of the degree remaining (the student’s Program of Study must have been submitted to the School of Graduate Studies); or
4. Registered for at least 3 graduate credits during the semester of the final thesis/dissertation defense or, in a nonthesis degree program, the last semester of coursework required on the student’s Program of Study.

Note: To defer a loan or to receive student loans, graduate students must be registered for at least 6 credits.

A matriculated-probationary graduate student has been placed on warned status because of inadequate progress in his or her degree program. The conditions to be met and the time limit for meeting them must be specified to the student in writing at the time he or she is placed on probation. If the conditions are not met as specified, the student’s participation in the degree program will be terminated.

Graduate assistants and fellowship recipients must be full-time matriculated students with a GPA of 3.0 or above, and must be registered each semester of the assistantship or fellowship, including summer.

A nonmatriculated postbaccalaureate student holds a bachelor’s degree, is enrolled for USU coursework, but has not been accepted to a graduate degree program. If an application for graduate studies has been submitted to the School of Graduate Studies, a student may apply through the School of Graduate Studies to enroll as a nonmatriculated student. A letter must be submitted from the graduate department head or graduate program coordinator giving permission for the student to be entered on the computer as a nonmatriculated student. If the student does not intend to pursue a graduate degree, the student should apply to the undergraduate Admissions Office to enroll as a nonmatriculated student. A maximum of 12 semester credits earned as a nonmatriculated, postbaccalaureate student may be used in a graduate degree program, but only if approved by the student’s supervisory committee.

An international student must be admitted to a degree program and hold a valid F-1 or J-1 visa before enrolling in classes at Utah State University. A student on an F-1 or J-1 visa must maintain full-time student status throughout the degree program. For other information about the University, he or she can contact the International Students and Scholars Office, Utah State University, 0140 Old Main Hill, Logan UT 84322-0140, tel. (435) 797-1124.

Split Form Policy

An undergraduate student doing well in his or her studies and planning a graduate degree at USU may file a Split Form to request that some coursework be reserved (split out) from the undergraduate degree. The instructor’s permission is required for an undergraduate student to register for graduate courses. For a Split Form to be approved, the student must be within 30 semester credits of completing bachelor’s degree requirements, have filed an Application for Graduation in the Graduation Office (a copy of which must be attached to the split request), be currently taking at least one required undergraduate class, have a cumulative undergraduate GPA of 3.0 or higher at the beginning of the semester listed on the Split Form, and have applied for admission to the School of Graduate Studies. In accordance with School of Graduate Studies admission policy (see pages 99-100), a transitional student will not be matriculated in the School of Graduate Studies until his or her bachelor’s degree has been completed. A maximum of 9 semester credits may be split out during a bachelor’s program.

A Split Form, which must include one or more required undergraduate courses from the student’s Application for Graduation, should be filed in the School of Graduate Studies, along with a copy of the Application for Graduation, before grades are posted for the semester requested to be split. A Split Form cannot be processed after the bachelor’s degree has been closed out and posted on the transcript. The form must be signed by the undergraduate advisor and the graduate department head or departmental graduate program chair/coordinator before it is submitted to the School of Graduate Studies. If approved by the dean of the School of Graduate Studies, the form will be processed and forwarded to the Graduation Office. Approval of a Split Form does not guarantee acceptance to the School of Graduate Studies.

By default, courses numbered 0010 through 4990 will be posted to an undergraduate transcript; and courses numbered 6000 through 7990 will be posted to a graduate transcript. Courses numbered 5000 through 5990 are generally posted to either an undergraduate or graduate transcript, based on the primary program level of the student. Therefore, undergraduate students who qualify (under the regulations shown above) to have some of their undergraduate coursework “split out” for a graduate degree will need to submit a form to the Registrar’s Office stating which undergraduate courses they desire to have “split out.” Students should contact their undergraduate advisor for help with filing the appropriate form. In cases where a graduate student has taken one or more undergraduate-level courses as part of the approved program of study, a form will need to be submitted to the Registrar’s Office, requesting that the course(s) be posted to the graduate transcript. Students should contact their graduate advisor for help with filing the appropriate form.
Course-Level Numbering and Acceptability

7000-7990 are doctorate-level courses. With supervisory committee and instructor approval, they may be used in a master’s program.

6000-6990 are master’s-level courses. With supervisory committee approval, they may be used in a doctoral program.

5000-5990 are advanced, upper-division courses and may be used in a graduate program if approved by the supervisory committee (see below).

3000-4990 are junior/senior, upper-division undergraduate courses. Up to 3 semester credits of coursework at this level may be used (see below).

No more than 15 semester credits of 3000-5990 level coursework may be used for a graduate degree, except for a doctorate without a master’s degree, for which a total of 21 semester credits of 3000-5990 level coursework may be used. Up to 3 semester credits of coursework at the 3000-4990 level may be included within the 15 or 21 semester credit limit, upon recommendation by the student’s supervisory committee and approval by the graduate dean. To be approved, such courses must be outside the student’s graduate-degree field. Courses that students entering the graduate program are expected to have taken as undergraduates and prerequisites for graduate courses are not acceptable.

2990 and below are lower-division courses and are not acceptable for graduate degree programs of study.

6990 and 7990 (continuing graduate advisement) credits, INST 7920, and IELI 7920 cannot be used in a degree program.

Audited courses may not be used for a degree program or toward status as a full-time student. Credits in the following areas are not acceptable in a degree program: foreign languages, continuing graduate advisement, individual home study, military science, and courses numbered below 3000. No more than 12 workshop credits may be applied to a master’s degree.

Minimum Grades and Credit Acceptability

Graduate students are required to maintain at least a 3.0 GPA for degree-program courses. Grades below C will not be accepted for a graduate degree. Some departments do not accept C grades.

P-Grade Policy

P (Pass) will be accepted only for seminars, special problems, interdisciplinary workshops, thesis or dissertation research, and continuing graduate advisement. Credits for a course with a P grade cannot be transferred from another university.

Correspondence Course Credits

Continuing Education correspondence (independent home study) courses are not accepted for graduate degrees.

Credit by Special Examination

Credit earned by special examination cannot be used to satisfy the course requirements for a graduate degree or to meet the residency requirement.

Transfer Credits

A student’s supervisory committee may recommend transfer of graduate credits earned at another accredited institution. The credits must not have been used for another degree. Only 12 semester credits earned before matriculation at USU may be transferred. Credits with P grades cannot be transferred. Transfer credits cannot replace required residency credit. Transfer credits are subject to approval of the supervisory committee and the dean of the School of Graduate Studies. Transfer credit which is more than eight years old may not be acceptable (see Time Limit section, pages 100-101). Transfer credits will be shown on official USU transcripts upon completion of the degree.

Rights in Inventions

It is the student’s responsibility to be aware of University policy in regard to rights in inventions. (Information is available in the Office of the Vice President for Research.)

Research Approval

All University research involving human subjects, animal subjects, radiation materials, recombinant DNA, or biohazardous materials must be reviewed and approved by the appropriate University committee(s) before the research is started. Graduate students are, with the assistance of their advisors, responsible for obtaining the necessary approval for their research. Verification of approval must be submitted to the School of Graduate Studies before the student’s master’s Program of Study or doctoral Application for Candidacy can be approved. For further information, contact the School of Graduate Studies or the Office of the Vice President for Research.

Continuous Graduate Registration

Graduate students using University facilities or faculty time must be registered for a minimum of 3 graduate credits every semester until completion of all degree requirements, except, in some cases, the semester of final thesis or dissertation approval (see below). Students employed as graduate assistants or graduate instructors during all semesters, including summer, must be registered as full-time matriculated students (see page 101). More than 3 credits of continuous registration may be required by a department. An off-campus student in a planned Extension program who is enrolled in a 1- or 2-credit course that is the only course offered locally that semester may be approved by the graduate dean for continuous registration upon written recommendation of the department head. Continuous registration may be met with courses, seminars, independent study, research credit, or 6990 or 7990 (Continuing Graduate Advisement). The continuous registration requirement goes into effect the semester a student matriculates in the School of Graduate Studies.

A graduate student who is not using University facilities or faculty time may meet the continuous registration requirement by paying the Continuous Registration Fee of $15 per semester (not necessary for summer semester). This alternative requires a written request from the department head, including verification that the student is not using University facilities and/or faculty time. International students usually do not qualify to pay the Continuous Registration Fee because of immigration regulations.
School of Graduate Studies

Monitoring of Progress

The student’s department and the School of Graduate Studies monitor the progress of graduate students. For continued participation in a graduate program, a student must complete requirements in a timely manner. In reviewing a student’s progress, several factors will be considered, including demonstrated ability to develop a thesis proposal, independence in the conduct of research, performance on comprehensive examinations, GPA, and special program requirements. Satisfactory progress also involves maintaining the standards of professional ethics and integrity expected in the student’s discipline.

Academic Nepotism

A faculty member is not to participate in admission or graduate-assistant employment decisions, serve as major professor, or serve on the supervisory committee of a relative, including a person with whom he or she has or has had an amorous relationship. Graduate students may enroll in classes taught by a relative only under special conditions. For information, contact the department head or the School of Graduate Studies.

Matriculation of Faculty

It is the policy of USU not to grant advanced degrees to its own faculty, except under unusual circumstances (see Faculty Policy 404.1.4).

Academic Honesty and Research Misconduct

Maintaining the highest standards of academic honesty and research ethics is especially important at the graduate level, where students are expected to do original, scholarly work in preparation for future professional and academic roles. Academic dishonesty is defined in The Code of Policies and Procedures for Students at Utah State University (April 2002) Article V, Section 3 (see page 41 of this catalog) to include cheating, falsification of information, and plagiarism.

Violations of the above policy will subject the offender to the University disciplinary procedures as outlined in Article VI, Section 1 of the student Code, with the penalties or disciplinary measures to include one or more of the following:

1. Probation. Continued participation in an academic program is predicated upon the student satisfying certain requirements as specified by the University. Probation is for a designated period of time and includes the probability of more severe disciplinary penalties if the student does not comply with the specified requirements or is found to be violating the Honor System during the probationary period.

2. Suspension. Temporary dismissal from the University for a specified time, after which the student is eligible to return. Conditions for readmission may be specified.

3. Expulsion. Permanent dismissal from the University.

4. Honor System violation. Assigning a designation with a course grade indicating an Honor System violation involving academic dishonesty.

5. Denial or revocation of a degree.

The semester a student defends (or redefends) a thesis, Plan B paper, or dissertation or takes final oral examinations, he or she must be registered for at least 3 credits. Doctoral and master’s Plan A, Plan B, and Plan C students will be given until the last day of the next semester (known as a “grace” semester) following the defense to finish degree requirements, and Plan C students will be given until the last day of the next semester after coursework completion to finish degree requirements. If a student has not completed all degree requirements by the end of the grace semester, the student must pay a $100 Late Completion Fee for each semester following the grace semester. If working with faculty involves more than routine submission of the thesis or dissertation to the assistant dean, registration for 3 or more credits is required. After one year, redefense may be required.

Because of SEVIS regulations, a student holding an F-1 or J-1 visa is not eligible to pay the $100 fee to complete the degree, but must be registered as a full-time student through the semester of completion.

Leave of Absence

A leave of absence, during which neither continuous registration nor a $15 payment is required, may be granted under the following conditions:

1. Illness, required military service, and other extenuating circumstances acceptable to the department head and the graduate dean.

2. Lack of availability of courses in a planned Extension program.

3. Participation in a planned program based primarily on summer semester courses.

For either 2 or 3, the student must have an approved Program of Study on file in the School of Graduate Studies before a leave will be granted.

A leave of absence must be approved by the graduate dean, upon written recommendation of the department head. A leave of absence may be the basis for extending the time limit to complete a degree, but not to extend the time limit for course validity.

Low-Scholarship Notification

Students whose grade point average (GPA) is below 3.0 for any semester will be notified by letter that their academic performance is unsatisfactory. Students whose cumulative GPA falls below 3.0 will be placed on probationary status. If a student remains on probationary status for two consecutive semesters, the School of Graduate Studies will ask the student’s department to explain why the student’s graduate program should not be terminated. If the department cannot provide compelling reasons to explain why the student should continue graduate study, the student’s graduate program will be terminated. In the case of termination, reapplication is required to regain matriculation. Should a student holding a University appointment as a teaching or research assistant or fellow be changed to probationary status, the assistantship or fellowship will be terminated. Until a Program of Study is submitted to the School of Graduate Studies, the GPA will be computed using all coursework completed at USU since the prior degree. Once a Program of Study, approved by the student’s supervisory committee and department head, is filed in the School of Graduate Studies, the courses listed on it will be used to compute the student’s GPA if approved by the student’s department head. Departments may have more restrictive scholarship policies.

Monitoring of Progress

The student’s department and the School of Graduate Studies monitor the progress of graduate students. For continued participation in a graduate program, a student must complete requirements in a timely manner. In reviewing a student’s progress, several factors will be considered, including demonstrated ability to develop a thesis proposal, independence in the conduct of research, performance on comprehensive examinations, GPA, and special program requirements. Satisfactory progress also involves maintaining the standards of professional ethics and integrity expected in the student’s discipline.

Academic Nepotism

A faculty member is not to participate in admission or graduate-assistant employment decisions, serve as major professor, or serve on the supervisory committee of a relative, including a person with whom he or she has or has had an amorous relationship. Graduate students may enroll in classes taught by a relative only under special conditions. For information, contact the department head or the School of Graduate Studies.

Matriculation of Faculty

It is the policy of USU not to grant advanced degrees to its own faculty, except under unusual circumstances (see Faculty Policy 404.1.4).

Academic Honesty and Research Misconduct

Maintaining the highest standards of academic honesty and research ethics is especially important at the graduate level, where students are expected to do original, scholarly work in preparation for future professional and academic roles. Academic dishonesty is defined in The Code of Policies and Procedures for Students at Utah State University (April 2002) Article V, Section 3 (see page 41 of this catalog) to include cheating, falsification of information, and plagiarism.

Violations of the above policy will subject the offender to the University disciplinary procedures as outlined in Article VI, Section 1 of the student Code, with the penalties or disciplinary measures to include one or more of the following:

1. Probation. Continued participation in an academic program is predicated upon the student satisfying certain requirements as specified by the University. Probation is for a designated period of time and includes the probability of more severe disciplinary penalties if the student does not comply with the specified requirements or is found to be violating the Honor System during the probationary period.

2. Suspension. Temporary dismissal from the University for a specified time, after which the student is eligible to return. Conditions for readmission may be specified.

3. Expulsion. Permanent dismissal from the University.

4. Honor System violation. Assigning a designation with a course grade indicating an Honor System violation involving academic dishonesty.

5. Denial or revocation of a degree.

Research is a vital part of the education of most graduate students, and appropriate scientific and research conduct is expected. An allegation of scientific misconduct involving funded research is handled through the Office of the Vice President for Research. If the research is nonfunded, the allegation is handled following The Code of Policies and Procedures for Students at Utah State University.

Research misconduct may be determined during a student's program or after the program is completed. If a student is found guilty of research fraud, the penalty may include, in addition to any listed above, correction and reanalysis of data and/or rewriting of the thesis or dissertation, with resubmission and redefense of the thesis or dissertation, and/or loss of financial assistance.

Appeals Procedure
Graduate students with grievances relating to academic matters may appeal to the dean of the School of Graduate Studies following the steps and procedures in The Code of Policies and Procedures for Students at Utah State University.

Graduate Degree Requirements
Each graduate student must be aware of degree requirements and must work with his or her major professor, supervisory committee, and department head to meet the requirements and specific deadlines.

Master's Degrees
When a student is accepted to a master's degree program, the department head appoints a temporary advisor, who may become the student's major professor. In most master's degree programs, a supervisory committee will be established for each student. During the first semester following matriculation, the student should meet with the department head to discuss the appointment of a supervisory committee. A completed Supervisory Committee form should be submitted by the department head to the dean of the School of Graduate Studies for final approval by the end of the student's first semester. Committee changes are not to be made during the six weeks prior to the final defense.

A master's degree supervisory committee must include at least three faculty members who are approved by the department head and the dean of the School of Graduate Studies. At least one member must represent the student's area of specialization, and at least one must be from outside the specialization area. Adjunct faculty can be members with the approval of the dean of the School of Graduate Studies. Upon recommendation of the department head, emeritus faculty may serve on supervisory committees, but may not chair new committees.

Within School of Graduate Studies and departmental requirements, the supervisory committee determines the courses for the student's Program of Study; conducts departmental qualifying examinations (if required); supervises the student's thesis research, Plan B paper, or project; and conducts the defense or final examination. The defense or final examination must be scheduled through the School of Graduate Studies. The major professor, who serves as the chairperson of the committee, usually directs the thesis, paper, or other degree project.

Three copies of a Program of Study form, one of which must be the original with signatures in ink, should be submitted to the School of Graduate Studies by the student before the end of the second semester following matriculation. The Program of Study must be submitted at least two months prior to the final examination or, for Plan C programs, completion of coursework. Amendments to the Program of Study require the signature of the major professor and written notification to each member of the supervisory committee. Submission of a new Program of Study is not necessary.

Plan A
The Plan A option for a master's degree requires preparation of a thesis. From 6-15 semester credits of thesis research are required. The semesters during which a student registers for thesis credit should correspond as closely as possible to the semesters in which the thesis work is done and faculty supervision is provided.

The thesis for a Plan A master's degree is to be a contribution to the field of knowledge, based on the student's own research or a treatment and presentation of known subject matter from a new point of view. The student and major professor should decide upon a problem or subject for the thesis study by the end of the student's first semester of graduate study.

A Thesis Proposal, signed by the entire committee, should be submitted by the student to the School of Graduate Studies along with the Program of Study form.

The student and all committee members are required to sign a Data and Copyright form and a Plans for Publication form. The forms are given to the student with his or her copy of the approved Supervisory Committee form and must be submitted to the School of Graduate Studies prior to the final defense.

Plan B
The Plan B option requires the production of a paper or a creative work of art. At least 2 credits of thesis research are required, but no more than 3 credits of thesis credit can be included on the Program of Study.

The Plan B paper is usually a review of literature, with conclusions drawn after conceptualizing an area of inquiry, planning a systematic search, and analyzing and critiquing the acquired information. The summary and conclusions developed should enhance knowledge in the discipline.

Plan B papers and reports should follow the same format specifications as theses and dissertations and are expected to reflect equivalent scholarship standards, even though they may be less intensive and not demand the originality of a Plan A thesis. Plan B papers are defended, but are not reviewed by the School of Graduate Studies assistant dean or signed by the graduate dean. Plan B papers must be submitted to the Merrill-Cazier Library to be microfilmed, and the binding receipt must be returned to the School of Graduate Studies.

Plan C
A master's degree option with no thesis or Plan B paper is available in some programs. A departmentally approved program that includes a culminating creative or integrative experience must be filed in the School of Graduate Studies. Generally, a course or seminar on research methods is required, but thesis credits are not accepted. Plan C students should contact their department early in their final semester to be certain that all degree requirements, including completion of graduation forms, will be met, and that all appropriate paperwork has been sent to the School of Graduate Studies.

Master of Arts
Requirements for the Master of Arts (MA) degree (except in the Art Department) include two years (approximately 15 semester credits) of an acceptable second language, which may include American Sign Language, with grades of C or above (unless a higher minimum grade
School of Graduate Studies

is required by the department), or the equivalent level of learning as determined by testing approved by the supervisory committee and the graduate dean. One year each of two languages, or the equivalent as determined by approved testing, is acceptable if approved by the student’s supervisory committee. Coursework to meet this requirement cannot have been used for another degree and cannot be more than eight years old.

Computer languages are not acceptable for the MA degree.

Approved testing procedures include the following:

1. Take and pass (C or above, unless the department requires a higher minimum grade) a language course at the appropriate level (i.e., the final course in a two-year sequence).

2. Take a test given by USU's Languages, Philosophy, and Speech Communication Department or at the BYU Testing Center and be certified for language equivalency for 15 or more semester credits. To obtain information on languages for which tests are available at USU and BYU, as well as to make arrangements for testing, contact the USU Department of Languages, Philosophy, and Speech Communication.

3. Arrange testing at another university center or testing agency approved by the department and the graduate dean.

4. For an international student: (a) certification of English competency through either a TOEFL score of 550 or above, a passing score on the IELI English Proficiency Test, or completion of IELI courses; and (b) certification of a second language through courses.

Credit Requirement
The minimum requirement for a master’s degree is 30 semester credits, except for a Plan C degree for which the minimum is 33 semester credits. For the MEd degree, the minimum number of semester credits is 36. The Master of Fine Arts is regarded as a terminal degree and requires a minimum of 60 semester credits.

Residency Requirement
At least 24 semester credits for a master’s degree must be from an approved Program of Study from Utah State University.

Post-Master’s Professional Degrees
Three degrees—the Civil Engineer (CE), the Master of Computer Science (MCS), and the Educational Specialist (EdS)—are designed for students who seek to improve their professional skills and knowledge beyond the master’s degree. The minimum requirement for each of these degrees is 30 semester credits beyond the master’s degree (60 credits beyond a bachelor’s degree). Each degree requires a project report that is prepared to the same format specifications as a thesis, but is not reviewed by the School of Graduate Studies assistant dean or signed by the graduate dean.

Doctoral Degrees
When a doctoral student is admitted, the department head appoints a temporary advisor to work with the student until a supervisory committee is established. A Supervisory Committee form must be submitted to the dean of the School of Graduate Studies for approval by the end of the student's second semester following matriculation. Committee changes are not to be made during the six weeks prior to the final defense.

A doctoral supervisory committee must include at least five faculty members with doctoral degrees who are approved by the department head and the dean of the School of Graduate Studies. Three members must be from within and at least one must be from outside the department or interdepartmental degree-granting program in which the student is matriculated. Adjunct faculty can serve on doctoral committees with the approval of the dean of the School of Graduate Studies. Upon recommendation of the department head, emeritus faculty may serve on supervisory committees, but may not chair new committees.

The supervisory committee specifies the student’s Program of Study; supervises the student’s qualifying examination (if there is one) and comprehensive examination, unless some other departmental or program procedure is in place; approves the dissertation proposal and supervises the student’s research and preparation of the dissertation; and conducts the final oral examination. The major professor is the chairperson of the committee and usually directs the student’s research. Continuation in a doctoral program is contingent upon the availability of a major professor.

By the end of the third semester, the student should have submitted a Program of Study to the School of Graduate Studies. Amendments to the Program of Study require the signature of the major professor and written notification to the other members of the supervisory committee.

Submission of a new Program of Study is not necessary.

The student and all committee members are required to sign a Data and Copyright form and a Plans for Publication form. The forms are given to the student with his or her copy of the approved supervisory committee form and must be submitted by the student to the School of Graduate Studies with the Program of Study.

Some departments or interdepartmental programs administer qualifying examinations. Each department or program has the responsibility of administering comprehensive examinations.

Following completion of all or most courses, successful completion of comprehensive examinations, and approval of a proposal for dissertation research, and at least three months before the final defense, the student must submit an Application for Candidacy form to the School of Graduate Studies, along with a copy of the dissertation proposal, signed by all members of the supervisory committee.

Submission of the candidacy form is a major step in the student's program, because the committee and department head thereby attest that the student is ready to conduct independent dissertation research, although successful completion of that requirement is not guaranteed.

Credit Requirement
The minimum requirement for a doctoral degree is 60 approved semester credits in addition to a master’s degree, or 90 approved graduate semester credits with no master’s degree. Coursework cannot be used for more than one degree.

A minimum of 12 dissertation credits is required for a post-master’s doctorate and a minimum of 18 for a no-master’s doctorate. The semesters during which a student registers for dissertation credit should correspond as closely as possible to the semesters in which the dissertation work is done and faculty supervision is provided.

Residency Requirement
For the PhD, a minimum of 33 USU credits from an approved Program of Study is required. At least three semesters, two of which must be consecutive, of full-time registration in residency at USU are required. For the EdD, a minimum of 39 USU semester credits from an approved Program of Study is required.
program of study is required. At least three semesters must be full-time registration in residence at USU; none of the semesters need to be consecutive, but two full-time semesters must be taken on campus prior to dissertation credit. Some departments also have language requirements.

**Transfer Credits**

With the approval of the supervisory committee and the graduate dean, graduate credit may be transferred from an accredited graduate school, provided the minimum residency requirements are met and the credit has not been used for any other degree. Transfer credit more than eight years old may not be acceptable (see *Time Limit* section, pages 100-101). Transfer credits will be shown on official USU transcripts upon completion of the degree.

**Preparation and Approval of Theses, Plan B Papers, and Dissertations**

Before beginning work on a thesis, Plan B paper, or dissertation, a student should obtain the *Publication Guide for Graduate Students*, available online or from the USU Bookstore, and the style manual or journal approved by the supervisory committee and/or department. These documents will guide the student in the proper preparation of his or her manuscript. Theses and dissertations may be prepared in either traditional or multiple-paper format. One article or article-manuscript may not be submitted as a thesis or dissertation.

Preparation of a thesis, Plan B paper, or dissertation is the culminating learning experience for a graduate student. The quality of the product, which should represent the student’s own best work, is the responsibility of the student. Monitoring the quality of the thesis, Plan B paper, or dissertation and mentoring the student in writing are responsibilities of the major professor, with the assistance of the supervisory committee. Editing by anyone other than the major professor and the supervisory committee should be limited to mechanics, such as spelling and grammar.

Drafts of sections should be submitted periodically to the major professor for critique. Committee members should be consulted, especially on sections that involve their special expertise. Upon request, the School of Graduate Studies assistant dean (in Main 164) will review an early draft for format and style. Students may also attend a thesis workshop. For more information about these workshops, see: [http://www.usu.edu/gradsch/thesis-diss-info/](http://www.usu.edu/gradsch/thesis-diss-info/)

**Oral Examination and Defense**

The final defense should be scheduled by the student after all courses and the thesis, Plan B paper, or dissertation are completed. Changes in the membership of a supervisory committee cannot be made during the six weeks prior to the defense without a written request from the department head and approval of the graduate dean.

At least four weeks prior to the defense, the student shall give a copy of the thesis, Plan B paper, or dissertation to each member of the supervisory committee for approval or corrections. An *Appointment for Examination* form must be completed by the student and committee, indicating approval of the proposed time and place for the examination and defense, and submitted by the student to the School of Graduate Studies a minimum of ten working days prior to the exam.

The deadline for completing degree requirements is the last day of the semester. When the defense is scheduled during a semester break, the student must enroll for at least 3 credits the following semester.
Final Steps

The following forms must be completed and submitted to the School of Graduate Studies, before degree requirements are considered completed.

1. Graduation Fee Payment Form requires $15 payment at the Registrar’s Office.

2. Commencement Data Card

3. Survey of Earned Doctorates, if a doctoral student

4. Alumni Card

In addition, three copies of the thesis or dissertation and one additional copy of the title page and an abstract for ProQuest (UMI) (150-word maximum for theses and 350-word maximum for dissertations) must be submitted to Current Periodicals in the Merrill-Cazier Library. The following fees must be paid at this time:

Binding fee for two of the three required copies.........................$30
Binding and processing fee for personal copies* ...................$15 per copy
Processing and handling fee ..............................................$15
ProQuest (formerly UMI) Microfilming Fee .........................$55 (doctoral)
ProQuest (formerly UMI) Microfilming Fee .........................$45 (master’s)
ProQuest Copyright Registration Fee ..................................$45 (optional)
Processing and Handling Fee ...........................................$15

*The student is responsible for verifying that the personal copies are complete and have been copied and/or printed without errors.

The Current Periodicals personnel will provide a paper receipt, which must be submitted to the School of Graduate Studies before the degree is considered completed.

The final committee-approved Plan B paper must be taken to Special Collections in the Merrill-Cazier Library to be microfiched. Special Collections personnel will provide a paper-receipt that must be submitted to the School of Graduate Studies before the degree is considered completed.

Also, incomplete grades must be removed from the student’s record by the major professor using forms provided by the Registrar’s Office. For Plan B and C programs, the School of Graduate Studies must receive a letter of completion from the department head or interdepartmental program director. It is the student’s responsibility to ensure that these final steps are taken.

Delay of Publication Policy

A thesis or dissertation must not contain material that cannot be disclosed publicly. However, occasionally it is in the University’s best interest to delay disclosure of the contents of a thesis or dissertation while patenting and/or commercial development possibilities are investigated or for a period of report review by a funding agency. In such cases, publication of a thesis or dissertation through submission to the Merrill-Cazier Library and to ProQuest (UMI) may be delayed without delaying award of the student’s degree. A copy of the publication delay policy, including the procedures for requesting a delay in library submission, may be obtained from the School of Graduate Studies.

Diplomas and Commencement

Diplomas are prepared by the Registrar’s Office at the end of each semester. If a student needs verification of completion of a degree before the end of the semester, the registrar will provide an official Certificate of Completion prior to the last two weeks of the semester. The actual date of completion is usually the date the graduate dean approves a thesis/dissertation or the date a departmental letter of completion is received by the School of Graduate Studies.

During fall and spring semesters, only students completing degrees by the published Commencement deadline dates for a given year will be included in the official Commencement program, although other students who complete requirements by a later date during the semester, established by the graduate dean, may participate in the graduate Commencement/Hooding ceremony. Their names will be printed in the next Commencement program.

Graduate Interdepartmental Curricula

Concurrent Degrees

Students may pursue concurrent master’s degrees or concurrent master’s and doctoral degrees with the approval of the cooperating departments and the graduate dean.

An application should be submitted for the first degree program. If admission is granted, the student may then apply for a second degree program after submitting a letter from the head of the department to which the student has been admitted. The letter should indicate that the department has no objection to the student applying for the second degree program. To be considered as concurrent degrees, admission to the second degree program must be finalized before the end of the first semester in the first degree.

Guidelines for Concurrent Master’s Degree Programs

In special cases, a student may complete concurrently the requirements for two master’s degrees in different departments but with fewer than the total credits required by both programs, provided that the following conditions are met:

1. The student must formally apply and be accepted into both programs by the end of the first semester of the student’s graduate program.

2. The chairperson of the student’s supervisory committee in each department must also be a member of the other committee.

3. The supervisory committee, the two department heads, and the graduate dean must approve the Program of Study for each degree.

4. There can be a maximum of 9 credits of overlap in courses between the two degree programs, and the overlap must be in the elective or broadening courses. With the allowance of overlapping, a student could thus complete the requirements for both degrees with up to 9 fewer semester credits than the usual minimum total for two degrees.
Guidelines for Concurrent Doctoral-Master’s Degree Programs
In special cases, a student may complete concurrently the requirements for a doctorate and a master’s degree in different departments with fewer than the total credits required by both programs, provided that the following conditions are met:

1. The student must formally apply and be accepted into both programs by the end of the first semester of the student’s graduate program.

2. The student’s doctoral supervisory committee must consist of four members from the doctoral department and two members from the master’s department if the student is on a thesis plan. The master’s committee must consist of two master’s departmental members and the chair of the doctoral committee.

3. The student’s supervisory committee, the two department heads, and the graduate dean must approve each Program of Study.

4. There can be a maximum of 15 semester credits of overlap in courses between the two degree programs, and the overlap must be in the elective or broadening courses. With the allowance of overlapping, a student could thus complete the requirements for both degrees with a minimum of 75 semester credits, rather than the usual 90-credit minimum.

Interdepartmental Degrees and Certificates
Several interdepartmental graduate degrees are offered at Utah State University. These include: the Interdepartmental Doctoral Program in Education (EdD, PhD), the Interdepartmental Program in Ecology (MS, PhD), the Master of Business Administration (MBA), the Master of Science in Bioregional Planning, the Interdepartmental Program in Social Sciences (MSS), the Interdepartmental Program in Toxicology (MS, PhD), and the Master of Natural Resources (MNR). Also offered are the following three interdisciplinary certificates: National Environmental Policy Act (NEPA), Natural Resource and Environmental Policy, and Natural Resources and Environmental Education (NREE).

Descriptions of the interdepartmental graduate programs are included alphabetically within the Instructional Units and Programs section of this catalog.
The success of various curricula in agriculture is manifest by the achievements of the graduates. They are setting new standards for agricultural production and in positions as professional specialists, teachers, research investigators, and leaders in agriculture and related industries locally, nationally, and internationally.

Education in agriculture includes fundamental science as well as applied business and technology. Many graduates continue their education for advanced degrees and other specialized education and training.

Admission Requirements

Undergraduate students accepted in good standing by the University are eligible for admission to the College of Agriculture.

Facilities and Equipment

The E. G. Peterson Agricultural Science Building houses the administrative offices of the College of Agriculture; the Agricultural Experiment Station; University Extension; the Animal, Dairy and Veterinary Sciences Department; and the Plants, Soils, and Biometeorology Department. The Animal, Dairy and Veterinary Sciences Department personnel are housed in the Agricultural Science Building, the Animal Sciences Building, the Biotechnology Center, the Skaggs Laboratory, and the Veterinary Science Building. The Agricultural Systems Technology and Education Department is located in the Agricultural Systems Technology and Education Building. The Economics Department is housed in the George S. Eccles Business Building. The Department of Nutrition and Food Sciences is housed in the C. A. Ernstrom Nutrition and Food Sciences Building. Some classes and laboratories are located on Agricultural Experiment Station facilities near the campus, where research and teaching interact.

Research units located in more distant areas of the state provide research opportunities for graduate students and faculty members.

Curricula in Agriculture

Students may work toward the Bachelor of Science degree in any of the departments of the College of Agriculture. Preveterinary training is offered in the Department of Animal, Dairy and Veterinary Sciences.

There are three basic curricula offered by most departments: (1) science, (2) general or production, and (3) business. Departmental listings detail the requirements for earning a degree in these curricula.

Science

Students who choose the science curriculum are taught the fundamentals of physical and biological sciences that are significant to agriculture, including biotechnology and genomics. In the basic science courses, students prepare themselves for graduate work and eventually research and teaching careers in the natural sciences. Graduates in science curricula are also prepared to do research or technical work in agriculturally oriented businesses such as farm chemicals, livestock health, feed processing and marketing, crop breeding, water use, and food processing.

Science curricula are offered in the Departments of Animal, Dairy and Veterinary Sciences; Nutrition and Food Sciences; and Plants, Soils, and Biometeorology.

General or Production

This curriculum is designed to educate students to meet the special demands of today’s agriculture. Successful modern agricultural production requires an understanding of the latest scientific knowledge and an ability to apply the information. The production curriculum will satisfy the needs of a student who plans to be involved in production agriculture, to be a farm manager, or to work directly with farm operators as a businessman or as a government or farm organization employee.

This curriculum is offered in the Departments of Agricultural Systems Technology and Education; Plants, Soils, and Biometeorology; and in the animal and dairy majors of the ADVS Department.

Business

The businesses and industries that buy from, sell to, and provide service for people involved in production agriculture are expanding the need for employees educated in agriculture. These enterprises include feed, fertilizer, machinery, and chemical firms that supply the
producer’s needs, as well as marketing firms that assemble, process, ship, and merchandise agricultural products. Managers of large-scale farm enterprises also profit from the kind of education provided by the business curriculum. Students who want to capitalize on their agricultural background while pursuing a business or industrial career should consider the business option.

This curriculum is offered in the Departments of Economics; Agricultural Systems Technology and Education; Nutrition and Food Sciences; Plants, Soils, and Biometeorology; and in the animal and dairy majors of the ADVS Department.

Interdepartmental and intercollege cooperation has and will continue to facilitate the development of various other curricula. Students should not hesitate to inquire about the possibilities of following a curriculum that would allow for special needs. The College of Agriculture participates in the Interdisciplinary Studies Major (see pages 342-343), which offers flexibility for qualifying students who cannot find an existing degree that meets their needs. Advisors in each department are available and should be consulted for guidance in scheduling classes and in planning careers.

**Financial Support**

The College of Agriculture and the agricultural industry in the Intermountain West annually sponsor over 100 scholarships, internships, and assistantships. The college and the local agribusinesses also support many students through work experience programs. For further information, contact the College of Agriculture Dean’s Office (Agricultural Science 223) and/or individual department offices.

---

**Safety and Liability in Classes and Laboratories**

Certain classes and laboratories involve a risk of bodily injury or of damage to clothing. Students should take appropriate precautions and wear suitable protective clothing. Some of the risks include handling or being near animals, slick floors or corrals, use of toxic or corrosive substances, and the use of sharp or breakable instruments and equipment. Students should take safety precautions during demonstrations or work with animal tissues or operative procedures. Students must assume their own liability protection for travel to and from classes, laboratories, and field trips. The University and its employees assume no liability in the performance of classroom or laboratory instruction or on scheduled field trips, or for other dangerous activities. The student, by voluntarily participating in these classes and activities, agrees to assume the risk and not hold USU or its staff liable.

Director of Business Graduate Programs:
Mary Jo Blahna, Business 809, (435) 797-2360, maryjo.blahna@usu.edu

Academic Departments
The College of Business includes the following academic departments. Information about degrees and curriculum options are listed in the departmental sections of this catalog.

Accountancy, School of Business Administration
Business Information Systems
Economics (jointly administered with the College of Agriculture)
Management and Human Resources

Interdisciplinary/College Programs
The College of Business offers the following programs in addition to those offered by academic departments. Detailed descriptions of these programs are provided in this section of this catalog and in the separate Master of Business Administration (MBA) section.

Major in Business
Dual Major and Second Bachelor’s in Business
Minor in Business
Minor in International Business
Master of Business Administration (MBA)

Nondegree and Other Programs
A wide variety of seminars and development programs are sponsored by college units and academic departments. For example, Business Relations operates the Partners in Business program and the Shingo Prize for Excellence in Manufacturing. Partners in Business provides a forum for the exchange of ideas, strategies, and innovative business practices through low-cost, high-quality management education seminars for working professionals. The program is managed by a staff of dedicated business students under the supervision of the program director. Annual seminars include: Financial Services and Banking, Operatioal Excellence, Accounting, Customer Service and Marketing, Women in Business, Information Technology, and Human Resources. The Shingo Prize for Excellence in Manufacturing is an award given to North American organizations in recognition of world-class business performance achieved through focused improvements in core manufacturing and business processes. The Shingo Prize is also awarded for research and writing that expands the knowledge and understanding of lean manufacturing processes. The college sponsors the Management Institute as a link between the talents of the faculty and the training needs of leaders in business, industry, and government. The Management Institute focuses on delivering high-quality, custom-designed training and development programs in outdoor experiential learning, indoor experiential learning, and data-based consulting. The Center for E-Commerce is a part of the Business Information Systems Department in the College of Business. The purpose of the center is to provide educational services within the University and community. The center includes e-commerce education, certification training, project coordination, and interdepartmental research.

Accreditation
College of Business programs in business and accounting are accredited by AACSB International—The Association to Advance Collegiate Schools of Business. AACSB is the premier accrediting association for business and accounting programs.

Vision
The College of Business is a School of Opportunity. It strives to be a highly sought first-rate business school, providing a springboard from which students can excel confidently and ethically in a global market.

Mission
The college is engaged in three primary activities: learning, discovery, and outreach. The learning or educational mission is to prepare future managers and leaders to positively contribute in a world community with a quest for life-long learning and self-improvement. The discovery mission is to aggressively support basic and applied research, ensuring the continued enlargement of the base of understanding about business, government, and other complex institutions; about the processes of managing and leading; and about the economic foundations upon which they function. The outreach mission is to provide innovative opportunities for the extended community through its own initiatives and through partnering with others.

Learning Goals
Regardless of their major, undergraduate College of Business students are required to take a common coursework core that includes learning experiences in both general knowledge and skills, as well as management-specific knowledge and skills. Nine specific learning goals drive the curriculum and are assessed for achievement. These goals are:

Goal 1
Each student can effectively communicate coherent and persuasive written reports and oral presentations.

Goal 2
Each student can recognize and analyze legal and ethical issues and choose appropriate actions for practical business situations.

Goal 3
Each student can correctly apply mathematical and statistical techniques appropriate for business analysis.

Goal 4
Each student can use contemporary information systems and technology in business decision-making.
College of Business

Goal 5
Each student understands the domestic and international economic environment in which business organizations operate.

Goal 6
Each student can evaluate the financial position of an organization and make appropriate financial decisions from an analysis of the organization’s financial information.

Goal 7
Each student can make appropriate decisions in the creation of value through the production and marketing of goods and services.

Goal 8
Each student can demonstrate an understanding of individual and group dynamics in organizations, including the use of team building and collaborative behaviors in accomplishment of tasks.

Goal 9
Each student can conceptualize complex business issues, apply analysis to identify plausible solutions, and communicate findings.

Assessment
Each of the nine learning goals is monitored and assessed for achievement. Information obtained through the assessment process is used to adjust and modify instructional methods and curriculum design as part of the college’s continuous improvement effort. Achievement of goals is assessed using both direct and indirect measures. Direct measures include selection of students, course-embedded measurements, and a national achievement test. Indirect measures include student, alumni, and employer surveys, as well as employment and career success of graduates. Specific assessments for the College of Business can be found at:
http://www.usu.edu/cob/web/cob/assessment.htm

Honors in Business
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Qualified students in all majors within the College of Business may pursue an Honors degree. Upon graduation, the student’s transcript will read: Graduated with Honors in [name of the major]. Honors students have the privilege of priority registration (registering a week before other students), as well as the privilege of enrolling in special course sections for honors students only. As part of a senior project, they have the opportunity to conduct business research of interest to them. Participating in the business honors program enriches the student’s educational experience, gains membership in the USU Honors Program, and enhances opportunities for admission to graduate and professional schools.

Eligibility for Acceptance
New freshmen with an Admission Index score of 126 or higher will be invited to participate in USU’s Honors Program and will be permitted to pursue Honors in Business. Admitted students must maintain a 3.50 minimum GPA in order to remain in the Honors Program. Sophomore, junior, and transfer students may apply or receive more information at the Honors Program Office, Main 15. Additional information can also be found online at: http://www.usu.edu/honors/

Program of Study
Honors in Business requires 15 credits, which may be completed in the following way. If specific honors courses are not taken, then other courses may be substituted upon approval of the College of Business honors advisor.

ECON 1500H (BAI) Introduction to Economic Institutions, History, and Principles ................................................................. 3 (taken during the fall of the first year)

ACCT 2010H Survey of Accounting I ........................................ 3 (taken during the fall of the second year)

MHR 3110H (DSS) Managing People and Organizations .......... 3 (taken during the spring of the second year)

At least one upper-division course in the major ..................... 3 minimum (taken under contract)

Supervised Senior Thesis/Project taken under one of the following (depending on major): ACCT 4950H, BA 4950H, BIS 4950H, ECON 4950H, or MHR 4950H (3 credits).

A student may elect to complete an Honors Advanced Internship (BUS 4250) by contract, in lieu of the Senior Honors Thesis/Project. For information about this option, contact Shauna Karren, College of Business Internship Director, Business 309, (435) 797-0333, shauna.karren@usu.edu.

College Honors Advisor
Clifford R. Skousen, Senior Associate Dean, College of Business, Business 202, (435) 797-2331, cliff.skousen@usu.edu.

Undergraduate Programs
Admission and Graduation Requirements

Freshman Admission
Students may be admitted directly into the College of Business as incoming freshmen if they have less than 24 earned post-high school college credits and if all of the following conditions are met: (1) admitted to Utah State University; (2) designated a College of Business major on USU application or submitted a College of Business application to the College of Business Career and Education Opportunities Center; (3) ACT Composite of 24 or higher; and (4) high school GPA of 3.5 or higher.

All admitted freshmen, regardless of declared College of Business major, must first complete the following four courses, or their equivalents, with a C grade or better in each course, as prerequisites to College of Business courses numbered 3000 and above: ECON 1500, Introduction to Economic Institutions, History, and Principles; MATH 1100, Calculus Techniques; STAT 2300, Business Statistics; and PSY or SOC 1010, General Psychology or Introductory Sociology.

Non-Freshman and Transfer Admission
USU students and transfer students from other accredited colleges and universities may be admitted directly to any College of Business major if they have met the following conditions: (1) admitted to Utah State University; (2) earned 24 or more post-high school college credits with 3.5 GPA or higher; and (3) designated a College of Business major on USU application (transfer students) or submitted a College of
Pre-Business Course Requirements (13 credits)

Applicants will be ranked according to an Application GPA that is calculated as follows: one-third weight on 13 credits earned in four required courses (ECON 1500, MATH 1100, STAT 2300, and PSY or SOC 1010); one-third weight on last 24 credits earned; and one-third weight on overall GPA. Essays will be evaluated by the admissions screening committee.

Students may not repeat a course more than twice, and may have no more than 10 repeats in total to earn a degree. (College of Business courses are limited to one repeat.)

Matriculation Requirement and Transfer Limitation

No more than 15 USU College of Business credits (ACCT, BA, BIS, BUS, MHR), numbered 2000 and above, earned as a nonbusiness major (before acceptance into the College of Business) can be applied to a College of Business degree. More than 15 business credits can be transferred from other accredited institutions. However, additional USU College of Business credits added to previously earned transfer business credits may not exceed a combined total of 15. Furthermore, to earn a bachelor's degree in a College of Business major, at least 50 percent of the required College of Business credits must be earned from coursework taken from the Utah State University College of Business.

Enrollment Restrictions

Admission to the College of Business does not ensure access to the courses required for graduation. The following course admission requirements must be met by all USU students:

1. There are no restrictions on 1000-level courses.

2. ACCT 2010, 2020, MHR 2050, and BIS 2100, 2200, require as prerequisites at least 15 credits of completed college-level work; an overall GPA (transfer credits included) of at least 2.50, and STAT 1040, or MATH 1030 or 1050. (MATH 1050 or equivalent is required for College of Business Majors.) In addition, BIS 2100 requires the CIL exam or equivalent.

3. Most 3000-, 4000-, and 5000-level departmental courses in the College of Business are restricted to students admitted to the College of Business or another USU major with an overall GPA of at least 2.67 and completion of at least 40 credits.

4. MHR 4880 and 4890 require completion of at least 90 credits for admission.

5. College of Business courses may be repeated only once.

6. Many College of Business courses have prerequisites and other restrictions requiring adherence. Before registering for courses within the College of Business, students should refer to course listings in this catalog or consult with their advisor to ensure they have completed the necessary prerequisites.

University Studies Requirements

All freshmen-level students who enter USU Fall of 1998 and thereafter will be required to meet the University Studies requirements. Students who have received an Associate of Arts/Science degree from a college or university in the Utah System of Higher Education or from a school with which USU or the College of Business has an articulation agreement will be considered to have fulfilled the General Education portion of the University Studies requirements, but must still complete the Depth Education portion. It is recommended that all business students visit with an advisor in the Career and Education Opportunities Center, Business 309, to clarify their specific requirements in this area. Additional information about these requirements is available on pages 49-57 of this catalog.

USU Credits and Business Credits

At least 30 of the last 60 semester credits must be taken from Utah State University, 10 of which must be included within the last 40 credits presented for the degree. At least 50 percent of the College of Business credits required for a College of Business degree must be taken from the Utah State University College of Business or its departments, which include: School of Accountancy, Business Administration, Business Information Systems, Economics, and Management and Human Resources.

Optional P/D+, D, F Grade Restriction

This option (see the USU “Grading Policy,” pages 38-40) is not available for any required courses for majors and minors in the College of Business.

College of Business Stop-out Policy

Students having a break in attendance of College of Business programs in excess of one year will be subject to the college and departmental requirements in effect at the time of their return.

Graduation

Students must satisfy all University, college, and departmental major requirements to be eligible for graduation. Refer to appropriate sections of this catalog for details.

Major in Business

The College of Business administers Bachelor of Science (BS) and Bachelor of Arts (BA) degree programs in business. Because these degree programs require a broad course distribution among the departments of the college, they are administered by the college, rather than by a specific department. These programs are primarily designed to be offered through the University’s Continuing Education centers. However, students may also satisfy degree requirements by taking equivalent coursework on the Logan campus. Further information is available in the College of Business Career and Education Opportunities Center, Business 309, (435) 797-2272.

Students who have been admitted to Utah State University and who have earned at least 24 post-high school credits qualify for admission to this major. However, a minimum 2.5 GPA is typically required for business courses taught through Continuing Education. An overall 2.50 GPA is required for graduation. On-campus departmental courses at the 3000-, 4000-, and 5000-level are restricted to students who have admitted to the College of Business or another USU major, and who have earned at least 40 credits; a minimum 2.67 GPA is typically required for these courses. In order to progress in the program, students must maintain the required GPA level. They must also satisfy all specific prerequisites required for each course.
**College of Business**

All students enrolled at USU are required to satisfy the General Education requirements and the University Studies Depth Education requirements of the University, as described on pages 49-57 of this catalog.

**Business Major Requirements (71 credits)**

Coursework in the following three categories must be completed in order to earn a BS or BA degree in Business: Pre-business, Business Core, and Option Areas.

**Pre-Business (17 credits)**

ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles ................................................. 3
MATH 1050 (QL) College Algebra ......................................................... 4
STAT 2300 (QL) Business Statistics .................................................. 4
PSY 1010 (BSS) General Psychology (3 cr) or SOC 1010 (BSS) Introductory Sociology (3 cr) ................................................. 3

**Business Core (36 credits)**

ACCT 2010 Survey of Accounting I .................................................. 3
ACCT 2020 Survey of Accounting II .................................................. 3
BIS 2100 Principles of Management Information Systems .................... 3
BIS 2200 (CI) Business Communication ............................................ 3
MHR 2050 Legal and Ethical Environment of Business ........................ 3
ECON 2010 (BSS) Introduction to Microeconomics ............................... 3
ECON 3400 (DSS) International Economics for Business ..................... 3
BUS 3110 (DSS) Management Fundamentals ....................................... 3
BUS 3400 (QI) Finance Fundamentals ............................................... 3
BUS 3500 Marketing Principles .......................................................... 3
BUS 3700 Operations Management Fundamentals ................................ 3
BUS 4880 (CI) Business Strategy ........................................................ 3

**Option Areas (18 credits)**

One of the following four option areas must be selected.

**Accounting Option**

BUS 3010 Intermediate Accounting I ................................................. 3
BUS 3020 Intermediate Accounting II ............................................... 3
BUS 3310 Managerial Cost Accounting ............................................... 3
BUS 3410 Federal Income Tax I ......................................................... 3
BUS 4250 Advanced Internship (6 cr) or Approved upper-division coursework (6 cr) ....................................................... 6

**Business Information Systems Option**

BUS 3330 Essentials of Database Systems ........................................ 3
BUS 3510 Business Programming ...................................................... 3
BUS 4050 Selected Topics in Information Systems ................................ 3
BUS 5100 Systems Analysis and Design and Project Management ....... 3
BUS 4250 Advanced Internship (6 cr) or Approved upper-division coursework (6 cr) ....................................................... 6

**Management Option**

BUS 4010 Selected Topics in Finance ............................................... 3
BUS 4020 Selected Topics in Marketing ............................................. 3
BUS 4030 Selected Topics in Management ........................................ 3
BUS 4040 Selected Topics in Human Resources ................................ 3
BUS 4250 Advanced Internship (6 cr) or Approved upper-division coursework (6 cr) ....................................................... 6

**General Option**

The general option can be satisfied in one of three ways:

1. **18 credits**—12 credits of approved business-subject coursework, plus 6 credits of BUS 4250 (Advanced Internship) or other approved upper-division coursework.

2. **Dual Major**—Must complete all requirements for another major outside of the College of Business.

3. **Second Bachelor’s Degree**—Must have a previously earned bachelor’s degree in a nonbusiness subject.

**Dual Major and Second Bachelor’s Degree**

The College of Business offers both a dual major and a second bachelor’s degree in business. The requirements for a dual major or a second bachelor’s degree are described above in the *Major in Business* section. For information concerning other dual majors or second bachelor’s degrees having specializations in the college, see departmental sections of this catalog.

**Minor in Business**

The college offers a minor for nonbusiness majors consisting of the six courses listed below. This minor is designed to develop a general background and perspective in business. Completion of this minor will acquaint students with each business discipline. Advisement for the minor in business is through the College of Business Career and Education Opportunities Center in Business 309. An overall minimum GPA of 2.50 is required for the six courses. Students are responsible to complete prerequisite courses where applicable. Required courses for the minor in business include ACCT 2010; BA 3400 or 3460; BA 3500; MHR 3110; and two of the following courses: ACCT 2020, BA 3700, BUS 2100, ECON 3400, and MHR 2050. Equivalent courses having a BUS prefix may be used to satisfy any of the course requirements.

**Minor in International Business**

Both College of Business majors and nonmajors are eligible to receive the International Business Minor. This minor is designed to develop a general background and perspective in business. All students who plan to pursue this minor receive academic advisement from the College of Business Career and Education Opportunities Center in Business 309. This minor consists of four courses selected from a group of six courses (listed below) and completion of either a Language Competency Option or a Regional Studies Option. Four of the following six courses are required as part of this minor: BA 4300 (International Finance), BIS 5700 (Internet Management and Electronic Commerce), ECON 3400 (International Economics for Business), ECON 5150 (Comparative Economic Systems), MHR 3820 (International Management), and MHR 4890 (Business Strategy in a Global Context). Information about the Language Competency and Regional Studies Options is available in the Career and Education Opportunities Center, Business 309.

**Minors in Other Business Subjects**

Minors are available in other business subjects, as indicated in departmental sections of this catalog.
College of Business Sponsored Student Organization

**Phi Beta Lambda (PBL)**
A cocurricular student organization. The organization’s goal is to provide opportunities to develop business career competencies and to promote civic and personal responsibility. Membership is open to all students interested in business.

Other Professional Student Organizations

The following student organizations are sponsored by College of Business departments and are available for membership, depending upon student objectives and qualifications.

**American Marketing Association (AMA)**
Organization for marketing and marketing education majors.

**American Production and Inventory Control Society (APICS)**
Professional society for production majors.

**Beta Alpha Psi**
National honorary and professional accounting fraternity.

**Beta Gamma Sigma**
Honorary business fraternity. (See page 81 for further information.)

**Association for Systems Management (ASM)**
Organization for students planning careers in information processing and information systems management.

**Delta Pi Epsilon (DPE)**
National graduate honorary fraternity in business education.

**Delta Epsilon Chi (DEX)**
Co-curricular organization for marketing education and marketing majors.

**Economics Club**
Organization for students majoring in economics.

**Finance Club**
Organization for students majoring in finance.

**Institute of Management Accountants (IMA)**
Organization designed for accounting majors.

**MBA Association**
Organization for MBA graduate students.

**Sigma Iota Epsilon (SIE)**
National honorary and professional management fraternity.

**Society for Human Resource Management (SHRM)**
Organization for majors in fields of personnel and human resource management.

Scholarships, Fellowships, and Assistantships

A number of scholarships and assistantships are available to College of Business students at both the undergraduate and graduate levels. There are also opportunities for employment in research projects and other activities. Assistantships for graduate students are available for both teaching and research. Applications for undergraduate scholarships may be made directly to the Career and Education Opportunities Center, Business 309.

Course Descriptions

Business (BUS), pages 581-582.
College of Education and Human Services

Dean: Carol J. Strong
Location: Emma Eccles Jones Education 109
Phone: (435) 797-1437
E-mail: shannon.johnson@usu.edu
WWW: http://www.cehs.usu.edu

Associate Dean for Teacher Education, Graduation, and Educator Licensing:
Francine Fukui Johnson, Education 101, (435) 797-1443, francine.johnson@usu.edu

Associate Dean for Education Extension:
Michael K. Freeman, Education 114A, (435) 797-1474, michael.freeman@usu.edu

Associate Dean for Research:
James T. Dorward, Education 453A, (435) 797-1471, jim.dorward@usu.edu

The College of Education and Human Services has the following departments:

Communicative Disorders and Deaf Education
Elementary Education
Family, Consumer, and Human Development
Health, Physical Education and Recreation
Instructional Technology
Psychology
Secondary Education
Special Education and Rehabilitation

The College of Education and Human Services provides preparation programs for prospective teachers, for counselors and other professional personnel in education, and for professionals in the human service area and in corporate settings. Students are urged to refer to the more detailed descriptions of programs, majors, and areas of specialization contained in this catalog.

The College of Education and Human Services participates in the Interdisciplinary Studies Major (see pages 342-343), which offers flexibility for qualifying students who cannot find an existing degree that meets their needs.

Accreditation
Utah State University is a member of the American Association of Colleges for Teacher Education and is accredited by the National Council for the Accreditation of Teacher Education and the Utah State Board of Education. Students who are licensed to teach in the state of Utah may qualify for licensure in other states and the District of Columbia. Additional program accreditations include: American Association of Family and Consumer Sciences, American Psychological Association, American Speech-Language-Hearing Association, Council on the Education of the Deaf, National Association of School Psychologists, and Council on Accreditation of the National Recreation Park Association.

University Studies Requirements
All students graduating from the College of Education and Human Services must complete the USU University Studies requirements (see pages 49-57).

Admission Requirements to Teacher Education
Students wishing to enter the Teacher Education Program at Utah State University must formally apply for admission and be approved by the Office of the Associate Dean for Teacher Education, as well as by the department where the teaching major is being offered. All applicants are required to submit a record of their ACT scores, pass the Teacher Education Writing Exam, and take a speech and hearing test. Students are not permitted to enroll in the education professional core classes prior to being admitted to the Teacher Education Program.

Detailed information about admission to the Teacher Education Program should be obtained from a departmental advisor or from the Office of the Associate Dean for Teacher Education, Graduation, and Educator Licensing.

Teacher Licensing
The Dean of the College of Education and Human Services is assigned responsibility for the development, approval, and administration of Teacher Licensing requirements for students.

The College of Education and Human Services currently offers preservice teacher preparation leading to licensure in 34 different areas. In addition, advanced programs leading to professional licensure are available for administrators, supervisors, school counselors, school psychologists, school library media specialists, speech-language pathologists and audiologists, educators of the deaf, and specialists in special education. Training is also available in English as a Second Language (ESL), reading, distance education, gifted and talented education, and middle-level education.

Specific requirements for each license may be obtained from the Office of the Associate Dean for Teacher Education, Graduation, and Educator Licensing or from the department in which the major work is offered. All students who desire licensure must complete a criminal background check and must pass the Utah State Office of Education approved content test (Praxis II) in their major area prior to student teaching.

For the early childhood, elementary, secondary, or special education licensure, a closely supervised program of student teaching is conducted in selected schools throughout the state. Students should be financially prepared to live off campus during the semester selected as their professional semester of student teaching.

Dual Licensing
A student desiring to obtain early childhood and elementary education, elementary and secondary education, elementary and special education, early childhood and deaf education, early childhood and special education, or secondary and special education licenses should consult with an advisor in the education departments early in his or her program. Ordinarily, dual licensure will require at least one additional semester of work.

Teacher Placement Service
The Teacher Placement Service functions as an integral part of the University Placement Center. Students may register with the service, which will help in compiling the proper credentials to be used in placement interviews. Application for placement services should be made prior to student teaching whenever possible. No fee is charged for using the center.
Facilities
The College of Education and Human Services Edith Bowen Laboratory School is a functioning elementary school on the University campus, serving as a research, demonstration, and teacher training center.

The Center for Early Childhood Education provides educational experiences and resources for teachers and parents that reflect the most current understanding of the social, emotional, physical, and cognitive needs of children in pre-kindergarten, kindergarten, and the primary grades.

The Center for the School of the Future is dedicated to improving the quality and effectiveness of education through identifying, researching, and developing proven educational practices, as well as supporting their dissemination and adoption in local circumstances.

The Center for Persons with Disabilities is Utah’s university center for excellence in developmental disabilities. Its programs offer students opportunities to participate in multidisciplinary education, research, and service. Students complete clinical and field experiences, and may receive financial support through assistantships, internships, stipends, or employment.

Graduate Study
Programs at the graduate level, leading to advanced professional degrees and/or licensure, are available in the administrative, supervisory, human services, clinical, library media, and counseling areas. The Master of Education (MED), Master of Science (MS), and Master of Arts (MA) degrees are offered in most departments. An Educational Specialist (EdS) program is available in the following departments: Communicative Disorders and Deaf Education, Instructional Technology, and Special Education and Rehabilitation. Interdepartmental Doctorate of Education (EdD) and Doctorate of Philosophy (PhD) degrees are available with specializations in Business Information Systems, Curriculum and Instruction, and Research and Evaluation. A professional Doctorate of Audiology (AuD) is available in the Department of Communicative Disorders and Deaf Education. PhD degrees are offered within the following departments: Family, Consumer, and Human Development; Instructional Technology; Psychology; and Special Education and Rehabilitation. The Master of Family and Human Development (MFHD) degree is offered by the Family, Consumer, and Human Development Department. The Master of Rehabilitation Counseling (MRC) degree is offered by the Special Education and Rehabilitation Department.

College of Engineering

Dean: H. Scott Hinton  
Location: Engineering 413  
Phone: (435) 797-2775  
FAX: (435) 797-2769  
E-mail: office@engineering.usu.edu  
WWW: http://www.engineering.usu.edu

Associate Dean: Wynn R. Walker, Engineering 413B, (435) 797-2788, wynnwalk@cc.usu.edu

Associate Dean: Christine E. Hailey, Engineering 413C, (435) 797-3332, chailey@engineering.usu.edu

Associate Dean: Maurice G. Thomas, Engineering 413F, (435) 797-1797, mthomas@cc.usu.edu

Academic Advisors:  
Joan P. Smith, Engineering 310, (435) 797-2705, joan.smith@usu.edu  
Kathleen E. Bayn, Engineering 308, (435) 797-2705, kathy.bayn@usu.edu  
Ronnie Green, Engineering 312, (435) 797-2790, ronnie@engineering.usu.edu

Development Director: Val K. Potter, Engineering 413L, (435) 797-8012, val.potter@usu.edu

The College of Engineering includes the following academic departments:

Biological and Irrigation Engineering  
Civil and Environmental Engineering  
Electrical and Computer Engineering  
Engineering and Technology Education  
Mechanical and Aerospace Engineering

The College of Engineering includes the following research centers, institutes, and laboratories:

Research Centers, Institutes, and Laboratories

Anderson Center for Wireless Teaching and Research: George K. Liang, Interim Director  
Buried Structures Laboratory: Alma P. Moser and Steven L. Folkman, Co-directors  
Center for Self-Organizing and Intelligent Systems (CSOIS): Yangquan Chen, Interim Director  
Huntsman Environmental Research Center (HERC): Maurice G. Thomas, Director  
Institute for Natural Systems Engineering: Thomas B. Hardy, Director  
International Irrigation Center (IIC): L. Humberto Yap-Salinas, Director  
Manufacturing Extension Partnership: Stephen S. Reed, Director  
Rocky Mountain NASA Space Grant Consortium: Doran J. Baker, Director  
Toxic and Hazardous Waste Management: Ronald C. Sims, Director  
Utah Local Technical Assistance Program: Doyt T. Bolling, Director  
Utah On-Site Wastewater Training Center: Judith L. Sims, Director  
Utah Space Engineering Center: Charles M. Swenson, Director  
Utah Transportation Center: Kevin C. Womack, Director

State Centers of Excellence

Center for Advanced Imagery LADAR: Robert T. Pack, Director  
Center for Advanced Satellite Manufacturing (CASM): Brent E. Stucker, Director  
Center for High-Speed Information Processing (CHIP): Jacob H. Gunther, Director  
Center for Profitable Uses of Agricultural Byproducts: Conly L. Hansen, Director

National Science Foundation (NSF) Center
National Center for Engineering and Technology Education (NCETE): Christine E. Hailey, Director

Utah State University Research Foundation
Space Dynamics Laboratory (SDL): Michael D. Pavich, Director

Utah State University
Utah Water Research Laboratory (UWRL): Mac McKee, Director  
Inland Northwest Research Alliance at USU: Ronald C. Sims, Coordinator

Mission

The primary objective of the College of Engineering is to foster a creative learning environment that will:

1. prepare engineering students to support the needs of industry and
2. develop new technologies and services that will improve tomorrow’s economy and environment.

Goal

The goal of the academic programs of the College of Engineering is to provide engineering and technical education enabling engineering students to:

1. develop as ethical professionals who understand engineering and technology in its societal context;
2. learn modern engineering/science and technology principles and their application in conducting experiments and analyzing data;
3. gain experience in working on engineering problems and designing solutions to meet desired needs;
4. acquire skills in communicating effectively and working on teams; and
5. understand the importance of life-long professional development and learning.

The college strives to create a brighter future by working with students, employers, industry, and government research partners to achieve this objective.
Programs

The undergraduate engineering BS degree programs offered by USU, which are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (EAC/ABET), include: Biological Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, and Mechanical Engineering.

At the graduate level, Master of Engineering (ME), Master of Science (MS), and Doctor of Philosophy (PhD) degrees are offered in these specific majors, along with the Civil Engineer (CE) degree.

The Engineering and Technology Education Department offers BS degrees in Engineering and Technology Education, Aviation Technology—Maintenance Management, and Aviation Technology—Professional Pilot, as well as an MS degree in Engineering and Technology Education. Admission and academic requirements for the ETE Department are considerably different than those for the other engineering departments. For details, see the Engineering and Technology Education section of this catalog (pages 273-277).

For details about the various majors and specialties offered by departments and programs within the College of Engineering, see the respective departmental sections in this catalog.

Assessment

The College of Engineering is committed to assessing the quality of its academic departments and programs, in order to assure that the desired educational outcomes will be achieved. Faculty members within the college strive to assure that their students obtain the knowledge and skills needed for success in their chosen fields.

The college uses a variety of tools and methods to gather information and data to evaluate progress in meeting the college’s program goals and objectives, and to take actions to continually improve the quality of students’ educational experience.

Undergraduate Programs

Objectives

The objectives of the engineering curriculum are: (1) to provide students with professional competence enabling them to enter and progress rapidly in their professional careers, (2) to provide an understanding of the physical and social world in which they live and work, and (3) to provide a basis for continued intellectual growth, professionally and socially.

In the engineering programs, the curricula begin with studies in mathematics, basic science, introductory engineering, and introductory engineering design. These basic science and engineering skills are coupled with communication skills, as well as courses in humanities and social sciences. The professional engineering programs continue with engineering science, engineering design, and modern engineering tools. Engineering design activities start during the freshman and sophomore years, progressing in-depth during the junior and senior years as the student’s proficiency increases. The design experience culminates with a capstone design sequence, which builds upon the fundamentals of engineering, communication skills, science, mathematics, humanities and social sciences, economics, ethics, safety, reliability, aesthetics, and social impact.

The expected outcomes of the professional engineering programs are: (1) to unite engineering sciences and modern engineering tools with engineering design to enhance the practical problem-solving abilities, decision-making proficiency, and creativity of the engineering student; (2) to provide for an understanding and appreciation of professional responsibility and ethics; (3) to expand a sensitivity to the economic, legal, and social dimensions of engineering decisions; and (4) to provide the foundation and help instill a desire for life-long learning.

Studies in the humanities and social sciences serve not only to meet the objectives of a broad education, but also to meet the objectives of the engineering profession. In the interest of making engineers aware of the impact of engineering solutions in a global, economic, environmental, and societal context, the College of Engineering requires coursework in the humanities and social sciences as an integral part of the engineering program. To satisfy this requirement, courses selected must provide both breadth and depth and be planned to fulfill an objective appropriate to the engineering profession.

Admission Requirements

Engineering Requirements

In addition to the policies of the University concerning admission of students, the following regulations apply to the engineering programs:

1. In order to complete an engineering curriculum in four years, high school students must complete at least two years of algebra, one year of geometry, one-half year of trigonometry, four years of English, and courses in computers, chemistry, and physics. If these courses are not taken in high school, they must be taken in college prior to starting the regular engineering programs. Students with deficiencies in several areas will probably require five years to fulfill graduation requirements.

Students can earn university credits in English, humanities, and social sciences by receiving appropriate scores on the College Level Examination Program (CLEP) tests. Advanced placement (AP) credit may be obtained in calculus, chemistry, English, history, and physics.

2. Transfer students from other colleges or universities will be referred to the Engineering Admission Committee for evaluation. Criteria considered in admission decisions for transfer students include resources available in the requested department and the transfer GPA, along with an evaluation of the program of the former college or university. Decisions concerning academic standing once the student is admitted to USU will be based solely on USU grades.

3. Students registered on campus (including General Studies) must be approved by the Engineering Admission Committee before transferring to the College of Engineering. Students in this category must have demonstrated, by courses taken at USU, a potential to succeed in the major of their choice.

Professional Engineering Program

Introduction

The purpose of the Professional Engineering Program (PEP) is to provide a quality education for engineering students by (1) requiring that students be fully prepared for upper-division engineering coursework by having satisfactorily completed all required preprofessional courses and (2) limiting enrollment in upper-division courses consistent with resources available within the departments and the college.
College of Engineering

Policy
Enrollment in upper-division engineering courses (3000-level and above) is available only to students who have been accepted into the PEP or an appropriate graduate program or have a nonengineering major which requires a specific engineering class for which the student has passed the prerequisite courses.

Application Requirements
Current PEP applications listing the required PEP courses and admission standards are available from the various departments and the office of the Dean of Engineering. The minimum requirements a student must satisfy in order to be eligible to apply for admission to a professional program are:

1. The student must be in good academic standing in the University and the college.

2. The student must achieve a grade of C- or better in every required preprofessional course. Required preprofessional courses are defined by each major. They include math, science, and engineering courses, as well as ENGL 2010. The 2.3 (2.8 for Electrical Engineering and Computer Engineering) minimum GPA requirement (see item 3 below) does not include ENGL 2010. The P/D+, D, F grading option may not be used except in freshman English Composition.

3. The student must achieve an overall grade point average of 2.3 (2.8 for Electrical Engineering and Computer Engineering) or better for all required preprofessional coursework completed at USU.

Repeated Coursework
A student can repeat no more than three of the required preprofessional courses in order to satisfy the PEP application and eligibility requirements. Multiple repeats of the same course are included in the total of three repeats. Audits count as a time taking a class unless prior written approval is obtained from the college academic advisor.

Transfer Credit
Transfer credit accepted by the department and the college may be applied toward meeting the requirements for admission into the PEP; however, the grades received will not be used in the USU GPA calculation. For students with transfer credits, a final decision on admission into the PEP will not be made until after the applicant has completed at least 12 semester credits of acceptable engineering, math, and science coursework at USU. Some of this coursework may include upper-division classes taken by permission.

Applications
Students should apply to the Professional Program midway through the semester in which they will complete all preprofessional courses. Students may request permission to take a limited number (not to exceed 15 credits) of upper-division courses if they are within 10 credit hours of completing the necessary requirements, have submitted a PEP application, and are registered for all remaining preprofessional courses. The final decision on granting permission to take upper-division classes before admission to the PEP rests with the college academic advisor and the Associate Dean of Engineering for Academics.

Admission Procedures
Satisfying minimum eligibility requirements does not ensure that a student will be admitted to a PEP program in a specific department.

The number of students accepted in the Professional Engineering Program of a department will be based upon the number of students that can be accommodated in upper-division classes. Applicants will be ranked and selected in order of their academic standing in the required preprofessional courses. Admission into a PEP program is for a period of three years. Students unable to complete graduation requirements during this time will be interviewed by the department head to determine whether special circumstances justify their continued in the program.

Academic Requirements
The Dean’s Office of the College of Engineering maintains a handout sheet giving current details of all academic regulations of the college. It is the responsibility of the student to know the current regulations and to follow these regulations.

Preprofessional Program
Students must maintain a USU GPA of 2.0 to remain in good standing both in the college and the University. Students in a preprofessional program who are not making satisfactory progress toward acceptance into a professional program or who become ineligible to enter a professional program will be suspended from the college. Students in good standing in a preprofessional program must still meet the entrance requirements for admission into a professional program.

Professional Program
For all engineering majors in the professional program the following academic regulations apply, in addition to University regulations:

1. A GPA of 2.0 or higher must be maintained in all upper-division engineering/math/science courses required for, or used as technical electives in, the chosen major. Courses which were part of the preprofessional program requirements and University Studies courses are not included in this GPA calculation.

2. No more than 10 hours of D or D+ credit may be applied toward meeting graduation requirements in engineering/math/science classes.

3. College of Engineering courses may be repeated only once. Audits count as a time taking a class unless prior written approval is obtained from the department head. A maximum of three required or elective courses completed as part of a professional program can be repeated in order to meet graduation requirements. (Courses completed as part of a preprofessional program are not included in this total of three repeats.)

4. The P/D+, D, F grading option may not be used in required or elective courses completed as part of a professional program. (The P/D+, D, F grading option is approved for University Studies Courses.)

5. The academic regulations listed above (1-4) apply to required coursework and any elective engineering/math/science course which could be used to satisfy graduation requirements for the chosen degree. That is, once a student completes a particular technical elective, it becomes a required course for that student.

6. Students in violation of departmental or college academic regulations, no longer eligible for graduation, or not making satisfactory progress toward a degree, will be placed on probation.
a. Students will be placed on probation if they (i) earn an F in an engineering/math/science course which could be used to satisfy graduation requirements for the chosen degree (see No. 5 above); (ii) have more than 10 hours of D credit (see No. 2 above); or (iii) have a GPA of less than 2.0 (see No. 1 above).

b. Students remain on probation until they improve their standing by repeating and passing all failed classes, repeating classes to reduce the number of D credits to 10 or less, and/or by raising their GPA above 2.0.

c. While on probation, a student must earn a semester GPA of 2.0 or higher in engineering/math/science classes and must not earn any grades of D or F.

While on probation, a student may not preregister. The student’s major code will be changed to a preprofessional code. The student must meet at least once each semester with the college academic advisor to work out a schedule having the primary goal of correcting the existing academic problems.

General Engineering

Engineering students are encouraged to select a major as soon as possible. Many of the courses taken during the freshman year are common to all engineering majors; however, there are significant differences in the courses taken during the sophomore year. Students who have not selected a specific major should meet with the college academic advisor for assistance in planning a personalized program. Students who choose to remain in general engineering must be prepared to meet the specific requirements of a professional program in the department of their choice.

Additional Engineering Information

Professional Societies

Faculty members of the departments hold memberships in various professional societies and organizations.

Student chapters or societies include the American Society of Agricultural and Biological Engineers; the Institute of Biological Engineering; the Biological and Irrigation Engineering Club; American Institute of Aeronautics and Astronautics; American Society of Civil Engineers; Chi Epsilon; Institute of Electrical and Electronic Engineers; American Society of Mechanical Engineers; American Water Resources Association; Tau Beta Pi; International Technology Education Association; National Intercollegiate Flying Association; Professional Flight Society; Society of Environmental Engineering Students; and Society of Women Engineers. Students are encouraged to affiliate with appropriate student societies.

The Engineering Council is comprised of a student from each department, a representative from each student society, and a staff member from the Dean’s Office. The college senator is chairperson, or a chairperson is appointed by the Dean’s Office. The council meets regularly to provide effective student-staff-administration liaison.

ROTC

Many engineering students find satisfaction in serving their country in the Reserve Officer Training Program (ROTC) and as reserve officers after graduation. Junior and senior ROTC students receive compensation equivalent to a substantial scholarship. See the Department of Aerospace Studies section (pages 136-137) or the Department of Military Science section (pages 407-408) of this catalog.

Scholarships, Fellowships, and Assistantships

A number of scholarships and assistantships are available to College of Engineering students. Interested high school seniors are encouraged to submit the Application for Undergraduate Admission and Scholarships to the Admissions Office before February 1 of the year they wish to receive assistance. Continuing students, transfer students, and returning students should contact the Dean’s Office, College of Engineering for a scholarship application. Completed applications are always due February 1. There are also opportunities for employment on research projects and other activities.

Concurrent BS/Master’s Program

Qualifications

The concurrent BS/Master’s program allows engineering students to begin taking graduate-level classes during their senior year. This permits them to complete requirements for both the BS degree and the master’s degree concurrently during two years. Students in this program have a greater selection of graduate courses, since many graduate courses are taught during alternate years. In addition, the student’s senior design project could be a start for a graduate design project or thesis. After completing their BS degree, students in the program can earn a master’s degree in only one additional year. Both the BS and the master’s degree can generally be earned with 150 total credits, although students should note that a Plan C MS requires 3 extra credits.

Procedures

Students in Biological Engineering, Civil Engineering, and Environmental Engineering must complete their junior year in engineering with a 3.0 GPA, both overall and during the last 60 semester credits. Students in Electrical Engineering and Computer Engineering must have a 3.3 GPA, both overall and during the last 60 semester credits. Students in Mechanical Engineering must earn a 3.4 GPA during the last 60 semester credits. No later than the beginning of the first semester of the senior year, they must apply to the department offering their major and be accepted into the concurrent program. For application forms, students should contact their department office or the College of Engineering Advising Center (Engineering 314A).

To prepare a two-year completion plan of study, students must meet with their approved faculty advisor. (Department head gives approval for advisor.) Students must take the GRE exam and submit scores to the School of Graduate Studies. (See major department for minimum GRE qualifying scores.)

Students must first contact the department to determine eligibility for the concurrent program. If eligible, they should apply to the School of Graduate Studies. A Split Registration Form must be filled out and submitted for each semester the student is enrolled in the concurrent program. All paperwork involved should have a notation of “ Concurrent Enrollment” at the top of each page (e.g., undergraduate application for graduation, Program of Study, split forms, etc.).

Formal acceptance into the School of Graduate Studies is required. The student must select a graduate committee, which must be approved by the School of Graduate Studies. The proposed master’s program must be approved by the committee, as well as by the School of Graduate Studies.
During the second year of the concurrent program, the student must pay graduate tuition. When the student is within 21 credits of completing both degrees, he or she will be coded as a graduate student. Thereafter, the student will pay graduate fees and will be eligible for loans, but not grants.

An application for graduation with a BS degree must be completed. The student must maintain a 3.0 or higher GPA in courses approved for his or her concurrent program.

Graduate Programs

For information about graduate programs, admissions, assistantships, and fellowships, see departmental sections of this catalog.

Research
The College of Engineering pursues an extensive program of research through the Engineering Experiment Station and the various research centers, institutes, laboratories, and departments. There are opportunities for graduate students to participate, and many undergraduates can find employment in research programs.

Utah Water Research Laboratory
The Utah Water Research Laboratory offers facilities and student support for water research, including surface and groundwater resources management and use. Strong programs have been developed through multiple projects in weather modification, water quality control, waste water treatment, hydraulics, flood and erosion control, hydrology, groundwater modeling, salinity control, water use in energy development, water systems optimization, and the socioeconomic aspects of water resources planning. Studies are coordinated with academic programs in the departments of Civil and Environmental Engineering, Biological and Irrigation Engineering, and related departments in other colleges.

International Irrigation Center
The International Irrigation Center conducts an extensive program of irrigation training and technology transfer through multi-lingual courses and through research. The center contributes significantly to improve irrigation practice, water management, and food production through these activities.

Other Research Centers
The College of Engineering also includes the following research centers: the Center for Self-Organizing and Intelligent Systems, the Center for High-Speed Information Processing (CHIP), the Center for Advanced Imagery LADAR, and the Utah Engineering Center.

Graduate Study
The college offers graduate study programs leading to the ME, MS, CE, and PhD degrees. For further information and details, see individual departmental sections of this catalog.

Associate Dean; Director, Center for International Studies;  
Director, Asian Studies Major and Minor:  
R. Edward Glatfelter, Main 333, (435) 797-1196, ed.glatfelter@usu.edu

Associate Dean:  
Christine Hult, Main 338E, (435) 797-8619, christine.hult@usu.edu

Director, Caine School of the Arts: Tom C. Peterson,  
Family Life 320A, (435) 797-1563, tom.peterson@usu.edu

Director, College of HASS Advising Center:  
Mary E. Leavitt, Student Center 302, (435) 797-3883, mary.leavitt@usu.edu

Liberal Arts Program:  
Contact College of HASS Advising Center, Student Center 302, (435) 797-3883

The College of Humanities, Arts, and Social Sciences has the following departments and programs:

Aerospace Studies  
American Studies  
Art  
Asian Studies  
British and Commonwealth Studies  
Classics Minor  
English  
History  
Intensive English Language Institute  
Interior Design  
International Studies  
Journalism and Communication  
Landscape Architecture and Environmental Planning  
Languages, Philosophy, and Speech Communication  
Liberal Arts  
Military Science  
Music  
Political Science  
Sociology, Social Work, and Anthropology  
Theatre Arts  
Women and Gender Studies

Other HASS Units:

Center for International Studies  
College of HASS Advising Center  
Mountain West Center for Regional Studies  
Nora Eccles Harrison Museum of Art

A listing of majors and degrees can be found under each department or program.

Within the College of Humanities, Arts, and Social Sciences are found those departments which provide career preparation in some of the most interesting and vital academic fields. The study of society, the governing of society and its history, communication in a number of languages, the various aspects of culture—all these appeal to an increasing number of undergraduate and graduate students. Many train for careers in these fields; more—scientists, engineers, etc.—take courses to broaden their horizons and add interest to their lives.

It is probably fair to say that the social trend is toward an awareness that while material things are important they are not enough for a full life. For this, the individual may turn to literature, art, music, and theatre. Concern with environmental problems may lead the student to an investigation of landscape architecture. The complexities of modern life necessitate an understanding of the social sciences and history. It is within the College of Humanities, Arts, and Social Sciences that these needs may be met.

Admission and Graduation Requirements

Students accepted in good standing by the University are eligible for admission to the College of Humanities, Arts, and Social Sciences (HASS). Because of limitations of faculty and/or space, a few departments within the college, such as Art, LAEP, and Sociology, Social Work and Anthropology, limit enrollment in their professional programs. See the departmental sections in this catalog and the department head for information regarding these limitations and/or requirements in addition to the University graduation requirements.

The College of HASS participates in the Interdisciplinary Studies Major (see pages 303-304), which offers flexibility for qualifying students who cannot find an existing degree that meets their needs.

Caine School of the Arts

Director: Tom C. Peterson, (435) 797-1563, tom.peterson@usu.edu

Believing in the unique power of the arts to celebrate, illuminate, transform, and inspire the human spirit, the Caine School of the Arts seeks to make the arts more visible, more innovative, and more fully integrated into the intellectual life of Utah State University and the communities it serves. A collaborative community, representing the collective strengths and voices of the arts, the Caine School offers a means for connecting people and programs. This collaboration will facilitate opportunities for interdisciplinary creation and research, and foster a culture that values the arts and promotes access to the arts in the University, the community, and the region. Utah State’s Caine School of the Arts represents the broadest interpretation of “the arts”: art as personal expression, art for art’s sake, art as communication, art as an important social and cultural force, art for personal enjoyment, and art as a contribution to what it means to be both an individual and a part of the larger cultures that connect us.

In achieving this mission, the Caine School of the Arts fulfills multiple roles.

On an advocacy level, the Caine School of the Arts offers a unified public presence for the arts that enhances the reputation of the University: informing the community about events, showcasing excellence in artistic programming and discovery, recruiting students, and promoting the campus as a culture that values the knowledge and enjoyment the arts engender.

On a curricular level, arts education grounded in a strong liberal arts tradition is offered. A studio approach and expert faculty provide a supportive environment for training professional artists in creative writing, interior design, landscape architecture and environmental planning, music, theatre, and the visual arts. These programs are
College of Humanities, Arts, and Social Sciences

instrumental in preparing teachers, historians, critics, and scholars. The Caine School also serves students throughout the University with breadth and depth courses in the arts.

On an outreach level, a rich program of lectures, exhibitions, and performances is offered for the USU campus and extended communities. Educational programs for pre-K through grade 12, as well as partnerships with arts-related groups, extend throughout the State of Utah. Many of the Caine School of the Arts programs provide design solutions for clients, locally and around the world.

On an organizational level, an environment in which dialogue and relationships can flourish across traditional boundaries is promoted, opening the way for new creative endeavors and understandings. An organizational structure encouraging and facilitating meaningful and effective collaborations is provided.

On a cultural level, the Caine School of the Arts seeks to infuse the University and its extended community with an increasing passion for the creation, investigation, and appreciation of the arts. The Caine School aims to position Utah State University as a national model for the “new land-grant university”—a place where personal, professional, academic, and community enrichment through the arts is a major institutional goal.

Nora Eccles Harrison Museum of Art

Director: Victoria Rowe, (435) 797-0164, victoria.rowe@usu.edu

Collections Manager and Registrar:
Susanne Lambert, (435) 797-0166, susanne.lambert@usu.edu

Assistant Education Curator: Nadra Haffar-Peragallo,
(435) 797-0165, nadra.peragallo@usu.edu

Administrative Program Coordinator:
Rachel Hamm, (435) 797-1414, rachel.hamm@usu.edu

The Nora Eccles Harrison Museum of Art is the major center for the exhibition of the visual arts in northern Utah. Emphasizing the breadth of artistic expression and the history of art in the western United States, the Museum’s permanent collections include Twentieth Century American sculpture, ceramics, paintings, graphic arts, photographs, and American Indian arts. Selections from the collection are always on view and are rotated periodically to reflect the continuing growth and refinement of the collection. In addition to installations of its permanent holdings, the Museum organizes temporary and traveling exhibitions and serves as a venue for exhibitions of national and international stature. Artist talks, films, docent tours, and educational activities are additional dimensions of the Museum’s programs which are designed to interpret, present, and foster the development of the visual arts.

As a component of Utah State University, the Museum provides educational opportunities for undergraduate and graduate students pursuing professional careers in the museum field. Through on-the-job training, independent study, and internships, students participate in collections care and management, exhibition development, installation design, and educational programming. Research and publication are also integral parts of the Museum’s educational offerings, and students, along with faculty and other scholars, pursue projects which are relevant to the permanent collections and exhibitions.

Named for its benefactor, the Nora Eccles Harrison Museum of Art was made possible through an insightful and generous gift from the Nora Eccles Treadwell Foundation. Designed by internationally acclaimed architect, Edward Larabee Barnes, the 20,000-square-foot structure includes offices, a workshop, library, storage facilities, and five exhibition galleries.

For more information, write or call: Nora Eccles Harrison Museum of Art, Utah State University, 4020 Old Main Hill, Logan UT 84322-4020, (435) 797-0163, FAX (435) 797-3423.

Mountain West Center for Regional Studies

Program Director: Elaine Thatcher, Main 303, (435) 797-3630

Utah History Fair Director: Michael W. Johnson, (435) 797-3633

The Mountain West Center for Regional Studies is a multidisciplinary outreach center in the College of Humanities, Arts, and Social Sciences. Its purpose is to enhance the work of the University through public programs, research and program funding, visiting scholars, student scholarships, and other projects, with a particular emphasis on activities that increase understanding of the Interior West, its land, and cultural groups.

Programs of the center include the David and Beatrice Evans Biography and Handcart Awards, the Bennion Teachers’ Workshop, the L. T. and J. T. Dee Visiting Scholars Program, the Utah History Fair, the USU Faculty Fellowship, and several scholarships. Recent projects have included the Mountain West Songfest (with the Music Department), a driving tour of historic barns in northern Utah (with the Bear River Association of Governments and the Bear River Heritage Area), symposia on the fiftieth anniversary of the end of the Korean War and on the one-hundredth anniversary of the Cache National Forest, student internships in oral history and folklore, and student workshops on working in the public sector arts and humanities.

Center for International Studies

Director:
R. Edward Glatfelter (HASS Dean’s Office), Main 333, (435) 797-1196, ed.glatfelter@usu.edu

The Center for International Studies promotes and coordinates international academic exchanges between the University and institutions of higher education abroad. Major objectives of the center are: (1) to develop bilateral university linkage programs, (2) to facilitate faculty and student exchange programs, and (3) to promote collaborative research programs, joint seminars, workshops, and conferences.
College of Humanities, Arts, and Social Sciences

College of HASS Advising Center

Director: Mary E. Leavitt
Assistant Director: Irene B. McInerney
Advisor: Lisa R. Hamblin
Advisor: Sally B. Peterson
Advisor: Marcia R. Roberts
Advisor: Lynne M. Slade
Program Coordinator: Susan Parkinson

Office in Student Center 302, (435) 797-3883
(Please call ahead for an appointment.)

The College of HASS Advising Center (CHAC) provides academic advising for students in the College of Humanities, Arts, and Social Sciences. Academic advisors counsel these students in the University Studies requirements and in certain HASS majors.

Academic advising is provided through the center to all Liberal Arts majors.

Advising

College of HASS students receive advising concerning University and College of HASS policies and procedures, as well as in University Studies, the Liberal Arts Program, graduation requirements and processes, the Interdisciplinary Studies Major, and the USU Area Studies Certificate programs. In addition, students are advised concerning academic choices, low grade point averages, and other problems.

Academic Services

CHAC represents the Dean of HASS in providing academic services to undergraduate students in the College of HASS. This includes requests for academic record changes and other documentation requiring the Dean’s signature. Coordination of academic problems, support, or referrals to other University services are also provided. Transcript evaluations, including international and transfer records, are made and approved in CHAC.

Graduation

All HASS graduation matters are processed through CHAC. Students should begin the graduation process at least one month prior to the graduation application deadline, and the application should be turned into CHAC at least two weeks prior to the deadline in order to avoid a late fee. A final review of University Studies (or other General Education programs) and other University graduation requirements will be made and the final approval signature added before the application is returned to the student for payment of the graduation fee. If the student wishes to amend the application to substitute or drop courses that are listed on it, a Supplement Form must be submitted through CHAC.

The Area Studies Certificates are awarded at the time of graduation. Application for the certificate should be made through CHAC.

College of Natural Resources

Dean: Nat B. Frazer
Director of Graduate Education: Todd A. Crowl
Director of Undergraduate Education: Mark W. Brunson
Location: Natural Resources 108
Phone: (435) 797-2452
FAX: (435) 797-2443
E-mail: radvisie@cc.usu.edu
WWW: http://www.cnr.usu.edu

Undergraduate Advisor:
Maureen A. Wagner, Natural Resources 120, (435) 797-2448, maureen@cc.usu.edu

The College of Natural Resources has the following academic degree programs:

**College of Natural Resources**
Master of Natural Resources (MNR)
Participates in Interdisciplinary Studies (BS, BA)

**Environment and Society Department**
Bioregional Planning (MS)
Environmental Studies (BS)
Geography (BS, BA, MS, and MA)
Human Dimensions of Ecosystem Science and Management (MS and PhD)
Recreation Resource Management (BS, MS, and PhD)

**Watershed Sciences Department**
Ecology (MS and PhD)
Fisheries and Aquatic Sciences (BS)
Fisheries Biology (MS and PhD)
Watershed and Earth Systems (BS)
Watershed Science (MS and PhD)

**Wildland Resources Department**
Conservation and Restoration Ecology (BS)
Ecology (MS and PhD)
Forestry (BS, MS, and PhD)
Range Science (MS and PhD)
Wildlife Biology (MS and PhD)
Wildlife Science (BS)

A list of degree requirements, emphases, and specializations can be found in the catalog section for each department. For a description of the Master of Natural Resources (MNR) professional degree, see page 433.

**Interdisciplinary Programs**
Many of the degree programs listed above are interdisciplinary to some extent. However, the Conservation and Restoration Ecology, Environmental Studies, Geography, and Watershed and Earth Systems programs offer students the opportunity to develop broad interdisciplinary programs to meet their interests. Conservation and Restoration Ecology and Watershed and Earth Systems build on a strong science base; Environmental Studies has a greater emphasis on management and policy; and Geography brings together ideas about culture, human behavior, and the physical environment.

The College of Natural Resources also participates in the Interdisciplinary Studies Major (see pages 342-343), which offers flexibility for qualifying students who cannot find an existing degree that meets their needs.

**Minors in Natural Resources**
The college offers minors in the following areas:

- Environmental Studies
- Fisheries Science
- Geographic Information Science
- Geography/Geography Teaching
- Recreation Resources
- Watershed Science

Requirements for the minors are found in the appropriate departmental sections of this catalog. Students should also consult a faculty advisor for the minor.

**Objectives**
The College of Natural Resources provides programs of study and professional training in the use and management of natural resources and the environment. These programs deal with renewable land and water resources and the management of these resources and their ecosystems. Forests, rangelands, wildlife, fisheries, watersheds, and recreation resources comprise the natural resources and environmental areas in which the college has developed professional competence. The college’s expertise in geography provides a link between the management of these resources and their value to our society and other cultures.

The College of Natural Resources programs and facilities provide exceptional opportunities for field experience. Forests and rangelands comprise more than 90 percent of the total Utah land area. The Wasatch-Cache National Forest and other areas of natural lands close to the USU campus provide unlimited study projects and opportunities for demonstration. Yellowstone and other national parks are within one day’s driving distance.

**Career Opportunities**
The curricula of the college prepare men and women for positions with federal or state agencies, private-sector work in natural resources management and administration, and positions in education.

**Summer Employment/Work Experience**
Students are strongly encouraged to seek summer employment with faculty research projects or natural resource agencies to gain practical work experience and help refine career goals. Students should check with the College of Natural Resources Academic Service Center in early January regarding summer employment opportunities.

**Undergraduate Programs**

**Academic Policies**

**Admission**
Freshmen accepted in good standing by the University are eligible for admission to the College of Natural Resources. Transfer students need a cumulative 2.5 GPA for admission to College of Natural Resources majors. Departments may impose additional requirements; refer to departmental sections for information.

Students will make more satisfactory progress in natural resources majors if they have had two years of high school algebra; have taken coursework in chemistry, physics, and biology; and have obtained basic computer skills. Four years of English are also desirable. Prospective students should realize that natural resources fields are...
highly technical professions, requiring not just field ability, but also high aptitude for scholarship. Success is also correlated with an ability to work well with people.

**Natural Resources—Undecided**

Students who have not yet decided on a specific natural resources major may be admitted to the college as "undecided." Many of the courses taken during the freshman year are common to all natural resources majors; however, students are encouraged to select a major as soon as possible. Students in the undecided category should meet with the college academic advisor for assistance in planning their educational program and selecting a major.

**Changes in Graduation Requirements**

Students who complete a baccalaureate degree within seven years of enrollment at USU can qualify for graduation by meeting (1) the General Education/University Studies requirements in effect when they initially enrolled at USU (or any revision of the University Studies requirements that has been in effect within seven years of their graduation) and (2) the major requirements in effect when they officially declared their major (or any revision of the major requirements that has been in effect within seven years of their graduation).

Students who have not completed the baccalaureate requirements within seven years of their initial enrollment at USU must have their General Education/University Studies and major requirements evaluated and approved by their department head and dean.

**Academic Responsibility**

The departments publish current major requirements in the catalog each year. It is the student’s responsibility to know the current requirements and to consult with a faculty advisor in planning and completing his or her degree program.

**Graduation Requirements**

Students must satisfy all University, College of Natural Resources, and departmental major requirements for graduation. Students must complete a series of basic lower-division courses, providing the disciplinary foundation for the natural resource and environmental professions, before advancing to professional coursework; foundation course requirements vary among the departments of the college. Equivalents of the foundation courses can be taken at many two- and four-year colleges. Students intending to transfer to a College of Natural Resources major should consult with a faculty advisor before registering for foundation courses at another school. Some foundation and core courses can be used to satisfy University Studies requirements. College requirements also include a grade point average of 2.5 or higher for all courses taught by the College of Natural Resources. Refer to the appropriate sections of this catalog for further details on graduation requirements.

**Student Leadership**

In addition to coursework and research involvement, undergraduate education in the College of Natural Resources also includes leadership education through professional internships and extracurricular involvement. The staff and student employees of the College of Natural Resources Academic Services Center maintain contacts with public and private sector employers from around the region, not only to connect students with summer jobs, but also to provide students with opportunities for volunteer participation during the school year, as well as with internships combining work done for academic credit with a chance to learn about future employment.

The Natural Resources Student Council and various student clubs offer opportunities for enrichment, professional development, and fun. Most of the student leaders have participated in leadership training activities offered by the College of Natural Resources. Students are strongly encouraged to participate in organizations affiliated with their majors or future career paths. Among these are student chapters affiliated with the following professional societies:

- American Fisheries Society
- International Association for Society and Natural Resources
- Society of American Foresters
- Society for Range Management
- The Wildlife Society

**Financial Aid**

A number of scholarships are available to students enrolled in the College of Natural Resources. During recent years, more than $100,000 in financial aid has been awarded annually, with emphasis on assistance to upper-division undergraduate students. The S.J. and Jessie E. Quinney Scholars program awards up to 10 scholarships annually of $3,000 per year to entering freshmen and transfer students in the College of Natural Resources. Interested high school students and prospective transfer students are encouraged to write to the College of Natural Resources Dean’s Office regarding these scholarships.

**Undergraduates in Research**

The College of Natural Resources maintains an extensive program of research in all aspects of natural resources and the environment. Undergraduate students are an integral part of this program. Their participation in research is encouraged, especially for those students planning to go on to graduate study.

Students are often able to find part-time employment in professors’ laboratories, working side-by-side with graduate students and faculty members on studies involving a wide range of topics from endangered fish biology to wildland soil science, backcountry hiking behavior to sagebrush ecology, and water conservation policy to the genetics of rare plants and animals. Highly motivated students can also design their own research projects with the assistance of College of Natural Resources faculty members. University and college programs can offer undergraduate researchers financial assistance to help cover the costs of research and of presenting research results to audiences of natural resource scientists and managers, as well as to other students.

**Graduate Programs**

The College of Natural Resources offers graduate programs leading to the Master of Natural Resources (MNR), Master of Science (MS), and Doctor of Philosophy (PhD) degrees. These degree programs are described in the catalog sections for the respective departments. There are also separate descriptions for the programs leading to the MNR degree (page 369), the Natural Resource and Environmental Policy Certificate Program (page 368), and the National Environmental Policy Act (page 363).
Financial assistance for graduate programs includes both research and teaching assistantships that are awarded through the departments offering each degree. For further information, students should contact their department and major professor. Fellowships and tuition waivers are offered to incoming graduate students on a competitive basis. Application is made through the student’s major professor.

**Financial Assistance**

**Assistantships**
Teaching or research assistantships are awarded through the departments. For further information, students should check with their department and major professor.

**Fellowships**
Fellowships and tuition waivers are awarded on a competitive basis. Incoming graduate students should apply through their major professor.

College of Science

Dean: Donald W. Fiesinger
Location: Eccles Science Learning Center 245
Phone: (435) 797-2478
FAX: (435) 797-3378
E-mail: scido@cc.usu.edu
WWW: http://www.usu.edu/science/

Associate Dean: Richard J. Mueller, ESLC 245G, (435) 797-2479, rmueller@biology.usu.edu

Associate Dean: Lisa M. Berreau, ESLC 245J, (435) 797-3509, berreau@cc.usu.edu

The College of Science has the following departments and programs:

- Biology
- Chemistry and Biochemistry
- Computer Science
- Geology
- Mathematics and Statistics
- Physics
- Cooperative Nursing Program

Objectives

USU has always emphasized the sciences. Modern civilization is based on science, most facets of which are fundamental in a land-grant university.

Opportunities for rewarding careers are excellent in the fields of science. These opportunities exist in education, research, conservation, service, and industry.

The curricula of the science departments are designed to achieve five purposes:

First, they serve all students. No college graduate can be considered educated without an appreciation of scientific principles.

Second, the college trains teachers of science at all levels of education. Highly competent teachers are absolutely essential to the continued well-being and development of society.

Third, students are prepared to take positions in industry and business in a highly technological world.

Fourth, education is provided in the health fields both at the preprofessional and entry level. The college has excellent programs in predental and premedical education with an exceptional record of placing students in dental and medical schools. Undergraduate degrees in the various departments of the college can be tailored to include predental and premedical training. Other programs prepare graduates to enter the health profession directly upon graduation.

Fifth, the College of Science educates research scholars in many fields of science. This is accomplished by completing a sound undergraduate degree in the field, followed by graduate specialization.

Students planning to enter the sciences are urged to discuss their plans and goals early with advisors, who are available in each academic department. Basic coursework in mathematics, chemistry, physics, and computer science is essential to most areas of science.

Admission Requirements

Students accepted in good standing by the University are eligible for admission to all departments in the College of Science. Students majoring in Computer Science must qualify for advanced standing status on the basis of their academic performance. Specific details are given in the Computer Science section of this catalog (see pages 209-210).

College of Science Core Requirements

Mathematics Requirement

All bachelor degree candidates in the College of Science must complete one year of calculus, consisting of MATH 1210 and 1220. In some degrees or options within degrees, the second semester of calculus may be replaced by STAT 3000. The substitution will be for specific degree programs, and not by student choice.

Science Requirement

Every bachelor degree candidate in the College of Science must complete a year-long sequence outside of his or her major department. The approved sequences are: (1) BIOL 1610, 1620; (2) CHEM 1210, 1220; (3) GEO 1150, 3200; (4) PHYS 2110, 2120; and (5) PHYS 2210, 2220.

Science Major (Undecided)

A beginning freshman student who wishes to major in science, but who has not selected a specific major, may register in the college as an Undecided Science Major. A course of study will be developed that will attempt to maximize transfer into the various departmental majors in the college. Students in the Undecided Science Major will be required to transfer to a departmental major after one year of study.

Scholarships

Scholarships are available through the college and some of the departments. Students should contact the college or their major department for further information about these scholarships. Information is also available at: http://www.usu.edu/science/

Graduate Assistantships and Fellowships

Excellent graduate assistantships and fellowships are available in all departments. Assistantships are available both for teaching and research. Applications should be made directly to the department concerned. For more information, see the Graduate Financial Assistance section of this catalog (pages 98-99).
College of Science

Graduate Programs
Graduate programs leading to the MS or PhD degree are available in each department in the college. In addition, the Department of Mathematics and Statistics offers an MMath (Master of Mathematics) degree, and the Computer Science Department offers an MCS (Master of Computer Science) degree. See the departmental sections in this catalog for more information on these programs.

Interdisciplinary Studies Major
The College of Science participates in the Interdisciplinary Studies Major (see pages 342-343), which offers flexibility for qualifying students who cannot find an existing degree that meets their needs.

Honors Program
Several departments in the college participate in the University Honors Program by offering special honors courses and by sponsoring an option for graduation with departmental honors.

Undergraduate Research
The sciences provide an ideal setting for research. All departments within the College of Science provide opportunities for undergraduate students to participate in research activities. Interested students should discuss this option with their academic advisor or with an associate dean in the college office.

School of Accountancy

Department Head: Richard L. Jenson
Location: Business 511
Phone: (435) 797-2335
FAX: (435) 797-1475
E-mail: maryann.clark@usu.edu
WWW: http://www.usu.edu/cob/acct

Director of Graduate Accounting Programs:
David H. Luthy, Business 504, (435) 797-2429, david.luthy@usu.edu

Undergraduate Advisor:
Joslyn M. Heiniger, Business 309, (435) 797-2272, joslyn.heiniger@usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA) in Accounting; Master of Accounting (MAcc); participates in Master of Business Administration (MBA)

Undergraduate options: A dual major in Accounting and Economics is available.

Graduate specializations: MAcc—Professional Accountancy, Taxation, Personal Financial Planning, Information Systems, and Finance. MBAs with specializations in Accounting and Personal Financial Planning are offered in the College of Business (see MBA—Accounting and MBA—Personal Financial Planning programs).

Undergraduate minors offered: Accounting and Personal Financial Planning

Undergraduate Programs

Mission

The mission of the USU School of Accountancy is to: (1) develop effective accounting and business leaders who are committed to professional excellence and ethical conduct, (2) advance accounting knowledge through theory development and accounting practice improvement, and (3) provide leadership and service to the University and professional community.

Objectives

The objective of the School of Accountancy is to provide high-quality accounting preparation for professional careers in industry, public accounting, and other organizations. The undergraduate programs are devoted to providing basic conceptual accounting, information systems, and business knowledge, along with general education, as a well-rounded foundation for career development. The fostering of high-quality student organizations is fundamental to the career-development process for on-campus programs.

The accounting curriculum is designed to help students prepare to meet changes in social, economic, and technological development. Academic course requirements for the bachelor’s degrees include University Studies coursework, as well as supporting courses in mathematics, economics, business information systems, business communications, business administration, accountancy, and information technology. The programs provide an opportunity to choose from a number of elective courses to broaden educational backgrounds and enhance employment opportunities.

Career Opportunities

Practice in the profession of accounting has become more complex, with computerized information and accounting systems becoming an integral part of the various accounting and business functions. University training is essential to prepare for high-level accounting careers in business, government, and public accounting.

Graduates of the accounting program find employment in a variety of industrial companies, nonbusiness and government agencies, and both large and small public accounting and business advisor firms. Graduates hold all levels of positions within organizations, including supervisors, managers, partners, controllers, financial vice presidents, and chief executive officers. Nonbusiness units and government agencies, such as the Utah State Auditors Office, the Federal Bureau of Investigation, and the Internal Revenue Service, provide jobs in many varied accounting functions.

Departmental Honors

See Honors in Business description in the College of Business section of this catalog (page 112).

Learning Objectives and Assessment

Assessment information for the School of Accountancy can be found online at: http://www.usu.edu/cob/acct/about/assess.htm.

Requirements

College of Business Admission Requirements

All students majoring in accounting must satisfy the College of Business admission requirements, provided on pages 112-113. Academic advising about these requirements is available in the College of Business Career and Education Opportunities Center, Business 309. All students enrolled at USU are required to satisfy the General Education requirements and the University Studies Depth Education requirements of the University, as described on pages 49-57 of this catalog.

Matriculation Requirement and Transfer Limitation

No more than 15 USU College of Business credits (ACCT, BA, BIS, BUS, MHR), numbered 2000 and above, earned as a nonbusiness major (before acceptance into the College of Business) can be applied to a College of Business degree. More than 15 business credits can be transferred from other accredited institutions. However, additional USU College of Business credits added to previously earned transfer business credits may not exceed a combined total of 15. Furthermore, to earn a bachelor’s degree in a College of Business major, at least 50 percent of the required College of Business credits must be earned from coursework taken from the Utah State University College of Business.

USU Credits and Business Credits

At least 30 of the last 60 semester credits must be taken from Utah State University, 10 of which must be included within the last 40 credits presented for the degree. At least 50 percent of the College of Business credits required for a College of Business degree must be taken from the Utah State University College of Business or its departments, which include: School of Accountancy, Business Administration, Business Information Systems, Economics, and Management and Human Resources. At least 15 credits in upper-
School of Accountancy

Division accounting courses must be completed through the USU School of Accountancy (Logan campus).

Accounting Admission Requirements
In addition to meeting the College of Business requirements, students must have achieved a cumulative overall GPA of 3.0 or higher and have earned a grade of B or better in ACCT 2010 before they will be allowed to enroll in ACCT 3110 or 3310.

General Instructions for all Accounting Majors
Since some accounting courses are not offered every semester and many have prerequisites, students should plan their program at least a year ahead.

Accounting Major Requirements
For a bachelor’s degree in accounting, students must complete at least 120 credits, including at least 30 credits in accounting and at least 90 credits in nonaccounting courses. At least 15 credits of upper-division accounting courses must be completed through the USU School of Accountancy (Logan Campus). To qualify for graduation as an accounting major, a student must have an accounting and an overall GPA of at least 2.5. All accounting majors are required to complete the General Education requirements and the University Studies Depth Education requirements (see pages 49-57), the Pre-Business course requirements, the College of Business Core, and the Required Accounting Courses.

Pre-Business Course Requirements (13 credits)
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp) .................................................................3
MATH 1100 (QL) Calculus Techniques (F,Sp,Su) ................................. 3
STAT 2300 (QL) Business Statistics (F,Sp,Su) ..................................4
PSY 1010 (BSS) General Psychology (F,Sp,Su) (3 cr) or
SOC 1010 (BSS) Introductory Sociology (F,Sp) (3 cr) ..................... 3

College of Business Core (37 credits)
ACCT 2010 Survey of Accounting I (F,Sp,Su) ....................................3
ACCT 2020 Survey of Accounting II (F,Sp,Su) ............................. 3
BA 3400 (QI) Corporate Finance (F,Sp,Su) ..................................... 3
BA 3500 Fundamentals of Marketing (F,Sp,Su) ............................... 3
BA 3700 Operations Management (F,Sp,Su) .................................. 3
BIS 2100 Principles of Management Information Systems (F,Sp,Su) .. 3
BIS 2200 (CI) Business Communication (F,Sp,Su) .......................... 3
BUS 3250 Discussions With Business Leaders (F,Sp) .................... 1
ECON 2010 (BSS) Introduction to Microeconomics (F,Sp) ........... 3
ECON 3400 International Economics for Business (F,Sp,Su) .......... 3
MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su) ... 3
MHR 3110 Managing Organizations and People (F,Sp,Su) ............. 3
MHR 4880 (CI) Business Strategy in an Entrepreneurial Context (F,Sp) (3 cr) or
MHR 4890 (CI) Business Strategy in a Global Context (F,Sp,Su) (3 cr) ........ 3

Required Accounting Courses (24 credits)
The courses listed below may not be taken Pass/Fail.
ACCT 3110 Intermediate Financial Accounting and Reporting I (F,Sp,Su) .................................................................3
ACCT 3120 Intermediate Financial Accounting and Reporting II (F,Sp,Su) ..................................................................................3
ACCT 3310 Strategic Cost Management (F,Sp,Su) ............................ 3
ACCT 3410 Income Taxation I (F,Sp,Su) ........................................ 3
ACCT 4200 Advanced Accounting (F,Sp) ....................................... 3
ACCT 4410 Income Taxation II (F,Sp) ......................................... 3
ACCT 4500 Accounting Information Systems (F,Sp) ...................... 3
ACCT 4510 (CI) Auditing Principles and Techniques (F,Sp) ........... 3

Four-Year Degree Plan (8 Semesters)
A four-year degree plan for the Accounting major can be found on page 133 and at:
http://www.usu.edu/cobssc/web/fouryeardegreeplans.htm

Accounting Minor (18 credits)
Students with a major in an area other than accounting may qualify for an accounting minor by completing 18 semester credits as follows:
ACCT 2010 Survey of Accounting I (F,Sp,Su) ....................................3
ACCT 2020 Survey of Accounting II (F,Sp,Su) ..................................3
ACCT 3110 Intermediate Financial Accounting and Reporting I (F,Sp,Su) ..................................................................................3
ACCT 3120 Intermediate Financial Accounting and Reporting II (F,Sp,Su) ...............................................................................3
ACCT 3310 Strategic Cost Management (F,Sp,Su) ............................ 3
ACCT 3410 Income Taxation I (F,Sp,Su) (3 cr) or
ACCT 4500 Accounting Information Systems (F,Sp) (3 cr) ............. 3

Students seeking a minor must be approved by the School of Accountancy and must achieve a 2.5 grade point average for accounting courses taken. Courses required for this minor may not be taken Pass/Fail.

Personal Financial Planning Minor (15 credits)
Students seeking a minor in personal financial planning must be approved by the School of Accountancy and must achieve at least a 2.5 grade point average in the required courses. The required courses consist of 15 semester credits as follows:
ACCT 3410 Income Taxation I (F,Sp,Su) ........................................ 3
PPF 5060 Personal Financial Planning and Advising (F) ............... 3
PPF 5070 Retirement Planning (Sp) .............................................. 3
PPF 5080 Estate Planning (Sp) ...................................................... 3
BA 3460 Fundamentals of Personal Investing (3 cr) or
BA 4460 Investments (F,Sp) (3 cr) .................................................. 3

The courses above are registered with the Certified Financial Planner (CFP) Board of Standards. Students completing these courses will qualify to sit for the comprehensive CFP Examination.

Dual Major

Accounting and Economics Dual Major
Select 12 credits in economics in addition to the courses required for an accounting major from the following:
ECON 4010 Managerial Economics (F,Sp) (3 cr) or
ECON 5010 Microeconomics (Sp) (3 cr) ........................................ 3
ECON 4020 Macroeconomics for Managers (F,Sp) (3 cr) or
ECON 5000 Macroeconomics (F) (3 cr) ......................................... 3
Upper-division Economics electives. ............................................. 6

Second Bachelor’s Degree in Accounting

Students seeking a second bachelor’s degree in accounting must be approved by the School of Accountancy, must achieve an accounting and overall grade point average of 2.5, and must complete the course of study listed above for an accounting major. For further information, refer to the Second Bachelor’s Degree text on page 60.
Beta Alpha Psi

The Delta Omega Chapter of Beta Alpha Psi, the national honorary and professional accounting fraternity, provides many professional accounting experiences for qualifying accounting students throughout their academic program.

Institute of Management Accountants

The student chapter of the Institute of Management Accountants (IMA) provides professional experiences in the area of management accounting. This organization is especially for students interested in careers in industry, not-for-profit organizations, governmental organizations, and accounting and business entrepreneurship.

Financial Planning Student Association

The Financial Planning Student Association (FPSA) provides students with opportunities to supplement classroom instruction with speakers from the financial planning industry, office visits, and internships at state and national meetings of professional associations in the financial services industry.

Additional Information

For additional information about undergraduate programs and requirements in the School of Accountancy, see the major requirement sheet, which can be obtained from the School of Accountancy, or accessed at: http://www.usu.edu/ats/majorsheets/

Suggested Four-year Course of Study for Accounting Major

The following curriculum is required for the BS degree in accounting. Students enrolled in the accounting major should consult with their advisor to determine which breadth, depth, and elective courses they should complete. Each student should also consult with his or her advisor to develop an individualized plan of study that is applicable to his or her own interests.

Freshman Year (30 credits)

Fall Semester (15 credits)

ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles .............................................. 3
MATH 1050 (QL) College Algebra ................................................ 4
USU 1010 University Connections ............................................. 2
OSS 1400 Microcomputer Applications (3 cr) or
Passing scores on Computer and Information Literacy (CIL) exams (0 cr) .................................................... 0-3
(Note: Although OSS 1400 includes the CIL exams, the CIL requirement is met only by passing all six exams, not by simply passing OSS 1400.)

Breadth Creative Arts (BCA) course ........................................ 3
Elective course(s) ................................................................. 0-3

Spring Semester (15 credits)

ECON 2010 (BSS) Introduction to Microeconomics .................. 3
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .................. 3
MATH 1100 (QL) Calculus Techniques .................................... 3
PSY 1010 (BSS) General Psychology (3 cr) or
SOC 1010 (BSS) Introductory Sociology (3 cr) .................. 3
Breadth Humanities (BH) course ........................................... 3
Sophomore Year (31 credits)

Fall Semester (16 credits)

ACCT 2010 Survey of Accounting I ........................................ 3
BIS 2100 Principles of Management Information Systems ........... 3
MHR 2050 Legal and Ethical Environment of Business ............ 3
STAT 2300 (QL) Business Statistics ...................................... 4
Breadth Life Sciences (BLS) course ........................................ 3

Spring Semester (15 credits)

ACCT 2020 Survey of Accounting II ...................................... 3
BA 3400 (QI) Corporate Finance ........................................... 3
BIS 2200 (CI) Business Communication .................................. 3
Breadth Physical Sciences (BPS) course .................................... 3
Elective course(s) ................................................................. 3

Junior Year (29 credits)

Fall Semester (14 credits)

ACCT 3110 Intermediate Financial Accounting and Reporting I .... 3
ACCT 3310 Strategic Cost Management ................................... 3
BA 3500 Fundamentals of Marketing ...................................... 3
BUS 3250 Discussions With Business Leaders ...................... 1
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode .................. 3
Elective course(s) ................................................................. 1

Spring Semester (15 credits)

ACCT 3120 Intermediate Financial Accounting and Reporting II .... 3
ACCT 3410 Income Taxation I ................................................ 3
BA 3700 Operations Management ........................................... 3
ECON 3400 (DSS) International Economics for Business .......... 3
Elective course(s) ................................................................. 3

Senior Year (30 credits)

Fall Semester (15 credits)

ACCT 4410 Income Taxation II ............................................... 3
ACCT 4500 Accounting Information Systems ......................... 3
MHR 3110 Managing Organizations and People ....................... 3
Depth Humanities and Creative Arts (DHA) course .................. 3
Elective course(s) ................................................................. 3

Spring Semester (15 credits)

ACCT 4200 Advanced Accounting ........................................... 3
ACCT 4510 (CI) Auditing Principles and Techniques ................ 3
MHR 4880 (CI) Business Strategy in an Entrepreneurial Content (3 cr) or
MHR 4890 (CI) Business Strategy in a Global Context (3 cr) or
Depth Life and Physical Sciences (DSC) course ....................... 3
Elective course(s) ................................................................. 3

1At least two of the required Breadth Courses must be University Studies courses having a USU prefix.
2If opting out of OSS 1400, students must take an extra 3 elective credits.

Graduate Programs

The graduate programs provide greater breadth and depth in accounting, taxation, information systems, and management to develop a high level of understanding, skill, and leadership capability to enter professional accountancy and related business careers. The Master of Accounting (MAcc) and the Master of Business Administration-Accounting Specialization (MBA-Accounting), offered by the College of Business, qualify graduates to sit for the Certified Public Accountant examination.

Utah State University 2006-2007 General Catalog
School of Accountancy

Admission Requirements
See general admission requirements, pages 99-100. In addition, candidates are selected based on the combined consideration of their score on the Graduate Management Admissions Test (GMAT) and their grade point average from the previous 60 semester credits (90 quarter credits) completed. Generally, 200 times the GPA plus the GMAT score must total 1,150 or more. Additionally, for MAcc Programs, the minimum acceptable GMAT score is at the 40th percentile and the minimum GPA is 3.0. In addition, scores for each section of the GMAT must be at least at the 40th percentile. For information about admission to the MBA—Accounting Specialization Program, see Admission Requirements for the MBA Program, page 197. Letters of recommendation, professional experience, professional certification, and leadership are also considered in admission decisions for all accounting graduate programs. Students may apply for admission to the graduate programs during their senior year of baccalaureate study. USU accounting students may take graduate courses during their last semester of undergraduate study, provided prerequisite courses have been completed, they have been admitted into a graduate program, and a split registration form is approved by the dean of the School of Graduate Studies. (See Split Form Policy, page 101.)

Students with an undergraduate degree in accounting which meets the USU undergraduate accounting program requirements have completed all of the preparatory work for graduate study. Students with less than the equivalent of the undergraduate program are expected to make up the deficiencies. The director of Graduate Accounting Programs will assist in necessary program scheduling. Students are encouraged to satisfy undergraduate deficiencies by taking equivalent graduate business administration, management and human resources, and economics core courses when possible.

Graduate students are expected to maintain an overall GPA of 3.0 to remain in the program.

Complete information relative to the details of the program and course scheduling is available from the School of Accountancy.

Graduate Degree Programs

MAcc requirements for students who have an undergraduate accounting major or equivalent (30 credits)

Program of Study
Students matriculated in the Master of Accounting degree must complete an approved program of study consisting of at least 30 credits. This program must include completion of the MAcc Core Requirements and one of the Areas of Specialization Requirements. At least 15 credits must be earned in approved Accounting courses numbered 6000 or above. Details for each requirement type are provided in the following paragraphs.

MAcc Core Requirements
The core courses required for this degree include: ACCT 6200, 6410, 6510, 6610, 6800; and PFP 6560.

Master of Accounting Specializations
In addition to meeting the MAcc Core Requirements, students must complete requirements for one of the following specializations:

Professional Accountancy Specialization
Required courses for this specialization are: ACCT 6350, 6500, 6540, and 6600.

Taxation Specialization
Required courses for this specialization are: ACCT 6420, 6440, 6460, and one course chosen from PFP 6060, 6070, or 6080.

Personal Financial Planning Specialization
Students must complete PFP 6060, 6070, 6080, and one course chosen from ACCT 6420, 6440, or 6460. In addition, students must complete, or have previously completed, the equivalent of BA 3460 or 4460 (neither of these courses count as part of the 30-credit MAcc degree requirement). This specialization satisfies the requirements to sit for the national Certified Financial Planner (CFP) examination.

Information Systems Specialization
Students must complete ACCT 6500, 6600, and an additional 6 credits of approved systems-related courses.

Finance Specialization
Complete ACCT 6350, plus 9 credits selected from approved finance-related courses.

Accelerated Program for Nonaccounting Undergraduate Majors

MAcc for nonaccounting undergraduate majors (54 to 68 credits)
Candidates for this program must score at or above the 50th percentile on all sections of the GMAT and have a 3.5 minimum GPA for the last 60 semester credits. This program requires the successful completion of the Business Core, plus an additional 54 credits. The Business Core may be satisfied by taking the Accelerated Business Core (13.5 credits), which is offered during summer semester only. (See Accelerated Business Core text in the Master of Business Administration (MBA) section, page 197.) Students with undergraduate degrees in business subjects (other than accounting) need not take the Accelerated Business Core and therefore may earn the MAcc in 54 credits. The 54 credits include: ACCT 3110, 3120, 3310, 3410, 4200, 4410, 4500, 4510, the MAcc Core Requirements, and one of the MAcc areas of specialization.

MBA—Accounting Specialization
Students admitted to the USU MBA Program may earn an Accounting Specialization by completing at least 12 approved 6000-level accounting credits as part of their MBA program of study. To qualify for this specialization, students must complete, or have previously completed, the equivalent of ACCT 3110, 3120, 3310, 3410, 4200, 4410, 4500, 4510, 6200, 6510, and 6610.

MBA—Personal Financial Planning Specialization
Students admitted to the MBA Program may earn a Personal Financial Planning Specialization by completing the MBA Advanced Required Courses (see MBA program description, pages 197-198), and the following: PFP 6060, 6070, 6080; ACCT 3410; and BA 3460 or 4460. This specialization satisfies requirements to sit for the national Certified Financial Planner (CFP) examination.

Financial Assistance
Financial assistance is available in the form of President’s Fellowships, Graduate School Fellowships, graduate assistantships, and special School of Accountancy scholarships. Applications for assistance should be made after the application for admission to the School of Graduate Studies is filed, but before March 1 of each year. Application forms are available from the School of Accountancy, and the awards are normally announced by April 15.
Professional Organizations and Activities

Graduate students are encouraged to participate in professional organizations, such as the USU chapters of Beta Alpha Psi (National Honors Fraternity for Financial Information Professionals), the Institute of Management Accountants, and the Financial Planning Student Association. The Federation of Schools of Accountancy, the American Institute of Certified Public Accountants, the Utah Association of Certified Public Accountants, and other professional organizations sponsor professional activities for accounting graduate students.

Accountancy Faculty

Personal Financial Planning (PFP), page 687.
Undergraduate Programs

Objectives

Air Force ROTC provides educational experiences that develop skills and attitudes vital to the career of an Air Force officer. The purpose of the course is to give an understanding of the mission and the global responsibilities of the United States Air Force. The academic phase develops background in national and international affairs to help understand and evaluate world events.

In addition, the curriculum includes experiences designed to stimulate and develop an interest in the Air Force (e.g., orientation flights and visits to Air Force bases); opportunities to apply the principles of leadership, human relations, management, and staff work in practical situations; and other related experiences.

Requirements

Physical Fitness and Medical
All students must meet the physical fitness and medical standards for general military service.

Age Limitations
Pilot and navigator category applicants must enter undergraduate flying training prior to age 30. AFROTC pilot and navigator candidates must be scheduled for commissioning before reaching 29 years of age. Applicants must receive an enrollment allocation before reaching age 30. The maximum age restriction may be waived for individuals scheduled for commissioning after age 34, but prior to age 35. Public Law 88-647 prohibits commissioning or active duty entrance after age 35. By law, scholarship recipients must be under age 31, as of December 31 of the calendar year during which commissioning is scheduled. Title 10, United States Code, Section 2107 does not provide for waivers.

Academic Requirements
Successful completion of the four-, three-, two-, or one-year Air Force ROTC program is required to be commissioned as a Second Lieutenant in the U.S. Air Force. Aerospace Studies classes are taken in addition to the classes required for a bachelor's degree. In some cases, ROTC classes may be taken in conjunction with a master's degree program. The program taken is based on the number of years remaining until graduation (e.g., a transfer student with two years remaining until graduation would enroll in the two-year program). The courses, along with the normal schedule for taking them for each of the programs, are listed below:

Four-Year Program
First year:
AS 1010 Introduction to the Air Force Today .............................. 1
AS 1110 Leadership Laboratory I ................................................. 1
AS 1020 Introduction to the Air Force Today .............................. 1
AS 1120 Leadership Laboratory I ................................................. 1

Second year:
AS 2010 The Evolution of U.S. Aerospace Power .......................... 1
AS 2110 Leadership Laboratory II .............................................. 1
AS 2020 The Evolution of U.S. Aerospace Power .......................... 1
AS 2120 Leadership Laboratory II .............................................. 1

Third year:
AS 3400 Field Training (4 weeks) ............................................... 1, 1-4
AS 3010 Air Force Leadership and Management .......................... 3
AS 3110 Leadership Laboratory III ............................................. 1
AS 3020 Air Force Leadership and Management .......................... 3
AS 3120 Leadership Laboratory III ............................................. 1

Fourth year:
AS 4010 National Security Affairs/Preparation for Active Duty ....... 3
AS 4110 Leadership Laboratory IV .............................................. 1
AS 4020 National Security Affairs/Preparation for Active Duty ....... 3
AS 4120 Leadership Laboratory IV .............................................. 1

Three-Year Program
First year:
AS 1010 Introduction to the Air Force Today .............................. 1
AS 1110 Leadership Laboratory I ................................................. 1
AS 2010 The Evolution of U.S. Aerospace Power .......................... 1
AS 2110 Leadership Laboratory II .............................................. 1
AS 1120 Leadership Laboratory I ................................................. 1
AS 2020 The Evolution of U.S. Aerospace Power .......................... 1
AS 2120 Leadership Laboratory II .............................................. 1

Second year:
AS 3400 Field Training (4 weeks) ............................................... 1, 1-4
AS 3010 Air Force Leadership and Management .......................... 3
AS 3110 Leadership Laboratory III ............................................. 1
AS 3020 Air Force Leadership and Management .......................... 3
AS 3120 Leadership Laboratory III ............................................. 1

Third year:
AS 4010 National Security Affairs/Preparation for Active Duty ....... 3
AS 4110 Leadership Laboratory IV .............................................. 1
AS 4020 National Security Affairs/Preparation for Active Duty ....... 3
AS 4120 Leadership Laboratory IV .............................................. 1

Two-Year Program
First year:
AS 3400 Field Training (5 weeks) ............................................... 1, 1-5
AS 3010 Air Force Leadership and Management .......................... 3
AS 3110 Leadership Laboratory III ............................................. 1
AS 3020 Air Force Leadership and Management .......................... 3
AS 3120 Leadership Laboratory III ............................................. 1

Second year:
AS 4010 National Security Affairs/Preparation for Active Duty ....... 3
AS 4110 Leadership Laboratory IV .............................................. 1
AS 4020 National Security Affairs/Preparation for Active Duty ....... 3
AS 4120 Leadership Laboratory IV .............................................. 1

One-Year Program
First year:
AS 3500 Field Training (5 weeks) ............................................... 1, 1-5
AS 4010 National Security Affairs/Preparation for Active Duty ....... 3
AS 4110 Leadership Laboratory IV .............................................. 1
AS 4020 National Security Affairs/Preparation for Active Duty ....... 3
AS 4120 Leadership Laboratory IV .............................................. 1
Summer Training
AS 3500 is a prerequisite for cadets entering the Air Force ROTC two-year program. Training will be given at an Air Force base and will last five weeks. Up to five university credits may be granted for this training.

All cadets in the three- and four-year programs will attend a four-week summer training camp. Attendance at this camp is usually between the sophomore and junior year at a selected Air Force base. Up to 4 credits may be granted for this training.

Leadership Laboratory
A Leadership Laboratory period is required each week during the fall and spring semesters for each year of aerospace studies. Interested students should check the current Schedule of Classes for the Leadership Laboratory schedule.

Minor
A minor in Aerospace Studies may be awarded upon completion of commissioning requirements.

Veterans
A veteran may apply for the Air Force ROTC program if he or she can complete the program prior to reaching age 30, with a year for year waiver up to age 35 for each year of active duty service. (The waiver does not apply to the maximum age at graduation to enter flight training of 29.) The general military course (first two years) may be waived for prior military service. However, veterans must successfully complete AS 3400 prior to entering the two-year program.

Commitment
Most officers have a four-year commitment. However, pilots have a commitment of ten years after pilot training, and navigators have a commitment of six years after their training. Air battle managers have a six-year commitment.

Future Educational Benefits
During the senior year, a cadet may request a delay to active duty to continue studies toward a graduate degree. The length of the delay depends upon the student’s request and the Air Force needs.

Through a variety of Air Force programs, officers may continue their education after going on active duty. Most bases have extensive on-base graduate college programs. The Tuition Assistance Program will pay 100 percent of tuition costs. ROTC graduates may also be eligible for the Montgomery GI Bill.

The Air Force Institute of Technology provides full-time graduate study for selected officers. Some classes are taught in residence at the institute’s campus at Wright-Patterson Air Force Base in Ohio, and others are taught at civilian universities.

Many officers make the Armed Forces their career, but some use the skills and training obtained in military service for civilian jobs. Most private businesses and government agencies require the same basic skills that are needed for jobs in military service. Air Force training and experience provide excellent leadership skills and can be a valuable asset in obtaining civilian employment.

Additional Information
For additional details about requirements for the Aerospace Studies program, see the major requirement sheet, which can be obtained from the department, or accessed at:
http://www.usu.edu/ats/majorsheets/

Scholarships

Scholarships
Air Force ROTC scholarships are available on a competitive basis in four-, three-, two-, and one-year awards. These scholarships provide up to full tuition, laboratory and incidental fees, plus an allowance for textbooks. Eligible USU students should apply to the Department of Aerospace Studies at USU.

The College Scholarship Program (CSP) for high school students is announced annually through the Air Force ROTC website at:
http://www.afrotc.com. This website contains information regarding eligibility requirements and application procedures, as well as an online application. Generally, students must use the online application. However, in the rare case that this is not possible, HQ AFROTC/DOR will work out an alternative application plan on a case-by-case basis. Students must apply by December 1 of their senior year in high school.

In addition, all students on contract (either on an Air Force ROTC scholarship or contracted in the POC) receive a tax-free stipend of $250-400 for each month during the school year.

Uniforms and Texts
All Air Force ROTC texts and uniforms are furnished at no expense to the student.

Miscellaneous Information

Career Opportunities
To meet the challenges, keep up with technological advancements, and explore the opportunities of the ever-broadening horizons in the aerospace age, officers possessing a variety of skills are required by the Air Force. Interested students should contact the Aerospace Studies Department for information on the Air Force career opportunities related to their academic major.

Family and Consumer Sciences Education Advisor:  
Betty J. Murn, Family Life 303A, (435) 797-1565, betty.murn@usu.edu

Degrees offered: Bachelor of Science (BS) in Agricultural Education; BS, Master of Science (MS) in Agricultural Systems Technology; BS in Family and Consumer Sciences Education; Associate of Applied Science (AAS) in Agricultural Machinery Technology; One-year Certificate in Agricultural Machinery Technology

Undergraduate emphases: BS—Agricultural Systems Technology: Agribusiness and Agricultural Mechanization

Graduate specializations: MS—Agricultural Extension Education, Agricultural Mechanization, Family and Consumer Sciences Education and Extension, International Agricultural Extension, and Secondary and Postsecondary Agricultural Education

Undergraduate Programs

Objectives

The programs offered in the Agricultural Systems Technology and Education Department are for students who are preparing for positions as family and consumer sciences or agricultural education teachers, as well as for positions in family and consumer sciences education or agricultural extension, agricultural mechanization, agribusiness, and agricultural production and management.

The facilities for these programs include laboratories with specially designed equipment for practical instruction in agricultural systems and mechanization, including computer applications, agribusiness, agricultural buildings, engines, electricity, hydraulics, machinery, and repair welding. Family and Consumer Sciences Education students use laboratories equipped for instruction in secondary education, clothing production, textile science, early childhood, nutrition, and interior design.

Requirements

Departmental Admission Requirements

Admission requirements for the Department of Agricultural Systems Technology and Education are the same as those described for the University on pages 16-20. Students in good standing may apply for admission to the department.

Bachelor of Science in Agricultural Education

Preparation in Agricultural Education includes technical agriculture, economics, and business. Students selecting the teaching option will also enroll in principles and techniques of teaching courses.

Students interested in teaching agricultural production and processing, agricultural mechanics, horticulture, or natural resources will be guided into areas of their major interest. Agricultural backgrounds or summer agricultural experiences are necessary for teacher certification.

An application for admission to teacher education should ordinarily be completed before the junior year (see College of Education and Human Services requirements, page 116). Approval for admission to teacher education is a prerequisite to enrollment in education and psychology courses. A 2.75 GPA is required for admission to the teacher education program.

Requirements for the Bachelor of Science in Agricultural Education are listed briefly. For more detailed information on courses and the recommended sequence for taking them, see the major requirement sheet available from the Agricultural Systems Technology and Education Department.

The Agricultural Education major involves four teaching areas, which correspond with the Utah agricultural education program model design. Students must complete the University Studies requirements (see pages 49-57). In addition, students must complete the following courses in preparation for teacher licensure:

Professional Education (14 credits)

SCED 3100 Motivation and Classroom Management (F,Sp) ............... 3
SCED 3210 (CI/DSS) Educational and Multicultural Foundations (F,Sp) ............................................................................................................ 3
SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) ............... 3
SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) ......... 3
SPED 4000 Education of Exceptional Individuals (F,Sp,Su) ............... 2

Agricultural Education (26 credits)

ASTE 2710 Orientation to Agricultural Education (F) ......................... 2
ASTE 3100 Leadership Applications in Agricultural Science, Management, and Development (Sp) ......................................................... 2
ASTE 3240 (CI) Teaching in Laboratory Settings (Sp) ......................... 3
ASTE 3300 Clinical Experience I in Agricultural Education (Sp) .............. 1
ASTE 3620 Managing the FFA and SAE Programs (Sp,Su) ................. 2
ASTE 4150 (CI) Methods of Teaching Agriculture (F) ...................... 3
ASTE 4300 Clinical Experience II in Agricultural Education (F) ............ 1
ASTE 5500 Agricultural Education Secondary Curriculum Seminar (Sp) ........................................................................................................... 2
ASTE 5630 Agricultural Education Student Teaching in Secondary Schools (Sp) .......................................................................................... 10

All students in the Agricultural Education major will complete a core of technical agricultural courses to include:

ASTE 3050 (CI) Technical and Professional Communication Principles in Agriculture (F,Sp) .......................................................... 3
ASTE 3080 Compact Power Units for Agricultural and Turfgrass Applications (Sp) ................................................................. 3
ADVS 1110 Introduction to Animal Science (F,Sp) .................................. 4
BIOL 1810 Biology I (F) .................................................................. 4
CHEM 1110 (BPS) General Chemistry I (F,Sp) ................................... 4
SOIL 3000 Fundamentals of Soil Science (F,Sp) ................................... 4

Students are required to designate a program emphasis for the following areas: Production and Processing; Agricultural Systems; Horticulture; and Natural Resources. Approximately 50 credits in a technical agriculture specialization are required in each of the four program area choices.
Department of Agricultural Systems Technology and Education

Emphasis Areas (50-57 credits)
These emphasis areas will not appear on a student's transcript. They are emphasis areas approved by the Utah State Office of Education.

Production and Processing (50 credits)
ASTE 1110 Introduction to Animal Science (F,Sp) ........................................... 3
ASTE 4560 (QI) Principles of Animal Breeding (F) ........................................... 3
ASTE 2200 Electricity in Agricultural Systems (Sp) ..................................... 3
ASTE 2830 Agribusiness Sales and Marketing (F) ..................................... 3
ASTE 3030 Metal Welding Processes and Technology in Agriculture (F) ........................................................... 3
ASTE 3040 (QI) Fabrication Practices in Agricultural Buildings (Sp) ....... 2
ASTE 3050 (CI) Technical and Professional Communication Principles in Agriculture (F,Sp) ........................................... 3
ASTE 3080 Compact Power Units for Agricultural and Turfgrass Applications (Sp) ......................................................... 3

Horticulture (57 credits)
ASTE 1110 Introduction to Animal Science (F,Sp) ........................................... 3
ASTE 2830 Agribusiness Sales and Marketing (F) ..................................... 3
ASTE 3040 (QI) Fabrication Practices in Agricultural Buildings (Sp) ....... 2
ASTE 3050 (CI) Technical and Professional Communication Principles in Agriculture (F,Sp) ........................................... 3
ASTE 3080 Compact Power Units for Agricultural and Turfgrass Applications (Sp) ......................................................... 3

Agricultural Systems (57 credits)
ASTE 1110 Introduction to Animal Science (F,Sp) ........................................... 4
ASTE 1010 Introduction to Agricultural Systems Technology (F) .......... 3
ASTE 1640 Agricultural Equipment and Parts Marketing and Communications (F) ......................................................... 3
ASTE 2200 Electricity in Agricultural Systems (Sp) .................................... 3
ASTE 3030 Metal Welding Processes and Technology in Agriculture (F) ........................................................... 3
ASTE 3040 (QI) Fabrication Practices in Agricultural Buildings (Sp) ....... 2
ASTE 3050 (CI) Technical and Professional Communication Principles in Agriculture (F,Sp) ........................................... 3
ASTE 3080 Compact Power Units for Agricultural and Turfgrass Applications (Sp) ......................................................... 3
ASTE 3200 Irrigation Principles and Practices (Sp) ...................................... 3
ASTE 3600 (QI) Management of Agricultural Machinery Systems (Sp) ........................................................... 3
ASTE 4100 Agricultural Structures and Environment (Sp) .................... 3
ASTE 5100 Electrical Controls and Motors for Agri-Industrial Applications (Sp) ........................................................... 3
ASTE 5260 (CI) Environmental Impacts of Agricultural Systems (F) .......... 3
CHEM 1110 (BPS) General Chemistry I (F,Sp) ........................................... 4
ECON 3030 (DSS) Introduction to Agribusiness Marketing (F) (3 cr) or ECON 3050 (DSS) Introduction to Agribusiness Management (Sp) (3 cr) ........................................................... 3
PHYS 1200 (BPS) Introduction to Physics by Hands-on Exploration .... 4
PLSC 4280 Field Crops (F) ........................................................................... 4
SOIL 3000 Fundamentals of Soil Science (F,Sp) ........................................ 4

Natural Resources (55 credits)
ASTE 1110 Introduction to Animal Science (F,Sp) ........................................... 4
ASTE 3040 (QI) Fabrication Practices in Agricultural Buildings (Sp) ....... 2
ASTE 3050 (CI) Technical and Professional Communication Principles in Agriculture (F,Sp) ........................................... 3
ASTE 3080 Compact Power Units for Agricultural and Turfgrass Applications (Sp) ......................................................... 3
ASTE 5260 (CI) Environmental Impacts of Agricultural Systems (F) .......... 3
BIOL 1610 Biology I (F) ........................................................................... 4
BIOL 1620 (BLS) Biology II (Sp) ................................................................. 4
BIOL 2200 General Ecology (F,Sp) ............................................................. 3
CHEM 1110 (BPS) General Chemistry I (F,Sp) ........................................... 4
ENVS 2340 (BSS) Natural Resources and Society (F,Sp) ....................... 3
ENVS 3600 Living with Wildlife (Sp) ........................................................... 3
FRWS 3600 Wildland Plant Ecology and Identification (F) ....................... 4
FRWS 3610 Wildland Animal Ecology and Identification (F) ....................... 4
FRWS 3900 Managing Dynamic Ecological Systems (Sp) ....................... 4
FRWS 4000 Principles of Rangeland Management (Sp) ........................... 3
SOIL 3000 Fundamentals of Soil Science (F,Sp) (4 cr) or SOIL 4000 Soil and Water Conservation (F) (4 cr) ................................. 4

Suggested Four-year Course of Study for Agricultural Education Major

Freshman Year (32 credits)
Fall Semester (16 credits)
ASTE 1110 Introduction to Animal Science ........................................... 4
ASTE 2710 Orientation to Agricultural Education ..................................... 2
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .................. 3
MATH 1050 (QL) Intermediate Algebra ......................................................... 3
USU 1320 (BHU) Civilization: Humanities ................................................. 3

Spring Semester (16 credits)
ASTE 2200 Electricity in Agricultural Systems ........................................... 3
ASTE 2830 Agribusiness Sales and Marketing ........................................... 3
ASTE 3030 Metal Welding Processes and Technology in Agriculture .......... 3
BIOL 1610 Biology I ........................................................................... 4
ENGL 1010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ........................................................... 3
USU 1330 (BCA) Civilization: Creative Arts ................................................. 3

Sophomore Year (29-30 credits)
Fall Semester (16 credits)
ASTE 2830 Agribusiness Sales and Marketing ........................................... 3
ASTE 3030 Metal Welding Processes and Technology in Agriculture .......... 3
BIOL 1610 Biology I ........................................................................... 4
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ........................................................... 3
USU 1330 (BCA) Civilization: Creative Arts ................................................. 3
Department of Agricultural Systems Technology and Education

Spring Semester (13-14 credits)
- ASTE 3040 (QI) Fabrication Practices in Agricultural Buildings .......... 2
- ASTE 3080 Compact Power Units for Agricultural and Turfgrass Applications ............................................. 3
- ASTE 3100 Leadership Applications in Agricultural Science, Management, and Development ........................................... 2
- PLSC 3050 Greenhouse Management and Crop Production ............. 4
- ADVS elective Production course ........................................... 2-3

Junior Year (31 credits)
Fall Semester (15 credits)
- ASTE 3050 (CI) Technical and Professional Communication Principles in Agriculture ............................................. 3
- ECON 3030 (DSS) Introduction to Agribusiness Marketing ................ 3
- PLSC 3700 Plant Propagation .................................................. 4
- USU 3330 (DHA) Arts Symposium ............................................ 2

Spring Semester (Level I—16 credits)
- ASTE 3240 (CI) Teaching in Laboratory Settings ........................... 3
- ASTE 3300 Clinical Experience I in Agricultural Education ........... 1
- ASTE 3620 Managing the FFA and SAE Programs ........................... 2
- SCED 3100 Motivation and Classroom Management ..................... 3
- SCED 3210 (CI/DSS) Educational and Multicultural Foundations .... 3
- SOIL 3000 Fundamentals of Soil Science .................................... 4

Senior Year (Level II—27 credits)
Fall Semester (15 credits)
- ASTE 4150 (CI) Methods of Teaching Agriculture ......................... 3
- ASTE 4300 Clinical Experience II in Agricultural Education ........... 1
- SCED 4200 (CI) Reading, Writing, and Technology ....................... 3
- SCED 4210 Cognition and Evaluation of Student Learning .............. 3
- SPED 4000 Education of Exceptional Individuals .......................... 2

Spring Semester (12 credits)
- ASTE 5500 Agricultural Education Secondary Curriculum Seminar ......................................................... 2
- ASTE 5630 Agricultural Education Student Teaching in Secondary Schools ................................................................. 10

In addition to the courses listed above, students must complete enough elective credits to meet the University’s requirement of at least 120 total credits.

Bachelor of Science in Agricultural Systems Technology (AST)

This major has two emphases: Agribusiness and Agricultural Mechanization. Preparation in either emphasis includes technical agriculture, economics, and business. The agricultural mechanization emphasis requires additional courses in technical electives and communication skills development.

The Bachelor of Science in Agricultural Systems Technology includes the following courses:

Technical Requirements (20 credits)
- ACCT 2010 Survey of Accounting I (F,Sp,Su) .................................. 3
- CHEM 1110 (BPS) General Chemistry I (F,Sp) .............................. 4
- ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp) .................................................. 3
- ECON 3030 (DSS) Introduction to Agribusiness Marketing (F) ........... 3
- ECON 3050 (DSS) Introduction to Agribusiness Management (Sp) ....... 3
- SOIL 3000 Fundamentals of Soil Science (F,Sp) ............................. 4

Communications Intensive Courses (6 credits)
- ASTE 3050 (CI) Technical and Professional Communication Principles in Agriculture (F,Sp) ............................................. 3
- ASTE 5260 (CI) Environmental Impacts of Agricultural Systems (F) .... 3

Agricultural Systems Courses (minimum of 23 credits)
- ASTE 1010 Introduction to Agricultural Systems Technology (F) ........ 3
- ASTE 2200 Electricity in Agricultural Systems (Sp) ............................ 3
- ASTE 2830 Agribusiness Sales and Marketing (F) ............................ 3
- ASTE 3030 Metal Welding Processes and Technology in Agriculture (F) .............................................................. 3
- ASTE 3080 Compact Power Units for Agricultural and Turfgrass Applications (Sp) ...................................................... 3
- ASTE 3090 Computer Applications in Agriculture (F) ..................... 3
- ASTE 4100 Agricultural Structures and Environment (Sp) ............... 3
- ASTE 4900 Senior Project Research and Creative Opportunity (Sp) ...... 1-6

Designated Electives (minimum of 24 credits)
Select 24 credits from the following courses. Twelve of these credits must be selected from upper-division (3000-level and above) courses.

- ASTE 1610 Agricultural Machinery Engines (F) ............................. 6
- ASTE 1620 Agricultural Machinery Power Trains (Sp) ...................... 6
- ASTE 3040 (QI) Fabrication Practices in Agricultural Buildings (Sp) .... 2
- ASTE 3100 Leadership Applications in Agricultural Science, Management, and Development (Sp) ................................. 2
- ASTE 3200 Irrigation Principles and Practices (Sp) ............................ 3
- ASTE 3600 (QI) Management of Agricultural Machinery Systems (Sp) ......................................................................... 3
- ASTE 3900 Special Problems in Agricultural Systems Technology and Education (F,Sp,Su) .................................................... 1-6
- ASTE 4250 Occupational Experiences in Agriculture (F,Sp,Su) ......... 1-6
- ASTE 5100 Electrical Controls and Motors for Agri-Industrial Applications (Sp) .......................................................... 3
- ADVS courses ............................................................................. 6-12
- ACCT courses ............................................................................ 6-12
- ECON courses (Agricultural) ....................................................... 6-12
- MHR courses ............................................................................. 6-12
- BA courses ................................................................................. 6-12
- BIS courses ................................................................................ 6-12
- PLSC courses ............................................................................. 6-12
- SOIL courses ............................................................................. 6-12

Electives (maximum of 11 credits)

Total Credits for Graduation .......................................................... 92

Students will complete a minor in Business or Agribusiness. Additional requirements in Animal Science; Plant and Soil Sciences; and Wildland Resources must also be met. In addition, students must complete the University Studies Requirements.

Suggested Four-year Course of Study for Agricultural Systems Technology Major

Freshman Year (32 credits)
Fall Semester (16 credits)
- ASTE 1010 Introduction to Agricultural Systems Technology .......... 3
- ENGL 1010 (CL1) Introduction to Writing: Academic Prose ............ 3
- MATH 1050 (QL) College Algebra .................................................. 4
- PHIL 1000 (BHU) Introduction to Philosophy .................................. 3
- Designated elective course .............................................................. 3
Department of Agricultural Systems Technology and Education

Spring Semester (16 credits)
ASTE 2200 Electricity in Agricultural Systems ................................... 3
CHEM 1110 (BPS) General Chemistry .................................................. 4
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles ................................................................. 3

MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su) ................... 3
SOIL 4000 Soil and Water Conservation (F) .............................................. 3
STAT 2300 (QL) Business Statistics (F,Sp,Su) ............................................ 4

University Studies Requirements
(not met as part of above requirements) (18 credits)
Communications Literacy (CL1 and CL2) courses ........................................ 6
Breadth Creative Arts (BCA) course ......................................................... 3
Breadth Humanities (BHU) course ......................................................... 3
Breadth Life Sciences (BLS) course ......................................................... 3
Depth Humanities and Creative Arts (DHA) course .................................. 3
Computer and Information Literacy (CIL) Exam ........................................ 0

General Electives (24 credits)
Total Credits for Graduation .................................................................................. 120

Associate of Applied Science Degree in Agricultural Machinery Technology
The Associate of Applied Science Degree in Agricultural Machinery Technology consists of a minimum of 6 credits of University Studies courses, 45 credits in the major (Agricultural Systems Technology and Education), 9 credits in business or related elective coursework, for a total of not less than 80 credits. The suggested breakdown of coursework is listed below.

University Studies (6 credits)
Classes will be selected from a minimum of two areas for a total of 6 credits. ENGL 1010, Introduction to Writing; Academic Prose (or an equivalent writing or communications class) must be completed as one of these classes.

Core Classes (45 credits)
The following 45 credits are required:
ASTE 1010 Introduction to Agricultural Systems Technology (F) .................. 3
ASTE 1120 Forage and Harvest Equipment (F) .......................................... 3
ASTE 1130 Planting and Tillage Equipment (Sp) ........................................... 3
ASTE 1610 Agricultural Machinery Engines (F) ......................................... 6
ASTE 1620 Agricultural Machinery Power Trains (Sp) .................................. 6

1Students must complete a minimum of 24 credits of designated elective courses in ASTE, ADVS, ACCT, ECON (Agricultural), MHR, BA, BIS, BLSC, or SOIL courses. Of these, 12 credits must be selected from upper-division (3000-level and above) courses.

2Students must complete enough elective credits to meet the University’s requirement of at least 120 total credits.
A total of 60 credits are required. Students should select credits approved by the Agricultural Systems Technology and Education Department for flexibility in strengthening areas of insufficient background.

**Elective Courses**

Students should select credits approved by the Agricultural Systems Technology and Education Department for flexibility in strengthening areas of insufficient background.

A total of 60 credits are required.

**Agricultural Machinery Technology Certificate**

This one-year agricultural program meets the needs of persons interested in employment opportunities with agricultural dealerships and companies in the areas of parts and service, as well as with farm suppliers, feed and fertilizer agencies, corporate farms and ranches, and other related industries. The vocationally oriented agricultural technology program includes a cooperative occupational experience placement at the end of the first year of instruction.

Requirements for the one-year program include a minimum of 31 credits, with the following breakdown of suggested coursework:

**Fall Semester**

- ASTE 2000 Electricity in Agricultural Systems (AC) (Sp) 3
- ASTE 3030 Metal Welding Processes and Technology in Agriculture (F) 3
- ASTE 3080 Compact Power Units for Agricultural and Turfgrass Applications (Sp) 3
- ASTE 3090 Computer Applications in Agriculture (F) 3
- ASTE 3600 Management of Agricultural Machinery Systems (Sp) 3
- ASTE 3710 Agricultural Machinery Hydraulic Systems and Diagnosis (F) 3
- ASTE 3720 Agricultural DC Electrical Systems and Diagnosis (F) 3
- ASTE 3730 Agricultural Machinery Auxiliary Systems and Diagnosis (Sp) 3

**Business or Related Elective Classes (select 9 credits)**

- ADVS 1110 Introduction to Animal Science (F,Sp) 4
- ASTE 2250 Occupational Experience in Agriculture (F,Sp) 5
- ASTE 2830 Agribusiness Sales and Marketing (F) 3
- ASTE 2900 (BSS) Humanity in the Food Web (F,Sp) 3
- ASTE 2830 Individualized Projects in Agricultural Mechanics (F,Sp) 1-3
- ASTE 3040 Fabrication Practices in Agricultural Buildings (Sp) 2
- ASTE 3050 Technical and Professional Communication Principles in Agriculture (F,Sp) 3
- ASTE 3090 Computer Applications in Agriculture (F) 3
- ASTE 3100 Leadership Applications in Agricultural Science, Management, and Development (Sp) 2
- ASTE 3200 Irrigation Principles and Practices (Sp) 3
- ASTE 3900 Special Problems in Agricultural Systems Technology and Education (F,Sp,Su) 1-6
- ATE 4100 Agricultural Structures and Environment (Sp) 3
- ATE 5100 Electrical Controls and Motors for Agri-Industrial Applications (Sp) 3
- ATE 5260 Environmental Impacts of Agricultural Systems (F) 3
- AWER 1200 (BLS) Biodiversity: Its Conservation and Future (F,Sp) 3
- BIOL 1610 Biology I (F) 4
- CHEM 1110 (BPS) General Chemistry I (F,Sp) 4
- CHEM 4900 Principles of Rangeland Management (Sp) 3
- MATH 1030 (QL) Quantitative Reasoning (F,Sp) 3
- NR 1010 (BSS) Humans and the Changing Global Environment (F,Sp) 3
- PHYS 1200 (BPS) Introduction to Physics by Hands-on Exploration 4
- PLSC 2200 Pest Management Principles and Practices (Sp) 3
- PLSC 2620 Woody Plant Materials: Trees and Shrubs for the Landscape (F) 3
- PLSC 2650 Identification and Selection of Plants in Production Agriculture (F) 1
- PLSC 3050 Greenhouse Management and Crop Production (Sp) 4
- PLSC 3300 Residential Landscapes (Sp) 3
- PLSC 3400 Landscape Management Principles and Practices (F) 3
- PLSC 3800 Turfgrass Management (F) 3
- PLSC 5550 Weed Biology and Control (F) 4

The following courses are required for the Family and Consumer Sciences Education Major.

- **Required Support Courses and Prerequisites**
  - MATH 1050 (QL) College Algebra (F,Sp,Su) 4
  - CHEM 1110 (BPS) General Chemistry I (F) 4
  - CHEM 1120 (BPS) General Chemistry II (Sp) 4

- **Major Required Courses (88 credits)**
  - A grade of C or better must be earned in these courses
  - FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) 3
  - FCHD 2400 (BSS) Marriage and Family Relationships (F,Sp) 3
  - FCHD 2450 (BSS) The Consumer and the Market (F,Sp) 3
  - FCHD 3350 (BPS/QI) Family Finance (F,Sp) 3
  - FCHD 4550 Preschool Methods and Curriculum (F,Sp) 3
  - FCHD 4900 Practice Teaching in Child Development Laboratories (F,Sp,Su) 3
  - FCSE 4250 Internship in Family and Consumer Sciences Education (F,Sp,Su) 3
  - FCSE 2040 Clothing Production Principles (F,Sp) 3

**Minor in Agricultural Systems Technology**

A minimum of 18 credits approved by a faculty advisor are required.

**Bachelor of Science in Family and Consumer Sciences Education (FCSE)**

This major provides professional preparation for teaching Family and Consumer Sciences Education and Occupational Family and Consumer Sciences Education in public schools, or for employment as a family and consumer scientist in business or government agencies, and extension. Many states, including Utah, require a master’s degree to work for extension.

This composite major includes study in nutrition and food sciences, family and human development, interior design, apparel and textiles, and consumer sciences, plus professional education courses.

Student teaching in secondary public schools is required. Internships in extension or business are available.
Department of Agricultural Systems Technology and Education

FCSE 2510 Orientation to Family and Consumer Sciences Education (Sp) .......................................................... 3
FCSE 3030 (DSC) Textile Science (Sp) .......................................................... 4
FCSE 3040 Advanced Clothing Production Principles (F) .......................................................... 3
FCSE 3060 (DSS/CI) Human Behavior Related to Dress (F) (3 cr) or FCSE 3060 Dress and Humanity (F,Su) (3 cr) .......................................................... 3
FCSE 3300 Family and Consumer Sciences Education Clinical Experience I (40 hrs. minimum) (Sp) .......................................................... 3
FCSE 3400 Family and Consumer Sciences Education Methods I (Sp) .......................................................... 3
FCSE 4300 Family and Consumer Sciences Education Clinical Experience II (40 hrs. minimum) (F) .......................................................... 3
FCSE 4400 Family and Consumer Sciences Education Methods II (F) .......................................................... 3

Fall Semester (11-13 credits)

ENGL 1010 (CL1) Introduction to Writing: Academic Prose .......................................................... 3
FCHD 1500 (BSS) Human Development Across The Lifespan .......................................................... 3
FCHD 2450 (BSS) The Consumer and the Market .......................................................... 3
MATH 1010 Intermediate Algebra .......................................................... 3
NFS 1020 (BLS) Science and Application of Human Nutrition (F,Sp) .......................................................... 3
NFS 1240 Culinary Basics (F,Su) .......................................................... 3
NFS 2020 Nutrition Throughout the Life Cycle (Sp) .......................................................... 3
NFS 4070 Experimental Foods (Sp) .......................................................... 3
SCED 3100 Motivation and Classroom Management (F,Sp) .......................................................... 3
SCED 3210 (DSS/CI) Educational and Multicultural Foundations (F,Sp) .......................................................... 2

Junior Year (32 credits)

Fall Semester (17 credits)

FCHD 3350 (QI) Family Finance .......................................................... 3
FCHD 4550 Preschool Methods and Curriculum .......................................................... 3
FCSE 3040 Advanced Clothing Production Principles .......................................................... 3
FCSE 3060 (CI) Human Behavior Related to Dress (3 cr) or FCSE 3060 Dress and Humanity (3 cr) .......................................................... 3
SPED 4000 Education of Exceptional Individuals .......................................................... 2

Spring Semester (16 credits)

CHEM 1120 (BPS) General Chemistry II .......................................................... 4
FCHD 2400 (BSS) Marriage and Family Relationships .......................................................... 3
FCSE 3030 (DSC) Textile Science .......................................................... 4
NFS 2020 Nutrition Throughout the Life Cycle .......................................................... 3

Senior Year (23-25 credits)

Fall Semester (11-13 credits)

FCHD 4960 Practice Teaching in Child Development Laboratories (3 cr) or FCSE 4250 Internship in Family and Consumer Sciences Education (1-3 cr) .......................................................... 1-3
FCSE 4300 Family and Consumer Sciences Education Clinical Experience II .......................................................... 1
FCSE 4400 Family and Consumer Sciences Education Methods II .......................................................... 3
SCED 4200 (CI) Reading, Writing, and Technology .......................................................... 3
SCED 4210 Cognition and Evaluation of Student Learning .......................................................... 3

In addition to the courses listed above, students must complete enough elective credits to meet the University’s requirement of at least 120 total credits.

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work on a one-on-one basis with state faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors
**Department of Agricultural Systems Technology and Education**

Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

**Additional Information**

For further information about undergraduate programs and requirements in the Department of Agricultural Systems Technology and Education, see the major requirement sheets, which can be obtained from the department, or accessed online at: http://www.usu.edu/ats/majorsheets/

**Graduate Programs**

**Admission Requirements**

See general admission requirements, pages 99-100. Applications will be considered throughout the year. However, students who wish to be considered for financial aid must apply by February 1 for the coming academic year. No application will be considered until all required information arrives at the office of the School of Graduate Studies.

**Course Requirements**

**Master of Science**

The MS program requires the completion of a minimum of 33 credits beyond the bachelor’s degree. These credits must be approved by a supervisory committee. However, to optimize a student’s academic experiences, 36 credits are recommended. A 15-credit core curriculum is required and includes courses in research/statistics and completion of a Plan A thesis for 6 credits or a Plan C program with a minimum of 37 credits. Students are also expected to select and complete an area of specialization.

In the Family and Consumer Sciences Education and Extension specialization, a Plan B option is available. This plan involves 33 credits of instruction (includes 3 thesis credits) and the development and presentation of a creative project.

The following four specializations are available for the MS in Agricultural Education:

The Agricultural Extension Education specialization provides a program for individuals interested in cooperative extension work. The curriculum for the program includes coursework related to managing people; planning, implementing, and evaluating programs to promote technology transfer (adult education); understanding research techniques relevant to agricultural education; and the managing of fiscal affairs.

Electives are selected from each of the following departments: Agricultural Systems Technology and Education; Animal, Dairy and Veterinary Sciences; Economics; Biology; Plants, Soils, and Biometeorology; Wildland Resources; and Instructional Technology.

The Secondary and Postsecondary Agricultural Education specialization is designed for persons desiring to improve their competencies as educators. This specialization provides teachers with opportunities to acquire additional knowledge in professional education and in their teaching specialties. The master’s degree does not result in a teaching license for public schools.

The purpose of the Family and Consumer Sciences Education and Extension specialization is to expand academic preparation in an area of study such as family studies, housing, textiles and clothing, nutrition and food sciences, and management of personal resources. This specialization places emphasis on teaching and curriculum/program development and/or Extension. Students are prepared for community professions, including secondary teaching (since students earn a teaching license), urban and rural extension, social science, and business. Study may lead to supervisory and administrative positions in business, technical schools, and applied technology colleges, or to consulting positions in mass media and industry. The master’s degree does not result in a teaching license for public schools.

The International Agricultural Extension specialization was developed to prepare agriculturally educated people to perform administrative and supervisory roles in less-developed countries. The curriculum for this program includes coursework related to managing people; planning, implementing, and evaluating programs to promote technology transfer; and managing fiscal affairs. Electives are selected from each of the following departments: Agricultural Systems Technology and Education; Animal, Dairy and Veterinary Sciences; Economics; Biology; Plants, Soils, and Biometeorology; and Instructional Technology.

**Research**

The Utah Agricultural Experiment Station, a component of the College of Agriculture, supports graduate work in several areas of Agricultural Systems Technology and Education. Other state and federal agencies also support research in agricultural systems.

**Financial Assistance**

Both departmental and formal grant support are available to graduate students and are awarded on a competitive basis. Students requesting financial support should apply to the department.

Research assistantships are available through faculty members who have ongoing projects with the Utah Agricultural Experiment Station or who hold special research grants from the University, private companies, or state-federal agencies. Acceptance to pursue graduate study does not guarantee the student financial assistance.

**Requirement Changes**

Graduation requirements described in this catalog are subject to change. Students should check with their departments concerning possible changes.

**Agricultural Systems Technology and Education Faculty**

**Professors**

Bruce E. Miller, agricultural systems and mechanization
Weldon S. Sleight, extension education
Gary S. Straquadine, agricultural education/extension

**Adjunct Professor**

Kevin C. Kesler, 4-H and youth development programs

**Professor Emeritus**

Gilbert A. Long, agricultural education
Department of Agricultural Systems Technology and Education

**Associate Professors**
- F. Richard Beard, research and extension, agricultural engineering
- Rhonda L. Miller, sustainable agriculture/agricultural systems
- Rudy S. Tarpley, agricultural education, teacher preparation

**Assistant Professors**
- John D. Harrison, agricultural waste management/extension specialist
- Nancy Thompson, family and consumer sciences education
- Brian K. Warnick, agricultural education, teacher preparation

**Instructor**
- Betty J. Murri, apparel and textiles

**Lecturers**
- Afifa Sabir, education and outreach, Biotechnology Center
- Julie P. Wheeler, family and consumer sciences education

**Academic Advisor**
- Eric B. Worthen

Associate Head:
Thomas D. Bunch, Agricultural Science 220, (435) 797-2148,
tombunch@cc.usu.edu

Undergraduate Advisor for Animal Science and Dairy Science majors:
Tami Spackman, Agricultural Science 242, (435) 797-2150,
tami.spackman@usu.edu

Undergraduate Advisor for Bioveterinary Science majors:
Stanley D. Allen, Veterinary Science 211, (435) 797-1900,
sallen@cc.usu.edu

Graduate Programs Coordinator:
Jeffrey L. Walters, Agricultural Science 246, (435) 797-2161,
jeffrey.walters@usu.edu

Degrees offered: Bachelor of Science (BS) in Animal Science, Dairy Science, Bioveterinary Science; Master of Science (MS) in Animal Science, Bioveterinary Science, Dairy Science; Doctor of Philosophy (PhD) in Animal Science and Bioveterinary Science; MS and PhD degrees in Toxicology are available through the Interdepartmental Toxicology program

Undergraduate Emphases: Animal Science—Animal Industries, Biotechnology, Science; Dairy Science—Dairy Industries, Science; Bioveterinary Science—Biotechnology

Graduate Specializations: Animal/Dairy Science—Animal Nutrition, Breeding and Genetics, Molecular Biology, Reproductive Biology, Animal or Dairy Management (MS only); Bioveterinary Science (PhD only)—Parasitology, Toxicology, Virology

Certificate Program: Dairy Herdsman

Undergraduate Programs

Objectives

Bachelor’s degree students majoring in Animal Science may choose a program from three career emphasis areas: Science, Animal Industries, or Biotechnology. Students majoring in Dairy Science may choose a program from two career emphasis areas: Science or Dairy Industries. The curricula in the animal and dairy sciences are designed to prepare students for a broad base of rewarding careers in the dynamic disciplines of animal agriculture. Teaching and research facilities, flocks, and herds are available for “hands-on” practical laboratory experiences, along with faculty-mentored research projects. An assigned faculty advisor helps students develop, arrange, and expedite their personal undergraduate program.

Bioveterinary Science (prevetinary) bachelor’s degree programs are intended to prepare students for admission to professional veterinary medical schools and/or graduate study in the biomedical sciences. A preveterinary bachelor’s degree is considered a nonterminal degree. Preveterinary students may earn a bachelor’s degree in Bioveterinary Science, or in the Science Emphasis of Animal Science or Dairy Science.

Instruction in the ADVS Department also encompasses a diversified co-curricular program including allied clubs, intercollegiate livestock judging and rodeo teams, and involvement with their respective professional societies.

Animal and Dairy Sciences

Science Emphasis

Designed for students desiring education beyond the bachelor’s degree, this emphasis is a preparatory course of study for students who have a career interest in the following areas: animal research in genetics; reproductive biology, nutrition (public or private sector); biotechnology; teaching; and advanced degrees (MS, PhD, and veterinary school). The Science Emphasis requires an especially close student-advisor relationship, as post-graduate training is considered essential for professional success in these disciplines.

Animal (Dairy) Industries Emphasis

This emphasis is designed to prepare students who earn a bachelor’s degree for the broadest range of career opportunities in animal agriculture. The Animal Industries Emphasis stresses both traditional skills in the areas of basic and applied animal sciences and related learning experiences in the other agricultural sciences, as well as in the areas of business administration, economics, and management. Students can select either an advanced research project or an internship experience in the animal industries as an integral component of their program of study in the junior or senior year. Graduates from this emphasis may seek career opportunities in production animal agriculture in farm or ranch management, in state or federal government agricultural agencies, and in fields that support or interact with animal agriculture, such as corporate agribusiness, wholesale and retail marketing and sales, economics, accounting, agricultural real estate sales and appraisal, financing and credit operations, public policy, agricultural media and communications, insurance, commodity trading, animal product processing, agricultural cooperatives, and producer/commodity associations.

Animal and Bioveterinary Sciences

Biotechnology Emphasis

This emphasis is designed to prepare students who earn a bachelor’s degree for careers in the expanding biotechnology industry or for graduate study in related fields. Nationwide there are more than 1,200 biotechnology/ biopharmaceutical companies, with additional start-ups developing every year. Recent increases in federal funding for research in animal biotechnology, along with heightened private sector activity, have led to unprecedented career prospects in molecular biology, genomics, bioinformatics, developmental biology, and associated areas. USU has made a major commitment to biotechnology since 1986. The ADVS Department is heavily involved in biotechnology research and teaching, and the resources of the Center for Integrated BioSystems are also available to support this emphasis.

Those students who enjoy lab work and would like to have a BS degree with good job opportunities, and still qualify to apply to veterinary school, may elect to add the Biotechnology Emphasis to their Bioveterinary Science or Animal Science degree.

Preveterinary Program

Preveterinary students take courses required by veterinary schools. Classes should be planned to assure meeting the current requirements for the veterinary schools to which the student plans to apply for admission. In most cases, preveterinary preparation requires a major...
Department of Animal, Dairy and Veterinary Sciences

portion of three academic years. Students accepted into veterinary school prior to completion of their BS degree may transfer credits back to USU for completion of their BS degree in Bioveterinary Science.

Utah participates in WICHE (Western Interstate Commission for Higher Education) which provides state subsidization of Utah resident (5 years or longer at the time of application) students entering any veterinary school that is a WICHE-participating school. At present this includes Colorado State University, Washington State University, and Oregon State University. The State of Utah also provides some support for a limited number of resident students who enroll at non-WICHE veterinary schools in the continental United States. Students may also apply to other veterinary schools as out-of-state applicants.

Vocational Subbaccalaureate Program

Dairy Herdsman Certificate
Students completing the required courses and experience in the Dairy Herdsman’s curriculum usually find employment with a commercial or family dairy. Some enter dairy-related businesses. Students desiring to continue their dairy education may complete a BS degree in three additional years with proper planning and suitable academic performance.

Requirements

Departmental Admission Requirements
Undergraduate admission requirements for the Animal Science and Dairy Science programs are the same as those described for the University. Students in good standing may apply for admission to the department. New freshmen admitted to USU in good standing qualify for admission to the Bioveterinary Science major. Students with less than 60 semester credits transferring from other institutions need a 2.2 transfer GPA, and students with less than 60 semester credits transferring from other USU majors need a 2.0 GPA for admission to the Bioveterinary Science major. All students with 60 or more semester credits need a 2.75 total GPA to be admitted to advanced standing in Bioveterinary Science, except that students declaring a Biotechnology Emphasis must have a 2.25 total GPA.

Departmental Standards
The following minimum requirements apply to all students working toward any bachelor’s degree offered by the ADVS department. Bachelor’s degree candidates must comply with these requirements in order to graduate: (1) courses required for the major may be repeated only once to improve a grade, and (2) courses required for the major may not be taken for pass-fail credit. In addition to these requirements, Animal Science and Dairy Science bachelor’s degree candidates must attain a grade point average of at least 2.50 in the ADVS courses specified as requirements in their respective emphasis curricula to graduate. Animal Science and Dairy Science degree candidates must attain an overall GPA of at least 2.25 to graduate. Bioveterinary Science degree candidates must attain an overall GPA of at least 3.0 to graduate, except for students with a Biotechnology Emphasis, who must attain an overall GPA of at least 2.50 to graduate.

Graduation Requirements
Courses required and recommended for meeting BS degree graduation requirements in the various options available in the department are as follows.

CHEM 1220 (BPS) Principles of Chemistry II ......................................................... 4
CHEM 1225 Chemical Principles Laboratory II ......................................................... 1
MATH 1100 (QL) Calculus Techniques (3 cr) or MATH 1210 (QL) Calculus I (4 cr) ......................................................... 3 or 4
Breadth Course13 ......................................................... 3
Sophomore Year (32 credits)
Fall Semester (15 credits)
ADVS 2130 Dairy Production Practices ................................................. 3
Biol 1610 Biology I ............................................................................... 4
CHEM 2310 Organic Chemistry I .......................................................... 4
CHEM 2315 Organic Chemistry Laboratory I ........................................ 1
ENGL 2010 (Cl) Intermediate Writing: Research Writing in a Persuasive Mode ................................................................. 3

Spring Semester (17 credits)
ADVS 3000 Animal Health and Hygiene ................................................. 3
BIOL 1620 (BLS) Biology II ................................................................. 4
CHEM 2320 Organic Chemistry II ......................................................... 4
Breadth Course 16 ............................................................................... 3

Junior Year (30 credits)
Fall Semester (13 credits)
ADVS 3500 Principles of Animal Nutrition ........................................ 3
BIOL 3300 General Microbiology ....................................................... 4
STAT 2000 (QI) Statistical Methods ................................................... 3
Breadth Course 16 ............................................................................... 3

Spring Semester (17 credits)
ADVS 3510 (QI) Applied Animal Nutrition ......................................... 3
ADVS 4200 (Cl) Physiology of Reproduction and Lactation .............. 4
BIOL 3060 (QI) Principles of Genetics ................................................ 4
CHEM 3700 Introductory Biochemistry ............................................. 3
Breadth Course 16 ............................................................................... 3

Senior Year (30.5 credits)
Fall Semester (15.5 credits)
ADVS 4560 (QI) Principles of Animal Breeding ................................ 3
ADVS 4910 Preprofessional Orientation ........................................... 0.5
ADVS 4920 (Cl) Undergraduate Seminar .......................................... 2
Depth Course 17 ............................................................................... 3
Electives 18 ..................................................................................... 7

Spring Semester (15 credits)
ADVS 4250 Internship in Animal Industry (3 cr) or
ADVS 4800 Undergraduate Research or Creative Opportunity (3 cr) .. 3
ADVS 5130 Dairy Cattle Management ............................................... 3
Depth Course 17 ............................................................................... 3
Electives 18 ..................................................................................... 6
16 Must take one Breadth course from each of the following four categories: American Institutions, Creative Arts, Humanities, and Social Sciences.
17 Must take one Depth course from each of the following two categories: Humanities and Creative Arts, and Social Sciences.
18 Recommended Electives include ADVS 5160, 5240, 5260; CHEM 3710; PHYS 2110.

Bioveterinary Science (Pre-veterinary)
Major Requirements
(120 credits) (3.0 min. total GPA) (2.5 min. total GPA if including Biotechnology Emphasis)

This is a four-year program, preparing students for application to and admittance to veterinary school or graduate school, or for finding employment in biotechnology research. Courses required for the major may not be taken pass-fail, except for ADVS 3920. In recent years, nearly all students who have been accepted to veterinary school have had at least a 3.4 GPA.

Advanced Standing Requirements
To attain Advanced Standing in Biotechnology Science, students must have completed or must be currently registered for a minimum of 60 semester credits, and must have earned an overall GPA of at least 2.75 for all credits, including transfer credits, taken up to the time the petition for Advanced Standing is made. If declaring the Biotechnology Emphasis, students must have earned an overall GPA of at least 2.25.

Students’ records will be checked when they reach a total of 60 semester credits. Those who do not meet advanced standing requirements will be notified to meet with their advisor.

Semester Schedule
Freshman Year (30 credits) 19
Fall Semester (15 credits)
ADVS 1110 Introduction to Animal Science ....................................... 4
ADVS 1920 Orientation to Bioveterinary Science ................................ 1
CHEM 1210 (CI) Principles of Chemistry I ....................................... 4
CHEM 1225 (CI) Principles of Chemistry Laboratory I ...................... 1
ENGL 1010 (Cl) Introduction to Writing: Academic Prose ................. 3
University Studies Breadth Course .................................................. 3
Electives ............................................................................................ 2

Spring Semester (15 credits)
ADVS 2200 Anatomy and Physiology of Animals .............................. 4
CHEM 1220 (CI) Principles of Chemistry II ....................................... 4
CHEM 1225 (CI) Principles of Chemistry Laboratory I ...................... 1
ENGL 1010 (Cl) Introduction to Writing: Academic Prose ................. 3
University Studies Breadth Course .................................................. 3
Electives ............................................................................................ 2

Summer Semester
ADVS 3920, Internship in Veterinary Medicine, is a recommended option. Students may count up to 2 credits of ADVS 3920 as elective upper-division credits toward graduation.

Sophomore Year (30.5 credits)
Fall Semester (15 credits)
ADVS 3500 Principles of Animal Nutrition ........................................ 3
BIOL 1610 (CI) Biology I ................................................................. 4
CHEM 2310 (CI) Organic Chemistry I ............................................... 4
CHEM 2315 (CI) Organic Chemistry Laboratory I ............................. 1
University Studies Breadth Course .................................................. 3

Spring Semester (15 credits)
BIOL 1620 (Cl) Biology II ................................................................. 4
CHEM 2320 (CI) Organic Chemistry II ........................................... 4
ADVS 2920 Orientation to Veterinary Medicine ................................ 0.5
BIOL 3060 (Cl) Principles of Genetics ............................................. 4
University Studies Breadth Course .................................................. 3
Electives ............................................................................................ 2

Junior Year (33 credits)
Fall Semester (17 credits)
BIOL 3300 General Microbiology ................................................... 4
PHYS 2110 (Cl) The Physics of Living Systems I ............................... 4
ENGL 2010 (Cl) Intermediate Writing: Research Writing in a Persuasive Mode ................................................................. 3
STAT 2000 (QI) Statistical Methods ................................................... 3
University Studies Breadth Course .................................................. 3
Electives ............................................................................................ 3

Spring Semester (16 credits)
ADVS 3000 Animal Health and Hygiene ........................................... 4
PHYS 2120 (BPS) The Physics of Living Systems II .......................... 4
CHEM 3700 (Cl) Introductory Biochemistry ..................................... 3
Two Upper-division University Studies Breadth Courses ................. 6

Senior Year (at least 29 credits)
Students must complete at least 120 semester credits for the BS degree, of which 40 credits must be in upper-division courses. The student must complete two courses which are communications intensive, and one course which is quantitative intensive. Students must include at least 15 credits from the following list. An additional 7
Department of Animal, Dairy and Veterinary Sciences

elective credits are needed to complete the 120 credits required for graduation. Other upper-division life sciences courses may be applied to this requirement if approved by a biotechnology science advisor.

ADVS 3510 (QI) Applied Animal Nutrition (Sp) ........................................ 3
ADVS 4200 (CI) Physiology of Reproduction and Lactation (Sp) .............. 4
ADVS 4560 (QI) Principles of Animal Breeding (F) ............................... 3

PHYS 2110 The Physics of Living Systems I ........................................... 4
PHYS 2120 (BPS) The Physics of Living Systems II .................................. 4

If a student is unable to pass the Computer and Information Literacy (CIL) Test, USU 1000 and OSS 1400 should be taken the first year.

19Required for Colorado, Washington, and Oregon veterinary schools.
20Students with little exposure to chemistry or an ACT Math score less than 25 will need to begin with a lower-level chemistry class and/or take MATH 1000 first. (See an advisor for assistance.)
21Students with math ACT scores of less than 25 must start with a lower-level class.
22Can also be met by an AP English Language and Composition or Literature and Composition test score of 3 or higher, an ACT English test score of 29 or higher, a CLEP English Composition test score of 50 or higher, a CLEP Freshman College Composition test score of 53 or higher, or an SAT Verbal test score of 640 or higher.
23Must take one Breadth course from each of the following four categories: Humanities, Creative Arts, Social Sciences, and American Institutions. Two of these courses must be taken with a USU prefix. AP or CLEP tests may be used to fulfill some Breadth requirements.
24Two approved Depth courses are required: one in Humanities and Creative Arts and one in Social Sciences (3000 level or higher). It is recommended that one of these courses be a Communications Intensive (CI) course.
25PHY2110 must be taken if the student plans to apply to veterinary school in Colorado, Washington, or Oregon.

Dairy Herdsman Program

The Program

The Dairy Herdsman Program is a one-year course of study in practical dairy knowledge and skills. Through lectures, laboratory exercises, and actual on-the-farm experiences, students are taught to be dairy herdsman, with highly employable skills. A high school education is highly recommended, but is not a requirement to be admitted to the program.

The classroom and laboratory experiences are directed by Utah State University staff members, extension personnel, and specially qualified guest speakers. Coursework covers such areas as nutrition and feeding, management, physiology, milk production, breeding and selection, and buildings and equipment. Students also gain practical experience and know-how by working with a commercial dairyman in Cache Valley. Many students are now selecting the new degree option, which allows students to take the dairy herdsman classwork and then continue on for a degree in dairy science.

All students may participate in judging at regional and national levels, showing at state and area shows, working with area sales, and field trips to the Western International Dairy Expo, the Dairy Herd Improvement Laboratory, and progressive dairy enterprises. These activities provide a well-rounded background and improve employment opportunities.

Students in this program have access to all privileges available to Utah State University students: athletic and entertainment events, campus housing and food services, the University library, the bookstore, and recreational facilities.

Utah State University 2006-2007 General Catalog 151
Department of Animal, Dairy and Veterinary Sciences

Career Opportunities
Students who complete this program will have a good working knowledge of how to care for and make decisions about various dairy animals and will understand and be able to use various types of equipment. These skills, as well as an understanding of the management process involved, can greatly improve the chances of being employed by a dairy or dairy-related industry.

Required Coursework for Dairy Herdsman Program
Fall Semester (16 credits)
ADVS 1010 Artificial Insemination and Reproduction ..........................2
ADVS 1020 Dairy Cattle Nutrition and Feeding ..................................3
ADVS 1050 Dairy Genetics .................................................................3
ADVS 1250 Applied Agricultural Computations ................................2
ADVS 2130 Dairy Production Practices ...........................................3
ADVS 2250 Cooperative Work Experience .........................................3

Spring Semester (16 credits)
ADVS 1030 Lactation and Milking Systems .........................................3
ADVS 1040 Records and Financial Aspects of Dairy Herd Operations 3
ADVS 1060 Applied Feeding and Management of Dairy Calves and Basic Construction of Facilities .................................................3
ADVS 1720 Dairy Cattle Evaluation and Judging ................................1
ADVS 2250 Cooperative Work Experience .........................................6

Horse Production
ADVS 1110, 2190, 2250; 6 or more elective ADVS credits with approval of an animal science advisor.

Horse Training
ADVS 1110, 1600, 2190, 2600; 2 or more elective ADVS credits with approval of an animal science advisor.

Dairy Herdsman
ADVS 1020, 1030, 1040, 1050, 1060. (Not available to Dairy Science Majors.)
Transfer students must have a minimum of one 3-credit upper-division course in residency with the approval of an ADVS advisor.

Undergraduate Program Assessment
The ADVS Department assessment plan defines learning objectives for each of its undergraduate programs. These learning objectives are mapped to each of the required courses in each program, so that they may be evaluated for their contribution to program goals. Outcome measures have also been defined for each program, and a process has been implemented to conduct exit interviews with all graduating students in Animal and Dairy Science. Rate of admission to a professional veterinary medical program has been identified as the critical outcome measure for the Bioveterinary Science program. The ADVS Department Curriculum Committee oversees the assessment process, with input from the ADVS Department Internship and Placement Committee. The ADVS Curriculum Committee reports its assessment findings to the ADVS department head, as well as to faculty members, and incorporates these findings in its regular ongoing and periodic comprehensive reviews and revisions of the ADVS Department undergraduate programs.

Learning Objectives
Animal Science Major (Animal Industries Emphasis)
The following Disciplinary Knowledge objectives apply:

1. Attain knowledge in mathematics and basic sciences required for disciplinary competency.

2. Know the nature, intent, and scope of animal science.

3. Attain depth in two subfields of animal science.

4. Achieve understanding in the disciplines of animal genetics, health, nutrition, and reproduction.

5. Integrate knowledge from the various disciplines to effectively conduct livestock operations.

Skills and Career Competencies objectives are as follows:

1. Comprehend reading materials appropriate to course levels.

2. Communicate effectively in oral and written forms.

3. Conduct library research using modern methods.

4. Use a computer for written work, presentations, and research.

5. Attain proficiency in basic techniques of animal management.

Honors
There is also an Honors Plan for students desiring a BS degree “with Honors” in Animal/Dairy/Bioveterinary Science. For details, students should contact their academic advisor.

ADVS Minors
A minor can be valuable when associated with a major in agricultural education, agricultural economics, plant science, nutrition and food science, business, economics, computer science, rangeland resources, and in other disciplines where the animal industry has direct or indirect involvement.

Requirements for specialty or emphasis area minors are listed below. The same departmental standards applying to animal science and dairy science majors also apply to all minors (see page 147).

Requirements for Minors
The following is a listing of courses for the various minor emphasis areas. A specific course may not be used to fulfill the requirements of more than one ADVS minor.

General Animal Science
ADVS 1110; choose one or more courses from ADVS 2080, 2090, 2120, 2130; 10 elective ADVS credits with approval of an animal science advisor.

General Dairy Science
ADVS 1110, 2130; 10 elective ADVS credits with approval of a dairy science advisor.

Bioveterinary Science
ADVS 2200, 3000; 7 elective ADVS credits with approval of a bioveterinary science advisor. A minimum grade of C is required in all courses applied toward this minor.
Animal Science and Dairy Science Majors

(Science Emphasis)

The following Disciplinary Knowledge objectives apply:

1. Attain knowledge in mathematics and basic sciences required for disciplinary competency.
2. Know the nature, intent, and scope of animal/dairy science.
3. Attain depth in one subfield of animal/dairy science.
4. Achieve understanding in the disciplines of animal genetics, health, nutrition, and reproduction.
5. Effectively integrate knowledge from basic sciences to applications in the animal sciences.

Skills and Career Competencies objectives are as follows:

1. Comprehend reading materials appropriate to course levels.
2. Communicate effectively in oral and written forms.
3. Conduct library research using modern methods.
4. Use a computer for written work, presentations, and research.

Animal Science and Bioveterinary Science Majors

(Biotechnology Emphasis)

The following Disciplinary Knowledge objectives apply:

1. Attain a working knowledge of biological mechanisms, including genetics, reproduction, and microbiology.
2. Acquire a working knowledge of mathematics, including calculus and statistics.
3. Achieve a working knowledge of chemistry, including inorganic, organic, and biochemistry.
4. Attain a basic knowledge of animal biotechnology and ethics.

Skills and Career Competencies objectives are as follows:

1. Understand and perform molecular cloning.
2. Understand and perform cell culture procedures.
3. Understand and perform protein purification.
4. Communicate effectively in oral and written forms.
5. Achieve quantitative competency.
6. Conduct scientific-literature searches using modern methods.

Bioveterinary Science Major

The following Disciplinary Knowledge objectives apply:

1. Attain a working knowledge of biological mechanisms, including molecular genetics.
2. Acquire a working knowledge of mathematics, including calculus and statistics.
3. Achieve a working knowledge of chemistry, including inorganic, organic, and biochemistry.
4. Acquire a basic knowledge of general physics.
5. Attain a basic knowledge of animal production, including breeding, nutrition, and reproduction.
6. Achieve a basic understanding of health and disease mechanisms.
7. Understand the ethics and profession of veterinary medicine.

Skills and Career Competencies objectives are as follows:

1. Communicate effectively in oral and written forms.
2. Achieve quantitative competency.
3. Conduct scientific literature searches using modern methods.

Dairy Science Major (Dairy Industries Emphasis)

The following Disciplinary Knowledge objectives apply:

1. Attain knowledge in mathematics and basic sciences required for disciplinary competency.
2. Know the nature, intent, and scope of dairy science.
3. Achieve understanding in the disciplines of animal genetics, health, nutrition, reproduction, and lactation.
4. Integrate knowledge from the various disciplines to effectively conduct dairy operations.

Skills and Career Competencies objectives are as follows:

1. Comprehend reading materials appropriate to course levels.
2. Communicate effectively in oral and written forms.
3. Conduct library research using modern methods.
4. Use a computer for written work, presentations, and research.
5. Attain proficiency in basic techniques of animal management.

Undergraduate Research Opportunities

Students interested in pursuing undergraduate research opportunities in the ADVS Department should contact Jeffrey L. Walters, Agricultural Science 246, jeffrey.walters@usu.edu, (435) 797-2161, for information and referrals.

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Departmental honors programs are available for students majoring in Animal Science, Dairy Science, or Bioveterinary Science. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also
complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school.

ADVS students qualify for acceptance into the departmental honors program by having a cumulative GPA of 3.3 or better at the time of application. The program of study requires the completion of 15 credits of upper-division (3000-level or above) coursework as follows: One credit of HONR 4800H, Thesis/Project Seminar; 3 to 6 credits of HONR 4900H, Senior Thesis/Project; and 8 to 11 credits of upper-division Honors coursework by contract (3 credits may be taken outside the ADVS Department). Completion of the degree requires a cumulative GPA of 3.3 and a 3.5 GPA in upper-division Honors classes. Examples of departmental classes which may be suitable as Honors courses by contract are ADVS 3000, 3200, 3500, 3510, 4200, 4560, 5160, 5240, 5260, 5350, 5400, 5520, 5530, 5690, 5700, and 5820. Students should plan their Honors Program early, so that their thesis project can be completed during the first semester of their senior year, and their last semester can be used to write and present their thesis.

Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information and Updates

For more information about Bachelor of Science requirements and the sequence in which courses should be taken, see major requirement sheets. For more information on ADVS Department minors, see minor requirement sheets. These are available from the ADVS Department advisor’s office (AG S 242). Major requirement sheets can also be found online at: http://www.usu.edu/ats/majorsheets/

Successful completion of a bachelor’s degree program in the ADVS Department requires that a very close student-academic advisor relationship be established and continued through each student’s bachelor’s degree program. Each student must take the responsibility of establishing this close working relationship with his or her advisor. Doing this soon after the student’s entry into the department can keep academic problems to a minimum.

For updated information on ADVS programs and course offerings, check the departmental home page at: http://www.advs.usu.edu

Safety and Liability in Classes and Laboratories

Certain classes and laboratories involve a risk of bodily injury or of damage to clothing. Students should take appropriate precautions and wear suitable protective clothing. Some of the risks include handling or being near animals, slick floors or corrals, use of toxic or corrosive substances, and the use of sharp or breakable instruments and equipment. Students should take precautions to avoid fainting during demonstrations or work with animal tissues or operative procedures. Students must assume their own liability protection for travel to and from classes, laboratories, and field trips. The University and its employees assume no liability in the performance of classroom or laboratory instruction or on scheduled field trips, or for other dangerous activities. The student, by voluntarily participating in these classes and activities, agrees to assume the risk and not hold USU or its staff liable.

Financial Support

In addition to the scholarships and other financial aid available through the University, the department awards designated scholarships to qualified students. The department employs students on a part-time basis to assist with its research and operate its animal facilities. The department also coordinates cooperative education and internship employment opportunities for students. For more information, contact the department.

Graduate Programs

Admission Requirements

In addition to the general admission requirements (see pages 99-100), applicants should have satisfactory (3.0 GPA or better) grades in completion of previous degree programs. GRE exam, verbal, quantitative, and analytical scores at or above the 40th percentile are required.

The applicant for a graduate program in animal or dairy science should have completed a BS undergraduate program similar to the USU animal science or dairy science Science Emphasis BS degree. This background would include the following courses and their prerequisites: BIOL 1610 and 1620 or their equivalents; CHEM 2310 and 2320 or their equivalents; MATH 1050 and STAT 1040 or their equivalents. Applicants with deficiencies in these areas may be admitted to the graduate program subject to the completion of remedial coursework specified by the department. Other preparatory courses may be specified by the student’s supervisory committee.

Applicants to the bioveterinary science graduate program should have a degree in bioveterinary science, biology, microbiology, chemistry, or one of the animal sciences. Pre-veterinary students oriented towards graduate research studies are strongly encouraged to apply.

Degree Programs

Master of Science

The MS is available to qualified students with bachelor’s degrees. MS degrees are offered by the department in animal science and dairy science, with five specializations in each, and in bioveterinary science.

Doctor of Philosophy

The PhD degree in animal science is offered with four specializations. It is available to qualified students with master’s degrees in related disciplines. Exceptionally well-qualified applicants may be considered for admission to a postbaccalaureate PhD program. The PhD degree in bioveterinary science has three specializations and is available to qualified students holding a DVM or a master’s degree in a related discipline, or exceptionally well-qualified postbaccalaureate applicants. The PhD is a terminal research degree that is awarded upon successful completion of a comprehensive program of coursework and original research in an approved area of specialization.

Specializations in Animal/ Dairy Science

Animal Nutrition

This specialization involves studies in biochemistry, principles of nutrition, animal management, nutritional physiology, and animal feedstuffs. Cooperation with producers, feed industry groups, other
Department of Animal, Dairy and Veterinary Sciences

departments of the University, and USDA collaborators, along with research funding from private industry, strengthens the graduate program in this area.

Course requirements: Students in the MS program are required to complete the following courses: ADVS 6800, any four ADVS graduate nutrition courses at the discretion of the supervisory committee; one 5000-level Statistics course. Students in the MS program are required to complete or to have completed CHEM 3700 or its equivalent, but will not receive graduate credit for it. Students in the PhD program are required to meet or have met all MS program requirements, as well as to complete the following coursework: ADVS 6800 (additional to the MS requirement), ADVS graduate nutrition courses as directed by the supervisory committee; CHEM 5700, 5710; one 5000-level Statistics course (additional to the MS requirement); additional coursework at the discretion of the supervisory committee to a total of at least 30 credits.

Breeding and Genetics
This specialization involves studies in quantitative genetics, applied animal genetics, statistics, and animal management. Cooperation with other departments, particularly the Department of Biology and the Department of Mathematics and Statistics, and collaboration with other research institutions, livestock producers, and commercial animal breeding companies broadens the resources of this graduate program.

Course requirements: Students in the MS program are required to complete the following courses: ADVS 6300, 6800; BIOL 6380; STAT 5110; and a minimum of 6 credits in the student’s area of study. Students in the PhD program are required to complete the following courses in addition to those required for the MS degree: ADVS 6800, 6820; MATH 5710, 5720; STAT 6710, 6720.

Molecular Biology
This specialization involves studies in molecular genetics, biochemistry of nucleic acids, cell biology, reproductive physiology, and bioveterinary science. Cooperation with other departments, particularly the Department of Biology and the Department of Chemistry and Biochemistry, the Biotechnology Center, and collaborators at other research institutions allows for a strong graduate program in this area.

Course requirements: Students in the MS program are required to complete the following courses: ADVS 5160 or 5240 or 5260; ADVS 6800; BIOL 5210 or 5220 or 6210; BIOL 5190; STAT 5200; and a minimum of 6 credits in the student's area of study. Students in the PhD program are required to complete the following courses in addition to those required for the MS degree: ADVS 6800; CHEM 5700, 5710.

Reproductive Biology
This specialization involves studies in physiology and endocrinology of reproduction; embryo technology, including collection, culture, manipulation, storage, and transfer of embryos; disease transmission, cytogenetics and molecular genetics; and environmental and toxicological influences on reproductive processes and fetal development. Cooperation with other departments and research centers of the University and with USDA collaborators allows for a strong graduate program in this area.

Course requirements: Students in the MS program are required to complete the following courses: ADVS 6200, 6800; BIOL 5210, 5220; STAT 5200. Students in the PhD program are required to complete the following coursework additional to the MS requirements: ADVS 6800; BIOL 5150, 6210; CHEM 5700, 5710. Additional coursework for the MS and PhD degree may be required at the discretion of the supervisory committee.

Animal or Dairy Management (MS only)
This specialization involves studies in the applications of the principles of genetics, reproductive biology, and nutrition to animal or dairy management at an advanced level. Appropriate emphasis is also placed on statistics, economics and business administration, and range management. The management specialization offers the option of degree programs with or without thesis (Plan A or Plan B). Graduates in management from a program including thesis (Plan A) may pursue advanced studies in more specialized fields. The MS in management without a thesis (Plan B) is considered a terminal degree.

Course requirements: Students choosing either the option with thesis (Plan A) or the option without thesis (Plan B) are required to complete the following courses: ADVS 6200, 6300, 6520 or 6530, 6800; plus one of the following (if comparable course not previously completed at the undergraduate level): ADVS 6080, 6090, 6120, 6130, 6190; one 5000-level Statistics course. Additional courses in related areas will be required as directed by the supervisory committee.

Bioveterinary Science
This degree program involves studies in biochemistry, statistics, pathology, toxicology, virology, parasitology, pharmacology, and microbiology. Advanced techniques in laboratory procedures and animal health research are emphasized. Cooperation with other departments and research centers of the University and with federal collaborators and agencies allows for a strong graduate program in bioveterinary science.

Course requirements: Students in the MS program are required to complete the following courses: ADVS 6700, 6800; CHEM 5700; STAT 3000. Students in the PhD program are required to complete the following courses: ADVS 6700, 6800; CHEM 5700, 5710; STAT 5200. Additional coursework will be determined by the supervisory committee.

Research
The ADVS department conducts a broad range of basic and applied research in the areas of animal reproduction, animal nutrition, livestock and dairy management, animal health, virology, parasitology, toxicology, animal behavior, cytogenetics, and molecular genetics. Department facilities include over 30 research laboratories on campus and at local and regional animal research facilities. There are research herds and flocks of beef and dairy cattle, sheep, and swine housed close to the University. There are additional research units housing beef cattle, sheep, and turkeys located throughout the state. Research in the department is funded by a multimillion dollar budget derived from support by the Utah Agricultural Experiment Station and by substantial outside contracts and grants. Cooperation with other departments and research centers of the University and with federal collaborators enhances the ADVS research and graduate programs. Significant in this regard are the University Center for Integrated BioSystems, the Utah State Animal Disease Diagnostic Laboratories, the Laboratory Animal Research Center, the Center for Environmental Toxicology, the Center for the Genetic Improvement of Livestock, and the on-campus USDA Poisonous Plant Laboratory.

Financial Assistance
Both departmental and research grant support are available to matriculated graduate students on a competitive basis. The department funds a number of graduate assistantships, which are available on a competitive basis to matriculated graduate students who are U.S.
Department of Animal, Dairy and Veterinary Sciences

citizens, nationals, or residents. Students interested in departmental assistantships may request an application form from the department. Applications for assistantships for the following academic year must be submitted by March 15.

Acceptance to graduate study in the ADVS Department does not constitute a guarantee of financial assistance.

Career Opportunities

Career opportunities are available for students who have earned graduate degrees in the MS and PhD programs offered by the ADVS Department as described below.

Animal and Dairy Science Graduate Degree Programs

Animal Nutrition
Career opportunities exist in extension, university and private research, the commercial animal feedstuffs industry, private consulting firms, and international programs.

Breeding and Genetics
Career opportunities exist in extension university and private research, commercial animal breeding and genetic engineering enterprises, and international programs.

Molecular Biology
Career opportunities exist in university, federal, and private research organizations, and in commercial applications in the rapidly growing area of biotechnology.

Reproductive Biology
Career opportunities exist in extension; university and private research; the pharmaceutical, embryo transfer, and artificial insemination industries; private consultation; and international programs.

Animal or Dairy Management
Career opportunities include extension, private consultation firms, farm and ranch management, sales and service to agricultural producers, agricultural finance, and international programs.

Bioveterinary Science Graduate Degree Programs

Career opportunities in this area exist in research, management, and submanagement positions in public and private health research and testing organizations, and in commercial industries in the health field. Graduates from the MS program may seek admission to advanced degree programs in the biological sciences or veterinary medicine.

Animal, Dairy and Veterinary Sciences Faculty

Trustee Professor
Robert W. Sidwell, virology

Professors
Stanley D. Allen, veterinary medicine, laboratory animal management
Clell V. Bagley, veterinary medicine
Thomas D. Bunch, cytogenetics, embryo biology
Noelle E. Cockett, molecular genetics, identification of genetic markers
Roger A. Coulombe, Jr., veterinary toxicology, molecular biology
Howard M. Deer, pesticides, environmental toxicology

Mark C. Healey, parasitology
Lyle G. McNeal, sheep production, wool science
Kenneth L. White, reproductive physiology, developmental biology

Research Professors
John D. Morrey, virology, transgenic animals
Kamal A. Rashid, in vitro mutagenesis and DNA repair
Donald F. Smea, viral chemotherapy

Adjunct Professors
J. Talmage Huber, dairy nutrition
Lynn F. James, animal physiology
Amrit K. Judd, medicinal chemistry as applied to treatment of viral diseases
Michael R. Marshall, veterinary medicine
Kanok Pavanathipaisit, medical science, anatomy
R. Dean Plowman, dairy genetics, management
Rex S. Spendlove, microbiology

Professors Emeritus
Clive W. Arave, behavior, dairy genetics
John E. Butcher, ruminant nutrition
Jay W. Call, veterinary medicine
Warren C. Foote, reproductive physiology
Robert C. Lamb, dairy genetics
James LeGrande Shupe, veterinary science, comparative clinical medicine
Ross A. Smart, veterinary diagnostic pathology
Norris J. Stenquist, livestock production, nutrition
Wallace R. Taylor, dairy breeding, dairy herd improvement
Don W. Thomas, veterinary medicine

Associate Professors
Thomas J. Baldwin, veterinary diagnostic pathology
Tilak R. Dhiman, dairy nutrition
David D. Frame, poultry production and management
Jeffery O. Hall, veterinary pathology, toxicology
Kenneth C. Olson, range livestock nutrition, management
Lee S. Rickords, molecular genetics, developmental biology
Randall D. Wiedmeier, beef cattle nutrition, management
Allen J. Young, dairy management, reproduction
Dale R. ZoBell, beef cattle production, management

Adjunct Associate Professors
Dale R. Gardner, chemistry/toxicology
Kip E. Panter, animal science/toxicology
Roy W. Silcox, physiology, nutrition
Bryan L. Stegelmeier, pathology
John T. Stellflug, reproductive physiology, biochemistry, statistics
J. Christopher Wilson, veterinary medicine, fisheries

Associate Professor Emeritus
Larry M. Slade, equine nutrition, management

Research Associate Professor
Dale L. Barnard, virology

Adjunct Research Associate Professor
Shiquan Wang, cytogenetics, reproductive physiology

Assistant Professors
Patricia A. Evans, equine management
Ramona T. Skirpstunas, bacterial diseases of fish, veterinary pathology, veterinary laboratory diagnostic medicine
Quinton A. Winger, reproductive physiology, molecular biology
Adjunct Assistant Professors
Breck D. Hunsaker, veterinary immunology
Stephen T. Lee, analytical chemistry
Timothy A. McAllister, ruminant nutrition, microbiology

Research Assistant Professors
Brian B. Gowen, immunology, virology
Justin G. Julander, virology, microbiology
Jeffrey L. Walters, dairy cattle breeding, statistics

Clinical Assistant Professor
Rusty Stott, clinical veterinarian, animal health

Research Assistant Professor Emeritus
Robert E. Warnick, turkey nutrition

Lecturers
Brett R. Bowman, animal science/nutrition
Parl Galloway, animal science, manager of Animal Science Farm
Justin A. Jenson, dairy herdsman coordinator, dairy youth specialist

Course Descriptions
Animal, Dairy and Veterinary Sciences (ADVS), pages 551-555.
Department of Art

Department Head: John Neely
Location: Fine Arts Visual 122
Phone: (435) 797-3460
FAX: (435) 797-3412
E-mail: neelyjc@cc.usu.edu
WWW: http://www.art.usu.edu/index1.php

Assistant Head and Graduate Program Director:
Christopher T. Terry, Fine Arts Visual 216, (435) 797-3409, ctterry@cc.usu.edu

Assistant Head and Undergraduate Program Director:
Robert Winward, Fine Arts Visual 110, (435) 797-1394, bob.winward@usu.edu

Art Education Undergraduate Advisor:
Jane S. Catlin, Fine Arts Visual 114, (435) 797-3469, jcatlin@hass.usu.edu

Degrees offered: Bachelor of Arts (BA), Bachelor of Science (BS), Bachelor of Fine Arts (BFA), Master of Arts (MA), and Master of Fine Arts (MFA) in Art

Undergraduate emphases: Art Education, Art History, Ceramics, Drawing and Painting, Graphic Design, Photography, Printmaking, Sculpture

Graduate specializations: Ceramics, Drawing, Graphic Design, Painting, Photography, Printmaking, Sculpture

Undergraduate Programs

Objectives
The Department of Art’s primary goal is to prepare undergraduate students for careers in art history, art education, and studio art, as well as the applied and fine arts. Requirements in eight different emphasis areas address the specific needs of each career. The Department of Art also serves the University community by offering courses in the University Studies program and by offering training for students in related degree programs.

Departmental Admission Requirements
Admission to the Art major is competitive. New freshmen admitted to USU in good standing may apply for admission to the Art major by submitting a portfolio of ten 35 mm slides or digital images on CD-ROM of their best work. Details are available from the Art Department. Entrance to the BFA program in studio art is accomplished by formal application after completion of the department’s foundation courses. Students applying for this degree program should have a GPA of at least 2.75. Application to the BFA program is done by portfolio review and should be made during the spring semester in which the prerequisites will be completed. Transfer students should make application during the spring semester prior to their entrance to USU to arrange for the portfolio review of their work prior to acceptance in the department. Participation in the BA program in Art History is limited to students with at least a 2.5 GPA.

Degrees Offered

Bachelor of Science Degree
The BS degree is a general art degree for the student who is not interested in specializing in one area of art. This degree requires 50 semester credits in Art courses, 30 credits in University Studies courses, and allows for 40 elective credits. A GPA of 2.5 is required for the BS degree. No grade less than C is acceptable in any art class. Art classes may be retaken for a higher grade. This degree does not fulfill the requirements for entrance into graduate schools of art.

Bachelor of Arts Degree
This degree is available primarily to students selecting an emphasis in Art History at USU. BA degree candidates should complete the majority of University Studies lower-division requirements, the modern language requirement, and the foundation curriculum by the end of the sophomore year. This will allow concentration in an area of specialization during the junior and senior years.

In addition, BA candidates must either complete requirements for the Art History Emphasis, as listed below, or the general art requirements as listed under the BS degree. The major professor may also prescribe other courses to serve the particular needs of different students. A minimum of 36 semester credits in art is required for a BA degree in Art with an Art History Emphasis. Students who desire to receive a BA degree in Art without an emphasis, must earn a minimum of 50 semester credits in art.

Bachelor of Fine Arts Degree
The BFA is a professional art degree requiring above-average accomplishment in art. Only students demonstrating considerable promise will be accepted for this more demanding professional degree program. Admission to the Art Department BS program does not guarantee admission to the BFA program. Entrance to the BFA program is by application only. Each emphasis area specifies classes that must be completed, along with the common foundation courses, prior to application to the BFA program. For most students, this will occur at the end of their sophomore year. Transfer students may make application during the spring semester prior to their planned entrance into the department.

To graduate with a BFA degree, students must meet the following minimum requirements:

1. A career total GPA of at least 2.75 must be attained.
2. Students must maintain a minimum GPA of at least 2.75 in the Art Foundation and Art Basic Core classes.
3. No grade lower than a C will be accepted in any art class.
4. In any emphasis area class, no grade lower than a B- is acceptable. Emphasis classes may be retaken for a higher grade.

A minimum of 70 semester credits in art must be completed for the BFA degree. This includes 6 credits of upper-division art history. During the spring semester of their senior year, students must take ART 4910 (Senior BFA Exhibition). Students must also fulfill the standard University Studies requirement of 30 credits, as well as complete 20 credits of electives. Any student unable to complete the necessary requirements for the BFA may still qualify for the BS degree.
Department of Art Curriculum

Foundation Courses
Students in the BS, BA, and BFA degree programs (except for students in the Art History emphasis) need to complete the following foundation curriculum. (Art History students should instead complete the BA foundation courses, which are listed in the Art History section.)

Suggested Sequence:
Freshman year—first semester:
ART 1020 Drawing I (3 cr) or 3
ART 1110 Drawing I (Art Majors Only) (3 cr) 3
ART 1120 Two-dimensional Design (3 cr) or 3
ART 1150 Two-dimensional Design (Art Majors Only) (3 cr) 3
ARTH 2710 (BHU) Survey of Western Art: Prehistoric to Medieval 3

Freshman year—second semester:
ART 1130 Three-dimensional Design (3 cr) or 3
ART 1160 Three-dimensional Design (Art Majors Only) (3 cr) 3
ART 2110 Drawing II 3
ARTH 2720 (BHU) Survey of Western Art: Renaissance to Post-Modern 3

Subsequent curriculum requirements are specific to these individual emphasis areas:

Art Education
The art education curriculum prepares students to teach art in the public schools. Students graduate with a Bachelor of Fine Arts (BFA) degree in art and obtain a secondary education teaching license. The BFA degree requires 70 credits in Art courses. A minimum of 45 credits must be completed in the core and broadening area:

ART 1020 Drawing I (F,Sp) (3 cr) or 3
ART 1110 Drawing I (Art Majors Only) (F,Sp) (3 cr) 3
ART 1120 Two-dimensional Design (F,Sp) (3 cr) or 3
ART 1150 Two-dimensional Design (Art Majors Only) (F,Sp) (3 cr) 3
ART 1130 Three-dimensional Design (F,Sp) (3 cr) or 3
ART 1160 Three-dimensional Design (Art Majors Only) (F,Sp) (3 cr) 3
ART 2110 Drawing II (F,Sp) 3
ART 2200 Painting I (F) 3
ART 2230 Basic Printmaking (F) 3
ART 2400 Computers and Art (Art Majors Only) (F,Sp) 3
ART 2600 Basic Sculpture (F,Sp) 3
ART 2650 Introduction to Ceramics (F,Sp,Su) 3
ARTH 2710 (BHU) Survey of Western Art: Prehistoric to Medieval (F) 3
ARTH 2720 (BHU) Survey of Western Art: Renaissance to Post-Modern (Sp) 3
ART 1050 Introduction to Photography (F) 3
ART 2810 Photography I (F,Sp) 3

In addition, 6 credits are required in upper-division art history courses. A minimum of 25 art credits must be taken in a specialization area. The secondary education teaching license requires the following courses:

ART 3000 Secondary Art Methods I (F,Sp) 3
ART 3300 Clinical Experience I (Sp) 3
ART 4000 Secondary Art Methods II (F) 3
ART 4300 Clinical Experience II (F) 3
ART 5500 Student Teaching Seminar (F,Sp) 2
ART 5630 Student Teaching in Secondary Schools (F,Sp) 10
INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su) 3
SCE D 3100 Motivation and Classroom Management (F,Sp) 3
SCE D 3210 (DSS/Ci) Educational and Multicultural Foundations (F,Sp) 3
SCE D 4200 (Ci) Reading, Writing, and Technology (F,Sp) 3
SCE D 4210 Cognition and Evaluation of Student Learning (F,Sp) 3
SPED 4000 Education of Exceptional Individuals (F,Sp,Su) 2

Sample Four-year Plan for Art Major,
Art Education Emphasis

Minimum GPA for Admission: 2.75, USU; 2.75 Career
Additional Admission Requirement: admission granted by professor
Minimum GPA for Graduation: 2.75, course/foundation courses; 2.75, major; 2.75, USU; 2.75 Career
Minimum Grade Accepted: B- in emphasis courses;
C in remaining ART courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.
To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (30 credits)
Fall Semester (15 credits)
ART 1110 Drawing I (Art Majors Only) 3
ART 1150 Two-dimensional Design (Art Majors Only) 3
ARTH 2710 (BHU) Survey of Western Art: Prehistoric to Medieval 3
ENGL 1010 (CL1) Introduction to Writing: Academic Prose 3
University Studies Quantitative Literacy (QL) course 3

Spring Semester (15 credits)
ART 1160 Three-dimensional Design (Art Majors Only) 3
ART 2110 Drawing II 3
ARTH 2720 (BHU) Survey of Western Art: Renaissance to Post-Modern 3
University Studies Breadth courses 6

Sophomore Year (30 credits)
Fall Semester (15 credits)
ART 2200 Painting I 3
ART 2400 Computers and Art 3
ART History upper-division course 3
ENGL 2010 (CL2) Intermediate Writing:
Research Writing in a Persuasive Mode 3
University Studies Breadth course 3

Spring Semester (15 credits)
ART 2230 Basic Printmaking 3
ART 2600 Basic Sculpture 3
Art History upper-division course 3
University Studies Breadth courses 6

Junior Year (29 credits)
Fall Semester (14 credits)
ART 1050 Introduction to Photography (3 cr) or 3
ART 2810 Photography I (3 cr) 3
ART 2650 Introduction to Ceramics 3
ART 3000 Secondary Art Methods I 3
ART 3300 Clinical Experience I 3
INST 3500 Technology Tools for Secondary Teachers 3
Depth Life and Physical Sciences (DSC) course 3

Spring Semester (15 credits)
SCE D 3100 Motivation and Classroom Management 3
SCE D 3210 (DSS/Ci) Educational and Multicultural Foundations 3
Art Area of Concentration courses 6
Quantitative Intensive (QI) course 3

Utah State University 2006-2007 General Catalog
Department of Art

Senior Year (21 credits)
Fall Semester (13 credits)

ART 4910 Senior BFA Exhibition ....................................................... 2
ART 5500 Student Teaching Seminar ............................................... 2
ART 5630 Student Teaching in Secondary Schools ....................... 10

Art History (52 total credits)
For the BA degree in Art with an emphasis in Art History, all students must take the following required foundation courses (15 credits):
ARTH 2710 (BHU) Survey of Western Art: Prehistoric to Medieval (F) 3
ARTH 2720 (BHU) Survey of Western Art: Renaissance to Post-Modern (Sp) 3
HIST 1100 (BHU) Foundations of Western Civilization: Ancient and Medieval (F,Sp,Su) 3
HIST 1110 (BHU) Foundations of Western Civilization: Modern (F,Sp,Su) 3

One studio art course of student’s choice (note prerequisites where necessary)

All majors must choose between the following two tracks, and must meet with their advisor to determine a concentration and special area by the beginning of their sophomore year. In addition, the student should have produced two research papers of 10-15 pages each by the senior year.

Track I (18 credits): Students must complete six upper-division courses in art history, consisting of three interrelated courses (e.g., by period) and three distributed widely (i.e., a concentrator in a modern period of art history would select courses from the ancient or medieval, Renaissance, and Baroque periods to achieve the wide distribution).

Track II (Interdisciplinary Track) (18 credits): Students must complete three upper-division courses in Art History and two upper-division courses outside the department that make up a special field (these may be combined from area studies, such as the British Commonwealth, French Studies, American Studies, Folklore, or Anthropology; or may consist of a selection of courses that deal with post-colonialism, Women and Gender Studies, and the intersections between art and the history of science, for example; or may include courses that deal with a certain period). The student must formally apply, in consultation with his or her advisor, to determine the concentration and special area. One additional course in Art History (outside the special field) must also be completed.

All majors are required to take ART 4790, Research/Writing/Methods (3 credits, offered every year). Students will be advised to take this seminar after they have written a research paper. Students are required to produce a self-assessment portfolio. During the second semester, senior majors must provide a portfolio of their work in art history. No credit is granted for the portfolio (which is not a class).

The portfolio consists of a two-page self-assessment of the student’s work and progress in the major; a list of classes taken in art history, studio art, and any related fields that have contributed to the student’s understanding of art history; and examples of the student’s work in art history at all levels, including study-abroad work and internship experiences.

Foreign Language (16 credits): Four semesters of one foreign language are required. (French and German are especially recommended for students who plan to go on to graduate school, but a student may petition to have another foreign language count toward this goal.)

Including foundation, foreign language, and major classes, the Art History emphasis requires a total of 52 credits.

Sample Four-year Plan for Art Major,
Art History Emphasis

Minimum GPA for Admission: 2.5, USU; 2.5 Career
Minimum GPA for Graduation: 2.5, major requirements; 2.5, USU; 2.5 Career
Minimum Grade Accepted: C in all major requirements

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

Elective course .................................................................................. 1

Drawing and Painting
The drawing and painting emphasis includes the two-dimensional study of form and space, as well as the exploration of drawing and painting media, graphic elements, and visual dynamics. It is an essential discipline for all artists, as it provides the fundamental visual skills needed in their search for a personal idiom. At the same time, drawing and painting are also vehicles of creative expression, visual adventure, and self-discovery. The curriculum emphasizes an analysis of historical approaches to drawing and painting, and the exploration of new ideas, techniques, and materials. Basic courses are designed to foster a respect for the craft of drawing and painting, and subsequent courses encourage application of the craft to expressive goals. Central to the focus of drawing and painting study at USU is the development of a personal portfolio reflecting the specific interests of the individual. Students must complete the following courses for a drawing and painting emphasis:
ART 1050 Introduction to Photography (F) (3 cr) or
ART 2810 Photography I (F,Sp) (3 cr) .................................................. 3
ART 2600 Basic Sculpture (F,Sp) (3 cr) or
ART 2650 Introduction to Ceramics (F,Sp,Su) (3 cr) ......................... 3
ART 3200 Painting II (Sp) ................................................................. 3
ART 3260 Anatomy for Artists (F) .................................................... 3
ART 3610 Intermediate Sculpture (F) ............................................... 3
ART 4200 Advanced Painting Studio (F,Sp) ...................................... 6
ART 4210 Figure Painting (Sp) ......................................................... 3
ART 4260 Life Drawing (Sp) .............................................................. 3
ART 4910 Senior BFA Exhibition (Sp) .............................................. 2
ARTH 4750 Twentieth Century Art .................................................... 3
One additional upper-division Art History course (required) ............ 3

One course must be chosen from:
ART 3230 Lithography (F) ................................................................. 3
ART 3240 Intaglio (Sp) .................................................................. 3
ART 3250 Relief Prints (F) ............................................................... 3

The remainder of the 70 semester credits can be taken as electives.

Sample Four-year Plan for Art Major,
Drawing and Painting Emphasis

Minimum GPA for Admission: 2.75, USU; 2.75 Career
Additional Admission Requirement: portfolio and application review
Minimum GPA for Graduation: 2.75, major; 2.75, USU; 2.75 Career
Minimum Grade Accepted: B- in emphasis courses;
C in remaining ART courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

### Graphic Design

Graphic design is the study of visual communications and the art of presenting information. Visual elements, such as animation, photography, illustration, symbols, and type, are designed or arranged using various techniques and materials. Materials range from traditional ink, paper, and printing presses to video and the Internet, using the latest computer software and hardware. Students in graphic design complete a variety of courses that involve working with symbols, trademarks, typography, layout, and all formats of print and publication design. Illustration, digital imaging, motion graphics, animation, and interactive media are also part of the graphic design curriculum. Seniors may specialize in one or more of these areas of study and create a professional portfolio specific to their interests.  

Graphic Design emphasis students should complete the following courses:  
**ART 2400** Computers and Art (F) ............................................. 3  
**ART 3400** Typography (Sp) .................................................... 3  
**ART 3420** Communication Arts Seminar (F,Sp) ..................... 1  
**ART 4410** Graphic Interface Design I (F) .............................. 3  
**ART 4420** Brand Identity Design (F) .......................................... 3  
**ART 4440** Type, Image, and Visual Continuity (Sp) .................. 3  
**ART 4450** Portfolio Preparation (F) .......................................... 3  
Additional Art Core Basic courses ............................................. 9  
Two upper-division Art History courses (3000- or 4000-level) ...... 6

*ART 3420 is repeatable for credit, and must be taken during a minimum of three semesters.*

### Photography

Photography found throughout all of contemporary life, photographic images shape the way we document, interpret, and direct our lives. As an art form, photography constantly reinvents our concept of beauty, reality, and culture. Within the program in photography, students learn the aesthetic and technical skills of the medium. The fundamentals of craft and the "hands on" application of knowledge at each level will enable the student to pursue a variety of photographic professions.
Department of Art

Requirements for the Photography emphasis include:

ART 2810 Photography I (F,Sp) ..................................................3
ART 3810 Photography II (Sp) ..................................................3
ART 3820 History of Early Photography (Sp) .........................3

Printmaking

Students in the printmaking emphasis have the opportunity to explore all aspects of traditional and contemporary printmaking. After an introduction to the basics of intaglio, lithographic, silkscreen, and relief processes, students are encouraged to continue their development in a specific area of interest. Independent studio projects will investigate the wide field of printmaking, providing a framework for the student to become engaged in a creative pursuit involving both technical and aesthetic considerations. Requirements for the Printmaking emphasis include:

ART 1050 Introduction to Photography (F) (3 cr) or ART 2810 Photography I (F,Sp) (3 cr) ....3
ART 2230 Basic Printmaking (F) ...........................................3
ART 3220 Screen Printing (Sp) ............................................3
ART 3230 Lithography (F) .....................................................3
ART 3240 Intaglio (Sp) .........................................................3
ART 3250 (A) Relief Prints (F) ..............................................3
ART 4250 Advanced Printmaking Studio (F,Sp) .........................9
ART 4910 Senior BFA Exhibition (Sp) ...................................2
Two additional upper-division Art History courses, 3000-level and above (required) ..................................................6

Sample Four-year Plan for Art Major, Printmaking Emphasis

Minimum GPA for Admission: 2.75, USU; 2.75 Career
Additional Admission Requirement: portfolio and application review
Minimum GPA for Graduation: 2.75, major; 2.75, USU; 2.75 Career
Minimum Grade Accepted: B- in emphasis courses;
C in remaining ART courses

This is a sample plan. It outlines University and major requirements in...
very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

Sculpture

Sculpture is the three-dimensional expression of ideas. Its range extends from discrete, permanent objects to ephemeral, multi-media environments. Students in the sculpture emphasis develop a base of knowledge in traditional approaches to the creation of form. After gaining competency in figure modeling, as well as in stone or wood carving, they explore both site-specific sculpture and sculptural installations. Intermediate and advanced students investigate specific problems involving technical, aesthetic, and conceptual considerations. They develop their own direction, based on both experience with form, materials, and techniques, and an understanding of traditional concerns and contemporary issues in the vast field encompassed today by sculpture.

The following courses are required for students in the sculpture emphasis:

ART 2600 Basic Sculpture (F,Sp) ............................................................... 3
ART 2650 Introduction to Ceramics (F,Sp,Su) ......................................... 3
ART 1050 Introduction to Photography (F) (3 cr) or
ART 2810 Photography I (F,Sp) (3 cr) .................................................... 3
ART 3610 Intermediate Sculpture (F) ...................................................... 3
ART 4660 Advanced Sculpture Studio (Sp) ............................................ 9
ART 4910 Senior BFA Exhibition (Sp) .................................................. 2
Two additional upper-division Art History courses (required) ............ 6

Credits in any ART classes ................................................. 12

Art History Minor
A minor in art history requires ARTH 2710 and 2720, plus 12 credits
from the art history group (ART 3820, 3830, 4790, ARTH 4720, 4740, 4750).

USU does not offer an art teaching minor for secondary teachers.
Students choosing to train for teaching art in secondary schools must
complete the art education major listed under art specialties and must
comply with all requirements listed by the Department of Secondary
Education.

Departmental Honors
Students who would like to experience greater academic depth within
their major are encouraged to enroll in departmental honors. Through
original, independent work, Honors students enjoy the benefits of
close supervision and mentoring, as they work one-on-one with faculty
in select upper-division departmental courses. Students wishing to
pursue departmental honors in art must have a cumulative GPA of
3.30 or higher, and must first be admitted to the BFA program. Once
that process is completed, they should meet with Alexa Sand, the
departmental honors advisor, to complete an honors program of study
contract form. Dr. Sand may be contacted at: Fine Arts Visual 144,
(435) 797-8549, or by e-mail at alexa.sand@usu.edu.

The 15-credit requirement for Departmental Honors in Art is met in the
following manner:

1. At least 6 credits in upper-division Art or Art History courses must
   be taken with an honors contract.

2. At least 3 credits must be completed in an Honors Depth Life
   and Physical Sciences (DSC) course or in an Honors Depth
   Social Sciences (DSS) course.

3. At least 3 credits of upper-division coursework must be completed
   in the emphasis area or from outside the department, and must
   be taken with an honors contract.

4. Students must complete ART 4910 (Senior BFA Exhibition, 2
   credits), along with at least 1 credit in HONR 4900H (Senior
   Thesis/Project, 1-3 credits).

To qualify for departmental honors in art, students must graduate with
a cumulative GPA of at least 3.30 in their upper-division coursework
taken as part of their departmental honors contract, and must present
their work in a public forum (such as the Senior BFA show and/or
Student Showcase).

Additional Information
For additional information about undergraduate requirements in the
Department of Art, see the major requirement sheet, which can be obtained
from the department, or accessed online at:
http://www.usu.edu/ats/majorsheets/

Graduate Programs
The Department of Art offers two graduate degrees and cooperates with the College of Education and Human Services on another degree. The Master of Arts (MA) and the Master of Fine Arts (MFA) are offered by the Art Department. A Master of Education (MED) with a specialization in art is offered through the College of Education and Human Services.

Master of Arts

Students are selected for the MA program on the basis of a portfolio demonstrating artistic individuality and a level of development beyond the need of classroom instruction.

Admission Requirements

All applicants are required to have earned a bachelor’s degree in the visual arts or its equivalent. The GPA in art courses must have been at least 3.0 on a 4-point scale. MAT scores should be at or above the 40th percentile. Applicants taking the GRE should have verbal and quantitative scores at or above the 40th percentile.

Degree Requirements

Candidates for the MA must complete a minimum of 30 credits, to include: (1) 21 graduate studio credits, which may be divided into two or three areas of study at the graduate level; (2) 3 credits which may be earned in classes outside the department; (3) 3 credits of art history; and (4) 3 credits of Research and Thesis.

A total of 12 credits of art history, including undergraduate credits, is required for graduation, but only 3 credits earned as a matriculated graduate student at USU may be applied toward the 30-credit MA requirement. The additional 9 credits of art history may include credits earned at the undergraduate level.

A candidate must complete a minimum of two semesters in residency. Nine credits per semester is considered full-time graduate enrollment, while 12 credits are considered the maximum enrollment. A minimum of three semesters is thus required to complete the 30-credit program.

Master of Fine Arts

The Master of Fine Arts degree is the terminal degree in the visual arts field. The MFA program is designed to allow students to mature to a level of professional competence in the making of art. Related studies augment a rigorous studio program. The prospective student must exhibit both academic excellence and a well-developed personal artistic vision.

Admission Requirements

All applicants are required to have earned a BFA degree in the visual arts or its equivalent, including a minimum of 12 credits of art history. Students must submit either MAT or GRE scores. GPA in art courses must have been at least 3.0 on a 4-point scale. MAT scores should be at or above the 40th percentile. Applicants taking the GRE should have verbal and quantitative scores at or above the 40th percentile.

Degree Requirements

Students must earn 60 credits, to include: (1) 43 credits of graduate-level studio art as determined by the student in consultation with his or her major professor, including a minimum of 6 credits outside of the emphasis area; (2) 6 credits of Graduate Seminar; (3) 2 credits of Graduate Interdisciplinary Critique; (4) 6 credits outside the Art Department as specified by the supervisory committee; and (5) 3 credits of Research and Thesis, which concludes with an MFA thesis exhibition and an oral defense. The MFA thesis is a visual presentation, the equivalent of a written dissertation in other disciplines. The thesis exhibition is the single most important feature of the MFA program; the culmination of at least two years, and often three or more years, of intensive study in a single discipline. The student must also submit a selection of slides documenting the exhibition.

The MFA program is a resident program; it is not possible to complete the requirements for graduation by correspondence. The program is predicated upon the assumption that students will live in the Logan area. Students must complete a minimum of four semesters in residency. Nine credits per semester is considered full-time graduate enrollment, while 12 credits are considered the maximum enrollment. A minimum of five semesters is thus required to complete the 60-credit program; most students require three years.

Application Procedures

Completed applications must include: (1) completed application forms; (2) a letter of intent; (3) transcripts of all previous graduate and undergraduate work; (4) three letters of recommendation from qualified professionals; (5) GRE or MAT scores; and (6) the $50 application fee.

These materials must be sent directly to the School of Graduate Studies. When complete, applications will be forwarded by the School of Graduate Studies to the Art Department for review.

A portfolio of twenty 35mm slides or digital images on CD-ROM of recent work must be mailed directly to: Graduate Coordinator, Department of Art, Utah State University, 4000 Old Main Hill, Logan UT 84322-4000.

Completed applications and slide portfolios must be received by February 1. Students should note that applications will be considered only at this time, and only completed applications will be reviewed. Admission will only be considered for fall semester. The deadlines for financial aid may be earlier than the admissions deadline. For further information about financial aid, visit the Financial Aid Office, Utah State University, 1800 Old Main Hill, Logan UT 84322-1800; or phone (435) 797-0173.

Applications are reviewed by the Art Department faculty. Candidates are selected primarily on the basis of their portfolio, which should demonstrate a level of development beyond the need of classroom instruction and encouragement. The faculty will also look in the portfolio for evidence of significant personal exploration.

Secondary to the portfolio, but important nonetheless, the applicant’s letter of intent and letters of recommendation will also be given careful consideration. In reviewing these letters, the faculty will look for, among other things, indications that the applicant will be capable of prolonged and concentrated effort, guided by realistic personal goals. Letters should address both academic and artistic accomplishments, as well as potential for further growth in both of these areas.

Applications are strongly encouraged to visit the USU campus and meet with the faculty in their proposed field of study well in advance of the February 1 application deadline.

Important Note. Please note that the graduate programs in the Art Department have limited enrollment; admission is very competitive. Because only a small fraction of applicants can be accommodated, there can be no guarantee that applicants who meet minimum admission requirements will be accepted into master’s programs.
Financial Assistance
Departmental support is available to graduate students on a competitive basis. Students requesting financial support should apply to the department by February 15. Other assistance is available through the University Financial Aid Office. Students should note that applications for Federal work-study should be mailed during the first week of February.

Art Faculty

Professors
Craig J. Law, photography
John Neely, ceramics
Christopher T. Terry, drawing, painting

Professors Emeritus
Jon I. Anderson, graphic design
Glen L. Edwards, illustration
Adrian Van Suchtelen, drawing

Associate Professors
Jane S. Catlin, art education, painting

Assistant Professors
Eileen Doktorski, sculpture
JinMan Jo, sculpture
Julie M. Johnson, art history
J. Daniel Murphy, ceramics
Alexa Sand, art history
Woody Shepherd, drawing, painting
Dave Smellie, graphic design
Koichi Yamamoto, printmaking

Asian Studies Major and Minor

Program Director: R. Edward Glatfelter
Location: Main 333
Phone: (435) 797-1196
FAX: (435) 797-1092
E-mail: ed.glatfelter@usu.edu

Advisor: Annie Inhae Kim, Animal Science 101E, (435) 797-0799, anniekim@cc.usu.edu (Please call for an appointment.)

Major

To graduate with a BA degree in Asian Studies, students must complete a minimum of 27 credits approved by the Asian Studies program director. The program must include a minimum of 18 credits selected from the Core Courses, and 9 credits from the General Electives, selected after consultation with the Asian Studies program advisor. In addition to the core and elective courses, proficiency at the 2020-level or higher in an Asian language is required for graduation.

Minor

For an Asian Studies Minor, students must complete a minimum of 12 credits selected from the Core Courses. The remaining 8 credits must be chosen from the General Electives or from language courses for the minor.

Core Courses

BIS 4550 (CI) Principles of International Business Communications (Sp) ................................................................. 3
ECON 5400 International and Development Economics (F) ................................................................. 4
ENGL 3320 Period Studies in World Literature (when syllabus includes Asian literature) (F,Sp) .... 3
ENGL 4360 Studies in Drama/Film (when course subtitle is Asia) (Sp) .................................................... 3
GEOG 4200 (CI) Regional Geography (when region covered is Asian) (F,Sp,Su) .................. 3
HIST 1060 (BHU) Introduction to Islamic Civilization ................................................................. 3
HIST 3460 Comparative Asian History ................................................................. 3
HIST 3480 History of China ................................................................. 3
HIST 4821 World War II in Asia ................................................................. 3
LANG 3550 Culture of East Asia ................................................................. 3
PHIL 3710 Philosophies of East Asia (F) ................................................................. 3
PHIL 4900 Special Topics (when syllabus includes Asian philosophies) (F,Sp) .................. 3
POLS 3230 Middle Eastern Government and Politics (F) ................................................................. 3
POLS 3250 (DSS) Chinese Government and Politics (F) ................................................................. 3
POLS 4220 (CI) Ethnic Conflict and Cooperation (when syllabus includes Asian Conflicts) (Sp) ................................................................. 3
POLS 4260 Southeast Asian Government and Politics (Sp) ................................................................. 3
POLS 4470 Foreign Policy in the Pacific (Sp) ................................................................. 3
SOC 4710 Asian Societies (Sp) ................................................................. 3
SOC 4730 Women in International Development (Sp) ................................................................. 3

General Electives

(required minimum of 9 credits):

ANTH 1010 (BSS) Cultural Anthropology (F,Sp) ................................................................. 3
ANTH 2010 (BSS) Peoples of the Contemporary World (Sp) ................................................................. 3
ANTH 3160 (DSS) Anthropology of Religion (F) ................................................................. 3
ANTH/LING 4100 The Study of Language (F,Sp) ................................................................. 3
ANTH 5100 (DSS) Anthropology of Sex and Gender (Sp) ................................................................. 3
ANTH 5160 (DSS) Cities and Development (Sp) ................................................................. 3
BA 4300 International Finance (F,Sp) ................................................................. 3
BA 4590 Global Marketing Strategy (F,Sp) ................................................................. 3
ECON 3400 (DSS) International Economics for Business (F,Sp,Su) ................................................................. 3
ECON 5120 Economics of Russia and Eastern Europe, 9th Century to 21st Century (F) ............ 3
ECON 5150 (DSS) Comparative Economic Systems (Sp) ................................................................. 3
ECON 5850 Regional and Community Economic Development (F) ................................................................. 3
GEOG 1300 (BSS) World Regional Geography (F) ................................................................. 3
GEOG 1400 (BSS) Human Geography (Sp) ................................................................. 3
GEOG 2130 Population Geography (Sp) ................................................................. 3
GEOG 3430 Political Geography (Sp) ................................................................. 3
NR 1010 (BSS) Humans and the Changing Global Environment (F,Sp) ................................................................. 3
PLSC 4300 World Food Crops and Cropping Systems: The Plants That Feed Us (Sp) .................. 3
POLS 2100 Introduction to International Politics (F,Sp) ................................................................. 3
POLS 2200 (BSS) Comparative Politics (F,Sp) ................................................................. 3
POLS 5200 Global Environment (F) ................................................................. 3
POLS 5440 (DSS) Gender and World Politics (Sp) ................................................................. 3
SOC 3200 (DSS) Population and Society (F,Sp) ................................................................. 3
SOC 3600 Sociology of Urban Places (F) ................................................................. 3
SOC/GEOG 5650 (DSS) Developing Societies (F) ................................................................. 3
SOC 6310 Sociology of Work and Occupations (Sp) ................................................................. 3

Sample Four-year Plan for Asian Studies Major

Minimum GPA for Admission: 2.5, USU; 2.2, Career
Minimum GPA for Graduation: 2.5, major requirements including foreign language
Minimum Grade Accepted: C- in all major requirements including foreign language

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (30 credits)

Fall Semester (15 credits)

Asian Language 1010-level course ................................................................. 5
Quantitative Literacy (QL) course ................................................................. 3
University Studies Breadth courses ................................................................. 6
Elective course ................................................................. 1

Spring Semester (15 credits)

ENGL 1010 (CL1) Introduction to Writing: Academic Prose ................................................................. 3
Asian Language 1020-level course ................................................................. 5
University Studies Breadth courses ................................................................. 6
Elective course ................................................................. 1

Complete the CIL exams by the end of the Freshman Year.

Sophomore Year (30 credits)

Fall Semester (15 credits)

Asian Language 1010-level course ................................................................. 5
Asian General Elective course ................................................................. 3
University Studies Breadth courses ................................................................. 6
Elective course ................................................................. 1

Spring Semester (15 credits)

ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................................................. 3
Asian Language 2020-level course ................................................................. 5
Asian Core course ................................................................. 3
Asian General Elective course ................................................................. 3
Elective course ................................................................. 1

  - Upper-division elective courses .......................................................... 9
  - Elective course .................................................................................. 3

### Asian Languages

Descriptions of Asian language courses can be found in the Course Descriptions section of this catalog.
#### Outcomes

Biological Engineering Program outcomes are aligned with the program outcomes of all academic engineering programs in the U.S. that are provided by the Accreditation Board for Engineering and Technology/Engineering Accreditation Commission (ABET/EAC). Six specific outcomes are identified below.

1. Students have proven themselves to be proficient in mathematics, the sciences, and engineering.

2. Students have shown a capacity for investigation and experimentation, including the analysis and interpretation of data, as well as the ability to design an effective biological or irrigation system.

3. Students have exercised their engineering skills as part of a multi-disciplinary group, and have demonstrated the capability to communicate verbally, in writing, graphically, and through engineering media.

4. Students have demonstrated the ability to solve engineering analysis and design problems, utilizing both fundamental engineering principles and modern engineering technology and tools.

5. Students have demonstrated an understanding of the standards of professional conduct and ethical responsibility, in addition to understanding the role that an engineer plays in modern global society.

6. Students have manifested recognition of and commitment to the need for life-long learning as a professional, and have broadened the scope of their interests beyond engineering to include an awareness of the world around them.

#### Assessment and Evaluation

The BIE Department is committed to an assessment process aimed at evaluating the effectiveness of BIE programs in preparing graduates as productive professionals. The foundation of departmental assessment is the undergraduate accreditation by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET).

The continuing improvement processes that are documented and implemented annually as part of the accreditation activities in support of the EAC/ABET requirements provide for formal and external review of the Biological Engineering Bachelor of Science program. Internal assessment and evaluation is formally conducted annually through BIE Department committees including: (1) the Curriculum Committee, and (2) the ABET Committee. This assessment and evaluation ensures that the USU program meets an overall objective and structure consistent with similar programs in the U.S. and Canada.

The biological engineering program is continuously improved through integrating the results of this formal assessment with the day-to-day assessments obtained from both students and faculty. To ensure the overall quality of the program, the department conducts several specific assessments. These are:

1. Annual faculty self-assessment survey

2. Fundamentals of Engineering Examination performances
Department of Biological and Irrigation Engineering

3. Biological and Irrigation Engineering Advisory Board activities, including employer responses and board reviews

4. Alumni survey

5. Graduating student exit interviews

6. Teaching evaluations

Undergraduate Programs

General biological engineering concepts include the properties of biological materials, electronics and bio-instrumentation, computer use and programming, engineering mechanics, thermodynamics, computer-aided drafting, bio-environmental transport phenomena, and fluid mechanics.

Students gain a strong foundation in biological, chemical, and physical sciences. Each student then selects an option within the field, based on personal interest. These areas of study are tailored for each student with 21 semester credits of technical electives and one-on-one academic advisement with a member of the faculty. Design is a major theme of both the student's general coursework and specialization, with most courses including open-ended design problems. The entire design experience is brought together in a capstone design course.

The Biological Engineering Program is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (EAC/ABET).

Requirements

Admission and Graduation Requirements

The student who is majoring in or planning to major in Biological Engineering needs to be aware of the College of Engineering requirements concerning admission to the college, pre-engineering, admission to the professional engineering program, general education, and other academic requirements. Additional information concerning these items is given in the College of Engineering requirements on pages 119-121. It is the responsibility of the student to be aware of these rules and regulations.

Biological Engineering Curriculum

Biological Engineering is divided into a preprofessional and a professional program involving either a four-year or a five-year schedule that will satisfy the requirements for a BS degree in Biological Engineering. Students receiving credit from the College Level Examination Program (CLEP) or from Advanced Placement (AP) may complete a BS degree program in less than four years. The academic work, particularly in the junior and senior years, is supplemented by hands-on laboratories which are required as part of the coursework. Modification in the program to meet special needs and priorities of a student may be obtained with the approval of the department head and advisor.

Preprofessional Program:

BIE 1880 Engineering Quantification of Biological Processes (Sp) ..........3
BIE 1880 Principles of Chemistry I (F,Sp) ..............................................4
CHEM 1210 Principles of Chemistry I (F,Sp) ..............................................3
CHEM 1215 Principles of Chemistry Laboratory I (F,Sp) .........................1
CHEM 2300 Principles of Organic Chemistry (F) ......................................3
CHEM 2315 Organic Chemistry Laboratory I (F) ......................................1
ENGR 1000 Introduction to Engineering Design (F) ..................................2
BIE 1880 Engineering Quantification of Biological Processes (Sp) ..........3
BIE 2330 Principles of Chemistry I (F,Sp) ..............................................4
CHEM 1215 Organic Chemistry Laboratory I (F,Sp) ......................................1
CHEM 2300 Principles of Organic Chemistry (F) ......................................3
CHEM 2315 Organic Chemistry Laboratory I (F) ......................................1
ENGR 1000 Introduction to Engineering Design (F) ..................................2
ENGR 2010 Engineering Mechanics Statics (F,Sp) .....................................2
ENGR 2030 Engineering Mechanics Dynamics (F,Sp) ...............................3
ENGR 2200 Engineering Numerical Methods I (F) .....................................3
BIO 2310 Principles of Chemistry I (F,Sp) ..............................................4
ENGL 1010 (BLS) Introduction to Engineering Design (F) .........................4
ENGL 1010 Principles of Organic Chemistry (F) ......................................3
ENGL 1015 Organic Chemistry Laboratory I (F) ......................................1
ENGR 2010 Engineering Mechanics Statics (F,Sp) .....................................2
ENGR 2200 Engineering Numerical Methods I (F,Sp) ...............................3
MAE 2300 Thermodynamics I (Sp,Su) ......................................................3
MATH 1210 (F) Calculus I (Sp,Su) ..........................................................4
MATH 1220 (QL) Calculus II (F,Sp,Su) .....................................................4
MATH 2250 (QL) Linear Algebra and Differential Equations (F,Sp,Su) ....4
PHYS 2200 Elements of Mechanics ......................................................2
Communications Literacy ..................................................................3

Professional Program:

BIE 3000 Instrumentation for Biological Systems (Sp) .........................2
BIE 3200 Introduction to Unit Operations in Biological Engineering (F) .......3
BIE 3670 Transport Phenomena in Bio-Environmental Systems (Sp) ....3
BIE 3870 Biological Engineering Design I (Sp,Su) ......................................1
BIE 4880 (CI) Biological Engineering Design II (F,Sp,Su) ..........................3

NFS 5110 (CI) Food Microbiology (Sp) ..................................................3
PHYS 2110 The Physics of Living Systems I .........................................4
PHYS 2120 (BPS) The Physics of Living Systems II ................................4
PHYS 2210 (CI) General Physics—Science and Engineering I ...............4
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II ......4
SOIL 3400 Fundamentals of Soil Science (F,Sp) .......................................3
SOIL 5650 Environmental Soil Physics (F) ............................................3

Other technical courses may be accepted with prior written approval from the Department of Biological and Irrigation Engineering.

Suggested Semester Schedule for Premedical Program
It is possible for students to combine premedical requirements with requirements for the Biological Engineering major. Some of the premedical requirements add to the total amount of credits required. This combination may be completed within five years, if the student is very diligent. Medical schools do not accept AP, CLEP, or ACT scores toward fulfillment of English Composition, Chemistry, or Biology requirements. The following schedule is designed to satisfy the requirements without time conflicts. Students who must deviate from this schedule should be sure to meet often with a College of Engineering advisor.

Preengineering: First Three Years
First Year (31 credits)
Fall Semester (15 credits)
BIOL 16101,2 Biology I .................................................................4
CHEM 1215 General Chemistry .........................................................4
CHEM 12101,2 General Chemistry .....................................................4

Utah State University 2006-2007 General Catalog 173
Department of Biological and Irrigation Engineering

ENGR 1000 Introduction to Engineering Design........................... 2
MATH 1210 (QL) Calculus I...................................................... 4

Spring Semester (16 credits)
BIE 1860 Engineering Quantification of Biological Processes.......... 3
BIOL 1620 (BLS) Biology II.................................................. 4
CHEM 1220 (BPS) Principles of Chemistry II.......................... 4
CHEM 1225 Chemical Principles Laboratory II.......................... 1
MATH 1220 (QL) Calculus II.................................................. 4

Second Year (32 credits)
Fall Semester (15 credits)
PHYS 2210 (QI) General Physics—Science and Engineering I ....... 4
MATH 2250 (QI) Linear Algebra and Differential Equations.......... 4
ENGL 1010 (CL1) Introduction to Writing: Academic Prose.......... 3
ENGR 2010 Engineering Mechanics Statics............................. 2
ETE 2270 Computer Engineering Drafting..............................

Spring Semester (17 credits)
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II ..4
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode......................................................... 3
ENGR 2030 Engineering Mechanics Dynamics.......................... 3
ETE 2300 (QI) Electronic Fundamentals.................................. 4
University Studies Breadth American Institutions (BAI) course....

Third Year (31 credits)
Fall Semester (15 credits)
BIE 2330 Engineering Properties of Biological Materials............... 3
ENGR 2200 Engineering Numerical Methods I.......................... 3
CHEM 2310 Organic Chemistry I........................................... 4
CHEM 2315 Organic Chemistry Laboratory I........................... 1
BIOL 2420 Human Physiology............................................. 4

Spring Semester (16 credits)
CHEM 2320 Organic Chemistry II........................................... 4
CHEM 2325 Organic Chemistry Laboratory II........................... 1
BIOL 2320 Human Anatomy................................................ 4
BIOL 3060 (QI) Principles of Genetics................................... 4
MAE 2360 Thermodynamics I (or BIE equivalent course)........... 3

Professional Engineering: Junior and Senior Years
Junior Year (30 credits)
Fall Semester (15 credits)
BIE 3200 Introduction to Unit Operations in Biological Engineering..... 3
CEE 3500 Civil and Environmental Engineering Fluid Mechanics..... 3
BIOL 5210 Cell Biology.......................................................... 3
University Studies Breadth Humanities (BHU) course.................. 3
University Studies Breadth Social Sciences (BSS) course............. 3

Spring Semester (15 credits)
BIOL 3300 (BLS) General Microbiology .................................. 4
BIE 3670 Transport Phenomena in Bio-Environmental Systems...... 3
BIE 3870 Biological Engineering Design I.............................. 1
CHEM 3700 Introductory Biochemistry................................... 3
CHEM 3710 Introductory Biochemistry Laboratory..................... 1
University Studies Breadth Creative Arts (BCA) course............... 3

Senior Year (29 credits)
Fall Semester (15 credits)
BIE 4880 (CI) Biological Engineering Design II........................ 3
BIE 5850 Biomaterials Engineering.....................................

BIE 5930 Special Studies: Modeling Biological Systems............. 3
STAT 3000 (QI) Statistics for Scientists................................. 3
BIE elective course............................................................... 3

Spring Semester (14 credits)
BIE 3000 Instrumentation for Biological Systems..................... 2
BIE 4890 (CI) Biological Engineering Design III...................... 3
Engineering Elective............................................................. 3
University Studies Depth Humanities and Creative Arts (DHA) course................................................................. 3
University Studies Breadth Social Sciences (DSS) course.......... 3

1The Breadth Sciences (BLS) area in the University Studies Program is satisfied by the combination of BIOL 1610 and 3300.
2To emphasize irrigation, bioprocesses, premedical, etc., contact department for suggested technical electives.
3This course is required for admission to the Professional Engineering Program (PEP).

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student's discipline. Participating in departmental honors enhances students' chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information
For more information about the Bachelor of Science requirements and the sequence in which courses should be taken, see major requirement sheet, available from the Biological and Irrigation Engineering Department, or online at: http://www.usu.edu/ats/majorsheets/

Financial Support
Scholarships, assistantships, grants-in-aid, and work-study programs are available through the University. In addition, the department employs students to assist in engineering research and development. Cooperative education and industrial employment opportunities for students are coordinated by the University Placement Office and by the BIE Department.

Concurrent BS/Master’s Program
The concurrent BS/Master’s program allows engineering students to begin taking graduate-level classes during their senior year. This permits them to complete requirements for both the BS degree and the master’s degree concurrently during two years. Students in this program have a greater selection of graduate courses, since many graduate courses are taught during alternate years. In addition, the
Department of Biological and Irrigation Engineering

Students must have a BS from an ABET-accredited engineering program in the U.S. or its equivalent in their home countries or must take the make-up coursework required for a BS in engineering at USU. It is assumed that the bachelor’s degree mathematical training includes courses in calculus, linear analysis, and differential equations.

Three MS options are available: research (Plan A), technical practice (Plan B), and training/extension (Plan C).

Research Option

Students wishing to gain experience in research may select the research option, particularly if they have a long-term goal of PhD study. The minimum requirements for this option are 30 credits, of which 8 may be awarded for the thesis.

Technical Practice Option

Some students may not be interested in pursuing a PhD degree or in doing the research necessary for a thesis. For such students, the technical practice (Plan B) option is offered. The requirements for the degree are similar to those for the research option, with the exception of the thesis. The 8 thesis credits are replaced by 4 credits for a significant engineering report or design project and 4 additional credits of coursework. The minimum course requirement for the technical practice option is 30 approved graduate credits.

Training/Extension Option

Students expecting to terminate their graduate studies at the MS level and wishing to develop an emphasis in the training and/or extension fields of biological engineering or irrigation engineering, may choose the training/extension option (Plan C). The same engineering BS or equivalent requirements noted under the Plan A option apply. The minimum requirements for this degree are 30 approved graduate credits. No report or thesis is required. The degree requirements under this option can be met by taking courses.

Doctor of Philosophy

Two PhD programs are offered in the department: (1) Biological Engineering and (2) Irrigation Engineering. Students who have completed an MS with a thesis (Plan A or equivalent) in an engineering discipline are eligible to apply for admission to a PhD program. Admission will be based on the students’ prior academic records and, if they are graduates of USU, the recommendations of their graduate committees. It is assumed that students are adequately prepared in mathematics and engineering design courses to compete at the PhD level. If such is not the case, a program of courses to make up the deficiency will be required.

In addition to any prescribed review courses and seminars, the minimum requirements for a PhD program include 60 credits of approved graduate courses beyond a master’s degree, satisfactory completion of comprehensive examinations or submission of an approved manuscript to a refereed archival journal, and the writing of a dissertation based on original research. The degree requirements beyond a master’s degree can be met by taking courses in engineering design, synthesis, and systems; mathematics; and related sciences.

Research

Graduate research projects in the BIE Department encompass two broad options: biological engineering and irrigation engineering. Specific research projects in the biological engineering option include tissue and biomedical engineering related to heart stents, biosensor design and development for biomedical and bioenvironmental applications (genetic probes), microbial fermentations, biorefining (production of biofuels and bioplastics from biological feedstocks), nanobiotechnology (quantum dots), biophotonics (interactions of light with biological materials), and land-based bioenvironmental sustainable systems (land application of industrial and municipal residuals for recycling, vegetative growth, soil improvement, and groundwater protection).
Food engineering represents an area of emphasis under the biological engineering option. Land application of food processing wastes, extrusion of dairy-based food, multi-stage anaerobic digestion of biological materials, functional properties of foods, and biological detoxification of metals are some of the research topics supported in food engineering.

In the irrigation engineering area, USU has attained worldwide prestige through the successful professional contributions of its graduates during a period of 80 years. The BIE Department is substantially involved in overseas research and training activities, for example in the Dominican Republic, Armenia, and Tatarstan, concerned with managing irrigation systems, on-farm water management, water resource development, and soil assimilation and recycling of industrial residues. Specific research projects in the irrigation and drainage engineering option include hydraulics of surface irrigation, consumptive use, return flow quantity and quality of irrigation waters, transient flow in tile drainage systems, drain envelopes, sprinkler irrigation, trickle irrigation, crop production and water requirements, salt movement, regional groundwater modeling for optimizing sustainable yield, conveyance system modeling and control, and remote sensing.

Financial Assistance

The large and diverse departmental research programs make it possible to offer graduate financial support in the form of research assistantships, traineeships, and teaching assistantships for qualified students. Research assistantships are provided by the BIE Department and by individual research projects. Teaching assistantships are provided by the School of Graduate Studies and by the College of Engineering. Traineeships and research assistantships carry tuition waivers. It is the goal of the BIE Department to provide research and/or teaching support for all qualified students.

Additional Information

Biological and Irrigation Engineering Faculty

Professors
Conly L. Hansen, food engineering
Thomas B. Hardy, natural systems
Robert W. Hill, irrigation and water resource extension
Christopher M. U. Neale, remote sensing
Richard C. Peralta, groundwater
Linda S. Powers, bioprocess engineering
Ronald C. Sims, biological process engineering
Wynn R. Walker, surface irrigation, Associate Dean of College of Engineering

Research Professors
Darwin L. Sorensen, soil microbiology
L. Humberto Yap-Salinas, drainage

Adjunct Professors
Richard Allen, irrigation
Anne J. Anderson, plant root-microbe interactions
H. Scott Hinton, biophotonics
Lawrence E. Hipps, biometeorology
Bart C. Weimer, microbiology, Director of Center for Integrated BioSystems

Professors Emeritus
George H. Hargreaves, crop water requirements
Jack Keller, sprinkle and drip irrigation
Glen E. Stringham, surface irrigation

Associate Professor
Gary P. Merkley, conveyance systems

Research Associate Professors
Joan E. McLean, soil chemistry
Judith L. Sims, soil biology

Adjunct Associate Professors
Michael J. McFarland, biosolids
Daryl B. DeWald, cell biology, Associate Director of Center for Integrated BioSystems

Assistant Professors
David W. Brit, biomedical engineering
Anhong Zhou, nanobiotechnology

Research Assistant Professor
Sinisha Ivans, biometeorology, surface irrigation

Adjunct Assistant Professors
David G. Chandler, soil processes
Andrew A. Keller, irrigation
Kytai T. Nguyen, biomedical engineering
Paul D. Schreuders, biomedical engineering

Adjunct Research Associate Professors
Hui Fang Dou, electrical engineering
Arnulf Gonzalez-Meza, irrigation system transfer
Scott B. Jones, soil physics
Charles D. Miller, biology

Research Assistant Professor Emeritus
R. Kern Stutler, irrigation structures

Principal Lecturer
Timothy A. Taylor, bioprocess engineering

Course Descriptions

Biological and Irrigation Engineering (BIE), pages 571-574.
The Department of Biology offers programs leading to a Bachelor of Science or Bachelor of Arts degree. Majors will complete a core of courses which provide an understanding of biological principles. Upper-division courses provide integration, in-depth study, and an opportunity for specialization within the different degree emphases. Additional coursework in chemistry, physics, statistics, and mathematics provides knowledge and analytical skills in these important related fields. Most biology degrees provide a foundation for graduate work. Biology majors can add a minor area of study, such as business or chemistry, to enhance their employment opportunities.

Prehealth Professions Programs
The Department of Biology supervises premedical, predental, and other prehealth professions programs. These programs satisfy entrance requirements for most medical and dental schools in the United States and Canada and are recognized for the high-quality preprofessional preparation they provide. After four years, the student receives a BS degree in Biology or another major. Advisor: D. M. Andy Anderson, Veterinary Science and Bacteriology 231.

Composite Teaching—Biological Science
This major combines content training in biology and related fields (including chemistry, physics, geology, mathematics, and statistics) with education courses. Graduates are licensed to teach at the secondary level. Advisor: Richard J. Mueller, Eccles Science Learning Center 245.

Public Health
The Department of Biology offers preprofessional training in public health. Individuals completing the BS degree have employment opportunities in such areas as environmental health, industrial hygiene, public health education, administration, nursing, nutrition, mental health, and social work. Advisor: David O. Wallace, Biology-Natural Resources 333.

The Department Head, the Director of Undergraduate Studies, and advisors in the Department of Biology are available to provide undergraduate majors with additional information regarding specific programs and career opportunities. The Biology Advising Center and the Director of Undergraduate Studies are located in BNR 101. Program requirements, advising information, and an “Ask an Advisor” e-mail service are on the Department of Biology web page at: http://www.biology.usu.edu.

Students with majors in the Department of Biology should consult with their advisors regularly as they plan their course of study. Students have the responsibility to keep themselves aware of major requirements and course prerequisites. For detailed information, obtain an official Major Requirement Sheet from the Biology Advising Center or online at: http://www.usu.edu/ats/majorsheets/. General requirements, specific course offerings, and the semesters that courses are taught may change.

Mathematics is an important and required skill to enhance one’s success in the sciences. Proper course level placement in mathematics at the beginning of the degree program is essential. Students should consult with an advisor to determine the appropriate level to begin their mathematics studies for meeting requirements and completion of their major.

Assessment
The primary mission of the Department of Biology is to discover and advance knowledge in the biological sciences, and to make that knowledge available to students through a diverse set of educational experiences. To achieve this, three specific areas are being targeted: (1) A core program in the life sciences is aimed at providing the skills and knowledge base needed for a wide variety of employment and educational opportunities in biological and biotechnology fields; (2) a premedical, predental, and prehealth program has the specific goal of guiding students with respect to opportunities in the health professions; and (3) a public health program provides pre-professional training in such subjects as environmental health, industrial hygiene, and public health education. For full details about Program Learning Objectives, Undergraduate Program Assessment, Data-based Decisions, and more, go to http://www.biology.usu.edu.

Undergraduate Research in Biology
The Department of Biology offers a broad array of undergraduate research opportunities. Undergraduate research allows students to...
have a real-life experience in a faculty research lab. Many students publish their research in scientific journals and present their research at national scientific meetings. Students may do undergraduate research work under the supervision of selected faculty members.

To receive academic credit, a student must enroll in BIOL 5800, Undergraduate Research. Students doing Honors in Biology do undergraduate research and write a bachelor’s thesis.

For complete information about undergraduate research, contact Liz Heffernan, Biology Advisor, at heffernanliz@biology.usu.edu or (435) 797-2577.

**Requirements**

**University Requirements**
Students are responsible for meeting all University requirements for total credits, upper-division credits, credits of C- or better, and the University Studies Program. (See pages 49-57 in this catalog.)

**College of Science Requirements**
All college requirements are met by completing the departmental degree requirements; no additional coursework is required.

**Departmental Admission Requirements**
New freshmen admitted to USU in good standing qualify for admission to the Biology and Public Health majors. Transfer students from other institutions need a 2.25 transfer GPA, and students transferring from other USU majors need a 2.25 cumulative GPA for admission to the Biology and Public Health majors in good standing. Admission requirements differ for the Composite Teaching—Biological Science Major, as explained below.

**Admission Requirements for the Composite Teaching—Biological Science Major**
New freshmen admitted to USU in good standing qualify for admission to this major. To qualify for admission to the Secondary Teacher Education Program (STEP), new freshmen must acquire a cumulative 2.75 GPA and 60 credits of coursework. Transfer students from other institutions or other USU majors need a cumulative 2.75 GPA and 60 credits of coursework to be admitted to the major and the STEP. For information on additional admission criteria, students should contact the Department of Secondary Education.

**GPA Requirement**
To graduate, a candidate for any bachelor’s degree offered by the Department of Biology must maintain a grade point average of 2.25 in all Department of Biology (BIOL or PUBH prefix) courses required for the major and a grade of C- or better in BIOL 1610 and 1620. The Pass-Fail option is not acceptable for any course required for the degree, but D grades are permitted within the restrictions of the 2.25 GPA. The Composite Teaching—Biological Science Major requires a cumulative overall GPA of 2.75 for admission and graduation. The 2.25 GPA requirement applies to the Biology, Public Health, and BioMath minors.

**BS Degree in Biology**
Four different emphases are available within the Biology degree. The Biology Emphasis is the most flexible option. Electives may be selected in any subdiscipline the student wishes to emphasize (e.g., botany, ecology, zoology, entomology, microbiology, etc.). The Cellular/Molecular and Ecology/Biodiversity emphases provide more directed training that is appropriate for research or other technical employment in academic institutions, government agencies, and the private sector. They also provide excellent preparation for graduate work. The Environmental Emphasis prepares students in the biological and physical sciences as they relate to environmental problems and concerns. This degree serves as a foundation for graduate work and provides practical training for employment at the bachelor’s degree level. Emphases will be listed on transcripts to indicate the student’s specialization. The course requirements are as follows:

**Biology Emphasis**

**Required Biology Courses (21-22 credits)**

<table>

Suggested Four-year Course of Study for Biology Major, Cellular/Molecular Emphasis

The suggested schedule shown below should be used in conjunction with the major requirement sheet.

Freshman Year (30 credits)

Fall Semester (15 credits)

BIOL 1610 Biology I ............................................. 4
CHEM 1210 Principles of Chemistry I ..................... 4
CHEM 1215 Chemical Principles Laboratory I .......... 1
University Studies or MATHPrerequisite courses ............ 6

Spring Semester (15 credits)

BIOL 1620 (BLS) Biology II .................................. 4
CHEM 1220 (BPS) Principles of Chemistry II ........... 4
CHEM 1225 Chemical Principles Laboratory II ........... 1
University Studies or MATHPrerequisite courses ............ 6

Sophomore Year (30-37 credits)

Fall Semester (15-19 credits)

BIOL 2220 General Ecology (3 cr) or
BIOL 3060 (QI) Principles of Genetics (4 cr) .......... 3 or 4
CHEM 2310 Organic Chemistry I ........................... 4
CHEM 2315 Organic Chemistry Laboratory I .......... 1
MATH 1210 (QL) Calculus I ................................. 4
University Studies or elective courses ...................... 3-6

Spring Semester (15-18 credits)

BIOL 2220 General Ecology (3 cr) or
BIOL 3060 (QI) Principles of Genetics (4 cr) .......... 3 or 4
CHEM 2320 Organic Chemistry II ........................... 4
CHEM 2325 Organic Chemistry Laboratory II ......... 1
STAT 3000 (QI) Statistics for Scientists ................. 3
University Studies or elective courses ...................... 4-6

Junior Year (30-35 credits)

Fall Semester (15-17 credits)

BIOL 5210 Cell Biology ......................................... 3
CHEM 5700 General Biochemistry I ......................... 3
PHYS 2110 The Physics of Living Systems I (4 cr) or
PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) ............ 4

Spring Semester (15-18 credits)

BIOL 5220 Developmental Biology ......................... 3
CHEM 5710 General Biochemistry II ....................... 3
CHEM 5720 General Biochemistry Laboratory .......... 2
PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) or
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr) .......... 4
University Studies or elective courses ...................... 3-6

Senior Year (30-34 credits)

Fall Semester (15-17 credits)

BIOL 5250 (CI) Evolutionary Biology (3 cr) or
Biology elective course (3 cr) ................................. 3
Upper-division Physiology elective course (3-5 cr) or
Biology elective course (3-5 cr) ............................. 3-5
University Studies or elective courses ...................... 6

Spring Semester (15-17 credits)

BIOL 5190 Molecular Genetics ...................... 3
BIOL 5250 (CI) Evolutionary Biology (3 cr) or
Biology elective course (3 cr) ............................. 3
Upper-division Physiology elective or Biology Biotechnology
Elective course(s) (3-5 cr) or
Biology elective course(s) (3-5 cr) ....................... 3-5
University Studies or elective courses ...................... 6

Biology elective course(s) (3-5 cr)........................ 2-4
Biology Biotechnology elective course (3 cr) or
Biology elective course (3 cr) ................................. 3

Ecology/Biodiversity Emphasis

Required Biology Courses (24 credits)

BIOL 1610 Biology I (F) ........................................ 4
BIOL 1620 (BLS) Biology II (Sp) ........................... 4
BIOL 2220 General Ecology (F,Sp) ......................... 3
BIOL 3060 (QI) Principles of Genetics (F,Sp,Su) ...... 4
BIOL 3220 (QI) Field Ecology (F) .......................... 2
BIOL 3300 General Microbiology (F,Sp) ................. 4
BIOL 5250 (CI) Evolutionary Biology (F,Sp) .......... 3

Physiology Course with Lab Requirement (4-5 credits)

Students must take one upper-division physiology course with an integrated or separate laboratory from the following list:

Courses with integrated laboratories:

BIOL 4400 (QI) Plant Physiology (F) ......................... 4
BIOL 5300 (QI) Microbial Physiology (Sp) ................. 4

Courses with separate lecture and lab; both must be taken to meet the requirement:

BIOL 5600 Comparative Animal Physiology (F) .......... 3
BIOL 5610 (QI) Animal Physiology Laboratory (F,Sp) .... 2
Or

BIOL 5620 Medical Physiology (Sp) (Alt. Years) .......... 3
BIOL 5610 (QI) Animal Physiology Laboratory (F,Sp) .... 2

Clusters (8-10 credits)

Students must take one course from each of the following three clusters.
Suggested Four-year Course of Study for
STAT 3000 (QI)
Calculus I (F,Sp,Su) .................................................. 3
Mathematics and Statistics Requirement (7 credits)
SOIL 3000 Fundamentals of Soil Science (Sp) ........................ 3
GEO 1110 (BPS) The Dynamic Earth: Physical Geology (F,Sp) 4
BIOL 1150 Principles of Ecology .................................. 3
BIOL 2220 General Ecology (BPS) ............................... 3
CHEM 3060 Principles of Genetics (QI) .......................... 3
CHEM 2300 Principles of Organic Chemistry .................. 3
CHEM 2315 Organic Chemistry Laboratory I .................. 1
MATH 1210 Calculus I ................................................. 4
University Studies or MATH prerequisites courses .............. 6

Sophomore Year (30-35 credits)
Fall Semester (15-18 credits)
BIOL 2220 General Ecology (3 cr) or
BIOL 3060 Principles of Genetics (4 cr) .......................... 3 or 4
CHEM 2300 Principles of Organic Chemistry .................. 3
CHEM 2370 Introductory Biochemistry ........................... 3
CHEM 3100 Introductory Biochemistry Laboratory ......... 1
STAT 3000 Statistics for Scientists ................................. 3
University Studies or elective courses ............................. 4-6

Spring Semester (15-17 credits)
BIOL 2220 General Ecology (3 cr) or
CHEM 2370 Introductory Biochemistry ........................... 3
CHEM 3100 Introductory Biochemistry Laboratory ......... 1
STAT 3000 Statistics for Scientists ................................. 3
University Studies or elective courses ............................. 5-6

Junior Year (30-35 credits)
Fall Semester (15-17 credits)
BIOL 3300 General Microbiology (4 cr) or
BIOL 3310 Evolutionary Biology (3 cr) .......................... 3 or 4
BIOL 3220 Field Ecology .............................................. 2
GEO 1110 The Dynamic Earth: Physical Geology ............ 4
PHYS 2110 The Physics of Living Systems I (4 cr) or
PHYS 2210 Qi General Physics—Science and Engineering I (4 cr) ................................................................. 4
University Studies or elective course .............................. 2-3

Spring Semester (15-18 credits)
BIOL 3300 General Microbiology (4 cr) or
BIOL 3310 Evolutionary Biology (3 cr) .......................... 3 or 4
PHYS 2120 Qi General Physics—Science and Engineering II (4 cr) ................................................................. 4
Biology elective course .............................................. 2-4
University Studies or elective courses ............................. 6

Senior Year (30-36 credits)
Fall Semester (15-18 credits)
BIOL 5250 Qi Evolutionary Biology (3 cr) or
Biology elective course (3 cr) ......................................... 3
SOIL 3000 Fundamentals of Soil Science .......................... 4
Upper-division Physiology elective course (3-5 cr) or
Biology elective course (3-5 cr) ......................................... 3-5
University Studies or elective courses ............................. 5-6

Spring Semester (15-18 credits)
BIOL 5250 Qi Evolutionary Biology (3 cr) or
Biology elective course (3-4 cr) ......................................... 3 or 4
Upper-division Physiology elective course (3-5 cr) or
Biology elective course (3-5 cr) ......................................... 3-5
University Studies or elective courses ............................. 9

If students need Math courses prerequisite to MATH 1210, Calculus I, credits in addition to those listed here will be required.

Utah State University 2006-2007 General Catalog
Environmental Emphasis

Required Biology Courses (24 credits)

BIOL 1610 Biology I (F) .................................................. 4
BIOL 1620 (BLS) Biology II (Sp) ................................. 4
BIOL 2220 General Ecology (F,Sp) .............................. 3
BIOL 3060 (QI) Principles of Genetics (F,Sp,Su) ............. 4
BIOL 3220 (QI) Field Ecology (F) ................................. 4
BIOL 3300 General Microbiology (F,Sp) ......................... 4
BIOL 5250 (CI) Evolutionary Biology (F,Sp) .................... 3

Plant Identification (2-3 credits)

Choose one of the following courses:

- BIOL 2410 Plants and Fungi in the Field (Su) ................ 2
- BIOL 4420 Plant Taxonomy (Sp) ................................ 3

Physiology Course with Lab Requirement (4-5 credits)

Students must take from the following list one upper-division physiology course with an integrated or separate laboratory:

- Courses with integrated laboratories:
  - BIOL 4400 (QI) Plant Physiology (F) ........................... 4
  - BIOL 5300 (QI) Microbial Physiology (Sp) ................. 4

- Courses with separate lecture and lab; both must be taken to meet the requirement:
  - BIOL 5600 Comparative Animal Physiology (F) ........... 3
  - BIOL 5610 (QI) Animal Physiology Laboratory (F,Sp) ...... 2
  - Or
  - BIOL 5620 Medical Physiology (Sp) (Alt. Years) ......... 3
  - BIOL 5610 (QI) Animal Physiology Laboratory (F,Sp) ...... 2

Biology Elective Courses (12 credits)

Students must take 12 credits from the following list or others approved by advisor. Up to 3 credits of BIOL 5800 may be included.

- ADVS 5400 Environmental Toxicology (Sp) ................... 3
- BIOL 4500 Applied Entomology (Sp) ........................... 3
- BIOL 5020 (QI) Modeling Biological Systems (F) .......... 3
- BIOL 5310 Soil Microbiology (F) (Alt. Years) ............... 3
- BIOL 5320 Soil Microbiology Laboratory (F,Sp) ............ 2
- BIOL 5410 Introduction to Plant Pathology (Sp) ............ 4
- BIOL 5800 Undergraduate Research (F,Sp,Su) .......... 1-3
- CEE/SOIL 5620 Aquatic Chemistry (F) ....................... 3
- GEO 1110 (BPS) The Dynamic Earth; Physical Geology (F,Sp) 4
- PUBH 3610 Environmental Management (F) ................ 4
- SOIL 3000 Fundamentals of Soil Science (F,Sp) .......... 4

Required Physical Science Courses (36 credits)

- CHEM 1210 Principles of Chemistry I (F,Sp) ................. 4
- CHEM 1215 Chemical Principles Laboratory I (F,Sp,Su) .... 1
- CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) .... 4
- CHEM 1225 Chemical Principles Laboratory II (F,Sp) .......... 4
- CHEM 2310 Organic Chemistry I (F) ............................ 4
- CHEM 2315 Organic Chemistry Laboratory I (F) .......... 1
- CHEM 2320 Organic Chemistry II (Sp) ......................... 4
- CHEM 2325 Organic Chemistry Laboratory II (Sp) .......... 4
- CHEM 3000 (QI) Quantitative Analysis (F) .................... 3
- CHEM 3005 Quantitative Analysis Laboratory (F) ........... 1
- CHEM 3700 Introductory Biochemistry (Sp) ................... 3
- CHEM 3710 Introductory Biochemistry Laboratory (Sp) ... 1

- PHYS 2110 The Physics of Living Systems I (4 cr) and
  PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) ... 8
  Or
  - PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) and
  - PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr) ... 8

Mathematics and Statistics Requirement (7 credits)

- MATH 1210 (QL) Calculus I (F,Sp,Su) .......................... 4
- STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) ........ 3

Suggested Four-year Course of Study for Biology Major, Environmental Emphasis

The suggested schedule shown below should be used in conjunction with the major requirement sheet.

Freshman Year (30 credits)

Fall Semester (15 credits)

- BIOL 1610 Biology I ................................................. 4
- CHEM 1210 Principles of Chemistry I ......................... 4
- CHEM 1215 Chemical Principles Laboratory I ............... 1
- University Studies or MATH* prerequisite courses .......... 6

Spring Semester (15 credits)

- BIOL 1620 (BLS) Biology II ....................................... 4
- CHEM 2320 Organic Chemistry II ............................... 4
- CHEM 2325 Organic Chemistry Laboratory II ............... 4
- CHEM 2315 Organic Chemistry Laboratory I ............... 1
- University Studies or MATH* prerequisite courses .......... 6

Sophomore Year (30-36 credits)

Fall Semester (15-18 credits)

- BIOL 2220 General Ecology (3 cr) or
- BIOL 3060 (QI) Principles of Genetics (4 cr) ................. 3 or 4
- CHEM 2310 Organic Chemistry I ............................... 4
- CHEM 2315 Organic Chemistry Laboratory I ............... 1
- MATH 1210 (QL) Calculus I .............................. 4
- University Studies or elective course(s) ......................... 3-5

Spring Semester (15-18 credits)

- BIOL 2220 General Ecology (3 cr) or
- BIOL 3060 (QI) Principles of Genetics (4 cr) ................. 3 or 4
- CHEM 2320 Organic Chemistry II ............................... 4
- CHEM 2325 Organic Chemistry Laboratory II ............... 4
- University Studies or elective course(s) ......................... 4-6

Junior Year (30-31 credits)

Fall Semester (15-16 credits)

- BIOL 3220 (QI) Field Ecology .................................... 2
- CHEM 3000 (QI) Quantitative Analysis Laboratory ......... 1
- PHYS 2110 The Physics of Living Systems I (4 cr) or
- PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) ......................... 4
- University Studies or elective course(s) ......................... 5-6

Spring Semester (15 credits)

- BIOL 3300 General Microbiology (4 cr) or
- Biology elective course (4 cr) ................................. 4
- CHEM 3700 Introductory Biochemistry ......................... 3
- CHEM 3710 Introductory Biochemistry Laboratory ............ 1
- PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) or
- PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr) ............ 4
- University Studies or elective course(s) ......................... 3

Senior Year (30-35 credits)

Fall Semester (15-17 credits)

- BIOL 3300 General Microbiology (4 cr) or
- Biology elective course (4 cr) ..................................... 4
- BIOL 5250 (CI) Evolutionary Biology (3 cr) or
- Biology elective course (3 cr) ..................................... 3
Upper-division Physiology elective course (3-5 cr) or
Biology elective course (3-5 cr) ........................................ 3-5
University Studies or elective course(s) ............................. 5

Spring Semester (15-18 credits)
BIOL 4420 Plant Taxonomy .............................................. 3
BIOL 5250 (CI) Evolutionary Biology (3 cr) or
Biology elective course(s) (3 cr) ...................................... 3
Biology elective course(s) ........................................ 2-3
Upper-division Physiology elective course (3-5 cr) or
Biology elective course(s) (3-5 cr) ...................................... 3-5
University Studies or elective course(s) ............................. 4

4If students need Math courses prerequisite to MATH 1210, Calculus I, credits in addition to those listed here will be required.

BS Degree in Composite Teaching—Biological Science

The Composite Teaching—Biological Science Major leads to licensure to teach in secondary schools. Students who wish to teach Integrated Science at the middle or junior high school level should talk to their advisor about completing the courses necessary for an Integrated Science endorsement. Note: Beginning in 2006, all USU teacher education candidates will be required to take and pass the content exam approved by the Utah State Office of Education in their major content area prior to student teaching. The Composite Teaching—Biological Science course requirements are as follows:

Required Courses (32 credits)
BIOL 1610 Biology I (F) ......................................................... 4
BIOL 1620 (BLS) Biology II (Sp) .............................................. 4
BIOL 2220 General Ecology (F,Sp) ......................................... 3
BIOL 2420 Human Physiology (F,Sp,Su) ............................. 4
BIOL 3060 (QI) Principles of Genetics (F,Sp,Su) .................. 4
BIOL 3065 Genetics Laboratory (F) (Alt. Years) ................. 2
BIOL 3220 (QI) Field Ecology (F) ........................................... 2
BIOL 3300 General Microbiology (F,Sp) .............................. 4
BIOL 5250 (CI) Evolutionary Biology (F,Sp) ......................... 3
SCI 4300 Science in Society (F,Sp) ......................................... 2

Physiology Course with Lab Requirement (4-5 credits)

Students must take from the following list one upper-division physiology course with an integrated or separate laboratory:

Courses with integrated laboratories:
BIOL 4400 (QI) Plant Physiology (F) ................................. 4
BIOL 5300 (QI) Microbial Physiology (Sp) ........................ 4

Courses with separate lecture and lab; both must be taken to meet the requirement:
BIOL 5600 Comparative Animal Physiology (F) ................... 3
BIOL 5610 (QI) Animal Physiology Laboratory (F,Sp) ........................ 2
Or
BIOL 5620 Medical Physiology (Sp) (Alt. Years) .................. 3
BIOL 5610 (QI) Animal Physiology Laboratory (F,Sp) ........................ 2

Required Physical Science Courses (21 credits)
GEO 1110 (BPS) The Dynamic Earth: Physical Geology (F,Sp) ........................ 4
CHEM 1110 (BPS) General Chemistry I (F,Sp) ....................... 4
CHEM 1115 General Chemistry Laboratory (Sp) .................... 1
CHEM 1120 (BPS) General Chemistry II (Sp) ........................ 4

PHYS 2110 The Physics of Living Systems I (4 cr) and
PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) .......... 8
Or
PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) and
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr) .......... 8

Mathematics and Statistics Requirement (7 credits)
MATH 1210 (QL) Calculus I (F,Sp,Su) ............................... 4
STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) ................. 3

Required Courses for the Secondary Teacher Education Program (STEP) (35 credits)

Level 1:
INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su) .................. 1
SCED 3100 Motivation and Classroom Management (F,Sp) ................ 3
SCED 3210 (CI/DSS) Educational and Multicultural Foundations (F,Sp) .................. 2
SCED 3300 Clinical Experience I (F,Sp) ................................ 1
SCED 3400 Teaching Science I (F,Sp) .................................. 3

Level 2:
SPED 4000 Education of Exceptional Individuals (may be taken anytime) (F,Sp,Su) .................. 2
SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) ............... 3
SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) .......... 3
SCED 4300 Clinical Experience II (F,Sp) ................................. 1
SCED 4400 Teaching Science II (F,Sp) .................................. 3

Level 3:
SCED 5500 Student Teaching Seminar (F,Sp) ....................... 2
SCED 5630 Student Teaching in Secondary Schools (F,Sp) ............. 10

Suggested Four-year Course of Study for Composite Teaching—Biological Science Major
The suggested schedule shown below should be used in conjunction with the major requirement sheet.

Freshman Year (29 credits)
Fall Semester (14 credits)
BIOL 1610 Biology I ................................................................. 4
CHEM 1110 (BPS) General Chemistry I ................................. 4
University Studies or MATH 2 prerequisite courses .................. 6

Spring Semester (15 credits)
BIOL 1620 (BLS) Biology II .................................................... 4
CHEM 1115 General Chemistry Laboratory .......................... 1
CHEM 1120 (BPS) General Chemistry II ............................... 4
University Studies or MATH 2 prerequisite courses .................. 6

Sophomore Year (31 credits)
Fall Semester (15 credits)
BIOL 2420 Human Physiology ............................................... 4
BIOL 3060 (QI) Principles of Genetics (F,Sp,Su) ................... 4
MATH 1210 (QL) Calculus I ..................................................... 4
University Studies courses .................................................. 3

Spring Semester (16 credits)
BIOL 2220 General Ecology .................................................. 3
STAT 3000 (QI) Statistics for Scientists ................................. 3
GEO 1110 (BPS) The Dynamic Earth: Physical Geology ................. 4
University Studies courses .................................................. 6
Department of Biology

Junior Year (31-32 credits)
Fall Semester (16-17 credits)
BIOL 3065* Genetics Laboratory (2 cr) or
SCI 4300P Science in Society (2 cr) ............................................ 2
BIOL 3220 (QI) Field Ecology ..................................................... 2
BIOL 3300 General Microbiology ................................................. 4
PHYS 2110 The Physics of Living Systems I (4 cr) or
PHYS 2210 (QI) General Physics—Science
and Engineering I (4 cr) ......................................................... 4
Upper-division Physiology elective with lab .......................... 4-5

Spring Semester (15 credits)
INST 3500 Technology Tools for Secondary Teachers .................. 1
SCED 3100 Motivation and Classroom Management .................... 3
SCED 3210 (CI/DSS) Educational and Multicultural Foundations .... 3
SCED 3300 Clinical Experience I .................................................. 1
SCED 4400 Teaching Science II ................................................... 2
PHYS 2210 (BPS) The Physics of Living Systems II (4 cr) or
PHYS 2220 (BPS/QI) General Physics—Science
and Engineering II (4 cr) ......................................................... 4

Senior Year (29 credits)
Fall Semester (17 credits)
SCED 3400 Teaching Science I .................................................... 3
SPED 4000 Education of Exceptional Individuals ....................... 3
SCED 4200 (CI) Reading, Writing, and Technology ...................... 2
SCED 4210 Cognition and Evaluation of Student Learning ............... 3
SCED 4300 Clinical Experience II ............................................... 1
BIOL 3065* Genetics Laboratory (2 cr) or

BIOL 5250 (CI) Evolutionary Biology .......................................... 3

Spring Semester (12 credits)
SCED 5500 Student Teaching Seminar ......................................... 2
SCED 5630 Student Teaching in Secondary Schools ..................... 10

BA Degrees in Biology and Composite Teaching—Biological Science
The student must complete the requirements for the BS (above) plus two years of a foreign language. (See page 58 of this catalog.)

BS Degree in Public Health
A four-year program leading to the Bachelor of Science in Public Health is offered by the Department of Biology with options in either environmental health, industrial hygiene, or public health education. Individuals completing the environmental health option are qualified to take the Registered Environmental Health Specialist/Sanitarian Examination. Those completing the industrial hygiene option are granted education toward both the Certified Industrial Hygienist and the Certified Safety Professional examinations. Public Health Education graduates are qualified to take the Certified Health Education Specialist (CHES) examination. The Public Health degree requires a core of biology courses similar to that required for the biology degrees; additional biology and public health courses; and chemistry, physics, mathematics, statistics, and allied science and engineering courses appropriate to each emphasis. The course requirements are as follows:

Industrial Hygiene Emphasis

Required Courses (16 credits)
BIOL 1610 Biology I (F) ............................................................. 4
BIOL 1620 (BLS) Biology II (Sp) ................................................ 4
BIOL 2420 Human Physiology (F,Sp,Su) ..................................... 4
BIOL 3300 General Microbiology (F,Sp) ..................................... 4

Required Physical Science Courses (30 credits)
CHEM 1210 Principles of Chemistry I (F,Sp) ................................. 4
CHEM 1215 Chemical Principles Laboratory I (F,Sp) .................... 1
CHEM 1220 (BPS) Principles of Organic Chemistry (F) ................. 3
CHEM 2300 Principles of Organic Chemistry (F) ......................... 3
CHEM 2315 Organic Chemistry Laboratory I (F) .......................... 1
CHEM 3000 (QI) Quantitative Analysis (F) ................................... 3
CHEM 3005 Quantitative Analysis Laboratory (F) ......................... 1
CHEM 3700 Introductory Biochemistry (Sp) ................................ 3
CHEM 3710 Introductory Biochemistry Laboratory (Sp) ................. 1

PHYS 2110 The Physics of Living Systems I (4 cr) and
PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) ............. 8
Or
PHYS 2210 (QI) General Physics—Science and Engineering I
(4 cr) and
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II
(4 cr) ................................................................................... 8

Mathematics and Statistics Requirement (7 credits)
MATH 1210 (QL) Calculus I (F,Sp,Su) ........................................ 2
STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) ......................... 3

Required Program Courses (32 credits)
CEE 3870 Professional/Technical Writing in Civil and
Environmental Engineering (F) ................................................. 2
PUBH 3310 Occupational Health and Safety (F) ......................... 3
PUBH 3610 Environmental Management (F) ................................ 3
PUBH 4040 Fundamentals of Epidemiology (Sp) ......................... 3
PUBH 4310 Industrial Hygiene Recognition of Hazards (F) .......... 4
PUBH 4320 Industrial Hygiene Chemical Hazard Evaluation (Sp) .... 3
PUBH 4330 Industrial Hygiene Physical Hazards (Sp) ................... 3
PUBH 4380 Industrial Hygiene Internship (F,Sp,Su) ...................... 3
PUBH 5330 (QI) Industrial Hygiene Chemical Hazard Control (F) .... 3
PUBH 5500 (CI) Public Health Management (F,Sp) ..................... 2
ADV 5400 Environmental Toxicology (Sp) ................................. 3

Elective Options (select 5 credits)
BIOL 3060 (QI) Principles of Genetics (F,Sp,Su) ......................... 4
CEE 5610 Environmental Quality Analysis (F) ............................ 3
PUBH 4300 Industrial Hygiene Seminar (F) ................................. 1-2
PUBH 4410 Industrial Safety (Sp) .................................................. 3
PUBH 5340 Industrial Hygiene and Safety Programs (Sp) ................ 2
PUBH 5670 Hazardous Chemicals Handling and Safety (Sp) .......... 2
PUBH 5730 Analysis and Fate of Environmental Contaminants (Sp) 3
PUBH 5790 Accident and Emergency Management (Sp) ............ 3

Suggested Four-year Course of Study for Public Health Major, Industrial Hygiene Emphasis
The suggested schedule shown below should be used in conjunction with the major requirement sheet.

Freshman Year (30 credits)
Fall Semester (15 credits)
BIOL 1610 Biology I ................................................................. 4
CHEM 1210 Principles of Chemistry I ....................................... 4
CHEM 1215 Chemical Principles Laboratory I ......................... 1
University Studies or MATH* prerequisite courses .................... 6

* 1-3 credits in mathematics, statistics, and allied science and engineering courses
* Additional biology and public health courses; and chemistry, physics, mathematics, statistics, and allied science and engineering courses
* Appropriate to each emphasis

Suggested Four-year Course of Study for Public
Health Major, Environmental Health Emphasis
The suggested schedule shown below should be used in conjunction
with the major requirement sheet.

Freshman Year (30 credits)
Fall Semester (15 credits)
Biol 1610 Biology I .........................................................4
Chem 1210 Principles of Chemistry I ................................4
Chem 1215 Chemical Principles Laboratory I .....................1
University Studies or Math\(^a\) prerequisite courses ...........6

\(^a\) Students need Math courses prerequisite to Math 1210, Calculus I, credits in addition to
those listed here will be required.
# Department of Biology

## Spring Semester (15 credits)
- BIOL 1620 (BLS) Biology II ................................................. 4
- CHEM 1220 (BPS) Principles of Chemistry II ......................... 4
- CHEM 1225 Chemical Principles Laboratory II ......................... 1
- University Studies or MATH** prerequisite courses .................. 6

### Sophomore Year (30-36 credits)

#### Fall Semester (15-18 credits)
- BIOL 2420 Human Physiology .............................................. 4
- CHEM 2300 Principles of Organic Chemistry ......................... 3
- CHEM 2315 Organic Chemistry Laboratory I ............................. 1
- MATH 1210 (QL) Calculus I .................................................. 4
- PUBH 3310 Occupational Health and Safety ......................... 3
- University Studies or elective courses ................................. 0-3

#### Spring Semester (15-18 credits)
- BIOL 2220 General Ecology .................................................. 3
- PUBH 5000 Public Health Seminar .......................................... 1
- STAT 3000 (QI) Statistics for Scientists ................................... 3
- University Studies or elective courses ................................. 8-11

### Junior Year (30-36 credits)

#### Fall Semester (13-16 credits)
- PHYS 2110 The Physics of Living Systems I (4 cr) or  
  PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) ................................................. 4
- PUBH 4310 Industrial Hygiene Recognition of Hazards ..  4
- PUBH 5730 Analysis and Fate of Environmental Contaminants ..  3
- University Studies or elective courses ................................. 2-5

#### Spring Semester (14-17 credits)
- BIOL 3300 General Microbiology ........................................... 4
- PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) or  
  PHYS 2220 (BPS/QI) General Physics—Science  
  and Engineering II (4 cr) .................................................. 4
- Public Health elective courses, University Studies courses, or other elective courses ......................... 6-9

### Summer Semester (3 credits)
- PUBH 4000 Public Health Field Experience ......................... 3

### Senior Year (30-36 credits)

#### Fall Semester (15-18 credits)
- CEE 3870 Professional/Technical Writing in Civil and  
  Environmental Engineering ................................................. 2
- PUBH 3610 Environmental Management .................................. 3
- PUBH 4030 Communicable Disease Control ......................... 3
- Public Health elective courses, University Studies courses, or other elective courses ......................... 7-10

#### Spring Semester (15-18 credits)
- PUBH 4040 Fundamentals of Epidemiology ............................. 3
- PUBH 5500 (CI) Public Health Management ............................ 2
- NFS 5110 (CI) Food Microbiology ........................................... 4
- Public Health elective courses, University Studies courses, or other elective courses ......................... 6-9

---

**All students need Math courses prerequisite to MATH 1210, Calculus I, credits in addition to those listed here will be required.**

### Public Health Education Emphasis

#### Required Biology Courses (16 credits)
- BIOL 1620 Biology I (F) ...................................................... 4
- BIOL 1620 (BLS) Biology II (Sp) ........................................... 4
- BIOL 2420 Human Physiology (F,Sp,Su) ............................... 4
- BIOL 3300 General Microbiology (F,Sp) ............................... 4

### Required Physical Science Courses (13 credits)
- CHEM 1110 (BPS) General Chemistry I (F,Sp) ......................... 4
- CHEM 1115 General Chemistry Laboratory (Sp) ....................... 1
- CHEM 1120 (BPS) General Chemistry II (Sp) ......................... 4
- PHYS 1200 (BPS) Introduction to Physics by Hands-on Exploration (4 cr) or  
  PHYS 1800 (BPS) Physics of Technology (4 cr) ...................... 4

### Mathematics and Statistics Requirement (7 credits)
- MATH 1210 (QL) Calculus I (F,Sp,Su) ................................... 4
- STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) ..................... 3

### Required Program Courses (15 credits)
- PUBH 3120 Family and Community Health (Sp) ...................... 3
- PUBH 4000 Public Health Field Experience (F,Sp,Su) .............. 3
- PUBH 4030 Communicable Disease Control (F) ...................... 3
- PUBH 4040 Fundamentals of Epidemiology (Sp) ...................... 3
- PUBH 5000 Public Health Seminar (Sp) ................................. 1
- PUBH 5500 (CI) Public Health Management (F) ...................... 2

### Required Supporting Courses (30 credits)
- HEP 2000 First Aid and Emergency Care (F,Sp,Su) ................. 2
- HEP 2500 Health and Wellness (F,Sp,Su) ............................... 2
- HEP 3000 Drugs and Human Behavior (F,Sp,Su) ..................... 3
- HEP 3800 Grant Proposal Writing (Sp) ................................. 3
- HEP 3900 Social Marketing in Health Education (Sp) ..........  3
- HEP 4200 (QI) Planning and Evaluation for Health Education (F) .... 3
- NFS 1020 (BLS) Science and Application of Human Nutrition (F,Sp,Su) .................................................. 3
- NFS 5210 Advanced Public Health Nutrition (Sp) .................... 2
- SOC 3330 Medical Sociology (F) .......................................... 2
- SOC 3500 Social Psychology (F,Sp) ....................................... 3
- SPCH 1020 (CI) Public Speaking (F,Sp) ............................... 3

### Suggested Four-year Course of Study for Public Health Major, Public Health Education Emphasis

The suggested schedule shown below should be used in conjunction with the major requirement sheet.

### Freshman Year (29 credits)

#### Fall Semester (14 credits)
- BIOL 1610 Biology I .......................................................... 4
- CHEM 1110 (BPS) General Chemistry I ................................. 4
- University Studies or MATH** prerequisite courses .................. 6

#### Spring Semester (15 credits)
- BIOL 1620 (BLS) Biology II .................................................. 4
- CHEM 1115 General Chemistry Laboratory ............................ 1
- CHEM 1120 (BPS) General Chemistry II ............................... 4
- University Studies or MATH** prerequisite courses .................. 6

### Sophomore Year (30-36 credits)

#### Fall Semester (15-18 credits)
- BIOL 2420 Human Physiology .............................................. 4
- MATH 1210 (QL) Calculus I .................................................. 4
- STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) ..................... 3
- University Studies or elective courses ................................. 4-7

#### Spring Semester (15-18 credits)
- BIOL 3300 General Microbiology .......................................... 4
- HEP 2000 First Aid and Emergency Care ............................... 2
- HEP 2500 Health and Wellness ............................................. 2
- PUBH 3120 Family and Community Health ............................ 3
- University Studies or elective courses ................................. 4-7

Biology majors must take one course from the biology electives (listed below), and two courses from the mathematics and statistics electives (listed below). Mathematics and Statistics majors must take two courses from the biology electives, and one course from the mathematics and statistics electives. All other majors must take two courses from each set of electives.

Biology Electives:
BIOL 3060 (QI) Principles of Genetics (F,Sp,Su) .......................... 4
BIOL 3220 (QI) Field Ecology (F) .................................................. 2
BIOL 4400 (QI) Plant Physiology (F) .............................................. 4
BIOL 5020 (QI) Modeling Biological Systems (F) ........................ 3
BIOL 5300 (QI) Microbial Physiology (Sp) .................................... 4
BIOL 5380 Evolutionary Genetics (F) ............................................. 4
BIOL 5510 Animal Physiology Laboratory (F,Sp) ......................... 2
BIOL 5800 Undergraduate Research (F,Sp,Su) (3 credits min.) .......... 3
BMET 5500 Land-Atmosphere Interactions (Sp) .............................. 3
PUBH 5330 (QI) Industrial Hygiene Chemical Hazard Control (F) ... 3

Mathematics and Statistics Electives
MATH 4630 Computer Aided Math for Scientists and Engineers (Sp) .. 3
MATH 5410 Methods of Applied Mathematics (F) ........................... 3
MATH 5420 Partial Differential Equations (Sp) ............................... 3
MATH 5460 Introduction to the Theory and Application of Nonlinear Dynamical Systems (Sp) .................................................... 3
MATH 5610 Computational Linear Algebra and Solution of Systems of Equations (F) ......................................................... 3
MATH 5620 Numerical Solution of Differential Equations (Sp) .......... 3
MATH 5710 Introduction to Probability (F,Sp) ................................. 3
MATH 5910 Directed Reading and Conference (F,Sp,Su) (3 credits min.) ................................................................. 3
STAT 5100 CI/QI Linear Regression and Time Series (F) ................. 3
STAT 5110 Theory of Linear Models (F) ........................................ 3
STAT 5120 Categorical Data Analysis (F) ...................................... 3
STAT 5200 Design of Experiments (Sp) .......................................... 3
STAT 5300 (QI) Statistical Process Control (Sp) ............................ 3
STAT 5600 (QI) Applied Multivariate Statistics (Sp) ....................... 3
STAT 5940 Directed Reading and Conference (F,Sp,Su) (3 credits min.) ................................................................. 3

BIO 5800, MATH 5910, and STAT 5940 must involve mathematical or statistical analysis of a biological problem.

Public Health Minor
The Public Health minor requires completion of the following:
BIOL 1610 Biology I (F) ................................................................. 4
BIOL 1620 (BLS) Biology II (Sp) ................................................... 4
Upper-division (3000-level and above) Public Health elective courses ................................................. 12

Field Trips and Laboratory Fees
Many biology courses require field trips. Those enrolled are expected to dress appropriately for the conditions and observe any safety precautions issued by instructors. Many courses require modest laboratory fees.

Financial Support
Scholarships, assistantships, grants-in-aid, and work-study programs are available from the University. Both the College of Science and the Department of Biology offer scholarships. Applications for departmental and college scholarships should be submitted during early spring semester. Contact the College of Science Office (ESLC 245) and the Biology Advising Center (BNR 101) for details.

Utah State University 2006-2007 General Catalog 187
Department of Biology

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school.

An Honors Plan is available for students desiring a BS or BA degree “with Honors” in Biology. Departmental Honors requires the completion of 9 credits of Honors coursework in upper-division BIOL courses, BIOL 5800H, and a research-based Bachelor’s Thesis. For details, students should contact: Kimberly A. Sullivan, (435) 797-3713, yejunco@biology.usu.edu.

Additional Information

For more information about requirements for the majors and minors within the Biology Department, see major requirement sheets, available from the Biology Department, or online at: http://www.usu.edu/ats/majorsheets/

Graduate Programs

Admission Requirements

See general admission requirements on pages 99-100. Complete details about graduate programs, admission requirements, and application procedures are available online at: http://www.biology.usu.edu/graduate/graduate.htm. To be recommended for matriculated status, an applicant must have earned a bachelor’s degree (or equivalent) from an accredited institution, and a Biology faculty member must agree to serve as major professor for that applicant. The Department of Biology also considers these guidelines for admission: (1) the transcript should show a minimum GPA of 3.0 (B); and (2) the scores on the verbal and quantitative GRE should be above the 50th percentile and the analytical writing score should be 3.5 or above. Advanced GREs (especially biology) are also recommended. Applicants for whom English is not the primary language must have scored at least 575 on the TOEFL. The applicant’s undergraduate program should be similar to that offered by the Department of Biology at Utah State University, which includes the following and their prerequisites: general biology, microbiology, genetics, ecology, physiology, cell biology, developmental biology, and evolution; general and organic chemistry; calculus; statistics; and physics. Other preparatory courses may be specified by the student’s supervisory committee.

Degree Programs

For those who have demonstrated strong academic capability as well as research interest, the Department of Biology offers the Master of Science Degree and the Doctor of Philosophy Degree in either Biology or Ecology. Graduate degrees in Toxicology are available through the Interdepartmental Program in Toxicology.

Undergraduate majors in Biology at USU with especially strong backgrounds and interest in research may apply for study of the Master of Science degree as transitional students. Acceptance as a transitional student allows undergraduates with advanced standing to integrate up to 9 credits of graduate work into the final semesters of their Bachelor of Science study. Acceptance into this program, as into all graduate programs in Biology, is closely regulated. Formal application through the School of Graduate Studies is required.

Course Requirements

Biology MS and PhD Degrees

Course requirements are determined by the student’s supervisory committee. They will vary depending on the research emphasis selected and the background of the student.

Ecology MS and PhD Degrees

For specific requirements, see the description of the Ecology Interdepartmental Program (pages 238-239).

Research

The Department of Biology provides a dynamic and broad base for research and graduate study through a balanced program of basic and applied studies at ecosystem, population, organismal, cellular, and molecular levels. An outstanding variety of field sites; animal, plant, and microbe growth facilities; and modern well-equipped laboratories are available. Also, the Intermountain Herbarium, an excellent insect collection, the USDA/ARS U.S. National Pollinating Insects Collection, the Stable Isotope Laboratory, and the Center for Integrated Biosystems exist as research and support facilities.

Faculty members participate in and are supported by several interdepartmental programs, including the Ecology Center and the Center for Environmental Toxicology. In addition, many less formal contacts and interactions exist with colleagues in the colleges of Agriculture, Natural Resources, and Science.

Students are encouraged to carefully consider how their career goals match the faculty’s research interests. Prospective students are strongly encouraged to contact faculty members with whom they are interested in working. Because of the combination of a diverse interdisciplinary base and excellent focused research programs, students have an opportunity to learn the philosophies and methods of many branches of biology. For further details about the faculty’s research interests, students are encouraged to visit the Biology website: http://www.biology.usu.edu/

Financial Assistance

Research assistantships are available from the grants of major professors and from Utah Agricultural Experiment Station funds. Teaching assistantships are awarded annually. All awards are made on a competitive basis and specific teaching needs are considered in awarding teaching assistantships. Given satisfactory performance, MS students are supported for at least two years and PhD candidates for at least four years on teaching assistantships. The department may also recommend particularly qualified students for College of Science or University fellowships. Admission to the graduate program of the Department of Biology does not guarantee financial support; however, applicants will not normally be admitted without financial support.
Completion of graduate degrees in Biology prepares students for careers in teaching and research in universities and colleges. Many graduates also find employment with private industry and state and national governmental agencies. Specific employment possibilities will depend on the nature of the graduate program pursued. The extensive background provided by a graduate degree also prepares students for eventual administrative responsibilities.

Research Emphases

Research areas of departmental faculty are diverse. Areas of research currently include: Cellular and Molecular Biology; plant-microbial interactions; neurobiology and biophysics; gene regulation and signal transduction; membrane transport; molecular virology; Ecology and Behavior: community and ecosystem ecology; insect ecology and behavior; pollination biology; plant-insect interactions; vertebrate behavioral ecology; mathematical and computer modeling; soil microbiology; fungal ecology; biological control; integrated pest management (IPM); Physiology and Comparative Biology: animal physiology; toxicology and industrial hygiene; insect pathology; plant physiology and pathology; and Systematics and Evolution: systematics and evolution of plants, fungi, insects, mammals, reptiles, and amphibians; evolutionary quantitative genetics; biogeography; evolution of chemical defenses and resistance in microorganisms, insects, reptiles, and amphibians.

Research and Teaching Facilities

Herbarium

Graduate study in plant taxonomy offered in the Department of Biology utilizes the extensive facilities of the Intermountain Herbarium. The collection includes over 220,000 research specimens. About 50 percent are from the Intermountain Region, while most of the remainder are from other regions of North America.

Insect Collection

Comprising more than two million specimens, the insect collection is available to scientists and graduate students involved in taxonomic research and to those requiring identification of insects in various research projects. The collection primarily covers the Intermountain Region, but it also contains species from nearly all areas of the world. The BNR Building also houses the USDA/ARS U.S. National Pollinating Insect Collection.

Laser Scanning Confocal Microscope

The Department of Biology has a BioRad 1024 Laser Scanning Confocal Microscope. This state-of-the-art technology utilizes highly tuned lasers to give detailed sectional views of the interior of intact structures such as cells and tissues, and greatly extends the advantages of fluorescence microscopy. This microscope is utilized by researchers campuswide, and is an indispensable tool for molecular and cellular studies.

Center for Integrated BioSystems (CIB)

The CIB operates three service laboratories and a variety of research projects. The service laboratories provide essential biological resources for biotechnology research and development including: DNA sequencing, peptide synthesis, protein sequencing, antibodies, and fermentation.
Department of Biology

Research Professor
Donald W. Roberts, insect pathology

Research Associate Professor
Vijendra K. Singh, immunology

Research Assistant Professors
Thomas N. Buckley, plant physiology
Michelle A. Grilley, molecular biology
Dane R. Hansen, molecular biology, physiology, cell signaling
Joanne E. Hughes, molecular genetics
Charles D. Miller, plant pathology
Mark P. Miller, genetics
Ethan White, ecology

Adjunct Professors
James H. Cane, bee biology
Noelle E. Cockett, biotechnology
Robert Fogel, mycology
J. Russell Mason, predation, ecology, and behavior
Rex S. Spendlove, virology
Bart C. Weimer, food microbiology

Adjunct Associate Professors
Dale L. Barnard, chemotherapy of viruses
Vincent J. Tepedino, entomology

Adjunct Assistant Professors
Terry Griswold, bee biology
Rosalind R. James, entomology
Theresa L. Pitts-Singer, entomology

Principal Lecturer
David M. “Andy” Anderson, medical technology

Senior Lecturer
David O. Wallace, public health, industrial hygiene

Lecturers
John A. Flores II, public health, industrial hygiene
Alice M. Lindahl, invertebrate biology

WWW: http://www.usu.edu/cob/admin

Undergraduate Advisor:  
Isobel Roskelley, Business 309, (435) 797-2272,  
isobel.roskelley@usu.edu

Degrees offered: Bachelor of Science (BS) and Bachelor of Arts (BA) in Business Administration, Finance, Marketing, and Operations Management. The Department of Business Administration participates in the College of Business MBA (Master of Business Administration) degree (see pages 197-198). The Business Administration Department is awaiting Utah State Board of Regents' approval for BS and BA degrees in International Business.

Undergraduate Programs

Objectives

The Department of Business Administration offers programs to prepare students for administrative positions in business, government, and other institutions. Specialized training is provided within specific functional fields of business, as well as training directed at understanding the broader aspect of business as it functions within our economy. Training is specifically provided in four areas: (1) Finance, leading to careers in banking, brokerage activities and investment, and positions as financial analysts in industry; (2) Marketing, involving positions in sales, advertising, retailing, distribution, and other similar activities; (3) Operations Management, leading to careers related to supply chain management, operations planning and scheduling, project management, quality management, and consulting; and (4) Business Administration, providing broad cross-disciplinary experience in the core business areas of operations, finance, and marketing.

Departmental Honors

See Honors in Business description in the College of Business section of this catalog (page 112).

Learning Objectives and Assessment

Assessment information for the Business Administration Department can be found online at:  
http://www.usu.edu/cob/admin/dept/assess.htm

College of Business Admission Requirements

All students desiring to major in the Business Administration Department must satisfy the College of Business admission requirements, provided on pages 112-113. Academic advising about these requirements is available in the College of Business Career and Education Opportunities Center, Business 309. All students enrolled at USU are required to satisfy the General Education requirements and the University Studies Depth Education requirements of the University, as described on pages 49-57 of this catalog.

Matriculation Requirement and Transfer Limitation

No more than 15 USU College of Business credits (ACCT, BA, BIS, BUS, MHR), numbered 2000 and above, earned as a nonbusiness major (before acceptance into the College of Business) can be applied to a College of Business degree. More than 15 business credits can be transferred from other accredited institutions. However, additional USU College of Business credits added to previously earned transfer business credits may not exceed a combined total of 15. Furthermore, to earn a bachelor’s degree in a College of Business major, at least 50 percent of the required College of Business credits must be earned from coursework taken from the Utah State University College of Business.

USU Credits and Business Credits

At least 30 of the last 60 semester credits must be taken from Utah State University, 10 of which must be included within the last 40 credits presented for the degree. At least 50 percent of the College of Business credits required for a College of Business degree must be taken from the Utah State University College of Business or its departments, which include: School of Accountancy, Business Administration, Business Information Systems, Economics, and Management and Human Resources.

Business Core

All majors in the Department of Business Administration must complete the following prerequisite courses and business core courses in addition to the specific courses listed for the major.

Prerequisite Courses (13 credits)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1500</td>

All 3000-, 4000-, and 5000-level courses in the College of Business are restricted to students admitted to the College of Business or another USU major with an overall GPA of at least 2.67 and completion of at least 40 credits.
Majors

The Department of Business Administration offers four majors. An overall GPA of at least 2.50 is required to graduate. Course requirements for each major are listed on the following pages.

Finance Major Requirements (21 credits)
Finance is concerned with how individuals and firms allocate resources over time. Solutions to allocation problems rely upon the existence of capital markets that allow the exchange of resources over time, and firms that allow individuals to transform current resources into resources available in the future. In particular, finance deals with the financial management of firms, investment management, and the management of financial institutions. Before continuing with the following courses, students must receive a grade of B- or better in BA 3400.

Required Courses (12 credits)

</tr>
</tbody>
</table>

Electives (9 credits)
Three electives are required, two of which must be selected from the following list:

- BA 4300 International Finance (F,Sp) 3 credits
- BA 4410 Financial Institutions (F,Sp) 3 credits
- BA 4420 Insurance (F) 3 credits
- BA 4430 Real Estate Finance (Sp) 3 credits

The remaining elective may be chosen from the following, or from the list above:

- ACCT 3310 Strategic Cost Management (F,Sp,Su) 3 credits
- ACCT 3410 Income Taxation I (F,Sp,Su) 3 credits
- BA 3080 (QI) Operations Research (F) 3 credits
- ECON 4030 (CI) Agribusiness Finance (F) 3 credits
- ECON 5030 Agricultural Marketing and Price Analysis (F) 3 credits
- ECON 5330 (QI) Applied Econometrics (Sp) 3 credits
- ECON 5600 Financial Economics (Sp) 3 credits
- PFP 5060 Personal Financial Planning and Advising (F) 3 credits
- PPF 5070 Retirement Planning (Sp) 3 credits
- PFP 5080 Estate Planning (Sp) 3 credits

For a suggested four-year plan, see page 194.

Marketing Major Requirements (21-22 credits)
Modern marketing consists of a system of activities designed to help the marketer understand and influence buyer and seller behavior. Within the socio-economic and political environment, the marketer must plan, price, promote, and distribute want-satisfying goods and services to society. As prerequisites to BA 4590, students must complete the following courses: BA 3500, 4540, and 4550. Before continuing with the following courses, students must receive a grade of B- or better in BA 3500.

</table>

Elective Courses (6-7 credits)

Select one of the following marketing tracks:

- Track 1: Analysis of Culture (Choose 2 courses)
  - LING 4100 The Study of Language (F,Sp) 3 credits
  - LING 4900 Analysis of Cross-Cultural Difference (Sp) 3 credits

- Track 2: Recreation/Tourism (Choose 2 courses)
  - ENVS 3000 Natural Resources Policy and Economics (F) 4 credits
  - ENVS 3300 Fundamentals of Recreation Resources Management (F) 3 credits

- Track 3: Research (Choose 2 courses)
  - ECON 4010 Managerial Economics (F,Sp) 3 credits
  - ECON 4310 (Q) Mathematical Methods for Economics (F) 3 credits

For a suggested four-year plan, see page 194-195.

Operations Management Major Requirements (21 credits)
Operations management involves planning, directing, controlling, and improving the activities related to providing goods and services. The operations manager is responsible for assuring that customer expectations are met, and even exceeded, with regard to quality, delivery, and price. To execute their responsibilities, operations managers must understand how to convert customer demand into specific material, equipment, and labor resources. In addition, they must work with and develop good suppliers, customer relationships, and internal work activities. Before continuing with the following courses, students must receive a grade of B- or better in BA 3700.

Required Courses (18 credits)

</tbody>
</table>

Elective Course (3 credits)
Select one of the following two courses:

- ACCT 3310 Strategic Cost Management (F,Sp,Su) 3 credits
- MHR 4630 Human Resource Management (F,Sp) 3 credits

For a suggested four-year plan, see page 195.

Business Administration Major Requirements
The Business Administration major is a general degree that recognizes that most business students will have multiple business responsibilities throughout their career. This degree provides broad cross-discipline experience in the core business areas of operations, finance, and
marketing. Before continuing with the following courses, students must receive a grade of B- or better in BA 3400, 3500, and 3700.

Required Courses (18 credits)
BA 4410 Financial Institutions (F,Sp) .................................................... 3
BA 4450 Financial Policy (F,Sp) ............................................................ 3
BA 4530 Marketing Research (F,Sp) ...................................................... 3
BA 4590 Global Marketing Strategy (F,Sp) ............................................ 3
BA 4790 Supply Chain Management (Sp) ............................................. 3
BA 5730 Process Analysis and Improvement (F) ...................................... 3

Capstone Course
MHR 4880 (CI) Business Strategy in an Entrepreneurial Context (F,Sp) (3 cr) or
Another approved course (3 cr) ............................................................. 3

Students choosing the MHR 4880 option must complete MHR 4890 to satisfy the business core requirement.

A grade point average of at least 2.50 over the minor courses is required.

For a suggested four-year plan, see pages 195-196.

Business Major
A general business major is administered by the College of Business (see pages 111-115). For further information, contact the College of Business Career and Education Opportunities Center, Business 309, (435) 797-2272.

Minor Requirements
The Department of Business Administration offers three minors: a marketing minor, a finance minor, and an operations management minor.

A student from outside the College of Business who desires to pursue any of these minors must recognize that there are several prerequisites to the required courses. Specifically, most of the courses require college algebra; some require accounting, economics, or statistics.

Marketing Minor (16 credits)
Required Courses (10 credits)
BA 3500 Fundamentals of Marketing (F,Sp,Su) ...................................... 3
MHR 3110 (DSS) Managing Organizations and People (F,Sp,Su) ............ 3
STAT 2300 (QL) Business Statistics (F,Sp,Su) ...................................... 4

Electives (6 credits)
Select two of the following courses:
BA 4510 Buyer Behavior (F,Sp) ............................................................. 3
BA 4530 Marketing Research (F,Sp) ...................................................... 3
BA 4540 Marketing Institutions (F,Sp) ................................................... 3
BA 4550 Promotion Management (F,Sp) ................................................ 3

Finance Minor (15 credits)
Required Courses (12 credits)
BA 3400 (QI) Corporate Finance (F,Sp,Su) ........................................... 3
BA 3500 Fundamentals of Marketing (F,Sp,Su) ...................................... 3
BA 4450 Financial Policy (F,Sp) ............................................................ 3
BA 4460 Investments (F,Sp) ................................................................. 3

Elective Course (3 credits)
Select one of the following courses:
BA 4300 International Finance (F,Sp) .................................................. 3
BA 4410 Financial Institutions (F,Sp) .................................................... 3
BA 4420 Insurance (F) ............................................................................. 3
BA 4430 Real Estate Finance (Sp) ......................................................... 3

Operations Management Minor (15 credits)
Required Courses (9 credits)
BA 3500 Fundamentals of Marketing (F,Sp,Su) ...................................... 3
BA 3700 Operations Management (F,Sp,Su) ........................................... 3
BA 4720 Production Planning and Control (F) ........................................ 3

Electives (6 credits)
Select two of the following courses:
BA 3080 (QI) Operations Research (F,Sp) ............................................ 3
BA 4750 Production Simulation (Sp) ..................................................... 3
BA 4790 Supply Chain Management (Sp) ............................................. 3
BA 5730 Process Analysis and Improvement (F) ...................................... 3

A student may request a deviation from the preceding requirements by submitting a written justification for the changes to the department head for approval. If approved, it becomes the minor for that student only.

Business Minor (General)
A general Business Minor is administered by the College of Business. For further information, students should contact the College of Business Career and Education Opportunities Center, Business 309, (435) 797-2272.

Other Degree Options
Dual Majors
Dual majors are available in accounting, human resources, management, business information systems, and economics. See the applicable department for information.

Second Bachelor’s Degrees
Second bachelor’s degrees are available for all four majors. For information, contact the College of Business Career and Education Opportunities Center, Business 309.

Additional Information
Advising sheets for majors, minors, second bachelor’s degrees, and the Business Administration major are available from the Department of Business Administration, Business 815, and from the College of Business Career and Education Opportunities Center, Business 309. These sheets can also be found online at: http://www.usu.edu/cobssc/web/requirementsheets.htm

A major requirement sheet, which includes further information about career opportunities and course requirements for the majors and minors within the Business Administration Department, can be obtained from the department, or accessed online at: http://www.usu.edu/ats/majorsheets/

Four-Year Degree Plans (8 Semesters)
The following are suggested four-year plans for majors offered by the Department of Business Administration. These plans may also be found at: http://www.usu.edu/cobssc/web/fouryeardegreeplans.htm
Department of Business Administration

Suggested Four-year Course of Study for Finance Major
Students enrolled in the finance major should consult with their advisor to determine which breadth, depth, and elective courses they should complete. Each student should also consult with his or her advisor to develop an individualized plan of study that is applicable to his or her own interests.

1At least two of the six required breadth courses must have a USU prefix.

Graduate Programs
For information about the Interdepartmental Curriculum for the Master of Business Administration (MBA), see pages 197-198. Master’s degrees are also offered by the following departments in the College of Business: Accountancy, Business Information Systems, and Economics. For further information, refer to the appropriate sections of this catalog.

Business Administration Faculty
Professors Emeritus
Allen D. Kartchner, production and operations research
Eugene C. Kartchner, production and operations research
Paul A. Randle, corporate finance and valuation analysis

Professors
Kenneth R. Barkus, promotion management
Drew Dahl, financial institutions and international finance
Peter M. Ellis, production and operations research
Cathy L. Hartman, consumer behavior and environmental sustainability
Vijay R. Kannan, supply chain and quality management, cellular manufacturing
J. Robert Mallo, corporate and energy utility finance
C. R. Michael Parent, marketing research and strategy
Philip R. Swensen, corporate finance, investments, and managerial economics

Associate Professors
J. Brian Atwater, “theory of constraints,” quality management, lean manufacturing
Edwin R. Stafford, marketing management, strategy, environmental sustainability
Alan A. Stephens, corporate finance and investments

Assistant Professors
Stacey B. Hills, marketing research, strategy, and product management
Haiyan Hu, retailing and consumer behavior, international retailing, visual merchandising and promotion
Seung-Woog Kwag, investments and corporate finance

Senior Lecturer/Executive in Residence
Randall L. Cook, operations management and finance

Lecturer
Janet P. Lyons, operations and marketing

Adjunct Lecturers
Shaun D. Barker, marketing
Scott F. Boyle, marketing
Steven R. Broadbent, finance
Kent B. Haueter, finance
Strat D. Roper, operations
Karl B. Ward, finance

Course Descriptions
Business Administration (BA), pages 569-571.
Master of Business Administration (MBA)

Director of Business Graduate Programs: Mary Jo Blahna
Location: Business 809
Phone: (435) 797-2360
FAX: (435) 797-2634
E-mail: maryjo.blahna@usu.edu
WWW: http://mba.usu.edu/

Degree Offered: Master of Business Administration (MBA)

Graduate Program

Objectives

The MBA program is an interdepartmental program administered by the College of Business. The MBA program is designed to provide students with an understanding of analytical tools necessary for effective and efficient management in today's complex business world. The curriculum prepares students with a working knowledge of the fundamental business functions and a sensitivity to the legal, ethical, social, technological, and international forces in the business environment. The MBA program's focus is the development of the analytical, communication, interpersonal, and leadership skills needed for a successful career in a variety of organizations. The MBA program is accredited by AACSB International—The Association to Advance Collegiate Schools of Business.

Admission Requirements

For consideration for admission to the MBA program, applicants must submit an application form and fee, all undergraduate transcripts, Graduate Management Admissions Test (GMAT) or Graduate Record Examination (GRE) scores, and three letters of recommendation from qualified professionals. TOEFL scores are required for candidates from abroad, with a minimum of 213 computerized or 550 paper/pencil deemed acceptable. International students with a prior degree from an English-speaking university are exempt from the TOEFL exam.

Students are expected to be admitted to the program as matriculated students before taking coursework leading to the degree.

Application Deadline for Fall Semester

No application will be considered until all required information arrives in the School of Graduate Studies at Utah State University. In addition, the student desiring to pursue the MBA degree must have been accepted as a matriculated student before he or she will be permitted to register for 6000-level courses that will be part of the student's advanced program. Full-time business experience is also preferred, but not required. Students who wish to be considered for financial aid must submit applications by February 15 for the coming academic year.

Students with or without an undergraduate degree in business may enter the MBA program. However, before taking advanced courses, basic competencies in business that have not been acquired through prior courses or experience must be met. Applicants not meeting minimum requirements may be allowed to correct deficiencies concurrently with graduate coursework. Before entering the program, each student must meet with an advisor to plan his or her course of study.

Degree Requirements

Students are held responsible for meeting requirements as outlined below. It is the student's responsibility to be aware of all requirements and initiate the resolution of apparent inconsistencies.

Business Core

The MBA Business Core curriculum provides skills and knowledge in statistics, written communication, computer literacy, mathematics, information systems, economics, accounting, finance, marketing, operations, management, and organizational behavior. Students who have completed a bachelor's degree must have coursework which includes learning experiences in management-specific areas recommended by AACSB—International for direct entry into the advanced program.

Accelerated Business Core

Students who have not completed a bachelor's degree accredited by AACSB International may choose to gain the necessary basic business competencies by attending the Accelerated Business Core (ABC). The ABC is a uniquely efficient and effective way of delivering the basic program curriculum in a compressed format during the summer semester. The ABC enables students from nonbusiness backgrounds to prepare quickly for the Advanced Program Courses. The classes offered include: ACCT 6010 (Financial and Managerial Accounting), BA 6410 (Corporate Finance Essentials), BA 6510 (Marketing Techniques), BA 6710 (Essentials of Operations Management), ECON 6050 (Fundamentals of Economics), MHR 6050 (Management Principles), and MHR 6070 (Fundamentals of Business Law). The ABC does not include MATH 1100 (Calculus) and STAT 2300 (Business Statistics); therefore, students who have not completed equivalent courses at the undergraduate level may be required to take these classes. Before enrolling for the ABC classes, students must be accepted into a College of Business graduate program.

Alternatively, students may acquire the necessary basic competencies by completing courses satisfying the following management-specific knowledge and skills requirement: ACCT 2010, 2020; BA 3400, 3500, 3700; ECON 1500, 2010; MHR 2050, 3110; MATH 1100; and STAT 2300. Students may not be required to take courses which duplicate prior academic or industrial training. Students must meet with the director of the MBA program to plan their course of study.

The advanced program courses, along with electives, consist of 33 credits. Students must complete the advanced program course requirements listed below. In addition, students may choose to select among several specializations, which are also described below. A specialization requires the student to complete additional courses beyond the 33 credits.

Advanced Program Courses (33 credits)

Students must complete the following six courses: ACCT 6350; BA 6420, 6520, 6720; and MHR 6500, 6890. Additionally, students must complete one course each in information systems (e.g., ACCT 6500), research methods (e.g., BUS 6860), quantitative analysis (e.g., ECON 6330), and business ethics (e.g., MHR 6770). These courses must be selected in consultation with the MBA program director. Also, students are required to attend a professional development program (BUS 6310) that begins in August before the start of classes and continues throughout the MBA program.
Specializations (12 credits)

Students may select a specialization in one of several areas listed below. Classes taken as part of the MBA advanced program courses cannot be used as part of a specialization. One course in each specialization will be designated as research intensive to meet the research methods requirement.

**Accounting**
To qualify for this specialization, students must complete at least 12 approved 6000-level accounting credits as part of their MBA program of study. Students must complete, or have previously completed, the equivalent of ACCT 3110, 3120, 3310, 3410, 4200, 4410, 4500, 4510, 6200, 6510, and 6610.

**Entrepreneurship**
This specialization consists of MHR 6410, 6430, 6470, and an approved elective.

**Human Resource Management**
This specialization requires students to complete MHR 6690 and to select any three of the following courses: MHR 6550, 6620, 6630, 6640, 6670, and 6760.

**Manufacturing Management**
This specialization includes BA 5730, 6740; and MHR 6350, 6370.

**Personal Financial Planning**
This specialization consists of PFP 6060, 6070, and 6080. Students must have either already completed, or complete as part of their graduate work, the following courses: BA 3460 or 4460, and ACCT 3410. This specialization satisfies requirements to sit for the national Certified Financial Planner (CFP) examination.

**Financial Assistance**
Graduate assistantships, scholarships, and fellowships are available to outstanding on-campus students. Graduate assistantships and scholarships generally range between $1,000 and $3,000 for nine months. Application for financial aid must be made by February 15. A recipient of a graduate assistantship is usually eligible for a waiver of the out-of-state portion of his or her tuition.

Master of Business Administration Faculty

**Professors**
- Kenneth R. Bartkus, promotion management
- Gaylen N. Chandler, human resources, management, and entrepreneurship
- Keith R. Cniddle, econometrics
- L. Dwight Israelsen, comparative systems and economic history
- Richard L. Jenson, information systems and managerial accounting
- Vijay R. Kannan, supply chain and quality management, cellular manufacturing
- J. Robert Malko, corporate and energy utility finance
- Glenn M. McEvoy, organizational behavior, human resources, and management
- C. R. Michael Parent, marketing research and strategy
- Clifford R. Skousen, international and managerial accounting
- David B. Stephens, business strategy and labor relations
- Philip R. Swensen, finance

**Associate Professors**
- J. Brian Atwater, “theory of constraints,” quality manufacturing, lean manufacturing
- Ronda R. Callister, organization behavior, management
- David H. Olsen, database manager
- Alan A. Stephens, corporate finance and investments

**Adjunct Associate Professor**
- Steven H. Hanks, business strategy, entrepreneurship

**Assistant Professors**
- Alison Cook, organizational behavior, human resource management
- Dawn DeTienne, entrepreneurship
- Konrad S. Lee, business ethics

**Executive-in-Residence/Principal Lecturer**
- Alan P. Warnick, human resources

MBA Courses

Descriptions of MBA courses can be found in the **Course Descriptions** section of this catalog.
Department of Business Information Systems

Department Head: Karen A. Forcht
Location: Business 711
Phone: (435) 797-2342
FAX: (435) 797-2351
E-mail: karen.forcht@usu.edu
WWW: http://www.usu.edu/cob/bis/

Undergraduate Advisor:
Peggy Butters, Business 309, (435) 797-2272, peggy.butters@usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), and Master of Science (MS) in Business Information Systems; participates in the Interdepartmental Doctor of Philosophy (PhD) in Education and Doctor of Education (EdD) with a specialization in Business Information Systems

Undergraduate emphases: Business Information Systems BS, BA—Technical, Managerial, and Training and Development

Undergraduate Programs

Objectives

The Business Information Systems major is designed to prepare individuals for positions as managers in business information systems, including information managers, information supervisors, network managers, worldwide web designers, electronic commerce developers, systems analysts, applications programmers, and systems trainers. The training and development emphasis prepares students to become trainers within business and private industry.

Departmental Honors

See Honors in Business description in the College of Business section of this catalog (page 112).

Learning Objectives and Assessment

Assessment information for the Business Information Systems Department can be found online at: http://www.usu.edu/cob/bis/about/assessment.htm

Requirements

College of Business Requirements

All bachelor's degree students majoring in Business Information Systems must satisfy the College of Business entrance requirements provided on pages 112-113. Academic advising about these requirements is provided by the College of Business Career and Education Opportunities Center, Business 309. Business Information Systems majors must also follow College of Business prebusiness course requirements for admission to a major, detailed on page 113.

Matriculation Requirement and Transfer Limitation

No more than 15 USU College of Business credits (ACCT, BA, BIS, BUS, MHR), numbered 2000 and above, earned as a nonbusiness major (before acceptance into the College of Business) can be applied to a College of Business degree. More than 15 business credits can be transferred from other accredited institutions. However, additional USU College of Business credits added to previously earned transfer business credits may not exceed a combined total of 15. Furthermore, to earn a bachelor’s degree in a College of Business major, at least 50 percent of the required College of Business credits must be earned from coursework taken from the Utah State University College of Business.

USU Credits and Business Credits

At least 30 of the last 60 semester credits must be taken from Utah State University, 10 of which must be included within the last 40 credits presented for the degree. At least 50 percent of the College of Business credits required for a College of Business degree must be taken from the Utah State University College of Business or its departments, which include: School of Accountancy, Business Administration, Business Information Systems, Economics, and Management and Human Resources.

Information Systems Programs

Programs in Information Systems are offered in both the departments of Business Information Systems and Computer Science. The curricula and objectives of the programs differ substantially. Each department's program is described below.

The Business Information Systems major with technical or managerial emphasis, is offered in the Business Information Systems Department, College of Business. The Bachelor of Science or Bachelor of Arts program is designed for students interested in business careers as information specialists, systems analysts, network managers, applications programmers, and information systems managers in business and industry. BIS majors take required courses in analysis and design, Internet management, telecommunications, decision support systems, spreadsheet and database applications, and information systems projects. All graduates are required to complete a common core of business subjects. The College of Business is accredited by AACSB International—The Association to Advance Collegiate Schools of Business. The department also offers a Master of Science in Business Information Systems with an area of emphasis in Management Information Systems.

The Computer Science major with an Information Systems emphasis is located in the College of Science and is designed for students interested in a career as a Computer Scientist with a background in Information Sciences and Systems. Majors in this emphasis are trained in all phases of the analysis, design, and implementation of Information Systems. As part of this emphasis, students also receive training in the theory and application of information. Students select an application area such as Business, Accounting, or Economics. Other application areas can be developed by working closely with an advisor. This program of study leads to a Bachelor of Science, Bachelor of Arts, or Master of Science degree in Computer Science. See pages 229-231 and 233 for additional details.

Requirements for Bachelor's Degree in Business Information Systems

To earn a bachelor's degree in Business Information Systems, a student must complete the University requirements for a bachelor's degree and the following categories of coursework in the College of Business: Pre-Business, College of Business Core, BIS Department Core, and one of three areas of emphasis: Technical, Managerial, or Training and Development.
Department of Business Information Systems

Pre-Business Course Requirements (13 credits)
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Su) ......................................................... 3
MATH 1100 (QL) Calculus Techniques (F,Sp,Su) ........................................ 3
STAT 2300 (QL) Business Statistics (F,Sp,Su) .......................................... 4
PSY 1010 (BSS) General Psychology (F,Sp,Su) (3 cr) or
SOC 1010 (BSS) Introductory Sociology (F,Sp) (3 cr) ............................. 3

College of Business Core (37 credits)
ACCT 2010 Survey of Accounting I (F,Sp,Su) ........................................... 3
ACCT 2020 Survey of Accounting II (F,Sp,Su) ........................................ 3
BA 3400 (QI) Corporate Finance (F,Sp,Su) ............................................ 3
BA 3500 Fundamentals of Marketing (F,Sp,Su) ..................................... 3
BA 3700 Operations Management (F,Sp,Su) ........................................... 3
BIS 2100 Principles of Management Information Systems (F,Sp,Su) ... 3
BIS 2200 (CI) Business Communication (F,Sp,Su) ................................. 3
BUS 3250 Discussions With Business Leaders (F,Sp) ............................ 1
ECON 2100 (BSS) Introduction to Microeconomics (F,Sp) .................... 3
ECON 3400 International Economics for Business (F,Sp,Su) ................. 3
MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su) .......... 3
MHR 3110 Managing Organizations and People (F,Sp,Su) ................. 3
MHR 4880 (CI) Business Strategy in an Entrepreneurial Context (F,Sp) (3 cr) or
MHR 4890 (CI) Business Strategy in a Global Context (F,Sp,Su) (3 cr) .......... 3

BIS Department Core Requirements (10 credits)
BIS 3330 Database Management (F,Sp) .............................................. 3
BIS 3500 Fundamentals of Database Implementation (F,Sp) ................. 3
BIS 3710 Survey of Accounting II (F,Sp,Su) ........................................... 3
BIS 4330 Database Implementation (F,Sp,Su) ....................................... 3
BIS 4500 Designing Graphical User Interfaces for Electronic Commerce (F,Sp) ................................................................. 3
BIS 5500 Advanced Website Development (F,Sp) ................................ 3

Training and Development Emphasis (18 credits)
Required Courses (9 credits)
BIS 4330 Database Implementation (F,Sp) .............................................. 3
BIS 5450 Designing Graphical User Interfaces for Electronic Commerce (F,Sp) ................................................................. 3
BIS 5650 Advanced Website Development (F,Sp) ................................ 3

Elective Courses (9 credits)
Choose three courses from the following:
BIS 4300 Systems Design and Implementation (F,Sp) ......................... 3
BIS 4330 Database Implementation (F,Sp) .............................................. 3
BIS 4500 Designing Graphical User Interfaces for Electronic Commerce (F,Sp) ................................................................. 3
Any 5000-level INST course ............................................................... 3

Four-Year Degree Plans (8 Semesters)
Four-year degree plans for each of the Business Information Systems major emphases can be found on pages 201-203 and at:
http://www.usu.edu/cobssc/web/fouryeardegreeplans.htm

Business Information Systems Minor (21-22 credits)
A minimum 2.50 GPA is required in all courses counted toward the minor.

Required Courses (15 credits)
ACCT 2010 Survey of Accounting I (F,Sp,Su) ........................................... 3
BIS 2100 Principles of Management Information Systems (F,Sp,Su) .... 3
BIS 3330 Database Management (F,Sp) .............................................. 3
BIS 3500 Fundamentals of Database Implementation (F,Sp) ................. 3
BIS 3710 Survey of Accounting II (F,Sp,Su) ........................................... 3
CS 1400 Introduction to Computer Science—CS 1 (F,Sp,Su) (3 cr) or
CS 3410 (CI/DSC) Algorithm Development: JAVA/Internet (F,Sp) (3 cr) .......... 3

Elective Courses (6-7 credits)
Choose two of the following courses:
ACCT 4500 Accounting Information Systems (F,Sp) ................................. 3
BIS 4330 Database Implementation (F,Sp) .............................................. 3
BIS 5100 Systems Design and Implementation (F,Sp) (3 cr) and
BIS 5110 Systems Design Laboratory (F,Sp) (1 cr) ............................... 4
BIS 5300 Advanced Data Communications (F,Sp) ................................. 3
BIS 5450 Designing Graphical User Interfaces for Electronic Commerce (F,Sp) ................................................................. 3
BIS 5700 Internet Management and Electronic Commerce (F,Sp) .......... 3
CS 1400 Introduction to Computer Science—CS 1 (F,Sp,Su) (3 cr) or
CS 3410 (CI/DSC) Algorithm Development: JAVA/Internet (F,Sp) (3 cr) .......... 3

Managerial Emphasis (18 credits)
Required Courses (12 credits)
BIS 3500 Management Information Systems Development (F,Sp) ........ 3
BIS 3700 Internet Management and Electronic Commerce (F,Sp) ......... 3
BIS 5300 Advanced Data Communications (F,Sp) ................................. 3
BIS 5800 Security of Business Information Systems (F) ....................... 3

Elective Courses (6 credits)
Choose two courses from the following:
BIS 4100 Information Technology and System Software (F,Sp) ................ 3

Student Organizations
The Department of Business Information Systems sponsors or co-sponsors three student organizations. Each group provides unique experiences that can complement and enrich formal coursework.
Leadership development and human relations skills are among the personal attributes enhanced by involvement in the various organization activities.

**Association for Computing Machinery (ACM)**

ACM, a professional society for the information systems industry, sponsors a student chapter at USU. The goals of ACM are to: (1) provide leadership experiences for undergraduate and graduate business information systems majors; (2) help student members plan their careers and find employment by introducing them to practicing systems professionals; and (3) foster a professional attitude among business information systems majors so that they will contribute to their field.

**Delta Epsilon Chi (DEX)**

Delta Epsilon Chi (DEX) is a cocurricular organization designed for marketing education and marketing majors. The major goal of DEX is to help students prepare for careers in marketing or marketing education. DEX provides students with opportunities to compete in marketing events at the state and national levels. Membership is open to all students interested in business and marketing.

**Delta Pi Epsilon (DPE)**

Delta Pi Epsilon (DPE) is a national honorary fraternity for graduate students. Purposes of the organization include enhancement of research, scholarship, service, and cooperation in the profession. Election to membership requires review by members and faculty of the Department of Business Information Systems.

**Additional Information**

For more information about requirements for the majors and minors within the Business Information Systems Department, see the major requirement sheets, available from the department, or online at: http://www.usu.edu/ats/majorsheets/

**Four-year Degree Plans (8 semesters)**

The following are suggested four-year plans for each emphasis of the Business Information Systems major.

**Suggested Four-year Course of Study for Business Information Systems Major, Technical Emphasis**

Students enrolled in the business information systems major should consult with their advisor to determine which breadth, depth, and elective courses they should complete. Each student should also consult with his or her advisor to develop an individualized plan of study that is applicable to his or her own interests.

**Freshman Year (28 credits)**

- **Fall Semester (13 credits)**
  - OSS 1400 Microcomputer Applications ........................................... 3
  - MATH 1050 (QL) College Algebra .................................................... 4
  - ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles ................................................................. 3
  - PSY 1010 (BSB) General Psychology (3 cr) or
  - SOC 1010 (BSB) Introductory Sociology (3 cr) ............................. 3

- **Spring Semester (15 credits)**
  - ENGL 1010 (CL1) Introduction to Writing: Academic Prose ............. 3
  - ECON 2010 (BSB) Introduction to Microeconomics ............................ 3
  - MATH 1100 (QL) Calculus Techniques ............................................... 3
  - University Studies Breadth courses .................................................. 6

**Sophomore Year (32 credits)**

- **Fall Semester (16 credits)**
  - ACCT 2010 Survey of Accounting I .................................................. 3
  - BIS 2100 Principles of Management Information Systems ................ 3
  - STAT 2300 (QL) Business Statistics .................................................. 4
  - MHR 2050 Legal and Ethical Environment of Business ....................... 3
  - University Studies Breadth course .................................................... 3

- **Spring Semester (16 credits)**
  - ACCT 2020 Survey of Accounting II ................................................ 3
  - BIS 2200 (CI) Business Communication .......................................... 3
  - ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ............................................................. 3
  - ECON 3400 International Economics for Business ......................... 3
  - CS 1400 Introduction to Computer Science—CS 1 ................................ 3
  - CS 1405 Introduction to Computer Science—CS 1 Lab ....................... 1

**Junior Year (31 credits)**

- **Fall Semester (15 credits)**
  - BA 3400 (QI) Corporate Finance .................................................... 3
  - BA 3500 Fundamentals of Marketing .............................................. 3
  - CS 1410 (QI) Introduction to Computer Science—CS 2 ...................... 3
  - University Studies Breadth course .................................................... 3
  - Elective course(s) ............................................................................... 3

- **Spring Semester (16 credits)**
  - BUS 3250 Discussions With Business Leaders .................................. 1
  - BIS 3330 Database Management ...................................................... 3
  - BIS 4100 Information Technology Hardware and System Software .... 3
  - BA 3700 Operations Management .................................................... 3
  - BIS elective course ........................................................................... 3
  - University Studies Depth course ....................................................... 3

**Senior Year (29 credits)**

- **Fall Semester (15 credits)**
  - BIS 4330 Database Implementation .................................................. 3
  - BIS 5650 Advanced Website Development ....................................... 3
  - MHR 3110 Managing Organizations and People ................................ 3
  - BUS 4250 Advanced Internship ....................................................... 3
  - University Studies Depth course ....................................................... 3

- **Spring Semester (14 credits)**
  - BIS 5100 Systems Design and Implementation ................................ 3
  - BIS 5110 Systems Design Laboratory ............................................... 1
  - MHR 4880 (CI) Business Strategy in an Entrepreneurial Context (3 cr) or
  - MHR 4890 (CI) Business Strategy in a Global Context (3 cr) ............ 3
  - Elective courses ............................................................................... 7

Note: Students must pass MATH 1050 with a grade of C- or better. Students who do not take OSS 1400 must take an additional 3 credits of electives. Students should apply for College of Business admission during their third semester.

**Suggested Four-year Course of Study for Business Information Systems Major, Managerial Emphasis**

Students enrolled in the business information systems major should consult with their advisor to determine which breadth, depth, and elective courses they should complete. Each student should also consult with his or her advisor to develop an individualized plan of study that is applicable to his or her own interests.

during their third semester.

Graduate Programs

Master of Science

Students applying for admission to the Master of Science program in Business Information Systems must take the GMAT test. A score at
the 40th percentile or better on the GMAT is required for admission.
Undergraduate GPA should be 3.0 or above. Meeting minimum
requirements does not guarantee admission.

The MS requires a minimum of 33 credits. A minimum of 24 credits of
academic work must be in classes numbered 6000 and above. Twelve
or more credits should be in the area of specialization. Students with
bachelor’s degrees outside of business may be required to complete
additional coursework.

Students in the master’s program pursue the Plan A option, where a
research paper is completed in a special research class. Those who
wish to pursue the Plan B option must have permission from their
department to do so.

All MS degrees in the BIS Department require the following core: BIS
6150, 6440, 6810.

The specialization in Management Information Systems (MIS)
is for students who wish to work as systems analysts, application
programmers, network managers, information managers, information
center managers, and trainers in business information systems.

Students are expected to have a background in business information
systems. Required courses are BIS 6120, 6200, 6330, 6400 (or 6700),
in addition to the departmental core. Students who choose the Plan A
option must complete 6 credits of MIS 6970. Students may take credits
in Business Information Systems, Computer Science, Instructional
Technology, Business Administration, Accounting, Economics, or other
approved electives to complete the 9 credits of electives required.

The specializations in Business Education, Marketing Education,
and Training and Development are designed for those who are
Teaching in an area of business or who wish to work in training and
development in business and industry: Required courses for the
Business Education or Marketing Education specialization are BIS
6350, 6450, 6700, 6720, 6730, and 6770. Students must complete 15
credits of electives chosen from the following list (or select others with
committee approval): BIS 6350, 6400, 6600, 6720, 6730, 6770; BUS
6250.

Required courses for the Training and Development specialization are
BIS 6350, 6450; and BUS 6250. Students must complete 15 credits of
electives chosen from the following list (or select others with committee
approval): BIS 6120, 6330, 6410.

For a current checklist of requirements, students should contact their
departmental graduate advisor.

The USU MS in Business Information Systems is the only master’s
program in Business Information Systems in the state of Utah.
Graduates are placed in the West and throughout the nation.

Doctor of Philosophy and Doctor of Education

Applicants for admission to the College of Education and Human
Services PhD or EdD programs with a specialization in Business
Information Systems must take the GRE. Scores on the verbal and
quantitative test must be at or above the 40th percentile. No minimum
score is required on the analytical section (required by the Educational
Testing Service).

The Department of Business Information Systems cooperates
with other departments in offering the interdepartmental Doctor of
Philosophy (PhD) and Doctor of Education (EdD). Within the
Business Information Systems specialization, emphases can be
pursued in business education, marketing education, business
information systems, and business communications. Other subject-
matter emphases are also available. The PhD is a research-based
degree. The EdD degree is a practitioner’s degree. Both degrees
require dissertations. Graduates secure positions teaching business
subjects or business-teacher education in colleges and universities
or in business and industry. Former graduates are currently in
various positions in higher education, including higher education
administration; in teacher education instruction; and in business and
industry.

Additional Information

Specific details about each of the foregoing degree programs are
outlined in policy and procedure documents available through the
department. All requirements are subject to change; check with the
department for current requirements.

The business and marketing teacher education programs at the
graduate level are ranked highly and respected throughout the nation,
with faculty who are nationally and internationally recognized.

All students must meet admission requirements as specified by the
School of Graduate Studies (see pages 99-100).

Research

Faculty in the Department of Business Information Systems are
active in research and scholarly endeavors. Current and published
research topics include business communications; international
communications; improvement of instruction in teaching; business
information systems as related to business and industry; curriculum
for business schools; business reengineering; electronic commerce;
group decision support systems; microcomputer applications; use of
microcomputers in various subjects, including accounting and business
communications; cooperative education; issues in higher education;
and other areas related to business information systems, marketing
education, and business education.
Financial Assistance and Assistantships

Funds for scholarships are provided through the School of Graduate Studies and administered in the department. Those interested in scholarships should contact the graduate director or the department head.

Each year several high-quality graduate teaching assistants are needed. These assistants generally teach classes in keyboarding, word processing, business communications, and microcomputer applications. Those who are interested in teaching assistantships must apply through the department head. They must have had teaching experience or be willing to take teaching methods classes, as well as the School of Graduate Studies-sponsored teaching assistant workshop, prior to receiving an assistantship.

Career Opportunities

Business Information Systems is one of the fastest growing fields in business and industry. Follow-up studies show that information systems positions pay excellent salaries, and the placement rate of students is almost 100 percent. Currently, there is also a great demand for business teachers in public education.

Business Information Systems Faculty

Professors
Karen A. Forcht, business information systems, business communication, data management, computer security
Dennis J. LaBonty, business information systems, business education
David H. Olsen, business information systems
David J. Paper, business information systems
John F. Vinsonhaler, business information systems

Professors Emeritus
H. Robert Stocker
William A. Stull

Associate Professors
Jeffrey J. Johnson, business information systems
Robert J. Mills, business information systems

Assistant Professors
Karina Hauser, lean manufacturing, artificial intelligence
Yong Seog Kim, data mining
Zsolt Ugray, business information systems, electrical commerce and optimization

Principal Lecturers
Susan M. Jones, business information systems, business communications
Marianna Larsen, business information systems, business communications
Craig J. Peterson, business information systems
Dana H. Swensen, business information systems, business communications

Senior Lecturer and Executive in Residence
Ralph B. "Bernie" Lantz, computer technology, networks security, business information systems, computer literacy

Course Descriptions

Business Information Systems (BIS), pages 578-580.
Department of Chemistry and Biochemistry

Department Head: Steve Scheiner
Location: Maeser Laboratory 140
Phone: (435) 797-1619
FAX: (435) 797-3390
E-mail: chemist@cc.usu.edu
WWW: http://www.chem.usu.edu

Undergraduate Advisors:
Faculty advisors in the Department of Chemistry and Biochemistry are as follows:

Biochemistry:
Scott A. Ensign, Widtsoe 239, (435) 797-3969, ensigns@cc.usu.edu

Chemistry:
Stephen E. Bialkowski, Maeser Lab 359, (435) 797-1907, stephen.bialkowski@usu.edu
Rick C. Holz, Widtsoe 237, (435) 797-2609, rholz@cc.usu.edu
Steve Scheiner, Maeser Lab 140, (435) 797-7419, scheiner@cc.usu.edu
Vernon D. Parker, Widtsoe 345, (435) 797-1697, vparker@cc.usu.edu

For faculty advisor assignment, contact Department of Chemistry and Biochemistry at (435) 797-1619 or chemist@cc.usu.edu.

Degrees Offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), Doctor of Philosophy (PhD) in Chemistry; BS, MS, and PhD in Biochemistry; BS in Chemistry Teaching; BS in Composite Teaching—Physical Science (Chem)

Undergraduate emphases: BS in Chemistry—Professional Chemistry, Biochemistry, Environmental Chemistry, Chemical Education, Life Science

Undergraduate Programs

Objectives

Chemistry is a subject that addresses the properties of materials and the transformations that they undergo. Especially important are aspects of energy and structure related to chemical reactivity. Consequently, students of many disciplines take courses in chemistry to learn about the behavior of the substances they will use or reference. The Department of Chemistry and Biochemistry offers a wide variety of courses for those whose majors and/or anticipated careers require a knowledge of chemistry. These areas of study include nutrition, engineering, biology, agriculture, natural resources, medicine, law, and education, to name a few. Many students also choose chemistry as an elective course to better prepare themselves as citizens in a technological world.

The Bachelor of Science Degree in Chemistry entails considerable specialization in chemistry and related areas. The BS emphases require a common core of courses, but allow for a different concentration of advanced work according to the interests and career objectives of the student. The BS with Professional Chemistry Emphasis, BS with Environmental Chemistry Emphasis, and BS with Biochemistry Emphasis degrees meet the requirements for certification by the American Chemical Society (ACS). The certified degree emphases provide excellent preparation for immediate entry into the job market or for graduate school in chemistry, biochemistry, chemical engineering, molecular biology, nutrition, food science, materials science, and a wide variety of other fields. ACS certification in Chemical Education is available to students who complete an ACS-certified program, together with the Professional Education program in secondary education. The BS with Life Science Emphasis degree is popular for students wishing to go on to medical or dental graduate programs. The life science emphasis is particularly appropriate for premedical and predental students who want a strong base for understanding the nature of chemical reactions in the body and the behavior of the drugs they will prescribe, or who want an attractive alternative should they decide ultimately not to pursue medical or dental school.

The Chemistry Teaching Major or the Composite Teaching Major in Physical Science are available to those who want a career in secondary education. The BA degree is an excellent choice for students with an interest in studying law or business and who have an interest in science. The core of the program utilizes year-long sequences of classes. The first-year sequence introduces the basic principles of chemistry, as well as most of the major concepts of the science. The second year explores in greater depth the characteristics of carbon-based compounds that serve as the backbone for the chemistry of life; for most drugs and medicines; for petroleum; for most fibers, paints, and plastics; and for many other commercial products. The third year examines in greater depth the models, theories, and mathematical interpretation of the structures, rates of change, energetics, and other properties of chemicals. In addition, one-semester courses examining the chemistry of life processes, the behavior of inorganic substances, and the analysis of the composition of substances are required. Many of the sequences have associated laboratory courses where students get hands-on practice. Here they synthesize compounds, measure physical properties, analyze samples, and determine structural features of compounds, using modern techniques and instrumentation.

The Bachelor of Science Degree in Biochemistry encompasses the study of the properties and functions of biological macromolecules, the mechanisms of action of enzymes, gene and protein regulation and expression, bioenergetics, and the metabolic pathways and processes that use and generate chemical and light energy. At its core, biochemistry recognizes and explains the unifying chemical principles that lie at the heart of the diverse expressions of life.

The core courses for the major are built around two-semester course sequences in the areas of general, organic, and biological chemistry; general biology; calculus; and general physics, along with associated laboratory courses. Students may choose from two physics tracks: (1) the life sciences track (typically preferred by students with a more biological inclination) and (2) the science-engineering track (typically preferred by students with a more mathematical/physical inclination). One-semester courses in analytical and biophysical chemistry and statistics round out the core of the program. To complete the additional 18 credits of coursework required for the major, students may choose elective courses from within the disciplines of chemistry, biochemistry, and biology. A wide range of advanced courses are available to meet the advanced electives requirement; students are encouraged to meet with their academic advisor to select courses that provide the best preparation for their intended career path. Representative courses (not all encompassing) include those in biology (e.g., human physiology, genetics, ecology, microbiology, plant physiology, cell biology); biochemistry (e.g., enzymology, structured biology, bioenergetics and metabolism, protein structure/function); and chemistry (e.g., intermediate and advanced inorganic, advanced organic).
Department of Chemistry and Biochemistry

The biochemistry major differs from the "chemistry major with biochemistry emphasis," which is an American Chemical Society (ACS) certified degree that emphasizes specialization in biochemistry, but has a more chemical and mathematical emphasis than the biochemistry major. The biochemistry major is more biologically inclined (as well as somewhat less physically and mathematically inclined) than the chemistry major and is designed to meet the standards for the curriculum proposed by the American Society for Biochemistry and Molecular Biology (ASBMB).

The requirements of the BS and BA degrees in chemistry and the BS degree in biochemistry, along with University and University Studies requirements, are summarized here. The specific requirements for the teaching major and for the composite teaching major in physical science are also included.

Students are urged to study these requirements and to visit with their advisor on a regular basis about progress toward the completion of their degrees or for any questions regarding complementary courses and career goals.

Assessment

The Department of Chemistry and Biochemistry has implemented a multilayered assessment strategy that defines learning objectives at the following levels: individual courses, divisional levels, and at the overall program level for the chemistry major. Details of this strategy can be found at: http://www.chem.usu.edu/assessment/index.php

Learning objectives for the Chemistry Major are specifically outlined in an organized matrix at:

General Requirements

Admission Requirements

First-year students admitted to USU in good standing qualify for admission to this major. Transfer students from other institutions need a 2.2 transfer GPA, and students transferring from other USU programs need a 2.0 total GPA for admission to the chemistry or biochemistry major in good standing.

Students interested in studying chemistry or biochemistry should take high school mathematics courses that will enable them to start calculus during their first semester at USU. High school coursework in chemistry, biology, and physics is also desirable. AP credit in chemistry may be counted toward the chemistry or biochemistry degree. For details, contact the departmental advising faculty.

No CHEM prefix course may be applied toward graduation with any major or minor in chemistry or biochemistry with an earned grade of less than C-. No CHEM prefix course may be taken on a Pass/ Fail basis. No CHEM prefix course may be repeated more than one time to improve the grade to a C- or better. A student dropped from the chemistry or biochemistry program for failure to meet this standard may appeal to the departmental Curriculum Committee for readmission.

Chemistry Core Curriculum

In addition to the University Studies requirements for graduation, chemistry majors take a series of core courses spread across a traditional four-year period. The completion of the chemistry core also covers the College of Science requirements for graduation.

1 The completion of MATH 2250 or STAT 3000 is optional for the Teaching Major.

Chemistry Degree Emphases

Professional Chemistry Emphasis (ACS Certified)

In addition to the chemistry core, students must complete the following:
CHEM 5520 Advanced Inorganic Chemistry (F) ........................................2
CHEM 5530 Advanced Synthesis Laboratory (Sp) ....................................2
Advanced electives as approved by department ..................................6

Utah State University 2006-2007 General Catalog
Biochemistry Emphasis (ACS Certified)
In addition to the chemistry core, students must complete the following:
CHEM 5710 General Biochemistry Laboratory (Sp) ......... 2
CHEM 5720 General Biochemistry Laboratory (Sp) .......... 2
BIOL 1610 General Biology I (F) .................. 4
Advanced Biology electives, as approved by department .... 4

Environmental Chemistry Emphasis (ACS Certified)
In addition to the chemistry core, students must complete the following:
CHEM 5670 Intermediate Environmental Chemistry (Sp) ... 3
CHEM 5680 Environmental Chemistry Laboratory (Sp) .... 2
Introductory environmental electives as approved by department .... 6-7
Advanced environmental electives as approved by department .... 3

Chemical Education Emphasis (ACS Certified)
In addition to the chemistry core, students must complete the following:
Required courses for the Secondary Teacher Education Program (STEP) (see details on page 208) ................. 35
Teaching minor from outside the Department of Chemistry and Biochemistry ............................................. 12-16

BS Degree in Chemistry with Honors
This option can be met by completing any ACS certified program and by meeting the following requirements:
1. Minimum GPA of 3.50 in chemistry courses
2. Overall GPA of 3.30
3. Completion of 15 credits of honors work as follows:
   CHEM 4800H (CI) Research Problems (F, Sp, Su) ....... 3-6
   CHEM 4990H (CI) Undergraduate Seminar (F, Sp) .... 2
   Credits selected from Honors courses numbered 3000 or above in chemistry or related subjects, as appropriate. Three credits may be selected from chemistry courses numbered 6000 or above ... 3-6
In addition, select two courses from the following:
   CHEM 2320H Organic Chemistry II (Sp) ............... 3
   CHEM 3070H (QI) Physical Chemistry (Sp) .......... 3
   CHEM 5640H Instrumental Analysis (Sp) .............. 3
   CHEM 5700H General Biochemistry I (F) ............. 3

BS in Chemistry, Life Science Emphasis
In addition to the Chemistry Core Requirements (with the exception of CHEM 5640, 5650), students must complete the following:
BIOL 1610 Biology I (F) .................. 4
BIOL 1620 (BLS) Biology II (Sp) (4 cr) or
BIOL 2420 Human Physiology (F,Sp,Su) (4 cr) or
BIOL 3060 (QI) Principles of Genetics (F,Sp,Su) (4 cr) or
BIOL 3300 (BLS) General Microbiology (F,Sp) (4 cr) or
CHEM 5710 General Biochemistry II (Sp) ............. 3
CHEM 5720 General Biochemistry Laboratory (Sp) .... 2

BA in Chemistry
In addition to the chemistry core (with the exception of CHEM 5640, 5650), students must complete the following:
CHEM 5520 Advanced Inorganic Chemistry (F) (2 cr) or
CHEM 5640 Instrumental Analysis (Sp) (3 cr) .......... 2 or 3
Completion of one foreign language (16 cr) or
Completion of two foreign languages (20 cr) .......... 16 or 20

Chemistry Teaching Major
In addition to the Chemistry Core Requirements (with the exception of MATH 2250 or STAT 3000, and CHEM 5640 and 5650), students must complete the following:
SCI 4300 Science in Society (F,Sp) .................. 2
Required courses for the Secondary Teacher Education Program (STEP) (see details on page 208) ................. 35
Teaching minor from outside the Department of Chemistry and Biochemistry ............................................. 12-16

Composite Teaching Major in the Physical Sciences
This degree is available through the Chemistry and Biochemistry or Physics departments. Students with a Composite Teaching Major in Physical Sciences should plan their programs carefully in order to meet the upper-division requirement for graduation.
Specific for admission to this program, a student must have at least a 2.75 GPA in the following chemistry and physics courses:
CHEM 1210 Principles of Chemistry I (F,Sp) ............. 4
CHEM 1215 Chemical Principles Laboratory I (F,Sp) .... 1
CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) ... 4
CHEM 1225 Chemical Principles Laboratory II (F,Sp) ... 1
PHYS 2110 The Physics of Living Systems I (4 cr) and
PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) .... 8
OR
PHYS 2220 (QI) General Physics—Science and Engineering I (4 cr) and
PHYS 2220 (QI/BPS) General Physics—Science and Engineering II (4 cr) ................. 8
(PHYS 2210 and 2220 are preferred.)
This program does not include many aspects of the Chemistry Core.

Required Courses:
CHEM 1210 Principles of Chemistry I (F,Sp) ............. 4
CHEM 1215 Chemical Principles Laboratory I (F,Sp) .... 1
CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) ... 4
CHEM 1225 Chemical Principles Laboratory II (F,Sp) ... 1
CHEM 2300 Principles of Organic Chemistry (F) (3 cr) or
CHEM 2310 Organic Chemistry I (F) (4 cr) ............. 3 or 4
CHEM 2315 Organic Chemistry Laboratory I (F) .......... 1
PHYS 1040 (BPS) Introductory Astronomy ................. 3
PHYS 1080 (BPS) Intelligent Life in the Universe (3 cr) or
PHYS 3030 (DSC/QI) The Universe (3 cr) .............. 3
PHYS 2110 The Physics of Living Systems I (4 cr) and
PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) .... 8
OR
PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) and
PHYS 2220 (QI/BPS) General Physics—Science and Engineering II (4 cr) ................. 8
MATH 1210 (QL) Calculus I (F,Sp,Su) ............. 4
MATH 1220 (QL) Calculus II (F,Sp,Su) ............. 4
STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) .... 3
SCI 4300 Science in Society (F,Sp) .................. 2
BIOL 1010 (BLS) Biology and the Citizen (F,Sp,Su) .... 3
GEO 1110 (BPS) The Dynamic Earth: Physical Geology (F,Sp) ... 4
BMET 2000 (BPS) The Atmosphere and Weather (F,Sp) .... 3
Teacher licensure courses from Secondary Education (35 cr)
(sees details on page 208) .................. 35
A teaching minor is optional for the Composite Teaching Major in the Physical Sciences.

Utah State University 2006-2007 General Catalog 207
Secondary Teacher Education Program (STEP) (35 credits)

Prior to enrolling in these courses, students must be approved for admission to the STEP by the College of Education and Human Services. The teaching major advisor can assist with this process.

An overall 2.75 GPA in a minimum of 60 semester credits of approved University coursework is required for admission into the STEP. A minimum overall GPA of 2.75 is required for graduation. Specific for admission to any Chemistry Teaching program, a student must have at least a 2.75 GPA in CHEM 1210, 1215, 1220, and 1225.

Beginning in 2006, all USU teacher education candidates will be required to take and pass the content exam approved by the Utah State Office of Education in their major content area prior to student teaching.

Students who may wish to teach Integrated Science at the middle or junior high school level should talk to their advisor about completing the courses necessary for an Integrated Science endorsement.

Level 1 (11 credits)
INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su)................1
SCED 3100 Motivation and Classroom Management (F,Sp)..................3
SCED 3210 (CI/DSS) Educational and Multicultural Foundations (F,Sp)....3
SCED 3300 Clinical Experience I (40 hours minimum) (F,Sp).................1
SCED 3400* Teaching Science I (F,Sp).................................................3

Level 2 (12 credits)
SPED 4000 Education of Exceptional Individuals (may be taken anytime) (F,Sp,Su).................2
SCED 4200 (CI) Reading, Writing, and Technology (F,Sp).......................3
SCED 4210 Cognition and Evaluation of Student Learning (F,Sp)............3
SCED 4300 Clinical Experience II (40 hours minimum) (F,Sp).................1
SCED 4400* Teaching Science II (F,Sp).................................................3

Level 3 (12 credits)
SCED 5500 Student Teaching Seminar (2 weeks) (F,Sp).........................2
SCED 5630 Student Teaching in Secondary Schools (15 weeks, full-time) (F,Sp)....................10

Note: The courses listed here.

*The science methods courses (SCED 3400 and 4400) may only be taught once per year. Therefore, students should take whichever one is taught during the semester they are in Level 1 or Level 2.

Biochemistry Major (121-134 credits)
The following curriculum is required for the BS degree in biochemistry. To complete the degree in eight semesters (four academic years), students must register for an average of 15-16 credits per semester.

Students must satisfy the CHEM 1210 requirement with an AP score of 3 or 4. Both CHEM 1210 and 1220 may be satisfied with an AP score of 5.

Suggested Schedule
First Year (30-32 credits)
Fall Semester (15-16 credits)
CHEM 1210 Principles of Chemistry I.................................................4
CHEM 1215 Chemical Principles Laboratory I....................................1
MATH 1210 (QL) Calculus I ...............................................................1
University Studies course(s)..............................................................6-7

Spring Semester (15-16 credits)
CHEM 1220 (BPS) Principles of Chemistry II.................................4
CHEM 1225 Chemical Principles Laboratory II.................................1
MATH 1220 (QL) Calculus II ...............................................................4
University Studies courses..............................................................6-7

Second Year (32 credits)
Fall Semester (16 credits)
CHEM 2310 Organic Chemistry I.....................................................4
CHEM 2315 Organic Chemistry Laboratory I....................................1
BIOL 1610B Biology I .................................................................4

CHEM 6730 Principles of Enzymology (Sp) .................................... 3
CHEM 6740 Cellular Communication by Small Molecules and Proteins (Sp) ........................................ 3
CHEM 6750 Principles of Structural Biology (F) ............................... 3
CHEM 6760 Principles of Bioenergetics (F) ..................................... 3

BS Degree in Biochemistry with Honors
A BS degree in Biochemistry with honors can be earned by meeting the following requirements:

1. Minimum GPA of 3.50 in chemistry courses
2. Overall GPA of 3.30
3. Completion of 15 credits of honors work, as follows:

   CHEM 4800H (CI) Research Problems (F,Sp,Su) ......................... 3-6
   CHEM 4890H (CI) Undergraduate Biochemistry Seminar I .............. 1
   CHEM 4891H (CI) Undergraduate Biochemistry Seminar II ............. 1
   3-6 credits selected from Honors courses numbered 3000 or higher in chemistry or related subjects, as appropriate. Three credits may be selected from chemistry courses numbered 6000 or higher .......................... 3-6

In addition, select two courses from the following:

   CHEM 2320H Organic Chemistry II (Sp) ..................................... 4
   CHEM 5070H Biophysical Chemistry (F) ...................................... 3
   CHEM 5700H General Biochemistry I (F) ..................................... 3
   CHEM 5710H General Biochemistry II (Sp) .................................. 3

   5 Offered fall semester only
   6 Offered spring semester only

Chemistry Minor
In addition to CHEM 1210, 1215, 1220, and 1225, 10 additional credits in Chemistry prefix courses at the 2000 level or higher, as approved by department, are required (either CHEM 2300 or 2310 may be included).

Chemistry Teaching Minor
In addition to CHEM 1210, 1215, 1220, 1225, CHEM 2300 or 2310, and CHEM 2315, 3-4 additional credits selected from the following are required:

   CHEM 2320 Organic Chemistry II (Sp)
   (if CHEM 2310 has been previously selected) ................................. 4
   CHEM 3000 (QI) Quantitative Analysis (F) ..................................... 3
   CHEM 3060 (QI) Physical Chemistry (F) ....................................... 3
   CHEM 3510 Intermediate Inorganic Chemistry (Sp) (2 cr) and
   CHEM 3520 Inorganic Chemistry Laboratory (Sp) (1 cr) .................. 3
   CHEM 3650 (DSC) Environmental Chemistry (Sp) (3 cr) or
   CHEM 3700 Introductory Biochemistry (Sp) (3 cr) ............................ 3
   Enrollment in the Secondary Teacher Education Program (STEP)
   (see details on page 208) ............................................................... 35

Undergraduate Research Opportunities
The Chemistry and Biochemistry Department encourages students in all departmental majors to engage in undergraduate research. For information about how they can become involved in undergraduate research, students should contact Joan Hevel, the departmental undergraduate research coordinator, (435) 797-1622, jhevel@cc.usu.edu.

Career Opportunities
Chemistry degree holders work in a wide variety of professions, from physicians, lawyers, and professors to research, development, sales, or production in the chemical, oil, pharmaceutical, metals, electronic, and biochemical industries. Government at all levels employs chemists, including the federal Departments of Defense, Health and Human Services, Agriculture, and Interior. A graduate with a bachelor’s degree often begins work in chemical analysis or sales or may assist senior chemists in research and development. A graduate with a teaching major or chemistry education emphasis may teach in public schools. A graduate degree is usually needed to direct research or teach at the university level. Degree holders from the Department of Chemistry and Biochemistry have had excellent success in obtaining support for graduate studies, often at very prestigious institutions, and in obtaining employment directly following graduation.

The major in Biochemistry is appropriate both for students who wish to terminate their studies at the bachelor’s degree and for those planning to continue their education at the graduate or professional level. For those who terminate at the bachelor’s degree, career opportunities are available in research and development, sales, quality control, and analysis within a range of biochemical, pharmaceutical, and biotechnological industries. For those planning to pursue a career in the health professions, the biochemistry major provides an excellent and well-rounded background for medical, dental, and veterinary school admission. The biochemistry major also provides excellent preparation for students planning to pursue graduate work in a range of biological, environmental, and chemical sciences, including biochemistry, molecular biology, genetics, genomics, oncology, and bioinformatics. For those students interested in pursuing a legal career in areas such as patent law, bioethics, and environmental protection and regulation, the major is also excellent preparation for law school.

For further information about career opportunities for chemistry majors and biochemistry majors, students should contact their advisor.

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/
Department of Chemistry and Biochemistry

Additional Information

For more information about requirements for the majors and minors within the Chemistry and Biochemistry Department, see the major requirement sheets, available from the department, or online at: http://www.usu.edu/ats/majorsheets/

Graduate Programs

Admissions Requirements

See the general admission requirements for the School of Graduate Studies (pages 99-100). All applicants should have a bachelor's degree or master's degree in chemistry or biochemistry from an accredited institution. Appropriate undergraduate preparation is expected; applicants not fully prepared may be admitted with the condition that appropriate undergraduate courses are taken as necessary.

Applications are especially encouraged during the spring semester for expected admission in the following fall semester. However, the Graduate Recruiting and Admissions Committee screens applications throughout the year. Detailed information about the graduate programs and faculty research activities can be found on the Internet at: http://www.chem.usu.edu

Degree Programs

Master of Science

To earn an MS in chemistry or biochemistry, a student must meet the general requirements of the School of Graduate Studies (see pages 104-106), conduct research under the direction of a major professor and write a thesis acceptable to a supervisory committee (Plan A) or write a review-of-literature paper (Plan B), and pass an oral examination that is principally a defense of the thesis or the Plan B paper.

Qualified undergraduate chemistry majors at USU may apply in the third year for admission to the MS program. Students may be admitted to this MS program if they have a B average in chemistry, physics, and mathematics courses, and have completed the one-year sequences in general, organic, and physical chemistry (including labs), two courses in analytical or inorganic chemistry, two semesters of physics, math through MATH 2210, and at least 15 credits of their University Studies requirement sheets, available from the department, or online at: http://www.chem.usu.edu

Doctor of Philosophy

To earn the PhD in chemistry or biochemistry, a student must successfully complete a core curriculum of courses and other courses as approved by a supervisory committee. In addition, preliminary examinations (both oral and written) must be passed and research in a field of specialization must be conducted. The final requirement is the writing and defense of a dissertation before the student's supervisory committee.

Biochemistry Course Requirements

Every MS and PhD student in the biochemistry program must complete at least four of the graduate biochemistry core courses (CHEM 6700, 6710, 6730, 6740, 6750, and 6760). In addition, all students must register for at least 2 credits of CHEM 6720 in the first semester of residence to participate in research training. Both MS and PhD students must complete a total of at least 15 credits in coursework, exclusive of seminar and research credit. The Program of Study is approved by the student's supervisory committee. A total of 30 credits is required for the MS degree, and a total of 90 credits is required for the PhD. Beginning students who already hold an MS degree need 60 credits to complete the PhD program.

Chemistry Course Requirements

Every MS and PhD student in the chemistry program must complete the courses required for their specialization: Analytical—CHEM 7600, 7610; Inorganic—CHEM 6500, 6510; Organic—CHEM 6300, 7300, 7310; or Physical Chemistry—CHEM 6010, 6020, 7020. Both MS and PhD students must complete a total of at least 15 credits in coursework, exclusive of seminar and research credit. The Program of Study is approved by the student's supervisory committee. A total of 30 credits is required for the MS degree and a total of 90 credits is required for the PhD. Beginning students who already hold an MS degree need 60 credits to complete the PhD program.

Financial Assistance

The department offers financial support to students in the form of teaching assistantships, research assistantships, and fellowships. All applications for admission to the School of Graduate Studies constitute an application for financial assistance; it is not necessary to file a separate request. Teaching assistantships are the principal means of support for first-year students. Inquiries about current support levels should be directed to the department main office. The department is responsible for the first nine months of stipend and tuition, with the remaining summer stipend and tuition usually being paid from faculty research funds. Teaching assistants devote no more than 12 contact hours per week directing undergraduate laboratories, leading recitation sections, and assisting students with questions during the regular fall and spring semesters. Research assistantships, funded from individual faculty research grants, support students conducting research related to the grant projects. Although first-year students are not normally supported as research assistants, well-prepared students may be eligible for research support at the discretion of their major professor.

Fellowships are awarded by the University to outstanding students solely on the basis of merit. The department encourages students with strong academic records to apply for the University fellowships and national awards, and will provide assistance in obtaining and submitting the appropriate forms. Additionally, several graduate awards are given each year to honor exemplary performance in research and teaching.

The College of Science recently established the Willard L. Eccles Foundation Science Fellowship. The $18,000 per year, three-year stipend is competitively awarded to highly qualified science applicants. Students applying to the graduate program will be considered for this fellowship, and will be sent the necessary information. Application deadline for this fellowship is March 1.

Utah State University 2006-2007 General Catalog
Chemistry and Biochemistry Faculty

Trustee Professor
Ann E. Aust, biochemistry

Professors
Steven D. Aust, biochemistry
Stephen E. Bialkowski, analytical chemistry
Alexander I. Boldyrev, physical chemistry
Scott A. Ensign, biochemistry
David Farrell, physical chemistry
Alvan C. Hengge, organic chemistry
Richard C. Holz, bioorganic chemistry
Vernon D. Parker, physical organic chemistry
Steve Scheiner, computational chemistry
Lance C. Seefeldt, biochemistry

Professors Emeritus
William M. Moore, physical chemistry
Richard K. Olsen, organic chemistry
Grant G. Smith, organic chemistry
Jack T. Spence, inorganic chemistry

Associate Professors
Lisa M. Berreau, inorganic chemistry
Robert S. Brown, analytical chemistry
Bradley S. Davidson, organic chemistry
John L. Hubbard, inorganic chemistry

Assistant Professors
Cheng-Wei Tom Chang, organic chemistry
Joan M. Hevel, biochemistry
Sean J. Johnson, biochemistry
Philip J. Silva, analytical chemistry

Research Assistant Professor
Tapas Kar, physical chemistry

Lecturer
Douglas G. Harris

Degrees offered: Bachelor of Science (BS) in Civil Engineering; BS in Environmental Engineering; Master of Engineering (ME), Master of Science (MS), Civil Engineer (CE) and Doctor of Philosophy (PhD) in Civil and Environmental Engineering

Undergraduate Programs

Objectives

Civil and Environmental Engineering is concerned with planning, designing, constructing, and operating various physical works; developing and utilizing natural resources in an environmentally sound manner; providing the infrastructure which supports the highest quality of life in the history of the world; and protecting public health and renovating impacted terrestrial and aquatic systems from the mismanagement of toxic and hazardous wastes. The Department of Civil and Environmental Engineering offers Bachelor of Science degrees in Civil Engineering and in Environmental Engineering. Both degrees are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (EAC/ABET).

The objectives of the undergraduate programs in Civil Engineering and Environmental Engineering are to graduate engineers who have a solid educational foundation with broad experiences in engineering, the sciences, and the humanities; and who are prepared to enter graduate school, other professional training, or the workplace as effective professionals. These graduates will understand the significance of life-long learning and the importance of ethical conduct and will be qualified to assume roles of leadership in business, community, government, and the engineering profession and contribute significantly to global society as a whole.

Outcomes

Graduates with a BS degree in Civil Engineering from Utah State University will have:

1. Proven themselves proficient in mathematics; the sciences; and the structures, geotechnical, hydraulics, and transportation areas of civil engineering.

2. Demonstrated the ability to solve engineering problems, utilizing fundamental engineering principles, as well as the latest technologies and engineering tools, in the process of engineering analysis and design. They will have done this as individuals and as members of multidisciplinary teams.

3. Shown a capacity for investigation and experimentation into physical (engineering) phenomena, along with the ability to analyze and interpret engineering data in at least two of the following areas of civil engineering: structures, geotechnical, hydraulics, and transportation.

4. Demonstrated the capability to communicate verbally, in writing, and through the use of engineering communication media. They will also have shown the capacity to present the outcomes of their problem solving and design projects for groups of engineers and lay persons.

5. Exhibited an understanding of the role civil engineering plays in our modern global society, that much is to be learned from the past and applied to the present, and that a responsible engineer is ethical and will continue to increase his or her knowledge throughout his or her lifetime.
Department of Civil and Environmental Engineering

Graduates with a BS degree in Environmental Engineering from Utah State University will have:

1. Knowledge of basic science and engineering principles fundamental to the practice of environmental engineering including: mathematics, biology, chemistry, soil science, physics, fluid and solid mechanics, hydrology, and engineering economics.

2. Knowledge of environmental engineering practice in the areas of water supply and treatment; environmental systems dynamics; environmental chemistry and analysis; wastewater, air quality and solid and hazardous waste management; and public health and industrial hygiene.

3. Advanced knowledge of science and engineering principles in two of the following program emphasis areas: water, solids, natural systems, air quality, and public health.

4. Integration of advanced science and engineering principles in a multidisciplinary team environment for the solution of a comprehensive design problem in one of the program emphasis areas incorporating: applicable design standards; state-of-the-practice design tools; real-life economic, social, regulatory, political, ethical, and business design constraints; and applicable considerations for contemporary issues, such as product manufacturability, process sustainability, health and safety concerns, and system constructability.

5. Experience in written and oral communication using state-of-the-practice presentation methods throughout the course of their Professional Program in Environmental Engineering which include: laboratory reports and presentations, research paper presentations, design proposal and progress reports and presentations, and final design project presentations to both technical and lay audiences.

6. Experience in one of the environmental engineering practice areas in the design and conduct of experiments; collection, analysis, and interpretation of data; and modeling and representation of experimental results and presentation of experimental findings.

Assessment

The Civil and Environmental Engineering Department employs several methods to assess the quality of the two BS programs offered by the department. Assessments are made prior to graduation by measuring the performance of students in each class. In addition, the results of the FE exam, senior exit interviews, and faculty reviews of student portfolios are used. Postgraduate assessment of Civil and Environmental Engineering graduates is also conducted up to six years after graduation. Assistance from outside reviewers is also obtained in making the assessment. For more details, see the CEE assessment website at: http://www.engineering.usu.edu/cee/assessment/

Requirements

Admission Requirements

Admission requirements for the Department of Civil and Environmental Engineering are the same as those described for the University on pages 16-20. Students in good standing may apply for admission to the department. In addition, students must maintain the academic requirements outlined for the College of Engineering on pages 120-121.

Bachelor of Science Degrees

The Department of Civil and Environmental Engineering offers two Bachelor of Science degrees: one in Civil Engineering and one in Environmental Engineering. The four-year programs leading to these two degrees are listed below. During the first two years, students are in a pre-engineering program. Students must successfully complete the pre-engineering program or, in the case of transfer students, substantially equivalent coursework at another institution before they are accepted into the professional program. Transfer students may apply for permission to take upper-division courses in cases where postponement of these courses will prolong the student's time to graduate.

Design is a cornerstone of engineering that requires creative thinking, technical knowledge, the ability to organize and solve complex problems, and teamwork. Engineering design activities begin during the first two years and progress in-depth as each student’s proficiency increases. These design activities culminate in a major senior design course, which integrates past engineering coursework into a focused, realistic design project. An important feature of the senior design experience is that students work in teams to complete the project.

The student who is majoring in or planning to major in Civil Engineering or Environmental Engineering needs to be aware of the College of Engineering requirements concerning admission to the college, pre-engineering program, admission to professional engineering programs, University Studies, and other academic requirements. Additional information concerning these items is given in the College of Engineering write-up on pages 119-122. It is the responsibility of the student to be aware of these rules and regulations. Passing the Fundamentals of Engineering Exam is required for graduation.

The Civil and Environmental Engineering Department strongly recommends that students have a high-end calculator, such as an HP calculator, that has the capabilities to do units, matrices, and programs in BASIC. Although not a requirement at this time, CEE students are strongly encouraged to have a modern desktop or laptop personal computer. Since computer technology is changing rapidly, students should seek advice from a knowledgeable professional on hardware and software requirements before purchasing a computer.

Students in the Civil Engineering program must establish proficiency in at least four areas of Civil Engineering. Proficiency is established through a combination of material covered in required courses, as well as by establishing depth through the selection of technical electives. Proficiency must be established in four of the following areas: Environmental Engineering, Fluid Mechanics/Hydraulics, Geotechnical, Structures, Transportation, or Water Resources. The courses must be selected from the approved Technical Elective courses.

Undergraduate Course Requirements for Civil Engineering

Pre-engineering Program: Freshman and Sophomore

Freshman Year (29-31 credits)

Fall Semester (16 credits)

MATH 1210 (QL) Calculus I ........................................ 4

CHEM 1215 Principles of Chemistry I .................. 4

CHEM 1215 Chemical Principles Laboratory I ...... 1

CEE 1880 Civil and Environmental Engineering Orientation and Computer Applications .................. 1

CEE 2240 Engineering Surveying ............................. 3

University Studies Breadth course .......................... 3

Utah State University 2006-2007 General Catalog 213
Department of Civil and Environmental Engineering

Spring Semester (13-15 credits)
MATH 1220 (QL) Calculus II .......................................................... 4
GEOL 1110 (BPS) The Dynamic Earth: Physical Geology .......... 4
ETE 2270 Computer Engineering Drafting .................................. 2
BIOL 1010 (BLS) Biology and the Citizen .................................. 3
PHYS 2200 Elements of Mechanics (prereq. to PHYS 2220) .... 2

Sophomore Year (32 credits)
Fall Semester (16 credits)
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II
(prereq. AP Physics or PHYS 2200) ............................................. 4
MATH 2250 (QI) Linear Algebra and Differential Equations .... 4
ENGR 2010 Engineering Mechanics Statics .............................. 2
ENGR 2200 Engineering Numerical Methods I ............................... 3
University Studies Breadth course ............................................ 3

Spring Semester (16 credits)
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a
Persuasive Mode ........................................................................ 3
ENGR 2030 Engineering Mechanics Dynamics .......................... 3
ENGR 2140 Strength of Materials ................................................ 2
ENGR 2450 Engineering Numerical Methods II ...................... 2
CEE 2870 Sophomore Seminar .................................................. 1
CEE 3030 Uncertainty in Engineering Analysis ....................... 2
University Studies Breadth course ............................................ 3

Sophomore Year (32 credits)
Fall Semester (16 credits)
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II
(prereq. AP Physics or PHYS 2200) ............................................. 4
MATH 2250 (QI) Linear Algebra and Differential Equations .... 4

CEE 4880 (CI) Civil Engineering Design III ................................... 2
CEE Group A coursesa ............................................................ 6-8
CEE Technical Elective courseb ................................................ 3
CEE Technical Elective Group B courseb .................................... 3

aStudents must complete all five Group A Courses, listed below. The order in which they are taken will dictate the choice of technical elective courses (as they are prerequisites for various technical elective courses).

bCEE 3610 and 3870 must be taken concurrently.

Group A Courses
CEE 3080 Design of Reinforced Concrete Structures (Sp) ............. 3
CEE 3210 Introduction to Transportation Engineering (Sp) ............ 3
CEE 3430 Engineering Hydrology (Sp) ........................................ 3
CEE 3640 Water and Wastewater Engineering (Sp) (4 credits) or
CEE 3780 Solid and Hazardous Waste Management (F) (3 credits) or
CEE 5860 Air Quality Management (F) (3 credits) or
CEE 4300 Engineering Soil Mechanics (Sp) .................................. 4

Students in the Civil Engineering program must complete a senior
design elective (see list below). They must also establish proficiency
in at least four areas of Civil Engineering by taking a minimum of two
courses in each area. Proficiency in Environmental Engineering
is established by taking BIOL 1010; CEE 3610; and CEE 3640, 3780, or
5860. Proficiency in Structures is established by taking ENGR 2010,
2140; and CEE 3010, 3020, 3080. Proficiency in Fluid Mechanics
and Hydraulics is established by taking ENGR 2030; and CEE
3430, 3500, 3510. Students will also demonstrate proficiency in one
of Geotechnical Engineering, Transportation Engineering, or Water
Resources Engineering by taking a Group B course (see list below).

Proficiency in Geotechnical Engineering is established by taking
ENGR 2030; GEO 1110; CEE 4300; and either CEE 5350 or 5380.
Proficiency in Transportation Engineering is established by taking
CEE 3210; and one of CEE 5190, 5220, 5230, or 5240. Proficiency in
Water Resources Engineering is established by taking CEE 3430;
and one of CEE 5450, 5460, 5470, or 6440.

The sum of the Group B class, the Senior Design Elective, and other
technical electives from the approved list must be at least 18 credits.

CEE 3670 Transport Phenomena in Bio-Environmental Systems (Sp) 3
CEE 3780 Solid and Hazardous Waste Management (F) ................. 3
CEE 5010 Matrix Analysis/Finite Element (F) ................................. 3
CEE 5050 Design of Wood and Masonry Structures (Sp) ............. 3
CEE 5070 Structural Steel Design (F) ............................................ 3
CEE 5500 Numerical Methods in Elasticity (F) ............................... 3
CEE 5100 Infrastructure Evaluation and Renewal (Sp) .................... 3
CEE 5190 Geographic Information Systems for Civil Engineers (Sp) 3
CEE 5220 Traffic Engineering (Sp) ............................................... 3
CEE 5230 Geometric Design of Highways (Sp) ............................... 3
CEE 5240 Urban and Regional Transportation Planning (F) .......... 3
CEE 5350 Foundation Analysis and Design (F) ............................... 3
CEE 5380 Earthquake Engineering (Sp) ........................................ 3

#### Undergraduate Course Requirements for Environmental Engineering

### Pre-engineering Program: Freshman and Sophomore

#### Freshman Year (29-31 credits)
- **Fall Semester (15 credits)**
  - BIOL 1610 (BLS) \(^1\) Biology I ............................................................................... 4
  - CHEM 1210 (QL) \(^2\) Chemical Principles I ......................................................... 4
  - MATH 1210 (QL) \(^2\) Calculus I ........................................................................... 4
- **Spring Semester (14-16 credits)**
  - CHEM 1215 \(^2\) Chemical Principles Laboratory I .............................................. 1
  - CHEM 1220 (QL) \(^2\) Calculus II ........................................................................ 4
- **Sophomore Year (32 credits)**
  - **Fall Semester (16 credits)**
    - ENGR 2200 Elements of Mechanics (prereq. to PHYS 2220) .......................... 2
    - PHYS 2200 Elements of Mechanics (prereq. to PHYS 2220) .......................... 2
  - **Spring Semester (16 credits)**
    - ENGR 2200 Elements of Mechanics Dynamics ............................................ 3
    - ENGR 2140 \(^3\) Strength of Materials ................................................................. 2
    - ENGL 2010 \(^4\) Intermediate Writing: Research Writing in a Persuasive Mode... 3
    - MAE 2300 \(^4\) Thermodynamics I ................................................................. 3
    - CEE 2890 \(^4\) Environmental Engineering Sophomore Seminar ......................... 1
    - BIOL 3300 (BLS) \(^4\) General Microbiology ...................................................... 4

### Professional Engineering Program: Junior and Senior

#### Junior Year (34 credits)
- **Fall Semester (17 credits)**
  - CEE 3030 Uncertainty in Engineering Analysis .................................................. 2
  - CEE 3500 Civil and Environmental Engineering Fluid Mechanics ..................... 3
  - CEE 3610 Environmental Management .............................................................. 3
  - CEE 3780 Solid and Hazardous Waste Management .......................................... 3
  - CEE 3870 Professional/Technical Writing in Civil and Environmental Engineering .. 2
- **Spring Semester (17 credits)**
  - CEE 3430 Engineering Hydrology ................................................................. 3
  - CEE 3510 Civil and Environmental Engineering Hydraulics .............................. 3
  - CEE 3640 Water and Wastewater Engineering .................................................. 4
  - CEE 3670 Transport Phenomena in Bio-Environmental Systems ..................... 3
  - CEE 3890 Environmental Engineering Design I ............................................. 1
- **University Studies Breadth course** ................................................................... 3

#### Senior Year (30-31 credits)
- **Fall Semester (16 credits)**
  - PUBH 3310 Occupational Health and Safety ...................................................... 3
  - CEE 4200 Engineering Economics ...................................................................... 2
  - CEE 4790 (CI) \(^5\) Environmental Engineering Design II .................................... 2
  - CEE 5610 Environmental Quality Analysis ....................................................... 3
  - CEE 5860 Air Quality Management .................................................................... 3
  - CEE Senior Design Elective course\(^6\) ................................................................. 3
- **Spring Semester (14-15 credits)**
  - CEE 4890 (CI) Environmental Engineering Design III ..................................... 2
  - Technical Elective course (Area 1, 2, or 3)\(^6\) .................................................... 2
  - Technical Elective course (Area 4 or 5)\(^6\) ......................................................... 2
- **University Studies Breadth course** ................................................................... 3
- **University Studies Depth Humanities and Creative Arts (DHA) and Depth Social Sciences (DSS) courses** .............................................................. 5-6

#### Technical Elective Courses
- **Solids—Area 1**
  - CEE 2670 Hazardous Chemicals Handling and Safety (Sp) .................................. 2
  - CEE 5680 Soil-based Waste Management (Sp) .................................................. 2
  - CEE 5730 Analysis and Fate of Environmental Contaminants (Sp) .................... 3
  - CEE 5830 Management and Utilization of Biological Solids and Wastewater (F) ........................................................................................................................................ 3
  - CEE 5880 Remediation Engineering (F) .............................................................. 3

#### Senior Design Elective Courses
- **Water—Area 2**
  - CEE 5430 Groundwater Engineering (F) ............................................................ 3
  - CEE 5620 Aquatic Chemistry (F) .......................................................................... 3
  - CEE 5730 Analysis and Fate of Environmental Contaminants (Sp) .................... 3
  - CEE 5810 Biochemical Engineering (F) .............................................................. 3

#### Air—Area 3
- BMET 4300 General Meteorology (F) .................................................................... 3
- CEE 5710 Pollution Prevention and Industrial Ecology (Sp, Alt Years) ........................ 2

---

\(^1\) The Breadth Life Science (BLS) area in the University Studies Program is satisfied by the combination of BIOL 1610 and 3300.

\(^2\) These courses are required for admission to the Professional Engineering Program (PEP).

CxEE 5790 Accident and Emergency Management (Sp) .................... 3

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school.

In the Department of Civil and Environmental Engineering, departmental honors can be earned by completing 20 credits of upper-division honors engineering courses. Students should work with the department in selecting appropriate courses.

Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information

For more information about Bachelor of Science requirements and the sequence in which courses should be taken, see major requirement sheet, available from the Civil and Environmental Engineering Department, or online at: http://www.usu.edu/ats/majorsheets/

Concurrent BS/Master's Program

The concurrent BS/Master’s program allows engineering students to begin taking graduate-level classes during their senior year. This permits them to complete requirements for both the BS degree and the master’s degree concurrently during two years. Students in this program have a greater selection of graduate courses, since many graduate courses are taught during alternate years. In addition, the student’s senior design project could be a start for a graduate design project or thesis. After completing their BS degree, students in the program can earn a master’s degree in only one additional year. Both the BS and the master’s degree can generally be earned with 150 total credits, although students should note that a Plan C MS requires 3 extra credits. Finally, students with a master’s degree can expect a much higher starting salary following graduation. (For more information, see College of Engineering section of this catalog, pages 121-122.)

Graduate Programs

The ME degree emphasizes professional practice and coursework. A minimum of 30 credits of technical and scientific coursework is required. The MS degree emphasizes research and the preparation of a significant publication. A minimum of 30 credits, 6 to 9 of which shall be thesis research, is required for an MS. In special cases, as decided by the student’s supervisory committee, a second MS is available with a Plan B option, which requires 30 credits, including 3 credits of CEE 6970, Thesis Research. The CE degree, which prepares students for professional engineering careers, requires 60 credits beyond the bachelor’s degree, or 30 credits beyond the master’s degree, including a technical engineering report. The PhD degree represents high scholarly achievement demonstrated by independent research and competence in an area of specialization approved by the student’s supervisory committee.

Admission Requirements

See general admission requirements, pages 99-100. Admission committees consider GRE scores and experience, undergraduate record and curriculum, and formal recommendations. A student without an undergraduate civil and environmental engineering background may be required to complete selected undergraduate courses prior to admission as a fully matriculated graduate student.

Graduate Program Divisions

The graduate program in the Department of Civil and Environmental Engineering is administered through five academic divisions, as described below.

Structural Engineering

The structural engineer is involved in the design, construction, repair, and retrofit of all types of structures: buildings, bridges, dams, and many others. The safety of the structures we occupy and utilize every day is the responsibility of structural engineers. They must be able to evaluate the loads placed on a structure, determine their effects on the structure, and select the appropriate materials and structural elements, or repair strategy, to withstand these loads. Today’s structural engineer is using new space materials in the design of new structures or the retrofit of older structures.

Mathematics, physics, and materials science constitute a foundation for structural engineering. Structural analysis and design are added to this foundation and become the focus of the structural engineering program. Graduate students in the structures program also engage in structural mechanics, numerical methods, structural dynamics, geotechnical engineering, and the study of new structural materials. Current research in the structures area is focusing on the dynamic characteristics of structures, their potential response to earthquakes, and new seismic retrofit measures, using advanced composite materials, for older structures. Materials research is focusing on cementious materials and constitutive modeling.

Geotechnical Engineering

Engineering studies of soils are concerned with the physical and engineering properties of soils and how these are related to engineering projects.
The Geotechnical Engineering Division, in cooperation with the Environmental Engineering Division, is offering a new program in Geoenvironmental Engineering. This new program uses the strengths of both divisions to provide a program involving the geotechnical aspects of hazardous waste management, the investigation of hazardous waste sites, and the design of hazardous waste containment systems.

The geotechnical division has a strong research program. Current research projects in this division include studies on liquefaction, seismic slope stability, pile foundations, landslides, mechanically-stabilized embankments, risk analysis of dams, finite element analysis of soil-structure systems, and the long-term properties of clay soils used in hazardous waste containment systems.

Water Engineering

The water engineering program is a multidisciplinary graduate program in the College of Engineering and is intended to enable engineers and scientists interested in water to obtain graduate degrees in the areas of fluid mechanics and hydraulics, hydrology, groundwater, and water resources engineering. Core courses and departmental offerings cover these fundamental areas, as well as essential numerical and statistical methods. The water engineering faculty are committed to a strong academic program. The curriculum offered is one of the most comprehensive offered in the U.S. Elements of ongoing research projects are routinely and effectively incorporated into the classes. The program combines training, research, and experience to understand the water issues and water resources management challenges in the United States and internationally. Graduate students can supplement departmental offerings by selecting courses in Mathematics and Statistics; Computer Science; Environment and Society; Watershed Sciences; Wildland Resources; Economics; Political Science; Geology; Biological and Irrigation Engineering; Mechanical and Aerospace Engineering; Plants, Soils, and Biometeorology; Biology; Chemistry and Biochemistry; and Physics. This ensures that graduates are well-grounded in the fundamentals, but have a breadth of training and are prepared to contribute professionally to the solution of multidisciplinary local, national, and international water problems. Graduate students in the water program have the opportunity for research support through the Utah Water Research Laboratory (UWRL) while working on theses or dissertations. Excellent laboratory and computing facilities are available. Strong, continuous state and federal research funding keeps the research topics and facilities current. Specialty areas within the program comprise fluid mechanics and hydraulics, hydrology, groundwater, and water resources engineering.

Fluid mechanics and hydraulic engineering covers both fundamental principles and theory and their applications in a variety of engineering fields. Elementary fluid mechanics, based on fundamental principles of conservation of mass, energy, and momentum, is the logical core for all water-related engineering programs. Consequently, other specialties in water engineering study fluid mechanics. Students specializing in fluid mechanics and hydraulics emphasize theoretical fluid mechanics, hydraulic design, numerical methods, and laboratory hydraulic techniques. A good variety and balance of courses supporting research in theoretical fluid mechanics, open channel hydraulics, hydraulic design, transients, sedimentation, municipal water system design, and cavitation are available at the graduate level. Graduates in fluid mechanics and hydraulics find employment in a broad range of professional engineering fields, including consulting, university teaching and research, and state and federal government agencies.

Hydrology is a branch of geoscience concerned with the origin, distribution, movement, and properties of waters of the earth. The hydrologic cycle encompasses the atmosphere, the land surface, lakes and oceans, and the subsurface. Complex, interacting processes at varied time and space scales describe the hydrologic cycle. The concepts and practice of hydrology derive from an integration of field observations, laboratory investigations, and conceptual, mathematical, chemical, statistical, and probabilistic models.

The hydrology program at USU has strength in both theoretical and applied aspects of modern hydrology. Past and present research focuses on a broad spectrum of hydrologic problems. These range from climate modeling, rainfall processes, floods, droughts, terminal lake analyses, soil erosion, and stream water quality models to groundwater contamination, characterization and remediation and watershed analyses. A particular emphasis of the program is on an understanding of the global water and energy cycles at nested scales from the hemisphere to the continent to the watershed from a holistic perspective that recognizes the two-way linkages between water reservoirs and fluxes through oceans, atmosphere, land surface and subsurface, and biota.

Groundwater engineering is concerned with fluid flow and transport of contaminants in the subsurface environment. It encompasses the theory of flow in porous media; groundwater hydrology; fate and transport of contaminants in subsurface; and analytical, numerical, and stochastic modeling of such processes. Emphasis is placed on the quantitative analysis of physical and chemical principles governing these processes and on the application of these principles to practical field problems, with all their difficulties related to the complex structure of subsurface formations. Examples of such problems include groundwater supply and management, capture zone analysis, well hydraulics, subsurface cleanup technologies, health risk assessment, and analysis and remediation of groundwater contamination. These problems are of a multidisciplinary nature, and their solutions require a multidisciplinary approach, involving, among others, soil and water chemistry, chemical engineering, and economics. The groundwater professional is an important team player in solving such problems.

Water Resources Engineering prepares engineers to be lead members in water resources planning teams, often charged with coordinating the information and concepts supplied from other disciplines. This need for breadth requires considerable flexibility in the training and arrangement of degree programs.

Water resources engineers draw principles from hydrology, fluid mechanics, hydraulics, environmental engineering, economics, ecology, political science, and other disciplines in the design and operation of projects and nonstructural methods for water resources planning and management. They need a sound understanding of how water storage, delivery, and other management systems function; of criteria used in evaluating and selecting among alternatives; of the techniques of operations research that can be used in systems design; and of the institutional aspects of decision-making in the public sector. A focus area of the program is to develop decision support systems.
Department of Civil and Environmental Engineering

for sustainable water quantity and quality management in the United States and in developing regions of the world. Evolving information sources and tools, such as spatial data sets encoded in geographical information systems, climate forecasts, and cognitive models of the human decision process and societal group dynamics, are being integrated in representative institutional contexts.

An internationally-recognized specialized program has been developed in dam safety risk assessment. Students take classes in dam engineering; hydrology and hydraulics; geotechnical engineering; geology; decision analysis; risk assessment; probability and statistics; and natural resources economics, planning, and management. Students work on practical applications, as well as research projects, for improving the state-of-the-art.

Environmental Engineering
The Division of Environmental Engineering is a multidisciplinary graduate program in the College of Engineering and provides coursework and research experience to enable engineers and scientists interested in the environment to obtain graduate degrees relating to potable water and waste treatment, toxic and hazardous wastes management, air quality management, natural systems engineering, and environmental impact assessment. The program provides an interdisciplinary educational approach to fundamental principles that can be applied to environmental phenomena. Research and training projects are a part of the program and provide the student with appropriate research experience leading to a thesis or dissertation.

Hazardous Waste Management. This specialization has been developed within the broader scope of the environmental engineering program to provide an integrated approach for students with a BS in engineering or natural sciences to deal with the complex issues of toxic and hazardous waste. Aspects of toxic/hazardous waste management, including characterization, treatment, disposal, control, monitoring, and environmental impacts, are dealt with in this program.

Natural Systems Engineering is the study of the interaction of engineered systems with nature, emphasizing impacts to aquatic ecosystems. Techniques include assessment of aquatic habitat through computer simulation and model verification, quantification of aquatic habitat using remote sensing systems, and data analysis and display through integrated statistical and GIS approaches. These tools are used to evaluate impacts on threatened and endangered species, habitat enhancement, instream flow assessments, fish habitat, stream sediment, and hydraulic features.

A bioprocess engineering program has been developed as a cooperative effort between the Division of Environmental Engineering and the Biological and Irrigation Engineering Department. This program provides students with specialized coursework and research experience in areas of bioreactor processing of environmental materials and engineering scale-up of biologically-based environmental reactions. Areas of specialization include waste to energy, fermentation, composting, and industrial waste (agricultural and chemical) reuse, recycling, and technologies based on biological processes, as well as engineering optimization of aquatic habitats.

Transportation Engineering
The graduate program in Transportation Engineering offers education and research opportunities in transportation systems planning, design, and management. It is designed to enable aspiring planners, engineers, and managers to obtain advanced degrees while specializing in infrastructure management, traffic network analysis, facility design, traffic operations, transportation economics and finance, and project appraisal. Up-to-date computer and laboratory facilities, as well as the Transportation Division’s close links with local and state transportation agencies, enable students to gain hands-on experience and practical perspectives.

Past and present research undertaken by the Transportation Division faculty and researchers ranges from microscopic traffic flow simulation, dynamic route assignment, and network reliability to traffic accident modeling, pavement management, video image processing, and intelligent transportation systems. The focus remains on efficient and effective solutions to transportation problems.

Transportation Division course offerings expose students to the theoretical and practical aspects of goods and passenger transportation. State-of-the-art analytical tools and new research findings are introduced into the courses through periodic revision of notes, examples, problem sets, and computer software. Students are encouraged to design their own programs of study according to their personal and professional goals. Due to the multi-disciplinary nature of transportation, students are encouraged to include in their program of study course offerings from other programs in CEE, as well as from Mathematics and Statistics, Environment and Society, Economics, Business Administration, and Sociology.

Financial Assistance
Both departmental and formal grant support are available to graduate students and are awarded on a competitive basis. Students requesting financial support should apply to the department by March 15 for the coming academic year.

A number of fellowships are available through the University and the department. Teaching assistantships are available through the department and research assistantships are available through the Utah Water Research Laboratory and departmental faculty members who have ongoing projects or who hold special research grants from the University, private companies, or state and federal agencies.

Acceptance to pursue graduate studies in the Civil and Environmental Engineering Department does not guarantee the student financial assistance. Inasmuch as funds are limited, the assistantships are awarded by the department to cover specific teaching assignments and by the faculty members to provide for research as funds are available.

Civil and Environmental Engineering Faculty

Professors
Loren R. Anderson, geotechnical engineering
A. Bruce Bishop, engineering systems and planning
David S. Bowles, risk assessment, hydrology, water resources engineering
William J. Doucette, environmental analytical chemistry
R. Ryan Dupont, hazardous waste management, bioremediation
William J. Grenney, Advanced Center for Transportation Studies
Christine E. Hailey, Associate Dean of College of Engineering, fluid and thermal sciences, engineering education
Thomas B. Hardy, ecological system modeling, statistical analysis
Jagath J. Kaluarachchi, subsurface hydrology, contaminant transport
Mariush W. Komblowski, subsurface hydrology and transport processes
Mac McKee, water resources planning and analysis
William J. Rahmeyer, hydraulics, hydraulic structures, scour and erosion
Department of Civil and Environmental Engineering

David K. Stevens, treatment process analysis
David G. Tarboton, hydrology and water resources
Kevin C. Womack, structural mechanics
Muzz Yener, structural engineering and mechanics

Research Professor
Darwin L. Sorensen, aquatic microbiology

Professors Emeritus
Jay M. Bagley, hydrology, water resources
W. O. Carter, structures
Calvin G. Clyde, fluid mechanics and groundwater
Irving S. Dunn, geotechnical engineering
Gordon H. Flammer, hydraulics
Daniel H. Hoggan, hydrologic and hydraulic modeling
Trevor C. Hughes, water resources systems analysis
C. Earl Israelsen, hydrology, hydraulics, water resources, erosion control
Roland W. Jeppson, numerical modeling
Fred W. Kiefer, Jr., geotechnical engineering
Elliot Rich, structural engineering
J. Paul Riley, water resources systems, hydrology
J. Paul Tullis, hydraulics, hydraulic structures, and hydromachinery
Reynold K. Watkins, geotechnical engineering

Adjunct Professors
Lloyd H. Austin, water resources
Steve C. Chapra, water-quality modeling
George G. Goble, deep foundations and structural dynamics
Roger D. Hansen, water resources
Jeffrey R. Keaton, geotechnical engineering, engineering geology
Upmanu Lall, climate modeling, statistical hydrology, water resource systems
Neil Parrett, performance and safety of dams
Norman E. Stauffer, Jr., engineering hydrology and computer modeling
Alan Steinberg, road maps for intelligence
Daniel A. Stone, environmental chemistry

Associate Professors
James A. Bay, geotechnical engineering
Joseph A. Caliendo, geotechnical engineering
Anthony Chen, network analysis and logistics, transportation planning
Marvin W. Halling, structural dynamics, earthquake engineering
Sonia S. Manuel-Dupont, technical communication

Randal S. Martin, environmental engineering (air pollution)
Michael J. McFarland, environmental engineering (biosolids)
Gilberto E. Urroz-Aguire, hydraulics, hydraulic structures

Research Associate Professors
Joan E. McLean, fate and behavior of metals in the subsurfaces
Robert T. Pack, geomatics and engineering geology

Adjunct Associate Professors
Danny Marks, snow hydrology
Eva C. Nieminski, water quality
Anthony Turhollow, transportation

Associate Professor Emeritus
J. Darle Thorpe, engineering materials, measurements

Assistant Professors
Paul J. Barr, reinforced concrete, bridge design
Luis Bastidas, hydrology
Laurie S. McNeill, environmental engineering (drinking water)
Keri L. Ryan, structural dynamics, structural control
Blake P. Tullis, hydraulics, hydraulic structures, and hydromachinery

Research Assistant Professors
Sanjay Chauhan, dam safety, risk assessment, hydrologic modeling
Michael C. Johnson, hydraulics

Adjunct Assistant Professors
Steve Barfuss, hydraulics
Arnfinn J. Emdal, geotechnical
Charles H. Luco, forest hydrology

Affiliate Faculty
Robert W. Hill, professor, Biological and Irrigation Engineering
John E. Keith, professor, Economics
Jack Keller, professor emeritus, Biological and Irrigation Engineering
Judith L. Sims, fate and behavior of organic chemicals
Ronald C. Sims, hazardous waste management
Wynn R. Walker, professor, Biological and Irrigation Engineering

Course Descriptions
Civil and Environmental Engineering (CEE), pages 582-589.
An academic minor is available in the field of Classical Studies with three areas of emphasis: Classical Civilization, Latin Language, and Greek Language. From the ancient civilizations of the Mediterranean area are derived our government, literature, sciences, and laws. The classical world is the backdrop of the modern world. In association with various majors, the Classics Minor is designed to enhance intellectual abilities and practical skills.

**Requirements**

Requirements for the three emphasis areas are as follows:

**Classics Minor with Emphasis in Civilization**

Twenty-one credits of coursework are required. All students must take:
- HIST 3130 (CI/DHA) Greek History .......................................................... 3
- HIST 3150 (CI) Roman History (Sp) ......................................................... 3

One of the following two courses in ancient archaeology is required:
- ANTH 2030 (BSS/CI) World Archaeology (F,Sp) ........................................ 3

One of the following three ancient literature courses is required:
- CLAS 1100 The Latin and Greek Element in English (F,Sp) .................. 3
- CLAS 3210 Classical Mythology (F,Sp) ..................................................... 3
- THEA 5290 Special Topics in Theatre History and Literature (F,Sp) .... 3

One of the following two ancient art courses is required:
- HIST 4210 Celtic Europe (F,Sp) .............................................................. 3
- ART 4710 Greek and Roman Art .............................................................. 3

One of the following three ancient thought courses is required:
- HIST 3140 Greek Intellectual History: Tradition, Challenge, and Response .......................................................... 3
- POLS 4310 (CI) History of Political Thought I (Sp) .............................. 3
- PHIL 3100 (CI) Ancient Philosophy (F) .................................................... 3

The remaining 3 credits are elective and may include any of the courses listed above.

**Classics Minor with Emphasis in Latin Language**

Thirteen credits are required. All students must complete HIST 3150 (Roman History) and 7 credits of upper-division (3000- and 4000-level) courses in Latin language. They must also complete one of the following courses:
- ART 4710 Greek and Roman Art .............................................................. 3
- CLAS 1100 The Latin and Greek Element in English (F,Sp) .................. 3
- CLAS 3210 Classical Mythology (F,Sp) ..................................................... 3
- HIST 4210 Celtic Europe (F,Sp) .............................................................. 3
- THEA 5290 Special Topics in Theatre History and Literature (F,Sp) .... 3

**Classics Minor with Emphasis in Greek Language**

Thirteen credits are required. All students must complete HIST 3130 (Greek History) and 7 credits of upper-division (3000- and 4000-level) courses in classical Greek language. They must also complete one of the following courses:
- ART 4710 Greek and Roman Art .............................................................. 3
- CLAS 1100 The Latin and Greek Element in English (F,Sp) .................. 3
- CLAS 3210 Classical Mythology (F,Sp) ..................................................... 3
- HIST 3140 Greek Intellectual History: Tradition, Challenge, and Response .......................................................... 3
- PHIL 3100 (CI) Ancient Philosophy (F) .................................................... 3
- THEA 5290 Special Topics in Theatre History and Literature (F,Sp) .... 3

Approved courses for the various minors are listed in the brochure titled Classical Studies. Brochures are available from the Department of History, Main 323.

Classics (CLAS), page 592.
Greek (GRK), page 639.
Latin (LATN), page 658.
Department of Communicative Disorders and Deaf Education

Department Head: Beth E. Foley  
Location: Lillywhite 103  
Phone: (435) 797-3924  
FAX: (435) 797-0221  
E-mail: beth@cc.usu.edu  
WWW: http://www.cehs.usu.edu/comd

Assistant Department Head and Advisor for Speech-Language Pathology and Audiology:  
Dee R. Child, Lillywhite 105, (435) 797-2318, deec@cc.usu.edu

Advisor for Deaf Education:  
Jan Kelley-King, Lillywhite 40, (435) 797-5718, jankin@cc.usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), Master of Arts (MA), Master of Education (MEd), and Educational Specialist (EdS) in Communicative Disorders and Deaf Education; Doctorate of Audiology (AuD)

Undergraduate areas of focus: BS, BA—Clinical and Educational Audiology, Education of the Deaf and Hard of Hearing, Speech-Language Pathology. The focus in Education of the Deaf and Hard of Hearing includes a composite degree in Deaf Education/Elementary Education.

Graduate specializations: MS, MA, MEd—Audiology, Early Childhood Communicative Disorders, Speech-Language Pathology; MEd—Education of the Deaf and Hard of Hearing; EdS—Audiology

Undergraduate Programs

Objectives

Three main objectives of the Department of Communicative Disorders and Deaf Education are (1) to train competent speech-language pathologists, educators of the deaf and hard of hearing, and clinical-audiological audiologists capable of receiving state and national licensure; (2) to provide clinical services to individuals with speech-language deficits or hearing loss in the University population or in the community; and (3) to provide research opportunities for students relating to communicative problems of individuals. The programs in both Speech-Language Pathology and Clinical-Audiological Audiology are fully accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association (ASHA). The program in Education of the Deaf and Hard of Hearing is accredited by the Council on Education of the Deaf. All department programs hold Utah State Office of Education approval and NCATE accreditation.

Requirements

Departmental Admissions Requirements (Audiology and Speech-Language Pathology)  
Any accepted student at Utah State University may major in Communicative Disorders and Deaf Education (COMD-DE) during the freshman and/or sophomore years. However, during the first semester of the junior year, the student must formally apply for admission into the COMD-DE undergraduate professional preparation program. Application forms for admission into COMD-DE will be disseminated in class during the first semester of the junior year. As part of the application process, each student will complete the College of Education and Human Services Writing Examination. The student will be accepted if cumulative grade point average is 3.0 or higher, University Studies credits are within 15 credits of completion, the College of Education and Human Services Writing Examination has been taken and passed, and all COM-DE courses taken to this point have grades higher than C+. Students who are accepted into the undergraduate program must maintain the acceptance standards each semester in order to continue in the major.

Transfer Students or students applying for admission into the program subsequent to the fall semester of their junior year must receive approval from the department head before beginning their matriculation in major classes.

Admission into the College of Education and Human Services teacher education program is necessary before the student may take licensure courses taught in the departments of Elementary Education, Special Education and Rehabilitation, and Secondary Education, which are supportive of the major. Admission into the teacher education program is also required prior to taking the Communicative Disorders clinical practicum coursework. Application to the teacher education program typically takes place at the beginning of the graduate program.

Departmental Admissions Requirements (Education of the Deaf and Hard of Hearing)  
Students admitted to the University in good standing may major in the composite degree in Deaf Education/Elementary Education (DEEE). Upon completion of 30 semester credits, students may apply for admission to the teacher education program. Admission criteria include a cumulative GPA of 2.75, a passing score on the College of Education and Human Services Writing Examination, a speech and hearing test, successful performance on the ACT exam, computer skills competency, and high potential as a teacher, as judged by performance in a small-group interview. Students must also complete the following courses prior to application: ELED 1010, ENGL 1010, FCHD 1500, MATH 1050, one Breadth American Institutions (BAI) course, one Breadth Physical Sciences (BPS) course, and one Breadth Humanities (BHU) or Breadth Creative Arts (BCA) course. Students who are accepted into the teacher education program may continue with the Deaf Education coursework, if they continue to improve in their use of American Sign Language, and if they continue to receive grades of no less than a B- in all of their COMD courses.

Bachelor’s Degree in Communicative Disorders and Deaf Education  
There are two tracks available within the department: (1) communicative disorders, which includes emphases in audiology and speech-language pathology, and (2) education of the deaf and hard of hearing. Though the BS or BA is available in both tracks, the student should be aware that there is no professional employment licensure in either communicative disorders or education of the deaf and hard of hearing at the bachelor’s level.

Suggested Semester Schedule for Communicative Disorders and Deaf Education Majors (Audiology and Speech-Language Pathology)

Note: A minimum 3.0 overall GPA is required for admission to the professional program during the junior year. Students should meet with their advisor to tailor the following schedule to their specific needs.

Junior Year (28 credits)  
Fall Semester (15 credits)  
COMD 2400 Orientation and Observation ........................................1  
COMD 2500 Language, Speech, and Hearing Development .............3  
COMD 3100 Fundamentals of Anatomy for Speech and Language .....3  
COMD 3500 Phonetics/Developmental Phonology..........................3  
SPED 4000 Education of Exceptional Individuals ..........................2  
Electives .........................................................................................3  

Utah State University 2006-2007 General Catalog
Spring Semester (13 credits)
COMD 3120 Disorders of Articulation and Phonology ..................3
COMD 3400 Acoustics and Anatomy of the Ear ............................3
COMD 5100 Language Science .................................................3
PSY 1400 Analysis of Behavior: Basic Principles .........................3
PSY 1410 Analysis of Behavior: Basic Principles Lab ..................1

Senior Year (28 credits)
Fall Semester (16 credits)
COMD 2910 (CI) Sign Language I (Majors) ..................................4
COMD 3700 Basic Audiology ....................................................3
COMD 5070 Speech Science .....................................................3
ENGL 3070 (DHA) Perspectives in Folklore .................................3
STAT 1040 (QL) Introduction to Statistics ...................................3

Spring Semester (12 credits)
COMD 3650 (CI) Clinical Processes and Behavior .........................2
COMD 5200 Language Assessment and Intervention for Preschool
Children Educational Psychology for Teachers .............................4
COMD 5330 Aural Rehabilitation ...............................................3
Electives ....................................................................................2

Suggested Schedule for Deaf Education/ Elementary Education Composite Majors

Students wishing to obtain teacher certification in Elementary Education and Deaf Education must complete the undergraduate requirements for the composite major and complete a two-semester graduate program during which student teaching requirements are fulfilled. There is no certification available at the bachelors’ degree level.

Freshman Year (34 credits)
Fall Semester (15 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ........3
Breadth American Institutions (BAI) course (major approved) ......3
Breadth Humanities (BHU) course (major approved) ................3
Breadth Life Sciences (BLS) course (major approved) ................3
Breadth Physical Sciences (BPS) course (major approved) ........3

Spring Semester (19 credits)
COMD 2910 (CI) Sign Language I .............................................4
ELED 1010 Orientation to Elementary Education ..........................3
FCHD 1500 (BSS) Human Development Across the Lifespan .......4
MATH 1050 (QL) College Algebra .............................................4
HEP 3500 Elementary School Health Education (2 cr) or
HEP 2000 First Aid and Emergency Care (2 cr) ..........................3
Breadth Creative Arts (BCA) course (major approved) ...............3

Sophomore Year (36 credits)
Fall Semester (18 credits)
Level II Courses (Students must be admitted to the program.)
ELED 3000 (CI) Foundation Studies and Practicum in Teaching and
Classroom Management Level II ..............................................8
SPED 4000 Education of Exceptional Individuals .........................2
PSY 3660 Educational Psychology for Teachers ..........................2
INST 4010 Principles and Practices of Technology for Elementary
Teachers ..................................................................................3
ELED 3100 Teaching Reading I ..................................................3

Spring Semester (18 credits)
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a
Persuasive Mode ......................................................................3
Breadth Physical Sciences (BPS) course (major approved) .........3
Breadth Social Sciences (BSS) course (major approved) ..........3

MATH 2020 (QL) Introduction to Logic and Geometry
(Prereq: MATH 1050; or ACT of 25 or higher) .........................3
MUSC 3260 Elementary School Music .......................................2
COMD 3910 Sign Language II .................................................4

Junior Year (34 credits)
Fall Semester (18 credits)
STAT 1040 (QL) Introduction to Statistics ...................................3
COMD 2500 Language, Speech, and Hearing Development .........3
PEP 3050 Physical Education in the Elementary School ............3
COMD 5610 Introduction to Education of the Deaf and
Hard of Hearing .....................................................................3
Depth Humanities and Creative Arts (DHA) Course .................3
Depth Life and Physical Sciences (DSC) Course .......................3

Spring Semester (16 credits)
COMD 3080 American Sign Language Practicum .......................1
Level III in Elementary Education:
ELED 4000 Teaching Science and Practicum Level III ................3
ELED 4030 (CI) Teaching Language Arts and Practicum Level III ....3
ELED 4040 (CI) Teaching Reading II and Practicum Level III ........3
ELED 4050 Teaching Social Studies and Practicum Level III ........3
ELED 4060 Teaching Mathematics and Practicum Level III ..........3

Senior Year (32 credits)
Fall Semester (16 credits)
COMD 4750 Teaching the English Language to Individuals who are
Deaf and Hard of Hearing .......................................................3
COMD 4770 Audiology and Teachers of Children who are Deaf and
Hard of Hearing ....................................................................3
COMD 4780 Socio-Cultural Aspects of Deafness ........................3
COMD 4910 (CI) Sign Language III ...........................................4
COMD 5740 Teaching Reading to Deaf and Hard of Hearing
Children .................................................................................3

Spring Semester (16 credits)
COMD 4630 Teaching Speech to Deaf and Hard of Hearing Children 3
COMD 4790 Psychological Principles and Individuals who are Deaf
and Hard of Hearing .............................................................3
COMD 4920 Sign Language IV ..................................................4
COMD 5600 Classroom Teaching Using American Sign Language ....3
COMD 5620 Teaching School Subjects to Students who are Deaf and
Hard of Hearing ....................................................................3

The undergraduate major for communicative disorders and deaf education consists of 44 semester credits of courses specified by the department, plus 4-8 semester credits of extra departmental coursework. Current national board and state educational agency licensure requirements demand more coursework than the minimum numbers required for University graduation. Students desiring supportive courses for majors in special education, elementary or secondary education, family life, psychology, or other related departments are advised to seek counsel from the departmental advisor in determining an effective minor core.

Education of the Deaf and Hard of Hearing
Students wishing to obtain licensure to teach the deaf and hard of hearing will need to complete the majority of the requirements for a teaching license in early childhood education, elementary education, secondary education, or special education. For students in the Composite Deaf Education/Elementary Education major, these requirements are fulfilled within the program.
Course Requirements

Each student in audiology and speech-language pathology must complete a component of professional training, which includes departmental and extra-departmental coursework. This professional training component includes the following courses:

A. Lower-division Core Courses (12-13 credits)
MATH 1010 Intermediate Algebra (F,Sp,Su) (3 cr) or
MATH 1050 (QL) College Algebra (F,Sp,Su) (4 cr) .................3-4
STAT 1040 (QL) Introduction to Statistics (F,Sp,Su) ..............3
CS 1030 (BPS) Foundations of Computer Science (F,Sp,Su) (3 cr) or
OSS 1400 Microcomputer Applications (F,Sp,Su) (3 cr) ..........3
PSY 1410 General Psychology (F,Sp,Su) ................................3

B. Extra-departmental Core Courses (14 credits)
BIOL 1010 (BLS) Biology and the Citizen (F,Sp,Su) ..............3
BIOL 2320 Human Anatomy (Sp,Su) (4 cr) or
BIOL 2420 Human Physiology (F,Sp,Su) (4 cr) .................4
PSY 1400 Analysis of Behavior: Basic Principles (F,Sp,Su) ....3
PSY 1410 Analysis of Behavior: Basic Principles Lab (F,Sp,Su) ...1
SPCH 2110 (CI) Interpersonal Communication (F,Sp) ..........3

C. Course Required for State Licensure (2 credits)
SPED 4000 Education of Exceptional Individuals (F,Sp,Su) ......2

D. Communicative Disorders Major Core Requirements (39-40 credits)
COMD 2400 Orientation and Observation (F,Sp) .................1
COMD 2500 Language, Speech, and Hearing Development (F,Sp) ...3
COMD 2910 (CI) Sign Language I (Majors) (F,Sp,Su) ............4
COMD 3100 Fundamentals of Anatomy for Speech and Language (F) ........................................................................3
COMD 3120 Disorders of Articulation and Phonology (Sp) ....3
COMD 3400 Audiology of the Ear (Sp) ................................3
COMD 3500 Phonetics/Developmental Phonology (F) ..........3
COMD 3650 (CI) Clinical Processes and Behavior (Sp) ..........2
COMD 3700 Basic Audiology (F) ........................................3
COMD 4400 Clinical Practicum in Audiology (F,Sp,Su) ........1-2
COMD 5070 Speech Science (F) .........................................3
COMD 5100 Language Science (Sp) ....................................3
COMD 5200 Language Assessment and Intervention for Preschool Children (Sp) .........................................................4
COMD 5330 Aural Rehabilitation (Sp) ..................................3

E. Upper-division Electives, Preapproved by Department (12 credits)

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students' chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information

For more information concerning graduation requirements and course sequencing, see the major requirement sheet, available from the Department of Communicative Disorders and Deaf Education, or online at: http://www.usu.edu/ats/majorsheets. Additional information may also be found at the departmental website: http://www.coe.usu.edu/comd

Because many of the undergraduate COMD-DE courses are taught in sequence, students should meet with a departmental advisor prior to beginning classes in the COMD-DE major to assure that the most efficient and effective schedule is followed. Students should also confer with a departmental advisor for information about changes in requirements or scheduling.

Graduate Programs

Admission Requirements

A bachelor’s degree in Communicative Disorders or equivalent requirements must be completed before the student enters the graduate program. (Students already having a bachelor’s degree in another area must either complete a second bachelor’s degree in Communicative Disorders or take the undergraduate Communicative Disorders courses as postbachelor’s courses.) The time required to complete the master of science degree is determined during the first semester of study by a temporary department committee consisting of professors from the student’s direct field of study.

Students seeking the MEd with a specialization in education of the deaf and hard of hearing must have an undergraduate degree in early childhood, elementary, secondary, or special education. Students coming into the master’s degree with a degree other than deaf education will need to plan on a two-year MEd program, while those coming directly through the USU curriculum will need to plan on a one-year master’s degree program.

In addition to School of Graduate Studies admission requirements, students must demonstrate competency in American Sign Language, in order to be admitted to the education of the deaf and hard of hearing program.

Applications will be considered once a year between March 1 and March 15. However, students must have completed the application process to the School of Graduate Studies by February 15. No application will be considered until all the required information is submitted to the School of Graduate Studies.

Doctorate of Audiology

The Department of Communicative Disorders and Deaf Education at Utah State University offers a clinical Doctorate of Audiology (AuD). The program provides students with a broad yet in-depth academic and practicum-based curriculum to prepare them for applied audiology in a variety of settings. Graduates have the skills to function at a high level of expertise in such environments as clinics, hospitals, private practice, research laboratories, hearing conservation programs, schools, the military, etc.
Department of Communicative Disorders and Deaf Education

The program is a four-year post-baccalaureate residency program, the first of its kind in the Intermountain West and Pacific states. Utah State University is the birthplace of educational audiology. In addition, USU is in the forefront of research in telehealth applications in audiology. The AuD will enable graduates to enter the field at a professional level and begin a rewarding career of service in this evolving allied healthcare discipline.

Master’s Degrees

Generally, all students will complete the requirements as specified below. In some instances students will have had some of the coursework required in the graduate curriculum as part of the undergraduate training at another institution. In those cases, the program will be individualized to meet national licensure through the American Speech-Language-Hearing Association (ASHA) and state educational licensure from the State of Utah. In no instance will students amass fewer than 36 graduate credits.

At the end of their programs, all graduate students, except for those in education of the deaf and hard of hearing, must take the NTE examination in their area of specialty. This must be done before a letter of completion will be sent to the School of Graduate Studies. Students are required to list USU as a recipient of NTE test scores.

Speech-Language Pathology

The program in speech-language pathology is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association (ASHA). The Utah State Office of Education has also approved the program. Students completing the master’s curriculum are eligible for certification from ASHA and licensure from the State of Utah Board of Education. Additionally, these students will have met the academic and practicum requirements for professional licensure from the State of Utah. Upon graduation, students are prepared for employment in both educational and health care settings, where qualified providers of diagnostic and treatment services for individuals with communicative disorders are needed.

Education of the Deaf and Hard of Hearing

The program in Education of the Deaf and Hard of Hearing is accredited by the Council on Education of the Deaf (CED) and is also approved by the Utah State Office of Education. Students completing this program may be licensed by the Utah State Office of Education as teachers of the deaf and hard of hearing and they also meet the requirements for licensure by CED. Students who complete the curriculum are prepared to provide services as teachers of the deaf and hard of hearing in any setting in which such services are furnished.

The following courses or their equivalent are required for all students seeking the MED in education of the deaf and hard of hearing:

- **COMD 2500 Language, Speech, and Hearing Development (F,Sp) .................................................. 3**
- **COMD 2910 (CI) Sign Language I (Majors) (F,Sp,Su) .................................................. 4**
- **COMD 3050 Practicum and Methods in Teaching Children who are Deaf and Hard of Hearing (F,Sp) .................................................. 3**
- **COMD 3080 American Sign Language Practicum (F,Sp) .................................................. 1-3**
- **COMD 3910 Sign Language II (F,Sp,Su) .................................................. 4**
- **COMD 4630 Teaching Speech to Deaf and Hard of Hearing (Sp) .................................................. 3**
- **COMD 4750 Teaching the English Language to Individuals who are Deaf and Hard of Hearing (F) .................................................. 3**
- **COMD 4760 Early Intervention for Children who are Deaf and Hard of Hearing (F) .................................................. 3**
- **COMD 4770 Audiology and Teachers of Children who are Deaf and Hard of Hearing (F) .................................................. 3**
- **COMD 4780 Socio-Cultural Aspects of Deafness (F) .................................................. 3**
- **COMD 4790 Psychological Principles and Individuals who are Deaf and Hard of Hearing (Sp) .................................................. 3**
- **COMD 4910 (CI) Sign Language III (F,Sp) .................................................. 4**
- **COMD 4920 Sign Language IV (Sp) .................................................. 4**
- **COMD 5610 Introduction to Education of the Deaf and Hard of Hearing (F) .................................................. 3**
- **COMD 5620 Teaching School Subjects to Students who are Deaf and Hard of Hearing (Sp) .................................................. 3**
- **COMD 6430 Speech Communication and Hearing Loss (F) .................................................. 3**
- **COMD 6640 Strategies for Teaching Children who are Deaf and Hard of Hearing (F) .................................................. 3**
- **COMD 6650 Strategies for Teaching English Language to Children who are Deaf and Hard of Hearing (F) .................................................. 3**
- **COMD 6700 Practicum in Education of Children who are Deaf and Hard of Hearing (F,Sp,Su) .................................................. 1-3**
- **COMD 6800 Student Teaching—Day-School Program (F) .................................................. 6-12**
- **COMD 6820 Principles of Intervention for Children who are Deaf and Hard of Hearing (Sp) .................................................. 3**
- **COMD 6830 Student Teaching—Residential (Sp) .................................................. 6-12**
- **COMD 6850 Seminar in Communicative Disorders and Deaf Education (F,Sp,Su) .................................................. 1-3**

Educational Specialist Degree

The department offers an Educational Specialist (EdS) program that can be individualized to suit a candidate’s need within a basic structure of educational audiology and with focus on research, supervision, and evaluation. The program is designed for those individuals who have completed the master’s degree and who are practicing in educational settings. The degree requires a minimum of 30 credits beyond the master’s degree and may be completed in part through coursework in the summer and extension study and research in conjunction with the individual’s workplace.

Course Requirements

Graduate Courses in Speech-Language Pathology

**Year One:**

**Fall Semester**
- **COMD 6020 Language Assessment and Intervention for School-age Children and Adolescents .................................................. 4**
- **COMD 6090 Disorders of Fluency—Stuttering .................................................. 3**
- **COMD 6050 Professional Practice in Speech-Language Pathology .................................................. 1**
- **COMD 6100 Advanced Clinical Practicum in Speech-Language Pathology .................................................. 1-4**
- **COMD 6130 Neuropathologies of Speech and Language .................................................. 4**

**Spring Semester**
- **COMD 6040 Communication Disorders Related to Orofacial Anomalies .................................................. 3**
- **COMD 6100 Advanced Clinical Practicum in Speech-Language Pathology .................................................. 1-4**
- **COMD 6120 Adult Disorders of Motor Speech and Swallowing .................................................. 4**
- **COMD 6220 Severe Communication Impairments .................................................. 3**
- **COMD 6810 Disorders of Phonation .................................................. 3**

**Summer Semester**
- **EDUC 6550 Research for Classroom Teachers (3 cr) or EDUC 6570 Introduction to Educational Psychological Research (3 cr) .................................................. 3**
**Department of Communicative Disorders and Deaf Education**

**Year Two:**

**Fall Semester**
- COMD 6050 Professional Practice in Speech-Language Pathology ... 1
- COMD 6140 Pediatric Neurogenic Disorders................................. 3
- COMD 6200 Internship in Public Schools—Speech-Language Pathology ........................................... 4-5
- COMD 6210 Bilingual/Bicultural Services ...................................... 2

**Spring Semester**
- COMD 6300 Externship in Speech-Language Pathology .......... 1-12
- COMD 6970 Thesis ................................................................. 1-7

**Graduate Courses in Audiology**

**Year One:**

**Fall Semester**
- COMD 7200 Introduction to Clinical Practice ........................... 2
- COMD 7310 Psychoacoustics and Instrumentation .................. 3
- COMD 7380 Advanced Audiology ............................................ 2
- COMD 7820 Research Seminar in Audiology ............................ 1

**Spring Semester**
- COMD 5330 Aural Rehabilitation (3 cr) or
  - EDUC 6570 Introduction to Educational and Psychological Research (3 cr) ................................................................. 3
- COMD 7200 Introduction to Clinical Practice ........................... 2
- COMD 7320 Amplification I ..................................................... 3
- COMD 7340 Pediatric Audiology ............................................. 1
- COMD 7490 Medical Aspects of Audiology .......................... 3

**Summer Semester**
- EDUC 6570 Introduction to Educational and Psychological Research . 3

**Year Two:**

**Fall Semester**
- COMD 7300 Intermediate Clinical Practicum .......................... 2
- COMD 7420 Amplification II .................................................. 3
- COMD 7430 Electrophysiology ............................................. 3
- EDUC 6600 Measurement, Design, and Analysis I ................... 3

**Spring Semester**
- COMD 6370 Educational Audiology .................................... 3
- COMD 7300 Intermediate Clinical Practicum .......................... 2
- COMD 7460 Adult Aural Rehabilitation .................................. 3
- COMD 7530 Balance Evaluation and Management ................. 3
- COMD 7820 Research Seminar in Audiology ............................ 1

**Summer Semester (Optional)**
- COMD 7300 Intermediate Clinical Practicum .......................... 2

**Graduate Courses in Education of the Deaf and Hard of Hearing**

Students entering the program in Education of the Deaf and Hard of Hearing may choose one of three tracks. **Track 1** is followed by students who have obtained their bachelor’s degree in Deaf Education/Elementary Education. **Track 2** is followed by students coming into the program without the required background in Deaf Education, but who have received a bachelor’s degree in Elementary Education, Secondary Education, or Special Education. **Track 3** follows the program outlined for those students who do not want a teaching license, but who wish to work with families of deaf children in an early intervention program. This track provides students with an early intervention endorsement, for serving families who have deaf children, ages birth to three years.

**Track 1 (one-year program)**

For students who have obtained their bachelor’s degree in Deaf Education/Elementary Education.

**Fall Semester (18 credits)**
- COMD 6640 Strategies for Teaching Children who are Deaf and Hard of Hearing .............................................................. 3
- COMD 6650 Strategies for Teaching English Language to Children who are Deaf and Hard of Hearing ................................................. 3
- COMD 6800 Student Teaching—Day-School Program
  - (8 weeks at the Utah School for the Deaf) .............................. 10
- COMD 6850 Seminar: Education of Children who are Deaf and Hard of Hearing ................................................................. 2

**Spring Semester (18 credits)**
- COMD 6820 Principles of Intervention for Children who are Deaf and Hard of Hearing ........................................................ 3
- COMD 6830 Student Teaching—Residential (6 weeks at one level and 6 weeks at a different level) ................................. 12
- COMD 6850 Seminar in Communicative Disorders and Deaf Education ................................................................. 3

**Track 2 (two-year program)**

For students coming into the program without the required background in Deaf Education, but who have received a bachelor’s degree in Elementary Education, Secondary Education, or Special Education.

**Year One:**

**Fall Semester (19 credits)**
- COMD 5610 Introduction to Education of the Deaf and Hard of Hearing ................................................................. 3
- COMD 6740 Teaching Reading to Deaf and Hard of Hearing ................................................................. 3
- COMD 6750 Teaching the English Language to Individuals who are Deaf and Hard of Hearing ................................. 3
- COMD 6770 Audiology and Teachers of Children who are Deaf and Hard of Hearing ................................................................. 3
- COMD 6780 Socio-Cultural Aspects of Deafness ............................................ 3
- COMD 6910 Sign Language III .................................................. 4

**Spring Semester (19 credits)**
- COMD 2500 Language, Speech, and Hearing Development (must be taken sometime) ................................................................. 3
- COMD 5600 Classroom Teaching Using American Sign Language .................................................. 3
- COMD 5620 Teaching School Subjects to Students who are Deaf and Hard of Hearing ................................................................. 3
- COMD 6630 Teaching Speech to Deaf and Hard of Hearing Children ................................................................. 3
- COMD 6790 Psychological Principles and Individuals who are Deaf and Hard of Hearing ................................................................. 3
- COMD 6920 Sign Language IV .................................................. 4

**Year Two:**

**Fall Semester (14 credits)**
- COMD 6640 Strategies for Teaching Children who are Deaf and Hard of Hearing ................................................................. 3
- COMD 6650 Strategies for Teaching English Language to Children who are Deaf and Hard of Hearing ................................................................. 3
- COMD 6800 Student Teaching—Day-School Program
  - (8 weeks at the Utah School for the Deaf) .............................. 8

**Spring Semester (15 credits)**
- COMD 6830 Student Teaching—Residential ................................ 12
- COMD 6850 Seminar in Communicative Disorders and Deaf Education ................................................................. 3
Department of Communicative Disorders and Deaf Education

Track 3
Early Childhood Focus (one-year program)
This early intervention program is for students wishing to work with families who have deaf children who are between birth and 3 years of age. Students must have completed the necessary background in Early Childhood and Family, Consumer, and Human Development.

Fall Semester (16 credits)
COMD 3910 Sign Language II .......................................................4
COMD 5610 Introduction to Education of the Deaf and Hard of Hearing .................................................................3
COMD 6760 Early Intervention for Children who are Deaf and Hard of Hearing .........................................................3
COMD 6770 Audiology and Teachers of Children who are Deaf and Hard of Hearing (3 cr) or
COMD 7340 Pediatric Audiology (instructor’s permission required) (3 cr) .........................................................3

COMD 7680 Socio-Cultural Aspects of Deafness (instructor’s permission required) ..................................................3

Spring Semester (15 credits)
COMD 4910 (CI) Sign Language III ..............................................4
COMD 6630 Teaching Speech to Deaf and Hard of Hearing Children .............................................................3
COMD 6960 Master’s Project ..........................................................2
SPED 5060 Consulting with Parents and Teachers (instructor’s permission required) .................................................3
SPED 5730 Intervention Strategies for Young Children with Disabilities (instructor’s permission required) .................3

Summer Semester (8 credits)
COMD 6700 Practicum in Education of Children who are Deaf and Hard of Hearing .........................................................3
COMD 6960 Master’s Project ............................................................2
SPED 5710 Young Children with Disabilities: Characteristics and Services (taught online; register through Extension) ........3

In order to earn the MEd from the Education of the Deaf and Hard of Hearing program, the student must (a) pass a sign language competency examination, (b) complete a creative project, or (c) pass a comprehensive written and oral examination. The candidate must also demonstrate the ability to teach children who are deaf and/or hard of hearing in a variety of settings.

Clinical Doctorate Program in Audiology
The Doctorate of Audiology (AuD) program at Utah State University meets the mandate of the American Speech-Language-Hearing Association (ASHA) to have audiology students move from master’s-level to doctoral-level training as the entry-level requirement within the profession of audiology. Specifically, the AuD requires three years of coursework, one year of intensive clinical practicum, and a doctoral-level clinically-related project to meet the requirements currently recommended for the AuD by ASHA and the American Academy of Audiology (AAA). Students at USU will participate in didactic and experiential learning in clinical, educational, telehealth, and rehabilitative audiology.

Course Requirements
A. Required Courses
All requirements for the undergraduate major in Communicative Disorders and Deaf Education must be taken in addition to the following graduate courses:

<table>

1 In order to earn the required number of credits, students must take this course, which is repeatable for credit, during more than one semester.

Research Requirements
Several options are available for graduate students to complete the research or special project required for the MS or MEd. These options are specified in the list of requirements available in the department office, and include for the MS the traditional Plan A experimental thesis option, as well as the Plan B integrative review option or creative project option. Declaration of an option must be made at the time the student files an Application for Candidacy form with the School of Graduate Studies. Changes in the option will necessitate a complete revision and review of the Application for Candidacy by the student’s supervisory committee.

Licensure
Each undergraduate and graduate is advised on which classes will meet Utah State Office of Education and American Speech-Language-Hearing Association licensure requirements, as well as Utah State Professional Licensure requirements. State Office of Education licensure credentials within Utah include approval for audiology, speech-language pathology, and education of the deaf and hard of hearing. Graduation from any of these programs ensures the student may be licensed in Utah. Such licensure facilitates meeting other requirements for other states because of reciprocal agreements that exist among some state educational agencies throughout the country.

Practicum Opportunities
Practicum experience at the graduate level is available in a variety of settings. The department maintains a Speech-Language-Hearing Center offering a full range of diagnostic and remedial services to individuals with speech-language or hearing disabilities. Additionally, students are assigned to off-campus practicum sites such as hospitals,
schools for the deaf, long-term and rehabilitation care centers, clinics, physician’s offices, and public schools. Placement in out-of-state practicum sites is available for those students who request it. Students may also be placed at the Center for Persons with Disabilities for experience in birth to age three services. Students must be enrolled in clinical practicum each semester of their graduate program.

Financial Assistance

Limited departmental and federal grant support is available to graduate students and is awarded on a competitive basis. The application form for financial support must be submitted to the department no later than March 1 for consideration for the coming year.

Career Opportunities

Audiology graduates are prepared to work as clinical, educational, and rehabilitative audiologists. Speech-Language-Pathology graduates are prepared to work in a variety of medical and school settings. Graduates in the area of Education of the Deaf are trained to work in total communication, bilingual/bicultural, and auditory-aural settings.

Additional Information

Specific details about each of the foregoing degree programs are outlined in policy and procedure documents available through the department. All requirements are subject to change; check with the department for current requirements. Additional information may be obtained by contacting the Department of Communicative Disorders and Deaf Education.

Communicative Disorders and Deaf Education Faculty

Trustee Professor
Carol J. Strong, Dean, College of Education and Human Services; language development, language assessment and intervention, language disorders in school-age students, research methodology in communicative disorders, narrative assessment and literature-based language intervention

Professors
James C. Blair, educational audiology, education of the deaf and hard of hearing
J. Freeman King, American Sign Language, linguistics, teacher preparation

Adjunct Clinical Professors
Bryan R. Larsen, MD, gastroenterologist
Gordon S. Wood, MD, otolaryngologist

Associate Professors
Kim Cortin-Lewis, diagnosis and management of voice disorders, laryngeal imaging, disorders of motor speech, dysphagia, anatomy and physiology of speech and swallow
Beth E. Foley, neuropathologies of speech and language, augmentative/alternative communication, language and literacy
Sonia S. Manuel-Dupont, nondiscriminatory educational assessment of non-English-language background children, Native American language assessment, emergent literacy, ethnic literacy, developmental phonology, syntax, professional and scientific discourse analysis
John E. Ribera, medical audiology, amplification, hearing science, telemedicine, hearing conservation, balance studies
Carmel Yarger, American Sign Language, curriculum for students who are deaf and hard of hearing, deaf education

Adjunct Associate Professor
Douglas W. Laws, clinical audiology

Assistant Professors
Jeffery Larsen, classroom acoustics, speech perception
Jaclyn Littledike, orofacial anomalies, professional practice issues, and clinical supervision
Susan Watkins, early intervention programs, sensory impaired infants and toddlers
Julie Wolter, school-age language, literacy

Assistant Clinical Professor
Vicki Simonsmeier, pediatric neurogenic disorders, oral-motor dysphagia, early intervention programs, audiology, auditory processing, clinical supervision

Clinical Instructors
Chad Bingham, pediatric brain injury, limited English proficiency, augmentative/assistive technology, clinical supervision
Dee R. Child, disorders of phonation, articulation, fluency
Anne Elsweiler, fluency, preschool language and articulation, clinical supervision
Kathryn S. Gantz, speech-language pathology
Heather Jo Jensen, clinical supervision, amplification, medical audiology
Jan Kelley-King, American Sign Language, deaf education

Course Descriptions

Communicative Disorders and Deaf Education (COMD), pages 592-596.
Department of Computer Science

Department Head: Donald H. Cooley
Location: Main 414
Phone: (435) 797-2451
FAX: (435) 797-3265
E-mail: usucs@cs.usu.edu
WWW: http://www.cs.usu.edu/

Associate Head and Coordinator for Graduate Programs in Computer Science:
Stephen J. Allan, Main 420, (435) 797-2587

Undergraduate Advisor:
Myra Cook, Main 424, (435) 797-8019, myra.cook@usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), and Doctor of Philosophy (PhD) in Computer Science; Master of Computer Science (MCS)

Undergraduate emphases: BS, BA—Science, Digital Systems, Information Systems, Bioinformatics, Information Technology

Graduate specializations: MS—Artificial Intelligence, Information Systems, Parallel Systems, Software Engineering

Accreditation: The Computer Science undergraduate program (Science, Digital Systems, and Information Systems emphases) is accredited by the Computing Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; telephone (410) 347-7700.

Undergraduate Programs

Objectives

The core objective of the department is to fulfill its mission, as defined in its mission statement. A detailed description of all department objectives is given under the department’s website: http://www.cs.usu.edu/. The outcome objectives for undergraduates are as follows.

Learning Objectives: Undergraduate Outcomes
All students graduating with a bachelor’s degree in Computer Science from Utah State University will be expected to show mastery in the following.

1. Graduates will be proficient in programming in at least two programming languages which have significance in industry.

2. Graduates will master the core curriculum in:
   a. Data Structures and Algorithms
   b. Computer Architecture and Organization
   c. Programming Languages
   d. Operating Systems
   e. Software Engineering

3. Graduates will understand the practices and dynamics required to develop software, whether it be a single program or a major software product developed in a team environment.

4. Graduates will gain proficiency in the use of mathematical tools, including calculus, elementary statistics, and probability.

5. Graduates will have sufficient mastery of fundamental knowledge to be lifelong learners in computer science.

6. Graduates will understand the social and ethical issues which face computer scientists, and thus be able to contribute in a positive and productive manner to society.

7. Graduates will be able to communicate information effectively, both in writing and orally.

The course of study offered by the Department of Computer Science is directed primarily toward developing the problem solving skills of its students. This, in conjunction with the understanding of computers and computer systems provided by coursework, will enable a graduate of the program to apply his or her knowledge to finding solutions to problems that arise in the science, business, industry, government, and education sectors.

Students who have the ability to think analytically and creatively will find a challenging and exciting future in computer science.

Opportunities for practical applications of computer science skills are available with members of the computer science faculty who are engaged in research and consultation work both on and off campus.

Assessment

The Computer Science Department has an ongoing assessment process that it highly values. Faculty members devote much of their time and resources to frequent assessment of the level or degree to which stated objectives are being met, the objectives themselves, and the departmental mission statement. The department then uses these results to establish priorities and guide the program. For further information, go to http://www.cs.usu.edu/ and click on assessment.

Computer Science

Computer Science deals with information structures and processes as they are represented and implemented in modern high-speed digital computers, and with information processing systems designed to implement useful applications of computing.

The program in computer science attempts to provide a solid foundation of knowledge about computers and to teach a mode of thinking which will permit continuing growth on the part of graduates. Prospective students should have an aptitude for mathematics and logic and an interest in analysis and deduction.

Computer science is one of the fastest growing fields of study in our society. Excellent employment opportunities are available to computer science graduates. All of the major corporations hire computer science graduates. Graduates in Computer Science work for numerous Utah-based corporations, as well as Microsoft, IBM, Hewlett-Packard, etc.

The Computer Science bachelor’s degree is a four-year degree with areas of emphasis in Science, Digital Systems, Information Systems, Bioinformatics, and Information Technology. In addition, by working with a departmental advisor, students may develop a plan of study tailored to their own unique career objectives.

Science Emphasis

The Science Emphasis is designed for those who plan to pursue scientific or technical careers, research, or graduate education in computer science. Students choosing the science emphasis will take courses in programming languages, advanced algorithms, and math courses in calculus, linear analysis, and multi-variable calculus. Additional courses include a variety of upper-division computer science courses, chosen in consultation with an advisor.
Department of Computer Science

Digital Systems Emphasis
The Digital Systems Emphasis is available for those interested in both the hardware and software aspects of computer systems. In addition to computer science and mathematics courses, students in this emphasis will take electrical engineering courses in electronics, circuits, digital fundamentals, microcomputer systems, and digital system design. The curriculum for students in this emphasis is similar to that for students in the computer engineering major in the Electrical and Computer Engineering Department.

Information Systems Emphasis
The Information Systems program at Utah State University offers a common core of courses through two department majors: (1) Computer Science and (2) Business Information Systems. The curricula of the individual departments differ substantially in emphasis.

The Computer Science major with an Information Systems emphasis is designed for students interested in a career as a Computer Scientist with a background in Information Sciences and Systems. Majors in this emphasis are trained in all phases of the analysis, design, and implementation of information systems. They also gain an understanding of business fundamentals. Thus, students are prepared to apply their computing expertise in a business environment. This program of study, offered within the College of Science, leads to a Bachelor of Science, Bachelor of Arts, or Master of Science degree in Computer Science.

The Business Information Systems major, Management Information Systems emphasis, is offered in the Business Information Systems Department, College of Business (see pages 199-202). The Bachelor of Science or Bachelor of Arts program is designed for students interested in business careers as information specialists, systems analysts, network managers, application programmers, and information systems managers in business and industry. BIS majors take required courses in analysis and design, Internet management, telecommunications, decision support systems, spreadsheet and database applications, and information systems projects. All graduates are required to complete a common core of business subjects. The College of Business is accredited by the American Assembly of Collegiate Schools of Business. The department also offers a Master of Science in Business Information Systems with a specialization in Management Information Systems. See page 203 for additional details.

Bioinformatics Emphasis
The Bioinformatics Emphasis is designed for students who wish to pursue careers in the computer science aspects of bioinformatics. Students in this emphasis gain a strong background in core computer science areas, such as programming, theory of computing, and software development. In addition, they follow a course of study in biology, chemistry, and statistics. Through this background and course of study, students are provided with the computational skills and the scientific understanding necessary for work in bioinformatics.

Information Technology Emphasis
The Information Technology Emphasis trains students in all phases of analysis, design, and implementation of information technology. It also gives students expertise in the theory and application of information technology. At the same time, this emphasis provides students with a strong background in business principles, including accounting, finance, marketing, and human resource management. Students in the Information Technology emphasis are prepared for careers that straddle information technology and business, in both the private and public sectors.

Undergraduate Research
The Computer Science Department provides opportunities for undergraduates to participate in research projects. Additionally, a student may register for CS 4950 (Undergraduate Research, 1-4 credits) to receive credit for their research. To learn about research opportunities, students should contact Computer Science faculty members. Students may work on a project of their own under faculty supervision, or they may do research as part of a faculty member’s research team. For further information, contact Dan Watson, the department’s coordinator of undergraduate research, at (435) 797-2440 or watson@cs.usu.edu.

Department and General College of Science Requirements
To fulfill the University Studies requirements, majors in computer science must complete a total of at least 30 semester credits in writing, languages, humanities, arts, and/or social sciences. Courses taken to meet the University Studies requirements, if applicable, may also be counted to meet this departmental requirement. Students must work closely with their advisor to meet both these requirements.

Bachelor of Science Core Requirements
Students working toward the Bachelor of Science degree in Computer Science must complete the following:

1. One year of calculus, including MATH 1210 and 1220. Students in the Information Technology Emphasis may substitute MATH 1100.
3. One of the following year-long science sequences: (1) BIOL 1610, 1620 (required for Bioinformatics Emphasis); (2) CHEM 1210, 1215, 1220, 1225; (3) PHYS 2210, 2220 (required for Digital Systems Emphasis); (4) PHYS 2110, 2120 (available for Information Technology Emphasis only); or (5) GEO 1110, 3200. The sequence chosen must be outside the student’s department.

Requirements
Summary of Departmental Admission and Retention Requirements
Admission requirements of the Department of Computer Science for freshmen are the same as those described for the University on pages 16-20. Transfer students with a 2.5 GPA may apply for admission to the department.

Before a student can register for a Computer Science course, he or she must earn a grade of C- or better in all prerequisite courses. All required classes for the major must be completed with a grade of C- or better. Required courses, regardless of department, may not be taken pass-fail, and a Computer Science major must have advanced standing or written permission to register for Computer Science courses or Electrical and Computer Engineering courses at the 3000-level or above.
In addition to completing the required courses listed below, students must comply with the following regulations, in order to graduate with a bachelor’s degree in Computer Science.

1. Students must maintain a minimum cumulative GPA of 2.5. The cumulative GPA will be computed using all USU credits, as well as transfer credits (if those transfer credits are applied to any USU requirements, including major requirements).

2. Students must attain a minimum grade of C- in all courses fulfilling Computer Science major requirements.

3. Students may have no more than six repeats among courses fulfilling Computer Science major requirements. A grade of WF is considered as a repeat. If a course is repeated, the final grade achieved will be used in determining a student’s advanced standing GPA.

4. Students may have no more than one 5000-level Computer Science course with a grade less than C- on their transcript.

Courses Required for Advanced Standing
Students must achieve a minimum cumulative GPA of 2.5 and a grade of C- or better in one of the following core emphasis course sequences, or their equivalent, as determined by the Computer Science Department:

**Science Emphasis**
CS 1400 Introduction to Computer Science—CS 1 (F,Sp,Su) .............. 3  
CS 1405 Introduction to Computer Science—CS 1 Lab (F,Sp,Su) .............. 1  
CS 1410 (QI) Introduction to Computer Science—CS 2 (F,Sp,Su) .............. 3  
CS 2420 (QI) Algorithms and Data Structures—CS 3 (F,Sp,Su) .............. 3  
CS 2450 (CI) Software Engineering (F,Sp) ............................................. 3  
MATH 3000 Undergraduate Seminar (F,Sp) ............................................. 1  
MATH 1210 (QL) Calculus I (F,Sp,Su) ............................................. 4  
MATH 1220 (QL) Calculus II (F,Sp,Su) ............................................. 4  
MATH 3310 Discrete Mathematics (F,Sp,Su) ............................................. 4  

**Digital Systems Emphasis**
CS 1400 Introduction to Computer Science—CS 1 (F,Sp,Su) .............. 3  
CS 1405 Introduction to Computer Science—CS 1 Lab (F,Sp,Su) .............. 1  
CS 1410 (QI) Introduction to Computer Science—CS 2 (F,Sp,Su) .............. 3  
CS 2420 (QI) Algorithms and Data Structures—CS 3 (F,Sp,Su) .............. 3  
CS 2450 (CI) Software Engineering (F,Sp) ............................................. 3  
CS 3000 Undergraduate Seminar (F,Sp) ............................................. 1

CS 2450 (CI) Software Engineering (F,Sp) ............................................. 3  
CS 2550 Computer Organization (F,Sp) ................................................ 3  
CS 3000 Undergraduate Seminar (F,Sp) ............................................. 1  
MATH 1100 (QL) Calculus Techniques (F,Sp,Su) ............................................. 3  

For a more complete statement of requirements, please contact the department directly. Requirements may change from time to time.

**Bachelor of Science Degree**

The department offers a degree program with emphases in Science, Digital Systems, Information Systems, Bioinformatics, and Information Technology. The objectives are to train computer scientists who can relate to science, computer design, or information-based business disciplines. Other areas of emphasis will be considered on an individual basis.

**First Semester Schedule (15 credits)**
Depending upon emphasis, a new student’s first semester schedule is configured from the following:
CS 1400 Introduction to Computer Science—CS 1 ............................................. 3  
CS 1405 Introduction to Computer Science—CS 1 Lab ............................................. 1  
MATH 1210 (QL) Calculus I (for Science, IS, DS, or BI Emphasis) ............................................. 4 (4 cr) or  
MATH 1100 (QL) Calculus Techniques (for IT Emphasis) ............................................. 3 or 4  
University Studies ............................................. 7-8  

**COMPUTER SCIENCE REQUIRED COURSES**

**Science Emphasis**
CS 1400 Introduction to Computer Science—CS 1 (F,Sp,Su) .............. 3  
CS 1405 Introduction to Computer Science—CS 1 Lab (F,Sp,Su) .............. 1  
CS 1410 (QI) Introduction to Computer Science—CS 2 (F,Sp,Su) .............. 3  
CS 2420 (QI) Algorithms and Data Structures—CS 3 (F,Sp,Su) .............. 3  
CS 2450 (CI) Software Engineering (F,Sp) ............................................. 3

Extra University Studies course .................................................... 3
Advisor-approved elective course .................................................. 3

Minor
Requirements for a minor in computer science are listed below. Before beginning any minor, a student must meet with a departmental advisor and file an approved minor application form with the Computer Science Department.

Computer Science Minor (16-18 credits)
A. Required Courses (10 credits)
CS 1400 Introduction to Computer Science—CS 1 (F,Sp,Su) ............... 3
CS 1405 Introduction to Computer Science—CS 1 Lab (F,Sp,Su) ........ 1
CS 1410 (QI) Introduction to Computer Science—CS 2 (F,Sp,Su) ....... 3
CS 2420 (QI) Algorithms and Data Structures—CS 3 (F,Sp,Su) ....... 3

B. Computer Science Electives (6-8 credits)
Two additional CS classes must be selected from the following:
CS 2450 (CI) Software Engineering (F,Sp) ...................................... 3
CS 2550 Computer Organization (F,Sp) ......................................... 3
CS 2810 Computer Organization and Architecture (F,Sp) ............. 3
CS 3100 Operating Systems and Concurrency (F,Sp) ....................... 3
CS 4700 Programming Languages (F,Sp) ...................................... 3
Any CS class numbered 5000 or above ........................................ 3 or 4
At least one of these two electives must be numbered at the 3000 level or above.

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through
original, independent work. Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/  

Additional Information  
For more information about requirements for the Computer Science major and minor, see the major requirement sheet, available from the Computer Science Department, or online at: http://www.usu.edu/ats/majorsheets/  

Graduate Programs  
Computer science deals with the programming, use, management, and organization of computers. Graduate students specialize in many different areas, several of which have strong ties to other disciplines such as mathematics, computer engineering, statistics, accounting, and business administration.  

Admission Requirements  
Applicants for admission to the graduate program should have a bachelor’s degree in computer science or extensive experience in computing. Normally, a score of at least 640 on the quantitative test of the general GRE is required for admission to the MS, and a score of at least 700 is required for admission to the PhD or MCS. For scores less than these, applicants must show other strengths in their backgrounds to be considered for admission. The GRE computer science subject exam is not required for admission. Those who do take the GRE computer science subject exam will have preference in consideration for the award of financial aid. Decisions on financial aid are made on or near March 15 for the following fall semester.  

Course Requirements  
In addition to the specific departmental admission and degree requirements described in this section, students are advised that they must also meet all Graduate School requirements as described in the Graduate School section of this catalog. Please note that departmental requirements change from time to time, so students should work closely with their advisor in designing their graduate program. Graduate-level courses outside the department may be acceptable for the graduate degree. In all cases, approval of the candidate’s graduate committee should be obtained before registering for such courses.  

Graduate students in the master’s degree programs who have not taken or passed at the 50th percentile the computer science GRE subject exam are required to meet departmental placement requirements before completion of their first year. Students who have not met this requirement after the first year, as a minimum, will not be eligible for department-funded financial aid and cannot submit their program of study. In some circumstances, students will be terminated in the program. The department placement requirement is met in one or a combination of the following three ways:  

1. Pass the placement exam in Algorithms and Data Structures, as well as two of the following five placement exams: Computer Architecture and Organization, Operating Systems, Automata, Programming Languages/Compilers, and Software Engineering.  
2. Complete CS 2420 (algorithms and data structures) with a grade of at least B-. Also complete with a grade of at least B- two of the following courses: CS 2810 or ECE 5750 (architecture); CS 3100 (operating systems); CS 4700 or 5300 (programming languages); and CS 2450, 5370, or 6370 (software engineering).  
3. Show on an official transcript from an accredited college or university the completion of three courses deemed by the department to be equivalent to its placement courses. These must be semester-based courses of at least 3 credits, and the corresponding grade must be at least a B-.  

Master of Science (MS)  
Whether Plan A, Plan B, or Plan C (see School of Graduate Studies general requirements), all MS/CS students must meet the following general requirements:

1. Complete four Computer Science courses numbered between 6000 and 6950. CS 6250 and 6900 are not accepted for these four courses. CS 6950 can count as only one of these four courses, and in that case must be taken for at least 3 credits in a single semester.
2. Complete 1 credit of CS 6900.

No more than 3 total credits in CS 5950, 6950, and 7950 and 1 credit of CS 6900 may be used to satisfy the MS degree requirements. CS 6250 cannot be used to meet MS coursework requirements. A maximum of 15 credits of committee-approved coursework below the 6000-level may be used for the MS degree.

Students completing a Plan A MS degree must fulfill the following requirements:

1. Complete at least 24 credits of graduate coursework. The total GPA must be at least 3.0, and no more than two class grades below B- and none below C may be included.
2. Successfully meet the departmental placement requirement.
3. Successfully complete and submit a graduate thesis proposal.
4. Successfully complete and defend a graduate thesis, based on original work (CS 6970, 6 credits).

Students completing a Plan B MS degree must fulfill the following requirements:

1. Complete at least 32 credits of graduate coursework. The total GPA must be at least 3.0, and no more than two class grades below B- and none below C may be included.
2. Successfully meet the departmental placement requirement.
3. Successfully complete and submit a graduate report proposal.

4. Successfully complete and defend a graduate report (CS 6970, 2 credits).

**Students completing a Plan C MS degree** must fulfill the following requirements:

1. Complete at least 37 credits of graduate coursework. The total GPA must be at least 3.0, and no more than two class grades below B- and none below C may be included. CS 6970 cannot be included.

2. Successfully meet the departmental placement requirement.

3. Successfully complete one pair of courses representing a sequence offered by the department. The sequences include:
   - CS 5050 and 6050; CS 5200 and 6200; CS 5300 and 6300;
   - CS 5600 and 6600; CS 5650 and 6650; CS 5700 and 6700;
   - CS 5800 and 7670; CS 6100 and 7100; CS 6450 and 7450;
   - two of CS 5370 or 6370, CS 7350, and 7380; two of CS 5500, 6500, 6550, and 7550; two of CS 5650, 6630, 6650, 7650, and 7680; and two of CS 5660, 6570, and 6670.

**Master of Computer Science (MCS)**

The Master of Computer Science (MCS) is a terminal degree with coursework requirements similar to the PhD, but lacking the PhD’s requirement for original research. Students completing an MCS degree must fulfill the following requirements:

1. Complete at least 60 credits of graduate coursework beyond the BS/CS or 30 credits of graduate coursework beyond the MS/CS with a minimum class grade of B- and a minimum cumulative GPA of 3.2.

2. No more than 15 credits of coursework numbered below 6000 may be used for the MCS.

3. Complete at least 12 credits of 7000-level computer science coursework.

4. Successfully meet the departmental placement requirement.

5. Successfully complete and submit a research report proposal.

6. Successfully complete and defend a research report, based on original work (CS 7970, 6 credits).

7. Complete 1 credit of CS 6900.

**Doctor of Philosophy (PhD)**

The Doctor of Philosophy in Computer Science is, above all else, a degree of quality. Simply completing a number of graduate courses or years of study is not sufficient to receive the degree. The successful candidate must demonstrate a breadth of understanding in computer science, as well as a depth of understanding in his or her chosen area(s) of emphasis. Also, students must show an ability to do creative research. This research should be carried out over a significant period of time (i.e., at least one year or three semesters). Thus, each successful PhD candidate will produce a significant piece of original research, presented in a written dissertation and defended in an oral examination. This work should be of such quality that one or more journal or conference articles can be derived from it.

**Students completing a PhD/CS must fulfill the following requirements:**

1. Complete at least 90 credits of graduate coursework (including at least 27 credits of dissertation/research) beyond a BS/CS or at least 60 credits (including at least 27 credits of dissertation research) beyond an MS/CS with a minimum class grade of B- and a minimum cumulative GPA of 3.5.

2. If an MS/CS is completed first, then no more than 15 credits of the 60 credits required for the PhD may be taken in coursework numbered below the 6000 level. If an MS/CS is not completed first, then no more than 21 credits of the 90 credits required for the PhD may be taken in coursework numbered below the 6000 level.

3. Complete at least 12 credits of 7000-level computer science coursework.

4. Complete 2 credits of PhD Seminar (CS 7900).

5. Complete 9 credits of department-approved courses outside the department.

6. Pass a set of comprehensive written examinations and an oral examination showing depth and breadth of knowledge in computer science and the student’s area(s) of emphasis.

7. Successfully complete and defend a research proposal.

8. Successfully complete and defend a dissertation (CS 7970, for at least 27 credits).

**Financial Assistance**

Applicants for admission will automatically be considered for financial aid, with no need for additional application procedures. Continuing students will be requested to apply for aid during the spring semester. Acceptance into the program does not guarantee financial assistance.

**Computer Science Faculty**

**Professors**
- Scott R. Cannon, parallel processing, real-time systems, biomedical applications
- Heng-Da Cheng, image processing, artificial intelligence, parallel processing, computer vision, fuzzy logic, VLSI algorithms and architectures, neural networks
- Donald H. Cooley, fuzzy logic, evolutionary algorithms, neural networks, multimedia systems

**Professor Emeritus**
- Wendell L. Pope, data structures, automatic software generation, programming languages

**Associate Professors**
- Stephen J. Allan, parallel processing, parallel programming, recognition of parallelism, program optimization
- Vicki H. Allan, instruction-level parallelism, register allocation, software pipelining, program optimization
- Stephen W. Clyde, software engineering, object orientation, distributed systems, database theory, multimedia systems
- Nicholas S. Flann, machine learning, artificial intelligence
- Daniel W. Watson, parallel and heterogeneous computing, interconnection networks
Department of Computer Science

Associate Professors Emeritus
Nelson T. Dinerstein, analysis and construction of information systems, database management systems, applications of small computers
Larre N. Egbert, scientific computing, computer graphics
Gregory W. Jones, theory of computing, software engineering

Assistant Professors
Robert F. Erbacher, computer graphics, visualization, computer security, bioinformatics, GUIs, systems
Jerry James, concurrency, formal methods, distributed systems, operating systems
Minghui Jiang, bioinformatics and computer biology, design and analysis of algorithms, computational geometry
Vladimir Kulyukin, assistive technology, robotics

Seungjin Lim, data mining, semi-structured databases, bioinformatics
Xiaojun Qi, image processing, data mining
Changhui Yan, bioinformatics, data mining, machine learning, computational biology

Lecturers
Linda Duhadway, computer science education
Dean Mathias, computer graphics

Interdepartmental Program in Ecology

Director: James A. MacMahon
Location: Natural Resources 314A
Phone: (435) 797-2555
FAX: (435) 797-3872
E-mail: jam@cc.usu.edu
WWW: http://www.usu.edu/ecology/

Assistant Director for Administrative Affairs:
Marvin C. Bennett, Natural Resources 314B, (435) 797-2090, marvb@cc.usu.edu

Degrees offered: Master of Science (MS) and Doctor of Philosophy (PhD) in the following departments: Biology; Plants, Soils, and Biometeorology; Watershed Sciences; and Wildland Resources

Graduate Program

The ecology program at Utah State University is administered by the interdepartmental Ecology Center. Its goals are to promote research and graduate education in the science of ecology and to provide expert, professional information and advice for decision makers considering actions that affect the environment. The research carried out by the center’s associates covers the full spectrum of ecology on several continents, but most of it is centered in the montane and desert regions of the western United States.

Students earn their degrees in ecology while maintaining residence in one of the participating departments; the center itself does not grant degrees. The candidate selects and is assigned a major professor from the department appropriate to his or her interests.

Degree Requirements

Requirements for graduate degrees in ecology include the University and departmental degree requirements, as well as the Ecology Center requirements outlined below, which are formulated by the Ecology Center Faculty Advisory Committee. This committee is comprised of faculty representatives, designated by the respective department heads, from the departments of Biology; Environment and Society; Geology; Plants, Soils, and Biometeorology; Watershed Sciences; and Wildland Resources. The Ecology Center director chairs the committee.

The ecology MS and PhD are research degrees requiring a research thesis or dissertation. The following course requirements for each of these degrees fall into two categories. The first is a general science category. Students receiving graduate degrees in ecology are expected to have some breadth and sophistication in modern science. The second category includes ecology course requirements. These are, for the most part, general requirements, with the specific courses taken by each student selected by his or her graduate committee and tailored to his or her needs and professional goals.

Ecology MS and PhD Degrees General Science Requirements

For further details, see the USU Ecology Center website: http://www.usu.edu/ecology/

Mathematics, Chemistry, Physics, and Computer Science

By its very nature, ecology must draw upon knowledge from most branches of science. As a result, at least a reasonable facility with fundamental mathematics and physical sciences must be attained by students, since these concepts have expression throughout the sciences. In order to assure a minimal comprehension in these areas, students receiving graduate degrees in ecology are required to have had the following at some point in their university careers:

1. Equivalent of mathematics through one semester of calculus.
2. Equivalent of at least a one-semester overview course in physics.
3. Chemistry through organic.
4. One year of introductory statistics and one graduate-level statistics course.

These courses are the minimum requirements for the MS and PhD degrees. The committee strongly recommends developing greater facility by taking at least a full year of calculus; one or more courses from the set of three including linear algebra, differential equations, and multi-variable calculus; and a full year of professional-level physics.

Biology

The following are required of all ecology graduate students, and must be taken at some point during their university career:

1. Genetics or evolution, one course.
2. One course in animal physiology for students emphasizing animal ecology.
3. One course each in plant physiology and soils for students emphasizing plant ecology.

Ecology Course Requirements

Master of Science

1. Attendance in Ecology Seminar (AWER/BIOL/ENVS/FRWS 6870) is required each semester in residence, but students should only register each fall.
2. A one-semester course in Graduate General Ecology (AWER BIOL/ENVS/FRWS 6960) is also required.
3. One course must be taken in each of two functional (core) blocks. The three available blocks are shown on the following page.

Doctor of Philosophy

1. Attendance in Ecology Seminar (AWER/BIOL/ENVS/FRWS 6870) is required each semester in residence, but students should only register each fall.
2. A one-semester course in Graduate General Ecology (AWER BIOL/ENVS/FRWS 6960) is also required.
3. One course must be taken from each functional (core) block. Students continuing from the MS to the PhD degree can apply block courses taken for the MS degree to the PhD requirement. The three available blocks are shown on the following page.
# Interdepartmental Program in Ecology

Undergraduate Advisor:
Sue Young, Business 615, (435) 797-2290, syoung@econ.usu.edu

Graduate Program Director:
Keith R. Criddle, Business 616, (435) 797-2296, kcriddle@econ.usu.edu

Degrees offered: Bachelor of Science (BS) in Agribusiness; Bachelor of Arts (BA) in International Agribusiness; BS in Agricultural Economics; Master of Science (MS) in Applied Economics; BS, BA, MS, Master of Arts (MA), and Doctor of Philosophy (PhD) in Economics; participates in Master of Business Administration (MBA); participates in International MBA in Food and Agribusiness (offered through the Royal Agricultural College in Cirencester, England). The Agribusiness and Economics majors are structured to facilitate a dual major with companion majors within or outside the College of Business.

Undergraduate emphases: BS, BA in Economics—Economic Theory, Managerial Economics, Prelaw Economics

Graduate specializations: MS in Applied Economics—Agricultural Economics, Natural Resource Economics, and Regional Economic Development

The Department of Economics is jointly administered by the College of Agriculture and the College of Business. Programs in both the College of Agriculture and the College of Business are offered.

Undergraduate Programs

Objectives

Undergraduate economics provides students with the basic intellectual framework to understand and analyze economic problems and to make informed decisions. A basic understanding of economics is essential to becoming a well-informed citizen, as well as a successful business or public leader.

Admission Requirements

Freshmen who meet the admission requirements and are accepted in good standing by the University are eligible for admission to the College of Agriculture, the College of Business, and the Department of Economics. All transfer students, whether transferring from within Utah State University or from other colleges and universities, must have an overall minimum GPA of 2.2 to be accepted as majors in the department. Additional requirements may apply for students who seek to be admitted to a dual major.

New students wishing to major in the Department of Economics may do so by listing one of the departmental majors on their application when they apply for admission to USU. Students enrolled at USU may change to a departmental major by applying directly to the College of Agriculture, the College of Business, or the Department of Economics.

Graduation Requirements

To receive a bachelor’s degree in Agribusiness, Agricultural Economics, Economics, or International Agribusiness, students must complete all University requirements and the college and departmental requirements for their specific major as noted below. Students may not obtain more than one major or minor in the Department of Economics.

Agribusiness Major

The Agribusiness major provides a foundation for employment in the agricultural sectors and rural regions and in businesses serving agriculture and rural regions, such as banks and financial institutions, production, marketing and buying cooperatives, value-added food producers, real estate and land management, agricultural chemical production and sales, and farms and ranches. Graduates of this program are employed in a variety of agribusiness operations throughout the United States. Agribusiness graduates have achieved prominence in positions in wholesale and retail sales and service, stock and commodity brokerage, real estate appraisal, banking and farm credit, insurance, and in farm and ranch operations. Classwork provides training in basic business and economics, as well as the specific management tools required for agricultural enterprises.

To graduate with a bachelor’s degree in Agribusiness, a student must have a major GPA of 2.5 or higher, as well as a grade of C or better in each course required for the major. A C grade or better in ECON 1500, MATH 1100, STAT 2300, and PSY 1010 or SOC 1010 and an overall GPA of 2.67 or higher is required for admission into some required BA and MHR courses. Agribusiness majors with a dual major must satisfy the admission and graduation requirements of both majors. All required courses must be taken for a letter grade. ECON 3000, 4950H, 4990, and 5950 cannot be used to meet economics elective requirements.

Agribusiness Major Requirements

All courses required for the Agribusiness Major should be taken for a letter grade. Students must earn a grade of C or better in each course.

Required Courses:
ACCT 1010 Survey of Accounting I (F,Sp,Su) .................................................3
ACCT 2010 Survey of Accounting II (F,Sp,Su) .........................................................3
ASTE 3090 Computer Applications in Agriculture (F) (3 cr) or
BIS 2100 Principles of Management Information Systems (F,Sp,Su) (3 cr) .........3
ASTE 3050 (CI) Technical and Professional Communication Principles in Agriculture (F,Sp) (3 cr) or
BIS 2200 (CI) Business Communication (F,Sp,Su) (3 cr) ...............................3
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp,Su) .................................................................3
ECON 1550 (BSS) Introduction to Environmental and Natural Resource Economics (F) (3 cr) or
ECON 2010 (BSS) Introduction to Microeconomics (F,Sp) (3 cr) ..................3
ECON 3030 (DSS) Introduction to Agribusiness Management (Sp) ..................3
ECON 3050 (DSS) Introduction to Agribusiness Management (Sp) .............3
ECON 4010 (DSS) Managerial Economics (F,Sp) .................................................3
ECON 4030 (CI) Agribusiness Finance (F) ............................................................3
ECON 5030 Agricultural Marketing and Price Analysis (F) ..........................3
ECON 5050 Farm and Ranch Planning and Analysis (Sp) ............................3
ECON 5350 (CI) Agribusiness, Cooperatives, and Management (Sp) ........3
MATH 1050 (QL) College Algebra (F,Sp,Su) ..........................................................4
MATH 1100 (QL) Calculus Techniques (F,Sp,Su) .................................................3
MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su) ...............3
STAT 2300 (QL) Business Statistics (F,Sp,Su) ......................................................4
College of Agriculture electives’ ..................................................................12
Department of Economics

For a suggested four-year plan, see page 244.

*These 12 credits must be selected from courses offered by departments within the College of Agriculture, excluding courses offered by the Department of Economics. Six of the 12 credits must be chosen from upper-division courses (i.e., courses numbered 3000 or above).

Agribusiness Major, Business Option

All courses required for the Agribusiness Major, Business Option should be taken for a letter grade. Students must earn a grade of C or better in each course. Students may be eligible for a second major in Business. For further information, contact an advisor. Note: Student transcripts and diplomas will list only the Agribusiness Major, not the Business Option.

Required Courses:

- ACCT 2010 Survey of Accounting I (F,Sp,Su) ............................................................... 3
- ACCT 2020 Survey of Accounting II (F,Sp,Su) ............................................................. 3
- BA 3400 (QI) Corporate Finance (F,Sp,Su) ................................................................. 3
- BA 3500 Fundamentals of Marketing (F,Sp,Su) .......................................................... 3
- BA 3700 Operations Management (F,Sp,Su) .............................................................. 3
- BIS 2100 Principles of Management Information Systems (F,Sp,Su) ......................... 3
- BIS 2200 (CI) Business Communication (F,Sp,Su) ..................................................... 3
- ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp,Su) ................................................................. 3
- ECON 1550 (BSS) Introduction to Environmental and Natural Resource Economics (F) (3 cr) or ECON 2010 (BSS) Introduction to Microeconomics (F,Sp) (3 cr) ................................. 3
- ECON 3000 (DSS) Introduction to Agribusiness Marketing (F) .................................. 3
- ECON 3050 (DSS) Introduction to Agribusiness Management (Sp) ........................... 3
- ECON 4010 (DSS) Managerial Economics (F,Sp)...................................................... 3
- ECON 4030 (CI) Agribusiness Finance (F) ................................................................. 3
- ECON 5030 Agricultural Marketing and Price Analysis (F) ........................................ 3
- ECON 5050 Farm and Ranch Planning and Analysis (Sp) ........................................... 3
- ECON 5100 Legal and Ethical Environment of Business (F,Sp,Su) ............................ 3
- ECON 5330 (QI) Applied Econometrics (Sp) ............................................................... 3
- ECON 5350 (CI) Agribusiness, Cooperatives, and Management (Sp) .................... 3
- MATH 1050 (QL) College Algebra (F,Sp,Su) .............................................................. 3
- MATH 1100 (QL) Calculus Techniques (F,Sp,Su) ....................................................... 3
- MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su) ............................ 3
- STAT 2300 (QL) Business Statistics (F,Sp,Su) ......................................................... 4

For a suggested four-year plan, see page 245.

Agribusiness Major, Agricultural Systems Option

All courses required for the Agribusiness Major, Agricultural Systems Option should be taken for a letter grade. Students must earn a grade of C or better in each course. Students who complete this option are eligible to earn a dual major in Agricultural Systems Technology. Note: Student transcripts and diplomas will list only the Agribusiness Major, not the Agricultural Systems Option.

Required Courses:

- ACCT 2010 Survey of Accounting I (F,Sp,Su) ............................................................... 3
- ACCT 2020 Survey of Accounting II (F,Sp,Su) ............................................................. 3
- BIS 2010 Introduction to Agricultural Technologies (F) .......................................... 3
- BIS 2200 Electricity in Agricultural Systems (Sp) ..................................................... 3
- ASTE 3030 Metal Welding Processes and Technology in Agriculture (F) (3 cr) or ASTE 4100 Agricultural Structures and Environment (Sp) (3 cr) ......................... 3
- ASTE 3050 (CI) Technical and Professional Communication Principles in Agriculture (F,Sp) ................................................................................. 3
- ASTE 3080 Compact Power Units for Agricultural and Turfgrass Applications (Sp) (3 cr) or ASTE 3200 Irrigation Principles and Practices (Sp) (3 cr) ......................................... 3
- ASTE 3090 Computer Applications in Agriculture (F) .............................................. 3
- ASTE 3600 (QI) Management of Agricultural Machinery Systems (Sp) ................... 3
- ASTE 5260 (CI) Environmental Impacts of Agricultural Systems (F) ...................... 3
- MATH 1050 (QL) College Algebra (F,Sp,Su) .............................................................. 3
- MATH 1100 (QL) Calculus Techniques (F,Sp,Su) ....................................................... 3

For a suggested four-year plan, see page 244-245.

Agricultural Economics Major

The Agricultural Economics major emphasizes the development of quantitative skills in and a deeper understanding of economic theory. While this program provides a solid base for individuals desiring careers in agricultural businesses, it is also an excellent preparation for graduate studies in economics, agricultural economics, natural resources, business, or law. The Agricultural Economics degree provides an excellent background for work in federal, state, and local government, as well as in the private sector. Graduates of this program are now working in positions involving the analysis of prices and markets, preparation of economic feasibility studies, and preparing economic forecasts.

To graduate with a bachelor’s degree in Agricultural Economics, a student must have a major GPA of 2.5 or higher, as well as a grade of C or better in each course required for the major. All required courses must be taken for a letter grade.

Agricultural Economics Major Requirements

All courses required for the Agricultural Economics Major should be taken for a letter grade. Students must earn a grade of C or better in each course.

Required Courses:

- ACCT 2010 Survey of Accounting I (F,Sp,Su) ............................................................... 3
- ACCT 2020 Survey of Accounting II (F,Sp,Su) ............................................................. 3
- AS 1200 Computer Applications in Agriculture (F) .................................................. 3
- AS 3030 Metal Welding Processes and Technology in Agriculture (F) (3 cr) or AS 4100 Agricultural Structures and Environment (Sp) (3 cr) ......................... 3
- AS 3050 (CI) Technical and Professional Communication Principles in Agriculture (F,Sp) ................................................................................. 3
- AS 3080 Compact Power Units for Agricultural and Turfgrass Applications (Sp) (3 cr) or AS 3200 Irrigation Principles and Practices (Sp) (3 cr) ......................................... 3
- AS 3090 Computer Applications in Agriculture (F) ................................................. 3

For a suggested four-year plan, see page 245.
Department of Economics

Select three of the following courses:
ECON 5020 (CI) Economics and Public Policy (Sp) .................. 3
ECON 5050 Farm and Ranch Planning and Analysis (Sp) ........... 3
ECON 5350 (CI) Agribusiness, Cooperatives, and Management (Sp) ....... 3
ECON 5560 Natural Resource and Environmental Economics (Sp) .... 3
ECON 5950 (CI) Senior Project (Sp) ........................................ 3

For a suggested four-year plan, see pages 246-247.

International Agribusiness Major

The International Agribusiness major combines training in business, language skills, and economics courses that emphasize the role of the trade and development issues that are critical to operating in the increasingly internationalized agribusiness sector. The program provides a foundation for employment in agricultural and agribusiness sectors and in banks and financial institutions, production, marketing and buying cooperatives, value-added food producers, agricultural chemical production and sales, and farms and ranches in domestic and international settings. Classwork provides training in basic business and economics, as well as the specific management tools required for agricultural enterprises.

To graduate with a bachelor’s degree in International Agribusiness, a student must have a major GPA of 2.5 or higher, as well as a grade of C or better in each course required for the major. All required courses must be taken for a letter grade. For information regarding elective requirements, students should contact their academic advisor.

Economics Major

Because the Economics major provides a strong grounding in economic theory, it helps open career opportunities that involve policy analysis. The Economics major has been a very popular dual major for Finance and Accounting majors because of the added theoretical and analytical dimension that advanced studies in economics can contribute to Finance and Accounting majors. This combination is excellent preparation for students interested in advanced studies in Accounting or Finance.

The Economics major also provides students in the humanities, and social and natural sciences with an opportunity to learn policy analysis tools. Whether the students are directly interested in policy or simply interested in the impact of policy within their chosen primary major, economics introduces a robust and empirically verified paradigm for explaining the behavior of social systems and their interaction with cultural, biological, and physical resources.

To graduate with a bachelor’s degree in Economics, a student must have a minimum GPA of 2.5 in courses required for the major and a grade of C or better in each course required for the major. A C grade or better in ECON 1500, MATH 1100, STAT 2300, and PSY 1010 or SOC 1010 and an overall GPA of 2.67 or higher is required for admission into some BA and MHR courses required for the managerial emphasis. Economics majors with a dual major must satisfy the admission and graduation requirements of both majors. All required courses must be taken for a letter grade. For information regarding elective requirements, students should contact their academic advisor.

Economics Major:
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F, Sp,Su) .................. 3
ECON 2010 (BSS) Introduction to Microeconomics (F,Sp,Su) ............... 3
ECON 3400 (DSS) International Economics for Business (F,Sp,Su) ....... 3
ECON 4010 (DSS) Managerial Economics (F,Sp,Su) or
ECON 5010 Microeconomics (Sp) or
ECON 4020 Macroeconomics for Managers (F,Sp,Su) or
ECON 5000 Macroeconomics (F) or
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp,Su) .................. 3
MATH 1050 (QL) College Algebra (F,Sp,Su) ................................ 4
MATH 1100 (QL) Calculus Techniques (F,Sp,Su) .................. 3
STAT 2300 (QL) Business Statistics (F,Sp,Su) .................. 3

Upper-division ECON electives ............................................................ 6

For a suggested four-year plan, see page 247.

The Economic Theory Emphasis is designed for students who are interested in preparing for graduate studies in economics or agricultural economics and for students who are preparing for a career that requires training in quantitative economic analysis. Graduates have employment opportunities in business and government, as well as opportunities for continuing their education in graduate economics programs or in professional schools. Economists are often involved in policy analysis for government agencies and nongovernmental organizations.

Economics Major (Economic Theory Emphasis):
ACCT 2010 Survey of Accounting I (F,Sp,Su) ..................... 3
ACCT 2020 Survey of Accounting II (F,Sp,Su) ..................... 3
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp,Su) .................. 3
ECON 2010 (BSS) Introduction to Microeconomics (F,Sp) ............... 3
ECON 3400 (DSS) International Economics for Business (F,Sp,Su) ....... 3
ECON 4010 (DSS) Managerial Economics (F,Sp) .................. 3
ECON 5010 Microeconomics (Sp) ........................................... 3
ECON 5100 History of Economic Thought (Sp) .................. 3

For a suggested four-year plan, see pages 246-247.
ECON 5310 (QI) Mathematical Methods for Economics (F) ........................................ 3
ECON 5330 (QI) Applied Econometrics (Sp) ............................................................. 3
ECON 5950 (CI) Senior Project (Sp) ................................................................. 3
MATH 1050 (QL) College Algebra (F,Sp,Su) ......................................................... 4
MATH 1100 (QL) Calculus Techniques (F,Sp,Su) .................................................... 3
STAT 2300 (QL) Business Statistics (F,Sp,Su) ....................................................... 3
ECON electives (3000-level or above) ................................................................. 12

For a suggested four-year plan, see pages 247-248.

The Managerial Economics Emphasis is for students who are planning for careers in business. The program can serve as a terminal program for those planning to enter the job market on graduation or as excellent preparation for students who intend to pursue an MBA or MPA.

**Economics Major (Managerial Economics Emphasis):**

ACCT 2010 Survey of Accounting I (F,Sp,Su) ...................................................... 3
ACCT 2020 Survey of Accounting II (F,Sp,Su) ................................................. 3
BA 3400 (QL) Corporate Finance (F,Sp,Su) ....................................................... 3

MATH 1050 (QL) College Algebra (F,Sp,Su) ..................................................... 4
MATH 1100 (QL) Calculus Techniques (F,Sp,Su) ............................................ 3

For a suggested four-year plan, see page 248.

The Prelaw Economics Emphasis is for students who plan to attend law school or pursue a career related to political science, and who want to obtain a strong foundation in economics. The large number of elective credits included in this emphasis area provides enough flexibility for students to custom design their program of study to meet individual interests and educational goals. Several students have taken advantage of this flexibility to design a dual major with Economics and Political Science.

**Economics Major (Prelaw Economics Emphasis):**

ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp,Su) .................................................. 3
ECON 2010 Survey of Accounting I (F,Sp,Su) ...................................................... 3
ECON 3030 (DSS) Managerial Economics (F,Sp) ........................................... 3

ECON 5040 Managerial Economics (Sp) ..................................................... 3
MATH 1050 (QL) College Algebra (F,Sp,Su) ..................................................... 4
MATH 1100 (QL) Calculus Techniques (F,Sp,Su) ............................................ 3

POLS 1100 (BAI) United States Government and Politics (F,Sp) ............... 3
STAT 2300 (QL) Business Statistics (F,Sp,Su) ............................................... 3
ECON electives (3000-level or above) ............................................................. 6
POLS electives (3000-level or above) ............................................................ 3

For a suggested four-year plan, see pages 248-249.

**Minor Requirements**

**Economics Minor:**

ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp,Su) .................................................. 3
ECON 2010 (BSS) Introduction to Microeconomics (F,Sp) (3 cr) or
ECON 1550 (BSS) Introduction to Environmental and Natural Resource Economics (F) (3 cr) ................................................................. 3
ECON 4010 (DSS) Managerial Economics (F,Sp) (3 cr) or
ECON 5010 Microeconomics (Sp) (3 cr) ..................................................... 3
ECON electives (3000-level or above) ............................................................. 6

**Economics Teaching Minor:**

BIS 3000 Principles of Business and Marketing Education (F,Sp) ........ 1
BIS 3300 Clinical Experience I (F,Sp) (1 cr) or
BIS 4300 Clinical Experience II (F,Sp) (1 cr) ............................................. 1
BIS 4400 Business Education and Marketing Education Methods (Sp) ................................................................. 1
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp,Su) .................................................. 3
ECON 2010 (BSS) Introduction to Microeconomics (F,Sp) (3 cr) or
ECON 1550 (BSS) Introduction to Environmental and Natural Resource Economics (F) (3 cr) ................................................................. 3
ECON 3400 (DSS) International Economics for Business (F,Sp,Su) (3 cr) or
ECON 5400 International and Development Economics (F) (3 cr) ................................................................. 3
ECON 5100 History of Economic Thought (Sp) ........................................ 3
ECON 5110 (DSS) Economic History of the United States (F) .................... 3

**Agribusiness Management Minor:**

ACCT 2010 Survey of Accounting I (F,Sp,Su) ...................................................... 3
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp,Su) .................................................. 3
ECON 3030 (DSS) Managerial Economics (F,Sp) ........................................... 3
ECON 3300 (DSS) Business Statistics (F,Sp,Su) ............................................ 3
ECON 4010 (DSS) Managerial Economics (F,Sp) (3 cr) or
ECON 5010 Microeconomics (Sp) (3 cr) ..................................................... 3
ECON 4030 (CI) Agribusiness Finance (F) .................................................... 3
ECON 4030 (CI) Managerial Economics (F,Sp) ........................................... 3

**Agricultural Economics Minor:**

ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp,Su) .................................................. 3
ECON 2010 (BSS) Introduction to Microeconomics (F,Sp,Su) (3 cr) or
ECON 1550 (BSS) Introduction to Environmental and Natural Resource Economics (F) (3 cr) ................................................................. 3
ECON 4010 (DSS) Managerial Economics (F,Sp) (3 cr) or
ECON 5010 Microeconomics (Sp) (3 cr) ..................................................... 3
ECON 5030 Agricultural Marketing and Price Analysis (F) .............................................. 3

2ECON 3900, 4950H, 4990, and 5950 may not be used to meet this requirement.
3The regular calculus series (MATH 1210 and 1220) is recommended for students contemplating graduate study in economics. MATH 1210 will fulfill the MATH 1100 requirement.

**Departmental Honors**

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty...
Department of Economics

in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Financial Support

The Department of Economics, the College of Agriculture, and the College of Business award scholarships in addition to those available through the University Financial Aid Office. Information and application forms may be obtained from the college or departmental offices.

Additional Information

For more information about undergraduate programs in the Department of Economics, see the major requirement sheets, available from the department, or accessed online at: http://www.usu.edu/ats/majorsheets/

Four-year Degree Plans (8 semesters)
The following are suggested four-year plans for majors offered by the Department of Economics. Students will need to meet with their advisor periodically to ensure all requirements are being met.

Suggested Four-year Course of Study for Agribusiness Major

The following curriculum is required for the BS degree in agribusiness. Students enrolled in the agribusiness major should consult with their advisor to determine which breadth, depth, and elective courses they should complete. Each student should also consult with his or her advisor to develop an individualized plan of study that is applicable to his or her own interests.

Freshman Year (30 credits)*
Fall Semester (15 credits)
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles ................................................. 3
MATH 1050 (QL) College Algebra ........................................ 4
USU 1010 University Connections ..................................... 2
Breadth Creative Arts (BCA) course 3 ................................. 3
Elective course(s) ............................................................. 3

Spring Semester (15 credits)
ACCT 2010 Survey of Accounting I ..................................... 3
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .......... 3
MATH 1100 (QL) Calculus Techniques ............................... 3
Breadth Humanities (BHU) course 3 ............................... 3
Elective course(s) ............................................................. 3

Sophomore Year (31 credits)
Fall Semester (16 credits)
ASTE 3090 Computer Applications in Agriculture (3 cr) or
BIS 2100 Principles of Management Information Systems (3 cr) ......................................................... 3
ECON 1550 (BAI) Introduction to Environmental and Natural Resource Economics (3 cr) or
ECON 2010 (BAI) Introduction to Microeconomics (3 cr) ............................................. 3

- Breadth Physical Sciences (BPS) course ................................. 3
- Communications Intensive (CI) course ........................................ 3
- Elective courses ........................................................................... 6

#### Junior Year (29 credits)

**Fall Semester (14 credits)**
- ECON 4020 Macroeconomics for Managers (3 cr) or
- ECON 5000 Microeconomics (3 cr) .................................................. 3
- Communications Intensive (CI) course ........................................ 3
- Elective courses ........................................................................... 8

**Spring Semester (15 credits)**
- ECON 4010 (DSS) Managerial Economics (3 cr) or
- ECON 5010 Microeconomics (3 cr) .................................................. 3
- Quantitative Intensive (QI) course .............................................. 3
- Elective courses ........................................................................... 9

#### Senior Year (30 credits)

**Fall Semester (15 credits)**
- Depth Humanities and Creative Arts (DHA) course ................................. 3
- Economics upper-division elective course ......................... 3
- Elective courses ........................................................................... 9

**Spring Semester (15 credits)**
- Depth Life and Physical Sciences (DSC) course ................................. 3
- Economics upper-division elective course ......................... 3
- Elective courses ........................................................................... 9

### Suggested Four-year Course of Study for Economics Major, Economic Theory Emphasis

The following curriculum is required for the BS degree in economics with an economic theory emphasis. Students enrolled in the economics major should consult with their advisor to determine which breadth, depth, and elective courses they should complete. Each student should also consult with his or her advisor to develop an individualized plan of study that is applicable to his or her own interests.

#### Freshman Year (30 credits)

**Fall Semester (15 credits)**
- ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles .................................................. 3
- MATH 1050 (QL) College Algebra .................................................. 4
- USU 1010 University Connections .................................................. 2
- Breadth Creative Arts (BCA) course ................................. 3
- Elective course(s) ........................................................................... 3

**Spring Semester (15 credits)**
- ECON 2010 (BS) Introduction to Microeconomics .................................................. 3
- ENGL 1010 (CL1) Introduction to Writing: Academic Prose ................. 3
- MATH 1100 (QL) Calculus Techniques ............................................. 3
- Breadth Humanities (BHU) course ................................. 3
- Elective course(s) ........................................................................... 3

#### Sophomore Year (31 credits)

**Fall Semester (16 credits)**
- ACCT 2010 Survey of Accounting I .................................................. 3
- ECON 3400 International Economics for Business .................................................. 3
- STAT 2300 (QL) Business Statistics .................................................. 4
- Breadth Life Sciences (BLS) course ................................. 3
- Elective course(s) ........................................................................... 3

**Spring Semester (15 credits)**

*Students should complete the CIL exams during their freshman year.
**At least two of the required Breadth Courses must be University Studies courses having a USU prefix.

Students must complete the business core requirements, along with MHR 4880 or 4890, with a minimum GPA of 2.67. A dual major in Business must apply for admission to the major through the College of Business, as well as satisfy graduation requirements for both majors.

Students are required to complete either ASTE 3030 or ASTE 4100. Three elective credits must be substituted for whichever course is not taken.

Students who complete the business core requirements, along with MHR 4880 or 4890, with a minimum GPA of 2.67 may earn a dual major in Business, in addition to a major in Agricultural Science. Students interested in a dual major in Business must apply for admission to the major through the College of Business, as well as satisfy graduation requirements for both majors.

Students are required to complete either ASTE 3030 or ASTE 4100. Three elective credits must be substituted for whichever course is not taken.

Students must complete three of the following five courses: ECON 5200, 5050, 5300, 5560, and 5950. All of these courses, with the exception of ECON 5560, are offered during spring semester. Students selecting ECON 5560 should take ECON 5560 during the fall semester of their senior year, and take an elective course during spring semester of their senior year.

A language minor must be completed as part of the requirements for the International Agribusiness major. To fulfill this requirement, students may substitute language courses for some of the elective courses.

Any upper-division economics course will meet this requirement, except for ECON 3900, 4250, 4950, 4990, and 5950.

The regular calculus series (MATH 1210 and 1220) is recommended for students contemplating graduate studies in economics. MATH 1210 will fulfill the MATH 1100 requirement.

Graduate Programs

The MA, MS, and PhD in Economics, along with the MS in Applied Economics, are offered jointly through the College of Agriculture and College of Business. The MBA is offered through the College of Business. The International MBA in Food and Agribusiness is offered through the Royal Agricultural College (RAC), Cirencester, England.

Objectives

Economics graduate training emphasizes economic theory, critical thinking, and quantitative analysis. This foundation is a means to an end, not an end in itself; theory and quantitative methods are tools used in applied courses, in theses and dissertations, and in other research and extension activities carried out in the department.

The Master of Science and Master of Arts in Economics are intended to prepare students for doctoral studies in economics. Consequently, students are required to take the same first-year core theory and econometrics courses as the PhD students, with specialization courses in the second year. The MS in Applied Economics is a terminal degree that prepares students for positions in industry; private consulting firms; local, regional, and national policy-making agencies; private not-for-profit organizations; and community/ regional economic planning and development agencies. The Doctor of Philosophy in Economics is intended to prepare students for faculty and research positions with dual fields in Trade and Development and Natural Resource and Environmental Economics. All PhD students are required to complete these “field” sequences. Students interested in other specialties are discouraged from applying.

Admission Requirements

Applicants must have earned a bachelor’s degree from an accredited college or university, maintained a grade point average of at least 3.0 for the last 60 semester credits earned, and score in at least the 40th percentile on the Graduate Record Exam (GRE). The Graduate Management Admission Test (GMAT) is required for the International MBA in Food and Agribusiness. In addition, international applicants from non-English-speaking countries must score at least 550 on the Test of English as a Foreign Language (TOEFL). Satisfaction of these minimum admission requirements does not guarantee admission.

Applications for graduate study from students trained in disciplines other than economics are welcomed. However, all applicants are expected to have: (1) an understanding of intermediate microeconomic and macroeconomic theory, (2) a solid grounding in mathematics, (3) economics and quantitative analysis. This foundation is a means to an end, not an end in itself; theory and quantitative methods are tools used in applied courses, in theses and dissertations, and in other research and extension activities carried out in the department.

The Master of Science and Master of Arts in Economics are intended to prepare students for doctoral studies in economics. Consequently, students are required to take the same first-year core theory and econometrics courses as the PhD students, with specialization courses in the second year. The MS in Applied Economics is a terminal degree that prepares students for positions in industry; private consulting firms; local, regional, and national policy-making agencies; private not-for-profit organizations; and community/ regional economic planning and development agencies. The Doctor of Philosophy in Economics is intended to prepare students for faculty and research positions with dual fields in Trade and Development and Natural Resource and Environmental Economics. All PhD students are required to complete these “field” sequences. Students interested in other specialties are discouraged from applying.

Degree Requirements

Doctor of Philosophy in Economics

PhD students are required to: (1) complete the first-year core (ECON 7060, 7190, 7140, 7230, 7240, 7310, 7350, 7360, 7950); (2) perform successfully on a written qualifying examination based on the first-year core; (3) complete the advanced core (ECON 7150, 7250, 7320, 7330); (4) complete the International Trade and Development and Natural Resource and Environmental Economics field sequences (ECON 7400, 7500, 7510, 7800); (5) complete a research dissertation and give an oral defense of the dissertation; and (6) meet University requirements for dissertation research and total credit hours.

Master of Science in Applied Economics

To complete an MS degree in Applied Economics, students are required to: (1) complete the applied core (ECON 6000, 6060, 6100, 6300, 6330); (2) complete a specialization in: (a) agricultural economics (ECON 5300, 6030, 6040, 6250; ACCT 6350; BA 6520; MHR 5640); (b) natural resource economics (ECON 6500 and 6510), or (c) regional economic development (ECON 6700 and 6710); (3) submit and orally defend a thesis (Plan A) or research report (Plan B); and (4) complete elective class or thesis research credits to meet Plan A, B, or C graduation requirements. Plan A requires at least 30 credits and must include at least 6 thesis research credits. Plan B requires at least 30 credits and must include 2 to 3 thesis research credits. Plan C has no research component and requires at least 33 credits. (No
Department of Economics

more than 6 undergraduate credits may be used in meeting degree requirements.)

Master of Science and Master of Arts in Economics
Students are required to complete the first-year core (ECON 6000, 6060, 6100, 7140, 7240, 7310, 7350, 7360) and to submit and orally defend a thesis (Plan A) or research report (Plan B). The department also accepts Plan C, which has no research component. MA students must satisfy the foreign language requirement. Plan A requires at least 30 credits and must include at least 6 thesis research credits. Plan B requires at least 30 credits and must include 2 to 3 thesis research credits. Plan C requires at least 33 credits. (No more than 6 undergraduate credits may be used in meeting degree requirements.)

Master of Business Administration
A student may receive a College of Business Master of Business Administration degree with a specialization in an economic field by completing the MBA advanced core (see the MBA program description on pages 197-198) and 9 specialization credits. These specialization credits should be coordinated with the MBA Program director.

International MBA in Food and Agribusiness
The Department of Economics participates with the Royal Agricultural College (RAC) in Cirencester, England to offer this degree. The degree is awarded by the RAC. Students study at USU during fall semester, and then study spring semester at the RAC. Students complete a team project and a thesis. The degree is designed to prepare students to be agribusiness managers in an international environment. Applicants for admission to the International MBA are expected to have completed a common body of knowledge core at an AACSB accredited program. The common body of knowledge includes: ACCT 2010, 2020; BA 3400, 3500, and 3080 or 3700; BIS 2100; ECON 1500, 2010; MATH 1100; STAT 2300; and MHR 2050 and 3110. Alternatively, students may choose to gain the necessary competencies by attending the 18-credit Accelerated Business Core (BUS 6160), which is offered during summer semester. Required courses to be completed at USU include: ACCT 6350; ECON 6030, 6040, 6330; and BA 6520 or 4590H. During spring semester, courses in finance, marketing and advertising, human resource management, macroeconomics, business strategy, agricultural food policy, and food chain industry are taught at the RAC. Participating students pay USU tuition and are expected to complete the program in 12-18 months.

Research
The department maintains an active and productive research program. The results of this research are published in professional journals, books, and technical reports. Financial support for the departmental research program is provided by the Utah Agricultural Experiment Station, the colleges of Agriculture and Business, the Office of the Vice President for Research, and by a combination of public and private extramural sources. The Economics Research Institute provides support and coordination for some of the department’s research activities. Graduate students are an integral part of departmental research programs.

Financial Assistance and Assistantships
The department offers teaching and research assistantships to qualified graduate students. These are awarded on a competitive basis, and all accepted students are considered eligible. However, while the department makes every effort to assist students in obtaining financial assistance, acceptance into department programs does not guarantee financial assistance.

Financial assistance is not provided to PhD students who fail to pass the written qualifying exam nor to graduate students who fail to make satisfactory progress toward completion of their degrees.

Economics Faculty

Professors
DeeVon Bailey, agricultural economics
Basudeb Biswas, international trade and economic development
Keith R. Criddle, resource economics and quantitative methods
Christopher Fawson, public finance and econometrics
Terrence F. Glover, production economics and policy
E. Bruce Godfrey, agricultural and resource economics
L. Dwight Israelensen, comparative systems and economic history
Paul M. Jakus, natural resource and environmental economics, nonmarket valuation
John E. Keith, agricultural and resource economics
W. Cris Lewis, regional-urban and managerial economics
Kenneth S. Lyon, economic theory
H. Craig Petersen, regulation and antitrust and managerial economics; Director of Analysis, Assessment, and Accreditation
Donald L. Snyder, agricultural and resource economics; Associate Dean for Academic Programs

Professors Emeritus
Roice H. Anderson
Larry K. Bond
Rondo A. Christensen
Lynn H. Davis
Reed R. Durtschi
Herbert H. Fullerton
Gary B. Hansen
Allen D. LeBaron
Darwin B. Nielsen
Morris D. Whitaker

Associate Professors
Tyler J. Bowles, econometrics and international economics
Arthur J. Caplan, environmental economics and applied microeconomic theory
John P. Gilbert, international trade theory and policy; applied general equilibrium modeling, development economics
Steven S. Vickner, agribusiness, food marketing
Ruby A. Ward, agribusiness management and operations research

Associate Professor Emeritus
Glenn F. Marston

Assistant Professors
Makoto Nirei, macroeconomics, econometrics
Gholamreza Oladi, international economics, econometrics
Rimma Shiptsova, international trade, food safety, econometrics

Human Resources Specialist
Marion T. Bentley, manpower economics

Course Descriptions
Economics (ECON), pages 604-607.
Interdepartmental Doctoral Program in Education (EdD, PhD)

Chairman:
Carol J. Strong, Dean of College of Education and Human Services

Location: Emma Eccles Jones Education 109
Phone: (435) 797-1437
FAX: (435) 797-3939
E-mail: idphelp@usu.edu
WWW: http://www.cehs.usu.edu/idp/

Faculty: Faculty are listed with participating departments.

Degrees offered: Doctorate of Education (EdD) and Doctorate of Philosophy (PhD)

Graduate specializations: PhD or EdD—Business Information Systems, Curriculum and Instruction, and Research and Evaluation

Admission Requirements

For admission information, contact: Dean, School of Graduate Studies, Utah State University, 0900 Old Main Hill, Logan UT 84322-0900; telephone (435) 797-1189; FAX (435) 797-1192; gradsch@cc.usu.edu.

To be evaluated against established criteria, students must submit to the School of Graduate Studies at Utah State University an Application for Admission along with the following:

1. Two official transcripts of both undergraduate and graduate credits from all colleges or universities attended. An average grade of B (3.0) or better is required during the last two years of undergraduate work and for all graduate work.

2. Three letters of recommendation (required). At least two of these letters should come from individuals who can evaluate the student’s academic abilities. All letters should address the student’s potential for successful graduate study.

3. Documentation of a master’s degree or equivalent coursework related to an area of specialization, or a statement of why admission is sought without a master’s degree.

4. An official report of the Graduate Record Examination (GRE), including both the Verbal and the Quantitative subtests.

5. Evidence of writing competency as determined by the department of specialization.

6. A statement of specific reasons for wanting to enroll in the doctoral program in education, including the area of specialization student desires to pursue.

Applicants to the Curriculum and Instruction specialization of the PhD and EdD degrees must have appropriate teaching experience.

General Information

Students may select from one of three specializations within the Interdepartmental Doctoral Program: Business and Information Systems (BIS), Curriculum and Instruction (C & I), and Research and Evaluation (R & E).

Both the Doctorate of Education (EdD) and the Doctorate of Philosophy (PhD) degrees are offered through the Interdepartmental Doctoral Program (IDP) in the College of Education and Human Services (CEHS). The IDP is an interdepartmental faculty effort.

The EdD degree program is intended for students who wish to be better prepared to (1) understand and deal effectively with curricular and instructional problems as administrators, supervisors, and curriculum specialists in public or private educational institutions and settings; and (2) teach in community colleges, four-year colleges, and universities. The PhD degree program is intended for students who wish to be better prepared to (1) fulfill roles in teaching and research in colleges, universities, and education-related fields; and (2) conduct and direct research and development activities in public and private educational settings or in the corporate sector.

Specializations

Business Information Systems
The BIS specialization prepares graduates for careers as teachers or educational leaders in the public schools and/or faculty members in higher education. Areas of emphasis include business information systems, communication, business and/or marketing education, and training and development.

Curriculum and Instruction
The C & I specialization prepares graduates to serve as curriculum specialists and instructional leaders in school districts and state educational agencies, professors in colleges of education, and subject area instructors in four-year or community colleges. Areas of emphasis include early childhood; engineering and technology education; instructional leadership; reading/writing; schooling, culture, and society; and teaching and learning in higher education.

Research and Evaluation
The R & E specialization prepares graduates to evaluate the quality of educational programs, including the comparison of strengths and weaknesses of alternative programs; the revision, updating, and/or redirection of existing programs; and the analysis of related educational issues.

Planned Program

To complete a doctorate degree, a minimum of 60 total credits are required for students with a master’s degree, and a minimum of 90 total credits are required for students without a master’s degree. A student must:

1. Complete a Unifying Program of Studies Core (6 semester credits) and a Research and Statistics Core (12 semester credits), required of all doctoral students.

2. Complete a planned program of supporting electives, as designated by the specialization or by a department and approved by the student’s supervisory committee.

3. Pass a written comprehensive examination. This exam must be satisfactorily completed before the student advances to candidacy. Advancement to candidacy also requires an approved dissertation proposal.

4. Present at a professional conference.

5. Submit for publication an approved manuscript.

6. Complete and satisfactorily defend a doctoral research study directed and judged by a supervisory committee of faculty.
Interdepartmental Doctoral Program in Education (EdD, PhD)

7. Complete all final requirements, as specified by an area of specialization, the College of Education and Human Services, and the School of Graduate Studies.

**Resident Coursework**

The Doctorate of Philosophy degree (PhD) requires three semesters of full-time registration in residency with a minimum of two semesters of consecutive residency. Completion of 33 credits in residence on the Logan campus is required.

The Doctorate of Education degree (EdD) requires at least three semesters in full-time residency, but they need not be consecutive. At least two semesters must be spent on campus prior to registering for dissertation credit. Completion of 39 credits must be completed in residence.

It is strongly recommended that the applicant enroll on campus the first semester after admission, so that appropriate program planning can be completed.

**Doctoral Residency**

It is the responsibility of the student’s doctoral committee to provide guidance, supervision, and review of the doctoral residency requirement. The purpose of residency is to provide the doctoral student with significant time for sustained contact with faculty members and intense attention to coursework, projects, research, and participation in academic life. Residency is a time for socialization into the shared community of professional life. It should include opportunities for the student to engage in activities outside of coursework that serve to transition the student into the new role of future colleague.

Each student’s residency experience should be considered on an individual basis and should include many varied activities. Quality of participation is important, but so is variety. Experiences that meet the goals of the residency requirement may include such opportunities as:

1. Collaborative research or grants with faculty or peers
2. Working with faculty on scholarly publications
3. Participation in non course-related scholarly groups (e.g., book or writing groups)
4. College teaching internships or assistantships
5. Research assistantships
6. Attendance at local, regional, or national professional meetings
7. Involvement in graduate student organizations (e.g., Graduate Student Senate)
8. Committee and/or service work within the department, college, or university
9. Assisting faculty with course development and teaching
10. Advanced coursework beyond the minimum
11. Attendance at departmental colloquia
12. Considerable out-of-class interaction with faculty and/or students, especially on substantive issues
13. Organizing program events, such as brown bags, consortia, orientation programs, etc.

It is difficult to accomplish these outcomes while physically distant from the campus. Thus, doctoral programs nationwide include “residency” requirements to assure that doctoral students, upon graduation, will be prepared for full professional participation in academic life.

**Research**

Each student must complete a significant research study; present at a professional conference; and prepare an article for publication in an appropriate journal, based on the completed research and/or program of study.

**Financial Assistance**

Students should contact department heads for all inquiries regarding assistantships and tuition waivers. Applications for University assistantships, fellowships, and all financial aid are processed through department offices. For a listing of fellowships and scholarships, see the Graduate Financial Assistance section of this catalog (page 99).

**Career Opportunities**

The doctoral specialization prepares educational leaders for positions as college and university researchers and teachers in education and education-related fields. Recipients of the doctorate degree are also prepared to conduct and direct research and development activities in public or private educational agencies or in the corporate sector; teach in community colleges, four-year colleges, and universities; serve as supervisors and curriculum specialists in public or private educational institutions and settings; and serve in a variety of other careers.

**Administrative/Supervisory Certificate Program**

A doctorate in education is separate from the Administrative/Supervisory Certificate (A/SC) Program; however, a student may obtain the A/SC while pursuing the doctorate degree. Completion of the A/SC program qualifies a person for the certificate required of administrators and/or supervisors at any level in the public school systems of Utah. Students desiring an Administrative/Supervisory Certificate will need to take courses in addition to those required for the PhD and EdD degree.

**College of Education and Human Services Courses**

Education courses are listed under the EDUC prefix, pages 607-609.
Department of Electrical and Computer Engineering

Department Head: Tamal Bose
Location: Engineering Laboratory 149
Phone: (435) 797-2840
FAX: (435) 797-3054
E-mail: info@ece.usu.edu
WWW: http://www.ece.usu.edu

Undergraduate Advising:
Engineering Advising Center, Engineering 314A, (435) 797-2705,
kathy@engineering.usu.edu, ronnie@engineering.usu.edu

Graduate Program Coordinator:
Scott E. Budge, Engineering Laboratory 113, (435) 797-3433,
scott.budge@ece.usu.edu

Degrees offered: Bachelor of Science (BS), Master of Engineering (ME), Master of Science (MS), and Doctor of Philosophy (PhD) in Electrical Engineering; BS in Computer Engineering

Undergraduate Programs

Department Mission Statement

The mission of the Department of Electrical and Computer Engineering is to serve society through excellence in learning, discovery, and outreach. Undergraduate and graduate students are provided with an education in electrical and computer engineering, while developing attitudes, values, and vision preparing them for lifetimes of continued learning and leadership in their chosen careers. Through research the department strives to generate and disseminate new knowledge and technology for the benefit of the State of Utah, the nation, and beyond.

Program Descriptions

The ECE Department offers a balanced curriculum of classwork, laboratory work, and design experiences to prepare students for careers in engineering. The Bachelor of Science programs in Electrical Engineering and Computer Engineering are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (EAC/ABET). The research program of the department, which includes undergraduates as well as graduate students, is internationally acclaimed in the fields of aerospace instrumentation and measurements, image compression, communications, electromagnetics, controls, and robotics.

Electrical Engineering

The Electrical Engineering program is dedicated to producing engineers who: (1) contribute to engineering practice, advance engineering knowledge, and contribute to the good of society; (2) are advancing their education in engineering and other professions; and (3) take a leadership role in engineering and society.

Each student is given a solid foundation in electricity, electronics, signals, and systems, with individual practical experience. Upon this basic foundation, the students then build expertise in advanced areas, stressing actual design practice, to prepare them for productive engineering careers. The focus areas can be categorized into the following: analog and digital electronics, controls, signal processing, communications, electromagnetics, microwaves, and space systems.

Computer Engineering

The Computer Engineering program is dedicated to producing engineers who: (1) apply fundamental principles to solve practical engineering problems; (2) are continually engaged in professional, personal, and community development; (3) are implementing well-planned, top-down designs of complex systems; and (4) function well as team members and interact well with other professionals and nonengineers.

Building on a solid curriculum in computing hardware and software, the program begins with a strong foundation in electricity, digital logic design, and computer science, then leads into advanced software engineering and microcomputer systems. Advanced courses provide experience in formal design methods, high-performance architectures, data communications, concurrent programming, and real-time and embedded systems. Students are also required to complete advanced course sequences in computer science.

Students in the BS programs in both electrical engineering and computer engineering are permitted and encouraged to take courses in the other program. Many courses, such as controls, digital signal processing, and robotics, draw heavily on skills in both areas.

Assessment

In addition to the regular national accreditation, the ECE Department employs a number of means to assess the quality of departmental programs. The primary indicator is the success of ECE graduates in obtaining professional employment. At intervals following graduation, the department keeps track of student placement. Other major tools include annual qualitative assessment of program objectives, semiannual reviews of the curriculum and facilities by the ECE Industrial Advisory Board, interviews of undergraduate and graduate students upon completion of their programs, regular monitoring of faculty members by peers, and surveys of ECE graduates working in industry.

Requirements

Prior to entry into the upper-division classes, the student must meet the standards for entry into the Professional Engineering Program. Additional information concerning these items is given in the College of Engineering write-up (pages 118-122). It is the responsibility of students to be aware of these rules and procedures; however, advisor assistance is available.

Admission to Pre-Professional Program

Admission requirements for students desiring to major in Electrical Engineering or Computer Engineering are the same as those governing admission to the College of Engineering (see pages 119-120), except that students must also be "calculus ready." That is, they must: (1) achieve a score of 27 or higher on the math ACT test; (2) complete MATH 1050 and 1060 or MATH 1210; or (3) achieve an AP score of at least 3 on the AB Calculus or BC Calculus test.

Bachelor of Science in Electrical Engineering

The program leading to a Bachelor of Science degree in electrical engineering is nominally a four-year program. The required program consists of a basic foundation of mathematics, science, computer science, engineering fundamentals, and laboratory and design experiences. Elective courses providing for one or more areas of technical focus, communication skills, and University Studies complete the program and prepare students for productive and rewarding careers in the electrical engineering profession.

Utah State University 2006-2007 General Catalog 253
Bachelor of Science in Computer Engineering
The program leading to a Bachelor of Science in computer engineering is nominally a four-year program. The required program consists of a basic foundation of mathematics, science, computer science, engineering fundamentals, and laboratory and design experiences. Elective courses providing for one or more areas of technical focus, communication skills, and University Studies complete the program and prepare students for productive and rewarding careers in the computer engineering profession.

Required Courses
Required courses are shown in the accompanying paragraphs; however, because of differences in high school or transfer student preparation, it is strongly recommended that students meet with the college academic advisor to plan a detailed semester-by-semester schedule for completing the professional prerequisites. Particular attention must be paid to course prerequisites, requiring some students to take longer than four semesters to complete the professional program. Students transferring into the department should consult with the college academic advisor for transfer credit evaluation and proper placement in the curriculum.

AP and CLEP credit may be used to meet some of the required technical and University Studies courses. Details concerning courses acceptable as electives are available from the Electrical and Computer Engineering Department.

Electrical Engineering

Pre-professional Program*
Suggested Semester Schedule
Freshman Year (30 credits)
Fall Semester (15 credits)
MATH 1210 (QL) Calculus I ..................................................4
CS 1400 Introduction to Computer Science—CS 1 .................3
ECE 1000 Introduction to Electrical and Computer Engineering……2
University Studies Breadth courses .................................6

Spring Semester (15 credits)
MATH 1220 (QL) Calculus II .............................................4
CS 1410 (QI) Introduction to Computer Science—CS 2 ..........3
PHYS 2210 (QI) General Physics—Science and Engineering I ....4
ECE 2700 Digital Circuits .................................................4

Sophomore Year (33 credits)
Fall Semester (16 credits)
MATH 2210 (QI) Multivariable Calculus ...............................3
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II .4
University Studies Breadth courses .................................9

Spring Semester (17 credits)
MATH 2250 (QI) Linear Algebra and Differential Equations ......4
ECE 2270 Electrical Circuits .............................................4
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a
Persuasive Mode ................................................................3
Technical Elective course ..............................................3
University Studies Depth Social Sciences (DSS) course ..........3

Junior Year (31-32 credits)
Fall Semester (15 credits)
ECE 4840 (CI) Design II ..................................................3
PHYS 2710 Introductory Modern Physics ............................3
ECE elective courses .......................................................9

Spring Semester (16-17 credits)
ECE 4850 (CI) Design III ................................................2
ECE Elective Courses ...................................................2
Technical elective course ..............................................3
University Studies Depth Humanities and Creative Arts
(DHA) course ..........................................................2-3

Senior Year (31-32 credits)
Fall Semester (15 credits)
ECE 4840 (CI) Design II ..................................................3
PHYS 2710 Introductory Modern Physics ............................3
ECE elective courses .......................................................9

Spring Semester (16-17 credits)
ECE 4850 (CI) Design III ................................................2
ECE Elective Courses ...................................................2
Technical elective course ..............................................3
University Studies Depth Humanities and Creative Arts
(DHA) course ..........................................................2-3

Professional Program
Because of the variations in schedules, it is recommended that students meet with an advisor to work out a schedule for their junior and senior years. The following courses are required for students selecting the Professional Program in Electrical Engineering.

Suggested Semester Schedule
Junior Year (31 credits)¹
Fall Semester (16 credits)
ECE 3410 Microelectronics I ............................................4
ECE 3620 Circuits and Signals ..........................................3
ECE 3870 Electromagnetics I ...........................................3
ECE 5520 Digital System Design .....................................3
MATH 5710 Introduction to Probability .............................3

Spring Semester (15 credits)
ECE 3640 Signals and Systems ........................................3
ECE 3710 Microcomputer Hardware and Software .............4
ECE 3820 (CI) Design I ..................................................2
Math/Science elective course .......................................3
ECE elective course .......................................................3

Senior Year (31-32 credits)
Fall Semester (15 credits)
ECE 4840 (CI) Design II ..................................................3
PHYS 2710 Introductory Modern Physics ............................3
ECE elective courses .......................................................9

Spring Semester (16-17 credits)
ECE 4850 (CI) Design III ................................................2
ECE Elective Courses ...................................................2
Technical elective course ..............................................3
University Studies Depth Humanities and Creative Arts
(DHA) course ..........................................................2-3

¹Some of the junior classes can be delayed until the senior year, but this may limit a student's choice of electives during his or her senior year.

Technical Elective Courses (select 30 or more credits)

Electrical Engineering Electives (select 21-27 credits)
ECE 3720 Microcomputer Systems Programming (Sp) ...........3
ECE 4650 Optical I (F) ....................................................3
ECE 4680 Optical II (Sp) ................................................3
ECE 4740 Computer and Data Communications (F) .............3

Also, any ECE 5000-level course (including ECE 5930 when topic relates to electrical engineering) may be counted as an Electrical Engineering Elective.

Math and Science Electives (select 3-9 credits)
MATH 3310 Discrete Mathematics (F,Sp,Su) .........................3
MATH 4200 (CI) Foundations of Analysis (F,Sp) ..................3
MATH 4310 (CI) Introduction to Algebraic Structures (F,Sp) ....3
MATH 4630 Computer Aided Math for Scientists and Engineers (Sp) ..3
MATH 5210 Introduction to Analysis I (F) ............................3
MATH 5220 Introduction to Analysis II (Sp) ............................3
MATH 5270 Complex Variables (Sp) ...................................3
MATH 5310 Introduction to Modern Algebra (Sp) .................3
MATH 5340 Theory of Linear Algebra (Sp) ........................3
MATH 5420 Partial Differential Equations (Sp) ....................3
MATH 5460 Introduction to the Theory and Application of Nonlinear
Dynamical Systems (Sp) ...............................................3
MATH 5510 Introduction to Topology (F) ..............................3
MATH 5610 Computational Linear Algebra and Solution of Systems
of Equations (F) .........................................................3
MATH 5620 Numerical Solution of Differential Equations (Sp) ..3
MATH 5720 Introduction to Mathematical Statistics (Sp) ........3
MATH 5760 Stochastic Processes (F) ..................................3
AP Biology ........................................................................4
BIOL 1610 Biology I (F) ..................................................4
Department of Electrical and Computer Engineering

BIOL 2420 Human Physiology (F,Sp,Su) ........................................ 4
BIOL 3300 General Microbiology (F,Sp) ....................................... 4
AP Chemistry ................................................................................. 8
CHEM 1210 Principles of Chemistry I (F,Sp) ................................. 4
CHEM 1215 Chemical Principles Laboratory I (F,Sp) .................... 1
CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) ............... 4
CHEM 2310 Organic Chemistry I (F) .............................................. 4
CHEM 3700 Introductory Biochemistry (Sp) .................................. 3
CHEM 3710 Introductory Biochemistry Laboratory (Sp) ............... 1
FRWS 2200 (BLS) Ecology of Our Changing World (F,Sp) ......... 3
PHYS 3550 Intermediate Classical Mechanics ............................. 3
PHYS 3600 Intermediate Electromagnetism .................................. 3
PHYS 3700 Thermal Physics .......................................................... 3
PHYS 3750 Foundations of Wave Phenomena ................................ 3
PHYS 4550 Advanced Classical Mechanics .................................. 3
PHYS 4600 Advanced Electromagnetism ...................................... 3
PHYS 4650 Optics I ....................................................................... 3
PHYS 4660 Optics II ...................................................................... 3
PHYS 4700 Quantum Mechanics I .................................................. 8
PHYS 4710 Quantum Mechanics II .................................................. 8

Technical Electives (select 0-6 credits)
CS 2420 (QI) Algorithms and Data Structures—CS 3 (F,Sp,Su) ... 3
CS 2450 (CI) Software Engineering (F,Sp) .................................... 3
CS 2810 Computer Organization and Architecture (F,Sp) ......... 3
CS 3100 Operating Systems and Concurrency (F,Sp) ................... 3
CS 4700 Programming Languages (F,Sp) ..................................... 3
CS 5000 Theory of Computability (Sp) ......................................... 3
CS 5050 Advanced Algorithms (F,Sp) .......................................... 3
CS 5100 Graphical User Interfaces and Windows Programming (Sp) .... 4
CS 5200 Distributed and Network Programming (F) ................. 3
CS 5300 Compiler Construction (F) ............................................. 3
CS 5370 Advanced Software Engineering (F) ............................ 3
CS 5400 Computer Graphics I (F) ............................................. 3

Spring Semester (15 credits)
ECE 4850 (CI) Design III ................................................................. 2
High-Level Technical Elective courses ........................................ 7
Math/Science elective course ........................................................ 3
University Studies Breadth Social Sciences (DSS) course .......... 3

Some of the junior classes can be delayed until the senior year, but this may limit a student's choice of electives during his or her senior year.
Department of Electrical and Computer Engineering

High-Level Technical Elective Courses (select 14-19 credits)
Students must complete a total of at least 14 credits within high-level technical electives. Courses listed in this departmental section as Computer Engineering Electives or Computer Science Electives may be used to fulfill this requirement. Also, courses having an ECE or CS prefix, which are numbered at the 5000 level, may be used as high-level technical electives.

Technical Elective Courses (select 23 or more credits)

Minors

Students should have all minors approved by the minor department. Minors may be filled by using the Technical Electives credits for courses in the chosen minor area. All courses required for the minors must be completed with grades of C- or better.

Mathematics Minor

Required courses include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1210</td>
<td>Calculus I (F,Sp,Su)</td>
</tr>
<tr>
<td>MATH 2210</td>
<td>Multivariable Calculus (F,Sp,Su)</td>
</tr>
<tr>
<td>MATH 2270</td>
<td>Linear Algebra (F)</td>
</tr>
<tr>
<td>MATH 2280</td>
<td>Ordinary Differential Equations (Sp)</td>
</tr>
</tbody>
</table>

Two additional courses (6 credits) numbered above 4000, excluding MATH 2280 (QI)

Physics Minor

PHYS 2110 General Physics—Science and Engineering I       |
PHYS 2220 General Physics—Science and Engineering II    |

Students must also select 10 credits from courses in Physics numbered 2710 or above.

Computer Science Minor

A minimum of 16 credits (with a cumulative GPA of 2.5 or higher and a C- or better in each class) is required. Students must complete the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 1400</td>
<td>Introduction to Computer Science—CS 1 (F,Sp,Su)</td>
</tr>
<tr>
<td>CS 1405</td>
<td>Introduction to Computer Science—CS 1 Lab (F,Sp,Su)</td>
</tr>
<tr>
<td>CS 1410</td>
<td>Introduction to Computer Science—CS 2 (F,Sp,Su)</td>
</tr>
<tr>
<td>CS 2420</td>
<td>Algorithms and Data Structures—CS 3 (F,Sp,Su)</td>
</tr>
</tbody>
</table>

Students must also complete two additional computer science classes. One of these two classes must be numbered at the 3000 level or above. Students should contact the Computer Science Department for information about classes that may not be used toward the Computer Science Minor.

Other minors should be approved by the minor department.
Student Research Opportunities

Undergraduate students are extensively involved with research activities in the department. Electrical engineering majors and computer engineering majors have presented papers at research conferences and have won prizes. They have also designed satellites for deployment from the space shuttle. Electrical and Computer Engineering faculty members are dedicated to helping students and providing a challenging and interesting learning atmosphere. For additional information, see the Research section under Graduate Programs (page 258).

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through participation in research work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Financial Support

Scholarships, assistantships, grants-in-aid, and work-study programs are available through the University. In addition, the department employs undergraduate and graduate students to assist in engineering research and development.

Concurrent BS/Master's Program

The concurrent BS/Master’s program allows engineering students to begin taking graduate-level classes during their senior year. This permits them to complete requirements for both the BS degree and the master’s degree concurrently in five years. Students in this program have a greater selection of graduate courses, since many graduate courses are taught during alternate years. In addition, the student’s senior design project could be a start for a graduate design project or thesis. Both the BS and the master’s degree can generally be earned with 150 total credits. The department requires that students have a minimum GPA of 3.3, both overall and during the last 60 semester credits, in order to qualify for acceptance into the concurrent BS/Master’s program. (For more information, see the College of Engineering section of this catalog, pages 118-122.)

Additional Information

For more information about Bachelor of Science requirements and the sequence in which courses should be taken, see the major requirement sheet, available from the Electrical and Computer Engineering Department, or online at: http://www.usu.edu/ats/majorsheets/

Graduate Programs

Admission Requirements

See general admission requirements on pages 99-100. Applicants with a bachelor’s degree in Electrical or Computer Engineering from an ABET accredited program and having a 3.1 GPA or better can generally be admitted without restriction. Additional coursework in electrical and computer engineering fundamentals may be required in individual cases. Students must take the general GRE exam; however, the subject GRE is not required. All graduate students are expected to have a working knowledge of a high-level computer language (preferably C or C++).

Applications will be considered throughout the year. However, students desiring financial aid should submit application materials by January 1 to be considered for the following fall semester and July 1 to be considered for the following spring semester.

No applications will be considered until all required information arrives in the office of the School of Graduate Studies.

Degree Requirements

Specific requirements for the ME, MS, and PhD degrees are outlined below; these are in addition to the general requirements of the School of Graduate Studies. All graduate degree programs in the ECE Department require a grade of B- or better in all courses applied toward the requirements listed below.

Master of Engineering (ME) and Master of Science (MS)

The ME degree is based on coursework and is designed to give graduates a strong practical foundation. The MS degree requires substantial thesis or project work in a specific area and prepares graduates a strong practical foundation. The MS degree requires successful completion of 30 credits of 5000-level or above coursework in a program approved by the student’s supervisory committee, with the following stipulations:

Master of Science

1. At least 12 credits of ECE coursework must be completed at or above the 6000 level.

2. MS Plan A students must complete 6 credits of Thesis Research (ECE 6970).
Department of Electrical and Computer Engineering

3. MS Plan B students must complete 3 credits of Thesis Research (ECE 6970) and 3 credits of Design Project (ECE 6950).

4. MS students must have a one- to two-page, double-spaced thesis or project proposal approved by their committee when a project has been identified.

Master of Engineering

1. At least 18 credits of ECE coursework must be completed at or above the 6000 level.

2. At least two ECE courses with substantial lab components must be completed at or above the 5000 level. This requirement may be waived for students who have taken two USU ECE lab intensive courses as undergraduates and who received a grade of B- or better in both of these classes.

All Master’s Students

1. At least 3 credits of ECE coursework must be completed at the 7000 level.

2. One credit of ECE 6800 (Electrical Engineering Colloquium) must be completed as soon as possible.

3. Each master’s student must form a committee and have a program of study approved by the end of his or her first semester.

4. No more than 3 courses of 5000-level coursework may be applied toward a master’s degree.

5. Any exceptions to the master’s requirements must be approved by the student’s committee and the ECE Graduate Committee.

A course in technical and professional writing, or equivalent writing experience, is required for MS students prior to beginning the thesis. This may be fulfilled as a requirement for a bachelor’s degree. MS students may, at the discretion of their supervisors, be required to hire an editor to bring the thesis or paper into acceptable form.

Doctor of Philosophy

To qualify for a PhD degree, a student is expected either to complete at least 51 credits beyond the requirements for a BS degree; or to complete at least 21 credits beyond the requirements for an MS degree, plus complete enough credits of dissertation research to have a total of 90 credits beyond the BS degree or 60 credits beyond the MS degree. Completion of this coursework generally requires three semesters of study beyond the MS degree, with up to 18 credits beyond the BS degree being taken in courses outside the Electrical and Computer Engineering Department.

After a student has completed at least 18 credits of coursework beyond the MS degree, he or she must pass a comprehensive examination based on graduate-level courses, as well as pass a dissertation research proposal defense. The comprehensive examination will be given only after a student has applied and received permission to take the exam. Near the end of the program, the results of the original (publishable) research work will be presented and publicly defended as a dissertation.

For further information, visit the departmental website at: http://www.engineering.usu.edu/ece/

Research

The department conducts extensive research through the following centers:

1. Center for Self-Organizing Intelligent Systems (CSOIS)
2. National Center for the Design of Molecular Function (NCDMF)
3. Space Dynamics Laboratory (SDL)
4. Anderson Center for Wireless Teaching and Research
5. Center for High-Speed Information Processing (CHIP)
6. Center for Advanced Imaging LADAR (CAIL)

Research activities include: robotics, control systems, digital system design, computer networks, concurrent systems, antennas, space systems, image processing, digital signal processing, wireless communications, acoustics, electromagnetic compatibility, and LADAR systems.

Financial Assistance

All applicants who are accepted academically are automatically considered for financial aid. Many successful graduate students in the department do receive some level of financial aid during their degree program.

Electrical and Computer Engineering Faculty

Professors

Doran J. Baker, electromagnetics, infrared measurements, engineering systems in space
Tamal Bose, digital signal processing, communications
Joe R. Douplnik, communications, computers
H. Scott Hinton, photonic switching, Dean of College of Engineering
Todd K. Moon, communications and signal processing
Linda S. Powers, biophysics, molecular engineering

Adjunct Professor

Heng-Da Cheng, pattern recognition, image processing

Trustee Professor Emeritus

Kay D. Baker, electronics, space science

Professors Emeritus

Robert W. Gunderson, control systems, pattern recognition, robotics
Romney D. Harris, microwaves, transmission line circuits, atmospheric modeling
William L. Jones, integrated circuits
Alan W. Shaw, electromagnetics, controls, microcomputers
Allan J. Steed, electro-optics, aerospace measurement systems
Gardner S. “Dyke” Stiles, concurrent systems
Ronald L. Thurgood, computers, database systems
Clair L. Wyatt, infrared, electro-optical systems

Associate Professors

Scott E. Budge, signal processing, image processing
Charles M. Swenson, space science and space engineering
Paul A. Wheeler, microprocessors, acoustics
Department of Electrical and Computer Engineering

Research Associate Professor
Robert T. Pack, geological and geomatics engineering

Adjunct Associate Professors
R. Rees Fullmer, control systems, space engineering
Ronald J. Huppi, space research
John C. Kemp, robotics, electro-optics
Tsung-Cheng Shen, physics
Gene A. Ware, computer systems

Associate Professor Emeritus
Duane G. Chadwick, remote sensors, instrumentation

Assistant Professors
Annette Bunker, computer security, hardware verification
Yang Quan Chen, control systems
Aravind Dasu, computer engineering
Brandon K. Eames, computer engineering
Jacob H. Gunther, communications and signal processing

George K. Liang, electromagnetics
Wei Ren, controls
Chris Winstead, analog VLSI

Principal Lecturers
Paul D. Israelsen, integrative services, digital systems design
Randy J. Jost, electromagnetics, microwave engineering, solid state electronics

Research Assistant Professor
Hui Fang Dou, precision instruments, mechatronics

Adjunct Research Assistant Professor
Steven R. Wassom, controls

Course Descriptions
Electrical and Computer Engineering (ECE), pages 601-604.

denise.taylor@usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), Master of Arts (MA), and Master of Education (MEd) in Elementary Education; BS and BA in Early Childhood Education; the Elementary Education Department participates in the Interdepartmental Doctoral Program in Education, including Doctor of Education (EdD) and Doctor of Philosophy (PhD) with Curriculum and Instruction Specialization.

Graduate specializations: MA, MS, MEd—Early Childhood Education; Educational Leadership; ESL Education; Gifted and Talented Education; Math and Science Education; Middle Education; Reading, Writing, and Language Arts; and Social Studies Education.

Undergraduate Programs

Objectives

The purposes of the Department of Elementary Education are:

1. To develop professional educators;
2. To advance knowledge in the field of education.

These purposes are realized through teaching, scholarly activities, and service. The department provides leadership in the preparation of teachers, supervisors, curriculum specialists, and other professional personnel for careers in elementary education, early childhood education, and middle education.

The Department of Elementary Education at Utah State University offers eight programs leading to licensure as a teacher. In the following list, each program name is followed by the licensure obtained (shown in parentheses). (1) Elementary Education (grades 1 through 6); (2) Early Childhood Education (preschool through grade 3); (3) Dual Elementary and Early Childhood Education (preschool through grade 6); (4) Composite Elementary Education/Early Childhood Education (F,Sp,Su) ......................................................................................... 1
(5) Elementary Education/Severe (grades 1 through 6 Special Education, and grades kindergarten through 12); (6) Composite Elementary Education/Severe (grades 1 through 6 Special Education, and grades kindergarten through 12); (7) Composite Elementary Education/Deaf Education (grades 1-6, and master’s in Deaf Education); (8) Composite Early Childhood Education/Deaf Education (preschool through grade 3, and master’s in Deaf Education).

Undergraduate Research

Undergraduate research opportunities are available with many departmental faculty members. Interested students should contact Francine Johnson, associate dean in the College of Education and Human Services, (435) 797-2417, francine.johnson@usu.edu.

Assessment

To review Department of Elementary Education assessment information, visit http://www.coe.usu.edu/eled/ and click on the assessment link.

University Studies Requirements

Elementary Education Majors and Early Childhood Education Majors are required to take certain classes to fulfill the University Studies requirements. The following sections list the specific courses to choose from:

Computer and Information Literacy (0-3 credits)

Passing grade on six computer and information literacy related examinations. Although no specific course is required, USU 1000 and BIS 1400 teach the required skills.

Quantitative Literacy (QL) (3 credits)

(A grade lower than a C– will not be accepted in this course.)

STAT 1040 (QL) Introduction to Statistics (F,Sp,Su) .............................................. 3

Math 1050 or Math ACT score of 25 or higher is required to apply to the Teacher Education Program.

Breadth Requirements (22 credits)

Choose one course from the following to meet the BAI requirement:

ECON 1500, HIST 1700, POLS 1100, USU 1300 .............................................. 3

Choose one course from the following to meet the BSS requirement:

ANTH 1010, HIST 1110, HIST 1510, PHIL 1000, PHIL 1120, PHIL 1200, PHIL 2400, USU 1320 ................................................................. 3

Choose one course from the following to meet the BHU requirement:

ANTH 1010, ANTH 2100, ASTE 2900, ENVS 2340, GEOG 1300, GEOG 1400, JCOM 1500, NR 1010, POLS 2200, SOC 1010, USU 1340 ......................................................... 3

Choose one course from the following to meet the BLS requirement:

AWER 1200, BIOL 1010, FRWS 2200, NFS 1020, PLSC 2100, USU 1350 ................................................................. 3

All students are required to complete PHYS 1200 (BPS) (4 cr). In addition, students must choose one course from the following:

BMET 2000, GEOG 1000, GEO 1010, GEO 1150, CHEM 1010, PHYS 1040, SOIL 2000, USU 1360 ................................................................. 7

Depth Education Requirements

Communications Intensive (CI) (2 courses)

(Elected in major)

ELED 3000 (CI) Foundation Studies and Practicum in Teaching and Classroom Management Level II (F,Sp,Su) ......................................................... 6-8

ELED 4030 (CI) Teaching Language Arts and Practicum Level III (F,Sp,Su) ................................................................. 3

Quantitative Intensive (QI) (1 course)

(A grade lower than a C– will not be accepted in this course.)

MATH 2020 (QI) Introduction to Logic and Geometry (F,Sp,Su) ...................... 3
Department of Elementary Education

Depth Course Requirements (2 courses)
Choose two approved University Studies depth courses designated DSC, DHA, or DSS (outside of area of Emphasis).

Requirements

Provisional Admission Process and Requirements
Since more students major in Elementary Education at USU than in any other major, competition for admission into the program is very keen. Due to increased demands for admission, coupled with limited resources, a ceiling of 180 students has been placed on admissions each year. Thus, admission to USU does not necessarily guarantee admission into the Elementary Education Program.

Provisional admission to the Elementary and Early Childhood Teacher Education Program is determined by (1) the student’s GPA in a set of core courses, (2) ACT scores and Writing Diagnostic Test or PPST test results, (3) the number of credits a student has taken, (4) successful completion of a group assessment interview, and (5) a speech and hearing test. (Additional factors to be weighted may be gender and/or minority status consistent with applicable law.) Applications are accepted each semester. Because there are typically more applicants than there is space available, the number accepted is limited. Students who are not accepted may reapply. Provisional admission requires formal action by the Office of the Dean of the College of Education and Human Services, as well as by the student’s department.

Admission to the Teacher Education Program is a prerequisite for enrollment in the major, starting with Level II. A student desiring admission to the Teacher Education Program should file an application in the Elementary Education Office, located in room 373 of the Emma Eccles Jones Education Building.

Elementary Education SODIA Program
The acronym SODIA represents the elementary education program. The name is derived from the initial letter of descriptive words (Self, Others, Discipline, Implementation, and Application) which represent emphasis placed at each level of the program.

The elementary education SODIA program is performance-based and field-centered. It utilizes public schools as partners in each phase of the Teacher Education Program. SODIA is an interdisciplinary and interdepartmental program utilizing staff members from the Departments of Psychology; Special Education and Rehabilitation; Family, Consumer, and Human Development; Health, Physical Education and Recreation; Music; Art; Theatre Arts; and Instructional Technology who work in conjunction with the Department of Elementary Education. These University faculty members work with teachers and principals of cooperating public schools and the Edith Bowen Laboratory School on the USU campus in an integrated program.

Level I, Self, is represented by the “S” in the acronym SODIA. This is the first-level course (ELED 1010) introducing the field of education and emphasizing the student’s self-assessment in relation to ability and desire to teach. A minimum of 15 hours are spent observing in an elementary or middle school classroom, completing volunteer service in other community settings, and viewing a variety of selected professional videos. In addition, a human growth and development course is required. The two courses in Level I are prerequisites to applying to the Teacher Education Program.

Level II, Others, is represented by the “O” in the acronym SODIA. This stands for the many “others” who make up the education community. In this block, each student receives 15 credits and is assigned as a teacher assistant in one of the public schools. The remainder of the time is spent in seminars and classwork offered on the USU campus. The classwork is interdisciplinary and interrelated, including courses in elementary education, psychology, special education, and technology. Entrance to Level II requires prior admission to the Teacher Education Program.

Level III, Disciplines, is represented by the “D” in the acronym SODIA. Students in this block complete 15 credits of methods coursework and practica at the Edith Bowen Laboratory School or public schools. The “methods” courses in reading, social studies, language arts, mathematics, and science are included in this bloc. A preliminary course in reading is required as a transition from Level II to Level III.

Level IV, Implementation, is represented by the “I” in the acronym SODIA. This is the student teaching phase of the program. Student teaching constitutes full days of actual teaching experience for the entire semester.

Level V, Application, is represented by the “A” in the acronym SODIA. At this level, graduates of the program make a transition into the profession of teaching.

National INTASC Principles also receive major emphasis through SODIA’s levels of progression. These principles are: Content Pedagogy, Student Development, Diverse Learners, Critical Thinking, Motivation and Management, Communication, Planning, Assessment, Professional Development, and School/Community Development. A student performance portfolio process (based around the INTASC Principles) is also included.

Continuing Status Requirements
A minimum GPA of 2.75 is required to remain in good standing and to graduate from the program.

All students majoring in elementary education must be registered in the College of Education and Human Services. An advisor will be assigned from the Department of Elementary Education. Programs of professional education courses, as well as teaching support courses and an area of emphasis, have been developed by the Department of Elementary Education and approved by the Council on Teacher Education and the Utah State Office of Education. For a complete description of the program and requirements for graduation and licensure, students should visit the Elementary Education Department website: http://www.coe.usu.edu/eled/

Prior to applying for Level III of the program, students are required to submit a background check. Prior to applying for student teaching, students are also required to take and pass the Praxis II content test (10014) with a score of 150 or higher.

Each student completes a professional semester of student teaching. An application for student teaching must be made at least one semester in advance, and credentials are reevaluated at that time. Since not all student teachers can be accommodated by the schools located within Cache Valley, placements are made on a first-come, first-served basis. Students should be financially prepared to spend that time off campus in the event such an arrangement is necessary. Students must be responsible for their own transportation.

Utah State University 2006-2007 General Catalog 261
Department of Elementary Education

Students who carefully select their elective courses may also qualify for a special endorsement to the basic professional teaching license. All students complete an area of emphasis in a subject matter field, in addition to the teaching support courses. Information concerning special endorsements and additional areas of specialization may be obtained from the Department of Elementary Education.

Students who have teaching licenses in areas other than elementary education may obtain the elementary license by meeting the same or equivalent requirements for licensure expected of an elementary education major. Those desiring to acquire a dual license should work with an advisor from the Department of Elementary Education.

All courses listed as major subject courses must be taken on an A-B-C-D-F basis and the grade point average for these courses must be 2.75 or better. Major subject courses passed with less than a C grade must be repeated.

Course Requirements

Elementary Education Major (78-80 credits) (includes Teaching Support Courses and Emphasis)

Students majoring in Elementary Education should complete all the following courses as indicated.

Note: Teaching License requires 2.75 cumulative Grade Point Average (GPA). (Grades lower than a C will not be accepted in the major.)

Level I (6 credits)
ELED 1010 Orientation to Elementary Education (F,Sp,Su)...3
FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp)...3

Level II (18 credits) (courses taken concurrently)
Students must be admitted to the Teacher Education Program prior to taking these classes.

ELED 3000 (CI) Foundation Studies and Practicum in Teaching and Classroom Management Level II (F,Sp,Su)...8
SPED 4000 Education of Exceptional Individuals (F,Sp,Su)...2
PSY 3660 Educational Psychology for Teachers (F,Sp)...2
INST 4100 Principles and Practices of Technology for Elementary Teachers (F,Sp,Su)...3
ELED 3100 Teaching Reading I (F,Sp,Su)...3

Level III (15 credits; must follow Level II) (courses taken concurrently)
ELED 4000 Teaching Science and Practicum Level III (F,Sp,Su)...3
ELED 4030 (CI) Teaching Language Arts and Practicum Level III (F,Sp,Su)...3
ELED 4040 (CI) Teaching Reading II and Practicum Level III (F,Sp,Su)...3
ELED 4050 Teaching Social Studies and Practicum Level III (F,Sp,Su)...3
ELED 4060 Teaching Mathematics and Practicum Level III (F,Sp,Su).3

Level IV (15 credits; must follow Level III)
ELED 5100 Student Teaching—Primary Grades (1-3) (F,Sp)...6
ELED 5150 Student Teaching—Elementary (Grades 4-6) (F,Sp)...6
ELED 5250 Student Teaching—Seminar (F,Sp)...3

Teaching Support Courses (Elementary Education Major, 12-14 credits; Early Childhood and Elementary Education Dual Major, 9-11 credits) (Grade of C- or better is required.)

Required Courses (5 credits)
MUSC 3260 Elementary School Music (F,Sp,Su)...2
PEP 3050 Physical Education in the Elementary School (F,Sp,Su)...3

Teaching Support Electives (two or three courses, depending on major)
Choose one course from the following:
HEP 2000 First Aid and Emergency Care (F,Sp)...2
HEP 2500 Health and Wellness (F,Sp,Su)...2
HEP 3000 Drugs and Human Behavior (F,Sp,Su)...3
HEP 3500 Elementary School Health Education (F,Sp)...2

From the following, Elementary Education Majors choose two courses; Early Childhood and Elementary Education Dual Majors choose one course:
ART 3700 Elementary Art Methods (F,Sp)...3
ELED 4410 Gifted Education in the Regular Classroom (F)...3
ELED 4420 Multiple Talent Approach to Thinking (Su)...2
ELED 4480 Early Childhood Education Kindergarten through Grade 3 (F,Sp)...3
ELED 4710 Diversity in Education (F,Sp,Su)...3
ENGL 3530 Children’s Literature (Sp)...3
ENVS 5110 Environmental Education (Sp)...3
FCHD 2610 Child Guidance (F,Sp)...3
LING 4100 The Study of Language (F,Sp,Su)...3
LING 4900 Analysis of Cross-Cultural Difference (Sp)...3
THEA 4330 Storytelling (F,Sp,Su)...3
THEA 4330 Drama and Theatre for Youth: Grades K-6 (F,Sp,Su)...3

Emphasis (12 credits) (C- or better required)
Refer to page 263 for a listing of available Emphasis areas. For a listing of required and recommended courses, students should contact their advisor.

Suggested Four-year Course of Study for Elementary Education Major

This is a model of the requirements and possible sequence of courses. However, students may progress through the program or have more flexibility if they have high ACT scores, CLEP credit, concurrent enrollment credit, AP credit, and/or transfer credit; or if they attend during summer semesters.

Freshman Year (31 credits)
Fall Semester (16 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose...3
MATH 1050 (QL) College Algebra...4
Breadth American Institutions (BAI) course...3
Breadth Humanities (BHU) course...3
Breadth Life Sciences (BLS) course...3

Spring Semester (15 credits)
STAT 1060 (QL) Introduction to Statistics...3
Breadth Creative Arts (BCA) course...3
Breadth Physical Sciences (BPS) course...3

Level I courses:
FCHD 1500 (BSS) Human Development Across the Lifespan...3
ELED 1010 Orientation to Elementary Education...3
Department of Elementary Education

Sophomore Year (32 credits)
Fall Semester (15 credits)
MATH 2020 (Q) Introduction to Logic and Geometry.......................... 3
Breadth Physical Sciences (BPS) coursea........................................ 3
Breadth Social Sciences (BSS) courseb............................................... 3
Emphasis courses .............................................................................. 6

Spring Semester (17 credits)
ENGL 2010 (CL2) Intermediate Writing: Research Writing
in a Persuasive Mode ........................................................................ 3
Emphasis courses .............................................................................. 6
HEP elective course ........................................................................... 2
Teaching Support elective course ..................................................... 3
University Studies Depth course ....................................................... 3
Note: Apply to the program by the July 1 deadline.

Junior Year (29 credits)
Fall Semester (15 credits)
Level II courses:
Students must be admitted to the Teacher Education Program prior to
enrolling in Level II courses.
ELED 3000 (CI) Foundation Studies and Practicum in Teaching
and Classroom Management Level II ................................................. 8
SPED 4000 Education of Exceptional Individuals ................................ 2
PSY 3660 Educational Psychology for Teachers ............................... 2
INST 4010 Principles and Practices of Technology
for Elementary Teachers ................................................................. 3

Spring Semester (14 credits)
ELED 3100 Teaching Reading I ........................................................ 3
PEP 3050 Physical Education in the Elementary School..................... 3
MUSC 3260 Elementary School Music ............................................. 3
University Studies Depth course ....................................................... 3
Teaching Support elective ............................................................... 3

Senior Year (30 credits)
Fall Semester (15 credits)
Level III courses:
ELED 4000 Teaching Science and Practicum Level III ...................... 3
ELED 4030 (CI) Teaching Language Arts and Practicum Level III ....... 3
ELED 4040 (CI) Teaching Reading II and Practicum Level III .......... 3
ELED 4050 Teaching Social Studies and Practicum Level III ............ 3
ELED 4060 Teaching Mathematics and Practicum Level III ............. 3

Spring Semester (15 credits)
Level IV courses:
ELED 5250 Student Teaching—Seminar ............................................ 3
ELED 5100 Student Teaching—Primary Grades (1-3) ....................... 6
ELED 5150 Student Teaching—Elementary (Grades 4-6) ................. 6

3The MATH 1050 requirement (or its equivalent) must be completed prior to application
to the Teacher Education Program.
4At least two of the seven breadth courses must have a USU prefix.

Early Childhood Education Major (80 credits)
or Early Childhood and Elementary Education
Dual Major (89-91 credits)
(includes Teaching Support Courses and Emphasis)
Note: Grades lower than a C will not be accepted toward major
requirements.

Level I (6 credits)
ELED 1010 Orientation to Elementary Education (F,Sp,Su) 3
FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) 3

Level II (15 credits) (courses taken concurrently)
Students must be admitted to the Teacher Education Program prior to
taking these classes.
ELED 3000 (CI) Foundation Studies and Practicum in Teaching
and Classroom Management Level II (F,Sp) ........................................ 6
FCHD 2600 Seminar in Early Childhood Education (F,Sp) .............. 2
FCHD 2630 Practicum in Early Childhood Education (F,Sp) ............ 2
PSY 3660 Educational Psychology for Teachers (F,Sp) .................... 2
ELED 3100 Teaching Reading I (F,Sp,Su) ........................................ 3
(ELED 3100 may be taken during transition semester, if desired.)

Transition (11 credits)
SPED 4000 Education of Exceptional Individuals (F,Sp,Su) ............ 2
INST 4010 Principles and Practices of Technology for Elementary
Teachers (F,Sp,Su) ........................................................................... 3
FCHD 4550 Preschool Methods and Curriculum (F,Sp) ................. 3
ELED 4480 Early Childhood Education Kindergarten through
Grade 3 (F,Sp,Su) .......................................................................... 3

Level III (15 credits; must follow Level II)
(courses taken concurrently during fall, spring, or
summer semester)
ELED 4000 Teaching Science and Practicum Level III ..................... 3
ELED 4030 (CI) Teaching Language Arts and Practicum Level III .... 3
ELED 4040 (CI) Teaching Reading II and Practicum Level III .......... 3
ELED 4050 Teaching Social Studies and Practicum Level III .......... 3
ELED 4060 Teaching Mathematics and Practicum Level III .......... 3

Level IV (21 credits) (taken during two semesters)
ELED 5050 Student Teaching—Kindergarten (F,Sp,Su) ................. 6
ELED 5100 Student Teaching—Primary Grades (1-3) (F,Sp,Su) .... 6
ELED 5250 Student Teaching—Seminar (F,Sp) ............................... 3
FCHD 4960 Practice Teaching in Child Development Laboratories
(F,Sp,Su) ................................................................................... 6

5Level II must be completed prior to taking this course.
6Level III and ELED 4480 must be completed prior to taking this course.
7FCHD 4550 must be completed prior to taking this course.

Emphasis (12 credits) (C- or better required)
A listing of available Emphasis areas is shown below. For a listing of
required and recommended courses, students should contact their
advisor.

Electives (to complete 120 credits)
The following courses are recommended to be taken as electives.
ART 3700 Elementary Art Methods (F,Sp) ....................................... 3
MUSC 3260 Elementary School Music (F,Sp,Su) ......................... 2
PEP 3050 Physical Education in the Elementary School (F,Sp,Su) .... 3
HEP 3500 Elementary School Health Education (F,Sp) ............... 2

Elementary/Early Childhood
Areas of Emphasis
Students majoring in Elementary Education or Early Childhood
Education are required to complete an area of Emphasis. All students
majoring in Elementary Education, Early Childhood Education, or
Dual Elementary Education and Early Childhood Education must
complete an area of Emphasis consisting of 12 credits. The area of
Emphasis must be chosen from the following fields: Language Arts,
Social Studies, Mathematics, Mathematics/General Science, General
Science, Fine Arts, Art, Music, Physical Education, Health/Wellness/
Nutrition, School Library Media, a Foreign Language, or an English as
a Second Language (ESL) Endorsement.
Department of Elementary Education

Suggested Four-year Course of Study for Early Childhood Education Major or Early Childhood and Elementary Education Dual Major

This is a model of the requirements and possible sequence of courses. However, students may progress through the program or have more flexibility if they have high ACT scores, CLEP credit, concurrent enrollment credit, AP credit, and/or transfer credit; or if they attend during summer semesters.

Freshman Year (31 credits)

Fall Semester (16 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .................. 3
MATH 1050 (QL) College Algebra ..................................................... 4
Breadth American Institutions (BAI) course b ................................. 3
Breadth Humanities (BHU) course b ............................................. 3
Breadth Life Sciences (BLS) course b ............................................ 3

Spring Semester (15 credits)
STAT 1040 (QL) Introduction to Statistics ....................................... 3
Breadth Creative Arts (BCA) course b ............................................. 3
Breadth Physical Sciences (BPS) course b ................................. 3

Level I courses:
FCHD 1500 (BSS) Human Development Across the Lifespan .......... 3
ELED 1010 Orientation to Elementary Education ......................... 3

Sophomore Year (32 credits)

Fall Semester (15 credits)
MATH 2020 (QI) Introduction to Logic and Geometry .......... 3
Breadth Social Sciences (BSS) course b ........................................ 3
Emphasis courses ........................................................................ 6

Spring Semester (17 credits)
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................................................. 3
Emphasis courses ........................................................................ 6
HEP elective 3 .............................................................................. 2
Teaching Support elective 4 ......................................................... 3
University Studies Depth course .................................................. 3

Note: Apply to the program by the July 1 deadline.

Junior Year (31 credits)

Fall Semester (15 credits)

Level II courses:
Students must be admitted to the Teacher Education Program prior to enrolling in Level II courses.
ELED 3500 (CI) Foundation Studies and Practicum in Teaching and Classroom Management Level II ............................................. 6
FCHD 2600 Seminar in Early Childhood Education ...................... 2
FCHD 2630 Practicum in Early Childhood Education ............... 2
PSY 3660 Educational Psychology for Teachers ......................... 2
ELED 3100 Teaching Reading I ......................................................... 3

Spring Semester (16 credits)
Pep 3050 b Physical Education in the Elementary School .......... 3
MUSC 3260 b Elementary School Music ........................................ 3
SPED 4000 Education of Exceptional Individuals ................... 2
INST 4010 Principles and Practices of Technology for Elementary Teachers ........................................................................... 3
ELED 4480 Early Childhood Education ........................................... 3
Kindergarten through Grade 3 ...................................................... 3
FCHD 4550 Preschool Methods and Curriculum ......................... 3

Senior Year (30 credits)

Fall Semester (15 credits)
Level III courses:
ELED 4000 Teaching Science and Practicum Level III .................. 3
ELED 4030 (CI) Teaching Language Arts and Practicum Level III .... 3
ELED 4040 (CI) Teaching Reading II and Practicum Level III ........ 3
ELED 4050 Teaching Social Studies and Practicum Level III ........ 3
ELED 4060 Teaching Mathematics and Practicum Level III .......... 3

Spring Semester (15 credits)
Level IV courses:
ELED 5100 Student Teaching—Seminar ........................................ 3
ELED 5050 Student Teaching—Kindergarten .................................. 6
ELED 5100 b 1st Student Teaching—Primary Grades (1-3) (6 cr) or
ELED 5150 b 1st Student Teaching—Elementary (Grades 4-6) (6 cr) .... 6

Additional Semester (9 credits)
FCHD 4960 Practice Teaching in Child Development Laboratories .... 6
University Studies Depth course ................................................... 3

Composite Elementary Education and Special Education Major

Elementary Education Major (65 credits)
(includes Teaching Support Courses)
Students should complete all of the following courses as indicated.

Note: Teaching licensure requires a 2.75 cumulative grade point average (GPA). (Grades lower than a C will not be accepted toward the major.)

Level I (6 credits)
ELED 1010 Orientation to Elementary Education (F,Sp,Su) .............. 3
FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) ... 3

Level II (courses taken concurrently during spring semester) (18 credits)
Students must be admitted to the Teacher Education Program prior to taking these classes.
ELED 3000 (CI) Foundation Studies and Practicum in Teaching and Classroom Management (Level II) ................................................. 8
SPED 4000 Education of Exceptional Individuals ........................ 2
PSY 3660 Educational Psychology for Teachers ............................. 2
SPED 5530 Technology for Teaching Exceptional Learners ............ 3
ELED 3100 Teaching Reading I ......................................................... 3

Level III (courses taken concurrently during fall, spring, or summer semester) (15 credits)
ELED 4000 Teaching Science and Practicum Level III .................. 3
ELED 4030 (CI) Teaching Language Arts and Practicum Level III .... 3
ELED 4040 (CI) Teaching Reading II and Practicum Level III .......... 3
ELED 4050 Teaching Social Studies and Practicum Level III ........ 3
ELED 4060 Teaching Mathematics and Practicum Level III .......... 3

Level IV (15 credits) (taken during fall or spring semester)
ELED 5150 Student Teaching—Elementary (Grades 4-6) ................. 6
Department of Elementary Education

SPED 5210 (CI)12 Student Teaching in Special Education:
Dual Majors ................................................................. 6
ELED 5250 Student Teaching—Seminar .............................. 3

12Students must complete Special Education major coursework prior to student teaching.

Teaching Support Courses
MUSC 3260 Elementary School Music (F,Sp,Su) .................. 2
PEP 3050 Physical Education in the Elementary School (F,Sp,Su) .... 3
COMD 2910 (CI)11 Sign Language I (F,Sp,Su) .................... 3
HEP 200013 First Aid and Emergency Care (F,Sp,Su) ............ 2

13Required for Special Education—Severe specialization only.

Special Education Major (33 or 29 credits)
Students should choose either the Mild/Moderate specialization or the Severe specialization.

Students must be admitted to the Special Education program prior to taking these courses.

Mild/Moderate Specialization (33 credits)

Fall:
SPED 5010 (Q) Applied Behavioral Analysis 1: Principles, Assessment, and Analysis .............................................. 3
SPED 5040 Foundations of Effective Assessment and Instructional Practices ......................................................... 3
SPED 5070 Policies and Procedures in Special Education .... 3
SPED 5310 Teaching Reading and Language Arts to Students with Mild/Moderate Disabilities .............................. 4
SPED 5330 Eligibility Assessment for Students with Mild/Moderate Disabilities .................................................. 1
SPED 5410 Practicum: Direct Instruction Reading and Language Arts for Students with Mild/Moderate Disabilities .................. 3

Spring:
SPED 5050 Applied Behavioral Analysis 2: Applications .......... 3
SPED 5060 Consulting with Parents and Teachers ....................... 3
SPED 5340 Teaching Math to Students with Mild/Moderate Disabilities ................................................................. 3
SPED 5420 Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities ........................................ 3

Severe Specialization (29 credits)

Fall:
SPED 5010 (Q) Applied Behavioral Analysis 1: Principles, Assessment, and Analysis .............................................. 3
SPED 5040 Foundations of Effective Assessment and Instructional Practices ......................................................... 3
SPED 5510 Curriculum for Students with Severe Disabilities .......... 4

Composite Early Childhood Education and Deaf Education Major

Early Childhood Education Major (56 credits)
Students should complete all of the following courses as indicated.

Note: Teaching licensure requires a 2.75 cumulative grade point average (GPA). (Grades lower than a C will not be accepted toward the major.)

Level I (6 credits)
ELED 1010 Orientation to Elementary Education (F,Sp,Su) ............................................................. 3
FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) ......................................................... 3

Level II (courses taken concurrently during fall or spring semester) (15 credits)
Students must be admitted to the Teacher Education Program prior to taking these classes.
ELED 3000 (CI) Foundation Studies, Practicum in Teaching and Classroom Management Level II .................................................. 6
Department of Elementary Education

ELED 3100 Teaching Reading I ................................................. 3
FCHD 2600 Seminar in Early Childhood Education (F,Sp) .......... 2
FCHD 2630 Practicum in Early Childhood Education (F,Sp) ..... 2
PSY 3660 Educational Psychology for Teachers ..................... 2

Transition (11 credits)
SPED 4000 Education of Exceptional Individuals ...................... 2
INST 4010 Principles and Practices of Technology for Elementary Teachers ................................................................. 3
FCHD 4550 Preschool Methods and Curriculum ........................ 3
ELED 4480 Early Childhood Education Kindergarten ................. 3

Level III (courses taken concurrently during fall, spring, or summer semester) (15 credits)
ELED 4000 Teaching Science and Practicum Level III ................ 3
ELED 4030 (CI) Teaching Language Arts and Practicum Level III . 3
ELED 4040 (CI) Teaching Reading II and Practicum Level III ...... 3
ELED 4050 Teaching Social Studies and Practicum Level III ........ 3
ELED 4060 Teaching Mathematics and Practicum Level III .......... 3

Additional Course for Early Childhood (3 credits)
FCHD 4960 (CI) Practice Teaching in Child Development Laboratories (Su also) ................................................................. 3

Deaf Education Requirements (47-49 credits)
COMD 2500 Language, Speech, and Hearing Development (F,Sp) ................................................................................. 3
COMD 2910 (CI) Sign Language I (F,Sp,Su) .................................... 4
COMD 3080 American Sign Language Practicum (F,Sp).............. 1-3
COMD 3910 Sign Language II (F,Sp,Su) ........................................ 4
COMD 5610 Introduction to Education of the Deaf and Hard of Hearing (F) ........................................................................... 3

Note: COMD 2500, 2910, 3910, and 5610 should be completed prior to the Deaf Education blocks.

Fall:
COMD 4750 Teaching the English Language to Individuals who are Deaf and Hard of Hearing ............................................. 3
COMD 4770 Audiology and Teachers of Children who are Deaf and Hard of Hearing ............................................................. 3
COMD 4780 Socio-Cultural Aspects of Deafness ............................ 3
COMD 4910 (CI) Sign Language III ............................................. 4
COMD 5740 Teaching Reading to Deaf and Hard of Hearing Children ...................................................................................... 3

Spring:
COMD 4630 Teaching Speech to Deaf and Hard of Hearing Children ...................................................................................... 3
COMD 4790 Psychological Principles and Individuals who are Deaf and Hard of Hearing ......................................................... 3
COMD 4920 Sign Language IV ...................................................... 4
COMD 5600 Classroom Teaching Using American Sign Language .............................................................................................. 3
COMD 5620 Teaching School Subjects to Students who are Deaf and Hard of Hearing ............................................................ 3

Suggested Four-year Course of Study for Elementary Education/Deaf Education Composite Major

This is a model of the requirements and possible sequence of courses. However, students may progress through the program or have more flexibility if they have high ACT scores, CLEP credit, concurrent enrollment credit, AP credit, and/or transfer credit; or if they attend during summer semesters.

Freshman Year (34 credits)
Fall Semester (16 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .......... 3
MATH 1050 (QL) College Algebra ............................................ 4
HEP 2000 First Aid and Emergency Care (2 cr) or
HEP 3500 Elementary School Health Education (2 cr) .......... 2
Breadth American Institutions (BAI) course ......................... 3
Breadth Humanities (BHU) course ......................................... 3
Breadth Life Sciences (BLS) course ....................................... 3

Spring Semester (16 credits)
COMD 2910 (CI) Sign Language I ............................................. 4
Breadth Creative Arts (BCA) course ......................................... 3
Breadth Physical Sciences (BPS) course ................................ 3

Level I courses:
FCHD 4550 Human Development Across the Lifespan ............. 3
ELED 1010 Orientation to Elementary Education ..................... 3
Note: Apply to the program by the July 1 deadline.

Sophomore Year (33 credits)
Fall Semester (15 credits)
Level II courses:
Students must be admitted to the Teacher Education Program prior to enrolling in Level II courses.
ELED 3000 (CI) Foundation Studies and Practicum in Teaching and Classroom Management ......................................................... 8
SPED 4000 Education of Exceptional Individuals .................. 2
PSY 3660 Educational Psychology for Teachers ...................... 3
INST 4010 Principles and Practices of Technology for Elementary Teachers ................................................................. 3

Spring Semester (18 credits)
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................................................. 3
MATH 2020 (QI) Introduction to Logic and Geometry .................. 3
MUSC 3260 Elementary School Music ..................................... 2
COMD 3910 Sign Language II .................................................. 4
Breadth Physical Sciences (BPS) course ................................ 3
Breadth Social Sciences (BSS) course .................................... 3

Junior Year (33 credits)
Fall Semester (18 credits)
STAT 1040 (QL) Introduction to Statistics .............................. 3
PEP 3050 Physical Education in the Elementary School .......... 3
COMD 2500 Language, Speech, and Hearing Development .... 3
COMD 5610 Introduction to Education of the Deaf and Hard of Hearing .................................................................................. 3
University Studies Depth courses ........................................... 6

Spring Semester (15 credits)
Level III courses:
ELED 4000 Teaching Science and Practicum Level III ............. 3
ELED 4030 (CI) Teaching Language Arts and Practicum Level III .... 3
ELED 4040 (CI) Teaching Reading II and Practicum Level III ....... 3
ELED 4050 Teaching Social Studies and Practicum Level III ...... 3
ELED 4060 Teaching Mathematics and Practicum Level III ....... 3

Senior Year (32 credits)
Fall Semester (16 credits)
COMD 4750 Teaching the English Language to Individuals who are Deaf and Hard of Hearing ............................................. 3

*Student Teaching is completed during the MEd Graduate Program.*

---

### Endorsements

The USU Elementary Education Department and Secondary Education Department jointly offer a K-12 English as a Second Language (ESL) Endorsement, as well as a Middle-Level Endorsement. Graduate endorsements are also available in Early Childhood Education, ESL, Reading, Gifted and Talented, and Middle-Level Education.

### Departmental Honors

Students having majors within the Department of Elementary Education may choose to add breadth and depth to their regular course offerings by enrolling in the departmental honors program. A cumulative GPA above 3.5 is required for enrollment.

Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level.

For additional information about departmental honors within the Department of Elementary Education, contact Deborah Byrnes, (435) 797-0396, deborah.byrnes@usu.edu.

### Additional Information

For more information concerning requirements for University graduation and for basic professional teaching licensure in elementary education, early childhood education, and middle education, see major requirement sheets available from the Elementary Education Department Advisement Center, Emma Eccles Jones Education Building, Room 373. Major requirement sheets can also be found online at: [http://www.usu.edu/ats/majorsheets/](http://www.usu.edu/ats/majorsheets/)

### Financial Support

The following scholarships are available to junior and senior students: Ballam, Blair, Bowen, DeHart, Frye, Hales, Jackson, Kurzhals, McEvoy, Stewart, Taylor, Vest, Watterson, and Young. To be eligible, students must have completed Level II of the Elementary Education Program and have a cumulative GPA of 3.5 or higher. Applications are available from the Elementary Education Department and are due by February 1.

### Graduate Programs

#### Admission Requirements

Students applying for admission to master’s programs must have GRE scores at or above the 40th percentile. This same percentile is the minimum required on the MAT. For the doctorate degree, GRE scores at or above the 40th percentile are also required on the verbal and quantitative tests. Admission committees also consider experience, undergraduate record, curricula completed, and formal recommendations. One year of successful elementary school teaching experience is required for the master’s program. Two years of teaching experience or the equivalent is required for admission to the doctoral program. Students with deficient oral or written English skills will be required to complete additional coursework to improve their skills.

Admission to graduate programs is contingent upon (1) completion of an application to graduate school and (2) recommendation by the department screening committee for the master’s program or the management admissions committee for the doctoral program. In addition to the requirements of the School of Graduate Studies (see pages 99-100), letters of recommendation must be received from three professionals in education.

### Degree Programs—On Campus

Three avenues exist for on-campus students wishing to pursue a master’s degree in the Department of Elementary Education at Utah State University. They are as follows:

#### Master of Arts/Master of Science—Plan A

Students planning to pursue a future doctoral degree or wishing to follow a traditional master’s degree should complete a Master of Arts or Master of Science (Plan A) degree. This is a 36-credit program, including 6 credits for the thesis. EDUC 6570 is required as a research course (rather than EDUC 6550). A copy of the Program of Study form listing other required core and professional option courses is available from the department office. A committee chair and two committee members will work with students pursuing the Plan A master’s degree. Plan A students should submit an Appointment for Examination form to their major professor, committee, and the Graduate School at least five working days before the final examination is to be held.

Requirements for the Master of Arts degree include two years of an acceptable foreign language or the equivalent, as determined by testing arranged by the supervisory committee and approved by the department and the graduate dean. One year each, or the equivalent, of two languages is acceptable if approved by the student’s committee.

#### Master of Education—Plan B

Students wishing to include a creative project as part of their master’s degree program should enroll in the Master of Education (Plan B) program. Three credits will be given for ELED 6960, Master’s Creative
Project. All MEd students will complete EDUC 6550 (Research for Classroom Teachers, 3 credits) and other courses listed on the current Program of Study form. A committee chair and two committee members will work with students completing the creative project; however, the chairperson will have major responsibility in approving the proposal and primarily work as the program advisor, with the committee members being involved more directly in the presentation of the creative project.

**Master of Education—Plan C**

In order to provide another option for prospective elementary education master’s degree students, the Department of Elementary Education conducts a Plan C option within its Master of Education Degree. The basic elements of a Plan C option include completion of 40 credits of prior approved graduate courses, completion of an exit paper, and an oral review.

The exit paper should be a pre-planned scholarly activity. It could be a paper discussing coursework applicability to the student’s teaching assignment, or a written plan for changing curriculum and/or instruction drawing on coursework and the student’s role, etc. The intent is that the exit paper be an integral part of the planned course of study.

A notice of intent to complete the degree must be filed with the School of Graduate Studies at the beginning of the last semester of coursework. A letter of completion should be filed by the department chairperson upon successful completion of all requirements.

**Degree Programs—Off Campus**

Two avenues exist for students wishing to pursue a master’s degree in the Department of Elementary Education at Utah State University primarily through offerings at USU Continuing Education centers. They are as follows.

**Master of Education—Plan B**

Off-campus students wishing to include a creative project as part of their master’s degree program should enroll in the Master of Education Program. Three credits will be given for ELED 6960 (Master’s Creative Project). All MEd students will complete the required core and other courses listed on the current Program of Study form. A committee chair and two committee members will work with students completing the creative project; however, the chairperson will have major responsibility in approving the proposal and primarily work as the program advisor, with the committee members being involved more directly in the presentation of the creative project (oral exam).

**Master of Education—Plan C**

In order to provide another option for prospective off-campus elementary education master’s degree students, the Department of Elementary Education conducts a Plan C option within its Master of Education Degree. The basic elements of a Plan C option include completion of 40 credits of prior approved graduate courses, completion of an exit paper, and an oral review.

The exit paper should be a pre-planned scholarly activity. It could be a paper discussing coursework applicability to the student’s teaching assignment, or a written plan for changing curriculum and/or instruction drawing on coursework and the student’s role, etc. The intent is that the exit paper be an integral part of the planned course of study.

A notice of intent to complete the program should be filed by the student with the department and the School of Graduate Studies at the beginning of the semester the candidate is to finish the degree. A letter of completion should be filed by the committee chairperson upon successful completion of all requirements.

**Doctoral Programs (PhD and EdD)**

The department participates in the Interdepartmental Doctoral Program in Education, which includes the Doctor of Philosophy (PhD) and the Doctor of Education (EdD). For information about areas of specialization, emphasis of study, research sponsored, admission requirements, procedures to follow, and other information, see pages 251-252 of this catalog.

**Additional Information**

All students completing master’s degrees in Elementary Education must enroll for a minimum of 10 credits on the USU campus, except for students completing their degrees at the following USU continuing education centers: Uintah Basin Campus (Vernal and Roosevelt), Moab Center, Price Center, and Blanding Center.

The Program of Study form for the appropriate degree and plan described above should be approved by the committee and submitted to the School of Graduate Studies at least two months prior to the oral exam, oral review, or presentation appropriate to that degree.

After matriculation into the program, a master’s degree must be completed within a six-year time period. Pass/fail grades will be accepted only for seminars, special problems, interdisciplinary workshops, thesis or dissertation research, and continuing graduate advisement. A maximum of 8 workshop credits may be included. Transfer credit accepted toward a degree is normally limited to 6 credits; however, with prior approval, 12 transfer credits may be accepted. A maximum of 15 credits taken during one summer may be counted toward the degree. A maximum of 12 credits taken before admission to the program may be counted toward the degree. All coursework in a student’s area of specialization must be taken at the 6000 level or above, in order to be applied toward a graduate degree in the Department of Elementary Education. Coursework goes out-of-date after eight years.

Admission deadlines for students applying to graduate programs are: June 15 for fall semester, October 15 for spring semester, and March 15 for summer semester.

**Research**

Cooperation with other departments and research centers at the University, as well as with public school and State Office of Education collaborators, permits strong graduate programs in all phases of elementary education. Research opportunities are available with the Edith Bowen Laboratory School, cooperating school districts in Utah and surrounding states, the Utah State Office of Education, and the United States Department of Education.

**Financial Assistance**

Both departmental and School of Graduate Studies support are available for the regular academic program and are awarded on a competitive basis. Students requesting financial support should apply to the department by March 15. To be eligible for financial assistance, a student must attend USU full-time. No financial assistance is available for summer semester.
Assistantships
Teaching assistantships are available through the department. Some research assistantships are available through faculty members who have ongoing projects with off-campus funding agencies.

Students are not eligible for assistantships or any form of financial assistance from the University until all application procedures are completed and the student is formally admitted to a program of studies.

Acceptance to pursue graduate study does not guarantee student financial assistance. Inasmuch as funds are limited, the assistantships are awarded by the department to cover specific teaching assignments and by the faculty to provide for research.

Doctoral students desiring information about financial assistance should write to: Coordinator, Doctoral Degrees, College of Education and Human Services, 2800 Old Main Hill, Utah State University, Logan UT 84322-2800.

Career Opportunities
Positions in Higher Education—Master Teachers
Many school districts support and encourage teachers to further their education and expertise by obtaining a master’s degree. Added financial remuneration generally accompanies the completion of such a degree. Supervisors, curriculum specialists, and other professional careers are enhanced by completion of a master’s degree.

Completion of a doctorate degree qualifies the graduate for a wide variety of careers, including positions in higher education, curriculum specialist positions in school districts and state offices of education, positions in educational agencies of the United States government, and educational specialist positions in business and industry.

Elementary Education Faculty
Emma Eccles Jones Distinguished Professor
D. Ray Reutzel, reading

Professors
Deborah A. Byrnes, social studies education, early childhood education
Martha T. Dever, foundations, early childhood education
James T. Dorward, mathematics, program evaluation, middle level education
Bernard L. Hayes, reading education
John A. Smith, reading education

Associate Professors
James J. Barta, mathematics, early childhood education
Gary L. Carlston, instructional leadership
Parker C. Fawson, reading
Scott L. Hunsaker, gifted/talented education, foundations
Francine Fukui Johnson, foundations, gifted/talented education, supervision
Rebecca M. Monhardt, science education
Martha L. Whitaker, foundations

Assistant Professors
Tricia M. Gallagher-Geurtsen, social studies, multicultural/multilingual education
Leigh C. Monhardt, science education
Lisa Pray, bilingual/English-as-a-second-language education
Sylvia Read, language arts education

Temporary Lecturer
Judy Greene, language arts/foundations

Undergraduate Advisor:  
Ronnie Green, Engineering 312, (435) 797-2790, ronnie@engineering.usu.edu

Degrees offered: Bachelor of Science (BS) and Master of Science (MS) in Engineering and Technology Education, BS in Aviation Technology—Professional Pilot, A&P Certificate in Aircraft Maintenance Technician—Airframe & Powerplant

Undergraduate emphases: BS in Engineering and Technology Education—Technology Education and Trade and Technical Education

Undergraduate Programs

Objectives

The Department of Engineering and Technology Education offers degrees in two fields: engineering and technology education and aviation technology. The department values the integration of academic knowledge with hands-on technical skills. This is achieved by emphasizing the application of scientific and technological principles in extensive laboratory activities. The department strives to ensure that all graduates will obtain employment to match their interests and preparation.

The Engineering and Technology Education programs prepare graduates to teach in public schools, applied technology colleges, and community colleges. Aviation Technology—Maintenance Management graduates fill aviation maintenance management positions in government and industry. The Aviation Technology—Professional Pilot curriculum prepares graduates to be professional pilots. The A&P Certificate in Aircraft Maintenance Technician—Airframe & Powerplant provides training and FAA licensing for graduates to perform maintenance and repairs on aircraft.

Admission Requirements

Admission requirements are commensurate with those outlined for the University. See pages 16-20 in this catalog.

Professional Technology Program (PTP)

The Professional Technology Program (PTP) applies to the Aviation Technology—Maintenance Management major, as well as to the Aviation Technology—Professional Pilot major. The purpose of the program is to provide a quality education for students by requiring that they be fully prepared for upper-division coursework by having satisfactorily completed all required pre-professional courses.

Enrollment in upper-division AV and ETE courses (3000-level and above) is available only to students who have been accepted into the PTP or into an appropriate graduate program or to students with a non-ETE major requiring a specific class. (Non-ETE majors may take a maximum of two upper-division AV or ETE classes.)

To be eligible to apply for admission to a professional program, a student must be in good academic standing in the University and college, must achieve a grade of C- or better in every required preprofessional course, and must have an overall grade point average of 2.5 in required preprofessional coursework completed at USU.

A student can repeat no more than three of the required preprofessional courses in order to satisfy the PTP application and eligibility requirements. Multiple repeats of the same course are included in the total of three repeats. Audits count as a time taking a class unless prior written approval is obtained from the college academic advisor.

Although transfer credit accepted by the department and the college may be applied toward PTP admission requirements, the grades received will not be used in the USU GPA calculation. A final decision on admission of a transfer student into the PTP will not be made until after the applicant has completed at least 15 credits of acceptable coursework at USU.

Eligible students must apply for admission to the PTP during the semester in which they are completing the required preprofessional courses.

For all technology majors in the Professional Program, the following academic regulations apply in addition to University regulations:

1. A minimum GPA of 2.2 must be maintained in technology/math/science/business courses required for, or used as technical electives in, the chosen major. Courses which were part of the preprofessional program requirements and University Studies courses are not included in this GPA calculation.

2. No more than 6 hours of D or D+ credit may be applied toward meeting graduation requirements in technology/math/science/business classes.

3. College of Engineering courses may be repeated only once. Audits count as a time taking a class unless prior written approval is obtained from the department head. A maximum of three required or elective courses completed as part of a Professional Program can be repeated in order to meet graduation requirements. (Courses completed as part of a preprofessional program are not included in this total of three repeats.)

4. The P-D-F grading option may not be used in required or elective courses completed as part of a Professional Program. (The P-D-F grading option is approved for University Studies courses.)

5. The academic regulations listed above (1-4) apply to required coursework and any technology/math/science/business course which could be used to satisfy graduation requirements for the chosen degree. That is, once a student completes a particular technical elective, it becomes a required course for that student.

6. Students in violation of departmental or college academic regulations, no longer eligible for graduation, or not making satisfactory progress toward a degree will be placed on probation.
Department of Engineering and Technology Education

a. Students will be placed on probation if they (i) earn an F in a technology/math/science/business course which could be used to satisfy graduation requirements for the chosen degree (see item 5 above); (ii) have more than 6 hours of D credit (see item 2 above); or (iii) have a GPA of less than 2.0 (see item 1 above).

b. Students remain on probation until they improve their standing by repeating and passing all failed classes, repeating classes to reduce the number of D credits to 6 or less, and/or by raising their GPA above 2.0.

c. While on probation, a student must earn a semester GPA of 2.0 or higher in technology/math/science/business classes and must not earn any grades of D or F.

While on probation, a student may not preregister. The student’s major code will be changed to a preprofessional code. The student must meet at least once per semester with the college academic advisor to work out a schedule having the primary goal of correcting the existing academic problems.

Requirements

Bachelor of Science in Engineering and Technology Education

Technology Education Emphasis
The Technology Education emphasis is designed to prepare students for teaching in junior and senior high schools. Students should follow the suggested semester schedule presented below, completing all courses listed. Consult with an advisor when choosing elective courses. All students in this program must maintain a cumulative GPA of 2.75 and gain admission to teacher education, in order to student teach and to receive secondary education licensure (College of Education and Human Services). The suggested semester schedule is as follows:

Freshman Year (33 credits)

Fall Semester (17 credits)
ETE 1000 Orientation to Engineering and Technology Education 1
ETE 1010 Communications Technology 1 2 3 4
ETE 1030 Material Processing Systems 1 2 4
ETE 1200 Computer Aided Drafting and Design 1 2 3 4
ENGL 1011 (CL1) Introduction to Writing: Academic Prose 1 2 3 4
MATH 1050 (QL) College Algebra 1 2

Spring Semester (16 credits)
ETE 1020 Energy, Power, Transportation Systems Control Technology 1 2 3
ETE 1040 Construction and Estimating 1 2 3
MATH 1060 Trigonometry 2 3
University Studies Breadth courses 1 2 3 4 5 6
Elective courses(s) 1 2 3 4 5 6

Sophomore Year (30 credits)

Fall Semester (16 credits)
Note: Students should apply to the Secondary Teacher Education Program (STEP) early (see advisor).
ETE 2030 Wood Based Manufacturing Systems 1 2 3 4
ETE 2300 (QL) Electronic Fundamentals 1 2 3 4 5
ETE 3220 Architecture and Construction Systems 1 2 3 4
University Studies Breadth course 1 2 3 4 5 6
Elective courses(s) 1 2 3 4 5 6

Spring Semester (15 credits)
ETE 3440 (DSC) Science, Technology, and Modern Society 1 2 3 4
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode 1 2 3 4 5 6
PHYS 1800 (BPS) Physics of Technology 1 2 3 4 5 6
SPED 4000 Education of Exceptional Individuals 1 2 3 4 5 6
Elective course(s) 1 2 3 4 5 6

Junior Year (31 credits)

Fall Semester (16 credits)
ETE 3200 Methods of Teaching Engineering and Technology Education I 1 2 3 4 5 6
ETE 3300 Clinical Experience I 1 2 3 4 5 6
SCED 3100 Motivation and Classroom Management 1 2 3 4 5 6
SCED 3210 (CI/DSS) Educational and Multicultural Foundations 1 2 3 4 5 6
University Studies Breadth courses 1 2 3 4 5 6

Spring Semester (15 credits)
ETE 2660 Principles of Engineering Education 1 2 3 4 5 6
ETE 4300 Clinical Experience II 1 2 3 4 5 6
ETE 4400 Methods of Teaching Engineering and Technology Education II 1 2 3 4 5 6
SCED 4200 (CI) Reading, Writing and Technology 1 2 3 4 5 6
SCED 4210 Cognition and Evaluation of Student Learning 1 2 3 4 5 6
ADVS 2040 Introduction to Biotechnology 1 2 3 4 5 6
INST 3500 Technology Tools for Secondary Teachers 1 2 3 4 5 6

Senior Year (27 credits)

Fall Semester (12 credits)
ETE 5500 Student Teaching Seminar 1 2 3 4 5 6
ETE 5630 Student Teaching in Secondary Schools 1 2 3 4 5 6

Spring Semester (15 credits)
ETE 3040 Engineering Systems 1 2 3 4 5 6
ETE 3050 Computer Systems and Networking 1 2 3 4 5 6
ETE 5220 (CI) Program and Course Development 1 2 3 4 5 6
University Studies Depth Humanities and Creative Arts (DHA) course 1 2 3 4 5 6
Elective course(s) 1 2 3 4 5 6

1 The INST 3500 requirement has been waived. However, INST 4500 is recommended.
2 This course is included in the Secondary Education Licensure Requirements. Prior to enrolling in this course, students must be admitted to the STEP.
3 Students must maintain a cumulative 2.75 GPA for admission to the College of Education and Human Services, for student teaching, and to receive secondary education licensure.
4 A Math ACT score of 23 or higher is required for enrolment in MATH 1050. If Math ACT score is between 18 and 22, student should enroll in MATH 1010 first.
5 PHYS 1800 fulfills the University Studies Breadth: Physical Sciences (BPS) requirement.
6 SCI 3210 fulfills the University Studies Breadth: Physical Sciences (BPS) requirement.
7 MATH 1050 is a prerequisite for ETE 2300.
8 MATH 1050 and 1060 are prerequisites for PHYS 1800 (which needs to be completed during the sophomore year).

Trade and Technical Education Emphasis
The Trade and Technical Education emphasis is designed to prepare students to teach vocational courses at the high school or post-high school level. Students should complete all courses listed below. All students in this emphasis must maintain a GPA of 2.75 in order to student teach.

INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su) 2

1 2 3 4 5 6

General elective courses .............................................................................. 9

State licensure requires a minimum of two years of approved vocational experience. Successful completion of a trade competency examination is accepted in lieu of vocational experience.

Bachelor of Science in Aviation Technology—Maintenance Management

Aviation Technology—Maintenance Management graduates are qualified to enter the work force in many rewarding career fields in aviation. Employment opportunities exist in target industries such as major airline carrier maintenance management, commuter airline maintenance management, fixed-base operator (FBO) maintenance, and Federal Aviation Administration (FAA) aircraft inspection after some field experience. This major has a great deal of depth in general maintenance, which applies to most industrial maintenance operations. Although the major’s focus is aviation, the knowledge and skills gained can be used in other fields.

The suggested semester schedule for Aviation Technology—Maintenance Management is as follows:

Freshman Year (34 credits)
Fall Semester (17 credits)
AV 1130 Flight Principles .................................................................................. 2
AV 1140 Aircraft Components and Principles ................................................. 2
AV 1170 Aircraft Structures ........................................................................... 3
AV 2180 Aircraft Hydraulic and Pneumatic Systems ........................................ 2
AV 2200 Aircraft Hydraulics and Pneumatic Systems Lab ................................ 1
MATH 1050 (QL) College Algebra .................................................................. 4
University Studies Breadth course ................................................................. 11,12

Spring Semester (17 credits)
AV 1240 Aircraft Maintenance ........................................................................ 3
AV 2170 Aircraft Systems ................................................................................ 3
AV 2190 Aircraft Systems Lab ......................................................................... 2
ETE 1030CAD Material Processing Systems ................................................. 1
ETE 1200 Computer-Aided Drafting and Design ......................................... 3
MATH 1060 Trigonometry ............................................................................. 1
University Studies Breadth course ................................................................. 11,12

Sophomore Year (33 credits)
Fall Semester (16 credits)
AV 2100 Aircraft Reciprocating Powerplants and Accessories ....................... 3
AV 2110 Aircraft Reciprocating Powerplants and Accessories Lab .................. 3
ETE 2300 (Qi) Electronic Fundamentals ......................................................... 4
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .......................... 3
Elective course(s) ......................................................................................... 3

Spring Semester (17 credits)
AV 1100 The Aviation Profession ..................................................................... 1
AV 2140 Aircraft Turbine Powerplants and Maintenance Operations .......... 3
AV 2150 Aircraft Turbine Powerplant Maintenance Operations Lab ............. 3
AV 2430 Aircraft Electrical Systems and Components .................................... 2
AV 2440 Aircraft Electrical Systems Laboratory ............................................ 2
ENGL 1020 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................................................................................. 3
University Studies Breadth course ................................................................. 11,12

Junior Year (30 credits)
Fall Semester (14 credits)
AV 3010 National Airspace, Air Traffic Control, and Airport Administration .... 3
AV 3280 Advanced Turbine Engines ............................................................. 2
MATH 1100 (QL) Calculus Techniques ........................................................... 3
Technical Elective course ............................................................................. 3
University Studies Breadth course ................................................................. 11,12

Spring Semester (16 credits)
AV 2420 FAA Regulations, Records, and Certification .................................... 2
AV 3610 AeroTechnology Design I ............................................................... 1
AV 4490 Human Factors in Aviation Safety .................................................... 3
MHR 3110 (DSS) Managing Organizations and People .................................... 3
PHYS 1800 (BPS) Physics of Technology ...................................................... 4
University Studies Depth Humanities and Creative Arts (DHA) course 11,12 ........................................................................................................... 3

Senior Year (29 credits)
Fall Semester (16 credits)
AV 4620 (CI) AeroTechnology Design III ..................................................... 3
MHR 3710 Developing Team and Interpersonal Skills ..................................... 3
STAT 2300 (Qi) Business Statistics ................................................................. 4
University Studies Breadth course ................................................................. 11,12

Spring Semester (13 credits)
AV 4200 Composite Manufacturing Processes and Repair .......................... 3
Technical Elective courses ............................................................................ 7

Students must complete a total of 40 credits of stipulated upper-division coursework.

---

8 This course is required for entrance to the Professional Technology Program (PTP).
9 A Math ACT score of 23 or higher is required to enroll in MATH 1050. If Math ACT score is between 18 and 22, student should enroll in MATH 1010 first. MATH 1050 is a prerequisite for STAT 2300, ETE 2300, and PHYS 1800.
10 Students must have a cumulative GPA of at least 2.67 and have professional status to be admitted to these College of Business courses.
11 Due to teaching load constraints, these courses may be offered during semesters other than those listed here. Check with the department regularly for possible changes. Most of these classes are offered only once each year.
12 These courses may be taken during summer semester to allow for more reasonable course loads during the academic year.
13 Students must take 10 credits of technical electives which must be in upper-division courses (3000-level and above).
14 PHYS 1800 fulfills the University Studies Breadth Physical Sciences (BPS) requirement.
15 MHR 3110 fulfills the University Studies Depth Social Sciences (DSS) requirement.
16 MATH 1060 is a prerequisite for PHYS 1800.

Utah State University 2006-2007 General Catalog
Department of Engineering and Technology Education

Bachelor of Science in Aviation Technology—Professional Pilot

Aviation Technology—Professional Pilot graduates are trained to be commercial pilots. The degree requirements include completion of the following FAA licenses: private, instrument, commercial, CFI, CFII, and Multi-Engine. The suggested semester schedule for this degree is as follows:

Freshman Year (31 credits)
Fall Semester (15 credits)
AV 1100 The Aviation Profession .................................................... 1
AV 1130 Flight Principles ............................................................. 2
AV 2330 Private Pilot Ground School ............................................ 4
AV 2350 Private Pilot Certification .................................................. 1
MATH 1050 (QL) College Algebra ................................................. 4
University Studies Breadth course .................................................. 3

Spring Semester (16 credits)
AV 2170 Aircraft Systems ............................................................. 2
AV 2550 Intermediate Flight .......................................................... 1
BMET 2000 The Atmosphere and Weather ..................................... 3
ENGL 1010 Introduction to Writing: Academic Prose ................. 3
MATH 1060 Trigonometry .............................................................. 2
Elective courses ............................................................................ 5

Sophomore Year (34 credits)
Fall Semester (17 credits)
AV 2180 Aircraft Hydraulic and Pneumatic Systems ...................... 2
AV 2520 Instrument Pilot Ground School .................................... 4
AV 2540 Instrument Pilot Certification I ....................................... 1
ETE 2300 Electronic Fundamentals .............................................. 4
Any Communications Intensive (CI) approved course ................. 3
University Studies Breadth course .................................................. 3

Spring Semester (16 credits)
AV 2430 Aircraft Electrical Systems ............................................. 2
AV 2550 Intermediate Pilot Certification II ................................. 1
AV 2620 Commercial Pilot Ground School ................................. 2
BMET 3250 Aviation Weather ......................................................... 3
ENGL 2010 Intermediate Writing: Research Writing in a Persuasive Mode .................................................. 3
MATH 1100 Calculus Techniques .................................................. 3
University Studies Breadth course .................................................. 3

Junior Year (30 credits)
Fall Semester (16 credits)
AV 2660 Commercial Pilot Certification ..................................... 1
AV 3010 National Airspace, Air Traffic Control, and Airport Administration .................................................. 3
AV 3120 Aviation Law ................................................................. 3
AV 3140 Advanced Avionics Systems and Flight Simulation ........ 3
AV 4280 Airline Operations .......................................................... 3
University Studies Breadth course .................................................. 3

Spring Semester (14 credits)
AV 2720 CFI and CFII Ground School ........................................... 3
AV 2880 Multi-Engine Certification ............................................... 3
AV 4490 Human Factors in Aviation Safety ................................. 3
AV 5400 Regional Jet Ground School I ......................................... 4
MHR 3110 (DSS) Managing Operations and People .................... 3

Senior Year (31 credits)
Fall Semester (15 credits)
AV 2740 CFI Certification ............................................................ 1
AV 2860 CFII Certification ............................................................. 1
AV 4660 Flight Senior Project ....................................................... 3
AV 5410 Regional Jet Ground School II ....................................... 4
Upper-division elective course ..................................................... 3
University Studies Breadth course .................................................. 3

Spring Semester (16 credits)
ETE 5910 Special Problems: Regional Jet Simulator ................. 3
PHYS 1800 (BPS) Physics of Technology .................................... 4
Upper-division elective courses .................................................... 6
University Studies Depth Humanities and Creative Arts (DHA) course .................................................. 3

18 MATH 1050 is a prerequisite for entrance to the Professional Technology Program (PTP). Completion of the Computer and Information Literacy (CIL) exams with passing grades is also required for PTP admission.
19 Students should contact their advisor for a list of approved upper-division electives.
20 This course is required for entrance to the Professional Technology Program (PTP).
21 Students must have a cumulative GPA of at least 2.67 and have professional status in order to be admitted to College of Business classes.

A&P Certificate in Aircraft Maintenance Technician—Airframe & Powerplant

This two-year technical program emphasizes aircraft repair and maintenance. Required courses are:

AV 1130 Flight Principles ............................................................. 2
AV 1140 Aircraft Components and Principles (F) ...................... 2
AV 1170 Aircraft Structures ......................................................... 3
AV 1240 Aircraft Maintenance ...................................................... 3
AV 2100 Aircraft Reciprocating Powerplants and Accessories .................. 3
AV 2110 Aircraft Reciprocating Powerplants and Accessories Lab .................................................. 3
AV 2140 Aircraft Turbine Powerplants and Maintenance Operations .................................................. 3
AV 2150 Aircraft Turbine Powerplant Maintenance Operations Lab .................................................. 3
AV 2170 Aircraft Systems ............................................................ 3
AV 2180 Aircraft Hydraulic and Pneumatic Systems .................. 2
AV 2190 Aircraft Systems Lab ...................................................... 1
AV 2200 Aircraft Hydraulics and Pneumatics Systems Lab (F) .......... 1
AV 2420 FAA Regulations, Records, and Certification (Sp) ......... 2
AV 2430 Aircraft Electrical Systems and Components (Sp) .......... 2
AV 2440 Aircraft Electrical Systems Laboratory (Sp) ................. 2
AV 3280 Advanced Turbine Engines (F) ...................................... 2
AV 4200 Composite Manufacturing Processes and Repair (Sp) ...... 3
ETE 1030 Material Processing Systems (F,Sp) ......................... 3
ETE 1200 Computer-Aided Drafting and Design (F,Sp,Su) ........... 4
ETE 2300 Electronic Fundamentals (F,Su) .............................. 4
MATH 1050 College Algebra ....................................................... 4
MATH 1060 Trigonometry ........................................................... 2
PHYS 1800 (BPS) Physics of Technology .................................... 4
ENGL 1010 Introduction to Writing: Academic Prose (F,Sp,Su) ......... 3

FAA regulations require students to earn a 70 percent or higher score to pass each course.

Students must complete a total of 40 credits of stipulated upper-division coursework.
Department of Engineering and Technology Education

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

MS Degree

The degree is designed for technology educators who want to strengthen their background in current educational theory and practice. Students are required to complete a professional core of courses relating to technology education or applied technology education and to select additional courses from a list of related courses. Plan A requires a minimum of 30 semester credits, including a thesis. Plan B is a nonthesis option that requires 33 semester credits, including a creative project. The core courses for this specialization are as follows: ETE 6090, 6100, 6150, 6450, and 6750.

Financial Assistance

The department offers a limited number of graduate research and teaching assistantships. For further information, contact the Engineering and Technology Education Department.

Engineering and Technology Education Faculty

Professors
Kurt Becker, technology education, construction technology, computer aided drafting
Edward M. Reeve, technology education, communication technology
Maurice G. Thomas, technology education

Professor Emeritus
Jay C. Hicken, technology education, wood technology, power/energy transportation

Associate Professors
Ward P. Belliston, computer electronics technology
Richard A. Charles, director of Aviation Program
Gary A. Stewardson, technology education, manufacturing technology

Assistant Professor
Paul D. Schreuders, engineering education

Senior Lecturer
James L. Garrett, aviation maintenance

Lecturers
Randall W. Chesley, aviation maintenance
Gary R. Green, aviation technology, professional pilot

Chief Flight Instructor
Sean E. Heiner

Course Descriptions

Aviation Technology (AV), pages 565-566.
Engineering and Technology Education (ETE), pages 621-624.

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), and Master of Arts (MA) in English; BS, BA, MS, and MA in American Studies; Doctor of Philosophy (PhD) in Theory and Practice of Professional Communication

Undergraduate emphases: BS, BA in English—Literary Studies, Professional and Technical Writing, English Teaching, and Creative Writing

Graduate specializations: MS, MA in English—Literature and Writing, Technical Writing; MS, MA in American Studies—Folklore, Public Sector Folklore

Undergraduate Programs

General Objectives

The undergraduate programs in English and American Studies encourage students to gain an appreciation of language and literature through reading, analysis, and writing as a means of enriching their lives as individuals, citizens and professionals. Through a variety of courses in literature, writing, and linguistics, students develop an awareness of these subjects in their personal and cultural contexts, a heightened sensitivity to human experience, and a capacity to adapt to a world of continually changing values and centers of conflict. Students majoring in English or American Studies thus acquire communicative, analytical, and interpretive skills that help prepare them for a wide range of careers.

After completing a set of core requirements, students in English fulfill the requirements in one of four emphases: (1) the Literary Studies emphasis, which gives students a knowledge of the texts and writers of American, British, and world literature and their cultural contexts; (2) the Professional and Technical Writing emphasis, which prepares students for various writing careers in professional organizations; (3) the English Teaching emphasis, which prepares students for teaching secondary-level English in the public school system; and (4) the Creative Writing emphasis, which trains students in the art of literary writing and prepares them for graduate study in creative writing programs. The English Department also offers a major in American Studies.

The English Department offers a Folklore minor and an interdisciplinary American Studies major and minor. The American Studies Program, situated within the English Department, offers students the opportunity to explore American life and cultures from interdisciplinary perspectives, while preparing them for careers in academic or professional fields. Students may pursue either an American Studies major or minor or a folklore minor. The English Department also offers an English Teaching Minor, an English Minor (Standard Nonteaching), and a minor in British and Commonwealth Studies.

The English Department also offers specific courses supporting other fields of specialization, courses fulfilling University Studies requirements, and enriching educational experiences through opportunities for creativity and expression enhancing lifetime activities.

Admission and Graduation Requirements

The requirements for admission and graduation are commensurate with those described on pages 16-20 and 58-61 of this catalog. To remain in good standing and to obtain approval for graduation as English majors or minors, students must maintain a minimum grade point average of 2.75 in their major and minor courses. All courses listed as major or minor subject courses must be taken on an A-B-C-D-F basis, and major or minor subject courses passed with less than a C grade must be repeated. Transfer students are required to complete at least 15 semester credits of major subject courses and 10 semester credits of minor subject courses in residence at USU.

Students in the English Teaching major and minor may also apply to the Secondary Teacher Education Program (STEP). See page 496 for procedures and requirements pertaining to teacher licensure and admission requirements, or go online to:

http://www.coe.usu.edu/
Course Requirements

Core and Survey Requirements
Upon entering the major, all English majors must complete ENGL 1110 (English Orientation) as soon as possible. In addition, all English majors, except for students in the Professional and Technical Writing emphasis, are required to complete three of the 2000-level literature survey courses as soon as possible before enrolling in upper-division courses. Differing requirements for the Professional and Technical Writing Emphasis are shown below.

Literary Studies Emphasis
This 49-credit emphasis is devoted to the study of literature. Its fundamental premise is that literature is a field of diverse representations that gives shape and meaning to human experience.

Students first complete three of the 2000-level survey courses, which provide a traditional overview of the major periods, authors, and genres of American and British literature. At the same time, students take an introductory course on literary analysis which introduces them to the methodologies of literary criticism.

At the 3000 and 4000 levels, students closely examine the conventions and principles forming the more traditional survey courses. Focusing on specific literary periods, authors, and genres, these courses invite students to think critically about how literature is constructed and organized as a field of knowledge. They also take a course focusing on literary theory and a linguistics course in which they study the structure and history of the English language.

At the 5000 level, students pursue advanced study of literature in relation to issues of gender and sexuality, regional and national boundaries, and cultural differences. These courses provide the advanced theoretical tools necessary to analyze the relationship between literature and culture. These courses insist that literary texts both exist within and depend upon a complex network of other cultural representations. Students also select one elective course in authors or genres from ENGL courses numbered 4300 through 4370.

The final course, a senior capstone seminar (ENGL 5350), encourages graduating students to both synthesize and critique their differing educational experiences within the program.

A. Core Requirements (4 credits)
ENGL 1110 English Orientation (F,Sp)................................. 1
ENGL 2600* Literary Analysis (F,Sp)............................... 3

B. Literary History (9 credits)
Select three courses from the following:
ENGL 2140 British Literary History: Anglo-Saxon to 18th Century (F,Sp)................................................................. 3
ENGL 2150 British Literary History: Romanticism to Present (F,Sp)........................................................................ 3
ENGL 2160* American Literary History: Colonialism to 1885 (F,Sp)........................................................................ 3
ENGL 2170 American Literary History: 1865 to Present (F,Sp)......................... 3

C. American, British, and World Literature (9 credits)
Select ENGL 3330, plus two of the following three period courses:
ENGL 3300 Period Studies in American Literature (F,Sp)............... 3
ENGL 3310 Period Studies in British Literature (F,Sp).................. 3
ENGL 3320 Period Studies in World Literature (F,Sp)................. 3
ENGL 3330 Literary Theory (F,Sp)........................................ 3

D. Linguistics (3 credits)
Select one of the following courses:
ENGL 4200 Linguistic Structures (F,Sp,Su).............................. 3
ENGL 4210 History of the English Language (Sp)...................... 3

E. Authors (6 credits)
Complete ENGL 4300 and one other course.
ENGL 4300* American Writers (F,Sp).................................... 3
ENGL 4310* British Writers (F,Sp)........................................ 3
ENGL 4320* World Writers (F)............................................. 3

F. Genre (6 credits)
Select two courses from the following:
ENGL 4340* Studies in Prose Fiction (Sp)............................... 3
ENGL 4350* Studies in Poetry (F)........................................... 3
ENGL 4360* Studies in Drama/Film (Sp).................................. 3
ENGL 4370* Studies in Nonfiction Prose (F)........................... 3

G. Literature and Culture (6 credits)
Select two courses from the following:
ENGL 5300 (CI)* Literature and Gender (F,Sp)......................... 3
ENGL 5320 (CI)* Literature and Cultural Difference (Sp).......... 3
ENGL 5340 (CI)* Studies in Literary and Cultural Theory (F)...... 3

H. Capstone Seminar (3 credits)
ENGL 5350 (CI)* Literary Studies Capstone (Sp).................... 3

I. Electives (3 credits)
Select one additional course from category E or F.

Sample Four-year Plan for English Major,
Literary Studies Emphasis

Minimum GPA for Admission: 2.75, major; 2.75, USU; 2.75, Career
Minimum GPA for Graduation: 2.0, Career; 2.0, USU; 2.0, Career
Minimum Grade Accepted: C in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (30 credits)
Fall Semester (15 credits)
ENGL 1010 (CI1) Introduction to Writing: Academic Prose ........ 3
ENGL 1110 English Orientation........................................... 1
University Studies Breadth courses ....................................... 6
University Studies Quantitative Literacy (QL) course .............. 3
Elective course(s).................................................................... 2

Spring Semester (15 credits)
ENGL 2600 Literary Analysis ................................................ 3
ENGL Literary History course................................................ 3
University Studies Breadth courses ....................................... 9

Complete the CIL exams by the end of the Freshman Year.

Sophomore Year (30 credits)
Fall Semester (15 credits)
ENGL 2100 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode....................................................... 3
Department of English

ENGL Period Studies Literature course .................................................... 3
ENGL Literary History course ............................................................... 3
University Studies Breadth course ........................................................ 3
Depth Life and Physical Sciences (DSC) course ....................................... 3

Spring Semester (15 credits)
ENGL 3330 Literary Theory ................................................................... 3
ENGL Literary History course ............................................................... 3
ENGL Linguistics course ....................................................................... 3
Quantitative Intensive (QI) course (PHIL 2200 suggested) .................... 3
Elective course(s) .................................................................................. 3

Junior Year (30 credits)
Fall Semester (15 credits)
ENGL 4300 Shakespeare ....................................................................... 3
ENGL Authors course ............................................................................ 3
ENGL Genre course ............................................................................... 3
Elective courses ..................................................................................... 6

Spring Semester (15 credits)
ENGL Authors course ............................................................................ 3
ENGL Genre course ............................................................................... 3
ENGL Period Studies Literature course .................................................. 3
Depth Social Sciences (DSS) course ....................................................... 3
Elective course(s) .................................................................................. 3

Senior Year (30 credits)
Fall Semester (15 credits)
ENGL Communications Intensive (CI)
Literature and Culture course ................................................................. 3
ENGL Authors course or Genre course ................................................... 3
Elective courses ..................................................................................... 9

Spring Semester (15 credits)
ENGL 5350 (CI) Literary Studies Capstone ............................................. 3
ENGL Literature and Culture course ....................................................... 3
Elective courses ..................................................................................... 9

Note: All courses from the following categories are upper-division courses: American, British, and World Literature; Linguistics; Authors; Genre; and Literature and Culture.

Professional and Technical Writing Emphasis
This 49-credit emphasis prepares students for career opportunities in various writing-related careers in professional organizations. The emphasis consists of: (1) a theoretical foundation in rhetoric and linguistics, enabling students to assess any writing situation and adapt their writing to the context as audience-aware writers; and (2) writing practice in a variety of contexts using the most up-to-date tools of technology, so that students know how to write and why they are writing, thus preparing them for the ever-changing job markets of the twenty-first century.

Students begin their studies by completing one literature survey course and two introductory professional writing courses introducing students to the profession of writing and the current technologies used in all levels of text production. ENGL 3400 (Professional Writing) and ENGL 3410 (Professional Writing Technology), which are prerequisites for applications courses, must be passed with a grade of B- or better, in order for the student to continue in the program. At the same time, students also take two courses addressing rhetorical issues and strategies in the perception, reading, and writing of texts, and two courses in linguistics acquainting students with the structure and diversity of the English language.

In addition, all Professional and Technical Writing students must pass ENGL 1120 (Elements of Grammar) with a grade of B- or better, or pass the challenge exam offered by the Writing Center.

Students then take courses in professional editing, document design and graphics, interactive media, and publication production and management. Along with these, students may also take courses in creative writing, as well as those with more specific forms of writing, such as proposals, newsletters, and computer documentation. Internships provide students with an opportunity to learn through hands-on experiences in a variety of organizations. Students complete the program by taking a capstone course, in which they prepare portfolios, explore professional opportunities, and prepare to begin their careers.

A. Core Requirements (4 credits)
ENGL 1110 English Orientation (F,Sp) .................................................. 1
ENGL 1120* Elements of Grammar (F,Sp) ......................................... 3

B. Literary History (3 credits)
Select one course from the following:
ENGL 2140 British Literary History: Anglo-Saxon to 18th Century (F,Sp) ........................................................................................................ 3
ENGL 2150 British Literary History: Romanticism to Present (F,Sp) ........................................................................................................ 3
ENGL 2160 American Literary History: Colonialism to 1865 (F,Sp) ........................................................................................................ 3
ENGL 2170 American Literary History: 1865 to Present (F,Sp) .......... 3

C. Introductory Professional Writing Courses (6 credits)
ENGL 3400 (CI) Professional Writing (F,Sp) ........................................... 3
ENGL 3410 Professional Writing Technology (F,Sp) .............................. 3

D. Theoretical Foundation Courses (6 credits)
Select two courses from the following:
ENGL 3450 Reading Theory for Writers (F,Sp) ...................................... 3
ENGL 3460 Modern Rhetorical Theory (F,Sp) ....................................... 3
ENGL 5490* Usability Studies: Theory and Practice (F,Sp) ................ 3

E. Linguistics Courses (6 credits)
Select two courses from the following:
ENGL 4200 Linguistic Structures (F,Sp,Su) ......................................... 3
ENGL 4210 History of the English Language (Sp) ................................. 3
ENGL 4230 Language and Society (F) .................................................. 3
ENGL 5210 Topics in Linguistics (F) ...................................................... 3

F. Applied and Creative Writing Courses (6 credits)
Complete 6 credits from the following:
ENGL 3040 Perspectives in Writing and Rhetoric (F,Sp) ....................... 3
ENGL 3420 Fiction Writing (F) ............................................................... 3
ENGL 3430 Poetry Writing (F,Sp) .......................................................... 3
ENGL 3440 Creative Nonfiction Writing (F,Sp) ...................................... 3
ENGL 4250 Playwriting (F) ................................................................ 3
ENGL 4420 Advanced Fiction Writing (Sp) ........................................... 3
ENGL 4430 Advanced Poetry Writing (Sp) .......................................... 3
ENGL 4440 Advanced Nonfiction Writing (Sp) .................................... 3
ENGL 4900 Internship/Cooperative Work Experience (F,Sp,Su) ...... 1-6

G. Major Courses (15 credits)
ENGL 4400 (CI)* Professional Editing (F) ........................................... 3
ENGL 4410* Document Design and Graphics (F,Sp) ............................. 3
ENGL 5400* Specialized Documents (F,Sp) ......................................... 3
ENGL 5410* Interactive Media (F,Sp) .................................................... 3
ENGL 5420* Publications Production (Sp) ............................................. 3
**Department of English**

**H. Capstone Seminar (3 credits)**

ENGL 5430 (CI) Professional Writing Capstone  
(Workplace Culture and Communication) (F,Sp) ................. 3

**Sample Four-year Plan for English Major, Professional and Technical Writing Emphasis**

Minimum GPA for Admission: 2.75, major; 2.75, USU; 2.75, Career  
Minimum GPA for Graduation: 2.75, major courses; 2.0, USU; 2.0, Career  
Minimum Grade Accepted: C in major courses; B- in ENGL 1120, 3400, and 3410

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

**Freshman Year (30 credits)**

**Fall Semester (15 credits)**

ENGL 1010 (CL1) Introduction to Writing: Academic Prose .............. 3  
ENGL 1110 English Orientation ............................................... 3  
University Studies Breadth courses .............................................. 6  
University Studies Quantitative Literacy (QL) course ..................... 3  
Elective course(s) ................................................................. 2

**Spring Semester (15 credits)**

ENGL 1120 Elements of Grammar (or exam) ............................. 3  
University Studies Breadth courses .............................................. 9  
Elective course(s) ................................................................. 3

Complete the CIL exams by the end of the Freshman Year.

**Sophomore Year (30 credits)**

**Fall Semester (15 credits)**

ENGL 2010 (CL2) Intermediate Writing: Research Writing in a  
Persuasive Mode ................................................................. 3  
ENGL 2140 British Literary History course ................................ 3  
University Studies Breadth course .............................................. 3  
Depth Life and Physical Sciences (DSC) course ......................... 3  
Elective course(s) ................................................................. 3

**Spring Semester (15 credits)**

ENGL 3400 (CI) Professional Writing ........................................ 3  
ENGL 3410 Professional Writing Technology ............................. 3  
Quantitative Intensive (QI) course (PHIL 2200 suggested) .......... 6  
Elective course(s) ................................................................. 6

**Junior Year (30 credits)**

**Fall Semester (15 credits)**

ENGL 4400 (CI) Professional Editing ........................................ 3  
ENGL Theoretical Foundation course ........................................ 3  
ENGL Applied and Creative Writing course .................................... 3  
Depth Social Sciences (DSS) course (SPCH 3050 suggested) ....... 3  
Elective course(s) ................................................................. 3

**Spring Semester (15 credits)**

ENGL 4410 Document Design and Graphics ................................ 3  
ENGL Theoretical Foundation course ........................................ 3  
ENGL Applied and Creative Writing course .................................... 3  
ENGL Linguistics course ....................................................... 3  
Elective course(s) ................................................................. 3

**Senior Year (30 credits)**

**Fall Semester (15 credits)**

ENGL 5400 Specialized Documents .......................................... 3  
ENGL 5410 Interactive Media .................................................. 3  
ENGL Linguistics course ....................................................... 3  
Elective course(s) ................................................................. 6

**Spring Semester (15 credits)**

ENGL 5420 Publications Production .......................................... 3  
ENGL 5430 (CI) Professional Writing Capstone (Workplace  
Culture and Communication) ................................................ 3  
Elective course(s) ................................................................. 9

**Note:** All courses from the following categories are upper-division courses: Theoretical Foundation; Linguistics; and Applied and Creative Writing.

**English Teaching Emphasis**

This 52-credit emphasis, leading to professional licensure in the teaching of secondary-level English, prepares prospective English teachers to participate actively in the many communities related to the profession. Students become well-versed in their academic subject matter (language, writing, literature, and multimedia); skilled in the methods of teaching the various components of the English curriculum and in classroom management techniques; and committed to the achievement of all students regardless of gender, race, ethnicity, religion, sexuality, or socioeconomic standing.

Students first complete 9 credits of literature survey courses and 3 credits of literary theory to acquire a broad understanding of the traditional literary canon and the current theoretical foundations of English Studies. They must also take ENGL 1120 (Elements of Grammar), or pass the challenge exam offered by the Writing Center. They then take 12 credits in upper-division literature and then courses which address the current understandings of the diversity of American language and culture as they impact the English classroom. Students take courses in young adult literature, Shakespeare, and 15 more credits of upper-division literature and writing courses to become familiar with the spectrum of theoretical, ideological, and scholarly issues at stake in English studies today. To become familiar with the art of teaching the many components of the English curriculum, students take two pedagogical courses, which approach reading and writing as interdependent aspects of communication. If students wish to obtain professional licensure at graduation, they must also fulfill the requirements of the 35-credit Secondary Teacher Education Program (STEP) prescribed by the Department of Secondary Education.

**A. Core Requirements (4 credits)**

ENGL 1110 English Orientation (F,Sp) ..................................... 1  
ENGL 2600 Introduction to Literary Theory (F,Sp) ....................... 3

**B. Literary History (9 credits)**

Select three courses from the following:

ENGL 2140 British Literary History: Anglo-Saxon to 18th Century  
(F,Sp) .................................................................................. 3  
ENGL 2150 British Literary History: Romanticism to Present  
(F,Sp) .................................................................................. 3  
ENGL 2160 American Literary History: Colonialism to 1865  
(F,Sp) .................................................................................. 3  
ENGL 2170 American Literary History: 1865 to Present (F,Sp) ...... 3

**C. Linguistics (3 credits)**

ENGL 4200 Linguistic Structures (F,Sp,Su) ............................... 3
Department of English

D. Upper-division Writing Courses (3 credits)
Select one course from the following:
ENGL 3400 (CI) Professional Writing (F,Sp) ................................................. 3
ENGL 3420 Fiction Writing (F) ............................................................................ 3
ENGL 3430 Poetry Writing (F,Sp) ................................................................. 3
ENGL 3440 Creative Nonfiction Writing (F,Sp) ......................................................... 3
ENGL 4420 Advanced Fiction Writing (Sp) ....................................................... 3
ENGL 4430 Advanced Poetry Writing (Sp) ......................................................... 3
ENGL 4440 Advanced Nonfiction Writing (Sp) .................................................... 3

E. Upper-division Literature Courses (15 credits)

1. Required Course (3 credits)
ENGL 4300 Shakespeare (F,Sp) ................................................................. 3

2. Select one course from each of the following groups:
   a. Group 1 (3 credits)
   ENGL 3300 Period Studies in American Literature (F,Sp) .................... 3
   ENGL 4310 American Writers (F,Sp) .......................................................... 3
   ENGL 4610 Western American Literature (F) ........................................... 3
   ENGL 4630 American Nature Writers (F,Sp) ............................................. 3
   b. Group 2 (3 credits)
   ENGL 3310 Period Studies in British Literature (F,Sp) ......................... 3
   ENGL 4320 British Writers (F,Sp) ............................................................... 3
   c. Group 3 (3 credits)
   ENGL 3320 Period Studies in World Literature (F,Sp) ............................ 3
   ENGL 4330 World Writers (F) ................................................................. 3
   CLAS 3210 Classical Mythology (Honors only) (Sp) ............................... 3
   d. Group 4 (3 credits)
   ENGL 4340 Studies in Prose Fiction (Sp) .................................................. 3
   ENGL 4350 Studies in Poetry (F) ............................................................... 3
   ENGL 4360 Studies in Drama/Film (Sp) ...................................................... 3
   ENGL 4370 Studies in Nonfiction Prose (F) ................................................. 3
   Folklore Courses: ENGL 3700 (Regional Folklore), 3710 (Folklore Colloquium), 4700 (Folk Material Culture), 4750 (Folklore Summer Workshop, Fife Conference), 5700 (Folk Narrative)

F. English Education Courses (15 credits)
ENGL 3510 Young Adult Literature (F,Sp) ......................................................... 3
ENGL 3520 Multicultural American Literature (F,Sp) ..................................... 3
ENGL 4220 Ethnic Literacy (F,Sp) ................................................................. 3
ENGL 4500 (CI) Teaching Writing (F,Sp) ....................................................... 3
ENGL 4510 (CI) Teaching Literature (F,Sp) .................................................... 3

G. Capstone Seminar (3 credits)
ENGL 5550 English Teaching Capstone (Sp) ............................................... 3

In addition to fulfilling the above requirements, students in the English teaching emphasis must fulfill a grammar competency requirement. This may be accomplished either by enrolling in ENGL 1120, Elements of Grammar, (also offered through Independent Study) or by passing a challenge exam in the English Department Writing Center (Ray B. West 104) with a score of 80 percent or better. See the English undergraduate advisor for further information.

H. Teaching Minor
Students in the English Teaching emphasis are also required to complete a teaching minor selected from among the following: Business Computer and Information Systems, Business Information Technology and Education, Chemistry, Geography, Health Education, History, Marketing Education, Mathematics, Modern Languages (French, German, Spanish), Physical Education Coaching, Physics, Political Science, Psychology, School Library Media, Sociology, Speech Communication, English as a Second Language, and Theatre Arts.

I. Secondary Teacher Education Program (STEP) (35 credits)
To receive a license to teach in the public school system, students in the English Teaching emphasis must complete the 35-credit STEP administered through the Department of Secondary Education. The student enrolls in this three-semester sequence of courses after having completed nearly all teaching major and minor requirements and after having been granted full admission to the program, which entails meeting various admission criteria. See the Department of Secondary Education for further information regarding this program.

Sample Four-year Plan for English Major, English Teaching Emphasis

Minimum GPA for Admission: 2.75, major; 2.75, USU; 2.75, Career
Additional Minimum GPA for Matriculation to STEP Program: 2.75, USU
Minimum GPA for Graduation: 2.75, major courses; 2.0; USU; 2.75, Career (for certification)
Minimum Grade Accepted: C in major courses; C- in STEP courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

SCED 5630 Student Teaching in Secondary Schools ........ 10

Creative Writing Emphasis
This 52-credit emphasis is devoted to the art of literary writing: fiction, poetry, creative nonfiction, and drama. Through practice in a chosen genre and a comprehensive study of literature, students learn the craft of literary writing as discovered and practiced over the last three thousand years of written human culture. The emphasis prepares undergraduates for graduate work in creative writing and develops critical, cognitive, and writing skills applicable in numerous professional fields.

Since creative writers must have a broad knowledge of literature, students first complete three of the 2000-level survey courses which provide an overview of major periods, authors, and genres in American and British literature. They also take an introductory course in literary theory which introduces methodologies of literary criticism.

At the 3000-level, students begin their work as creative writers, taking three introductory writing courses in three genres: fiction, poetry, and creative nonfiction. To continue their immersion in the study of literature, students take one course in Period Studies.

At the 4000-level, students concentrate their training as creative writers, taking two courses in advanced creative writing, courses which can be repeated. Also at the 4000-level, students take a course in the study of the English language, a course focused on the study of a single author, and a course in the study of one’s chosen genre. Students also select two courses (for 6 credits) from courses outside their emphasis, ideally from outside the English Department, to further broaden their knowledge of human culture and the natural world.

The emphasis culminates in a creative writing capstone, which encourages students to reflect upon and assess their experience in the creative writing program, and which also has students complete a portfolio of their best work.

A. Core Requirements (4 credits)
ENGL 1110 English Orientation (F,Sp) .................. 1
ENGL 2600 Introduction to Literary Theory (F,Sp) .... 3

B. Literary History (12 credits)
Select all four of the following courses:
ENGL 2140 British Literary History: Anglo-Saxon to 18th Century (F,Sp) .................................. 3
ENGL 2150 British Literary History: Romanticism to Present (F,Sp) ........................................ 3
ENGL 2160 American Literary History: Colonialism to 1865 (F,Sp) ............................................ 3
ENGL 2170 American Literary History: 1865 to Present (F,Sp) .............................................. 3

C. Creative Writing Courses (15 credits)
Select all three of the following courses:
ENGL 3420 Fiction Writing (F) ............................ 3
ENGL 3430 Poetry Writing (F,Sp) ...................... 3
ENGL 3440 Creative Nonfiction Writing (F,Sp) .... 3

Select two of the following courses:
ENGL 4250 Playwriting (F) ............................... 3
ENGL 4420 Advanced Fiction Writing (prereq. ENGL 3420) (Sp) ........................................ 3
ENGL 4420 Advanced Poetry Writing (prereq. ENGL 3430) (Sp) ........................................ 3
ENGL 4440 Advanced Nonfiction Writing (Sp) ........ 3

D. American, British, and World Literature (3 credits)
Select one of the following courses:
ENGL 3300 Period Studies in American Literature (F,Sp) .......... 3
ENGL 3310 Period Studies in British Literature (F,Sp) .......... 3
ENGL 3320 Period Studies in World Literature (F,Sp) .......... 3

Note: The Period Studies courses vary according to the specialty of the faculty member teaching the course.

E. Linguistics (3 credits)
Select one course:
ENGL 4200 Linguistic Structures (F,Sp,Su) .............. 3
ENGL 4210 History of the English Language (Sp) ........ 3

F. Authors (3 credits)
Select one of the following courses:
ENGL 4300 Shakespeare (F) .............................. 3
ENGL 4310 American Writers (F,Sp) .................... 3
ENGL 4320 British Writers (F,Sp) ....................... 3
ENGL 4330 World Writers (F) ............................ 3
Note: The Writers courses vary according to the specialty of the faculty member teaching the course.

G. Genres (3 credits)
Select one of the following courses:
ENGL 4340 Studies in Prose Fiction (Sp)..........................3
ENGL 4350* Studies in Poetry (F)........................................3
ENGL 4360* Studies in Drama/Film (Sp)..........................3
ENGL 4370* Studies in Nonfiction Prose (F)..................3

Note: The Genre courses vary according to the specialty of the faculty member teaching the course.

H. Capstone Seminar (3 credits)
ENGL 5450 Creative Writing Capstone (Sp)..................3

I. Electives (6 credits)
1. ENGL 2600 should be taken before registering for 3000 or above literature courses.
2. These courses are repeatable for credit.
3. This capstone course should be completed during the senior year.
4. ENGL 1120 is waived if students pass the grammar challenge exam. For further information, contact the undergraduate advisor.
5. ENGL 5400 includes proposals, brochures, environmental impact statements, newsletters, computer documentation, etc. This course is repeatable for credit.
6. Prerequisite: Admission to program and completion of ENGL 3420 and 3410 with grades of B- or better.
7. Prior to enrolling in ENGL 5490, students must have completed either ENGL 3450 or 3460 with a grade of B- or better.
8. ENGL 5410 includes multimedia, interactive and electronic texts, etc. This course is repeatable for credit.

Sample Four-year Plan for English Major, Creative Writing Emphasis

Minimum GPA for Admission: 2.75, major; 2.75, USU; 2.75, Career
Minimum GPA for Graduation: 2.75, major courses; 2.0, USU; 2.0, Career
Minimum Grade Accepted: C in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

ENGL 4430 Advanced Poetry Writing (3 cr) or
ENGL 4440 Advanced Nonfiction Writing (3 cr) ...............3
ENGL 5450 Creative Writing Capstone ..............................3
Communications Intensive (CI) course ..............................3
Elective courses .................................................................6

Note: All courses from the following categories are upper-division courses: American, British, and World Literature; Linguistics; Authors; and Genre.

American Studies Major and Minor
Many important issues associated with the origin, evolution, and manifestation of American culture transcend the boundaries of traditional subject areas and are best explored from a variety of perspectives or disciplines. The American Studies major and minor provide students with the opportunity to integrate studies in various fields into a broader understanding of American culture and its antecedents. Although housed in the Department of English, the American Studies Program permits students to choose relevant courses for their cognate areas from a variety of participating departments throughout the University.

For admission and graduation, students must have and maintain a minimum grade point average of 2.75. All courses used to fulfill either the major or minor requirements must be taken on an A-B-C-D-F basis, and major or minor courses passed with less than a C grade must
be repeated. However, up to 3 credits of internship credit, which is recorded as P/F, may be used to partially fulfill the major requirements. Transfer students are required to take at least 15 credits of major subject courses and 10 credits of minor subject courses in residence at USU.

Major
To obtain a degree in American Studies, students must complete a total of 51 credits, including 12 credits of core requirements that introduce foundations of American literature, region, and culture; 6 credits from the 3000 level that expose students to the diversity of American culture; and 9 credits of upper-division work (4000 level) that allow students to approach American literature and culture through various genres.

In addition to completing the required English classes, students must complete 21 credits from two of the following six cognate areas: creative writing, folklore, history, nature and environment, political science, and sociology and anthropology. Students will be required to meet with either the director or the undergraduate advisor (Lisa Hamblin, Student Center 302) to determine appropriate courses for the cognate areas.

The final course, a senior capstone, encourages graduating students to reflect on their overall coursework, synthesizing the perspectives they have gained about American culture in an extended research project reflecting their interdisciplinary academic experience.

Course Requirements
A. Core Requirements (12 credits)
ENGL 2160 American Literary History: Colonialism to 1865 (F,Sp,Su)..........................3
ENGL 2170 American Literary History: 1865 to Present (F,Sp)......................3
ENGL 2630 (BHU) American Culture and the Environment (F,Sp)........3
ENGL 4610 Western American Literature (F,Sp)........................................3

B. Choose two of the following courses (6 credits)
ENGL 3070 (DHA) Perspectives in Folklore (F,Su)..........................3
ENGL 3300 Period Studies in American Literature (F,Sp).................3
ENGL 3520 Multicultural American Literature (F,Sp)..........................3
ENGL 3620 Native American Studies (F,Sp)........................................3

C. Choose three of the following courses (9 credits)
ENGL 4310 American Writers (F,Sp)........................................3
ENGL 4340 Studies in Prose Fiction (Sp).......................................3
ENGL 4350 Studies in Poetry (F)...............................................3
ENGL 4360 Studies in Drama/Film (Sp).......................................3
ENGL 4370 Studies in Nonfiction Prose (F)................................3
ENGL 4620 (CI) Advanced Seminar in American Literature (F,Sp)........3
ENGL/HIST 4640 (CI) Studies in the American West (F,Sp).................3
ENGL 4900 Internship/Cooperative Work Experience (F,Sp,F,T,S) 1-3

D. Cognate Areas (21 credits)
Select two cognate areas and choose 9 credits from one and 12 credits from the other (21 credits total). Possible cognate course options are listed below.
1. Creative Writing
2. Folklore
3. History
4. Nature and Environment
5. Political Science
6. Sociology and Anthropology

E. Capstone Course (3 credits)
ENGL/HIST 5690 (CI) American Studies Capstone Seminar (Sp)........3

Cognate Course Options
Students are required to select two cognate areas and choose 9 credits from one and 12 credits from the other (21 credits total). Cognate courses cannot be used to fill University Studies requirements. A maximum of 3 credits can be completed in lower-division courses. The following are partial lists of appropriate courses. The Director of American Studies must approve substitutions.

1. Creative Writing
Select three or four courses from the following:
ENGL 3420 Fiction Writing (F).................................................3
ENGL 3430 Poetry Writing (F,Sp).................................................3
ENGL 3440 Creative Nonfiction Writing (F,Sp)...............................3
ENGL 4420 Advanced Fiction Writing (Sp)....................................3
ENGL 4430 Advanced Poetry Writing (Sp)....................................3
ENGL 4440 Advanced Nonfiction Writing (Sp)................................3

2. Folklore
Select three or four courses from the following:
ENGL/HIST/ANTH 2210 (BHU) Introduction to Folklore (F,Sp)........3
ENGL/HIST/ANTH 2720 Survey of American Folklore (F,Sp)...........3
ENGL/HIST/ANTH 3070 Perspectives in Folklore (F,Sp)....................3
ENGL/HIST 3700 (CI) Regional Folklore (F,Sp)................................3
ENGL/HIST 3710 (CI) Folklore Colloquium (Sp)...............................3
ENGL/HIST 4700 Folk Material Culture (Sp)..................................3
ENGL/HIST 4750 Advanced Folklore Workshop: Fife Conference (Su)..........3
ENGL/HIST/ANTH 5700 Folk Narrative (Sp)..................................3

3. History
Select three or four courses from the following:
HIST/ENGL 1600 American Cultures in Film (F,Sp).................................3
HIST 2700 (BAI) United States to 1877 (F,Sp,Su).................................3
HIST 2710 (BAI) United States 1877-Present (F,Sp,Su).......................3
HIST 3720 Colonial America (F)................................................3
HIST 3730 The New American Nation (Sp).......................................3
HIST 3750 Civil War and Reconstruction (Sp)..................................3
HIST 3760 (CI) The United States, 1900-1945 (Sp)..............................3
HIST 3850 (CI) History of Utah (Sp).............................................3
HIST 4300 (CI) The History of Women and Family in America...........3
HIST 4600 (CI) The History of the American West (F,Sp).....................3
HIST/ENGL 4640 (CI) Studies in the American West (F,Sp).................3
HIST 4710 American Indian History (F).........................................3
HIST 4730 (CI) History of Black America (Sp)................................3
HIST 4740 American Immigration History (F)................................3
HIST 4790 American Religious History........................................3
HIST 4810 American Military History...........................................3

4. Nature and Environment
Select three or four courses from the following:
ENGL 4630 American Nature Writers (F,Sp).........................................3
ENVS 2340 (BSS) Natural Resources and Society (F,Sp)......................3
ENVS 3510 Environmental Education (Sp)........................................3
FRWS 2200 (BLS) Ecology of Our Changing World (F,Sp)..................3
HIST 3950 (CI) Environmental History..........................................3
NR 1010 (BSS) Humans and the Changing Global Environment (F,Sp)....3
NR 2220 General Ecology (F,Sp)..................................................3
PHIL 3510 Environmental Ethics (F,Sp)...........................................3
POLS 4820 (DSS) Natural Resources and Environmental Policy (Sp)........3
SOC 3600 Sociology of Urban Places (F)........................................3
SOC 3610 (DSS) Rural Sociology (F)............................................3
Department of English

SOC 4620 (DSS) Sociology of the Environment and Natural Resources (Sp) .......................................................... 3
SPCH 5250 Environmental Rhetoric (Sp) ................................................................................................................. 3

5. Political Science
Select three or four courses from the following:
POLS 1100 (BAI) United States Government and Politics (F,Sp) ....... 3
POLS 2200 (BSS) Comparative Politics (F,Sp) ........................................ 3
POLS 3140 (DSS) The Presidency (F) ..................................................... 3
POLS/ECON 3170 Law and Economics (F) ............................................ 3
POLS 3310 (DSS) American Political Thought (F) ................................. 3
POLS 3320 The Foundations of American Constitutionalism ............... 3
POLS 3400 (DSS) United States Foreign Policy (F,Sp) ......................... 3
POLS 4130 Constitutional Theory (Sp) .................................................. 3
POLS 4140 Political Organizations ......................................................... 3

6. Sociology and Anthropology
Select three or four courses from the following:
ANTH 1010 (BSS) Cultural Anthropology (F,Sp) ................................. 3
ANTH 3110 North American Indian Cultures (F) .................................. 3
ANTH 3130 (CI) Peoples of Latin America ............................................. 3
ANTH 3200 (DSS/CI) Perspectives on Race (Sp) ................................. 3
ANTH 3300 (DSS) Archaeology in North America (Sp) ....................... 3
ANTH 4110 (DSS) Southwest Indian Cultures, Past and Present (F) , 3
ANTH 4360 (DSS) Ancient Desert West (F) ....................................... 3
ANTH 5800 Museum Development (F,Sp,Su) ................................. 1-3
SOC 1010 (BSS) Introductory Sociology (F,Sp) ...................................... 3
SOC 2370 Sociology of Gender (F) ..................................................... 3
SOC 3010 Race, Class, and Gender (F,Sp) .............................................. 3

Sample Four-year Plan for American Studies Majors
Minimum GPA for Admission: 2.75, major; 2.75, USU; 2.0, Career
Minimum GPA for Graduation: 2.75, major courses; 2.0, USU; 2.0, Career
Minimum Grade Accepted: C in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

(Note: Students may not count the courses used for University Studies in a Cognate Area as well.)

Freshman Year (30 credits)
Fall Semester (15 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .............. 3
ENGL 1110 English Orientation ....................................................... 1
University Studies Breadth courses .................................................. 6
University Studies Quantitative Literacy (QL) course ....................... 3
Elective course(s) ........................................................................ 2

Spring Semester (15 credits)
ENGL 2160 American Literary History: Colonialism to 1865 ........... 3
ENGL 2630 (BHU) American Culture and Environment ............... 3
University Studies Breadth courses .................................................. 6
Elective course(s) ........................................................................ 3

Complete the CIL exams by the end of the Freshman Year.

Sophomore Year (30 credits)
Fall Semester (15 credits)
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................................................. 3
ENGL 2170 American Literary History: 1865 to Present.................... 3
ENGL 3070 Perspectives in Folklore (3 cr) or
ENGL 3300 Period Studies in American Literature (3 cr) or
ENGL 3520 Multicultural American Literature (3 cr) or
ENGL 3620 Native American Studies (3 cr) ........................................ 3
University Studies Breadth course .................................................... 3
Depth Life and Physical Sciences (DSC) course ............................... 3

Spring Semester (15 credits)
ENGL 3300 Period Studies in American Literature (3 cr) or
ENGL 3520 Multicultural American Literature (3 cr) or
ENGL 4310 American Writers (3 cr) or
ENGL 4340* Studies in Prose Fiction (3 cr) or
ENGL 4360* Studies in Drama/Film (3 cr) or
ENGL 4630 American Nature Writers (3 cr) or
ENGL 4690 Internship/Cooperative Work Experience (3 cr) .......... 3
Cognate Area #1 course 10 ................................................................. 3
Cognate Area #2 course 10 ................................................................. 3
Elective course(s) ........................................................................ 3

Junior Year (30 credits)
Fall Semester (15 credits)
ENGL 4310 American Writers (3 cr) or
ENGL 4350* Studies in Poetry (3 cr) or
ENGL 4370* Studies in Nonfiction Prose (3 cr) or
ENGL 4620 (CI) Advanced Seminar in American Studies (3 cr) or
ENGL 4630 American Nature Writers (3 cr) or
ENGL 4640 (CI) Studies in the American West (3 cr) or
ENGL 4900 Internship/Cooperative Work Experience (3 cr) .......... 3
Cognate Area #1 course 10 ................................................................. 3
Cognate Area #2 course 10 ................................................................. 3
Depth Social Sciences (DSS) course (May not be a course used in one of the Cognate Areas) ......................................................... 3
Elective course(s) ........................................................................ 3

Spring Semester (15 credits)
ENGL 4310 American Writers (3 cr) or
ENGL 4340* Studies in Prose Fiction (3 cr) or
ENGL 4360* Studies in Drama/Film (3 cr) or
ENGL 4630 American Nature Writers (3 cr) or
ENGL 4690 Internship/Cooperative Work Experience (3 cr) .......... 3
Quantitative Intensive (QI) course (PHIL 2200 suggested) .......... 3
Cognate Area #1 course 10 ................................................................. 3
Cognate Area #2 course 10 ................................................................. 3
Elective course(s) ........................................................................ 3

Senior Year (30 credits)
Fall Semester (15 credits)
ENGL 4610 Western American Literature ..................................... 3
Communications Intensive (CI) course ............................................. 3
Cognate Area #1 course 10 ................................................................. 3
Elective courses ........................................................................... 6

Spring Semester (15 credits)
ENGL 5690 (CI) American Studies Capstone Seminar ................. 3
Elective courses ........................................................................ 12

*These courses may be used toward the major only when course content is American Studies related. Students should contact their advisor for approval.
*Students may apply only one lower-division course in the Cognate Areas (one course total), not one course per Cognate Area.
American Studies Minor (21 credits)
American Studies minors must meet and maintain a 2.75 GPA admissions and graduation standard. Students are required to complete ENGL 2160, American Literary History: Colonialism to 1865; ENGL 2170, American Literary History: 1865 to Present; and one upper-division English course. They must also complete 12 credits of upper-division coursework drawn from two cognate areas. These courses of study must be approved by the Director of American Studies or by the American Studies advisor (Lisa Hamblin, Student Center 302) at least one year in advance of graduation. Courses used to fulfill requirements for the English and History majors may not be used for the American Studies minor.

Folklore Minor (18 credits)
The 18-credit minor in folklore is an interdisciplinary program sponsored by the English Department and the History Department. The Director of the Folklore Program must approve the coursework at least one year prior to graduation. Folklore minor students must maintain a 2.75 GPA admissions and graduation standard.

A. Required Courses (6 credits)
ENGLISH/ANTH 2210 (BHU) Introduction to Folklore (F,Sp)..............3
ENGLISH/ANTH 5700 Folk Narrative (Sp)...........................................3

B. Survey of Folklore in Culture and Place (3 credits)
Select one of the following courses:
ENGLISH/ANTH 2720 Survey of American Folklore (F,Sp)..............3
ENGLISH/ANTH 3700 (CI) Regional Folklore (F,Sp)............................3

C. Folklore Genres (3 credits)
Select one of the following courses:
ENGLISH/ANTH 3070 (DHA) Perspectives in Folklore (F,Su).............3
ENGLISH/ANTH 4700 Folk Material Culture (Sp)..............................3

D. Focused Approaches to the Study of Folklore (3 credits)
Select one of the following courses:
ENGLISH/ANTH 3710 (CI) Folklore Colloquium (Sp)........................3
ENGLISH/ANTH 4750 Advanced Folklore Workshop:
Fife Conference (Su).................................................................3

E. Electives (3 credits)
Select one of the following courses:
ANTH 2010 (BSS) Cultural Anthropology (F,Sp)..............................3
ANTH 3100 North American Indian Cultures (F).............................3
ANTH 3130 (CI) Peoples of Latin America.....................................3
ANTH 3160 (DSS) Anthropology of Religion (F)..............................3
ANTH 4110 (DSS) Southwestern Indian Cultures,
Past and Present (F)......................................................................3
ANTH 4120 (CI/DSS) Ethnography of Childhood (F)......................3
ANTH 4130 (DSS) Medical Anthropology:
Matter, Culture, Spirit, and Health (Sp)........................................3
ANTH 5190 Applied Anthropology Practicum.................................3
ENGLISH/HISTORY 1600 American Cultures in Film (F)..................3
ENGLISH/HISTORY 3070 (DHA) Perspectives in Folklore (F,Su)........3
ENGLISH 3520 Multicultural American Literature (F,Sp)......................3
ENGLISH 3620 Native American Studies (F,Sp).................................3
ENGLISH/ANTH 3710 (CI) Folklore Colloquium (Sp).......................3
ENGLISH/ANTH 4750 Advanced Folklore Workshop:
Fife Conference (Su).................................................................3

English Teaching Minor (27 credits)
English Teaching minor students must meet and maintain a 2.75 GPA for admission and graduation. This minor is available only to students completing a teaching major. Students may not use the P/D/F option, and grades C- and below must be repeated. Students must complete the following courses:
ENGLISH 2140 British Literary History: Anglo-Saxon to 18th Century (F,Sp) (3 cr) or
ENGLISH 2150 British Literary History: Romanticism to Present (F,Sp) (3 cr) .................................................................3
ENGLISH 2160 American Literary History: Colonialism to 1865 (F,Sp) (3 cr) or
ENGLISH 2170 American Literary History: 1865 to Present (F,Sp) (3 cr)..............................................................................3
ENGLISH 3510 Young Adult Literature (F,Sp)...................................3
ENGLISH 3520 Multicultural American Literature (F,Sp)...................3
ENGLISH 4200 Linguistic Structures (F,Sp,Su).................................3
ENGLISH 4220 Ethnic Literacy (F,Sp)...............................................3
ENGLISH 4300 Shakespeare (F,Sp)..................................................3
ENGLISH 4500 (CI) Teaching Writing (F,Sp)....................................3
ENGLISH 4510 (CI) Teaching Literature (F,Sp).................................3

In addition to fulfilling the above requirements, students in the English teaching minor must fulfill a grammar competency requirement. They may meet this requirement by either enrolling in ENGL 1120, Elements of Grammar (also offered through Independent Study), or by passing a challenge exam in the English Department Writing Center (Ray B. West 104) with a score of 80 percent or better. For further information, contact the English undergraduate advisor (Lisa Hamblin, Student Center 302, lisa.hamblin@usu.edu).

English Minor (Standard Nonteaching) (18 credits)
The standard nonteaching minor consists of 18 credits of various courses, 12 of which must be in upper-division coursework. Nine of the 18 credits must be earned in residence at USU. Advanced Placement credit, CLEP credit, and credit from ENGL 1010 and 1020 may not be counted toward this minor. The program must be approved by the Director of Undergraduate Studies at least one year prior to graduation.

British and Commonwealth Studies Minor (18 credits)
The minor in British and Commonwealth Studies, sponsored jointly by the English and History departments, allows undergraduates to experience interdisciplinary study and broaden their international perspectives. Students engage in interdisciplinary study by doing extended work outside their home departments, while at the same time integrating their study around a single area. They enhance their international experience by deepening their knowledge of the British Isles and of the British Empire's contact with world cultures in the Commonwealth and other postcolonial nations. This minor requires a minimum of 18 credits. Up to three of these courses (9 credits) from the list in Section A below may also be used to fulfill requirements for the English or History majors. The program selected must be approved by the coordinator of the British and Commonwealth Studies Minor at least one year prior to graduation. Alternatives to this program are possible, but any alternative must be approved by the coordinator.

A. Select five courses relevant to British and Commonwealth Studies (15 credits)
Each semester, applicable courses will be listed on the program’s website (click on link at http://english.usu.edu/). Several courses which may fulfill the requirements are listed below. Other courses may
also be applicable, depending on the topic. At least one course must be chosen from the English Department offerings, and at least one course must be chosen from the History Department. Furthermore, at least one course must focus on some aspect of the Commonwealth (each of these courses is designated by an asterisk on the website). Students engaged in a formal program of study in Britain or any Commonwealth country may apply this experience toward the British and Commonwealth Studies minor, at the program coordinator’s discretion.

**ENGL 2140 British Literary History: Anglo-Saxon to 18th Century (F,Sp)............................................................3**

**ENGL 2150 British Literary History: Romanticism to Present (F,Sp)..........................................................3**

**ENGL 3060 British and Commonwealth Cultures ..........................................................3**

**ENGL 3310 Period Studies in British Literature (F,Sp)..........................................................3**

**ENGL 3320 Period Studies in World Literature (F,Sp)..........................................................3**

**ENGL/HIST 3700 (CI) Regional Folklore (F,Sp)..........................................................3**

**ENGL 4300 Shakespeare (F,Sp)............................................................................3**

**ENGL 4320 British Writers (F,Sp)............................................................................3**

**ENGL 4330 World Writers (F)............................................................................3**

**HIST 3240 Modern Europe from 1789 to the Present..................................................3**

**HIST 3510 Africa and the World............................................................................3**

**HIST 3720 Colonial America (F)............................................................................3**

**HIST 4210 Celtic Europe (F,Sp)............................................................................3**

**HIST 4250 The Reformation in Britain: 1450-1688..................................................3**

**HIST 4390 British Imperialism from 1688 to the Present...........................................3**

**B. Complete one of the following two courses (3 credits)**

These courses will culminate in the student producing a research paper of approximately 20 pages, which should be on some topic relevant to Britain and/or the Commonwealth.

**ENGL 5920 Directed Study (F,Sp,Su)............................................................................3**

**HIST 4930 Directed Readings............................................................................3**

For further information about the British and Commonwealth Studies Minor, contact the program coordinator (Shane Graham, Ray B. West 301B, (435) 797-2719, sgraham@english.usu.edu).

**Program Assessment**

For information about how the English Department assesses its programs, click on the Assessment link on the departmental home page at: [http://english.usu.edu/](http://english.usu.edu/)

**Departmental Honors**

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school.

Students are eligible for admission to the English departmental honors program if they: (1) are majoring in English or in American Studies, (2) have a cumulative GPA of at least 3.3, and (3) have a GPA in English courses (excluding ENGL 1010 and 2010) of at least 3.5. In order to earn a departmental honors degree, students must maintain these GPA levels, take 15 credits of approved upper-division English coursework for Honors credit, and complete and orally defend a Senior Honors Thesis. Typically, students take four 3-credit courses with honors contracts and one 3-credit independent study course (ENGL 5910, Senior Honors Thesis) in order to complete the 15 required credits for the program. For more information, follow the Honors Program link at: [http://english.usu.edu/](http://english.usu.edu/)

**Additional Information and Updates**

English programs are constantly being updated. Students should therefore confer with the English advisor, Lisa Hamblin (Student Center 302). Current requirement sheets are available online at: [http://www.usu.edu/ats/majorsheets/](http://www.usu.edu/ats/majorsheets/)

**Financial Support and Scholarships**

Scholarships, assistantships, grants-in-aid, and work-study programs are available through the University. In addition, the English Department employs a few students as tutors in The Writing Center and oversees various cooperative education and internship opportunities for students. Departmental scholarships are available on a competitive basis to juniors and seniors, as well as to some sophomores. Applications are accepted in January and February and are available in the college dean’s office, Main 338. For further information, click on the scholarships link at: [http://english.usu.edu](http://english.usu.edu)

**Graduate Programs**

**PhD in Theory and Practice of Professional Communication**

The Theory and Practice of Professional Communication (TPPC) program is designed to meet the interests and needs of students who aspire to conduct advanced study of and research into the communicative practices of organizations and the professions. The program offers the opportunity to study professional communication, technology, and culture in a department with a long history of expertise and achievement in writing and technology. The defining features of this program include opportunities to study and work with advanced communication technologies, to engage in extended fieldwork research experiences, and to pursue a program of study that can largely be tailored to work with different research interests within the field of professional communication. The program prepares students to become academic instructors/researchers in English departments or to move into administrative or research positions in nonacademic workplaces.

The TPPC program has a website providing details about the application process, financial assistance, and graduation requirements. This website may be accessed at: [http://tppc.usu.edu](http://tppc.usu.edu)

**Research**

PhD students have opportunities to participate in unique research activities available at facilities associated with the Department of English, such as computer classrooms and labs directed by faculty members. These research activities complement faculty expertise and curriculum strengths in the department, including workplace-focused graduate research, theory and practice of online education, and training in writing and professional communication.

The TPPC program makes extensive use of Web-based communications systems. The English Department at Utah State has a national reputation for its achievements in online education and
continues to develop innovative ways to deliver state-of-the-art, Web-based instruction to students in Utah, across the U.S., and around the world. Depending on their research and teaching interests, TPPC students may be actively involved in these efforts.

**Coursework**

As part of the work on their degree, students in the program complete a minimum of 60 approved semester credits beyond their master’s degree. The required courses include ENGL 7000 (Advanced Research Methods in Professional Communication), ENGL 7410 (Theory and Research in Professional Communication), ENGL 7900 (Research Internship), and ENGL 7970 (Dissertation Research). Additional coursework is completed through a rotating series of seminars focused on the ongoing research projects and interests of faculty. In addition, to support the breadth of perspective required to understand professional communication as it operates in society at large, students are required to take at least 6 credits (and a maximum of 18 credits) of graduate-level coursework outside of the Department of English. Students are encouraged to select courses that will help them develop expertise in an area (either disciplinary or interdisciplinary) that will complement their research and/or pedagogical goals.

**Admission Procedure**

Applicants for admission to the program must have a master’s degree in a subject area that complements their professional reason(s) for earning a PhD in Theory and Practice of Professional Communication. They must also have earned scores no lower than the 40th percentile in the Verbal section and in either the Quantitative or the Analytical section of the Graduate Record Examination (GRE) General Test. Applicants to the program should send materials to two offices at Utah State University, as described below.

To the School of Graduate Studies, applicants should send four items:

1. A completed application form, along with the application fee.
2. Two copies of all official undergraduate and graduate transcripts, showing GPA. The minimum requirement is 3.00 on a 4.00 scale for the last 60 credits of undergraduate courses taken and for all graduate credits taken.
3. Three letters of recommendation (at least two of which must be from former professors if the applicant has been enrolled in school during the last five years).
4. GRE scores no older than five years.

To the Director of Graduate Studies in the Department of English, applicants should send four items:

1. A letter of intent providing background information about the applicant’s training, interests, and experiences, as well as an overview of the applicant's career goals and specific reasons why graduate training in professional communication is important to the applicant. A completed Graduate Instructorship Application for PhD Students form (indicating whether or not the applicant wishes to be considered for a graduate instructorship).
2. A current vita.

4. Two writing samples (a total of 20-40 pages). The samples may include academic or nonacademic writing, but should demonstrate both the applicant’s critical and research skills. Each sample must be accompanied by a 1-page introductory preface. For additional details, including current application deadline, see the TPPC website at: [http://tppc.usu.edu/](http://tppc.usu.edu/)

**Financial Assistance**

Both departmental support and formal research grant support are available to graduate students on a competitive basis. Highly qualified graduate students may also be nominated to compete for University fellowships. Students who wish to be considered for financial aid must meet the application deadlines described above.

Graduate instructorships are available through the Department of English. The assignment will be 50 percent time—approximately 20 hours of work per week. The normal teaching load is two sections of writing classes (e.g., composition or introduction to technical communication) for fall and spring semesters.

In addition, students are normally responsible for paying resident (instate) tuition and fees if they are residents of Utah, and both resident and nonresident (out-of-state) tuition and fees if they are not Utah residents. However, PhD students who are employed as graduate instructors (or who are recipients of certain fellowships) are eligible for tuition waivers. If they are Utah residents, their resident tuition costs will be waived. If they are not Utah residents, both the resident and nonresident tuition costs will be waived. Recipients of these tuition waivers will still be responsible for paying fees each semester.

**Master’s Degree Programs**

The Department of English offers courses of study leading to the MS and MA degrees in English and in American Studies. Applicants seeking the English degree may be admitted into the Literature and Writing specialization or the Technical Writing specialization. Applicants seeking the interdisciplinary American Studies degree may draw from a combination of courses dealing with American culture: literature, history, art, government, etc. Folklore is one of the specializations in American Studies, with courses in all aspects of folklore study, including public sector folklore.

For a more complete description of the Department of English graduate programs, see the department's website: [http://english.usu.edu/](http://english.usu.edu/)

**Admission Requirements**

In addition to the requirements specified on pages 99-100 (Admission Procedures), applicants for admission to the English Department master’s degree programs should have a BS or BA degree with an undergraduate major in a subject area relevant to the master’s program they desire to enter. The English Department accepts the Miller Analogies Test in place of the GRE general test, but encourages applicants to take the GRE. The department also requires a 5-10 page writing sample appropriate to the program the applicant desires to enter. The Technical Writing specialization has additional requirements; see the following website: [http://techcomm.usu.edu/grad/](http://techcomm.usu.edu/grad/)

International applicants from non-English-speaking countries who desire an MS or MA degree in English should have a BS or BA degree in English from an accredited, English-speaking university. Students whose command of written English is not adequate to the demands of writing a graduate thesis in English may be required to take courses in
Intensive English or may be counseled to obtain a second bachelor’s degree at USU (30 credits minimum).

The annual application deadline is January 15 for those who wish to be considered for a graduate instructor position. The final annual deadline is June 15 for all other applicants who wish to begin their course of study fall semester.

Anyone who has not been accepted into a graduate program in the English Department must have permission from the department’s Director of Graduate Studies to enroll in English graduate courses.

**MA/MS in English Requirements**

Applicants will be admitted to the English degree for one of two specializations: Literature and Writing (30-33 credits) or Technical Writing (33 credits).

**Literature and Writing**
The graduate specialization in Literature and Writing offers an MA or MS in English to students who wish to do advanced work in the fields of literary criticism, composition, rhetoric, and creative writing. The aim is to professionalize students, helping them to become scholars and teachers of English. While any student having a strong undergraduate education in English, along with a desire to pursue that education further, is welcome to pursue the Literature and Writing specialization, the specialization does cater most directly to future PhD students in English, future two-year college instructors, and secondary educators. Under the guidance of a faculty committee, students are encouraged to write a thesis as the culmination of their studies; alternatively, they may perform additional coursework.

In both seminars and independent study with faculty, Literature and Writing students consider literary and nonliterary texts, learning not only how to interpret such texts, but also how to produce them. The course of study thus includes both theory and practice: students take part in the reading and the writing of literature, criticism, essays, and arguments. The curriculum is divided into three groups of courses: (1) Literature, (2) Writing, and (3) Teaching Literature and Writing. Students who are particularly interested in one of these three areas may take as many courses in that group as are available. However, they should not expect to be able to take all their courses from any one group; rather, they are encouraged to take courses from all three groups before they graduate.

Although most of their courses will be completed within the Literature and Writing curriculum, students may also pursue their interests by taking some courses in the department’s other master’s programs (American Studies, Folklore, and Technical Writing), as well as doctoral courses in the Theory and Practice of Professional Communication PhD program. Permission of the Director of Graduate Studies in English is required. Coursework may include some online courses; however, Literature and Writing is an on-campus specialization and may not be completed by taking only online classes.

**Technical Writing (online)**
Technical Writing is designed for students who already have some training and/or experience as practitioners of technical writing. The program is entirely online, via the Internet. The program’s mission is to prepare students to enter or reenter nonacademic workplaces, not just as practitioners, but also as developers and managers of technical documents. When they finish the program, students will be qualified to determine and defend writing policy and practices in their workplaces.

To prepare students for these leadership roles, the program provides them with a strong theoretical understanding of their profession. In their online graduate seminars, students will read widely in research and theory relating to workplace writing practices. They will critically examine both the theories and the practices, and they will explore ways in which each can enhance the other. They will also learn how to manage teams of writers, and they will explore ethical issues in the profession. The program will balance the theoretical training with opportunities for students to improve their own practical skills as technical writers, learning how to apply theory and current technology to the production of a variety of technical documents. This practical training will include multimedia presentations and graphic design.

The program is designed primarily for nontraditional students—working professional writers who want to enhance their credentials and build a strong theoretical understanding of their profession. However, it may also accept some traditional students who have just finished their undergraduate studies.

Students in Technical Writing must complete 33 credits under the Plan C option. Courses may be taken in any sequence. Students in this program pursue the MS degree.

**MA/MS in American Studies Requirements**

Those applicants who have been admitted to the American Studies degree program will work out a program of study with either the American Studies Director or the Folklore Director. Generally, students develop their programs with a focus in American literature, folklore, or history. Interdisciplinary connections with many other departments at USU are possible. Students may choose the American Studies Standard specialization, with or without an emphasis in creative nonfiction writing on the cultures and landscapes of the American West; or the Folklore specialization, with or without an emphasis in public sector folklore. The American Studies degree requires 30 credits, with a preference for the MA and the Plan A (thesis) options, although the MS and the Plan B options are also accepted.

Students in the American Studies Standard specialization must take ENGL/HIST 6600 (American Studies Theory and Method) early in their course of study. Students must also take at least one course in a department other than English. Students selecting the Creative Nonfiction emphasis will follow the same requirements as the students in the American Studies Standard specialization, with the following exception: all students in the Creative Nonfiction emphasis are required to take two courses in which a major part of their coursework focuses on some form of creative nonfiction. If approved, it is possible for one course in either fiction or poetry writing to be applied toward this emphasis.

Students in the Folklore specialization must take ENGL/HIST 6700 (Folklore Theory and Method) early in their course of study. Students selecting the Public Sector Folklore emphasis will follow the same requirements as the students in the Folklore specialization, with the following exception: all students in the Public Sector Folklore emphasis are required to take ENGL/HIST 6720 (Folklore Fieldwork), ENGL/HIST 6730 (Public Folklore), and ENGL 6900 (Graduate Internship).

Of special interest to students in American Studies are the Western Historical Quarterly and the Western American Literature journals published at USU, which often provide editorial and clerical positions for graduate students. Also, The Mountain West Center for Regional Studies sponsors lectures and programs and provides research assistance for students working in the field of regional studies. The
Department of English

Merrill-Cazier Library is a regional depository for federal publications and receives 60,000 to 70,000 government titles each year. The library’s Special Collections division contains thousands of historical photographs, an immense store of pioneer diaries and papers, and a strong collection of books and manuscripts relating to the West, the pioneers, the Mormons, cowboys, and cowboy poetry. The Fife Folklore Archives, one of the best folklore archives in the country, contains over 3,400 books on folklore and folklore-related topics. The Special Collections division also serves as the national depository for the American Folklore Society’s Papers, more than 50 linear feet of records and documents accumulated during the 114-year history of the organization.

General Requirements

All candidates for the MS and MA degrees must meet the School of Graduate Studies requirements (see pages 104-106 of this catalog). Only grades of B- or better will be accepted for credits in support of the degree programs; however, students must maintain an overall GPA of 3.0 to remain in the program.

All candidates must complete a comprehensive examination covering the material of their graduate program; however, the nature of this examination varies according to the particular specialization and the advice of the candidate’s supervisory committee.

All candidates are required to defend their Plan A thesis or Plan B papers. After successfully defending their Plan A thesis, students must submit a department-approved final draft to the School of Graduate Studies assistant dean (Main 164). After successfully defending their Plan B papers, students must submit a department-approved copy to University Library Special Collections.

All candidates who are first-year graduate instructors are required to take ENGL 6820 (Practicum in Teaching English) during their first semester. The candidate’s supervisory committee will determine whether ENGL 6820 will be accepted as part of the candidate’s graduate program.

Financial Assistance

The Department of English has a limited number of graduate instructor positions and Moyle Q. Rice Scholarships available on a competitive basis for both English and American Studies graduate students. Additional financial aid is available through the journal of Western American Literature. All applicants who wish to be considered for a graduate instructorship should contact the Director of Graduate Studies in the English Department. The application deadline for instructorships is January 15.

English Faculty

Professors

Melody Graulich, American Literature, American Studies, Western American literature, feminist studies; editor, Western American Literature
Patricia Gantt, teacher education, young adult literature, American studies, women and gender studies, southern literature
Christine Hult, composition and rhetoric, teacher education (Associate Dean, College of Humanities, Arts and Social Sciences)
Joyce A. Kinkead, composition and rhetoric
(Vice Provost for Undergraduate Studies and Research)
Lynn L. Meeks, teacher education, composition and rhetoric, literature for children and young adults

Stephen C. Siporin, folklore, folk narrative, material culture, folk ethnicity
Jeffrey Smitten, eighteenth century British literature, Scottish literature, literary theory and criticism
Jeannie B. Thomas, folklore, legend, oral narrative, humor and gender

Professors Emeritus

Jan Bakker, nineteenth- and early twentieth-century American literature
Barre Toelken, folklore, Native American studies, medieval literature

Associate Professors

Paul J. Crumley, American poetry, nineteenth century American women writers, American identity, the wilderness experience
Brock Dethier, composition, creative writing
Kathryn R. Fitzgerald, teacher education, composition and rhetoric, writing assessment
Evelyn I. Funda, American literature, Western American literature
Keith A. Grant-Davie, composition and rhetoric, reading theory, technical communication
David E. Hailey, Jr., technical communication, online information, CBT technology
Phebe Jensen, sixteenth- and seventeenth-century British literature, Shakespeare
Sonia Manuel-Dupont, linguistics, technical communication, teacher education
Brian W. McCuskey, nineteenth-century British literature
John E. McLaughlin, linguistics, technical communication, Native American languages
Kristine A. Miller, twentieth-century British literature
Jan E. Roush, American Studies, folklore
Anne Shifrer, twentieth-century literature, women writers, poetry, literary theory and criticism
Ronald R. Shock, technical communication, linguistics
Mark Zachry, rhetoric and professional communication; editor Technical Communication Quarterly

Associate Professors Emeritus

Theodore Andra, British literature, technical writing
Kate M. Begnal, twentieth-century literature, postmodernism, literary theory and criticism
Patricia Gardner, world literature, children’s and young adult literature, folklore

Assistant Professors

Cheryl E. Ball, computers and writing, new media, visual rhetoric, composition studies, e-poetics
Christopher Cokinos, creative nonfiction, poetry writing, science and nature writing; editor, Isotopes
Kelli Cargile Cook, technical communication
Christine F. Cooper, medieval literature, commonwealth
Lisa Ann Gabbert, folklore, American studies
Shane Graham, postcolonial literature and theory, contemporary fiction and drama, multicultural literature
Ryan M. Moeller, professional writing, rhetorical theory, rhetorics of technology
Jennifer Sinor, rhetoric and composition, teacher education
Michael Sowder, creative writing (poetry), American literature
Roberta S. Stearman, American literature, fiction writing

Adjunct Assistant Professor

Christie L. Fox, folklore, Program Coordinator of Honors Program

Senior Lecturer

Nancy O’Rourke, technical communication
Department of English

Lecturers
Susan Andersen, literature and writing
Shanan L. Ballam, writing, creative writing
Star Coulbrooke, Associate Director of Writing Center
Carey Emmons, literature and writing
John Engler, literature and writing
Nikole Berger Eyre, literature and writing
Julie R. Foust, writing; Director of Rhetoric Associates
Marina L. Hall, Coordinator of Public Relations and Educational Outreach
Charlene A. Hirschi, Director of Writing Center

Department of Environment and Society

Department Head: Terry L. Shank
Location: Natural Resources 201
Phone: (435) 797-1790
FAX: (435) 797-4048
WWW: http://www.cnr.usu.edu/envs

Undergraduate Advisor:
Maureen A. Wagner, Natural Resources 120, (435) 797-2448, maureen@cc.usu.edu

Degrees offered: Bachelor of Science (BS) in Environmental Studies; BS, Master of Science (MS), and Doctor of Philosophy (PhD) in Recreation Resource Management; BS, Bachelor of Arts (BA), MS, and Master of Arts (MA) in Geography; MS in Bioregional Planning (offered jointly with Department of Landscape Architecture and Environmental Planning); MS and PhD in Human Dimensions of Ecosystem Science and Management

Vision/Mission: The vision of the Department of Environment and Society is one of bringing people and science together for healthy communities and enduring ecosystems. The mission of the department is based on three goals: (1) to promote scholarship and creativity in the discovery, synthesis, and transfer of knowledge relating to the human dimensions of natural resource and environmental management; (2) to apply social science concepts and approaches to better understand human-environment interactions at a range of spatial scales; and (3) to enhance the effectiveness of policies, planning, and administrative processes that affect sustainable use of the natural world.

To this end, the department’s academic programs provide undergraduate and graduate students with a balanced exposure to the social, physical, and biological sciences within an interdisciplinary framework. This combination has great relevance for students aspiring to careers in natural resource and environmental policy, planning, management, education, and science, as well as careers in geography. The program is designed to provide students with a working knowledge of the human aspects of ecosystems and a speaking knowledge of the biophysical aspects, as well as experience using “state of the art” tools and techniques for integrating this knowledge.

Undergraduate Programs

Objectives

The department offers the following undergraduate degree programs: Environmental Studies, Geography, and Recreation Resource Management. Each of these programs offers a balanced exposure to key ideas and principles of the social, biological, and physical sciences, placing special emphasis on the human dimensions of natural resources and environmental management. The department’s goal is to train professionals who can lead the way toward finding and keeping a sustainable balance between protecting the environment and enhancing human societies.

Departmental programs offer learning experiences in the classroom and in the field, frequent individual contacts with faculty as teachers and advisors, and opportunities to take part in student and professional organizations. Seasonal employment, internships, and other activities promoting hands-on experience in natural resource and geographic professions are strongly encouraged.

The Environmental Studies curriculum is designed for students who wish to acquire a broad understanding of natural resources and human-environment relationships, together with the technical background needed to understand environmental issues. In many ways, the curriculum provides a traditional “liberal arts education” with a strong natural resources emphasis. Moreover, it offers flexibility for the development of either specialization or breadth of content to match the student’s interests.

The Geography curriculum provides a broad background in the basic themes of geography—human (cultural), physical, and regional geography—with a particular focus on environmental and earth resources geography. In addition, students acquire technical geographic analysis skills. Students also have the opportunity to study in a systematic, regional, or technical area of geography.

The Geography Teaching curriculum offers students an opportunity to prepare for a career in secondary education with a geography emphasis.

The Recreation Resource Management curriculum prepares students for careers in managing outdoor recreation settings, such as public forests and rangelands, state and national parks, and wilderness areas. Because these jobs require an understanding of both the land and the people who visit it, the major offers courses in both the natural and social sciences, along with an emphasis on communication skills.

Environment and Society Minors

The department offers minors in Environmental Studies, Geography, Geography Teaching, and Recreation Resources. Students in all University majors may complete a Geography, Geography Teaching, or Recreation Resources minor. The Environmental Studies minor is open to all majors, except those in the College of Natural Resources. Because the same courses cannot be counted toward both a student’s major and minor, students must take additional courses beyond those listed here if their majors require courses that are also included in the minor. Students wishing to minor in the above areas should contact the department to meet with the designated advisor for that minor.

Requirements

Admission Requirements

Admission requirements for the Department of Environment and Society are the same as those described for the College of Natural Resources (see pages 126-127).

Graduation Requirements

All courses listed as major subject courses must be taken on an A-B-C-D-F basis. Students must achieve a grade of C- or better in all ENVS and GEOG courses used to satisfy the requirements for a major in the Department of Environment and Society. The grade point average for all courses taught by the College of Natural Resources must be 2.5 or higher.

All students in the Environmental Studies and Recreation Resource Management majors must complete a series of basic lower-division courses providing the disciplinary foundation for natural resource professions before moving on to professional coursework. Equivalents of these foundation courses may be taken at many two- and four-year colleges. Some foundation and core courses may also be used toward the University Studies requirements, as shown by the University Studies designations listed in parentheses following the course numbers. Students should consult their academic advisor if they have questions about University graduation requirements.
Department of Environment and Society

Environmental Studies Major

The Environmental Studies major consists of 85-88 credits. This total includes the disciplinary foundation, professional courses, and a specialization option of 15 or more credits.

F. Specialization Option (15 credits)

Students majoring in Environmental Studies are required to select one of the following specialization options and complete at least 15 credits chosen from the classes listed. A student should meet with his or her advisor to develop and gain approval for the option no later than midway through the first semester of the junior year. Students must file an approved specialization plan prior to applying for graduation; contact the departmental office in NR 201 for details. Some courses may require prerequisites; for additional information, see course descriptions.

Environmental Stewardship
In consultation with his or her advisor, a student may develop a custom specialization/emphasis of at least 15 credits. Students pursuing this option must fill out a specialization/emphasis form describing educational goals and specific courses to be taken. A University-approved minor may be used to meet this requirement, subject to approval by the student's advisor and department head.

G. Electives (32-35 credits)
Students may take the remainder of the 120 credits from any department. The guidelines described under “Breadth Requirements” (see pages 50-51) and “Depth Education Requirements” (see pages 52-57) should be consulted to ensure meeting University Studies Requirements.

Environmental Studies Major
Recommended Four-Year Plan of Study

Students should meet regularly with their faculty advisor and carefully plan their academic program, keeping in mind that many upper-division courses have prerequisites and must be taken in sequence.

Students following the recommended schedule listed below should be able to complete degree requirements in four years (eight semesters).

Freshman Year (29-29 credits)
Fall Semester (14-15 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ..................3
ENVS 1990 Professional Orientation for Environment and Society .........................................................2
ENVS 2340 (BSS) Natural Resources and Society ................................3
GEO 1100 (BPS) Physical Geography (3 cr) or GEO 1110 (BPS) The Dynamic Earth: Physical Geology (4 cr) .................3 or 4
USU 1320 (BHU) Civilization: Humanities (3 cr) or Other approved Breadth Humanities (BHU) course (3 cr) ...........3

Spring Semester (14 credits)
BIOL 1010 (BLS) Biology and the Citizen ........................................3
BIOL 1020 Biological Discovery: A Lab Course ...............................1
MATH 1050 (QL) College Algebra ..................................................4
USU 1300 (BAI) U.S. Institutions (3 cr) or Other approved Breadth American Institutions (BAI) course (3 cr) .......3
USU 1330 (BCA) Civilization: Creative Arts (3 cr) or Other approved Breadth Creative Arts (BCA) course (3 cr) ....3

Sophomore Year (29-30 credits)
Fall Semester (14 credits)
CHEM 1110 (BPS) General Chemistry I .............................................4
FRWS 2200 (BLS) Ecology of Our Changing World ........................3
GEOG 3850 Map, Air Photo, and GIS Interpretation ..........................4
STAT 2000 (QI) Statistical Methods ..................................................3

Spring Semester (15-16 credits)
AWER 3700 (CI) Fundamentals of Watershed Science .....................3
ENGL 2010 (CL2) Intermediate Writing: Research Writing In a Persuasive Mode ..............................................3
ENVS 3330 Environment and Society .............................................3
HIST 3950 (DHA/CI) Environmental History (3 cr) or PHIL 3510 (DHA) Environmental Ethics (3 cr) ......................3
Animal or plant course .................................................................3-4

Junior Year (28-32 credits)
Fall Semester (14-16 credits)
ENVS 3000 Natural Resources Policy and Economics ....................4

Animal or plant course .................................................................3-4
Specialization or elective courses ...............................................7-8

Spring Semester (14-16 credits)
FRWS 3900 Managing Dynamic Ecological Systems .....................4
ENVS 4400 Economic Applications in Natural Resource Management .........................................................4
Policy or specialization courses ...................................................6-8

Senior Year (30-33 credits)
Fall Semester (15-16 credits)
ENVS 3500 (QI) Quantitative Assessment of Environmental and Natural Resource Problems .............................................3
ENVS 4000 Human Dimensions of Natural Resource Management .................................................................3
ENVS 4900 Environmental and Natural Resource Professionalism Seminar ......................................................2
Specialization or elective courses ...............................................7-8

Spring Semester (15-17 credits)
ENVS 5000 Collaborative Problem-Solving for Environment and Natural Resources ..............................................3
Policy, specialization, or elective courses ...................................12-14

Environmental Studies Minor (15-17 credits)
The Environmental Studies minor is open to all majors except those in the College of Natural Resources. Students wishing to minor in Environmental Studies should contact the Department of Environment and Society to meet with the department’s designated minor advisor. All courses required for the minor must be taken on an A-B-C-D-F basis. A minimum GPA of 2.5 is required for courses taken to complete the minor.

A. Required Courses (10 credits)
ENVS 2340 (BSS) Natural Resources and Society (F,Sp) ................3
ENVS 3000 Natural Resources Policy and Economics (F) .........4
FRWS 2200 (BLS) Ecology of Our Changing World (F,Sp) ....3

B. Policy or Economics Course (2-4 credits)
Select one of the following courses in natural resources policy or economics:
ENVS 4110 Fisheries and Wildlife Policy and Administration (F) ........3
ENVS 4130 Recreation Policy and Planning (Sp) .........................3
ENVS 4400 Economic Applications in Natural Resource Management (Sp) ..................................................4
ENVS 5300 Natural Resources Law and Policy (Sp) .................2
ENVS 5320 Water Law and Policy in the United States (F) ............3
ENVS 5550 Sustainable Development (Sp) .................................3

C. Electives (3 credits)
Select one additional upper-division (3000-level or higher) course of 3 credits or more, which provides greater depth in an area of natural or social sciences that can be applied to the management of natural resources and the environment, to be selected in consultation with the Environmental Studies minor advisor.

Geography Major
The Geography major consists of 48 credits. After meeting the University Studies, USU upper-division, and geography major requirements, students may take the remainder of their 120 required credits in any discipline from any department. Students interested in using their elective credits to develop a field of specialization should consult with their advisor to select appropriate courses.
Department of Environment and Society

A. Disciplinary Foundation Courses (29 credits)
AWER 4930 Geographic Information Systems (F) .............................................. 4
ENVS 1990 Professional Orientation for Environment and Society (F) .......... 2
ENVS 5000 Collaborative Problem-Solving for Environment and Natural Resources (Sp) ......................................................... 3
GEOG 1000 (BPS) Physical Geography (F,Sp,Su) ........................................ 3
GEOG 1005 Physical Geography Lab (F,Sp) .............................................. 1
GEOG 1300 (BSS) World Regional Geography (F) .................................. 3
GEOG 1400 (BSS) Human Geography (Sp) ............................................. 3
GEOG 3850 Map, Air Photo, and GIS Interpretation (F) ............................ 4
GEOG 4200 (CI) Regional Geography (F,Sp,Su) ..................................... 3
GEOG 4850 Cartographic Design (Sp) .................................................. 3

B. Quantitative Foundation (7 credits)
MATH 1050 (QL) College Algebra (F,Sp,Su) ........................................... 4
STAT 2000 (QI) Statistical Methods (F,Sp) ............................................. 3

C. Specialization Option (12 credits)
Students majoring in Geography are required to select one of the following specialization options and complete at least 12 credits chosen from the classes listed. A student should meet with his or her advisor to develop and gain approval for the option no later than midway through the first semester of the junior year. Students must file an approved specialization plan prior to applying for graduation; contact the departmental office in NR 201 for details. Some courses may require prerequisites; for additional information, see course descriptions.

Human Impact on Environment
ANTH 3320 (DSS) Ancient Humans and the Environment (F) ..................... 3
ENVS 3600 (DSC) Living with Wildlife (Sp) .......................................... 3
ENVS 5000 Collaborative Problem-Solving for Environment and Natural Resources (Sp) ......................................................... 3
ENVS 5550 Sustainable Development (Sp) ............................................. 3
ENVS 5570 Sustainable Living (Sp) .......................................................... 3
FRWS 2200 (BLS) Ecology of Our Changing World (F,Sp) (3 cr) or NR 2220 General Ecology (F,Sp) (3 cr) ......................................................... 3
(Students can count either FRWS 2200 or NR 2220 toward the specialization option, but cannot count both.)
FRWS 4600 Conservation Biology (Sp) .................................................. 3
HIST 3950 (DHA/CI) Environmental History ........................................ 3

Cultural/Social Geography
ANTH 3110 North American Indian Cultures (F) ...................................... 3
ANTH 3160 (DSS) Anthropology of Religion (F) ..................................... 3
ENVS 5550 Sustainable Development (Sp) ............................................. 3
FREN 3550 (DHA) French Civilization (F) (3 cr) or JAPN 3100 Readings in Contemporary Japanese Culture (F) (3 cr) or Any other culture course offered as part of a foreign language program (3 cr) ................................................................................. 3
GEOG 4200 (CI) Regional Geography (F,Sp,Su) ..................................... 3
(Must be the second geographic area of study beyond the area chosen in the Disciplinary Foundation Courses.)
GEOG 5650 (DSS) Developing Societies (F) .......................................... 3
SOC 4710 Asian Cultures (Sp) .............................................................. 3

Planning and Analysis
ANTH 5120 Applied Rural Development (Sp) .......................................... 3
AWER 5930 Geographic Information Analysis (Sp) ....................................... 4
ENVS 3000 Natural Resource Policy and Economics (F) ............................ 4
ENVS 5000 Collaborative Problem-Solving for Environment and Natural Resources (Sp) ......................................................... 3
ENVS 5300 Natural Resources Law and Policy (Sp) .................................... 2
GEOG 3610 Geography of Rural/Urban Planning (F) ................................ 3
LAEP 2700 (CI) Site Analysis and Design (F) ........................................... 5
LAEP 3700 City and Regional Planning (Sp) ............................................ 3

Geographic Perspectives
In consultation with his or her advisor, a student may develop a customized emphasis that meets specific career goals not addressed in the other three emphases. Students pursuing this option must complete a specialization/emphasis form describing educational goals and specific courses to be taken. A University-approved minor may be used to meet this requirement, subject to approval by the student’s advisor and department head.

Geography Major Recommended Four-Year Plan of Study

Students should meet regularly with their faculty advisor and carefully plan their academic program, keeping in mind that many upper-division courses have prerequisites and must be taken in sequence.

Students following the recommended schedule listed below should be able to complete degree requirements in four years (eight semesters).

Note: Students in the Geography Teaching Major should contact their advisor for information about their recommended four-year plan of study.

Freshman Year (30 credits)
Fall Semester (14 credits)
ENVS 1990 Professional Orientation for Environment and Society .......................................................... 2
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .................. 3
GEOG 1300 (BSS) World Regional Geography ...................................... 3
USU 1300 (BAI) U.S. Institutions (3 cr) or Other approved Breadth American Institutions (BAI) course (3 cr) .............. 3
USU 1320 (BU) Civilization: Humanities (3 cr) or Other approved Breadth Humanities (BU) course (3 cr) .................. 3

Spring Semester (16 credits)
GEOG 1000 (BPS) Physical Geography .................................................. 3
GEOG 1005 Physical Geography Lab .................................................... 1
MATH 1050 (QL) College Algebra ......................................................... 4
USU 1330 (BCA) Civilization: Creative Arts (3 cr) or Other approved Breadth Creative Arts (BCA) course (3 cr) .............. 3
USU 1350 (BLS) Integrated Life Science (3 cr) or Other approved Breadth Life Sciences (BLS) course (3 cr) .............. 3
Elective course(s) .................................................................................. 2

Sophomore Year (30-32 credits)
Fall Semester (15 credits)
STAT 2000 (QI) Statistical Methods ......................................................... 3
GEOG 4200 (CI) Regional Geography .................................................. 3
Elective courses .................................................................................. 9

Spring Semester (15-17 credits)
GEOG 1400 (BSS) Human Geography .................................................. 3
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode .......................................................... 3
Depth Humanities and Creative Arts (DHA) course ......................... 2-3
Geography specialization or elective courses ............................... 7-8

Junior Year (29-31 credits)
Fall Semester (14-15 credits)
AWER 4930 Geographic Information Systems ......................................... 4
GEOG 3850 Map, Air Photo, and GIS Interpretation ......................... 4
Geography specialization or elective courses .................................. 6-7

Spring Semester (15-16 credits)
GEOG 4850 Cartographic Design ......................................................... 3
Depth Life and Physical Sciences (DSC) course ............................. 3-4
Elective courses (including CI course) ............................................... 9

Utah State University 2006-2007 General Catalog
Department of Environment and Society

Senior Year (28-30 credits)
Fall Semester (14-15 credits)
ENVS 4990 Environmental and Natural Resource Professionalism Seminar (highly recommended) .......................... 2
Geography specialization or elective courses .................................. 12-13

Spring Semester (14-15 credits)
ENVS 5000 Collaborative Problem-Solving for Environment and Natural Resources .................................................. 3
Geography specialization or elective courses .................................. 11-12

Geography Minor (24 credits minimum)
All courses required for the Geography minor must be taken on an A-B-C-D-F basis. In order to graduate, students must maintain a 2.5 or higher grade point average in all courses taken from offerings within the College of Natural Resources.

AWER 4930 Geographic Information Systems (F).......................... 4
GEOG 1000 (BPS) Physical Geography (F,Sp,Su)......................... 3
GEOG 1005 Physical Geography Lab (F,Sp) .................................. 1
GEOG 1300 (BSS) World Regional Geography (F) ....................... 3
GEOG 1400 (BSS) Human Geography (Sp) .................................. 3
GEOG 3850 Map, Air Photo, and GIS Interpretation (F) ............... 4
GEOG 4200 (CI) Regional Geography (F,Sp,Su) .......................... 3
GEOG 4850 Cartographic Design (Sp) .......................................... 3

Geography Teaching Major (38 credits minimum)
The teaching major in Geography consists of both the geography courses (38 credits minimum, shown in sections A, B, and C below), plus the Secondary Teacher Education Program (STEP) (35 credits). A 2.75 or higher overall cumulative GPA in 90 credits is required for admission to the STEP. The 2.75 minimum overall cumulative GPA must be maintained for graduation.

A. Geography Teaching Major Foundation Courses (24-25 credits)
ENVS 1990 Professional Orientation for Environment and Society (F) ............................................................ 2
GEOG 1000 (BPS) Physical Geography (F,Sp,Su) ......................... 3
GEOG 1300 (BSS) World Regional Geography (F) ....................... 3
GEOG 1400 (BSS) Human Geography (Sp) .................................. 3
GEOG 3850 Map, Air Photo, and GIS Interpretation (F) ............... 4
GEOG 4200 (CI) Regional Geography (Utah) (Sp) ....................... 3
GEOG 4200 (CI) Regional Geography (International Course) (F,Sp,Su) .............................................................. 3
GEOG 4850 Cartographic Design (Sp) .......................................... 3
AWER 4930 Geographic Information Systems (F) (4 cr) ............... 3 or 4

B. Geography Education Pedagogical Methods Courses (4 credits)
GEOG 4300 Geography Education Classroom Practicum (F,Sp,Su) .............................................................. 1
GEOG 4800 Teaching Geography (F) .......................................... 3

C. Geography Electives (1-2 credits)
Students may select the remaining 9-10 credits in Geography from courses numbered 2000 and above. It is recommended that students take additional regional, physical, human, human-environment interaction techniques, technology in geography education, or classroom technology practicum credits. All electives must be coordinated with a geography education advisor.

D. Electives
After meeting the University Studies, USU upper-division, and geography teaching major requirements, students may take the remainder of their 120 required credits in any discipline and from any department. ENVS 4990 (2 cr) and ENVS 5000 (3 cr) are recommended.

E. Teaching Minor
A teaching major in Geography also requires an approved teaching minor from another field of study acceptable to the Secondary Education Department.

Teaching Minor in Geography (24 credits minimum)
Note: A teaching minor in Geography requires an approved teaching major in another subject. All courses required for the Geography Teaching minor must be taken on an A-B-C-D-F basis. A minimum GPA of 2.5 is required for courses taken to complete the minor.

A. Geography Teaching Minor Foundation Courses (18-19 credits)
GEOG 1000 (BPS) Physical Geography (F,Sp,Su) ......................... 3
GEOG 1300 (BSS) World Regional Geography (F) ....................... 3
GEOG 1400 (BSS) Human Geography (Sp) .................................. 3
GEOG 4200 (CI) Regional Geography (Utah) (Sp) ....................... 3
GEOG 4200 (CI) Regional Geography (International Course) (F,Sp,Su) .............................................................. 3
GEOG 3850 Map, Air Photo, and GIS Interpretation (F) (4 cr) or GEOG 4850 Cartographic Design (Sp) (3 cr) or AWER 4930 Geographic Information Systems (F) (4 cr) .............. 3 or 4

B. Geography Education Courses (4 credits)
GEOG 4300 Geography Education Classroom Practicum (taken with GEOG 4800) (F,Sp,Su) .............................................................. 1
GEOG 4800 Teaching Geography (F) .......................................... 3

Secondary Teacher Education Program (STEP) (35 credits)
Students must complete three levels in the STEP. All three levels of the STEP will be offered during fall and spring semesters, not during summers. Levels of the STEP are taken as a package, not piecemeal. Each level must be satisfactorily completed before a student is advanced to the next level. All courses must be completed with a minimum grade of C-. Prior to admission to the STEP, students in the Geography Teaching Major must complete MATH 1050, unless their Math ACT score is 25 or higher.

Students should consult with advisors in major and minor departments for scheduling of special methods classes at Levels 1 and 2. Although certain combinations of majors and minors require three special methods classes, only two clinical experiences (total) should be scheduled at Levels 1 and 2. These in-school experiences are coordinated by methods instructors.

A. Level 1 (15-week courses) (11 credits minimum)
INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su) ........ 1
SCED 3100 Motivation and Classroom Management (F,Sp) ........... 3
SCED 3210 (CI/DSS) Educational and Multicultural Foundations (F,Sp) .............................................................. 3
Clinical Experience I (30 hrs. minimum) (3300 in various departments) .............................................................. 1
One or more methods courses in major (3-6 credits in minor—Social Studies Education) ......................................... 3

Utah State University 2006-2007 General Catalog 297
Department of Environment and Society

B. Level 2 (15-week courses) (12 credits minimum)
SPED 4000 Education of Exceptional Individuals (may be taken anytime) (F,Sp,Su) ............... 2
SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) ........................................ 3
SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) .................. 3
Clinical Experience II (30 hrs. minimum) .......................................................... 3
(4300 in various departments) ....................................................................... 1
Special Methods II (major or minor) ........................................ (taught in various departments) .................. 3

C. Level 3 (includes 13 weeks of student teaching and 2 weeks of Student Teaching Seminar) (12 credits)
SCED 5500 Student Teaching Seminar (2 weeks) (F,Sp) .................. 2
SCED 5630 Student Teaching in Secondary Schools (13 weeks, full-time) (F,Sp) .............. 10

Recreation Resource Management Major
The Recreation Resource Management major consists of 84-86 credits.

A. Disciplinary Foundation (15 credits)
BIOL 1010 (BLS) Biology and the Citizen (F,Sp,Su) ........................................ 3
BIOL 1020 Biological Discovery: A Lab Course (F,Sp) ................................... 1
CHEM 1110 (BPS) General Chemistry I (F,Sp) ..................................... 4
MATH 1050 (QL) College Algebra (F,Sp,Su) ........................................ 4
STAT 2000 (QI) Statistical Methods (F,Sp) ............................................... 3

B. Professional Coursework (57-58 credits)
AWER 3700 (CI) Fundamentals of Watershed Science (Sp) ................... 3
ENVS 1990 Professional Orientation for Environment and Society (Sp) ......... 3
ENVS 2340 (BSS) Natural Resources and Society (F,Sp,Su) ..................... 3
ENVS 3300 Fundamentals of Recreation Resources Management (F,Sp) .... 3
ENVS 3500 (QI) Quantitative Assessment of Environmental and Natural Resource Problems (F) ...................................................... 3
ENVS 4000 Human Dimensions of Natural Resource Management (F) ....... 3
ENVS 4130 Recreation Policy and Planning (Sp) ........................................ 3
ENVS 4400 Economic Applications in Natural Resource Management (Sp) .... 4
ENVS 4500 (CI) Wildland Recreation Behavior (F) .................................... 3
ENVS 4520 Special Projects in Recreation Management (F,Sp,Su) ............. 3
ENVS 4990 Environmental and Natural Resource Professionalism Seminar (F) ................................................................. 2
ENVS 5500 Collaborative Problem-Solving for Environment and Natural Resources (Sp) .................................................... 3
FRWS 2200 (BLS) Ecology of Our Changing World (F,Sp) ......................... 3
FRWS 3900 Managing Dynamic Ecological Systems (Sp) ......................... 4
GEOG 1000 (BPS) Physical Geography (F,Sp,Su) (3 cr) or GEOG 1110 (BPS) The Dynamic Earth: Physical Geography (F,Sp) (4 cr) .......... 3
GEOG 3850 Map, Air Photo, and GIS Interpretation (F) ................................ 4
SOIL 3000 Fundamentals of Soil Science (F,Sp) ........................................ 4

C. Animal Course (select 3 credits)
AWER 3100 (CI/DSC) Fish Diversity and Conservation (F) ...................... 3
ENVS 3600 (DSC) Living With Wildlife (Sp) .......................................... 3

D. Education/Interpretation Course (select 3 credits)
ENVS 4600 Natural Resource Interpretation (F) ......................................... 3
ENVS 5110 Environmental Education (Sp) ............................................. 3

E. Plant Course (select 3-4 credits)
BIOL 3040 (DSC) Plants and Civilization (F) ........................................... 3
FRWS 3600 Wildland Plant Ecology and Identification (F) ......................... 4
PLSC 3950 The Structure and Function of Economic Crop Plants (Sp) ......... 3

F. Anthropology Course (select 3 credits)
ANTH 3110 North American Indian Cultures (F) .................................... 3
ANTH 4110 Southwest Indian Cultures, Past and Present (F) ..................... 3
Other Approved Anthropology Course ....................................................... 3

G. Electives (34-36 credits)
Students may take the remainder of the 120 credits from any department. The guidelines described under "Breadth Requirements" (see pages 50-51) and "Depth Education Requirements" (see pages 52-57) should be consulted to ensure meeting University Studies Requirements.

Recreation Resource Management Major
Recommended Four-Year Plan of Study
Students should meet regularly with their faculty advisor and carefully plan their academic program, keeping in mind that many upper-division courses have prerequisites and must be taken in sequence.

Students following the recommended schedule listed below should be able to complete degree requirements in four years (eight semesters).

Freshman Year (28-29 credits)
Fall Semester (14-15 credits)
BIOL 1010 (BLS) Biology and the Citizen ................................................. 3
ENVS 1990 Professional Orientation for Environment and Society .......... 3
ENVS 2340 (BSS) Natural Resources and Society ..................................... 3
GEOG 1110 (BPS) Physical Geography (3 cr) or GEOG 1110 (BPS) The Dynamic Earth: Physical Geography (4 cr) ......................................................... 3 or 4
USU 1320 (BHU) Civilization: Humanities (3 cr) or Other approved Breadth Humanities (BHU) course (3 cr) .................... 3

Spring Semester (14 credits)
BIOL 1020 Biological Discovery: A Lab Course .................................... 1
MATH 1050 (QL) College Algebra ............................................................ 4
USU 1300 (BAI) U.S. Institutions (3 cr) or Other approved Breadth American Institutions (BAI) course (3 cr) ........ 3
USU 1330 (BCA) Civilization: Creative Arts (3 cr) or Other approved Breadth Creative Arts (BCA) course (3 cr) ........ 3

Sophomore Year (30-33 credits)
Fall Semester (15-16 credits)
CHEM 1110 (BPS) General Chemistry I .................................................... 4
ENVS 3300 Fundamentals of Recreation Resources Management ............ 3
FRWS 2200 (BLS) Ecology of Our Changing World ................................ 3
STAT 2000 (QI) Statistical Methods .......................................................... 3
Elective course(s) .................................................................................... 2-3

Spring Semester (15-17 credits)
AWER 3700 (CI) Fundamentals of Watershed Science ............................ 3
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................................................. 3
SOIL 3000 Fundamentals of Soil Science ................................................. 3
Depth Humanities and Creative Arts (DHA) course ............................. 2-3
Plant or animal course ............................................................................. 3-4
## Department of Environment and Society

### Junior Year (29-31 credits)

**Fall Semester (14-15 credits)**
- ENVS 3000 Natural Resources Policy and Economics .......................... 4
- ENVS 4500 (CI) Wildland Recreation Behavior ................................ 3
- GEOG 3850 Map, Air Photo, and GIS Interpretation .......................... 4
- Plant or animal course ..................................................................... 3-4

**Spring Semester (15-16 credits)**
- ENVS 4130 Recreation Policy and Planning....................................... 3
- ENVS 4400 Economic Applications in Natural Resource Management ......................................................... 4
- FRWS 3900 Managing Dynamic Ecological Systems ........................ 4
- Elective courses ............................................................................. 4-5

**Senior Year (29 credits)**

**Fall Semester (14 credits)**
- ENVS 3500 (QI) Quantitative Assessment of Environmental and Natural Resource Problems ............................................. 3
- ENVS 4000 Human Dimensions of Natural Resource Management .............................................................................. 3
- ENVS 4920 Special Projects in Recreation Management (3 cr) or Education/Interpretation course (3 cr) .......................... 3
- ENVS 4990 Environmental and Natural Resource Professionalism Seminar ................................................................. 2
- Anthropology course ..................................................................... 3

**Spring Semester (15 credits)**
- ENVS 5000 Collaborative Problem-Solving for Environment and Natural Resources ..................................................... 3
- ENVS 4920 Special Projects in Recreation Management (3 cr) or Education/Interpretation course (3 cr) .......................... 3
- Elective courses ............................................................................. 9

### Recreation Resources Minor (15 credits minimum)

Students wishing to minor in Recreation Resources should contact the Department of Environment and Society to meet with the department’s designated minor advisor. All courses required for the minor must be taken on an A-B-C-D-F basis. A minimum GPA of 2.5 is required for courses taken to complete the minor.

**A. Required Courses (12 credits)**
- ENVS 3300 Fundamentals of Recreation Resources Management (F) ............................................................................. 3
- ENVS 4130 Recreation Policy and Planning (Sp) ............................ 3
- ENVS 4500 (CI) Wildland Recreation Behavior (F) ......................... 3
- ENVS 4600 Natural Resource Interpretation (F) .............................. 3

**B. Elective Course (3-4 credits)**
Select one of the following courses:
- ENVS 3330 Environment and Society (Sp) .................................... 3
- ENVS 4000 (DSS) Human Dimensions of Natural Resource Management (F) ................................................................. 3
- ENVS 4400 Economic Applications in Natural Resource Management (Sp) ........................................................................... 4
- ENVS 5110 Environmental Education (Sp) ...................................... 3

### Financial Assistance

The main opportunities for undergraduates to find financial support through grants, work-study, and loans are listed on pages 23-28 in the Financial Aid and Scholarship Information section. Some students may be able to find paid internships with private or governmental organizations, or work for a faculty member on a research project.

Interested persons should contact the College of Natural Resources Academic Service Center for more information on scholarships for undergraduates.

### Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: [http://www.usu.edu/honors/](http://www.usu.edu/honors/)

### Additional Information

For additional information about the Bachelor of Science requirements, course sequencing, and departmental specialization options and their related coursework, as well as updated information describing current programs and courses offered by the Department of Environment and Society, visit the Environment and Society main office, Natural Resources 201, or visit: [http://www.cnrs.usu.edu/envs](http://www.cnrs.usu.edu/envs)

Major requirement sheets, which outline career opportunities and required courses for departmental majors, can be obtained from the department, or online at: [http://www.usu.edu/ats/majorsheets/](http://www.usu.edu/ats/majorsheets/)

### Graduate Programs

#### Admission Requirements

See general admission requirements on pages 99-100. Applicants for graduate study in the Department of Environment and Society should have a bachelor’s degree from an accredited college or university, a cumulative GPA of at least 3.0 (out of 4.0), and GRE scores (quantitative and verbal) above the 40th percentile. Foreign students should submit a TOEFL score of at least 550. Exceptions to these standards will be considered on a case-by-case basis. Written statements of interest help match applicants with faculty advisors. A faculty member must agree to serve as the major professor in order for an applicant to be accepted. Prospective students are encouraged to contact faculty members early in the application process to investigate mutual interests, projects, and prospects for financial support.

The department’s graduate programs focus on providing students with a broad foundation in the social and natural sciences as they relate to the study, planning, and management of ecosystems. The curriculum is designed to enhance interdisciplinary integration by emphasizing current and future environmental issues facing humanity. Coursework and research are focused on problem solving through application of social research methods, case studies, computer mapping, and other analytical techniques.
Department of Environment and Society

The department values intellectual, academic, and social diversity in the applicants for graduate study. Mature professionals seeking education to augment life experiences, or practical training to pursue new career paths, are also encouraged to apply. Knowledge gaps will be identified early in a student’s program and addressed on a case-by-case basis through agreements between students and their graduate advisory committees.

Degree Programs

The department offers opportunities for graduate study through the MS, MA, PhD, and graduate certificate programs listed below.

The MS degree requires a minimum of 30 credits, of which 24 must be in residence. Candidates for the MA must complete the requirements for the MS, with the addition of at least two years (approximately 16 credits) of an approved foreign language or some other demonstration of foreign language proficiency. There are two options available in both the MS and MA programs. The Plan A requires students to complete coursework, as well as a research thesis. The Plan B is a nonthesis, terminal degree, based largely on coursework and a professional paper or project.

For the PhD degree, there is a more variable amount of required coursework, as well as a research dissertation. Compared to the MS degree, the PhD degree has a greater emphasis on theory, research methods, writing research proposals, and publishing research in peer-reviewed outlets.

Bioregional Planning

Bioregional Planning is aimed at students focused on how the biophysical attributes of a region influence the human dimensions of culture and settlement and the reciprocal of this. Offered jointly with the Department of Landscape Architecture and Environmental Planning, the program has an interdisciplinary core of courses that provides the background for addressing complex issues in the areas of environmental analysis, planning, and policy. Employment is available in both the private and public sectors, wherever there is emphasis on large-scale planning and management.

Geography and Geography Teaching

Geography and Geography Teaching is geared for students interested in exploring the availability and location of the earth’s natural resources, the physical and cultural processes that occur at the earth’s surface, and the spatial interactions among components of human society and the biophysical environment. Career opportunities are available in both the private and public sectors in such areas as business, planning, resource and economic development, environmental assessment, and education.

Recreation Resource Management

Recreation Resource Management is aimed at students interested in managing outdoor recreation settings, such as public forests and rangelands, state and national parks, and wilderness areas. An understanding of both the land itself and the people who visit these areas is required. Opportunities are available to work as environmental interpreters, recreation planners, park rangers, trail crew supervisors, ski area employees, visitor center directors, wilderness rangers, and similar occupations. Graduate study provides additional opportunities for research and teaching in higher education, as well as in the private and government sectors.

Human Dimensions of Ecosystem Science and Management

These degrees are the first of their kind in the country. They are aimed at students who desire to be problem-solvers with an ability to integrate the human and biophysical aspects of ecosystems, and to analyze policies and decisions that encourage sustainability of human communities and ecosystems. The MS degree prepares students for professional practice in natural resources and environmental planning and management, policy and program analysis, public affairs, environmental education, community assessment and collaboration, conflict management, and extension/outreach. The PhD program places a greater emphasis on basic theory and research methods in one or more social science disciplines, and thus prepares students for university teaching, research, and extension; for conducting agency and private organizational research; and for positions in formal policy and program evaluation.

Natural Resources (MNR)

The MNR is a nonthesis master’s degree program designed for students and practicing professionals seeking advanced training in natural resource management, with an emphasis on collaboration and interdisciplinary teamwork. Employment is available in both the private and public sectors, in positions where management skills are of paramount importance.

Graduate Certificates

The National Environmental Policy Act (NEPA) program offers training at the graduate level related to the National Environmental Policy Act, including how to manage the NEPA process and write effective NEPA documents, reviewing NEPA documents, environmental risk communication, environmental compliance, interdisciplinary team-building, environmental contracting, cumulative impact analysis and documentation, conflict management, and socio-economic impact analysis. The certificate leads to careers in federal natural resource agencies, typically as a member of planning teams, where NEPA expertise is critical to decision-making regarding alternative uses of the land.

The Natural Resource and Environmental Education (NREE) program provides graduate students with a comprehensive education for understanding and communicating natural resources and environmental information, and for developing the analytical skills needed to effectively implement appropriate environmental education and communication techniques for varying audiences. Careers are available with land management agencies; in the education sector—both formal (K-12 school-based) and nonformal (youth, community, and outdoor); in nonprofit organizations; and in the for-profit commercial sector.

Internships

Students are encouraged to undertake one or more internships with various agencies and organizations, as a means of exploring various career possibilities.

Research

The generation of new knowledge through research is one of the key contributions that an academic department makes to professions and society at large. Research is also a major venue for the interaction of graduate students and faculty in the Department of Environment and Society. Although faculty and students work on many different issues, the research strives to be interdisciplinary and focuses on merging the relevant social and natural sciences. Work is undertaken in Utah and
beyond, including several projects elsewhere in the United States and in developing nations. Funding comes from a variety of public and private sources. The department houses one institute and three programs that also collaborate on research. These include the Institute for Outdoor Recreation and Tourism, the Natural Resource and Environmental Policy Program, the Geographic Education Program, and the Environmental Education Program.

Financial Assistance
General aspects of financial support for graduate students at Utah State University are listed on pages 98-99 in the Graduate Financial Assistance section. This includes important information on the University-wide policies and terms of reference for research and teaching assistantships, graduate tuition obligations and benefits, Western Regional Graduate Programs, and competitive University-wide fellowships and scholarships.

The Department of Environment and Society intends that all graduate students be financially supported. Graduate research assistantships are available through major professors having contracts, grants, or other awards. Internships may also be created on a case-by-case basis. A student may want to author or co-author a proposal with a faculty member to fund a new initiative. There are also open competitions for graduate scholarships and fellowships through the College of Natural Resources. The department also has a few graduate teaching assistantships where graduate students typically help instructors with teaching, grading, or recitation in large courses. Interested persons should contact the department early in the application process for more information on financial assistance for graduate students. Prospective students may also visit: http://www.cnr.usu.edu/envs

Environment and Society Faculty

Professors
Mark W. Brunson, environmental knowledge, attitudes and behavior, outdoor recreation
Clifford B. Craig, human geography, geographic education, rural/urban planning and development, geography of Utah, GIS education
Steven E. Daniels, natural resource policy and sociology
James J. Kennedy, organizational behavior, forest economics
Richard S. Kramnich, natural resource sociology and policy
H. Charles Romesburg, environmental decision making, natural resource research methods and survey sampling, bioethics
Terry L. Shank, academic administration and leadership, teaching and learning pedagogy, forest ecology
Richard E. Toth, bioregional planning and water resources management

Adjunct Professor
Thomas C. Edwards, Jr., Utah Cooperative Fish and Wildlife Research Unit, spatial

Adjunct Research Professor
Leila McReynolds Shultz, plant taxonomy and geography

Professors Emeritus
Leona K. Hawks, green consumerism, resource conservation and efficiency, human impacts on the environment
Derrick J. Thom, cultural geography, international rural development, land use planning, Africa

Associate Professors
Ted J. Also, physical geography, university pedagogy, photogrammetry
Dale J. Blatna, natural resource/community social science, outdoor recreation, policy
Steven W. Burr, outdoor recreation, nature-based tourism
Christopher A. Conte, African, environmental history
D. Layne Copnock, range ecology and management, international development, systems analysis
Joanna L. Endter-Wada, natural resource and environmental policy, interdisciplinary social sciences, water management and planning
Robert J. Lileholm, natural resource economics and management, international protected areas
Robert H. Schmidt, wildlife policy and human dimensions, wildlife damage management

Adjunct Associate Professors
Christopher Call, vegetation manipulation/management
Arthur J. Caplan, environmental economics, public policy, quantitative analysis
R. Douglas Ramsey, remote sensing, geographic information systems, landscapes

Assistant Professors
Nicole L. McCoy, natural resource economics and policy
Claudia A. Radel, human-environment geography, cultural/political ecology, feminist geography

Research Assistant Professor
Theresa L. Sefia, sociology of environment and development, rural development

Adjunct Assistant Professors
David T. Anderson, Project Director Utah Botanical Center
Benny Bobowski, wildlife biology, rangeland ecology, ecosystem management
Paul W. Box, geographic information systems, spatial analysis and modeling
Christopher Cokinos, literary nature and science writing
Michael F. Harper, Latin America, educational technology, geography education
John Haskin, novice teacher development and qualitative research methodologies
Tamsin C. McCormick, physical geology, land management, environmental education, habitat restoration
Nancy O. McCormick, physical geology, land management, environmental education, habitat restoration
Douglas G. Wachob, development effects on wildlife, environmental education

Senior Lecturer
Michael F. Butkus, recreation resources management and planning, interpretive planning

Lecturers
Benjamin D. Baldwin, Tehabi Project Leader, internship development, leadership and teamwork
Judith A. Kurtzman, natural resource policy
Barbara Middleton, environmental education
Department of Environment and Society

Adjunct Lecturers
Kerry F. Case, Utah House Program Coordinator, extension agent, rhetoric, resource conservation and efficiency
Catherine A. “Kate” Stephens, Program Coordinator of Utah Conservation Corps, environmental education

Undergraduate Academic Advisor:
Marilyn B. Kruse, Family Life 205A, (435) 797-1530,
marilynkr@cc.usu.edu

Deans offered: Bachelor of Science (BS), Bachelor of Arts (BA),
Master of Science (MS), and Doctor of Philosophy (PhD) in Family,
Consumer, and Human Development; BS and BA in Early Childhood
Education; BS and BA in Family and Consumer Sciences; Master of
Family and Human Development (MFHD)

Undergraduate emphases: BS, BA in Family, Consumer, and Human
Development—Deaf Education, Family and Community Services,
Family Finance; Human Development; BS, BA in Early Childhood
Education—licensure, K-3rd grades

Graduate specializations: MS— and Youth, Adult Development and
Aging, Consumer Sciences, Infancy and Childhood, Marriage and
Family Relationships, Marriage and Family Therapy

Program at Utah State University is administered through the
Department of Family, Consumer, and Human Development, and is
open to all majors. Students preparing for careers in the field of aging
can choose the following aging-related coursework, including a supervised
field practicum in a gerontological setting. A minimum GPA of 3.0 is required for the Gerontology Certificate.

Undergraduate Programs

Objectives

The Family, Consumer, and Human Development Department offers undergraduate programs in Family, Consumer, and Human Development; Family and Consumer Sciences; and Early Childhood Education. All programs are designed to prepare students for success in careers serving individuals and families across the life span. Through classroom study and applied experiences, majors study how human development, family relationships, family economics, and consumer issues affect the individual and family.

Faculty members provide instruction and practicum supervision to prepare students to meet the needs of the people they will serve in their future careers. Students are then prepared to work in agencies and organizations serving individuals from infancy through later life, as well as families and consumers in many settings.

Student majors in Family, Consumer, and Human Development are required to complete a practicum experience, which is arranged with the department practicum coordinator. Types of practicum sites include state agencies, hospitals, preschools and child care centers, nursing homes, senior citizen centers, parenting programs, detention centers, crisis intervention programs, public schools, Head Start programs, and after-school programs, as well as financial institutions, credit counseling services, and housing services. Practicum experience in the Deaf Education and Human Development emphases includes the Adele and Dale Young Child Development Laboratory setting. Students majoring in Early Childhood Education complete a formal internship in the Adele and Dale Young Child Development Laboratory and in primary school grades.

Majors in Family, Consumer, and Human Development (FCHD), Family and Consumer Sciences (FCS), and Early Childhood Education (ECE), receive the necessary preparation for graduate study in a family, consumer, and human development related field or employment. Early Childhood Education majors acquire a teaching license so they can teach in grades K-3 in the public schools.

In addition to preparation for advanced study or job opportunities, FCHD majors receive increased knowledge and skills in topics which will enhance their personal and family lives.

Certified Family Life Educator (CFLE)

Students who complete the Family and Community Services emphasis are eligible to apply for the Certified Family Life Educator credential through the National Council on Family Relations.

Gerontology Certificate

Students pursuing the Gerontology Certificate must take additional courses and complete a gerontology practicum as required for certification. A complete list of requirements may be obtained in Family Life 214 or by calling (435) 797-7140.

Departmental Requirements for Family, Consumer, and Human Development Major

Admission Requirements

Students with less than 24 semester credits can declare a premajor in FCHD (PFHD). Completion of at least 24 semester credits (including FCHD 1100, 1500, and 2400) with a cumulative GPA of 3.0 is required for admission into the Family and Community Services, Human Development, and Deaf Education emphases. Family Finance premajor courses include FCHD 1100, 1500, 2400, and 2450. A cumulative GPA of 3.0 is required.

Departmental Program Requirements

The department has established the following regulations, which govern students’ academic progress:

1. The P/D+, D, and F option cannot be used for courses required in the FCHD major or minor.

2. An overall cumulative GPA of 3.0 is required to enter the major, and a cumulative 3.0 GPA is required for graduation. A GPA of 3.0 in FCHD major courses is also required for graduation.

3. Ten-year Policy. Courses which are required for the major will be accepted if they have been completed within the last 10 years.
Background Check
All students will be required to pass a background check prior to participation in a practicum experience (FCHD 4950, 4970, 4980, or 5950).

Emphasis Requirements
After admission to the FCHD major, students must complete the requirements for one of the following four emphases: Family and Community Services, Human Development, Deaf Education, or Family Finance. These requirements are shown below.

Family and Community Services and Human Development Emphases
Majors choosing one of these two emphases prepare for employment in a variety of occupational settings. Previous graduates have found employment in a variety of settings as childcare, Head Start programs, social services agencies, drug treatment centers, youth and adult residential care centers, foster care, youth centers, crisis centers, parent education programs, senior citizen centers, long-term care facilities, adult day care centers, and a host of related federal, state, and local agencies serving families and children. Students are prepared to work in their communities to develop and guide policies for families and children. In addition, FCHD majors receive increased knowledge and skills in topics which will enhance their personal and family lives.

Core Courses (54 credits)
FCHD 1100 Critical Issues in Family, Consumer, and Human Development (F, Sp, Su) ......................................................... 1
FCHD 1500 (BSS) Human Development Across the Lifespan (F, Sp) ................................................................. 3
FCHD 2400 (BSS) Marriage and Family Relationships (F, Sp) .............................................................. 3
FCHD 2610 Child Guidance (F, Sp) ..................................................................................... 1
FCHD 3100 Abuse and Neglect in Family Context
(Prereq: Sophomore standing, FCHD 1500, 2400) (F, Sp) .................................................. 3
FCHD 3110 Human Sexuality (Prereq: FCHD 1500, 2400) (F, Sp, Su) ................................................ 3
FCHD 3130 (QI) Research Methods (Prereq: STAT 1040) (majors only) (F, Sp) ................................................................. 3
FCHD 3210 (CI) Families and Cultural Diversity
(Prereq: FCHD 1500, 2400, ENGL 2010) (F, Sp) (majors only) .................................................. 3
FCHD 3510 Infant and Early Childhood
(Prereq: Junior standing, FCHD 1500, 2610) (F, Sp) ............................................................. 3
FCHD 3520 Children in the Middle Years
(Prereq: Junior standing, FCHD 1500, 2610) (F, Sp) ............................................................. 3
FCHD 3530 Adolescence (Prereq: Junior standing, FCHD 1500) (F, Sp) ................................................................. 3
FCHD 3540 Adult Development and Aging (Prereq: Junior standing and FCHD 1500) (F, Sp) ................................................................. 3
FCHD 4220 Family Crises and Interventions (Prereq: Junior standing, FCHD 2400) (F, Su) ................................................................. 3
FCHD 4230 Families and Social Policy (Prereq: Junior standing, FCHD 2400) (F, Sp) ................................................................. 3
FCHD 4240 Social and Family Gerontology (Prereq: Junior standing, FCHD 2400, 3540) (F, Sp) ................................................................. 3
FCHD 4250 Pre-Practicum Skills (Prereq: Junior standing, FCHD 2610, 3100, ENGL 2010) (F, Sp) ................................................................. 3
FCHD 4980 Practicum (F, Sp, Su) ..................................................................................... 6
PSY 2800 (QI) Psychological Statistics (Prereq: STAT 1040) (3 cr or STAT 1040 or equivalent) (3 cr) ........................................................................................................ 3

In addition to completing these core courses, all students must complete all courses listed below for either the Family and Community Services Emphasis or the Human Development Emphasis.
**Department of Family, Consumer, and Human Development**

### Spring Semester (15 credits)
- **FCHD 3210** (CI) Families and Cultural Diversity ................................................. 3
- **FCHD 3350** (QI) Family Finance ........................................................................... 3
- University Studies Breadth courses* ........................................................................ 6
- Elective course(s) ........................................................................................................ 3

### Junior Year (30 credits)

#### Fall Semester (15 credits)
- **FCHD 3510** Infancy and Early Childhood ................................................................. 3
- **FCHD 3550** Infant Lab .............................................................................................. 3
- **FCHD 3540** Adult Development and Aging ................................................................. 3
- **FCHD 4220** Family Crises and Interventions ............................................................... 3
- Depth Humanities and Creative Arts (DHA) course ..................................................... 3
- Elective course(s) ........................................................................................................ 2

#### Spring Semester (15 credits)
- **FCHD 3130** (Q) Research Methods ...................................................................... 3
- **FCHD 3520** Children in the Middle Years ................................................................. 3
- **FCHD 3530** Adolescence ......................................................................................... 3
- **FCHD 4230** Families and Social Policy ................................................................. 3
- Elective course(s) ........................................................................................................ 3

### Senior Year (30 credits)

#### Fall Semester (15 credits)
- **FCHD 4980** Practicum ............................................................................................ 6
- Elective course(s) ........................................................................................................ 9

### Deaf Education Emphasis

Majors choosing this emphasis are prepared to work with infants and young children who are hearing impaired and their families. Once students have completed their undergraduate degree, they can apply to the graduate program in the Department of Communicative Disorders and Deaf Education and work toward a master’s degree with a specialization in Early Childhood Communicative Disorders. This master’s program can be completed in two semesters plus a summer session. Students completing the master’s program will have the skills necessary to work in early intervention programs called Parent-Infant Programs (or PIP). These programs may be found in every state of the country. Upon completion of the undergraduate FCHD major with the Deaf Education emphasis and the graduate Early Childhood Communicative Disorders specialization, students will have the coursework necessary to cover the competencies for the U-3 Hearing Endorsement and the EI-2 credential which are necessary to be a Deaf Education Specialist.

#### Required Courses

- **FCHD 1100** Critical Issues in Family, Consumer, and Human Development (F,Sp,Su) ................................................................. 3
- **FCHD 1500** (BSS) Human Development Across the Lifespan (F,Sp) ...................... 3
- **FCHD 2400** Marriage and Family Relationships (F,Sp) .......................................... 3
- **FCHD 2610** Child Guidance (F,Sp) ........................................................................ 3
- **FCHD 3100** Abuse and Neglect in Family Context  
  (Prereq: Sophomore standing, FCHD 1500, 2400) (F,Sp) ........................................ 3
- **FCHD 3110** Human Sexuality (Prereq: FCHD 1500, 2400) (F,Sp) ......................... 3
- **FCHD 3130** (QI) Research Methods (Prereq: STAT 1040)  
  (majors only) (F,Sp) .......................................................................................... 3
- **FCHD 3210** (CI) Families and Cultural Diversity  
  (Prereq: FCHD 1500, 2400, ENGL 2100) (F,Sp) (majors only) .................................. 3
- **FCHD 3350** Infant and Early Childhood (Prereq: FCHD 1500, 2610) (F,Sp) .......... 3
- **FCHD 3350** Infant Lab (take concurrently with FCHD 3350) (F,Sp) ......................... 1
- **FCHD 3520** Children in the Middle Years (Prereq: FCHD 1500, 2610) (F,Sp) ........ 3
- **FCHD 4220** Family Crises and Interventions  
  (Prereq: Junior standing, FCHD 2400) (F,Sp) .................................................. 3
- **FCHD 4550** Preschool Methods and Curriculum  
  (Prereq: Junior standing, FCHD 1500) (F,Sp) .................................................. 3
- **FCHD 4900** (CI) Pre-Practicum Skills (Prereq: Junior standing, FCHD 2610, 3100, ENGL 1010) (F,Sp) .................................................. 3
- **FCHD 4960** Practice Teaching in Child Development Laboratories  
  (Prereq: Junior standing, FCHD 4550) (F,Sp,Su) ............................................. 3
- **FCHD 4980** Practicum (with ages 0-3) (F,Sp,Su) .................................................. 3
- **COMD 2500** Language, Speech, and Hearing Development (F,Sp) ....................... 3
- **COMD 2910** Sign Language I (F,Sp,Su) .................................................................. 4
- **COMD 3080** American Sign Language Practicum (F,Sp) ........................................ 1
- **COMD 3910** Sign Language II (F,Sp,Su) ................................................................ 4
- **COMD 4630** Teaching Speech to Deaf and Hard of Hearing Children (Sp) ............. 3
- **COMD 4750** Teaching the English Language to Individuals who are Deaf and Hard of Hearing (F) .................................................. 3
- **COMD 4770** Audiology and Teachers of Children who are Deaf and Hard of Hearing (F) .................................................. 3
- **COMD 4780** Socio-Cultural Aspects of Deafness (F) ............................................. 3
- **COMD 4790** Psychological Principles and Individuals who are Deaf and Hard of Hearing (Sp) .................................................. 3
- **COMD 5610** Introduction to Education of the Deaf and Hard of Hearing (F) ............ 3
- **SPED 5810** Seminar and Field Experiences with Infants and Families (Sp) ............ 4

### Family Finance Emphasis

Majors choosing this emphasis will be prepared for careers in financial counseling, advising, and education. Coursework focuses on the financial decisions that individuals and families face relating to insurance, investing, credit, budgeting, and home ownership. Students will complete an off-campus practicum and a Financial Counseling practicum at the Family Life Center on campus. At the Family Life Center, students will encounter various types of financial experiences, including new home buyer counseling sessions and workshops, as well as financial problems related to credit and budgeting, mortgage defaults, and reverse mortgages. The Family Life Center is a U.S. Department of Housing and Urban Development (HUD) approved housing and financial counseling agency that provides counseling

---

1. Prerequisite: Junior standing, FCHD 4900, a total of at least 30 FCHD credits, and prior application approval by the Practicum Coordinator. Practicum application deadlines are February 15 for fall, June 15 for spring, and October 15 for summer.
2. Students must sign up one year in advance in Family Life 205.
3. Students choosing this emphasis will be prepared for careers in financial counseling, advising, and education. Coursework focuses on the financial decisions that individuals and families face relating to insurance, investing, credit, budgeting, and home ownership. Students will complete an off-campus practicum at the Family Life Center on campus. At the Family Life Center, students will encounter various types of financial experiences, including new home buyer counseling sessions and workshops, as well as financial problems related to credit and budgeting, mortgage defaults, and reverse mortgages. The Family Life Center is a U.S. Department of Housing and Urban Development (HUD) approved housing and financial counseling agency that provides counseling.
and education to the community. Employment opportunities exist with consumer credit counseling services, credit unions, the armed forces, corporate employee assistance programs, employee benefits counseling firms, college financial aid offices, bank loan offices, hospitals, corporate credit offices, bankruptcy courts, community housing programs, Federal Home Administration, and Housing and Urban Development. A student graduating with a Family Finance emphasis may be employed as a personal banker, mortgage loan officer, credit counselor, financial counselor or educator, consumer relations coordinator, military financial educator, debt collections coordinator, credit investigator, fraud detective, insurance broker, stockbroker, or financial planner.

### Prerequisites for FCHD 4950 and 5950 Family Finance Practica

FCHD 4950 and 5950 may be taken only by FCHD majors who have completed the application process. Prior to enrolling in FCHD 4950 or 5950, students must have completed a minimum of 70 semester credits. The following courses are also prerequisites for FCHD 4950 and 5950:

- FCHD 1100 Critical Issues in Family, Consumer, and Human Development
- FCHD 1500 Human Development Across the Lifespan
- FCHD 2400 Marriage and Family Relationships
- FCHD 2450 The Consumer and the Market
- FCHD 3340 Housing: Societal and Environmental Issues
- FCHD 3350 Family Finance
- FCHD 3450 Consumer Credit Problems
- SPCH 1020 Public Speaking

### Required Courses (6 credits)

- FCHD 1500 Human Development Across the Lifespan
- FCHD 2400 Marriage and Family Relationships

### Suggested Support Courses

- BA 3460 Fundamentals of Personal Investing
- BIS 2450 Spreadsheet Applications
- ECON 2010 Introduction to Microeconomics
- FCHD 3510 Child Development and Aging
- FCHD 4240 Social and Family Gerontology
- PFP 5060 Personal Financial Planning and Advising
- PFP 5070 Retirement Planning
- PFP 5080 Estate Planning

### Required General Education Courses

- ECON 1500 Introduction to Economic Institutions, History, and Principles
- STAT 1040 Introduction to Statistics
- SPCH 1020 Public Speaking

### Additional Requirements

- Transfer credit for a completed FCHD course may not exceed 6 credits.
- Transfer credit for a completed FHD minor is not accepted.
- A minimum of 30 credits must be completed at USU.
- Students must complete a minimum of 3 USU FCHD courses in order to earn an FHD minor.
- A minimum cumulative GPA of 2.0 is required for graduation.
- Students must complete the application process before enrolling in FCHD 4950 or 5950.
- The Family and Human Development Minor is designed to provide a knowledge base for understanding families and human development in order to enhance the training of majors in other academic disciplines.
- A 3.0 GPA is required for the minor.
- Prior to enrolling in FCHD 4950 or 5950, students must have completed a minimum of 70 semester credits.
- Students must complete a minimum of 3 USU FCHD courses in order to earn an FHD minor.
- Courses counted toward the minor may not be taken pass-fail.
Department of Family, Consumer, and Human Development

Family Finance Minor (3.0 GPA required)
Required Courses (6 credits)
FCHD 2450 (BSS) The Consumer and the Market (F,Sp) ....... 3
FCHD 3350 (QI) Family Finance (F,Sp,Su) .......................... 3

Elective Courses (9 credits)
Students must complete at least 9 credits in courses selected from
the following. Courses counted toward the minor may not be taken
pass/fail.
FCHD 3280 Economic Issues for Individuals and Families (Sp).... 3
FCHD 3310 Consumer Policy (Sp) ........................................... 3
FCHD 3340 Housing: Societal and Environmental Issues (F) ...... 3
FCHD 3450 Consumer Credit Problems (Prereq: FCHD 3350) (F) .... 3
FCHD 4350 Advanced Family Finance (Prereq: FCHD 3350) (Sp) ...... 3

Early Childhood Education Major
Majors in early childhood education are licensed to teach in preschool,
kindergarten, and grades 1-3. Several practica and field experiences
with children are provided, and a subject matter emphasis is selected.
This major is a cooperative effort between the Department of
Family, Consumer, and Human Development and the Department of
Elementary Education. Students are required to complete a student
Teaching practicum in a preschool program, a kindergarten, and
in the public schools grades 1, 2, or 3. Additional materials describing
the major in the Department of Family, Consumer, and Human
Development are available from the advisors in FL 205.

University Studies Requirements
Early Childhood Education Majors are required to take certain classes
to fulfill the University Studies requirements. The following sections list
the specific courses to choose from:

Quantitative Literacy (QL) (3 credits)
A grade lower than a C- will not be accepted in this course.)
STAT 1040 (QL) Introduction to Statistics (F,Sp,Su) .................. 3
(Math 1050 or Math ACT score of 25 or higher is required to apply to
the Teacher Education Program.)

Breadth Requirements (21 credits)
Choose one course from the following to meet BCI requirement:
ECON 1500, HIST 1700, POLS 1100, USU 1300 .................... 3
Choose one course from the following to meet BCA requirement:
MUSC 1010, USU 1330, ID 1750 ........................................... 3
Choose one course from the following to meet BHU requirement:
ANTH 2210, HIST 1110, HIST 1510, PHIL 1000, PHIL 1120,
PHIL 1200, PHIL 2400, USU 1320 ........................................ 3
Choose one course from the following to meet BSS requirement:
ANTH 1010, ANTH 2010, ASTE 2900, ENVS 2340, GEOG 1300,
GEOG 1403, JCOM 1500, NR 1010, POLS 2200, SOC 1010,
USU 1340 ........................................................................... 3
Choose one course from the following to meet BLS requirement:
AWER 1200, BIOL 1010, FRWS 2200, NFS 1020, PLSC 2100,
USU 1350 ........................................................................... 3
Choose one course from the following to meet BPS requirement:
BMET 2000, GEOG 1000, GEO 1010, GEO 1110, CHEM 1010,
PHYS 1040, SOIL 2000, USU 1360 ......................................... 6
Complete PHYS 1200 and choose one course from the following to
meet BPS requirement:
BMET 2000, GEOG 1000, GEO 1010, GEO 1110, CHEM 1010,
PHYS 1040, SOIL 2000, USU 1360 ......................................... 6

Depth Education Requirements
Communications Intensive (CI) (2 courses)
ELED 3000 (CI) Foundation Studies and Practicum in Teaching and
Classroom Management Level II ........................................... 6
ELED 4030 (CI) Teaching Language Arts and Practicum Level III ....... 3
(ELED 3000 and 4030 are included in major requirements.)

Quantitative Intensive (QI) (1 course)
A grade lower than a C- will not be accepted in this course.)
MATH 2020 (QI) Introduction to Logic and Geometry (F,Sp,Su) ....... 3
(Prereq: MATH 1050 or Math ACT score of 25 or higher; also required
to apply to the Teacher Education Program)

Depth Course Requirements (2 courses)
Choose two approved University Studies depth courses designated
DSC, DHA, or DSS (outside of area of emphasis).

Early Childhood Education Major
Minimum 2.75 GPA
Offered in Conjunction with Elementary Education Department.

Early Childhood Education Major (80 credits) (minimum 2.75 GPA)

Level I (6 credits)14
ELED 1010 Orientation to Elementary Education .................. 3
FCHD 1500 (BSS) Human Development Across the Lifespan .... 3

Level II (15 credits)15
Students must be officially admitted to the Teacher Education Program
prior to Level II.
ELED 3000 (CI) Foundation Studies and Practicum in Teaching and
Classroom Management Level II ........................................... 6
FCHD 2600 Seminar in Early Childhood Education (F,Sp) ......... 2
FCHD 2630 Practicum in Early Childhood Education (F,Sp) ......... 2
PSY 3660 Educational Psychology for Teachers .................... 2
(ELED II courses may be taken concurrently.)
ELED 3100 19 Teaching Reading I ....................................... 3
(ELED 3100 may be taken during transition semester, if desired.)

Transition (11 credits)11
SPED 4000 Education of Exceptional Individuals ................. 2
INST 4010 Principles and Practices of Technology for Elementary
Teachers ................................................................. 3
FCHD 4550 Preschool Methods and Curriculum .................. 3
ELED 4480 Early Childhood Education Kindergarten through
Grade 3 ........................................................................... 3

Level III (15 credits; must follow Level II)
ELED 4080 Teaching Science and Practicum Level III .............. 3
ELED 4030 (CI) Teaching Language Arts and Practicum Level III ... 3
Department of Family, Consumer, and Human Development

ELED 4040 (CI) Teaching Reading II and Practicum Level II ............... 3
ELED 4050 Teaching Social Studies and Practicum Level III ............... 3
ELED 4060 Teaching Mathematics and Practicum Level III ............... 3
(Level III courses must be taken concurrently.)

Level IV (21 credits)
ELED 5050 Student Teaching—Kindergarten ........................................ 6
ELED 5100 Student Teaching—Primary Grades (1-3) ........................... 6
ELED 5250 Student Teaching—Seminar ............................................... 3
FCHD 4960 Practice Teaching in Child Development Laboratories 6
(Level IV courses must be taken during two semesters.)

Emphasis (12 credits)
Descriptions of available emphasis areas are shown below.

Electives (if needed to complete 120 credits)
Choose Breadth Electives from the following courses:
ART 3700 Elementary Art Methods .................................................. 3
THEA 4330 Storytelling ................................................................... 3
THEA 4330 Drama and Theatre for Youth: Grades K-6 ..................... 3
THEA 5360 Drama in the Secondary Education Classroom:
Grades 7-12 ..............................................................................
HEP 3500 Elementary School Health Education .............................. 2
PEP 3050 Physical Education in the Elementary School ................. 3
PEP 3650 Movement Exploration for Elementary Teachers ........... 3
ETE 3070 K-8 Engineering and Technology Education .................. 3
ENVS 5110 Environmental Education .......................................... 3
ELED 4410 Gifted Education in the Regular Classroom ................. 3
ELED 4420 Multiple Talent Approach to Thinking ........................... 2
FCHD 2610 Child Guidance ......................................................... 3
ENGL 3530 Children’s Literature ................................................. 3
MUSC 3260 Elementary School Music .......................................... 2

10These courses are prerequisites to Level II.
11SPED 4000, ELED 3100, or INST 4010 may be taken concurrently with Level II courses,
allowing students to earn 14-15 credits during their Level II semester. See the Schedule of
Classes for information about when these courses will be taught.
12ELED 4480 and FCHD 4550 must be taken after completion of Level II.
13FCHD 4550 is a prerequisite for FCHD 4960.
14Students must apply for FCHD 4960 three to four semesters in advance of taking the class.
Apply in Family Life Building, room 205.
15ENGL 3530 is highly recommended.

Early Childhood Areas of Emphasis
Students majoring in Early Childhood Education are required to complete 12 credits in an area of emphasis. The area of emphasis must be chosen from the following fields: Language Arts, Social Studies, Mathematics/General Science, General Science, Fine Arts, Art, Music, Physical Education, Health/Wellness/Nutrition, Foreign Language, School Library Media, or English as a Second Language. Students must choose two upper-division courses numbered 3000 or above.

Language Arts Emphasis (12 credits)
Select two courses from each group. Remaining courses (if any) may be selected from any of the courses listed.
Listening and Speaking
SPCH 1020 (CI) Public Speaking .................................................. 3
SPCH 2110 (CI) Interpersonal Communication ............................. 3
SPCH 3330 (DSS) Intercultural Communication ............................ 3
THEA 1030 (BHU) Exploring Performance Through Aesthetic Texts .... 3
THEA 4030 Storytelling ................................................................ 3
THEA 4330 Drama and Theatre for Youth: Grades K-6 ................. 3
THEA 5360 Drama in the Secondary Education Classroom:
Grades 7-12 .............................................................................

Reading and Writing
ENGL 1120 Elements of Grammar ................................................. 3
ENGL 2200 (BHU) Understanding Literature .................................. 3
ENGL 2210 (BHU) Introduction to Folklore .................................. 3
ENGL 2720 Survey of American Folklore ....................................... 3
ENGL 3030 (DHA) Perspectives in Literature .................................. 3
ENGL 3040 (DHA) Perspectives in Writing and Rhetoric ................ 3
ENGL 3420 Fiction Writing .......................................................... 3
ENGL 3530 Children’s Literature .................................................. 3
ENGL 3700 (CI) Regional Folklore ................................................. 3

Electives
ENGL 2140 British Literary History: Anglo-Saxon to 18th Century .... 3
ENGL 2600 Introduction to Literary Theory ..................................... 3
ENGL 3050 (DHA) Masterpieces of World Literature ..................... 3
ENGL 3070 (DHA) Perspectives in Folklore .................................. 3
ENGL 3430 Poetry Writing ......................................................... 3
ENGL 3510 Young Adult Literature ............................................. 3
ENGL 3520 Multicultural American Literature .............................. 3
ENGL 4300 Shakespeare ............................................................. 3
COMD 2500 Language, Speech, and Hearing Development ............ 3

Social Studies Emphasis (12 credits)
The purpose of this area is to offer students the opportunity to broaden their understanding of social studies. Students should select courses from at least three areas to constitute the 12 credits required.

Anthropology
ANTH 1010 (BSS) Cultural Anthropology ..................................... 3
ANTH 2010 (BSS) Peoples of the Contemporary World .................. 3
ANTH 2030 (CI/BSS) World Archaeology ..................................... 3
ANTH 3130 (CI) Peoples of Latin America ..................................... 3
ANTH 3160 (DSS) Anthropology of Religion ................................. 3
ANTH 3200 (CI/DSS) Perspectives on Race .................................. 3
ANTH 4110 (DSS) Southwest Indian cultures, Past and Present .... 3

Economics
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles ................................................................. 3
ECON 2010 (BSS) Introduction to Microeconomics ......................... 3

Political Science
POLS 1100 (BAI) United States Government and Politics .............. 3
POLS 2100 Introduction to International Politics ............................ 3
POLS 2200 (BSS) Comparative Politics ........................................ 3
POLS 3120 (DSS) Law and Politics ............................................. 3
POLS 3140 (DSS) The Presidency ................................................ 3
POLS 3190 (DSS) Gender, Power, and Politics ............................. 3
POLS 3310 (DSS) American Political Thought ............................. 3

Sociology
SOC 1010 (BSS) Introductory Sociology ....................................... 3
SOC 1020 Social Problems ......................................................... 3
SOC 3010 Race, Class, and Gender ............................................. 3
SOC 3110 (CI) Methods of Social Research .................................. 3
SOC 3120 (QI) Social Statistics I ................................................ 3
SOC 3200 (DSS) Population and Society ..................................... 3
SOC 3410 Juvenile Delinquency .................................................. 3
SOC 3500 Social Psychology ....................................................... 3
SOC 3610 (DSS) Rural Sociology ................................................ 3
SOC 3750 Sociology of Aging ..................................................... 3
SOC 4010 Contemporary Sociological Theory ............................... 3

Geography
GEOG 1300 (BSS) World Regional Geography ............................ 3
GEOG 1400 (BSS) Human Geography .......................................... 3
Department of Family, Consumer, and Human Development

GEOG 3850 Map, Air Photo, and GIS Interpretation .............................. 4
GEOG 4200 (CI) Regional Geography ........................................................ 3

History
HIST 1060 (BHU) Introduction to Islamic Civilization ................................. 3
HIST 1100 (BHU) Foundations of Western Civilization: Ancient and Medieval .................................................................................. 3
HIST 1110 (BHU) Foundations of Western Civilization: Modern ................. 3
HIST 1500 (BHU) Cultural and Economic Exchange in the Pre-Nineteenth Century World .................................................................. 3
HIST 1510 (BHU) The Modern World .......................................................... 3
HIST 1600 American Cultures in Film ......................................................... 3
HIST 2210 (BHU) Introduction to Folklore .................................................. 3
HIST 2700 (BAI) United States to 1877 ......................................................... 3
HIST 2710 (BAI) United States 1877 to Present .......................................... 3
HIST 2720 Survey of American Folklore ..................................................... 3
HIST 3240 Modern Europe from 1799 to the Present .................................. 3
HIST 3330 The Soviet Union and its Heirs ................................................. 3
HIST 3410 Africa and the World .................................................................. 3
HIST 3620 History of Colonial Latin America ........................................... 3
HIST 3700 (CI) Regional Folklore ............................................................... 3
HIST 3720 Colonial America ....................................................................... 3
HIST 3750 Civil War and Reconstruction .................................................. 3
HIST 3770 Contemporary America, 1945-Present ...................................... 3
HIST 3840 Twentieth Century American West .......................................... 3
HIST 3850 (CI/DA) History of Utah ............................................................. 4
HIST 4230 (CI/DA) The History of Christianity in the West ....................... 3
HIST 4330 Modern Germany with Special Emphasis on the Twentieth Century .................................................................................. 3
HIST 4390 British Imperialism from 1688 to the Present ................................ 3
HIST 4550 (CI/DA) The History of Women and Family in America ............. 3
HIST 4600 (CI/DA) The History of the American West ............................... 3
HIST 4640 (CI) Studies in the American West ........................................... 3
HIST 4710 American Indian History ............................................................ 3
HIST 4730 (CI) History of Black America .................................................. 3

Additional Courses
NR 1010 (BSS) Humans and the Changing Global Environment .................. 3
ENVS 5110 Environmental Education ....................................................... 3
PHIL 1000 (BHU) Introduction to Philosophy .......................................... 3
PHIL 2400 (BHU) Ethics ........................................................................... 3
SW 1010 Introduction to Social Welfare ................................................... 3
SW 3350 Child Welfare .............................................................................. 3

Mathematics/General Science Emphasis (12 credits)
Choose one course from each category: Mathematics, Physical Science, and Biological (Life) Science. Remaining credits may be chosen from any category.

Mathematics
MATH 1060 Trigonometry ........................................................................... 2
MATH 1100 (QL) Calculus Techniques ......................................................... 3
MATH 3110 Modern Geometry ................................................................. 3

Physical Science
CHEM 1110 (BPS) General Chemistry I .................................................... 4
CHEM 1120 (BPS) General Chemistry II .................................................... 4
PHYS 1020 (BPS) Energy .......................................................................... 3
PHYS 1040 (BPS) Introductory Astronomy ................................................. 3
PHYS 1080 (BPS) Intelligent Life in the Universe ..................................... 3
PHYS 3010 (DSC/QI) Space Exploration from Earth to the Solar System ................................................................. 3
PHYS 3020 (DSC) Great Scientists ............................................................. 3
PHYS 3030 (DSC/QI) The Universe ............................................................. 3
BMET 2000 (BPS) The Atmosphere and Weather ...................................... 3
BMET 3820 (DSC/QI) Climate Change ...................................................... 3

SOIL 3000 Fundamentals of Soil Science .................................................... 4
GEO 1110 (BPS) The Dynamic Earth: Physical Geology ............................ 4
GEO 3200 (DSC) The Earth Through Time .............................................. 4
GEOG 1000 (BPS) Physical Geography ..................................................... 3

Biological (Life) Science
AWER 3000 (DSC) Oceanography ............................................................. 3
BIOL 1110 Elementary Microbiology ...................................................... 4
BIOL 1610 Biology I ................................................................................. 4
BIOL 1620 (BLS) Biology II ..................................................................... 4
BIOL 2320 Human Anatomy ................................................................... 4
BIOL 2420 Human Physiology ................................................................. 4
BIOL 3010 (CI/DSC) Evolution ................................................................. 3
BIOL 3030 (DSC) Genetics and Society .................................................... 4
BIOL 3060 (QI) Principles of Genetics ..................................................... 4
BIOL 3300 General Microbiology ............................................................ 4
ENVS 5110 Environmental Education ..................................................... 3
FRWS 2200 (BLS) Ecology of Our Changing World ................................. 3
NR/BIO/BIOL 2220 General Ecology ....................................................... 3
PUBH 3120 Family and Community Health ............................................ 3
PUBH/CEE 3610 Environmental Education ............................................. 3
NFS 1020 (BLS) Science and Application of Human Nutrition .................. 3
HEP 3000 Drugs and Human Behavior .................................................... 3

General Science Emphasis (12 credits)
Choose science courses from the preceding lists. One course must be from the Physical Science category and one must be from the Biological (Life) Science category. Remaining credits may be chosen from either category.

Fine Arts Emphasis (12 credits)
Early Childhood Education Majors should choose MUSC 3260 as a general elective.

Required:
ART 2110 Drawing II ................................................................................. 3
ART 2810 Photography I ........................................................................... 3
ART 3700 Elementary Art Methods ......................................................... 3
MUSC 1010 (BHA) Introduction to Music (3 cr) or MUSC 3010 (DA) Masterpieces of Music (3 cr) or THEA 4350 Drama and Theatre for Youth: Grades K-6 .................................................. 3

Choose remaining credits from the following:
ART 2110 Drawing II ................................................................................. 3
ART 2810 Photography I ........................................................................... 3
PUBH 3120 Family and Community Health ............................................ 3
THEA 1300 (BHU) Exploring Performance Through Aesthetic Texts .......... 3

Art Emphasis (12 credits)
Early Childhood Education majors should consult with their advisor before choosing this emphasis.

ART 1010 (BHA) Exploring Art (3 cr) or ART 2710 (BHU) Survey of Western Art: Prehistoric to Medieval (3 cr) or ART 2720 (BHU) Survey of Western Art: Renaissance to Post-Modern (3 cr) ................................................................................. 3
ART 1020 Drawing I (3 cr) or ART 1120 Two-dimensional Design (3 cr) .................................................................................. 3
ART 2650 Introduction to Ceramics .......................................................... 3
ART 3700 Elementary Art Methods ......................................................... 3

Utah State University 2006-2007 General Catalog 309
Department of Family, Consumer, and Human Development

Music Emphasis (12 credits)
Required:
MUSC 1010 (BCA) Introduction to Music ....................... 3
MUSC 1110 Music Theory I ........................................... 3
MUSC 1600 Voice Techniques ........................................ 1
MUSC 3260 Elementary School Music ........................... 2

Choose remaining 3 credits from the following:
Appropriate piano course(s) (3 cr) or
Guitar course(s) (3 cr) or
Acceptable substitute courses, approved by advisor (3 cr) ... 3

Physical Education Emphasis (12 credits)
Required:
PE 3000 Dynamic Fitness ............................................. 3
PEP 3200 (CI) Motor Learning and Skill Analysis ............. 4
HEP 2000 First Aid and Emergency Care ....................... 2

Choose remaining credits from the following:
PEP 2200 Skills 2 (Lifetime Activities) .......................... 1
PEP 2300 Skills 3 (Softball, Basketball, Soccer) ............. 1
PEP 2400 Skills 4 (Tennis, Badminton, Track and Field) .... 1
PEP 2500 Rhythms and Movement .................................. 1
PRP 1500 Social Recreation Leadership ......................... 3

Health/Wellness/Nutrition Emphasis (12 credits)
Choose one of the following two courses:
NFS 1020 (BLS) Science and Application of Human Nutrition .... 3
NFS 2020 Nutrition Throughout the Life Cycle .................. 3

Choose remaining credits from the following:
NFS 1000 World of Food and Nutrition .......................... 1
NFS 3110 (DSC) Food, Technology, and Health ............... 3
BIOL 2420 Human Physiology ...................................... 3
HEP 2000 First Aid and Emergency Care ....................... 2
HEP 2500 Health and Wellness .................................... 2
HEP 3000 Drugs and Human Behavior ........................... 3
HEP 3500 Elementary School Health Education .............. 2
PUBH 3120 Family and Community Health ..................... 3
PE 3000 Dynamic Fitness ............................................. 3

Foreign Language Emphasis (12 credits)
A foreign language area of emphasis may be designed by a student, provided it is limited to one language.

School Library Media Certification
This certification will fulfill the emphasis requirement for Early Childhood Education majors. For a list of required courses, contact the Instructional Technology Department.

English as a Second Language (ESL) Endorsement
This endorsement will fulfill the emphasis requirement for Early Childhood Education majors. For a list of required courses, students should contact their advisor. (Completing 12 credits toward the ESL Endorsement will fulfill an ESL Emphasis.)

Optional Supporting Area in Parenting for Early Childhood Education Majors (17 credits)
The Early Childhood Education requirements can be met and then additional credits taken to complete a supporting area in parenting. This may enhance employment opportunities in school districts, day care, and preschools where there is a strong commitment to a parent involvement program, or as an instructor for community adult education programs.

Family and Consumer Sciences Major

The Family and Consumer Sciences (FCS) major is an integrative major that links the various fields within the family and consumer sciences profession and prepares the student for positions requiring interdisciplinary problem-solving skills. The Family and Consumer Sciences major prepares graduates for positions in business, local/state/federal agencies, child care centers, youth programs, job training centers, and other related agencies.

Admission Requirements
To qualify for admission to the Family and Consumer Sciences (FCS) major, students must complete at least 24 semester credits (including FCHD 1100, 1500, 2400, and 2450) with a cumulative GPA of at least 3.0. However, students who have completed less than 24 credits may declare a premajor in FCS.

Departmental Program Requirements
The department has several regulations governing students’ academic progress:

1. The P/D+, D, F option cannot be used for courses required in the FCS major.
2. An overall cumulative GPA of 3.0 is required for entrance to the major. An overall GPA of 3.0 is required for graduation.
3. Ten-year Policy. Courses which are required for the major will be accepted only if they have been completed within the last 10 years.

Major Courses (51 credits)
Students must select courses from each of the following five areas. The minimum number of credits to be selected from each area is shown in parentheses.

Human Development and Family Studies (12 credits)
Select at least 12 credits from the following:
FCHD 2610 Child Guidance (F,Sp) ................................. 3
FCHD 3100 Abuse and Neglect in Family Context
(Prereq: Sophomore standing, FCHD 1500, 2400) (F,Sp) ....... 3
FCHD 3110 Human Sexuality (Prereq: FCHD 1500, 2400) (F,Sp).... 3
FCHD 3550 Infant Lab (F,Sp) ............................................. 1
FCHD 3560 Middle Childhood Lab (F,Sp) ......................... 3
FCHD 3510 Infancy and Early Childhood
(Prereq: Junior standing, FCHD 1500, 2610) (F,Sp) .............. 3
FCHD 3520 Children in the Middle Years
(Prereq: Junior standing, FCHD 1500, 2610) (F,Sp) .............. 3
**Department of Family, Consumer, and Human Development**

**FCHD 3530** Adolescence (Prereq: Junior standing, FCHD 1500) ........................................... 3
**FCHD 3540** Adult Development and Aging (Prereq: Junior standing and FCHD 1500) (F,Sp) .................................................. 3
**FCHD 4220** Family Crises and Interventions (Prereq: Junior standing, FCHD 2400) (F,Su) .................... 3
**FCHD 4230** Families and Social Policy (Prereq: Junior standing, FCHD 2400) (F,Sp) ......................... 3
**FCHD 4240** Social and Family Gerontology (Prereq: Junior standing, FCHD 2400, 3540) (F,Sp) ............... 3
**FCHD 4550** Preschool Methods and Curriculum (Prereq: Junior standing, FCHD 1500) (F,Sp) ............ 3

**Consumer and Family Finance (12 credits)**
Select at least 12 credits from the following:

**FCHD 3280** Economic Issues for Individuals and Families (Sp) ........................................... 3
**FCHD 3310** Consumer Policy (Sp) .......................................................... 3
**FCHD 3340** Housing: Societal and Environmental Issues (F) ....................................................... 3
**FCHD 3350** (Q) Family Finance (F,Sp,Su) ............................................................................. 3
**FCHD 3450** Consumer Credit Problems (Prereq: FCHD 3350) (F) ........................................... 3
**FCHD 4330** Family Finance Career Seminar (Prereq: FCHD 3350) (F) ........................................... 1
**FCHD 4350** Advanced Family Finance (Prereq: FCHD 3350) (Sp) .................................................. 3
**FCHD 5340** Housing Finance and Regulations (Prereq: FCHD 3340, 3550) (majors only) (Sp) .......... 3

**Foods and Nutrition (9 credits)**
Select at least 9 credits from the following:

**NFS 1000** World of Food and Nutrition (F) .......................................................... 1
**NFS 1020** (BLS) Science and Application of Human Nutrition (F,Sp,Su) ............................ 3
**NFS 1240** Culinary Basics (F,Su) .................................................................................. 3
**NFS 1250** Sanitation and Safety (Sp) .............................................................................. 3
**NFS 2020** Nutrition Throughout the Life Cycle (Prereq: NFS 1020) (Sp) ................................. 3
**NFS 2030** Catering (Prereq: NFS 1240, 1250) (F) .......................................................... 3
**NFS 3020** Nutrition and Physical Performance (Prereq: NFS 1020) (F)................................. 3
**NFS 3110** (DSC) Food, Technology, and Health (Prereq: University Studies Breadth Life Sciences Course) (F) .................................................. 3
**NFS 4070** Experimental Foods (Prereq: CHEM 1120 or 2300 or 2310) (Sp) ................... 4
**NFS 4480** Community Nutrition (Prereq: NFS 1020) (F) ...................................................... 3

**Research Methods and Professional Courses (12 credits)**
The following courses are required:

**FCHD 3130** (Q) Research Methods (Prereq: STAT 1040) (F,Sp) (majors only) ......................... 3
**FCHD 3210** (CI) Families and Cultural Diversity (Prereq: FCHD 1500, 2400, ENGL 2010) (F,Sp) (majors only) .................................................................................. 3

Choose one of the following:

**OSS 1550** (CI) Business Correspondence ........................................................................ 3
**BIS 2200** (CI) Business Communication (F,Sp,Su) ......................................................... 3
**FCHD 4900** (CI) Pre-Practicum Skills (Prereq: Junior Standing, FCHD 2610, 3100, ENGL 2010) (F,Sp) .................................................. 3
**SPCH 1020** (CI) Public Speaking (F,Sp) ............................................................................ 3
**SPCH 2110** (CI) Interpersonal Communication (F,Sp) ....................................................... 3

Choose one of the following:

**FCHD 4900** (CI) Pre-Practicum Skills (Prereq: Junior Standing, FCHD 2610, 3100, ENGL 2010) (F,Sp) .................................................. 3
**PHIL 1120** (BHU) Social Ethics (Sp) .................................................................................. 3
**PHIL 2400** (BHU) Ethics (Sp) .................................................................................. 3

**Practicum (6 credits)**
Complete a total of 6 credits from one or both of the following:

**FCHD 4950** Practicum: Consumer Science (F,Sp,Su) .......................................................... 3
**FCHD 4960** Practicum in Child Development Laboratories (Prereq: Junior Standing, FCHD 4550) (F,Sp,Su) ............................................................................. 3

**Suggested Support Courses**
The following courses are suggested (but not required) for students in the FCS major:

**FCSE 2040** Clothing Production Principles (F,Sp) .......................................................... 3
**FCSE 3030** (DSC) Textile Science (Sp) ............................................................................. 4
**FCSE 3040** Advanced Clothing Production Principles (F,Sp) ........................................... 3
**FCSE 3060** (DSS/CI) Human Behavior Related to Dress (F) (3 cr) or **FCSE 3080** Dress and Humanity (F,Sp) (3 cr) ........................................ 3
**ID 1790** (BCA) Interior Design Theory (Sp) ......................................................................... 3
**ID 3740** (DHA) History of Interior Furnishings and Architecture I (F) ........................... 3
**ID 3750** (DHA/CI) History of Interior Furnishings and Architecture II (Sp) ................. 3

**Suggested Four-year Course of Study for Family and Consumer Sciences (FCS) Major**
The FCS major is an interdisciplinary program. Students are required to take 12 credits in Human Development and Family Studies, 12 credits in Consumer and Family Finance, and 9 credits in Foods and Nutrition, as well as professional courses listed on the major requirement sheet.

The suggested course of study shown below is intended to guide students in the selection of their courses. However, students should meet with their advisor each semester to plan an individualized schedule tailored to their specific interests and needs.

**Freshman Year (30-33 credits)**
**Fall Semester (15-18 credits)**
**FCHD 1100** Critical Issues in Family, Consumer, and Human Development ............................................. 1
**MATH 1010** Intermediate Algebra ......................................................................................... 3
**ENGL 1010** (CL1) Introduction to Writing: Academic Prose ........................................... 3
**USU 1000** Introduction to Computers and Information Literacy (1 cr) or **OSS 1400** Microcomputer Applications (3 cr) or

Passing scores on Computer and Information Literacy
(CIL) exams (0 cr) ........................................................................................................... 0-3
(Note: Although USU 1000 and OSS 1400 include the CIL exams, the CIL requirement is met only by passing all six exams, not by simply passing USU 1000 or OSS 1400.)

University Studies Breadth course ................................ 3
Elective course(s) .......................................................... 2

**Spring Semester (15 credits)**
**FCHD 2400** (BSS) Marriage and Family Relationships ........................................... 3
**FCHD 2450** (BSS) The Consumer and the Market ...................................................... 3
**STAT 1040** (QL) Introduction to Statistics ......................................................................... 3

University Studies Breadth course ................................ 3
Elective course(s) .......................................................... 3
Department of Family, Consumer, and Human Development

Sophomore Year (30 credits)
Fall Semester (15 credits)
FCHD 3350 (QII) Family Finance ........................................... 3
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a
Persuasive Mode ................................................................. 3
NFS 1020 (BLS) Science and Application of Human Nutrition .... 3
FCHD Human Development and Family Studies course .......... 3
University Studies Breadth courseA ...................................... 3

Spring Semester (15 credits)
FCHD Human Development and Family Studies course .......... 3
FCHD Consumer and Family Finance course ......................... 3
NFS Foods and Nutrition course .......................................... 3
Communications Intensive (CI) course ................................. 3
(as listed in FCS requirements) ............................................. 3
Elective course(s) ............................................................... 3

Junior Year (30 credits)
Fall Semester (15 credits)
FCHD 3210 (CI) Families and Cultural Diversity ..................... 3
FCHD Human Development and Family Studies course .......... 3
FCHD Consumer and Family Finance course ......................... 3
NFS Foods and Nutrition course .......................................... 3
Elective course(s) ............................................................... 3

Spring Semester (15 credits)
FCHD Human Development and Family Studies course .......... 3
FCHD Consumer and Family Finance course ......................... 3
PHIL Ethics course (as listed in FCS requirements)B ................ 3
Elective course(s) ............................................................... 3

Senior Year (30 credits)
Fall Semester (15 credits)
FCHD 3130 (QII) Research Methods ..................................... 3
Depth Life and Physical Sciences (DSC) course ..................... 3
Depth Humanities and Creative Arts (DHA) course ............... 3
Elective course(s) ............................................................... 6

Spring Semester (15 credits)
FCHD 4950 Practicum: Consumer Science ......................... 6
Elective course(s) ............................................................... 9

A FCHD 1000, 2400, or 2450 meets the Breadth Social Sciences (BSS) requirement, NFS 1020 meets the Breadth Life Sciences (BLS) requirement, and the PHIL Ethics Course meets the Breadth Humanities (BHU) requirement.
B At least two of the six required breadth courses must have a USU prefix.
C Effective Fall Semester 2007, Quantitative Intensive (QII) University Studies credit will no longer be granted for FCHD 3350.

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in selected upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. The minimum GPA for participation in departmental honors in FCHD is 3.30, with 3.5 in the FCHD major. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/; or by contacting Dr. Ann Austin (FCHD honors advisor) at ann.austin@usu.edu or at (435) 797-1527.

Additional Information

For more detailed information about the Family, Consumer, and Human Development; Early Childhood Education; and Family and Consumer Sciences majors, see the current major requirement sheets or an advisor in the FCHD Advising Center (Family Life 205). Major requirement sheets are also available online at: http://www.usu.edu/ats/majorsheets/

Financial Support

In addition to the scholarships, assistantships, grants-in-aid, and work-study programs available through the University, the College of Education and Human Services and the Department of Family, Consumer, and Human Development also give scholarships and other types of support each year. Students should inquire at the Dean’s Office in Education 108, the departmental advising office in Family Life 205, or the Financial Aid Office in Student Center 106.

Graduate Programs

Admission Requirements

See general admission requirements on pages 99-100. Students may use either the GRE or MAT for application for all specializations in the MS degree, but the GRE is required for the PhD program. Additional assessment is required for admission to the MS marriage and family therapy specialization. An applicant’s MAT score, or the GRE verbal and quantitative scores, must be at or above the 40th percentile. Applications are expected to be completed by January 1, but may be considered throughout the year, with the exception of applications for the Marriage and Family Therapy (MFT) Specialization and the Master of Family and Human Development (MFHD) degree. MFT applications must be received by January 1, and MFHD applications must be received by March 1 in years that a new cohort is admitted.

Degree Programs

Graduate students receive a strong research and theoretical base in family relationships, consumer sciences, and human development. In addition to the core courses required for each of the specializations, students have the opportunity to achieve their program goals with a wide range of other graduate courses in the department, as well as designated courses in related programs at USU. Graduate students also engage in independent study, practica, and other specialized professional experiences that help them to acquire specific skills.

The department provides advanced graduate education and training for students to (1) establish the professional competency necessary for employment in research, teaching, marriage and family therapy, extension, and administration; (2) develop skills necessary for agency administration in the field of family and child care services; (3) receive clinical training in marriage and family therapy; (4) develop the skills for supervisory responsibilities in child development laboratories, child-care facilities, and adolescent programs; and (5) develop the skills and expertise to work in financial and consumer services agencies and organizations.
Department of Family, Consumer, and Human Development

MS in Family, Consumer, and Human Development
Students in the MS program complete a research thesis that makes a contribution to knowledge in family studies, human development, or consumer sciences.

All students in the MS Marriage and Family Therapy specialization also complete required clinical experiences. The MS Marriage and Family Therapy specialization satisfies basic educational requirements for Utah State licensure in marriage and family therapy and clinical membership in AAMFT. The Marriage and Family Therapy specialization is accredited by the Commission on Accreditation for Marriage and Family Therapy Education.

Master of Family and Human Development (MFHD)
The MFHD is a practice-oriented, but nonclinical, master’s degree especially suitable for individuals already working or planning to work in the family or social service sectors, education, corrections, or related fields. The MFHD does not require a thesis. A new group of students is enrolled every two years in the distance-delivered program, and the group takes a prescribed set of courses.

PhD in Family, Consumer, and Human Development
Students in the PhD program complete a major research dissertation that makes a significant contribution to the theoretical and empirical knowledge in family studies, consumer sciences, or human development.

Background Check
Students are required to pass a background check prior to participation in a practicum experience (FCHD 6980 or 7980).

Specializations
The MS degree has specializations in Adolescence and Youth, Adult Development and Aging, Consumer Sciences, Infancy and Childhood, Marriage and Family Relationships, and Marriage and Family Therapy. Further information may be obtained from the department and by accessing the department’s home page at: http://www.usu.edu/fchd

Course Requirements
The core substantive courses for the master’s degree are FCHD 6030, 6050, 6060, and 6070. Master’s students also complete course requirements under their chosen specialization in Marriage and Family Relationships, Marriage and Family Therapy, Consumer Sciences, Infancy and Childhood, Adolescence and Youth, or Adult Development and Aging. Elective courses and thesis topics are individualized with each student by faculty supervisory committees.

Doctoral core courses are FCHD 7060 and 7070. Doctoral students also complete topical seminars, methods and statistics courses, research and teaching internships, comprehensive exams, and dissertation research. For more specific information, see the department’s Graduate Student Handbook online at: http://www.usu.edu/fchd/graduate_handbook.pdf

Research
The department has three major child development laboratories, other research labs, marriage and family therapy facilities, and housing and financial counseling facilities that are available for research and training in the graduate program. The department enjoys a long history of research activities with preschools, public schools, extension programs, financial institutions, and other agencies throughout the state, and has a program of gerontology research.

Financial Assistance
Extensive teaching, research, and extension graduate assistantships are available for applicants for both the MS and PhD degrees. Attractive fellowships are available for strong PhD students with high GPA and high GRE scores. When an applicant’s folder is complete, it is reviewed by the Graduate Admissions and Finance Committee, which makes specific recommendations regarding admission and financial support. Assistantships and fellowships include waivers for out-of-state tuition. Doctoral students can also receive waivers for in-state tuition with a half-time teaching or research assistantship.

Career Opportunities
Recent recipients of advanced degrees have found employment in public schools, academic departments at colleges and universities, research centers, hospitals, Head Start, child care programs, social services agencies, mental health agencies, private and clinical practice settings, extension services, financial institutions and agencies, and related agencies that teach about, study, or serve individuals, families, and consumers.

Additional Information and Updates
The department publishes a Graduate Student Handbook providing more details about graduate program admission and requirements. This handbook is available online at: http://www.usu.edu/fchd

Family, Consumer, and Human Development Faculty
Professors
Ann M. Berghout Austin, alternative child care and family life, development from birth to 12 years of age
Raymond T. Coward, USU Provost; aging, elder care, rural health care
Thomas R. Lee, parenting, family life education, family resiliency, at-risk youth, marriage education
Shelley L. Knudsen Lindauer, alternative child care, early childhood education and curriculum, child care administration, socialization, development in infancy and early childhood
Jean M. Lown, consumer and family economics
Brent C. Miller, marriage and family relationships, adolescent pregnancy, adoption, research methods
Thoranna S. Nelson, marriage and family therapy, gender, family therapy training and supervision
Lori A. Roggman, infant social development, attachment, parenting stress, play across the life span, physical attractiveness, early intervention
Barbara R. Rowe, family resource management, extension

Utah State University 2006-2007 General Catalog 313
Adjunct Professors
Frank R. Ascione, prosocial development, moral development, developmental psychopathology
Sarah Rule, methods of early intervention, applications of technology to staff development, improvement of service delivery systems

Professors Emeritus
Glen O. Jenson, marriage education, in-law and grandparent role performance, family life education, work/family challenges
Jay D. Schvaneveldt, marriage and family studies, family life education, international families, theory and methods

Associate Professors
Scot M. Allgood, family therapy process, assessment, and marital studies
Randall M. Jones, adolescent development, identity, problem behavior, prevention, research methods
D. Kim Openshaw, marriage and family therapy, research and application, typological and intervention strategy advancement of youthful sexual offending, theoretical conceptualization of self-esteem, marital arts and mental health related syndromes
Kathleen W. Piercy, midlife, older adults and family caregiving, family policy, qualitative research methodology

Assistant Professors
Troy E. Beckert, life span human development, adolescence, research methods, parenting
Karen Biers, clothing and textiles, home-based entrepreneurship, extension
Lucy Delgadillo, family and consumer sciences, housing
Yoon G. Lee, family and consumer sciences, family finance
Sylvia Niehuis, premarital relationships, transition from courtship to marriage, marriage preparation, prediction of marital outcomes, longitudinal research methods

Adjunct Assistant Professor
Carol M. Baumann, child welfare, foster care, adoption

Adjunct Research Assistant Professor
Lisa K. Boyce, infancy and early childhood, language development, parent-child interaction

Principal Lecturer
Deborah B. Ascione, marriage, human development, child abuse and neglect

Lecturers
Jana Darrington, adult development and aging, relationship development, family policy
Susan L. Ericksen, undergraduate practicum coordinator, marriage and family therapy, professional development
Alena Johnson, family financial management, financial counseling, students and debt
Farol Ann G. Nelson, early childhood education, child development, parent education, experiences in the arts for early childhood
Kaelin Olsen, infant and toddler development, developmentally appropriate practice in early childhood education, preschool curriculum, child guidance

Course Descriptions
Family, Consumer, and Human Development (FCHD), pages 624-627.
Department of Geology

Department Head: John W. Shervais
Location: Geology 205
Phone: (435) 797-1273
FAX: (435) 797-1588
E-mail: geology@cc.usu.edu
WWW: http://www.usu.edu/geo/

Undergraduate Advisor:
Peter T. Kolesar, Geology 110, (435) 797-3282, peter.kolesar@usu.edu

Graduate Program Director:
W. David Liddell, Geology 212, (435) 797-1261, davel@cc.usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), and Doctor of Philosophy (PhD) in Geology; BS in Composite Teaching in Earth Science

Undergraduate emphases: BS in Geology—Hydrogeology-Engineering Geology and Geoarchaeology

Graduate Specializations: MS in Geology—Geochemistry, Hydrogeology, Igneous Petrology, Paleoeocology, Sedimentary Petrology, Structural Geology, and Surficial Geology

Undergraduate Programs

Objectives

Geology is the study of the planet Earth, the materials of which it is made, the processes that act on these materials, the products formed, and the history of the planet and its life forms since its origin. Geology considers the physical forces that act within and on the Earth, the chemistry of its constituent materials, and the biology of its past inhabitants as revealed by fossil evidence. Geologists integrate biology, chemistry, engineering, mathematics, and physics in the study of our natural surroundings. The knowledge thus obtained is used by geologists to explore for energy, mineral, and water resources; to identify geologically stable sites for major structures; and to provide foreknowledge of some of the dangers associated with the mobile forces of a dynamic Earth. Geologists provide fundamental information required by modern society to plan for cultural and industrial development, reduce geological hazards, identify potential resources, and assist in the design of waste-disposal facilities.

The Department of Geology prepares students for professional careers in the geosciences and provides the background required for advanced studies. The department offers three options of study to meet the growing demand for geoscientists with training in general geology (BS in geology without an emphasis), hydrogeology-engineering geology emphasis, or geoarchaeology emphasis. All options provide exposure to the sciences and an appreciation of our physical surroundings. The BS program in Geology meets the curriculum standards established by the American Institute of Professional Geologists.

The department also offers the Composite Teaching Major in Earth Science to prepare teachers of earth science at the secondary school level. Requirements for this major meet or exceed the standards of the National Science Teachers Association. Those students who major in earth science should be aware that state licensure is required of secondary education teachers. The Composite Teaching Major in Earth Science fulfills the requirements that provide eligibility for licensure. Licensure requirements vary from state to state, and students should investigate the requirements for the states in which they intend to seek employment. Advising for the Secondary Teacher Education Program (STEP) and State of Utah secondary education licensure is provided by the USU Department of Secondary Education.

The Department of Geology is housed within the Geology Building, which is located at the northeast corner of the Old Main Quad. The Geology Building provides spacious, well-equipped teaching labs, classrooms, and facilities, including a display and study area for students, computer access, document room, map room, preparation facilities, and research labs.

General College of Science Requirements

All general College of Science requirements are embedded within the various major requirements listed below. No extra coursework is required to fulfill the general college requirements.

Requirements

Departmental Admission Requirements

New freshmen admitted to USU in good standing qualify for admission to this major. Transfer students from other institutions need a 2.2 GPA, and students transferring from other USU majors need a 2.0 GPA for admission to this major in good standing. Students seeking admission to the Composite Teaching Major in Earth Science should be aware that a 2.75 minimum GPA is required for admission to the Secondary Teacher Education Program (STEP) in the Department of Secondary Education. Students in the Hydrogeology-Engineering Geology emphasis must meet all College of Engineering GPA standards appropriate for the courses to be taken having either the ENGR or CEE prefix.

Field Trips and Labs

Most Geology courses have required laboratories and/or field trips. Those enrolled are expected to dress properly for the conditions and observe safety precautions issued by the instructors. Most courses require modest lab fees.

Bachelor of Arts Degree

For a BA in Geology, the foreign-language requirement must be satisfied in addition to the Bachelor of Science in Geology requirements.

STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) .............................. 3
CS 1050 Problem Solving with Computers (F,Sp) (3 cr) or
CS 1400 Introduction to Computer Science—CS 1 (F,Sp,Su) (3 cr) .... 3

Students must also complete the Secondary Teacher Education Program (STEP) as follows:

Level 1
SCED 3100 Motivation and Classroom Management (F,Sp) .............. 3
SCED 3210 (CI/DSS) Educational and Multicultural Foundations (F,Sp) ................................................................. 3
SCED 3300 Clinical Experience I (F,Sp) ......................................... 1
SCED 3400 Teaching Science I (F,Sp) ............................................. 3
INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su) ........ 1

Level 2
SPED 4000 Education of Exceptional Individuals
(may be taken anytime) (F,Sp,Su) .................................................. 2
SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) .................. 3
SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) ...... 3
SCED 4300 Clinical Experience II (F,Sp) ......................................... 1
SCED 4400 Teaching Science II (F,Sp) ............................................ 3

Level 3 (12 credits)
SCED 5500 Student Teaching Seminar (F,Sp) ..................................... 2
SCED 5630 Student Teaching in Secondary Schools (F,Sp) ............... 10

Notes
This curriculum meets the standards of the Utah Core Curriculum—Science 7-12.
Department of Geology

Beginning in 2006, all USU teacher education candidates will be required to take and pass the content exam approved by the Utah State Office of Education in their major content area prior to student teaching.

A 2.75 minimum GPA is required for both admission to and graduation from the Secondary Teacher Education Program (STEP).

Geology Minor
GEO 1010 (BPS) Geology of National Parks: Introduction to Geology (F,Su) (3 cr)
GEO 1110 (BPS) The Dynamic Earth: Physical Geology (F,Sp) (4 cr) .................................3 or 4
GEO 3200 (DSC) The Earth Through Time (Sp) .................................................................4

Students must also select 10 elective credits from Geology courses at the 3500 level or above.

Students may need to complete prerequisite courses prior to enrolling in MATH 1210.
2GEO 2500 (a 1-credit course) is repeatable for credit, and must be taken twice for the student to earn the required 2 credits.
3PHYS 1020 may also be listed as USU 1360, ST: Energy.
4GEO 1110 is preferred.

Senior Thesis
Geology majors in good academic standing may elect to complete a senior thesis. This is an endeavor which normally spans a year in its preparation and presentation. Senior thesis credits may be applied toward the elective requirements in the General Geology option. For further information, students should contact their geology advisor or the geology department head.

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. This is a departmental recognition which is separate from the University Honors program. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school.

Geology majors with a minimum GPA of 3.30 may elect to complete the requirements for the Geology Honors degree option. For further information, students should contact their geology advisor or the geology department head.

Undergraduate Research Opportunities
The Department of Geology offers a range of opportunities for undergraduate students to participate in research activities under the guidance of a faculty mentor. All departmental undergraduate research activities are coordinated by the departmental undergraduate research coordinator, James Evans, (435) 797-1267, jpevans@cc.usu.edu. More information may be found on the Geology Department website: http://www.usu.edu/geo/

Learning Objectives
Upon graduation, geology majors are expected to be able to: (1) identify common minerals; (2) identify common fossils, as well as their ages and the conditions under which they lived; (3) describe sedimentary rocks and measure a stratigraphic section in the field; (4) create a surficial geologic map; (5) define and distinguish between, and determine the type of stress responsible for forming various structural features; (6) use a Brunton compass; (7) read topographic maps, as well as construct profiles from them; (8) read and make geologic maps, as well as construct cross sections from them; (9) know the ages of important geologic features and events in the Earth’s history, as well as explain how and why the Earth has changed over time; (10) know the Earth’s internal processes and the features produced by them; (11) collect and evaluate geologic data; (12) interpret and create graphs of quantitative data; and (13) communicate observations and interpretations, both orally and in writing.

Assessment
The Department of Geology relies on a variety of tools to periodically assess its undergraduate program, including: (1) student input in assessment; (2) value-added assessment; (3) college-level assessment; (4) alumni participation in assessment; and (5) faculty program assessment. For more information, please refer to the Geology Department assessment website at: http://www.usu.edu/geo/assessment/assessment.htm

Additional Information
For more information about bachelor’s degree requirements for Geology programs, see the Geology Major Requirement Sheet, available from the department, or online at: http://www.usu.edu/ats/majorsheets/

Graduate Programs
Admission Requirements
See general admission requirements on pages 99-100. In addition, applicants must have acceptable GRE scores and an acceptable GPA. For the Master of Science program, minimum scores of 40th percentile on the Verbal and Quantitative sections, a combined minimum of 1,000, and a GPA of 3.0 are required. For the PhD program, minimum scores of 50th percentile on the Verbal and Quantitative sections, a combined minimum of 1,200, and a GPA of 3.4 are required. For both programs, a member of the Geology faculty must agree to serve as the major professor for the applicant prior to acceptance.

Applications will be considered throughout the year, but program entry in fall semester is preferred. Students who wish to be considered for assistantships or other financial aid must have complete applications on file no later than February 15 for entry into the program the following fall semester.

Prerequisites for Matriculation
Completion of a BS or BA in geology, biology, physics, chemistry, or engineering is required for matriculated status. Suggested prerequisite courses include: CHEM 1210, 1215, 1220, 1225; PHYS 2210, 2220; MATH 1210; STAT 3000; and CS 1050 or CS 1400 or CEE 5190 or AWER 4930. Deficiencies in geology are determined based on current
Degree Programs

Master of Science Degree
The department offers advanced study and research opportunities leading to the MS degree in Geology. Although many research specialties require advanced courses selected primarily from Geology offerings, additional courses may be selected from other departments on campus, such as Biology; Civil and Environmental Engineering; Environment and Society; Mathematics and Statistics; Plants, Soils, and Biometeorology; Watershed Sciences; and Wildland Resources.

Doctor of Philosophy Degree
The Doctor of Philosophy degree in Geology requires original research in a specific area of geology, demonstration of broad knowledge in the field of geology, and demonstration of depth of knowledge in at least two areas of geology. The successful candidate must demonstrate a breadth of understanding in geology, as well as a depth of understanding in his or her chosen area(s) of emphasis. Potential students must show an ability to do creative research. This research should be carried out during a significant period of time (i.e., during at least one year or three semesters in residence). Thus, each successful PhD candidate will produce a significant piece of original research, presented in a written dissertation and defended in an oral examination. This work should be of such scope and quality that more than one journal or conference article can be derived from it.

Research Areas
Fields of graduate research include the following: geophysics, hydrogeology, igneous petrology, paleoecology (including invertebrate paleontology), sedimentology (including petroleum, basin analysis, sedimentation, stratigraphy, and petroleum geology), process geomorphology, Quaternary geology, structural geology, and regional tectonics.

Degree Requirements

Master of Science Degree
Only the Plan A thesis option is allowed for the MS degree in Geology. The recommended distribution is 20 credits of coursework and 10 credits of thesis to obtain the required 30 credits for the MS degree. A minimum of five 6000-level geology courses (other than GEO 6800) is recommended for the degree program. Only two grades of less than B (C to B-) will be accepted as part of the required degree program as listed on the “Program of Study for Master's Degree.” A 3.0 grade point average must be obtained in required coursework as listed on the Program of Study. Thesis credits will be graded P-F only (i.e., no letter grade will be given). Geology graduate students using department or University facilities and/or under geology faculty supervision must register for a minimum of 3 credits every semester, up to and including the semester in which the thesis is cleared by the School of Graduate Studies. Registration may not be required during the summer.

Doctor of Philosophy Degree
There are two program tracks for this degree: academic and professional. The academic track is designed to prepare graduates for a career in academia or other teaching-related settings. It includes both coursework in education and classroom teaching experience under the supervision of a faculty teaching mentor. The professional track is designed to prepare graduates for work in professional careers with the petroleum industry, with other extractive industries, or in environmental and hydrologic consulting. It includes coursework in statistics, information systems, remote sensing, and GIS. Completion of a professional internship is encouraged.

Students completing a PhD in Geology must fulfill the following requirements:

1. Complete at least 90 credits of graduate coursework (including at least 21 credits of GEO 7970, Dissertation Research) beyond a BS degree or at least 60 credits (including at least 15 credits of GEO 7970, Dissertation Research) beyond an MS degree, with a minimum class grade of B and a minimum cumulative GPA of 3.3.

2. If an MS degree is completed first, then no more than 12 credits of the 60 credits required for the PhD degree may be taken in coursework numbered below the 6000 level. If an MS degree is not completed first, then no more than 21 credits of the 90 credits required for the PhD degree may be taken in coursework numbered below the 6000 level.

3. Complete at least 30 credits of advanced coursework (6000 level and above) beyond the BS degree or 21 credits of advanced coursework beyond the MS degree, including at least 15 credits of 7000-level geology coursework, and excluding GEO 6900, 7970, and 7990.

4. Complete 3 credits of GEO 7800 (Graduate Seminar Series).

5. Academic Track: Complete 9-12 credits of department-approved education or instructional technology courses, and successfully teach one geology course under the supervision of a faculty mentor. ELED/SCED 6190 and GEO 6990 (teaching internship) are required.

Professional Track: Complete 9-12 credits of department-approved courses in statistics, remote sensing, and/or geographic information systems. Completion of a professional internship program is encouraged. Approved courses include AWER 4930, 6790, AWER/BIE/BMET 6250, FRWS 6740, 6750, ENVS 6650.

6. Pass a written comprehensive examination showing depth and breadth of knowledge in geology and in the student’s area(s) of emphasis. The student may be required to take additional classes to satisfy any deficiencies.

7. Successfully complete a written dissertation research proposal, present that proposal orally to the department, and defend it during an oral examination. The oral examination will include questions of a deep and probing nature, and may range beyond the dissertation proposal into areas unrelated to the student’s specialization.

8. Complete at least 15 credits in GEO 7970 (Dissertation Research) if admitted with a prior master’s degree, or 21 credits in GEO 7970 (Dissertation Research) without an earned master’s degree.

9. Successfully complete and defend a dissertation. The dissertation will be a written document and may consist of several papers submitted or accepted for publication. The defense will be oral, including a presentation of the work and successful defense of the work to the faculty.
Research

There are six broad areas of research emphasis for graduate students and faculty within the department: (1) geomorphology, (2) geophysics, (3) hydrology, (4) petrology, (5) sedimentology, and (6) structural geology and regional tectonics. Summaries of these activities follow.

**Geomorphology** research has included the study of climate, tectonic, and anthropogenic controls on landscape change, erosion, and sedimentation. This includes studies on hillslope processes, landscape evolution of the Colorado Plateau and Grand Canyon, the downstream effect of dams, and river restoration.

**Geophysics** examines the earth through quantitative methods, such as seismology, magnetics, GPS, geodesy, and gravity. Current geophysics research in the Department of Geology examines rates and magnitudes of crustal deformation through GPS techniques.

Research activity in **hydrogeology** has included wellhead protection in confined to semiconfined aquifers, the relationships between stream losses and water table depths, and the identification and geochemical characterization of groundwater recharge to surface streams.

Research in **petrology** focuses on the origin and evolution of magmatic systems, oceanic lithosphere, collisional orogens, and convergent margin systems. These efforts use field relations, phase chemistry, and whole rock geochemistry to decipher these systems, as well as determine their relationship to the tectonic and geochemical evolution of the Earth.

Research in **sedimentology** has included sedimentation and development of coral reefs and associated carbonate environments during Pleistocene and Holocene times, sequence stratigraphy of Paleozoic carbonate and detrital systems, study of mixed carbonate-siliciclastic deposition in Proterozoic and Paleozoic time, and Proterozoic basin analysis, isotope geochemistry, and paleobiology. Research activities are dominantly field-oriented, with studies ongoing in the western United States, Mexico, and the Caribbean.

Research in **structural geology** and **regional tectonics** has included the examination of the mechanical and chemical evolution of fault zones; the structural and tectonic development of extensional structures in the Great Basin; the development of fold-and-thrust structures in Idaho, Montana, Wyoming, and Utah; and the characterization of fluid-flow properties in fractured crystalline rocks.

Geology faculty members commonly interact with the faculty and staff of the Utah Water Research Laboratory, the Department of Watershed Sciences, the Department of Plants, Soils, and Biometeorology, and the Department of Civil and Environmental Engineering.

Financial Assistance

Departmental financial support for incoming graduate students consists primarily of graduate teaching assistantships, which are awarded on a competitive basis. There is often other financial support available, such as research assistantships, resulting from grants or other external funding. Students requesting financial support should apply directly to the department no later than February 15. Admission to the MS or PhD program does not guarantee financial assistance.

Additional Information

Additional information on the research activities of faculty and graduate students may be obtained directly from the Department of Geology's website at [http://www.usu.edu/geo/](http://www.usu.edu/geo/)

Geology Faculty

**Professors**

- James P. Evans, structural geology, structural petrology
- W. David Liddell, marine ecology, paleoecology, sedimentology
- John W. Shervais, igneous petrology, geochemistry, tectonics

**Adjunct Professor**

- David G. Tarboton, water resources and hydrology

**Professor Emeritus**

- Robert Q. Oaks, Jr., sedimentary petrology, stratigraphy

**Associate Professors**

- Donald W. Fiesinger, igneous petrology, Dean of College of Science
- Susanne U. Janecke, tectonics, structural geology
- Peter T. Kolesar, carbonate petrology, geochemistry
- Thomas E. Lachmar, hydrogeology
- Joel L. Pederson, process geomorphology, Quaternary geology

**Adjunct Associate Professors**

- Janis L. Boettinger, soil mineralogy
- John C. Schmidt, fluvial geomorphology

**Assistant Professors**

- Carol M. Dehler, sedimentation, geochemical cycles
- Anthony R. Lowry, geophysics

**Adjunct Assistant Professor**

- David G. Chandler, surface hydrology

**Lecturer**

- Susan K. Morgan, science education, carbonate petrology

Course Descriptions

Geology (GEO), pages 633-636.
Recreational and Intramural Activities
The intramural program is planned and conducted to meet the needs of all students regardless of skill or ability. The major objectives are to offer a wide variety of sports experiences, to encourage lifetime sports participation, to develop habits of fair play, and to provide leadership experiences. The intramural concept not only embraces the traditional highly-organized program with teams, leagues, and tournaments, but also voluntary free play activities where opportunities are provided for physical recreation for all segments of the University community.

Undergraduate Research Opportunities
Undergraduate students interested in health, physical education and recreation research are encouraged to assist faculty members with grant writing, data collection, data analysis, and report writing. Additionally, students can assist faculty members with submissions of scholarly presentations and articles, as needed.

Departmental Admission
Requirements
Health Education Specialist Major and Minor
New freshmen, transfer students, and students from other USU majors who have at least a 2.75 total GPA qualify to enter the Health Education Specialist major. Students must formally apply to the School Health minor. Pre-minor coursework must be completed before application to the school health minor.

Pre-minor coursework for the School Health minor includes:
- BIOL 2250 Human Anatomy (Sp,Su) (4 cr) or
- BIOL 2420 Human Physiology (F,Sp,Su) (4 cr) ..................................................4
- ENGL 1010 (CL1) Introduction to Writing: Academic Prose (F,Sp,Su) .3
- HEP 2500 Health and Wellness (F,Sp,Su) ............................................................2
- MATH 1050 (QL) College Algebra (F,Sp,Su) (4 cr) or
- STAT 1040 (QL) Introduction to Statistics (F,Sp,Su) (or higher) (3 cr) .................................................................3 or 4
- NFS 1020 (BLS) Science and Application of Human Nutrition (F,Sp,Su) ..........................3

For application materials and deadlines, contact the HPER Department Main Office (PE 122).

Physical Education Major and Minor
New freshmen, transfer students, and other USU majors who have at least a 2.75 total GPA qualify to enter the Physical Education major. A 2.75 total GPA is also required for the Physical Education Coaching minor.

Parks and Recreation Major and Minor
New freshmen, transfer students, and students from other USU majors who have at least a 2.5 total GPA qualify to enter the Parks and Recreation major or minor.

Course Requirements
Health Education Specialist Major
The HPER Department offers a program of study leading to a Bachelor of Science degree in Health Education. The program offers two emphasis areas. The community health emphasis prepares students to work in state and local health departments, clinical settings, nonprofit health organizations, wellness centers, and private industry. Students in the school health emphasis earn a teaching license upon graduation and will primarily teach health courses in middle and high schools. All Health Education Specialist majors will be well-prepared to sit for the nationally recognized Certified Health Education Specialist exam.

A. Core Requirements (30 credits)
The following courses are required for all students in both the School Health Emphasis and the Community Health Emphasis. A grade of C- or higher is required in all HEP courses.
## Department of Health, Physical Education and Recreation

In addition, students must complete requirements for either the Community Health Emphasis or the School Health Emphasis, and must achieve a C- or better grade in all HEP courses. A 2.75 total GPA is required for graduation.

### Community Health Emphasis (72 credits)

The Community Health emphasis offers a program of study leading to a Bachelor of Science degree as a Health Education Specialist. The emphasis requires a total of 72 credits. Students must complete the Health Education Specialist 30-credit core and the Community Health Education 36-credit core, as well as 6 credits selected from the list of elective courses.

#### A. Required Professional Core (36 credits)

#### B. Elective Courses (select 6 credits)

Students must complete 6 credits of elective courses, taking at least one course from two of the following three areas:

- **Human Nature**
  - ANTH 3110 North American Indian Cultures (F)                                      | 3 |
  - ANTH 4130 (DSS) Medical Anthropology: Matter, Culture, Spirit, and Health (Sp)  | 3 |
- **FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp).**                   | 3 |
- **FCHD 3110 (BSS) Human Sexuality (F,Sp).**                                        | 3 |
- **FCHD 3500 (BSS) Adolescence (F,Sp).**                                             | 3 |
- **PSY 1101 (BSS) General Psychology (F,Sp,Su).**                                   | 3 |
- **PSY 1100 (BSS) Developmental Psychology: Infancy and Childhood (F,Sp).**        | 3 |
- **PSY 1210 (BSS) Psychology of Human Adjustment (F,Sp).**                          | 3 |
- **PSY 4240 (DSS) Multicultural Psychology (F).**                                   | 3 |
- **SOC 2370 Sociology of Gender (F).**                                              | 3 |
- **SOC 3010 Race, Class, and Gender (F).**                                          | 3 |
- **SOC 3330 Medical Sociology (F).**                                                | 3 |
- **SW 2100 (BSS) Human Behavior in the Social Environment (Sp).**                  | 3 |

School Health Emphasis (74 credits)
(only for students desiring teacher licensure)

The School Health emphasis offers a program of study leading to a
Bachelor of Science degree as a Health Education Specialist, and is
an approved teaching major through the Department of Secondary
Education. It is also necessary for students to complete an approved
teaching minor (credits will vary). Students must complete the Health
Education Specialist 30-credit core, the School Health Education 9-
credit core, and the Secondary Education 35-credit core.

Note: Students must be formally accepted into the School Health
Emphasis before enrolling for School Health Core Courses.

A. Required School Health Core (9 credits)
FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) . 3
HEP 3100 School Health Programs (F) ............................................ 3
HEP 4500* Sexuality Education within the Schools (Sp) ..................... 3

B. Secondary Teacher Education Program (STEP)
(35 credits)
Level 1 (15-week courses)
INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su) .... 1
SCED 3100 Motivation and Classroom Management (F,Sp) ............ 3
SCED 3210 (CDSS) Educational and Multicultural Foundations
(F,Sp) ........................................................................................................ 3
HEP 3300* Clinical Experience I (or minor Clinical Experience I)
(F,Sp) ........................................................................................................ 1
HEP 4400* Creative Methods in Teaching Health Education
(F,Sp) (3 cr) or
Minor Special Methods Course (3 cr) .................................................. 3

Level 2 (15-week courses)
SPED 4000 Education of Exceptional Individuals
(may be taken anytime) (F,Sp,Su) .................................................... 2
SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) ............. 3
SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) .... 3
HEP 4300* Clinical Experience II (or minor Clinical Experience II)
(F,Sp) ........................................................................................................ 1
HEP 4400* Creative Methods in Teaching Health Education
(F,Sp) (3 cr) or
Minor Special Methods Course (3 cr) .................................................. 3

Level 3 (includes 13 weeks of student teaching and 2 weeks of
Student Teaching Seminar)
HEP 5500* Student Teaching Seminar (2 weeks) (F,Sp) ............... 2
HEP 5630* Student Teaching (13 weeks) (F,Sp) .............................. 10

Suggested Four-year Course of Study for Health
Education Specialist Major, School Health Emphasis

Level II courses ............................................................................. 12

Spring Semester (12 credits)
Level III courses ........................................................................... 12

School Health Minor (33 credits)
Note: This is an approved teaching minor through the Department of
Secondary Education. Students must be formally accepted into the School Health minor before enrolling for the School Health Education
Core Courses. Students completing this minor must have a teaching
major. Applications for the minor are available from the HPER
Department. Prior to admission to the minor, the following courses
must be completed: ENGL 1010, BIOL 2320 or 2420, HEP 2500,
MATH 1050 or STAT 1040 (or higher), and NFS 1020. A grade of C- or
higher is required in all HEP courses.

FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) . 3
HEP 2000 First Aid and Emergency Care (F,Sp,Su) ......................... 2
HEP 2500 Health and Wellness (F,Sp,Su) ....................................... 2

Utah State University 2006-2007 General Catalog 323
Department of Health, Physical Education and Recreation

HEP 3000 Drugs and Human Behavior (F,Su) .............................................. 3
HEP 3100 School Health Programs (F) .................................................... 3
HEP 3200 Consumer Health (F,Su) .......................................................... 3
HEP 3300 Clinical Experience I (F,Sp) ...................................................... 1
HEP 4300 Clinical Experience II (F,Sp) ...................................................... 1
HEP 4400 Creative Methods in Teaching Health Education (F,Sp) .............. 3
HEP 4500 Sexuality Education within the Schools (Sp) ................................ 3
HEP 5000 (CI) Race, Culture, Class, and Gender Issues in Health (Sp) ........ 3

B. Electives (9 credits)
Select at least 9 credits from the following courses:
- FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) .... 3
- PRP 1500 Social Recreation Leadership (Sp) ........................................... 3
- HEP 2000 First Aid and Emergency Care (F,Sp,Su) .............................. 2
- HEP 3400 Stress Management (F,Sp) ...................................................... 3
- LAEP 1030 (BCA) Introduction to Landscape Architecture (F,Sp,Su) .... 3
- SOC 3010 Race, Class, and Gender (F,Sp) .............................................. 3
- ENVS 4130 Recreation Policy and Planning (Sp) ..................................... 3
- ENVS 4500 (CI) Wildland Recreation Behavior (F) .............................. 3
- ENVS 4600 Natural Resource Interpretation (F) .................................... 3
- Activity Courses in Physical Education (numbered PE 1000-2000) ......... 1-3

C. Additional Requirements
In addition to the above requirements for the major, students are required to select a minor from an approved area outside the major.

Suggested Four-year Course of Study for Parks and Recreation Major

Freshman Year (29-30 credits)
Fall Semester (15-16 credits)
- PRP 1000 Introduction to Parks and Recreation ....................................
- MATH 1030 (QL) Quantitative Reasoning (3 cr) or
- STAT 1040 (QL) Introduction to Statistics (3 cr) or
- MATH 1050 (QL) College Algebra (4 cr) .............................................. 3 or 4

Parks and Recreation elective course ..................................................... 3
- Parks and Recreation elective course(s) .............................................. 3
- Breadth American Institutions (BAI) course ........................................ 3
- Breadth Humanities (BUH) course ..................................................... 3

Spring Semester (14 credits)
- PRP 2100 Leisure and Aging ......................................................... 2
- Parks and Recreation elective course(s) .............................................. 3
- Breadth Creative Arts (BCA) course ................................................... 3
- ENGL 1010 (CL1) Introduction to Writing: Academic Prose ................ 3

Sophomore Year (30 credits)
Fall Semester (15 credits)
- PRP 2500 Outdoor Recreation Management ....................................... 3
- PRP 3900 Introduction of Therapeutic Recreation for Diverse Populations (F) ................................................................. 3
- INST 5400 Computer Applications for Instruction and Training .......... 3
- Breadth Physical Sciences (BSS) course .......................................... 3
- Minor course(s) .............................................................................. 3

Spring Semester (15 credits)
- PRP 3000 Recreation Programming .................................................. 3
- PRP 3750 Commercial Recreation and Tourism .................................. 3
- ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................................................. 3
- Minor course(s) .............................................................................. 3
- Breadth Social Sciences (BSS) course .......................................... 3

Parks and Recreation Major (51 credits)
The HPER Department offers a program of study leading to a Bachelor of Science Degree in Parks and Recreation. This program prepares students to become professionals in the areas of public, private, commercial, therapeutic, voluntary, and special service settings of parks and recreation. Graduates of the program will be capable of directing, planning, designing, managing, and administering parks and recreation programs. A 2.5 total GPA is required for graduation.

A. Parks and Recreation Core Courses (42 credits)
- PRP 1000 Introduction to Parks and Recreation (F,Sp) ......................... 3
- PRP 2100 Leisure and Aging ............................................................. 2
- PRP 2500 Outdoor Recreation Management (F) ................................. 3
- PRP 3900 Recreation Programming (Sp) ............................................. 3
- PRP 3500 (CI) Community Recreation Administration (F) ................. 3
- PRP 3750 Commercial Recreation and Tourism (Sp) ........................... 3
- PRP 3900 Introduction of Therapeutic Recreation for Diverse Populations (F) ................................................................. 3
- PRP 4400 Legal Aspects of Recreation and Leisure (Sp) ..................... 3
- PRP 4400 Recreation Facility Design and Management (F) ................. 3
- PRP 4700 Internship Seminar (Sp) ..................................................... 1
- PRP 4700 Recreation Internship (F,Sp,Su) .......................................... 6

- INST 5400 Computer Applications for Instruction and Training .......... 3
- ENVS 3300 Fundamentals of Recreation Resources Management (F) ................................................................. 3

3Prerequisites: Junior standing and FCHD 1500.
4Prerequisites: HEP 3600; and STAT 1040 or MATH 1030 (or higher). HEP 3100 or 4100 is recommended prior to taking this course. Senior standing is also recommended.
5Prerequisites: Admission to teacher education program and completion of level 1.
6Prerequisites: Formal acceptance into the School Health emphasis or School Health minor.
7Prerequisites: Consent of instructor for students not in the School Health emphasis or School Health minor. Students in the School Health emphasis must receive formal acceptance into the emphasis prior to taking HEP 4400. During the level in which HEP 4400 is not taken (either Level 1 or Level 2), students should complete a minor special methods course.
8Course approved for University Studies credit.
9Prerequisites: HEP 2500.
10Prerequisites: HEP 3600, 4100, and consent of instructor.
11Prerequisites: Junior standing (or higher).
12Prerequisites: STAT 1040 or MATH 1030 (or higher).
13It is recommended that BIOL 1110 or 3300; or BIOL 2320 and 2420 be completed prior to taking PUBH 4030. It is recommended that a course in statistics, such as STAT 3000 or PSY 2800, and PUBH 4030 be completed prior to taking PUBH 4040. It is recommended that courses in statistics, such as STAT 3000 or PSY 2800, be completed prior to taking PUBH 4030.
14Prerequisites: FCHD 1500, 2400.
15Prerequisites: SW 1010.
16Prerequisites: SW 1010, 2100, 2400.
17Prerequisites: Ability to keyboard at 25 wpm minimum.
18Prerequisites: ENGL 1010 or equivalent, English Proficiency Test, typing test, and permission of Department of Journalism and Communication.
19Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010.
20Prerequisites: Consent of instructor for students not in the School Health emphasis or the School Health minor.
21Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010.
22Prerequisites: Consent of instructor for students not in the School Health emphasis or the School Health minor.
23Prerequisites: Consent of instructor for students not in the School Health emphasis or the School Health minor.
24Prerequisites: Consent of instructor for students not in the School Health emphasis or the School Health minor.
25Prerequisites: Consent of instructor for students not in the School Health emphasis or the School Health minor.
26Prerequisites: Consent of instructor for students not in the School Health emphasis or the School Health minor.
27Prerequisites: Consent of instructor for students not in the School Health emphasis or the School Health minor.
28Prerequisites: Consent of instructor for students not in the School Health emphasis or the School Health minor.
29,30Prerequisites: Consent of instructor for students not in the School Health emphasis or the School Health minor.
31Prerequisites: Consent of instructor for students not in the School Health emphasis or the School Health minor.
32Prerequisites: Consent of instructor for students not in the School Health emphasis or the School Health minor.
33Prerequisites: Consent of instructor for students not in the School Health emphasis or the School Health minor.

PEP 3100 Athletic Injuries (F,Sp) ......................................................... 3
PEP 3250 Anatomical Kinesiology (Sp) ............................................. 3
PEP 4100QI, 72 Exercise Physiology and Principles of Conditioning (F,Sp) ................................................................. 3
PEP 4200 (QI)QI, 71 Biomechanics (F,Sp) ......................................... 4
PEP 4250 Advanced Cooperative Work Experience (F,Sp,Su) ......... 3
PEP 4400 (QI)* Evaluation in Physical Education (F,Sp,Su) ............ 3
PEP 5100 Fitness Assessment and Exercise Programs (F) ............... 4

C. Professional Development (31 credits)
Biology (4 credits minimum, including lab)
BIOL 1010 (BLS) Biology and the Citizen (F,Sp,Su) ......................... 3
BIOL 1020 Biological Discovery: A Lab Course (F,Sp,Su) ............... 1
BIOL 1610 Biology I (F) .................................................................... 4
BIOL 1620 (BLS)QI Biology II (Sp) ...................................................... 4
BIOL 3060 (QI)*QI Principles of Genetics (F,Sp,Su) ......................... 4
BIOL 3300QI General Microbiology (F,Sp) ....................................... 4

Chemistry (9 credits minimum)
CHEM 1110 (BPS)QI General Chemistry I (F,Sp,Su) ....................... 4
CHEM 1115QI General Chemistry Laboratory (Sp) .......................... 1
CHEM 1120 (BPS)QI General Chemistry II (Sp) ................................. 4

Or
CHEM 1210QI Principles of Chemistry I (F,Sp,Su) ......................... 4
CHEM 1215QI Chemistry Principles Laboratory I (F,Sp,Su) ............ 1
CHEM 1220 (BPS)QI Principles of Chemistry II (F,Sp,Su) ............ 4
CHEM 1225QI Chemistry Principles Laboratory II (F,Sp,Su) ......... 1

Mathematics and Statistics (6 credits minimum)
Choose one course from the following:
MATH 1100 (QL)QI Calculus Techniques ........................................... 3
MATH 1200 (QL)QI Calculus I (F,Sp,Su) ............................................... 4

Choose one course from the following:
STAT 2000 (QI)QI Statistical Methods (F,Sp,Su) .............................. 3
STAT 2300 (QL)QI Business Statistics (F,Sp,Su) .............................. 4
STAT 3000 (QI)QI Statistics for Scientists (F,Sp,Su) ....................... 3

Physics (8 credits minimum)
PHYS 2110QI The Physics of Living Systems I .................................. 4
PHYS 2120 (BPS)QI The Physics of Living Systems II ..................... 4

Psychology (3 credits minimum)
PSY 1210QI Psychology of Human Adjustment (F,Sp,Su) ............. 3
**Department of Health, Physical Education and Recreation**

**PSY 2100** Developmental Psychology: Adolescence (Sp) .............. 3  
**PSY 3210** (DSS) Abnormal Psychology, (F,Sp) .......................... 3

---

5. Math ACT score of at least 23, MATH 1010, or satisfactory score on placement exam is a prerequisite for this course.  
6. BIOL 2320, 2420, MATH 1050 are prerequisites for this course.  
7. BIOL 1610; MATH 1050; and CHEM 1100 or 1220 are prerequisites for this course.  
8. BIOL 1610 (with a grade of C- or better); and CHEM 1120 or 2300 or 2310 (or may be taken concurrently) are prerequisites for this course.  
9. MATH 1050, or Math ACT score of at least 25, is a prerequisite for this course.  
10. CHEM 1210 must be taken previously or concurrently.  
11. CHEM 1215 is a prerequisite for this course.  
12. MATH 1050, or a Math ACT score of at least 25, is a prerequisite for MATH 1100; MATH 1050 and 1060, or an AP Calculus score of at least 3 on the AB test or a Math ACT score of at least 27, are prerequisites for MATH 1210.  
13. MATH 1050 is a prerequisite for this course.  
14. MATH 1100 or 1210 is a prerequisite for this course.  
15. MATH 1100 or 1210, and PHYS 2110 are prerequisites for this course.  
16. PSY 1010 is a prerequisite for this course.  
17. This course is approved for Quantitative Intensive (QI) University Studies credit.  
18. Admission to the Physical Education Major is required prior to enrolling in this course.  
19. MATH ACT score of at least 23, or MATH 1050 or higher, is a prerequisite for this course.  
20. CHEM 1100 must be taken previously or concurrently.  
21. CHEM 1110 is a prerequisite for this course.  

**Suggested Four-year Course of Study for Physical Education Major, Pre-Physical Therapy Emphasis**

**Freshman Year (27 credits)**

- **Fall Semester (13 credits)**
  - PEP 2020 Introduction to Physical Therapy ........................................... 2  
  - BIOL 1010 (BLS) Biology and the Citizen .............................................. 3  
  - BIOL 1020 Biological Discovery: A Lab Course .................................... 1  
  - MATH 1050 (QL) College Algebra .......................................................... 4  
  - PSY 1010 (BSS) General Psychology ..................................................... 3

- **Spring Semester (14 credits)**
  - PEP 3100 Athletic Injuries ..................................................................... 3  
  - ENGL 1010 (CL1) Introduction to Writing: Academic Prose .................. 3  
  - MATH 1060 Trigonometry .................................................................... 2  
  - USU 1300 (BAI) U.S. Institutions Breadth Humanities (BHU) course ...... 5

**Sophomore Year (29 credits)**

- **Fall Semester (14-15 credits)**
  - PE 3000 Dynamic Fitness ...................................................................... 3  
  - BIOL 2420 Human Physiology .............................................................. 4  
  - MATH 1100 (QL) Calculus Techniques (3 cr) or  
  - MATH 1210 (QL) Calculus I (4 cr) ......................................................... 3 or 4  
  - Breadth Creative Arts (BCA) course ...................................................... 3  
  - Elective course ....................................................................................... 1

- **Spring Semester (15 credits)**
  - BIOL 2320 Human Anatomy .................................................................. 4  
  - CHEM 1100 (BPS) General Chemistry I (4 cr) or  
  - CHEM 1210 Principles of Chemistry I (4 cr) ........................................... 4  
  - CHEM 1115 General Chemistry Laboratory I (1 cr) or  
  - CHEM 1215 Chemical Principles Laboratory I (1 cr)  
    1. ENGL 2010 (CL2) Intermediate Writing: Research Writing  
    2. English in a Persuasive Mode ............................................................. 1  
  - Communications Intensive (CI) course .................................................. 3

**Junior Year (32-33 credits)**

- **Fall Semester (16 credits)**
  - PEP 4250 Advanced Cooperative Work Experience ......................... 4  
  - PEP 3250 Anatomical Kinesiology ......................................................... 3  
  - CHEM 1120 (BPS) General Chemistry II (4 cr) or  
  - CHEM 1220 (BPS) Principles of Chemistry II (4 cr)  
  - CHEM 1115 General Chemistry Laboratory I (1 cr) or

- **CHEM 1225 Chemical Principles Laboratory II (1 cr) ......................... 1  
- **PHYS 2110 The Physics of Living Systems II ..................................... 4**

**Spring Semester (16-17 credits)**

- **PHYS 2120 (BPS) The Physics of Living Systems II ............................. 4**  
- **PSY 3210 (DSS) Abnormal Psychology .............................................. 3**  
- **STAT 2000 (QI) Statistical Methods (3 cr) or**  
- **STAT 2300 (QL) Business Statistics (4 cr) or**  
- **STAT 3000 (QI) Statistics for Scientists (3 cr) ..................................... 3 or 4**  
- **Upper-division Communications Intensive (CI) course .......................... 3**  
- **Upper-division Depth Humanities and Creative Arts (DHA) course ...... 3**

**Senior Year (32 credits)**

- **Fall Semester (13 credits)**
  - PEP 4100 Exercise Physiology and Principles of Conditioning ........ 4  
  - PEP 4400 (QI) Evaluation in Physical Education ................................. 3  
  - Upper-division elective course(s) ......................................................... 3  
  - Elective course(s) .................................................................................. 3

- **Spring Semester (19 credits)**
  - PEP 4200 (QI) Biomechanics ............................................................ 4  
  - PEP 5100 Fitness Assessment and Exercise Programs ....................... 4  
  - Elective courses ................................................................................... 11

**Physical Education Major: Teaching Emphasis (K-12) (90 credits)**

Students also need to complete a teaching minor. A 2.75 total GPA is required for graduation.

**Note:** This is an approved teaching major through the Department of Secondary Education.

- **A. Prerequisites (17 credits)**
  - BIOL 2320 Human Anatomy (Sp,Su) .................................................. 4  
  - BIOL 2420 Human Physiology (F,Sp,Su) ............................................ 4  
  - MATH 1050 (QL) College Algebra (F,Sp,Su) ....................................... 4  
  - HEP 2000 First Aid and Emergency Care (F,Sp,Su) ............................. 2  
  - PE 3000 Dynamic Fitness (F,Sp,Su) .................................................... 3

- **B. Skill Development (5 credits)**
  - PEP 2100 Skills 1 (Swimming, Volleyball, Football) (F,Sp) ............... 1  
  - PEP 2200 Skills 2 (Noncompetitive Lifetime Activities) (F,Sp,Su) .... 1  
  - PEP 2300 Skills 3 (Softball, Basketball, Soccer) (F,Sp) ................. 1  
  - PEP 2400 Skills 4 (Tennis, Badminton, Track and Field) (F,Sp) ....... 1  
  - PEP 2500 Rhythms and Movement (F,Sp) ............................................ 1

- **C. Professional Development (11 credits)**
  - PEP 2000 Introduction and History of Physical Education (F,Sp) ....... 2  
  - PEP 3050 Physical Education in the Elementary School (F,Sp,Su) .... 3  
  - PEP 3100 Athletic Injuries (F,Sp) ........................................................... 3  
  - PEP 3200 (CI)**  
  - Motor Learning and Skill Analysis (F,Sp,Su) ............................................. 3

- **D. Professional Foundations (16 credits)**
  - PEP 4000 Mental Aspects of Sports Performance (F,Sp,Su) ............. 3  
  - PEP 4100 (QI)**  
  - Exercise Physiology and Principles of Conditioning (F,Sp) ............ 4  
  - PEP 4200 (QI)**  
  - Biomechanics (F,Sp) ......................................................................... 4  
  - PEP 4350 Administration of Physical Education (F,Sp) .................. 2  
  - PEP 4400 (QI)**  
  - Evaluation in Physical Education (F,Sp) ............................................ 3

- **E. Methods of Teaching (3 credits)**
  - PEP 3550 Strategies and Methods of Teaching Team, Individual,  
  - and Dual Sports and Fitness (F,Sp) ....................................................... 3

- **F. Methods of Coaching (3 credits)**
  - PEP 4500 (QI)**  
  - Methods of Coaching (F,Sp) ............................................................... 3
Department of Health, Physical Education and Recreation

G. Secondary Teacher Education Program (STEP) (35 credits)

Note: Acceptance into the STEP is required prior to enrolling in the courses listed below. Students must take a minor Special Methods Course and Clinical Experience, which may be completed during Level 1 or Level 2.

Level 1 (15-week courses)
INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su)..............1
SCED 3100 Motivation and Classroom Management (F,Sp)..................3
SCED 3210 (CI/DDS) Educational and Multicultural Foundations (F,Sp).................................................................3
Clinical Experience I (in minor)*3
Methods of Teaching (in minor)*6..........................................................3

Level 2 (15-week courses)
SPED 4000 Education of Exceptional Individuals (may be taken anytime) (F,Sp,Su)...............................................................2
SCED 4200 (CI) Reading, Writing, and Technology (F,Sp)......................3
SCED 4210 Cognition and Evaluation of Student Learning (F,Sp)..........3
PEP 4300HI Clinical Experience II (F,Sp).............................................1
PEP 4900 (CI)** Methods of Physical Education (F,Sp).......................3

Level 3 (includes 13 weeks of student teaching and 2 weeks of Student Teaching Seminar)
PEP 5500H Student Teaching Seminar (2 weeks) (F,Sp).....................2
PEP 5630H Student Teaching in Secondary Schools (13 weeks) (F,Sp)..........................10

Math ACT score of at least 23, MATH 1010, or satisfactory score on placement exam is a prerequisite for this course.
*BIOI 2320, 2420, MATH 1050 are prerequisites for this course.
*PEP 2000 (which may be taken concurrently) should be completed prior to taking this course.
*Clinical Experience I is taught under course number 3300 in various departments. Must be taken concurrently with Clinical Experience II in minor.
*Methods of Teaching courses are taught under various course numbers in various departments. Must be taken concurrently with Clinical Experience I in minor.
*Must be taken concurrently with PEP 4900.
*PEP 3500 should be taken prior to this course.
*This course is approved for Communications Intensive (CI) University Studies credit.
*Must be taken concurrently with PEP 5630.
*Must be taken concurrently with PEP 5500. Application for student teaching must be completed. Applications are available in EDUC 330.
*This course is approved for Quantitative Intensive (QI) University Studies credit.
*A admission to the Physical Education Major is required prior to enrolling in this course.

Suggested Four-year Course of Study for Physical Education Major, Teaching Emphasis

Freshman Year (30 credits)
Fall Semester (14 credits)
PEP 2000 Introduction and History of Physical Education..................2
PEP 2200 Skills 2 (Lifetime Activities)...............................................1
PEP 2300 Skills 3 (Softball, Basketball, Soccer).................................1
ENGL 1010 (CL1) Introduction to Writing: Academic Prose..............3

PEP 4400 (QI) Evaluation in Physical Education.................................3
Courses for teaching minor.........................................................6

Senior Year (32 credits)
Fall Semester (17 credits)
Depth Humanities and Creative Arts (DHA) course...........................3
Course(s) for teaching minor.........................................................3

Level I courses
INST 3500 Technology Tools for Secondary Teachers...............1
SCED 3100 Motivation and Classroom Management......................3
SCED 3210 (CI/DDS) Educational and Multicultural Foundations....3
Clinical Experience course (in teaching minor).................................1
Methods of Teaching course (in teaching minor).............................3

Spring Semester (15 credits)
Course(s) for teaching minor.........................................................3

Level II courses
SPED 4000 Education of Exceptional Individuals............................2
SCED 4200 (CI) Reading, Writing, and Technology........................3
SCED 4210 Cognition and Evaluation of Student Learning...............3
PEP 4300 Clinical Experience II.....................................................1
PEP 4900 (CI) Methods of Physical Education.................................3

Level III (12 credits)
Students must complete Level I and Level II field experiences prior to enrolling in PEP 5500 and 5630.
PEP 5500 Student Teaching Seminar.............................................2
PEP 5630 Student Teaching in Secondary Schools..........................10

Physical Education Coaching Minor
This minor requires 28 credits, plus 17 credits of prerequisites and the 35-credit Secondary Teacher Education Program (STEP).
Department of Health, Physical Education and Recreation

A. Required Prerequisites (17 credits)
- BIOL 2320 Human Anatomy (Sp,Su) .................................................. 4
- BIOL 2420 Human Physiology (F,Sp,Su) ........................................... 4
- MATH 1050 (QL)* College Algebra (F,Sp,Su) .................................... 4
- HEP 2000 First Aid and Emergency Care (F,Sp,Su) ......................... 2
- PE 3000 Dynamic Fitness (F,Sp,Su) .................................................. 3

B. Skill Development (select 3 credits)
- PEP 2100 Skills 1 (Swimming, Volleyball, Football) (F,Sp) ............... 1
- PEP 2200 Skills 2 (Noncompetitive Lifetime Activities) (F,Sp,Su) .... 1
- PEP 2300 Skills 3 (Softball, Basketball, Soccer) (F,Sp) .................... 1
- PEP 2400 Skills 4 (Tennis, Badminton, Track and Field) (F,Sp) ....... 1
- PEP 2500 Rhythms and Movement (F,Sp) ....................................... 1

C. Professional Foundation (18 credits)
- PEP 3100 Athletic Injuries (F,Sp) ..................................................... 3
- PEP 3200 (CI)* Motor Learning and Skill Analysis (F,Sp,Su) .......... 3
- PEP 4000 Mental Aspects of Sports Performance (F,Sp,Su) .......... 3
- PEP 4100 (CI)* Exercise Physiology and Principles of Cognitive (F,Sp) ................................................................. 4
- PEP 4350 Administration of Physical Education (F,Sp) ................ 2
- PEP 4400 (QL)* Evaluation in Physical Education (F,Sp) ............. 3

D. Methods of Teaching (3 credits)
- PEP 3550 Strategies and Methods of Teaching Team, Individual, and (F,Sp) ................................................................. 3

E. Methods of Coaching (4 credits)
- PEP 2050 Sport Rules and Regulations of the Utah High School 3
- PEP 4500* Methods of Coaching (F,Sp) ........................................... 3

F. Secondary Teacher Education Program (STEP) (35 credits)
- PEP 4900, Methods of Physical Education, and PEP 3300, Clinical 1
- Experience I, should be taken as part of the STEP.

Additional Information
Updated information concerning undergraduate courses and major or minor requirements can be obtained from the HPER Department, or check the departmental page at: http://www.coede.usu.edu/hper

Major requirement sheets, which provide detailed information about requirements for departmental majors, can be obtained from the department or accessed online at: http://www.usu.edu/ats/majorsheets/

Financial Support
The College of Education and Human Services distributes scholarship applications beginning in January of each academic year. For information on those scholarships awarded by the HPER Department, visit the departmental office in HPER 122.

Assessment

Health Education Specialist Major Assessment
The Health Education Specialist major curriculum is based on the National Commission of Health Education Credentialing (NCHEC) seven responsibility areas for entry-level health educators. As such, each course is evaluated on a yearly basis to determine if it is meeting student needs, based on NCHEC guidelines. Coursework prepares graduating students to successfully sit for the Certified Health Education Specialist exam. Additionally, exit surveys and interviews are given to students to better assess the curriculum and the learning needs of the students. To further assess curriculum needs, follow-up surveys are sent to students one year after they graduate.

Physical Education Major Assessment
The Physical Education major curriculum is based on the standards and benchmarks of the National Association for Sport and Physical Education (NASPE). Each course is matrixed against the standards to assure quality in curriculum content. A number of assessments are available for exiting students, including Praxis 2 and a number of certifications of the American College of Sports Medicine (ACSM). Exit surveys and interviews are conducted annually, as well as post-graduation surveys.

Parks and Recreation Major Assessment
The Parks and Recreation major curriculum is accredited by the National Recreation and Park Association (NRPA). To assure compliance with the national standards, the curriculum is evaluated annually. Students are eligible to sit for the National Certification Examination. Exit surveys and interviews are conducted yearly, as well as post-graduation surveys.

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Graduate Programs
Please refer to the general admission requirements on pages 99-100 of this catalog. In addition, the letters of recommendation must be written by professionals in health or physical education who know the applicant and his/her work well. Students with fewer than 12 credits of undergraduate health or physical education coursework must make up any deficiencies before being granted matriculated status. Basic competencies that have not been acquired through courses or experience may be obtained by completing prerequisite undergraduate courses without credit. Other nongraduate credit courses may be
Department of Health, Physical Education and Recreation

required by the admissions committee. Students with weak oral or written English skills will be required to take remedial work or complete undergraduate or intensive English classes.

Degree Programs

Master of Science
The MS is available for students who plan to teach, provide community leadership, or do further graduate or research study.

Master of Education
The MEd is designed for students desiring to improve teaching competencies.

Specializations
MS students may select an area of emphasis for research and study from the following specializations: Corporate Wellness, Exercise Science, and Health Education.

Course Requirements

Core Courses
MS candidates specializing in Corporate Wellness must complete the following courses:
EDUC 6570 Introduction to Educational and Psychological Research (F,Sp,Su) ................................................................. 3
HEP 6800 Seminar in Health Behavior (F) ........................................... 3
PEP 6290 Corporate Wellness Marketing (Sp) ......................................... 3
PEP 6420 Exercise in Health, Fitness, and Sport (Ar) ............................ 4
PEP 6450 Exercise in Health, Fitness, and Sport (Arr) .......................... 4
PEP 6500 Practicum in Corporate Wellness (F,Sp,Su) .......................... 1-10
PEP 6540 Wellness Programming (Sp) .............................................. 3
PEP 6680 Biomechanics and Engineering of Health, Industry, and Sport (Sp) ............................................................... 3
PEP 6810 Research Methods in Health Sciences (F) .......................... 3
PSY 6470 Health Psychology (F) ..................................................... 3

MS candidates specializing in Exercise Science must complete the following courses:
EDUC 6600 Measurement, Design, and Analysis I (F,Sp,Su) .............. 3
PEP 6420 Curriculum in Physical Education (F) ................................ 3
PEP 6430 Experimentation in Physical Education and Sport (F) ........ 3
PEP 6450 Fitness Assessment and Exercise Testing (Sp) ..................... 3
PEP 6600 Biomechanics and Engineering of Health, Industry, and Sport (Sp) ............................................................... 3
PEP 6810 Research Methods in Health Sciences (F) .......................... 3
PEP 6970 Thesis (F,Sp,Su) ............................................................... 1-9

Eleven credits must be selected from the following:
HEP 6100 Current Trends in Health Promotion (F) .............................. 3
HEP 6050 Psychological Aspects of Sports Performance (Arr) ........... 3
HEP 6070 Sport in Society (Sp) ......................................................... 3
HEP 6420 Curriculum in Physical Education (F) ................................ 3
HEP 6430 Experimentation in Physical Education and Sport (F) ........ 3
HEP 6450 Fitness Assessment and Exercise Testing (Sp) ..................... 3
HEP 6540 Wellness Programming (Sp) .............................................. 3
HEP 6830 Motor Learning (Sp) .......................................................... 3
or other committee-approved electives

MS candidates specializing in Health Education must complete the following courses:
EDUC 6570 Introduction to Educational and Psychological Research (F,Sp,Su) ................................................................. 3
EDUC 6600 Measurement, Design, and Analysis I (F,Sp,Su) .............. 3

HEP 6000 Evaluating Health-Promotion Programs (Sp) .................... 3
HEP 6100 Current Trends in Health Promotion (F) .............................. 3
HEP 6600 Field Work in Health Education (F,Sp,Su) .......................... 3
HEP 6800 Seminar in Health Behavior (F) ........................................... 3
HEP 6970 Thesis (F,Sp,Su) ............................................................... 1-9

Students must also complete 6 credits from the following:
FCHD 6020 Survey of Human Development Research (Sp) .............. 3
FCHD 6060 Human Development Theories (F) .................................. 3
HEP 6300 Stress Management (Arr) .................................................. 3
HEP 6700 Special Topics in Health (Arr) ......................................... 1-6
HEP 6900 Independent Study (F,Sp,Su) ............................................ 1-3
HEP 6950 Independent Research (F,Sp,Su) ....................................... 1-3
INST 5230 Instructional Graphic Production (F,Su) .......................... 3
INST 6350 Instructional Design Process (F) ...................................... 3
MHR 6370 Project Management ....................................................... 3
NFS 6200 Nutritional Epidemiology (F) ............................................ 2
NFS 6210 Advanced Public Health Nutrition (Sp) .............................. 3
PEP 6290 Corporate Wellness Marketing (Sp) .................................... 3
PEP 6400 Exercise in Health, Fitness, and Sport (Ar) ......................... 4
PEP 6540 Wellness Programming (Sp) .............................................. 3
PSY 6470 Health Psychology (F) ..................................................... 3
PSY 7700 Grant Writing (Sp) ........................................................... 3
PUBH 4030 Communicable Disease Control (F) .............................. 3
PUBH 4100 Fundamentals of Epidemiology (Sp) .............................. 3
PUBH 4310 Industrial Hygiene Recognition of Hazards (F) ................ 4
PUBH 4330 Industrial Hygiene Physical Hazards (Sp) ........................ 3
SOC 6460 Sociology of Health (F) ................................................... 3

Other courses may be selected on the basis of a student’s need and interests, subject to the approval of the student’s committee.

MEd candidates must complete the following courses:
EDUC 6410 Educational Foundations (F,Su) ..................................... 2
EDUC 6550 Research for Classroom Teachers (F,Sp,Su) ................. 3
EDUC 6710 Diversity in Education (Sp,Su) ....................................... 3
PEP 6050 Psychological Aspects of Sports Performance (Arr) .......... 3
PEP 6070 Sport in Society (Sp) ......................................................... 3
PEP 6400 Exercise in Health, Fitness, and Sport (Arr) ....................... 4
PEP 6420 Curriculum in Physical Education (F) .............................. 3
PEP 6430 History and Philosophy of Physical Education and Sport (F) ............................................................... 3
PEP 6690 Analysis of Teaching Physical Education (Arr) ................. 3
PEP 6800 Biomechanics and Engineering of Health, Industry, and Sport (Sp) ............................................................... 3
PEP 6830 Motor Learning (Sp) .......................................................... 3
PEP 6960 Master’s Project (F,Sp,Su) ................................................ 3

Research
Research areas include health promotion, health education, exercise science, corporate wellness, sport psychology, sport in society, biomechanics, and pedagogy.

Financial Assistance
Teaching and research assistantships are available through the HPER Department and are awarded on a competitive basis. Application for the assistantships must be made by March 15 to the department head. A formal application for admission must be submitted to the School of Graduate Studies at the same time as the application for an assistantship. A recipient of a graduate assistantship is usually eligible for a waiver for the out-of-state portion of his or her tuition.
Department of Health, Physical Education and Recreation

Additional Information

Additional and/or updated information about graduate courses and programs may be obtained from the HPER Department, or check the departmental home page at: http://www.coe.usu.edu/hper.

Health, Physical Education and Recreation Faculty

Professors
Richard D. Gordin, Jr., sport psychology
Edward M. Heath, exercise physiology
Craig W. Kelsey, parks and recreation

Associate Professors
Hilda Fronske, motor learning
Julie A. Gast, community health, multicultural health issues, women’s health
Donna L. Gordon, health promotion
Arthur R. Jones, recreation administration
John M. Kras, administration, history, philosophy and sociology of sport
Dennis A. Nelson, family recreation, multicultural education, recreation programming
Rolayne Wilson, elementary physical education

Nontenure Assistant Professors
Brett Holt, education pedagogy
Phillip Waite, community health, therapeutic reminiscence, worksite health promotion, program evaluation
Dale Wagner, exercise physiology

Principal Lecturer
Peter J. Mathesius, conditioning, sport skills, and teaching methods

Course Descriptions

Health Education Professional (HEP), pages 639-641.
Physical Education Professional (PEP), pages 684-687.
Parks and Recreation Professional (PRP), page 697.
Physical Education Activity (PE), pages 682-684.
Dance West Summer, Dance Education Classes (DE), pages 600-601.
Department of History

Department Head: Norman L. Jones
Location: Main 323
Phone: (435) 797-1290
FAX: (435) 797-3899
TTY: (435) 797-1290
E-mail: monica.ingold@usu.edu
WWW: http://www.usu.edu/history

Graduate Program Coordinator: Christopher A. Conte,
Main 323G, (435) 797-1303, cconte@cc.usu.edu

Director of Undergraduate Studies: Denise O. Conover,
Main 321H, (435) 797-0870, conoverd@hass.usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA),
Master of Science (MS), Master of Arts (MA) in History; participates in
Master of Social Sciences (MSS)

Undergraduate Programs

Objectives

The Department of History offers a flexible program to accomplish the
following objectives:

1. To train undergraduates to research, analyze, synthesize, and
communicate reasonable conclusions about the past by using the
historical method.

2. To inculcate cultural literacy and provide the knowledge necessary
for informed decision-making by citizens of Utah, the United
States, and the world.

3. To provide students with crucial work skills in research, analysis,
communication, and collaboration, as well as enriching their lives.

4. To contribute to the liberal arts curriculum of the University
through general education, general interest courses, the history
major, the history teaching major, minors in history and classics,
and the interdisciplinary programs of folklore, American studies,
and British and commonwealth studies.

History is a reading- and writing-intensive program.

Requirements

Departmental Requirements

New freshmen accepted in good standing by the University may apply
for admission to the History Department. Students transferring from
another institution or another major will be admitted if they have a
minimum 2.5 GPA in history courses and an overall minimum GPA
of 2.5. A minimum 2.75 GPA is required for entry into the teacher
education program.

Candidates for a degree must earn a grade of C or better in all history
courses used to meet the requirements for a history major or minor, a
history teaching major or teaching minor, or a classics minor.

Bachelor of Arts (BA) Degree in History

The BA degree requires a minimum proficiency in a foreign language.
This proficiency may be established in one of the following ways:

1. 16 credits in a single language.
2. Documentation of a proficiency level of "intermediate low" or
   better through an examination administered by the USU
   Department of Languages, Philosophy, and Speech
   Communication.
3. Completion of any upper-division foreign language course
   constituting a third-year course of study with a grade of C or
   better.

Bachelor of Science (BS) Degree in History

The BS degree in history requires 15 credits of math and science
beyond the University Studies requirements. Of the 15 credits, 3 must
be earned in a statistics course, preferably in social science statistics.
The remaining 12 credits must include a course series from the
following list:

- BIOL 1610 Biology I (F) ......................................................... 3
- BIOL 1620 (BLS) Biology II (Sp) ............................................ 4
- CHEM 1210 Principles of Chemistry I (F,Sp) ....................... 4
- CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) .......... 4
- GEO 1110 (BPS) The Dynamic Earth: Physical Geology (F,Sp) 4
- GEO 3200 (DSC) The Earth Through Time (Sp) .................. 3
- PHYS 2101 The Physics of Living Systems I ...................... 4
- PHYS 2102 (BPS) The Physics of Living Systems II .......... 4
- PHYS 2210 (QI) General Physics—Science and Engineering I 4
- PHYS 2220 (QI) General Physics—Science and Engineering II .. 4

History Major

Thirty-six credits of history coursework are required. A grade of C
or better must be earned in all history courses used for the major. Each
major must complete one of the following three courses in the area
of premodern civilization:

- HIST 1060 (BHU) Introduction to Islamic Civilization ........ 3
- HIST 1100 (BHU) Foundations of Western Civilization: Ancient and
  Medieval (F,Sp,Su) ................................................................. 3
- HIST 1500 (BHU) Cultural and Economic Exchange in the
  Pre-Nineteenth Century World (F,Sp) .......................... 3

Each major must complete one of the following two courses in the area
of modern civilization:

- HIST 1110 (BHU) Foundations of Western Civilization: Modern
  (F,Sp,Su) ................................................................. 3
- HIST 1510 (BHU) The Modern World (F,Sp,Su) .............. 3

Each major must complete one of the following two courses in the area
of American history:

- HIST 2700 (BAI) United States to 1877 (F,Sp,Su) ........... 3
- HIST 2710 (BAI) United States 1877-Present (F,Sp,Su) .... 3

No student, including transfer students, may count more than 12
credits of lower-division coursework toward the history major.

Every senior must take HIST 4990 (Special Topics in History), the
capstone course for the major. Students should complete their
remaining 21-24 credits by taking 3000- and 4000-level history
courses. Since new courses may be approved from time to time, any
upper-division course listed in the current Schedule of Classes under
History is acceptable.

No more than 3 credits of HIST 4930 (Directed Readings) may be
applied toward the major.
Department of History

Since the study of history requires an understanding of many fields of human endeavor, students majoring in history must select a minor. Historians are encouraged to take electives in fields that will broaden their knowledge of the world and are closely allied to history, such as literature, economics, geography, anthropology, political science, sociology, classics, philosophy, or foreign language.

Students wishing to undertake graduate work should pursue the BA degree. During their senior year, they should take the graduate record exam (GRE).

Sample Four-year Plan for History Major

Minimum GPA for Admission: 2.5, major; 2.5, Career
Minimum GPA for Graduation: 2.5, major courses
Minimum Grade Accepted: C in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (30 credits)

History upper-division course ......................................................3
Minor course ................................................................................3
Elective upper-division courses ...................................................7

History Teaching Emphasis

Thirty-nine credits, earned in history courses, are required. A grade of C or better must be earned for all history courses used for the emphasis. Each student in the History Teaching Emphasis must complete one of the following three courses in the area of premodern civilization:

HIST 1060 (BHU) Introduction to Islamic Civilization..................3
HIST 1100 (BHU) Foundations of Western Civilization: Ancient and
Medieval (F,Sp,Su) ..........................................................3
HIST 1500 (BHU) Cultural and Economic Exchange in the
Pre-Nineteenth Century World (F,Sp).................................3

Each student must complete one of the following two courses in the area of modern civilization:

HIST 1110 (BHU) Foundations of Western Civilization: Modern
(F,Sp,Su) .........................................................................3
HIST 1510 (BHU) The Modern World (F,Sp,Su) .........................3

Each student must complete one of the following two courses in the area of American history:

HIST 2700 (BAI) United States to 1877 (F,Sp,Su) .......................3
HIST 2710 (BAI) United States 1877-Present (F,Sp,Su) ....................3

No student, including transfer students, may count more than 12 credits of lower-division coursework toward the history teaching emphasis.

Every student in the History Teaching Emphasis must take one of the following three courses as a senior capstone course:

HIST 4850 Interpreting the Past for Teachers (F,Sp)..................3
HIST 4860 Teaching History (F) ..................................................3
HIST 4870 Teaching World History: Themes, Approaches, and
Materials (Sp) ...........................................................................3

Students should complete their remaining 24-27 credits by taking 3000- and 4000-level history courses. A minimum of two courses must be taken from each of the following areas: U.S. history, European history, and world history. Since new courses may be approved from time to time, any upper-division course listed in the current Schedule of Classes under History is acceptable. To become licensed to teach history, students must be admitted to the Secondary Teacher Education Program (STEP). A 2.75 GPA is required for admission, as well as a writing test, a speech and hearing test, and a background check. Application should be made as soon as practical after the history teaching emphasis has begun. Applications for admission are available in the History Department Office. The STEP requires 35
Department of History

 credits of coursework, in addition to the 39 credits of history courses. For additional information about the STEP, contact Harold Heap, secondary education undergraduate advisor, (435) 797-2222.

All teaching majors must also have a teaching minor in an area for which teaching licensure can be granted. No more than 3 credits of HIST 4930 (Directed Readings) may be applied toward the emphasis.

Sample Four-year Plan for History Major, History Teaching Emphasis

Minimum GPA for Admission: 2.5, major; 2.75, Career
Minimum GPA for Graduation: 2.75, major courses; 2.75, Career
Minimum Grade Accepted: C in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

History upper-division course 3
STEP courses 9

Certification Semester (12 credits)
STEP (Student Teaching) courses 12

Minor in History
Twenty-one credits are required. A grade of C must be earned in all history courses used for the minor. Every student must complete one of the following three courses in the area of premodern civilizations:

HIST 1060 (BHU) Introduction to Islamic Civilization 3
HIST 1100 (BHU) Foundations of Western Civilization: Ancient and Medieval (F,Sp,Su) 3
HIST 1500 (BHU) Cultural and Economic Exchange in the Pre-Nineteenth Century World (F,Sp) 3

Every student must complete one of the following two courses in modern civilization:

HIST 1110 (BHU) Foundations of Western Civilization: Modern (F,Sp,Su) 3
HIST 1510 (BHU) The Modern World (F,Sp,Su) 3

Every student must complete one of the following courses in the area of American history:

HIST 2700 (BAI) United States to 1877 (F,Sp,Su) 3
HIST 2710 (BAI) United States 1877-Present (F,Sp,Su) 3

No student, including transfer students, may count more than 12 credits of lower-division coursework toward the history minor. Students should complete their remaining 9-12 credits by taking 3000- and 4000-level history courses.

No more than 3 credits of HIST 4930 (Directed Readings) may be applied toward the minor.

History Teaching Minor
Twenty-four credits are required. A grade of C or better must be earned in all history courses used for the minor. Every student must complete one of the following three courses in premodern civilization:

HIST 1060 (BHU) Introduction to Islamic Civilization 3
HIST 1100 (BHU) Foundations of Western Civilization: Ancient and Medieval (F,Sp,Su) 3
HIST 1500 (BHU) Cultural and Economic Exchange in the Pre-Nineteenth Century World (F,Sp) 3

Every student must complete one of the following two courses in modern civilization:

HIST 1110 (BHU) Foundations of Western Civilization: Modern (F,Sp,Su) 3
HIST 1510 (BHU) The Modern World (F,Sp,Su) 3
Department of History

Every student must complete one of the following courses in the area of American history:

**HIST 2700** (BAI) United States to 1877 (F,Sp,Su) .........................3
**HIST 2710** (BAI) United States 1877-Present (F,Sp,Su) .....................3

No student, including transfer students, may count more than 12 credits of lower-division coursework toward the history minor. All teaching minors in history must take one of the following:

**HIST 4850** Interpreting the Past for Teachers (F,Sp) .......................3
**HIST 4860** Teaching History (F) ..................................................3
**HIST 4870** Teaching World History: Themes, Approaches, and Materials (Sp) .........................................................3

Students should complete their remaining 9-12 credits by taking 3000- and 4000-level history courses.

No more than 3 credits of HIST 4930 (Directed Readings) can be applied toward the minor.

**Classics Minor**
For information about the Classics Minor, which is administered through the Department of History, see page 220. of this catalog.

**Academic Opportunities**

**Departmental Honors in History**
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Students in the department with a minimum GPA of 3.5 may apply to pursue an honors degree in history. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. Those interested should consult the department honors coordinator. Additional information can be found online at: [http://www.usu.edu/honors/](http://www.usu.edu/honors/)

**Phi Alpha Theta**
History students with a minimum GPA of 3.1 in history classes and an overall minimum GPA of 3.0 are eligible for membership in the national history honor society, Phi Alpha Theta. Those interested should consult the faculty advisor for Phi Alpha Theta.

**Undergraduate Teaching Fellows**
The UTF program is designed to provide students, particularly potential teachers, with the opportunity to assist professors and, thereby, learn first-hand about the nature of the profession. UTFs must maintain a minimum GPA of 3.0 and be sponsored by a professor. Application forms are available in the History Department office and on the History Department website: [http://www.usu.edu/history](http://www.usu.edu/history)

**Additional Information**
For updated information concerning programs and courses offered by the Department of History, visit the departmental web page at: [http://www.usu.edu/history](http://www.usu.edu/history)

Major requirement sheets, which provide detailed information about requirements for the History major, can be obtained from the department, or can be accessed online at: [http://www.usu.edu/ats/majorsheets/](http://www.usu.edu/ats/majorsheets/)

**Financial Support**
Scholarships, grants-in-aid, and work-study programs are available through the University. The History Department offers tuition waivers and scholarships to outstanding students. In addition, undergraduates may be employed as research assistants and clerical assistants within the department. For current information on scholarships and employment opportunities, consult the department head.

**Graduate Programs**

**Admission Requirements**
Graduate applicants may be admitted to the program for either the master of arts or master of science in history if they meet the following qualifications: (1) hold a baccalaureate degree; (2) have at least a 3.0 cumulative GPA over the last 60 credits of undergraduate work, with a 3.5 GPA in history courses recommended; (3) submit Graduate Record Examination (GRE) general test scores, with a required minimum score at the 40th percentile on the verbal section, and a recommended minimum score at the 40th percentile on both the quantitative and written portions of the exam; (4) submit three letters of recommendation from persons acquainted with the applicant’s academic performance and potential; and (5) submit a brief statement of proposed fields of interest and career goals.

The Department of History also strongly recommends that applicants have either an undergraduate major or minor in history or a closely related field. Familiarity with one or more foreign languages is highly desirable and is required for the master of arts degree and for master’s level research in many fields of history. Applications will be strengthened by the submission of an example of the student’s historical writing, such as a paper (about 15 pages in length) written for a seminar or upper-division course.

The final recommendation for admission will be made upon consideration of all the above factors by the department to the School of Graduate Studies.

**Degree Programs and Additional Requirements**

**Master's Degree, Plan A (Thesis)**
The thesis option should be taken by anyone intending to do research or enter another program for the doctoral degree. A master of arts or master of science degree can be completed with this option.

The program consists of 30 semester credits beyond the bachelor’s degree, 6 credits of which must be in thesis research. Students must take HIST 6000, as well as either HIST 6010 or 6020, or another theory-intensive course approved by the director of graduate studies. Students may apply a maximum of 4 internship credits earned while working in an archive, for a museum, on the staff of a scholarly journal, or as a teaching intern in an upper-division undergraduate course.

The remainder of the 30 credits may be taken as electives in history or related courses relevant to the student’s program.
Department of History

Upon arrival at USU, students are urged to meet with the departmental graduate advisor, who will direct them to one or more faculty members with similar interests. Through consultations with the graduate and faculty advisor, the first-year student will form a thesis committee and formulate a course of study. By the end of the first year, most students will have submitted to their committees a proposal for the thesis, which they will write under the close supervision of the committee members. The oral defense usually takes place in the spring semester of the second year.

Master’s Degree, Plan B (Nonthesis)

A nonthesis master’s program can help a student attain employment in many areas, but is not recommended for students planning to secure a doctorate. A master of arts, master of science, or master of social sciences degree can be completed with this option.

The Plan B program consists of 30 credits beyond the bachelor’s degree. The course requirements are identical to those of the Plan A program, except that only 3 thesis credits are permitted.

Students completing the Plan B program do not write a full-length thesis. Instead, Plan B students write a research paper of approximately 30 pages in length and submit a portfolio of their graduate writing, which includes two additional and distinct pieces of writing. Students defend their Plan B research papers and writing portfolios before their major professor and the members of the supervisory committee. Final approval of the Plan B rests with the department, rather than with the School of Graduate Studies.

Master of Arts

To receive a master of arts (MA) degree, students must successfully complete two years of foreign language at the undergraduate level. If two years of undergraduate language study already appear on the student’s transcript, he or she must demonstrate current competence through successful completion of a language exam or by taking a 3000- or 4000-level language course for which a grade of B or higher proves competency. In all cases, an individual assessment must be made of a student’s language status. For further information, see pages 104-105.

Students planning to continue on for a doctorate should be aware that many doctoral programs in history require that students pass written proficiency exams in two or more languages.

Master of Science

To receive a master of science (MS) degree in history, students may be required to demonstrate, to the satisfaction of their supervisory committee, the ability to incorporate scientific methodologies in their research as appropriate.

Master of Social Sciences (MSS)

Like the MA and MS in history, the MSS degree requires a minimum of 30 credits, including 15 credits in the major discipline of history, plus a minimum of 15 credits from one of the following two tracks. Track A: a minimum of 15 credits from two approved minor areas, with at least two courses in each minor area. Track B: a minimum of 15 credits from an approved minor and a liberal arts and sciences cluster, with at least two courses in the minor and two courses in the cluster. Accepted minor disciplines include instructional technology, environment and society, political science, psychology, and sociology/anthropology. This degree is designed for secondary school teachers who need more training to obtain licensure in additional teaching fields or who simply wish to deepen their understanding of a related field.

Students in the MSS program are required to take HIST 6000 and 3 credits of HIST 6970 for their Plan B. A supervisory committee consists of a major professor in history and two committee members, each representing one of the student’s minor fields. MSS students, like other Plan B students in history, must write a research paper of approximately 30 pages and submit a portfolio of their graduate writing that consists of two separate and distinct pieces of work, one from each of their two minor fields. An oral defense of the student’s Plan B paper and portfolio is held before the student’s supervisory committee.

Additionally, the master of social sciences (MSS) in history requires students to demonstrate an understanding of statistical applications in the social sciences.

Financial Assistance

The primary financial assistance offered by the Department of History is through graduate assistantships. Each year, the History Department offers to qualified students, on a competitive basis, a total of seven graduate assistantships. These assistantships entail approximately 20 hours of work per week, assisting faculty members with departmental introductory survey courses. The award carries a stipend and an out-of-state tuition waiver. To keep their assistantships, graduate assistants must maintain a GPA of 3.0 (or a B average) and be a full-time student (see page 98). While enrolled in the MA or MS program, graduate assistants may hold graduate assistantships for a maximum of two years. Applications for graduate assistantships should be postmarked no later than February 1, for the upcoming academic year.

Graduate students may be eligible for Carr Scholarships to supplement their graduate assistantships. Competitive grants to support travel and research are also available to history graduate students.

In addition, financial assistance is available through the Western Historical Quarterly, a journal published at USU. The editors of the journal offer, during alternate years, the S. George Ellsworth Editorial Fellowship and the Robert M. Utley Editorial Fellowship. These fellowships are awarded to highly qualified students working as editorial assistants in that office. These fellowships are nationally competitive and allow graduate students to learn all aspects of journal production. They carry a stipend (with additional funding possible during the summer) and a waiver of the out-of-state portion of the tuition. Materials should be postmarked no later than February 1, for the upcoming academic year. Applicants will be notified in early April.

Funding for the S. George Ellsworth Fellowship is provided by the Western Historical Quarterly, the School of Graduate Studies, the College of Humanities, Arts and Social Sciences, and the S. George Ellsworth Endowment of the Mountain West Center for Regional Studies. The S. George Ellsworth Fellowship is being offered for the 2007-2008 academic year.

Funding for the Robert M. Utley Fellowship is provided by the Western Historical Quarterly and the School of Graduate Studies. The Robert M. Utley Fellowship is being offered for the 2006-2007 and 2008-2009 academic years. For further information about Western Historical Quarterly fellowships, write to: Western Historical Quarterly, Utah State University, 0740 Old Main Hill, Logan UT 84322-0740; or send e-mail to: cdoyle@hass.usu.edu.

The application deadline for both fellowships is February 1, for the upcoming academic year.
Additional Funding
In addition to graduate assistantships and the Western Historical Quarterly editorial assistantships, the School of Graduate Studies awards a limited number of scholarships. To be eligible for these awards, all students should complete the application for admission and send it, along with GRE scores and letters of recommendation, to the School of Graduate Studies by February 1. A financial aid application form (which may be obtained from the History Department) should be returned to the History Department by February 1.

Students interested in establishing eligibility for federal loans and work-study will need to complete the Free Application for Federal Student Aid (FAFSA) and submit it to: Financial Aid Office, Utah State University, 1800 Old Main Hill, Logan UT 84322-1800. Questions about eligibility should be directed to the Financial Aid Office, tel. (435) 797-0173.

Career Opportunities
Some graduates of USU’s master’s program continue their formal education in PhD programs or law schools. Others find employment in the two-year college or secondary school systems, as teachers or administrators. Still others work for historical societies, museums, publishing firms, and a variety of enterprises in the private sector.

Additional Information
Current announcements and other information are posted to the History Department website: http://www.usu.edu/history

History Faculty
Professors
Jay Anderson, folklore, folklife, film studies
C. Robert Cole, England, modern European history
Mark L. Damen, ancient world, theatre history, Latin, Greek
Norman L. Jones, medieval, early modern Europe, Britain, Christianity
David R. Lewis, American Indian, environmental, Utah, editor of Western Historical Quarterly
Daniel J. McInerney, American intellectual history, Nineteenth Century
Michael L. Nicholls, early American history
Leonard N. Rosenband, France, European economic and labor history
Stephen C. Siporin, folklore, oral narrative folklore, folk art
Frances B. Titchener, ancient Greece and Rome, Latin, Greek

Adjunct Professors
Doran J. Baker, Electrical and Computer Engineering Department, history of science
Barry M. Franklin, Secondary Education Department, history of education
Christopher B. R. Pelling, Regius Professor of Greek, Oxford University: Classics

Trustee Professor Emeritus
Anne M. Butler, U.S. West, U.S. Women

Professors Emeritus
William F. Lye, Africa, India, Canada
F. Ross Peterson, U.S. modern political history, Black history

Associate Professors
Christopher A. Conte, Africa, world, and environmental history
R. Edward Glattfelder, Russia and East Asia, associate dean of College of Humanities, Arts and Social Sciences
Peter Mentzel, Eastern Europe, Ottoman empire, Islamic civilization
Colleen O’Neill, West, Native American, labor, associate editor of Western Historical Quarterly
Susan O. Shapiro, Greek intellectual history, ancient Greek and Latin language

Assistant Professors
M. Lawrence Culver, U.S. Southwest Borderlands; U.S. West, cultural, environmental, and urban history
Victoria M. Grieve, modern American cultural and intellectual history, art and culture of the West
Jennifer Ritterhouse, U.S. history, African-American history, U.S. South, women’s history
James Sanders, Latin America
Timothy S. Wolters, science and technology, American history

Adjunct Assistant Professors
Daniel M. Davis, photograph curator, U.S. West
Stephen C. Sturgeon, manuscript curator, Twentieth Century U.S. West, political, environmental history

Senior Lecturer
Denise O. Conover, American diplomatic history, U.S. military, American civilization

Adjunct Instructors
Michael W. Johnson, Director of Utah History Fair, Mountain West Center for Regional Studies
Robert E. Parson, University Archivist, Special Collections and Archives
Elaine Thatcher, Associate Director of Mountain West Center for Regional Studies

Greek (GRK), page 639.
Classics (CLAS), page 592.
Undergraduate Program

Overview

Utah State University’s Honors Program, established in 1964, provides an enhanced academic environment for highly motivated undergraduates. The Honors Program includes a community of scholars whose curiosity, creativity, and enthusiasm for learning foster educational achievement and personal growth.

Honors offers students intensive seminars, experimental classes, interdisciplinary courses, writing projects, leadership opportunities, and special activities. Participants may define independent study programs and design special research projects. Honors students work in close contact with professors in smaller classes; they pursue studies in greater depth than regular classes would allow. Participants also enjoy the company of other committed students who encourage and support one another’s intellectual growth and productivity. Honors students participate actively in their own education.

Honors serves students who work hard, raise questions, and seek answers. It is designed for students who want to go beyond minimum requirements and narrow specialties. The program benefits those who want to make the most of their university experience.

The Honors program maintains strict standards for both entering and completing its program. However, there are no extra fees to pay, and there are Honors options suitable for both entering freshmen and transfer students. The most important criterion for success is a student’s motivation and dedication to learning.

Entrance to the Honors Program

Students generally enter Honors at one of two points during their academic career. The majority will enter through “Scholars Forum.” Students with strong academic qualifications, who plan to enroll at Utah State as freshmen, are automatically enrolled in Scholars Forum, a 1-credit online orientation class (HONR 2000H), as well as an appropriate Honors University Studies class. The Scholars Forum gives high-ability students the opportunity to explore various options to maximize the value of their undergraduate education. Many will elect to continue along the “Honors Pathway” until graduation, through a formal application process conducted during October.

Other students may join Honors after they have completed all or nearly all of their General Education requirements. These students will initially enroll in HONR 2100H (Honors Inquiry Seminar), which will prepare them to pursue an Honors degree in their major (i.e., “Departmental Honors”).

Participation in Honors

To be eligible for entrance into Honors, a student must have a GPA of 3.50. For most majors, to maintain eligibility and to graduate in Honors, a student must not allow her or his GPA to drop below 3.30. The Honors Office places students with a GPA of less than 3.30 on probation. A student with a GPA of less than 2.50 will be dropped from the program. Reinstatement can be requested if the GPA is raised to 3.30. Honors students must also register for one Honors class per semester in order to remain active in the program.

Honors Degrees

Utah State University offers Honors degrees designed to fill a variety of student needs. Students may work toward one of three degree options:

1. **Departmental Honors.** Requires 15 semester credits as specified in a Departmental Honors plan, including a senior thesis/project.

2. **Departmental Honors with Honors in University Studies.** Requires 27 semester credits including 12 credits from the Honors Course List and at least 15 credits, including Honors senior thesis/project credits, in an approved Departmental Honors Plan.

3. **University Honors.** Requires 27 semester credits including at least 12 credits from the Honors Course List and as many as 15 credits, including Honors senior thesis/project credits, in an upper-division plan of study that has been approved by the Honors Director.

Listing of Honors Courses

Class offerings change frequently. For the most complete list, see the Honors Course List available on the Honors Program website:

http://www.usu.edu/honors/

Department of Instructional Technology

Department Head: Byron R. Burnham
Location: Emma Eccles Jones Education 215A
Phone: (435) 797-2692
FAX: (435) 797-2693
E-mail: ashlee.davis@usu.edu
WWW: http://it.usu.edu/

Degrees offered: Master of Education (MEd), Master of Science (MS), Educational Specialist (EdS), Doctor of Philosophy (PhD) in Instructional Technology

Graduate specializations: MEd—Educational Technology, Information Technology and School Library Media Administration; MS and EdS—Instructional Development for Training and Education

Undergraduate Programs

Objectives and Requirements

There is no major in instructional technology at the undergraduate level because of the need for those preparing in the field to have especially strong general education knowledge as well as depth in a specialized field of study. The minors include School Library Media and Multimedia Development. The objectives and requirements of these minors are as follows:

School Library Media Minor Objectives
1. Provides students with library media skills.
2. Prepares students to receive a Utah Library Media Endorsement.
3. Prepares students for employment as a School Library Media Specialist.

School Library Media Minor Requirements
This minor is available only through distance education. Those persons wanting endorsement for positions in the public schools must complete a teaching license and the prescribed School Library Media minor. A 2.7 grade point average is required for admission and endorsement as a school library media specialist at the bachelor’s level. For detailed requirements, contact the department.

Multimedia Development Minor Objectives
1. Provides students with design skills.
2. Develops students’ multimedia production skills.
3. Prepares students for employment in the multimedia field.

Multimedia Development Minor Requirements
Persons not seeking a public school position may elect the minor in Multimedia Development, in conjunction with a major in other fields. The Multimedia Development minor is especially appropriate for fields which require computer-based instruction, such as business, computer science, engineering, communications, and others. For detailed requirements, contact the department.

Graduate Programs

Instructional technology is a systematic way of designing, developing, implementing, and evaluating the processes of learning and teaching with specific objectives based on research in human learning and communication. It employs a combination of human and nonhuman resources to bring about more effective instruction. Instructional technology includes aspects of instructional design, product development, interactive learning technologies, multimedia, distance education, and library and information literacy. Each aspect of the field has unique contributions to make to the teaching-learning process.

The department offers specializations in Educational Technology, Information Technology and School Library Media Administration, and Instructional Development for Training and Education. A program emphasis in online learning communities in education and training is also offered.

Graduates are in demand in business and industrial settings, as well as in education, because of their preparation in training and instructional design. Admission to the graduate program is open to all students regardless of their undergraduate preparation.

Admission Requirements

See general admission requirements, pages 99-100. The MS and MEd admission requirements include a 3.0 GPA for the last 60 semester credits (90 quarter credits) and an MAT score or GRE verbal and quantitative scores at or above the 40th percentile. In addition, the department requires that those applying for the EdS program have a master’s degree, and a score at or above the 40th percentile on the verbal/quantitative tests of the GRE or 46 percent or above on the MAT. Those applying for the PhD program must have GRE verbal and quantitative test scores at or above the 40th percentile. Demonstrated writing and computer proficiency is required of all applicants. A minimum score of 213 computerized or 550 paper/pencil on the TOEFL is required for all prospective international students.

Applications for MS and PhD degree programs must be submitted to the School of Graduate Studies by January 31. Applications for MEd programs must be submitted to the School of Graduate Studies by May 15. Space permitting, additional qualified candidates will be considered until the beginning of summer semester. Students who wish to be considered for financial aid must submit applications by January 31 for the coming academic year. All graduate students are expected to begin their programs in the fall semester.

Applicants for the EdS and PhD programs who do not hold a master’s degree in Instructional Technology must complete additional course requirements.

No applications will be considered until all required information is received by the School of Graduate Studies.

Degree Programs

Master of Science (MS)
This degree emphasizes instructional design and development, and prepares the graduate with skills to apply principles of instructional systems design to education and training. The program prepares instructional developers to take positions in corporate training programs in business and industry. It also leads to careers in public and higher education, development of interactive learning technologies, telecommunications, distance education, and adult education.

The MS degree is available to qualified students with bachelor’s degrees from any field. Undergraduate students planning in advance for an MS in Instructional Technology should consider the department’s Multimedia Development minor as part of their bachelor’s program.
Department of Instructional Technology

**Master of Education (MEd)**
This master’s program is only available through extension and distance education via distance delivery methods. The MEd degree is a two-year cohort rotation (i.e., students proceed as a group through the two-year program). To be successful in this master’s degree program, students should own or have access to a personal computer. They will also need an e-mail address and internet access in order to communicate with faculty members and other students in the program. Persons choosing the MEd have two specializations available: Educational Technology, and Information Technology and School Library Media Administration. A Distance Learning Endorsement is also available within the MEd. Students accepted to the MEd may also choose certain electives from the Administrative Supervisory Certificate (ASC) program. They may then apply for acceptance to the ASC.

The Educational Technology specialization is directed at public school educators and administrators who are interested in applying the principles of educational technology to the teaching/learning process. This specialization may lead to a position as a district-level or building-level educational technology specialist responsible for technology integration and in-service training related to computers and other technologies.

The Information Technology and School Library Media Administration specialization is directed at persons seeking employment in a school library media center. Students seeking this specialization must complete the School Library Media minor (available only through extension and distance education) and apply for a Utah State Library Media Endorsement. This specialization may lead to a position as a district-level or building-level school library media specialist (K-12). The library media specialist is prepared to apply principles of library and information technology to help students and teachers. The library media specialist also understands the effective use of learning resources in the teaching/learning process.

The goal of the Distance Learning Endorsement Program is to provide public school educators with the knowledge and skills they need in order to be effective teachers of students who are participating in distance education programs. To prepare them for meeting the challenges of teaching and learning at a distance in the K-12 setting, the program aids master teachers in becoming (1) effective communicators with distant learners across the barriers of time and distance, and (2) proficient users of telecommunications technologies in instruction.

**Educational Specialist Degree (EdS)**
The Educational Specialist degree is intended for students interested in acquiring advanced skills in instructional technology beyond those of the master’s degree. This program involves coursework, independent study, practicum experiences, and a culminating experience. The degree requires a minimum of 30 credits beyond the master’s degree, providing the master’s degree was received in the instructional technology field. For students with a master’s degree in a field other than instructional technology, a minimum of 40 credits is required.

**Doctoral Degree (PhD)**
The doctor of philosophy degree emphasizes research and theory building in instructional design and development. The degree offers advanced preparation for graduates seeking a career in higher education, research centers, or corporate training and development.

**Course Requirements**
Course requirements for all degrees are dependent upon the area of emphasis and are individually planned by the student and the supervisory committee. For planning materials and program details, contact the department.

**Financial Assistance**
Fellowships, assistantships, and other financial support are available and awarded on a competitive basis. Apply through the department.

**Instructional Technology Faculty**

**Professors**
Byron R. Burnham, adult learning  
J. Nicholls Eastmond, Jr., theory and evaluation  
Alan M. Hofmeister, research  
Mimi Recker, cognitive modeling, interactive learning

**Associate Professors**
David A. Wiley, learning objects, instructional design theory  
Linda L. Wolcott, distance education, library media, and foundations

**Assistant Professors**
Joanne P. Bentley, learning theory and evaluation  
Yanghee Kim, pedagogical agents, instructional design, learning, intelligent tutoring systems  
Brett E. Shelton, immersive technologies, cognitive studies  
Deepak P. Subramony, technology effects in non-Western cultural groups and cultural diversity among technology users  
Andrew E. Walker, collaborative information filtering and problem-based learning, situated cognition

**Adjunct Instructors**
JaDene M. Denniston, school library media  
Leong-Guan (Eddie) Loo, instructional design  
Kevin L. Reeve, distance education

**Lecturer**
Sheri Haderlie, Instructional Technology Department Outreach Program Manager

**Professors Emeritus**
M. David Merrill, instructional design  
Don C. Smellie, foundations  
Ron J. Thorkildsen, research and interactive learning  
R. Kent Wood, theory, foundations

**Associate Professor Emeritus**
J. Steven Soulier, message design, computer applications

**Course Descriptions**

Instructional Technology (INST), pages 648-651.
Objectives

The Intensive English Language Institute (IELI) is an academic program in the College of Humanities, Arts and Social Sciences. IELI teaches international students, residents, and refugees the English skills and cultural knowledge they need to be successful university students. IELI also trains international teaching assistants (ITAs) for USU. Information about the ITA training is available through the School of Graduate Studies.

The IELI program accepts students seeking a degree at Utah State University, as well as students who want to study English for personal or professional reasons. Students may enroll to study only English.

Undergraduate students who apply to USU without a TOEFL score of at least 173 computerized, 500 paper/pencil, or 61 on the iBT; and graduate students applying without a minimum TOEFL score of 213 computerized, 550 paper/pencil, or 79-80 on the iBT must take the IELI Placement Examination, given the first day of each semester, including the first day of the IELI summer session. Based on the examination results, students will be required to study in the IELI or be exempted from further study and permitted to take classes in their major fields. (Note: iBT is the Internet-based TOEFL.)

Curriculum

Four levels of study are offered each semester. The ability levels of classes range from elementary through advanced. Several of the level 1 and 2 classes are combined into multilevel classes. Classes focus on listening, speaking, reading, writing, and cultural skills. In addition, there are topics courses, covering topics ranging from current events and the environment to academic literacy and the cultures of the U.S. Students must complete one topics course for every level they study in the IELI program.

Students advance from one level of a class to the next higher level by obtaining a grade of C- or higher in the lower-level class. Students who do not obtain a C- or higher in a class must repeat the class. Students who complete all level 4 classes with a C- or higher may begin taking courses outside of IELI. Students at level 4, who have less than a full course load remaining in IELI, must take other University credits sufficient to stay in status with visa requirements. Exceptions to this policy must be approved by the director of IELI in consultation with students’ major field advisors and the international student officer.

Credit for Intensive English Study

Classes in IELI carry academic credit. Full-time students at each level take 18 credits per semester. A student who begins IELI at level 1 and progresses to level 4 may earn a total of 72 undergraduate elective credits. While all the credits will appear on a student’s transcript, a maximum of 18 can be counted toward graduation. Application of the 18 credits will be determined by the student’s college and major department. Students must, therefore, meet with their departmental advisors to determine the role of IELI credits in their graduation requirements.

Services

New students in IELI take the Placement Examination and attend an orientation meeting prior to the beginning of each semester. All students are assigned an advisor in IELI who helps them with various difficulties they may encounter. In addition, all the services and privileges offered to students on campus are available to IELI students. These services include health care services, recreational opportunities, and numerous special programs for international students.

Intensive English Language Institute (IELI), pages 647-648.
Interdisciplinary Studies Major

Objectives

The organization of academic departments and their associated degree programs reflects the history and traditions of study in those fields. The Interdisciplinary Studies major is intended to serve the needs of students who want to design a unique individualized academic program, obtain a broadly-based education, and diversify their professional potential. The degree is not intended to replace existing majors or curricula. Rather, it is designed to provide the small number of students whose degree needs cannot be met with other majors with a program which is less restrictive and more responsive to their individual plans and interests. Students who complete their programs will receive the Bachelor of Science or (if they meet the language requirement) the Bachelor of Arts degree. The degree cannot be used as part of a dual major.

The Interdisciplinary Studies major is available through the following five colleges: Agriculture; Education and Human Services; Humanities, Arts, and Social Sciences; Natural Resources; and Science. However, the major is not available to students enrolled in the College of Business, the College of Engineering, nor the Department of Computer Science. The Interdisciplinary Studies degree is also available through the University’s Continuing Education centers.

Students who think the Interdisciplinary Studies major may be right for them, but are not sure, should ask themselves the following questions:

1. Students must have a minimum of 45 semester credits completed before the major may be declared. Do I have 45 or more semester credits on my transcript? If not, how close am I?

2. Interdisciplinary Studies cannot duplicate existing majors. Have I explored the educational opportunities at USU? Have I reviewed the General Catalog to see what is already available at USU? Have I visited Career Services (University Inn 102) to explore career development programs? Why don’t any of the existing majors meet my needs?

3. Which areas of study am I proposing to combine? Do they logically go together? Does USU offer the areas of study I am proposing to combine? What would the program I am proposing lead me to? Are there job opportunities out there?

4. If my degree crosses two or more colleges, which college would I propose to serve as the lead college?

If, after reviewing the above, students feel that they have a unique interest in a subject matter and USU can help, this may be the right major for them. Interested students should make an appointment with the advising center in the college from which the degree will be awarded.

Admission Requirements

Students may apply for admission to the Interdisciplinary Studies major after completing 45 credits with a minimum GPA of 2.0, submitting an Application for Interdisciplinary Studies, and receiving approval for the Application.

Transfer students from other institutions or from other USU majors need to complete a minimum of 45 credits, achieve the required GPA, and have an approved Application for Interdisciplinary Studies for admission to this major in good standing.

Students who wish to pursue the degree must submit a letter of application containing the following information:

1. A clear statement of the student’s educational objectives.

2. A proposed program of study including specific courses and listing the faculty member the student proposes to work with on the final thesis or project.

3. A brief statement explaining why the student feels the proposed program is worthy of a college degree.

A current unofficial transcript must be attached to the application. The application should be discussed with and reviewed by the student’s major advisor.

Requirements

Students will work with a faculty member or members who will assist in course selection and will oversee the successful completion of the 45 credits in the program. Courses selected must provide coherent, carefully planned programs of study in the area of interest, which must involve two or more disciplines. Courses used for University Studies Breadth Requirements and courses used for Depth Humanities and Creative Arts (DHA), Depth Life and Physical Sciences (DSC), and Depth Social Sciences (DSS) may be counted toward the degree only with the permission of the college advisor. However, courses meeting the Communications Intensive (CI) and Quantitative Intensive (QI) requirements may be applied toward requirements for the Interdisciplinary Studies degree.

Courses used to meet the 45-credit minimum requirement may come from any department, with the following restrictions:

1. At least 21 of the 45 credits must be numbered 3000 or above.

2. Courses used for the major must include at least 15 credits each from two different disciplines. A maximum of 3 internship credits may be counted toward the major. Note: Some colleges may require that more than 15 credits counted toward the major be taught by departments within their college; check with the college advisor for further information.

3. The coursework must focus on an overarching theme and must be consistent with the student’s educational and career goals.
4. As part of the 45 credits, students must complete a 3-credit senior project, thesis, or capstone course supervised by their faculty advisor.

5. Students must pass every course approved for the program of study and must earn a composite GPA of at least 2.0 in the 45 credits of coursework used for the major. Note: Some colleges may have a higher GPA requirement; check with the college advisor for further information.

6. Courses used for the major may be used for a minor or to fill University Studies Breadth requirements only with the permission of the college advisor.

Additional Information

Students interested in the Interdisciplinary Studies degree should contact the advising center in the college from which the degree will be awarded. Students who would like to explore the degree, but are unsure which college they should enroll in, may discuss their interests with Susan Haddock, University Advising and Transfer Services, (435) 797-3373, susan.haddock@usu.edu.

Students exploring whether or not the Interdisciplinary Studies major is right for them should review the major requirement sheet, which can be found online at: http://www.usu.edu/ats/majorsheets/

For students pursuing the Interdisciplinary Studies major, the requirement sheet provides details of major requirements, as well as a worksheet for students to record their progress toward fulfilling major requirements.

Interior Design Program

Director: Tom C. Peterson
Location: Family Life 320A
Phone: (435) 797-1557
FAX: (435) 797-8245
E-mail: interiors@cc.usu.edu

Academic Advisor: Mary E. Leavitt, Student Center 302/
Family Life 320H, (435) 797-3883, mary.leavitt@usu.edu

Degrees Offered: Bachelor of Science (BS) and Bachelor of Arts (BA) in Interior Design

A Master of Science (MS) degree is also available. Degree options are designed for graduates with degrees in interior design, as well as those without interior design degrees. For additional graduate degree information, contact the Interior Design Program.

Undergraduate Emphases: Studio Emphasis, Design Sales and Marketing Emphasis

Overview

The program in interior design is structured with two specific emphases, both of which offer a BS and BA degree. Each has been developed to prepare students for entry into the varied professions of interior design. Students must identify, research, and creatively solve problems pertaining to the function and quality of the interior environment, as well as its relationship to natural and man-made resources. Students must also gain an understanding of the legal and ethical issues that guide and direct the profession.

An interior designer renders professional services with respect to interior and related spaces, both commercial and residential, with special attention to the individuals who will eventually reside in those spaces. These services include programming, design analysis, space planning, and aesthetics, using specialized knowledge of interior construction, building codes, equipment, materials, and furnishings. Another component of each student’s training in interior design is the preparation of drawings and documents relative to the design of interior spaces, in order to enhance and protect the health, safety, and welfare of the public.

In an effort to meet the needs of the design profession, the Interior Design Program provides foundation training and technical skill building during the freshman and sophomore years. This is followed by a review process which determines the choice of emphases students may select to complete their degree. The two available emphases are (1) Studio and (2) Design Sales and Marketing.

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Course Requirements

Minimum GPA for Admission: Any student admitted to USU may take lower-division Interior Design classes.

Additional Matriculation Requirements: Portfolio review during sophomore year determines which students may matriculate into the upper-division portion of the program.

Minimum GPA for Graduation: 2.5, major; 2.0, Career

Minimum Grade Accepted: C in major requirements:

Studio Emphasis—USU 1330, MHR 2050, PHIL 3810, all ID courses; Design Sales and Marketing Emphasis—BIS 2100, 2200, OSS 2800, BA 3500 (or BUS 3500), MHR 2050, 3110 (or BUS 3110), 3710, PHIL 3810, all ID courses

These are sample plans. They outline University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

All Majors

Freshman Year (32 credits)

Fall Semester (16 credits)

ID 1700 Interior Design Professional Seminar ................................. 1
ID 3740 History of Interior Furnishings and Architecture I ................ 3

Laptop Computer Requirement

Students entering sophomore-level interior design courses must bring their own laptop computer. Specifications for the laptop will be provided by the Interior Design Program. The computer should be purchased just prior to beginning the sophomore year. Required software will be made available through a special leasing program.

Sophomore Review

In addition to basic undergraduate and graduate requirements set forth in this catalog, students in Interior Design must participate in a Sophomore Review in order to matriculate to junior class standing. The review takes place during the spring semester of a student’s sophomore year in the program. Students wishing to enroll in junior-level courses must first submit projects from as many of the following courses as possible: ID 1790, 2710, 2720, 2730, 2750, 2760; ART 1020, 1120; and one elective art skills class. Students will be expected to organize and properly label their projects, as well as deliver them to a location designated by the program.

An additional component of the Sophomore Review will be an analysis of the student’s academic performance. Courses considered for junior status are: ID 1790, 1790, 2710, 2720, 2730, 2750, 2760, 3470, 3750; ART 1020, 1120; three credits from ARTH 2710 or 2720; and one art skills course. The student’s overall GPA will also be used as part of the review process.

Students with a cumulative GPA of 3.0 or above will be given preference in this process, following the successful completion of the first portion of the review. As studio space is limited, admission to the Studio Emphasis will be offered first to those ranking highest in the review process, until capacity is reached. Others who successfully complete the review process will be offered a place in the Design Sales and Marketing Emphasis.

If a student who has been approved to take upper-division classes stops out of the program, he or she will be readmitted if space is available. Due to space limitations, first preference will be given to students with continuous registration in the program.

Tours

Each year the Interior Design Program may sponsor a tour to a major design center. Students should plan to take advantage of this opportunity while enrolled in the program.

Study Abroad

The world is expanding. In this rapidly growing environment, students need to be more globally aware of their historical and contemporary surroundings. When students are exposed to design and culture outside of the state, their world views expand. Directly applying these influences will improve their design skills. This study abroad program addresses these needs and goals through a collaborative and intensive study of design in the rich environment of Great Britain and France. The Interior Design Travel Course (ID 4780) is delivered through a
variety of learning and teaching structures, which include individual and
group tutorials, projects, seminars, lectures, and visits to museums,
galleries, and studios. The course provides the opportunity for students
to apply what is learned in its historical and cultural context.

Interior Design Programmatic Learning Objectives

1. The Interior Design Program will allow students to develop the
   attitudes, traits, and values of professional responsibility,
   accountability, and effectiveness.

2. Students will learn the fundamentals of art and design, theories of
   design and human behavior, and discipline-related history.

3. Students will understand and apply the knowledge, skills,
   processes, and theories of interior design.

4. Students will learn to communicate effectively.

5. Students will design within the context of building systems.
   Students will use appropriate materials and products.

6. Students will learn to apply the laws, codes, regulations,
   standards, and practices that protect the health, safety, and
   welfare of the public.

7. Students will be given a foundation in business and professional
   practice.

Assessment

The Interior Design Program participates in an ongoing self-
assessment of the program and completes regular evaluations of the
curriculum to ensure continuing growth and development. Much of this
activity is stimulated by a continuing need to meet the requirements set
forth by the program’s accreditation. The program also conducts two
major portfolio reviews each year. The first review occurs at the end
of a student’s sophomore year, and the second review is conducted
at the conclusion of a student’s senior year of classes. These reviews
allow the program to determine areas of strength, as well as areas of
weakness, in order to provide direction for needed revision, to meet
the needs of the various industries in which graduates of the program
will be employed. Additionally, information is requested from alumni,
in an effort to assess how the curriculum has prepared them to meet
necessary employment expectations.

Additional Information

Major requirement sheets, which provide detailed information about
requirements for the Interior Design major, can be obtained from the
Interior Design Program, or online at:
http://www.usu.edu/ats/majorsheets/

Interior Design Faculty

Professor
Tom C. Peterson, design process and experiential learning

Assistant Professors
Darrin S. Brooks, residential design and interior history
Steven R. Mansfield, architecture and computer aided design

Course Descriptions

Interior Design (ID), pages 646-647.
Admission Requirements for this Major

1. New freshmen admitted to USU in good standing qualify for admission to this major.

2. Transfer students from other institutions or from other USU majors need a 2.5 total GPA for admission to this major in good standing.

Overview

Problems of security, development, ethnic conflict, and human rights, as well as problems relating to the environment and natural resources, are increasingly confronted at a global rather than a national level. With its theoretical models and real-world application, the study of international studies is an exciting and highly relevant interdisciplinary major. This program cultivates the development of language and intercultural skills, develops understanding of global problems and circumstances, and expands the student’s capacity to make informed judgments regarding complex international and global issues.

Requirements

In addition to completing the necessary core courses listed below, students must also choose one area option from one of the four available options. Through these options, students gain a level of expertise in their chosen area.

Each student must also complete a senior research project (3 credits). This project must fit within the area option chosen by the student. Under the direction of a faculty member, this project may be completed within the context of an existing course, or may be completed independently under the guidance of the chosen faculty member.

In addition to the senior research project and the choice of one area option, the student must also complete an international experience component. The student may choose the traditional study abroad experience in an accredited program, which must be approved by the international studies advisor. The student may also choose an internship. The internship must have a clear international focus and must be supervised by a faculty member. The relevant faculty member, as well as the international studies advisor, must approve proposals for internships. Students may count a total of 3 credits earned during an internship toward completion of the major.

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Graduation Requirements

International Studies Major

(39 credits minimum) (3.0 GPA)

A. Core Courses (15 credits)

ANTH 1010 (BSS) Cultural Anthropology (F,Sp) (3 cr) or ANTH 2010 (BSS) Peoples of the Contemporary World (Sp) (3 cr) ..... 3
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp) (3 cr) or ECON 3400 (DSS) International Economics for Business (F,Sp,Su) (prereq: ECON 2010) (3 cr) ................................................................. 3
HIST 1500 (BHU) Cultural and Economic Exchange in the Pre-Nineteenth Century World (F,Sp) (3 cr) or HIST 1510 (BHU) The Modern World (F,Sp,Su) (3 cr) ......................... 3
POLS 2100 Introduction to International Politics (F,Sp) .......................... 3

B. Electives (6 credits)

Students may earn these credits by taking any of the courses listed in the four area options: (1) World Economy and Development, (2) Peace and Security, (3) Global Environment and Natural Resources, and (4) Peoples and Nations.

C. Language Requirement

Students must acquire at least a basic knowledge of one foreign language. Students must successfully complete either one course at the 3000 level or pass a competency examination at the same level.

D. Area Option Requirement (15 credits)

Students must choose one option from the four listed below. Students must complete courses from at least two different departments within their chosen option, for a total of 15 credits.

E. Senior Research Project (3 credits)

Each student must complete a senior research project which must fit within the area option chosen by the student.
Area Options

World Economy and Development
ANTH 5160 (DSS) Cities and Development (Sp) .................................................. 3
ANTH/GEOSOC/5650 (DSS) Developing Societies (F) ........................................... 3
BA 4300 International Finance (F,Sp) ........................................................................ 3

Sample Four-year Plan for International Studies Major

Minimum GPA for Admission: 2.5, Career
Minimum GPA for Graduation: 3.0, major courses; 2.0, Career
Minimum Grade Accepted: C- in major requirements

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (32 credits)
Fall Semester (16 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ............... 3
ANTH 1010 (BSS) Cultural Anthropology (3 cr) or
ANTH 2010 (BSS) Peoples of the Contemporary World (3 cr) .......... 3
HIST 1500 (BHU) Cultural and Economic Exchange in the Pre-Nineteenth Century World (3 cr) or

Spring Semester (15 credits)
Senior Thesis (upper-division) course .............................................. 3
Depth Life and Physical Sciences (DSC) course ................................ 3
Upper-division elective courses ....................................................... 9

International Studies Minor (18 credits) (3.0 minimum overall GPA)

A. Core Courses (15 credits)
ANTH 1010 (BSS) Cultural Anthropology (F,Sp) (3 cr) or
ANTH 2010 (BSS) Peoples of the Contemporary World (Sp) (3 cr) .... 3
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp) (3 cr) or
ECON 3400 (DSS) International Economics for Business (F,Sp,Su) (prereq: ECON 2010) (3 cr) ...................................................... 3
GEOG 1300 (BSS) World Regional Geography (F) ............................. 3
HIST 1500 (BHU) Cultural and Economic Exchange in the Pre-Nineteenth Century World (F,Sp) (3 cr) or
HIST 1510 (BHU) The Modern World (F,Sp,Su) (3 cr) ..................... 3
POL 2100 Introduction to International Politics (F,Sp) ........................ 3

B. Electives (3 credits)
Any course listed in any of the four area options is acceptable.

Additional Information
For detailed information about requirements for the International Studies major and minor, see the major requirement sheet, which can be obtained from the Political Science Department, or online at:
http://www.usu.edu/ats/majorsheets/
Department of Journalism and Communication

Department Head: Michael S. Sweeney
Location: Animal Science 310
Phone: (435) 797-3292
FAX: (435) 797-3973
E-mail: jcom@cc.usu.edu
WWW: http://www.usu.edu/journalism

Assistant Department Head:
Penny M. Byrne, Animal Science 108A, (435) 797-3289, penny.byrne@usu.edu
Graduate Program Coordinator:
Edward C. Pease, Animal Science 308B, (435) 797-3293, tpease@cc.usu.edu

Degrees offered: Bachelor of Science (BS) and Bachelor of Arts (BA) in Journalism; Master of Science (MS) and Master of Arts (MA) in Communication

Undergraduate emphases: Broadcast/Electronic Media, Print Journalism, Public Relations/Corporate Communications

Undergraduate Programs

Objectives

The undergraduate major in the Journalism and Communication Department, leading to the Bachelor of Arts or the Bachelor of Science degree in Journalism, is designed to prepare students for careers in a wide range of communication fields, through instruction in the philosophical groundings, theoretical perspectives, and hands-on applications of communications skills and practice. The curriculum integrates practical mass communications skills training with critical thinking skills, while helping students to understand the processes and effects of communication, as well as the relationships, roles, and interactions of mass communication with other social institutions.

With individual student objectives in mind, the Department of Journalism and Communication offers a flexible program of study having the following learning objectives:

1. Journalism and Communication Skills: Writing and verbal skills, information-gathering, fact-checking, the synthesis of ideas, and deductive logic.
2. Technological Skills: Both the ability to use effectively, as well as the knowledge of, current delivery systems for information and their impacts.
3. Philosophical Grounding: Understanding of the philosophical, historical, and ethical antecedents of modern mass journalism and communication practice in the context of the First Amendment and a free and open society, and how these lessons apply in day-to-day mass media practice for media producers and consumers.
4. Critical Thinking: The ability to evaluate mass media messages and campaigns, to understand how media and society interact, and the implications of that interaction.
5. Professional and Personal Responsibility: Affirmation of the individual’s responsibilities as either a producer or consumer of information in a democratic mass media age.

The Department of Journalism and Communication maintains professional studios and labs, designed to train students in various communications and journalism skills. These include the multimedia computer newsroom, a digital nonlinear video editing lab, a full TV studio, and a photographic darkroom. Students receive instruction in traditional journalistic basics, such as writing, information-gathering, reporting, and video production; in new technologies of online information gathering; and in critical skills of media literacy.

Requirements

Course Requirements

Journalism majors must complete a minimum of 30 credits and a maximum of 36 credits (38 for Broadcast/Electronic Media emphasis) in Journalism and Communication courses, while pursuing one of the three course sequences outlined below. Of the 120 semester credits required for graduation from Utah State University, Journalism majors must complete at least 65 credits in other departments within the College of Humanities, Arts, and Social Sciences. In addition, majors must complete a minor/cognate area outside of the Journalism and Communication Department, selected with the approval of an advisor.

Therefore, the basic Journalism course of study is as follows: Journalism and Communication courses, 30-36 credits; University Studies courses, 30 credits; courses in the minor/cognate area, 18 credits; electives from outside the Journalism and Communication Department, 36-40 credits; Total Credits, 120.

Major Status

Students may apply for major status upon completion of a minimum of 60 semester credits, including the Journalism Premajor Core requirements, while maintaining a 2.5 cumulative GPA. Students may declare themselves as Journalism Premajors at any time after their admission to the University. Majors must maintain a minimum 2.5 GPA, both overall and in the major. Students whose GPA drops below 2.5 will be placed on probation and may be dropped from the major if grades do not improve within one semester. All courses in the major must be taken for a grade (not Pass-Fail). Courses must be taken in sequence.

Students transferring from other institutions may be accepted into the major if they fulfill these requirements. Up to 9 transferred semester credits may count toward the major, if approved by an advisor.

The Department of Journalism and Communication and Utah State University allow students to take a class a maximum of three times. Failure to achieve the Journalism and Communication Department’s minimum grade of C+ in three attempts in any of the three premajor core classes, or C in any other JCOM course required for the major, will result in the student being dropped from the Journalism major.

Students attempting to register for any JCOM class for the third time will be required to meet with the department head, who will remind them of the three-and-out rule. Students will be asked to sign a form attesting to their understanding of this rule.

Students must complete the premajor core (JCOM 1130, 1500, and 2010) with a C+ or better before continuing in the Journalism major. Students lacking the minimum grades in the premajor core will be blocked from taking courses in the Broadcast/Electronic Media, Print Journalism, and Public Relations/Corporate Communications emphases.

Students dropped from the Journalism major for failure to achieve the minimum grades within three attempts, or for failure to maintain a GPA of at least 2.5, should speak with an advisor. Options may include switching to another major or creating an Interdisciplinary Studies major.
Department of Journalism and Communication

Premajor Core Requirement (9 credits)
The following courses are required for all majors, and must be completed prior to application for major status:

- JCOM 1130 Beginning Newswriting for Mass Media (F,Sp,Su) ............3
- JCOM 1500 (BSS) Introduction to Mass Communication (F,Sp) ............3
- JCOM 2010 (BSS) Media Smarts: Making Sense of the Information Age (F,Sp) ............................................................3

Prior to taking JCOM 1130, students must complete ENGL 1010, Introduction to Writing (or equivalent) and an English proficiency test. Majors must complete each of the premajor requirements with a C+ or better.

Major Requirements (6 credits)
The following courses are required for all majors after acceptance into the department:

- JCOM 2160 (CI) Introduction to Online Journalism (F,Sp) ............2
  (prereq: min of C+ in JCOM 1130, 1500, and 2010)
- JCOM 4000 Senior Seminar in Mass Communication (F,Sp) ............1
  (prereq: senior standing)
- JCOM 4030 Mass Media Law (F,Sp) ..............................3
  (prereq: junior standing or instructor’s permission)

Emphasis Areas
Each student must select one of the following emphasis areas:

- Broadcast/Electronic Media Emphasis (30-38 credits)

  A. Premajor Core Requirements (9 credits)
  Journalism majors must complete the Premajor Core Requirements before taking courses in section B below.

  B. Broadcast/Electronic Media Requirements (12 credits)
  - JCOM 2230 Writing for Electronic Media (F) ............................3
  - Additional major requirements (JCOM 2160, 4000, 4030) .............6

  C. Newscast or Corporate Video/Multimedia (6-8 credits)
  Students should complete one of the two pairs of courses listed below.
  - JCOM 4210 (CI) Newscast I (F,Sp) (4 cr) and
  - JCOM 4220 (CI) Newscast II (F,Sp) (4 cr) ............................8
  Or
  - JCOM 4230 Corporate Video (F,Sp) (3 cr) and
  - JCOM 5210 Website Design and Production (F,Sp) (3 cr) ............6

  D. Communication Electives (3-9 credits)
  Students should consult with their advisor to choose appropriate electives.

Print Journalism Emphasis (30-36 credits)

  A. Premajor Core Requirements (9 credits)
  Journalism majors must complete the Premajor Core Requirements before taking courses in section B below.

  B. Print Journalism Requirements (15 credits)
  - JCOM 2170 (CI) Reporting Public Affairs (F,Sp) .......................3
  - JCOM 3110 (CI) Beyond the Inverted Pyramid (F,Sp) .................3
  - JCOM 3120 (CI) Copy Editing and Publication Design (F,Sp) .........3
  - Additional major requirements (JCOM 2160, 4000, 4030) .............6

  C. Communication Electives (6-12 credits)
  Students should consult with their advisor to choose appropriate electives.

Public Relations/Corporate Communications Emphasis (30-36 credits)

  A. Premajor Core Requirements (9 credits)
  Journalism majors must complete the Premajor Core Requirements before taking courses in section B below.

  B. Required Courses (12 credits, may be taken concurrently)
  - JCOM 2300 Introduction to Public Relations (F,Sp) ..................3
  - JCOM 2310 (CI) Writing for Public Relations (F,Sp) ...............3
  - Additional major requirements (JCOM 2160, 4000, 4030) ............6

  C. Upper-division Required Courses (6 credits; must be taken in sequence after completion of JCOM 2300, 2310)
  - JCOM 3300 Strategic Research Methods in Public Relations (F,Sp) .3
  - JCOM 5300 (CI) Case Studies in Public Relations (F,Sp) ............3

  D. Electives (3-9 credits; at least 3 credits in skills course; 3 credits upper division)

Other Communications Electives
In addition to the Pre-major, major, and emphasis area courses listed above, students must select additional electives from courses in the Department of Journalism and Communication, to ensure a total of 30-36 credits completed in the Journalism and Communication Department.

Sample Four-year Plan for Journalism Major, Broadcast/Electronic Media Emphasis

Minimum GPA for Admission: 2.5, Career
Minimum GPA for Graduation: 2.5, major courses; 2.5 USU;
2.5, Career
Minimum Grade Accepted: C in major courses; C+ in JCOM 1130, 1500, and 2010

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (30 credits)

Fall Semester (15 credits)
- ENGL 1010 (CL1) Introduction to Writing: Academic Prose ..........3
- JCOM 1500 (BSS) Introduction to Mass Communication .............3
- Quantitative Literacy (QL) course .............................................3
- University Studies Breadth course .......................................3
- Elective course(s) .................................................................3

Spring Semester (15 credits)
- JCOM 1130 Beginning Newswriting for the Mass Media ..........3
- Minor or Cognate course .....................................................3
- University Studies Breadth courses .......................................6
- Elective course(s) .................................................................3

Complete the CIL exams by the end of the Freshman Year.

Sophomore Year (29 credits)

Fall Semester (15 credits)
- ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode .................................................................3
- JCOM 2160 (CI) Introduction to Online Journalism (F,Sp) ............3
- JCOM 4000 Senior Seminar in Mass Communication (F,Sp) ............1
- JCOM 4030 Mass Media Law (F,Sp) ...........................................3
- JCOM 4210 (CI) Newscast I (F,Sp) (4 cr) and
- JCOM 4220 (CI) Newscast II (F,Sp) (4 cr) ............................8
- Or
- JCOM 4230 Corporate Video (F,Sp) (3 cr) and
- JCOM 5210 Website Design and Production (F,Sp) (3 cr) ............6

Complete the CIL exams by the end of the Sophomore Year.

Summarize with a few paragraphs, if possible:...

Students completing this emphasis have the option of taking both JCOM 4210 (CI) Newscast I (4 cr) and JCOM 4220 (CI) Newscast II (4 cr) or substituting both JCOM 4230 Corporate Video (3 cr) and JCOM 5210 Website Design and Production (3 cr). Students choosing the second option must make up the credit difference with a 3-credit JCOM upper-division elective course to accumulate a minimum of 120 credits, as required for graduation. In addition, students completing the second option must complete two Communications Intensive (CI) courses.

Utah State University 2006-2007 General Catalog

Journalism Minor

Students may earn a minor in Journalism by completing a minimum of 18 JCOM credits. The minimum GPA requirements for Journalism minors are the same as those required for Journalism majors.

These credits must include:
JCOM 1130 Beginning Newswriting for the Mass Media (F,Sp,Su) (3 cr) or JCOM 2010 (BSS) Media Smarts: Making Sense of the Information Age (F,Sp) (3 cr) .................................................................3
JCOM 1500 (BSS) Introduction to Mass Communication (F,Sp) ................................3

For the remaining 12 JCOM credits, students must select one of the following options:
(a) JCOM 2170 (CI) Reporting Public Affairs (F,Sp) .........................................................3
JCOM faculty advisor-approved upper-division JCOM credits ....................................9
(b) JCOM 2220 Introduction to Video Media (F,Sp) ..........................................................3
JCOM 2230 Writing for Electronic Media (F,Sp) .............................................................3
JCOM faculty advisor-approved upper-division JCOM credits .....................................6
(c) JCOM 2300 Introduction to Public Relations (F,Sp) .........................................................3
JCOM 2310 (CI) Writing for Public Relations (F,Sp) .........................................................3
JCOM faculty advisor-approved upper-division JCOM credits .....................................6

Financial Support

In addition to general scholarships and other financial support opportunities available through the University and the College of Humanities, Arts and Social Sciences, the Department of Journalism and Communication awards various scholarships to juniors, seniors, and graduate students. For a listing of scholarships, deadlines, and application requirements, contact the Department of Journalism and Communication. In addition, many professional paid and unpaid internships are available through the department.

Careers in Journalism and Communication

Journalism majors often begin their careers in various media professions, such as newspapers, radio and TV broadcasting, and public relations, many serving as interns while still attending school. Upon graduation, they land jobs in a variety of capacities for both
journalism businesses and other industries requiring workers with excellent communication and problem-solving skills. In recent years, USU journalism students have routinely won state, regional, and national awards in print and video journalism, multimedia and new technologies, and, increasingly, public relations.

This success translates into an excellent reputation for USU students among businesses hiring USU students as interns and hiring USU graduates for professional positions. Jobs held by recent graduates include newspaper and magazine reporter, photographer, graphic artist, and editor; radio and television reporter, anchor, and producer; public relations director and account executive; multimedia software designer for HTML, web pages, CD-ROMs, etc.; and public information officer for politicians, legislative and lobbying groups, sports teams, and colleges, as well as for environmental organizations and other groups in the business and public sectors. Training and expertise in communication, including writing and reporting, visual literacy, publication layout and design, computer graphics, and online applications, prove to be valuable add-on skills for graduates entering a variety of occupations or going on to graduate school and law school.

In addition to these kinds of opportunities enjoyed by undergraduates, master's degree graduates often return to communication careers in new capacities, or teach at the community college level in journalism and communication departments.

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with a faculty mentor in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu; or contact the Journalism and Communication departmental advisor, Penny Byrne, at penny.byrne@usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information

For further information about publications, curriculum, scholarships, faculty, and other program offerings, including USU’s TV studio facilities; weekly newscasts and TV programs; the award-winning student news website, the Hard News Café; and the Media and Society Lecture Series; check out the Journalism and Communication Department’s website: http://www.usu.edu/journalism

For detailed information about requirements for the Journalism major and minor, see the major requirement sheet, which can be obtained from the department, or accessed online at: http://www.usu.edu/ats/majorsheets/

Graduate Programs

The Master of Science (MS) and the Master of Arts (MA) degrees in Communication combine professional practice and theoretical training, and are designed to fit individual student needs. Students may specialize in print, photo, or broadcast journalism. Application to the graduate program is made through the USU School of Graduate Studies.

Objectives

The master’s program in Communication at Utah State University offers a three-track approach to graduate study, designed for the maximum individual flexibility in pursuit of the student’s goals.

The Plan A, also known as the “Thesis Option” or “Media Research,” is a course of study designed for students considering or planning to go on to a doctoral program. The Plan A option requires more coursework in theory and methodology, as well as in research tools, in order to provide grounding for advanced study at the PhD level, whether in communication or another discipline. This option also requires completion of a master’s thesis, consisting of original research.

The Plan B, also known as the “Professional Option” or “Media Practice,” is designed for students seeking the master’s degree as a terminal degree, and planning to go from USU into the mass media professions, or into a teaching position at the junior college level. Typically, Plan B students are mid-career media professionals seeking retooling, refresher, or credentials for community college teaching. The Plan B option requires a professional project, approved by a major professor, in place of the research thesis.

The Plan C, another “Professional Option,” is the same as the Plan B except, instead of a professional project, the student enrolls in additional coursework.

All three options—A, B, and C—require the student to pass comprehensive exit exams.

Graduate students in Communication work closely with advisors throughout their programs to design coursework and a research or professional activity agenda, along with appropriate study in a cognate area outside of Communication, that will permit them to achieve their individual goals, within the core framework of Communication coursework, whether they include professional training or additional doctoral work.

Admission Requirements

For admission to the graduate program in Communication, all students must complete the department’s English Language Proficiency Examination, and must complete or demonstrate competency in the following Communication foundation courses:

JCOM 1130 Beginning Newswriting for the Mass Media (F,Sp,Su)…….3
JCOM 2010 (BSS) Media Smarts: Making Sense of the Information Age (F,Sp)……………………………………………………3
JCOM 3110 (CI) Beyond the Inverted Pyramid (F,Sp)……………………3
JCOM 4030 (DSS) Mass Media Law (F,Sp)…………………………….3

Competency may be demonstrated through previous coursework or experience, and one or more of these requirements may be waived with permission of the graduate program coordinator. These credits do not count toward the graduate degree. In addition, other undergraduate courses may be required.
Degree Requirements

Students may enroll in the Plan A (thesis), Plan B (Professional Option, with professional project), or Plan C (Professional Option with additional coursework in lieu of project) as outlined below. Plans A and B require 30 semester credits, while Plan C requires 33 semester credits. Plan A is intended for students planning to continue graduate study, teach, or enter professions requiring research skills. Plans B and C are intended for students seeking a terminal professional degree. Selection of the A, B or C option must be made in consultation with the student's advisor and filed with the graduate coordinator by the end of the first semester of study.

All students must complete core requirements. Students must, in consultation with their advisor, select an appropriate research tools class in research methods; the course need not be taught by the Journalism and Communication Department. To remain in good standing, all students must fulfill Graduate School requirements.

Plan A: Media Research
Core Requirements (21 credits). All students must complete the following courses: JCOM 6000 (3 cr.), 6020 (3 cr.), 6040 (3 cr.), 6400 (3 cr.), and 6970 (6 cr.). In addition, students must select an appropriate 3-credit Research Tools course (from any department), providing methodological training most appropriate for the student, in consultation with the advisor.

Cognate/Electives (9 credits). With advisor permission, students may include additional Journalism and Communication electives.

Plan B: Professional Option (Project)
Core Requirements (18 credits). All students must complete the following courses: JCOM 6000 (3 cr.), 6020 (3 cr.), 6040 (3 cr.), 6400 (3 cr.), and 6970 (3 cr.). In addition, students must select an appropriate 3-credit Research Tools course (from any department), providing methodological training most appropriate for the student, in consultation with the advisor.

Cognate/Electives (12 credits). With advisor permission, students may include additional Journalism and Communication electives.

Plan C: Professional Option (Additional Coursework)

Core Requirements (15 credits). All students must complete the following courses: JCOM 6000 (3 cr.), 6020 (3 cr.), 6040 (3 cr.), and 6400 (3 cr.). In addition, students must select a 3-credit Research Tools course (from any department), in consultation with the advisor.

Cognate/Electives (18 credits). With advisor permission, students may include additional Journalism and Communication electives.

Additional Information

For more information about graduate studies in the Department of Journalism and Communication, contact the School of Graduate Studies or the Department of Journalism and Communication. Also, check out the departmental website at: http://www.usu.edu/journalism

Journalism and Communication Faculty

Professor
Edward C. Pease, journalism, media criticism

Professor Emeritus
Nelson B. Wadsworth, print journalism

Associate Professors
Penny M. Byrne, broadcasting, media law
Brenda Cooper, media criticism, gender and mass communication
Michael S. Sweeney, print journalism, media history

Associate Professors Emeritus
Scott A. Chisholm, media management, literary journalism
James O. Derry, international mass communication development

Assistant Professors
Cathy Ferrand Bullock, mass communication theory and research methods
Les A. Roka, public relations
Nancy M. Williams, print journalism, Internet

Video Lab Supervisor
S. Dean Byrne, broadcast and electronic media

Lecturer
R. Troy Oldham, public relations, corporate communications

Adjunct Instructors
Cami Boehme, Internet
Tim Vitale, public relations
Jay C. Wamsley, print journalism

Graduate Program Director:
John C. Ellsworth, Fine Arts Visual 238, (435) 797-0504, john.ellsworth@usu.edu

Degrees offered: Bachelor of Landscape Architecture (BLA) and Master of Landscape Architecture (MLA); Master of Science (MS) in Bioregional Planning. BLA and first professional MLA programs are fully accredited by the American Society of Landscape Architects.

Department Objectives

The objectives of the department are to (1) provide an educational and technical program responsive to current societal needs related to environmental planning, landscape architecture, and urban design; (2) give students the opportunity to participate in collaborative learning experiences with other disciplines on campus; (3) prepare students for professional careers in the private or public sector; and (4) conduct original research to advance the body of knowledge in landscape architecture, environmental planning, and design.

Undergraduate Programs

Admission and Graduation Requirements

The Bachelor of Landscape Architecture (BLA) degree program is an intensive four-year studio-based course of study, fully accredited by the American Society of Landscape Architects. Accreditation standards require the department to maintain a reasonable faculty/student ratio. Space in the program is restricted by faculty availability and faculty size. Admission to the upper division is competitive, and is limited to students who are determined by the faculty to have the best potential for academic success. Matriculation into the upper division will normally be limited to 25 students, although additional students may be matriculated in special circumstances at the discretion of the LAEP faculty.

Any student admitted to USU is eligible for enrollment in lower-division LAEP courses. Declared LAEP majors will be advised of their relative class standing at the mid-point of their sophomore year, to assist in their personal academic career planning. At the end of the sophomore year, a selection process will determine which students will matriculate into the upper division of the program.

Students applying for matriculation must have a minimum USU GPA of 2.5. Eligibility for matriculation requires the completion of the following prerequisite courses:

LAEP 1030 (BCA) Introduction to Landscape Architecture (F,Sp,Su) ................................................................. 3
LAEP 1200 Basic Graphics in Landscape Architecture (F) .......... 4
LAEP 1350 Theory of Design (Sp) .................................................. 4
LAEP 2300 History of Landscape Architecture (F) .................. 3
LAEP 2600 (Qi) Landscape Construction I (F) .................... 4
LAEP 2650 Architecture and the Built Environment (Sp) .......... 4
LAEP 2700 (Ci) Site Analysis and Design (F) ....................... 5
LAEP 2720 Site Planning and Design (Sp) ......................... 5
ETE 1200 Computer-Aided Drafting and Design (F,Sp,Su) (3 cr) or ETE 2270 Computer Engineering Drafting (F,Sp,Su) (2 cr) ........ 2 or 3
PLSC 2620 Woody Plant Materials: Trees and Shrubs for the Landscape (F) ....................................................... 3

Selection of students to be matriculated to the upper division is based on a letter of intent; a portfolio demonstrating creative potential, problem solving skills, and graphic fluency; and cumulative GPA earned in the eight LAEP prefix courses listed above. Portfolios and letters of intent are to be submitted by the last Monday in March. Detailed information regarding the letter of intent and portfolio requirements may be obtained from the LAEP Department website: http://www.usu.edu/laep/. The final selection of students to matriculate to the upper division is a decision of the LAEP faculty. The review of students for matriculation will take place during the week following spring semester final exams, and students will be notified as soon as possible thereafter.

Students who have had LAEP courses waived or covered by articulation from another institution will have their GPA calculated only on the basis of LAEP grades actually earned at USU.

Transfer students from other programs of landscape architecture who have completed the equivalent of the lower-division USU LAEP coursework may apply for admission to the upper division of the program through submission of a portfolio, letter of intent, transcript of grades, and description of landscape architecture courses taken. Students who have previously been enrolled and matriculated into the upper division at USU, and must interrupt their education for up to three academic years, may resume their studies at the same level of the program which they departed upon returning to USU. Students who have stopped-out longer than three years must reapply, following the guidelines specified for transfer students. The decision on applications from transfer students and for readmission rests with the LAEP faculty and will be considered on a case-by-case basis.

Computer Requirement

Computer competency is essential in the contemporary professional environment. Appropriate computer skills are required for most entry-level opportunities in landscape architecture and environmental planning.

Course content increasingly relies on computer skills and personal access to computers with the appropriate software.

All students entering the upper division of the BLA program must purchase, lease, or otherwise obtain continuing and uninterrupted access to a personal computer which meets the configuration requirements specified by the LAEP Department. Contact the department for current specifications.

Recommended High School Courses

High school students planning to major in landscape architecture may enhance their preparation with courses in art, natural sciences, social sciences, and math through college algebra.
Department of Landscape Architecture and Environmental Planning

BLA Degree
The Bachelor of Landscape Architecture (BLA) degree is a four-year program consisting of courses relating to theory, design, history, and the various technical areas of the profession. The degree provides a substantial basis for a professional career, as well as an excellent foundation for advanced graduate studies. In addition to the courses required for upper division status, the following LAEP courses are required for graduation:

- LAEP 3100 Recreation/Open Space (F) ............................................ 5
- LAEP 3120 Residential Planning and Design (Sp) ........................... 5
- LAEP 3300 Advanced Computer Applications in Landscape Architecture (F) ................................................................. 4
- LAEP 3500 Planting Design (F) ........................................................... 2-4
- LAEP 3610 Landscape Construction II (Sp) ........................................... 4
- LAEP 3700 City and Regional Planning (Sp) ........................................... 3
- LAEP 4100 Urban Theory, Systems, and Design (F) ............................ 5
- LAEP 4110 Construction Document Preparation (F) ........................... 4
- LAEP 4120 Emerging Areas in Landscape Architecture I (F, Sp, Su) ........................... 2
- LAEP 4130 Emerging Areas in Landscape Architecture II (F, Sp, Su) ........................... 2
- LAEP 4920 (Cl) Professional Practice (Sp) ........................................... 2

Non-LAEP Courses Required for BLA majors:
The following courses taught outside the LAEP Department are required for all BLA majors. Note that several of these courses will also assist in fulfillment of University Studies Requirements:

- ASTE 3050 (CI) Technical and Professional Communication
  Principles in Agriculture (F, Sp) (3 cr) or
- ENGL 3080 (CI) Introduction to Technical Communication
  (F, Sp) (3 cr) .................................................................................. 3
- GEO 3100 (DSC) Natural Disasters (Sp) ............................................. 3
- AWER 1200 (BLS) Biodiversity: Its Conservation and Future
  (F, Sp) (3 cr) or
- FRWS 2200 (BLS) Ecology of Our Changing World (F, Sp) (3 cr) .... 3
- MATH 1010 Intermediate Algebra (F, Sp, Su) ...................................... 3
- SOC 3610 (DSS) Rural Sociology (F) (3 cr) or
- SOC 4620 (DSS) Sociology of the Environment and Natural
  Resources (Sp) (3 cr) ........................................................................... 3
- PLSC 2620 Woody Plant Materials: Trees and Shrubs for the
  Landscape (F) .................................................................................... 3
- ETE 1200 Computer-Aided Drafting and Design (F, Sp, Su) (3 cr) or
- ETE 2270 Computer Engineering Drafting (F, Sp, Su) (2 cr) .............. 2 or 3

All required courses with an LAEP prefix must be passed with a grade of C- or better. Students must also complete the University Studies requirements. For more detailed information, see major requirement sheet available from the department, or online at:
http://www.usu.edu/ats/majorsheets/

Required Courses—Four-year Sequence

Minimum GPA for Admission: 2.5, USU

Additional Matriculation Requirements: completion of prerequisite courses, portfolio review, and submission of letter of intent (usually at end of the sophomore year)

Minimum GPA for Graduation: 2.0, USU

Minimum Grade Accepted: C- in major courses
