This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (31-32 credits)

Fall Semester (16 credits)
- LAEP 1030 (BCA) Introduction to Landscape Architecture .................. 3
- LAEP 1200 Basic Graphics in Landscape Architecture ...................... 4
- PLSC 2620 Woody Plant Materials: Trees and Shrubs for the
  Landscape ......................................................................................... 3
- Breadth Physical Sciences (BPS) course .................................................. 3
- Elective course(s) .................................................................................. 3

Spring Semester (15-16 credits)
- LAEP 1350 Theory of Design .............................................................. 4
- GEO 3100 (DSC) Natural Disasters ...................................................... 3
- ETE 1200 Computer-Aided Drafting and Design (3 cr) or
- ETE 2270 Computer Engineering Drafting (2 cr) .............................. 2 or 3
- University Studies1 and elective courses ............................................. 6

Sophomore Year (30 credits)

Fall Semester (15 credits)
- LAEP 2300 History of Landscape Architecture .................................... 3
- LAEP 2600 (CI) Landscape Construction I ........................................ 4
- LAEP 2700 (CI) Site Analysis and Design ........................................... 5
- University Studies2 or elective course(s) ............................................. 3

Spring Semester (15 credits)
- LAEP 2650 Architecture and the Built Environment ............................ 4
- LAEP 2720 Site Planning and Design ................................................. 5
- University Studies3 and elective courses ............................................. 6

Junior Year (31 credits)

Fall Semester (16 credits)
- LAEP 3100 Recreation/Open Space ................................................... 5
- LAEP 3300 Advanced Computer Applications in Landscape
  Architecture ....................................................................................... 4
- LAEP 3500 Planting Design .............................................................. 4
- University Studies or elective course(s) .............................................. 3

Spring Semester (15 credits)
- LAEP 3120 Residential Planning and Design ..................................... 5
- LAEP 3610 Landscape Construction II ............................................... 4
- LAEP 3700 City and Regional Planning ............................................. 3
- ASTE 3050 (CI) Technical and Professional Communication
  Principles in Agriculture ................................................................. 3

Senior Year (30 credits)

Fall Semester (15 credits)
- LAEP 4100 Urban Theory, Systems, and Design ................................ 5
- LAEP 4110 Construction Document Preparation ................................ 4
- SOC 3610 (DSS) Rural Sociology (3 cr) or
- SOC 4620 (DSS) Sociology of the Environment and Natural
  Resources (3 cr) ............................................................................. 3
- Breadth American Institutions (BAI) course ........................................... 3

Spring Semester (15 credits)
- LAEP 4120 Emerging Areas in Landscape Architecture .................... 2
- LAEP 4130 Emerging Areas in Landscape Architecture .................... 2
- LAEP 4920 (CI) Professional Practice .................................................. 2
- University Studies and elective courses ............................................. 9

1Recommended: MATH 1010, Intermediate Algebra; ENGL 1010 (CL1), Introduction to
Writing: Academic Prose.
2Recommended: ENGL 2010 (CL2), Intermediate Writing: Research Writing in a Persuasive
Mode.
3Recommended: AWER 1200 (BLS), Biodiversity: Its Conservation and Future; or FRWS 2200
(BLS), Ecology of Our Changing World.
Undergraduate Travel Requirement
The undergraduate curriculum includes a requirement for a minimum of 1 credit of travel and study outside of the bioregion. This travel requirement can be satisfied by one or more of the following courses, depending upon the specific content of the course at the time of offering. (Check with the department for specific information.)

LAEP 4120 Emerging Areas in Landscape Architecture I (F,Sp,Su) .... 2
LAEP 4130 Emerging Areas in Landscape Architecture II (F,Sp,Su) ... 2
LAEP 4350 Travel Course (F,Sp,Su) ............................................ 1-3
LAEP 4900 Special Problems (F,Sp,Su) .................................... 1-5

Study Abroad
The department currently has cooperative agreements with the University of Ljubljana, Slovenia, and the Czech Agricultural University in Prague, Czech Republic, where students can study for a semester. Approved courses of study in design and planning programs offered by other institutions may count toward the travel requirement; however, course substitutions are subject to faculty approval.

Faculty-Sponsored Field Study Travel
The department already has a long tradition of a professionally oriented “Spring Break” trip, which is offered for undergraduate students under LAEP 4350. Recent trips have included San Francisco, Los Angeles, Portland, Seattle, Vancouver, Boston, and Washington DC.

The department also offers an international (2-week) field study experience, the destination of which changes from year to year. For example:

May 2005—The Italian Renaissance Villa and Town Planning: Looks at Greek (Paestum) and Roman (Pompeii, Roman Forum) antecedents, as well as Renaissance Villas from the region surrounding Rome to Florence and the Tuscan landscape.

March 2006—Paris and Berlin: Looks at the development of the urban fabric with a concentration on contemporary urban development issues, as well as public places and architecture of historical significance.

Individual Travel
Undergraduate students desiring to count individual travel toward their degree will need to enroll for LAEP 4900 (Special Problems). Prior to enrollment, students must have a sponsoring faculty member and must submit a proposal for individual travel/study to the faculty for review. The content, objectives, and outcomes of the proposal will be evaluated for consistency with the educational objectives of the travel program.

Specialized Service Courses
The following courses are available for majors in other fields who may wish to gain an exposure to the different aspects of landscape architecture and environmental planning. A minor is not given in LAEP; however, these service courses are available, without prerequisites, for those requesting them.

LAEP 1030 (BCA) Introduction to Landscape Architecture (F,Sp,Su) ................................................................. 3
LAEP 1200 Basic Graphics in Landscape Architecture (F) ............ 3
LAEP 2300 History of Landscape Architecture (F) .................... 3
LAEP 3700 City and Regional Planning (Sp) ............................ 3

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school.

The LAEP Department offers a departmental honors program for BLA students. To qualify, students must be matriculated in the upper division of the LAEP program and must have a cumulative GPA of at least 3.50. The 15-credit honors course requirement for LAEP honors recognition is met by completion of the following: (1) a 3-credit honors thesis during the senior year, (2) two readings seminars (LAEP 6910 and 6930), and (3) an additional 10 credits of upper-division honors coursework.

Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information
For detailed information about requirements for the Bachelor of Landscape Architecture, see the major requirement sheet, which can be obtained from the department, or accessed online at:
http://www.usu.edu/ats/majorsheets/

Graduate Programs
The department offers three master’s degrees, including two in Landscape Architecture and one in BioRegional Planning.

MLA First Professional Degree in Landscape Architecture
The department offers a three-year, first professional degree for students with a bachelor’s degree in any area of study. This option allows students having a wide range of undergraduate experience to obtain an accredited degree in landscape architecture that fulfills the educational requirement for professional registration and allows entrance into the field of landscape architecture.

MLA Advanced Professional Degree
Students with a bachelor’s degree in Landscape Architecture can obtain a master’s degree within two years. This advanced professional degree affords landscape architects the opportunity to expand their knowledge in areas of special interest.

Master of Science in Bioregional Planning
This joint interdisciplinary program is offered by the department in conjunction with the Department of Environment and Society, College of Natural Resources.

For more information about required and recommended coursework, as well as other requirements for these degrees, visit the departmental website: http://www.usu.edu/laep/
**Department of Landscape Architecture and Environmental Planning**

**Master of Landscape Architecture**

The program for the Master of Landscape Architecture (MLA) emphasizes both traditional site scale planning and design, as well as broader areas of the profession, such as large-scale regional landscape analysis and planning, and computer-aided design and planning techniques. The MLA first professional degree is fully accredited by the Landscape Architectural Accreditation Board of the American Society of Landscape Architects.

The Master of Landscape Architecture program is designed to prepare the student for the landscape architect’s challenging role of providing a holistic approach to environmental planning and design. In order for landscape architects to contribute effectively to an interdisciplinary effort, they must be competent in the fundamentals of landscape architecture and also have an understanding of the subject matter of other professions. Landscape architects must master the communication skills necessary to achieve meaningful collaboration. In support of this philosophy, the following are the major objectives of the MLA program.

1. To provide a well-structured curriculum in fundamental professional knowledge and skills.
2. To research, analyze, and resolve land use and design issues related specifically to the Intermountain West. The scope of the program examines national, regional, and local issues; and their impact on the visual, physical, and cultural setting of the Intermountain West.
3. To integrate field experience and research into major graduate studio courses structured around real-world projects.
4. To provide opportunities for each student for exploration and development of an area of concentration as noted elsewhere.
5. To draw upon the regional, national, and international relationships of Utah State University to facilitate a program of academic and professional excellence which will allow the student to achieve eminence in practice, research, or education.

**Areas of Faculty Expertise**

The Master of Landscape Architecture Program provides opportunities for each student to study and conduct research in areas which take advantage of the strengths of Utah State University and the landscape context of the Intermountain West centered around the expertise of the LAEP Department faculty, including: Land Rehabilitation/Revegetation—Ellsworth and Johnson; Regional Landscape Planning—Brabec, Kumble, Nicholson, and Shapiro; Visual Resources Management—Ellsworth; Urban Wildlife/Refuge Planning—Johnson; Riparian Systems—Bell and Johnson; Community Planning—Bell, Lavoie, Nicholson, and Timmons; Public Lands/Recreation—Borecki, Timmons, Urban Design/Theory—Lavoie; Historic Landscapes and Preservation—Borecki, Brabec, and Timmons; Land Use Law—Brabec; Open Space Conservation and Greenways Development—Brabec, Johnson, Kumble, and Shapiro; Site Planning—Bell, Johnson, Lavoie, and Timmons.

These areas of faculty expertise include an assessment of the relevant environmental, design, social, economic, and public policy issues utilizing a wide range of computer-compatible techniques and models.

**Admission Requirements**

The application deadline for consideration in the first round of reviews is March 15. Applications received later than March 15 will be considered as space availability allows. February 1 is the application deadline for consideration for some scholarships, fellowships, and other financial aid. For general admissions requirements, see the appropriate sections of this catalog.

**Computer Requirement**

Computer competency is essential in the contemporary professional environment. Appropriate computer skills are required for most entry-level opportunities in landscape architecture and environmental planning. Therefore, course content increasingly relies on computer skills and personal access to computers with the appropriate software.

All students entering the second year of the First Professional Degree MLA program and all students entering the first year of the Advanced Professional Degree MLA program must purchase, lease, or otherwise obtain continuing and uninterrupted access to a personal computer which meets the configuration requirements specified by the LAEP Department. Contact the department for current specifications.

**Course of Study**

The graduate program director oversees academic advising; however, all incoming students are assigned a faculty mentor until they have selected a thesis topic. A major professor whose interests are closely aligned to those of the student (see Areas of Faculty Expertise above and Areas of Concentration below) supervises thesis work. A minimum of 30 graduate-level credits, including thesis work, is required. Students supplement requirements with courses negotiated with the major professor and supervisory committee. An area of concentration may be pursued by selecting a relevant course of study, as outlined below.

**Areas of Concentration**

The program possesses an enviable reputation for graduating students with strong core professional skills. In addition to these skills, the department has the following four areas of concentration which reflect the strengths of the faculty, along with elective course offerings in other units of the University: (1) Open Space Conservation Planning and Green Space Design, (2) Cultural and Historic Landscapes, (3) Community Planning and Urban Design, and (4) Sustainable Landscapes. These four areas of concentration have recommended courses of study as outlined below, reflecting a depth of study in a particular area of landscape architectural theory and practice. Students may choose one of these areas, or they may create their own course of study to reflect their particular interests. Note that all students must complete the core MLA curriculum, in addition to courses noted in the various areas of concentration. For current requirements, contact the LAEP graduate program director. Since these areas of concentration are not approved as graduate specializations, they will not appear on student transcripts or diplomas.

**Open Space Conservation Planning and Green Space Design**

This area of concentration focuses on the conservation, planning, and design of open space. This focus will appeal to individuals who are interested in working for land trusts or for state and local governments in planning or land conservation roles, as well as to landscape architects in public or private practice who are interested in the design and planning of open space. With a strong basis in the Landscape Architecture program in the design and planning of open space (along with the theory, policy, and legal issues), supporting courses can be found in other units in the University. Elective courses can be found in
Sociology, focusing on conflict management and the social implications of resource policy; Economics, focusing on valuation and impact analysis; and Natural Resources, focusing on ecology, spatial systems, collaborative problem-solving, and conservation biology.

Primary Courses
LAEP 6100 Regional Landscape Analysis and Planning (F)..............5
LAEP 6110 Landscape Planning for Wildlife (Sp).............................3
LAEP 6310 Recreation and Open Space Planning and Design (F).....5
LAEP 6320 Residential Planning and Design (Sp)..........................5
LAEP 6750 Implementation and Regulatory Techniques
in Planning (F,Sp)........................................................................3
LAEP 6900 Special Problems (F,Sp,Su)............................................1-5
LAEP 6960 Master’s Project (F,Sp,Su) (1-6 cr) or
LAEP 6970 Thesis Research (F,Sp,Su) (1-6 cr).................................1-6

Supporting Coursework
LAEP 2300 History of Landscape Architecture (F).........................3
LAEP 2720 Site Planning and Design (Sp).......................................5
LAEP 4900 Special Problems: Site Analysis and Design (F)..........2
LAEP 6350 Planting Design for Sustainability (F)..........................4
LAEP 6740 Planning Theory and Implementation Issues (F).........3

Electives
ECON 5560 Natural Resource and Environmental Economics (Sp)....3
ECON 6710 Community Planning and Impact Analysis (F)..............3
ENVS 4000 (DSS) Human Dimensions of Natural Resource
Management (F)...........................................................................3
ENVS 5000 Collaborative Problem-Solving for Environment and
Natural Resources (Sp).................................................................3
FRWS 4600 Conservation Biology (Sp)............................................3
FRWS 6510 Topics in Spatial Ecology (Sp)....................................1-3
FRWS 7220 Community-based Conservation Partnerships (Sp)....3
NR 6510 Biophysical and Human Dimensions of
Ecosystems (F,Sp,Su)................................................................3
SOC 6630 Natural Resources and Social Development (Sp)............3
SOC 6640 Conflict Management in Natural Resources (Sp)..........3

Cultural and Historic Landscapes

The graduate concentration in Cultural and Historic Landscapes prepares students for work in the research, documentation, analysis, understanding, planning, and management of human-influenced landscapes. Cultural landscapes have been defined by the World Heritage Convention of UNESCO as representing the “combined works of nature and of man. They are illustrative of the evolution of human society and settlement over time, under the influence of the physical constraints and/or opportunities presented by their natural environment and of successive social, economic, and cultural forces, both external and internal.” They are grouped into three broad categories, which include: (1) the historic designed landscape or site, (2) the organically evolved or vernacular landscape, and (3) the associative cultural (ethnographic) landscape. (UNESCO. World Heritage Convention. Operational Guidelines for the Implementation of the World Heritage
Convention. Paris: UNESCO, 1996.) The National Park Service notes the importance of cultural landscapes in understanding the evolution of human societies. This curriculum path will appeal to students who want to apply their landscape architecture skills to community focused projects, which could range in scale from an ethnic neighborhood in a city of two hundred thousand to a downtown redevelopment project for a small town in the rural West. Opportunities upon graduation would include private firms offering planning and design services, as well as public agencies at the local, state or federal level.

Primary Courses
LAEP 6100 Regional Landscape Analysis and Planning (F)..............5
LAEP 6370 City and Regional Planning (Sp).....................................3
LAEP 6410 Redefining the Urban Landscape (F)............................5
LAEP 6740 Planning Theory and Implementation Issues (F)............3
LAEP 6750 Implementation and Regulatory Techniques
in Planning (F,Sp).........................................................................3
LAEP 6900 Special Problems (F,Sp,Su)............................................1-5

Supporting Coursework
LAEP 2720 Site Planning and Design (Sp).......................................5
LAEP 4900 Special Problems: Site Analysis and Design (F)..........2
LAEP 6900 Special Problems: Geographic Information
Systems (GIS) (F).........................................................................2

Electives
ECON 5560 Natural Resource and Environmental Economics (Sp)....3
ECON 5850 Regional and Community Economic Development (F)........3
GEOG 3610 Geography of Rural/Urban Planning (F)......................3
SOC 3600 Sociology of Urban Places (F)........................................3
Sustainable Landscapes

Sustainability is a broad concept. It can be integrated into virtually every aspect of landscape architecture and environmental planning. The sustainable landscapes area of concentration in the LAEP department is focused on sustainability issues associated with the built landscape and the interface between built landscapes and open space. Coursework includes such subjects as low water use landscaping, planting design, planning for urban wildlife, storm water management, community economic development, and green business. In addition to coursework and thesis writing, students in the sustainable landscapes area of concentration organize and implement the department’s annual Sustainability Conference, which is now in its eighth year.

Primary Courses

- **LAEP 6100 Regional Landscape Analysis and Planning (F)**
- **LAEP 6110 Landscape Planning for Wildlife (Sp)**
- **LAEP 6350 Planting Design for Sustainability (F)**
- **LAEP 6400 Low Water Landscaping (F)**
- **LAEP 6500 Special Problems (F, Sp, Su)**
- **LAEP 6960 Master’s Project (F, Sp, Su)** (1-6 cr) or **LAEP 6970 Thesis Research (F, Sp, Su)** (1-6 cr)

Supporting Coursework

- **BIOL 2220 General Ecology (F, Sp)**
- **LAEP 2600 Landscape Construction I (F)**
- **LAEP 3610 Recreation and Open Space Planning and Design (F)**
- **LAEP 3610 Landscape Construction II (Sp)**
- **LAEP 6750 Implementation and Regulatory Techniques in Planning (F, Sp)**

Electives

- **AWER 5490 Small Watershed Hydrology (F)**
- **AWER 6530 Water Quality and Pollution (Sp)**
- **AWER 7640 Riparian Ecology and Management (Sp)**
- **ENVS 4000 (DSS) Human Dimensions of Natural Resource Management (F)**
- **FRWS 7300/5300 Wildlife Damage Management Principles (Sp)**
- **FRWS 7400 Plant Population Ecology (F)**
- **GEO 3100 (DSC) Natural Disasters (Sp)**
- **NR 6510 Biophysical and Human Dimensions of Ecosystems (F, Sp, Su)**
- **NR 6520 Structure and Function of Ecological and Social Systems (F, Sp, Su)**
- **NR 6530 Integrated Inventory, Analysis, and Assessment of Ecosystems (F, Sp, Su)**
- **NR 6540 Ecosystem Management Implementation (F, Sp, Su)**
- **SOC 6620 Environment, Technology, and Social Change (Sp)**
- **SOC 6640 Conflict Management in Natural Resources (Sp)**
- **SOC 7640 Population and Environment (Sp)**
- **SOIL 4000 Soil and Water Conservation (F)**

Certificate Programs

**Interdisciplinary Graduate Certificate Program in Natural Resource and Environmental Policy:** Program goals are to provide students with a more comprehensive educational framework for understanding complex natural resource and environmental concerns and to develop the critical thinking and analytical skills needed to address these issues. Students will become familiar with concepts and principles of social, natural, and physical science approaches to natural resource policy.

**Interdisciplinary Certificate Program in Landscape Restoration (program currently being developed):** This certificate program is designed to prepare resource managers and landscape architects to meet the growing demand for professionals who can plan, design, and construct restoration projects in uplands or streams. This program is interdisciplinary, designed to train students for careers in government, education, and private consulting practice.

Graduate Travel Requirement

The graduate curriculum includes a requirement for a minimum of 1 credit of travel and study outside of the bioregion. This travel requirement can be satisfied by one or more of the following courses:

- **LAEP 6550 Travel Course (F, Sp, Su)**
- **LAEP 6900 Special Problems (F, Sp, Su)**

Study Abroad

The department currently has cooperative agreements with the University of Ljubljana, Slovenia, and the Czech Agricultural University in Prague, Czech Republic, where students can study for a semester and complete research projects as appropriate. Approved courses of study in design and planning programs offered by other institutions may count toward the travel requirement; however, course substitutions are subject to faculty approval.

Faculty-Sponsored Field Study Travel

The department already has a long tradition of a professionally oriented “Spring Break” trip, which is offered for graduate students under LAEP 6550. Recent trips have included San Francisco, Los Angeles, Portland, Seattle, Vancouver, Boston, and Washington DC.

The department also offers an international (2-week) field study experience, the destination of which changes from year to year. For example:

**May 2005**—The Italian Renaissance Villa and Town Planning: Looks at Greek (Paestum) and Roman (Pompeii, Roman Forum) antecedents, as well as Renaissance Villas from the region surrounding Rome to Florence and the Tuscan landscape.

**March 2006**—Paris and Berlin: Looks at the development of the urban fabric with an concentration on contemporary urban development issues, as well as public places and architecture of historical significance.

Individual Travel

Graduate students desiring to count individual travel toward their degree will need to enroll for LAEP 6900 (Special Problems). Prior to enrollment, students must have a sponsoring faculty member and must submit a proposal for individual travel/study to the faculty for review. The content, objectives, and outcomes of the proposal will be evaluated for consistency with the educational objectives of the travel program.

Additional Information

For more detailed information about currently required and recommended coursework, as well as other requirements for this degree, visit the departmental website: [http://www.usu.edu/laep/](http://www.usu.edu/laep/)
Master of Science in Bioregional Planning (joint degree program with Environment and Society)

Good planning and management of natural resources and systems supersedes individual disciplines, requiring an interdisciplinary approach for the successful resolution of environmental issues. The intent of this program’s curriculum is to integrate the biophysical disciplines more closely while also addressing the social and political sciences. This degree program is offered jointly by the Department of Landscape Architecture and Environmental Planning in the College of Humanities, Arts and Social Sciences, and by the Department of Environment and Society in the College of Natural Resources.

This program consists of a two-year period of study with a required thesis or paper/project. To maintain a program focus, the student selects from three clusters of coursework (research methods/case studies, biophysical, and social/economic policy). A minimum of 36 graduate-level credits, including 3-6 credits of thesis or paper/project is required. A capstone course is required for all LAEP students. The program contains a total of nine elective credits from which the candidate and his or her committee can formulate an area of concentration.

Course of Study
This two-year MS program is comprised of an interdisciplinary core of courses and faculty for addressing complex issues in the areas of bioregional planning and management. Emphasis is placed on four problematic content areas: biophysical, social/demographic, economic, and public policy. The spatial focus is on the planning for large landscape areas with dispersed populations with a primary economic base in agriculture, energy development, tourism/recreation, retirement communities, and natural resources.

The program requires a minimum of 36 graduate-level credits, including 3-6 credits of work on a thesis or paper/project. Nine of the required credits may be in an area of concentration. These nine credits are to be negotiated with the candidate’s major professor and supervisory committee. Requirements for the MS in Bioregional Planning are as follows:

Required
Environment Systems Research Institute (ESRI) certification course or ENVS 6900 (Geographic Information Systems), LAEP 6740, and ENVS 6900 (Shipley Seminar/ NEPA/EIS).

Research Methods/Case Studies (3-4 credits)
One of the following courses is required: FRWS 6500, SOC 6100, 6150.

Biophysical (3-4 credits)
One of the following courses is required: FRWS 6710, AWER 6330. For those students without a background in ecology, FRWS 4600 is also required. Credits earned for FRWS 4600 or equivalent do not apply to the graduate program.

Social/Economic Policy (3-4 credits)
One of the following courses is required: ENVS 6000, POLS 5180, or SOC 6630.

Capstone Course (5 credits)
LAEP 6100 is required for all LAEP students.

Area of Concentration (9 credits)
Nine credits should be available to the candidate for an area of concentration.

Thesis or Project (3 or 6 credits)
A thesis or Plan B paper/project option is required and is to be negotiated with the candidate, major professor, and supervisory committee.

Total Credits: 36-39

Environmental Field Service

The department sponsors a program of planning and design services in which MS, MLA, and MLA students may participate. The Environmental Field Service program offers students the opportunity to interact with community leaders and citizens and to test concepts and skills acquired in the classroom while working on real projects.

Internships and Cooperative Education

Many students take advantage of the practical learning opportunities available through internships and cooperative education programs. The department, student, and government agency or private firm, make the necessary arrangements. Internships and cooperative education experiences are not required for degree completion. In some cases, these experiences may be used as the basis for waiver of selected courses, subject to approval in advance by the major professor, graduate program director, and department head. Students completing these experiences are required to make a summary presentation to department faculty and students.

Financial Assistance

The application deadlines for scholarships and financial assistance vary. For current application deadline information, contact the LAEP Department, the USU Financial Aid Office, and the School of Graduate Studies. Acceptance to pursue graduate study does not guarantee the student financial assistance.

Career Opportunities

The Department of Landscape Architecture and Environmental Planning provides education for careers in landscape architectural site planning, design, environmental planning, and management, with special consideration for conditions in the Intermountain West. Graduates are employed by local, state, and federal agencies, as well as by private sector professional firms. LAEP graduates also find employment in academia at both the undergraduate and graduate levels.
Landscape Architecture and Environmental Planning Faculty

Sumner Margetts Swaner Professor
Tamara F. Shapiro, regional landscape planning

Professors
Elizabeth A. Brabec, cultural landscapes, landscape and open space conservation and management, land use law and policy
John C. Ellsworth, visual resources management, computer applications, disturbed lands rehabilitation
Craig W. Johnson, planting design, land rehabilitation, wildlife habitat planning and design, site planning

Associate Professors
David L. Bell, residential design, landscape construction, community planning and design
Caroline Lavoie, urban design and cultural landscapes, design theory, landscape planning theory

John K. Nicholson, urban and regional planning, computer applications, transportation
Michael L. Timmons, site planning and design, recreation and open space planning, landscape history, historic preservation

Associate Professor Emeritus
Vern J. Budge, landscape construction, recreation planning

Assistant Professors
Peter Kumble, regional landscape planning, professional practice, open space preservation
Margie Borecki, basic graphics, landscape construction, sustainability practices

Course Descriptions
Landscape Architecture and Environmental Planning (LAEP), pages 656-657.
Undergraduate Programs

Mission Statement

The Department of Languages, Philosophy, and Speech Communication offers programs in modern languages and literature, philosophy, and speech communication. While these programs differ widely in their curricula, they are bound together by two considerations: (1) an emphasis on humanistic content and method of inquiry; and (2) a recognition on the part of the departmental faculty that a critical part of becoming an educated person lies in achieving a greater understanding of one’s self and of others, an understanding opened up through insight into the spoken and written word.

Courses offered by the department provide majors and minors with opportunities to achieve this understanding by increasing their communicative, logical, interpretive, linguistic and research skills; their ability to function within an increasingly globalized society; and their awareness of ethical, aesthetic, and other values. Courses offered by the department also give students in the teaching emphasis and teaching minors the opportunity to serve the needs of the education professions.

Through its participation in the University Studies program, the department provides all students with an opportunity to gain knowledge of how people come to understand themselves through their cultural, literary, and philosophical achievements. The department also furthers the education of both traditional and nontraditional students through faculty participation in interdisciplinary programs such as Honors, Liberal Arts, Asian Studies, and Women and Gender Studies; and in cooperative education, distance learning, extension, and study-abroad programs.

Admission Requirements

Admission requirements for freshmen desiring entrance to major programs offered by the Department of Languages, Philosophy, and Speech Communication are the same as those for Utah State University (see pages 16-20). Transfer students from other institutions and from other majors within Utah State University must have an overall minimum GPA of 2.5 (2.75 for Spanish) to be admitted to the department’s major programs.

All students majoring in programs offered by this department must maintain a minimum GPA of 2.5 in their major (3.0 in Spanish) to be in good standing in the department and to obtain official approval for graduation.

Career Information

For career and graduate school information, students should contact undergraduate advisors in the department.

Scholarship Information

Four scholarships are offered through the Department of Languages, Philosophy, and Speech Communication. The Brett Blanch Memorial Scholarship is awarded to an outstanding philosophy major. The Carl T. Degener Memorial Scholarship is awarded to an outstanding language major at the junior level. Outstanding upper-division students in French (and under some circumstances Spanish) are eligible for the Jean Inness Scholarship. The Train Scholarship is awarded to an outstanding high school senior enrolling in a language or philosophy course at USU. For more details, contact the department office.
Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information

For detailed information about requirements for majors and minors within the Languages, Philosophy, and Speech Communication Department, see the major requirement sheets, which are available from the department, or which can be accessed online at: http://www.usu.edu/ats/majorsheets/

Graduate Program

Master of Second Language Teaching (MSLT)

The Master of Second Language Teaching (MSLT) degree program is designed for students desiring additional training at the graduate level in an integrative, interdisciplinary program combining coursework in the field of Foreign Language Education, Bilingual Education, and ESL/EFL Education. Attainment of the degree requires the completion of a minimum of 30 credits of coursework in the MSLT program. The program leading to the MSLT consists of a core curriculum of 18 credits and a professional curriculum of 12 credits. Courses in the core curriculum are designed to respond to the program’s emphasis areas in language, literacy, and culture. Courses in the professional curriculum address teaching methodology, curriculum preparation, materials development, and testing. A Master’s Project in the form of an original, independent work, Honors students enjoy the benefits of

This master’s degree program does not lead to licensure by the Utah State Board of Education. Individuals who do not have Utah State Board of Education licensure and wish to obtain that credential must take the three-semester Secondary Teacher Education Program (STEP) in the College of Education and Human Services.

For program information, including admission requirements, degree requirements, courses, and financial assistance, contact the departmental office or see the program’s website at: http://www.usu.edu/langphil/mlsl

Languages

Language faculty members in the Department of Languages, Philosophy, and Speech Communication teach courses leading to undergraduate degrees in French, German, and Spanish, as well as to undergraduate minors in Chinese, French, German, Japanese, Portuguese, Russian, and Spanish. Teaching emphases and minors are also offered in French, German, and Spanish. The department also offers a minor program in Linguistics.

French, German, and Spanish Major Programs

The goal of the French, German, and Spanish BA degree programs is to prepare students to be able to take advanced studies in these languages, literatures, and cultures; to be quality teachers of these languages, literatures, and cultures in the public schools; and to provide those who may enter other professions a solid grounding in these languages, literatures, and cultures, in order that they may function as members of the international community. The curricula supporting these goals includes courses in language, literature, civilization, culture, and linguistics. See the course requirements which follow.

Students should note that no more than two upper-division French courses taught in English can be applied toward the French majors.

### Sample Four-year Plan for French Major

**Minimum GPA for Admission:** 2.5, USU; 2.5, Career  
**Minimum GPA for Graduation:** 2.5, major courses; 2.0, Career  
**Minimum Grade Accepted:** C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

### Freshman Year (32 credits)

**Fall Semester (16 credits)**  
FREN 1010 French First Year I ................................................. 4  
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ........ 3  
University Studies Breadth courses ........................................... 9

**Spring Semester (16 credits)**  
FREN 1020 French First Year II ................................................. 4  
University Studies Quantitative Literacy (QL) course ................. 3  
University Studies Breadth courses ........................................... 9

Complete the CIL exams by the end of the Freshman Year.

### Sophomore Year (32 credits)

**Fall Semester (16 credits)**  
FREN 2010 French Second Year I ................................................. 4  
ENGL 2100 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ........................................... 3  
Elective courses ................................................................. 9

**Spring Semester (16 credits)**  
FREN 2020 French Second Year II ................................................. 4  
Depth Life and Physical Sciences (DSS) course .......................... 3  
Quantitative Intensive (QI) course ............................................ 3  
Elective course(s) .................................................................... 3

### Junior Year (28 credits)

**Fall Semester (14 credits)**  
FREN 3070 Topics in French and Francophone Studies (F) .................. 3  
Communications Intensive (CI) course ....................................... 3  
FREN upper-division courses ................................................. 6  
Upper-division elective course ............................................... 1  
Elective course ...................................................................... 1

**Spring Semester (14 credits)**

### Senior Year (28 credits)

**Fall Semester (14 credits)**  
FREN upper-division courses ................................................. 9  
Elective courses ................................................................. 5

**Spring Semester (14 credits)**  
FREN upper-division courses ................................................. 6  
Elective courses ................................................................. 8

### French Major—Teaching Emphasis with Secondary School Licensure (62 credits) (2.5 GPA)

- **Minimum GPA for Admission:** 2.5, USU; 2.5, Career  
- **Minimum GPA for Graduation:** 2.5, major courses; 2.0, Career  
- **Minimum Grade Accepted:** C- in major courses

**Note:** The following requirements only specify courses offered by the Department of Languages, Philosophy, and Speech Communication. To be licensed to teach in the Utah public secondary school system, students with a teaching emphasis must also complete additional courses (approximately 31 credits) required by the Department of Secondary Education. For more information, please contact the Department of Secondary Education, Education Building 330, or review the supplementary section, entitled Secondary Teacher Education Program (STEP) Level Outline on pages 373-374. Information is also provided on the Web at: [http://www.coe.usu.edu/seced/](http://www.coe.usu.edu/seced/)

### I. French and Linguistics Courses (31 credits)

#### A. Required Courses (25 credits)

- LING 4100a The Study of Language (F,Sp) .................................. 3  
- FREN 4200a Applied French Linguistics and Phonetics (Sp) ........... 3  
- FREN 3060 (CI) French Conversation (F) (3 cr) or FREN 4060 (CI) Advanced French Conversation (Sp) (3 cr) .................. 3  
- FREN 3090 (CI) French Intermediate Written Communication (F) (3 cr) or FREN 4090 (CI) Advanced Written Communication (F) (3 cr) .......... 3  
- FREN 3550 (DHA) French Civilization (F) (3 cr) or FREN 3570 France Today (Sp) (3 cr) .......................................................... 3  
- FREN 3600a Textual Analysis (F) ............................................... 3  
- FREN 4610 (DHA) Period Studies in French Literature (Sp) ........... 3  
- FREN 4620 (DHA) Genre Studies in French Literature (F) ............ 3  
- FREN 4920a French Language Tutoring (F,Sp,Su) ...................... 1-2

#### B. Elective Courses (6 credits)

Students must complete 6 additional upper-division credits in coursework either not taken above or from the following list:

- FREN 3500 (DHA) Topics in French Literature in Translation (F,Sp,Su) .................................................. 3  
- FREN 3510 (Cl) Business French (F) ........................................ 3  
- FREN 3900a Topics in French and Francophone Studies (F) ........ 3  
- FREN 4520 Information Technologies in French (F) .................... 3  
- FREN 4900a Seminar in French and Francophone Studies (Sp) .... 3  
- LING 4900 Analysis of Cross-Cultural Difference (Sp) ............... 3  
- FREN 3030a Advanced French for Everyday Communication (Su) .... 3  
- FREN 3070a Advanced French Language Study Abroad I (Su) ........ 4  
- FREN 3080a Advanced French Language Study Abroad II (Su) ........ 4  
- FREN 3820a Advanced Independent Study: Experiencing Paris (Su) 2
- FREN 3880 Individual Readings (F,Sp,Su) .................................. 1-4
II. Secondary Teacher Education Program (STEP) Courses (31 credits; 35 credits including courses for teaching minor)

For further information, review the Secondary Teacher Education Program (STEP) Level Outline on pages 373-374.

Suggested Four-year Plan for French Major, French Teaching Emphasis

Minimum GPA for Admission: 2.5, USU; 2.5, Career
Minimum GPA for Graduation: 2.5, major courses; 2.0, Career
Minimum Grade Accepted: C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. French Minor (12 credits) (2.5 GPA)

To receive a French minor, students must complete 12 upper-division credits in French. Students should note that only one credit of FREN 4920 may count toward the French minor. In addition, courses taken for the French minor programs may not be taken on a pass/fail basis, with the exception of FREN 3030. Students should also note that no more than one upper-division French course taught in English can be applied toward the French minor.

French Minor—Teaching Emphasis with Secondary School Licensure (46 credits) (2.5 GPA)

Note: The following requirements only specify courses offered by the Department of Languages, Philosophy, and Speech Communication. To be licensed to teach in Utah public secondary school system, students with a teaching emphasis must also complete additional courses (approximately 31 credits) required by the Department of Secondary Education. For more information, please contact the Department of Secondary Education, Education Building 330, or review the supplementary section, entitled Secondary Teacher Education Program (STEP) Level Outline on pages 373-374. Information is also provided on the Web at: http://www.coe.usu.edu/seced/

Students should note that only one credit of FREN 4920 may count toward the French Minor—Teaching Emphasis. In addition, courses taken for the French minor programs may not be taken on a pass/fail basis, with the exception of FREN 3030.

I. French and Linguistics Courses (15 credits)

A. Required Courses (12 credits)
FREN 3090 (CI) French Intermediate Written Communication (F) (3 cr) or
FREN 4090 (CI) Advanced French Intermediate Writing (F) (3 cr) .......... 3
FREN 3350 (DHA) French Civilization (F) (3 cr) or
FREN 3370 France Today (Sp) (3 cr) .................................................... 3
FREN 3600 Textual Analysis (F) ....................................................... 3
FREN 4200 Applied French Linguistics and Phonetics (Sp) ............ 3

B. Elective Courses (3 credits)

Students must complete an additional three credits in coursework selected from the following list:
FREN 4610 (DHA) Period Studies in French Literature (Sp) ............ 3
FREN 4620 (DHA) Genre Studies in French Literature (F) ............ 3
LING 4900 Analysis of Cross-Cultural Difference (Sp) .............. 3
FREN 3030 Advanced French for Everyday Communication (Su) 3
FREN 3070 Advanced French Language Study Abroad I (Su) ........ 4
FREN 3080 Advanced French Language Study Abroad II (Su) ........ 4
FREN 3500 (DHA) Topics in French Literature
in Translation (F,Sp,Su) .......................................................... 3
II. Secondary Teacher Education Program (STEP)
Courses (31 credits; 35 credits including courses for teaching emphasis)
For further information, review the Secondary Teacher Education Program (STEP) Level Outline on pages 373-374.

French Major and/or Minor—Teaching Emphasis without Secondary School Licensure (major 35 credits, minor 19 credits) (2.5 GPA)
It is possible to have a teaching emphasis within a major or minor in French without receiving Secondary School teaching licensure. However, unless the student is an elementary education major, he or she would not be able to teach in Utah public schools (nor at many private ones). Graduating without licensure may allow employment at some community colleges and universities.

In order to complete the French Major—Teaching Emphasis without Secondary School Licensure, students must fulfill all of the requirements listed under Section I (French and Linguistics Courses) of the French Major—Teaching Emphasis with Secondary School Licensure (31 credits), plus eitherLING 3300 or 4300 (1 credit) and LING 4400 (3 credits), for a total of 35 credits.

Similarly, to complete a French Minor—Teaching Emphasis without Secondary School Licensure, students must fulfill all of the requirements listed under Section I (French and Linguistics Courses) of the French Minor—Teaching Emphasis with Secondary School Licensure (15 credits), plus either LING 3300 or 4300 (1 credit) and LING 4400 (3 credits), for a total of 19 credits.

1 This course requires FREN 3600 or instructor’s permission. FREN 3900, 4900, and 4920 may be repeated for credit with different content.
2 Students with foreign experience may be advised to enroll in FREN 3060 or 4060, depending upon results of a placement test and/or instructor’s determination.
3 Students with foreign experience may be advised to enroll in FREN 3090 or 4090, depending upon results of a placement test and/or instructor’s determination.
4 Only two credits of FREN 4920 may count toward the French Major or French Major—Teaching Emphasis.
5 It is recommended that LING 4100 be taken before FREN 4200.
6 This course may be repeated one time for credit with different content.
7 Offered only through USU’s Summer Study Abroad program in France.
8 Only one credit of FREN 4920 may count toward the French Minor or French Minor—Teaching Emphasis.
9 Students should take FREN 4200 near the end of their coursework. Please note that FREN 4200 is offered every other year.
10 LING 3300 or 4300 and LING 4400 must be taken during the same semester, and should be the last courses taken for the major or minor.

German Major and Minor Requirements

Minimum Departmental Requirements
Total Credits:
German Major ................................................................. 33
German Major, Teaching Emphasis ............................31 GERM & 31 SCED
German Minor ................................................................. 12
German Minor, Teaching Emphasis ..............................15 GERM & 31 SCED
German Major, Teaching Emphasis without licensure ........................................ 35
German Minor, Teaching Emphasis without licensure ........................................ 19

Grade Point Average to Declare a Major or Minor..............2.5 Career GPA
Grade Point Average to Graduate with Major or Minor...2.0 Career GPA and 2.5 GPA within Major/Minor Classes

Notes:
Courses for German Majors and Minors require a minimum of C- or better.
Courses for German Majors and Minors may not be taken on a Pass/ Fail Basis.

German Major (33 credits) (2.5 GPA)

A. Required Courses (9 credits)
GERM 3000 (DHA) Introduction to German Studies (F)..........................3
GERM 3040 (CI) Advanced German Grammar and Composition (F)........3
LING 4100 The Study of Language (F,Sp) ...........................................3

B. Elective Courses (24 credits)
Students must complete at least 24 credits of upper-division coursework from the following list.

GERM 3050 (CI) Advanced German Grammar and Composition (Sp)........3
GERM 3300 (DHA) Contemporary German Speaking Cultures (Sp) ....3
GERM 3510 (CI) Business German (Sp) ..............................................3

German Minor (12 credits) (2.5 GPA)
To receive a German minor, students must complete 12 upper-division credits in German. Students should note that only one credit of GERM 4920 may count toward the German minor. In addition, courses taken for the German minor programs may not be taken on a pass/fail basis.

German Minor—Teaching Emphasis with Licensure (46 credits) (2.5 GPA)

Note: The following requirements only specify courses offered by the Department of Languages, Philosophy, and Speech Communication. To be licensed to teach in the Utah public secondary school system, students with a teaching emphasis must also complete additional courses (approximately 31 credits) required by the Department of Secondary Education. For more information, please contact the Department of Secondary Education, Education Building 330, or review the supplementary section, entitled Secondary Teacher Education Program (STEP) Level Outline on pages 373-374. Information is also provided on the Web at: http://www.coe.usu.edu/seced/

Students should note that only 1 credit from GERM 4920 may count toward the German Minor—Teaching Emphasis. In addition, courses taken for the German minor programs may not be taken on a pass/fail basis.

I. German and Linguistics Courses (15 credits)

A. Required Courses (12 credits)
LING 4900 Analysis of Cross-Cultural Difference (Sp) .................. 3
GERM 3040 (CI) Advanced German Grammar and Composition (F) ........................................................................... 3
GERM 3050 (CI) Advanced German Grammar and Composition (Sp) ........................................................................... 3
GERM 4200d Applied German Linguistics and Phonetics (Sp) .... 3

B. Elective Courses (3 credits)
GERM 3300 (DHA) Contemporary German Speaking Cultures (Sp) .... 3
GERM 3510 (CI) Business German (Sp) ......................................... 3
GERM 3540 (CI) Techniques in Translating German Texts (F) ........... 3

GERM 3550 (DHA) Cultural History of German Speaking Peoples (F) ........................................................................... 3

II. Secondary Teacher Education Program (STEP)
Courses (31 credits; 35 credits including courses for teaching emphasis)

For further information, review the Secondary Teacher Education Program (STEP) Level Outline on pages 373-374.

German Teaching Emphasis and/or Minor—Teaching Emphasis without Secondary School Licensure (major 35 credits) (minor 19 credits) (2.5 GPA)

It is possible to have a teaching emphasis within a major or minor in German without receiving Secondary School teaching licensure. However, unless the student is an elementary education major, he or she would not be able to teach in Utah public schools (nor at many private ones). Graduating without licensure may allow employment at some community colleges and universities.

In order to complete the German Major—Teaching Emphasis without Secondary School Licensure, students must fulfill all of the requirements listed under Section I (German and Linguistics Courses) of the German Major—Teaching Emphasis with Secondary School Licensure (31 credits), plus either LING 3300 or LING 4300 (1 credit) and LING 4400 (3 credits), for a total of 35 credits.

Similarly, to complete a German Minor—Teaching Emphasis without Secondary School Licensure, students must fulfill all of the requirements listed under Section I (German and Linguistics Courses) of the German Minor—Teaching Emphasis with Secondary School Licensure (15 credits), plus either LING 3300 or LING 4300 (1 credit) and LING 4400 (3 credits) for a total of 19 credits.

This course may be repeated for credit.

Only 2 credits of GERM 4920 may count toward the German major.

LING 4100 should be taken at the beginning of the student’s coursework.

GERM 4200 should be taken near the end of the student’s coursework. However, GERM 4200 is not offered every year. Therefore, students should check to see when the course will be offered.

LING 3300 or 4300 and LING 4400 must be taken during the same semester, and should be the last courses taken for the major or minor.

Spanish Major and Minor Requirements

Minimum Departmental Requirements

Total Credits:
Spanish Major ................................................................. 34
Spanish Major, Teaching Emphasis ................................. 34 SPAN/LING & 31 SCED
Spanish Minor ................................................................. 16
Spanish Minor, Teaching Emphasis ................................. 16 SPAN/LING & 31 SCED
Spanish Major, Teaching Emphasis without licensure ....... 38
Spanish Minor, Teaching Emphasis without licensure ........... 20
Grade Point Average to Declare a Major or Minor .... 2.75 Career GPA
Grade Point Average to Graduate with Major or Minor ... 2.75 Career GPA and 3.00 GPA within Major/Minor Classes
Spanish Major (34 credits) (3.00 GPA)

A. Required Courses (22 credits)

LING 4100 The Study of Language (F,Sp) .................. 3

Select at least one of the following two courses:
SPAN 3040 Advanced Spanish Grammar (F,Sp) ........... 3
SPAN 3800 Spanish III Study Abroad (Su) ............... 1-4

Select at least one of the following three courses:
SPAN 3550 (DHA) Spanish Culture and Civilization (F) ........ 3
SPAN 3570 (DHA) Latin American Culture and Civilization (Sp) ..... 3
SPAN 4800 Spanish II Hispanic Culture and Civilization—Study Abroad (Su) .................. 1-4

Select at least three of the following six courses:

Select one or two courses from this group:
SPAN 3600 (DHA) Survey of Spanish Literature I (F,Sp) .......... 3
SPAN 3610 (DHA) Survey of Spanish Literature II (F,Sp) ........ 3
SPAN 3650 Spanish Literature—Study Abroad (Su) ............ 1-4

Select one or two courses from this group:
SPAN 3620 (DHA) Survey of Latin American Literature I (F,Sp) .... 3
SPAN 3630 (DHA) Survey of Latin American Literature II (F,Sp) ... 3
SPAN 3660 Latin American Literature—Study Abroad (Su) ........ 1-4

Select at least one of the following two courses:
SPAN 4900 Topics of Spanish Literature (F,Sp) .................. 3
SPAN 4910 Topics of Latin American Literature (F,Sp) ............ 3

SPAN 4990 Spanish Degree Assessment (F,Sp,Su) 18,24 ........ 1

B. Elective Courses (12 credits)

Students must complete 12 additional credits in courses either not taken above or selected from the following list:

SPAN 301017,18,19 Hispanic Outreach Practicum (P/F only) (F,Sp,Su) ........ 1-4
SPAN 3060 (CI) Advanced Spanish Conversation and Composition (F) ............. 3
SPAN 3510 Business Spanish (F) ........................................ 3
SPAN 352017,18,19 Business Spanish Practicum (P/F only) (F,Sp,Su) .......... 1-4
SPAN 4200 Spanish Linguistics and Phonetics (Sp) .............. 3
SPAN 4880 Individual Readings (F,Sp) .......................... 1-4
SPAN 492017,18,19 Spanish Language Tutoring (P/F only) (F,Sp,Su) .......... 1
LING 4900 Analysis of Cross-Cultural Difference (Sp) ............ 3

Sample Four-year Plan for Spanish Major

Minimum GPA for Admission: 2.75, Career
Minimum GPA for Graduation: 3.0, major courses; 2.75, Career
Minimum Grade Accepted: C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

Teaching Emphasis for Spanish Major and Minor
Spanish Major and/or Minor—Teaching Emphasis with Secondary School Licensure
To receive secondary school licensure, students must complete the Secondary Teacher Education Program (STEP). For further information, review the Secondary Teacher Education Program (STEP) Level Outline shown on pages 373-374.

Spanish Major and/or Minor—Teaching Emphasis without Secondary School Licensure
It is possible to have a teaching emphasis within a major or minor in Spanish without receiving Secondary School teaching licensure. However, unless the student is an elementary education major, he or she would not be able to teach in Utah public schools (nor at many private ones). Graduating without licensure may allow employment at some community college and universities.

In order to complete the Spanish Major—Teaching Emphasis without Secondary School Licensure, students must fulfill all of the requirements listed under Section I (Spanish and Linguistics Courses) of the Spanish Major—Teaching Emphasis (34 credits), plus either LING 3300 or LING 4300 (1 credit) and LING 4400 (3 credits), for a total of 38 credits.

Similarly, to complete a Spanish Minor—Teaching Emphasis without Secondary School Licensure, students must fulfill all of the requirements listed under the Spanish Minor—Teaching Emphasis (16 credits), plus either LING 3300 or LING 4300 (1 credit) and LING 4400 (3 credits) for a total of 20 credits.

Secondary Teacher Education Program (STEP) Level Outline
(31 credits; 35 credits including courses for teaching emphasis/minor)
Most of the courses listed below count for both the teaching emphasis and the teaching minor.
Department of Languages, Philosophy, and Speech Communication

A. Level 1 (first semester in program)
- SCED 3100 Motivation and Classroom Management (F,Sp) ..............3
- SCED 3210 (CI/DSS) Educational and Multicultural Foundations (F,Sp) ......3
- LING 3300/43002627 Clinical Experience I and II (F,Sp) (P/F only) .........1
- LING 44002627 Teaching Modern Languages (F,Sp) .........................3
  (LING 3300/4300 and 4400 may be taken in either Level 1 or Level 2.)
- INST 3500 Technology Tools for Secondary Teachers (F, Sp, Su) ..........1

B. Level 2
- SPED 4000 Education of Exceptional Individuals (may be taken earlier) (F,Sp,Su) ..................................2
- SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) .............. 3
- SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) .......3

C. Level 3
- Because student teaching requires a major commitment of time and energy, students should take only the courses listed below during this semester. Students are also urged to forgo outside employment, if possible, during the student teaching experience.
- LING 5500 Student Teaching Seminar (F,Sp) ..................................2
- LING 5630 Student Teaching in Secondary Schools (F,Sp) ............10

26The Clinical Experience II course is taught under course number 4300 in various departments. Course title varies among departments.
27The Special Methods II course is taught under course number 4400.
28LING 3300 or 4300 and LING 4400 must be taken during the same semester, and should be the last courses taken for the major or minor.

Additional Language Minor Requirements

Minimum Departmental Requirements

Total Credits:
- Chinese Minor .................................................................................12
- Japanese Minor .................................................................................12
- Portuguese Minor ..............................................................................12
- Russian Minor ..................................................................................12
- Linguistics Minor .............................................................................12

Grade Point Average to Declare Minor.................................2.5 Career GPA
Grade Point Average to Graduate with Minor..................2.0 Career GPA
and 2.5 GPA within Minor Classes

Notes:
Courses for Minors may not be taken on a Pass/Fail basis.
Courses for Minors require a minimum grade of C- or better.
At least half (50 percent) of credits for Minors must be completed through USU, and approved by the department head.
Any 4920 course is repeatable; however, only 1 credit may be applied toward the minor.

Chinese Minor
Select 12 upper-division credits in Chinese from the following courses:
- CHIN 3010 Chinese Third Year I (F) .................................................4
- CHIN 3020 Chinese Third Year II (Sp) .............................................4
- CHIN 3100 (DHA) Readings in Contemporary Chinese Culture (Sp) ...3
- CHIN 3510 Chinese Business Language (F) .....................................3
- CHIN 3880 Individual Readings in Chinese (F,Sp) ..........................1-2
- CHIN 4920 Chinese Language Tutoring (F,Sp,Su) ................. 1

Japanese Minor
Select 12 credits from the following courses:
- JAPN 3010 Japanese Third Year I (F) .............................................4
- JAPN 3020 Japanese Third Year II (Sp) ...........................................4
- JAPN 305028 Japanese Calligraphy (Sp) ........................................1
- JAPN 3100 Readings in Contemporary Japanese Culture (F) .......3
- JAPN 3510 Japanese for the Business Environment (Sp) ............3
- JAPN 4920 Japanese Language Tutoring (F,Sp) ..................... 1

Portuguese Minor
Select 12 credits from the following courses:
- PORT 2020 Portuguese Second Year II (Sp) ....................................4
- PORT 3040 (CI) Advanced Portuguese Grammar and Composition (must be completed at USU) (F,Sp) ..........3
- PORT 3570 Brazilian Culture and Civilization (must be completed at USU) (F) ........................................3
- PORT 3630 Survey of Brazilian Literature (must be completed at USU) (Sp) .................3

28This course is repeatable for credit, and may be taken a maximum of three times.

Russian Minor
Select 12 credits from the following courses:
- RUSS 3040 Advanced Russian Grammar and Composition (F) .......3
- RUSS 3050 Advanced Russian Grammar and Composition (Sp) ....3
- RUSS 3300 (DHA) Contemporary Russian Language and Culture (Sp 2007, F 2008) .................................3
- RUSS 3510 (CI) Business Russian (F 2007) .................................3
- RUSS 3540 Russian Translation for Science, Business, and Culture (Sp 2008) ............................................................3

Linguistics Minor
Select 3 credits from the following courses:
- ENGL 4210 History of the English Language (Sp) .................3
- ENGL 4230 Language and Society (F) ..............................................3
- ENGL 5210 Topics in Linguistics (F) ................................................3

Select 9 credits from the following courses:
- LING 4400 Teaching Modern Languages (F,Sp) .........................3
- LING 4520 Technology for Language Teaching (Su) .................3
- LING 4900 Analysis of Cross-Cultural Difference (Sp) ............3
- LING 4900 Technology for Language Teaching (Su) ..................3
- LING 4900 History of the English Language (Sp) ......................3
- LING 4900 Technology for Language Teaching (Su) .................3

Four-year Plan for Linguistics Minor
It is suggested that students completing the Linguistics Minor take the courses listed above in the following sequence:

Freshman Year
- ENGL 3020 (DHA) or LING 4100 or ENGL 4200

Sophomore Year
- ENGL 4210 or ENGL 4230

Junior Year
- ENGL 4210 or ENGL 4230

Senior Year
- LING 4400 or LING 4520 or ENGL 5210

For additional information on language major and minor programs offered by the Department of Languages, Philosophy, and Speech Communication, contact the department office.
Proficiency Tests, Placement in Language Courses, and Obtaining Credit by Special Examination

Students who have completed one or more years of language study may take proficiency tests to determine their proper placement in language courses.

When basic skills in a department-taught language (other than French, German, and Spanish) have been acquired by means other than college courses, students can receive 4-20 lower-division credits with a letter grade by completing a course in that language at a higher level than the credits to be acquired. This course needs to be completed with a grade of B or better.

These credits will count as transfer credits. They will not count toward a certain semester or the USU GPA, but will be counted into the cumulative GPA. Please contact the department for further details.

Technology Assisted Language Center

The department operates a technology assisted language center, located in Main 004, for instructional use associated with language classes, and for students desiring additional language practice outside of the classroom. The center includes computer workstations capable of running multimedia applications, as well as audio equipment.

Exchange Programs, Semester Abroad Programs, and Summer Study Abroad Programs

The Department of Languages, Philosophy, and Speech Communication assists students with academic advising for study abroad exchange programs, semester abroad programs, and summer study abroad programs. Students must be in good standing at the University, and it is recommended that the students have some language preparation in order to participate in these programs. For program information, contact the USU Study Abroad Office, Student Center 313, or visit their website at: http://www.usu.edu/stdyabrd

National Honor Societies

Lambda Pi Eta (LPH) is the National Communication Honor Society of the National Communication Association for undergraduate junior and senior communication students. Among the goals of LPH are to recognize, foster, and reward outstanding scholastic achievement; and to provide an opportunity for faculty and students to discuss and exchange ideas about their field of interest.

9Sigma Delta Pi (SDP) is the National Collegiate Hispanic Honor Society of the American Association of Teachers of Spanish and Portuguese for students studying Spanish. Among the goals of SDP are to honor those who attain excellence in the study of the Spanish language and of the literature and culture of the Spanish-speaking peoples, and to encourage college and university students to acquire a greater interest in and a deeper understanding of Hispanic culture.

Phi Sigma Iota (PSI) is an international language honor society for juniors, seniors, and graduate students who excel in foreign language. PSI promotes international communication and understanding, as well as a sentiment of unity among nations. Phi Sigma Iota helps members further their training through scholarship and graduation honors. The society also promotes trips abroad.

Philosophy

Philosophy at USU reflects the ideals of the liberal arts in encouraging the respect for truth without promoting dogmatism, and in offering the opportunity for students to increase their self-understanding at the same time as they increase their knowledge of the world around them.

Philosophy faculty in the Department of Languages, Philosophy, and Speech Communication teach courses leading to an undergraduate major and a minor in philosophy. The mission of the Philosophy program at Utah State University is to provide a high-quality education leading to an understanding of the major areas of inquiry represented within the discipline of philosophy. Coursework emphasizes the areas of the history of philosophy, logic, ethical theory and applied ethics, and metaphysics and epistemology. The curriculum is designed to meet a wide variety of student interests in pursuing a major in philosophy. It provides a rigorous foundation for students intending to further their education in law school or graduate school in philosophy, and it also provides an exciting and challenging education for those students who enjoy thinking about ideas for their own sake. Coursework is also designed to enrich the education of students majoring in other subjects, by providing them with opportunities to gain an understanding of philosophical perspectives on and philosophical foundations of their chosen fields.

Minimum Departmental Requirements

Total Credits:

| Philosophy Major | 30 |
| Philosophy Minor | 18 |

Grade Point Average to Declare a Major or Minor...........2.5 Career GPA
Grade Point Average to Graduate with Major or Minor...2.5 Career GPA and 2.5 GPA within Major/Minor Classes

Notes:
Courses for Philosophy Majors and Minors require a minimum grade of C- or better.
Courses for Philosophy Majors and Minors may not be taken on a Pass/Fail basis.
Bachelor of Arts (BA) degree additional requirements include two years of language, or same as University Requirement (see Bachelor of Arts section, page 58).

Bachelor of Science (BS) degree additional requirements include PHIL 2200 and 4310 and 12 credits of Math and/or Science.

Course Requirements

Bachelor of Arts in Philosophy

(30 credits) (2.5 GPA)

All philosophy majors must complete 30 credits of philosophy. PHIL 3100, 3120, 4300, and 4400 may not be taken on a pass/fail basis for the philosophy major. The requirements are distributed as follows:

A. Required Courses (21 credits)

PHIL 1120 (BHU) Social Ethics (F) (3 cr) or PHIL 2400 (BHU) Ethics (Sp) (3 cr) ...................................................................................................................... 3
PHIL 1200 (BHU) Practical Logic (Sp) (3 cr) ...................................................................................................................... 3
PHIL 2200 (QI) Deductive Logic (F,Sp) (3 cr) ...................................................................................................................... 3
PHIL 3100 (CI) Ancient Philosophy (F) ...................................................................................................................... 3
PHIL 3120 (CI) Early Modern Philosophy (F) ...................................................................................................................... 3

Choose one course from the following:

PHIL 3500 Medical Ethics (F) ...................................................................................................................... 3
PHIL 3510 Environmental Ethics (F,Sp) ...................................................................................................................... 3
PHIL 3520 Business Ethics (Sp) ...................................................................................................................... 3
PHIL 4500 Contemporary Ethical Theory (Sp) ...................................................................................................................... 3
PHIL 4530 (DSC) Ethics and Biotechnology (Sp) ...................................................................................................................... 3
PHIL 4540 (DHA) Human Values and Information Technology (Sp) ...................................................................................................................... 3
PHIL 4610 (DHA) Social and Political Philosophy (Sp) ...................................................................................................................... 3

B. Elective Courses (9 credits)

Choose three other upper-division philosophy courses from the following list of courses:

PHIL 3110 Medieval Philosophy (F) ...................................................................................................................... 3
PHIL 3150 (CI) Kant and His Successors (Sp) ...................................................................................................................... 3
PHIL 3160 (CI) Contemporary Philosophy (F) ...................................................................................................................... 3
PHIL 3510 (CI) Contemporary European Philosophy (F) ...................................................................................................................... 3
PHIL 3500 Medical Ethics (F) ...................................................................................................................... 3
PHIL 3510 (DHA) Environmental Ethics (F,Sp) ...................................................................................................................... 3
PHIL 3520 (DHA) Business Ethics (Sp) ...................................................................................................................... 3
PHIL 3700 Philosophy of Religion (F) ...................................................................................................................... 3
PHIL 3710 Philosophies of East Asia (F) ...................................................................................................................... 3
PHIL 3720 Philosophical Theology After Kant (F) ...................................................................................................................... 3
PHIL 3730 (CI) Philosophy of the New Testament (Sp) ...................................................................................................................... 3
PHIL 3750 Religion and Science in the Modern World (Sp) ...................................................................................................................... 3
PHIL 3900 (DHA) Philosophy in Literature (F) ...................................................................................................................... 3
PHIL 3810 (DHA) Aesthetics (Sp) ...................................................................................................................... 3
PHIL 4300 (DHA) Epistemology (F) ...................................................................................................................... 3
PHIL 4310 (DHA) Philosophy of Science (Sp) ...................................................................................................................... 3
PHIL 4320 (DHA) History of Scientific Thought (Sp) ...................................................................................................................... 3
PHIL 4400 Metaphysics (F) ...................................................................................................................... 3
PHIL 4410 (DHA) Philosophy of Mind (F) ...................................................................................................................... 3
PHIL 4420 Philosophy of Language (Sp) ...................................................................................................................... 3
PHIL 4500 (DSC) Ethics and Biotechnology (Sp) ...................................................................................................................... 3
PHIL 4530 (DSC) Ethics and Biotechnology (Sp) ...................................................................................................................... 3
PHIL 4540 (DHA) Human Values and Information Technology (Sp) ...................................................................................................................... 3

PHIL 4600 Philosophy of Law (F) ...................................................................................................................... 3
PHIL 4610 (DHA) Social and Political Philosophy (Sp) ...................................................................................................................... 3
PHIL 4900 Special Topics (F,Sp) ...................................................................................................................... 3
PHIL 4910 Readings and Research (F,Sp) ...................................................................................................................... 1-4
PHIL 4920H Senior Honors Seminar (Sp) ...................................................................................................................... 1
PHIL 4930H Senior Honors Thesis (F,Sp,Su) ...................................................................................................................... 1-4
PHIL 4990 Philosophy Seminar (Sp) ...................................................................................................................... 3
PHIL 5200 Symbolic Logic (Sp) ...................................................................................................................... 3
PHIL 5510 Ethics and the Environment (F) ...................................................................................................................... 3
PHIL 5600 Legal Ethics (F) ...................................................................................................................... 3

In addition, other University Studies courses, as required by the University, must be completed. To receive a Bachelor of Arts (BA) degree, students must also complete the foreign language requirement.

Bachelor of Science in Philosophy

(30 credits) (2.5 GPA)

The requirements for the Bachelor of Science (BS) in Philosophy are the same as those for the Bachelor of Arts (BA), with these additional limitations: (1) no foreign language instruction is necessary, (2) PHIL 2200 and 4310 must be taken, and (3) 12 credits in Mathematics and/or Science courses beyond the University Studies requirements must be completed.

Sample Four-year Plan for Philosophy Major

Minimum GPA for Admission: 2.5, Career
Minimum GPA for Graduation: 2.5, major courses; 2.5, USU;

Minimum Grade Accepted: C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (30 credits)

Fall Semester (15 credits)

ENGL 1010 (CL1) Introduction to Writing: Academic Prose ...................................................................................................................... 3
PHIL 1200 (BHU) Practical Logic ...................................................................................................................... 3
University Studies Breadth courses ...................................................................................................................... 6
Degree Requirement (BS or BA) course ...................................................................................................................... 3

Spring Semester (15 credits)

Quantitative Literacy (QL) course ...................................................................................................................... 3
University Studies Breadth courses ...................................................................................................................... 6
Degree Requirement (BS or BA) course ...................................................................................................................... 3
Elective course(s) ...................................................................................................................................................................................... 3

Complete the CIL exams by the end of the Freshman Year.

Sophomore Year (30 credits)

Fall Semester (15 credits)

ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ...................................................................................................................... 3
PHIL 1120 (BHU) Social Ethics (3 cr) or
PHIL 2400 (BHU) Ethics (3 cr) ...................................................................................................................................................................................... 3
Department of Languages, Philosophy, and Speech Communication

PHIL 2200 (QI) Deductive Logic ................................................................. 3
Degree Requirement (BS or BA) course .............................................. 3
Elective course(s). .................................................................... 3

Spring Semester (15 credits)
PHIL upper-division courses ......................................................... 6
Degree Requirement (BS or BA) course .............................................. 3
Depth Life and Physical Sciences (DSC) course ......................... 3
Depth Social Sciences (DSS) course .............................................. 3

Junior Year (30 credits)
PHIL upper-division courses .......................................................... 6
Elective courses .............................................................................. 3

Spring Semester (15 credits)
PHIL upper-division courses .......................................................... 6
Elective courses .............................................................................. 9

Senior Year (30 credits)
Fall Semester (15 credits)
PHIL upper-division course ............................................................. 3
Upper-division elective courses ....................................................... 10
Elective course(s) ............................................................................ 2

Spring Semester (15 credits)
Upper-division elective course ....................................................... 3
Elective courses .............................................................................. 12

*These courses should be selected from the upper-division philosophy courses (numbered 3000 or higher) shown under A. Required Courses and B. Elective Courses on page 376.

Philosophy Minor (18 credits) (2.5 GPA)
Six courses in Philosophy, at least four of which must be at the upper-division level, must be completed for a philosophy minor.

Philosophy Course Descriptions
Philosophy (PHIL), pages 687-689.

Speech Communication
Speech Communication has been taught continuously at USU almost from the University’s founding in 1888. Speech Communication faculty in the Department of Languages, Philosophy, and Speech Communication teach courses leading to a Bachelor of Arts or Bachelor of Science degree in Speech, as well as to minors in Organizational Communication and Speech Communication Teaching.

The speech major emphasizes organizational communication. Organizational communication is the study of how communication creates organizations and of how organizations shape communication. Coursework in the program addresses the theories and analytical skills enabling students to identify common communication problems arising in organizational contexts and to develop appropriate communication policies and practices. The program also teaches important aspects of intercultural and interpersonal communication theory.

Students majoring in speech are encouraged to earn a BA degree by completing two years of study in a foreign language. This broadens cultural and social awareness and can increase one’s understanding of the nature of language in general.

Admission to the speech major will be limited to 25 students each year. Admission decisions will be based on (1) academic record, (2) realistic career or professional study objective, (3) ability of this program to prepare the student for intended career, (4) satisfactory speaking and writing competencies, and (5) motivation and creativity demonstrated by class performance, work experience, volunteer activities, and other means offered by the student during the application process.

Students not admitted may apply the following year. If not admitted on the second application, the student will be permitted to complete a minor, but will not be considered again for the major.

To obtain guidelines for applying to the speech major, contact the Department of Languages, Philosophy, and Speech Communication.

The minor program in Organizational Communication is designed for students who seek communication and human relations competencies, an understanding of human communication behavior, and the critical thinking skills required for success in a variety of careers.

The course of study leading to a minor in Speech Communication Teaching is designed to develop the communication competencies and the understanding of communication processes and theory necessary for effective high school speech communication instruction. Prior to student teaching, the program features practicum experience in which students learn how to critique and coach speech communication students.

Minimum Departmental Requirements
Total Credits:
Speech Major ................................................................. 30
Organizational Communication Minor ........................................... 15
Speech Communication Teaching Minor ........................................... 19

Grade Point Average to Declare a Major or Minor ........2.5 Career GPA
Grade Point Average to Graduate with Major or Minor...2.5 Career GPA
and 2.5 GPA within Major/Minor Classes

Note:
As many as 15 credits for the Major and 6 credits for the Minor completed at other colleges or universities may be used to partially satisfy these requirements, with advisor permission only.

Course Requirements
Speech Major (30 credits) (2.5 GPA in major classes)
As many as 15 credits completed at other colleges or universities may be used to partially satisfy these requirements. For more information, students should contact their advisor. Students must earn an overall GPA of at least 2.5 in all classes applied toward the major.

A. Communication Core (6 credits)
SPCH 1020 (CI) Public Speaking (F,Sp) ........................................... 3
SPCH 2110 (CI) Interpersonal Communication (F,Sp) ...................... 3

B. Senior Year Capstone Course (3 credits)
This course, which is offered spring semester only, must be taken during the student’s senior year.

SPCH 5100 (CI) Theories of Speech Communication (Sp) .................... 3

C. Organizational Communication Theory (9-12 credits)
SPCH 3250 (CI) Organizational Communication (F) ......................... 3

Organizational Communication Theory upper-division course (3 cr) ...... 3
Upper-division elective course ................................................... 7
Elective course(s) .................................................................... 2

See sections C. Organizational Communication Theory and D. Organizational Communication Application for approved courses (page 378).

Speech Communication Minor Programs

Organizational Communication Minor (15 credits) (2.5 GPA)

A. Required Courses (6 credits)
SPCH 1020 (CI) Public Speaking (F,Sp) (3 cr) or
SPCH 2110 (CI) Interpersonal Communication (F,Sp) (3 cr) .......... 3
SPCH 3250 (CI) Organizational Communication (F) .................... 3

B. Elective Courses (9 credits)
In consultation with a program advisor, select 9 credits from courses having the SPCH prefix. Of these 9 credits, at least 3 credits must be completed in a course offered at the 4000 or 5000 level.

Speech Communication Minor—Teaching Emphasis (19 credits) (2.5 GPA)

Note: The following requirements only specify courses offered by the Department of Languages, Philosophy, and Speech Communication. To be licensed to teach in the Utah public secondary school system, students with a teaching emphasis must also complete an approved teaching major and STEP courses required by the Department of Secondary Education. SPCH 5370 and either SPCH 3300 or 4300 are part of the STEP requirements. For more information, please contact the Department of Secondary Education, Education Building 330, or review the supplementary section, entitled Secondary Teacher Education Program (STEP) Level Outline on pages 373-374. Information is also provided on the Web at: http://www.coe.usu.edu/sece/

Also Note: SPCH 1020, 2110, and 3000 should be completed prior to enrollment in the 4000- and 5000-level courses. A minimum grade of C- is required in each of these classes.
I. Speech Communication Courses (19 credits)

**SPCH 1020 (CI)** Public Speaking (F,Sp) ............................................ 3
**SPCH 2110 (CI)** Interpersonal Communication (F,Sp) .......................... 3
**SPCH 2270** Argumentation and Debate (F) .......................................... 3
**SPCH 3000** Speech Communication Teaching Practicum (Sp) ............... 1
**SPCH 5100 (CI)** Theories of Speech Communication (Sp) ..................... 3
**SPCH 5280** Communication Education Theory (Sp) .............................. 3
**SPCH 3330 (DSS)** Intercultural Communication (F) (3 cr) or
**SPCH 5090** Small Group Theory (Sp) (3 cr) ........................................ 3

II. Secondary Teacher Education Program (STEP) Courses (31 credits; 35 credits including courses for teaching minor)

For further information, review the Secondary Teacher Education Program (STEP) Level Outline on pages 373-374.

Speech Communication Course Descriptions

Speech Communication (SPCH), pages 714-715.

Languages, Philosophy, and Speech Communication Faculty

**Professors**

Charles W. Johnson, philosophy of mind, Wittgenstein, logic, philosophical methods
John E. Lackstrom, linguistics, Spanish applied linguistics, TESL
Mark D. Larsen, Latin American literature, computer applications in languages
Kent E. Robson, ethics, philosophy of language, history of philosophy, philosophy of science, philosophy of religion
Richard Sherlock, medical and environmental ethics, ethical theory, ethical issues in genetics, political philosophy, philosophy of religion

**Professors Emeritus**

Lynn R. Eliason, 19th century Russian and German novels, Russian culture
Hans K. Mussler, German literature, Lessing, enlightenment, translation, teaching methodology
Alfred N. Smith, Jr., French, foreign language education, cross-cultural studies

**Associate Professors**

M. Isela Chiu, Spanish, Portuguese, Latin American literature
Maria-de Jesus Cordero, colonial Spanish-American literature
Charlie Huenemann, history of modern philosophy, Kant, metaphysics
Harold J. Kinzer, organizational communication
Taira Koybaeva, Russian, Linguistics, intercultural relationships
Renate Posthofen, German language and literature, contemporary culture and film
John S. Seiter, interpersonal communication, intercultural relations, social influence
Gordon Steinhoff, philosophy of science, logic, metaphysics

**Associate Professors Emeritus**

Jerry L. Benbow, Peninsular Spanish literature and grammar
Lynne H. Goodhart, 20th century French poetry, women in literature
Ilona Jappinen, German language, literature and culture, Nietzsche expressionism
Gordon E. Porter, Spanish, Spanish literature, Portuguese
Norman R. Savoie, contemporary French culture, contemporary French detective fiction
Janet C. Stock, French, business French, 20th century French literature, Proust

**Assistant Professors**

Anne F. Carlson, Francophone literature and culture
Javier Dominguez-Garcia, Spanish medieval and golden age
Susan J. Dudash, late medieval French literature
Sarah Gordon, medieval French
Xenia Srebianski Harwell, German and Russian literature
Jennifer A. Peeples, environmental rhetoric
J. P. Spicer-Escalante, 19th century Latin American literature
Maria Luisa Spicer-Escalante, Hispanic applied linguistics
Felix W. Tweraser, 20th century Austrian literature

**Assistant Professor Emeritus**

Valentine Suprunowicz, Russian literature

**Principal Lecturer Emeritus**

Viva L. Lynn, Spanish literature

**Lecturers**

Karim de Jonge-Kannan, second language acquisition
Kevin L. Krogh, Spanish
Atsuko O. Neely, Japanese, second language acquisition
Latin American Studies Minor

Coordination:
M. Isela Chiu-Olivares, Associate Professor of Spanish and Portuguese, Department of Languages, Philosophy, and Speech Communication, isela@cc.usu.edu
William L. Furlong, Professor, Department of Political Science, bill.furlong@usu.edu
Bonnie Glass-Coffin, Associate Professor, Department of Sociology, Social Work and Anthropology, glasscob@cc.usu.edu
James Sanders, Assistant Professor, History Department, jsanders@hass.usu.edu
J.P. Spicer-Escalante, Assistant Professor of Spanish, Department of Languages, Philosophy, and Speech Communication, jspicer@cc.usu.edu

The Latin American Studies minor, an interdepartmental program within the College of Humanities, Arts, and Social Sciences, provides students with an interdisciplinary and rigorous introduction to Latin America. The minor complements existing majors through the expansion and development of regional knowledge and expertise. After completing the minor, students will have demonstrated language competence and enhanced political, economic, cultural, and sociological understanding of the countries and peoples of Latin America.

Admission Requirements
1. USU students in good standing who are enrolled in any major or department and who have a 2.75 minimum GPA qualify for admission to this minor.
2. Transfer students from other institutions need a 2.75 minimum total GPA for admission to this minor.

Latin American Studies Minor Requirements (18 credits, plus language competency)

A. Language Requirement
A minimum of two years (16 credits or four semesters) of Introductory Spanish (SPAN 1010, 1020, 2010, and 2020) or Introductory Portuguese (PORT 1010, 1020, 2010, and 2020), or the completion of an equivalent competency exam, is required.

B. Required Course (3 credits)
LATS 2200 Introduction to Latin America (F) ........................................3

C. Electives (15 credits)
Students must choose a minimum of five courses from the following list. The courses must be chosen from at least two different disciplines.

- ANTH 3130 (CI) Peoples of Latin America ........................................3
- ANTH/SOC 5130/6130 Ethnographic Field School (Su) ..................6
- GEOG 4200 (CI) Regional Geography: Latin America (F,Su) .......3
- HIST 3620 History of Colonial Latin America ....................................3
- HIST 3630 History of Modern Latin America .....................................3
- HIST 3640 History of Social Movements in Latin America ..............3
- HIST 3650 Caribbean History ........................................................3
- HIST 3660 History of Mexico ..........................................................3
- POLS 3270 (DSS) Latin American Government and Politics (F) ....3
- POLS 4450 (CI) United States and Latin America (Sp) .................3
- PORT 3570 Brazilian Culture and Civilization (F) .........................3
- PORT 3630 Survey of Brazilian Literature (Sp) ............................3
- PORT 3800 Portuguese III Study Abroad (Su) ..............................3
- SPAN 3570 (DHA) Latin American Culture and Civilization (Sp) ....3
- SPAN 3620 Survey of Latin American Literature I (F,Sp) .............3
- SPAN 3630 Survey of Latin American Literature II (F,Sp) .............3
- SPAN 3800 Spanish III Study Abroad (Su) .................................1-4
- SPAN 4800 Hispanic Culture and Civilization—Study Abroad (Su) ...1-4
- SPAN 4910 Topics of Latin American Literature (F,Sp) ...............3

D. Restricted Electives (3 credits)
Students may choose one course from the following list to count toward their total elective credits.

- ENGL 3300 Period Studies in American Literature: The Mexican Revolution and its Aftermath in the United States (F,Sp) ..............3
- ENGL 5300 (CI) Literature and Gender: Chicana Literature (F,Sp).....3
- HIST 3670 Slavery in the Atlantic World ........................................3
- HIST 4630 The History of Mexican Americans ............................3

1Requires a proficiency in Spanish or Portuguese at the 3000 level or above.
2Requires a proficiency in Spanish at the 2000 level or above.

Additional Information
For additional information about the Latin American Studies minor, see the minor requirement sheet, which can be accessed online at:
http://www.usu.edu/ats/majorsheets/

2. Demonstration of proficiency in

In one of the following ways:

- A Bachelor of Arts (BA) degree signifies proficiency in one or more foreign languages. Specifically, the BA requirement may be completed in one of the following ways:

1. Demonstration of proficiency in one foreign language by successful completion of one course at the 2020-level or higher (or its equivalent).

Or

2. Demonstration of proficiency in two foreign languages by successful completion of the 1020 course level in one language and the 2010 course level in the second language (or its equivalent).

Or

3. Completion of an upper-division (3000-level or higher) foreign language grammar or literature course requiring the 2020 course level (or its equivalent) as a prerequisite. Conversation courses cannot be considered for satisfying this requirement.

For nonnative English-speaking students only, the following options are available:

1. Successful completion of the Intensive English Language Institute (IELI) program for international students.

Or

2. TOEFL, Michigan, or IELI placement scores high enough to meet the University admission criteria.

Focus of Study

The focus of study for the Liberal Arts major is to help students gain a basic understanding of the development of civilization, including historical and cultural traditions, political institutions and processes, an appreciation of arts and literature, and expanded capacities for critical thought. Four learning goals are identified, each requiring a minimum of 9 credits, for a total of 36 credits.

Students plan a multi-disciplinary academic program providing a focus for study, with emphasis in primarily social sciences, humanities, and arts.

Pre-professional and Elective Credits

Depending on a student’s career objectives, a student may take courses leading to further study in medicine, law, business, or other graduate programs, or continue to study in a number of different disciplines.

Sample Four-year Plan for Liberal Arts Major

Minimum GPA for Admission: 2.3, Career
Minimum GPA for Graduation: 2.0, major courses; 2.3, USU
Minimum Grade Accepted: C in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (32 credits)

Fall Semester (16 credits)

ENGL 1010 (CL1) Introduction to Writing: Academic Prose ............... 3
Foreign Language 1010-level course ............................................. 6
University Studies Breadth courses ........................................... 6
Elective course(s) ................................................................. 3

Spring Semester (16 credits)

Foreign Language 1020-level course ............................................. 4
University Studies Breadth courses ........................................... 6
Quantitative Literacy (QL) course ................................................ 3
Elective course(s) ................................................................. 3

Complete the CIL exams by the end of the Freshman Year.

Learning Objectives and Assessment

Assessment information for the Management and Human Resources Department can be found online at:
http://www.usu.edu/cob/mhr/dept_info/assess.htm

College of Business

Admission Requirements

All students majoring in entrepreneurship or human resource management must satisfy the College of Business admission requirements, provided on pages 112-113. Academic advising about these requirements is available in the College of Business Career and Education Opportunities Center, Business 309.

All students enrolled at USU are required to satisfy the General Education requirements and the University Studies Depth Education requirements of the University, as described on pages 49-57 of this catalog.

Matriculation Requirement and Transfer Limitation

No more than 15 USU College of Business credits (ACCT, BA, BIS, BUS, MHR), numbered 2000 and above, earned as a nonbusiness major (before acceptance into the College of Business) can be applied to a College of Business degree. More than 15 business credits can be transferred from other accredited institutions. However, additional USU College of Business credits added to previously earned transfer business credits may not exceed a combined total of 15. Furthermore, to earn a bachelor’s degree in a College of Business major, at least 50 percent of the required College of Business credits must be earned from coursework taken from the Utah State University College of Business.

USU Credits and Business Credits

At least 30 of the last 60 semester credits must be taken from Utah State University, 10 of which must be included within the last 40 credits presented for the degree. At least 50 percent of the College of Business credits required for a College of Business degree must be taken from the Utah State University College of Business or its departments, which include: School of Accountancy, Business Administration, Business Information Systems, Economics, Management and Human Resources.

College of Business Core

All majors in the Department of Management and Human Resources must complete the following prerequisite courses and business core courses, in addition to the specific courses listed for the major.

Business majors must take these courses as prerequisite to 3000-, 4000-, and 5000-level courses in the College of Business.

Pre-Business Course Requirements (13 credits)

ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp) .................................................3
MATH 1100 (QL) Calculus Techniques (F,Sp,Su) ..................3
STAT 2300 (QL) Business Statistics (F,Sp,Su) ......................4
PSY 1010 (BSS) General Psychology (F,Sp,Su) (3 cr) or
SOC 1010 (BSS) Introductory Sociology (F,Sp) (3 cr) .........3
Department of Management and Human Resources

All 3000-, 4000-, and 5000-level courses in the College of Business are restricted to students admitted to the College of Business or another USU major with an overall GPA of at least 2.67 and completion of at least 40 credits.

College of Business Core (37 credits)
ACCT 2010 Survey of Accounting I (F,Sp,Su).................................3
ACCT 2020 Survey of Accounting II (F,Sp,Su).............................3
BA 3400 (QI) Corporate Finance (F,Sp,Su)....................................3
BA 3500 Fundamentals of Marketing (F,Sp,Su).............................3
BA 3700 Operations Management (F,Sp,Su).................................3
BIS 2100 Principles of Management Information Systems (F,Sp,Su)3
BIS 2220 (CI) Business Communication (F,Sp,Su).......................3
BUS 3250 Discussions With Business Leaders (F,Sp)...................1
ECON 2010 (BSS) Introduction to Microeconomics (F,Sp)............3
ECON 3400 International Economics for Business (F,Sp,Su)........3
MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su)....3
MHR 3110 Managing Organizations and People (F,Sp,Su).............3
MHR 4800 (CI) Business Strategy in an Entrepreneurial Context (F,Sp,Su) (3 cr) or
MHR 4890 (CI) Business Strategy in a Global Context (F,Sp,Su) (3 cr).................................................................3

Requirements for Majors

Entrepreneurship (15 credits)
MHR 3510 Fundamentals of Entrepreneurship (F)..........................3
MHR 3520 Relationship and Organizational Competencies for Entrepreneurs (Sp)..........................................................3
MHR 3710 Developing Team and Interpersonal Skills (F,Sp)..........3
MHR 3820 International Management (F,Sp).................................3
MHR 4510 Senior Seminar in Entrepreneurship (F).......................3

Students completing the Entrepreneurship major requirements must take MHR 4880 as their senior capstone course in the Business Core requirements. Students should also note that MHR 3510 and 3520 must be taken prior to MHR 4510.

Human Resource Management (15 credits)

Required Courses (9 credits)
MHR 3710 Developing Team and Interpersonal Skills (F,Sp)...........3
MHR 3820 International Management (F,Sp).................................3
MHR 4630 Human Resource Management (F,Sp)........................3

Elective Courses (select 6 credits)
Students must complete at least two of the following:
MHR 3810 (DSS) Employment Law and Policy Development (F,Sp).................................................................3
BIS 4350 Introduction to Training and Development (Sp) (3 cr) or
ECON 5660 Training and Organizational Development (Sp) (2 cr)........................................................................2 or 3
ECON 5680 Labor Economics (Sp).................................................3
PUBH 3310 Occupational Health and Safety (F).........................3
ANTH 3200 (DSS/CI) Perspectives on Race (Sp)..........................3
SOC 3500 Social Psychology (F,Sp)..............................................3
SPCH 3250 (CI) Organizational Communication (F) (3 cr) or
SPCH 3330 (DSS) Intercultural Communication (F) (3 cr) or
SPCH 3600 Communication and Conflict (F) (3 cr).......................3
PHIL 3520 (DHA) Business Ethics (Sp) (3 cr).................................3

Elective Course Requirements
Because the University requires a minimum of 120 credits for a bachelor's degree, students will need to take some elective credits. These credits may be chosen from any course (1000-level or above) offered by the University. If a student wants to complete a minor or a dual major in another department, the use of elective credits should be planned carefully with an advisor in the other department.

If a College of Business student elects to take a minor, he or she is encouraged to select one from outside the College of Business.

Four-Year Degree Plans (8 Semesters)

Four-year degree plans for majors in the Management and Human Resources Department can be found on pages 385-386 and at: http://www.usu.edu/cobssc/web/fouryeardegreeplans.htm

Requirements for Minors

A minor in Management and a minor in Human Resource Management are available, as outlined below. Any deviation from the programs as outlined must be submitted in writing, with justification for the changes, to the department head for approval. A 2.50 GPA in the minor courses is required.

Minor in Management
This minor is for students who expect to work in an organization where they will assume supervisory or management responsibilities. The Management minor consists of a minimum of 12 credits.

Required:
MHR 3110 Managing Organizations and People (F,Sp,Su)..............3

Select three courses from the following:
MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su)....3
MHR 3510 Fundamentals of Entrepreneurship (F)........................3
MHR 3520 Relationship and Organizational Competencies for Entrepreneurs (Sp).........................................................3
MHR 3710 Developing Team and Interpersonal Skills (F,Sp)..........3
MHR 3810 Employment Law and Policy Development (Prerequisite: MHR 2050) (F,Sp).........................................................3
MHR 3820 International Management (F,Sp)...............................3
MHR 4510 Senior Seminar in Entrepreneurship (Prerequisites: MHR 3510 and 3520) (F).........................................................3
MHR 4630 Human Resource Management (F,Sp)........................3
PHIL 3520 (DHA) Business Ethics (Sp)........................................3
BIS 4350 Introduction to Training and Development (Sp) (3 cr) or
ECON 5660 Training and Organizational Development (Sp) (2 cr)........................................................................2 or 3
ECON 5680 Labor Economics (Sp).................................................3

Minor in Human Resource Management
This minor is for students who want to work in any of the human resource functions of an organization. The Human Resource Management minor consists of a minimum of 12 credits.

Required:
MHR 3110 Managing Organizations and People (F,Sp,Su)..............3
MHR 4630 Human Resource Management (F,Sp)........................3

Select two courses from the following:
MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su)....3
MHR 3710 Developing Team and Interpersonal Skills (F,Sp)..........3
MHR 3810 Employment Law and Policy Development (Prerequisite: MHR 2050) (F,Sp).........................................................3
MHR 3820 International Management (F,Sp)...............................3
PHIL 3520 (DHA) Business Ethics (Sp)........................................3

384 Utah State University 2006-2007 General Catalog
Department of Management and Human Resources

BIS 4350 Introduction to Training and Development (Sp) (3 cr) or ECON 5660 Training and Organizational Development (Sp) (2 cr) .........................................................2 or 3
ECON 5680 Labor Economics (Sp) ......................................................3
PUBH 3310 Occupational Health and Safety (F) ...................................3
ANTH 3200 (DSS/CI) Perspectives on Race (Sp) ....................................3
SOC 3500 Social Psychology (F,Sp).....................................................3
SPCH 3250 (CI) Organizational Communication (F) (3 cr) or SPCH 3330 (DSS) Intercultural Communication (F) (3 cr) or SPCH 3600 Communication and Conflict (F) (3 cr) ................................................3

Note: An overall GPA of 2.67 and admission into a degree-seeking major are required for enrollment in 3000- or 4000-level courses in the Department of Management and Human Resources.

Graduation Requirements

To be recommended by the department for graduation, majors in the Department of Management and Human Resources must have a grade point average of at least 2.50 in their upper-division College of Business core and major requirement courses, as well as an overall GPA of 2.50. This includes transfer credits. At least fifty percent of the business credits required for a business degree must be taken on the Utah State University campus or at a designated residence center.

Financial Assistance

The Department of Management and Human Resources and the College of Business award scholarships in addition to those available through the University Financial Aid Office. Information and application forms are available from the College of Business Career and Education Opportunities Center, Business 309.

Student Organizations

The department sponsors two student organizations. Membership in the organizations is open to all students, both undergraduate and graduate, who meet the membership requirements.

Collegiate Entrepreneurs’ Association (CEO) is the premier global entrepreneurship network serving more than 500 colleges and universities.

Society for Human Resource Management (SHRM) is the professional Human Resource Management organization co-sponsored by the Bridgerland Chapter of SHRM.

Additional Information

A major requirement sheet, which includes further information about career opportunities and course requirements for the majors and minors within the Management and Human Resources Department, can be found online at: http://www.usu.edu/ats/majorsheets/

Further information about undergraduate programs in the College of Business can be obtained from the Career and Education Opportunities Center, Business 309, or found on the Web at: http://www.usu.edu/cobceo

Four-Year Degree Plans (8 Semesters)

The following are suggested four-year plans for majors offered by the Department of Management and Human Resources.

Suggested Four-year Course of Study for Entrepreneurship Major

The following curriculum is required for the BS degree in entrepreneurship. Students enrolled in the entrepreneurship major should consult with their advisor to determine which breadth, depth, and elective courses they should complete. Each student should also consult with his or her advisor to develop an individualized plan of study that is applicable to his or her own interests.

Freshman Year (30 credits)

Fall Semester (15 credits)
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles ......................................................3
MATH 1050 (QL) College Algebra ....................................................4
USU 1010 University Connections ....................................................2
OSS 1400 Microcomputer Applications (3 cr) or
Passing scores on Computer and Information Literacy (CIL) exams (0 cr).................................................................0-3
(Note: Although OSS 1400 includes the CIL exams, the CIL requirement is met only by passing all six exams, not by simply passing OSS 1400.)

Breadth Creative Arts (BCA) course1 ....................................................3
Elective course(s) .................................................................0-3

Spring Semester (15 credits)
ECON 2010 (BSS) Introduction to Microeconomics .........................3
ENGL 1010 (CL) Introduction to Writing: Academic Prose ..............3
MATH 1100 (QL) Calculus Techniques ................................................3
PSY 1010 (BSS) General Psychology (3 cr) or
SOC 1010 (BSS) Introductory Sociology (3 cr) ..................................3
Breadth Humanities (BHU) course1 ....................................................3

Sophomore Year (31 credits)

Fall Semester (16 credits)
ACCT 2020 Survey of Accounting I ....................................................3
BIS 2100 Principles of Management Information Systems ..............3
MHR 2050 Legal and Ethical Environment of Business ..................3
STAT 2300 (QL) Business Statistics ..................................................4
Breadth Life Sciences (BLS) course1 ....................................................3

Spring Semester (15 credits)
ACCT 2020 Survey of Accounting II ..................................................3
BIS 2200 (CI) Business Communication ........................................3
MHR 3110 Managing Organizations and People .............................3
Breadth Physical Sciences (BPS) course1 ............................................3
Elective course(s) .................................................................3

Junior Year (29 credits)

Fall Semester (15 credits)
BA 3400 (QI) Corporate Finance ....................................................3
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ..................................................3
MHR 3510 Fundamentals of Entrepreneurship ................................3
Elective courses .................................................................6

Spring Semester (14 credits)
BA 3700 Operations Management ....................................................3
BUS 3250 Discussions With Business Leaders ...............................1
ECON 3400 International Economics for Business .......................3
MHR 3520 Relationship and Organizational Competencies for Entrepreneurs .................................................3
Elective courses .................................................................4
Department of Management and Human Resources

Senior Year (30 credits)
Fall Semester (15 credits)
BA 3500 Fundamentals of Marketing ................................................................. 3
MHR 3710 Developing Team and Interpersonal Skills ........................................ 3
MHR 4510 Senior Seminar in Entrepreneurship .............................................. 3
Depth Humanities and Creative Arts (DHA) course ......................................... 3
Elective course(s) .................................................................................. 3

Spring Semester (15 credits)
MHR 3820 International Management ............................................................. 3
MHR 4880 (CI) Business Strategy in an Entrepreneurial Context .................... 3
Depth Life and Physical Sciences (DSC) course .............................................. 3
Elective courses .................................................................................. 6

Suggested Four-year Course of Study for Human Resource Management Major
The following curriculum is required for the BS degree in human resource management. Students enrolled in the human resource management major should consult with their advisor to determine which breadth, depth, and elective courses they should complete. Each student should also consult with his or her advisor to develop an individualized plan of study that is applicable to his or her own interests.

Freshman Year (30 credits)
Fall Semester (15 credits)
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles .................................................................................. 3
MATH 1050 (QL) College Algebra .................................................................... 4
USU 1010 University Connections .................................................................. 2
OSS 14002 Microcomputer Applications (3 cr) or Passing scores on Computer and Information Literacy (CIL) exams (0 cr) ........................................................................... 0-3
(Note: Although OSS 1400 includes the CIL exams, the CIL requirement is met only by passing all six exams, not by simply passing OSS 1400.)
Breadth Creative Arts (BCA) course1 ................................................................ 3
Elective course(s) .................................................................................. 0-3

Spring Semester (15 credits)
ECON 2010 (BSS) Introduction to Microeconomics ......................................... 3
ENGL 1010 (CL) Introduction to Writing: Academic Prose ................................ 3
MATH 1100 (QL) Calculus Techniques ................................................................ 3
PSY 1010 (BSS) General Psychology (3 cr) or SOC 1010 (BSS) Introductory Sociology (3 cr) .......................................................... 3
Breadth Humanities (BHU) course1 .................................................................. 3

Elective courses .................................................................................. 6

Graduate Programs

Master of Science in Human Resources (MS HR)

Objectives
The MS in Human Resources degree prepares students for professional careers in the field of Human Resource Management. The instruction is designed to teach students to assume a strategic role in helping organizations gain competitive advantage by building employee commitment, competence, and effectiveness. Required subject areas include human resource planning, recruiting, performance management, selection, placement, compensation and benefits, career planning, training and organizational development, labor and employee relations, ethical/legal employment practices, statistical methods, and program evaluation.

Admission Requirements
See Admission Procedures on pages 99-100. Students are required to submit scores on the Graduate Management Admissions Test (GMAT) or the Graduate Record Examination (GRE). Prospective students may request information on the expected test performance standards for acceptance. Applicants are expected to have strong written and oral communication skills.

Students without sufficient relevant work experience are required to complete an approved internship. The executive in residence in the MHR Department and/or the MS in Human Resources...
steering committee will serve as facilitators to help secure internship opportunities. The Human Resource Certification Institute (HRCI) exam will be included as part of coursework.

Students are expected to be admitted to the program as matriculated students before taking coursework leading to the degree.

**Degree Requirements**

Students are held responsible for meeting requirements as outlined below. It is the student’s responsibility to be aware of all requirements and initiate the resolution of apparent inconsistencies.

The typical degree option is Plan C, which includes coursework to meet the degree requirements.

The MS in Human Resources degree requires a minimum of 36 credits beyond the Business Core taken as part of an AACSB-International accredited undergraduate business degree. The total number of credits is typically 50 for students without an undergraduate business degree or commensurate work experience. See Accelerated Business Core (in Master of Business Administration section, page 197) for information about satisfying the Business Core requirements. Coursework beyond the Business Core includes MHR 6310, 6330; MHR 6510 or 6680; MHR 6550, 6620, 6630, 6650, 6670, 6690, 6760; BUS 6250; and one 3-credit elective approved by the steering committee. Students with applicable and relevant work experience may substitute MHR 6900 for BUS 6250 (Graduate Internship) on approval of the MS in Human Resources steering committee. Students with an undergraduate degree from an AACSB-International accredited business school or equivalent work experience will not be required to take the business core. Students will take the HRCI (Human Resource Certification Institute) exam as part of coursework.

Additional information about the MS in Human Resources degree may be obtained by contacting the Department of Management and Human Resources.

**Financial Assistance and Assistantships**

A limited number of graduate assistantships, scholarships, and other departmental awards are provided to outstanding on-campus students on a competitive basis. Acceptance to the program does not guarantee financial assistance. Application forms are available from the MHR Department. The deadline for financial aid assistance is March 15.

**Master of Business Administration (MBA)**

The department also participates with other departments in the College of Business in offering the Master of Business Administration (MBA) Degree. A description of the MBA degree and program requirements can be found on pages 197-198 of this catalog.

**Management and Human Resources Faculty**

**Professors**
Gaylen N. Chandler, entrepreneurship, management
Glenn M. McEvoy, human resources, organizational behavior, management
David B. Stephens, business strategy and labor relations

**Professors Emeritus**
Vernon M. Buehler
Howard M. Carlisle
John R. Cragun
Gary B. Hansen
Leon R. McCarrey
Y. Krishna Shetty

**Associate Professors**
Ronda R. Callister, management, organizational behavior, international management
Ross E. Robson, lean manufacturing, management

**Adjunct Associate Professor**
Steven H. Hanks, business strategy, management, and entrepreneurship

**Assistant Professors**
Alison Cook, organizational behavior, human resource management
Konrad S. Lee, employment law, business law
Troy V. Mumford, organizational behavior, human resource management, compensation
Jeremy Short, business strategy

**Adjunct Senior Lecturer**
Mary Jo Blahna, organizational behavior, management, human resources

**Principal Lecturer**
Alan P. Warnick, human resource management

**Lecturers**
David G. Herrmann, management and entrepreneurship
Henry Nowak, entrepreneurship

**Course Descriptions**

Management and Human Resources (MHR), pages 665-667.

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), and Master of Science (MS) in Mathematics; BS and BA in Mathematics Education; BS in Composite Mathematics-Statistics Education; BS in Composite Mathematics/Statistics; Master of Mathematics (MMath); BS, BA, and MS in Statistics; MS in Industrial Mathematics; Doctor of Philosophy (PhD) in Mathematical Sciences

Graduate specializations: PhD in Mathematical Sciences—College Teaching, Interdisciplinary Studies, Pure and Applied Mathematics, and Statistics

Undergraduate Programs

Objectives

The Department of Mathematics and Statistics offers a variety of programs and courses designed to prepare students for careers in teaching and for positions as mathematicians and statisticians in industry and government. The department also provides service courses for students in many other disciplines and contributes to the University Studies program by providing Quantitative Literacy and Quantitative Intensive classes.

Placement of New Students

The mathematics ACT score, math placement exam, and Advanced Placement (AP) calculus and statistics scores are used for placement in 1000-level and 2000-level mathematics and statistics courses. New students and students who are registering for a math class at USU for the first time should have a math ACT score of at least 18 to register for MATH 1010 (Intermediate Algebra), a score of at least 19 to register for STAT 1040, and a score of at least 23 to register for MATH 1030 (Quantitative Reasoning), MATH 1050 (College Algebra), and MATH 1060 (Trigonometry). The alternative is to take the math placement exam through the Mathematics and Statistics Department. A student who has already taken a math class at USU may register for the next higher level course, providing he or she received a grade of C- or better in the prerequisite course. Equivalent transfer courses must also have a C- or better grade. Entering students with math ACT scores of less than 18 should register for MATH 0900 (Elements of Algebra) or take the math placement exam to qualify for a higher-level course. The math placement exam requires a small fee.

A math ACT score of at least 25 is needed to begin in MATH 1100, and an ACT score of at least 27 is needed to begin in MATH 1210.

Entering students with passing scores on AP calculus or statistics exams will be given 8 semester credits in mathematics for passing either one of the calculus exams, and 4 semester credits for passing the statistics exam. Part of this credit may include specific USU courses. Students with an AP calculus AB score of 3 will generally be advised to start in MATH 1210 (Calculus I). Students with a score of 4 or 5 on the calculus AB exam or a score of 3 or 4 on the calculus BC exam will be given credit for MATH 1210, and will be advised to begin in MATH 1220 (Calculus II). Students with a score of 5 on the calculus BC exam will be given credit for MATH 1210 and 1220, and will be advised to begin in MATH 2210 (Multivariable Calculus). Students with a score of 3 or higher on the AP statistics exam will be given credit for STAT 2000. Students may also take the math placement exam through the Mathematics and Statistics Department to determine if MATH 1100 (Calculus Techniques) or MATH 1210 (Calculus I) is an appropriate place to start.

The calculus courses MATH 1210, 1220, and 2210 are designed for students in mathematics, the sciences, and engineering. MATH 1100 (Calculus Techniques) is designed primarily for students in business and a few other majors. All students in calculus classes need strong backgrounds in the material covered in MATH 1010 and MATH 1050. In addition, the MATH 1210, 1220, 2210 sequence requires trigonometry (MATH 1060) and a graphics calculator.

Students with outstanding mathematics records in high school and transfer students with some experience in calculus may wish to consult with a departmental advisor prior to registration.

Departmental Admission Requirements

1. New freshmen admitted to USU in good standing qualify for admission to the major.

2. Transfer students from other institutions need a 2.2 transfer GPA, and students transferring from other USU majors need a 2.0 total GPA for admission to this major in good standing.

3. Students may be admitted to the Mathematics Education major by satisfying either of the above conditions. However, in order to be admitted to the Secondary Teacher Education Program (STEP), and to graduate from the Mathematics Education major (and minor), students must have a cumulative GPA of at least 3.0 in the equivalent of MATH 1210, 1220, and 2210, and an overall GPA of at least 2.75.
## University Requirements

All students in the Department of Mathematics and Statistics must satisfy the requirements of USU’s University Studies program, described on pages 49-57 of this catalog.

## College of Science Requirements

Every bachelor’s degree candidate in the College of Science must complete the following coursework or its equivalent:

1. One year of calculus:
   - MATH 1210 (QL) Calculus I (F,Sp,Su) (4 cr) and
   - MATH 1220 (QL) Calculus II (F,Sp,Su) (4 cr)

   In some degrees or emphases within degrees, the second semester of calculus may be replaced by STAT 3000. The substitution will be for specific degree programs, not by student choice.

2. One of the following year-long sequences. The chosen sequence must be outside the student’s major department.
   - BIOL 1610 Biology I (F) (4 cr) and BIOL 1620 (BLS) Biology II (Sp) (4 cr)
   - Or CHEM 1210 Principles of Chemistry I (F,Sp) (4 cr) and CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) (4 cr)
   - Or GEO 1110 (BPS) The Dynamic Earth: Physical Geology (F,Sp) (4 cr) and GEO 2110 The Earth Through Time (Sp) (4 cr)
   - Or PHYS 2110 The Physics of Living Systems I (4 cr) and PHYS 2120 (BPS) The Physics of Living Systems II (4 cr)
   - Or PHYS 2210 (QL) General Physics—Science and Engineering I (4 cr) and PHYS 2220 (BPS/QL) General Physics—Science and Engineering II (4 cr)

## Bachelor of Arts (BA) Degree

For this degree, students must complete the major requirements for the corresponding BS degree, plus the equivalent of two years of training in a foreign language. The Languages, Philosophy, and Speech Communication Department is responsible for approving the foreign language coursework for this degree.

## Major Requirements

Major and minor requirements in the Department of Mathematics and Statistics vary from time to time. Students may obtain from the department information about the exact requirements in effect at any given time. All grades for MATH and STAT courses applied toward a departmental major or minor must be C- or better. Major and minor requirements in effect at the beginning of Fall Semester 2005 are given below.

### Mathematics Major (44 credits)

#### A. Required Courses (29 credits)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1210 (QL)</td>
<td>Calculus I (F,Sp,Su)</td>
<td>4</td>
</tr>
<tr>
<td>MATH 1220 (QL)</td>
<td>Calculus II (F,Sp,Su)</td>
<td>4</td>
</tr>
<tr>
<td>MATH 2210 (QL)</td>
<td>Multivariable Calculus (F,Sp,Su)</td>
<td>4</td>
</tr>
<tr>
<td>MATH 2270 (QL)</td>
<td>Linear Algebra (F)</td>
<td>3</td>
</tr>
<tr>
<td>MATH 2280 (QL)</td>
<td>Ordinary Differential Equations (Sp)</td>
<td>3</td>
</tr>
<tr>
<td>MATH 4200 (CI)</td>
<td>Foundations of Analysis (F,Sp)</td>
<td>3</td>
</tr>
</tbody>
</table>

#### B. Core Courses (6 credits)

Select at least two courses (6 credits) from the following:

- MATH 5110 Differential Geometry (F) (3 cr)
- MATH 5220 Introduction to Analysis II (Sp) (3 cr)
- MATH 5270 Complex Variables (Sp) (3 cr)
- MATH 5310 Introduction to Modern Algebra (Sp) (3 cr)
- MATH 5340 Theory of Linear Algebra (Sp) (3 cr)
- MATH 5510 Introduction to Topology (F) (3 cr)

#### C. Elective Courses (9 credits)

Select at least three courses (9 credits) in mathematics courses numbered above 5000, excluding MATH 5570 (Actuarial Math I) and 5580 (Actuarial Math II).

Note: MATH 2250 (Linear Algebra and Differential Equations) may substitute for both MATH 2270 (Linear Algebra) and MATH 2280 (Ordinary Differential Equations); however, MATH 2270 and 2280 are recommended. Several options in this major exist (e.g., Actuarial Science and Computational Mathematics). Contact the Mathematics and Statistics Department for details.

### Suggested Four-year Course of Study for Mathematics Major

The suggested schedule shown below should be used in conjunction with the major requirement sheet.

#### Freshman Year (28-34 credits)

**Fall Semester (14-17 credits)**

- MATH 1210 (QL) Calculus I ................................................. 4
- College of Science required course ........................................ 4
- University Studies courses ....................................................... 6-9

**Spring Semester (14-17 credits)**

- MATH 1220 (QL) Calculus II ................................................. 4
- College of Science required course ........................................... 4
- University Studies courses ....................................................... 6-9

#### Sophomore Year (30-32 credits)

**Fall Semester (15-16 credits)**

- MATH 2210 (QL) Multivariable Calculus ................................. 3
- MATH 2250 (QL) Linear Algebra and Differential Equations (4 cr) or MATH 2270 (QL) Linear Algebra (3 cr) ............................................. 3 or 4
- University Studies courses ....................................................... 9

**Spring Semester (15-16 credits)**

- MATH 2250 (QL) Linear Algebra and Differential Equations (4 cr) or MATH 2280 (QL) Ordinary Differential Equations (3 cr) ......................................... 3 or 4
- MATH 5710 Introduction to Probability ..................................... 3
- University Studies or elective courses ........................................ 9

#### Junior Year (30 credits)

**Fall Semester (15 credits)**

- MATH 4200 (CI) Foundations of Analysis ................................. 3
- MATH 4310 (CI) Introduction to Algebraic Structures .......... 3
- Math core or elective course not requiring MATH 4200 ............ 3
- University Studies courses ....................................................... 6

**Spring Semester (15 credits)**

- Math core or elective courses ................................................. 6
- University Studies courses ....................................................... 9
Senior Year (24-30 credits)
Fall Semester (12-15 credits)
MATH 5210 Introduction to Analysis I ............................................. 3
Math core or elective courses ......................................................... 3-6
University Studies Depth or elective courses ................................. 6

Spring Semester (12-15 credits)
Math core or elective courses ......................................................... 3-6
University Studies or elective courses .......................................... 9

Mathematics Education Major (71 credits)
A. Mathematics and Statistics Courses (39 credits)
STAT 1040 (QL) Introduction to Statistics (F,Sp,Su) .................... 3
MATH 1210 (QL) Calculus I (F,Sp,Su) ............................................. 4
MATH 1220 (QL) Calculus II (F,Sp,Su) .......................................... 4
MATH 2210 (QI) Multivariable Calculus (F,Sp,Su) ......................... 3
MATH 2250 (QI) Linear Algebra and Differential Equations (F,Sp,Su) 3
MATH 3110 Modern Geometry (Sp) ............................................... 3
MATH 4200 (CI) Foundations of Analysis (F,Sp) ......................... 3
MATH 4310 (CI) Introduction to Algebraic Structures (F,Sp) .......... 3
MATH 4400 History of Mathematics and Number Theory (Sp) .... 3
MATH 4620 Computer Aided Math for Secondary Math Teachers (F) 3
MATH 5500 Capstone Mathematics and Statistics for Teachers (F) 3
MATH 5710 Introduction to Probability (F,Sp) ................................ 3

B. Secondary Teacher Education Program (STEP) (31 credits)
Level 1
SCED 3100 Motivation and Classroom Management (F,Sp) ........ 3
SCED 3210 (CI/DSS) Educational and Multicultural Foundations (F,Sp) 3
MATH 3300 School Laboratory for Mathematics Teachers Level I (F,Sp) 3
MATH 4500 Methods of Secondary School Mathematics Teaching (F,Sp) 3

Level 2
SPED 4000 Education of Exceptional Individuals (may be taken anytime) (F,Sp,Su) 2
SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) ............ 3
SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) .... 3
MATH 4300 School Laboratory for Mathematics Teachers Level II (F,Sp) 1

Level 3
SCED 5500 Student Teaching Seminar (F,Sp) ................................. 2
SCED 5630 Student Teaching in Secondary Schools (F,Sp) .............. 10

Note: Admission to the STEP requires a GPA of at least 3.00 in the equivalent of MATH 1210 (Calculus I), MATH 1220 (Calculus II), and MATH 2210 (Multivariable Calculus) and an overall GPA of at least 2.75. Graduation from this major also requires an overall GPA of at least 2.75. No more than three repeats in all required courses may be used in GPA computations. The STEP is normally completed during the last three semesters of the degree program, and consequently nearly all the mathematics classes in the Mathematics Education Major must be completed before beginning the STEP.

Note: Beginning in 2006, all USU teacher education candidates will be required to take and pass the content exam approved by the Utah State Office of Education in their major content area prior to student teaching.

Note: MATH 2270 (Linear Algebra) and MATH 2280 (Ordinary Differential Equations) may substitute for MATH 2250 (Linear Algebra and Differential Equations).

Suggested Four-year Course of Study for Mathematics Education Major
The suggested schedule shown below should be used in conjunction with the major requirement sheet.

Freshman Year (28-34 credits)
Fall Semester (14-17 credits)
STAT 1040 (QL) Introduction to Statistics ..................................... 3
MATH 1210 (QL) Calculus I ......................................................... 4
College of Science required course .......................................... 4
University Studies course(s) ..................................................... 3-6

Spring Semester (14-17 credits)
MATH 1220 (QL) Calculus II ..................................................... 4
College of Science required course .......................................... 4
University Studies courses ....................................................... 6-9

Sophomore Year (28-31 credits)
Fall Semester (13-16 credits)
MATH 2210 (QI) Multivariable Calculus ...................................... 3
MATH 2250 (QI) Linear Algebra and Differential Equations .......... 4
University Studies and teaching minor courses ................................ 6-9

Spring Semester (15 credits)
MATH 3110 Modern Geometry .................................................. 3
MATH 4200 (CI) Foundations of Analysis .................................. 3
MATH 4310 (CI) Introduction to Algebraic Structures .................. 3
MATH 5710 Introduction to Probability ....................................... 3
University Studies or teaching minor course .............................. 3

Junior Year (29-32 credits)
Fall Semester (15 credits)
MATH 4500 Methods of Secondary School Mathematics Teaching ............................................. 3
MATH 4620 Computer Aided Math for Secondary Math Teachers ............................................. 3
University Studies and teaching minor courses ................................ 9

Spring Semester (14-17 credits)
INST 3500 Technology Tools for Secondary Teachers .................. 1
SCED 3100 Motivation and Classroom Management .................. 3
SCED 3210 (CI/DSS) Educational and Multicultural Foundations .... 3
MATH 3300 School Laboratory for Mathematics Teachers Level I ............................................. 1
MATH 4400 History of Mathematics and Number Theory ............ 3
University Studies and teaching minor course(s) ......................... 3-6

Senior Year (29 credits)
Fall Semester (17 credits)
SPED 4000 Education of Exceptional Individuals ....................... 2
SCED 4200 (CI) Reading, Writing, and Technology .................... 3
SCED 4210 Cognition and Evaluation of Student Learning .......... 3
MATH 4300 School Laboratory for Mathematics Teachers Level II ............................................. 1
MATH 5500 Capstone Mathematics and Statistics for Teachers ............................................. 3
University Studies or teaching minor courses ................................ 5

Spring Semester (12 credits)
SCED 5500 Student Teaching Seminar ........................................ 2
SCED 5630 Student Teaching in Secondary Schools .................... 10
Composite Mathematics-Statistics Education Major (79-81 credits)

A. Mathematics and Statistics Courses (45-47 credits)

- MATH 1210 (QL) Calculus I (F,S,Su) ........................................4
- MATH 1220 (QL) Calculus II (F,S,Su) ........................................4
- STAT 3000 (QI) Statistics for Scientists (F,S)(Su) (3 cr) or
  STAT 2000 (QI) Statistical Methods (F,S) (3 cr) .....................3
- MATH 2210 (QI) Multivariable Calculus (F,S,Su) ....................3
- MATH 2250 (QI) Linear Algebra and Differential Equations
  (F,S,Su) ............................................................................4
  OR (MATH 2250; or MATH 2270 and 2280)
- MATH 2270 (QI) Linear Algebra (F) (3 cr) and
- MATH 2280 (QI) Ordinary Differential Equations (Sp) (3 cr) ........6
- STAT 2000 (QI) Linear Regression and Time Series (F) ............3
- MATH 3110 Modern Geometry (Sp) .........................................3
- MATH 4200 (CI) Foundations of Analysis (F,S).........................3
- MATH 4310 (CI) Introduction to Algebraic Structures (F,S)........3
- MATH 4400 History of Mathematics and Number Theory (Sp)
  .......................................................................................3
- MATH 4620 Computer Aided Math for Secondary Math Teachers
  (F,Sp) ..............................................................................3
- MATH 5500 Capstone Mathematics and Statistics for Teachers
  (F) ..................................................................................3
- MATH 5710 Introduction to Probability (F,S) ............................3
- STAT 5200 Design of Experiments (Sp) .....................................3

B. Secondary Teacher Education Program (STEP) (34 credits)

Level 1
- SCED 3100 Motivation and Classroom Management (F,S) .......3
- SCED 3210 (CI/DSS) Educational and Multicultural Foundations
  (F,S) ..................................................................................3
- MATH 3300 School Laboratory for Mathematics Teachers Level I
  (F,S) ...............................................................................3
- MATH 4500 Methods of Secondary School Mathematics Teaching
  (F,S) ..................................................................................3
- STAT 4500 Methods of Teaching Statistics in Secondary and Middle
  School (F,S) ......................................................................3

Level 2
- SPED 4000 Education of Exceptional Individuals
  (may be taken anytime) (F,S,Su) ..............................................2
- SCED 4200 (CI) Reading, Writing, and Technology (F,S) ..........3
- SCED 4210 Cognition and Evaluation of Student Learning (F,S) ..3
- MATH 4300 School Laboratory for Mathematics Teachers Level II
  (F,S) ..................................................................................1

Level 3
- SCED 5500 Student Teaching Seminar (F,S) .............................2
- SCED 5630 Student Teaching in Secondary Schools (F,S) ...........10

Note: Admission to the STEP requires a GPA of at least 3.00 in the
equivalent of MATH 1210 (Calculus I), MATH 1220 (Calculus II),
and MATH 2210 (Multivariable Calculus); a cumulative GPA of at
least 3.00 in STAT 1040 (Introduction to Statistics), and STAT 2000
(Statistical Methods) or STAT 3000 (Statistics for Scientists); and
an overall GPA of at least 2.75. No more than three repeats in all
required courses may be used in GPA computations. The STEP is
normally completed during the last three semesters of the degree
program, and consequently nearly all the mathematics and statistics
classes in the Mathematics-Statistics Education Major must be completed
before beginning the STEP.

Note: Beginning in 2006, all USU teacher education candidates will
be required to take and pass the content exam approved by the Utah
State Office of Education in their major content area prior to student
Teaching.

Suggested Four-year Course of Study for Composite Mathematics-Statistics Education Major

The suggested schedule shown below should be used in conjunction
with the major requirement sheet.

Freshman Year (31-34 credits)

Fall Semester (14-17 credits)
- STAT 1040 (QL) Introduction to Statistics ...............................3
- MATH 1210 (QL) Calculus I ..................................................4
- College of Science required course .......................................4
- University Studies course(s) ................................................3-6

Spring Semester (17 credits)
- STAT 2000 (QI) Statistical Methods (3 cr) or
- STAT 3000 (QI) Statistics for Scientists (3 cr) .....................3
- MATH 1220 (QL) Calculus II ................................................4
- College of Science required course .......................................4
- University Studies courses ...................................................6

Sophomore Year (30-31 credits)

Fall Semester (15-16 credits)
- MATH 2210 (QI) Multivariable Calculus ................................3
- MATH 2250 (QI) Linear Algebra and Differential Equations (4 cr)
or
  MATH 2270 (QI) Linear Algebra (3 cr) ................................3
- STAT 5100 (CI/QI) Linear Regression and Time Series ......3
- University Studies courses ...................................................6

Spring Semester (15 credits)
- MATH 3110 Modern Geometry ..............................................3
- MATH 4200 (CI) Foundations of Analysis ..............................3
- MATH 5710 Introduction to Probability (F,S) ..............................3
- STAT 5200 Design of Experiments .......................................3
- University Studies or teaching minor course .........................3

Junior Year (29-32 credits)

Fall Semester (15 credits)
- MATH 4310 (CI) Introduction to Algebraic Structures ............3
- MATH 4500 Methods of Secondary School Mathematics Teaching ..................................................3
- MATH 4620 Computer Aided Math for Secondary Math Teachers ........................................3
- STAT 4500 Methods of Teaching Statistics in Secondary and Middle School ........................................3
- University Studies course ...................................................3

Spring Semester (14-17 credits)
- INST 3500 Technology Tools for Secondary Teachers .......1
- SCED 3100 Motivation and Classroom Management ................3
- SCED 3210 (CI/DSS) Educational and Multicultural Foundations ........................................3
- MATH 3300 School Laboratory for Mathematics Teachers Level I ..................................................1
- MATH 4400 History of Mathematics and Number Theory ..................................................3
- University Studies course ...................................................3-6

Senior Year (29 credits)

Fall Semester (17 credits)
- SPED 4000 Education of Exceptional Individuals ..................2
- SCED 4200 (CI) Reading, Writing, and Technology ............3
- SCED 4210 Cognition and Evaluation of Student Learning ..3
- MATH 4300 (CI) School Laboratory for Mathematics Teachers Level II ..................................................3
- MATH 5500 Capstone Mathematics and Statistics for Teachers ..................................................3
- University Studies or teaching minor course .........................3

Spring Semester (12 credits)
- SCED 5500 Student Teaching Seminar ..................................2
- SCED 5630 Student Teaching in Secondary Schools .............10

**B. Elective Courses (12 credits)**

Select four courses (12 credits) in statistics numbered above 5000. One of the three elective classes may be selected from:

- MATH 5610 Computational Linear Algebra and Solution of Systems of Equations (F)
- MATH 5760 Stochastic Processes (F)

**Note:** MATH 2250 (Linear Algebra and Differential Equations) may substitute for MATH 2270 (Linear Algebra).

#### Suggested Four-year Course of Study for Statistics Major

The suggested schedule shown below should be used in conjunction with the major requirement sheet.

**Freshman Year (28-34 credits)**

**Fall Semester (14-17 credits)**

- CS 1400 Introduction to Computer Science—CS 1
- MATH 1210 Calculus I
- College of Science required course(s)
- University Studies course(s)

**Spring Semester (14-17 credits)**

- MATH 1220 Calculus II
- STAT 2000 Statistical Methods (3 cr) or
- STAT 3000 Statistics for Scientists (3 cr)
- College of Science required course(s)
- University Studies course(s)

**Sophomore Year (30 credits)**

**Fall Semester (15 credits)**

- MATH 2210 Multivariable Calculus
- MATH 2270 Linear Algebra
- University Studies courses

**Spring Semester (15 credits)**

- MATH 4200 Foundations of Analysis
- University Studies or elective courses

**Junior Year (30 credits)**

**Fall Semester (15 credits)**

- MATH 5710 Introduction to Probability
- STAT 5100 Linear Regression and Time Series
- Statistics elective course
- University Studies courses

**Spring Semester (15 credits)**

- MATH 5720 Introduction to Mathematical Statistics
- Statistics elective course
- University Studies courses

#### Senior Year (24-30 credits)

**Fall Semester (12-15 credits)**

- Statistics elective course(s)
- University Studies courses

**Spring Semester (12-15 credits)**

- Statistics elective course(s)
- University Studies courses

### Emphasis Requirements

#### Computational Mathematics Emphasis (60 credits)

The Computational Mathematics Emphasis is available in the Mathematics Major.

**A. Required Mathematics Courses (35 credits)**

- MATH 1210 Calculus I (F,Sp,Su)
- MATH 1220 Calculus II (F,Sp,Su)
- MATH 2210 Multivariable Calculus (F,Sp,Su)
- MATH 2270 Linear Algebra (F)
- MATH 2280 Ordinary Differential Equations (Sp)
- MATH 3310 Discrete Mathematics (F,Sp,Su)
- MATH 4200 Foundations of Analysis (F,Sp)
- MATH 5210 Introduction to Analysis I (F)
- MATH 5610 Computational Linear Algebra and Solution of Systems of Equations (F)
- MATH 5620 Numerical Solution of Differential Equations (Sp)
- MATH 5710 Introduction to Probability (F,Sp)

**B. Required Computer Science Courses (13 credits)**

- CS 1400 Introduction to Computer Science—CS 1 (F,Sp,Su)
- CS 1405 Introduction to Computer Science—CS 1 Lab (F,Sp,Su)
- CS 1410 Introduction to Computer Science—CS 2 (F,Sp,Su)
- CS 2420 Algorithms and Data Structures—CS 3 (F,Sp,Su)
- CS 2450 Software Engineering (F,Sp)

**C. Mathematics Elective Courses (6 credits)**

Select two courses (6 credits) in mathematics numbered above 4620, excluding MATH 5570 (Actuarial Math I) and 5580 (Actuarial Math II).

**D. Computer Science Elective Courses (6 credits)**

Select at least two courses (6 credits) in computer science numbered above 4000.

**Note:** Mathematics majors are strongly urged to take MATH 2270 (Linear Algebra) and MATH 2280 (Ordinary Differential Equations) instead of MATH 2250 (Linear Algebra and Differential Equations).

#### Suggested Four-year Course of Study for Mathematics Major, Computational Mathematics Emphasis

The suggested schedule shown below should be used in conjunction with the major requirement sheet.

**Freshman Year (35-41 credits)**

**Fall Semester (18-21 credits)**

- MATH 1210 Calculus I (F,Sp,Su)
- MATH 1220 Calculus II (F,Sp,Su)
- MATH 2210 Multivariable Calculus (F,Sp,Su)
- MATH 2270 Linear Algebra (F)
- MATH 5760 Actuarial Math I (F)
- CS 1400 Introduction to Computer Science—CS 1 Lab (F,Sp,Su)
- CS 1405 Introduction to Computer Science—CS 2 Lab (F,Sp,Su)
- CS 1410 Introduction to Computer Science—CS 2 Lab (F,Sp,Su)
- CS 2420 Algorithms and Data Structures—CS 3 Lab (F,Sp,Su)
- CS 2450 Software Engineering (F,Sp)
- University Studies courses

**Spring Semester (12-15 credits)**

- Statistics elective course(s)
- University Studies courses
## Department of Mathematics and Statistics

### Spring Semester (17-20 credits)

- **MATH 1220 (QL) Calculus II** .................................................. 4
- **CS 1410 (QI) Introduction to Computer Science—CS 2** ............. 3
- College of Science required course ........................................... 4

**University Studies courses** .................................................. 6-9

### Sophomore Year (36-38 credits)

#### Fall Semester (18-19 credits)

- **MATH 2210 (QI) Multivariable Calculus** ................................ 3
- **MATH 2250 (QI) Linear Algebra and Differential Equations (4 cr)**
  or **MATH 2270 (QI) Linear Algebra (3 cr)** .................................. 3 or 4
- **CS 2420 (QI) Software Engineering** ......................................... 3

**University Studies or elective courses** .................................. 9

#### Spring Semester (18-19 credits)

- **MATH 2250 Linear Algebra and Differential Equations (4 cr)**
  or **MATH 2280 (QI) Ordinary Differential Equations (3 cr)** ....... 3 or 4
- **MATH 3310 Discrete Mathematics** .......................................... 3
- **CS 2450 (CI) Software Engineering** ......................................... 3

**University Studies or elective courses** .................................. 9

### Junior Year (18-24 credits)

#### Fall Semester (9-12 credits)

- **MATH 4200 (CI) Foundations of Analysis** ............................... 3

**University Studies courses** .................................................. 6-9

#### Spring Semester (9-12 credits)

- Math elective course(s) ............................................................. 3-6
- Computer Science elective course(s) ........................................ 3-6

### Senior Year (33-39 credits)

#### Fall Semester (15-18 credits)

- **MATH 5210 Introduction to Analysis I** ................................... 3
- **MATH 5610 Computational Linear Algebra and Solution of**
  Systems of Equations .............................................................. 3

**Math/Computer Science elective course(s)** ............................. 3-6

**University Studies Depth or elective courses** ......................... 6

#### Spring Semester (18-21 credits)

- **MATH 5620 Numerical Solution of Differential Equations** ........ 3
- **MATH 5710 Introduction to Probability** ................................ 3

**Math/Computer Science elective course(s)** ............................. 3-6

**University Studies or elective courses** .................................. 9

### Actuarial Science Emphasis (59 credits)

The Actuarial Science Emphasis is available in *either* the Mathematics Major or the Statistics Major.

#### A. Mathematics and Statistics Courses

**(for Mathematics Majors) (44 credits)**

- **MATH 1210 (QL) Calculus I (F,Sp,Su)** .................................. 4
- **MATH 1220 (QL) Calculus II (F,Sp,Su)** .................................. 4
- **MATH 2210 (QI) Multivariable Calculus (F,Sp,Su)** .................. 3
- **MATH 2270 (QI) Linear Algebra (F)** ..................................... 3
- **MATH 2280 (QI) Ordinary Differential Equations (Sp)** ............ 3
- **MATH 4200 (CI) Foundations of Analysis (F,Sp)** ..................... 3
- **MATH 4310 (CI) Introduction to Algebraic Structures (F,Sp)** .. 3
- **MATH 5210 Introduction to Analysis I (F)** ............................. 3
- **MATH 5220 (CI) Actuarial Math I (F)** ................................. 3
- **MATH 5570 Actuarial Math II (Sp)** ...................................... 3
- **MATH 5710 Introduction to Probability (F,Sp)** ........................ 3
- **MATH 5720 Introduction to Mathematical Statistics (Sp)** ......... 3
- **STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) (3 cr)** ....... 3
  or **STAT 2000 (QI) Statistical Methods (F,Sp) (3 cr)** ............. 3
  or **STAT 5100 (QI/CI) Linear Regression and Time Series (F)** .. 3

#### B. Mathematics and Statistics Courses

**(for Statistics Majors) (44 credits)**

Statistics Majors must complete all of the courses listed above in

**Section A, except for the following two courses:**

- **MATH 4310 (CI) Introduction to Algebraic Structures (F,Sp)** .. 3
- **MATH 5210 Introduction to Analysis I (F)** ............................. 3

In addition, students must complete the following:

- **STAT 5200 Design of Experiments (Sp)** ............................... 3
- **Elective STAT course numbered above 5000** ........................ 3

#### C. Required Accounting, Business Administration, Economics, and Management and Human Resources Courses (15 credits)

- **ACCT 2010 Survey of Accounting I (F,Sp,Su)** ....................... 3
- **ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp)** .................................................... 3
- **ECON 2010 (BSS) Introduction to Microeconomics (F,Sp)** ...... 3
- **MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su)** 3

Note: Mathematics majors are strongly urged to take MATH 2270 (Linear Algebra) and MATH 2280 (Ordinary Differential Equations) instead of MATH 2250 (Linear Algebra and Differential Equations).

Note: Admission to the Actuarial Science Emphasis requires explicit departmental approval.

### Composite Major in Mathematics/Statistics

**(59 credits)**

#### A. Required Courses (44 credits)

- **MATH 1210 (QL) Calculus I (F,Sp,Su)** .................................. 4
- **MATH 1220 (QL) Calculus II (F,Sp,Su)** .................................. 4
- **MATH 2210 (QI) Multivariable Calculus (F,Sp,Su)** .................. 3
- **MATH 2270 (QI) Linear Algebra (F)** ..................................... 3
- **MATH 2280 (QI) Ordinary Differential Equations (Sp)** .......... 3
- **MATH 4200 (CI) Foundations of Analysis (F,Sp)** ..................... 3
- **MATH 4310 (CI) Introduction to Algebraic Structures (F,Sp)** .. 3
- **MATH 5210 Introduction to Analysis I (F)** ............................. 3
- **MATH 5220 (CI) Actuarial Math I (F)** ................................. 3
- **MATH 5570 Actuarial Math II (Sp)** ...................................... 3
- **MATH 5710 Introduction to Probability (F,Sp)** ........................ 3
- **MATH 5720 Introduction to Mathematical Statistics (Sp)** ......... 3
- **CS 1400 Introduction to Computer Science—CS 1 (F,Sp,Su)** .... 3
- **STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) (3 cr)** ....... 3
- **STAT 2000 (QI) Statistical Methods (F,Sp) (3 cr)** ............... 3
- **STAT 5100 (QI/CI) Linear Regression and Time Series (F)** .... 3
- **STAT 5200 Design of Experiments (Sp)** ............................... 3

#### B. Elective Mathematics Courses (6 credits)

Select at least two courses (6 credits) in mathematics numbered above 5000.

#### C. Elective Statistics Courses (9 credits)

Select at least three courses (9 credits) in statistics numbered above 5000. Either MATH 5760 (Stochastic Processes) or MATH 5570 (Actuarial Math I) may substitute for one of the statistics elective courses.

Note: Mathematics majors are strongly urged to take MATH 2270 and 2280 instead of MATH 2250, but MATH 2250 may substitute for MATH 2270 and 2280.
Minor Requirements

Mathematics Minor (23 credits)
A. Required Courses (17 credits)
MATH 1210 (QL) Calculus I (F,Sp,Su) ........................................... 4
MATH 1220 (QL) Calculus II (F,Sp,Su) ....................................... 4
MATH 2210 (Q) Multivariable Calculus (F,Sp,Su) ......................... 3
MATH 2270 (Q) Linear Algebra (F) ............................................. 3
MATH 2280 (Q) Ordinary Differential Equations (Sp) ................... 3

B. Elective Courses (6 credits)
Select at least two additional courses (6 credits) in mathematics numbered above 4000, excluding the following courses: MATH 4300, 4400, 4500, 4620, 5570, and 5580.

Statistics Minor (15 credits)
A. Required Courses (9 credits)
STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) (3 cr) or
STAT 2000 (QI) Statistical Methods (F,Sp,Su) (3 cr) ....................... 3
STAT 5100 (QI/Q) Linear Regression and Time Series (F) .......... 3
STAT 5200 Design of Experiments (Sp) .................................... 3

B. Elective Courses (6 credits)
Select two additional courses (6 credits) from statistics courses numbered above 5000, or from the following courses:
MATH 5710 Introduction to Probability (F,Sp) ............................ 3
MATH 5720 Introduction to Mathematical Statistics (Sp) ............. 3
MATH 5760 Stochastic Processes (F) .......................................... 3

Mathematics Education Minor (42 credits)
STAT 1040 (QL) Introduction to Statistics (F,Sp,Su) .................... 3
MATH 1210 (QL) Calculus I (F,Sp,Su) ....................................... 4
MATH 1220 (QL) Calculus II (F,Sp,Su) ....................................... 4
MATH 2210 (Q) Multivariable Calculus (F,Sp,Su) ......................... 3
MATH 2250 (Q) Linear Algebra and Differential Equations (F,Sp,Su) .......................................................... 4
MATH 3110 Modern Geometry (Sp) .......................................... 3
MATH 4200 (CI) Foundations of Analysis (F,Sp) ......................... 3
MATH 4310 (CI) Introduction to Algebraic Structures (F,Sp) .......... 3
MATH 4400 History of Mathematics and Number Theory (Sp) .... 3
MATH 4500 Methods of Secondary School Mathematics Teaching (F,Sp) .......................................................... 3
MATH 4620 Computer Aided Math for Secondary Math Teachers (F) 3
MATH 5500 Capstone Mathematics and Statistics for Teachers (F) 3
MATH 5710 Introduction to Probability (F,Sp) ............................ 3

Completion of the Secondary Teacher Education Program (STEP) for the student’s Secondary Education major is also required. Admission to the STEP requires a GPA of at least 3.00 in the equivalent of MATH 1210, 1220, and 2210, and an overall GPA of at least 2.75. Graduation from this minor also requires an overall GPA of at least 2.75. No more than three repeats in all required courses may be used in GPA computations. The STEP is normally completed during the last three semesters of study, and consequently nearly all the mathematics classes in the Mathematics Education Minor must be completed before beginning the STEP.

Biomathematics Minor (36-40 credits)
A. Required Courses (28 credits)
BIOL 1610 Biology I (F) ......................................................... 4
BIOL 1620 (BLS) Biology II (Sp) ............................................ 4

MATH 1210 (QL) Calculus I (F,Sp,Su) ........................................ 4
MATH 1220 (QL) Calculus II (F,Sp,Su) ....................................... 4
MATH 2270 (Q) Linear Algebra (F) ............................................. 3
MATH 2280 (Q) Ordinary Differential Equations (Sp) ................... 3
STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) ....................... 3
MATH/BIOL 4230 (QI) Applied Mathematics in Biology (Sp) ....... 3

Note: MATH 2250 may substitute for both MATH 2270 and 2280.

B. Elective Courses (8-12 credits)
Biology majors must take one course from the biology electives (listed below), and two courses from the mathematics and statistics electives (listed below). Mathematics and Statistics majors must take two courses from the biology electives, and one course from the mathematics and statistics electives. All other majors must take two courses from each set of electives.

Biology Electives
BIOL 3220 (QI) Field Ecology (F) ........................................... 2
BIOL 5020 (QI) Modeling Biological Systems (F) ....................... 3
BIOL 5380 Evolutionary Genetics (F) ....................................... 4
BIOL 5600 Comparative Animal Physiology (F) ......................... 3
BIOL 5620 Medical Physiology (Sp) ......................................... 3
FRWS 3810 Plant and Animal Populations (Sp) ......................... 3
PUBH 5330 (QI) Industrial Hygiene Chemical Hazard Control (F) 3
BMET 5500 Land-Airpasshle Interactions (Sp) .......................... 3

Mathematics and Statistics Electives
MATH 5410 Methods of Applied Mathematics (F) ...................... 3
MATH 5420 Partial Differential Equations (Sp) .......................... 3
MATH 5460 Introduction to the Theory and Application of Nonlinear Dynamical Systems (Sp) ............................................. 3
MATH 5610 Computational Linear Algebra and Solution of Systems of Equations (F) ......................................................... 3
MATH 5620 Numerical Solution of Differential Equations (Sp) ....... 3
MATH 5710 Introduction to Probability (F,Sp) ........................... 3
STAT 5100 (CI/QI) Linear Regression and Time Series (F) ........... 3
STAT 5120 Categorical Data Analysis (F) ................................... 3
STAT 5200 Design of Experiments (Sp) ................................... 3
STAT 5600 (CI) Applied Multivariable Statistics (Sp) ................... 3

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/
Department of Mathematics and Statistics

Additional Information

Students who enter the University with AP credit in Mathematics and/or Statistics, and about 30 additional AP or CLEP credits, may be able to complete both a BS and an MS degree within five years or less. Interested students should consult with a departmental undergraduate advisor.

For detailed information about requirements for majors and minors within the Mathematics and Statistics Department, see the major requirement sheet, which is available from the department, or online at: http://www.usu.edu/ats/majorsheets/

Financial Support

The department offers several one-, two-, and four-year scholarships to qualified students who enroll as full-time Mathematics, Mathematics Education, or Statistics majors. The winner of the Hunaker Scholarship receives a cash award each semester for two years. This award is given in addition to any four-year scholarship or tuition waiver for which the student is eligible. During the final two years, the recipient is expected to work as a grader for the department. The department also offers other scholarships (Elitch, Ellis, van Vliet, and departmental). The amount of these scholarships varies from year to year. The Ellis Scholarship is awarded to a junior or senior Mathematics Education major, and the recipient is selected by the department. To apply for any of these scholarships (except for the Ellis Scholarship, for which there is no application) fill out the scholarship application form located at http://www.math.usu.edu/undergrad/application.html, send a statement of qualifications, including high school transcripts and SAT or ACT scores, and three letters of recommendation to:

Scholarship Committee
Department of Mathematics and Statistics
Utah State University
3900 Old Main Hill
Logan UT 84322-3900

Applications must be received by April 1.

Learning Objectives

All students having majors within the Department of Mathematics and Statistics are expected to achieve competency in: (1) pre-calculus algebra; (2) calculus of one and several variables; (3) ordinary differential equations; (4) linear algebra/matrices, eigenvalues/eigenvectors, determinant, rank; and (5) analysis (introduction to formal proofs/analysis theory).

Students enrolled in specific departmental majors should also have competence in additional areas pertaining to their major. These areas are listed in the following paragraphs.

Mathematics Major

(1) algebraic structures; (2) analysis/advanced calculus; (3) complex variables; (4) topology; (5) algebraic theory; and (6) partial differential equations.

Statistics Major

(1) theory of probability and statistics; (2) linear regression/time series; (3) experiment design; and (4) one or more of sampling, categorical analysis, multivariate analysis, quality control.

Mathematics Education Major (including Composite Mathematics-Statistics Education)

(1) algebraic structures; (2) probability; (3) history of mathematics; (4) methods for secondary school teaching of mathematics and/or statistics; and (5) in-service teaching experiences.

Other Majors and Emphases

(e.g., Computational Mathematics Emphasis, Actuarial Science Emphasis, etc.)

Replace general competencies in traditional areas (i.e., algebra, topology, analysis) with specific topics related to the specialized emphasis. For example, students in the Computational Mathematics Emphasis need the ability to write computer code to solve linear, nonlinear, stochastic, and (partial and ordinary) differential equations; and students in the Actuarial Science Emphasis need two semesters of actuarial mathematics.

Assessment

Assessment of General Education Courses (MATH 1050 and STAT 1040)

Beginning with Spring Semester 2004, the department has conducted an annual assessment of student performance in primary General Education courses (including MATH 1050 and STAT 1040). The performance of approximately 100 randomly selected students from each of MATH 1050 and STAT 1040 was evaluated by topic area on the common finals of these courses. Summary results will be available soon. The process was repeated for Spring Semester 2005. Together, these two years of data provide a baseline against which future groups of students will be compared. Weaknesses in topic learning will then be identified, and the Undergraduate Committee and course supervisors will provide feedback to instructors in an effort to bring overall student performance to target levels.

Assessment of Core Courses (MATH 1210, 1220, 2210, 2250, and STAT 1040, 2000, 3000)

Core content of these courses changes infrequently and is primarily addressed through the selection of textbooks at three-year to five-year intervals. Primary assessment of these courses is through semester evaluations and final examination scores and course grade profiles. Competency in these areas is essential for any student majoring in mathematics or statistics.

Assessment of Upper-division Major Courses

These courses are re-evaluated by subcommittees of the Undergraduate Committee in terms of: level and appropriateness of content relative to learning objectives, textbook selection, final examinations, course grades, and student evaluations. At two-year to five-year intervals, courses are redesigned if the subject matter develops beyond traditional norms, or if market demand indicates that an under-utilized course should be replaced by a course having greater demand (e.g., development of a new cryptography course).

Undergraduate Research Opportunities

Students interested in undergraduate research opportunities in the Department of Mathematics and Statistics at Utah State University should begin by contacting the assistant department head and undergraduate research liaison, Daniel C. Coster, (435) 797-2815, coster@math.usu.edu.
Department of Mathematics and Statistics

Several departmental faculty members have engaged in successful undergraduate research projects. These faculty members, along with their research areas, include: James Powell (mathematical modeling of pine beetle infestations), Ian Anderson (differential geometry applications to theoretical and applied physics), and Richard Culler (analysis of epidemiological and environmental data). In general, undergraduate research offers students an excellent opportunity to explore mathematical and statistical theory and practice under the guidance of an experienced researcher, to focus their own course selection on particular career paths and research areas (including graduate school), to co-author professional publications, and to actively make presentations at conferences or local seminars.

Graduate Programs

Admission Requirements

See the general admission requirements for graduate programs at Utah State University on pages 99-100 of this catalog. In general, students wishing to pursue graduate studies in mathematics or statistics should have a bachelor’s degree in mathematics, statistics, or a closely related field, with extensive coursework in one of the departmental disciplines.

Students entering the Master of Mathematics (MMath) program must either possess a valid secondary school teaching license or be concurrently enrolled in a secondary school teacher licensure program.

Degree Programs

Master of Science (MS) in Mathematics

This program prepares students to work as mathematicians in government, business, and industry. This degree may also be a “stepping stone” for students who ultimately wish to pursue a doctorate in mathematics or a closely related subject.

Master of Science (MS) in Statistics

This program is primarily designed to prepare students for careers in business, industry, federal, state, and local government. Students pursuing graduate degrees in other disciplines, such as biology, natural resources, engineering, business, economics, epidemiology, and the social sciences, may elect to earn an MS in statistics concurrent with their other degree programs. For most students, the MS in statistics will prove sufficient for career preparation. However, some graduates may ultimately pursue a doctorate in statistics, biostatistics, or a closely related discipline.

Master of Science (MS) in Industrial Mathematics

The Industrial Mathematics master’s degree is designed to broaden the learning experiences and job opportunities for master’s students in mathematics. The program of study incorporates fundamental applied mathematics and interdisciplinary coursework in support of an industrial internship experience.

Master of Mathematics (MMath)

This program is designed specifically for secondary school teachers of mathematics. The purpose of this degree is to provide students with a broad background in mathematics.

Doctor of Philosophy (PhD) in Mathematical Sciences

This is a terminal degree for mathematics and statistics researchers in academe, government, and industry, and for prospective college teachers.

Specializations for PhD in Mathematical Sciences

The College Teaching Specialization is designed to prepare students to teach undergraduate mathematics in two- and four-year colleges and in universities. This program is less specialized than the other two options. Students in the College Teaching specialization receive broad training in pure and applied mathematics. The dissertation for this specialization includes exposition of important mathematical theories and their historical relationships in an area of mathematics of the student’s choosing.

The Interdisciplinary Studies Specialization offers students the opportunity to receive advanced training in mathematics and/or statistics in the context of another field of inquiry, such as biology, ecology, business, economics, engineering, or education. Students in this specialization will usually take about two thirds of their coursework in the Department of Mathematics and Statistics, and the remaining third in the other discipline. The student’s dissertation committee will choose two members from outside the Department of Mathematics and Statistics. The dissertation itself will generally entail the development of advanced mathematical or statistical methods to solve problems in the other subject area.

The Pure and Applied Mathematics Specialization is a traditional doctoral program in mathematics, offering broad training in the foundations of modern mathematics together with specialized training in an area of mathematical research. The dissertation represents a significant contribution to mathematics research in the chosen area of specialization.

The Statistics Specialization offers broad training in theoretical and applied statistics for students seeking careers in academia, industry, or government. The dissertation represents a significant contribution to statistical research.

Course Requirements

Departmental requirements change from time to time. Check with the Department of Mathematics and Statistics for the list of requirements currently in effect. The requirements listed below are in effect for Fall Semester 2005.

Master of Science in Mathematics

This degree requires 30 credits of approved coursework at or above the 5000 level. At least 18 of these credits must be at the 6000 level or above, excluding MATH 6990 and 7990 (Continuing Graduate Advisement) and MATH 7910 (College Teaching Internship). Generally, most of the coursework will be in mathematics, but the student’s supervisory committee may approve courses in statistics, physics, engineering, or any other discipline, if it seems such coursework is appropriate for the student’s program of study.

The MS in mathematics has three options. The Plan A or the thesis option requires taking 6 credits of MATH 6970 (Thesis and Research) and working with a faculty member on a substantial research project. The research must be presented in a thesis, which must be approved
Department of Mathematics and Statistics

by the student’s supervisory committee and the dean of the School of Graduate Studies. An oral defense of the thesis must be arranged through the School of Graduate Studies.

The Plan B or project option requires taking 3 credits of MATH 6970 and working with a faculty member on a smaller research project. A written report of the research must be approved by the student’s supervisory committee. An oral defense of the report must be scheduled through the School of Graduate Studies.

The third option of the MS in Mathematics requires only coursework, and is called the Plan C option.

All students in the MS program in Mathematics must pass a written qualifying examination covering the introductory analysis and advanced calculus material presented in MATH 4200, 5210, and 5220. Students may take this exam before beginning formal coursework in the MS program, and must take the exam at the end of the first full year of matriculation. The exam is typically given twice a year, in May and September. Matriculated students who fail on their first try must pass the exam at the next scheduled opportunity. A detailed exam syllabus is contained in the Graduate Handbook, available from the department.

Master of Science in Statistics
This degree requires 30 credits of approved coursework at or above the 5000 level or above, excluding STAT 6990 and STAT 7990 (Continuing Graduate Advisement). All students must take STAT 6710 and 6720 (Mathematical Statistics I and II). Generally, most of the coursework will be in statistics, but the student’s supervisory committee may approve courses in mathematics, biology, economics, or any other discipline if it deems such coursework to be appropriate for the student’s program of study.

The MS in statistics has Plan A (thesis), Plan B (report), and Plan C (coursework only) options. The Plan A and Plan B options require students to work with a faculty member on a research project, taking 6 or 3 credits of MATH 6970, respectively, and presenting the results of the research in a written report. For both the Plan A and Plan B options, the report must be approved by the student’s supervisory committee. A Plan A report (thesis) must also be approved by the dean of the School of Graduate Studies. Both Plan A and Plan B reports require an oral defense that must be scheduled through the School of Graduate Studies.

Students in all three options of the MS in Statistics must pass a written qualifying examination based on the material presented in STAT 3000 (Statistics for Scientists), MATH 5710 (Introduction to Probability), and MATH 5720 (Introduction to Mathematical Statistics). Students may take the exam before beginning any formal coursework in the MS program. Students must attempt the exam by the end of the first full year of matriculation. The exam is usually given in May and September each year. Matriculated students who fail the exam on their first try must pass the exam at the next scheduled opportunity. A detailed exam syllabus is available in the Graduate Handbook, available from the department.

Master of Science in Industrial Mathematics
This degree requires 36 credits of coursework at or above the 5000 level. At least 15 of these credits must be completed in MATH courses at the 6000 level or above. Additionally, students must complete a total of 9 credits outside of Mathematics which complement their internship and final project. A maximum of 3 of these credits may be taken at the 5000-level (i.e., one 3-credit course in another department). See the departmental website or the Graduate Handbook for more detailed information about coursework requirements.

Students in the MS program in Industrial Mathematics are required to pass the Advanced Calculus examination (see the Master of Science in Mathematics examination requirements), or the Statistics qualifying examination (see the Master of Science in Statistics examination requirements), or an examination based on material presented in four core courses chosen by the student during the first year. The exam, which can be taken before or at the beginning of the student’s second year in the program, is usually given in May or September. Students are also required to complete a final project based on work done during an internship, either with a company or possibly with another department on campus. The project will include a technical write-up suitable to the industry/field, and presentation to the involved faculty and students in the program. This follows the Plan B option listed for the Master of Science in Mathematics degree.

The Departmental Graduate Committee supervises all MS and MMath students until a supervisory committee for the student is established and approved. Prior to advancement to candidacy, students in Plan A and Plan B options for the MS degree in mathematics and statistics must pass an examination in English writing. This exam is administered by the Department of Mathematics and Statistics.

Master of Mathematics
This program requires at least 36 credits approved by the Graduate Committee within the Department of Mathematics and Statistics. At least 21 of these credits must be course work in mathematics classes numbered above 5000, and the remaining credits must be chosen from approved courses offered within the College of Education and Human Services. MATH 4620 or an approved substitute must also be included. The GPA for the 36 credits and for the 21 math credits must be at least 3.0.

PhD in Mathematical Sciences
All four specializations require a course of study of 60 credits beyond a master’s degree or 90 credits beyond a bachelor’s degree. In almost all cases, a student who applies to the PhD program who does not already have a master’s degree will first be directed to the MS programs in mathematics and statistics. Satisfactory performance in one of these programs can lead to admission to the PhD program in mathematical sciences.

The core requirements for the PhD degree in Mathematical Sciences that are common to all four specializations include the following:

1. Passing a standard written qualifying examination appropriate for the specialization.
2. Passing a comprehensive examination that is constructed specifically for the student by his or her supervisory committee. The form of the examination may be written or oral, or may include a combination of written and oral components. The length and content of the exam are determined by the student’s supervisory committee.
3. Successfully complete a test of technical English writing skills. Usually the student’s dissertation proposal will serve this purpose.
5. Successfully defend the dissertation in a final oral examination.

After completing items 1-3, a PhD student may be advanced to candidacy.
Requirements that are specific to the specialization of the PhD in Mathematical Sciences are listed below. In all cases, it is assumed that the student already has a master’s degree in mathematics or statistics.

The College Teaching Specialization requires at least 60 credits in mathematics courses numbered 6000 or higher, excluding MATH 7990 and MATH 6990, of which no more than 20 can be completed in MATH 7970 (Dissertation Research). At least 6 credits should be selected from classes and seminars at the 7000 level, and 6 credits of MATH 7910 (College Teaching Internship) are also required. Students in this specialization take a qualifying examination in Real Analysis. The student's dissertation in this specialization may take several forms, including a traditional, publishable contribution to some area of mathematics; a significant contribution in the area of mathematics education; or an exposition of important mathematical theories and their historic relationships in an area of the student's choosing.

The Interdisciplinary Studies Specialization requires at least 60 credits numbered 6000 or higher, excluding MATH 7990, STAT 7990, MATH 6990, and STAT 6990. No more than 30 of the credits may be completed in MATH 7970 or STAT 7970 (Dissertation Research). At least 20 of the credits should be in mathematics and/or statistics, of which at least 6 should be in seminars and classes at the 7000 level. An additional 10 credits in the student’s chosen interdisciplinary area are also required. Students in this specialization may take a qualifying examination in Real Analysis or in Probability and Mathematical Statistics, depending on whether the majority of their coursework is in mathematics or in statistics. The student’s PhD supervisory committee should include two persons in the student’s selected interdisciplinary area, and the comprehensive examination should have a significant interdisciplinary component. The dissertation for a student in this specialization should involve the development and application of mathematical or statistical methods to solve problems in the chosen interdisciplinary area, and should be publishable in journals in that area.

The Pure and Applied Mathematics Specialization requires at least 60 credits in mathematics numbered 6000 or higher, excluding MATH 6990 and 7990. At least 6 credits must be selected from seminars or classes numbered 7000 or higher, and no more than 30 of the credits can be completed in MATH 7970 (Dissertation Research). The qualifying examination for this option is in Real Analysis. The dissertation should be a publishable, significant contribution to research in an area of mathematics.

The Statistics Specialization requires at least 60 credits in statistics at the 6000 and 7000 level, excluding STAT 6990 and 7990. With the permission of the student’s supervisory committee, some of these credits may be in mathematics or in another discipline. At least 6 credits must be selected from seminars and classes numbered 7000 and higher, and a maximum of 30 credits may be completed in STAT 7970 (Dissertation Research). Students in this specialization take a qualifying examination in Probability and Mathematical Statistics. The dissertation constitutes a publishable, significant contribution to research in statistics.

Research

Mathematics research opportunities within the department are many and varied, and students are urged to contact faculty about mutual interests at an early stage as feasible. The interdisciplinary option permits and encourages study with a broad spectrum of outstanding nationally recognized University research programs.

Financial Assistance

Graduate students in the PhD program, the MMath program, and the Plan A and B options of the MS programs are eligible for teaching assistantships in the department. In most cases, a teaching assistant is responsible for teaching and grading a section of about 40 students in an introductory mathematics or statistics course during each semester. Stipends for teaching assistants are $13,000 for MS students, $14,000 for PhD students who have not been advanced to candidacy, and $16,000 for PhD students who have been advanced to candidacy. In rare situations, a graduate student may be offered a paper grading and tutoring assistantship that pays half of the teaching assistantship stipend. All graduate student stipends described here carry with them a waiver of all nonresident tuition. PhD students with stipends also receive a waiver of resident tuition. The department is also allocated a small number of resident tuition waivers for MS students each year. The department is able to support most PhD students and some MS students with summer teaching assignments that pay $3,000. Mathematics and Statistics faculty members who have research grants may choose to partially or fully support students that they are advising.

Mathematics and Statistics Faculty

Professors

Ian M. Anderson, differential geometry, global analysis
LeRoy B. Beasley, matrix theory, linear algebra, combinatorics
James S. Cangelosi, mathematics education, psychometrics
Lawrence O. Cannon, topology, mathematics education
D. Richard Cutler, environmental statistics, epidemiology
E. Robert Heal, analysis, statistics, mathematics education
Lance L. Littlejohn, differential equations, special functions
James Powell, applied mathematics, mathematical biology
David H. Sattinger, differential equations
Russell C. Thompson, differential equations
Zhi-Qiang Wang, nonlinear differential equations, nonlinear analysis
Stanley C. Williams, measure theory, modern analysis

Professors Emeritus

Ronald V. Canfield, multivariate and industrial statistics
Chris S. Coray, numerical analysis
Duane Loveland, geometric topology, continuum theory
Jerry Ridenhour, differential equations
Donald V. Sisson, statistical methods, experimental design

Associate Professors

Daniel C. Coster, experimental design, linear models
Christopher D. Corcoran, computational biostatistics
Adelle Cutler, statistical computing
Mark E. Fels, differential geometry
Joseph V. Koebbe, numerical analysis, applied mathematics
Piotr Kokoszka, probability and time series analysis
Michael C. Minnotte, nonparametric density estimation, statistical visualization
Xiaofeng Ren, partial differential equations, applied mathematics
Juergen Symanzik, computational and graphical statistics
Kathryn Turner, numerical analysis, optimization, linear algebra
Danusz M. Wilczynski, geometric and algebraic topology

Associate Professors Emeritus

Wayne R. Rich, mathematics education
E. Eugene Underwood, matrix theory, linear algebra
James D. Watson, numerical analysis

Utah State University 2006-2007 General Catalog
Assistant Professors
David E. Brown, discrete mathematics, graph theory
Peg Howland, numerical linear algebra
Brynja R. Kohler, mathematics education, mathematical biology
John R. Stevens, bioinformatics, applied statistics, meta-analysis
M. K. Stephen Yeung, dynamical systems, gene network structures

Principal Lecturers
David D. Bregenzer, mathematics, statistics
Eric Rowley, mathematics, mathematics education

Lecturers
Bryan Bornholdt, mathematics, mathematics education
Claudia Mora, mathematics, mathematics education

Course Descriptions
Mathematics (MATH), pages 663-665.
Statistics (STAT), pages 719-721.
Department of Mechanical and Aerospace Engineering

Department Head: Byard D. Wood  
Location: Engineering 419  
Phone: (435) 797-2867  
FAX: (435) 797-2417  
Undergraduate/Graduate E-mail: kbzobell@engineering.usu.edu  
WWW: http://www.mae.usu.edu/  

Undergraduate Advisor:  
Kathleen E. Bayn, Engineering 308, (435) 797-2705,  
kathy.bayn@usu.edu

Degrees offered: Bachelor of Science (BS), Master of Engineering (ME), Master of Science (MS), and Doctor of Philosophy (PhD) in Mechanical Engineering

Undergraduate Emphases: Mechanical Engineering—Aerospace Engineering, Computational Engineering, Manufacturing Engineering

Graduate specializations: Aerospace Engineering, Manufacturing Engineering, Mechanical Engineering

Graduate Areas of Interest: Advanced Additive Manufacturing; Aeronautics; Astrodynamics and Orbital Mechanics; Bioengineering; Cluster Supercomputers; Composite Materials; Computational and Experimental Fluid Mechanics; Heat and Mass Transfer; Micromachining; Soil/Structure Interfaces; Spacecraft and Optical Systems Control; Solar Energy Systems; Spacecraft Guidance, Navigation, and Control Systems; Welding and Materials Joining

Undergraduate Programs

Mission

The Department of Mechanical and Aerospace Engineering provides graduates with a foundation of knowledge and experience upon which to build successful careers in mechanical, manufacturing, or aerospace engineering, or other fields where a strong engineering background is required or desirable. Undergraduate programs emphasize mechanical engineering fundamentals and computer-based problem solving, while teaching students to learn, synthesize, and communicate engineering information. Graduate programs emphasize fundamental and applied research, providing students with enhanced preparation for engineering practice, research, and education. Students, faculty, and staff are committed to excellence in learning, discovery, and engagement in an environment that fosters diversity and mutual respect.

Undergraduate Program Objectives (Mechanical Engineering)

1. Graduates will succeed in entry-level engineering positions with mechanical, manufacturing, or aerospace firms in regional, national, or international industries, as well as with government agencies.
2. Graduates will succeed in the pursuit of advanced degrees in engineering or other fields where a solid foundation in mathematics, science, and engineering fundamentals is required.
3. Graduates will be able to synthesize mathematics, science, engineering fundamentals, and laboratory and work-based experiences to formulate and solve engineering problems in both thermal and mechanical systems areas.
4. Graduates will have proficiency in computer-based engineering, including modern numerical methods, software design and development, and the use of computational tools.
5. Graduates will be prepared to communicate and work effectively on team-based engineering projects.
6. Graduates will recognize the importance of, and have the skills for, continued independent learning.

Undergraduate Program Outcomes (Mechanical Engineering)

Fundamentals

Students will identify, formulate, and solve basic engineering problems utilizing:
1. linear algebra
2. calculus-based statistics
3. multivariable calculus
4. differential equations
5. calculus-based physics
6. chemistry
7. material science
8. solid mechanics
9. fluid mechanics
10. thermal science
11. manufacturing science

Communication

Students will develop and demonstrate the ability to communicate engineering information, including geometry, technical concepts, and results, by:
1. participating in oral presentations.
2. writing proposals and reports.
3. developing engineering drawings and specifications.
4. participating in team-based engineering projects.

Laboratory Experiences

Students will participate in laboratory experiences, which:
1. include experimental design, data collection, and data analyses.
2. incorporate the use of modern laboratory and data acquisition equipment.
3. utilize statistical analysis and interpretation of data.
4. develop basic manufacturing skills.
5. may include work-based learning experiences, such as internships.
Department of Mechanical and Aerospace Engineering

Computer-based Engineering
Students will demonstrate proficiency in the application of computer technology to engineering problem-solving through:

1. application of modern numerical methods and computational techniques.
2. design and development of engineering software.
3. integration of numerical solutions into the engineering process of design and analysis.
4. use of current commercial engineering software.

Humanities and Social Sciences
Students will acquire significant exposure to the humanities and social sciences, so as to:

1. gain an appreciation for the broad impact of engineering solutions on society.
2. demonstrate an understanding of the fundamentals of the history, principles, form of government, and economic system of the United States.
3. demonstrate a knowledge of contemporary global issues.
4. contribute to the development of the individual as a responsible well-rounded citizen.

Design and Synthesis
Students will participate in the design and realization process, in which they will:

1. develop a set of multidisciplinary engineering requirements.
2. synthesize material from mathematics, science, and engineering fundamentals to solve engineering problems.
3. design, develop, and verify software to solve engineering problems.
4. bring a system from requirements definition to concept development, then specification, prototype and testing, and production or fabrication using significant engineering analysis.
5. demonstrate the links between design, prototyping, testing, manufacturing, and other disciplines.
6. manage a project, including budgeting and detailed planning.

Independent Learning
Students will recognize the importance of, and demonstrate the skills required for, independent learning through:

1. independent study required in the engineering curriculum.
2. exposure to case studies in ethics and professional responsibility.
3. exposure to advanced topics in engineering science.
4. exposure to advanced topics in engineering research.
5. studying for and passing the Fundamentals of Engineering Examination.

Assessment and Quality Improvement
The MAE faculty and staff are committed to excellence and to continuous quality improvement. A responsive assessment and feedback process involving major constituencies, including faculty, students, alumni, and industrial employers of students and graduates, is in place and ongoing.

Options for Undergraduate Study
The Mechanical Engineering BS degree provides the broadest background of any discipline in the field of engineering. Mechanical Engineering graduates are prepared to pursue careers in such widely diverse industries as aerospace, agricultural equipment, automotive, biotechnical, chemical processing, composite materials, computer equipment, defense, electrical utilities, food processing, industrial equipment, manufacturing, marine, energy, nuclear, petroleum, robotics, and solar energy. Most Mechanical Engineering graduates are prepared for graduate studies and enhanced career prospects in engineering or other areas, such as consulting, law, medicine, business management, or teaching. In addition, students who are preparing to apply for admission to medical school will find that Mechanical Engineering provides an excellent foundation for the increasingly technology-oriented field of medicine.

The Aerospace Engineering emphasis within the Mechanical Engineering BS degree serves to focus mechanical engineering fundamentals on the mechanics and dynamics of both flight within the atmosphere and space flight. Included within its scope are studies in aerodynamics, aircraft flight dynamics and control, aircraft design, spacecraft mechanics, spacecraft attitude motion and control, and space systems design. Graduates who complete the aerospace engineering emphasis are prepared to pursue careers in aircraft design and development, aircraft flight testing, spacecraft and space systems design, and spacecraft trajectory design and analysis. As fully qualified Mechanical Engineers, graduates with the aerospace engineering emphasis are also well-prepared to pursue graduate studies or careers in the industries listed above under Mechanical Engineering.

The Manufacturing Engineering emphasis within the Mechanical Engineering BS degree prepares students to be proficient in the fundamentals of engineering, as well as in materials and manufacturing processes; process, assembly, and product engineering; manufacturing competitiveness; manufacturing systems design; lean manufacturing; and laboratory experience. Graduates will understand the behavior and properties of materials as they are altered and influenced by processing in manufacturing; the design of products and the equipment, tooling, and environment necessary for their manufacture; the creation of competitive advantage through manufacturing planning, strategy, and control; the analysis, synthesis, and control of manufacturing operations using statistical and calculus based methods; and how to measure manufacturing process variables and make technical inferences about the process. Graduates will have the necessary background to pass the Certified Manufacturing Technologist and Certified Manufacturing Engineer exams. Graduates who complete the Manufacturing Engineering emphasis are prepared to pursue graduate studies or careers in any industry that manufactures a product. For example, the aerospace, automotive, electronics, machine tool, petroleum, and electronics industries all employ manufacturing engineers as product designers, process designers and managers, maintenance engineers, and quality control engineers.

The Computational Engineering emphasis within the Mechanical Engineering BS degree prepares students to be proficient in the
Department of Mechanical and Aerospace Engineering

theory and fundamentals of engineering, as well as in advanced simulation techniques and numerical methods. Computational engineering encompasses the design, development, and application of computational systems for the solution of physical problems in engineering and science. These computational systems include not only the algorithms and software required for the solution of mathematical equations describing physical processes, but also the means and methods of visualizing, analyzing, and interpreting computed results and other physical data. Computational engineering focuses on developing the student’s readiness in solving problems of complex systems in engineering and technology by means of computational modeling, analysis, and simulations. Students graduating with this emphasis will also earn a minor in mathematics. Students who complete the computational engineering emphasis will be prepared to pursue careers in all fields of mechanical engineering, including design, simulation, and modeling, and will also be well-prepared to pursue graduate studies.

The first two years of the MAE curriculum are structured to concentrate on the fundamentals of mathematics, chemistry, physics, computer science, and basic engineering science. During the second two years, students apply these fundamentals to more concentrated courses in the essentials of mechanical, aerospace, computational, and/or manufacturing engineering. Laboratory activities and computer usage are integrated throughout the curriculum to give students opportunities for hands-on exposure to modern computer hardware and software, as well as other modern hardware and laboratory facilities. Engineering design activities begin during the first two years and progress in depth as the student’s proficiency increases. The engineering design experience culminates in a capstone senior design course, integrating the engineering coursework into a focused, realistic design project.

The Mechanical Engineering degree is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (EAC/ABET). The Aerospace Engineering emphasis, Computational Engineering emphasis, and Manufacturing Engineering emphasis are included within the Mechanical Engineering degree.

Admission and Graduation Requirements

Freshman and transfer students must satisfy the admission policies and entrance requirements of both the University and the College of Engineering. Each new student will be assigned an advisor, who will help plan an educational program fulfilling the student’s professional goals. Placement of incoming students will depend on high school and/or prior college coursework. Those who complete a portion of the University Studies requirements by examination (CLEP) and/or by advanced placement (AP) credit may complete the requirements for a Bachelor of Science degree in less than four years.

Curriculum

At the beginning of each school year, each student should obtain a detailed, four-year requirement sheet. This sheet, which lists semester requirements for each of the four curricula (mechanical, computational, manufacturing, and aerospace), may be obtained from the departmental office. All students in the department follow the preprofessional engineering curriculum for the freshman and sophomore years. Prior to the junior year, the student must apply for admission to the professional program and, in consultation with the faculty mentor, select an area of emphasis. Students who are unable to take courses during the semester indicated on the curriculum requirement sheet may develop alternative schedules, consistent with prerequisites and the timing of course offerings.

GPA Requirement

A 2.3 GPA in all technical courses is the minimum standard which preprofessional students must attain in order to be considered for admission to any MAE professional program.

Course Requirements

The specific course requirements for the MAE preprofessional program and the MAE professional programs are quite extensive and may occasionally change. For these reasons, the complete requirements are not listed here. For more information, contact the department or send an Internet e-mail request to joan.smith@usu.edu.

A passing grade on the Fundamentals of Engineering Exam, the first step in becoming a licensed professional engineer, is required for graduation. Past experience has shown that the USU Mechanical and Aerospace Engineering students are well-prepared for this locally administered, national exam.

For additional information on academic requirements, see the College of Engineering (pages 120-121) and the Undergraduate Graduation Requirements (pages 58-61) sections of this catalog.

Pre-professional Program

The curriculum for the first two years is common for Aerospace, Computational, Mechanical, and Manufacturing students.

1Students must select 15 credits of technical elective courses from the list of approved MAE Technical Elective Courses shown below.

Note: Elective courses, once selected and undertaken by a student, become part of the required program for that student.

The selection of elective courses needs to be given careful consideration. The preparation for a career in the broad field of mechanical and aerospace engineering and the selection of classes by real interest is more important than the maximization of the undergraduate grade point average.

MAE Technical Elective Courses
MAE 5020 Finite Element Methods in Solid Mechanics I (F) .................. 3
MAE 5060 Mechanics of Composite Materials I (Sp) ................................. 3
MAE 5310 Dynamic Systems and Controls (F) ............................................ 3

ECE 5320 Mechatronics (Sp) ................................................................. 4
ENGR 5500 High Performance Computing for Engineers (F) ................. 3
MHR 5350 Contemporary Manufacturing Management (F) ..................... 3

Students may choose one of their technical electives from the following courses:
MATH 4630 Computer Aided Math for Scientists and Engineers (Sp) .......... 3
MATH 5270 Complex Variables (Sp) ......................................................... 3
MATH 5410 Methods of Applied Mathematics (F) .................................... 3
MATH 5420 Partial Differential Equations (Sp) ......................................... 3
MATH 5620 Numerical Solution of Differential Equations (Sp) ............... 3
MATH 5640 Optimization (Sp) ................................................................. 3
STAT 5200 Design of Experiments (Sp) ..................................................... 3
STAT 5300 (QI) Statistical Process Control (Sp) ........................................ 3
Special Problems courses under MAE 5930 may be used as technical
electives with prior approval.

Professional Program in Aerospace Engineering

In addition to completing the pre-professional program, students who
choose to graduate with the Aerospace Engineering emphasis must
complete the following courses as their elective selection.

Junior Year (31 credits)
Fall Semester (17 credits)
MAE 2200 Engineering Numerical Methods I ............................................ 2
MAE 3040 Mechanics of Solids ................................................................. 3
MAE 3320 Advanced Dynamics ................................................................. 3
MAE 3400 Thermodynamics I ................................................................. 3
MAE 3420 Fluid Mechanics ................................................................. 3
MATH 4700 Engineering Mathematics and Statistics .............................. 3

Spring Semester (14 credits)
MAE 2450 Engineering Numerical Methods II ............................................ 3
MAE 3340 Instrumentation and Measurements ............................................ 3
MAE 3440 (QI) Heat and Mass Transfer ................................................. 3
MAE 3800 Design I ................................................................................... 3
MAE 4300 Machine Design .................................................................... 3

Senior Year (31-32 credits)
Fall Semester (16-17 credits)
MAE 4400 (CI) Fluids/Thermal Laboratory .................................................... 2
MAE 4800 (CI) Design II ........................................................................... 3
MAE 5300 Vibrations .................................................................................. 3
MAE 5510 Dynamic Systems and Controls (F) ............................................ 3
MAE 5530 Space System Design (Sp) ........................................................ 3
MAE 5580 Aircraft Design (F) ..................................................................... 3
MAE 5600 Manufacturing Process Planning and Statistical Quality
Control (F) ................................................................................................. 3
MAE 5610 Hydraulics and Pneumatics (Sp) ................................................... 3
MAE 5620 Manufacturing Automation (F) ................................................. 3
MAE 5630 Machining Theory and Applications (Sp) .................................. 3
MAE 5640 Design for Manufacturability (F) .............................................. 3
MAE 5650 Nontraditional and Additive Manufacturing Processes
(Sp) ............................................................................................................ 3
MAE 5660 Transport Phenomena in Manufacturing Processes (Sp) .......... 3
MAE 5680 Manufacturing Planning and Simulation (Sp) ............................ 3
MAE 5900 Cooperative Practice (F,Sp,SU) ................................................ 3
MAE 5930 ST: Kinematics (F) ................................................................. 1-3
ECE 3710 Microcomputer Hardware and Software (F,Sp) ......................... 4
ECE 5230 Spacecraft Systems Engineering (F) ............................................ 3
ECE 5310 Control Systems (F) ................................................................. 3
ECE 5320 Mechatronics (Sp) ................................................................. 4
ENGR 5500 High Performance Computing for Engineers (F) ................. 3
MHR 5350 Contemporary Manufacturing Management (F) ..................... 3

During their senior year, Aerospace Engineering students must take one of the following
courses: MAE 5020, 5060, or 5440; and two of the following classes: MAE 5510, 5530,
5580, or 5930 (ST: Kinematics-Moortenbug).

Professional Program in Manufacturing Engineering

In addition to completing the pre-professional program, students who
choose to graduate with the Manufacturing Engineering emphasis must
complete the following courses as their elective selection.

Junior Year (31 credits)
Fall Semester (17 credits)
MAE 2200 Engineering Numerical Methods I ............................................ 2
MAE 3040 Mechanics of Solids ................................................................. 3
MAE 3320 Advanced Dynamics ................................................................. 3
MAE 3400 Thermodynamics I ................................................................. 3
MAE 3420 Fluid Mechanics ................................................................. 3
MATH 4700 Engineering Mathematics and Statistics .............................. 3

#### Manufacturing Engineering Approved Technical Elective Courses

Students must choose five courses from the following list:

- MAE 5020 Finite Element Methods in Solid Mechanics I (F) | 3 |
- MAE 5310 Dynamic Systems and Controls (F) (3 cr) or MAE 5620 Manufacturing Automation (F) (3 cr) | 3 |
- MAE 5600 Manufacturing Process Planning and Statistical Quality Control (F) (3 cr) or STAT 5300 (QI) Statistical Process Control (Sp) (3 cr) | 3 |
- MAE 5640 Design for Manufacturability (F) | 3 |
- MAE 5650 Nontraditional and Additive Manufacturing Processes (Sp) | 3 |
- MAE 5660 Transport Phenomena in Manufacturing Processes (Sp) | 3 |
- MAE 5680 Manufacturing Planning and Simulation (Sp) | 3 |
- MHR 5350 Contemporary Manufacturing Management (F) | 3 |
- STAT 5200 Design of Experiments (Sp) | 3 |

#### Computational Engineering Emphasis

In addition to completing the pre-professional program, students who choose to graduate with the Computational Engineering emphasis must complete the following courses as their elective selection.

<table>
<thead>
<tr>
<th>Junior Year (31 credits)</th>

</tr>
</tbody>
</table>

*MATH 5620 fulfills the requirement for a Math Minor.

#### Financial Support

Scholarships, assistantships, and work-study programs are available to undergraduate students through the University. In addition, the MAE department employs undergraduates to assist in engineering research and development. Aerodynamics, design of instrumentation and payloads for the upper atmosphere and space, buried structures, and manufacturing processes and controls are some of the research programs that involve undergraduate students. Cooperative education and industrial employment opportunities for students are coordinated by the University Placement Office.

#### Concurrent BS/Master’s Program

The concurrent BS/Master’s program allows engineering students to begin taking graduate-level classes during their senior year. This permits them to complete requirements for both the BS degree and the master’s degree concurrently during two years. Students in this program have a greater selection of graduate courses, since many graduate courses are taught during alternate years. In addition, the student’s senior design project could be a start for a graduate design project or thesis. After completing their BS degree, students in the program can earn a master’s degree in only one additional year. Both the BS and the master’s degree can generally be earned with 150 total credits, although students should note that a Plan C MS requires 3 extra credits. In order to qualify for the concurrent program, students must have a 3.4 GPA for the 60 credits completed most recently. Finally, students with a master’s degree can expect a much higher starting salary following graduation. (For more information, see College of Engineering section of this catalog, pages 121-122.)

#### Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2115, honors@cc.usu.edu. Additional information can be found online at: [http://www.usu.edu/honors/](http://www.usu.edu/honors/)
Department of Mechanical and Aerospace Engineering

Additional Information

For more information about Bachelor of Science requirements and the sequence in which courses should be taken, see major requirement sheet, available from the Mechanical and Aerospace Engineering Department, or online at: http://www.usu.edu/ats/majorsheets/

Graduate Programs

Admission Requirements

All students intending to pursue graduate studies at Utah State University must complete and return an Application for Admission to the School of Graduate Studies. In addition to the general graduate admission requirements listed on pages 99-100, the department requires all graduate applicants to have a bachelor’s degree from an accredited institution in Mechanical Engineering, Aerospace Engineering, Manufacturing Engineering, or a closely related engineering discipline. A minimum GPA of 3.0 for MS applicants and 3.3 for PhD applicants is required for the last 60 semester or 90 quarter credits earned. All MAE graduate students are expected to be well-acquainted with either the FORTRAN or C programming language. Those students who do not have a BS degree in an appropriate engineering discipline may be admitted with nonmatriculated status and required to complete some remedial requirements. Applicants are also required to submit evidence of potential graduate-level success through GRE scores in the verbal and quantitative categories.

Specializations

The Department of Mechanical and Aerospace Engineering offers ME, MS, and PhD degrees in Mechanical Engineering, with specializations in Aerospace Engineering, Manufacturing Engineering, and Mechanical Engineering.

Aerospace Engineering addresses atmospheric and space flight. Included are such disciplines as computational fluid dynamics, experimental fluid mechanics, aerodynamics, aircraft flight dynamics, aircraft design, spacecraft orbital mechanics, spacecraft attitude motion and control, aircraft and spacecraft propulsion systems, space system design, thermal management of space deployed systems, and the space environment. Mechanical Engineering graduates choosing the aerospace engineering specialization may pursue careers in such areas as aircraft design and development, aircraft flight testing, spacecraft and space systems design, and spacecraft trajectory design and analysis, as well as the broader, traditional mechanical engineering fields.

Manufacturing Engineering concentrates on the theory of manufacturing systems, including manufacturing processes, the design of manufacturing systems, product design, productivity, quality, and life cycle analysis. Principal areas of emphasis include manufacturing automation, machining theory, mold flow analysis, and materials joining, as well as flexible manufacturing systems and computer-integrated manufacturing. Manufacturing engineers are prepared to pursue product and process design careers in virtually all manufacturing industries, including electronics, food processing, and petroleum industries.

Mechanical Engineering deals with the creation of the mechanical systems and machines that serve society. Areas of emphasis include solid mechanics, thermal/fluids, and dynamics and control. The solid mechanics emphasis is concerned with the mechanics of displacement and stress analysis combined with material science for selection of an optimum design. Students learn to use the finite element method as well as classical methods for the determination of stresses, strains, and displacements. Included are studies of elasticity, plasticity, and failure in traditional metals and high-tech composite materials. The thermal/fluids emphasis is concerned with the transport of mass, momentum, and energy in solids, liquids, and gasses. Included within its scope are the fundamental studies of thermodynamics, heat transfer, and fluid mechanics. The dynamics and control emphasis is concerned with describing and controlling the motion of mechanical systems. Included within its scope are the fundamental studies of dynamics, kinematics, vibrations, control theory, hydraulics and pneumatics, electromechanical systems, and machine design. Graduates who select the broad mechanical engineering specialization are prepared to pursue careers in such widely diverse disciplines as aerospace, automotive, building, chemical, defense, electronics, environmental engineering, food processing, heating and air conditioning, heavy equipment, machine tools, manufacturing, nuclear, petroleum, public utilities, and solar energy.

Degree Programs

The Plan A MS Degree requires 9 credits of graduate-level coursework in Mechanical Engineering fundamentals; 12 credits of 6000-level (or above) engineering coursework, exclusive of MAE 6930, 6950, 6970, and 6990; a minimum of 3 credits of 5000-level (or above) coursework in approved mathematics; and 9 credits selected from any one of five declared areas of emphasis. A minimum of 30 credits is required beyond the BS, including a 6-credit thesis (MAE 6970). The thesis must meet School of Graduate Studies requirements.

The Plan B MS Degree requires 9 credits of graduate-level coursework in Mechanical Engineering fundamentals; 12 credits of 6000-level (or above) engineering coursework, exclusive of MAE 6930, 6950, 6970, and 6990; a minimum of 3 credits of 5000-level (or above) coursework in approved mathematics; and either 12 credits selected from any one of five declared areas of emphasis or 15 credits selected from any two of the areas. A minimum of 30 credits is required beyond the BS, which includes a 3-credit report written to thesis standards.

The Plan C MS Degree requires 9 credits of graduate-level coursework in Mechanical Engineering fundamentals; 18 credits of 6000-level (or above) engineering coursework, exclusive of MAE 6930, 6950, 6970, and 6990; a minimum of 3 credits of 5000-level (or above) coursework in approved mathematics; and either 12 credits selected from any one of five declared areas of emphasis, or 15 credits selected from any two of the areas. A minimum of 33 credits is required beyond the BS, which may not include a thesis (MAE 6970), but may include up to 3 credits of Design Project (MAE 6950). MAE 6950 requires a report written to thesis standards. Students are not required to defend the report. However, the report must be approved by the major professor.

The Master of Engineering Degree requires 15 credits of 6000-level (or above) engineering coursework exclusive of MAE 6930, 6950, 6970, 6990, 7930, 7970, and 7990; a minimum of 3 credits of 5000-level (or above) coursework in approved mathematics; and either 15 credits selected from Group A or at least 9 credits from Group A and the remainder chosen from Group B. (Contact Joan Smith at joan.smith@usu.edu for requirement details.) A minimum of 30 credits is required beyond the BS, which may not include a thesis (MAE 6970), but may include up to three credits of Design Project (MAE 6950). MAE 6950 requires a report written to thesis standards. Students are not required to defend the report. However, the report must be approved by the major professor.
The PhD Degree requires 24 credits of 6000-level (or above) engineering coursework, exclusive of MAE 6930, 6950, 6970, 6990, 7930, 7970, and 7990; a minimum of 6 credits of 5000-level (or above) coursework in approved mathematics; and 18 credits selected from any one of five declared areas of emphasis. A minimum of 90 credits is required beyond the BS, including a dissertation (MAE 7970). The dissertation must meet School of Graduate Studies requirements and be at least 24 credits, but no more than 39 credits. A Qualifying Exam is required and must be passed before completing 18 credits at the PhD level. A paper with the student as author or coauthor, submitted for publication in a refereed journal, is also required.

GPA Requirement
A 3.0 GPA is the minimum acceptable for an ME or MS degree from USU. A PhD degree from USU requires a minimum GPA of 3.3.

Course Requirements
The specific course requirements for the ME, MS, and PhD degrees offered through the department may occasionally change. For this reason, prospective students are advised to seek current details concerning graduate degree requirements and program coursework by contacting the department or sending an Internet e-mail request to: joan.smith@usu.edu.

Research
The Department of Mechanical and Aerospace Engineering is conducting research in all three of the areas of specialization listed above. Departmental research projects are funded by both government agencies and private industry. Current research topics include analytical and experimental structural dynamics, computational and experimental fluid dynamics, aerodynamics, plastics and composite materials, numerical modeling and design of composite structures, buried structures, thermodynamics, heat transfer, cryogenics, intelligent control systems, manufacturing automation, spacecraft control, design and analysis of space systems, orbital mechanics, remote sensing, robotics, design theory and methodology, and production modeling and simulation.

Financial Assistance
A number of teaching and research assistantships are available to graduate students through the department, and are awarded on a competitive basis each year. In addition, scholarships covering the nonresident portion of tuition are available each semester, on a competitive basis, to nonresident students who hold a graduate assistantship paying at least $250 per month. Students interested in working part time as teaching or research assistants should apply to the department by March 31 for the coming academic year.

Acceptance to pursue graduate studies in the Department of Mechanical and Aerospace Engineering does not imply a commitment to any type of financial aid. All awards for financial aid are made on a competitive basis after applicants are admitted to graduate school. All students who receive any type of financial support from the University or who are supplied University space for study or research must carry a minimum of 9 credits of approved coursework for an MS or ME degree and a minimum of 9 credits of approved coursework for a PhD degree each semester while receiving such support.

Mechanical and Aerospace Engineering Faculty

Professors
Alma P. Moser, engineering mechanics, piping systems
Warren F. Phillips, aerodynamics, flight mechanics
Robert E. Spall, thermal/fluids, CFD, computational
Byard D. Wood, solar energy for heating and cooling, heat and mass transfer

Trustee Professor Emeritus
J. Clair Batty, thermal science, cryogenics, space systems

Professors Emeritus
P. Thomas Blotter, structural dynamics
Ralph H. Haycock, mechanics, manufacturing
Russell M. Holdredge, heat transfer, fluid mechanics
Owen K. Shupe, nuclear, material science
Carl D. Spear, material science
Edward W. Vendell, Jr., cryogenics, heat transfer, thermal systems design

Associate Professors
Steven L. Folkman, applied mechanics, structural dynamics, space structures, buried pipe systems
Thomas H. Fronk, mechanics of composites and materials
R. Rees Fullmer, manufacturing, controls, robotics, dynamics, spacecraft

Adjunct Associate Professor
Robert T. Pack, remote sensing, optoelectronics, lidar sensor systems

Assistant Professors
Ning Fang, manufacturing, micro and high-speed machining
David K. Geller, spacecraft guidance and navigation
Thomas Hauser, computational fluid dynamics, thermal/fluids, numerical methods, high-performance computing
Leijun Li, manufacturing, materials joining
Barton L. Smith, thermal/fluids, experimental fluid mechanics
Brent E. Stucker, advanced manufacturing and materials
Stephen A. Whitmore, high-speed aerodynamics, astrodynamics
Wenbin Yu, advanced structures, solid mechanics, computational solid mechanics (FEM)

Adjunct Assistant Professors
John Devitry, solid modeling, computer graphics
Angela Minichiello, heat transfer, thermodynamics
Steven R. Wassom, spacecraft instrumentation design

Principal Lecturer
Carl G. Wood, design, manufacturing

Course Descriptions
Mechanical and Aerospace Engineering (MAE), pages 659-662.
Department of Military Science

Undergraduate Programs

Objectives

Military Science (Army ROTC) focuses on leadership development. Students pursue the major of their choice while studying Military Science, and graduate with the ability to function effectively as leaders. Upon completion of Army ROTC and graduation from college, students become commissioned officers in the active Army, Army Reserve, or National Guard.

Instructors, textbooks, uniforms, and equipment are provided at no cost to the student or the University. All contracted students receive between $300-500 per month (up to 10 months per academic year). Army ROTC also covers the cost of tuition and fees for Army ROTC scholarship students and provides a $900-per-year book allowance.

The Margin of Difference

Army ROTC cadets learn to be leaders and receive hands-on experience in managing physical, financial, and human resources. They develop self-confidence and superior decision-making skills. Employers value these leadership qualities and recognize associated potential.

Four-Year Program

The traditional Army ROTC program covers four years consistent with normal undergraduate progression (freshman-senior). The four-year program is divided into two parts: the basic course and the advanced course. The basic course is usually taken during the first two years of college. It covers subjects such as mountaineering, land navigation, wilderness survival, leadership development, small unit tactics, weapons marksmanship, and military history. This program is designed for high-performing students who wish to try Military Science without obligation, while enhancing their leadership skills and self-confidence. Upon successful completion of the basic course, students are eligible to enter the advanced course.

Advanced course requirements are normally completed during the junior and senior years. The advanced course further develops and refines leadership competencies, and qualifies the student for a commission in the United States Army. Advanced course students receive a $450-500 per month tax-free subsistence allowance (up to 10 months per year), and attend a paid five-week leader development course between their junior and senior years.

Two-Year Program

This is a special program for junior and community college transfer students or for students who did not take Army ROTC during their first two years of college. To enter the two-year program, a student must have completed Basic Training in a military service or participate in five weeks of basic leadership instruction. This instruction usually takes place between the sophomore and junior year. Students are paid for attending this instruction, have the opportunity to compete for two-year scholarships, and may receive academic credit. Students who qualify for the two-year program are enrolled directly in the advanced course.

Course Requirements for Military Science Programs

Basic Course Requirements (8 credits)
- MS 1010 Introduction to Leadership ................................................................. 2
- MS 1020 Leadership Skills ................................................................. 2
- MS 2010 Leadership Development ................................................................. 2
- MS 2020 Small Unit Leadership ................................................................. 2

Advanced Course Requirements (15 credits)
- MS 3010 Organizational Leadership and Small Unit Tactics ....... 3
- MS 3020 Advanced Tactics and Operations ........................................ 3
- MS 4010 Command and Staff Functions ........................................ 3
- MS 4020 Officer Perspectives ........................................ 3
- MS 4610 Military History Seminar (3 cr) or HIST 4810 American Military History (3 cr) ................................................................. 3

Scholarships

Army ROTC provides numerous scholarship opportunities. High school seniors may qualify for the four-year Army ROTC scholarship. College students may qualify for three- or two-year scholarships. These scholarships pay the cost of tuition and fees, a flat rate for textbooks and classroom supplies, and a monthly cash stipend between $2,700-4,500 per year. The Green to Gold scholarship allows soldiers serving on active duty to leave the Army early and attend college/ROTC full time while receiving scholarship benefits. Other scholarship opportunities include: room and book grants and the Western Undergraduate Exchange (WUE) program. Call or visit the Department of Military Science for details.

Placement Credit For Veterans

Veterans may qualify for advanced course placement based on prior military experience. They can take full advantage of veteran’s benefits and receive financial aid from Army ROTC concurrently.

Simultaneous Membership Program (SMP)

This program is available to advanced course cadets who wish to serve in the Army Reserve or National Guard while attending college and pursuing a commission through Army ROTC. SMP students are eligible to receive reserve drill pay, tuition assistance, other monetary incentives, and $450-500 per month tax-free subsistence allowance (up to 10 months per academic year) from Army ROTC. Call or visit the Department of Military Science for details.

Leave of Absence

If students (including scholarship recipients) wish to take a leave of absence to serve a mission for their church, they can do so conveniently between their freshman and sophomore years.

Commission Requirements

In order to qualify for a commission as a Second Lieutenant in the United States Army, each student must:
1. Complete all required Military Science instruction while attending college as a full-time student, and obtain a baccalaureate or higher degree prior to age 27 (age waiver can be granted for prior military service or other extenuating circumstances).

2. Meet medical and physical fitness standards.

4. Successfully complete the advanced summer camp.

5. Be recommended by the Professor of Military Science.

Service Obligation

There is no military service obligation for basic course students, unless they have received an Army ROTC scholarship. Advanced course (contracted) and scholarship students incur an obligation to serve in the active Army, Army Reserve, or National Guard.

Minor in Military Science

Grade Requirements
Students must obtain a grade of C or better in all courses used toward the minor, as well as maintain a cumulative GPA of 2.5 for these courses.

Credit Requirements
A minimum of 21 credits must be earned in Military Science and related courses, as follows:

Course Requirements for Military Science Minor (21 credits)
MS 3010 Organizational Leadership and Small Unit Tactics ..........................3
MS 3020 Advanced Tactics and Operations .............................................3
MS 4010 Command and Staff Functions .................................................3
MS 4020 Officer Perspectives ...................................................................3
HIST 4810 American Military History (3 cr) or
MS 4610 Military History Seminar (3 cr) .................................................3
Electives (must be approved by department head) .................................6

Elective Course Offerings
MS 2400 Physical Readiness
(repeatable; take 1 credit per semester) .................................................1
MS 2420 Ranger Preparation ..............................................................2
MS 2430 Air Assault ...........................................................................2
MS 2440 Airborne Operations ............................................................2
MS 2510 ROTC Basic Camp .............................................................1-6
MS 3110 Staff Organization and Operations .......................................1-6
MS 3210 Independent Study ..............................................................1-3
MS 4110 Advanced Staff Operations ................................................1-3
MS 4400 Advanced Physical Readiness .............................................1
MS 4510 ROTC Advanced Camp .......................................................1-10
MS 4520 Cadet Troop Leadership Training .......................................1-2
MS 4610 Military History Seminar ......................................................1-3

Additional Information

For more detailed information about course requirements for Military Science programs, as well as information about career opportunities, see the major requirement sheet, which is available from the Military Science Department, or online at:

Saxophone:
Jon Gudmundson, Fine Arts 212, (435) 797-3003, gudmundson@hass.usu.edu

Bassoon:
R. Dennis Hirst, Fine Arts 101, (435) 797-3257, dennis.hirst@usu.edu

Voice:
Cindy J. Dewey, Fine Arts 208B, (435) 797-3055, cdewey@hass.usu.edu

Operas:
Lynn Jemison-Keisker, Fine Arts 206, (435) 797-3038, lkeisker@hass.usu.edu

Music (Undecided):
Bruce M. Saperston, Fine Arts 107, (435) 797-3000, bsaperston@hass.usu.edu

Degrees offered:
Bachelor of Music (BM) in Music; Bachelor of Science (BS) in Music Therapy

Undergraduate emphases:
BM degree in Music—Music Education (Band), Music Education (Orchestra), Music Education (Choral), Music Education (General); Piano Performance, Organ Performance, String Performance, Vocal Performance, Wind/Brass/Percussion Performance, Guitar Performance; Piano Pedagogy

Undergraduate Programs

Objectives

The Department of Music provides instruction in music by: (1) offering service courses which contribute to the Liberal Arts major in the College of Humanities, Arts and Social Sciences and the College of Science, and to the University Studies Program of the University; (2) offering specific sequences of courses leading to professional preparation in music education, music therapy, and performance/pedagogy; and (3) providing public musical service to the University and the community.

The specific objectives of the programs in music for the music major are fourfold: (1) to prepare licensed music teachers to serve effectively in elementary and secondary schools; (2) to prepare musically talented students for careers as professional performers and/or studio teachers; (3) to prepare board-certified music therapists to serve in educational and therapeutic settings; and (4) to prepare music students for graduate study in their areas of specialization.
### Department of Music

#### Requirements

**Admission Requirements**
Admission requirements for the Department of Music include those described for the University in this catalog (see pages 16-20). In addition, transfer students must have a minimum 3.00 GPA in music courses and a minimum 2.75 GPA overall. All students interested in majoring in Music or Music Therapy will be given pre-music major status until they have completed the required audition/interview process, as verified by their area advisor through the Change of Major Form. It is strongly recommended that prospective majors complete their audition/interview during the department’s scholarship auditions in February preceding matriculation at USU. To schedule an audition/interview, contact the department at (435) 797-3015.

Prospective majors in Music Therapy should complete the audition/interview prior to May 1 of the year of admission.

**GPA Requirement**
Students majoring in music, music education, or music therapy must maintain a minimum GPA of 3.00 in music courses and a minimum 2.75 GPA overall. All core curriculum classes must be completed with a C- or higher in order to progress to the next courses in sequence. A student receiving a grade lower than C- is placed on probation, and may repeat the course once to raise the grade to C- or higher. If the grade received on the repeat is lower than C-, the student is no longer a music, music education, or music therapy major.

**Music Core Curriculum Requirements (32-37 credits)**
All majors in the department must complete the music core curriculum. Although it is possible to complete the degree if these courses are begun after the first year of study, the department strongly recommends that students begin the core curriculum during the first year, completing the courses in the following recommended sequence.

### Freshman Year

**Fall Semester**
- MUSC 1110 Music Theory I .......................................................... 3
- MUSC 1130 Aural Skills I .............................................................. 1
- MUSC 1170 Keyboard Harmony I ...................................................... 1

**Spring Semester**
- MUSC 1120 Music Theory II .......................................................... 3
- MUSC 1140 Aural Skills II .............................................................. 1
- MUSC 1180 Keyboard Harmony II ..................................................... 1

### Sophomore Year

**Fall Semester**
- MUSC 2110 Music Theory III ......................................................... 3
- MUSC 2130 Aural Skills III ............................................................ 1
- MUSC 2170 Keyboard Harmony III ..................................................... 1
- MUSC 2180 Computer Applications in Music ..................................... 2

**Spring Semester**

- MUSC 3110 Music History I: Origins through Baroque ...................... 3
- MUSC 3140 Musical Form and Analysis ............................................ 3

### Junior Year

**Fall Semester**
- MUSC 2350 Conducting ................................................................. 2
- MUSC 3120 Music History II: Classical and Romantic Periods ............ 3

**Spring Semester**
- MUSC 3130 (CI) Music Theory IV ................................................... 3
- MUSC 3180 Scoring and Arranging .................................................. (2)
- MUSC 3190 Music History III: Music of the Twentieth Century ............ 3

Students should note that MUSC 2180, 2350, and 3180 may be taken during different semesters, if necessary. Also, since MUSC 2140 is not required for all music areas, students should contact their advisor to determine whether or not they should enroll in this course. Additional requirements for specific emphasis areas are available from the Music Department Student Services Office, Fine Arts 102.

1 MUSC 1170 and 1180 are not required for the Music Education (General) Emphasis, nor for the Guitar Performance Emphasis.
2 MUSC 2140 is not required for the Composite Major in Music Education, nor for the Guitar Performance Emphasis or the Wind/Brass/Percussion Performance Emphasis.
3 MUSC 3180 is not required for the Vocal Performance Emphasis.

### Bachelor of Music Degree Composite Major in Music Education
Music majors must maintain a minimum GPA of 3.0 in music courses. A grade of C- or better must be earned in all core and emphasis classes. A 2.75 cumulative GPA is required for graduation. Additional requirements, such as piano proficiency, concert attendance, etc., are stipulated in the Department of Music’s Student Handbook.

**Emphasis Area**
Students must select one area of emphasis and complete the required coursework for that emphasis. The student’s transcript will show the area of emphasis selected by the student from those listed below. Please note all music majors are required to participate in major departmental ensemble organizations each semester. The student and an advisor will determine the organizations in which the student will participate.

**Music Education (Band) (44-49 credits)**
- MUSC 1500 String Techniques I (F,Sp) ......................................... 1
- MUSC 1600 Voice Techniques (F,Sp) ............................................ 1
- MUSC 1800 Percussion Techniques (F) ........................................... 1

Small Ensembles (2 credits)
Select 2 credits from the following:
- MUSC 2740 Recorder Techniques (Sp) ........................................ 1
- MUSC 3700 Woodwind Ensemble (F,Sp) ..................................... 1-2
- MUSC 3780 Flute Ensemble (F) .................................................... 1
- MUSC 3800 Trombone Ensemble (F,Sp) ...................................... 1
- MUSC 3850 Brass Ensemble (F,Sp) ................................................ 1
- MUSC 3870 Percussion Ensemble (F,Sp) ...................................... 1
Music Education (Choral) (34-39 credits)
MUSC 3710 Individual Flute Instr for Music Majors (F,Sp,Su) 1-2
MUSC 3720 Individual Oboe Instr for Music Majors (F,Sp,Su) 1-2
MUSC 3730 Individual Clarinet Instr for Music Majors (F,Sp,Su) 1-2
MUSC 3740 Individual Bassoon Instr for Music Majors (F,Sp,Su) 1-2
MUSC 3750 Individual Saxophone Instr for Music Majors (F,Sp,Su) 1-2
MUSC 3810 Individual Trumpet Instr for Music Majors (F,Sp) 1-2
MUSC 3820 Individual Trombone Instr for Music Majors (F,Sp) 1-2
MUSC 3830 Individual French Horn Instr for Music Majors (F,Sp) 1-2
MUSC 3840 Individual Tuba/Euphonium Instr for Music Majors (F,Sp) 1-2
MUSC 3860 Individual Percussion Instr for Music Majors (F,Sp,Su) 1-2

Music Education (Orchestra) (39-44 credits)
MUSC 2600 Women’s Choir (F,Sp) (1 cr) or
MUSC 4600 University Chorale (F,Sp) (1 cr) or
MUSC 2700 Woodwind Techniques I: Flute, Clarinet (F) 1 cr
MUSC 2800 Brass Techniques I: Trumpet, French Horn (F) 1 cr
MUSC 3100 Motivation and Classroom Management Strategies in Secondary Classroom Music (Sp) 1-2
MUSC 3220 Choral Methods and Materials (F) 1-2
MUSC 3240 Instrumental Methods and Materials (Sp) 2 cr
MUSC 3500 Symphony Orchestra (F,Sp,Su) 7 cr
MUSC 3510 Orchestra Literature (Sp) 2 cr
MUSC 3520 String Pedagogy and Solo Literature (F,Sp) 2 cr
MUSC 4240 Advanced Conducting (F) 2 cr
MUSC 4500 String Ensemble (F,Sp) 4 cr
MUSC 4920 Individual Recital (F,Sp,Su) 1-6 cr

Individual String Instruction (7 credits)
MUSC 4510 Individual Violin Instr for Music Majors (F,Sp,Su) 1-2
MUSC 4520 Individual Viola Instr for Music Majors (F,Sp,Su) 1-2
MUSC 4530 Individual Cello Instr for Music Majors (F,Sp,Su) 1-2
MUSC 4540 Individual String Bass Instr for Music Majors (F,Sp,Su) 1-2

Music Education (General) (36 credits)
MUSC 1150 Beginning Group Piano (Sp) (1 cr) or
MUSC 1160 Intermediate Group Piano (Sp) (1 cr) or
MUSC 2490 Individual Piano Instruction (Second Instrument) for Music Majors (F,Sp,Su) (1 cr, repeatable) 2 cr
MUSC 1600 Voice Techniques (F,Sp) 1 cr
MUSC 1800 Percussion Techniques (F) 1 cr
MUSC 2550 Guitar Styles (Blues/Bluegrass) (F) 2 cr
MUSC 2560 Guitar Styles (Jazz/Classical) (Sp) 2 cr
MUSC 2570 Fingerboard Theory I (F) 2 cr
MUSC 2580 Fingerboard Theory II (Sp) 2 cr
MUSC 2600 Women’s Choir (F,Sp) (1 cr) or
MUSC 4600 University Chorale (F,Sp) (1 cr) or
MUSC 2700 Woodwind Techniques I: Flute, Clarinet (F) 1 cr
MUSC 3100 Motivation and Classroom Management Strategies in Secondary Classroom Music (Sp) 1-2
MUSC 3220 Choral Methods and Materials (F) 1-2
MUSC 3240 Instrumental Methods and Materials (Sp) 2 cr
MUSC 3550 Individual Guitar Instruction for Music Majors (F,Sp,Su) 6 cr
MUSC 3570 Guitar Pedagogy I (F) 2 cr
MUSC 3580 Guitar Pedagogy II (Sp) 2 cr
MUSC 3590 Electric Guitar Ensemble (F,Sp) (1 cr, repeatable) or
MUSC 4550 Acoustic Guitar Ensemble (F,Sp) (1 cr, repeatable) 4 cr

Secondary Teacher Education Program (STEP) (26 credits)
Admission to the STEP curriculum requires action by the Office of the Associate Dean for Teacher Education, Graduation, and Educator Licensing, as well as the department where the major work is being offered. Students are not generally permitted to enroll in the following STEP courses unless they have been admitted to the STEP.

Level 1 Courses (7 credits)
SCED 3210 (CI/DSS) Educational and Multicultural Foundations (F,Sp) 3 cr
SPED 4000 Education of Exceptional Individuals (F,Sp,Su) 1 cr
INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su) 2 cr

Level 2 Courses (7 credits)
SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) 3 cr
SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) 3 cr
SCED 4300 Clinical Experience II (F,Sp) (Arranged) 1 cr

Level 3 Courses (12 credits)
SCED 5500 Student Teaching Seminar (2 weeks) (F,Sp) 2 cr
SCED 5630 Student Teaching in Secondary Schools (13 weeks, full-time) (F,Sp) 10 cr

Dual Licensure (Recommended)
Students receiving licensure in secondary music education are encouraged to qualify for teaching music (vocal and/or instrumental) in the elementary schools. In addition to the graduation and licensure requirements for the BM Degree in Music Education, the following courses are required.

PSY 1100 Developmental Psychology: Infancy and Childhood (F,Sp) (3 cr) or
FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) (3 cr) or
MUSC 3260 Elementary School Music (F,Sp,Su) 2 cr
MUSC 3270 Teaching Strategies and Practicum in Elementary Music (Sp) 3 cr

Sample Four-year Plan for Music Major,
Music Education (Orchestra) Emphasis
Minimum GPA for Admission: 2.75, USU; 2.75 Career
Minimum GPA for Graduation: 2.75, major courses; 2.75, USU;
2.75 Career
Minimum Grade Accepted: C- in major courses
This is a sample plan. It outlines University and major requirements in
very general terms. While there are requirements that are sequential,
many are flexible and do not need to be completed exactly in the order
listed. Students should always check with their faculty and professional
advisors to be sure they are meeting the requirements appropriately.
In addition, students should refer to the Music Department’s Student
Handbook. To make an appointment with a professional advisor,
call (435) 797-3883.

Sample Four-year Plan for Music Major,
Music Education (General) Emphasis

Minimum GPA for Admission: 2.75, USU; 2.75 Career
Minimum GPA for Graduation: 2.75, major courses; 2.75, USU; 2.75 Career
Minimum Grade Accepted: C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. In addition, students should refer to the Music Department’s Student Handbook. To make an appointment with a professional advisor, call (435) 797-3883.

### Bachelor of Music Degree (Performance Emphases)

**(2.75 cumulative GPA; 3.0 GPA in Music courses)**

The Bachelor of Music Degree with one of the performance emphases requires completion of University Studies Requirements, Core Requirements, and Emphasis Area Requirements. A grade of C- or better must be earned in all core and emphasis classes.

**Music Core Curriculum Requirements (35 credits)**

All of the Music Core Curriculum courses (shown on page 410) are required, with the following exceptions:

- MUSC 1170, 1180, and 2140 are not required for the Guitar Performance Emphasis.
- MUSC 2140 is not required for the Wind/Brass/Percussion Performance Emphasis.
- MUSC 3180 is not required for the Vocal Performance Emphasis.

**Emphasis Area**

Students must select one area of emphasis and complete the required coursework for that emphasis. The student's transcript will show the area of emphasis selected by the student from those listed below. Please note that all music majors are required to participate in major departmental ensemble organizations each semester. The student and an advisor will determine the organizations in which the student will participate.

**Piano Performance (63-66 credits)**
- MUSC 1420 Pedagogy Practicum (F,Sp) ............................................. 9
- MUSC 1430 Piano Pedagogy I (F) ...................................................... 3
- MUSC 1440 Piano Pedagogy II (Sp) .................................................. 3
- MUSC 2420 Piano Literature I (F) .................................................... 3
- MUSC 2430 Piano Literature II (Sp) .................................................. 3
- MUSC 2440 Piano Literature III (F) .................................................. 3
- MUSC 2450 Piano Literature IV (Sp) .................................................. 3
- MUSC 3400 Individual Piano Instruction for Music Majors (F,Sp,Su) .... 12
- MUSC 3410 Ensemble and Accompanying (Piano) (F,Sp,Su) .............. 6
- MUSC 3420 Keyboard Skills I (F) ...................................................... 3
- MUSC 3430 Keyboard Skills II (Sp) .................................................. 3
- MUSC 4210 Advanced Music Form and Analysis (F) .......................... 3
- MUSC 4410 Advanced Piano Pedagogy I (F) ...................................... 3
- MUSC 4420 Advanced Piano Pedagogy II (Sp) .................................. 3
- MUSC 4920 Individual Recital (F,Sp,Su) ............................................. 3-6

**Organ Performance (52 credits)**
- MUSC 1460 (Cl) Organ Literature I (F) ............................................ 3
- MUSC 1470 (Cl) Organ Literature II (Sp) ........................................... 3
- MUSC 1800 Voice Techniques (F,Sp) .................................................. 1
- MUSC 2600 Women’s Choir (F,Sp,Su) .............................................. 1
- MUSC 4600 University Chorale (F,Sp) (1 cr) or .................................... 1
- MUSC 3230 Choral Literature (Sp) ..................................................... 2
- MUSC 3460 Church Music for Organists I (F) .................................. 3
- MUSC 3470 Church Music for Organists II (Sp) .................................. 3
- MUSC 3480 Individual Organ Instruction for Music Majors (F,Sp,Su) .... 16
- MUSC 4900 Baroque Counterpoint (F) ............................................. 2
- MUSC 4920 Individual Recital (F,Sp,Su) ............................................. 4
- Music Electives .................................................................................. 14

**String Performance (46 credits)**
- MUSC 2490 Individual Piano Instruction (Second Instrument) for Music Majors (F,Sp,Su) ...................................................... 2
- MUSC 3500 Symphony Orchestra (F,Sp) ........................................... 8
- MUSC 4500 String Ensemble (F,Sp) ................................................... 8
- MUSC 4920 Individual Recital (Sophomore) (F,Sp,Su) ....................... 2
- MUSC 4920 Individual Recital (Junior) (F,Sp,Su) ................................. 2
- MUSC 4920 Individual Recital (Senior) (F,Sp,Su) ................................. 2
- Music Electives .................................................................................. 6

**Individual String Instruction** (16 credits)

Students must complete credits from one of the following:

- MUSC 4510 Individual Violin Instr for Music Majors (F,Sp,Su) .......... 1-2
- MUSC 4520 Individual Viola Instr for Music Majors (F,Sp,Su) .......... 1-2
- MUSC 4530 Individual Cello Instr for Music Majors (F,Sp,Su) .......... 1-2
- MUSC 4540 Individual String Bass Instr for Music Majors (F,Sp,Su) .... 1-2

**Vocal Performance (56-62 credits)**
- MUSC 1610 Introduction to Musical Theatre (Sp) (2 cr) or ................. 2
- MUSC 1620 Introduction to Opera (F) (2 cr) ........................................ 2
- MUSC 2490 Individual Piano Instruction (Second Instrument) for Music Majors (F,Sp,Su) ...................................................... 2
- MUSC 2660 Italian Diction for Singers (Sp) ......................................... 2
- MUSC 2670 German Diction for Singers (F) ...................................... 2
- MUSC 2680 French Diction for Singers (Sp) ...................................... 2
- MUSC 3600 Opera Workshop (F,Sp) .................................................. 6
- MUSC 3610 Vocal Repertory I (F) ...................................................... 2
- MUSC 3620 (CI) Vocal Repertory II (Sp) ............................................ 2
- MUSC 3630 Vocal Pedagogy I (F) ...................................................... 2
- MUSC 3640 Vocal Pedagogy II (Sp) .................................................... 2
- MUSC 3670 Individual Vocal Instruction for Music Majors (F,Sp,Su) .... 16
- MUSC 4920 Individual Recital (F,Sp,Su) ............................................. 4
- Major Performance Group (MUSC 4600, 4650, 2610, or 2600) ........... 8

**Italian or German or French (2 semesters)** ................................. 6

Utah State University 2006-2007 General Catalog
Department of Music

All students selecting the Vocal Performance Emphasis must complete performance level 5 in piano or MUSC 2490 until level requirement is met.

Wind/Brass/Percussion Performance (48-56 credits)

Individual Instruction (12 credits)

Students must complete 12 credits from one of the following three groups of courses in their area (Individual Woodwind Instruction or Individual Brass Instruction or Individual Percussion Instruction).

Individual Woodwind Instruction

MUSC 3710 Individual Flute Instr for Music Majors (F,Sp,Su) .......... 1-2
MUSC 3720 Individual Oboe Instr for Music Majors (F,Sp,Su) .......... 1-2
MUSC 3730 Individual Clarinet Instr for Music Majors (F,Sp,Su) ......... 1-2
MUSC 3740 Individual Bassoon Instr for Music Majors (F,Sp,Su) ......... 1-2
MUSC 3750 Individual Saxophone Instr for Music Majors (F,Sp,Su) ......... 1-2

Individual Brass Instruction

MUSC 3810 Individual Trumpet Instr for Music Majors (F,Sp) ........... 1-2
MUSC 3820 Individual Trombone Instr for Music Majors (F,Sp) ........... 1-2
MUSC 3830 Individual French Horn Instr for Music Majors (F,Sp) .......... 1-2
MUSC 3840 Individual Tuba/Euphonium Instr for Music Majors (F,Sp) .......... 1-2

Individual Percussion Instruction

MUSC 3860 Individual Percussion Instr for Music Majors (F,Sp,Su) . 1-2

Large Ensembles (8 credits)

Select 8 credits from the following:

MUSC 3500 Symphony Orchestra (repeatable) (F,Sp,Su) ................. 1
MUSC 3790 Symphonic Band (repeatable) (F,Sp,Su) ...................... 1
MUSC 4700 Wind Orchestra (repeatable) (F,Sp,Su) ....................... 1

Small Ensembles (4 credits)

Select 4 credits from the following five courses:

MUSC 3700 Woodwind Ensemble (F,Sp,Su) ........................................ 1-2
MUSC 3780 Flute Ensemble (F,Sp,Su) ............................................. 1
MUSC 3800 Trombone Ensemble (F,Sp,Su) ....................................... 1
MUSC 3850 Brass Ensemble (F,Sp,Su) ............................................. 1
MUSC 3870 Percussion Ensemble (F,Sp,Su) ...................................... 1

Additional Courses (24-32 credits)

MUSC 1800 Percussion Techniques (F,Sp,Su) ...................................... 1
MUSC 2700 Woodwind Techniques I: Flute, Clarinet (F,Sp,Su) (1 cr) or
MUSC 2710 Woodwind Techniques II: Saxophone, Oboe, Bassoon (Sp) (1 cr) or
MUSC 2740 Recorder Techniques (Sp) (1 cr) ...................................... 1
MUSC 2800 Brass Techniques I: Trumpet, French Horn (F,Sp,Su) (1 cr) or
MUSC 2810 Brass Techniques II: Trombone, Tuba, Euphonium (Sp) (1 cr) or
MUSC 3240 Instrumental Methods and Materials (Sp) (2 cr) or
MUSC 4930 Readings and Conference (Independent Study with major prof in instrumental pedagogy) (2 cr) (F,Sp,Su) ......................... 2
MUSC 3900 Jazz Improvisation (F,Sp,Su) ........................................... 2
MUSC 4920 Individual Recital (Junior) (F,Sp,Su) .................................. 1-2
MUSC 4920 Individual Recital (Senior) (F,Sp,Su) ............................... 3-6

Secondary Instrument Course

Electives (at least 4 credits in Music) ........................................... 11-15

Guitar Performance (54 credits)

MUSC 1150 Beginning Group Piano (Sp) (1 cr) or
MUSC 1160 Intermediate Group Piano (Sp) (1 cr) or
MUSC 2490 Individual Piano Instruction (Second Instrument) for Music Majors (F,Sp,Su) (1 cr, repeatable) ........................................ 2
MUSC 2550 Guitar Styles (Blues/Bluegrass) (F,Sp,Su) ......................... 2
MUSC 2560 Guitar Styles (Jazz/Classical) (Sp) ...................................... 2
MUSC 2570 Fingerboard Theory I (F,Sp) ............................................. 2
MUSC 2580 Fingerboard Theory II (Sp) ............................................. 2
MUSC 3550 Individual Guitar Instruction for Music Majors (F,Sp,Su) .................. 10
MUSC 3560 Guitar History and Literature (Sp) ................................. 3
MUSC 3570 Guitar Pedagogy I (F,Sp,Su) ........................................... 2
MUSC 3580 Guitar Pedagogy II (Sp) ............................................... 2
MUSC 3590 Electric Guitar Ensemble (F,Sp,Su) (1 cr, repeatable) or
MUSC 4550 Acoustic Guitar Ensemble (1 cr, repeatable) (F,Sp) ........... 8
MUSC 3900 Jazz Improvisation (F,Sp) ........................................... 2
MUSC 4920 Individual Recital (F,Sp,Su) ........................................... 6
MUSC 3400 Readings and Conference (F,Sp,Su) .................................. 2
Music Electives.................................................................................. 3
University Electives......................................................................... 6

Sample Four-year Plan for Music Major,

Piano Performance Emphasis

Minimum GPA for Admission: 2.75, USU; 2.75 Career

Minimum GPA for Graduation: 2.75, major courses; 2.75, USU; 2.75 Career

Minimum Grade Accepted: C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

In addition, students should refer to the Music Department’s Student Handbook. To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (31 credits)

Fall Semester (15 credits)

ENGL 1010 (CL1) Introduction to Writing: Academic Prose ........................ 3
MUSC 1110 Music Theory I ............................................................. 3
MUSC 1120 Aural Skills I ............................................................... 1
MUSC 1170 Keyboard Harmony I .................................................. 1
MUSC 1430 Piano Pedagogy I ......................................................... 3
MUSC 2180 Computer Applications in Music .................................. 2

Sample Four-year Plan for Music Major,
Vocal Performance Emphasis

Minimum GPA for Admission: 2.75, USU; 2.75 Career
Minimum GPA for Graduation: 2.75, major courses; 2.75, USU; 2.75 Career
Minimum Grade Accepted: C- in major courses
This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. In addition, students should refer to the Music Department’s Student Handbook. To make an appointment with a professional advisor, call (435) 797-3883.

**Freshman Year (31 credits)**

**Fall Semester (14 credits)**
- ENGL 1010 (CL1) Introduction to Writing: Academic Prose .......... 3
- MUSC 1110 Music Theory I .......................................................... 3
- MUSC 1130 Aural Skills I .............................................................. 1
- MUSC 1170 Keyboard Harmony II .............................................. 1

### Bachelor of Music Degree

**(Piano Pedagogy Emphasis)**

**(2.75 cumulative GPA; 3.0 GPA in Music courses)**

The Bachelor of Music Degree with an emphasis in Piano Pedagogy requires completion of University Studies Requirements, Core Requirements, Pedagogy Emphasis, and Electives. **Music majors must maintain a minimum GPA of 3.0 in Music courses.** A grade of C- or better must be earned in all core and emphasis classes. A 2.75 cumulative GPA is required for graduation. Additional requirements, such as piano proficiency, concert attendance, etc., are stipulated in the Department of Music’s Student Handbook.

### Music Core Curriculum Requirements (35 credits)

Students in the Piano Pedagogy emphasis must complete the 35-credit music core curriculum as listed on page 410.

### Pedagogy Emphasis Requirements (59-60 credits)

- MUSC 1420 Pedagogy Practice (F,Sp) .................................... 9
- MUSC 1430 Piano Pedagogy I (F) ......................................... 3
- MUSC 1440 Piano Pedagogy II (Sp) ...................................... 3

Bachelor of Music Degree
(Individualized Program)
(2.75 cumulative GPA; 3.0 GPA in Music courses)
The Individualized Bachelor of Music Degree is intended for persons
whose musical goals are not met by USU’s other bachelor of music
programs in music education, performance/pedagogy, or music
therapy. The individualized program is also appropriate for those who
wish to combine music with another discipline, such as business,
electrical engineering, computer science, etc. A grade of C- or better
must be earned in all classes applied toward the degree.

All individualized curricula must meet criteria established by the
National Association of Schools of Music. Students in the individualized
program are expected to complete at least the minimum jury
performance level required for their major instrument or voice, and to
complete a senior recital appropriate to their emphasis. All proposed
individualized curricula must be approved by an appropriate advisor,
the Individualized Bachelor of Music Degree Committee, and the Head
of the Department of Music.

University Studies Requirements

Music Core Curriculum (35 credits) (see page 410)

Music Performance (16 credits)

Individual Instruction (8 credits)
Individual instruction should be taken in either the major instrument or
voice.

Large and Small Ensembles (8 credits)
As part of the 8 required credits, a minimum of 4 credits must be taken
in a large ensemble.

Emphasis Area (37 credits)
The curriculum for the emphasis area must be developed in consultation
with an appropriate advisor and approved by the
Individualized Bachelor of Music Degree Program Committee and by
the Head of the Department of Music. It must form a coherent plan
leading to the fulfillment of specific objectives. Student transcripts will
show Individualized Program, not the emphasis area approved by the
committee.

If the plan involves relating music to other fields, it must meet
appropriate criteria as outlined in the Handbook of the National
Association of Schools of Music for the degree of Bachelor of Music
in Combinations with an Outside Field. Such a plan must also be
developed and approved in consultation with an advisor in the other
field, in addition to the appropriate advisor in the Department of Music.
Music Therapy Requirements

Students must complete an application process through the Music Department in order to be accepted for the Music Therapy major.

Music Therapy majors must maintain a minimum GPA of 3.0 in Music Therapy courses. A grade of C- or better must be earned in all required classes. A 2.75 total GPA is required for graduation. Additional requirements, such as piano proficiency, concert attendance, etc., are stipulated in the Department of Music’s Student Handbook and Music Therapy Addendum to the Handbook.

Core Course Requirements (34-35 credits)

- MUSC 1110 Music Theory I (F) .......................................................... 3
- MUSC 1120 Music Theory II (Sp) .................................................... 3
- MUSC 1130 Aural Skills I (F) ........................................................... 1
- MUSC 1140 Aural Skills II (Sp) ..................................................... 1
- MUSC 1170 Keyboard Harmony I (F) .............................................. 1
- MUSC 1180 Keyboard Harmony II (Sp) ......................................... 1
- MUSC 2110 Music Theory III (F) .................................................. 3
- MUSC 2130 Aural Skills III (F) ...................................................... 1
- MUSC 2140 Aural Skills IV (Sp) (1 cr) or ........................................... 1 or 2
- MUSC 2180 Computer Applications in Music (F,Sp) ...................... 2
- MUSC 2350 Conducting (F) ........................................................... 2
- MUSC 3110 Music History I: Origins Through Baroque (Sp) ....... 3
- MUSC 3120 Music History II: Classical and Romantic Periods (F) ... 3
- MUSC 3130 (CI) Music Theory IV (Sp) ........................................ 3
- MUSC 3140 Musical Form and Analysis (Sp) .................................. 3
- MUSC 3190 Music History III: Music of the Twentieth Century (Sp) .... 3

Additional Music Coursework (4 credits)

- MUSC 1800 Percussion Techniques (F) ........................................... 1
- MUSC 2740 Recorder Techniques (Sp) ........................................... 1
- MUSC 3260 Elementary School Music (F,Sp,Su) .......................... 2

Ensemble Performance (2 credits)

Select 2 credits from the following:
- MUSC 1320 Music Therapy Ensemble (F,Sp) ............................... 1
- MUSC 3700 Woodwind Ensemble (F,Sp) ....................................... 1-2
- MUSC 3780 Flute Ensemble (F) ..................................................... 1
- MUSC 3790 Symphonic Band (F,Sp) ............................................. 1
- MUSC 3800 Trombone Ensemble (F,Sp) ........................................ 1
- MUSC 3850 Brass Ensemble (F,Sp) .............................................. 1
- MUSC 3870 Percussion Ensemble (F,Sp) ....................................... 1
- MUSC 4500 String Ensemble (F,Sp) ............................................. 1
- MUSC 4600 University Chorale (F,Sp) ........................................... 1
- MUSC 4650 Chamber Singers (F,Sp) ............................................ 1

Individual Instruction (Major Instrument) (4 credits)

Guitar Requirements (with advisor approval) (1-4 credits)

Select 1-4 credits from the following:
- MUSC 1550 Beginning Guitar (F,Sp) ............................................. 1
- MUSC 1560 Intermediate Guitar (F,Sp) ......................................... 1
- MUSC 2550 Guitar Studies (Blues/Bluegrass) (F) ....................... 2
- MUSC 2560 Guitar Studies (Jazz/Classical) (Sp) ......................... 2
- MUSC 2590 Individual Guitar Instruction (Second Instrument) for Music Majors (F,Sp,Su) ......................................................... 1
- MUSC 3550 Individual Guitar Instruction for Music Majors (F,Sp,Su) ................................................................. 1-2

Vocal Requirements (with advisor approval) (2 credits)

Select 2 credits from the following:
- MUSC 2640 Individual Vocal Instruction (Second Instrument) for Music Majors (repeatable) (F,Sp,Su) .................................................. 1
- MUSC 3670 Individual Vocal Instruction for Music Majors (repeatable) (F,Sp,Su) ................................................................. 1-2

Music Therapy Core Courses (29-31 credits)

- MUSC 1310 Introduction to Music Therapy (F) ............................ 2
- MUSC 2310 Introduction to Observational and Behavioral Methods in Music Therapy (F) ......................................................... 2
- MUSC 2320 Music Therapy Methods and Materials (Sp) ............. 2
- MUSC 3310 Music Therapy and the Exceptional Child (F) .......... 3
- MUSC 3320 Psychology of Music I (Sp) ........................................ 2
- MUSC 3330 Music Therapy Practicum (F,Sp) ...................... 9-11
- MUSC 4310 Music Therapy with Adult Populations (F) ............ 3
- MUSC 4320 (CI) Psychology of Music II (Sp) .......................... 2
- MUSC 4330 Clinical and Professional Issues in Music Therapy (Sp) 2
- MUSC 4340 Internship in Music Therapy (taken only after all academic coursework has been completed) (F,Sp,Su) .................. 2

Sample Four-year Plan for Music Therapy Major

Minimum GPA for Admission: 2.75, USU; 2.75 Career
Minimum GPA for Graduation: 2.75, major courses; 2.75, USU; 2.75 Career
Minimum Grade Accepted: C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

In addition, students should refer to the Music Department’s Student Handbook and Music Therapy Addendum to the Handbook. To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (34 credits)

Fall Semester (18 credits)
- ENGL 1010 (CL1) Introduction to Writing: Academic Prose .......... 3
- MUSC 1110 Music Theory I ....................................................... 3
- MUSC 1130 Aural Skills I ........................................................... 1
- MUSC 1170 Keyboard Harmony I ............................................. 1
- MUSC 1310 Introduction to Music Therapy ................................ 2
- MUSC 2400 Individual Piano Instruction (Second Instrument) for Music Majors (1 cr) or .........................................................
- MUSC 2590 Individual Guitar Instruction (Second Instrument) for Music Majors (1 cr) or .........................................................
- PSY 1010 (BSS) General Psychology .......................................... 3
- PSY 3210 (BSS) Abnormal Psychology ....................................... 3
- SPED 4000 Education of Exceptional Individuals (F,Sp,Su) ........ 2
- Electives (must be approved by student’s advisor) ...................... 8

Freshman Year (34 credits)

Fall Semester (18 credits)
- ENGL 1010 (CL1) Introduction to Writing: Academic Prose .......... 3
- MUSC 1110 Music Theory I ....................................................... 3
- MUSC 1130 Aural Skills I ........................................................... 1

Music Minors

Admission to Music Minor Programs
To be admitted as music minors, students must complete the Music Minor Admission Form and return it to the Department of Music Student Services Office, Fine Arts 102. Students are required to meet the requirements which are in effect at the time the Admission Form is completed.

Basic Music Minor (24 credits)
Advisor: Dr. Dean Madsen, 797-3031, University Reserve 202
MUSC 1110 Music Theory I (music minor section) (F) .................................... 3
MUSC 1120 Music Theory II (music minor section) (F) .................................... 1
MUSC 1480 Individual Piano Instruction for Nonmusic Majors
(F,Sp,Su) ........................................................................................................ 1
MUSC 2350 Conducting (F) .......................................................................... 2
Large or Small Ensemble ............................................................................... 4
Individual Instruction (nonmajor courses, primary instrument/voice) .......... 4
In addition, complete the following three courses, which may also count toward University Studies requirements.
MUSC 1010 (BCA) Introduction to Music (F,Sp,Su) ........................................ 3
MUSC 3010 (DHA) Masterpieces of Music (F,Sp) .......................................... 3
MUSC 3020 (DHA) History of Jazz (Sp) ......................................................... 3

Music Composition Minor (21 credits)
(Approval pending)
This minor is available to Music and Music Therapy majors only.
Advisor: Dr. Dean Madsen, 797-3031, University Reserve 202
MUSC 2180 Computer Applications in Music (F,Sp) ..................................... 2
MUSC 3020 History of Jazz (Sp) ................................................................... 3
MUSC 3910 Individual Composition Instruction (F,Sp) ................................... 2
MUSC 4900 Baroque Counterpoint (F) ........................................................ 2
MUSC 4910 Music Composition (repeatable; take for 2 semesters) (Sp) ....... 4
MUSC 4920 Individual Recital (F,Sp,Su) ....................................................... 2
In addition, complete the following two courses. ECE 3260 may also count toward University Studies requirements.
PHIL 3810 Aesthetics (Sp) ........................................................................... 3
ECE 3260 (QI/DSC) Science of Sound (F) .................................................. 3
Elementary School Music Teaching Minor (19 credits)
This minor is for Early Childhood Education or Elementary Education majors only.

Advisor: Professor Leslie Timmons, 797-3699, Fine Arts 105

MUSC 1110\(^{10}\) Music Theory I (music minor section) (F) .................... 3
MUSC 1130\(^{10}\) Aural Skills I (music minor section) (F) ..................... 1
MUSC 1170 Keyboard Harmony I (music minor section) (F) ............. 1
MUSC 1600 Voice Techniques (F,Sp) (1 cr) or
MUSC 1630 Individual Vocal Instruction for Nonmusic Majors (F,Sp,Su) (1 cr) ................................................................. 1
MUSC 3260\(^{12}\) Elementary School Music (F,Sp,Su) ......................... 2
MUSC 3270\(^{11}\) Teaching Strategies and Practicum in Elementary Music (Sp) ................................................................. 3
Choral Performance Ensemble ...................................................... 2
Large or Small Performance Ensembles ..................................... 2

In addition, complete the following course, which may also count toward University Studies requirements.
MUSC 1010 (BCA) Introduction to Music (F,Sp,Su) ....................... 3

Elective Courses
Complete at least one of the three courses listed below.
MUSC 1480 Individual Piano Instruction for Nonmusic Majors (F,Sp,Su) ................................................................. 1
MUSC 1550 Beginning Group Guitar (F,Sp) .................................. 1
MUSC 1560 Intermediate Group Guitar (F,Sp) .......................... 1

\(^{10}\)Offered during spring semester only. These courses must be taken concurrently.
\(^{11}\)It is recommended that students complete MUSC 1010 prior to enrolling in MUSC 3010 and 3270.
\(^{12}\)Students must have completed a minimum of 55 credits prior to enrolling in MUSC 3260. It is recommended that students complete MUSC 1010, 1110, 1130, and 1170 prior to enrolling in MUSC 3260.

Recital and Concert Attendance
Recital and concert attendance is required and will be monitored. Students should plan in advance to attend departmental recitals at least 10 concerts and 10 recitals each year.

Individual Performance and Jury Requirements
Music majors enroll in individual instruction each semester and practice regularly outside of lessons. Jury exams are held at the end of each semester to assess individual progress. To determine specific jury requirements their area, students should contact their advisor.

Recital Participation
Each music education, performance, and pedagogy major is encouraged to appear in a departmental recital each semester. Four such appearances are required for graduation. Since junior and senior recital requirements vary, students should consult program advisors and degree requirement sheets for specific information.

Piano Proficiency Requirements
Music, Music Education, and Music Therapy majors must meet a minimum standard of piano proficiency before graduation. The specific requirements are detailed in the department’s Student Handbook.

Music Theory Proficiency
Music, Music Education, and Music Therapy majors must meet a minimum standard of theory proficiency before entering third-year core music courses. This theory exam is administered upon completion of the theory sequence and is also required for all transfer students. It serves as a placement exam for those who have not completed the theory sequence at their previous schools. For details, contact the Music Department Student Services Office, (435) 797-3015, Fine Arts 102.

Assessment
Information about the ongoing assessment of the Music Department can be found at: [http://www.usu.edu/music/assessment/index.html](http://www.usu.edu/music/assessment/index.html)

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: [http://www.usu.edu/honors/](http://www.usu.edu/honors/)

Additional Information and Updates
Degree requirements are listed on the Music Major Requirement Sheet and the Music Therapy Major Requirement Sheet, which can be obtained from the department, or online at: [http://www.usu.edu/ats/majorsheets/](http://www.usu.edu/ats/majorsheets/)

Additional requirements, including appropriate sequencing of courses, are listed in the Department of Music Student Handbook. For the most recent information regarding degree requirements and course sequencing, contact advisors over specific programs. Further information can also be obtained by contacting the Music Department Office, Fine Arts 102, or by visiting the department’s website.

Financial Support
Scholarships, grants, and work-study programs are available through the University. Information about these programs can be obtained by calling the Admissions Office, (435) 797-1129 or 1-800-488-8108. In addition, the Department of Music offers talent-based scholarships to undergraduate students and employs students as part-time workers. For scholarship information or to arrange an audition, contact the department at (435) 797-3015 or visit the department’s website.
Music Faculty

Professors
Gary Amano, piano
Michael L. Ballam, opera
Michael K. Christiansen, guitar program
James M. Drake, organ program
Todd L. Fallis, instrumental music education, student advising, low brass
F. Dean Madsen, music theory, twentieth century music, composition
Nicholas E. Morrison, clarinet, associate director of bands

Adjunct Professor
Michael Martin Murphey, songwriting, American studies

Professors Emeritus
Warren L. Burton, introduction to music
Max F. Dalby, bands, woodwind, conducting
Glen A. Fifield, elementary music, cornet and trumpet
Larry G. Smith, jazz program, musicianship program, staff arranger, saxophone, jazz piano
Alvin Wardle, music education, low brass

Associate Professors
Cindy J. Dewey, voice, opera, pedagogy
Mark A. Emile, string performance and pedagogy, violin/viola
Dennis D. Griffin, percussion, electronic music, composition
Lynn Jemison-Keisker, opera, voice
Thomas Rohrer, director of bands
Bruce M. Saperston, music therapy
Leslie Timmons, elementary music education, flute
Elizabeth York, director of music therapy

Associate Professor Emeritus
Mildred Johnson, music history and literature, musicianship program, viola

Assistant Professors
Sergio Bernal, orchestra conductor, string program
Jon Gudmundson, jazz, saxophone
R. Dennis Hirst, piano, Youth Conservatory
Eric Smigel, music history, world music
Ralph van der Beek, piano, Youth Conservatory

Assistant Professor Emeritus
Betty Beecher, piano

Instructors
Lane Cheney, choral music education
R. Cory Evans, choral music

Lecturers (Fry Street Quartet)
Russell Fallstad, viola
Anne Francis, cello
Jessica Guidieri, violin
Rebecca McFaul, violin

Certificate Program in National Environmental Policy Act (NEPA)

**Director:** Joanna Endter-Wada, Department of Environment and Society  
**Location:** Natural Resources 355B  
**Phone:** (435) 797-0922  
**FAX:** (435) 797-3526  
**E-mail:** joanna.endter-wada@usu.edu  
**WWW:** http://www.cnr.usu.edu/policy/

**Program Administrator:** Judith A. Kurtzman, Natural Resources 322, (435) 797-0922

**Graduate Program Description**

The Department of Environment and Society at Utah State University and the Shipley Group, Inc. have formed a partnership to provide a graduate-level certificate program that offers training related to the National Environmental Policy Act (NEPA). NEPA is an important environmental law that requires analysis of impacts, alternatives, and mitigation measures for all major federal actions affecting the environment, both within the territorial boundaries of the U.S. and at foreign military installations. Government agencies, private businesses, public interest organizations, and other groups involved in the NEPA process need individuals who have been trained in decision-making, analysis, and documentation aspects of NEPA, as well as in the accompanying Council on Environmental Quality (CEQ) regulations and various agencies’ NEPA implementing procedures.

The NEPA Certificate Program was designed to prepare natural resource and environmental professionals to meet the challenges of complying with the act and working effectively on NEPA documents. Participants who successfully complete the program should have a solid understanding of both the spirit and the letter of the law, and will be more effective members of interdisciplinary teams responsible for developing NEPA documents.

**Certificate**

Students who complete the program will receive a graduate-level certificate in the National Environmental Policy Act. Their Utah State University transcript will list the courses they attended to complete the program.

**Admission Requirements**

To apply and gain acceptance into the program, a person must complete and submit a NEPA Certificate Program application form to the Department of Environment and Society at USU, as well as provide a transcript documenting the completion of a bachelor’s degree. Students pursuing the NEPA Certificate are not required to be enrolled in a graduate degree program. However, credits obtained from the program may be applied toward a graduate degree.

**Course Requirements**

To receive the certificate, a participant must complete the following set of requirements:

1. apply and be accepted into the NEPA Certificate Program;
2. register for and successfully complete seven graduate-level courses taken for grades (four required courses and three elective courses);
3. undertake an individual capstone experience for graduate credit that involves a negotiated project;
4. maintain a minimum 3.0 GPA for program courses (grades below C will not be accepted);
5. abide by the Code of Policies and Procedures for Students at Utah State University.

**NEPA Certificate Program Courses**

Courses for the program will be offered at USU and at other locations around the country. Courses will be offered on a short-course basis through Continuing Education. A two-credit course requires a minimum of three full days in class; a one-credit course requires two full days in class. To receive graduate credit that can be applied toward completion of the certificate, all NEPA courses must be taken for a letter grade, which requires completion of a written examination in addition to class attendance. All courses offered as part of the NEPA Certificate Program may be taken for University graduate credit, whether or not a participant in the course is enrolled in the NEPA Certificate Program.

**Curriculum**

Students must complete four core courses (2 credits each), three elective courses (1 credit each), and a capstone experience (1 credit) in order to fulfill the requirements for the NEPA Certificate.

**Core Courses**

Participants are required to take four of the following courses. The first three listed are required. However, participants may choose between the last two courses to fulfill the core course requirements.

- **NEPA 6200** How to Manage the NEPA Process and Write Effective NEPA Documents ......................................................... 2
- **NEPA 6210** Clear Writing for NEPA Specialists ....................... 2
- **NEPA 6220** Reviewing NEPA Documents ................................ 2
- **NEPA 6230** Risk Communication for NEPA Specialists: Strategies and Implementation .................................................... 2
- **NEPA 6260** Cultural and Natural Resource Management ............ 2

**Elective Courses**

Participants are required to take three courses of their choosing from the following list.

- **NEPA 6270** Environmental Compliance Overview .................... 1
- **NEPA 6280** Interdisciplinary Team Building .............................. 1
- **NEPA 6300** Effective Environmental Contracting ...................... 1
- **NEPA 6310** NEPA Writing for Technical Specialists .................... 1
- **NEPA 6320** NEPA: Cumulative Impacts ..................................... 1
- **NEPA 6330** Conflict Management in the NEPA Process .............. 1
- **NEPA 6350** Socio-economic Impact Analysis for NEPA Specialists .... 1
- **NEPA 6360** Overview of the Endangered Species Act .................. 1
Capstone Experience

After completing the coursework, participants are required to complete a NEPA Capstone Experience (NEPA 6370) before being awarded the NEPA Certificate. This experience will be individualized for each participant, will consist of a project that has been negotiated between the participant and the program faculty, and may be subject to oversight from the NEPA Certificate Program Advisory Board.

Course Descriptions

National Environmental Policy Act (NEPA), page 676.
Natural Resources and Environmental Education Graduate Certificate

Certificate

Students who complete the program receive a certificate in Natural Resources and Environmental Education. Notification of this certificate appears on the student's transcript.

Admission Requirements

To apply for admittance into the NREE Interdisciplinary Graduate Certificate Program, a graduate student must: (1) be accepted by the School of Graduate Studies at Utah State University for graduate study (current or provisional), (2) complete an NREE Interdisciplinary Graduate Certificate Program Application, and (3) submit a resume with references, along with a narrative describing personal interest in completing the NREE Certificate Program with respect to his or her professional goals. The NREE Program Director reviews the application and makes a recommendation for admittance into the certificate program, if appropriate, to the NREE Certificate Advisory Committee.

Student Advisement

An NREE Certificate Advisory Committee, comprised of the NREE Program Director, NREE Program Associate, and two NREE-affiliated faculty from participating departments and colleges, will assist in reviewing graduate student applications for admission into the certificate program, identifying major advisors, identifying funding opportunities, recommending courses to meet the NREE Certificate requirements, and advising graduate students. Graduate students accepted into the NREE Certificate Program will work with their major faculty advisor, as well as with the NREE Certificate Advisory Committee, to support them in understanding and meeting the requirements of the NREE Graduate Certificate Program.

Course Requirements

The NREE Interdisciplinary Graduate Certificate Program consists of three curriculum components, for a total of 15-17 credits: (1) the NREE Core that includes two foundation courses, a NREE graduate seminar, and an "integrating" capstone experience; (2) one Human Dimensions of Natural Resources/Environment course; and (3) one Natural Resources/Environmental Management course.

The purpose of the certificate is to meet an identified need expressed by graduate students with interests in working professionally in the field of natural resources and environmental education and interpretation. The certificate program provides an interdisciplinary perspective on environmental education, and provides graduate students with the ability to teach people how to think critically and creatively in understanding, interpreting, and dealing with environmental issues and challenges. This approach enables students to focus on a broad spectrum of issues and content related to natural resources and the environment.

The structure of the certificate program emphasizes: (1) processes and skills necessary to present and integrate information across a broad spectrum of delivery systems; (2) interdisciplinary information and technical content across many areas, including natural resources, ecology, human resources, history, education, sociology, etc.; and (3) development of an interest area of personal/professional inquiry. The program provides a mechanism to support graduate student project development and research, emphasizing scholarship, discovery, and application of findings in applied settings in order to contribute to the professional field of natural resources and environmental education and interpretation.

Completion of the certificate program will provide graduate students with a working knowledge of the depth and breadth of the professional field of environmental education and interpretation. Moreover, it will prepare them for a job market demanding innovative and creative approaches for incorporating environmental education and interpretation in natural resource management agencies, in both formal (K-12 school-based) and nonformal (youth, community, and outdoor) education programs, in nonprofit organizations, and in the for-profit commercial sector. Although professionals working in natural resources and environmental education may work in a wide range of settings, they share one objective: to help people appreciate and understand the relationship between humans and the natural world around them. Thus, the value of the NREE Certificate Program goes far beyond more traditional approaches associated with education-oriented certificate programs.

Certificate Program is administered by the Department of Environment and Society. College of Natural Resources. The certificate program consists of three components, for a total of 15-17 credits: (1) the NREE Core that includes two foundation courses, a NREE graduate seminar, and an "integrating" capstone experience; (2) one Human Dimensions of Natural Resources/Environment course; and (3) one Natural Resources/Environmental Management course.

The purpose of the certificate is to meet an identified need expressed by graduate students with interests in working professionally in the field of natural resources and environmental education and interpretation. The certificate program provides an interdisciplinary perspective on environmental education, and provides graduate students with the ability to teach people how to think critically and creatively in understanding, interpreting, and dealing with environmental issues and challenges. This approach enables students to focus on a broad spectrum of issues and content related to natural resources and the environment.

The structure of the certificate program emphasizes: (1) processes and skills necessary to present and integrate information across a broad spectrum of delivery systems; (2) interdisciplinary information and technical content across many areas, including natural resources, ecology, human resources, history, education, sociology, etc.; and (3) development of an interest area of personal/professional inquiry. The program provides a mechanism to support graduate student project development and research, emphasizing scholarship, discovery, and application of findings in applied settings in order to contribute to the professional field of natural resources and environmental education and interpretation.

Completion of the certificate program will provide graduate students with a working knowledge of the depth and breadth of the professional field of environmental education and interpretation. Moreover, it will prepare them for a job market demanding innovative and creative approaches for incorporating environmental education and interpretation in natural resource management agencies, in both formal (K-12 school-based) and nonformal (youth, community, and outdoor) education programs, in nonprofit organizations, and in the for-profit commercial sector. Although professionals working in natural resources and environmental education may work in a wide range of settings, they share one objective: to help people appreciate and understand the relationship between humans and the natural world around them. Thus, the value of the NREE Certificate Program goes far beyond more traditional approaches associated with education-oriented certificate programs.
as well as using the environment and natural world to teach other subjects, with a strong emphasis on participation and on practicing techniques. Advanced Natural Resource Interpretation examines the planning processes, techniques, and evaluation procedures for using information and education to influence human behavior and increase benefits to visitors in natural settings, and also focuses on the leadership of teams involved in producing interpretive plans and materials.

Graduate Seminar
ENVS 6800 Environment and Society Departmental
Seminar (F or Sp) ................................................................. 1

The Graduate Seminar requires student attendance at a number of different speaker seminars, occurring during the fall or spring semester, that are related to NREE, along with occasional meetings with NREE affiliated faculty to discuss connections and relevance of the seminars to NREE.

Capstone Experience
Students must complete 3 credits in a capstone experience, developed in consultation with a faculty advisor. Credits may be completed in the following types of courses:
Graduate Internship/Co-op
Graduate Special Topics
Graduate Directed Study
Thesis Research
Dissertation Research

The Capstone Experience requirement may be fulfilled in a number of ways, based on each student’s interest, through an internship/co-op/special field experience, an investigation of a special topic or development of a project, directed readings/study, or a research project. In meeting this requirement, it will be important for students to be able to demonstrate they are getting an “integrating” capstone experience in natural resources and environmental education. Depending on the topic and its relationship to natural resources and environmental education, the completion of a student’s Plan A thesis or Plan B project at the master’s level may also fulfill this requirement. A student’s doctoral dissertation research may qualify as a Capstone Experience. The student’s graduate advisor, graduate committee, and NREE Advisory Committee will approve the “capstone” experience. A final “integrative” paper or thesis/dissertation will be the product for the “capstone” experience, emphasizing scholarship and discovery, as well as application of findings in applied settings in natural resources and environmental education.

II. Human Dimensions of Natural Resources/Environment Courses (2-3 credits)
For the NREE Interdisciplinary Graduate Certificate Program, students are required to take one of the following courses in order to gain a management perspective toward natural resources and the environment.

ENVS 5300 Natural Resource and Environmental Economics 3
ENVS 5320 Water Law and Policy in the United States 2
ENVS 5640 Conflict Management in Natural Resources 3
ENVS 6000 Theoretical Foundations in Human Dimensions of Ecosystem Science and Management
ENVS 6110 Fisheries and Wildlife Policy and Administration 3
HIST 6460 Seminar in Environmental History 3
PHIL 5510 Ethics and the Environment 3

POLS 5180 Natural Resource Policy 3
POLS 5200 Global Environment 3
SOC 6620 Environment, Technology, and Social Change 3
SOC 6630 Natural Resources and Social Development 3

There may be another course that can satisfy this requirement, but the course will need to be approved by the student’s graduate advisor and the NREE Advisory Committee.

III. Natural Resources/Environmental Management Courses (3-4 credits)
For the NREE Interdisciplinary Graduate Certificate Program, students are required to take one of the following courses in order to gain a management perspective toward natural resources and the environment.

ADVS 5030 Sustainable Agricultural Production Systems with Animals 3
AWER 5150/6150 Fluvial Geomorphology 3
AWER 5330/6330 Large River Management 3
AWER 5640/6640 Riparian Ecology and Management 3
AWER 5660 Watershed and Stream Restoration 2
AWER 6520 Water Quality and Pollution 3
AWER 6650 Principles in Fishery Management 3
ENVS 5000 Collaborative Problem-Solving for Environment and Natural Resources 3
FRWS 5000 Predator Ecology and Management 3
FRWS 5070/6070 Range Wildlife Relations 3
FRWS 5300/7300 Wildlife Damage Management Principles 3
FRWS 7000 Theory and Applications of Rangeland Ecosystem Management 3
PLSC 5050/6050 Weed Biology and Control 4
SOIL 5350/6350 Wildland Soils 3

There may be another course that can satisfy this requirement, but the course will need to be approved by the student’s graduate advisor and the NREE Advisory Committee.

IV. Personal/Professional Inquiry
Although not formally required, a number of courses exist that can support students’ interest in natural resources and environmental education, and support student efforts in completing individual degree requirements. These courses include the following:

ASTE 5260/6260 Environmental Impacts of Agricultural Systems 3
ASTE 6070 Program and Curriculum Development in Career and Technical Education 3

ASTE 6110 Applied Technology Education Program Planning and Evaluation 3

ASTE 6170 Supervision and Administration of International Extension Programs 3

ASTE 6240 Strategies for Teaching Adults 3
BIOL 5550 Freshwater Invertebrates 3
BIOL 5560 Ornithology 3
BIOL 5570 Herpetology 3
BIOL 5580 Mammalogy 3
BIOL 6510 Insect-Plant Interactions 2
ELED 6400 Multiple Talent Approach to Teaching 2
ELED 6700 Improvement of Science Instruction 3
ENGL/HIST 6610 Seminar on the American West 3
ENGL/HIST 6620 Seminar in Native American Studies 3
ENGL/HIST 6700 Folklore Theory and Method 3
ENGL/HIST 6720 Folklore Fieldwork 3
ENGL/HIST 6730 Public Folklore 3
ENGL/HIST 6740 Folk Narrative 3
Natural Resources and Environmental Education Graduate Certificate

ENGL/HIST 6760 Cultural and Historical Museums .................................. 3
GEOG 5650/6650 Developing Societies .................................................... 3
GEOG 5810/6810 Geography Education Inservice Workshop ..................... 3
GEOG 5970 Classroom Technology in Geography Education ..................... 3
GEOG 6800 Teaching Geography .............................................................. 3
HIST 6460 Seminar in Environmental History ......................................... 3
LAEP 5400/6400 Low Water Landscaping ............................................. 3
LAEP 6110 Landscape Planning for Wildlife ......................................... 3
MHR 6620 Training and Organizational Development .............................. 3
MHR 6650 Team and Interpersonal Effectiveness .................................... 3
PLSC 5100/6100 Landscape Irrigation Management .................................. 3
POLS 5180 Natural Resource Policy ......................................................... 3
POLS 5200 Global Environment ............................................................... 3
PSY 6660 Cognition and Instruction ....................................................... 3
PSY/EDUC 7670 Literature Reviews in Education and Psychology ............. 1
PSY 7700 Grant Writing ........................................................................... 3
SCED/ELED 6150 Foundations of Curriculum ......................................... 3
SCED/ELED 6310 Content Area Reading and Writing ................................ 3
SPCH 5250 Environmental Rhetoric ......................................................... 3
THEA 6030 Storytelling ........................................................................... 3

Graduate Program Description

The Natural Resource and Environmental Policy Graduate Certificate is an interdisciplinary program designed for students seeking graduate degrees in fields related to environmental and natural resource policy analysis. The program introduces students to complementary scientific and social scientific perspectives on environmental and natural resource policy, linking the scientific dimensions of policy to its social context and to the operation of political and economic institutions. Courses that satisfy program requirements are currently offered by the departments of Agricultural Systems Technology and Education; Business Administration; Economics; Environment and Society; Wildland Resources; History; Landscape Architecture and Environmental Planning; Political Science; and Sociology, Social Work and Anthropology. The program helps to prepare students for careers in public or private sector policy analysis, environmental planning, environmental program assessment, natural resource policy administration, environmental and natural resource consulting, and environmental and natural resource policy advocacy.

Certificate

Students who complete the Policy Program receive a certificate in Natural Resource and Environmental Policy. Notification of this certificate appears on the student’s transcript.

Admission Requirements

Admission to the Certificate Program is open to students accepted into a master’s degree program or a doctoral degree program at Utah State University, provided their degree program requirements include development of a written research paper or project defended before the student’s graduate committee. In all cases, the thesis, research report, or dissertation must contain a significant component addressing natural resource or environmental policy.

Prerequisites

Prior to admission into the Natural Resource and Environmental Policy Graduate Certificate Program, a student must complete at least one upper-division or graduate course in ecology, biological systems, earth processes, or ecosystem management. In addition, each student must also complete at least one upper-division or graduate course in economics, political science, history, or sociology. With the approval of the program coordinator, appropriate professional experience can serve as a substitute for either one of these prerequisites.

Graduate Committee

The student’s graduate committee must include one faculty member affiliated with the Policy Program to advise the student on meeting the program requirements and in selecting core courses.

Course Requirements (14 credits)

Courses taken to satisfy requirements in a student’s major or minor area of study can also be used to satisfy Natural Resource and Environmental Policy Graduate Certificate requirements.

Required Courses (5-6 credits)

NR 6430 Natural Resource and Environmental Policy Cornerstone Seminar (3 cr) or POLS 5180 Natural Resource Policy (3 cr) ........................................... 3
And
ENVS 5300 Natural Resources Law and Policy (2 cr) or ENVS 5320 Water Law and Policy in the United States (3 cr) ........... 2 or 3

Elective Courses (8-9 credits)

Because of ongoing changes in the curricular offerings of the participating departments, the list of Natural Resource and Environmental Policy Graduate Certificate elective courses is updated annually. Students entering the program should immediately obtain a current list of electives from the program coordinator or staff assistant. Students may petition the program coordinator to use as electives courses not included on the current list; however, to gain approval as an elective, a course must have significant environmental or natural resource policy content.

Approved elective courses include the following:
ASTE 6260 Environmental Impacts of Agricultural Systems ............ 3
AWER 6330 Large River Management ......................................... 3
ECON 6500 Introduction to Natural Resource Economics ............ 3
ECON 6510 Introduction to Environmental Economics ............. 3
ENVS 5640/6640 Conflict Management in Natural Resources .......... 3
ENVS 6000/7000 Theoretical Foundations in Human
Dimensions of Ecosystem Science and Management .................. 3
ENVS 6130 Policy Aspects of Wildland Recreation ..................... 3
ENVS 6530 Natural Resources Administration .......................... 2
HIST 6460 Seminar in Environmental History ............................ 3
POLS 5200 Global Environment ........................................... 3
SOC 6620 Environment, Technology, and Social Change ............... 3
SOC 6630 Natural Resources and Social Development .................. 3
SOC 7620 Sociology of Environmental Hazards and Risks ............ 3
Master of Natural Resources (MNR)

Degree Coordinator: Todd A. Crowl

Location: Natural Resources 108

Phone: (435) 797-7565

FAX: (435) 797-2443

E-mail: facrowl@cc.usu.edu

WWW: http://www.cnr.usu.edu

Degree offered: Master of Natural Resources (MNR)

Objectives

The Master of Natural Resources (MNR) is a professional degree designed to prepare students to work in the interdisciplinary context of the 21st Century. It is a nonthesis program, intended for students and practicing professionals with a career orientation in natural resource management.

Admission Requirements

All MNR students are admitted through one of the three College of Natural Resources departments, following School of Graduate Studies standard procedures and policies (see pages 99-100). As with other USU master’s degrees, each student must be accepted by a faculty member (major professor) who agrees to guide the student in the MNR program.

Undergraduate prerequisites include courses in chemistry, physics, botany, zoology, ecology, economics, political science, algebra, and statistics; and at least three courses in natural resources disciplines. Students without undergraduate degrees in natural resources or similar majors will be required to make up deficiencies in undergraduate preparation prior to beginning MNR degree coursework.

Course Requirements

The degree program includes two required core courses, courses in specified topic areas, and elective courses. The specific coursework required for each student will be determined by the major professor and the two other members of the student’s graduate supervisory committee.
Cooperative Nursing Program

Advisor:
Doug Watson, (801) 626-6128 or (800) 350-7042 (Utah only), healthprofessions@weber.edu

Undergraduate Programs

Associate Degree Program Objectives

Weber State University and Utah State University jointly offer an Associate of Science degree or an Associate of Applied Science degree in Nursing at Logan.

All nursing theory, University Studies, and laboratory practice classes are offered on the Utah State University campus and in health service agencies within Box Elder and Cache Counties.

Weber State University admits the prospective student and grants the Associate of Science degree or the Associate of Applied Science degree upon the student’s completion of the course. The student participates in graduation ceremonies held on the Weber State University campus.

A graduate of this program is eligible to write the State Board licensing examination to become a registered nurse. The program is accredited by the Utah State Board of Nursing and the National League of Nursing Accrediting Commission.

Students admitted to the program have the prerogative of taking the licensing examination for Practical Nursing upon an equivalency basis with the completion of the first year’s course of studies.

Departmental Admission Requirements for Associate Degree Program

Admission into the Cooperative Nursing Program is selective. To ensure quality clinical placement, a limited number of students are accepted into the program each year. Applications are accepted once a year and are available online or in-person after October 1. Students must complete the application process by February 1.

Applications are reviewed by the Nursing Program admissions and advancement committee. A point system is used to facilitate candidate selection. Applications received by January 15 will earn extra points. Support courses will be evaluated, but points will not be awarded for courses already in-progress during the semester in which an application is received. Students will be notified of acceptance into the program by April 15.

Utah State University

Pre-Nursing Major

Initially, many students are admitted into Utah State University to take their general education and supporting science courses, in order to become competitive applicants for the Weber State RN program on the Logan campus. Students must attain a minimum GPA of 3.0 in order to be accepted into the USU pre-nursing major.

USU Pre-Nursing Advisor: Liz Heffernan, (435) 797 2577, heffernanliz@biology.usu.edu

Curriculum for Associate Degree Program

The curriculum for the associate degree is planned over a six-semester period, using two academic years plus two summer semesters. It is planned to include a broad University Studies program concurrently with courses in Nursing. A grade of B or higher is required for all lower-division nursing courses, and a grade of C or higher is required for all support classes.

Graduation Requirements

Associate of Science Degree in Nursing
(Weber State University)
(3.0 overall GPA minimum)

Students must complete all prerequisite courses listed before beginning fall nursing classes. A grade of C or better must be achieved in each of these courses in order for the student to remain in the Nursing Program.

First Year

Summer Semester (or prior college credit)
BIOL 2320 Human Anatomy .................................................4
BIOL 2420 Human Physiology ..............................................4
CHEM 1110 (BPS) General Chemistry I (Prereq: MATH 1050) ..........4
Breath Humanities (BHU) elective course .................................3

Mathematics Requirement. For information about the mathematics requirement, students should refer to their admission packet.

Fall Semester
BIOL 1110 Elementary Microbiology (4 cr) or
BIOL 1100 Introduction to Microbiology (Home Study only) (3 cr).3 or 4

Undergraduate Advisor:
Emily W. Hoffman, Nutrition and Food Sciences 222, (435) 797-2131

Degrees offered: Bachelor of Science (BS), Master of Science (MS), and Doctor of Philosophy (PhD) in Nutrition and Food Sciences; Master of Food Microbiology and Safety (MFMS); Master of Dietetics Administration (MDA)

Undergraduate emphases: BS—Food Science, Food Technology Management, Nutrition Science, Biotechnology, and Dietetics

Graduate specializations: MS, PhD—Dietetics, Food Biotechnology, Food Chemistry, Food Engineering, Food Microbiology, Food Processing, Human Nutrition, and Nutrient Metabolism

Undergraduate Programs

Objectives
The Department of Nutrition and Food Sciences has the following three objectives:

1. To provide students with the scientific/academic background necessary to function well in further academic pursuits or future work environments.
2. To provide students with the critical thinking and problem solving skills necessary to enhance further academic pursuits or future work environments.
3. To provide students with practical application and work experience credentials to provide personal and employment satisfaction.

Program Emphases and Career Opportunities

Food Science
Students receive an excellent background in chemistry, engineering, food processing, statistics, sensory evaluation, and microbiology. The Food Science program is approved by the Institute of Food Technologists. Graduates are in demand by industry for positions in research, quality control/assurance, product development, and processing. Government laboratories and regulatory agencies also hire food science graduates. With a food science degree, students can also qualify to enter graduate school.

Food Technology Management
The Food Technology Management program gives students a broad background in basic food science and in business administration to be applied to the business-oriented aspects of the food industry. Students also qualify for a Business Production Minor. Graduates are sought by private food industry and public institutions in management positions.

Nutrition Science
The Nutrition Science emphasis is for students who are interested in studying the molecular and cellular bases of human health and disease. This is a multi-disciplinary program in which students learn to apply techniques from the fields of molecular and cellular biology, physiology, genetics, and biochemistry to issues in nutrition. Students will gain experience in laboratory, clinical, and epidemiological methods, and may have the opportunity to gain laboratory research experience in nutrition studies being conducted by faculty members. The undergraduate Bachelor of Science degree qualifies a student with the Nutrition Science emphasis to find employment in industry or academic laboratories, as well as in government agencies. It can also be used as preparation for medical or graduate school.

Biotechnology
The Biotechnology emphasis gives students a specialized background in biotechnology with depth training in either Food Science or Nutrition Science. Graduates of the program will be well-qualified to pursue biotechnology-related positions related to their depth area of choice.

Dietetics
This emphasis is a Bachelor of Science program that prepares students to become registered dietitians with professional skills in clinical nutrition, community/public health nutrition, and food service management. Students should complete prerequisites and apply by March 15 of their sophomore year. Within this program, USU offers two options: the Coordinated Program in Dietetics (CPD) and the Didactic Program in Dietetics (DPD), which are both accredited by the Commission on Accreditation for Dietetics Education of The American Dietetic Association, 20 South Riverside Plaza Suite 2000, Chicago IL 60606-6995, (312) 899-0040. Each of these programs is described below:

1. Coordinated Program in Dietetics (CPD). In addition to coursework, students complete 1,000 internship hours during their junior and senior years. Students should complete prerequisites and apply by mid-March of their sophomore year. Twelve students are accepted annually, and seniors must relocate to Salt Lake City during fall semester. Graduates are eligible to take the national registration exam upon completion of the BS degree.

2. Didactic Program in Dietetics (DPD). After completing prerequisites, students should apply by mid-March of their sophomore year. Upon completion of coursework required for the BS degree, students apply for internships (located throughout the U.S., including the Utah-based USU Extension Dietetic Internship Program). Graduates are eligible to take the national registration exam upon completion of their internship.

Completion of courses required for the Food Science Emphasis, Nutrition Science emphasis, or Dietetics emphasis may be suitable preparation for students planning to apply to medical school.

Bachelor of Science Requirements

Departmental Admission Requirements
Admission requirements for the Department of Nutrition and Food Sciences are the same as those described for the University on pages 16-20. Students in good standing may apply for admission to the department. Students planning to major in Nutrition and Food Sciences should take algebra, chemistry, and biology in high school.

Graduation Requirements
All graduates from the department must have completed one of the six emphasis areas in the department and must meet the following minimum requirements:
Department of Nutrition and Food Sciences

1. Grade point average (GPA) must be 2.5 or higher in all courses required for the major.
2. A grade of C or better must be received in every required course offered through the department (i.e., courses having an NFS prefix).
3. Courses required for the major may be repeated only once to improve a grade.
4. Courses required for the major may not be taken as Pass-D-Fail credits.

Minor in Food Sciences

Students with majors outside of the Nutrition and Food Sciences Department may graduate with a minor in Food Sciences by completing NFS 1020, 3110, 4070, 5020 (or 5030), and 5560 with a minimum cumulative GPA of 2.5 for these courses.

Major and Emphasis Requirements

Specific requirements for each emphasis are listed below. Requirements change periodically, and sequence of courses is important.

Food Science Emphasis

Courses followed by an asterisk (*) are suggested for fulfilling University Studies Requirements.

Freshman Year

Fall Semester
NFS 1000 World of Food and Nutrition .............................. 1
CHEM 1210 Principles of Chemistry I .............................. 4
CHEM 1215 Chemical Principles Laboratory I ................. 1
NFS 1020 (BLS) Science and Application of Human Nutrition .... 3
MATH 1050 (QL) College Algebra ................................. 4
MATH 1060 Trigonometry ............................................ 2

Spring Semester
NFS 1250 Sanitation and Safety .................................... 3
CHEM 1220 (BPS) Principles of Chemistry II .................. 4
CHEM 1225 Chemical Principles Laboratory II ............... 1
ECON 1500 (BAI)* Introduction to Economic Institutions, History, and Principles .................... 3
MATH 1210 (QL) Calculus I ........................................ 4

Financial Support
The Department of Nutrition and Food Sciences and the College of Agriculture award scholarships in addition to those available through the University Financial Aid Office. Information and application forms may be obtained from the department office. Students may also contact the department for assistance in finding employment that will enhance their academic studies. Many students are employed by the department and by private firms near the University.

Assessment of Instruction
Information about assessment within each of the departmental programs can be found at:
http://www.nfs.usu.edu/academics/assessment/

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information
For more information about Bachelor of Science requirements and the sequence in which courses should be taken, see major requirement sheet, available from the Nutrition and Food Sciences Department, or online at: http://www.usu.edu/ats/majorsheets/

Graduate Programs

MS and PhD Programs

Admission Requirements
Candidates for graduate study in the Department of Nutrition and Food Sciences need a background in chemistry, biochemistry, physics, mathematics, statistics, bacteriology and physiology. Prior coursework in food science or nutrition is desirable. Students may be accepted into the NFS graduate program with deficiencies in these areas; however, their supervisory committee will require that competence equivalent to a BS degree in Nutrition and Food Sciences be obtained as part of the Program of Study.

Students must meet some departmental requirements, in addition to requirements of the School of Graduate Studies, as shown at:
http://www.usu.edu/gradsch/admission/

Departmental requirements include the following:

1. Students must attain Graduate Record Examination (GRE) scores at the 40th percentile minimum on the Verbal, Quantitative, and Analytical Writing tests.

2. Before acceptance into a PhD program, a student must have obtained an MS degree or have a manuscript reporting original research accepted for publication in a refereed journal.

3. Before acceptance into the Department of Nutrition and Food Sciences, potential MS and PhD graduate students must be accepted by a faculty member who is willing to add them to his or her research team.

Registration Requirements
Once admitted, students are required to maintain enrollment as follows:

1. Enrollment in at least 3 credits per semester in order to use University facilities and receive direction (including thesis or dissertation direction) from their major professor.

2. Enrollment in at least 9 credits per semester if receiving an assistantship or fellowship from Utah State University.

3. Enrollment in no more than 6 credits per semester if employed full time by Utah State University.

Selecting a Major Professor
Initially, students are accepted into the department when at least one faculty member has expressed a willingness to add the student to his or her research team. By doing so, the faculty member guarantees at the time of acceptance that the student may work in his or her research program. However, offers of financial aid must be discussed directly with the faculty member. Students may choose as their major professor any faculty member who can and is willing to accommodate them.
Establishing a Supervisory Committee
A supervisory committee must be selected by the student in conjunction with his or her major professor during the student’s first semester as an NFS graduate student. The major professor serves as the chair of the supervisory committee. A minimum of three members (at least two from the department) including the major professor are required for the MS program, and at least five (three or more from the department and one or more from outside the department) for a PhD program must be suggested.

The Supervisory Committee Assignment Form needs to be submitted to the department head by the 8th week of the first semester for MS students and the 15th week of the first semester for PhD students. The department head must approve the student’s committee and may add members. It is the student’s responsibility to meet with the proposed committee members to make certain they are able and willing to serve. The Supervisory Committee Assignment Form is then forwarded to the dean of the School of Graduate Studies for final approval. (Note: The Supervisory Committee Assignment Form may be found on the School of Graduate Studies website, http://www.usu.edu/gradsch/forms/, or may be obtained at the Nutrition and Food Sciences departmental office.)

Defining a Program of Study
Students should register for their first semester based on advise from their major professor. Students should then prepare a Program of Study in conjunction with their major professor. The Program of Study should ensure fulfillment of the minimum requirements for all NFS graduate students (shown below) and also include other courses providing the background necessary to conduct their research.

Students need to schedule a meeting with their supervisory committee to discuss the proposed Program of Study by the end of the first semester for MS students and by the end of the second semester for PhD students. A copy of the proposed Program of Study should be given to each committee member several days prior to the committee meeting.

The purpose of the committee meeting is to secure the supervisory committee’s approval of the Program of Study. The committee will determine any deficiencies in core BS competencies or academic background. Students in the NFS graduate program should have already taken undergraduate general chemistry, organic chemistry, biochemistry, algebra, and statistics. Although these courses may be taken as part of the graduate program, they will not be counted as graduate credit in the Program of Study.

The supervisory committee is responsible for ensuring NFS graduate students have (or obtain during their program of study) the expected core competencies of NFS bachelor’s degree graduates. This can be based upon transcripts of courses from prior studies, passing courses listed in the program of study (with a minimum grade of B), or by administering a written or oral examination.

The committee will also determine that the courses included in the Program of Study meet the minimum requirements for obtaining an MS or PhD in Nutrition and Food Sciences (as shown below). All members of the committee, as well as the department head, must sign the Program of Study Form before it is sent to the School of Graduate Studies. Registration for all subsequent semesters should be based on the approved Program of Study. Changes to the Program of Study require a letter written by the major professor to the School of Graduate Studies (with copies to all members of the committee and the department head) justifying the change.

The student may register for courses not listed on the Program of Study with approval of his or her major professor (especially if the student is receiving a research assistantship). However, the student will be responsible for paying any additional in-state and out-of-state tuition and fees required for these additional classes. Tuition waivers (and tuition remission for PhD students) are based upon the approved Program of Study.

Minimum Course Requirements for MS/PhD Students in Nutrition and Food Sciences

BS Core Competency Classes by Graduate Specialization

Food Science. The following courses are required for students specializing in a food science related area: NFS 3110 (Food Technology and Health), NFS 5020 (Meat Technology and Processing) or NFS 5030 (Dairy Technology and Processing), NFS 5110 (Food Microbiology), NFS 5500 (Food Analysis), NFS 5560 (Food Chemistry), and STAT 3000 (Statistics for Scientists).

Nutrition. The following courses are required for students specializing in a nutrition related area: NFS 4020 (Advanced Nutrition) and STAT 3000 (Statistics for Scientists).

Program of Study for MS and PhD Degrees

The following courses are required. For further information, see pages 104-106 of the School of Graduate Studies section of this catalog.

1. NFS Graduate courses. NFS graduate courses (other than BS core competency courses): 5 credits for MS, 10 credits for PhD.

2. Biochemistry and Statistics. Biochemistry (CHEM 5700, 5710): 3 credits for MS, 6 credits for PhD; Statistics (STAT 5100, 5120, 5200, 5600): 3 credits for MS, 6 credits for PhD.

3. NFS Graduate Seminar (NFS 7800). Students must enroll in NFS 7800 during each fall and spring semester: 2 credits for MS, 6 credits for PhD.

4. Teaching. INST 7920: 1 credit required for PhD; NFS Teaching Experience (new course to be introduced) or NFS 5250 (Occupational Experience): 2 credits required for PhD. (Credits in this area are not required for MS.)

5. Other Graduate Courses. BS core competency courses taken at the 6000 level, or other USU courses approved for graduate studies, may be included. For MS, 5-11 credits are required; for PhD, 15-25 credits are required.

6. Research. For MS, 6-12 credits of NFS 6970 are required. For PhD, 34-45 credits of NFS 7970 are required. If students desire to do research beyond the Program of Study requirements, they should register for Continuing Graduate Advisement.

Total Credits Required

For the MS degree, 30 total credits are required. For the PhD degree, 90 total credits are required (including the 30 credits taken for the MS).
Research Proposal
In consultation with the major professor, the student must choose a research area suitable for the MS thesis or PhD dissertation, and then prepare a research proposal. Research proposals should be written and approved by the end of the second semester for students completing the MS degree and by the end of the third semester for PhD students.

The content and duration of the proposed research should be appropriate for the degree. It is expected that MS research and coursework (including writing and defense of the thesis) should be completed within 2 years (24 months). The length of research being proposed for the PhD dissertation is dependent on the discovery by the student of a substantial level of new information that can be added to their field of specialization.

The proposal should include the following:
1. Title
2. Description of the problem, based on the most current literature
3. Statement of the purpose of the intended research
4. Research Plan
5. List of references cited, presented in a form acceptable for publication in a scientific journal in the student’s field

The student prepares the research proposal under the guidance of the major professor. Once the research proposal is completed, it is the student's responsibility to schedule a meeting with his or her supervisory committee, and to provide each committee member with a copy of the research proposal at least two weeks prior to the meeting.

During the committee meeting, the student is expected to provide an oral presentation of the proposed research, and discuss any regulated aspects of the research, such as hazardous materials, experimental animals, or human subjects. After all members of the supervisory committee have approved the research proposal, a copy of the proposal will be sent to the graduate school.

Departmental Seminar
The NFS graduate seminar (NFS 7800) is held in the Nutrition and Food Sciences Building, room 202 from 3:30 to 5:00 p.m. each Wednesday during fall and spring semesters. All NFS MS and PhD students are expected to register for and attend this seminar during each semester for which they are enrolled as full-time graduate students.

This seminar will include presentations by NFS faculty members, faculty members from other USU departments, invited speakers, and graduate students. In addition to the presentations, NFS 7800 will also include assignments on topics such as critical thinking, scientific writing, poster preparation, and grant proposal writing. The theme of the seminar will be chosen by the NFS faculty member who is assigned as the course instructor.

During the semester in which they defend their thesis or dissertation, all MS and PhD students are required to give a presentation (a 30 to 45 minute seminar) on the results of their research. This presentation will be given to the NFS faculty members and students as part of the NFS 7800 seminar series. The student must invite all members of the supervisory committee to attend this seminar presentation. At the beginning of the semester in which they plan to defend their thesis or dissertation, students need to schedule a date for their presentation with the NFS 7800 instructor.

Comprehensive Examination
(PhD students only)
Before a student can become a candidate for the PhD degree, he or she must take a comprehensive examination, as required by the School of Graduate Studies. After completion of the courses listed in the Program of Study, the student should schedule a meeting of their committee for the comprehensive examination. This is usually an oral examination (although committee members have the option of providing a written exam), and the student should bring the Application for Candidacy for Doctoral Degree Form to the examination.

Typically students will be asked questions related to their area of specialization and their field of research. However, the comprehensive exam can also be used to test students' overall knowledge of food science or nutrition, and committee members can ask any questions that will test the student’s knowledge and ability to synthesize nutrition and food science information, as well as answer questions. The form should be completed at this time. On the Application for Candidacy for Doctoral Degree Form, the committee members will list the field in which they examined the student, and then sign the form accordingly.

Thesis or Dissertation Final Examination
Students write the thesis or dissertation under the guidance of their major professor. To schedule a tentative date for the final examination (or defense) of the thesis or dissertation, students should also contact their supervisory committee members. Students need to plan well in advance, so that there will be sufficient time allowed for the student to complete their writing and for the committee members to read the thesis or dissertation. When the thesis or dissertation is ready to be defended, and at least four weeks prior to the tentative defense (or final) examination date and time, the student submits a copy to each committee member.

After the committee members have read the thesis or dissertation and have determined that it is indeed ready to be defended, the student prepares the Appointment for Examination Form. Each of the supervisory committee members is required to sign this form, indicating that they have read and tentatively approve the content and format of the thesis or dissertation, and that they can be in attendance at the defense.

The Appointment for Examination Form needs to be submitted to the School of Graduate Studies a minimum of 10 working days prior to the defense. The School of Graduate Studies will appoint one of the supervisory committee members (other than the major professor) to chair the defense examination.

Completing the Thesis or Dissertation
After a successful defense of the thesis or dissertation, the student is required to make any changes to the thesis or dissertation that are required as a consequence of the final examination. At this time, the student can schedule with the School of Graduate Studies a date by which he or she expects to have the thesis or dissertation available for review. If the thesis or dissertation is not submitted to the School of Graduate Studies prior to this date, it will be reviewed at the next available date.

When the thesis or dissertation has been revised to the satisfaction of the committee member(s) assigned the responsibility of ensuring such changes are completed to the satisfaction of the supervisory committee (usually the major professor), the front page of the thesis or dissertation can be signed. The student then completes the Thesis/Dissertation Format and Style Form and obtains the major professor’s
Department of Nutrition and Food Sciences

signature (in the NFS Department the major professor also acts as the departmental format/style reviewer) and submits the thesis or dissertation to the School of Graduate Studies.

Following review by the School of Graduate Studies, the thesis or dissertation is collected by the NFS Department and returned to the major professor, along with a list of corrections. The major professor then has the responsibility of ensuring that the thesis or dissertation is revised (if necessary), and of signing a release indicating that the thesis or dissertation is ready for binding. The student may then make the needed copies of the thesis or dissertation and submit them for binding. It is also the student’s responsibility to ensure that all other forms and fees related to the thesis or dissertation and to the completion of his or degree are finalized.

Other Graduate Programs

Master of Food Microbiology and Safety (MFMS)
The MFMS degree is a professional degree designed to provide students with depth training in food safety assurance and the use of management systems such as HACCP. The degree is primarily intended for individuals planning careers in food quality assurance or other food safety-related positions in the food industry.

MFMS Admission Requirements
Students seeking entry into the MFMS program must satisfy the minimum admission requirements of the USU School of Graduate Studies and the NFS Department, and must also achieve a score of 3 (equivalent to the 40th percentile) or higher on the newly administered GRE Written Examination. Applications will be reviewed by the MFMS Advisory Committee, which is responsible for accepting students into the MFMS program and assigning them an advisor. The advisor will then consult with the student to select two additional graduate committee members.

MFMS Program of Study
The MFMS program of study has been tailored for students with undergraduate training in (1) food science or (2) microbiology or biology. Students who lack prerequisite competencies in food science, microbiology, or biology will be required to address those deficiencies during the MFMS program of study. Course requirements to meet specific deficiencies will be designated by the student’s advisory committee and, in accordance with School of Graduate Studies policy, may or may not count toward course requirements for the MFMS program of study.

The MFMS program of study, outlined below, requires a minimum of 32 semester credits, including (1) 10 semester credits of core coursework in food safety assurance, microbiology, and epidemiology; (2) at least 19 semester credits of coursework based on the student’s career goals and undergraduate competencies; and (3) the written preparation and oral presentation of a substantive literature review on a food safety topic.

MFMS Program Requirements (32 credits minimum)
Students must complete all of the following courses (12 credits); NFS 6170, 6200, 6900 (2 credits), 7800 (2 credits); BIOL 5850/6850; and PUBH 4030. During NFS 6900 (Special Problems), students will prepare a substantive written literature review of a food safety topic. NFS 7800 (Seminar) must be taken during two semesters; during the final seminar, students must make an oral presentation on the food safety topic used for their literature review.

Students with a BS degree in Food Sciences must demonstrate competency equivalent to a USU BS degree in Nutrition and Food Sciences with a Food Science emphasis. These students must also select a minimum of 10 credits from the following: ADVS 6400; BIOL 5150 (offered biennially), 5300, 5330. The remaining credits should generally be selected from the following, although additional course substitutions may be made with approval of the student’s advisory committee: NFS 6020, 6030, 6120, 6210, 6500, 6510, 6610; NFS 6270, 6670, 6680, 6690 (the preceding four courses are offered biennially); ASTE 6260; CHEM 6730.

Minimum program prerequisites for students with a BS in biology, microbiology, or an equivalent degree include the following (the USU equivalent course is listed in parentheses): biochemistry (CHEM 3700), general microbiology (BIOL 3300), microbial physiology (BIOL 5300), and statistics (STAT 3000). In addition, these students must complete both NFS 6110 and 6500, and must take at least one of NFS 6020 and 6030. The remaining credits should generally be selected from the following, although additional course substitutions may be made with approval of the student’s advisory committee: NFS 6120, 6210, 6510, 6610; NFS 6270, 6670, 6680, 6690, BIOL 5150 (the preceding five courses are offered biennially); ADVS 6400; ASTE 6260; CHEM 6730.

Master of Dietetics Administration (MDA)
The MDA degree is a professional degree designed to provide dietitians with in-depth training in management and leadership in food and nutrition program administration. Nationwide, there is a need for professionally trained managers at local, district, state, and federal levels in food and nutrition programs, including school, university, and hospital food services; public health programs; and clinical management. This program provides in-depth training in financial management, human resource management, marketing, and dietetics-specific management.

MDA Admission Requirements
Candidates for the MDA program must qualify for one of the following categories: Option 1: Must have completed the USU Extension Dietetics Internship; or Option 2: Must be currently registered as a dietitian with at least two years of work experience. Students seeking entry must also satisfy: (1) admission requirements of the USU School of Graduate Studies; (2) admission requirements of the NFS Department; and (3) admission requirements of the MDA program, including a letter of application and an approved Program of Study. For further details, see http://www.nfs.usu.edu/dietetics/programs/mda

The MDA Advisory Committee is responsible for reviewing applications, accepting students into the MDA program, and assigning students to an advisor.

MDA Program of Study
Option 1 is tailored for applicants who have completed the USU Extension Dietetics Internship. Students must complete a minimum of 41 credits and a Plan B thesis. The completed USU Extension Dietetics Internship provides 26 of the 41 credits. Following the internship, 15 additional credits are required including: NFS 6780, 6900 (3 credits), 6970 (2 credits), 7800 (1 credit), and two elective courses to be determined by the MDA candidate and the Advisory Committee.

Option 2 is tailored to the registered dietitian with at least two years of work experience. A minimum of 30 credits is required for this Plan B option. Students must complete 18 credits from the NFS Department and a minimum of 6 credits each in two of the three related disciplines. These disciplines include overall management, financial management, and human resource management. Coursework will be based on the...
Department of Nutrition and Food Sciences

The department offers graduate programs leading to the MS and PhD degrees in nutrition and food sciences. There are many research areas available for graduate study, which are supported by government and private agencies. The graduate student is assigned a faculty mentor who assists him or her in the development of a research proposal. There are many research areas available, including nutrition, food processing, food microbiology, and food biochemistry. The department also offers courses in biochemistry, food science, and food microbiology. The department is located in the Food Science and Nutrition Building, which houses modern laboratories and classrooms. The department is staffed by full-time faculty members, as well as part-time faculty members who are employed by the University. The department is also supported by the USDA and other agencies.

Registration Requirements for Graduate Students

Once admitted, students are required to maintain enrollment as follows: at least 6 credits if on a Graduate Teaching or Research Assistantship (9 credits if employed less than 15 hours per week); at least 9 credits if on a Research Fellowship or unsupported; at least 6 credits if receiving tuition waivers, student loans, or other University-administered financial aid; and no more than 6 credits if employed full time by the University.

Financial Assistance

Some teaching assistantships and research fellowships and many research assistantships are available to graduate students in the Department of Nutrition and Food Sciences. Teaching assistantships are used to cover the teaching needs of the department. Research fellowships and research assistantships are available through individual faculty members. Most research assistantships are tied to specific research projects.

The Gandhi Scholarship is available, on a competitive basis, to support outstanding students during their graduate education in food science. Each incoming student may select any advisor who fits his or her area of interest in food science. Awards are available for entering master’s degree students, as well as for PhD candidates. Applications are due February 1. To obtain an application, visit the Department of Nutrition and Food Sciences website or contact the departmental staff.

Career Opportunities

There is a continuing shortage of MS and PhD graduates in nutrition and food sciences. Many MS graduates go on to obtain a PhD, but all graduates have a wide choice of career opportunities.

Additional Information

Additional information and updates may be obtained by writing or telephoning the Department of Nutrition and Food Sciences directly or by checking out the departmental website at: http://www.usu.edu/nfs

Graduation requirements described in this catalog are subject to change. Students should check with the Department of Nutrition and Food Sciences concerning possible changes.

Nutrition and Food Sciences Faculty

Professors

Jeffrey R. Broadbent, food science, microbial genetics
Charles E. Carpenter, food science, muscle biochemistry and physiology, meat processing
Daren P. Comforth, food science, meat and muscle chemistry
Conly L. Hansen, food science, food engineering

Donald J. McMahon, food science, dairy chemistry and technology
Ronald G. Munger, nutrition, epidemiology, and public health
Ilka Nemere, nutrition, molecular nutrition
Bart C. Weimer, food science, microbial physiology

Clinical Professors

Janet B. Anderson, dietetics, food science management, food safety
Noreen B. Schvaneveldt, dietetics, clinical nutrition

Adjunct Professors

Gary M. Chan, pediatrics
Craig J. Oberg, microbiology

Professors Emeritus

Deloy G. Hendricks
Georgia C. Lauritzen
Von T. Mendenhall
Gary H. Richardson
Ann W. Sorenson
Bonita W. Wyse

Associate Professors

Nedra K. Christensen, nutrition, dietetics
Marie K. Walsh, food science, dairy chemistry

Adjunct Associate Professors

Barbara Chatfield, pediatric pulmonology
Wayne G. Geilman, dairy processing and technology
Paul A. Savello, dairy processing and food science, food laws and regulations, milk ultra high temperature and whitening

Adjunct Research Associate Professor

Laurie J. Moyer-Mileur, pediatric nutrition

Associate Professor Emeritus

Charlotte P. Brennand

Assistant Professors

Silvana Martini, characterization of lipids, sensory evaluation of foods, product development
Brian A. Nummer, biosecurity, food service, food safety, food process development
Robert E. Ward, bioactive nutrients, food and lipid analysis
Heidi J. Wengreen, nutrition, clinical dietetics, epidemiology

Research Assistant Professors

Dong Chen, molecular structure and biochemistry
Carl S. Hansen, agricultural education, waste management

Clinical Assistant Professor

Tamara S. Vitale, dietetics, community nutrition

Adjunct Clinical Assistant Professor

Ann M. Mildenhall, dietetics, director of dietetic internship program

Assistant Professor Emeritus

Frances G. Taylor

Adjunct Assistant Professors

Bradley J. Haack, molecular pathogenesis
Theodore Liou, nutrition, internal medicine, pulmonology
Robert Miceli, molecular assay development, biosensor development, infectious disease, antibody engineering, immune regulation
Department of Nutrition and Food Sciences

Adjunct Clinical Assistant Professor
W. Daniel Jackson, pediatrics

Clinical Instructors
Emily W. Hoffman, dietetics, nutrition, food safety
Kim McMahon, dietetics/food service management

Adjunct Instructors
Catherine McDonald, pediatric nutrition, clinical dietetics
Cynthia Mitchell, dietetics management
Rachel T. Rood, nutrition, registered dietitian

Lecturers
Randall T. Bagley, dairy processing
Virginia C. Bragg, nutrition
Erik T. Burtle, culinary arts/food service management, chef
Grace B. Harvell, culinary arts
Megan Bunch Smith, dietetics
Dick R. Whittier, meat processing
Jeffrey W. Woolley, culinary arts/food service management, chef

Adjunct Clinical Lecturer
Rebecca S. Cole, dietetics/food service management

Course Descriptions
Nutrition and Food Sciences (NFS), pages 676-680.
Office Systems Support AAS Degree

Objective

This 2+2 program, offered only through Continuing Education, leads to an Associate of Applied Science (AAS) degree in Office Systems Support (OSS). This degree is offered through the Center for Independent and Distance Learning (CIDL) at Continuing Education Centers located in Logan, Brigham City, Tooele, and the Uintah Basin. The OSS curriculum reflects the IS 2002 Model Curriculum for undergraduate programs developed by information systems professionals and educators. This degree is designed to prepare students for office positions using the latest office skills and the applications of computer technology for transmitting business information. Although the degree is a two-year program, students who take articulated classes, concurrent enrollment classes, or challenge tests can complete the degree in less than two years.

Admission Requirements

1. New freshmen admitted to USU in good standing qualify for admission to this major.
2. Transfer students from other institutions and from other USU majors need a 2.20 total GPA for admission to this major in good standing.

Degree Requirements

The OSS degree program is a blend of Office Systems Support courses and courses from other departments. Students begin by taking English, communications, mathematics, and microcomputer courses that provide knowledge and skills useful in everyday office work. In addition, they select a number of courses from those approved for University Studies. Classes in English, Sociology, Psychology, Family, Consumer, and Human Development; and Business Administration are recommended. Next, students learn advanced word processing and business correspondence skills needed in today's offices. Students also learn about computers, accounting, and economics. After completing the prerequisite knowledge and skill courses, students are placed in internship positions for on-the-job training.

In completing the minimum 65 credits required in the program, students will complete courses related to their major, such as accounting and information systems. They will also select courses of their own choice. The requirements for this program, including University Studies requirements, are summarized below. Students are urged to visit with their advisor on a regular basis about progress toward the completion of the program.

Career Opportunities

Recent graduates have been employed in various occupations, including Medicare specialist, senior administrative assistant, computer analyst, and as administrative assistants in legal, marketing, and accounting offices.

Academic Advisement

All students should contact their academic advisor for assistance with course selection, program planning, and meeting graduation requirements. If they do not know who their advisor is, students should contact the Continuing Education center through which they are completing their degree.

Graduation Requirements

(65 credits)

All courses completed as part of this program may also be applied toward the requirements for a bachelor's degree. Some classes may have prerequisites. For further information, review this catalog.

University Studies Requirements

(18-19 credits)

Communications Literacy (6 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose (F, Sp, Su) ..................................................3
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode (F, Sp, Su) ................................. 3

Quantitative Literacy (3-4 credits)
MATH 1050 (QL) College Algebra (F, Sp, Su) (4 cr) or MATH 1100 (QL) Calculus Techniques (F, Sp, Su) (3 cr) .............. 3 or 4

Breadth Requirements (9 credits)
Two of the following three classes must have a USU prefix.
Breadth Humanities (BHU) course (USU 1320 recommended) ......... 3
Breadth Life Sciences (BLS) course (USU 1350 recommended) .......... 3
Breadth Physical Sciences (BPS) course (USU 1360 recommended) .... 3

Elective Requirements (4-5 credits)

Major Area Requirements (33 credits)

(2.5 GPA)
ACCT 2010 Survey of Accounting I (F, Sp, Su) ...................................................... 3
BIS 2100 Principles of Management Information Systems (F, Sp, Su) ... 3
BIS 2200 (CI) Business Communication (F, Sp, Su) ............................ 3
BUS 2250 Introductory Internship (pre-approval required) (F, Sp, Su) 3
OSS 1400 Microcomputer Applications (F, Sp, Su) (3 cr) or OSS 1410 Special Topics: Basic Computer Concepts (3 cr) .......... 3
OSS 1420 Word Processing Applications ................................................. 3
OSS 1550 (CI) Business Correspondence ..................................................... 3
OSS 2300 Data Communications and Networking (F, Sp) .................. 3
OSS 2400 Web Design Applications (F, Sp, Su) ................................. 3
OSS 2520 Integrating Office Technology ...................................................... 3
OSS 2600 Office Procedures ................................................................. 3

Related Area Requirements (9 credits)

Students must also take 9 or more credits from the following recommended courses. Students must choose from at least two areas.

Accounting
ACCT 1500 Accounting Software for Small Business Applications ...... 3
ACCT 2020 Survey of Accounting II (F, Sp, Su) ................................. 3
ACCT 3110 Intermediate Financial Accounting and Reporting I (F, Sp, Su) ................................................................. 3
Office Systems Support AAS Degree

Business Information Systems
BIS 3330 Database Management (F,Sp) ............................................. 3

Office Systems Support
OSS 1410 Special Topics (F,Sp,Su) .................................................. 1-3
OSS 2450 Spreadsheets and Databases (F,Sp,Su) .................................. 3
OSS 2500 Visual Basic Applications (F,Sp) ........................................ 3

Communications/Speech/Engineering and Technology Education
JCOM 1500 (BSS) Introduction to Mass Communication (F,Sp) ........... 3
JCOM 2300 Introduction to Public Relations (F,Sp) .......................... 3
SPCH 1020 (CI) Public Speaking (F,Sp) ......................................... 3
SPCH 2110 (CI) Interpersonal Communication (F,Sp) ....................... 3
ETE 1010 Communications Technology (F) ...................................... 3

General Business
BA 1350 Introduction to Business (F) .............................................. 3
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp) .......................................................... 3
MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su) ....... 3
MHR 3110 Managing Organizations and People (F,Sp,Su) ................. 3
MHR 3710 Developing Team and Interpersonal Skills (F,Sp) ............. 3
PSY 1010 (BSS) General Psychology (F,Sp,Su) ............................... 3

Computer Science
CS 1030 (BPS) Foundations of Computer Science, and the Application of Computer Science to the Investigation of Physical Systems and Phenomena (F,Sp,Su) ................................................. 3
CS 3500 (DSC/QI) Algorithm Development: Visual BASIC/Graphical User (Su) ................................................................. 3

Department of Physics

Department Head: Jan J. Sojka
Location: Science Engineering Research 250A
Phone: (435) 797-2848
FAX: (435) 797-2492
E-mail: physics@cc.usu.edu
WWW: http://www.physics.usu.edu/

Assistant Department Head:
Charles G. Torre, Science Engineering Research 232, (435) 797-3426, charles.torre@usu.edu

Academic Advisor:
Karalee Ransom, Science Engineering Research 250D, (435) 797-4021, karalee.ransom@usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), and Doctor of Philosophy (PhD) in Physics; BS in Physics Teaching; BS in Composite Teaching—Physical Science

Undergraduate emphases: BS—Professional Emphasis or Applied Emphasis

Graduate specializations: Atomic Physics, Electromagnetic Theory, Industrial Physics (MS only), Medium Energy Nuclear Physics, Space Science, Surface Physics, Theoretical Physics, Upper Atmospheric Physics (MS only)

Undergraduate Programs

Objectives

The Physics Department embraces undergraduate students from all quarters of the University—in introductory courses required for majors by various departments, in courses for more general audiences that are part of the University Studies Program, and in upper-level courses designed primarily to fulfill bachelor's degree requirements in Physics. These courses, and the degree programs offered, are strongly impacted by the department's central goals:

1. to communicate the beauty and utility of the fundamental principles of the physical universe and the power of describing nature in quantitative terms,
2. to create new knowledge,
3. to foster critical and creative thinking,
4. to enhance the ability of citizens to participate in a technological democracy,
5. to assist in the preparation of elementary and secondary school teachers,
6. to provide opportunities for students to sharpen their communication and interpersonal skills, and
7. to develop new tools and texts to improve physics pedagogy.

The degree programs of the department are constructed to be rigorous, yet flexible, and are intended to help students prepare for careers in academia, government and industrial laboratories, medicine, law, teaching, and business. Required course and laboratory work in these programs carefully balances theory and experiment.

Because the department believes that one must participate in discovery to understand science, undergraduates are encouraged to engage in departmental research early in their studies, and a formal research experience is integral to most departmental programs. The department's Microgravity Research Team (MRT) activities provide excellent opportunities for students of all backgrounds to participate in space-related research.

Requirements

Departmental Admission and Graduation Requirements

New freshmen admitted to USU in good standing qualify for admission to the degree programs in Physics. Admission in good standing for students transferring from another institution requires a minimum transfer GPA of 2.2, while students transferring from another USU major are required to have a minimum total GPA of 2.0. Students wishing to complete the Teaching Major in Physics must apply for admission to the Secondary Education program as well. Requirements for admission to the Secondary Teacher Education Program (STEP) include a minimum GPA of 2.75 in either PHYS 2110 and 2120, or PHYS 2210 and 2220; and at least 60 total credits completed with a minimum GPA of 2.75. A Composite Teaching Major in Physical Science is available through either the Physics or the Chemistry and Biochemistry departments. Students applying for admission to the STEP with the Composite major must satisfy the latter requirements, plus a minimum GPA of 2.75 in CHEM 1210, 1215, 1220, and 1225.

Students may use no more than one course with the P-D-F option to satisfy a major or minor requirement in Physics. All other courses used to satisfy major or minor requirements must be completed with at least a C- grade, and the total GPA in all required Physics courses must be at least 2.3. The Teaching Major and Teaching Minor in Physics and the Composite Teaching Major in Physical Science require a 2.75 minimum GPA in Physics courses and a minimum 2.75 overall GPA for graduation.

College of Science Requirements

The College of Science requires a year of mathematics (8 credits) and a year sequence in science (6-8 credits) for all of its majors. For Physics majors, the College of Science requirements are:

MATH 1210 (QL) Calculus I, (F,Sp,Su) ...........................................4
MATH 1220 (QL) Calculus II (F,Sp,Su) ...........................................4
Choose one of the following pairs of courses:
BIOL 1610 Biology I (F) (4 cr) and BIOL 1620 (BLS) Biology II (Sp) (4 cr) ...........................................8
Or
CHEM 1210 Principles of Chemistry I (F,Sp) (4 cr) and CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) (4 cr) .............8
Or
GEO 1110 (BPS) The Dynamic Earth: Physical Geology (F,Sp) (4 cr) and GEO 3200 (DSC) The Earth Through Time (Sp) (4 cr) .................8

Bachelor's Degrees and Core Requirements

The Physics Department awards the following degrees: BS in Physics, BA in Physics, BS in Physics with a Professional Emphasis, BS in Physics with an Applied Emphasis, BS in Mathematics and Physics Dual Major Option, BS in Physics Teaching, and BS in Composite Teaching—Physical Science.
Department of Physics

Except for the two Teaching Majors, all degrees require a common core (42 credits):

A. College of Science Requirements (16 credits)

B. Required Physics Courses (23 credits)

PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) and
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr) .................................................8
Or (PHYS 2210, 2220 preferred; or PHYS 2110, 2120)
PHYS 2110 The Physics of Living Systems I (4 cr) and
PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) .................................................................8

PHYS 2500 Introduction to Computer Methods in Physics .................................................2
PHYS 2710 Introductory Modern Physics .................................................................3
PHYS 3550 Intermediate Classical Mechanics .................................................3
PHYS 3600 Intermediate Electromagnetism (3 cr) or
ECE 3870 Electromagnetics I (F,S) .........................................................3
PHYS 3870 (CI) Intermediate Laboratory I .........................................................2
PHYS 4900 (CI) Research in Physics .................................................................2

Note: A new course in systems analysis is currently under discussion. For details, students should contact the Physics Department.

C. Required Mathematics Course (3 credits)

MATH 2210 (QI) Multivariable Calculus (F,S) .....................................................3

The specific requirements beyond this core for the various bachelor's degrees are:

1. Bachelor of Science Degree in Physics (15 credits)

MATH 2250 (QI) Linear Algebra and Differential Equations (F,S) .................................................4
PHYS 3710 Intermediate Modern Physics .................................................................3
PHYS 3700 Thermal Physics (3 cr) or
PHYS 4650 Optics I (3 cr) ........................................................................3
Courses in Physics at the 3500 level and above (not to include PHYS courses designed as University Studies depth courses) .................................................5

2. Bachelor of Arts Degree in Physics (32 credits)

MATH 2250 (QI) Linear Algebra and Differential Equations (F,S) .................................................4
PHIL 4310 (DHA) Philosophy of Science (Sp) .................................................................3
PHIL 4320 (DHA) History of Scientific Thought (Sp) .........................................................3
Courses in Physics at the 3500 level and above (not to include PHYS courses designed as University Studies depth courses) .................................................6
Two years training (or equivalent) in a foreign language .................................................16

3. Bachelor of Science Degree in Physics with a Professional Emphasis (29 credits)

MATH 2250 (QI) Linear Algebra and Differential Equations (F,S) .................................................4
PHYS 3700 Thermal Physics .................................................................3
PHYS 3710 Intermediate Modern Physics .................................................................3
PHYS 3750 Foundations of Wave Phenomena .................................................................3
PHYS 3880 (CI) Intermediate Laboratory I .........................................................2
PHYS 4600 Advanced Electromagnetism .................................................................3
PHYS 4650 Optics I ..................................................................................3
PHYS 4700 Quantum Mechanics I .................................................................3
PHYS 4710 Quantum Mechanics II .................................................................3
PHYS 4900 (CI) Research in Physics .................................................................2

4. Bachelor of Science Degree in Physics with an Applied Emphasis (24 credits)

MATH 2250 (QI) Linear Algebra and Differential Equations (F,S) .................................................4
PHYS 3700 Thermal Physics .................................................................3
PHYS 3880 (CI) Intermediate Laboratory I .........................................................2
PHYS 4650 Optics I ..................................................................................3
Courses in other technical departments at the 3000 level or above
(not to include courses designated as University Studies depth courses). Selected courses must have a coherent theme and must be approved by the Physics Department .................................................12

5. Mathematics and Physics Dual Major Option

By fulfilling all degree requirements for any two separate majors, it is possible for a student to receive a diploma having two majors listed. Because most physics majors are required to complete a minimum of 14 credits in mathematics courses, many students elect to complete the requirements for a BS degree in mathematics, as well as the requirements for their physics degree.

Suggested Four-year Course of Study for Bachelor of Science Degree in Physics

The suggested schedule shown below should be used in conjunction with the major requirement sheet. Students should consult with their advisor to develop an individualized plan of study that is applicable to their interests and degree track.

Prior to enrolling in MATH 1220 (Calculus II), students must have completed MATH 1210 (Calculus I) with a grade of C- or better, or must have received an AP score of at least 4 on the Calculus AB exam or at least 3 on the Calculus BC exam.

Freshman Year (30 credits)

Fall Semester (15 credits)

PHYS 2210 (QI) General Physics—Science and Engineering I .................................................4
MATH 1220 (QL) Calculus II .................................................................4
College of Science sequence requirement .................................................................4
University Studies Breadth course .................................................................3

Spring Semester (15 credits)

PHYS 2220 (BPS/QI) General Physics—Science and Engineering II .................................................4
MATH 2250 (QI) Linear Algebra and Differential Equations .................................................4
PHIL 4310 (DHA) Philosophy of Science .................................................................3
PHIL 4320 (DHA) History of Scientific Thought .................................................................3
University Studies Breadth course .................................................................3
Elective course ..................................................................................1

Sophomore Year (30 credits)

Fall Semester (15 credits)

PHYS 2500 Introduction to Computer Methods in Physics .................................................2
PHYS 2710 Introductory Modern Physics .................................................................3
MATH 2250 (QI) Linear Algebra and Differential Equations .................................................4
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .........................................................3
University Studies Breadth course .................................................................3

Spring Semester (15 credits)

Minor in Physics

Majors in other departments may obtain a minor in physics by successfully completing the following courses:
PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) and
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr) ................................................. 8
Or (PHYS 2210, 2220 preferred; or PHYS 2110, 2120)
PHYS 2110 The Physics of Living Systems I (4 cr) and
PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) ................................................................. 8
To obtain a physics minor, students must also select 10 additional credits from PHYS courses at the 2500 level and above (not to include PHYS courses designated as USU Depth courses). Note that MATH 1100 or 1210 is a prerequisite for PHYS 2110, MATH 1210 is a prerequisite for PHYS 2210, and MATH 1220 is a prerequisite for PHYS 2710.

Bachelor of Science in Physics Teaching

In addition to the College of Science requirements, courses required for the Bachelor of Science in Physics Teaching include the following:
Department of Physics

MATH 1210 (QL) Calculus I (F,Sp,Su) ................................................. 4
MATH 1220 (QL) Calculus II (F,Sp,Su) ............................................. 4
MATH 2250 (Q) Linear Algebra and Differential Equations (F,Sp,Su) ................................................................. 4
STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) ................................. 3

PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) and
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr) ................................................................. 8
Or (PHYS 2210, 2220 preferred; or PHYS 2110, 2120)
PHYS 2110 The Physics of Living Systems I (4 cr) and
PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) ..................... 8

PHYS 1040 (BPS) Introductory Astronomy ........................................ 3
PHYS 2500 Introduction to Computer Methods in Physics ................. 2

Freshman Year (30 credits)
Fall Semester (15 credits)
PHYS 2210 (QI) General Physics—Science and Engineering I ............ 4
MATH 1220 (QL) Calculus II .............................................................. 4
General Science sequence requirement ............................................. 4
University Studies Breadth course .................................................. 3

Spring Semester (15 credits)
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II .... 4
MATH 2250 (QI) Linear Algebra and Differential Equations .............. 4
General Science sequence requirement ............................................. 4
University Studies Breadth course .................................................. 3

Sophomore Year (33 credits)
Fall Semester (17 credits)
PHYS 1040 (BPS) Introductory Astronomy ....................................... 3
PHYS 2500 Introduction to Computer Methods in Physics ................. 2

PHYS 2710 Introductory Modern Physics ......................................... 3
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ............... 3
STAT 3000 (QI) Statistics for Scientists ........................................... 3
University Studies Breadth course .................................................. 3

Spring Semester (16 credits)
PHYS 3710 Intermediate Modern Physics ....................................... 3
General Science requirement ......................................................... 4
University Studies Breadth courses ............................................... 6
University Studies Depth course .................................................... 3
Apply for STEP (Secondary Teacher Education Program)

Junior Year (31 credits)
Fall Semester (17 credits)
PHYS 3710 (CI) Intermediate Laboratory I .................................... 2
PHYS elective course at 3000-level or higher .................................. 3
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ..................................................... 3
General Science requirement ......................................................... 4
University Studies Breadth course .................................................. 3

Spring Semester (16 credits)
PHYS elective course at 3000-level or higher .................................. 2
University Studies Breadth course .................................................. 3
STEP Level 1 courses ..................................................................... 11

Senior Year (29 credits)
Fall Semester (17 credits)
SCI 4300 Science in Society ............................................................ 2
University Studies Depth course ..................................................... 3
STEP Level 2 courses ................................................................... 12

Spring Semester (12 credits)
STEP Level 3 Student Teaching ...................................................... 12

Bachelor of Science Degree in Composite Teaching—Physical Science (91-92 credits)
Courses required for the Bachelor of Science in Composite Teaching—
Physical Science include the following:
MATH 1210 (QL) Calculus I (F,Sp,Su) ............................................. 4
MATH 1220 (QL) Calculus II (F,Sp,Su) ........................................... 4
STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) ................................. 3

PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) and
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr) ................................................................. 8
Or (PHYS 2210, 2220 preferred; or PHYS 2110, 2120)
PHYS 2110 The Physics of Living Systems I (4 cr) and
PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) ..................... 8

PHYS 1040 (BPS) Introductory Astronomy ........................................ 3
PHYS 1080 (BPS) Intelligent Life in the Universe (sometimes listed as USU 1360, ST: Intelligent Life in the Universe) (3 cr) or
PHYS 3030 (QI) The Universe (3 cr) ............................................... 3
Courses in Physics from PHYS courses at the 2500 level and above
(including USU Depth courses) ..................................................... 5

CHEM 1210 Principles of Chemistry I (F,Sp) ................................... 4
CHEM 1215 Chemical Principles Laboratory I (F,Sp) ....................... 1
CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) ................. 4
CHEM 1225 Chemical Principles Laboratory II (F,Sp) ..................... 1
CHEM 2300 Principles of Organic Chemistry (F) (3 cr) or
CHEM 2310 Organic Chemistry I (F) (4 cr) ..................................... 3 or 4
CHEM 2315 Organic Chemistry Laboratory I (F) ........................... 1

BIOl 1010 (BLS) Biology and the Citizen (F,Sp,Su) ............................. 3
Department of Physics

GEO 1110 (BPS) The Dynamic Earth: Physical Geology (F,Sp) ............ 4
BMET 2000 (BPS) The Atmosphere and Weather (F,Sp) ...................... 3
SCI 4300 Science in Society (F,Sp) ................................................... 2

Students seeking this degree must complete the requirements for the Secondary Teacher Education Program (STEP). Admission to the STEP with this major requires a minimum GPA of 2.75 in either PHYS 2110 and 2120 or PHYS 2210 and 2220, in addition to Department of Secondary Education requirements.

Students who may wish to teach Integrated Science at the middle or junior high school level should talk to their advisor about completing the courses necessary for an Integrated Science endorsement.

Note: Beginning in 2006, all USU teacher education candidates will be required to take and pass the content exam approved by the Utah State Office of Education in their major content area prior to student teaching.

Suggested Four-year Course of Study for Bachelor of Science Degree in Composite Teaching—Physical Science

The suggested schedule shown below should be used in conjunction with the major requirement sheet. Students should consult with their advisor to develop an individualized plan of study that is applicable to their interests and degree track.

Prior to enrolling in MATH 1220 (Calculus II), students must have completed MATH 1210 (Calculus I) with a grade of C- or better, or must have received an AP score of at least 4 on the Calculus BC exam or at least 3 on the Calculus AB exam.

Freshman Year (31 credits)

Fall Semester (15 credits)
PHYS 2210 (QI) General Physics—Science and Engineering I ........... 4
MATH 1220 (QL) Calculus II ......................................................... 4
PHYS 1220/USU 1360 (BPS) Intelligent Life in the Universe ......... 3
University Studies Breadth course .................................................. 3
Elective course ............................................................................. 1

Spring Semester (16 credits)
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II .................................................. 4
STAT 3000 (QI) Statistics for Scientists ....................................... 4
BIOL 1010 (BLS) Biology and the Citizen .................................... 3
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ......... 3
University Studies Breadth course .................................................. 3

Sophomore Year (32 credits)

Fall Semester (18 credits)
PHYS 1000 (BPS) Introductory Astronomy .................................. 3
GEO 1110 (BPS) The Dynamic Earth: Physical Geology .............. 4
BMET 2000 (BPS) The Atmosphere and Weather ....................... 3
CHEM 1210 Principles of Chemistry I .................................... 4

Senior Year (24 credits)

Fall Semester (12 credits)
STEP Level 2 courses ............................................................... 12

Spring Semester (12 credits)
STEP Level 3 Student Teaching ................................................... 12

Teaching Minor in Physics

Students who complete the Secondary Teacher Education Program (STEP) are eligible to obtain a Teaching Minor in Physics by successfully completing the following courses:

PHYS 1000 (BPS) Introductory Astronomy .................................. 3

PHYS 2110 The Physics of Living Systems I (4 cr) and ................. 3
PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) .......... 8

PHYS 2220 (QI) General Physics—Science and Engineering I (4 cr) and ................. 4
PHYS 2210 (QI) General Physics—Science and Engineering II (4 cr) .......... 8

Courses in Physics chosen from PHYS 2500 and/or courses above the 3000 level (including USU Depth courses) ......................... 6

SCI 4300 Science in Society (F,Sp) (2 cr) or 
Science course (not including Physics) not required by the major, if SCI 4300 is required by the student’s major .................... 2

Note: MATH 1100 or 1210 is a prerequisite for PHYS 2110, 
MATH 1210 is a prerequisite for PHYS 2210, and MATH 1220 is a prerequisite for PHYS 2710.

In addition, the Teaching Minor in Physics requires completion of the Secondary Teacher Education Program (STEP). Admission to the STEP with this major requires a minimum GPA of 2.75 in either PHYS 2110 and 2120, or PHYS 2210 and 2220, in addition to Department of Secondary Education requirements.

Secondary Teacher Education Program (STEP)

(35 credits)

Level 1 (11 credits)
SCED 3100 Motivation and Classroom Management (F,Sp) .......... 3
SCED 3210 (CI/DSS) Educational and Multicultural Foundations (F,Sp) .......... 3
SCED 3300 Clinical Experience I (40 hours minimum) (F,Sp) ......... 1
SCED 3400 Teaching Science I (F,Sp) ........................................... 3
INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su) ........ 1
Department of Physics

Level 2 (12 credits)
SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) ............... 3
SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) ...... 3
SCED 4300 Clinical Experience II (40 hours minimum) (F,Sp) .......... 1
SCED 4400 Teaching Science II (F,Sp) ....................................... 3
SPED 4000 Education of Exceptional Individuals
(may be taken at any time) (F,Sp,Su) ........................................... 2

Level 3 (12 credits)
SCED 5500 Student Teaching Seminar (2 weeks) (F,Sp) ............... 2
SCED 5630 Student Teaching in Secondary Schools
(13 weeks, full-time) (F,Sp) ..................................................... 10

*Science methods courses (SCED 3400 and 4400) may only be taught once per year. Therefore, students should take whichever one is taught during the term they are in Level 1 or Level 2.

Undergraduate Research Opportunities
The Physics Department at Utah State University has a long record of successfully involving its undergraduate students in research and extracurricular scholarly activities. Learning what science is requires more than just doing homework and taking exams; it requires getting involved in the pursuit of knowledge that is not yet in any textbook. Undergraduates can take PHYS 4900 (Research in Physics) for academic credit. However, many students participate in research activities without credit, because they enjoy being immersed in the act of discovery. Having a meaningful research experience and working closely with faculty are useful for applying for employment, admission to graduate schools, and applying for competitive scholarships. For more information, contact David Peak at david.peak@usu.edu, or visit the following website:
http://www.physics.usu.edu/research/undergrad.html

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Learning Objectives
The Physics Department has the following learning objectives. While many of these objectives are applicable to all six departmental programs, some apply only to specific programs. To see which program(s) include that objective, see the footnotes which follow.

1. Capable communication, written and oral
2. Skepticism
3. Ability in critical thinking and problem solving
4. Knowledge of physics subjects to an advanced undergraduate level
5. Wide knowledge of physics subjects to an advanced undergraduate level
6. Knowledge of focused applied areas of study to the undergraduate level
7. Experience in experimental physics
8. Experience in physics research
9. Knowledge of computer methods in physics
10. Knowledge of broadening subjects
11. Knowledge of mathematics to undergraduate calculus level
12. Knowledge of mathematics to undergraduate differential equations level
13. Knowledge of statistics to undergraduate level
14. Knowledge of philosophy of science to the undergraduate level
15. Knowledge of a foreign language to the undergraduate level

Programs:
The footnotes following each of the preceding learning objectives indicate which program(s) include that objective. The six undergraduate programs are as follows:

1BA degree in physics
2BS degree in physics
3BS degree in physics with professional emphasis
4BS degree in physics applied emphasis
5BS degree in physics teaching
6BS degree in composite teaching

Assessment
The principal assessment tools of the Physics Department are (1) an exit interview, which is conducted by the department head with all graduating seniors; and (2) follow-up on the work or advanced education of all graduating seniors. The department also makes special note of awards and honors received by students having majors within the department. At the annual departmental retreat (as well as at faculty meetings), faculty members conduct a careful review of any deficiencies in departmental programs. If it is perceived and agreed that these deficiencies are real, and if departmental resources are available to remedy them, then the department undertakes steps to modify their teaching program in order to address the problems. Details of the assessment plan can be found at the following website:
http://www.physics.usu.edu/teaching/assessment.html
Financial Support

The Physics Department has several small scholarship funds available for physics majors with excellent academic records. In addition, there are a number of Microgravity Research Team (MRT) scholarships for students interested in designing and constructing experiments to be flown in space and in participating in other MRT activities. Inquiries should be made with the Physics advisor in SER 250.

Additional Information

Information concerning degree programs, recommended schedules of courses, career opportunities, and opportunities to participate in the Microgravity Research Team (MRT) activities and in other areas of undergraduate research may be obtained by consulting the Physics advisor in SER 250. Also see the department’s website at: http://www.physics.usu.edu/

Major requirement sheets, which provide details of undergraduate programs in physics, can be obtained from the department, or online at: http://www.usu.edu/ats/majorsheets/

Graduate Programs

Admission Requirements

In addition to the general requirements for admission established by the School of Graduate Studies (see pages 104-106), the department admission committee bases its decisions for offering admission on the following criteria: review of applicants’ undergraduate records, letters of recommendation, performance in graduate courses (if any), performance in research (if any), and scores on the General portion of the Graduate Record Examination. Students whose native language is not English are strongly encouraged to submit to the School of Graduate Studies results of the Test of Spoken English (TSE). Regardless, nonnative English speakers must submit a score for the Test of English as a Foreign Language (TOEFL). If a satisfactory score on the TSE is not provided, such students will be required to take a test given by the Intensive English Language Institute (IELI) at USU. The purpose of this test is to guide the selection of remedial language courses, if needed, to help with physics coursework comprehension. (See also Financial Assistance, page 458.)

Placement

Prior to registering for graduate courses for the first time, each student will consult with the Graduate Student Tracking Committee and the departmental advisor. Based on these discussions, the student will be advised to register for courses in either the Physics Department standard curriculum or advanced curriculum. Continuing advisement concerning courses will be provided by the Graduate Student Tracking Committee, the departmental advisor, and the student’s graduate supervisory committee.

Qualification Requirements

Each student enrolled in the PhD program will be evaluated for qualification for PhD work. Consideration of qualification will occur no later than the end of the second semester after the student has been admitted for study in the PhD program and has taken a first graduate course in physics. Evaluation will be based on whatever relevant information the student wishes to have presented on his or her behalf (coursework, research, TA performance, subject GRE, etc.), but must include a faculty evaluation of coursework in physics for courses taken at USU. Normally, the student should present the results of at least four physics courses. Students admitted to the PhD program with considerable coursework from another institution, who have not taken at least four courses in physics at USU, must present a qualification seminar to the Department of Physics on research he or she has done during the preceding year at USU. Based on the various pieces of information presented on behalf of the student, the department will judge whether or not the student is qualified to continue in the PhD program. If not, a student already having an MS in physics from USU will be asked to leave. A student without an MS in physics from USU will be invited to finish his or her MS degree. Upon completion, the student can reapply to the PhD program, but acceptance will be contingent on the evaluation of the student’s graduate work to that point.

Degree Programs

Master of Science

In addition to the above general requirements, students completing a Plan A MS degree must complete four of the nine required PhD courses listed below (see Doctor of Philosophy). Plan B MS students must complete five of the nine courses, and Plan C MS students must complete six of the nine courses. Each student is required to pass PHYS 5800 (Physics Colloquium) for four consecutive semesters, beginning with the first semester after matriculation. The student must also submit and orally defend either a thesis (Plan A) or a research report (Plan B) at the discretion of the student’s supervisory committee. Plan A and Plan B MS candidates must present a colloquium to the department on the research topic during the time the thesis or research report is being written. The department also accepts Plan C, which has no research component. For Plan C, the student must complete 33 credits of graduate-level classwork, the composition of which shall include the required courses listed above. In addition, the student must present a seminar and a paper to his or her supervisory committee on a topic related to educational or managerial aspects of physics graduate education, which is chosen by his or her supervisory committee.

Master of Science (Upper Atmospheric Physics Specialization)

The department offers a specialization in Upper Atmospheric Physics for MS students. This degree is a Plan A MS. In consultation with his or her advisor, the student selects a minimum of 18 credits of classwork from the following courses:

- PHYS 4600 Advanced Electromagnetism ........................................ 3
- PHYS 6240 Space Environment and Engineering .......................... 3
- PHYS 6310 Solar-terrestrial Physics I ......................................... 3
- PHYS 6320 Solar-terrestrial Physics II ....................................... 3
- PHYS 6330 Plasma Physics I .................................................. 3
- PHYS 6340 Plasma Physics II .............................................. 3
- PHYS 7210 Spacecraft Instrumentation (Sp) .............................. 3
- PHYS 7500 Advanced Topics in Physics (Topic) .......................... 3

Three to six additional credits may be chosen from courses in electrical engineering, computer science, mathematics, and biometeorology. The student may gain from 6 to 12 credits by research, to be written up as a thesis that must be defended orally. In addition, the student must present a colloquium on the topic of his or her research.

Doctor of Philosophy

In addition to the general requirements, a total of nine courses (27 credits) are required for all PhD students. The required courses are:
The State of Matter requirement can be fulfilled by taking any one of Two courses in Advanced Topics ........................................................... PHYS 6110

Utah State University 2006-2007 General Catalog

International Thermonuclear Experimental Reactor (ITER). In addition, Dr. Held is involved in developing improved hybrid fluid/kinetic collaborative effort between Dr. Farrell Edwards and Dr. Eric Held. In neutron and energy sources and are being developed as a substantial electric fields. These configurations hold promise realization of minimum-energy confinement configurations possessing.

The State of Matter requirement can be fulfilled by taking any one of Two courses in Advanced Topics ........................................................... PHYS 6110

The student must also complete a research dissertation and give an oral defense of the dissertation. Furthermore, the PhD candidate is expected to give two colloquia to the department. The first of these will normally be given at the time of submission of the research proposal, with the other given at the time the dissertation is completed.

Research

Space Science

The Physics Department is active in the field of atmospheric and space science, in close association with the interdisciplinary Center for Atmospheric and Space Sciences and the Space Dynamics Laboratory. Atmospheric and space science involves many areas of physics, in addition to such disciplines as engineering, chemistry, and meteorology. At USU, these groups enjoy a strong cooperative relationship and, as a result, the atmospheric and space science program has flourished for many years. Once the departmental requirements have been met, students may select courses from the offerings of the associated departments suited for their particular interests and needs while they gain research experience on challenging problems in atmospheric and space science. Opportunities are available for students in both experimental and theoretical projects. These include participation in instrument development and data analysis related to rocket, satellite, and space shuttle projects and projects in experimental design and data analysis related to incoherent-scatter and coherent radars, ground-based magnetometer, and ground-based optical instruments including a LIDAR system. Opportunities also exist in theoretical modeling of physical processes occurring in both the neutral atmosphere and in the plasma in the solar-terrestrial environment.

Plasma Theory and Confinement

Research in the field of magnetic confinement fusion at Utah State University includes the theoretical development and experimental realization of minimum-energy confinement configurations possessing substantial electric fields. These configurations hold promise as neutron and energy sources and are being developed as a collaborative effort between Dr. Farrell Edwards and Dr. Eric Held. In addition, Dr. Held is involved in developing improved hybrid fluid/kinetic models for terrestrial and astrophysical plasmas. This work provides theoretical support for next-step fusion experiments such as the International Thermonuclear Experimental Reactor (ITER).
of granular materials, liquid flow in fractured media, and development of new data analysis techniques for uncovering evidence for determinism and computation in biological systems.

Financial Assistance

Financial assistance in the form of teaching assistantships and fellowships is awarded by the department. Research assistantships are available from research groups or individuals. Some support for teaching laboratory sections or grading papers is available. To be eligible for a teaching assistantship (TA), a student must successfully complete a graduate TA workshop. Nonnative English-speaking students must pass a test of spoken English (or submit a satisfactory TSE score) administered by the Intensive English Language Institute before being admitted to the TA workshop. The MS specialization in Upper Atmospheric Physics is a Western Regional Graduate Program (see page 98).

Career Opportunities

Master’s degree holders in physics are generally employed by industrial or government laboratories as either physicists or engineers. Some are hired as teachers by high schools and by two-year colleges. Holders of the PhD in physics will generally be hired as research and development physicists by industrial or government laboratories and as professors in universities (though usually only following an appointment as a postdoctoral fellow for one to three years).

Additional Information

Regularly updated information about Physics Department activities and programs may be obtained via the Web at: http://www.physics.usu.edu/

Physics Faculty

Professors
J. R. Dennison, surface physics
W. Farrell Edwards, electromagnetic and plasma theory
Bela G. Fejer, space plasma physics
David Peak, nonlinear dynamics, complex materials
Robert W. Schunk, space plasma physics
Jan J. Sojka, atmospheric and space physics
Michael J. Taylor, atmospheric and space physics
Charles G. Torre, mathematical and gravitational physics
Vincent B. Wickwar, atmospheric and space physics

Research Professors
F. Tom Berkey, atmospheric and space physics
Kent L. Miller, atmospheric physics
Thomas D. Wilkerson, atmospheric and space physics

Adjunct Professors
Stephen E. Bialkowski, nonlinear optics and laser spectroscopy
Yeaton H. Clifton, mathematical physics
Raymond DeVito, medical physics
Leonard F. Hall, structure forming systems
Allen Q. Howard, electromagnetic theory
R. Gilbert Moore, space physics
David Rees, atmospheric physics
Ray W. Russell, astronomy
Neal D. Shinn, surface interface physics
John R. Tucker, device physics and superconductivity

Professors Emeritus
Wilford N. Hansen, reflection spectroscopy, surface physics
Eastman N. Hatch, nuclear physics
Don L. Lind, space physics
V. Gordon Lind, medium energy nuclear physics
William R. Pendleton, Jr., atomic and molecular physics
W. John Raith, space plasma physics
John K. Wood, spectroscopy

Associate Professors
Eric D. Held, plasma physics
D. Mark Riffe, surface physics
Tsung-Cheng Shen, surface physics, nanotechnology
James T. Wheeler, mathematical physics and general relativity

Research Associate Professors
Abdallah R. Barakat, space plasma physics
Howard G. Demars, space physics
Timothy E. Doyle, random and disordered systems
J. Steven Hansen, image processing
Lie Zhu, space physics

Adjunct Associate Professors
K. S. Balasubramanian, solar physics
I. Lee Davis, condensed matter physics
Hugo deGaris, artificial intelligence
James S. Dyer, space contamination and outgassing
Jill A. Marshall, physics education
David J. Vieira, nuclear physics
Vladimir Zavyalov, condensed matter physics

Associate Professor Emeritus
Robert E. McAdams, nuclear physics

Assistant Professor
Haeyeon Yang, surface physics, nanotechnology

Adjunct Assistant Professor
Jeremy R. King, astrophysics

Lecturer
Tonya B. Triplet, physics education

Course Descriptions

Physics (PHYS), page 689-691.
Department of Plants, Soils, and Biometeorology

Department Head: Larry A. Rupp  
Location: Agricultural Science 322C  
Phone: (435) 797-2233  
FAX: (435) 797-3376  
E-mail: larry.rupp@usu.edu  
WWW: http://www.pb.s.usu.edu

Undergraduate Advisor:  
M. Cathryn Myers-Roche, Agricultural Science 322, (435) 797-5560, cmyers@mendel.usu.edu

Undergraduate Off-Campus Advisor:  
Donna B. Minch, Farmington, (801) 451-4604, minch@siana.com

Graduate Program Coordinator:  
Paul G. Johnson, Agricultural Science 306, (435) 797-7039, paul.johnson@usu.edu

Degrees Offered: Bachelor of Science (BS) and Bachelor of Arts (BA) in Crop Science, Horticulture, Environmental Soil/Water Science; Master of Science (MS), and Doctor of Philosophy (PhD) in Biometeorology, Plant Science, Soil Science, and Ecology; Master of Professional Studies in Horticulture (MPSH)

Undergraduate emphases: Crop Science BS, BA—Agronomy, Research/Biotechnology; Horticulture BS, BA—Ornamental Horticulture, Landscape Maintenance and Construction, Turfgrass Management, Business, Science; Environmental Soil/Water Science BS, BA—Soil, Water, Plant

Certificate and Associate Degree Program: Ornamental Horticulture

Undergraduate Programs

Objectives

The departmental curricula emphasize understanding the physical, chemical, and biological mechanisms that operate in the continuum of the soil, plants, and the atmosphere; and how they impact management of a wide range of agricultural and natural systems.

The undergraduate teaching program facilitates the acquisition and application of knowledge, understanding, and skills by students within their chosen field of study. The program also prepares students to develop lifelong learning skills, understand and appreciate diversity, be productive citizens of the world, and be professionals in their vocations.

The department also provides training of undergraduates for graduate school and maintains a strong graduate program in biometeorology, plant science, and soil science. The research that underlies the graduate program is conducted in biometeorology (micro- and meso-scale), crop biotechnology, crop ecology, crop physiology, crop science, horticulture (general and ornamental), plant breeding, soil microbiology, pedology, soil chemistry, soil physics, soil fertility, environmental soil and water science, and arid landscaping.

A major effort is directed at extending research and teaching programs to all citizens of the State of Utah.

Departmental Facilities

To support these objectives, departmental facilities include well-equipped laboratories and greenhouses on campus. The University has significant acreage for field research at strategic locations throughout the state. In addition, the University is developing a botanical garden, which will offer opportunities to a broad spectra of clientele. The department maintains state-of-the-art analytical equipment for the measurement of critical soil, plant, and climatic variables.

Requirements

Departmental Admission Requirements

Persons meeting the admission requirements for the University (see pages 16-20) are admitted to the Department of Plants, Soils, and Biometeorology by listing the department major code on the University admission application form. A change of major form is used when students in good standing wish to transfer from another department to the Department of Plants, Soils, and Biometeorology.

ARCPACS Certification

Students who meet specific requirements are eligible, after five years of work experience, for professional certification as an Agronomist, Crop Scientist, Crop Specialist, Horticulturist, Soil Scientist, Soil Specialist, Soil Classifier, or Weed Scientist through the American Registry of Certified Professionals in Agronomy, Crops, and Soils (ARCPACS). General information about ARCPACS certifications can be found at http://www.agronomy.org/certification. Students interested in becoming certified should inform their advisor of their intent. This certification is granted in addition to the bachelor’s degree.

Applied Ornamental Horticulture Certificates and AAS Degree

This program provides practical training in greenhouse and nursery management, turf production, floral design, and maintenance of home and commercial grounds. Coursework encompasses pest control, plant identification, construction of landscapes, small business management, and the operation and maintenance of equipment, including small engines. As an integral part of their training, students are required to complete an internship in the industry. Students may work toward a one-year certificate or an Associate of Applied Science Degree.

Bachelor of Science Degree

The department offers the Bachelor of Science Degree in three areas: (1) Crop Science, which deals with agronomic (commonly called field) crops, such as forages, grains, corn, pasture, etc.; (2) Horticulture, which deals with tree fruits, berries, vine fruits, vegetables, and ornamental plants (ornamental includes all aspects of floriculture and landscape plant production and use); and (3) Environmental Soil/Water Science, which deals with soil and water in relation to plant growth and environmental quality. In all three majors, there are science-oriented emphases intended to prepare students for research or professional studies, and degree emphases that emphasize a practical, applied approach to application of information. All courses used to fill major requirements must be taken on an A-B-C-D-F basis. A minimum 2.5 GPA is required for courses used for the major. Transfer students are required to take at least 18 credits of major subject coursework at Utah State University.
courses in residence at USU. A minor may be earned in Agronomy, Crop Biotechnology, Horticulture, Ornamental Horticulture, and Soil Science. A minimum of 16 approved credits are required (see lists below). All courses must be taken on an A-B-C-D-F basis and passed with a grade of C- or better. For information about receiving a Bachelor of Arts degree, consult the department undergraduate advisor.

The course requirements for the Crop Science Major are designed to prepare students for a career related to the production of agronomic crops. These courses allow students to function well in a rapidly changing technological environment and to acquire new skills and understanding as their career evolves. Each of the emphases within this major has been designed to allow students the flexibility to add courses or a minor to meet their own goals. The Agronomy Emphasis is designed for students interested in learning more about the applied aspects of crop production. Some courses emphasize production techniques and systems, while others provide the student with an understanding of the principles underlying crop production. The Research/Biotechnology Emphasis is designed for students who wish to participate in the development of plant-oriented technologies at any level of employment, and for those who intend to pursue a career in private or public research requiring graduate degrees. Courses provide the fundamental tools for a twenty-first century career in agriculture.

The Horticulture Major prepares students for production of fruits, vegetables, turf, or ornamentals and for landscape construction and maintenance. Course topics include biology, chemistry, and control of insects, diseases, and weeds. The Ornamental Horticulture Emphasis adds courses in production management techniques, such as pruning, spraying, and landscaping (materials, design, and maintenance); and greenhouse management. In the Landscape Maintenance and Construction Emphasis, students learn design, construction, and maintenance through a joint program with the Landscape Architecture and Environmental Planning Department. In the Turfgrass Management Emphasis, students complete courses in turfgrass management to prepare them for careers in golf course, park, athletic field, and landscaping management. The Science Emphasis prepares students for graduate study and for employment in technical occupations. The Business Emphasis joins courses necessary for a minor in Business with those necessary for obtaining expertise in horticulture.

The Environmental Soil/Water Science Major is intended to provide each student with a fundamental understanding of the basic sciences and mathematics, as well as a strong background in both soil and water sciences. Preparatory requirements include chemistry, physics, mathematics, biology, geology, and statistics. The core courses for Environmental Soil/Water Science emphasize the interactive soil/water processes in the soil’s plant-rooting zone—from the microscopic to the landscape perspective. From this base, each student can design his or her own program of specialization in one of the many aspects of soil science, water science, or the integration of both soil and water sciences. Students may choose complementary classes in the Soil Emphasis, Water Emphasis, or Plant Emphasis in preparation for a variety of career opportunities. The Environmental Soil/Water Science Major is complementary to existing undergraduate programs at Utah State University in Geology, Environmental Studies, Watershed and Earth Systems, and Environmental Engineering.

**Additional Crop-related Courses:**

Students must complete at least 18 credits chosen from the following crop-related courses:

- PLSC 2650 Identification and Selection of Plants in Production Agriculture (F)
- PLSC 3700 Plant Propagation (F)
- PLSC 4280 Field Crops (F,Sp)
- PLSC 4300 World Food Crops and Cropping Systems: The Plants That Feed Us (F, even)
- PLSC 4320 Forage Production and Pasteure Ecology (F)
- PLSC 4600 (QI) Cereal Science (Sp, even years)
- PLSC 5430 Plant Nutrition (F, odd)
- PLSC 5440 Plant Molecular, Cellular, and Developmental Biology I (Sp)
- PLSC 5450 Plant Molecular, Cellular, and Developmental Biology II (Sp)
- PLSC 5550 Weed Biology and Control (F)
- PLSC 5600 Plant Water Relations (F)
- PLSC 5700 Principles of Plant Breeding (Sp, odd years)
- PSB 5160 Methods in Biotechnology: Cell Culture (Sp)
- PSB 5240 Methods in Biotechnology: Protein Purification Techniques (Sp)
- PSB 5260 Methods in Biotechnology: Molecular Cloning (F)
- SOIL 5560 Analytical Techniques for the Soil Environment (Sp)
- STAT 2000 (QI) Statistical Methods (F,Sp) (3 cr) or STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) (3 cr)

The following courses are also recommended:

- BIOL 4410 Plant Structure (Sp)
- BIOL 4500 Applied Entomology (Sp)
- BIOL 5210 Cell Biology (F)
- BIOL 5230 Developmental Biology (Sp)
- BIOL 5410 Introduction to Plant Pathology (Sp)
- MATH 1210 (QL) Calculus I (F,Sp,Su)
- PHYS 2110 The Physics of Living Systems I
- PLSC 5440 Plant Molecular, Cellular, and Developmental Biology I (Sp)
- PLSC 5450 Plant Molecular, Cellular, and Developmental Biology II (Sp)
- CHEM 1110 (BPS) General Chemistry I
- Elective course(s)

**Spring Semester (15 credits)**

- BIOL 1620 (QL) Biology I
- CHEM 1120 (BPS) General Chemistry II
- CHEM 1115 General Chemistry Laboratory
- ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles
- PSB 2040 Introduction to Biotechnology
- Elective course(s)

**Sophomore Year (28 credits)**

- Fall Semester (16 credits)
  - PLSC 4280 Field Crops
  - PLSC 4320 Forage Production and Pasture Ecology
  - USU 1320 (BHU) Civilization: Humanities
  - USU 1330 (BCA) Civilization: Creative Arts
  - ENGL 2100 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode
  - PLSC 2650 Identification and Selection of Plants in Production Agriculture (F)

- Spring Semester (12 credits)
  - PLSC 3500 The Structure and Function of Economic Crop Plants
  - PHYS 1100 (BPS) Great Ideas in Physics
  - BIS 2100 Principles of Management Information Systems (F,Sp,Su)
  - BIOL 4500 Applied Entomology

**Junior Year (31 credits)**

- Fall Semester (15 credits)
  - BIOL 3060 (QI) Principles of Genetics
  - SOIL 3000 Fundamentals of Soil Science
  - HIST 3850 (DHA/CI) History of Utah
  - Elective course(s)

- Spring Semester (16 credits)
  - BIOL 5410 Introduction to Plant Pathology
  - PLSC 4600 (QI) Cereal Science (taught even years only)
  - PLSC 5700 Principles of Plant Breeding (taught odd years only)
  - SOIL 4700 Irrigated Soils (half semester)
  - STAT 3000 (QI) Statistics for Scientists

**Senior Year (30 credits)**

- Fall Semester (15 credits)
  - BIOL 4400 (QI) Plant Physiology
  - PLSC 5550 Weed Biology and Control
  - PSB 4250 Internship in Plants, Soils, and/or Biometeorology
  - PSB 4890 (CI) Senior Seminar
  - SOIL 4000 Soil and Water Conservation

- Spring Semester (15 credits)
  - BIOL 4410 Plant Structure
  - PLSC 5200 Crop Physiology
  - SOIL 5550 (QI) Soils and Plant Nutrient Bioavailability
  - SOIL 5560 Analytical Techniques for the Soil Environment
  - Elective course(s)

**Sample Curriculum for Crop Science Major—Agronomy Emphasis**

The sample curriculum shows most lower-division courses selected freshman and sophomore years, and most upper-division courses selected junior and senior years.

**Freshman Year (30 credits)**

- Fall Semester (15 credits)
  - BIOL 1610 (QL) Biology I
  - MATH 1050 (QL) College Algebra
  - PSB 1050 Plants, Soils, and Biometeorology Orientation

- Spring Semester (15 credits)
  - BIOL 2620 (QL) Biology II
  - CHEM 2315 Organic Chemistry Laboratory I (F,Sp)
  - PSB 2040 Introduction to Biotechnology
  - Elective course(s)
Department of Plants, Soils, and Biometeorology

Freshman Year (28 credits)
Fall Semester (15 credits)
BIOL 16101 Biology I ......................................................... 4
MATH 1050 (QL) College Algebra ......................................... 4
PSB 10502 Plants, Soils, and Biometeorology Orientation ...... 1
CHEM 1210 Principles of Chemistry I ................................. 4
CHEM 1215 Principles of Chemistry Laboratory I .................. 4
Elective course(s) .......................................................... 1

Spring Semester (13 credits)
BIOL 1620 (BLS) Biology II .............................................. 4
CHEM 1220 (BPS) Principles of Chemistry II ....................... 4
CHEM 1225 Chemical Principles Laboratory II ................... 1
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles ............................... 3
PSB 204011 Introduction to Biotechnology ........................... 1

Sophomore Year (30 credits)
Fall Semester (15 credits)
CHEM 2310 Organic Chemistry I ........................................ 4
CHEM 2315 Organic Chemistry Laboratory I ....................... 1
USU 1320 (BHlu) Civilization: Humanities .......................... 3
USU 1330 (BCA) Civilization: Creative Arts ........................ 3
ENGL 2100 (CL2) Intermediate Writing; Research Writing in a Persuasive Mode ........................................... 3
PLSC 2650 Identification and Selection of Plants in Production Agriculture .............................................. 1

Spring Semester (15 credits)
CHEM 2320 Organic Chemistry II ....................................... 4
CHEM 2325 Organic Chemistry Laboratory II (blocks 1 & 2) ... 1
PHYS 1100 (BPS) Great Ideas in Physics ............................. 3
BUS 3100 (OSS) Survey of Management Information Systems 3
MATH 1210 (QL) Calculus I ........................................... 4

Junior Year (28 credits)
Fall Semester (15 credits)
BIOL 3060 (QI) Principles of Genetics .................................. 4
SOIL 3000 Fundamentals of Soil Science ............................. 4
PLSC 3700 Plant Propagation ........................................ 4
HIST 3850 (DHA/CI) History of Utah ............................... 4

Spring Semester (13 credits)
CHEM 3700 Introductory Biochemistry ................................ 3
CHEM 3710 Introductory Biochemistry Laboratory ............... 1
PLSC 4600 (QI) Cereal Science (taught even years only) ...... 3
STAT 3000 (QI) Statistics for Scientists ......................... 3
Elective course(s) .......................................................... 3

Senior Year (32 credits)
Fall Semester (15 credits)
BIOL 4400 (QI) Plant Physiology ....................................... 4
BIOL 521010 Cell Biology ............................................. 3

Elective course(s) .......................................................... 5

ARCPACS Certification
For more information, students should refer to the American Society of Agronomy website at: http://www.agronomy.org or http://www.agronomy.org/certification

ARCPACS Requirements
Certified Professional Agronomist (84 credits)
Certified Professional Crop Scientist (84 credits)
Certified Professional Weed Scientist (82 credits)

Students wishing to obtain ARCPACS certification must satisfy the requirements for the Bachelor of Science degree, as well as complete any additional courses.

For Certified Agronomist or Certified Weed Scientist, take 9 credits chosen from the following courses. For Certified Crop Scientist, take 15 credits chosen from the following courses.
PLSC 3800 Turfgrass Management (F) ............................. 3
PLSC 4280 Field Crops (F) ............................................ 3
PLSC 4320 Forage Production and Pasture Ecology (F) ....... 3
PLSC 4600 (QI) Cereal Science (Sp, even years) ............... 3
PLSC 5200 Crop Physiology (Sp) ................................... 2
PLSC 5210 Crop Physiology Laboratory (Sp) ...................... 1
PLSC 5700 Principles of Plant Breeding (Sp, odd years) ....... 3

All ARCPACS categories (Agronomy, Crop Science, and Weed Science) require the following course:
SOIL 5550 (QI) Soils and Plant Nutrient Bioavailability (Sp) .. 3

For Certified Agronomist, take at least 6 credits from the following list:
SOIL 4000 Soil and Water Conservation (F) ...................... 4
SOIL 4700 Irrigated Soils (Sp, half semester) ...................... 3
SOIL 5050 Principles of Environmental Soil Chemistry (Sp) .. 3
SOIL 5130 Soil Genesis, Morphology, and Classification (F) .. 4

For Certified Agronomist or Certified Crop Scientist, take at least two of the following three courses:
BIOL 4500 Applied Entomology (Sp) ................................. 3
BIOL 5410 Introduction to Plant Pathology (Sp) .................. 4
PLSC 5550 Weed Biology and Control (F) ......................... 4

For Certified Agronomist or Certified Crop Scientist, take all of these courses:
ASTE 3050 (CI) Technical and Professional Communication Principles in Agriculture (F,Sp) ........................................ 3
SPCH 1020 (CI) Public Speaking (F,Sp) ............................... 3
CS 1030 (BPS) Foundations of Computer Science, and the Application of Computer Science to the Investigation of Physical Systems and Phenomena (F,Sp,Su) ............................... 3
ECON 2010 (BSS) Introduction to Microeconomics (F,Sp) .... 3

1This course is required as part of the Crop Science Major Core.
2This course is required for the Agronomy Emphasis.
3This course is required for the Agronomy Emphasis.
4This course is included in the Additional Crop-related Courses for the Agronomy Emphasis.
5This course is included in the Additional Soils-related Courses for the Agronomy Emphasis.
6This course is a restricted elective. Other courses may be used to satisfy this requirement.
7Students must complete at least 9 credits selected from these Agronomy Emphasis courses.
8This course is required for the Research/Biotechnology Emphasis.
9This course is included in the Additional Crop-related Courses for the Research/Biotechnology Emphasis.
10This course is a recommended elective for the Research/Biotechnology Emphasis.
11This course is an unrestricted elective. Some suggested courses are indicated.
Horticulture Major

Students must complete the core courses and courses for one of the four emphases to fulfill the requirements for a Horticulture Degree.

Core Courses (23-26 credits)

SOIL 3200 (DSC) Microbes in Environmental Action (Sp) ............ 3
SOIL 5550 (Qi)* Soils and Plant Nutrient Bioavailability (Sp) ....... 3
STAT 3000 (Qi) Statistics for Scientists (F,Sp,Su) ......................... 3
Select any Ornamental Horticulture class* .................................... 2-3

Select one of the following:

BIOL 4500 Applied Entomology (Sp) ........................................... 3
BIOL 5410 Introduction to Plant Pathology (Sp) ........................... 4
PLSC 5550 Weed Biology and Control (F) .................................... 4

Sample Curriculum for Horticulture Major—Ornamental Horticulture Emphasis

The sample curriculum shows most lower-division courses selected during freshman and sophomore years, and most upper-division courses selected during junior and senior years.

Freshman Year (29 credits)

Fall Semester (15 credits)

BIOL 1610* Biology I ................................................................. 4
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ....................... 3
PLSC 2620* Woody Plant Materials: Trees and Shrubs for the Landscape ................................................................. 3
PSB 2800 Identification and Selection of Plants in Production Agriculture ................................................................. 1
PSB 1050* Plants, Soils, and Biometeorology Orientation ............... 1
Any USU elective course(s) ......................................................... 3

Spring Semester (14 credits)

BIOL 1620 (BLS)* Biology II ....................................................... 4
FRWS 2200 (BLS)* Ecology of Our Changing World ................. 3
MATH 1050 (QL)* College Algebra ............................................ 4
OSS 1400* Microcomputer Applications .................................. 3
### Department of Plants, Soils, and Biometeorology

#### Sophomore Year (29.5 credits)
- **Fall Semester (15.5 credits)**
  - CHEM 1110 (BPS) General Chemistry I ................................. 4
  - ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ......................................................... 3
  - PLSC 2600 Winter and Perennial Plant Materials ..................... 1.5
  - Any Breadth American Institutions (BAI)/USU course, as required 3
  - Any emphasis elective course(s), as advised ............................ 4
- **Spring Semester (14 credits)**
  - PLSC 4500 Fruit Production .................................................. 4
  - SOIL 3000 Fundamentals of Soil Science ..................................... 4
  - Any Breadth Social Sciences (BSS)/USU course, as required 3
  - Any emphasis elective course(s), as advised ............................ 7

#### Junior Year (31 credits)
- **Fall Semester (15 credits)**
  - PLSC 4400 Modern Vegetable Production ............................. 3
  - Any Breadth Humanities (BHU)/USU course, as required 3
  - Any Depth Social Sciences (DSS) course ................................. 3
  - Any emphasis elective course(s), as advised ............................ 3
  - Any USU elective course(s)* .................................................. 3
- **Spring Semester (16 credits)**
  - SOIL 5550 Soils and Plant Nutrient Bioavailability .................. 3
  - Any USU elective courses* .................................................... 6
  - Any emphasis elective courses, as advised ............................ 7

#### Senior Year (34 credits)
- **Fall Semester (17 credits)**
  - BIOL 3050 Principles of Genetics ................................. 4
  - PSB 4250 Internship in Plants, Soils, and/or Biometeorology .... 2
  - PSB 4890 (CI) Senior Seminar ............................................ 1
  - Any Depth Humanities and Creative Arts (DHA) course .......... 3
  - Any emphasis elective course(s), as advised ......................... 3
  - Any USU elective course(s)* .................................................. 3
- **Spring Semester (17 credits)**
  - PSB 4890 (CI) Senior Seminar ............................................ 1
  - Any Breadth Creative Arts (BCA)/USU course, as required 3
  - Any Quantitative Intensive (QI) course ................................. 3
  - Any emphasis elective course(s), as advised ........................ 7
  - Any USU elective course(s)* .................................................. 3

#### Sample Curriculum for Horticulture Major—Landscape Maintenance and Construction Emphasis
The sample curriculum shows most lower-division courses selected freshman and sophomore years, and most upper-division courses selected junior and senior years.

#### Freshman Year (29 credits)
- **Fall Semester (16 credits)**
  - BIOL 1610 Biology I ............................................................ 4
  - ENGL 1010 (CL1) Introduction to Writing: Academic Prose ........ 3
  - LAEP 1200 Basic Graphics in Landscape Architecture .......... 4
  - PLSC 2620 Woody Plant Materials: Trees and Shrubs for the Landscape ................................................................. 4
  - PLSC 2650 Identification and Selection of Plants in Production Agriculture ................................................................. 1
  - PSB 1050 Plants, Soils, and Biometeorology Orientation ........ 1
- **Spring Semester (13 credits)**
  - FRWS 2200 (BLS) Ecology of Our Changing World .................. 3
  - MATH 1050 College Algebra .................................................. 4
  - OSS 1400 Microcomputer Applications ................................... 3
  - PLSC 2200 Pest Management Principles and Practices .......... 3

#### Sophomore Year (32.5 credits)
- **Fall Semester (16 credits)**
  - CHEM 1110 (BPS) General Chemistry I ................................. 4
  - ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ......................................................... 3
  - LAEP 2600 (CL1) Landscape Construction I ............................ 4
  - PLSC 2600 Winter and Perennial Plant Materials ..................... 1.5
  - SOIL 3000 Fundamentals of Soil Science ..................................... 4
- **Spring Semester (16 credits)**
  - LAEP 3610 Landscape Construction II .................................... 4
  - PLSC 3300 Residential Landscapes .......................................... 3
  - Any Breadth Social Sciences (BSS)/USU course, as required 3
  - Any USU elective courses* .................................................... 6

#### Junior Year (29 credits)
- **Fall Semester (14 credits)**
  - LAEP 3500 Planting Design .................................................. 2
  - PLSC 4400 Modern Vegetable Production ............................. 3
  - Any Breadth Humanities (BHU)/USU course, as required 3
  - Any Depth Social Sciences (DSS) course ................................. 3
  - Any USU elective course(s)* .................................................. 3
- **Spring Semester (15 credits)**
  - PLSC 3500 The Structure and Function of Economic Crop Plants ... 3
  - PSB 4250 Internship in Plants, Soils, and/or Biometeorology .... 3
  - SOIL 4700 Irrigated Soils .................................................... 3
  - Any Breadth American Institutions (BAI)/USU course, as required 3
  - Any USU elective course(s)* .................................................. 3

#### Senior Year (30 credits)
- **Fall Semester (14 credits)**
  - PLSC 3400 Landscape Maintenance Principles and Practices .... 3
  - PLSC 3800 Turfgrass Management ........................................... 3
  - PLSC 5550 Weed Biology and Control .................................... 4
  - PSB 4890 (CI) Senior Seminar ............................................ 1
  - Any USU elective course(s)* .................................................. 3
- **Spring Semester (16 credits)**
  - PSB 4890 (CI) Senior Seminar ............................................ 1
  - Any Breadth Creative Arts (BCA)/USU course, as required 3
  - Any Depth Humanities and Creative Arts (DHA) course .......... 3
  - Any emphasis elective course(s), as advised ........................ 3
  - Any USU elective courses* .................................................... 6

#### Sample Curriculum for Horticulture Major—Turfgrass Management Emphasis
The sample curriculum shows most lower-division courses selected freshman and sophomore years, and most upper-division courses selected junior and senior years.

#### Freshman Year (32 credits)
- **Fall Semester (15 credits)**
  - BIOL 1610 Biology I ............................................................ 4
  - ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles .................................................. 3
  - ENGL 1010 (CL1) Introduction to Writing: Academic Prose ........ 3
  - PLSC 2620 Woody Plant Materials: Trees and Shrubs for the Landscape ................................................................. 3
  - PLSC 2650 Identification and Selection of Plants in Production Agriculture ................................................................. 1
  - PSB 1050 Plants, Soils, and Biometeorology Orientation ........ 1
- **Spring Semester (17 credits)**
  - BIOL 1620 (BLS) Biology II .................................................. 4
  - FRWS 2200 (BLS) Ecology of Our Changing World ............... 3

---

\(^{1}\) Must be completed in the fall or spring semester of the freshman year.

\(^{2}\) Credits may be transferred from other institutions.

---

Utah State University 2006-2007 General Catalog
Department of Plants, Soils, and Biometeorology

Spring Semester (14 credits)
BIOL 1620 (BLS)1 Ecology of Our Changing World ............................... 4
FRWS 2200 (BLS)12 Ecological Principles (F,Sp) ................................. 3
MATH 1050 (QL)12 College Algebra ....................................................... 3
OSS 14001 Microcomputer Applications ................................................... 3

Sophomore Year (31 credits)
Fall Semester (14 credits)
BIOL 4400 (QL)1 Plant Physiology ......................................................... 4
CHEM 1110 (BPS)1 General Chemistry ..................................................... 4
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................................................. 3
Any Breadth American Institutions (BAI)/USU course, as required .......... 3

Spring Semester (17 credits)
SOIL 300014 Fundamentals of Soil Science .............................................. 4
Any Breadth Social Sciences (BSS)/USU course, as required ................. 3
Any emphasis elective courses, as advised .............................................. 6
Any USU elective course(s)................................................................... 4

Junior Year (31 credits)
Fall Semester (16 credits)
PLSC 440016 Modern Vegetable Production ......................................... 4
Any Breadth Humanities (BH)/USU course, as required ....................... 3
Any Depth Social Sciences (DSS) course .............................................. 4
Any emphasis elective course(s), as advised ......................................... 3
Any USU elective course(s)................................................................... 3

Spring Semester (16 credits)
PLSC 450018 Fruit Production ............................................................... 4
SOIL 5550 (QL)18 Soils and Plant Nutrient Bioavailability ......................... 4
Any USU elective course(s)................................................................... 4
Any emphasis elective courses, as advised .............................................. 6

Senior Year (32 credits)
Fall Semester (16 credits)
MATH 1100 (QL)19 Calculus Techniques .................................................. 3
PSB 425019 Internship in Plants, Soils, and/or Biometeorology ............... 2
PSB 4890 (CL2) Senior Seminar ............................................................. 1
Any Depth Humanities and Creative Arts (DHA) course ........................ 3
Any USU elective course(s)................................................................... 7

Spring Semester (16 credits)
PLSC 5200 Crop Physiology ................................................................. 4
BIOL 3060 (QL)19 Principles of Genetics .................................................. 4
PSB 4890 (CL2) Senior Seminar ............................................................. 1
Any Breadth Creative Arts (BCA)/USU course, as required ................. 3
Any Quantitative Intensive (QI) course .................................................. 3
Any emphasis elective course, as advised .............................................. 3

Environmental Soil/Water Science Major
Preparatory Core Courses (43-49 credits)
Required Courses (18 credits)
BIOL 1610 Biology I (F) ........................................................................... 4
BIOL 1620 (BLS) Biology II (Sp) .............................................................. 4
GEO 1110 (BPS) The Dynamic Earth: Physical Geology (F,Sp) ............. 4
FRWS 2200 (BLS) Ecology of Our Changing World (F,Su) (3 cr) or
BIOL 2220 General Ecology (F,Sp) (3 cr) .................................................. 3

Department of Plants, Soils, and Biometeorology

STAT 2000 (QI) Statistical Methods (F,Sp) (3 cr) or
STAT 3000 (QL) Statistics for Scientists (F,Sp,Su) (3 cr) ......................... 3

Chemistry Courses (9 or 13 credits)
Complete one of the two following blocks of Chemistry courses:
Block 1 (9 credits)
CHEM 1110 (BPS) General Chemistry I (F,Sp) ...................................... 4
CHEM 1115 General Chemistry Laboratory (Sp) .................................... 1
CHEM 1120 (BPS) General Chemistry II (Sp) ........................................ 4

Block 2 (13 credits)19
CHEM 1210 Principles of Chemistry I (F,Sp) ......................................... 4
CHEM 1215 Chemical Principles Laboratory I (F,Sp) ............................ 1
CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) ....................... 4
CHEM 1225 Chemical Principles Laboratory II (F,Sp) ......................... 1
CHEM 2300 Principles of Organic Chemistry (F) ................................. 3

Mathematics Courses (10 or 8 credits)
Complete one of the two following blocks of Mathematics courses:
Block 1 (10 credits)
MATH 1050 (QL) College Algebra (F,Sp,Su) ........................................... 4
MATH 1060 Trigonometry (F,Sp,Su) ....................................................... 2
MATH 1210 (QL) Calculus I (F,Sp,Su) ..................................................... 4

Block 2 (8 credits)19
MATH 1210 (QL) Calculus I (F,Sp,Su) ..................................................... 4
MATH 1220 (QL) Calculus II (F,Sp,Su) ..................................................... 4

Physics Courses (8 credits)
Complete one of the two following blocks of Physics courses:
Block 1 (8 credits)
PHYS 2110 The Physics of Living Systems I ......................................... 4
PHYS 2120 (BPS) The Physics of Living Systems II ............................... 4

Block 2 (8 credits)19
PHYS 2210 (QL) General Physics—Science and Engineering I .......... 4
PHYS 2220 (BPS/QL) General Physics—Science and Engineering II .... 4

Professional Core Courses (26 credits)
SOIL 3000 Fundamentals of Soil Science (F,Sp) ..................................... 4
SOIL 5050 Principles of Environmental Soil Chemistry (Sp odd) .......... 3
SOIL 5130 Soil Genesis, Morphology, and Classification (F) ............... 4
SOIL 5310 Soil Microbiology (F, even years) (3 cr) or
SOIL 5550 (QL)19 Soils and Plant Nutrient Bioavailability (Sp) (3 cr) .... 3
SOIL 5560 Analytical Techniques for the Soil Environment (Sp) .......... 2
SOIL 5600 Surface Hydrologic Field Methods (Sp) .............................. 3
SOIL 5650 Environmental Soil Physics (F) ............................................. 3
SOIL 5750 Environmental Quality: Soil and Water (Sp) ....................... 2
PSB 4890 (CI) Senior Seminar (F,Sp) (take 1 credit per semester) ......... 2

1Students in the Water Emphasis should take the Block 2 courses in Chemistry, Mathematics, and Physics.
2Students in the Plant Emphasis must select SOIL 5550.

Emphases
Students must select 12 credits from one or a combination of the following three emphases.

Soil Emphasis
AWER 47501 Fundamentals of Remote Sensing Science (F) ............... 3
AWER 4930 Geographic Information Systems (F) ................................. 4
AWER 5930 Geographic Information Analysis (Sp) ............................... 4
SOIL 5250 Remote Sensing of Land Surfaces (Sp) ............................... 4
CEE 5190 Geographic Information Systems for Civil Engineers (Sp) .... 3
CHEM 3000 (QL) Quantitative Analysis (F) ......................................... 3
FRWS 5750 Applied Remote Sensing (F) ............................................. 4
GEO 3500 Mineralogy and Crystallography (F) ................................... 4
GEO 3550 (CI) Sedimentation and Stratigraphy (F) ............................ 4
Department of Plants, Soils, and Biometeorology

GEO 3600 Geomorphology (F) .............................................................. 4
GEO 5410B Introduction to Clay Mineralogy (Sp) .................................. 2
GEO 5600 Geochemistry (F) .............................................................. 3
GEO 5630 Photogeology ................................................................. 2
PSB 5200 Site-Specific Agriculture and Landscape/Horticultural Management (Sp, half semester) ......................................................... 3
SOIL 3100 Soils and Civilization (Sp) .................................................. 3
SOIL 3200 (DSC) Microbes in Environmental Action (Sp) ..................... 3
SOIL 4000 Soil and Water Conservation (F) ....................................... 4
SOIL 5310 Soil Microbiology (F) .......................................................... 3
SOIL 5320 Soil Microbiology Laboratory (F, even years) .................... 2
SOIL 5350 Wildland Soils (Sp) ............................................................ 3
SOIL 5550 (QI) Soils and Plant Nutrient Bioavailability (Sp) ............... 3

Water Emphasis
ASTE 5260 (CI) Environmental Impacts of Agricultural Systems (F) ....... 3
AWER 3700 (CI) Fundamentals of Watershed Science (Sp) .................... 3
AWER 4500 Limnology: Ecology of Inland Waters (Sp) ......................... 3
AWER 4510 Aquatic Ecology Pracicum (F) .......................................... 3
AWER 4530 Aquatic Ecology Practicum (F) ......................................... 3
AWER 5640 Water Quality and Pollution (Sp) ...................................... 3
BIE 5100 Principles of Irrigation Engineering (F) .................................. 3
BIE 5110 Principles of Irrigation Engineering (F) .................................. 4
BIE 5150 Surface Irrigation Design (Sp) .............................................. 3
BMET 4300 General Meteorology (F) .................................................. 3
BMET 5250 Remote Sensing of Land Surfaces (Sp) ................................ 4
BMET 5500 Land-Atmosphere Interactions (Sp) .................................... 3
BMET 5700 Environmental Measurements (Sp) .................................... 3
CEE 3430 Engineering Hydrology (Sp) ................................................. 4
CHEM 3000 (QI) Quantitative Analysis (F) .......................................... 3
CHEM 5100 Fluvial Geomorphology (F) ............................................. 3
GEO 5510 (QI) Groundwater Geology (F) .......................................... 4
GEO 5520 (CI) Techniques of Groundwater Investigations (Sp) .......... 3
PLSC 5200 Crop Physiology (Sp) ....................................................... 2
PLSC 5210 Crop Physiology Laboratory (Sp) ....................................... 1
SOIL 4000 Soil and Water Conservation (F) ....................................... 4
SOIL 4700 Irrigated Soils (Sp, half semester) ....................................... 3

Plant Emphasis
BIOL 2410 Plants and Fungi in the Field (Su) ..................................... 2
BIOL 4400 (QI) Plant Physiology (F) .................................................. 4
BIOL 4410 Plant Structure (Sp) .......................................................... 3
BIOL 4420 Plant Taxonomy (Sp) ......................................................... 3
BMET 5500 Land-Atmosphere Interactions (Sp) .................................... 3
FRWS 3600 Wildland Plant Ecology and Identification (F) ................. 4
FRWS 3700 (CI) Inventory and Assessment in Natural Resource and Environmental Management (F) ................................................ 3
FRWS 3710 Monitoring and Assessment in Natural Resource and Environmental Management (Sp) .................................................. 3
PLSC 2100 (BLS) Introduction to Horticulture (F) ............................... 3
PLSC 2600 Annual and Perennial Plant Materials (F) ............................ 1.5
PLSC 2620 Woody Plant Materials: Trees and Shrubs for the Landscape (F) ........................................................... 3

Sample Curriculum for Environmental Soil/Water Science Major
The sample curriculum shows most lower-division courses selected freshman and sophomore years, and most upper-division courses selected junior and senior years.

Freshman Year (31 credits)
Fall Semester (14 credits)
BIOL 1610 Biology I ................................................................. 4
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ............... 3
GEO 1110 (BPS) The Dynamic Earth: Physical Geology .................... 4
Any Breadth Creative Arts (BCA)/USU course, as required .......... 3

Spring Semester (17 credits)
BIOL 1620 (BLS) Biology II .......................................................... 4
FRWS 2200 (BLS) Ecology of Our Changing World ......................... 3
MATH 1050 (QL) College Algebra .................................................. 3
OSS 1400 Microcomputer Applications ........................................... 3
Any emphasis elective course, as advised ......................... 3

Sophomore Year (31 credits)
Fall Semester (16 credits)
CHEM 1110 (BPS) General Chemistry I ........................................... 4
ENGL 2100 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................................................. 3
Any Breadth Humanities (BHU)/USU course, as required .......... 3
Any Breadth Social Sciences (BSS)/USU course, as required ......... 3
Any emphasis elective course, as advised ......................... 3

Spring Semester (15 credits)
CHEM 1115 General Chemistry Laboratory (1 cr) or
CHEM 1210A General Chemistry Laboratory I (1 cr) ....................... 1
CHEM 1120 (BPS) General Chemistry II (4 cr) or
CHEM 1220 (BPS) Principles of Chemistry II (4 cr) ....................... 4
SOIL 3000 Fundamentals of Soil Science ......................................... 4
Any Depth Humanities and Creative Arts (DHA)/USU course, as required .......... 3
Any emphasis elective course, as advised ......................... 3

Junior Year (31 credits)
Fall Semester (15 credits)
MATH 1060 Trigonometry ............................................................. 4
SOIL 5130 Soil Genesis, Morphology, and Classification ................. 2
STAT 2000 (QI) Statistical Methods (3 cr) or
STAT 3000 (QI) Statistics for Scientists (3 cr) ................................. 3
Any Depth Social Sciences (DSS) course ........................................ 3
Any Communications Intensive (CI) course .................................... 3

Spring Semester (16 credits)
MATH 1210 (QL) Calculus I .......................................................... 4
PHYS 2110 The Physics of Living Systems I .................................... 4
SOIL 5050 Principles of Environmental Soil Chemistry ................. 3
SOIL 5560 Analytical Techniques for the Soil Environment .......... 2
Any emphasis elective course, as advised ......................... 3

Senior Year (31 credits)
Fall Semester (16 credits)
PHYS 2120 (BPS) The Physics of Living Systems II ......................... 4
SOIL 5850 Environmental Soil Physics ............................................ 3
Any Breadth American Institutions (BAI)/USU course, as required .... 3
Any USU elective courses ....................................................... 6

468
Utah State University 2006-2007 General Catalog
### Ormamental Horticulture Program

**One-year Certificate (27 credits)**

The 27 credits are distributed as follows:

<table>
<thead>
<tr>
<th>Course Code</th>

**Total Credits:** 10-14

### Minors

#### Crop Biotechnology Minor

**16 credits required**

The following courses are required: PLSC 3700, 5750. Select the balance of credits from the following courses. At least one of the production courses, marked with an asterisk (*), is required. PLSC 3500, 4280*, 4300, 4320*, 4400*, 4500*, 5200, 5560, 5700, PSB 5160, 5240, 5260.

#### Agronomy Minor

**16 credits required**

A minimum of 6 credits of Soil Science courses must be taken, including SOIL 3000. A minimum of 6 credits of Plant Science courses must be taken, including the following courses: PLSC 4280 and 4320. Select the balance of credits from the following courses: SOIL 4000, 4700, 5130, 5310, 5560, 5650, 5700, PLSC 2200, 3800, 4400, 5200, 5550, 5700.

#### Soil Science Minor

**16 credits required**

The following course is required: SOIL 3000. Select 12 credits from the following courses: SOIL 4000, 4700, 5050, 5130, 5310, 5350, 5560, 5650, 5750.

#### Ornamental Horticulture Minor

**16 credits required**

The following courses are required: PLSC 3700, 5750. Select the balance of credits from the following courses: PLSC 2100, 2200, 2620, 3800, 4400, 4500, 5700.

#### Horticulture Minor

**16 credits required**

Select 6 credits from the following courses: PLSC 2100, 2200, 4400, 4500, one ornamental horticulture course. Select the remaining credits from the following: PLSC 2650, 3050, 3300, 3800, PSB 2800, SOIL 3000.

### Undergraduate Research Opportunities

The Plants, Soils, and Biometeorology Department is dedicated to providing undergraduate students with opportunities to participate with faculty members in research and creative activities. Examples of recent research include salt cedar control, pasture growth dynamics, soil-less media characteristics, gene sequencing, and essential oils from native plants. In addition to faculty mentorship of such activities, students may obtain grants of up to $1,000 for support of their projects. For further information, students may contact any departmental faculty member, or view the undergraduate research section of the Vice President for Research website at: [http://www.usu.edu/vpr/students/](http://www.usu.edu/vpr/students/)

### Departmental Assessment

Review and assessment of departmental programs is a commitment of the Plants, Soils, and Biometeorology Department. In 2002, the department completed a USDA-Cooperative State Research, Education, and Extension Service review. On an ongoing basis, the department evaluates all academic programs. More information about departmental assessment can be found at: [http://psb.usu.edu/htm/about/assessment/](http://psb.usu.edu/htm/about/assessment/)
Department of Plants, Soils, and Biometeorology

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information

For more information about requirements for undergraduate programs and the sequence in which courses should be taken, see major requirement sheets available from the Plants, Soils, and Biometeorology Department, or accessed online at: http://www.usu.edu/ats/majorsheets/

Graduate Programs

Admission Requirements

See general admission requirements, pages 99-100. Departmental admission committees and potential graduate student advisors (major professors) consider previous work experience, undergraduate and graduate records and curriculum, and formal recommendations in their decisions concerning acceptance of applicants. Students without an undergraduate or graduate degree in plants, soils, biometeorology, or a closely related field may be required to complete selected undergraduate courses prior to admission as fully matriculated graduate students in the Plants, Soils, and Biometeorology Department. Qualified applicants are occasionally denied admission because faculty members in the applicant’s area of interest do not have the time or funds to advise additional students. The serious applicant is encouraged to discuss his or her goals with appropriate members of the graduate faculty prior to preparing an application.

Graduate student candidates must have scores on the verbal and quantitative portions of the Graduate Record Examination (GRE) at or above the 40th percentile. TOEFL scores of 550 or higher are required for candidates from abroad. International students with a prior degree from an English-speaking university are exempted from the TOEFL exam.

Degree Programs and Specializations

The Master of Science and Doctor of Philosophy degrees are offered as follows: (1) Plant Science with specializations in crop physiology, crop production and management, molecular biology, plant breeding and cytology, plant biotechnology and tissue culture, plant nutrition, space biology, and weed science; (2) Soil Science with specializations in molecular biology (interdepartmental program), soil and water chemistry, soil biochemistry and ecology, soil conservation systems, soil fertility and plant nutrition, soil physics, soil-plant-water relations, soil taxonomy and genesis, and soils and irrigation; (3) Biometeorology with specializations in agricultural meteorology, climatology, micrometeorology, remote sensing, and turbulence in plant canopies; and (4) Ecology. A Master of Professional Studies in Horticulture (MPSH) is also offered.

Course Requirements

Course requirements leading to MS or PhD degrees are developed jointly by the student and the student’s advisory committee. Course selections reflect areas of specialization. There are, however, specific departmental requirements regarding physical sciences, biological sciences, and mathematics courses, which differ depending on the area of specialization.

Research

Research projects vary over time, depending on funding and other factors. Students are encouraged to visit the home page websites of the graduate faculty to determine research interests and lists of recent publications. Some of the research interests in the department include (1) the control of diseases, nematodes, weeds, and other hazards to fruit, vegetable, ornamental, and field crops; (2) physiological and genetic improvement of fruit, vegetable, ornamental, and field crops (breeding and biotechnology); (3) the evolution, genetic regulation, and utilization of apomixis and other developmental phenomena of higher plants; (4) management of agronomic and horticultural production systems; (5) horticultural landscape water management; (6) soil formation and landscape evolution; (7) soil, plant, water, and nutrient relationships; (8) management of saline and sodic soils; (9) alternative land uses; (10) improved management of animal wastes and biosolids; (11) management of soil microbial processes; (12) drainage and irrigation systems; (13) adaptations to weather and weather modification; (14) analyses and modification of large-scale surface evaporation from atmospheric boundary layer measurements; (15) spatial and temporal properties of sun flecks in plant canopies; and (16) spatial variation in surface fluxes of heat and water vapor in semiarid regions.

Financial Assistance and Assistantships

The financial awards provided by the School of Graduate Studies are listed on pages 98-99 of this catalog. The Department of Plants, Soils, and Biometeorology does not have a formal application form for financial assistance. Most monies used to assist students in the department come from research grants controlled by individual faculty members. Negotiations for financial assistance (research assistantships or part-time employment) are made between faculty members and students. The department provides a few part-time teaching assistantships (a semester at a time). Graduate teaching assistants are responsible to their major professor and to the instructor whom they assist. The MS and PhD in Biometeorology are Western Regional Graduate Programs (see page 98).

Career Opportunities

A broad range of career opportunities exists for students completing the MS or PhD degree from the Department of Plants, Soils, and Biometeorology. Graduate students specializing in the plant...
Department of Plants, Soils, and Biometeorology

Additional Information and Updates

Additional information and updates concerning graduate faculty and graduate student opportunities can be obtained from the web at: http://www.psb.usu.edu

Plants, Soils, and Biometeorology Faculty

Professors
Bruce G. Bugbee, crop physiology
John G. Carman, plant reproduction and development
Steven A. Dewey, weed science
Daniel T. Drost, vegetable production
Lynn M. Dudley, soil physical chemistry
Lawrence E. Hipp, biometeorology
David J. Hole, cereal breeding
H. Paul Rasmussen, horticulture
V. Philip Rasmussen, sustainable agriculture
Larry A. Rupp, ornamental horticulture
Schuyler D. Seelye, pomology
Ralph E. Whitesides, pomology

Research Professor
Stanford A. Young, seed production

Adjunct Professors
Michael C. Amacher, soil chemistry
Gail E. Bingham, micrometeorology
N. Jerry Chatterton, forage/range physiology/biochemistry
Wilford R. Gardner, soil physics
Henry F. Mayland, soil science
Charles W. Robbins, soil science
Edward J. Souza, plant breeding and genetics
John M. Stark, microbial ecology and biogeochemistry
Dale R. Westerman, soil science
Raymond M. Wheeler, plant physiology
James L. Wright, soil science

Professors Emeritus
Rulon S. Albrechtsen, plant breeding
Keith R. Allred, forage physiology
J. LaMar Anderson, pomology
Gaylen L. Ashcroft, biometeorology
William F. Campbell, crop stress physiology
Paul D. Christensen, soil science
Wade G. Dewey, plant breeding
John O. Evans, weed science
Alvin R. Hamson, horticulture
R. John Hanks, soil physics
Anthony H. Hatch, horticulture
Donald T. Jensen, climatology
Jerome J. Jurinak, soil chemistry
R. Paul Larsen, horticulture
Devere McAllister, plant breeding
Frank B. Salisbury, plant physiology
R. L. Smith, soil science
Alvin R. Southard, soil classification
James H. Thomas, international agronomy
H. Grant Vest, Jr., vegetable breeding
David R. Walker, pomology

Associate Professors
Janis L. Boettiger, soil genesis, classification and mineralogy
Brent L. Black, pomology
Grant E. Cardon, soil science
Robert R. Gillies, biometeorology
Paul R. Grossl, biogeochemist
Paul G. Johnson, turfgrass science
Roger K. Kjelgren, urban horticulture
Jennifer W. MacAdam, forage production and physiology
Jeanette M. Norton, soil microbiology

Research Associate Professor
Esmaiel Malek, biometeorology

Adjunct Associate Professors
Ari M. Ferro, phytoremediation
Kevin B. Jensen, forage breeding
Thomas A. Jones, plant genetics
Helga Van Miegroet, forest soils

Assistant Professors
David G. Chandler, surface hydrology
Thomas C. Griggs, agronomy
Scott B. Jones, soil physics
Kelly L. Kopp, water conservation/turfgrass science
Heidi A. Kratsch, ornamental horticulture
Corey V. Ransom, weed science
Dominique J. P. Roche, small grains, breeding/genetics
Yajun Wu, plant stress physiology, cell wall proteins

Research Assistant Professor
Raymond L. Cartee, soils and irrigation

Adjunct Assistant Professors
Jayne Belnap, biological soil crusts
Nathaniel Brunsel, biometeorology
Shawn Bushman, plant genetics, molecular biology
Richard T. Lamar, environmental microbiology
Steven R. Larson, research geneticist
Susan Meyer, seed biology
Michael Peel, plant breeding
Blair L. Waldron, research geneticist

Senior Lecturer
D. Craig Aston, ornamental horticulture

Lecturer
M. Cathryn Myers-Roche
Department of Plants, Soils, and Biometeorology

Research Associates
Shyrl M. Clawson, plant breeding
Robert L. Newhall, soil conservation and sustainable agriculture

Director, Utah Botanical Gardens
William A. Varga, ornamental horticulture

Director, Soil Testing Lab
Janice Kotuby-Amacher, soil chemistry

Department of Political Science

Department Head: Roberta Q. Herzberg
Location: Main 320A
Phone: (435) 797-1307
FAX: (435) 797-3751
E-mail: bobbi.herzberg@usu.edu
WWW: http://websites.usu.edu/politicalscience

Graduate Program Director: To be appointed
Undergraduate Advisors:
Political Science:
  Roberta Q. Herzberg, Main 320A, (435) 797-1307, bobbi.herzberg@usu.edu
Law and Constitutional Studies:
  Anthony A. Peacock, Main 341, (435) 797-1314, anthony.peacock@usu.edu
International Studies:
  Veronica Ward, Main 324E, (435) 797-1319, veronica.ward@usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), and Master of Arts (MA) in Political Science; BS and BA in Law and Constitutional Studies; Administers BA in International Studies; Participates in a pilot program of Master of Social Sciences (MSS), with an emphasis in Public Administration, administered through Continuing Education.

Undergraduate Programs

Objectives
The Department of Political Science offers a flexible program to accomplish the following objectives:

1. to provide students with theoretical and factual understanding of government, politics, and political philosophy, nationally and internationally;
2. to develop students’ analytic ability, communication skills, and facility with political research methods;
3. to prepare students for effective participation in civic affairs, careers in government and the teaching of government, and graduate study in political science, law, and other fields related to the public sector; and
4. to further the liberal arts education mission of the University and to enrich the educational experiences of students in all programs of study.

Admission and Prerequisite Requirements

Departmental Admission Requirements
Admission requirements for the Department of Political Science include a minimum 2.5 GPA for Political Science majors and a minimum 3.0 GPA for Law and Constitutional Studies majors. Students in good standing may apply for admission to the department.

Prerequisites
It is assumed that students registered for upper-division political science courses have acquired the basic knowledge and information taught in the lower-division courses required for the major. Anyone who wishes to take an upper-division course, but has not had the appropriate prerequisites, should consult with the instructor before registering. Faculty members reserve the right to drop from upper-division courses students who do not meet these requirements.

Graduation Requirements

Political Science Major
A. Total credits in Political Science Courses: 36
B. Overall GPA: 2.00
C. Average GPA in Political Science Courses: 2.50
D. Required Courses (15 credits)
POLS 1100 (BAI) U.S. Government and Politics (F,Sp) .................. 3
POLS 2100 Introduction to International Politics (F,Sp) (3 cr) or
POLS 2200 (BSS) Comparative Politics (F,Sp) (3 cr) .................... 3
POLS 2300 Introduction to Political Theory (F,Sp) ......................... 3
POLS 2400 (CI) Introduction to Political Research (F,Sp) ............... 3
POLS 4990 (CI) Senior Research Seminar (F,Sp) ......................... 3
E. Area Requirements (15 credits minimum) Select two of the following four areas: U.S. Government and Policy, International Relations, Comparative Politics, and Political Theory. Complete nine upper-division credits in one of the selected areas and six upper-division credits in the other. Even though a course may be listed under more than one area, it can be applied to only one area. Prior to taking the upper-division courses in a particular area, students must take the introductory course corresponding to that specific area.

1. U.S. Government and Policy
POLS 1100, U.S. Government and Politics, must be taken prior to taking any of the upper-division coursework listed below.
POLS 3110 Parties and Elections (Sp) ........................................ 3
POLS 3120 Law and Politics (F) ............................................... 3
POLS 3130 United States Legislative Politics (Sp) ......................... 3
POLS 3140 The Presidency (F) ................................................ 3
POLS 3150 State and Local Government (Sp) ............................. 3
POLS 3170 Law and Economics (F) .......................................... 3
POLS 3810 Introduction to Public Policy (F) ............................... 3
POLS 4120 American Constitutional Law (F) ............................. 3
POLS 4140 Political Organizations .......................................... 3
POLS 4810 Politics and Public Policy (F) .................................. 3
POLS 4820 Natural Resources and Environmental Policy (Sp) ....... 3
POLS 4890 Special Topics (F,Sp) ............................................. 3
POLS 5110 Social Policy (F) .................................................. 3
POLS 5130 Law and Policy (Sp) ............................................... 3
POLS 5140 Law, Politics, and War (F) ..................................... 3
POLS 5180 Natural Resource Policy (Sp) ................................. 3

2. International Relations
POLS 2100, Introduction to International Politics, or POLS 2200, Comparative Politics, must be taken prior to taking any of the upper-division coursework listed below.
POLS 3100 Global Issues (F) .................................................. 3
POLS 3400 United States Foreign Policy (F,Sp) ......................... 3
POLS 4210 European Union Politics (Sp) .................................. 3
POLS 4280 Politics and War (Sp) ............................................. 3
POLS 4410 Global Negotiations (Sp) ....................................... 3
Department of Political Science

POLS 4450 (CI) United States and Latin America (Sp) ..................3
POLS 4460 National Security Policy (Sp) ..................................3
POLS 4470 Foreign Policy in the Pacific (Sp) ............................3
POLS 4480 International Trade Policy (Sp) ...............................3
POLS 4890* Special Topics (F,Sp) .............................................3
POLS 5200 Global Environment (F) ........................................3
POLS 5210 Comparative Political Change/Development (F) .....3
POLS 5270 Latin American Politics and Development (Sp) .....3
POLS 5290 Development in Europe (Sp) .....................................3

3. Comparative Politics
POLS 2200. Comparative Politics, or POLS 2100. Introduction to International Politics, must be taken prior to taking any of the upper-division coursework listed below.

POLS 3190 Gender, Power, and Politics (F) ...............................3
POLS 3210 Western European Government and Politics (F) ....3
POLS 3220 Russian and East European Government and Politics (F) .........................................................3
POLS 3230 Middle Eastern Government and Politics (F) ..........3
POLS 3250 Chinese Government and Politics (F) ........................3
POLS 3270 Latin American Government and Politics (F) .......3
POLS 3430 Political Geography (Sp) .........................................3
POLS 4120 European Union Politics (Sp) ...............................3
POLS 4120 (CI) Ethnic Conflict and Cooperation (Sp) ............3
POLS 4230 Issues in Middle East Politics (Sp) .........................3
POLS 4260 Southeast Asian Government and Politics (Sp) .....3
POLS 4410 Global Negotiations (Sp) ........................................3
POLS 4450 (CI) United States and Latin America (Sp) .........3
POLS 4890* Special Topics (F,Sp) ............................................3
POLS 5120 Economics of Russia and Eastern Europe, 9th Century to 21st Century (F) .........................................................3
POLS 5140 Law, Politics, and War (F) ......................................3
POLS 5210 Comparative Political Change/Development (F) ....3
POLS 5230 Development in the Middle East (Sp) ....................3
POLS 5270 Latin American Politics and Development (Sp) ....3
POLS 5290 Development in Europe (Sp) ....................................3
POLS 5350 Evolution, Conflict, and Cooperation (Sp) ..........3
POLS 5440 Gender and World Politics (Sp) ............................3

4. Political Theory
POLS 2300. Introduction to Political Theory, must be taken prior to taking any of the upper-division coursework listed below.

POLS 3310 American Political Thought (F) ...............................3
POLS 3320 The Foundations of American Constitutionalism ....3
POLS 4130 Constitutional Theory (Sp) .......................................3
POLS 4310 (CI) History of Political Thought I (Sp) .................3
POLS 4320 History of Political Thought II (Sp) .........................3
POLS 4890* Special Topics (F,Sp) ............................................3

F. Electives (6 credits)
In addition to the 15 credits of required prerequisite courses and the 15 credits of area courses, students must complete six upper-division elective credits. Any upper-division Political Science courses may be used to fulfill this requirement, with two exceptions:

1. Not more than three credits in Directed Readings courses (POLS 4910) can apply to this requirement.

2. Not more than three credits in the following courses can apply to this requirement:
   POLS 5910 Campaign Internship (F,Sp,Su) .........................1-12
   POLS 5920 Washington Internship (F,Sp,Su) ......................1-12
   POLS 5930 State Government Internship (F,Sp,Su) ..............1-12
   POLS 5940 Administrative Internship (F,Sp,Su) ...................1-12

Sample Four-year Plan for Political Science Major

Minimum GPA for Admission: 2.0, USU; 2.0, Career
Minimum GPA for Graduation: 2.5, major courses; 2.0, USU; 2.0, Career
Minimum Grade Accepted: C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3853.

E. Course Sequencing
Law and Constitutional Studies majors are required to complete POLS 1100 (U.S. Government and Politics) as a prerequisite to all 3000- and 4000-level Political Science courses. It is advised that Law and Constitutional Studies majors take POLS 3120 (Law and Politics) prior to POLS 4120 (American Constitutional Law), 4130 (Constitutional Theory), 5130 (Law and Policy), or 5140 (Law, Politics, and War).

F. Area Requirements (6 credits minimum)
Students must take a minimum of six upper-division credits in U.S. Government and Policy in addition to courses required for this major.

G. Electives (9 credits)
Any Political Science upper-division courses can be used to complete the major and fulfill this requirement, with two exceptions:

1. Not more than three credits in Directed Readings courses (POLS 4910) can apply to this requirement.

2. Not more than three credits in the following courses can apply to this requirement:
POLS 5910 Campaign Internship (F,Sp,Su) .......................... 1-12
POLS 5920 Washington Internship (F,Sp,Su) ......................... 1-12
POLS 5930 State Government Internship (F,Sp,Su) ................. 1-12
POLS 5940 Administrative Internship (F,Sp,Su) ...................... 1-12

Department of Political Science

Political Science Minor
Students can obtain a minor in political science by completing a total of 18 credits in the field. The following courses must be included:
- POLS 1100 (BAI) U.S. Government and Politics (F,Sp) ..........................3
- POLS 2100 Introduction to International Politics (F,Sp) (3 cr) or
- POLS 2200 (BSS) Comparative Politics (F,Sp) (3 cr) .............................3
- POLS 2300 Introduction to Political Theory (F,Sp) ...............................3

The remaining credits must be from upper-division courses.

Political Science Teaching Minor
This minor is designed specifically for students seeking careers in secondary education. Students must have at least 18 credits in political science courses chosen from a list available from the department and in the Guide to the Undergraduate Program in Secondary Education at USU, available at the USU Bookstore.

International Studies Major
Problems of security, development, ethnic conflict, and human rights, as well as problems relating to the environment and natural resources, are increasingly confronted at a global rather than a national level. With its theoretical models and real-world application, the study of international studies is an exciting and highly relevant interdisciplinary major. This program cultivates the development of language and intercultural skills, develops understanding of global problems and circumstances, and expands the students’ capacity to make informed judgments regarding complex international and global issues. For information about requirements for this major, see pages 342-343.

Internships
The department places approximately 40-45 students in government or related internships each year. Most of these internships work with a member of the Utah delegation to the U.S. Congress in Washington, D.C., a member of the Utah Legislature in Salt Lake City, a political campaign, a state or local administrative agency, or a lobbying group. Students in any major, of at least junior class standing, and having a minimum GPA of 3.0 are eligible to apply.

Pi Sigma Alpha
Pi Sigma Alpha is the national honorary political science society. A member must have earned at least 15 credits in political science courses with a minimum 3.0 GPA and a minimum 3.0 GPA overall.

Financial Support
The Political Science Department offers a number of scholarships yearly to students. Contact the Political Science department office for applications (usually available around the first week of January and due back the first week of February) at (435) 797-1306 or visit the office in Main 320.

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information
For detailed information about requirements for the majors and minors within the Political Science Department, see the major requirement sheets, which can be obtained from the department, or online at: http://www.usu.edu/ats/majorsheets/

Graduate Programs

Departmental Admission Requirements
Applicants must have a BS or BA degree. An undergraduate GPA of 3.0 or better, or a GPA of 3.5 or better over the last 90 semester credits of undergraduate coursework is required. Students must have quantitative, verbal, and analytical GRE scores at or above the 50th percentile. Applicants with very high GPAs and other exceptional supporting materials may petition for admission with deficient GRE scores. The graduate admissions committee will review petitions individually.

International students must receive a score of 550 or better on the TOEFL exam.

Due to limited space, acceptance into Political Science graduate programs is not guaranteed, even for students who meet admission requirements. Moreover, all students are expected to perform at high levels throughout their program. Any student receiving a C grade or lower for any course at any level or a grade point average below 3.0 for a given semester will be placed on academic probation. Receipt of two grades of C or lower or a grade point average below 3.0 for two semesters will result in termination from the program. In addition, students must meet the requirements of the School of Graduate Studies. Applicants not meeting minimum requirements may be allowed to correct deficiencies concurrently with graduate coursework.

Applications will be considered throughout the year. However, students who wish to be considered for financial aid outside of the department must submit applications by March 15 for the coming academic year.

No application will be considered until all required information arrives in the office of the School of Graduate Studies.

Assistantships
The department appoints a number of teaching assistants, each with a $7,000 annual stipend. Appointments are for one year, and may be renewable for a second year. Research assistantships and government internships are sometimes available as well. Applications are available from the Political Science Department and are due on March 15.
Course Requirements

Effective Fall 2006, the master’s degree in Political Science will consist of three area tracks, with each student choosing one of the three. Details of requirements and courses follow. Completion of the degree requires a total of 30 credits, along with a thesis.

Public Policy Track

Required Courses (6 credits)
POLS 6010 Research Design (F) ............................................. 3
POLS 6020 Public Policy Analysis (Sp) .................................. 3

Elective Courses (12 credits)
Students must complete 12 credits, chosen from the following list:
BA 6420 Financial Problems (F) ............................................. 3
POLS 4480 International Trade Policy (Sp) ............................ 3
POLS 5110 Social Policy (F) ................................................... 3
POLS 5130 Law and Policy (Sp) ............................................. 3
POLS 5100 Introduction to Public Administration ...................... 3
POLS 6400 United States Foreign Policy .................................... 3
Political Theory and Democracy (course being developed)

Note: Students in the Public Policy Track may also select courses from the Democratic Theory and Practice Track.

Democratic Theory and Practice Track

Required Courses (6 credits)
POLS 6010 Research Design (F) ............................................. 3
POLS 6240 Democratic Theories and Practice (F) ..................... 3

Elective Courses (12 credits)
Students must complete 12 credits, chosen from the following list:
ECON 4510 Comparative Economic Systems (Sp) ................. 3
POLS 4480 International Trade Policy (Sp) ............................ 3
POLS 5130 Law and Policy (Sp) ............................................. 3
POLS 5140 Law, Politics, and War (F) .................................... 3
POLS 5230 Development in the Middle East (Sp) .................... 3
POLS 5290 Development in Europe (Sp) ................................. 3
POLS 6100 Introduction to Public Administration ...................... 3
POLS 6250 Theories of War and Peace (F,Sp) ......................... 3
POLS 6400 United States Foreign Policy .................................... 3
Democratic Theories and Practice (F) ..................................... 3
Comparative Politics: Asia (course being developed)
Political Theory and Democracy (course being developed)

Note: Students in the Democratic Theory and Practice Track may also select courses from the Conflict and Security Track.

Conflict and Security Track

Required Courses (6 credits)
POLS 6010 Research Design (F) ............................................. 3
POLS 6210 Conflict and Security (Sp) ..................................... 3

Elective Courses (12 credits)
Students must complete 12 credits, chosen from the following list:
ECON 5150 Comparative Economic Systems (Sp) ................. 3
POLS 5140 Law, Politics, and War (F) .................................... 3
POLS 5230 Development in the Middle East (Sp) .................... 3
POLS 5270 Latin American Politics and Development (Sp) ........ 3
POLS 6230 Terrorism and Counter-Terrorism (Sp) ..................... 3
POLS 6400 United States Foreign Policy .................................... 3
Comparative Politics: Asia (course being developed)
Political Theory and Democracy (course being developed)

Note: Students in the Conflict and Security Track may also select courses from the Democratic Theory and Practice Track.

Other Requirements (12 credits)

The remaining 12 credits needed for the degree may be chosen from the following:
POLS 6910 Graduate Tutorial (F,Sp,Su) ................................. 1-3
(not may count up to 6 credits toward the degree, subject to approval)
POLS 6920 Internship (F,Sp,Su) ............................................. 1-15
(not may count up to 3 credits toward the degree, subject to approval)
POLS 6970 Thesis Research (F,Sp,Su) .................................... 1-9
(not may count up to 3 credits toward the degree)
Approved graduate courses taught outside of Political Science ...... 1-3

Political Science Faculty

Professors
William L. Furlong, Latin America, Central America, democratization, development
Peter F. Galderisi, parties, elections, interest groups, research methods, statistics
Carolyn Rhodes, international relations, comparative politics, European union, trade
Randy T. Simmons, environmental politics and policy, public choice

Adjunct Professors
Larry Boothe, national security policy
Brian Theadore “Ted” Stewart, constitutional law
James L. Waite, European policy, comparative European government, methodology, public opinion

Professor Emeritus
Stanford Cazier, U.S. government, public law

Associate Professors
David B. Goetze, human cooperation and conflict, ethnic conflict, evolutionary theory
Robert M. Herbst, public choice, health policy, public policy
Patricia D. Julnes, public administration, organization theory, information technology management, quantitative and statistical methods
Michael S. Lyons, U.S. government, Congress, public policy, elections
Peter McNamara, political theory
Anthony A. Peacock, public law
Veronica Ward, international relations, social choice, global environmental issues, conflict and cooperation

Adjunct Associate Professor
Charles E. Kay, environmental policy ecology

Assistant Professors
Huiyun Feng, Chinese politics, East Asian politics, comparative politics, international relations
V. James Strickler, public law

Department of Political Science

Senior Lecturer

Carol L. McNamara, political theory, presidency

Lecturers

Jeannie L. Johnson, international relations, comparative cultures
Shannon Peterson, international relations, foreign policy

Course Descriptions

Political Science (POLS), pages 694-696.
Latin American Studies (LATS), page 658.
Psychologists endeavor to scientifically understand the thought processes, emotions, and behavior of both humans and animals. Psychologists specialize in diverse areas. Some psychologists seek to better understand the interactions among genetic, biological, social, and psychological determinants of behavior. Other psychologists are concerned with how the body and brain create emotions, memories, and sensory experiences, and how these are perceived and interpreted. Still others are concerned with how we learn observable processes, and how we process, store, and retrieve information. Additionally, psychologists focus their careers on the causes, assessment, and/or treatment of emotional and behavioral disorders. Psychologists utilize research methods to understand the causes of behavior, emotion, and thought processes.

### Assessment of Learning Objectives

**Didactic, Laboratory, Tutorial, and Independent Coursework**

All required, primary elective, and secondary elective courses in psychology address the programmatic learning objectives 1 through 6. Syllabi and ancillary course materials specify detailed learning objects in these six areas that are correlated with each unit of each course. Students complete a pre-test assessment in each of the courses pertaining to their knowledge, critical thinking and problem solving skills, principle mastery, and understanding of the scientific and quantitative methods encompassed by the discipline of psychology on which the course focuses. Their achievement of objectives in these areas is assessed periodically throughout the semester in the form of unit exams, written literature reviews or original research proposals, laboratory experiments and written exercises, or homework assignments. Post-tests are administered at the close of the semester. Records are kept of the students' performance in each area, and final course grades are determined based on mastery of the objectives.

Successful preparation and mastery of the programmatic objectives 5 and 6 are intensively addressed and assessed via the applied and research service-learning experiences that faculty offer to students via independent apprenticeship; independent research; independent applied service-learning coursework (PSY 2250, 4250, 4910, 4920, 5500, 5720, 5900, 5910, 5930, 5950, and 5960); supervision of honors' coursework in any of the required, primary elective, and secondary elective courses in psychology; active student engagement in professional psychological organizations that model the standards and expectations of each employment career or post-baccalaureate graduate education opportunity in psychology (Psi Chi, American Psychological Association, American Psychological Society, and Student Analysis of Behavior Association); student poster or paper presentations at professional societies; and student submissions to competitive undergraduate journals dedicated to teaching or research in psychology. Students prepare a detailed set of learning objectives tailored to the goals of their independently supervised teaching.
Department of Psychology

applied projects, and/or research projects. These objectives and goals form the basis for a contract to be fulfilled by the end of semester. In collaboration with the faculty or the appointed field supervisor, student progress and the final grade are assessed based on the students' successful and productive efforts toward mastering the objectives and meeting their goals. Students are expected to demonstrate mastery of the requirements of the American Psychological Association Style Manual (5th edition) in their required courses and selected coursework from the primary electives. Effective Fall 2006, students entering the psychology major must take PSY 2950 and 4950 instead of PSY 5950 and 5960. (PSY 4950 is currently being developed.)

PSY 5950 and 5960 additionally provide students with the presentation and documentation skills needed to achieve objectives 5 and 6 (e.g., to prepare and successfully complete applications for employment, employment interviews, graduate school admission materials, letters of intent, candidate interviews, a resume, and a curriculum vita). Because PSY 5950 provides specific information that students need to document their competency and achievement of learning objectives 5 and 6, the department strongly advises students to enroll in PSY 5950 very early in their undergraduate careers. Students should take this course as soon as they know they wish to major in psychology. PSY 5950 should be taken no later than the semester immediately following admission to the major. (Because this course should be taken as early as is feasible, plans are underway to renumber PSY 5950 to the undergraduate level to promote earlier enrollment.) Students are also strongly advised to affiliate themselves with a faculty mentor early in their careers and to participate actively in the teaching and research experiences that will help them document continued achievements and mastery of objectives 5 and 6. Students should thus also enroll early in the independent research study or applied courses (PSY 4910, 5900, 5910, and 5930).

Departmental-level Competency Assessments

Students are required to complete a pre-test, as well as two post-tests, and to submit written documentation of their progress and program accomplishments. Students should make arrangements with the Psychology Advising Office to complete the pre-test and the two post-tests, and they should submit all written documentation to this office.

Student completion of the departmental competency pre-test in psychology is a formal requirement for admission to the psychology major. The pre-test is a web-based, multiple-choice assessment of students’ incoming knowledge and mastery of required and elective coursework, and is correlated with the programmatic learning objectives 1-4. The Psychology Advising Office will not initiate the graduation application process until students have additionally completed two formal post-test assessments of their progress through the program, which are correlated with learning objectives 1-4. Specifically, students must take the departmental competency post-test in psychology, which is similar but not identical to the pre-test, as well as a departmentally prepared and administered analogue of the Graduate Record Examination subject test in psychology. Students’ performance in each content area of the three tests is recorded and maintained in a confidential, password-protected file accompanied by students’ pre-test and post-test scores from assessments administered in each USU-affiliated course in psychology. Graduation is not currently contingent upon the level of performance on these tests. Test performance is used, however, as a formative assessment of programmatic achievement.

Final approval of each student’s application for graduation is additionally contingent upon the student’s submission of three documents to the advising office. The student must submit a professionally prepared curriculum vita in APA style, in both hard copy and electronic (PDF) format. The vita must reflect the culmination of the student’s research, applied, and service-learning experiences and accomplishments in, or related to, the field of psychology. The vita must be current, must reflect all of the student’s work (up to two weeks prior to graduation), and may include his or her scores on standardized national tests (e.g., the GRE, MCAT, LSAT, and/or MAT, where applicable). It should also include a current e-mail address and phone number that will allow the student to be contacted after graduation to volunteer information regarding his or her post-graduation successes. Along with the vita, each student must submit an accompanying approval form that has been signed by his or her faculty mentor, or USU-affiliated and approved sponsor. The student must additionally complete a departmental exit survey that compiles information regarding the student’s perception of the program and his or her success in securing employment or admission to graduate programs. The vita and survey documents are used to assess program objectives 5 and 6.

The courses in Psychology and the electives available in related departments allow students to tailor their education to meet specific career goals. Some students who major in psychology may qualify for admission to unique specialty tracks: (1) the (secondary education) Teaching Major; (2) Behavior Analysis Skill Track; (3) Interpersonal Relationships Skill Track; and (4) Graduate School Preparation Track. A human services/caseworker training option may also be available to majors.

Students can complete the major or minor in psychology either on-campus (Logan), or through the USU Distance Education system (all required courses and selected electives are offered every 1-2 years) available throughout the State of Utah. The specific requirements for the skill tracks, the Apprenticeship, the on- and off-campus (distance education) options, and for how psychology electives can be used to advance students’ career goals can be obtained from the Psychology Advisement Office, Eccles-Jones Education Building, Room 475, (435) 797-1456.

Requirements

Pre-psychology Admission Requirements

Students are admitted to the Department of Psychology as Pre-psychology majors by meeting the Utah State University admission requirements (see pages 16-20). To be a Psychology major, a student must make written application to the department, after meeting the following prerequisites: (1) completion of at least 40 semester credits with a cumulative GPA of 2.75 or higher; (2) completion of at least 18 credits of the University Studies requirement with a GPA of 2.75 or higher; and (3) completion of PSY 1010, 1100, 1400, 1410, and 2800 with a GPA of 3.0 or higher. Application to the department should be made during the semester in which these prerequisites will be completed.

A student who wishes to be officially recognized as a psychology major or psychology teaching major must submit a formal application to the Department of Psychology Undergraduate Advising Office at Utah State University. The formal application will be reviewed and approved by the USU Psychology Department advisorial staff only. This contingency applies to all students, including those in the on-campus programs and in any of the USU Distance Education, Continuing Education, or Extension programs. Applications that have been reviewed by a USU Psychology Department advisor and meet all requirements will be processed in a timely fashion.

Students who wish to fulfill the major requirements via any of the USU Distance Education, Continuing Education, or Extension programs or sites must contact the Psychology Department Advising Office on the
Logan campus to be informed of the contingencies regarding timely progression through the program. Students need to carefully review their program of study with the Psychology Department Advising Office. Students should be aware that their program of study will be delayed when either (1) they fail to contact advisors at the Logan campus or (2) Continuing Education deviates from the published schedule of courses.

General Undergraduate Psychology Major:
Required Courses (22 credits), plus
Primary Electives (16 credits),
Secondary Electives (3 credits), and
Apprenticeship (6 credits)

Requirements for a psychology major consist of a broad preparation of 22 credits of specified coursework, plus a minimum of 19 credits of approved Psychology elective courses, and 6 credits of an apprenticeship, which allows for integration of coursework knowledge (theory) through application, for a total of 47 credits. At least 20 Psychology credits must be upper-division, 12 of which must be taken at USU.

A. Required Courses (22 credits)
PSY 1010 (BSS) General Psychology (F,Sp,Su) .........................3
PSY 1100 Developmental Psychology: Infancy and Childhood (F,Sp) ..........................3
PSY 1400 Analysis of Behavior: Basic Principles (F,Sp,Su) ................3
PSY 1410 Analysis of Behavior: Basic Principles Lab (F,Sp,Su) ................1
PSY 2800 (QI) Psychological Statistics .................................................3
PSY 3500 Scientific Thinking and Methods in Psychology (F,Sp) ........................................3
PSY 5100 History and Systems of Psychology (Sp) ........................................3
PSY 5330 Psychometrics (F) ..........................................................3

B. Primary Elective Courses (16 credits)
Group 1. Select 3 credits from the following:
PSY 3510 Social Psychology (F,Su) .................................................3
PSY 4210 Personality Theory (Sp) ...........................................3

Group 2. Select 3 credits from the following:
PSY 3450 Perception and Psychophysics (F) .................................3
PSY 3460 Physiological Psychology (Sp) ........................................3

Group 3. Select 4 credits from the following:
PSY 3400 Analysis of Behavior: Advanced (F,Sp) .............................4
PSY 4420 Cognitive Psychology (Sp) (3 cr) and
PSY 4430 Cognitive Psychology Laboratory (Sp) (1 cr) ..........................4

Group 4. Select 6 credits from the following:
PSY 3110 Health Psychology (Sp) ................................................3
PSY 3120 Abuse, Neglect, and the Psychological Dimensions
of Intimate Violence (F,Su) .........................................................3
PSY 3210 Abnormal Psychology (F,Sp) ........................................3
PSY 5200 (CI) Introduction to Interviewing and Counseling (F) ................3
Behavior Pharmacology course (under development) ..........................3

C. Secondary Elective Courses (3 credits minimum)
Select at least 3 credits from the following. (A course from the
Primary Electives list may count as fulfilling the Secondary Elective
requirement if and only if it has not been counted as a Primary Elective
requirement.)

PSY 1210 Psychology of Human Adjustment (F,Sp) .........................3
PSY 2100 Developmental Psychology: Adolescence (Sp) ........................3
PSY 3680 Educational Psychology for Teachers (F,Sp) .......................2
PSY 3720 Behavior Modification (Sp) ................................................3
PSY 4230 Psychology of Gender (Sp) ..............................................3
PSY 4240 Multicultural Psychology (F) ............................................3

PSY 4510 (CI) Effective Social Skills Interventions (Sp) .......................3
PSY/PEP 4000 Mental Aspects of Sports Performance
(F,Sp,Su) (3 cr) or
PSY/PEP 5050 Psychological Aspects of Sports Performance (Sp) (3 cr) .........................3
PSY/COMD 4790 Psychological Principles and Individuals who are
Deaf and Hard of Hearing (Sp) ....................................................3
PSY/SPED 5720 Behavior Analysis Practicum (F) ............................3
SPED 1010 (BSS) Disability in the American Experience ..................3

D. Required Apprenticeship Courses (6 credits)
PSY 5950 (CI) Undergraduate Apprenticeship I (F,Sp) ........................3
PSY 5960 (CI) Undergraduate Apprenticeship II (F,Sp) ........................3

A minor in another area is required. A minimum overall USU GPA of 2.75 is required for graduation, with a minimum GPA of 3.0 in Psychology. Students must receive a grade of C- or better in all psychology courses (USU and transfer) in order to have them counted toward major requirements. (Students desiring licensure for teaching in secondary schools must also meet the requirements of the Secondary Education Department.)

Students must meet the above minimum requirements in order to graduate with a major in psychology. These requirements include completing all of the required assessments and providing the supporting documentation (see Assessment of Learning Objectives on pages 479-480).

Meeting these minimum requirements alone is insufficient to prepare for competitive employment opportunities or to secure admission to graduate school. Students who are planning to secure optimal employment or graduate admissions need to first affiliate with a faculty mentor, as well as become involved in research or applied experiences with the faculty member, as soon as they know they will pursue a major in psychology. These students should enroll in one of PSY 5900, 5910, or 5930 as soon as they have identified a mentor and have met Utah State University’s admission requirements for the Department of Psychology Pre-psychology Major designation. They should pursue PSY 5950 early in their undergraduate career and no later than the semester following admission to the psychology major. They should pursue their own creative research opportunity experience with the faculty member and enroll in PSY 4910 during the second semester of their junior year and absolutely no later than the first semester of their senior year. They should plan to enroll in an additional section of PSY 5900, 5910, or 5930 during their senior year.

Suggested Sample Four-year Plan
for Psychology Major

Freshman Year (30 credits)
Fall Semester (15 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ............3
PSY 1010 (BSS) General Psychology ...........................................3
STAT 1040 (QL) Introduction to Statistics ..................................3
University Studies Breadth courses\* ..............................................3
Passing scores on Computer and Information Literacy
(CIL) exams\* ...........................................................................6
(Note: The CIL requirement is met only by passing all six exams.)

Spring Semester (15 credits)
PSY 1400 Analysis of Behavior: Basic Principles .........................3
PSY 1410 Analysis of Behavior: Basic Principles Lab .................1
PSY 2800 (QI) Psychological Statistics ........................................3
University Studies Breadth courses\* .............................................6
Elective course(s) .................................................................2

Utah State University 2006-2007 General Catalog 481
Department of Psychology

Sophomore Year (30 credits)
Fall Semester (15 credits)
PSY 1100 Developmental Psychology: Infancy and Childhood .......3
PSY Primary Elective course (chosen from group 1, 2, 3, or 4)6-7
University Studies Breadth coursea ................................................3
Course counting toward minor .....................................................3

Spring Semester (15 credits)
ENGL 2100 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode .................................................................3
PSY 3500 Scientific Thinking and Methods in Psychology ...........3
PSY 5960 Undergraduate Apprenticeship I ....................................3
PSY Primary Elective course (chosen from group 1, 2, 3, or 4)3-4
Course counting toward minor .....................................................3

Junior Year (30 credits)
Fall Semester (15 credits)
Elective course(s) ...........................................................................3
PSY 5330 Psychometrics .................................................................3
PSY 5960 Undergraduate Apprenticeship II .................................3
PSY Primary Elective course (chosen from group 1, 2, 3, or 4)3-4
Elective course(s) ...........................................................................3

Spring Semester (15 credits)
PSY 5100 History and Systems of Psychology ..............................3
PSY Primary Elective course (chosen from group 1, 2, 3, or 4)3-4
University Studies Depth course (DHA or DSC)..........6
Elective courses ...........................................................................6

Senior Year (30 credits)
Fall Semester (15 credits)
University Studies Depth course (DHA or DSC)........................3
PSY Secondary Elective course ......................................................3
Course counting toward minor .....................................................3
Elective courses ...........................................................................6

Spring Semester (15 credits)
Elective courses or courses counting toward minor (as needed)....15

Note: In order to graduate, students must complete at least 120 credits with a minimum USU GPA of 2.75. Of these 120 credits, 40 credits must be completed in upper-division courses (numbered at the 3000-level and above). For psychology courses used to complete the major, a minimum GPA of at least 3.0 is required, with no grades below C-

To enroll in STAT 1040, students must have: (1) completed MATH 1010, (2) achieved a score of 70 percent or higher on the MATH 1050 placement test, (3) received an ACT score of 19 or higher, or (4) received an SAT score of 480 or higher.

All upper-division psychology courses are state-approved courses and are transferable. Students completing the psychology major at USU must complete all psychology courses (USU and transfer) in order to have them counted toward minor requirements.

A. Required Courses (10 credits)
PSY 1010 (BSS) General Psychology (F,Sp,Su) .........................3
PSY 1100 Developmental Psychology: Infancy and Childhood (F,Sp).3

B. Electives (8 credits)
Choose course(s) from required or primary elective courses listed for the Psychology Major to total 18 credits.

The student’s grade point average for all psychology courses, USU or transfer, must average 3.0 or above to qualify for credit toward the minor. At least 12 credits of the 18 required credits must be completed at USU. Students must receive a grade of C- or higher in all psychology courses (USU and transfer) in order to have them counted toward minor requirements.

Psychology Teaching Major:
Required Psychology Courses (27 credits), plus
Elective Psychology Courses (16 credits)

Requirements for a Teaching Major in Psychology broadly consist of 27 credits of specified psychology coursework and 16 credits of elective psychology coursework, for a total of 43 credits in psychology. Only 16 of these 43 psychology credits may be taken in lower-division courses. The remaining 27 credits must be received in 3000- or 4000-level psychology courses. At least 12 of the upper-division credits must have been earned in courses completed at USU. A minor in another field of study is also required. Prospective teachers must complete 35 credits of the Secondary Teacher Education Program (STEP) in the Department of Secondary Education. Required GPA for psychology courses is 3.0. Students must receive a grade of C- or better in all psychology courses (USU and transfer) in order to have them counted toward major requirements.

A. Required Courses (27 credits)
PSY 1010 (BSS) General Psychology (F,Sp,Su) .........................3
PSY 1100 Developmental Psychology: Infancy and Childhood (F,Sp).3
PSY 1400 Analysis of Behavior: Basic Principles (F,Sp,Su) ...........3
PSY 1410 Analysis of Behavior: Basic Principles Lab (F,Sp,Su) ...........1

B. Electives (16 credits)

Group 1. Select 3 credits from the following:
PSY 3510 Social Psychology (F,Su) ..................................................3
PSY 4210 Personality Theory (Sp) .....................................................3

Group 2. Select 3 credits from the following:
PSY 3450 Perception and Psychophysics (F) .................................3
PSY 3460 Physiological Psychology (Sp) .........................................3

Group 3. Select 4 credits from the following:
PSY 3400 Analysis of Behavior: Advanced (F,Sp) .........................4
PSY 4420 Cognitive Psychology (Sp) (3 cr) and
PSY 4430 Cognitive Psychology Laboratory (Sp) (1 cr) ..................4

Group 4. Select 6 credits from the following:
PSY 3110 Health Psychology (Sp) ....................................................3
PSY 3120 Abuse, Neglect, and the Psychological Dimensions of Intimate Violence (F,Su) .........................................................3
PSY 3210 Abnormal Psychology (F,Sp) ............................................3
PSY 5200 (CI) Introduction to Interviewing and Counseling (F) ........3

Behavior Pharmacology course (under development) .................3

1To enroll in STAT 1040, students must have: (1) completed MATH 1010, (2) achieved a score of 70 percent or higher on the MATH 1050 placement test, (3) received an ACT score of 19 or higher, or (4) received an SAT score of 480 or higher.

2To fulfill the breadth requirements, students must complete one course from each of the six breadth areas (BAI, BCA, BHU, BLS, BPS, and BSS). PSY 1010 will fulfill the BSS requirement. At least two of the remaining five breadth courses must be completed in courses having a USU prefix.

3Students may fulfill the CIL requirement by taking OSS 1400 and receiving passing scores on all six required CIL exams, which are included in this course. OSS 1400 may be substituted for one of the elective courses.

4Apprenticeship courses are in a state of change. Accommodations will be made for students wishing to complete their degrees under the requirements previously in place, or under the new courses, when they become available.

5Students must complete 4 credits chosen from Group 3. Students must complete 6 credits (or two courses) chosen from Group 4.
Department of Psychology

C. Secondary Teacher Education Program (STEP) (35 credits)
Admission to Secondary Education must be completed approximately one semester before the following courses may be taken.

Level 1 (15-week courses) (11 credits)
Students at Level 1 must complete the following courses:
- INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su) .............. 1
- SCED 3100 Motivation and Classroom Management (F,Sp) ............... 3
- SCED 3210 (CI) Educational and Multicultural Foundations (F,Sp) .... 3
- Special Methods Course (major or minor)6 ........................................... 3
- Clinical Experience I Course (major or minor)6 ............................... 1

Level 2 (15-week courses) (12 credits)
Students at Level 2 must complete the following courses:
- SPED 4000 Education of Exceptional Individuals (may be taken anytime) (F,Sp,Su) .................................................... 2
- SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) ............... 3
- SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) .... 3
- Special Methods Course (major or minor)6 ........................................... 3
- Clinical Experience II Course (major or minor)6 ............................... 1

Level 3 (includes 13 weeks of student teaching and 2 weeks of Student Teaching Seminar) (12 credits)
- SCED 5500 Student Teaching Seminar (2 weeks) (F,Sp) ...................... 2
- SCED 5630 Student Teaching in Secondary Schools (13 weeks, full-time) (F,Sp) ................................................................. 10

6Students must complete a methods course and a clinical experience course for each of their teaching subjects. Students should check with the department offering their other teaching subject for methods and clinical experience course numbers in that subject. Students electing Psychology at Level 1 should register for SCED 3500 (methods course) and SCED 3300 (clinical course). Students electing Psychology at Level 2 should register for SCED 3500 (methods course) and SCED 4300 (clinical course).

Elective Psychology Courses (3 credits)

B. Electives (3 credits minimum)
Choose course(s) from required or primary elective courses listed for the Psychology Major to total 18 credits.

Note: The Psychology Teaching Minor also requires the completion of the Secondary Teacher Education Program (STEP) (35 credits). See section C under Psychology Teaching Major.

Skill Tracks for Undergraduate Majors in Psychology

The following skill tracks can be completed as part of a student’s major in Psychology. A skill track represents a cluster of courses that help provide more comprehensive knowledge and practical skill in particular areas. After admission as a major in Psychology, students may apply for admission to a skill track. Completing a skill track requires careful planning, so that skill track courses and all other required and elective courses for the major are fulfilled. Enrollment in a skill track is entirely optional for majors.

Behavior Analysis Skill Track
The following cluster of courses will provide psychology majors with a basic foundation in experimental and applied behavior analysis: PSY 1400, 1410, 3400, 4910, 5720; SPED 5010, 5050; BIOL 3010; and PHIL 4320 or 4900.

Interpersonal Relationships Skill Track
The following cluster of courses will assist psychology majors in systematically developing a broad range of interpersonal relationship skills, such as listening, assertiveness, negotiation, conflict resolution, anger management, etc.: PSY 1210, 3210, 3510, 4210, 4510, 5200; MHR 3710.

Graduate School Preparation Track
The major in Psychology has been designed so that students take classes that will help them compete in applying for graduate school. Students completing the graduate school track need to become actively involved with faculty research, form an association with Psi Chi, and enroll in independent research and readings courses. Students should also take a course covering use of statistical software (e.g., SPSS), offered through FCHD or Sociology. Furthermore, it is recommended that students take at least one upper-division course in statistics from Psychology, FCHD, or Sociology.

Students who pursue the skills tracks in Psychology are encouraged to become involved with the faculty in independent research or applied experiences. Involvement in these experiences is associated with greater chances of successful graduate school admission and/or competitive post-baccalaureate employment, especially for students who pursue this involvement early in their undergraduate careers.

The faculty who teach courses satisfying the skills track requirements are committed to working closely with students to hone their experiences and accomplishments in research methodology and applied fields of psychology.

These faculty have a solid track record in mentoring students. Their students have achieved remarkable success in procuring funding to support student-initiated research projects via Utah State University’s competitive University Research Cooperative Opportunity (URCO) mechanism and the national honor society of psychology (Psi Chi).

Their students have been first authors or co-authors on numerous scholarly presentations at regional, national, and international conferences in psychology (e.g., Association of Behavior Analysis, American Psychological Association, European Conference of Developmental Psychology, International Society for the Study of Behavioral Development, Society for Personality and Social Psychology, Society for Research in Adolescence, and Society for Research in Human Development). Their students have competed successfully each year for awards that recognize their achievements. Together with the faculty, the students have published in premier journals.
Department of Psychology

The Department of Psychology and Utah State University actively supports students’ efforts by awarding matching funding to support the attendance of conferences at which they can present their accepted conference presentations.

**Psychology Courses Fulfilling University Studies Requirements**

The following Psychology courses may be used to fulfill University Studies requirements, in the areas indicated:

- **Breadth Social Sciences (BSS):** PSY 1010.
- **Depth Social Sciences (DSS):** PSY 3120, 3210, 3400, 3500, 3510, 4210, 4230, 4240, 4420.
- **Communications Intensive (CI):** PSY 4510, 5200, 5950, 5960.
- **Quantitative Intensive (QI):** PSY 2800.

Although these courses may be applied toward fulfilling the University Studies breadth, depth, communications intensive, and quantitative intensive requirements, students must be prepared to complete additional writing or library assignments, as required for University Studies.

**Important Contingencies for Psychology Courses**

Prerequisites for Psychology courses are *strictly enforced*. The prerequisites are indicated, at the end of course descriptions, within the Psychology course listings (see pages 698-703).

A student must be admitted as a psychology major or must complete at least 45 semester credits with a GPA of 3.0 or higher prior to taking psychology courses numbered 3000 or above. However, students who have been admitted to the Teacher Education program may take PSY 3660, provided they have met the prerequisites. A student must be admitted as a psychology major or must complete at least 60 semester credits with a GPA of 3.0 or higher prior to taking psychology courses numbered 4000 or above.

Students desiring to receive credit for courses taken previously at other institutions will need to assure the Undergraduate Advising Office that the substitute class contained the requisite laboratory experience (where applicable).

Students who can complete a baccalaureate degree within seven years of enrollment at USU can qualify for graduation by meeting (1) the General Education/University Studies requirements in effect when they initially enrolled and (2) the major requirements in effect when they officially declared their major, even though there may have been changes in General Education/University Studies and major requirements since that time. Students who have not completed the baccalaureate requirements within seven years of their initial enrollment at USU must have their General Education/University Studies and major requirements evaluated and approved by their department head and dean. However, exceptions to this seven-year policy may be necessary for mandated changes in degree requirements.

Undergraduate psychology coursework (USU or transfer) that is *more than eight years old* may not be used toward meeting the specific psychology coursework requirements for a psychology major or psychology minor. However, the Psychology Department Undergraduate Committee may allow revalidation through testing. Testing arrangements may be made by contacting Karen Ranson at karen.ranson@usu.edu.

**Departmental Honors**

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school.

In the Psychology Department, students may complete an *Honors in University Studies with Department Honors* or a *Department Honors* only program. The requirements for departmental honors are as follows:

- **Honors Coursework**
  - Honors students must complete 12 credits in courses designated as Honors courses. These courses are selected by students, and are approved by the Department Honors Coordinator and individual faculty members. Any upper-division (3000-level or higher) course may be taken as Honors. Additional courses which will meet the criteria for an Honors designation are determined, in conjunction with the student, by the faculty members teaching the courses.

- **GPA Requirements**
  - To qualify for departmental honors, students must maintain a cumulative GPA of 3.3 and a GPA of 3.5 within upper-division major requirements and Honors coursework.

- **Senior Thesis**
  - In order to obtain departmental honors, students are required to design, conduct, and present a senior thesis/project under the supervision of a faculty mentor. The senior thesis/project can be built from the research component of PSY 5950 and 5960.

Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: [http://www.usu.edu/honors/](http://www.usu.edu/honors/)

**Additional Information**

For detailed information about course requirements for majors and minors within the Psychology Department, see the major requirement sheet, which is available from the department, or which can be accessed online at: [http://www.usu.edu/ats/majorsheets/](http://www.usu.edu/ats/majorsheets/)

**Graduate Programs**

**Admission Requirements**

Admissions requirements vary somewhat across Psychology graduate programs. However, applications submitted to the School of Graduate
Studies must include the following: (1) transcript showing completion of undergraduate course prerequisites, plus any recommended coursework; (2) report of GRE test scores from ETS; (3) GPA of at least 3.2, covering the last 60 semester credits; (4) three letters of recommendation; and (5) a statement of professional goals and intent. The department requires a minimum GRE combined (Verbal and Quantitative) score of at least 1,100 for all programs.

The deadline for submitting applications for the Combined Clinical/Counseling/School Psychology PhD program is January 15. Applications for the Research and Evaluation Methodology PhD program are reviewed throughout the year. The application deadline for the MS School Psychology program is March 1. Applications for the MS program in School Counseling must be submitted by June 1 during odd-numbered alternate years (e.g., 2003, 2005, etc.). With the exception of the PhD program in Combined Clinical/Counseling/ School, applications for programs may be accepted after these dates if openings still exist.

Students are admitted to Psychology master’s degree programs, including School Psychology and School Counseling, following completion of a bachelor’s degree. Prospective PhD program students can compete for admission to the Combined Clinical/Counseling/ School program or the Research and Evaluation Methodology program if they possess either a bachelor’s or a master’s degree.

Prerequisites for Admission to Graduate Programs

Applicants to the Master of Science (MS) and Doctor of Philosophy (PhD) program are advised that they should possess a broad base of knowledge at the undergraduate level in a substantive subgroup of the following: general psychology, human development, learning theory, cognition, personality theory research, psychometrics, elementary statistics, history and systems, physiological, sensation and perception, and social psychology. The absolute prerequisites for each graduate program are outlined below, along with a listing of graduate program course requirements for each program.

Psychology MS Programs

School Psychology, NASP-accredited

USU’s nationally accredited program in school psychology emphasizes child development issues, assessment and treatment of emotional and behavioral disorders, and traditional psychoeducational assessment and consultation activities appropriate to school settings. The program is approved by the Utah State Office of Education for licensure of school psychologists. Students are required to complete either a research thesis (Graduate School Plan A option), or a major literature review/synthesis paper (Plan B).

Absolute undergraduate course prerequisites for admission to the MS in School Psychology are as follows: (1) Elementary Statistics; (2) Theories/Research in Learning or Applied Behavior Analysis; (3) Abnormal Psychology; and (4) Theories/Research in Personality. The MS in School Psychology requires a minimum of 60 semester credits.

The following courses are required:
PSY 6150 Empirically Supported Treatments for Psychological Disorders of Children and Adolescents (Sp) .......................... 3
PSY 6220 Group Counseling (F) .............................................. 3
PSY 6270 Child Psychopathology (F) ......................................... 3
PSY 6290 Diversity Issues in Treatment and Assessment (Sp) ...... 3

School Counselor Education (NCATE-accredited)

Completion of this program qualifies graduates for professional licensure in School Guidance Counseling. Coursework is formulated to train students in a broad range of skills, including individual and group counseling for diverse populations; behavior and educational assessment and intervention; research and methodological foundations; ethical, legal, and professional standards. Experiential learning in the form of practicum and internship placements is a critical component of the program. The program is approved by the Utah State Office of Education and most other states. It is offered on campus and via a live, satellite distance education system (EDNET) to sites within Utah’s boundaries.

Absolute undergraduate course prerequisites for admission to the MS in School Counseling are as follows: (1) Theories of Personality, (2) Abnormal Psychology, and (3) Psychological Statistics (or equivalent).

The MS in School Counseling requires a minimum of 48 semester credits. The following courses are required:
PSY 6010 Introduction to Program Evaluation: Evaluation Models and Practical Guidelines (F,Su) ............................................ 3
PSY 6150 Empirically Supported Treatments for Psychological Disorders of Children and Adolescents (Sp) .......................... 3
PSY 6220 Group Counseling (F) .............................................. 3
PSY 6240 Introduction to School Counseling and Guidance (F) .... 3
PSY 6250 Internship in School Counseling and Guidance (F,Sp,Su) 10
PSY 6260 Career Development: Theory and Practice (Sp) ........... 3
PSY 6290 Diversity Issues in Treatment and Assessment (Sp) ....... 3
PSY 6330 Psychometrics (F) ................................................... 3
PSY 6340 Psychological and Educational Consultation (F) ........... 3
PSY 6350 Introduction to Theory and Practicum in Counseling (F) 3
PSY 6370 Practicum in School Counseling (F,Sp,Su) .................... 3
PSY 6460 Professional Issues in School Counseling and School Psychology (Sp) ......................................................... 3
PSY 6630 Developmental Psychology (F) ................................... 3
PSY 6610 Seminar (Grant Writing) (Su) ...................................... 2
Department of Psychology

PhD Programs

Combined and Integrated (C-I) Clinical/Counseling/School Psychology, (APA-accredited)

This program integrates the theory and practice of psychology common to the disciplines traditionally denoted as clinical, counseling, and school psychology. It subscribes to the scientist-practitioner model, and students completing the program will enter professional practice in a variety of settings, including VA hospitals, mental health centers, hospitals, clinics, schools, and academic settings. The program provides an excellent balance of research and practitioner skill training. Entering BS students can opt to earn an MS degree in either counseling psychology or school psychology prior to the PhD. A research thesis and dissertation are required of all students. The combined program provides generalized training, along with three areas of specialization. The emphasis areas are designed for students to begin systematically developing a specialty area in line with their future career goals. The three areas of specialization, which mirror faculty interest and expertise, are health psychology/neuropsychology, child clinical (with or without a school psychology emphasis), and rural and minority psychology. The program is also affiliated with the American Indian Student Project, one of the nation’s most successful programs for training and mentoring American Indian PhD psychologists.

Complete information on accreditation guidelines and principles is available through the Committee on Accreditation (CoA) at Education Directorate, American Psychological Association, 750 First Street NE, Washington DC 20002-4242, (202) 336-5979, or on the web at: http://www.apa.org/ed/accreditation/

Absolute undergraduate prerequisites for admission to the PhD program in Combined Clinical/Counseling/School are as follows: (1) Elementary Statistics; (2) Theories/Research in Learning; (3) Abnormal Psychology; and (4) Theories/Research in Personality.

The Combined Clinical/Counseling/School Psychology PhD requires 107 total semester credits, including the following:

Note: The MS counseling psychology degree is available only to students matriculated into the PhD Clinical/Counseling/School program.

Research and Evaluation Methodology (REM)

The department offers a PhD program in research and evaluation methodology. The program is designed to produce specialists capable of contributing to the knowledge base in psychology and education utilizing experimental and evaluation methods. While satisfying the department's general requirements, students may design their programs to become specialists in a variety of areas, such as program evaluation, experimental health psychology, analysis of behavior, statistics, or similar areas. A research thesis and/or dissertation are required of all students.

Absolute undergraduate prerequisites for admission to the PhD program in Research and Evaluation Methodology are as follows: (1) Elementary Statistics, (2) Psychometrics, and (3) History and Systems of Psychology.

The Research and Evaluation Methodology PhD requires a minimum of 63 total credits past the MS degree (total of 40 credits):

Specialty Area Electives (21 credits):
Students should consult with their supervisory committee to determine which Specialty Area Electives they should complete.

Additional Requirements for Psychology PhD Programs
All PhD candidates must meet the following general core requirements, regardless of specialty emphasis: (1) submission of an article for publication in a recognized journal; (2) presentation of research findings at a regional or national convention or professional meeting; (3) completion of the doctoral dissertation; (4) a comprehensive literature review; (5) completion of the research core; and (6) completion of an apprenticeship or internship. Students in the combined PhD program must also complete a formal case presentation, and compete nationally for admission to an APA-approved, 2,000-hour predoctoral internship. The Research and Evaluation Methodology program has an additional requirement of a grant proposal.

Research Opportunities for Students
Departmental faculty are heavily involved in basic and/or applied research. A sampling of the diverse research interests of tenured and tenure-track faculty available to students includes: Ascione—prosocial, moral development, domestic violence, relation between cruelty to animals and psychopathology; Bates—adolescent problem behavior prevention, community-level prevention, higher education teaching and learning; Cheney—behavioral pharmacology, basic operant learning; Crowley—anxiety, depression, supervision and training; DeBerard—health psychology, behavioral medicine, spinal surgery outcome and technique efficacy; Domenech Rodriguez—Latino family dynamics, parent training programs; Fargo—statistical methods, quantitative neuropsychology, seizure disorders, classification statistics; Ferguson—social skills, guilt/shame development, social cognition; Field—adolescent behavior disorders, rural mental health issues, school psychology; Franco—student services, minority health issues, multicultural psychology; Galliher—social and dating relationship processes and dynamics in adolescence and rural mental health service delivery; Gilbertson—early intervention and prevention of behavior problems, school psychology; Gimpel Peacock—ADHD, behavioral disorders of children; Julnes—evaluation theory, human service delivery, family; Lehman—Web/Internet learning variables and efficacy, educational psychology; Odum—experimental analysis of behavior, behavior pharmacology; Roberts—early intervention with families of young children, community-based systems of services; Schroder—sexual risk behavior, models of health behavior, stress and coping; Shaham—experimental analysis of behavior, drug self-administration, behavior momentum, conditioned reinforcement, behavior economics; Sinex—processing of central auditory system, neuropsychology of sound discrimination; Stein—addictive behaviors and models, drug and alcohol prevention/treatment; Tschanz—neuropsychology of Alzheimer’s disease and other dementias; White—educational research, hearing loss detection in infancy, and program evaluation.

Graduate Student Financial Assistance
Financial support for students enrolled in terminal MS programs is limited. MS students should meet with their academic advisor for information about possible assistantship opportunities.

PhD students are guaranteed an assistantship for at least their first year. However, for at least the last 15 years, 100 percent of PhD students have continued to enjoy assistantship support beyond their first year, if they desired it. The department also has available a number of teaching assistantships. Though these are generally awarded to students matriculated in psychology PhD programs, they are occasionally given to exceptional MS students. Also, faculty in the department and college regularly offer research assistantships to graduate students, as does the Counseling Center and a variety of on- and off-campus facilities (e.g., Center for Persons with Disabilities, Bear River Mental Health Center, Head Start, and Early Head Start). Additionally, first-year psychology PhD students typically compete extremely well for several University Fellowships, which were established to attract top student scholars to USU. Furthermore, the department has some scholarship support specifically available to psychology graduate students (e.g., Walter Borg and Elwin Nielsen scholarships). Finally, in accordance with current School of Graduate Studies policy, PhD students may qualify for full tuition remission for up to 70 credits of their program.

Psychology Faculty
Professors
Frank R. Ascione, developmental
Carl D. Cheney, physiological
Susan L. Crowley, counseling
Tamara J. Ferguson, social and developmental psychology
Richard N. Roberts, developmental
Charles L. Salzberg, applied behavior analysis
Donal G. Sinex, auditory neuropsychology
David M. Stein, clinical psychology
Karl R. White, research and evaluation methodology

Research Professors
Byron R. Burnham, qualitative evaluation methods
Russell Snyder, auditory neuropsychology

Professors Emeritus
Marvin G. Fifield, school and counseling
J. Grayson Osborne, behavior therapy, child
Blaine R. Worthen, research and evaluation methodology

Associate Professors
M. Scott DeBerard, health psychology
George Julnes, research and evaluation methodology
Gretchen Gimpel Peacock, school psychology
JoAnn T. Tschanz, neuropsychology, abnormal psychology, physiological psychology

Research Associate Professor
Mark S. Innocenti, school psychology

Assistant Professors
Scott C. Bates, social and community psychology
Jamison Fargo, statistical methods, neuropsychology
Clint Field, school psychology
Renee V. Galliher, clinical psychology
Donna M. Gilbertson, school psychology
Steve Lehman, educational psychology
Maria C. Norton, research and evaluation methodology
Amy I. Odum, behavior analysis
Melanie M. Domenech Rodriguez, counseling, child clinical
Timothy Shaham, behavior analysis
Kerstin E. E. Schroder, health psychology
Department of Psychology

Research Assistant Professor
Susan G. Friedman, research methods

Adjunct and Clinical Faculty
Ann M. Berghout Austin, infancy through childhood
Carolyn G. Barcus, counseling
David W. Bush, clinical/counseling
Robert S. Cook, rural and family interventions
Gwenaelle C. Couillard, training
Mary E. Doty, clinical
Monique Frazier, child clinical
Eric J. Gee, research and evaluation
Richard D. Gordin, Jr., sport and exercise psychology
Randall M. Jones, family research management
Joan A. Kleinke, counseling and personnel services

J. Russell Mason, sensory evaluation, ethology
Kent E. Nabers, gero-psychology
Mark A. Nafziger, counseling psychology
D. Kim Openshaw, marriage and family therapy
Lori A. Roggman, developmental
Thomas R. Schenkenberg, neuropsychology
Patricia L. Truhn, neuropsychology, crisis intervention
Brian Tschanz, social psychology
Beth Walden, research and evaluation methodology
Leland J. Winger, Jr., clinical
Jean Wollam, educational psychology

Religious Studies Major and Minor

Department Head: Norman L. Jones
Location: Main 323
Phone: (435) 797-1290
FAX: (435) 797-3899
TTY: (435) 797-1290
E-mail: monica.ingold@usu.edu
WWW: http://www.usu.edu/history

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA)

Program Description

The Religious Studies BS or BA degree requires a total of 36 credits for the major, as well as 15 credits in a complementary minor.

Students begin their course of study by completing two lower-division courses. One of these courses is a survey of religions, and the other is a methodology course.

Students must take 27 credits of upper-division coursework, distributed over the following three areas: Cultural Inquiry (humanistic approaches), Scientific Inquiry (social scientific approaches), and Doctrinal Inquiry (philosophical and theological approaches).

At the end of the program, students completing either the BA or the BS degree must take a capstone seminar.

The minor in religious studies requires the same two lower-division courses as the major, and at least one upper-division course chosen from each of the three areas of approach.

Purpose and Outcomes

Students completing the BA or BS degree in Religious Studies should be able to demonstrate the ability to:

1. understand the influence of religion upon culture, and the influence of culture upon religion;
2. analyze the influence of religious value systems on individuals;
3. apply appropriate methods of research and argumentation to questions concerning religion and culture;
4. communicate their findings in clear, well-reasoned writing; and
5. express cultural literacy concerning the major religions of the world.

Requirements

New students accepted in good standing by the University may apply for admission to the Religious Studies Program. Students transferring from another institution or another major will be admitted if they have an overall minimum GPA of 2.5.

Candidates must earn a grade of C or better in all courses used to meet the requirements of the Religious Studies major or minor.

Degree Options

Students in the program may work toward one of the following two degrees:

Bachelor of Arts (BA) Degree

Students enrolled in the BA degree focus their work on cultural questions within religious studies. Since sufficient coursework in a foreign language is required, students should consider completing courses offered by USU in Latin, Greek, Hebrew, Chinese, or Arabic languages. The BA degree requires a minimum proficiency in a foreign language. This proficiency may be established in one of the following ways:

1. Sixteen credits in a single language
2. Documentation of a proficiency level of “intermediate low” or better through an examination administered by the USU Department of Languages, Philosophy, and Speech Communication
3. Completion of any upper-division foreign language course constituting a third-year course of study with a grade of C or better

Bachelor of Science (BS) Degree

Students enrolled in the BS degree focus their work on quantitative or clinical questions within religious studies. Students should consider completing classes such as SOC 3110 (Methods of Social Research) and SOC 3120 (Social Statistics I). Students must complete 15 credits of math and science beyond the University Studies requirements.

Religious Studies Major

Students must complete at least 36 credits in interdisciplinary coursework. A grade of C or better must be earned in all classes used for the major.

Note: At the time this catalog went to press, courses having the Religious Studies (RELS) prefix had not yet been officially approved. Therefore, these courses are not listed in the Course Descriptions section of the printed catalog. Following approval, these courses will be shown in the online General Catalog, which can be found at: http://www.usu.edu/ats/generalcatalog/

Required Courses (9 credits)

RELS 1010 Religion and Culture .............................................3
Explores the ways in which religions shape cultures, and cultures shape religions. Covers the major modern religions. This course will be proposed for General Education credit.

RELS 2010 Introduction to Religious Studies Methodology .............3
Pre-major course helping students to understand the discipline of religious studies. Explores the questions asked by religious studies, as well as the methods used to answer these questions.

RELS 4990 Religious Studies Capstone .............................................3
In this course, students write a substantial research paper dealing with a religious studies topic and demonstrating their command of the research methods, documentation, and style of professional communication used in the discipline.

Elective Courses (27 credits)

Complete at least 6 credits of coursework in each of the following three divisions. The total credits for coursework completed in this section must be at least 27 credits.
Religious Studies Major and Minor

Cultural Inquiry
Courses in this section use the methods of the arts and humanities to explore religious expression and the ways in which religion and behavior interact over time.

Select at least two of the following courses:
ENGL 3070 (DHA) Perspectives in Folklore (F,Su) ......................... 3
In-depth study of folklore for nonmajors. Topics vary according to faculty expertise. Also taught as HIST 3070.

ENGL 3700 (CI) Regional Folklore (F,Sp) ................................. 3
Study of folklore and folklife as they relate to regional cultures. Also taught as HIST 3700.

HIST 3110 (DHA/CI) Ancient Near East ...................................... 3
Survey of history and civilization of ancient Mesopotamia, Egypt, and Israel, from prehistory to 500 B.C. Writing intensive. Prerequisite: ENGL 2010 or equivalent. Also taught as ART 3110.

HIST 3150 (CI) Roman History ................................................. 3
History of Rome from Neolithic era to “fall” of the Western Empire. Special emphasis on politics, art, literature, and civilization. Writing intensive. Prerequisite: ENGL 2010.

HIST 3220 (DHA/CI) Medieval European Civilization, 500-1500 .......... 3
Provides students with overview of major themes in medieval European history from 500 to 1500 A.D. Also introduces major historiographical problems related to this period. Writing intensive and document based. Prerequisite: ENGL 2010 or equivalent.

HIST 3230 Early Modern Europe ........................................... 3
Examines major themes of early modern European history, such as secularization, the rise of the nation state, the Reformation, and the birth of capitalism. Introduces major historiographical issues of the period. Reading and writing intensive. Prerequisite: ENGL 2010 or equivalent.

HIST 3250 (DHA/CI) Renaissance Europe 1300 to 1520 (F,Sp) ........ 3
Emphasizing written and primary sources, covers significant changes in Europe in government, society, and intellectual life caused by the Black Death, the humanist revolution in arts and literature, and the centralizing efforts of popes and monarchs.

HIST 3410 The Modern Middle East ......................................... 3
Examines history of the Middle East (Arabian peninsula, Fertile Crescent, Egypt, Iran, and Turkey), with special emphasis on social and political currents which have shaped the area’s history.

HIST 3460 Comparative Asian History .................................... 3
Surveys history of Asian continent, analyzing common patterns in the cultures of West, Southeast, and East Asia.

HIST 3850 (DHA/CI) History of Utah (Sp) ............................ 3
Prehistory to the present. Examines environment and peoples of Utah, emphasizing use of primary documents to view and interpret Utah’s past. Reading and writing intensive. Requires use of USU Special Collections and Archives. Prerequisite: ENGL 2010.

HIST 4210 Celtic Europe (F,Sp) .............................................. 3
History of Celtic peoples in British Isles, Scandinavia, and continental Europe, from Neolithic times to the Norman Conquest in 1066. Computer intensive.

HIST 4230 (DHA/CI) The History of Christianity in the West ........... 3
Introduces students to history of Christian spirituality, asking how Christianity has been lived and how it has shaped lives over two thousand years. Uses original sources to introduce both the history and the historiographical problems surrounding the Christian religion. Writing intensive.

HIST 4250 The Reformation in Britain: 1450-1688 ...................... 3
Focuses on major research questions in the field of early modern studies. Explores causes and consequences of English Reformation and British Civil War. Writing and research intensive.

HIST 4790 American Religious History .................................. 3
Varieties of American religious experience from settlement to the present.

Scientific Inquiry
Courses in this section use the methods of the social sciences to explore religious values and behavior on an individual and a societal level.

Select at least two of the following courses:
ANTH 3160 (DSS) Anthropology of Religion (F) .......................... 3

ANTH 4110 (d6110) (DSS) Southwest Indian Cultures, Past and Present (F) ......................................................... 3
Reviews past and present Indian cultures of greater southwest region. Examines the prehistoric Anasazi, the Pueblos, the canyon and desert peoples, the Utes, and the Navajos. Interprets these cultures in ecological, historic, and political contexts.

ANTH 4130 (DSS) Medical Anthropology: Matter, Culture, Spirit, and Health (Sp) ................................................................. 3
Examines the bio-ecological (matter) and socio-cultural aspects of disease/illness in human populations and examines “spiritual” dimensions of health in cross-cultural context. Includes methods component for anthropology majors and serves as a Liberal Arts cluster capstone course.

PHIL 3750 Religion and Science in the Modern World (Sp) .......... 3
Study of problems addressing the relation of religion to science in the modern world (e.g., evolution, Big Bang, origin of life).

PSY 3500 (DSS) Scientific Thinking and Methods in Psychology (F,Sp) ................................................................. 3
Social science research is commonly reported by the media, and by political and governmental interests. Students learn how to legitimately interpret such research through a study of accepted research methods and analysis procedures, and through critical study of the common interpretive mistakes made by media writers. Prerequisite: PSY 1010.

PSY 3510 (DSS) Social Psychology (F,Su) ..................................... 3
Study of the individual in society; problems, theories, and methods of social psychology; will relate reading assignments to current social issues. Prerequisite: PSY 1010.

PSY 4420 (DSS) Cognitive Psychology (Sp) ............................ 3
In-depth study of basic concepts, methods, and theories involved in perception, memory, and thinking. Lab required. Prerequisite: PSY 1010.
Religious Studies Major and Minor

PSY 4430 Cognitive Psychology Laboratory (Sp) ................................. 1
Required laboratory, designed to accompany PSY 4420. Focuses on conducting cognitive experiments via computer simulations and sampling data collection. Designed to increase skills in designing data collection and interpreting experimental data.

SOC 3500 Social Psychology (F,Sp) .................................................. 3
Explores interaction between the social system and the individual. Examines human behavior in terms of positions people occupy in the social structure.

SOC 4330 Sociology of Religion (F) .................................................. 3
Discussion of theories and research used by sociologists to understand social dimensions of religion. Includes ways in which religion influences and is influenced by other societal institutions, such as politics, the economy, and the class system.

Doctrinal Inquiry
Courses in this section use the methods of philosophy and theology, exploring systems of belief and major theological models.

Select at least two of the following courses:

PHIL 3100 (CI) Ancient Philosophy (F) ............................................. 3
Development of philosophical thought in the Ancient Greek world. Readings from the pre-Socratics, Plato, Aristotle, the Stoics, and Epicureans.

PHIL 3110 Medieval Philosophy (Sp) ............................................... 3
Neo-Platonism with stress on Plotinus, St. Augustine, and early Christian philosophy; early medieval thought; St. Thomas Aquinas and the rise of scholasticism; and philosophical thought in the Renaissance.

PHIL 3120 (CI) Early Modern Philosophy (F) ...................................... 3
Philosophers and philosophical disputes in Western Europe from 1400-1750. Figures and topics may include: Bacon, Hobbes, Descartes, Locke, Hume, nominalism, empiricism, rationalism, religion, politics, and morals.

PHIL 3700 Philosophy of Religion (F) ............................................... 3
Problems in defining "religion" and the existence of God; the problem of evil; the immortality of the soul; religious experience; faith; alternatives to theism; religious language.

PHIL 3710 Philosophies of East Asia (F) ........................................... 3
Study of three Asian philosophies: Confucianism, Taoism, and Buddhism. Focus on appreciating the merits of each system of thought. Emphasis on class discussion and participation.

PHIL 3720 Philosophical Theology After Kant (F) .............................. 3
Explores attempts to reconstruct the reasonable basis of religion in the two centuries after the Enlightenment.

PHIL 3730 (CI) Philosophy of the New Testament (Sp) ...................... 3
Historical and intellectual context of the development of the New Testament. Character, ideas, and historical setting of the various documents.

PHIL 4300 (DHA) Epistemology (F) .................................................. 3
Study of foundations of knowledge and belief systems, and related topics in epistemology, including perception, certainty, and skepticism.

Minor in Religious Studies
The minor in Religious Studies requires 15 credits. Students must earn a grade of C or better in all courses counted toward the minor. Students must complete the following courses.

Note: At the time this catalog went to press, courses having the Religious Studies (RELS) prefix had not yet been officially approved. Therefore, these courses are not listed in the Course Descriptions section of the printed catalog. Following approval, these courses will be shown in the online General Catalog, which can be found at: http://www.usu.edu/ats/generalcatalog/

RELS 1010 Religion and Culture .................................................... 3
Explores the ways in which religions shape cultures, and cultures shape religions. Covers the major modern religions. This course will be proposed for General Education credit.

RELS 1050 Introduction to Religious Studies Methodology ............. 3
Pre-major course helping students to understand the discipline of religious studies. Explores the questions asked by religious studies, as well as the methods used to answer these questions.

In addition to the two RELS courses listed above, students must also complete at least one upper-division course chosen from each of the following three areas of approach: Cultural Inquiry, Scientific Inquiry, and Doctrinal Inquiry.

Sample Four-year Plan for Religious Studies Major

Minimum GPA for Admission: 2.5, USU; 2.0, Career
Minimum GPA for Graduation: 2.5, major courses
Minimum Grade Accepted: C in all major requirements

This is a sample plan, which outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (30-34 credits)

Fall Semester (15-17 credits)

ENGL 1010 (CL1) Introduction to Writing: Academic Prose ............ 3
RELS 1010 Religion and Culture (approval pending) ....................... 3

Spring Semester (15-17 credits)

Religious Studies upper-division course ........................................... 3
Science or Foreign Language course(s) (BS/BA requirement) ........... 3-5

Sophomore Year (30-34 credits)

Fall Semester (15-17 credits)

Department of Secondary Education

Interim Department Head: Gary L. Carlston
Location: Emma Eccles Jones Education 330
Phone: (435) 797-2222
FAX: (435) 797-1441
E-mail: seced@usu.edu
WWW: http://secondaryeducation.usu.edu/

Undergraduate Advisor:
Harold E. Heap, Education 330B, (435) 797-2224,
harold.heap@usu.edu

Degrees Offered: Second Bachelor of Science (BS), Second Bachelor of Arts (BA), Master of Science (MS), Master of Arts (MA), and Master of Education (MED) in Secondary Education; BS and BA in Composite Teaching—Social Studies. The department participates in the Interdepartmental Doctor of Education (EdD) and Doctor of Philosophy (PhD) programs, focusing on the Curriculum and Instruction specialization.

Graduate Specializations: Educational Leadership, English as a Second Language (MED only), English Education, Gifted and Talented, Mathematics Education, Middle Level Education, Reading Education, Social Studies Education, Science Education

Undergraduate Programs

Objectives
The Department of Secondary Education coordinates state-approved programs for secondary teacher licensure across campus. The department offers the Secondary Teacher Education Program (STEP), a sequence of courses and field experiences designed to prepare students for teaching careers in secondary schools. The STEP program is fully accredited by the Utah State Board of Education and by the National Council for Accreditation of Teacher Education. Students who successfully complete the program are recommended for secondary licensure in the State of Utah, enabling them to teach in grades 6-12.

Requirements

Departmental Entrance Requirements
In addition to meeting the admission requirements for the University, students in good standing must have a minimum entrance GPA of 2.75 and maintain that GPA in order to student teach. All students must be admitted to the teacher education program. See details below.

Admission to Teacher Education
Prior to enrolling in STEP courses, students must be admitted to the teacher education program. Criteria for admission include completion of a minimum of 60 semester credits, and (1) minimum ACT scores, (2) University Studies requirements, (3) a speech and hearing test, (4) successful completion of the Teacher Education Writing Exam, (5) recommendations from advisors in major and minor fields, and (6) submission of a criminal background check (a legislative mandate). Application forms are available from advisors; from the Office of Teacher Education, Graduation, and Educator Licensing, Room 103, Emma Eccles Jones Education Building; and from the Department of Secondary Education, Room 330, Emma Eccles Jones Education Building.

Students must submit copies of University transcripts, including transfer coursework, verifying a minimum total GPA of 2.75. Criminal Background Check materials, required by the State of Utah, must also be submitted at this time. The fee for the Criminal Background Check is payable to the Utah State Office of Education. A money order must be provided as payment. Questions about the admission requirements may be directed to the Secondary Education advisor.

Bachelor’s Degree in Social Studies Composite Teaching
Students who are accepted in good standing by the University and who have a minimum total GPA of 2.75 may be admitted to the Social Studies Composite Teaching Major. In order to graduate with the Social Studies Composite Teaching degree, students must (1) maintain a minimum 2.75 total GPA, (2) earn a grade of C or better in all courses in the major, (3) complete the Secondary Teacher Education Program (STEP), and (4) meet all requirements for the Secondary Teacher License (see below).

For the bachelor’s degree, students must complete: (1) University Studies requirements, (2) courses required for the Social Studies Composite Teaching Major (see list below), (3) The Secondary Teacher Education Program (STEP), and (4) electives. Students must complete each course in the Social Studies Composite Teaching Major with a minimum grade of C. Upon completing all requirements for graduation, students are eligible for a secondary teaching license from the Utah State Office of Education (grades 6-12). Students with the Social Studies Composite Teaching Major graduate from the Department of Secondary Education. Courses in the Social Studies Composite Teaching Major are provided by various departments. Students should check regularly with these departments and the Secondary Education advisor for changes and substitutions.

Students must complete a total of 61 credits selected from various social science courses listed below. The number of credits and course choices are listed after the area in which they must be completed.

A. History (24 credits)
The History requirement is met by completing the 24-credit History Teaching Minor. Requirements for this minor can be found on pages 334-335.

B. Geography (16-24 credits)
Complete the 24 credits minimum required for the Teaching Minor in Geography (see pages 297-298), or complete the following 16 credits:
- GEOG 1000 (BPS) Physical Geography (F,Sp,Su) ......................... 3
- GEOG 1300 (BSS) World Regional Geography (F,Sp) ................. 3
- GEOG 1340 (BSS) Human Geography (Sp) .......................... 3
- GEOG 3850 Map, Air Photo, and GIS Interpretation (F) .......... 4
- GEOG 4200 (CI) Regional Geography (Utah) (F,Sp,Su) ............. 3

C. Economics (6 credits)
- ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp) ................................................. 3
- ECON 2120 (BSS) Introduction to Microeconomics (F,Sp) .......... 3

D. Political Science (9 credits)
- POLS 1100 (BAI) United States Government and Politics (F,Sp) ...... 3

Spring Semester (15 credits)
Recommended courses in STEP Program (see advisor) ..................................... 15

Certification Semester (12 credits)
STEP Student Teaching courses ........................................................................... 12

Secondary Teaching License (grades 6-12)
To obtain a secondary teaching license, undergraduate students must complete
(1) 30 credits of University Studies requirements, including written communications, (2) an approved composite teaching major or approved teaching major and teaching minor (see below), and (3) the Secondary Teacher Education Program (STEP). The Secondary Education advisor will assist returning students who already have an undergraduate degree with program planning for licensure. These students occupy “Second BS” or “Second BA” status while pursuing licensure. They also may apply for a second bachelor’s degree in conjunction with teacher licensure. Consult the Admissions Office for details.

All students should note that secondary teacher licensure is not automatic upon completion of the program. In order to receive Utah licensure, students must apply for the Basic Teaching License. Applications are available in the Office of Teacher Education, Graduation, and Educator Licensing, Emma Eccles Jones Education Building, Room 103.

Special Education Dual Licensure
Students can be licensed in both special education and in a secondary subject area through a dual licensure program offered jointly by two departments. Early in their programs, students should consult with undergraduate advisors in Secondary Education and the Department of Special Education and Rehabilitation.

Optional Middle Level Endorsement (grades 6-9)
The Department of Secondary Education has joined with the Department of Elementary Education to offer a Middle Level Endorsement for students seeking initial teacher licensure and for persons who already have an elementary or secondary teaching license. Students pursing this endorsement must take additional coursework that specifically focuses on middle level curriculum and instruction. To be recommended for the Middle Level Endorsement, students must student teach (SCED 5630) in the middle grades. Information about this program is available from the Secondary Education Advisor and the Department of Elementary Education.

ESL Teaching Minor or Endorsement
The USU Elementary Education Department and the Secondary Education Department jointly offer a K-12 English as a Second Language (ESL) endorsement. Undergraduate students seeking initial teacher licensure can obtain an ESL Teaching Minor (24 credits) and the ESL endorsement. Students pursuing the minor must complete the following courses: LING 4100, 4400, 4900; SCED 3300 or 4300; SCED 4710, 4770, 5630. (Note: Secondary Education majors should complete SCED 3210 prior to taking SCED 4710.)

Composite Majors, Teaching Majors, and Teaching Minors
Secondary Teacher Licensure requires that students complete a composite teaching major or a combination of a single-subject teaching major and teaching minor. Students are strongly encouraged to meet as soon as possible with advisors in their declared teaching major and minor. The following composite teaching majors, single-subject teaching majors, and teaching minors are approved for Utah State University.

Utah State University 2006-2007 General Catalog
Department of Secondary Education

Composite Teaching Majors (46 credits minimum)

Teaching Majors (30 credits minimum)

Teaching Minors (16 credits minimum)

Secondary Teacher Education Program (STEP)

Secondary Education coordinates a state-approved program to complement the teaching majors and minors in 21 departments. The framework is organized into three sequential levels, each taken during a different semester. Students should plan to complete the STEP Program during their junior and senior years after most or all of the major and minor coursework has been completed. All three levels of the STEP are offered during fall and spring semesters, but not during summers. Levels of the STEP are taken as a package, not piecemeal. Each level must be satisfactorily completed before students advance to the next level. All courses in the STEP Program must be completed with a minimum grade of C-.

As outlined below, Level 1 and Level 2 courses are offered by the Department of Secondary Education and other cooperating departments. Teaching Methods courses are offered by many departments across campus. Students should refer to the requirement sheets of their composite teaching major, or their teaching major and minor, to determine which methods courses they are required to complete on Levels 1 and 2 to prepare for student teaching at Level 3. Student teaching in a composite teaching major, or in at least one teaching major and one teaching minor, is required.

A. Level 1 (15-week courses)
INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su) ..........1
SCED 3100 Motivation and Classroom Management (F,Sp) ...............3
SCED 3210 (CI/DSS) Educational and Multicultural Foundations (F,Sp) ................................................................. 3
Clinical Experience I (IC) (40 hours minimum) ..................................1
Special Methods I (major or minor) ..................................................3

B. Level 2 (15-week courses)
SPED 4000 Education of Exceptional Individuals (F,Sp,Su) (may be taken anytime) ................................................................. 2
SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) .................3
SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) ......3
Clinical Experience II (IC) (40 hours minimum) ................................1
Special Methods II (major or minor) .................................................3

C. Level 3 (includes 13 weeks of student teaching and 10 weeks of Student Teaching Seminar)
Student Teaching Seminar 1 (10 weeks) ........................................2
Student Teaching 2 (13 weeks, full-time) .........................................10

1. The Clinical Experience I course is taught under course number 3300 in various departments. Course title varies among departments.
2. The Special Methods I course is taught by various departments under various course numbers. Course title varies among departments.
3. The Clinical Experience II course is taught under course number 4300 in various departments. Course title varies among departments.
4. The Special Methods II course is taught by various departments under various course numbers. Course title varies among departments.
5. The Student Teaching Seminar course is taught under course number 5500 in various departments. Course title varies among departments.
6. The Student Teaching course is taught under course number 5630 in various departments. Course title varies among departments.

Clinical Experience
Students must enroll for either Clinical Experience I or Clinical Experience II concurrent with their methods courses. Methods instructors, in concert with the Office of Field Experiences, set up and monitor these field activities in middle and high school settings. The clinical experiences provide a classroom context for understanding STEP and methods courses. A clinical experience fee of $50 is assessed at each of the two levels. This fee provides a stipend to classroom teachers who work with clinical experience students in the public schools. Students should refer to the requirement sheet for their composite teaching major or their teaching minor to determine which methods courses they should take. If a student extends Level 1 and 2 coursework over more than two semesters, a clinical experience must be taken during each additional semester.

Student Teaching
Students must attend the Student Teaching Enrollment Meeting (STEM) one year in advance of their student teaching semester. Applications for student teaching and each semester’s deadlines will be discussed at the STEM. Information concerning the Praxis II test, which must be passed before student teaching, will also be discussed. Students must complete 80 percent of their teaching major/minor (or composite major) requirements prior to student teaching.

Students should be financially prepared to stay off campus, if necessary, during the 13-week block of student teaching. Because student teaching requires a major commitment of time and energy, it should be planned with care. Students are urged to forego outside employment, if possible, during the student teaching experience.

Only the courses approved for the semester may be taken during student teaching.

Assessment
The Department of Secondary Education is committed to principles and practices of continual assessment of its programs and its students. Information about current assessment tools that are being used by the department can be found at: http://www.coe.usu.edu/seced/assessment/index.html

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also
complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information

For detailed information about requirements for teaching majors and minors, students should see the major requirement sheet(s) for the subject area(s) in which they plan to seek licensure or receive a teaching minor. These requirement sheets can be found online at: http://www.usu.edu/ats/majorsheets/

Graduate Programs

Admission Requirements

The Department of Secondary Education assists in the preparation of graduate students seeking the MEd, MA, and MS degrees, as well as the EdD and PhD degrees. Students desiring information concerning the various graduate programs should contact the department head. The application for admission to a graduate program is made through the School of Graduate Studies. See Graduate Admission Procedures (pages 99-100).

Students applying to a master’s degree program may take either the Miller Analogy Test (MAT) or the Graduate Record Exam (GRE). Students applying to a doctoral degree program should take the GRE. Scores at the 40th percentile or above are required for admission. In addition, students must have at least one year of teaching experience (or comparable professional experience) and a valid secondary teaching license.

All students applying to the doctoral degree program (Curriculum and Instruction specialization) participate in oral interviews with the Curriculum and Instruction Management Committee. A sample of academic writing should be included as part of the doctoral-level admission folder.

Master’s applications are considered on a rolling basis. Students applying for doctoral programs should consult the director of the Interdepartmental Doctoral Program for information about application deadlines. Application folders will not be considered until all required information is received by the School of Graduate Studies and sent to the department.

Master’s Degree Programs

Secondary Education master’s degree programs provide coursework and professional experiences for those preparing to become master teachers, teacher-leaders, supervisors, or curriculum specialists. Each program provides coursework in education, with associated work in a specialized subject matter, which is the teacher’s area of concentration.

Typically, the area of concentration derives from the teacher’s ongoing work with middle school or high school students.

Areas of specialization in Secondary Education include the following: Educational Leadership, English as a Second Language (MEd only), English Education, Gifted and Talented, Mathematics Education, Middle Level Education, Reading Education, Social Studies Education, and Science Education. Two University departments—Art and Business Information Systems—also participate in master’s degree programs sponsored by Secondary Education. Admission to these fields of study requires approval of the cooperating department. In planning areas of specialization, students work with a faculty advisor and select graduate courses from the University-wide curriculum.

MEd Degree Plan B (36 credits)
The MEd Plan B offers a Portfolio Project Option or Creative Project Option which culminates in the presentation of the project in a final exam setting. Students take a common core of courses from college and department curricula, then courses in areas of concentration in relation to their teaching specialties. The research course for the MEd focuses on issues of application as well as action research. Creative projects are diverse and range from action research to curriculum development. The professional portfolio project provides the context for a personal knowledge base. Although portfolios share certain structural features, each student’s portfolio is unique.

MEd Degree Plan C (40 credits)
The MEd Plan C is a coursework-only program. Students take a common core of courses from college and department curricula, then courses in areas of concentration in relation to their teaching specialties; additional coursework in the area of concentration. At the conclusion of the program, a culminating experience to meet the needs of the student is developed. Options for the experience can be an interview with the advisor, oral comprehensive examination under the supervision of the advisor, written comprehensive examination under the supervision of the advisor, or other culminating experience developed by the student and advisor and approved by the department head.

MS and MA Degrees Plan A (30 credits)
The MS/MA option culminates in a formal defense of a thesis. This option is for teachers whose long-term goals require a traditional, research-oriented degree. The MS thesis involves either an experimental or qualitative research study. The MA thesis involves a project in a final exam setting. Students take a common core of courses from college and department curricula, then courses in areas of concentration in relation to their teaching specialties; additional coursework in the area of concentration. At the conclusion of the program, a culminating experience to meet the needs of the student is developed. Options for the experience can be an interview with the advisor, oral comprehensive examination under the supervision of the advisor, written comprehensive examination under the supervision of the advisor, or other culminating experience developed by the student and advisor and approved by the department head.

Doctoral Degree Programs

For students who have already completed a master’s degree, Secondary Education participates in the interdepartmental doctoral program coordinated by the dean of the College of Education and Human Services. Both PhD and EdD degrees are offered in the Curriculum and Instruction specialization. For an overview of the program, including program requirements and admission procedures, see pages 251-252 of this catalog. As with any degree program, students interested in doctoral study are encouraged to contact the department head of Secondary Education.
Financial Assistance

Departmental support or grant support is available to doctorate-level and master’s level students pursuing full-time study on campus. Such financial support typically is through assistantships, which carry half-time teaching, research, or supervisory obligations. Typical assistantships carry forward up to four years. Awards are made on a competitive basis. Students who wish to be considered for financial aid should apply to the department no later than February 1 for the following academic year. Acceptance to graduate study does not guarantee financial assistance.

Secondary Education Faculty

Professor
Barry M. Franklin, curriculum policy, theory, and history

Professors Emeritus
Ross R. Allen, mathematics education, comparative education
Eldon M. Drake, journalism, general student teaching
Richard S. Knight, social studies specialist
Izar A. Martinez, administration, research methods, measurement/evaluation
Walter L. Saunders, science specialist
James P. Shaver, social studies, former School of Graduate Studies Dean
William J. Strong, content area reading, Utah Writing Project Director

Associate Professors
Kay Cepanek, content area reading/writing, learning theory, literacy education
Gary L. Carlston, instructional leadership
Janice L. Hall, qualitative research, professional development, supervisor of student teaching
Grace C. Huerta, educational foundations, multicultural education, ESL/Bilingual

Associate Professor Emeritus
Varnell A. Bench, extension, administration, supervision

Assistant Professors
George G. Hruby, literacy/reading
Sherry Marx, ESL/bilingual/multicultural
L. Ruth Struyk, classroom assessment, classroom management, measurement, instructional supervision, program evaluation

Continuing Education Assistant Professors
Todd Campbell, science
Peggie Lee Clelland, literacy, reading
Laurie Culbreth, English education
Steven Laing, educational leadership

Lecturer
Barbara Cangelosi, classroom management

Adjunct Clinical Instructor
Loo Leong Guan Eddie, instructional technology

Undergraduate Advisor
Harold E. Heap, classroom management, adolescent development

E-mail: servelearn@cc.usu.edu

Vice President for Student Services:
Juan N. Franco, Student Center 220, (435) 797-1712, juan.franco@usu.edu

Vice Provost for Undergraduate Studies and Research:
Joyce Kinkead, Main 142, (435) 797-1706, joyce.kinkead@usu.edu

Associate Director for Student Involvement and Leadership:
Keri L. Mecham, Student Center 326, (435) 797-1740

Program Description

Utah State University has implemented an Academic Service-Learning Program that leads to a Certificate in Service-Learning. This program provides a much-needed and desired academic component complementing the extensive public service efforts of many USU students. It supports broader state and national movements promoting more civic engagement among college and university students. It also supports USU’s undergraduate educational mission, which is to prepare citizen scholars "...who participate and lead in local, regional, national, and global communities."

Service-Learning is a well-researched and highly effective teaching pedagogy, which incorporates community service into the course curriculum. Academic Service-Learning is a credit-bearing educational experience where students: (1) gain a broader understanding of course content, (2) earn a deeper appreciation of the discipline, (3) help meet community needs, (4) reflect on service activities, and (5) develop an enhanced sense of civic responsibility. Many opportunities for service-learning are available for USU students. Course sections listed in the Schedule of Classes with the SL designation have been approved by the Service-Learning Steering Committee to meet the criteria listed above. For a current list of SL-designated courses, contact the Service-Learning Coordinator.

The program is housed organizationally within the Office of the Provost, with oversight by the Vice Provost for Undergraduate Studies and Research. The program’s faculty and staff work very closely with the ASUSU Service Vice President, the Val R. Christensen Service Center program directors, and the Vice President for Student Services. The Service-Learning Coordinator is assisted by a steering committee consisting of faculty, students, and staff.

Certificate

Service-Learning Scholars are awarded a Service-Learning Certificate, which is recorded on a student’s official transcript, enabling employers and graduate programs to see evidence of a student’s determination to go the extra mile. As Service-Learning Scholars, students will also be recognized at graduation with a banquet in their honor, cords to wear during commencement, and their names in the graduation program.

Admission Requirements

Service-Learning Scholars at USU are an elite group of students dedicated to making a difference in their community. Each year, 25 students will be admitted to the program. Admission to the program is competitive and is limited to a maximum of 100 students at any one time. In order to gain admittance to the program, students must submit an application, have a 3.0 or higher grade point average, and submit a written essay detailing their interest in Service-Learning and their dedication to community engagement.

Certificate Requirements

To receive a Service-Learning Certificate, a student must:

1. Apply for and be accepted to the Service-Learning Scholars Program.

2. Earn a minimum of 9 SL designated credits (with a grade of B or better in each course).

3. Perform a minimum of 400 service hours.

4. Develop and complete an approved capstone project.

5. Maintain and present a reflective portfolio.

The 9 credits must come from an approved list of Service-Learning courses. Course adaptations will be considered by the Service-Learning Coordinator (for example, an instructor may work with one student in a non-SL course to complete the SL requirement). For answers to any questions, as well as an up-to-date list of approved SL courses and program applications, students should contact the Service-Learning Coordinator.
Interdepartmental Program in Social Sciences

Degree Coordinator:
Gary Kiger, Dean of College of Humanities, Arts, and Social Sciences
Location: Main 338
Phone: (435) 797-1195

Degree offered: Master of Social Sciences (MSS)
Primary Disciplines: History, Political Science, and Sociology
Secondary Disciplines: Anthropology; Business Administration; Instructional Technology; Environment and Society; Family, Consumer, and Human Development; History; Political Science; Psychology; Social Work; and Sociology

Graduate Program

Administration

The program is administered by a committee of the department heads (Management Committee) from the three primary disciplines or their designees. The committee is chaired by annual rotation by one of the members of the committee, and reports to the Degree Coordinator. The Management Committee reviews policy and develops recommendations which are submitted to the Degree Coordinator for approval.

Degree Description

The social sciences are disciplines that have as a common objective the understanding of human behavior and social relationships. The MSS offers multidisciplinary graduate training for candidates desiring in-depth applied understanding of human performance, human environments, and the structuring of social, political, and economic systems. Students in History and Sociology typically follow the Plan B option, which requires a minimum of 30 credits. A minimum of 15 credits are required in a primary discipline, plus a minimum of 15 credits from one of the following two tracks: Track A: a minimum of 15 credits from two approved primary disciplines, with at least two courses in each secondary discipline. Track B: a minimum of 15 credits from an approved secondary discipline and a cluster, with at least two courses in the secondary discipline and two courses in the cluster. Courses counted in a cluster must be outside the selected primary discipline and secondary discipline. Three of the 30 credits required for the Plan B option must be thesis credits, but no more than 3 credits of thesis can be counted toward a degree. Departments may impose more rigorous requirements. A maximum of 3 credits may be earned either from readings/conferences or from independent research.

The MSS degree is primarily intended to prepare degree recipients for employment or advancement in social science-related occupations. Students interested in pursuing doctoral work should consider a Plan A Master of Science program.

Admission Requirements

See general admission requirements, pages 99-100. In addition, the faculty of each discipline determines whether to recommend to the graduate dean the acceptance of applicants. For further information, contact the Graduate Coordinator in the department of the proposed primary discipline.

Degree Requirements

Plan B Research Paper

Each Plan B student must submit a research paper for thesis credit in accordance with School of Graduate Studies and departmental requirements. Ordinarily, the Plan B paper is written in the primary discipline, but in some cases, with the approval of the student’s supervisory committee, it may be written in one of the secondary disciplines. Information specific to each primary discipline may be obtained by contacting the sponsoring department.

Further Information

Candidates interested in pursuing this degree program may obtain specific information by contacting the head of one of the participating departments, the School of Graduate Studies, or the dean of Humanities, Arts, and Social Sciences.

Additional Information

Program Office: Main 224, (435) 797-1230

The study of the human individual and human groups is central to sociology. Sociology offers a broad foundation for understanding human behavior on an individual and group basis, and encourages the development of skills necessary for establishing favorable societal conditions for human development.

Students learn to systematically describe and explain group behavior, including the effects of one group on another and of groups upon individual behavior. Required sociology classes deal with how people in different societies organize and control their societies; critical issues, such as race, class, and gender, as they have developed through history; and research and statistical methods for analyzing sociological data.

Upon completion of the prescribed program for a major in sociology, the student should be able to:

1. Demonstrate knowledge essential for understanding society from a sociological perspective;
2. Identify and critically evaluate the contributions of sociologists, social scientists, and scholars;
3. Identify and critically evaluate the forces and institutions that influence his or her life as a member of society;
4. Identify, comprehend, and critically evaluate the influences of race, class, gender, age, and disability on a member of society;

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students' chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Sociology

Undergraduate Program Director: Peggy Petrzelka

The study of the human individual and human groups is central to sociology. Sociology offers a broad foundation for understanding human behavior on an individual and group basis, and encourages the development of skills necessary for establishing favorable societal conditions for human development.

Students learn to systematically describe and explain group behavior, including the effects of one group on another and of groups upon individual behavior. Required sociology classes deal with how people in different societies organize and control their societies; critical issues, such as race, class, and gender, as they have developed through history; and research and statistical methods for analyzing sociological data.

Upon completion of the prescribed program for a major in sociology, the student should be able to:

1. Demonstrate knowledge essential for understanding society from a sociological perspective;
2. Identify and critically evaluate the contributions of sociologists, social scientists, and scholars;
3. Identify and critically evaluate the forces and institutions that influence his or her life as a member of society;
4. Identify, comprehend, and critically evaluate the influences of race, class, gender, age, and disability on a member of society;
Department of Sociology, Social Work and Anthropology

5. Pursue careers in sociological areas, business, government, and/or graduate study; and

6. Apply the methods and concepts of sociology to the analysis of social issues, problems, and conflicts in preparation for participation as agents of creative social change.

Students select courses from three different areas. Social Problems courses focus on criminology and deviance, retirement and other aspects of aging, the causes and prevention of juvenile delinquency, and the cultural characteristics of various social groups. Groups and Institutions courses look at collective behavior, the organization of communities, and the development of gender roles, as well as economic systems, educational systems, and social inequality. Population and Environment and Development courses deal with the effects of the environment and human behavior and the consequences of different patterns of population growth and settlement. A Law and Society Area Studies Certificate is available. A teaching minor in sociology is available for students wishing to teach in secondary schools.

Surveys of graduates indicate that sociology majors pursue a wide range of occupations. About one-third are employed in the professional sector, while close to one-fourth are in service occupations. In addition, 26 percent are involved in sales or management/administration. In terms of specific job titles, social service is a popular option, as are retail sales and teaching. Other frequent job titles include: vocational rehabilitation counselor, research analyst, data coordinator, management analyst, district sales manager, parole officer, juvenile probation officer, social services director, civil service test examiner, personnel director, insurance salesman, and correctional service officer. A variety of government and business positions are also expanding for sociology majors with the new emphasis on a liberal arts education. The growing awareness of the value of sociological perspectives for problem-solving continues to provide an increasing range of opportunities for employment in a variety of work settings.

Departmental Graduation Requirements

Sociology majors must meet the following course requirements:

1. Complete the general requirements of the University. Majors are expected to take STAT 1040 (QL) Introduction to Statistics to fulfill the quantitative literacy requirement for University Studies.

2. Complete a minimum of 33 credits of sociology coursework. At least fifty percent of the sociology coursework must be completed in the USU Sociology program. Sociology majors must maintain a minimum GPA of 2.5 in sociology courses and earn a grade of C or better in SOC 1010 (BSS) Introductory Sociology (effective Fall Semester 2005) and a C- or better in all other courses to be counted toward the major.

3. A minor outside the program is encouraged but not required.

4. Complete the following required courses (15 credits):
   - SOC 1010 (BSS) Introductory Sociology (F,Sp) ............................................. 3
   - SOC 3110 (CI) Methods of Social Research (F,Sp) ............................................. 3
   - SOC 3120 (QI) Social Statistics I (F,Sp) ............................................................ 3
   - SOC 4010 Contemporary Sociological Theory (F,Sp) ....................................... 3

5. Choose a minimum of 18 credits from the following sociology elective courses. At least 3 credits must come from each of the three specialty areas listed below.

Sociology and Social Work Dual Major
Sociology majors desiring additional preparation for employment in the social sciences may complete a dual major in sociology and social work. With the help of advisors, students who will seek positions in other special areas could include appropriately related courses.

Minor
Students minoring in sociology must complete a minimum of 12 credits in sociology courses. Sociology minors must maintain a minimum GPA of 2.5 in sociology courses. They must also earn a grade of C or better in SOC 1010 (BSS) Introductory Sociology (effective Fall Semester 2005), and a grade of C- or better in all other courses to be counted toward the minor.

SOC 1010 (BSS) Introductory Sociology (F,Sp) ........................................... 3
SOC 1020 Social Problems (F,Sp) ............................................................... 3
Additional credits with a SOC prefix ......................................................... 6

Sociology Student Organization
Alpha Kappa Delta (AKD), the sociology honor society, provides sociology undergraduates with a sense of community and an opportunity to build strong friendships outside of the classroom. Students are encouraged to become involved with AKD. For further information, contact Peggy Petzelka, peggy@hass.usu.edu.

Teaching License
Sociology is defined as an approved teaching major in Utah secondary schools by the State Board of Education. The sociology major must complete a minor in a subject that is required in Utah high schools. In addition to completing the courses required for the sociology major, the sociology teaching major must also complete the required teaching licensure courses in education. Students can also elect sociology as an approved teaching minor.

Law and Society Area Studies Certificate
The Department of Sociology, Social Work and Anthropology sponsors an interdisciplinary program emphasizing the study of the relationship between law and society. Students must complete a minimum of 24 credits, chosen from a selected list of courses, in at least three disciplines. A minimum 3.0 GPA must be maintained in these courses.

The selected courses are:
FCHD 3100 Abuse and Neglect in Family Context (F,Sp) (prereq: Sophomore standing, FCHD 1500, 2400) (3 cr)
PSY 3120 Abuse, Neglect, and the Psychological Dimensions of Intimate Violence (F,Su) (prereq: PSY 1100) (3 cr)
JCOM 4030 Mass Media Law (F,Sp) .......................................................... 3
MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su) ................. 3
MHR 3810 Employment Law and Policy Development (F,Sp) ....................... 3
MHR 5640 Selected Topics: International Business Law ............................ 3
PHIL 1120 (BHU) Social Ethics (F) .......................................................... 3
PHIL 4600 Philosophy of Law (F) ............................................................ 3
PHIL 4610 (DHA) Social and Political Philosophy (Sp) ............................. 3
PHIL 5600 Legal Ethics (F) (prereq: PHIL 4600) ........................................ 3
POLS 3120 Law and Politics (F) ............................................................... 3
POLS 3130 United States Legislative Politics (Sp) ..................................... 3
POLS 3170 Law and Economics (F) .......................................................... 3
POLS 3320 The Foundations of American Constitutionalism ..................... 3
POLS 3810 Introduction to Public Policy (F) ............................................ 3
POLS 4120 American Constitutional Law (F) ............................................ 3
POLS 4130 Constitutional Theory (Sp) ..................................................... 3
POLS 4810 Politics and Public Policy (F) ................................................... 3
POLS 5130 Law and Policy (Sp) ............................................................... 3
SOC 1020 Social Problems (F,Sp) ............................................................. 3
SOC 3410 Juvenile Delinquency (F,Sp) ...................................................... 3
SOC 3420 Criminology (F,Sp) .................................................................. 3
SOC 3430 Social Deviance (F) ................................................................. 3
SOC 4420 (CI) Criminal Law and Justice (Sp) .......................................... 3
SPED 5070 Policies and Procedures in Special Education (F) ........................ 1-3
SW 5350 (CI) Social Welfare Policy (F) .................................................... 3

Only 12 credits may be selected from a single discipline. The Law and Society Area Studies certificate is pursued in conjunction with a major. Credits may be applied to the major, as well as to the area studies requirements. A student’s transcript will reflect the Law and Society Area Studies certificate upon completion of requirements for a degree.

For further information, contact Dr. Kelly Hardwick, (435) 797-8402, in the Department of Sociology, Social Work and Anthropology.

Gerontology Program
The Department of Sociology, Social Work and Anthropology is one of several departments sponsoring an interdisciplinary gerontology program, which prepares students for careers in the field of aging. Students may earn a certificate in gerontology by completing a selected list of course requirements, including supervised field practicum in a gerontological setting.

More information concerning the gerontology certification program may be obtained from the Department of Family, Consumer, and Human Development.
American Studies Major
The Department of Sociology, Social Work and Anthropology is one of several departments offering an area of concentration for the American Studies program. Students who wish to focus their work in American culture should refer to the American Studies program description (pages 250-251).

Social Work
Program Director: Terry L. Peak
Program Office: Main 239, (435) 797-1286; or Main 224, (435) 797-1230

Utah State University’s Social Work Program offers a baccalaureate degree in social work. The program is accredited by the Council on Social Work Education (CSWE) and meets requirements established by the State of Utah for licensure of social service workers.

The Social Work Program provides a learning environment for those who seek to acquire the knowledge and skills needed to bring about meaningful social change in individuals, groups, communities, organizations, and society. The program provides grounding in the fundamental generalist skills, knowledge, and values of social work, such as critical thinking, clarification of personal values, awareness of diversity, professional use of self, and communication and interpersonal relationship skills.

Social Work at Utah State University recognizes the historic importance of social welfare in balancing the country’s economic and social structure. The program is committed to the resolution of contemporary human social problems, such as poverty, racism, discrimination, and economic injustice.

Program Goals
There are two fundamental goals that guide the Social Work Program:

1. To prepare students for employment as generalist social workers through education in a professional foundation curriculum and selected liberal arts education coursework.

2. To prepare students for advanced education.

The program is based on a generalist conception of social work and a problem-solving, empowerment, and strengths model of practice. The social work sequence stresses problem solving at the interface of person and environment, which requires that students develop a repertoire of generalist practice skills. The program inculcates in students the knowledge, skills, understanding, and values necessary to perform multi-level assessments and interventions utilizing a theoretical knowledge base. The program is committed to building a student’s education on a solid base that includes a liberal arts perspective vital to the development of a social worker.

The program endeavors to prepare students for advanced standing in graduate professional programs and to provide a solid academic base for continuing education. To accomplish this, the program facilitates the development of the profession’s knowledge, values, and skills; provides a well-rounded liberal arts educational foundation; and teaches good study habits, written and oral communication skills, and the ability to think critically.

The program also endeavors to maintain a campus environment that will foster a sense of community and social responsibility. To accomplish this, the program provides opportunities for service learning, social development, and educational research forums through the state-affiliated National Association of Social Workers student organization and the Social Work Phi Alpha Honor Society.

Licensure
In the State of Utah, graduates with a bachelor’s degree in Social Work are eligible to be licensed upon graduation as social service workers. Students may obtain further information on licensure from:

Department of Commerce
Division of Occupational and Professional Licensing
160 East 300 South

Social Work Major
Liberal Arts Foundation
All students pursuing an undergraduate degree at Utah State University must meet requirements designed to assure a broad, liberal arts foundation. Cross-cultural and cross-disciplinary perspectives are vital to a student’s development as a social worker. The University Studies program, which is described in detail in this catalog (see pages 46-54), is required of all majors. Majors are expected to take STAT 1040 (QL), Introduction to Statistics, to fulfill the quantitative literacy requirement for University Studies. In addition to fulfilling University Studies requirements, majors will need to complete specific liberal arts courses, listed in the Social Work Program requirements, some of which fulfill both University Studies and Social Work Program requirements. Social Work majors must complete STAT 1040 (Introduction to Statistics) and SOC 3120 (Social Statistics I) to graduate.

Program Admission Requirements
The following regulations apply for admission to the Social Work Program: (1) New freshmen admitted to USU in good standing qualify for admission to the Social Work Major. (2) Transfer students from other institutions must obtain a minimum overall GPA of 2.5 and a minimum overall GPA of 2.75 in social work classes. (Refer to the USU Social Work Program Transfer of Credit Policy.) (3) Students transferring from other USU majors must complete the Social Work Major course of study and must obtain a minimum overall GPA of 2.5 and a minimum overall GPA of 2.75 in social work classes. (4) Students must apply for and meet criteria for advanced standing, in order to continue on in upper-division social work practice courses and field practicum courses. (5) Students are responsible for reviewing and knowing the requirements for the Social Work degree. (6) All courses required for the Social Work degree must be taken for a letter grade.

Social Work Major
Students may declare Social Work as their major at any time. All course offerings in social work are open to all Social Work majors, with the exception of the practice courses (SW 3050 Practice I, SW 4150 Practice II, and SW 4160 Practice III) and the field practicum courses (SW 4870 Beginning Field Practicum and SW 5870 Advanced Field Practicum), which require admission to advanced standing. Social work students are expected to take courses in sequence, in order to have the professional foundation knowledge required for each class. Maintenance of a high grade point average is important as students progress through the major and continue on to graduate school. Requirements for the Social Work major are as follows:
### Department of Sociology, Social Work and Anthropology

**First year:**
- **SW 1010** Introduction to Social Welfare (F,Sp) ................................................................. 3
- **ANTH 1010 (BSS)** Cultural Anthropology (F,Sp) ................................................................. 3
- **BIOL 1010 (BLS)** Biology and the Citizen (F,Sp,Su) ............................................................. 3
- **ENGL 1010 (CL1)** Introduction to Writing: Academic Prose (F,Sp,Su) .................... 3
- **FCHD 1500 (BSS)** Human Development Across the Lifespan (F,Sp) ...................... 3
- **PSY 1010 (BSS)** General Psychology (F,Sp,Su) ................................................................. 3
- **SOC 1010 (BSS)** Introductory Sociology (F,Sp) ................................................................. 3
- **STAT 1040 (QL)** Introduction to Statistics (F,Sp,Su) .......................................................... 3

1. Students must take SW 1010 prior to taking SW 2100 and 2400.
2. Students must complete STAT 1040 as a prerequisite to SOC 3120 and to fulfill Social Work major requirements.

**Second year:**
- **ENGL 2010 (CL2)** Intermediate Writing: Research Writing in a Persuasive Mode (F,Sp,Su) ................................................................. 3
- **SW 2100** Human Behavior in the Social Environment (Sp) .............................................. 3
- **SW 2400** Social Work with Diverse Populations (Sp) ......................................................... 3
- One elective enrichment course ......................................................................................... 3

Students should apply for advanced standing during their second year.

**Third year:**
- **SW 3050** Practice I (F) ................................................................................................... 3
- **SW 4100** Social Work Research (F) ............................................................................... 3
- **SW 4150** Practice II (Sp) .................................................................................................. 3
- **SW 4160** Practice III (Sp) ............................................................................................... 3
- **SOC 3120 (QL)** Social Statistics I (F,Sp) ............................................................................ 3
- Two elective enrichment courses ....................................................................................... 3

Students should apply for the practicum during their third year.

**Required Elective Enrichment Courses**

Nine credits of electives are to be chosen during the second and third years, prior to the practicum year. At least two electives are to be taken in Social Work, and one upper-division elective can be taken outside of Social Work.

- **SW 3350** Child Welfare .................................................................................................. 3
- **SW 3360** Adolescents: Theories, Problems, and Issues ................................................... 3
- **SW 3450** School Social Work ......................................................................................... 3
- **SW 3550** Social Gerontology .......................................................................................... 3
- **SW 3650** Mental Health ................................................................................................... 3
- **SW 3750** Medical Social Services .................................................................................... 3
- **SW 3850** Spirituality and Social Work ............................................................................. 3
- **SW 3950** Occupational and Environmental Health  
  (offered infrequently; check with department) .................................................................. 3
- **SW 4900** Topical Issue Seminar ...................................................................................... 3

**Optional Elective**
- **SW 4950** Directed Readings (F,Sp) .............................................................................. 1-5

**Fourth year:**
- **SW 4870** Beginning Field Practicum (F) ................................................................. 6
- **SW 5350 (CI)** Social Welfare Policy (F) ........................................................................ 3
- **SW 5870** Advanced Field Practicum (Sp) ...................................................................... 6

**Sample Four-year Plan for Social Work Major**

**Minimum GPA for Admission:** 2.75, major; 2.5, USU; 2.5, Career

**Additional Matriculation Requirements:**
- Students must apply for Advanced Standing in the Social Work major. Application requirements include: satisfactory grades in all prerequisite Social Work courses and specific University Studies courses, an essay, and a satisfactory grade (70 percent or better) on the Advanced Placement Test (APT). After the junior year, the practicum requires a satisfactory grade (70 percent or better) on the Generalist Practice Test (GPT).

**Minimum GPA for Graduation:** 2.75, major; 2.5, USU; 2.5, Career

**Minimum Grade Accepted:** C+ in SW 1010; B- in SW 3050, 4150, and 4160; C in remaining major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

**Freshman Year (30 credits)**

**Fall Semester (15 credits)**
- **SW 1010** Introduction to Social Welfare ........................................................................... 3
- **SOC 1010 (BSS)** Introductory Sociology ........................................................................... 3
- **ANTH 1010 (BSS)** Cultural Anthropology ....................................................................... 3
- **BIOL 1010 (BLS)** Biology and the Citizen ........................................................................ 3
- Elective course(s) ................................................................................................................ 3

**Spring Semester (15 credits)**
- **FCHD 1500 (BSS)** Human Development Across the Lifespan ...................................... 3
- **ENGL 1010 (CL1)** Introduction to Writing: Academic Prose ............................................ 3
- **PSY 1010 (BSS)** General Psychology ............................................................................... 3
- **STAT 1040 (QL)** Introduction to Statistics ....................................................................... 3
- University Studies Breadth course ...................................................................................... 3

Complete the CIL exams by the end of the Freshman Year.

**Sophomore Year (30 credits)**

**Fall Semester (15 credits)**
- **ENGL 2010 (CL2)** Intermediate Writing: Research Writing in a Persuasive Mode ............ 3
- University Studies Breadth courses ................................................................................... 6
- Social Work elective course ............................................................................................... 3
- Elective course(s) ................................................................................................................ 3

**Spring Semester (15 credits)**
- **SW 2100** Human Behavior in the Social Environment .................................................... 3
- **SW 2400** Social Work with Diverse Populations ............................................................... 3
- University Studies Breadth course ...................................................................................... 3
- Depth Humanities and Creative Arts (DHA) course ............................................................. 3
- Elective course(s) ................................................................................................................ 3

**Junior Year (30 credits)**

**Fall Semester (15 credits)**
- **SW 4100** Social Work Research ..................................................................................... 3
- **SOC 3120 (QL)** Social Statistics I ..................................................................................... 3
- Social Work upper-division course ..................................................................................... 3
- Upper-division elective course ........................................................................................... 3

**Spring Semester (15 credits)**
- **SW 4150** Practice II ....................................................................................................... 3
- **SW 4160** Practice III ........................................................................................................ 3
Department of Sociology, Social Work and Anthropology

Elective courses ............................................................................. 9

Procedures for Advanced Standing in the Social Work Major

In order to be considered for advanced standing, students must turn in a completed application form by March 1 of the academic year. Applications for admission can be obtained in the Social Work Office, Main 239. At the end of spring semester, when the criteria for advanced standing have been met, eligible students will be ranked according to their grade point average, personal statement, performance on the advanced placement test, and faculty evaluation. The highest ranking students will receive advanced standing, which will allow them to enroll in upper-division practice courses. Only those students who have completed first- and second-year requirements by the end of spring semester of the applied year will be considered for advanced standing. The primary reasons for this evaluation are: (1) to maintain a high-quality educational experience for students in upper-division practice courses, and (2) to maintain the status of full accreditation by the Council on Social Work Education. Students will receive notification of acceptance in June of the application year. Those students who do not receive advanced standing, and are therefore not allowed to enroll in upper-division practice courses, may retake courses to improve their GPA and reapply for advanced standing during the following year.

To be considered for advanced standing, students must meet the following minimum criteria:

1. Completion of the following courses with a C or better:
   ANTH 1010 (BSS) Cultural Anthropology (F,Sp) .......................... 3
   BIOL 1010 (BLS) Biology and the Citizen (F,Sp,Su) .............. 3
   ENGL 1010 (CL1) Introduction to Writing: Academic Prose (F,Sp,Su) .................................................. 3
   ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode (F,Sp,Su) .......... 3
   FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) .................................................. 3
   PSY 1010 (BSS) General Psychology (F,Sp,Su) ......................... 3
   SOC 1010 (BSS) Introductory Sociology (F,Sp,Su) .................... 3
   SW 2100 Human Behavior in the Social Environment (Sp) .... 3
   SW 2400 Social Work with Diverse Populations (Sp) .......... 3

2. Completion of SW 1010 (Introduction to Social Welfare) with a grade of C+ or better.

3. Junior status (61-90 credits) upon application.

4. Maintenance of a minimum overall GPA of 2.5 and a minimum GPA of 2.75 in social work classes.

5. No Pass-D-Fail grades in courses required for the major.

6. A satisfactory grade (70 percent or better) on the Advanced Placement Test (APT), given during finals week of spring semester.

Students should also be aware that if there are any personal data, such as that included on the application for state licensure, which indicate a potential threat to the public safety and welfare, a student may be denied advanced standing in the program. Students turned down for advanced standing will be assisted in finding a more suitable major or may reapply during the following year.

To maintain advanced standing and eligibility for graduation as a Social Work Major, students must: (1) obtain a B- or better in SW 3050 (Practice I), SW 4150 (Practice II), and SW 4160 (Practice III); (2) must have completed SW 1010 (Introduction to Social Welfare) with a C+ or better; (3) must maintain a minimum overall GPA of 2.5 or better and a minimum 2.75 GPA in the Social Work Major; (4) must receive a grade of C or better in all other courses required for the major; (5) must not repeat more than one course, to improve a grade, any course required for the major; and (6) must not receive a Pass-D-Fail grade for any course required for the major.

Procedures for Admission to Field Practicum

Students must complete 480 clock hours of supervised field practicum and integrative seminar coursework. The field practicum courses are SW 4870 (Beginning Field Practicum) and SW 5870 (Advanced Field Practicum). Students may register for SW 4870 only after making application with the practicum director. Application must be made during the spring semester of the academic year prior to enrollment in the practicum, and is due by February 20. Applications are available in Main 239. No applications for the practicum will be accepted from students who will not complete all required coursework by the end of spring semester.

The following are eligibility criteria for admission to the field practicum:

1. Senior status (92-120 credits completed) by the end of the spring semester in which the student applies. Only those students who are candidates for the baccalaureate degree in social work may be admitted to the field practicum.

2. Completion of University Studies program (including Depth Education requirements) and all social work courses, with the exception of SW 5350 (Social Welfare Policy).

3. A grade of B- or better in SW 3050 (Practice I), SW 4150 (Practice II), and SW 4160 (Practice II).

4. A grade of C or better in all courses required for the major and a grade of C+ or better in SW 1010 (Introduction to Social Welfare).

5. No Pass-D-Fail grades received in courses required for the major.

6. Demonstration of appropriate professional, moral, and ethical character, and must abide by the National Association of Social Work (NASW) code of ethics.

7. Maintenance of an overall minimum GPA of 2.5 and a 2.75 minimum GPA in the Social Work Major.

8. A satisfactory grade (70 percent or better) on the Generalist Practice Test (GPT), given during finals week of spring semester.

Students should also be aware that if there are any personal data, such as that included on the application for state licensure, which
Social Work courses
Social Work faculty members review applications for advanced standing to qualify students to enroll in upper-division practice classes.
Department of Sociology, Social Work and Anthropology

schools, and have played critical roles in international ventures, public health programs, community development activities, and minority and migrant social actions. Additionally, anthropology serves applied interests in international development, archaeology and cultural resource management, cross-cultural health care, and osteology/forensics. With first-hand experience in every region of the country and around the world, anthropologists bring a unique understanding of specific social and ethnic groups and of the biological, ecological, and cultural factors that influence human behavior.

Special features of the anthropology program include smaller classes, individualized attention, opportunities for laboratory, museum, and field work, and the opportunity of working in teaching assistant positions. All these features give anthropology majors choices and experiences unavailable to undergraduates in most programs. The Anthropology Museum and Field Schools provide additional hands-on learning opportunities. Anthropology participates in the Department of Geology emphasis in Geoarchaeology, the American Studies Program, and the Folklore Program in the Department of English.

Anthropology leads to a variety of "real-world" jobs. Anthropology graduates are: lawyers, nurses, health care administrators, travel consultants, teachers of all kinds, cultural resource professionals, agency and program administrators, and technical writers. They work for museums, government land management, environmental and Foreign Service agencies, Indian tribes, and are common in both the government and private sectors of the environmental-cultural heritage protection industry. They can be found in public and private foundations, bureaus, and agencies for the arts, humanities, sciences, and tourism.

Graduate study in anthropology opens the world of practicing anthropology. Not limited to college teaching, anthropologists with graduate degrees can be found in a variety of private sector and government agency positions.

For students seeking a dual major, an Anthropology major can complement a major in American Studies, Biology, Geology, Geography, History, Languages, and Political Science. It also pairs well with majors in Natural Resources, because cultural resource and Native American issues are important to many positions in private firms and government agencies concerned with land management and the environment.

Major Requirements
A minimum of 39 credits is required for the anthropology major. All students must take four required courses, including a three-semester sequence in the basic areas of anthropology and a beginning upper-division level course in the history of anthropology. The anthropology major also requires exposure across the breadth of the discipline. To achieve this, students select courses from topical and area clusters at the upper-division levels and a final capstone course. Additional graduation requirements include:

Methods component
Majors must complete one "Methods" course in anthropology. The course chosen to meet this requirement may also count toward other anthropology major requirements.

A minimum of 16 credits of the anthropology course credits counting toward the major must be Utah State University courses. Credits from distance and residence center courses are subject to departmental approval for application toward the anthropology major.

Students majoring in anthropology must maintain a minimum 2.5 overall GPA in anthropology courses. A grade of C or better must be attained in all courses counted for the major, including foreign language and statistics courses. In addition, majors must complete the general requirements of the University in consultation with the student’s advisor, and complete the following major courses:

Utah State University 2006-2007 General Catalog
Department of Sociology, Social Work and Anthropology

ANTH 6900 Independent Studies .................................................1-3
SOC 4730 Women in International Development (Sp) ...............3

Students planning to receive a BA degree must complete two
years training or equivalent in a foreign language approved by
the Languages, Philosophy, and Speech Communication Department
or one year or equivalent in each of two foreign languages approved by
the Languages, Philosophy, and Speech Communication Department.

Students planning to receive a BS degree must complete STAT 1040
(Introduction to Statistics), and two courses selected from a list of
courses approved by the Anthropology Program.

Anthropology majors are encouraged to complete both the foreign
language and statistics requirements.

Sample Four-year Plan for Anthropology Major

Minimum GPA for Admission: 2.5, Career
Minimum GPA for Graduation: 2.5, major requirements,
including BS and BA required courses; 2.0, Career
Minimum Grade Accepted: C in major requirements,
including BS and BA required courses

This is a sample plan. It outlines University and major requirements in
very general terms. While there are requirements that are sequential,
many are flexible and do not need to be completed exactly in the order
listed. Students should always check with their faculty and professional
advisors to be sure they are meeting the requirements appropriately.
To make an appointment with a professional advisor,
call (435) 797-3883.

Freshman Year (30 credits)
Fall Semester (15 credits)
ANTH 1010 (BSS) Cultural Anthropology .................................3
ANTH 1020 (BLS) Biological Anthropology ...............................3

Fall Semester (15 credits)
ENGL 2010 (CL2) Intermediate Writing: Research Writing
in a Persuasive Mode ...............................................................3
University Studies Breadth course .............................................3
Anthropology upper-division courses .....................................6
Degree requirement (BS/BA) course ......................................3

Spring Semester (15 credits)
Anthropology upper-division courses .....................................6
Degree requirement (BS/BA) course ......................................3
Elective course(s) .................................................................6

Junior Year (30 credits)
Fall Semester (15 credits)
ANTH 3990 History and Theories of Anthropology ..................3
ANTH 4150 (QI) Problems in Cultural Anthropology ..............3

Depth Humanities and Creative Arts (DHA) course ....................3
Upper-division course(s) .......................................................4
Elective course(s) .................................................................2

Spring Semester (15 credits)
Anthropology upper-division courses .....................................6
Depth Life and Physical Sciences (DSC) course .......................3
Elective courses .................................................................6

Senior Year (30 credits)
Fall Semester (15 credits)
Anthropology upper-division course (Methods) .......................3
Communications Intensive (CI) course ....................................3
Elective course(s) .................................................................9

Spring Semester (15 credits)
Anthropology upper-division course (Capstone) ......................3
Elective course(s) .................................................................12

Minor Requirements
A minimum of 18 credits is required for the anthropology minor. A
minimum of 12 anthropology credits counting toward the minor must
be Utah State University courses. Credits from distance and residence
center courses are subject to departmental approval for application
toward the anthropology minor. Students must maintain a minimum 2.5
overall GPA in anthropology courses. A grade of C or better must be
attained in all courses counting toward the minor.

Required Courses (9 credits)
ANTH 1010 (BSS) Cultural Anthropology (F,Sp) .....................3
ANTH 1020 (BLS) Biological Anthropology (F) .......................3
ANTH 2030 (BSS/CI) World Archaeology (F,Sp) ....................3

Breadth-in-Anthropology Structured Electives
(9 credits minimum)
In addition to the required courses, students must complete a minimum
of 9 credits (ANTH 2010, 3000-5000 level courses) in anthropology
from the Structured Electives in Cultural Anthropology, Biological
Anthropology, or Archaeology.

Sociology Graduate Program

Graduate Program Director: Douglas B. Jackson-Smith
Program Office: Main 224, (435) 797-0582

The Department of Sociology, Social Work and Anthropology offers
graduate work leading to the MS, MA, and PhD degrees in Sociology.
The department also administers an interdisciplinary Master of Social
Sciences (MSS) degree with emphasis in International Rural and
Community Development.

The Graduate Program in Sociology provides a unique integrative
and reinforcing combination of demographic, organizational,
poLitical-economic, and social psychological orientations to major
domestic and global issues. At the graduate level, the department is
particularly strong in four areas: Demography, Natural Resource and
Environmental Sociology, Social Problems and Inequality, and Social
Change and Development. Graduate students have the opportunity to
merge basic foundation coursework in sociological theory and research
methods with more specialized training in selected specialty areas
and apprenticeship roles in both basic and applied research projects.
Sustained personal interaction between faculty and students is a
hallmark and strength of the program.
Department of Sociology, Social Work and Anthropology

The Graduate Program in Sociology has developed a Graduate Program Handbook that provides more details about the application process, financial assistance decisions, and graduation requirements. An electronic copy of this handbook is available on the departmental website: http://www.usu.edu/sswa/grad.htm

The typical graduate application has five main components:

1. A formal application form, available from the School of Graduate Studies;

2. Transcripts from the applicant’s undergraduate and graduate studies;

3. Test scores from the Graduate Record Examination (GRE) for all applicants, and the Test of English as a Foreign Language (TOEFL) and the Test of Spoken English (TSE) examinations for international students whose native language is not English;

4. Letters of reference from faculty or scholars who can attest to the applicant’s abilities to succeed in graduate school; and

5. A letter of intent providing background about the applicant’s training, interests, and experiences, as well as an overview of the applicant’s career goals and specific reasons why graduate training in sociology is important to the applicant.

All application materials should be sent directly to the School of Graduate Studies, 0900 Old Main Hill, Utah State University, Logan UT 84322-0900.

The department offers financial assistance to most graduate students enrolled in departmental programs. These funds are distributed through a competitive process, based on student qualifications, performance, and interests. Graduate assistants typically earn enough to cover basic costs of tuition and living expenses. In order to be considered for financial assistance for the following academic year, complete applications must be received by USU no later than February 1. Decisions on graduate student funding are usually based on an overall evaluation of all five components of the application.

Students must have scores on the verbal and quantitative portions of the Graduate Record Examination (GRE) at or above the 40th percentile. TOEFL scores are required for international candidates, with a minimum score of 600 (paper test) or 250 (computer-based test) deemed acceptable. The Test of Spoken English (TSE) is also strongly recommended, with a minimum score of 50 deemed acceptable. International applicants who are admitted without having taken the TSE will be required to take a test of spoken English fluency administered by the Intensive English Language Institute (IELI) at Utah State University prior to beginning their first semester in the Sociology Graduate Program. Dependent upon the test results, the student may be required to complete a program of English language training during the first semester of residence in the graduate program. For consideration for admission to the MSS degree program, applicants may submit either GRE or Miller Analogies Test scores.

Applications are screened throughout the year by the Graduate Program Executive Committee. No applications will be considered until all required information arrives in the School of Graduate Studies or a formal petition to review a nearly-complete file is made and approved.

Students with or without an undergraduate degree in sociology may enter the master’s degree program. However, before matriculating, basic competencies in sociology that have not been acquired through prior courses or experience must be satisfied. Students entering the doctoral program must complete master’s level prerequisites in sociological theory and research methods and statistics.

PhD in Sociology

In addition to coursework in sociological theory and methods, doctoral students are expected to concentrate in and pass written comprehensive examinations in two of the following specialty areas. Specialty areas are distinct, but are also highly integrative. One line of integration involves the department’s continuing emphasis on Rural Sociology, which links elements of all four specialty areas. The program is sufficiently flexible to permit students with a strong interest in an area other than the established specialty areas to elect that area as an emphasis area, rather than having a second specialization, with approval of the supervisory committee and the department head or his or her delegated representative. In this case, the student would select a series of courses in that area in consultation with his or her supervisory committee and the department head or his or her delegated representative.

Demography

The demography area of specialization is administered through the Population Research Laboratory. The orientation is twofold: (1) basic and policy-oriented research on sociological aspects of demographic structure and processes, including migration, marriage and fertility, morbidity, and mortality; and technical demographic topics such as population estimates and projections; and (2) the provision of demographic training to domestic and international students relevant to their respective settings. Research endeavors encompass a broad range of local, regional, national, and international projects in the areas of migration and population redistribution, family demography, life course and aging, health and disability, labor force, and population estimates and projections. Graduate coursework is provided in social demography, population theories and policy, and demographic methods, as well as through various special topic seminars.

Environmental Sociology/Sociology of Natural Resources

The faculty in this area maintain an active research involvement in a wide variety of areas, such as natural resource development, land use changes, public participation in environmental planning, hazardous facility siting, recreation, risk assessment, population/environment relationships, public land management issues, and natural resource policy. Faculty have been engaged in cooperative research ventures with engineering, natural resource sciences, and other physical and social sciences faculty. Graduate curricula offerings are focused on the sociology of natural resources, environmental sociology, environmental problems and inequality, and social risk analysis.

Social Problems and Inequality

This specialization is organized around analyses of the social and cultural processes through which social problems come to be recognized, with particular emphasis on race, class, and gender inequality.

Graduate courses in this area include theoretical foundations, as well as topical courses in the areas of criminology, health, gender, environmental justice, and work and occupations. Faculty members in this area have recently conducted extensive research on health risks and behavior, family and work conflict, peer court intervention in juvenile delinquency, and the gendered impacts of labor market restructuring.
Since the sociology program has a joint relationship with social work and anthropology, sociology graduate students have many opportunities to draw from the experience and applied research of these faculty as well.

**Social Change and Development**

This specialization is designed to provide a broad foundation for students interested in examining the social, political, and economic dynamics and impacts of social change. Two major goals of this program are to: (1) give students the conceptual and analytical foundations enabling them to understand the dynamics and impacts of social change and development, and (2) convey specific skills required for effective performance in applied fields.

While some faculty and students have projects in urbanizing contexts, there is a strong focus on rural sociology. Faculty members have extensive domestic and international experience examining rural community development, demographic changes, labor market restructuring, agrarian transformations, political transitions and social movements, and land use changes.

**Core Courses**

The core courses for the PhD degree in Sociology include the following:

- **SOC 7010 Issues in Sociological Theory (Sp)**: 3 credits
- **SOC 7100 Advanced Survey Techniques (Sp)**: 3 credits
- **SOC 7110 Advanced Sociological Analysis (F)**: 3 credits
- **SOC 7150 Advanced Qualitative Methods in Sociology (Sp)**: 3 credits

**MS and MA in Sociology**

The main objective of this degree program is to provide a firm foundation in sociological theory and methods. Students also have the opportunity to take electives in any of the departmental specialty areas or outside the department. A minimum of 30 credits (including a research thesis) is required for the degree.

**Core Courses**

The core courses for the MS and MA degrees in Sociology include the following:

- **SOC 6010 Development of Sociological Theory (F)**: 3 credits
- **SOC 6020 Modern Social Theory (F)**: 3 credits
- **SOC 6100 Advanced Methods of Social Research (F)**: 3 credits
- **SOC 6150 Social Statistics II (Sp)**: 3 credits

The ability to utilize a statistical package (or permission of instructor) is a prerequisite to SOC 6150 (Social Statistics II).

**MSS Sociology Specialization**

This specialization enables interdisciplinary training in three related disciplines. The program requires a minimum of 35 credits, including 17 credits in a major discipline (Sociology); and either (1) a minimum of 9 credits in each of two minors or (2) a minimum of 9 credits in a minor and a minimum of 9 credits in a cluster. Two credits for the Plan B paper are included in the minimum 17 credits in Sociology. A minimum overall GPA of 3.0 is required. This is an applied degree. Individual options and plans of study can be arranged in consultation with the student’s supervisory committee. At present, the degree is available with an emphasis in International Rural and Community Development.

**International Rural and Community Development**

This emphasis is designed to prepare administrators, planners, and researchers for work in international settings. The emphasis is on social and community factors in development. The interdisciplinary curriculum in sociology of development, rural sociology, economic anthropology, political science, and the economics of development has been specifically designed to prepare practitioners and leaders for careers in applied social development. The coursework can be adapted to the individual career interest of each student. The program involves students both from abroad and from the United States.

**Core Courses**

Individualized programs of study are prepared with the cooperation of the student and supervisory committee.

**Research**

The graduate program’s research agenda is focused within the framework of the department’s specialty areas. Since the areas are integrative, research tends to involve collaborative participation by several faculty members. Several active research projects are supported by the Utah Agricultural Experiment Station. Research is conducted at various levels, including international, national, regional, and state. The department has two active research units: (1) the Institute for Social Science Research on Natural Resources and (2) the Population Research Laboratory. Departmental research is supported by grants from federal and state agencies, local governments, private foundations, and the Utah Agricultural Experiment Station. Faculty members participate in many cross-campus research efforts, including the Women and Gender Research Institute, the USU Water Initiative, the Utah Water Research Laboratory, the Mountain West Center for Regional Studies, and the Natural Resources and Environmental Policy Program.

**Financial Assistance**

Both departmental support and formal research grant support are available to graduate students and are awarded on a competitive basis. Some highly qualified departmental graduate students are also nominated to compete for University fellowships. Students who wish to be considered for financial aid must submit applications by February 1 for the coming academic year. Late applications are considered only if additional funds are still available.

Teaching assistantships are available through the department. Research assistantships are available through faculty members who have ongoing projects with the Utah Agricultural Experiment Station or who have research grants from the University, private companies, and federal or state agencies. University fellowships are available for exceptionally qualified students.

**Career Opportunities**

Traditionally, persons with advanced degrees in sociology have been employed in college and university settings. Recent evidence has shown a greater variety of career paths. A survey conducted by the American Sociological Association showed that 21 percent of sociologists holding the doctoral degree were employed in the private sector; 31 percent were working in the nonprofit sector; 46 percent were working in federal, state, or local government agencies; and 12 percent were self-employed. USU sociology graduates have followed this pattern of diversity. They have secured appointments in a variety of academic, governmental, and private settings, both domestic and abroad. A sizeable number have achieved key leadership positions and high visibility in the profession.
Department of Sociology, Social Work and Anthropology

Sociology, Social Work and Anthropology Faculty

Professors
Stan L. Albrecht, President of Utah State University, environmental sociology, rural sociology, health studies
John C. Allen, rural development, natural resource sociology, survey research methods
E. Helen Berry, demography, ecology, methods, urban
Raymond T. Coward, Provost of Utah State University; social gerontology, health care delivery, rural sociology
Richley H. Crapo, religion, sex, and gender; sexuality and homosexuality
Steven E. Daniels, rural development, natural resource policy
Susan E. Dawson, occupational and environmental health
H. Reed Geertsen, community, sociological theory, medical
Gary Kiger, Dean of College of Humanities, Arts, and Social Sciences; social psychology; gender, work, and family; research methods

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), Master of Education (MEd), and Educational Specialist (EdS) in Special Education; Master of Rehabilitation Counseling (MRC); Doctor of Philosophy (PhD) in Disability Disciplines; the Special Education and Rehabilitation Department participates in the Interdepartmental Doctor of Education (EdD)

Undergraduate emphases: BS, BA—Mild/Moderate Disabilities, Severe Disabilities, Early Childhood Special Education

Graduate specializations: MEd, MS, EdS—Behavioral Disorders, Early Childhood Special Education, Mild/Moderate Disabilities, Severe Disabilities, Transition/Special Education

Licensure is available for teachers in early childhood special education, mild/moderate disabilities, and severe disabilities. At the postbaccalaureate level, licensure is available for teachers in vision and hearing impairments. A Special Education composite licensure program is available with the Department of Elementary Education. A dual licensure program is available with secondary education content majors.

Undergraduate Programs

Objectives

The undergraduate programs in the Department of Special Education and Rehabilitation offer educational and training opportunities for teachers and support personnel working with exceptional children and adults with disabilities. The programs prepare students to work with individuals with mild, moderate, and severe disabilities and with early childhood special education. Students who are majoring in other teaching fields (i.e., elementary education, secondary education) are encouraged to pursue a second endorsement by taking those courses which lead to a special education license. Teacher education programs in the department are accredited by the State of Utah and nationally by NCATE.

Areas of Emphasis

The Department of Special Education and Rehabilitation offers training programs for individuals who want to work with children and adults with disabilities. A student fulfilling the undergraduate course requirements will qualify for a BS or BA degree in special education and be eligible for a license to teach students with mild/moderate disabilities, students with severe disabilities, or young children with disabilities. The severe and mild/moderate endorsements allow graduates to teach children with disabilities from birth to five years old. In addition, the department offers composite teaching majors with the Department of Elementary Education and dual teaching majors with the Department of Secondary Education. Students completing the dual major requirements in secondary education will be eligible for teacher licensure in one of the special education endorsement areas and their secondary education content major. Students completing the composite major requirements in elementary education will be eligible for teacher licensure in one of the special education endorsement areas and elementary education. Students interested in teaching preschool children with disabilities may receive an early childhood special education license for ages 0-5, in addition to a K-12 special education endorsement in severe or mild/moderate disabilities. A Birth to Age 5 minor is available for Family, Consumer, and Human Development majors.

Requirements

Admission Requirements

Students are admitted to the Department of Special Education and Rehabilitation as Pre-Special Education majors by meeting the Utah State University minimum requirements (see pages 18-20). To become a Special Education major, a student must make written application to the department after meeting the following prerequisites: (1) completion of at least 40 attempted semester credits with a cumulative GPA of 2.75 or higher; (2) completion of admission requirements to the College of Education and Human Services Teacher Education Program (see page 116); (3) passing scores on all six Computer and Information Literacy (CIL) exams; and (4) passing score on Special Education Math exam. Students should apply to the department during fall semester of their sophomore year. Admission to the department is competitive based on several factors. These include: (1) the student’s current GPA; (2) the number of credit hours completed by the end of fall semester; (3) completion of premajor classes (such as STAT 1040 and FCHD 1500); and (4) the student’s career goals and experiences.

GPA Requirement

A minimum GPA of 2.75 is required to apply for admission, to remain in good standing, and to graduate from the program. All required special education classes must be completed with a grade of C or better.
Bachelor's Degree in Special Education
Undergraduate study leads to the Bachelor of Science or Bachelor of Arts degree in Special Education with licensure to teach students with mild/moderate disabilities, severe disabilities, or early childhood special education. The degree requires a total of 120 credits. The requirements are as follows:

A. University Studies Requirements
Competency Requirements (9-13 credits), Breadth Requirements (18 credits), and Depth Education Requirements (5 courses). For more information, see pages 49-57.

B. Professional Education Requirements (18-22 credits)
FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) (3 cr)
PSY 1100 Developmental Psychology: Infancy and Childhood (F,Sp) (3 cr) or
PSY 5600 Educational Psychology for Teachers (Sp) (3 cr)
SPED 4000 Education of Exceptional Individuals (F,Sp,Su) (2 cr)
SPED 5200 Seminar and Practicum in Early Childhood Education (F) (3 cr)
SPED 5500 Classroom Management Level I (Sp) (3 cr)
SPED 5600 Educational Psychology for Teachers (Sp) (3 cr)
SPED 5810 Seminar and Field Experiences with Infants and Families (Sp) (3 cr)
SPED 5820 Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5830 Practicum: Direct Instruction Reading and Language Arts for Students with Mild/Moderate Disabilities (F) (3 cr)
SPED 5840 Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5850 Practicum: Introduction to Instruction of Students with Severe Disabilities (Sp) (3 cr)
SPED 5910 Practicum: Advanced Systematic Instruction of Students with Severe Disabilities (Sp) (3 cr)
SPED 5920 Applied Behavioral Analysis 2: Applications (Sp) (3 cr)
SPED 5930 Applied Behavioral Analysis 3: Applications (Sp) (3 cr)

C. Special Education Major (42-60 credits)
Coursework includes: human growth and development; applied behavior analysis; introduction to systematic instruction (task analysis, curriculum-based measurement, behavioral objectives, contingent reinforcement); designing curriculum; Individualized Educational Programs (IEP); educational assessment, analysis, and adaptation of instructional materials; intervention strategies for academic and social behaviors; and parent involvement. Additionally, each endorsement area includes practicum work with exceptional children or youth. Finally, all students must complete student teaching with students with disabilities.

D. Teaching Support (15 credits)
The support area is designed to enhance the Special Education major's background. Areas recommended include communicative disorders, psychology, sociology, family and human development, recreation, and physical education.

E. Electives (7-20 credits)

Endorsement Areas
Students are required to complete the Mild/Moderate Disabilities Endorsement, the Severe Disabilities Endorsement, or the Birth to Age 5 Certificate.

Mild/Moderate Disabilities Endorsement (48 credits)
SPED 5010 (QI) Applied Behavioral Analysis 1: Principles, Assessment, and Analysis (F) (3 cr)
SPED 5040 Foundations of Effective Assessment and Instructional Practices (F) (3 cr)
SPED 5050 Applied Behavioral Analysis 2: Applications (Sp) (3 cr)
SPED 5060 Consulting with Parents and Teachers (Sp) (3 cr)
SPED 5070 Policies and Procedures in Special Education (F) (3 cr)
SPED 5200 Seminar and Practicum in Early Childhood Education (F) (3 cr)
SPED 5310 Teaching Reading and Language Arts to Students with Mild/Moderate Disabilities (F) (3 cr)
SPED 5320 Teaching Content Areas and Transition to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5330 Eligibility Assessment for Students with Mild/Moderate Disabilities (F) (3 cr)
SPED 5340 Teaching Math to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5410 Practicum: Direct Instruction Reading and Language Arts for Students with Mild/Moderate Disabilities (F) (3 cr)
SPED 5420 Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5520 Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5620 Practicum: Introduction to Instruction of Students with Severe Disabilities (F) (3 cr)
SPED 5630 Practicum: Advanced Systematic Instruction of Students with Severe Disabilities (Sp) (3 cr)
SPED 5790 Special Topics: Assessment of Persons with Severe Disabilities (Sp) (3 cr)

Severe Disabilities Endorsement (45 credits)
SPED 5010 (QI) Applied Behavioral Analysis 1: Principles, Assessment, and Analysis (F) (3 cr)
SPED 5040 Foundations of Effective Assessment and Instructional Practices (F) (3 cr)
SPED 5050 Applied Behavioral Analysis 2: Applications (Sp) (3 cr)
SPED 5060 Consulting with Parents and Teachers (Sp) (3 cr)
SPED 5070 Policies and Procedures in Special Education (F) (3 cr)
SPED 5200 Seminar and Practicum in Early Childhood Education (F) (3 cr)
SPED 5310 Teaching Reading and Language Arts to Students with Mild/Moderate Disabilities (F) (3 cr)
SPED 5320 Teaching Content Areas and Transition to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5330 Eligibility Assessment for Students with Mild/Moderate Disabilities (F) (3 cr)
SPED 5340 Teaching Math to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5410 Practicum: Direct Instruction Reading and Language Arts for Students with Mild/Moderate Disabilities (F) (3 cr)
SPED 5420 Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5520 Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5530 Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5620 Practicum: Introduction to Instruction of Students with Severe Disabilities (F) (3 cr)
SPED 5630 Practicum: Advanced Systematic Instruction of Students with Severe Disabilities (Sp) (3 cr)
SPED 5790 Special Topics: Assessment of Persons with Severe Disabilities (Sp) (3 cr)

Birth to Age 5 Certificate (46 credits)
Students who are completing this certificate in addition to the Mild/Moderate Disabilities Endorsement or the Severe Disabilities Endorsement will need to complete only those courses which they have not already taken under their endorsement.

SPED 5010 (QI) Applied Behavioral Analysis 1: Principles, Assessment, and Analysis (F) (3 cr)
SPED 5040 Foundations of Effective Assessment and Instructional Practices (F) (3 cr)
SPED 5050 Applied Behavioral Analysis 2: Applications (Sp) (3 cr)
SPED 5060 Consulting with Parents and Teachers (Sp) (3 cr)
SPED 5070 Policies and Procedures in Special Education (F) (3 cr)
SPED 5200 Seminar and Practicum in Early Childhood Education (F) (3 cr)
SPED 5310 Teaching Reading and Language Arts to Students with Mild/Moderate Disabilities (F) (3 cr)
SPED 5320 Teaching Content Areas and Transition to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5330 Eligibility Assessment for Students with Mild/Moderate Disabilities (F) (3 cr)
SPED 5340 Teaching Math to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5410 Practicum: Direct Instruction Reading and Language Arts for Students with Mild/Moderate Disabilities (F) (3 cr)
SPED 5420 Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5520 Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5530 Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5620 Practicum: Introduction to Instruction of Students with Severe Disabilities (F) (3 cr)
SPED 5630 Practicum: Advanced Systematic Instruction of Students with Severe Disabilities (Sp) (3 cr)
SPED 5790 Special Topics: Assessment of Persons with Severe Disabilities (Sp) (3 cr)

1After acceptance to the Special Education major and before beginning the Special Education practica, students are required to complete a background check for conviction of violating any law (except traffic violations).
2SPED 5200 should be taken during the senior year.
3Students working toward the Birth to Age 5 Certificate are encouraged to complete either the mild/moderate disabilities endorsement or the severe disabilities endorsement, as well as courses included in the Birth to Age 5 Certificate. For additional information, see the special education advisor.
Department of Special Education and Rehabilitation

Suggested Four-year Course of Study for Special Education Major, Mild/Moderate Disabilities Emphasis
This is a model of the requirements and possible sequence of courses. However, students may progress through the program or have more flexibility if they have high ACT scores, CLEP credit, concurrent enrollment credit, AP credit, and/or transfer credit; or if they attend during summer semesters.

Additional Semester
During this additional semester, students should finish their Secondary Content Major courses.

*At least two of the six breadth courses must have a USU prefix.
*The MATH 1050 requirement (or its equivalent) must be completed prior to application to the Teacher Education Program.

Assessment and Accreditation
Information about assessment within the Department of Special Education and Rehabilitation, as well as information about NCATE and CORE accreditation, can be found at: http://sped.usu.edu/accreditation/index.html

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30–3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information
For more information concerning Bachelor of Science or Bachelor of Arts requirements and the sequence in which courses should be taken, see major requirement sheets available from the Department of Special Education and Rehabilitation (Education 313) or the Special Education Advising Office (Education 107). Requirement sheets can also be accessed online at: http://www.usu.edu/ats/majorsheets/

Financial Support
Scholarships, assistantships, grants-in-aid, and work-study programs are available through the University. In addition, there are some endowed scholarships available through the department and, sometimes, there are stipends available from federal grants.

Graduate Programs
Admission Requirements
Admission decisions are made by the department’s Graduate Program Committee. Admission requirements are based upon those of the School of Graduate Studies (see pages 99-100). In addition, the committee considers experience, academic record and curriculum, formal recommendations, and test scores. Master’s and doctoral program admission requires GRE scores. Students applying for admission to special education graduate programs, who do not have an undergraduate special education background, may be required to complete selected undergraduate courses prior to admission as fully-matriculated graduate students.

Applicants for the Rehabilitation Counseling program are screened throughout the year by the Graduate Program Committee. Deadlines for application to the Special Education Master’s program are March 15, June 15, and October 15. The deadline for application to the Disabilities Disciplines Doctoral program is February 1. Only complete files will be reviewed. Applications received after these dates will be considered, but opportunities for financial assistance may be limited. No applications will be considered until all required information arrives at the School of Graduate Studies office.
Teaching Licenses

The department prepares students for licensure as teachers of students with mild/moderate disabilities, students with severe disabilities, and preschool-age students with disabilities. Licensure may also be obtained in visual and/or hearing impairments through a multi-university consortium program. Licensure may be obtained as part of the graduate degree program or without a graduate degree.

Degree Programs

Master of Science in Special Education (MS)

The Master of Science degree program is designed for persons who desire a graduate program that will help them improve their teaching skills and who are contemplating an advanced degree beyond a master’s degree. Generally speaking, MS theses differ from MEd creative projects in that they involve experimental research. That is, a study is designed to determine the relationship between an independent variable (i.e., an intervention or treatment) and a dependent variable (i.e., a target behavior). The intent of such research is to contribute knowledge to the field of special education. A minimum of 36 credits, including a thesis, is required for the MS degree.

Master of Education in Special Education (MEd)

The Master of Education degree program is designed for persons who desire a graduate program that will help them improve their competencies as educators. This includes school personnel, as well as individuals who are involved in education-related activities across a variety of community, work, and clinical settings. The MEd degree focuses on refining school practices in terms of instruction and management practices, legal requirements, and professional collaboration. All candidates must complete a creative project. A minimum of 36 credits, including a creative project, is required for the MEd degree.

Master of Rehabilitation Counseling (MRC)

The Master of Rehabilitation Counseling prepares persons with the basic competencies to provide rehabilitation counseling to individuals with a broad range of disabilities in a variety of settings, such as state rehabilitation agencies, independent living centers, rehabilitation hospitals, private rehabilitation facilities and agencies, employment assistance programs, and private industry. The degree is a 48-credit program consistent with the requirements of the Council on Rehabilitation Education (CORE). The Rehabilitation Counseling Program has a limited number of scholarships funded through the U.S. Department of Education, Rehabilitation Services Administration. These scholarships require a postgraduate commitment to work for a not-for-profit agency serving the needs of individuals with disabilities for two years for every year of scholarship received.

Educational Specialist Program (EdS)

The educational specialist degree is designed for advanced graduate students seeking instruction beyond a master’s degree. Programs are individually planned to address specific student needs. Completion of the EdS program is based on completion of required coursework, submission of a research proposal to a supervisory committee, and satisfactory defense of the research project.

Doctor of Philosophy in Disability Disciplines (PhD)

The PhD program prepares leadership personnel for positions in research and personnel preparation in the areas of special education, rehabilitation, applied behavior analysis, and disabilities studies. The PhD program is designed to develop students’ competence in (1) mastery of the theoretical and applied content underlying provision of appropriate educational and other services for persons with disabilities; (2) ability to conduct independent research; and (3) ability to conduct effective personnel preparation, including teaching audiences with varying levels of sophistication and expertise, and supervising the delivery of special education and rehabilitation services.

Doctorate of Education (EdD)

The department participates in the College of Education and Human Services Interdepartmental Doctorate of Education (EdD) degree program. The general purpose of the special education emphasis area of the EdD program is to prepare leadership personnel for positions in administration, supervision, curriculum development, and teacher training. For information about areas of specialization, emphases of study, research sponsored, admission requirements, procedures to follow, and other information, see pages 251-252 of this catalog.

Financial Assistance

Scholarships, teaching assistantships, and research assistantships are available for qualified doctoral students. Scholarships are also available to qualified students in the Master of Rehabilitation Counseling program.

Additional Information

Graduate handbooks outlining the graduate programs, policies, and procedures in the Department of Special Education and Rehabilitation may be obtained from the department office in room 313 of the Education Building.

For more information about graduate requirements and the sequence in which courses should be taken, see major requirement sheets, available from the department.

Graduation requirements described in this catalog are subject to change. Students should check with the department concerning possible changes.

Because the Special Education and Rehabilitation graduate programs occasionally undergo fine-tuning and updating, prospective students are advised to check the departmental website at: http://sped.usu.edu

Special Education and Rehabilitation Faculty

Professors
Alan M. Hofmeister, technology, school reform, reading and math instruction
Benjamin Lignugaris/Kraft, personnel preparation, secondary special education, social/vocational skill training, behavioral analysis, instructional design and program development
Sarah Rule, early intervention, developmental disabilities, technology and teacher education
Charles L. Saltzberg, applied behavioral analysis, single-subject research design, research on teacher training, employment preparation for persons with disabilities, video assisted training programs, paraeducator training, and students with disabilities in higher education

Utah State University 2006-2007 General Catalog
Department of Special Education and Rehabilitation

Julie F. Smart, rehabilitation counseling, disability studies, Hispanics with disabilities, Spanish translation of rehabilitation instruments, multicultural rehabilitation
Richard P. West, behavior analysis in education, computer-based decision making, parent training, school organization and administration
Karl R. White, research and evaluation, early intervention

Adjunct Professor
K. Richard Young, behavior disorders, behavior analysis, social skills

Professors Emeritus
Garth M. Eldredge, rehabilitation counseling
Marvin G. Fifield, evaluation of persons with emotional disturbances

Associate Professors
Judith M. Holt, early childhood and visually impaired
Pamela J. Hudson, adolescents with mild disabilities, mathematics
Robert L. Morgan, behavior analysis/transition
Timothy A. Slocum, reading, mild/moderate disabilities, behavior analysis, research methods

Research Associate Professor
Marilyn Likins, paraeducators, mild and moderate disabilities, alternative teacher preparation

Adjunct Associate Professor
Daniel P. Morgan, behavior disorders, social skills, legal issues in special education, personnel development in special education

Associate Professors Emeritus
Hyrum S. Henderson, teacher training
Devoe C. Rickert, vocational training

Assistant Professors
David E. Forbush, mild/moderate disabilities, reading, behavior analysis in schools, assessment, educational systems change, educational leadership
Nancy Glomb, mild/moderate disabilities, distance education
Thomas S. Higbee, early childhood, severe disabilities, autism

Research Assistant Professors
Cynthia J. Rowland, distance education, speech and language development, naturalistic instructional methods, early literacy, assistive technology
Jared Schultz, rehabilitation counseling

Extension Assistant Professor
Nancy K. Glomb, special education teacher education, distance education, legal issues, behavior disorders, collaboration

Adjunct Assistant Professors
David W. Bush, psychological, assessment, counseling
Julie Landeen, legal issues in special education, special education administration
Sharon Neyme, students at-risk
Ginger Rhode, legal issues in special education, behavior analysis
Kathleen Robins, multi-sensory disabilities
Randyl Schelble, mild and moderate disabilities

Clinical Instructors
Barbara J. Fiechtli, preschool and infant service delivery
Kimberly H. Snow, curriculum development

Adjunct Clinical Instructors
Kirk Allen, emotionally disturbed, special education administration
Gayle Baker, severe disabilities
Deb Bowen, vocational rehabilitation and transition
Jerry Christensen, personnel development, special education leadership
Norman Corson, job placement of persons with disabilities
Marlene Deer, clinical early childhood
Glenn Dyke, behavior disorders, mild and moderate disabilities
AnnaLee Hansen, mild and moderate disabilities
Melanie Jones, mild and moderate disabilities
Susanne Kuresa, behavior disorders, classroom management
Martell Menlove, special education administration
Cindy Myers, moderate and severe disabilities, alternative teacher preparation
Lois Naegle, American Sign language, deaf culture, rehabilitation counseling
Bruce Schroeder, collaboration, special education administration, special education personnel development
Patricia B. Willis, learning disabilities, early literacy

Clinical Instructor Emeritus
Joan F. Forsgren-White

Special Education (SPED), pages 715-719.
Rehabilitation Counseling (REH), pages 704-705.
Department of Theatre Arts

Undergraduate Programs

Objectives

The primary mission of the Department of Theatre Arts is to offer a flexible program with the following objectives:

1. To prepare students for professional work in performance, various types of theatre design, and technical practice with producing theatre organizations;

2. To teach appreciation and service courses contributing to the University Studies Program;

3. To prepare students for careers as theatre instructors in secondary schools and to provide service courses in support of the language arts curriculum of the State of Utah for elementary education majors;

4. To prepare students for advanced study and training;

5. To sponsor public performances in which students can practice the art and craft of theatre and interpretive/narrative performance. These productions will enhance the cultural life of the University community and region.

Production Groups and Theatres

The Theatre Arts Department sponsors the following production groups and divisions: Utah State Theatre, Old Lyric Repertory Company (summer), Studio/Conservatory Stage Series, and Utah State Children’s Theatre. Facilities used for performances by these groups include the 660-seat thrust stage Morgan Theatre in the Chase Fine Arts Center, the 380-seat proscenium Caine Lyric Theatre in downtown Logan, and a flexible 80-seat Studio Stage. Facilities also include a costume shop, scenery shop, sound studio, design studio, dance and movement laboratory, and storage areas.

Requirements

Departmental Admission and Scholarship Requirements

Admission requirements are the same as those described for the University on pages 16-20. Students in good standing may apply for admission or transfer to the program. Students transferring into the department must have a minimum 2.75 GPA (on a scale of 4.0) regardless of credit amount transferred. Students are encouraged to declare a theatre arts major early and consult an advisor as soon as they arrive on campus, as the professional BFA degree requires a minimum of three full years to complete. Admission to specialized BFA programs by audition, interview, or portfolio review, subsequent to admission to the department, is explained below. Students must maintain an average 2.75 minimum GPA in all theatre classes required for graduation. No grade of less than a C- is accepted in any theatre class, and no required classes, regardless of department, may be taken on a pass-fail basis.

Required Core Courses (15 credits)

All Theatre Arts majors are required to complete the following core courses:

THEA 1033 Beginning Acting (F,Sp) ..................................................... 3
THEA 1513 Stage and Costume Crafts (F,Sp) .................................... 3
THEA 1713 Introduction to Playtext Analysis (F,Sp) .......................... 3
THEA 2410 Directing (F,Sp) ................................................................. 3
Department of Theatre Arts

THEA 3230 Survey of Western Theatre (F) ........................................3

In addition, all students must complete a minimum of 6 credits of production practicum work:

**Required Practicum Courses (6 credits)**

Theatre Arts majors and minors should expect to work on Utah State Theatre and studio productions as a crew member nearly every semester. All Theatre Arts majors, except for the BFA with the Theatre Education emphasis, are required to complete the following production work requirements (6 credits). Only 1 credit of THEA 2555 or 2556 may be taken per assignment in a given semester (45 clock hours per credit or until assignment is completed).

THEA 2555/4750 Production Practicum: Scenery (F,Sp,Su) .......... 1
THEA 2555/4750 Production Practicum: Lighting (F,Sp,Su) ............ 1
THEA 2555/4750 Production Practicum: Properties (F,Sp,Su) ........... 1
THEA 2555/4750 Production Practicum: Costumes (F,Sp,Su) .......... 1
THEA 2555/4750 Production Practicum: Publicity (F,Sp,Su) .......... 1
THEA 2556/4750 Production Run Crew (F,Sp,Su) ...................... 1

Transfer students’ transcripts will be evaluated and a prorated production work requirement will be set at the time of admission to the program. Additional production work is required under some degree plans.

**Bachelor of Arts Degree**

A Bachelor of Arts degree in the General Theatre Arts Studies Program requires 60 credits. Requirements are as follows: core courses and production work (21 credits); performance courses (9 credits); design/technical courses (3 credits); dramatic literature/history courses (15 credits); and a university minor. To obtain a Bachelor of Arts degree, a student must fulfill the language requirement (see page 58). All students declaring a Theatre Arts major are enrolled in the BA program until they audition or interview for one of the BFA tracks. The BA degree is recommended for students interested in pursuing careers in stage directing, especially in a graduate program. In lieu of a senior project, students in this program must select a minor in consultation with their advisor, and fulfill all requirements for the minor selected.

**General Theatre Arts Studies Program (THEA)**

**BA Degree in Theatre Arts (48 credits) (2.75 GPA)**

**Language Requirement (see University graduation requirements)**

**Required Theatre Arts Department Core Courses (15 credits)**

**Required Minor**

Since the study of theatre requires an understanding of many different fields of human endeavor, students majoring in Theatre Arts must select a minor in consultation with their advisor. Students are encouraged to select a minor that will broaden their knowledge of the world, as well as strengthen their practice of theatre.

**Sample Four-year Plan for Theatre Arts Major,**

**General Theatre Arts Studies Program (BA Degree)**

Minimum GPA for Admission: 2.75, USU; 2.75, Career
Minimum GPA for Graduation: 2.75, major courses; 2.75, USU;
2.75, Career
Minimum Grade Accepted: B- in performance and design courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

### Bachelor of Fine Arts Degree

**Program Entrance Requirements**

Students seeking the BFA degree who choose the Acting Emphasis or the Theatre Design and Technology Emphasis will be admitted by audition or an interview and portfolio review. Periodic audition and review will be undertaken to determine good standing in these programs.

This degree is highly recommended for those students desiring more intensive preprofessional training in their selected discipline. Students in these programs also complete a capstone recital or project during their senior year.

**Acting Emphasis (AE) (78 Credits) (2.75 GPA)**

**BFA Degree in Theatre Arts**

Candidates are accepted into this performance program through an audition and interview conducted by a BFA committee. Progress and retention in this emphasis is monitored through periodic recitals/auditions before the same body, and students must maintain B or better grades in all performance courses. All students in the Acting Emphasis must perform a recital during their senior year. Transfer students are subject to the same acceptance process and progress review. Inquiries about specific requirements and expectations should be directed to the Theatre Arts Office.

Students seeking the BFA degree must work closely with advisors. Most University Studies courses and the core curriculum should be completed before the end of the sophomore year, as training is conducted in a manner adapted from conservatory practice. Individual needs, interests, and goals of the student are taken into consideration for selection of elective courses.
Department of Theatre Arts

Required Theatre Arts Department Core Courses (15 credits)

Required Practicum Courses (6 credits)

BFA Acting Recital/Capstone (2 credits)
All BFA Acting Emphasis majors must perform a recital during their senior year. Recital material is to be selected and approved during the spring semester of the junior year, including submission of a written proposal. Students must be enrolled in THEA 5910 for 2 credits during the semester in which the recital is to be presented.

Recitals should be 45-60 minutes in duration and may be individual or combined efforts on the part of not more than two candidates (combined efforts must be approved by the BFA committee). Upon approval of the advisor, an individual performer may recruit no more than two additional performers. All BFA candidates are required to attend recitals.

Required Acting Recital
THEA 5910 Senior Project (BFA Performance Recital) (F,Sp) ....... 2

Theatre Performance Minor

(18 credits) (2.75 GPA)

Note: Transcripts will list this minor as Theatre Arts Minor.

The Theatre Performance Minor is available to all students. Students enrolled in this minor must submit a resume and/or production history of their theatre work to date. Progress will be reviewed on an annual basis.

Required Theatre Arts Courses (9 credits)
THEA 1033 Beginning Acting (F,Sp) ........................................ 3

Minimum Grade Accepted: 2.75, in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3683.

Freshman Year (31 credits)
Fall Semester (15 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ..........3
THEA 1033 Beginning Acting .................................................3
THEA 1513 Stage and Costume Crafts ....................................3
University Studies Breadth courses .......................................6

Begin crafting and assembling portfolio for Theatre Education.

Spring Semester (16 credits)
THEA 2555 Production Practicum (1 cr) or
THEA 2556 Production Run Crew (1 cr) .....................................1
THEA 1713 Introduction to Playscript Analysis ..........................3
Required Design/Technical course .........................................3
University Studies Quantitative Literacy (QL) course ..............3
University Studies Breadth courses .......................................6

Complete the CIL exams by the end of the Freshman Year.

Sophomore Year (32 credits)
Fall Semester (16 credits)
THEA 2410 Directing ..............................................................3
THEA 2555 Production Practicum (1 cr) or
THEA 2556 Production Run Crew (1 cr) .................................1
THEA 3230 Survey of Western Theatre .................................3
Required Performance course ..............................................3
Teaching Minor course .......................................................3
University Studies Breadth course .......................................3

Review portfolio with faculty advisor.
Department of Theatre Arts

Spring Semester (16 credits)
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ......................................................... 3
THEA 2555 Production Practicum (1 cr) or
THEA 2556 Production Run Crew (1 cr) .................................. 1
THEA 5340 Theatre Production Methods for Educators .............. 3
Required Technical course ..................................................... 3
Teaching Minor course ......................................................... 3
Quantitative Intensive (QI) course .......................................... 3

Complete Speech and Hearing Screening and Background Check.
Complete Teacher Education Writing Exam.

Junior Year (32 credits)
Fall Semester (16 credits)
THEA 4750 Advanced Production Practicum (1 cr) or
THEA 4850 Advanced Production Projects (1 cr) ..................... 1
Required Theatre History course .......................................... 3
Required Design/Technical course ...................................... 3
Required Performance course ............................................ 3
University Studies Breadth course .................................... 3
Teaching Minor course ..................................................... 3

Review portfolio with faculty advisor.

Spring Semester (16 credits)
THEA 4750 Advanced Production Practicum (1 cr) or
THEA 4850 Advanced Production Projects (1 cr) ..................... 1
THEA 5240 (CI) Contemporary Theatre .................................. 3
THEA 5360 Drama in the Secondary Education Classroom:
Grades 7-12 ............................................................................ 3
Teaching Minor courses ....................................................... 6
Depth Life and Physical Sciences (DSC) course ...................... 3

Senior Year (25 credits)
Fall Semester (13 credits)
THEA 4740 Advanced Performance Practicum I (1 cr) or
THEA 4840 Advanced Performance Practicum II (1 cr) ............. 1
THEA 4750 Advanced Production Practicum (1 cr) or
THEA 4850 Advanced Production Projects (1 cr) ..................... 1
Required Performance course ............................................ 3
Teaching Minor courses ....................................................... 6
Senior Project ........................................................................ 2

Apply for admission to the STEP Program.
Review portfolio with faculty advisor.

Spring Semester (12 credits)
THEA 4750 Advanced Production Practicum (1 cr) or
THEA 4850 Advanced Production Projects (1 cr) ..................... 1
SCED 3210 (CI/DSS) Educational and Multicultural Foundations 3
STEP Level I courses ......................................................... 8

Certification Year (24-26 credits)
Fall Semester (12 credits)
STEP Level II courses ......................................................... 12

Spring Semester (12-14 credits)
THEA 5910 Senior Project (if not doing Senior Project in context of Student Teaching) ............................................... 2
STEP Level III (Student Teaching) courses ............................. 12

Theatre Arts Teaching Minor
(29 credits) (2.75 GPA)
Theatre Education Courses (select 3 credits minimum)
THEA 5340 Theatre Production Methods for Educators (Sp) ........ 3
THEA 5360 Drama in the Secondary Education Classroom:
Grades 7-12 (Sp) ................................................................. 3

Theatre Performance Practicum Courses (select 2 credits)
THEA 4740 Advanced Performance Practicum I (F,Sp)
(1-2 cr, repeatable) .............................................................. 1-2
THEA 4840 Advanced Performance Practicum II (F,Sp)
(1-2 cr, repeatable) .............................................................. 1-2
THEA 5310 Theatre Mentorship and Service (F,Sp,Su)
(1-3 cr, repeatable) .............................................................. 1-3

Theatre Production Practicum Courses (select 6 credits minimum; 3 credits must be upper division)
THEA 2555 Production Practicum (F,Sp,Su) (1 cr, repeatable) .... 1-2
THEA 4750 Advanced Production Practicum (F,Sp,Su)
(1-3 cr, repeatable) .............................................................. 1-3

Production Responsibilities

Because the production programs of the department are some of the most important training tools of the discipline, all majors and teaching minors are required to participate in them. A permanent theatre participation record is maintained for each student, and successful completion of crew and performance assignments is a requirement for graduation.

As a capstone experience to their university careers, all majors in their senior year are required to complete a project or recital appropriate to their area of emphasis, except those in the General Theatre Arts Studies BA program.

Financial Support

Scholarships, grants-in-aid, and work-study opportunities are available through the University. In addition, the department offers talent awards and tuition scholarships to its own majors. These are generally for one semester of in-state tuition and may be applied for each semester by continuing students. Several auditions and interviews are scheduled during the year, both on-campus and at regional theatre conferences and festivals. The department offers special work grants through its production program for qualified, skilled students. There are a number of named scholarships awarded to students qualifying under specific conditions. Contact the Theatre Arts Department for more information.
Department of Theatre Arts

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student's discipline. Participating in departmental honors enhances students' chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information

Major requirement sheets, which provide detailed information about requirements for undergraduate programs within the Theatre Arts Department, can be obtained from the department, or accessed online at: http://www.usu.edu/arts/majorsheets/

Graduate Programs

Admission Requirements

All students making application to the MFA program who cannot audition or interview with a member of the theatre arts faculty must submit a resume and a portfolio with renderings, designs, photographs appropriate to the specialization, and any special letters of reference not included with the formal application to the School of Graduate Studies.

The Miller Analogies Test (MAT) may be substituted for the more standard GRE, although the department does not recommend the MAT for international students.

Students who have received their undergraduate training at other institutions or in a discipline other than theatre will be expected to meet a proficiency equivalent to that of USU Theatre Arts graduates. This may require the student to complete the following minimum 20-credit program, which will not count toward the graduate degree:

THEA 1033 Beginning Acting (F,Sp) ........................................... 3
THEA 1513 Stage and Costume Crafts (F,Sp) ............................. 3
THEA 2410 Directing (F,Sp) .................................................. 3
THEA 3230 Survey of Western Theatre (F) .............................. 3
THEA 4750 Advanced Production Practicum (F,Sp,Su) ............. 3
Elective Theatre Arts courses in one program area ....................... 6

The student will be given credit for any equivalent courses taken within seven years prior to the date of admission.

Students accepted into the program must begin during the fall semester. The nature of the discipline and the program require that students maintain a continuous residence at the campus during the first two years of study.

Master of Arts

The candidate for the 30 (minimum) credit MA degree will normally complete a thesis, but may, with the approval of the supervisory committee, present a thesis alternative Plan B (36 credits minimum required).

Required Courses (30 credits)

Requirements are as follows:

THEA 6010 Introduction to Graduate Study in Theatre (F).......... 3
THEA 6240 Contemporary Theatre (F,Sp) .............................. 3
THEA 6790 Seminar in Drama (Sp) ......................................... 3
THEA 6800 Graduate Studies in Theatre: Dramaturgy Project .... 2

Two advanced theatre history or dramatic literature courses selected from the Theatre Arts, English, or Languages, Philosophy, and Speech Communication departments are also required (6 credits).

Students must also complete two 5000- or 6000-level THEA courses, two of which must be in a single area.

Generally, students complete up to 8 thesis credits in THEA 6970. However, under special circumstances, a Plan B option in this program is available, requiring 12 credits of special project work and no more than 3 thesis credits in THEA 6970, for a total of 36 credits minimum.

In addition, the standard language competency of 15 credits in one language is required for the MA degree (see pages 104-105).

Master of Fine Arts (60 credits minimum)

The candidate for the 60 (minimum) credit MFA must complete the Plan B program, and will undertake from three to four creative projects in the appropriate specialization. Under this plan, the required project reports customarily take the form of production books, journals, or a design or technical portfolio.

The student may specialize in one of the following areas. It is recommended that both a primary and a secondary emphasis be elected.

- Scenery Design
- Costume Design
- Lighting Design
- Advanced Technical Practice

The minimum residency is four semesters, including one or two summers in an established repertory or stock company, or equivalent experience. Participation in the department’s summer Old Lyric Repertory Company will satisfy this requirement. A minimum total of 60 semester credits is required. The nature of the discipline, as well as the resources of the department, discourage credit by extension, large amounts of transfer credit (i.e., in excess of 12 credits), or numerous off-campus projects.

Students who have already earned an MA degree in theatre from an accredited institution will generally be given approximately one academic year of credit toward the MFA degree. To finish the MFA degree, they will then be required to complete a specialized program of approximately 40 credits.

Required Courses

The program is completed in three phases, and while there may be
considerable overlap between them, students undergo formal reviews before advancing to the next phase. The number of semesters given is approximate.

I. Entry Phase (approximately two semesters) (19 credits)
   A. Required Course (3 credits)
      THEA 6010 Introduction to Graduate Study in Theatre (F) ..........3
   B. Advanced Literature Component (select two courses) (6 credits)
      THEA 6200 Contemporary Theatre (F,Sp) ..........3
      THEA 6240 Storytelling (F,Sp,Su) ..........3
      THEA 6510 Advanced Scene Design (F,Sp) ..........3
      THEA 6520 Advanced Lighting Design (Sp) ..........3
      THEA 6540 Advanced Technical Practice (Sp) ..........3
      THEA 6920 Project in Theatre A ..........3
      THEA 6920 Project in Theatre B ..........3
      THEA 6920 Project in Theatre C ..........3
   C. Advanced Design Coursework (in areas of specialization) (select 6 credits)
      THEA 5510 Computer-Aided Design for Theatre (F) ..........3
      THEA 5950 Rendering and Painting for the Theatre (F,Sp) ..........3
      THEA 6480 Theatre Leadership and Management (Sp) ..........3
      THEA 6510 Advanced Scene Design (F,Sp) ..........3
      THEA 6540 Advanced Technical Practice (Sp) ..........3
      THEA 6680 Theatre Production Portfolio (Sp) ..........3
   D. Design Studies (complete 2 credits each semester) (4 credits)
      THEA 5990 Design Studies for Theatre (F,Sp) ..........4
      THEA 6180 Seminar in Drama (Topics include: Drafting for Theatre, Tailoring, Pattern Drafting, Structural Design for the Stage, Costume Crafts) (F,Sp) ..........3
      THEA 6270 Performance Theory and Criticism (Sp) ..........3
      THEA 6290 Special Topics in Theatre History and Literature (F,Sp) ..........3
      THEA 6290 Research Studies (F,Sp,Su) ..........3
      THEA 6790 Advanced Lighting Design (Sp) ..........3
      THEA 6890 Seminar in Drama (Topics include: Drafting for Theatre, Tailoring, Pattern Drafting, Structural Design for the Stage, Costume Crafts) (F,Sp) ..........3
      THEA 6920 Research Studies (F,Sp,Su) ..........3
      THEA 6920 Project in Theatre A ..........3
      THEA 6920 Project in Theatre B ..........3
      THEA 6920 Project in Theatre C ..........3
      THEA 6920 Old Lyric Repertory Company or its equivalent in a recognized stock or repertory program; a letter of satisfactory performance from the company director should be submitted to the department (repeatable) ..........4-8

Notes:
1. Students may also begin projects while they are still in the Entry Phase, but credit given for projects should include time for assembling and writing up the report, which is due the following semester; the supervising instructor will notify the major professor or advisor when this is completed.
2. Planning of the major projects should begin as early as possible in this phase.
3. Qualified major and minor projects should be identified by the faculty each spring, based upon the plays selected for the following season. Graduate students will meet with the faculty or department head to discuss directing, design, or technical assignments; or request a list of such projects by mid-April each year.
4. During (or upon completion of) this phase, the student will:
   a. Submit a petition to advance to the final phase. The date of this petition will depend upon individual progress.
   b. Submit proof that projects A, B, and C, as well as the written reports for them, have been completed.
   c. Submit a proposal and/or preliminary work for the major project: renderings, preliminary working drawings, etc.

Culminating Phase (one semester minimum)
   Required Courses (7 credits)
   THEA 6180 Theatre Production Portfolio (Sp) ..........3
   THEA 6920 Thesis (F,Sp) ..........4
   (Assemble Plan B reports and complete major report in thesis format.)

Note:
The option to cancel a student project, or to allow work to proceed but disqualify it as an MFA project based upon insufficient preparation or validity, rests with the department’s Graduate Study Committee, the student’s Supervisory Committee chairperson (advisor), and the Executive Producer of Utah State Theatre. This rule is designed to protect the priorities of the department and the integrity of its productions.
During (or upon completion of) this phase, the student will:

1. Assemble the Supervisory Committee for a final review (defense) of the student’s graduate work.

2. File a complete copy of all Plan B reports with the department, in accordance with procedures of the School of Graduate Studies. Copyrighted material, such as published scripts, will be filed separately in the Theatre Arts Office.

3. Be awarded the appropriate degree.

**Financial Assistance**

Teaching and general assistantships are awarded by the department. Assistantships are generally in the area of production, depending on theatre needs and the skills of applying students, and are renewable for up to three years. Application should be made directly to the department by February 1. Graduate students are not guaranteed financial assistance during their initial year of residence. Several other grants and forms of support are available on a competitive basis. Fellowships may supplement assistantships when funding is available.

**Career Opportunities**

The MA degree is a general, nonterminal degree designed to train students for further doctoral work in the discipline and to serve as a career upgrade for secondary school teachers. Students interested in teaching dramatic literature and theatre history and criticism at the postsecondary level should plan to use the MA as a step toward further PhD studies. Some two-year colleges employ MA graduates in teaching positions; however, almost no four-year colleges do so.

The MFA is designed for students pursuing careers in educational, professional, and regional theatres, or, in some cases, further doctoral-level work. It is regarded by most university and college administrations as a terminal degree for individuals with academic appointments as acting instructors, designers, and technicians. The department makes no guarantee that its training will qualify its graduates to pass examinations administered by the theatrical trade unions or otherwise meet requirements for guild membership. MFA graduates are qualified to seek employment with regional and professional theatres, regardless of the guild or trade union status of these organizations.

**Additional Information**

Specific details about each of the foregoing programs are outlined in documents available through the department. Requirements are subject to change. Internet e-mail requests should be sent to: luannh@hass.usu.edu.

**Theatre Arts Faculty**

**Professors**
Mark L. Damen, playwriting, history
Colin B. Johnson, theatre history and criticism, film

**Professor Emeritus**
Sidney G. Perkes, scene and costume design

**Associate Professors**
Kevin Doyle, acting, directing
Bruce L. Duerden, technical theatre, lighting
Dennis Hassan, scene design
Nancy E. Hills, costume design
Lynda Linford, acting
David E. Sidwell, history, storytelling, theatre education

**Associate Professor Emeritus**
Arthur Y. Smith, interpretation, theatre education

**Assistant Professors**
Shawn Fisher, design, technical generalist
Adrianne Moore, voice, acting, directing
Artemis Preeshl, movement, dance, acting

**Lecturer**
Robbin C. Black, theatre appreciation, theatre education

**Course Descriptions**

Theatre Arts (THEA), pages 722-725.
Interdepartmental Program in Toxicology

Director: Roger A. Coulombe, Jr.
Location: Animal Science 213
Phone: (435) 797-1600
FAX: (435) 797-1601
E-mail: rogerc@cc.usu.edu
WWW: http://toxicology.usu.edu

Degrees offered: Master of Science (MS) and Doctor of Philosophy (PhD) in Toxicology

Graduate Programs

Established in 1962, USU's Interdepartmental Graduate Program in Toxicology is one of the first degree-granting graduate toxicology programs in the country. More than 140 students have received MS and PhD degrees through this research-intensive interdisciplinary program. Students affiliate with the program through one of several departments: Animal, Dairy and Veterinary Sciences (ADVS); Biology; Chemistry and Biochemistry; Civil and Environmental Engineering (CEE); or Plants, Soils, and Biometeorology (PSB). The USDA Poisonous Plants Laboratory also provides facilities and research projects for study.

Admission Requirements

Students with a degree in life sciences, physical science, medical science, or engineering and with adequate preparation in chemistry, biology, physics, and/or mathematics are encouraged to apply. Admission to the program requires compliance with the general admission requirements of the School of Graduate Studies, a faculty sponsor, and acceptance into the sponsoring professor's home department. Applicants should have a minimum GPA of 3.0 from completed degree programs. International students must receive a minimum TOEFL score of 250 (computer-based) or 600 (paper-based).

Major Research Areas

Molecular and Biochemical Toxicology

Modern molecular biological techniques are used to determine the mechanisms of toxicity and carcinogenesis by examining how various natural and synthetic compounds interact with the cellular genome. Resultant mutations in oncogenes and tumor suppressor genes are being investigated. The mechanisms of free-radical toxicity, specifically by iron and other transition elements, are also important research topics. Other ongoing studies examine the mechanisms of cancer chemoprevention, chemical metabolism, effects of toxicants on macromolecular syntheses, and metabolic intermediates. The toxicity of poisonous plants is another program emphasis.

Environmental Toxicology

Utah State University has a comprehensive research program in several aspects of environmental toxicology. Specifically, Utah State University faculty pioneered the use of white-rot fungi for the biodegradation of environmental contaminants. Models are developed and tested for dealing with the migration of chemicals in the environment, especially those with potential routes for human exposure. Basic biological, chemical, and physical methods are explored for hazardous waste management programs.

Course Requirements

Students in the MS program are required to complete the following core courses: ADVS 6350, 6400, 6600 (taught alternate fall semesters), 6810; CHEM 5700, 5710; STAT 5200.

Students in the PhD program are required to complete the following core courses: ADVS 6350, 6400, 6600 (taught alternate fall semesters), 6810; BIOL 5600 or 5620; CHEM 5700, 5710; STAT 5200.

Additional coursework may be required, at the discretion of the student's advisory committee.

Financial Assistance

Graduate students are eligible for competitive fellowships, teaching assistantships, and research assistantships. Out-of-state fees are waived, and in many cases, in-state fees are also waived. Hourly employment, which often permits waiver of out-of-state fees, is also available.

The Toxicology Graduate Program participates in the WICHE Western Regional Graduate Degree Program (WRGP). Residents of participating states may enroll in this program without paying nonresident tuition. To facilitate this process, applicants should inform the Toxicology Program of their WRGP status upon application.

Toxicology Program Faculty

Professors

Ann J. Anderson, plant toxicology (Biology)
Ann E. Aust, metal-induced carcinogenesis (Chemistry and Biochemistry)
Steven D. Aust, biochemical toxicology and bioremediation (Chemistry and Biochemistry)
Roger A. Coulombe, Jr., molecular toxicology, cancer chemoprevention, natural product toxicology (ADVS)
Howard M. Deer, pesticides and occupational health (ADVS)
William J. Doucette, fate of environmental chemicals, phytoremediation (CEE)
R. Ryan Dupont, biological waste treatment (CEE)
William J. Popendorf, occupational toxicology and industrial hygiene (Biology)
Ronald C. Sims, environmental engineering (CEE)

Research Professor

Darwin L. Sorensen, aquatic toxicology (CEE)

Associate Professors

Paul R. Gross, soil chemistry and phytoremediation (PSB)
Jeffery O. Hall, veterinary toxicology (ADVS)

Collaborators at USDA Poisonous Plants Laboratory

Dale R. Gardner, natural product chemistry
Kip E. Panter, poisonous plants
James A. Pfister, behavioral toxicology
Bryan L. Stegelmeier, veterinary pathology
Department of Watershed Sciences

Department Head: Chris Luecke
Location: Natural Resources 210
Phone: (435) 797-2459
Fax: (435) 797-1871
E-mail: chris.luecke@usu.edu
WWW: http://www.cnr.usu.edu/awer

Undergraduate Advisor: Maureen A. Wagner, Natural Resources 120, (435) 797-2448, maureen@cc.usu.edu

Degrees offered: Bachelor of Science (BS) in Fisheries and Aquatic Sciences; BS in Watershed and Earth Systems; Master of Science (MS) and Doctor of Philosophy (PhD) in Watershed Science; MS and PhD in Ecology; MS and PhD in Fisheries Biology

Graduate specializations: MS, PhD in Ecology—Aquatic Ecology; MS, PhD in Fisheries Biology—Aquatic Ecology, Conservation Biology, Fisheries Management

Undergraduate Programs

Objectives

Watershed science is the study of the physical, chemical, and biological processes associated with the movement of water across the landscape. Clean and adequate water supplies are essential elements of human societies. Understanding the interaction among water, earth materials, plants, and animals is essential to the management of wildland, agricultural, and urban ecosystems. The Department of Watershed Sciences offers comprehensive educational opportunities for undergraduate and graduate students interested in fisheries science, aquatic ecology, and the understanding of watershed ecosystems. Departmental faculty provide expertise in fish biology, the management and conservation of aquatic ecosystems, and the analysis of the water cycle. Degree programs within the Watershed Sciences Department help students learn how water links the physical, biological, and geographic aspects of watersheds. Knowledge of this linkage process is necessary for understanding and managing water supply, water quality, and ecosystem health.

Career Opportunities

Watershed scientists work throughout the United States, as well as in the developed and developing world, performing the tasks of understanding, managing, and restoring water supplies, water quality, and ecosystem health. Graduates of programs within the Watershed Sciences Department become scientists and managers for natural resources agencies, professionals with consulting and nonprofit environmental firms, and teachers and researchers at major universities. Degree holders often work as environmental scientists, hydrologists, fisheries biologists, or specialists in geographic information analysis and remote sensing. With experience and/or advanced degrees, graduates of programs within the Watershed Sciences Department may do natural resource assessment, management planning, and resource impact analysis.

Federal agencies, such as the Forest Service, Fish and Wildlife Service, Geological Survey, Bureau of Land Management, Environmental Protection Agency, National Park Service, Bureau of Reclamation, and National Marine Fisheries Service, hire graduates of Department of Watershed Sciences academic programs. Graduates also find employment with state natural resource agencies, nongovernmental conservation organizations, and private consulting firms.

Requirements

Departmental Admission Requirements

Admission requirements for the department are the same as those described for the College of Natural Resources (see pages 126-127).

Academic Advisement

First-year students are assigned to the department head for initial advising. After students have completed 20 credits in the program, they are assigned a faculty advisor. Students are encouraged to meet with their advisor each semester prior to enrolling for courses. If they do not know who their advisor is, students should contact the Department of Watershed Sciences (NR 210) or the College of Natural Resources Academic Service Center (NR 120).

Graduation Requirements

All courses listed as major subject courses must be taken on an A-B-C-D-F basis. A grade of C- or better is required for all AWER courses used to meet the requirements for a major or minor in the department. The grade point average for all courses taught by the College of Natural Resources must be 2.5 or higher.

For information about changes in requirements, course sequence, and scheduling, students should confer with a departmental advisor. The undergraduate program can be readily tailored to individual student needs with the help of a faculty advisor.

In addition to completing the University Studies course requirements, all students earning an undergraduate degree in the Department of Watershed Sciences must complete the Common Departmental Core, as listed below. Some of these courses may be used toward the University Studies requirements, as indicated by the University Studies designations listed in parentheses following the course numbers.

Common Departmental Core (19 credits)

AWER 1020 Aquatic, Watershed, and Earth Resources
Professional Orientation (F) ...............................................................1
AWER 3700 (CI) Fundamentals of Watershed Science (Sp) ........3
AWER 4490 Small Watershed Hydrology (F) .................................4
AWER 4500 Limnology: Ecology of Inland Waters (Sp) .................3
AWER 4930 Geographic Information Systems (F) ..........................4
AWER 4980 Undergraduate Seminar (F,Sp) .................................1
ENVS 4000 (DSS) Human Dimensions of Natural Resource Management (F) .................................................................3

Bachelor of Science in Fisheries and Aquatic Sciences

Students in the Fisheries and Aquatic Sciences major must meet the course requirements for University Studies, as well as complete the Common Departmental Core listed above. They must also complete the requirements listed below in sections A through E.

A. Scientific Foundation (35 credits)

BIOL 1610 Biology I (F) .................................................................4
BIOL 1620 (BLS) Biology II (Sp) ..................................................4
CHEM 1210 Principles of Chemistry I (F,Sp) .................................4
CHEM 1215 Chemical Principles Laboratory I (F,Sp) .................1
CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) ...............4
CHEM 1225 Chemical Principles Laboratory II (F,Sp) .....................1
MATH 1050 (QL) College Algebra (F,Sp,Su) .................................4
MATH 1100 (QL) Calculus Techniques (F,Sp,Su) .........................3
NR 2220 General Ecology (F,Sp) ..................................................3
PHYS 2110 The Physics of Living Systems I ..................................4
STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) .........................3
Department of Watershed Sciences

B. Fisheries Courses (13 credits)
  AWER 3100 (CI) Fish Diversity and Conservation (F) .......................... 3
  AWER 3110 Fish Diversity Laboratory (F) ........................................ 1
  AWER 4650 Principles in Fishery Management (Sp) .......................... 3
  AWER 5200 Fish Habitat Relationships in Managed Forests (Sp) .... 3
  AWER 5550 Freshwater Invertebrates (Sp) ....................................... 3

C. Capstone Courses (6 credits minimum)
  AWER 4510 Aquatic Ecology Practicum (F) ..................................... 3
  AWER 4530 Water Quality and Pollution (Sp) .................................. 3
  AWER 5330 Large River Management (F) ....................................... 3
  AWER 5930 Geographic Information Analysis (Sp) ........................... 4
  AWER 6200 Watershed Analysis (Sp) ............................................. 2
  Or
      Approved Natural Resources Capstone Experience ...................... 3

D. Directed Elective Courses (23 credits)
  Students must choose a minimum of 23 elective credits to complete
  the Fisheries and Aquatic Sciences degree requirements. The majority
  of these elective credits must come from courses directly related to
  the degree program. All elective courses must be approved by the
  student’s faculty advisor before enrollment. The following is a list
  of recommended courses that could be used to satisfy this requirement.
  Courses listed in Section C that were not used to meet the Capstone
  Course requirement may be taken as part of the suggested electives.

  AWER 3000 Oceanography (Sp) .................................................... 3
  AWER 3820 (QI) Climate Change (Sp) .......................................... 3
  AWER 5150 Fluvial Geomorphology (F) ....................................... 3
  AWER 5640 Riparian Ecology and Management (Sp) ....................... 3
  ENVS 5320 Water Law and Policy in the United States (Sp) .......... 3
  FRWS 3810 Plant and Animal Populations (Sp) .............................. 3
  FRWS 4880 Genetics in Conservation and Management (F) ........... 3
  HIST 3950 (DHA/CI) Environmental History ............................... 3
  PHIL 3510 (DHA) Environmental Ethics (F,Sp) ............................. 3
  POLS 4820 (DSS) Natural Resources and Environmental Policy:
    Political Economy of Environmental Quality (Sp) ..................... 3

Note: Students wanting to pursue federal employment should check
the following U.S. Office of Personnel Management website for a listing
of required coursework:

E. General Electives
  Students may take the remainder of the 120 credits from any
  department. The guidelines described under General Education
  Requirements and University Studies Depth Education Requirements
  (see pages 49-57) should be consulted to ensure meeting University
  Studies Requirements.

Fisheries and Aquatic Sciences Major
Recommanded Four-Year Plan of Study

Students should meet regularly with their faculty advisor and carefully
plan their academic program, keeping in mind that many upper-division
courses have prerequisites and must be taken in sequence.

The first two years of study include courses designed to give the
student a sound scientific background, an introduction to the field of
natural resources management, and an introduction to aquatic and
earth resources.

Students following the recommended schedule listed below should be
able to complete degree requirements in four years (eight semesters).

Freshman Year (29 credits)
Fall Semester (15 credits)
  AWER 1020 Aquatic, Watershed, and Earth Resources Professional
    Orientation ................................................................. 1
  BIOL 1610 Biology I .......................................................... 4
  ENGL 1010 (CL1) Introduction to Writing: Academic Prose ..... 3
  MATH 1050 (QL) College Algebra ........................................... 3
    Breadth American Institutions (BAI) course .......................... 3

Spring Semester (14 credits)
  AWER 4980 Undergraduate Seminar ........................................... 1
  BIOL 1620 (BLS) Biology II ................................................. 4
  MATH 1100 (QL) Calculus Techniques ................................. 3
    Breadth Creative Arts (BCA) course ................................. 3
    Breadth Humanities (BHU) course ................................... 3

Sophomore Year (29 credits)
Fall Semester (15 credits)
  AWER 3100 (CI) Fish Diversity and Conservation ....................... 3
  AWER 3110 Fish Diversity Laboratory ................................. 1
  CHEM 1210 Principles of Chemistry I .................................. 4
  CHEM 1215 Chemical Principles Laboratory I ....................... 1
  ENGR 1550 (BSS) Introduction to Environmental and Natural
    Resource Economics (3 cr) or
    Other approved Breadth Social Sciences (BSS) course (3 cr) .... 3
  STAT 3000 (QI) Statistics for Scientists ................................ 3

Spring Semester (14 credits)
  AWER 3700 (CI) Fundamentals of Watershed Science .................. 3
  CHEM 1220 (BPS) Principles of Chemistry II .......................... 4
  CHEM 1225 Chemical Principles Laboratory II ....................... 1
  ENGL 2010 (CL2) Intermediate Writing: Research Writing in a
    Persuasive Mode ...................................................... 1
  NR 2220 General Ecology ................................................. 3

Junior Year (30 credits)
Fall Semester (15 credits)
  AWER 4490 Small Watershed Hydrology .................................. 4

  PHYS 2110 The Physics of Living Systems I ........................... 4
    Directed Elective or General Elective course .................... 3

Spring Semester (15 credits)
  AWER 4500 Limnology: Ecology of Inland Waters ................. 3
  AWER 4650 Principles in Fishery Management ....................... 3
  AWER 5550 Freshwater Invertebrates .................................... 3
  FRWS 3810 Plant and Animal Populations (suggested elective) .... 3
    Depth Humanities and Creative Arts (DHA) course .............. 3

Senior Year (32 credits)
Fall Semester (15 credits)
  ENVS 4000 (DSS) Human Dimensions of Natural Resource
    Management ............................................................. 3
    Capstone Course (AWER 4510 recommended) ...................... 3
    Directed Elective or General Elective courses .................. 9

Spring Semester (17 credits)
  AWER 5200 Fish Habitat Relationships in Managed Forests .......... 3
    Capstone Course (AWER 4530 recommended) ...................... 3
    Directed Elective or General Elective courses .................. 11
Department of Watershed Sciences

Fisheries Science Minor Requirements (18 credits)
All courses required for the Fisheries Science minor must be taken on an A-B-C-D-F basis. A grade of C- or better is required for all AWER courses used to meet requirements for this minor.

A. Fisheries Science Core Courses (9 credits)

AWER 3100 (CI) Fisheries and Conservation (F) ............................................... 3
AWER 3700 (CI) Fundamentals of Watershed Science (Sp) .................................... 3
NR 2220 General Ecology (F,Sp) ....................................................................... 3

B. Electives (9 credits)
Select three courses from the following:

AWER 4650 Fishery Management (F,Sp) ..................................................... 3
AWER 5200 Fish Habitat Relationships in Managed Forests (Sp) .................... 3
AWER 5550 Freshwater Invertebrates (Sp) ..................................................... 3
FRWS 3810 Plant and Animal Populations (Sp) ............................................. 3

Bachelor of Science in Watershed and Earth Systems

Students in the Watershed and Earth Systems major must meet the course requirements for University Studies, as well as complete the Common Departmental Core listed on page 535. They must also complete the requirements listed below in sections A through E.

A. Science Foundation (19 credits)

CHEM 1210 Principles of Chemistry I (F,Sp) .................................................... 4
CHEM 1250 General Physics—Science and Engineering I ................................ 4
MATH 1210 Calculus I (F,Sp) ........................................................................ 4
STAT 3000 Statistics for Scientists (F,Sp,Su) .................................................. 3
PHYS 2210 General Physics—Science and Engineering I ................................ 4

B. Water Resources and Earth Systems Courses (15 credits)

AWER 3820 (QI) Climate Change (Sp) ........................................................... 3
AWER 4750 Fundamentals of Remote Sensing Science (F) ......................... 3
AWER 5150 Fluvial Geomorphology (F) .......................................................... 3
AWER 5170 Fluvial Geomorphology Lab (F) ................................................... 3
SOIL 3000 Fundamentals of Soil Science (F,Sp) ............................................. 3

C. Capstone Courses (6 credits minimum)

AWER 4510 Aquatic Ecology Practicum (F) .................................................... 3
AWER 4530 Water Quality and Pollution (Sp) ................................................. 3
AWER 5330 Large River Management (F) ...................................................... 3
AWER 5930 Geographic Information Analysis (Sp) ......................................... 3
AWER 6200 Watershed Analysis (Sp) ............................................................. 2

Or

Approved Natural Resources Capstone Experience ....................................... 3

D. Directed Elective Courses (31 credits)

Students must choose a minimum of 31 elective credits to complete the Watershed and Earth Systems degree requirements. The majority of these elective credits must come from courses directly related to the degree program. All elective courses must be approved by the student’s faculty advisor before enrollment. The following is a list of recommended courses that could be used to satisfy this requirement. Courses listed in Section C that were not used to meet the Capstone Course requirement may be taken as part of the suggested electives.

AWER 5200 Fish Habitat Relationships in Managed Forests (F) .................... 3
AWER 5250 Remote Sensing of Land Surfaces (Sp) ..................................... 4

E. General Electives

Students may take the remainder of the 120 credits from any department. The guidelines described under General Education Requirements and University Studies Degree Education Requirements (see pages 49-57) should be consulted to ensure meeting University Studies Requirements.

Note: Students wanting to pursue federal employment should check the following U.S. Office of Personnel Management website for a listing of required coursework:
http://www.opm.gov/qualifications/SEC-IV/B/GS1300/1315.HTM

Watershed and Earth Systems Major Recommended Four-Year Plan of Study

Students should meet regularly with their faculty advisor and carefully plan their academic program, keeping in mind that many upper-division courses have prerequisites and must be taken in sequence. Students following the recommended schedule listed below should be able to complete degree requirements in four years (eight semesters).

Freshman Year (31-32 credits)

Fall Semester (15 credits)

AWER 1020 Aquatic, Watershed, and Earth Resources Professional Orientation ................................................................. 1
CHEM 1210 Principles of Chemistry I .............................................................. 4
ECON 1550 Introduction to Environmental and Natural Resource Economics (or other approved Breadth Social Sciences course) ................. 3
ENGL 1010 Introduction to Writing: Academic Prose .................................. 3
GEO 1110 The Dynamic Earth: Physical Geology ........................................ 4

Spring Semester (16-17 credits)

AWER 3700 (CI) Fundamentals of Watershed Science ................................ 3
CHEM 1220 (BPS) Principles of Chemistry II (4 cr) or
Other approved elective course (3-4 cr) .......................................................... 3
MATH 1210 (QL) Calculus II .......................................................................... 3
PHYS 2210 (QI) General Physics—Science and Engineering II ................. 4

Sophomore Year (29-31 credits)

Fall Semester (16-17 credits)

MATH 1220 (QL) Calculus II (4 cr) or
Other approved elective course (3-4 cr) ......................................................... 3
PHYS 2210 (QI) General Physics—Science and Engineering II ................. 4

Spring Semester (13-14 credits)

AWER 3820 (QI) Climate Change ................................................................. 4
ENGL 2010 Intermediate Writing: Research Writing in a Persuasive Mode .................................................................................. 3
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr) or
Other approved elective course (3-4 cr) ......................................................... 3

Utah State University 2006-2007 General Catalog 537
Department of Watershed Sciences

Junior Year (30 credits)

AWER 4500 Limnology: Ecology of Inland Waters (Sp) ....................... 3
AWER 5150 Fluvial Geomorphology (F) ........................................... 3
AWER 5640 Riparian Ecology and Management (Sp) .......................... 3

Financial Assistance
The main sources of undergraduate financial assistance include University scholarships, grants-in-aid, work-study, and loans. In addition, more than 30 scholarships are offered for eligible students in the College of Natural Resources.

Scholarships are awarded for scholastic and professional achievements at the department, College of Natural Resources, and University level. For more information, contact College of Natural Resources academic advisors. Grants-in-aid and work-study are available from the Financial Aid Office. In addition, departmental faculty often employ undergraduate students to assist in research, extension, and outreach projects. These projects often involve field and laboratory data collection, data management and analysis, and report preparation.

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information
For additional information about the Bachelor of Science requirements, course sequencing, and departmental specialization options and their related coursework, as well as updated information describing current programs and courses offered by the Department of Watershed Sciences, visit the Watershed Sciences main office, Natural Resources 210, or visit http://www.cnrs.usu.edu/awer. Major requirement sheets may be obtained at the departmental office, or online at: http://www.usu.edu/ats/majorsheets/

Graduate Programs

Admission Requirements
General admission requirements apply, in addition to the requirements which follow. Although admission to the graduate program is treated on an application-by-application basis, the following are usually required: (1) a bachelor’s degree from an accredited college or university; (2) a GPA of 3.2 or better (out of 4.0) for the most recent two years of academic coursework; (3) combined verbal and quantitative GRE scores above the 40th percentile; and (4) a letter of “interest and purpose” detailing the applicant’s reasons for seeking an advanced degree. Foreign students should have a TOEFL score of at least 550.
The written statement of interest helps match applicants with faculty advisors. A faculty member must agree to serve as the major professor in order for an applicant to be accepted. Prospective students are encouraged to contact faculty members early in the application process to investigate mutual interests, projects, and prospects for financial support.

Previous training in the field is not a prerequisite for admission, although a sound background in the physical and biological sciences is recommended. Successful applicants without the necessary background will be expected to obtain it in the course of their studies for the advanced degree.

**Degree Programs**

A Master of Science degree in Fisheries Biology or Watershed Science, with emphasis on the management of fisheries or watershed resources directed toward decision-making roles in natural resource agencies, is offered for the applicant with previous agency experience and for the student motivated toward an administrative career. A Doctor of Philosophy degree in Fisheries Biology, Ecology, or Watershed Science is provided for students interested in pursuing a research or academic career.

A thesis or dissertation based on original research performed by the student is required. Written comprehensive examinations are required of all students pursuing the PhD degree. At the discretion of the student’s graduate supervisory committee, an additional oral examination may be required.

The minimum requirement for an MS degree is 30 credits, including at least 24 credits in residency and 6 credits of thesis research. The minimum requirement for a PhD degree is 60 approved graduate credits in addition to an MS degree, or 90 approved graduate credits with no MS degree. At least one year (a minimum of 32 credits), including a minimum of two consecutive semesters, of full-time registration must be in residence at USU.

With committee approval, graduate credit may be transferred from accredited graduate schools, provided the minimum residency requirement (including thesis and dissertation credit) at USU is met. Transfer credit, which must not have been used for any other degree, will be shown on official USU transcripts at completion of the degree.

**Master of Natural Resources**

The department also participates in the College of Natural Resources Master of Natural Resources (MNR) degree program. For more information, see page 453.

**Specializations**

The MS and PhD degrees in Fisheries Biology and Ecology allow students to specialize in either Fisheries Management or Aquatic Ecology.

**Financial Assistance**

General aspects of financial support for graduate students at Utah State University are listed on pages 98-99 in the Graduate Financial Assistance section. This includes important information on the University-wide policies and terms of reference for research and teaching assistantships, graduate tuition obligations and benefits, Western Regional Graduate Programs, and competitive University-wide fellowships and scholarships.

**Assistantships**

Research assistantships are available through individual faculty members who hold research grants or contracts. Occasionally, teaching assistantships are available through the department. Recipients of teaching assistantships are usually selected from among PhD students.

**Western Regional Graduate Programs**

The MS and PhD in Watershed Science are Western Regional Graduate Programs. For more information, see page 98.

**Watershed Sciences Faculty**

**Professors**

Todd A. Crow, aquatic ecology, conservation biology, tropical biology
Charles P. Hawkins, aquatic ecology, stream and riparian ecosystems
Chris Luecke, aquatic ecology, fisheries management
Wayne A. Wurtsbaugh, limnology, fish ecology, and watershed biogeochemistry

**Adjunct Professors**

Christopher Neale, remote sensing
David G. Tarboton, geomorphology, hydrology

**Professors Emeritus**

John A. Kadlec, wetland ecology and biogeochemistry
John M. Neuhold, fisheries biology

**Associate Professors**

Robert R. Gillies, remote sensing and meteorology
John C. Schmidt, fluvial geomorphology and water policy
Helga Van Miegroet, wildland soils and biogeochemistry

**Adjunct Associate Professors**

Michelle A. Baker, ecology, hydrology
Joanna L. Endter-Wada, cultural anthropology, natural resource policy and sociology
Joel L. Pederson, geomorphology, paleoclimatology, and sedimentology
Bruce E. Rieman, fisheries management
Juergen Symanzik, computational and graphical statistics

**Assistant Professors**

Matthew E. Baker, riparian ecology, watershed hydrology, GIS, and spatial analysis
Phaedra E. Budy, assistant leader, fisheries, Utah Cooperative Fisheries and Wildlife Research Unit, fisheries management and conservation
Tamato Kasahara, riparian hydrology, biogeochemistry
Nancy O. Mesner, water quality, water policy, and modeling
Michael A. White, global change ecology

**Research Assistant Professor**

Mark R. Vinson, aquatic invertebrate ecology and biomonitoring
Department of Watershed Sciences

Adjunct Assistant Professors
Nicolaas W. Bouwes, Jr., fisheries management, aquatic ecology
Anne Brasher, ecology specialist, water quality assessment
Jayne Brim-Box, population genetics and conservation biology
David G. Chandler, hydrology
Michael N. Gooseff, hydrologic modeling
David Naftz, geochemist
Brett Roper, USDA Forest Service Aquatic Monitoring Center Program Leader, aquatic ecologist

Michael L. Scott, riparian plant ecology
J. Christopher Wilson, director, State of Utah Division of Wildlife Resources Fisheries Experiment Station, fish pathologist/nutritionist

Undergraduate Advisor:
Maureen A. Wagner, Natural Resources 120, (435) 797-2448, maureen@cc.usu.edu

Degrees offered: Bachelor of Science (BS) in Conservation and Restoration Ecology; BS, Master of Science (MS), and Doctor of Philosophy (PhD) in Forestry; BS in Rangeland Resources; BS in Wildlife Science; MS and PhD in Ecology; MS and PhD in Range Science; and MS and PhD in Wildlife Biology

Graduate specializations: MS, PhD in Ecology—Conservation Biology, Wildlife Ecology; MS, PhD in Wildlife Biology—Conservation Biology, Problem Wildlife Management, Wildlife Management

Undergraduate Programs

Objectives

The Department of Wildland Resources offers four undergraduate degrees: Conservation and Restoration Ecology, Forestry, Rangeland Resources, and Wildlife Science. These degree programs offer broad educational opportunities for students interested in the analysis and management of forest and rangeland ecosystems and their associated wildlife populations. The department’s philosophy of education is to promote a broad interdisciplinary approach to natural resources analysis, management, and science.

The first two years of study in the Department of Wildland Resources are designed to provide students with a sound background in the natural sciences, an introduction to the field of natural resources management, and an introduction to their respective major. The last two years are designed to provide an advanced understanding of natural resource management and science, depth concentration in the major, and experience with the integration of scientific and management concepts across a diversity of disciplines and management scenarios. Students are expected to enroll for 15 or more credits of coursework per semester.

Career Opportunities

Graduates in Wildland Resources programs qualify for a broad range of career opportunities specific to their major. The Bachelor of Science degrees in Forestry, Rangeland Resources, and Wildlife Science are designed to meet the U.S. Office of Personnel Management (OPM) requirements for professional, permanent, full-time jobs with the Forest Service, Fish and Wildlife Service, Bureau of Land Management, National Park Service, or other federal natural resources agencies. The Bachelor of Science in Conservation and Restoration Ecology is designed to meet OPM requirements for Ecologist, but is flexible and intended to meet the needs of nongovernmental careers as well, such as the Nature Conservancy or private natural resource consulting firms, as well as state and county restoration and management agencies. Graduates in all degree programs receive a solid background in biological and quantitative sciences, as well as the communication skills needed to succeed in many career paths.

Requirements

Admission Requirements

Admission requirements for the Department of Wildland Resources are the same as those described for the College of Natural Resources on pages 126-127.

Graduation Requirements

All General Science Foundation Courses, Departmental Common Courses, and all courses listed as major subject courses must be taken on an A-B-C-D-F basis. A grade of C- or better is required for all FRWS courses used to meet the requirements for a major or minor in the department. The grade point average for all courses taught by the College of Natural Resources must be 2.5 or higher.

In addition to completing the University Studies course requirements (see pages 49-57), all students earning an undergraduate degree in the Department of Wildland Resources must complete the General Science Foundation Courses and the Departmental Common Courses, as listed below. Some of these courses may be used toward the University Studies requirements, as indicated by the University Studies designations listed in parentheses following the course numbers.

A. General Science Foundation Courses (34 credits)

Bachelor of Science in Conservation and Restoration Ecology

Students in the Conservation and Restoration Ecology major must meet the course requirements for University Studies, as well as complete the General Science Foundation Courses and the Departmental Common Courses listed above. They must also complete 13 credits of Degree Program Courses, as follows:
Department of Wildland Resources

A. Degree Program Courses (13 credits)

<table>

</tbody>
</table>

In addition, they must complete a 21-credit specialization, which is designed by the student in consultation with a faculty advisor to meet specific goals and career objectives and must be approved by the Wildland Resources department head.

B. Degree Program Electives (21 credits)

Students in the Conservation and Restoration Ecology major must meet with their advisor and plan a program of study for their 21 credits of degree program electives. Students must identify an organizing theme or comprehensive plan to guide the selection of their degree program electives, and all courses counted toward this requirement must be approved in advance by the student’s advisor. Courses taken to complete a dual major with another major within the College of Natural Resources may not be counted toward fulfillment of this requirement.

C. Free Elective Credits (24 credits)

Students may take the remainder of the 120 credits from any department. Courses which meet General Education “Breadth Requirements” and University Studies “Depth Education Requirements” should be included to ensure meeting General Education and University Studies Requirements.

Note: Students wanting to pursue federal employment should check the following U.S. Office of Personnel Management website for a listing of required coursework:

Conservation and Restoration Ecology Major Recommended Four-Year Plan of Study

Students should meet regularly with their faculty advisor and carefully plan their academic program, keeping in mind that many upper-division courses have prerequisites and must be taken in sequence. Students following the recommended schedule listed below should be able to complete degree requirements in four years (eight semesters).

A. First Year (28 credits)

Financial Assistance

The main opportunities for undergraduates to find financial support through grants, work-study, and loans are listed on pages 23-28 in the Financial Aid and Scholarship Information section. In addition, more than 30 scholarships are available for eligible students in the College of Natural Resources. Some students may be able to find paid internships with private or governmental organizations, or work for a faculty member on a research project. Interested persons should contact the college’s Academic Service Center for more information on financial assistance for undergraduate students.

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information

The undergraduate program may be tailored to individual student needs with the help of a faculty advisor. For additional information about the degree requirements, course sequencing, and departmental specialization options and their related coursework, as well as updated information describing current programs and courses offered by the Department of Wildland Resources, visit the Wildland Resources main office, Natural Resources 206, or visit: http://www.cnr.usu.edu/frws

Major requirement sheets, which outline career opportunities and required courses for departmental majors, can be obtained from the department, or online at: http://www.usu.edu/ats/majorsheets/

Graduate Programs

Admission Requirements

The Department of Wildland Resources offers opportunities for graduate study through MS and PhD degree programs in Ecology, Forestry, Range Science, and Wildlife Biology. The department also offers opportunities to participate in a college-wide Master of Natural Resources (MNR) degree program administered through the College of Natural Resources. The MNR is described more fully on page 433.

The programs of instruction and research leading to graduate degrees in the department are available only to students meeting high scholastic standards who are accepted for study by the departmental faculty. Students desiring entrance to these graduate programs should contact the department head for information concerning eligibility.

USU School of Graduate Studies general admission requirements are described on pages 99-100. Applicants for graduate study in the department should have a bachelor’s degree from an accredited college or university, a cumulative GPA of at least 3.0 (out of 4.0), and GRE scores (quantitative and verbal) above the 40th percentile. Foreign students should submit a TOEFL score of at least 550. Exceptions to these standards will be considered on a case-by-case basis. Written statements of interest help match applicants with faculty advisors. A faculty member must agree to serve as the major professor in order for an applicant to be accepted for study. Prospective students are encouraged to contact faculty members early in the application process to investigate mutual interests, projects, and prospects for financial support.

A natural resources baccalaureate degree is not required for admission to the department, although a sound background in the natural sciences is strongly recommended. Students lacking the requisite background will work with their supervisory committee to address deficiencies.
Department of Wildland Resources

Degree Programs

The MS degree is offered for students motivated toward a management or administrative career in natural resources management. The MS may be obtained through either a Plan A (thesis) or Plan B (nonthesis) program, as described on page 104. The Plan A option requires a thesis based on original research conducted by the student. The Plan B option is recommended for professional forestry, rangeland, or wildlife managers who do not desire research training. The PhD degree is intended for students seeking a natural resources research or academic career. Comprehensive exams (both oral and written) are required in the doctoral program.

The minimum requirement for an MS degree is 30 credits, including at least 24 credits in residency and 6 credits of thesis research. The minimum requirement for a PhD degree is 60 approved graduate credits in addition to an MS degree, or 90 approved graduate credits with no MS degree. At least one year (a minimum of 32 credits), including a minimum of two consecutive semesters, of full-time registration must be in residence at USU.

With committee approval, graduate credit may be transferred from accredited graduate schools, provided the minimum residency requirement (including thesis and dissertation credit) at USU is met. Transfer credit, which must not have been used for any other degree, will be shown on official USU transcripts at completion of the degree.

Research

Cooperation with other departments and research centers of the University, as well as with government collaborators, permits strong graduate programs in all aspects of forest, range, and wildlife-related sciences. Particular mention should be made of the USU Ecology Center, in which the Wildland Resources Department is very active; the Utah Agricultural Experiment Station, which has a full program in both applied and basic research; the Utah Cooperative Fisheries and Wildlife Research Unit; the Predator Ecology and Behavior Field Station; the Jack H. Berryman Institute; the U.S. Forest Service Rocky Mountain Forest and Range Experiment Station; and the USDA Agricultural Research Service.

Financial Assistance

General aspects of financial support for graduate students at Utah State University are listed on pages 98-99 in the Graduate Financial Assistance section. This includes important information on the University-wide policies and terms of reference for research and teaching assistantships, graduate tuition obligations and benefits, Western Regional Graduate Programs, and competitive University-wide fellowships and scholarships. The College of Natural Resources also offers a limited number of Quinney Doctoral Fellowships for incoming doctoral students.

Graduate research assistantships may be available on a competitive basis to both MS and PhD students through major professors having contracts, grants, or other awards from the University, private sector, or government agencies. These assistantships vary in the amount of support offered, but they commonly offer a stipend to help cover living expenses and operating funds to carry out the research. Other benefits may include assistance with tuition and student health insurance, as well as opportunities to travel.

The department also has a few graduate teaching assistantships for students who help with teaching, grading, or recitation in large courses.

These typically pay only a modest supplement on a semester basis, however, and are not sufficient to cover living expenses. Domestic PhD students on a research assistantship in some departmental degree programs are required to hold at least one teaching assistantship during their program, to obtain experience in classroom (mainly undergraduate) instruction. MS students may also hold teaching assistantships, contingent upon availability of funds. Acceptance to pursue graduate study does not guarantee the student financial assistance.

Additional Information

For more information about graduate programs and departmental faculty and their research emphasis areas, as well as updated information describing current programs and courses offered by the Department of Wildland Resources, visit the Wildland Resources main office, Natural Resources 206, or visit http://www.cnr.usu.edu/frws

Wildland Resources Faculty

Professors

John A. Bissonette, Leader, Utah Cooperative Fish and Wildlife Research Unit, landscape ecology, terrestrial vertebrate ecology
John D. "Fle" Busby, effects of livestock grazing
Martyn M. Caldwell, plant physiological ecology
Michael R. Conner, animal behavior, wildlife damage management
Raymond D. Dueser, conservation ecology
Johan du Toit, ecology and conservation of large mammals in terrestrial ecosystems
Thomas C. Edwards, Jr., Utah Cooperative Fish and Wildlife Research Unit, spatial ecology, habitat modeling, biostatistics
Michael M. Jaeger, behavioral ecology
Frederick F. Knowlton, Predator Ecology and Behavior Project, predator ecology, behavior and management
Michael R. Kuhns, forestry extension specialist, urban forestry, tree physiology
James N. Long, forest ecology, silviculture
John C. Malechek, rangeland management
Terry A. Messmer, fisheries and wildlife extension specialist, wild ungulate and waterfowl management, wetlands ecology, private land management, conservation communication
Frederick D. Provenza, range animal production
Michael L. Wolfe, wildlife ecology and management

Research Professor

Leila McReynolds Shultz, plant taxonomy and geography

Adjunct Professors

James E. Bowns, range ecology
Mark W. Brunson, social and psychological aspects of forest and rangeland management
John W. Connelly, game bird ecology and management, avian ecology
Norbert V. DeByale, forest ecology
Douglas A. Johnson, plant ecophysiology
Karel Klinka, forest ecology
Jesse A. Logan, forest insect ecology, disturbance ecology, dynamical systems analysis
Bret Olson, range ecology
G. Allen Rasmussen, rangeland fire ecology and prescribed burning, rangeland management
David W. Roberts, forest ecology, forest modeling, vegetation ecology
Scott R. Winterstein, wildlife population dynamics and management
Department of Wildland Resources

Professors Emeritus
Thadis W. Box, range management
John A. Kadlec, wetlands ecology, wildlife management
Ronald M. Lanner, forest genetics, dendrology
Frederic H. Wagner, wildlife ecology, natural resources policy
Neil E. West, rangeland desertification/condition/trend
John P. Workman, range economics

Associate Professors
Frederick A. Baker, forest pathology, computer applications
Roger E. Banner, range extension specialist
Christopher A. Call, vegetation manipulation/management
Eric M. Gese, Predator Ecology and Behavior Field Station, predator behavior and ecology
Michael J. Jenkins, disturbance ecology and management, insects, fire, snow avalanches
R. Douglas Ramsey, remote sensing, geographic information systems, landscape ecology, spatial analysis
Eugene W. Schupp, plant population ecology and restoration ecology
John A. Shivik, predator ecology
Helga Van Miegroet, forest soils and biogeochemistry

Adjunct Associate Professors
Derek Bailey, large herbivore animal behavior
Dale L. Bartos, forest ecology, aspen conservation
D. Layne Coppock, animal production systems/technology transfer and international pastoral development
John L. Crane Jr., environmental resource management
Ellen S. Dierenfeld, zoo and wildlife nutrition, conservation biology
Richard C. Etchberger, wildlife-habitat interactions, natural resource education
Frank P. Howe, avian ecology and management, riparian and shrubsteppe ecology
Thomas A. Jones, native grass breeding
Bruce A. Kimball, range ecology
William J. McShea, ungulate ecology, conservation of Asian mammals, small mammal ecology
Patricia D. Moehlman, behavioral ecology of large mammals
Niki S. Nicholas, biogeochemistry
Kenneth C. Olson, grazing livestock nutrition
James A. Pfister, poisonous range plants
Howard B. Quigley, carnivore conservation biology
Michael H. Ralphs, poisonous plants/grazing management
Robert H. Schmidt, wildlife policy, wildlife damage management

Associate Professors Emeritus
Brien E. (Ben) Norton, grazing ecology, international range management
Gar W. Workman, wildlife ecology and management

Assistant Professors
Karen H. Beard, community ecology, ecosystem ecology, conservation biology
Karen E. Mock, conservation genetics and applied molecular ecology
Ronald J. Ryel, plant physiological ecology

Research Assistant Professors
Mary M. Conner, wildlife population ecology
Juan J. Villalba, foraging behavior

Adjunct Assistant Professors
Peter B. Adler, plant community ecology
Barbara J. Bentz, forest entomology
Randall B. Boone, wildlife ecology and ecosystem modeling
Larry M. Conner, wildlife ecologist, wildlife damage management, mammalogist
Jeanne M. Fair, epidemiology, avian biology
Jennifer A. Gervais, ecotoxicology, population dynamics
Jeannette K. Howard, stream ecology, biogeography, fluvial geomorphology
Kyran E. Kunkel, carnivores, predator/prey ecology, mammal restoration ecology
Chris L. Lauver, range ecology
Tamsin C. McCormick, desert ecology
Nicole L. McCoy, natural resource economics
Thomas A. Monaco, research ecologist
Dale L. Nolte, foraging behavior
William C. Pitt, predator ecology and behavior
Daniel K. Rosenberg, population, conservation, and landscape ecology
John D. Shaw, forest inventory, quantitative silviculture
Johanna M. Ward, population dynamics, avian ecology, conservation biology

Assistant Professor Emeritus
Barrie K. Gilbert, wildlife ethology, behavioral ecology

Adjunct Instructor
Jon Keith Schnare, timber harvest planning and logging methods

Course Descriptions
Forest, Range, and Wildlife Sciences (FRWS), pages 630-633.
Women and Gender Studies

Director: Brenda Cooper  
Location: Animal Science 319C  
Phone: (435) 797-3253  
E-mail: bcooperc@cc.usu.edu

WWW: http://www.usu.edu/womenstu/

Women and Gender Studies (WGS) at Utah State University is a multidisciplinary program focusing on the role of gender in the everyday experiences of women and men. Students are provided with opportunities to examine the diverse experiences, perspectives, and contributions of women in the past, present, and future, both nationally and internationally. Specific courses examine the processes of gender role socialization and the resulting cultural beliefs and stereotyped images of women. As a result, students gain appreciation for the role of gender and its practical implications in their basic life experiences, thus preparing them to understand current and future changes in the social construction of gender.

Each semester, WGS courses are taught by faculty members from a variety of disciplines, including Anthropology, Journalism and Communication, English, Fine Arts, Health and Physical Education, History, Natural Resources, Political Science, Psychology, Special Education, and Sociology. Throughout the year, several special topics courses are offered, and new courses are continually being developed. Two WGS scholarships are awarded to undergraduates.

Students may enroll in individual courses or apply coursework toward either a minor in WGS or an Area Studies certificate. At least 50 percent of the WGS coursework must be taken at USU.

Area Studies Certificate in Women and Gender Studies (3.0 GPA)

Students desiring to explore WGS in depth may want an area studies certificate. To receive the certificate, students must complete 24 credits of courses from the list below or from the course list published each semester and earn a minimum grade point average of 3.0 in these courses. With preapproval of the WGS director, as well as a signed contract with a WGS faculty member, other courses may be applied toward the certificate if at least 50 percent of the class material is directly related to gender issues or if students complete a gender-related project in order to earn 50 percent of their grade in that course. Courses must be taken from at least three different academic areas; no more than 12 credits can be counted from a single discipline. Courses may come from major, minor, or University Studies programs. Area studies certificates may be earned by undergraduate and graduate students. Forms for the area studies certificate may be obtained in Student Center 302.

Women and Gender Studies Minor (2.5 GPA)

To complete the minor, students must select 18 credits from the list below or from the course list published each semester and must earn a minimum grade point average of 2.5 in these courses.

Courses for the Area Studies Certificate and Minor in Women and Gender Studies: (Area Studies, 24 credits; Minor, 18 credits)

Required Course (3 credits)
WGS 1010 Introduction to Women and Gender Studies (Sp).............3

Electives
(Minor, 15 credits; Area Studies, 21 credits)
For the minor, select 15 credits from the following list. For the area studies certificate, select 21 credits.

ANTH 5100 Anthropology of Sex and Gender (Sp).............3
ART 4790 Art History Seminar: Gender Issues in Art (F,Sp,Su).......3
BIOL 4750/6750 ST: Women in Science (Sp)..........................3
ENGL 3030 Perspectives in Literature: Gender Focus (F,Sp,Su)........3
ENGL 3300 Period Studies in American Literature: Gender Focus (F,Sp)........3
ENGL 3510 Young Adult Literature: Reading and Writing Gender (F,Sp)........3
ENGL 3520 Multicultural American Literature: Gender Focus (F,Sp)....3
ENGL 3710 (CI) Folklore Colloquium: Folklore of the American Family and/or Folklore and Gender (Sp)..................3
ENGL 4320 British Writers: Gender Focus (F,Sp).....................3
ENGL 4350 Studies in Poetry: Women Poets 1950 to the Present (F)..................3
ENGL 4360 Studies in Film: Genre and Gender in Hollywood (Sp)......3
ENGL 4370 Studies in Nonfiction Prose: Gender Focus (F)...........3
ENGL 4610 Western American Literature: Utah Women Writers and/or Western Women Writers (F)..................3
ENGL 5300 (CI) Literature and Gender (F,Sp)..........................3
ENGL 5320 (CI) Literature and Cultural Difference: Gender Focus (Sp)..................3
ENGL 5340 (CI) Studies in Literary Theory: Feminist Theory (F)........3
ENGL 6330 Topics in Literary Studies: Women's Literature of the American West and/or Politics and the American Woman Writer (1776-1886) (F,Sp)..................3
FCHD 3110 Human Sexuality (F,Sp)..........................3
FCHD 3280 Economic Issues: Gender, Family, and Work Roles (Sp)....3
FREN 3500 (DHA) ST: The Modern French Novel (Sp)................3
HEP 5000 (CI) Race, Class, and Gender Issues in Health (Arr)........3
HEP 5700/6700 ST: Workshop on Women's Health Issues (Su)........3
HIST 4730 (CI) History of Black America (Sp)..................3
JCOM 3410 (DSS) Film as Cultural Communication: Women, Feminism, and Film (F,Sp)..................3
JCOM 5410/6410 Gender and the Mass Media (F,Sp)................3
POL 3190 (DSS) Gender, Power, and Politics (F)..................3
POL 5440 (DSS) Gender and World Politics (Sp)..................3
SOCI 2370 Sociology of Gender (F)..........................3
SOCI 3010 Race, Class, and Gender (F,Sp)..................3
SOCI 4730 Women in International Development (Sp)................3
SOCI 6420 Gender and Social Inequality (Sp)..................3
SOCI 6730 Gender and International Development (Sp)................3
SPAN 4900 ST: Women Writers in the Spanish World (F,Sp)........3
SPAN 4910 ST: Latin American Women Writers and/or Latin American Women Playwrights (F,Sp)..................3
WGS 2010 Women and Leadership (Sp)..........................3
WGS 4550 (DHA/CI) Women and Gender in America................3
WGS 4900 Directed Study: Women and Gender Studies (F,Sp,Su)........1-3

For additional course offerings, please consult the Women and Gender Studies website: http://www.usu.edu/womenstu/

Further information may be obtained from the director or from the College of HASS Advising Center (Student Center 302).

Course Descriptions

Accounting (ACCT)

See School of Accountancy, pages 131–135.

**ACCT 1050**  
*Accounting Essentials*  3  
Overview of accounting concepts, with special emphasis on practical applications. Taught only as a special extension course as requested.

**ACCT 1550**  
*Accounting Software for Small Business Applications*  3  
Instruction in the use of small business accounting software. Prerequisite: ACCT 1050 or equivalent.

**ACCT 2010**  
*Survey of Accounting I*  3  
Survey of uses of accounting information by investors and creditors for decision making. Emphasis on basic accounting principles used to prepare, analyze, and interpret financial statements. Prerequisites: STAT 1040 or MATH 1030 or 1050 (MATH 1050 or equivalent is required for College of Business majors); and GPA of 2.5 or higher. (F,Sp,Su)

**ACCT 2020**  
*Survey of Accounting II*  3  
Survey of uses of accounting information by managers for decision making, including planning, budgeting, and controlling operations. Emphasizes accumulation, analysis, and control of product and service costs. Prerequisite: ACCT 2010. (F,Sp,Su)

**ACCT 3110**  
*Intermediate Financial Accounting and Reporting I*  3  
Study of accounting principles, theory, and practice relating to financial reporting of assets. Prerequisites: Cumulative GPA of 3.0 or higher; grade of B or better in ACCT 2010; ACCT 2020; admittance to a USU major; and completion of at least 40 credits. (F,Sp,Su)

**ACCT 3120**  
*Intermediate Financial Accounting and Reporting II*  3  
Study of accounting principles, theory, and practice relating to liabilities, equities, and other contemporary issues. Prerequisite: ACCT 3110; admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp,Su)

**ACCT 3310**  
*Strategic Cost Management*  3  
Contemporary theory and applications in the accumulation, analysis, and interpretation of accounting information for internal decision-making and control. Prerequisites: Cumulative GPA of 3.0 or higher; grade of B or better in ACCT 2010; ACCT 2020; admittance to a USU major; and completion of at least 40 credits. (F,Sp,Su)

**ACCT 3410**  
*Income Taxation I*  3  
Emphasis on Federal income taxation of individuals. Introduction to tax research methods and taxation of corporations and partnerships. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp,Su)

**ACCT 4200**  
*Advanced Accounting*  3  
Study of accounting principles and theory relating to business combinations, nonprofit organizations, and governmental accounting. Prerequisites: ACCT 3120; admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp,Su)

**ACCT 4410**  
*Income Taxation II*  3  
Federal income taxation of partnerships, corporations, S-corporations, estates and trusts, and gifts. Prerequisites: ACCT 3410; admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp,Su)

**ACCT 4500**  
*Accounting Information Systems*  3  
Theoretical concepts underlying accounting systems' computerized support of business processes. Topics include accounting systems development, controls, security, and audit. Prerequisites: ACCT 3110 and BIS 2450; admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp,Su)

**ACCT 4510**  
*CI Auditing Principles and Techniques*  3  
Fundamental principles and techniques of auditing and reporting of audits presented in the context of the audit logic sequence. Integrative applications emphasizing audits of organizational resources, processes, and systems. Also addresses ethics, legal environment, auditing standards, and fraud. Prerequisites: ACCT 3110; admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)

**ACCT 4900**  
*Independent Research and Readings*  1-3  
Selected reading and research individually assigned, handled, and directed. Problems of mutual interest to students and the instructor are investigated and reported. Prerequisite: Departmental permission. (F,Sp,Su)

**ACCT 4950H**  
*Senior Honors Thesis/Project*  3  
Creative project that will then be written up, and presented, as a Senior Thesis as required for an Honors Plan. (Sp)

**ACCT 6010**  
*Financial and Managerial Accounting*  3  
Introduction to financial and managerial accounting at the graduate level. Prerequisite: Admission to a College of Business graduate program. (Su)

**ACCT 6200**  
*Advanced Topics in Financial Reporting*  3  
Study of accounting principles and theory related to advanced consolidations, multinational accounting, segment reporting, SEC reporting, partnerships, and financial distress. Prerequisites: ACCT 3120, 4200. (F,Su)

**ACCT 6350**  
*Accounting Strategies for Achieving Profit Goals*  3  
Action-oriented case studies to demonstrate management accounting techniques to achieve profit goals and business strategies in a variety of organizations. International accounting and ethical issues are addressed. Prerequisites: ACCT 2010 and 2020, or ACCT 6010. (F,Sp)

**ACCT 6410**  
*Tax Research and Procedures*  3  
Methods of researching tax problems, case studies in tax administration, civil procedures and penalties, professional responsibility, and tax ethics for the tax practitioner. Prerequisites: ACCT 3410 and 4410. (F,Su)

**ACCT 6420**  
*Taxation of Corporations and Shareholders*  3  
Concepts and principles governing the taxation of corporations and shareholders. Effect of taxes on corporation formation, capital structure, distributions, liquidations, and reorganizations. Prerequisites: ACCT 3410 and 4410. (Su)

**ACCT 6440**  
*Taxation of Partnerships, Estates, and Trusts*  3  
Concepts and principles governing the taxation of partnerships and partners and estates, trusts, and beneficiaries. Uses of partnerships and trusts in tax planning. Prerequisites: ACCT 3410 and 4410. (F)

**ACCT 6460**  
*Tax Topics*  3  
Topics of current interest to tax professionals. Prerequisites: ACCT 3410 and 4410. (Su)

**ACCT 6500**  
*Advanced Accounting Information Systems*  3  
Contemporary issues in accounting information systems, including emerging information technologies, systems evaluation and selection, and computer-based audit and security. Prerequisite: ACCT 4500. (Sp)

**ACCT 6510**  
*Financial Auditing*  3  
Application of generally accepted auditing standards to accounting systems. Some study of auditing theory and current issues, and an introduction to statistical auditing. Prerequisite: ACCT 4510. (F,Sp)

**ACCT 6540**  
*Forensic Accounting*  3  
Study of forensic accounting. Topics covered include types of fraud, recognition of red flags, and fraud investigation techniques. Also includes practice with computer-aided fraud detection, interrogation techniques, and case studies. (F)

**ACCT 6600**  
*Information Systems Auditing and Control*  3  
Study of information systems auditing methodologies, including risk assessment, systems controls, and the use of computer-assisted audit techniques. (F)

**ACCT 6610**  
*Accounting Theory and Research*  3  
Analytical approach to understanding the financial reporting environment. Integration of accounting theory and practical research methodology in the resolution of financial reporting problems. Prerequisite: ACCT 3120 (may be taken concurrently). (Sp,Su)
Course Descriptions

ACCT 6800 Accounting Communications and Professional Conduct 3
Study of written and oral communication skills appropriate for the accounting profession. Covers interpersonal skills and professional conduct, including ethical conduct, in various business settings. (F,Sp)

ACCT 6900 Independent Reading and Research 1-3
Independent work in accounting areas: theory, auditing, taxation, and other related areas. Prerequisite: Departmental permission. (F,Sp,Su)

ACCT 6960 Professional Paper 1-3
A paper of professional quality prepared by the student. Designed to demonstrate the ability to complete a major-business-related project and to effectively present the results. Prerequisite: Departmental permission. (F,Sp,Su)

ACCT 6990 Continuing Graduate Advisement 1-3
Continuing enrollment at the University required after completing coursework. Prerequisite: Departmental permission. (F,Sp,Su)

Animal, Dairy, and Veterinary Sciences (ADVS)
See Department of Animal, Dairy and Veterinary Sciences, pages 146-157.

ADVS 1010 Artificial Insemination and Reproduction 2
Principles of reproduction, artificial insemination, and handling of semen. Anatomy and physiology of the bovine reproductive tract and reproductive management of the dairy farm. (F)

ADVS 1020 Dairy Cattle Nutrition and Feeding 3
Applied approach to nutrients, feeds, digestion, and nutrient utilization by dairy cattle. Dietary requirements and feeding practices. (F)

ADVS 1030 Lactation and Milking Systems 3
The mammary gland,udder health, and mastitis and its control. Milk quality and marketing, Principles involved in the function, design, and maintenance of dairy equipment. (Sp)

ADVS 1040 Records and Financial Aspects of Dairy Herd Operations 3
Record keeping systems, tax records, estate planning, DH records, and computer record systems. Principles of credit and finance. Accessing loan sources. (Sp)

ADVS 1050 Dairy Genetics 3
Principles of dairy genetics, mating, pedigrees, and breeding. Purebred cattle type traits and classification. (F)

ADVS 1060 Applied Feeding and Management of Dairy Calves and Basic Construction of Facilities 3
Practical experience in feeding and management of dairy calves from birth to weaning. Students participate in actual calf-raising programs. Development of basic skills required for planning and building agricultural structures. (Sp)

ADVS 1100 Small Scale Animal Production 3
Fundamentals of raising domestic farm animals in a semi-rural, noncommercial setting. Considerations of feeding, breeding, housing, marketing, sanitation, general health care, and community zoning factors. For nonmajors. (Su)

ADVS 1110 Introduction to Animal Science 4
Influence and contributions of animal production and its commodities to society. Introductory scientific principles of animal science, livestock production systems, and contemporary issues. Introduction to professions and careers in animal agriculture and veterinary sciences. (F,Sp)

ADVS 1250 QI Applied Agricultural Computations 2
Development of understanding and proficiency in the application of basic mathematical skills, including algebra and geometry, to practical computational situations encountered in the agricultural sciences. (F,Sp)

ADVS 1600 Western Horsemanship I 2
Grooming, saddling, bridling, mounting, seats and hands, horseback riding both bareback and on western saddle. For students with limited or no previous riding experience. Western-type riding boots and health insurance required. (F,Sp)

ADVS 1720 Dairy Cattle Evaluation and Judging 1
Evaluation of cattle based on exterior anatomical traits functional for improving longevity and milk production. Explanation of classification systems used by breed associations and the artificial insemination industry. Development of basic skills for preparing dairy cattle for show. (Sp)

ADVS 1910 Orientation to Animal and Dairy Science 0.5
Introduction to the Animal Science and Dairy Science programs, and to the opportunities in animal agriculture and related fields. (F)

ADVS 1920 Orientation to Bioveterinary Science 1
Introduction to the profession of veterinary medicine and related fields, and to the preparation required for veterinary medical careers. (F)

ADVS 2040 Introduction to Biotechnology 1
Introduces students to the emerging field of biotechnology and the impact this technology has on society. Also taught as BIOL 2040, NFS 2040, and PSB 2040. (Sp)

ADVS 2080 Beef Production Practices 2
Production practices in the handling, selection, and care of beef cattle. Demonstrations of equipment, facilities, and skills relevant to beef cattle production. Prerequisite: ADVS 1110 (may be taken concurrently) or permission of instructor. (Sp)

ADVS 2090 Sheep Production Practices 2
Production practices in the handling, selection, and care of sheep. Demonstrations of equipment, facilities, and skills relevant to sheep and wool production. Prerequisite: ADVS 1110 (may be taken concurrently) or permission of instructor. (Sp)

ADVS 2120 Swine Production Practices 2
Production practices in the selection, handling, and care of swine. Demonstrations of equipment, facilities, and skills relevant to swine industry. Prerequisite: ADVS 1110 (may be taken concurrently) or permission of instructor. (Su)

ADVS 2130 Dairy Production Practices 3
Basic husbandry skills needed to carry out day-to-day operations on a dairy farm. Principles of dairy herd health, disease prevention, and treatment. Prerequisite: ADVS 1020 or 1110 (may be taken concurrently) or permission of instructor. (F)

ADVS 2190 Horse Production Practices 2
Production practices in the selection, care, and evaluation of horses. Survey of breeds of horses, their characteristics, and their uses, as well as equine behavior, health care, nutrition, reproduction, anatomy, and physiology. Prerequisite: ADVS 1110 (may be taken concurrently) or permission of instructor. (F)

ADVS 2200 Anatomy and Physiology of Animals 4
Normal structure and function studied systematically. Comparative livestock, poultry, pleasure and companion animals, laboratory animals, and humans. (Sp)

ADVS 2250 Cooperative Work Experience 1-12
For students who require animal industry experience to prepare them for advanced curriculum in Animal, Dairy, or Bioveterinary Science. (F,Sp,Su)

ADVS 2600 Western Horsemanship II 2
Alternative training techniques for western pleasure and western reining horses, teaching leads, cueing techniques, reining maneuvers, and show-style riding. Western-type riding boots and health insurance required. Prerequisite: ADVS 1600. (F,Sp)

ADVS 2920 Orientation to Veterinary Medicine 0.5
Preparation of preveterinary students for successful application and admission to professional veterinary schools. Taught first half of spring semester. (Sp)

ADVS 3000 Animal Health and Hygiene 3
Introduction to basic principles of disease. Agents, mechanisms, and preventive measures for common diseases of farm animals will be emphasized. Prerequisite: ADVS 2200. (Sp)
Course Descriptions

ADVS 3020 Biotechnology in Agriculture 3
Broad view of biotechnology in agriculture. Contributions of advances in recombinant DNA technology, molecular genetics, and genetic engineering toward animal breeding and development of new medicines. Prerequisites: BIOL 1220, CHEM 2310. (F)

ADVS 3200 DSC Ethical Issues in Genetic Engineering and Biotechnology 3
Critical evaluation of ethical issues of genetic engineering in biotechnology, including biological engineering and cloning of plants, animals, and humans. Presents basic science of genetic engineering and biotechnology. (Sp)

ADVS 3500 Principles of Animal Nutrition 3
Biochemical characterization and chemical analysis of feedstuffs for farm animals, with regard to carbohydrates, proteins, lipids, minerals, and vitamins. Catabolic/anabolic pathways associated with utilization of these nutrients with respect to production, general health, and nutritional disorders. Prerequisites: ADVS 2200; CHEM 1120 or 2320. (F)

ADVS 3510 QI Applied Animal Nutrition 3
Categorization of farm animal feeds into energy feeds, protein feeds, dry forages, slages and haylages, pasture and range plants, and vitamin-mineral supplements. Emphasis placed on practical diet formulation, including computerization and aspects of feed delivery and nutritional management. Prerequisite: ADVS 3500 or CHEM 3700. (Sp)

ADVS 3600 Western Horsemanship III 2
Utilization of current training methods relating to basic equine behavior, ground breaking skills, and riding and training of the unbroken and freshly broken horse. Prerequisite: ADVS 2600. (F,Sp)

ADVS 3650 Live Animal and Carcass Evaluation 3
Judging, grading, and pricing of market animals and carcasses, with emphasis on comparative evaluation of live animals and carcasses. (F)

ADVS 3710 Advanced Livestock Judging 2
Advanced methods of selection and identification of superior animals for breeding stock. Emphasis on performance records, judging, grading, and oral reasons. (F,Sp)

ADVS 3900 Special Problems and Readings 1-3*
Students conduct short-term studies and/or literature review with critical analysis of individualized subject matter. Formal written reports required. Prerequisite: Permission of instructor. (F,Sp,Su)

ADVS 3910 Special Topics 1-5*
Topics of special interest to those who have needs not satisfied by courses currently offered. (F,Sp,Su)

ADVS 3920 Internship in Veterinary Medicine 1-3*
A directed and evaluated work experience with a veterinarian. For each credit, student must document at least 54 hours of work time. Prerequisite: Permission of instructor. (F,Sp,Su)

ADVS 4200 CI Physiology of Reproduction and Lactation 4
Introduction to principles of physiology as they relate to the reproductive and lactation processes in domestic animals. Factors affecting reproduction and lactation performance and their applications in animal management. Prerequisites: ADVS 2200; CHEM 1120 or 2310. (Sp)

ADVS 4250 Internship in Animal Industry 1-12*
Directed and evaluated educational work experience with an animal production unit, related business, or government facility in cooperation with the Livestock Education Foundation. Prerequisite: Permission of instructor. (F,Sp,Su)

ADVS 4260 Internship in Animal Biotechnology Industry 2-12*
Directed and evaluated educational work experience with an animal biotechnology unit, or with a related business or government facility. Prerequisite: ADVS 5160 or 5240 or 5260 and permission of instructor. (F,Sp,Su)

ADVS 4560 QI Principles of Animal Breeding 3
Genetic influences affecting animal performance and the application of selection principles, breeding systems, and methods of improvement to farm animals, including beef and dairy cattle, sheep, swine, and horses. Prerequisite: BIOL 1010 or 1620. (F)

ADVS 4800 Undergraduate Research or Creative Opportunity 1-6*
Research or creative activity pertaining to animals. May include management, production, medical, or basic science, with consideration of biological, chemical, or physical aspects, or instrument design. Prerequisite: Permission of instructor. (F,Sp,Su)

ADVS 4910 Preprofessional Orientation 0.5
Survey of the professional opportunities in the animal industries to enable graduating students to make the transition to careers and/or postgraduate study. Prerequisite: Senior standing. (F)

ADVS 4920 CI Undergraduate Seminar 2
Current developments in agricultural field selected by student. Each student is responsible for the research and oral presentation of a topic in the animal industries. Group investigations, preparations, and deliberations on issues in animal agriculture. Prerequisite: Senior standing. (F)

ADVS 5030 Sustainable Agricultural Production Systems with Animals 3
Study of various domestic animal production systems in relation to sustainable agriculture and integrated ranch and farm management strategies. Consideration of environmental factors and overall profitability. Prerequisite: ADVS 1110. (F)

ADVS 5080 (dual listing 6080) Beef Cattle Management 3
Managing the beef enterprise to yield optimum returns through integrating resource use and applying breeding, nutrition, reproduction, and animal health practices. Prerequisites: ADVS 2080; ADVS 3510, 4200, 4560 (may be taken concurrently). (Sp)

ADVS 5090 (dual listing 6090) Sheep Management and Wool Technology 4
Detailed study of the managerial considerations for range and farm flock operations. Examinations of wool, and review of wool clip handling and merchandising. Prerequisites: ADVS 2090; ADVS 3510, 4200, 4560 (may be taken concurrently). (Sp)

ADVS 5120 Swine Management (dual listing 6120) 3
Management decisions based on nutrition, breeding programs, herd health practices, herd records, and marketing opportunities. Prerequisites: ADVS 2120; ADVS 3510, 4200, 4560 (may be taken concurrently). (F)

ADVS 5130 Dairy Cattle Management (dual listing 6130) 3
Capstone course drawing together concepts and applying them to a total dairy farm management program. Prerequisites: ADVS 2130; ADVS 3510, 4200, 4560 (may be taken concurrently). (Sp)

ADVS 5160 Methods in Biotechnology: Cell Culture 3
Techniques and fundamental knowledge for culturing mammalian and insect cells. Students will learn maintenance, growing, genetic engineering of cells, cytotoxicity, hybridoma creation, cloning, etc. Extensive laboratory experience is provided. Also taught as BIOL 5160, NFS 5160, and PSB 5160. (F)

ADVS 5190 Horse Management (dual listing 6190) 3
Management decisions in horse enterprises emphasizing business procedures, including merchandising, records, selection, uses, housing, facilities, nutrition, feeding, health care, and breeding. Emphasizes total management of horse enterprise, rather than husbandry. Prerequisites: ADVS 2190; ADVS 3510, 4200, 4560 (may be taken concurrently). (Sp)

ADVS 5220 Endocrine Aspects of Nutrition 2
(dual listing 6220) Provides physiological background into hormones involved in nutrient regulation, as well as mechanisms of hormone action at the cellular and molecular levels. Includes action of steroids in the nucleus and membrane-based signal transduction pathways. Course includes lectures and literature review/presentations. Prerequisite: CHEM 3700 or permission of instructor. Also taught as BIOL 5220/6220 and NFS 5220/6220. (Sp)
Course Descriptions

ADVS 5240  Methods in Biotechnology: Protein Purification Techniques  
Reviews basic methods of protein purification, including scaled-up use of 100L fermenter, large-scale centrifugation, diafiltration, chromatography, and use of BioCAD. Prerequisite: CHEM 3700. Also taught as BIOL 5240, NFS 5240, and PSB 5240. (Sp)

ADVS 5260  Methods in Biotechnology: Molecular Cloning  
Laboratory-oriented course designed to teach molecular biology techniques such as DNA cloning, genetic probes, polymerase chain reaction, and DNA sequencing. Prerequisite: CHEM 3700 or 5710; or BIOL 3060; or permission of instructor. Also taught as BIOL 5260, NFS 5260, and PSB 5260. (F)

ADVS 5280  Animal Molecular Biology  
(dual listing 6280)
Laboratory-based course designed to present the theory and provide in-depth laboratory experience in RNA detection, differential gene expression analysis, real-time RT-PCR, protein detection and purification, 2-D gel electrophoresis, and microarrays. Prerequisite: ADVS 5260 or permission of instructor. (Sp)

ADVS 5350  Introductory Pharmacology and Pharmacokinetics  
Basic principles of pharmacology and pharmacokinetics providing basis for extrapolation of biological kinetics of foreign compounds to a wide variety of xenobiotics encountered in toxicology, biology, and research. Prerequisites: BIOL 5600, CHEM 3700. (Sp)

ADVS 5370  Molecular Methods in Nutrition Science  
Theory of modern techniques used to study macromolecules and ions. Prerequisite: CHEM 3700. Also taught as BIOL/NFS/PSB 5370/6370. (F)

ADVS 5400  Environmental Toxicology  
(dual listing 6400)
Presents in-depth survey of toxic chemicals present in the environment, environmental factors impacting fate of chemicals, potential biological effects associated with chemical exposures, and methods of reducing associated risks. Prerequisite: CHEM 3700. (Sp)

ADVS 5520  Grazing Livestock Nutrition and Management**  
(dual listing 6520)
Principles of livestock nutrition and production applied to the grazing environment and the relationships of livestock and range management for optimizing values from both. Prerequisites: ADVS 3510, FRWS 4000 (recommended). (Sp)

ADVS 5530  Nutritional Management of Farm Animals*  
(dual listing 6530)
Nutritional management, problem solving, and feeding strategies as they influence performance of farm animals. Optimization of nutrition for various species and classes of domestic livestock. Prerequisite: ADVS 3510. (Sp)

ADVS 5690  Animal Histology  
(dual listing 6690)
Microscopic anatomy and physiology of normal domestic animal’s cells, tissues, organs, and system. Prerequisite: ADVS 2200 or permission of instructor. (F)

ADVS 5700  CI  General Animal Pathobiology  
(dual listing 6700)
Introduction to the principles of gross, microscopic, and physiological changes associated with diseases of domestic animals. Prerequisite: ADVS 5690/6690 or permission of instructor. (Sp)

ADVS 5750  Parasitology  
Introduction to biology of parasitism. Discussion of representative examples of human and animal parasites. Emphasizes classification, life cycles, and clinical significance of medically important parasites. Laboratories concentrate on taxonomy and morphology of parasites. Prerequisite: BIOL 1620. This course is not currently being offered. For information about when it may be offered, contact the department.

ADVS 5820  Animal Cytogenetics and Gene Mapping**  
(dual listing 6820)
Structure and properties of chromosomes, chromosome behavior during cell division, chromosomal influence on phenotype, and factors causing changes in chromosome structure and number. Gene markers and gene mapping, with emphasis on applications for livestock. Prerequisite: ADVS 4560 or BIOL 3200. (F)

ADVS 5860  Poisonous Range Plants Affecting Livestock**  
(dual listing 5080)
Poisonous plants of rangelands and their effects on grazing animals, especially livestock. Management practices to reduce or prevent poisoning. Also taught as FRWS 5860. (Sp)

ADVS 6010  Animal Research Orientation  
Orientation to graduate study and to research procedures and methods in the animal sciences, with introduction to the design and analysis of experiments, research ethics, and accessing research databases. For beginning graduate students. This course is not currently being offered. For information about when it may be offered, contact the department.

ADVS 6080  Beef Cattle Management  
(dual listing 5080)
Managing the beef enterprise to yield optimum returns through integrating resource use and applying breeding, nutrition, reproduction, and animal health practices. Prerequisites: ADVS 2080; ADVS 3510, 4200, 4560 (may be taken concurrently). (Sp)

ADVS 6090  Sheep Management and Wool Technology  
(dual listing 5090)
Detailed study of the managerial considerations for range and farm flock operations. Examinations of wool, and review of wool clip handling and merchandising. Prerequisites: ADVS 2090; ADVS 3510, 4200, 4560 (may be taken concurrently). (Sp)

ADVS 6120  Swine Management  
(dual listing 5120)
Management decisions based on nutrition, breeding programs, herd health practices, herd records, and marketing opportunities. Prerequisites: ADVS 2120; ADVS 3510, 4200, 4560 (may be taken concurrently). (F)

ADVS 6130  Dairy Cattle Management  
(dual listing 5130)
Capstone course drawing together concepts and applying them to a total dairy farm management program. Prerequisites: ADVS 2130; ADVS 3510, 4200, 4560 (may be taken concurrently). (Sp)

ADVS 6190  Horse Management  
(dual listing 5190)
Management decisions in horse enterprises emphasizing business procedures, including merchandising, records, selection, uses, housing, facilities, nutrition, feeding, health care, and breeding. Emphasizes total management of horse enterprise, rather than husbandry. Prerequisites: ADVS 2190; ADVS 3510, 4200, 4560 (may be taken concurrently). (Sp)

ADVS 6200  Physiology of Reproduction**  
(dual listing 5200)
Principles of mammalian reproduction, including fertilization, embryonic development, reproductive endocrinology, and mechanisms of control. Prerequisites: ADVS 4200, CHEM 3700. (Sp)

ADVS 6210  Molecular Reproduction and Development*  
(dual listing 7210)
Lecture-based course focusing on current knowledge of genes associated with gametogenesis, fertilization, nuclear reprogramming, and embryonic and fetal development. Prerequisite: ADVS 6200 or permission of instructor. (Sp)

ADVS 6220  Endocrine Aspects of Nutrition  
(dual listing 5220)
Provides physiological background into hormones involved in nutrient regulation, as well as mechanisms of hormone action at the cellular and molecular levels. Includes action of steroids in the nucleus and membrane-based signal transduction pathways. Course includes lectures and literature reviews/presentations. Prerequisite: CHEM 3700 or permission of instructor. Also taught as BIOL 6220/5220 and NFS 6220/5220. (Sp)

ADVS 6280  Animal Molecular Biology  
(dual listing 5280)
Laboratory-based course designed to present the theory and provide an in-depth laboratory experience in RNA detection, differential gene expression analysis,
Course Descriptions

real-time RT-PCR, protein detection and purification, 2-D gel electrophoresis, and microarrays. Prerequisite: ADVS 5260 or permission of instructor. (Sp)

ADVS 6300 Animal Breeding Theory* 3
Basic theoretics of populations as applied to breeding and improvement of domestic animals with emphasis on effects of directed selection and mating and design of effective breeding plans. Prerequisite: ADVS 4560. (F)

ADVS 6320 Animal Genomics and Proteomics* 3
(dual listing 7320)
Presents in-depth study of current animal genomic and proteomic technologies. Investigates the genetics of animal development, physiology, and disease through the application of techniques used to study genes and the modification of the animal genome. (F)

ADVS 6350 Introductory Pharmacology and Pharmacokinetics 3
(dual listing 5350)
Basic principles of pharmacology and pharmacokinetics providing basis for extrapolation of biological kinetics of foreign compounds to a wide variety of xenobiotics encountered in toxicology, biology, and research. Prerequisites: BIOL 5600, CHEM 3700. (Sp)

ADVS 6370 Molecular Methods in Nutrition Science 2
(dual listing 5370)
Theory of modern techniques used to study macromolecules and ions. Prerequisite: CHEM 3700. Also taught as BIOL/NFS/PSB 6370/5370. (F)

ADVS 6400 Environmental Toxicology 3
(dual listing 5400)
Presents in-depth survey of toxic chemicals present in the environment, environmental factors impacting fate of chemicals, potential biological effects associated with chemical exposures, and methods of reducing associated risks. Prerequisite: CHEM 3700. (Sp)

ADVS 6500 Animal Nutrition Research Techniques 2
Laboratory intensive course in routine feedstuff evaluation and research techniques to evaluate nutritional and metabolic responses under in vivo, in situ, and in vitro conditions using feed, digesta, feces, urine, tissue, metabolites, and products. Prerequisite: ADVS 3510. (F)

ADVS 6510 Rumen Physiology and Metabolism* 2
(dual listing 7510)
Discussion of some key aspects of physiology and metabolism of the ruminant digestive tract, with emphasis on the rumen. Topics include anatomy and function; motility; metabolism of protein, carbohydrates, and lipids; rumen microbiology; and common digestive disorders. Prerequisite: ADVS 3510. (Sp)

ADVS 6520 Grazing Livestock Nutrition and Management** 2
(dual listing 5520)
Principles of livestock nutrition and production applied to the grazing environment and the relationships of livestock and range management for optimizing values from both. Prerequisites: ADVS 3510, FRWS 4000 (recommended). (Sp)

ADVS 6530 Nutritional Management of Farm Animals* 3
(dual listing 5530)
Nutritional management, problem solving, and feeding strategies as they influence performance of farm animals. Optimization of nutrition for various species and classes of domestic livestock. Prerequisite: ADVS 3510. (Sp)

ADVS 6540 Animal Energetics and Nutrient Metabolism** 3
(dual listing 7540)
Techniques and procedures in measurement of heat production; factors affecting heat production; efficiency of energy utilization in body processes such as work, growth, and synthesis of fats, proteins, and carbohydrates; and the energetic costs of nutrient interconversion and turnover. Prerequisites: ADVS 6510/7510; CHEM 5700, 5710. (Sp)

ADVS 6550 Protein Metabolism and Utilization** 3
(dual listing 7550)
Processes involved in the digestion, synthesis, and degradation of protein in the rumen, with special emphasis on protein-energy relationships in the rumen and whole animal. Discussion of protein requirements and efficiency of protein utilization. Prerequisite: ADVS 6510/7510. (F)

ADVS 6560 Mineral and Vitamin Metabolism* 3
(dual listing 7560)
Principal roles of minerals and vitamins in nutrient metabolism as they apply to animal nutrition. Prerequisite: ADVS 6510/7510. (F)

ADVS 6600 Principles of Toxicology** 3
(dual listing 7600)
Mechanisms of action and effects of toxicants on living organisms. Prerequisite: ADVS 5500/6350. (F)

ADVS 6690 Animal Histology 3
(dual listing 5690)
Microscopic anatomy and physiology of normal domestic animal's cells, tissues, organs, and system. Prerequisite: ADVS 2200 or permission of instructor. (F)

ADVS 6700 General Animal Pathobiology 3
Introduction to the principles of gross, microscopic, and physiological changes associated with diseases of domestic animals. Prerequisite: ADVS 6690/5690 or permission of instructor. (Sp)

ADVS 6800 Graduate Student Seminar 1
Seminars on topics of interest in Animal, Dairy and Veterinary Sciences. (F,Sp)

ADVS 6810 Seminar in Toxicology 1*
Graduate seminar in toxicology and related topics. (Sp)

ADVS 6820 Animal Cytogenetics and Gene Mapping** 3
(dual listing 5820)
Structure and properties of chromosomes, chromosome behavior during cell division, chromosomal influence on phenotype, and factors causing changes in chromosome structure and number. Gene markers and gene mapping, with emphasis on applications for livestock. Prerequisite: ADVS 4560 or BIOL 3060. (F)

ADVS 6890 Mechanisms of Animal Disease 3
(dual listing 7890)
Discussion course dealing with biochemical and microbial mechanisms in disease processes, including cellular reaction to injury, host-viral interactions, and host-toxin interactions. Students enrolled in ADVS 7890 will be required to prepare a USDA/NIH grant application. This course is not currently being offered. For information about when it may be offered, contact the department.

ADVS 6900 Special Problems 1-3*
Readings, discussions, lectures, literature reviews, and research problems in animal, dairy, and bioveterinary sciences. Prerequisite: Consent of instructor and department. (F,Sp,Su)

ADVS 6910 Readings and Conference in Pharmacology and Toxicology 1-3*
Independent readings and conferences in the area of pharmacology and toxicology with particular emphasis on current literature. Prerequisite: ADVS 6590/5590. (F)

ADVS 6970 Research and Thesis 1-12
(free)

ADVS 6990 Continuing Graduate Advisement 1-3*
(free)

ADVS 7210 Molecular Reproduction and Development* 3
(dual listing 6210)
Lecture-based course focusing on current knowledge of genes associated with gametogenesis, fertilization, nuclear reprogramming, and embryonic and fetal development. Prerequisite: ADVS 6200 or permission of instructor. (Sp)

ADVS 7320 Animal Genomics and Proteomics* 3
(dual listing 6320)
Presents in-depth study of current animal genomic and proteomic technologies. Investigates the genetics of animal development, physiology, and disease through the application of techniques used to study genes and the modification of the animal genome. (F)
Course Descriptions

ADVS 7510 Rumen Physiology and Metabolism* 2 (dual listing 6510) Discussion of some key aspects of physiology and metabolism of the ruminant digestive tract, with emphasis on the rumen. Topics include anatomy and function; motility; metabolism of protein, carbohydrates, and lipids; rumen microbiology; and common digestive disorders. Prerequisite: ADVS 3510. (Sp)

ADVS 7540 Animal Energetics and (dual listing 6540) Nutrient Metabolism** 3 Techniques and procedures in measurement of heat production; factors affecting heat production; efficiency of energy utilization in body processes such as work, growth, and synthesis of fats, proteins, and carbohydrates; and the energetic costs of nutrient interconversion and turnover. Prerequisites: ADVS 7510/6510; CHEM 5700, 5710. (Sp)

ADVS 7550 Protein Metabolism and Utilization** 3 Processes involved in the digestion, synthesis, and degradation of protein in the rumen, with special emphasis on protein-energy relationships in the rumen and whole animal. Discussion of protein requirements and efficiency of protein utilization. Prerequisite: ADVS 7510/6510. (F)

ADVS 7560 Mineral and Vitamin Metabolism* 3 (dual listing 6560) Principal roles of minerals and vitamins in nutrient metabolism as they apply to animal nutrition. Prerequisite: ADVS 7510/6510. (F)

ADVS 7600 Principles of Toxicology* 3 (dual listing 6600) Mechanisms of action and effects of toxicants on living organisms. Prerequisite: ADVS 5350/6350. (F)

ADVS 7890 Mechanisms of Animal Disease 3 (dual listing 6890) Discussion course dealing with biochemical and microbial mechanisms in disease processes, including cellular reaction to injury, host-viral interactions, and host-toxin interactions. Students enrolled in ADVS 7890 will be required to prepare a USDA/NH grant application. This course is not currently being offered. For information about when it may be offered, contact the department.

ADVS 7970 Dissertation Research 1-12* (F,Sp,Su)

ADVS 7990 Continuing Graduate Advisement 1-9* (F,Sp,Su)

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Agriculture (AG)

See College of Agriculture, pages 109-110.

AG 4250 Advanced Internship and Cooperative Experience 1-9 Advanced or middle-level internship or cooperative experience to be approved by the Dean’s Office. Intended for exchange students interested in a broad agricultural experience. (F,Sp,Su)

Anthropology (ANTH)

See Department of Sociology, Social Work and Anthropology, pages 500-511.

ANTH 1010 BSS Cultural Anthropology 3 Role of cultural concepts within discipline of anthropology. Relationship of cultural concepts to survival and adaptation, society and social life, ideology and symbolism, and cultural change and diversity. Applications to contemporary world problems. (F,Sp)

ANTH 1020 BLS Biological Anthropology 3 Survey of multidisciplinary field of biological anthropology. Includes study of fossil and living primates, fossil evidence for human evolution, bioarchaeology, contemporary human variation and adaptation, principles of evolutionary theory, and introductory population genetics. (F)

ANTH 2010 BSS Peoples of the Contemporary World (formerly ANTH 2100 BSS) 3 Introduces different ways of life, rural and urban, from the world’s major culture areas. Focuses on how contemporary societies have evolved in ecological, historical, and political context. Introduces problems arising from third world social change. (F)

ANTH 2020 BSS/CI World Archaeology (formerly ANTH 1030 BSS/CI) 3 Surveys archaeology and the means by which inferences about the past are made. Examines major processes shaping humans, including world colonization, our foraging legacy, origins of agriculture and civilization, and implications of our past for the present and future. (F,Sp)

ANTH 2210 BHU Introduction to Folklore (formerly ANTH 1710 BHU) 3 Introduction to major genres of folklore (folk narrative, custom, folk music and song, vernacular architecture and arts), folk groups (regional, ethnic, occupational, familial), and basic folklore research method (collecting and archiving). Also taught as ENGL 2210 and HIST 2210. (F,Sp)

ANTH 2720 Survey of American Folklore 3 Principal ethnic, regional, and occupational folk groups in America. Relations between folklore and American history, literature, and society. Key genres in American folklore (narrative, art, song, etc.) and their role in American culture. Also taught as ENGL 2720 and HIST 2720. (Sp)

ANTH 3110 North American Indian Cultures 3 Introduces ethnography of native cultures found within the USA and Canada, documenting their pre-contact adaptations and their interactions with changing national policies leading to today’s resurgence of native peoples. (F)

ANTH 3130 CI Peoples of Latin America 3 Survey of Latin American cultures, past and present. Emphasis on culture as a dynamic, adaptive system and on contemporary issues in rural and urban Andean South America, Amazonia, and Mesoamerica. Appropriate for both majors and nonmajors. (Sp)

ANTH 3150 Applied Anthropology Survey: History, Uses, Methods, and Careers 3 Surveys the field of applied anthropology, including discussions of emergence, application, and usefulness. Introduces students to methods and skills used by practitioners, as well as to those used to prepare for careers in applied anthropology. (F,Sp)

ANTH 3160 DSS Anthropology of Religion 3 Cross-cultural description and theoretical analysis of religion and its functional relationships to human psychology, society, and the natural environment. (F)

ANTH 3200 DSS/CI Perspectives on Race 3 Study of the processes of racial differentiation, the basis of biological differences found among existing human groups, the influence of biology and culture on human variation, and the influence of social context on perceptions of race. (Sp)

ANTH 3250 Osteology 3 Detailed hands-on study of human skeleton, including component of comparative vertebrate skeletal anatomy. Applications to fields of archaeology, forensic science, paleopathology, and zoology. Includes methods component. (F)

ANTH 3300 DSS Archaeology in North America 3 Prehistoric and historic archaeology of the North American continent. Explores initial colonization and Native American origins; variability among foraging adaptations; spread of farming; cultural complexity in Midwest, Southwest, and West Coast; Indian-environment relationships; European contact; depopulation; and historic archaeology of Euro-Americans. (Sp)

ANTH 3310 CI Introduction to Museum Studies 3 Explores all aspects of museum work, from the acquisition and storage of collections to fundraising and educational programs. As part of course requirements, students tour area museums and get first-hand perspectives on the challenges and rewards of museum work from professionals in the field. (Sp)

Utah State University 2006-2007 General Catalog
Course Descriptions

ANTH 3320  DSS  Ancient Humans and the Environment 3  
Explores human-environment relationships during the past 40,000-plus years, from small-scale societies to ancient civilizations. In this problem-oriented, topical course, emphasis placed on small group projects, discussion, writing, and oral presentation. (F)1

ANTH 3350  DSS  Archaeology of Ancient Civilizations 3  
Surveys primary states in antiquity, including Mesopotamia, China, Egypt, South America, and Mesoamerica. In-depth study of the process of their formation and theories of their origins. Emphasis is anthropological and scientific to complement the classical and humanistic. (Sp)1

ANTH 3990  History and Theories of Anthropology 3  
Traces history of anthropology, main currents of theoretical thought shaping claimed anthropological knowledge, and major figures associated with the discipline. Conceptualizes anthropology among the social sciences, life sciences, and humanities. Prerequisite: ANTH 1010. (F)1

ANTH 4100  The Study of Language 3  
Investigates ways in which human languages are structured, how they change, how they reflect the cultures in which they are used, and how they are learned. Also taught as LING 4100. (F,Sp)

ANTH 4110  DSS  Southwest Indian Cultures, (dual listing 6110) Past and Present 3  
Reviews past and present Indian cultures of greater southwest region. Examines the prehistoric Anasazi, the Pueblos, the canyon and desert peoples, the Utes, and the Navajos. Interprets these cultures in ecological, historic, and political contexts. (F)1

ANTH 4120  Ci/DSS  Ethnography of Childhood 3  
Focuses on ethnographic methods and the anthropological study of childhood. Students design and carry out ethnographic study of children in school, family, or other setting. Readings of ethnographic studies of childhood from the U.S. and abroad. Includes methods component. (F)1,2

ANTH 4130  DSS  Medical Anthropology: Matter, Culture, Spirit, and Health 3  
Examines the bio-ecological (matter) and socio-cultural aspects of disease/illness in human populations and examines “spiritual” dimensions of health in cross-cultural context. Includes methods component for anthropology majors and serves as a Liberal Arts capstone course. (Sp)1,2

ANTH 4150  QI  Problems in Cultural Anthropology 3  
Introduction to the wide range of information obtainable through the study of cross-cultural data. Methods and techniques of scientific inquiry in cultural anthropology explored through critical evaluation of quantitative, cross-cultural research literature and analysis of cultural data using SPSS. Prerequisites: ANTH 1010 and STAT 1040. (F,Sp)1

ANTH 4250  QI  Problems in Bioarchaeology 3  
Examines various approaches to the study of human biocultural adaptation through the analysis of human remains from archaeological sites. Includes methods component. Prerequisite: STAT 1040 or ANTH 3250 or permission of instructor. (Sp)1,2,3

ANTH 4350  Archaeological Method/Theory and Cultural Resource Management 3  
Examines contemporary theories, as well as methods used by archaeologists to address questions arising from theory. Also considers contributions of cultural resource management to meeting anthropological and public concerns. Includes methods component. Prerequisite: ANTH 2030; and one of the following courses: ANTH 3300, 3350, 4360, or 4380. (Sp)1,2,3

ANTH 4360  DSS  Ancient Desert West 3-4  
Prehistoric to historic human ecology and paleoenvironments of the Great Basin, Southwest, and southern California deserts. Emphasizes perspective of human evolutionary ecology and detailed examination of the archaeological record in conjunction with paleoenvironmental data. For classroom work only, 3 credits are granted. For 4 credits, one or more weekend field trips are required. Prerequisite: ANTH 2030 or permission of instructor. (F)1,3

ANTH 4370  Archaeology and Paleoenvironments Field Trip 2  
Two-hour class session and assigned readings prepare students for a three-day field trip to explore the archaeology and paleoenvironments of the northern Bonneville Basin. Post-field writing assignment integrates the field experience with readings and discussion. Prerequisite: Instructor permission. (F)

ANTH 4380  Peopling of the New World 3  
Explores how, when, and why humans first populated the Americas. Through emphasis on critical thinking and hypothesis testing, students scientifically evaluate evidence for initial colonization drawn from the fields of archaeology, biological anthropology, genetics, and linguistics. (Sp)1

ANTH 4800  Topics in Anthropology 1-3  
Focuses on special topics in anthropology. Topics and course format vary.

ANTH 4990  Contemporary Issues in Anthropology 3  
Capstone course in anthropological theory and method, required for all majors. Prerequisite: ANTH 1010. Recommended Prerequisite: ANTH 3990. (Sp)1,3

ANTH 5100  DSS  Anthropology of Sex and Gender (dual listing 6100) 3  
Increases awareness of sexuality and gender, and of feminist perspectives about social problems related to gender and sexuality that cross-cut cultural boundaries. Emphasizes gender-related social problems in contemporary world societies. (Sp)1

ANTH 5120  Applied Rural Development (dual listing 6120) 3  
Reviews development anthropology for practitioners. Examines human dimensions of planned policy, program, and project interventions. Examines how rural development occurs and how it is analyzed and managed in selected real-world cases. Includes methods component. (Sp)1

ANTH 5130  Ethnographic Field School (dual listing 6130) 3-6  
Provides practical training in use of ethnographic field methods, qualitative data analysis, and ethnographic report-writing. Combines classroom instruction with supervised off-campus field research, while living in a cross-cultural setting. Fulfills program methods requirement. Application and additional fee required. Also taught as SOC 5130/6130. (Su)

ANTH 5160  DSS  Cities and Development (dual listing 6160) 3  
Examines role of emerging urban areas in national development. Employs ethnographic case studies of selected cities, coupled with a policy perspective on problems of hyperurbanization in both poor and more advanced societies. Includes methods component. (Sp)1

ANTH 5190  Applied Anthropology Practicum 1-5  
Supervised projects in applied anthropology for advanced students. Integrates academic knowledge and field technique. Minimum contact hours, requirements, and credits available vary. Includes methods component. Prerequisite: Application and instructor approval.2,3

ANTH 5210  Physical Anthropology Lab 1-3  
Laboratory experience enabling participation in analysis/reporting stages of physical anthropology projects. Includes methods component. Prerequisite: ANTH 2030 and instructor’s permission. (Su)2,3

ANTH 5300  Archaeology Field School 1-5  
Internship on archaeological field project, including survey, excavation, recording, mapping, and scientific conduct of archaeological problem solving. Application process begins in March. Additional field support fee required. Prerequisites: ANTH 2030 and instructor’s permission. (Su)2,3

ANTH 5310  Archaeology Lab 1-3  
Laboratory experience enabling participation in analysis/reporting stages of archaeology projects. Includes methods component. Prerequisite: Permission of instructor.2,3

ANTH 5550  DSS  Developing Societies (dual listing 6650) 3  
Reviews how sociology, cultural geography, and economic anthropology analyze processes of globalization in postcolonial societies. Examines changing
Course Descriptions

livelihoods, patterns of spatial incorporation and societal evolution, and emergent policy problems associated with rapid socioeconomic change. Also taught as GEOG 5650/6650 and SOC 5650/6650. (F)¹

ANTH 5700 Folk Narrative 3
Forms and functions of folk narrative genres: myth, legend, folktale, memorate, and ballad. Also taught as ENGL 5700 and HIST 5700. (Sp)

ANTH 5800 Museum Development 1-3⁰
Apprenticeship in the USU Museum of Anthropology to learn the operation of a small museum. Entails close ongoing consultation with museum director and other staff members. Possible projects include artifact curation, exhibit development, public outreach, and others. Prerequisite: Instructor’s permission. (F,Sp,Su)²,³

ANTH 5900 Independent Studies 1-3⁰
Customized study or readings for upper-division or graduate students on topics not covered in regular courses. Prerequisite: Approval, prior to registration, of proposal written by student in consultation with instructor.

ANTH 5980 Senior Project 1
Develops advanced research and writing skills in a specialty area, and results in a research project/report. Must register in combination with a 4000- or 5000-level anthropology course, in consultation with instructor and subject to approval.

ANTH 6100 Anthropology of Sex and Gender (dual listing 5100) 3
Increases awareness of sexuality and gender, and of feminist perspectives about social problems related to gender and sexuality that cross-cut cultural boundaries. Emphasizes gender-related social problems in contemporary world societies. (Sp)³

ANTH 6110 Southwest Indian Cultures, (dual listing 4110) Past and Present 3
Reviews past and present Indian cultures of greater southwestern region. Examines the prehistoric Anasazi, the Pueblos, the canyon and desert peoples, the Utes, and the Navajos. Interprets these cultures in ecological, historic, and political contexts. (F)³

ANTH 6120 Applied Rural Development (dual listing 5120) 3
Reviews development anthropology for practitioners. Examines human dimensions of planned policy, program, and project interventions. Examines how rural development occurs and how it is analyzed and managed in selected real-world cases. Includes methods component. (Sp)³

ANTH 6130 Ethnographic Field School (dual listing 5130) 3-6
Provides practical training in use of ethnographic field methods, qualitative data analysis, and ethnographic report-writing. Combines classroom instruction with supervised off-campus field research, while living in a cross-cultural setting. Fulfills program methods requirement. Application and additional fee required. Also taught as SOC 6130/5130. (Su)

ANTH 6160 Cities and Development (dual listing 5160) 3
Examines role of emergent urban areas in national development. Employs ethnographic case studies of selected cities, coupled with a policy perspective on problems of hyperurbanization in both poor and more advanced societies. Includes methods component. (Sp)³

ANTH 6650 Developing Societies (dual listing 5650) 3
Reviews how sociology, cultural geography, and economic anthropology analyze processes of globalization in postcolonial societies. Examines changing livelihoods, patterns of spatial incorporation and societal evolution, and emergent policy problems associated with rapid socioeconomic change. Also taught as GEOG 6650/5650 and SOC 6650/5650. (F)

ANTH 6900 Independent Studies 1-3⁰
Customized study or readings for graduate students on topics not covered in regular courses. Prerequisite: Approval of proposal written by student in consultation with instructor.

¹This course is taught alternating years. Check with department for information about when course will be taught.

²This course may be used to satisfy the methods component requirement for the anthropology major.

³This course has one or more prerequisites. Check with the department for details.

⁴This course is offered infrequently. Check with department for information about when course will be taught.

⁵Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

⁶This course is also offered by online correspondence and/or CD through Continuing Education Time Enhanced Learning.

Art (ART)

See Department of Art, pages 158-168.

ART 1010 BCA Exploring Art (formerly ART 1100) 3
Introduction to the visual arts, including the language, elements, and history of art. (F)

ART 1020 Drawing I (formerly ART 1110) 3
Introduction to the visual language of drawing, the graphic elements, various drawing media, and the creative problems involved. (F,Sp)

ART 1050 Introduction to Photography (formerly ART 2800) 3
Overview of photography. Operation of camera and related equipment, exposure and development of black and white and color positive film materials, and enlarging and printing of black and white negatives, with a strong emphasis on composition and photographic aesthetics. (F)

ART 1110 Drawing I (Art Majors Only) 3
Development of foundation drawing skills for art majors. Introduction to fundamental drawing principles and various drawing media through creative applications. Required for art majors. Enrollment limited to art majors having freshman standing (30 or less earned credits) only. (F,Sp)

ART 1120 Two-dimensional Design 3
Study and problem solving of form, space, texture, value, and color theory. (F,Sp)

ART 1130 Three-dimensional Design 3
Fosters development of basic understanding of three-dimensional form and space relationships. Includes three-dimensional problem solving, as well as use of a range of materials. (F,Sp)

ART 1150 Two-dimensional Design (Art Majors Only) 3
Foundation design course for art majors. Exploration of the elements and principles of two-dimensional design. Extensive use of a variety of media in creative problem solving. Required for art majors. Enrollment limited to art majors having freshman standing (30 or less earned credits) only. (F,Sp)

ART 1160 Three-dimensional Design (Art Majors Only) 3
Foundation design course for art majors. Exploration into the principles and vocabulary of visual organization in three dimensions. Through the manipulation of a variety of materials, students gain understanding of form and space. Required for art majors. Enrollment limited to art majors having freshman standing (30 or less earned credits) only. (F,Sp)

ART 2110 Drawing II (formerly ART 2140) 3
A continuation of ART 2120. Provides experience in both direct and indirect painting methods, as well as introducing applied color concepts. Prerequisites: ART 2120 or 1110; and ART 1120 or 1150. (F)
### Course Descriptions

<table>
<thead>
<tr>
<th>ART 2220</th>
<th>Watercolor Painting</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exploration of formal, technical, and conceptual problems in water media, for students with basic painting experience. Emphasis on gaining proficiency in both transparent and opaque watercolor techniques. Prerequisite: ART 2200. (F,Sp)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*Requires permission of instructor. (Sp)
**Requires permission of instructor. (F,Sp,Su)

Utah State University 2006-2007 General Catalog
Course Descriptions

ART 4840  Color Photography I*  3
Introduction to technical, conceptual, aesthetic, and digital explorations available with exposure and development of color positive and negative films. Investigation of color theory accompanied by production of correctly balanced color prints. Prerequisite: ART 3810. (F)

ART 4850  Color Photography II*  3
Continuation of study with color materials including digital investigations. Explores alternative techniques and manipulative capabilities with color processes. Stresses individual pursuit of color print portfolio. Prerequisite: ART 4840. (Sp)

ART 4860  Photographic Studio**  3
Exploration of the photographic studio, 4x5 view camera, the principles of applied lighting, and the communication of an idea through photography. Commercial, editorial, portrait, and digital photography directed toward professional portfolio preparation. All students required to have 4x5 camera. Enrollment limited to BFA students only. Prerequisite: ART 3810. (F)

ART 4870  Photographic Portfolio**  3
Advanced photography class in preparation for life after graduation. Strong emphasis on work toward a personal professional portfolio (fine art and 560

Graduate status. (F,Sp,Su)

ART 4880  Photographic Studio**  3
Emphasizes individual attainment of personal conviction or direction in painting. Commercial, editorial, portrait, and digital photography directed toward professional portfolio preparation. All students required to have 4x5 camera. Enrollment limited to BFA students only. Prerequisite: ART 3810. (F)

ART 4880  Imaging Services  3
Internship situation at a commercial photographic studio and lab facility. Prerequisites: ART 4810, 4840. Enrollment limited to BFA candidates only. (F,Sp,Su)

ART 4900  Advanced Internship/Coop  1-9
Internship/cooperative education work experience in art. For those students needing complexity and a more professional level of experience in the workplace. (F,Sp)

ART 4910  Senior BFA Exhibition  2
Professional presentation and exhibition procedures. Enrollment limited to senior standing and BFA candidates only. Required for all BFA candidates. Prerequisite: Approval of advisor. (Sp)

ART 4920  Independent Projects  1-9
Student-planned projects, executed through individual initiative and scheduled consultation with instructor. Prerequisites: ART 1020 or 1110; ART 1120 or 1150; and ART 1130 or 1160. (F,Sp,Su)

ART 4930  Student Teaching at University Level  3
Teaching methods and procedures for university-level classes, working directly with faculty in lower-division classes. Prerequisite: Approval of instructor. (F,Sp,Su)

ART 5500  Student Teaching Seminar  2
Capstone seminar focused upon student teaching issues, professional development, and principles of effective instruction, emphasizing a reflective methodology. Prerequisites: Level 1 and Level 2 completion, and student teaching placement. (F,Sp)

ART 5630  Student Teaching in Secondary Schools  10
Thirteen-week culminating practicum in which students assume full-time teaching responsibilities under direction of cooperating teachers in major and minor fields. Prerequisites: Level 1 and Level 2 completion, and student teaching placement. (F,Sp)

ART 6200  Graduate Drawing and Painting Studio  1-9
Emphasizes individual attainment of personal conviction or direction in painting. Prerequisite: Graduate status. (F,Sp,Su)

ART 6250  Graduate Printmaking Studio  1-9
Intensive individual production in advanced printmaking techniques. Prerequisite: Graduate status. (F,Sp,Su)

ART 6370  Graduate Illustration Studio  3-9
(Advertising, Editorial, Fashion.) Techniques in advertising illustration meeting the needs of client and his or her audience. Prerequisite: Graduate status. (F,Sp,Su)

ART 6400  Graduate Graphic Design Studio  3-9
Graphic design problems leading to understanding of major concepts in this area. Prerequisite: Graduate status. (F,Sp,Su)

ART 6640  Technology of Ceramic Art  3
Selected topics in aesthetics and technology of ceramic art, including ceramic history, glaze chemistry and calculation, firing techniques, kiln design and construction, etc. Prerequisite: Graduate status. (F,Sp,Su)

ART 6650  Graduate Ceramic Studio  3-9
Arranged to provide time, equipment, and facilities for graduate students to pursue directed studies. Tutorial format with group critiques. Prerequisite: Graduate status. (F,Sp,Su)

ART 6660  Graduate Sculpture Studio  3-9
Advanced individual problems in various media and technique. Prerequisite: Graduate status. (F,Sp,Su)

ART 6710  Graduate Greek and Roman Art  3
Origin and development of the art and architecture of Crete, Mycenae, Greece, and the Roman world. Prerequisite: Graduate status. (Sp)

ART 6770  Graduate Gender Issues in Art  3
Discussion of major issues and debates regarding gender in the visual arts. Topics include: revising the canon, representing gender, and theories of gender and spectatorship. Readings are discussed and applied to visual works of art.

ART 6790  Graduate Gender Issues in Art  3
Discussion of major issues and debates regarding gender in the visual arts. Topics include: revising the canon, representing gender, and theories of gender and spectatorship. Readings are discussed and applied to visual works of art.

ART 6900  Graduate Seminar  3
Deals with general topic of professional practice, including art criticism and what we see in an artistic manner. Allows graduate students to further emphasize their thesis project area of study. Prerequisite: Graduate status. (F,Sp,Su)

ART 6910  Graduate Interdisciplinary Critique  1
Focuses on current work of critique participants. Brings disciplinary analysis to specific problem. Prerequisite: Graduate status. (F,Sp)

ART 6920  Graduate Independent Projects in Art  1-9
Advanced problems in emphasis, medium, and idiom of student's choice. Student plans project and executes it through individual initiative and scheduled consultation with the instructor. Prerequisites: Consent of instructor, graduate status. (F,Sp,Su)

ART 6940  Graduate Internship/Coop  1-9
Internship/cooperative education work experience in art. Designed to allow graduate students to receive more complex and professional workplace experience. Prerequisite: Graduate status. (F,Sp,Su)

ART 6970  Research and Thesis  3
Graduate status. (F,Sp,Su)

ART 6990  Continuing Graduate Advisement  1-3
Graduate status. (F,Sp,Su)

Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

This course is also offered by online correspondence and/or CD through Continuing Education Time Enhanced Learning.

Course Descriptions

Art History (ARTH)

See Department of Art, pages 158-168.

ARTH 2710 BHU Survey of Western Art: Prehistoric to Medieval 3
(formerly ART 2710 BHU)
Prehistoric art through the end of the Gothic era. (F)

ARTH 2720 BHU Survey of Western Art: Renaissance to Post-Modern 3
(formerly ART 2720 BHU)
Renaissance through modern. (Sp)

ARTH 4610 DHA Greek and Roman Art* 3
(dual listing 6610)
(formerly ART 3140 DHA)
Origin and development of art and architecture of Crete, Mycenae, Greece, and the Roman world.

ARTH 4620 DHA Byzantine Art* 3
(dual listing 6620)
(formerly ART 3130 DHA)
Focuses on the art and architecture of the Byzantine empire from late antiquity to the fifteenth century. In addition to including study of the visual arts, course incorporates readings in the history of religion and gender studies. Recommended prerequisite: ARTH 2710. (F)

ARTH 4630 DHA Medieval Art* 3
(dual listing 6630)
(formerly ART 3140 DHA)
Covers art and architecture in Europe between 450 and 1450, with an emphasis on cultural diversity and artistic variety. Study of the visual arts is complemented by readings in history and literature. Recommended prerequisite: ARTH 2710. (Sp)

ARTH 4720 Renaissance Art 3
(formerly ART 4720)
Development of European art and architecture from the thirteenth to the sixteenth century.

ARTH 4730 Baroque and Rococo Art 3
(formerly ART 4730)
Development of painting, sculpture, and architecture in Europe from the late sixteenth through the eighteenth centuries.

ARTH 4740 Nineteenth Century Art 3
(formerly ART 4740)
Painting and sculpture from Neoclassicism to Symbolism. Prerequisite: ARTH 2720.

ARTH 4750 Twentieth Century Art* 3
(formerly ART 4750)
History of painting, sculpture, and architecture from post-impressionists to the present. Prerequisite: ARTH 4610.

ARTH 4760 American Art 3
(formerly ART 4760)
History of painting, sculpture, and architecture in America from colonial times to the present. Prerequisite: ARTH 2720. (Sp)

ARTH 4800 Directed Reading and Research in Art History 1-3
Directed reading, writing, and research in art history. Prerequisite: Permission of instructor. (F,Sp)

ARTH 4810 Museum Internship 1-3
Through this course, advanced art history students may arrange for credit in conjunction with a local museum. Supervisor at museum oversees student’s work. A faculty member in Art History oversees the written component, including portfolio, documentation, and research paper, depending on number of credits student is enrolled for. Prerequisite: Permission of instructor. (F,Sp)

ARTH 5710 Gender Issues in Art* 3
(formerly ART 4770)
Discussion of major issues and debates regarding gender in the visual arts. Topics include: revising the canon, representing gender, and theories of gender and spectatorship. Readings are discussed and applied to visual works of art. (Sp)

ARTH 5720 Central European Art* 3
(formerly ART 4110)
Discussion-based seminar covering the traditionally neglected theme of art in Central Europe. Emphasizes modern art, with the theme of national identity as a constant concern. (F)

ARTH 5730 The Art Museum* 3
The history of museums and display practice has become a significant field in studies of contemporary art and art history. Topics covered include: cabinets of curiosity and historical origins, art museums and their publics, blockbusters, revisionism, architecture, museums, and memory.

ARTH 6510 DHA Islamic Visual Cultures* 3
(formerly ART 4510)
Explore the emergence and development of Islamic visual cultures in Asia and around the Mediterranean between 622 and 1250. Recommended prerequisite: ARTH 2710. (Sp)

ARTH 6610 Greek and Roman Art* 3
(formerly ART 4610)
Origin and development of art and architecture of Crete, Mycenae, Greece, and the Roman world.

ARTH 6620 Byzantine Art* 3
(formerly ART 4620)
Focuses on the art and architecture of the Byzantine empire from late antiquity to the fifteenth century. In addition to including study of the visual arts, course incorporates readings in the history of religion and gender studies. Recommended prerequisite: ARTH 2710. (F)

ARTH 6630 DHA Medieval Art* 3
(formerly ART 4630)
Covers art and architecture in Europe between 450 and 1450, with an emphasis on cultural diversity and artistic variety. Study of the visual arts is complemented by readings in history and literature. Recommended prerequisite: ARTH 2710. (Sp)

ARTH 6650 DHA Islamic Visual Cultures* 3
(formerly ART 4510)
Explore the emergence and development of Islamic visual cultures in Asia and around the Mediterranean between 622 and 1250. Recommended prerequisite: ARTH 2710. (Sp)

ARTH 6660 Byzantine Art* 3
(formerly ART 4620)
Origin and development of art and architecture of Crete, Mycenae, Greece, and the Roman world.

ARTH 6720 Graduate Renaissance Art 3
(formerly ART 6720)
Development of European art and architecture from the thirteenth to the sixteenth centuries. Prerequisite: Graduate status. (F)

ARTH 6730 Graduate Baroque and Rococo Art 3
(formerly ART 6730)
Development of art and architecture in Europe from the sixteenth to the eighteenth centuries. Prerequisite: Graduate status. (Sp)

ARTH 6740 Graduate Nineteenth Century Art 3
(formerly ART 6740)
Painting and sculpture from Neoclassicism to Symbolism. Prerequisites: ARTH 2720 or consent of instructor. graduate status. (F)

ARTH 6750 Graduate Twentieth Century Art 3
(formerly ART 6750)
History of painting, sculpture, and architecture from the post-impressionists to the present. Prerequisite: Graduate status. (Sp)

## Aerospace Studies (AS)

See Department of Aerospace Studies, pages 136-137.

*Taught alternate years. For further information, consult department.

## Agricultural Systems Technology and Education (ASTE)

See Department of Agricultural Systems Technology and Education, pages 138-145.

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Students examine the framework of agricultural education, with a special emphasis on the nature of the programs, career opportunities, and the qualifications and preparation requirements of future agricultural educators. (F)

Basic principles of agribusiness sales and marketing. After completing a series of self-assessments relating to sales, learning, and personality preferences, students learn to complete each major step of the sales process. (F)

Provides broad overview of food systems in conjunction with detailed analysis of particular issues, such as different theories and supporting data on the domestication of plants and animals, the use of human labor, the development and operation of complex technologies, and the analysis of socioeconomic data on human population growth and well-being. (F,Sp)

Basic skill preparation for employment in agricultural industry. (F,Sp)

Selection of ferrous and nonferrous welding techniques in agricultural applications. Welding, cold- and hot-working metal in agricultural construction and maintenance. (F)

Selection and use of agricultural building materials, including concrete and masonry, lumber, plywood, finishes, and fasteners. Application of hand and power tools and procedures in agricultural construction. (Sp)

Technical communication principles and practices used in the agricultural industry. Emphasizes technical writing of reports and correspondence using electronic information retrieval and presentation. Prerequisite: ENGL 2110. (F,Sp)

Operation and application of agricultural and turfgrass equipment powered by internal combustion engines having less than 40 horsepower. (Sp)

Overview of computer systems and software currently used in agriculture. Emphasis placed on spreadsheet development, file management, computer ethics, and design of materials for print, presentation, and web media. Prerequisite: Satisfactory completion of University computer and information literacy exam. (F)

Study of leadership styles and their applications in development of agricultural programs for youth and adults. Emphasizes leadership and communication principles for effective community resource management in rural environments. Experiences provided in leadership styles, program planning, and meeting organization. (Sp)

Introduction to planning principles for irrigation systems and farm water resource development. Layout of system components and coverage of practices common to the Intermountain West. (Sp)

Basic principles of teaching students in laboratory settings. Overview of major concepts, considerations, and practices used for developing and evaluating agriscience curricula. Prerequisite: ASTE 2710. (Sp)

In-school clinical observation experience. Students involved in observing management and assisting in teaching. Designed to provide familiarity with agricultural education classroom. (Sp)

Designed to challenge students from all academic majors to develop an understanding of the dynamic interaction between science, technology, and society. Explores responsibility of humans for directing the utilization of technology as a creative enterprise. Also taught as ETE 3440. (F,Sp)

Each student serves as an apprentice to professional agricultural educator. Students complete competencies leading to early preparation for student teaching. (F,Sp,Su)

Management principles for evaluation and selection of agricultural complements for performance, optimization, economics, environmental impact, and long-term sustainable agricultural practices. Prerequisite: MATH 1050 or STAT 1040. (Sp)

Introduction to basic concerns, understandings, and practices needed to effectively advise an FFA chapter. Students learn appropriate philosophies and skills for operation of a comprehensive supervised agricultural experience program. Prerequisite: Admission to Secondary Teacher Education Program. (Sp)

Fundamental principles and components of hydraulic systems as applied in agricultural machinery. Exploration of techniques for diagnosing malfunctions and related failures with a systems approach. (F)

Fundamental principles and components of hydraulic systems as applied in agricultural machinery. Exploration of techniques for diagnosing malfunctions and related failures with a systems approach. (F)

Application of theory, testing, diagnosis, and repairs of auxiliary systems, including air conditioning, fuel injection, analog, electronic monitoring, and GPS as utilized in agricultural equipment. Prerequisite: ASTE 3720 or approval of instructor. (Sp)

Students conduct short-term investigation and/or literature analysis with critical review of contemporary issues in Agricultural Systems Technology. Formal contract with approved faculty. Activities culminate with a written report. (F,Sp,Su)

Overview of agricultural structures and environmental considerations related to livestock, livestock waste management, and commodity storage. Planning, layout, construction materials, concrete masonry, ventilation, insulation, and energy. (Sp)

Introduction to basic practices of classroom teaching and program planning. Through participation in discussions, activities, and assignments, students refine their abilities to develop programs, diagnose the learner, prepare the instruction, and guide student learning. Prerequisites: ASTE 2710, 3240. (F)

Supervised occupational experience for technical and professional preparation in teacher education and/or agricultural business. (F,Sp,Su)

Continued in-school observation of agricultural education teaching. Requires student participation in teaching, management, and program development in agricultural education. (F)

<tr>
<td>ASTE 6000</td>
<td>Methods of Equipment Testing, Diagnosis, and Repair</td>
<td>3</td>
<td>Investigation and demonstration of methods and procedures for testing, troubleshooting, and diagnosis of tractors, power units, and all types of agricultural equipment. This course is currently inactive. Contact department for information about when this course may be taught.</td>
</tr>
<tr>
<td>ASTE 6070</td>
<td>Program and Curriculum Development in Career and Technical Education</td>
<td>3</td>
<td>Program planning for locally applied curriculum design to meet student interests and community needs for career and technical educators. (F,Sp,Su)</td>
</tr>
<tr>
<td>ASTE 6100</td>
<td>Electrical Controls and Motors for (dual listing 5100) Agri-industrial Applications</td>
<td>3</td>
<td>Operation and application of electrical motors, electrical and electronic controls, and circuit and overload protection utilized in agricultural and industrial installations. This course is currently inactive. Contact department for information about when this course may be taught.</td>
</tr>
<tr>
<td>ASTE 6110</td>
<td>Applied Technology Education Program Planning and Evaluation</td>
<td>3</td>
<td>Program planning and evaluation. Study of strategies used in applied technology. Demonstration of manpower surveys and job analysis for curriculum development. (F)</td>
</tr>
<tr>
<td>ASTE 6130</td>
<td>Electrical and Hydraulic Component Testing, Diagnosis, and Repair</td>
<td>3</td>
<td>Involves supervision and demonstration of procedures for testing, diagnosis, and repair of all types of electrical and hydraulic components on modern agricultural equipment. (F)</td>
</tr>
<tr>
<td>ASTE 6140</td>
<td>Agricultural Development and Evaluation</td>
<td>3</td>
<td>Principles and strategies for developing, implementing, and evaluating agricultural technology and educational programs for U.S. and international organizations. (Sp)</td>
</tr>
<tr>
<td>ASTE 6170</td>
<td>Supervision and Administration of International Extension Programs</td>
<td>3</td>
<td>Investigation and analysis of theories and practices of supervision and administration as applied to international extension-education programs and rural development/agricultural extension operations. (F)</td>
</tr>
<tr>
<td>ASTE 6240</td>
<td>Strategies for Teaching Adults</td>
<td>3</td>
<td>Features contemporary strategies and guided practice for teaching adults in group and individualized learning settings. (F,Sp,Su)</td>
</tr>
<tr>
<td>ASTE 6250</td>
<td>Special Problems in Agricultural Systems Technology</td>
<td>1-5</td>
<td>A consideration of needs and special types of service in FFA, young farmers, and adult programs for applied technology teachers. (F,Sp,Su)</td>
</tr>
<tr>
<td>ASTE 6260</td>
<td>Environmental Impacts of Agricultural Systems (dual listing 5260)</td>
<td>3</td>
<td>Investigation of relationship between agricultural practices and environmental quality, including control of agricultural nonpoint-source pollution. (F)</td>
</tr>
<tr>
<td>ASTE 6300</td>
<td>Foundations of Adult Education and Program Evaluation</td>
<td>3</td>
<td>Addresses the context and providers of adult education. In addition, adult learning theories and participation models are examined. (F)</td>
</tr>
<tr>
<td>ASTE 6400</td>
<td>Food, Land and People Workshop</td>
<td>0.5-3</td>
<td>Designed for practicing K-12 teachers. Offers in-service development for infusing agriculture and the concepts of Food, Land and People into existing curriculum standards and objectives. Presentation of Agriculture in the Classroom instructional units, as well as hands-on methods and materials. (F,Sp,Su)</td>
</tr>
<tr>
<td>ASTE 6510</td>
<td>Principles and Practices of Extension Education</td>
<td>3</td>
<td>History, philosophy, and organizational structure of U.S. and international extension organizations, including programming models, teaching strategies, and accountability. (F)</td>
</tr>
<tr>
<td>ASTE 6700</td>
<td>Research Methods</td>
<td>3</td>
<td>Introduction to techniques used in applied agricultural research and career and technical education research. Includes research design, data gathering, and statistical analysis and interpretation. (Sp)</td>
</tr>
<tr>
<td>ASTE 6750</td>
<td>Agricultural Safety and Health: Issues and Decisions</td>
<td>3</td>
<td>Review of agricultural safety and health issues. Public and private concerns addressed through problem identification, data gathering, resolution, and evaluation. (Sp)</td>
</tr>
<tr>
<td>ASTE 6970</td>
<td>Research and Thesis</td>
<td>1-9</td>
<td>(F,Sp,Su)</td>
</tr>
<tr>
<td>ASTE 6990</td>
<td>Continuing Graduate Advisement</td>
<td>1-3</td>
<td>(F,Sp,Su)</td>
</tr>
<tr>
<td>ASTE 7000</td>
<td>Principles and Practices of Community College Education</td>
<td>3</td>
<td>Examines the American two-year college, including historical and philosophical development, curricula, students and the learning process, faculty and instruction, administration and governance, support, and control. Focuses upon principles, practices, and problems of community colleges in America. (Su)</td>
</tr>
<tr>
<td>ASTE 7400</td>
<td>Community and Interagency Partnerships</td>
<td>3</td>
<td>Explores relationship between education and the community, with special emphasis on community needs and interagency relationships needed for the development of a total community education program. Further understanding of leadership and agency, through exploring and examining contemporary and perennial issues from multiple perspectives in a diverse higher-educational context. (Su)</td>
</tr>

**Course Descriptions**

**AV 100** The Aviation Profession  
Covers attributes of aviation professional, career planning, and certification process. (F,Sp)

**AV 1100** Aircraft Structures  
 theory of operation, maintenance, and repair of reciprocating engines, propellers, exhaust systems, ignition systems, and fuel systems with laboratory applications of principles and components studied. Prerequisite: AV 2110 (must be taken concurrently). (F)

**AV 1120** Aircraft Maintenance  
Maintenance, repair, alteration, and inspection of aircraft. Assembly and rigging of control systems with laboratory application of maintenance assembly and rigging procedures. Prerequisites: AV 1130, 1140. (Sp)

**AV 1170** Aircraft Turbine Powerplants and Accessories  
Theory of operation, maintenance, and repair of reciprocating engines, propellers, exhaust systems, ignition systems, fuel systems, and fuel systems with laboratory applications of principles and components studied. Prerequisite: AV 2110 (must be taken concurrently). (F)

**AV 2100** Aircraft Turbine Powerplants and Accessories  
Laboratory application of principles studied in AV 2100. Prerequisite: AV 2100 (must be taken concurrently). (F)

**AV 2110** Aircraft Turbine Powerplants and Accessories Lab  
Laboratory application of principles studied in AV 2110. Prerequisite: AV 2100 (must be taken concurrently). (F)

**AV 2140** Aircraft Turbine Powerplants and Maintenance Operations  
Theory of turbine powerplants, including turbine engine and components operation, hot section inspection, and servicing. Aircraft engine 100-hour inspections and maintenance, with laboratory applications of principles and components studied. Prerequisite: AV 2150 (must be taken concurrently). (Sp)

**AV 2150** Aircraft Turbine Powerplant Maintenance Operations Lab  
Theory of turbine powerplants, including turbine engine and components operation, hot section inspection, and servicing. Aircraft engine 100-hour inspections and maintenance, with laboratory applications of principles and components studied. Prerequisite: AV 2140 (must be taken concurrently). (Sp)

**AV 2170** Aircraft Systems  
Theory and operation of aerospace environmental systems, communication, navigation and guidance systems, fuel and propellant systems, fire detection, and warning. (Sp)

**AV 2180** Aircraft Hydraulic and Pneumatic Systems  
Theory and operation of aircraft hydraulic, landing gear, and brake systems. (F)

**AV 2190** Aircraft Systems Lab  
Laboratory application of principles and components studied in AV 2170. Prerequisite: AV 2170 (must be taken concurrently). (Sp)

**AV 2200** Aircraft Hydraulics and Pneumatics Systems Lab  
Laboratory application of principles and components studied in AV 2180. Prerequisite: AV 2180 (must be taken concurrently). (F)

**AV 2250** Internship  
Planned supervised work experience in industry. Must have departmental approval. (F,Sp,Su)

**AV 2330** Private Pilot Ground School  
Instructions in principles of flight, aircraft and engine operation, weather, navigation, radio aids to navigation, radio communications, and federal air regulations. Preparation for FAA Private Pilot written exam. (F,Sp,Su)

**AV 2350** Private Pilot Certification  
FAA-approved flight training program meeting all requirements for, and in the issuance of, the Private Pilot Airplane License. Prerequisite: AV 2330 (may be taken concurrently). (F,Sp,Su)

**AV 2420** FAA Regulations, Records, and Certification  
Preparation for FAA Private Pilot written exam. (F,Sp,Su)

**AV 2430** Aircraft Electrical Systems and Components  
Aircraft electrical power generating systems. Theory of generation, alternators, regulation, and control systems with laboratory application of principles and systems studied. Prerequisite: ETE 2300. (Sp)

**AV 2440** Aircraft Electrical Systems Laboratory  
Laboratory application of principles and systems studied in AV 2430. Prerequisites: ETE 2300; AV 2430 (must be taken concurrently). (Sp)

**AV 2510** Intermediate Flight  
FAA-approved flight training program that fulfills the cross country requirements for commercial and instrument ratings. Prerequisite: AV 2350. (F,Sp,Su)

**AV 2520** Instrument Pilot Ground School  
Ground school approved by FAA under Part 141 of the Federal Aviation Regulations. Designed to prepare students to pass the FAA oral and written examinations required for becoming instrument rated pilots. Prerequisite: AV 2350. (F,Sp,Su)

**AV 2540** Instrument Pilot Certification I  
FAA-approved flight training program introducing requirements for issuance of the Instrument Pilot Airplane Rating. Prerequisites: AV 2520; AV 2550 (may be taken concurrently). (F,Sp,Su)

**AV 2550** Instrument Pilot Certification II  
Continuation of AV 2540. Completes all requirements for issuance of the instrument pilot airplane rating. Prerequisite: AV 2540. (F,Sp,Su)

**AV 2570** Instrument Pilot Certification  
Continuation of AV 2540. Completes all requirements for issuance of the instrument pilot airplane rating. Prerequisite: AV 2540. (F,Sp,Su)

**AV 2620** Commercial Pilot Ground School  
Commercial flight operations including performance, cross country planning, advanced systems operations, complex airplanes, and flight maneuvers. Prerequisites: AV 2350 and 2520. (F,Sp)

**AV 2660** Commercial Pilot Certification  
Flight instruction to meet FAA requirements and completion of tests for certification. Prerequisites: AV 2540; AV 2620 (may be taken concurrently). (F,Sp,Su)

**AV 2720** CFI and CFII Ground School  
Designed to prepare students to pass the FAA oral and written examinations required for becoming certified flight and instrument instructors. Combines Certified Flight Instructor and Certified Flight Instructor-Instrument into one course. Prerequisite: AV 2660. (F,Sp)

**AV 2740** CFI Certification  
FAA-approved flight training program meeting all requirements for the issuance of the Certified Flight Instructor Airplane Rating. Prerequisite: AV 2720 (may be taken concurrently). (F,Sp,Su)
Course Descriptions

AV 2860 CFII Certification 1
FAA approved flight training program meeting all the requirements for, and issuance of, the Certified Flight Instructor, Airplane Instrument Rating. Prerequisites: AV 2720 and 2740 (may be taken concurrently). (F,Sp,Su)

AV 2880 Multi-Engine Certification 1
FAA approved flight training program meeting all the requirements for, and issuance of, the Multi-Engine Airplane Rating. Prerequisite: AV 2660. (F,Sp,Su)

AV 3010 National Airspace, Air Traffic Control, and Administration 3
Study of air traffic control system, airspace usage, and facilities. Airport planning, development, and management and their importance to the achievement of a successful airport operation. Management of publicly owned and operated airports, ranging in size from general aviation to the large air carrier hubs. (F)

AV 3120 Aviation Law 3
Law as it affects aviation industry. Rights and responsibilities of individual organizations and the aviation community. Regulation and liability pertaining to design, manufacturing, operation, and maintenance of aircraft. Prerequisite: AV 1100. (F)

AV 3140 Advanced Avionics Systems and Flight Simulation 3
In-depth study of state-of-the-art aircraft instrumentation systems and advanced flight training utilizing a flight simulator. Prerequisite: AV 2540. (F,Sp,Su)

AV 3280 Advanced Turbine Engines 2
Advanced study of turbo-jet propulsion. Comparative examination of jet, fan, turbo-prop, and turbo-shaft engines. Prerequisite: AV 2150. (F)

AV 3410 FCC License 1
Prepares students to obtain the FCC General Radio Telephone Operator’s License. Covers electronic fundamentals through microwave radar and FCC rules and regulations. Prerequisite: ETE 3400. (Sp)

AV 3610 AeroTechnology Design I 1
Students select and plan a senior project. Requires written proposal, including technical description of the project and management plans. (Sp)

AV 4200 Composite Manufacturing Processes and Repair 3
Composite manufacturing processes, composite materials survey, tooling design and fabrication, autoclave processes, vacuum bag techniques, filament winding processes, equipment requirements, materials cutting and storage, and composite materials testing. (Sp)

AV 4250 Internship 1-6*
Planned supervised work experience in industry. Prerequisite: Departmental approval. (F,Sp,Su)

AV 4280 Airline Operations 3
Study of airline operations and their organizational structure. Examines functions of airline dispatcher, operations specialists, managers, and cockpit flight crew. Discussion of advanced flight planning, aircraft performance and loading considerations, and impact of weather on flight operations and routing priorities. Prerequisite: AV 1100. (F)

AV 4300 Airline Marketing 3
Introduces marketing thought, basic marketing principles and their application to airline business and operations, strategic planning, and decision-making. No prerequisites; however, AV 4280 is highly recommended. (Sp)

AV 4480 Certified Flight Instructor Practicum 2
Under supervision of ground school instructor, student gains practical experience teaching ground school subjects. Prerequisite: AV 2740.

AV 4490 Human Factors in Aviation Safety 3
Examines major causative agent in aircraft accidents: the human being. Emphasizes psychological and physiological factors enhancing accident probability. Includes detailed analysis of ergonomics (human engineering) and its influence on safety. Prerequisite: AV 1100. (Sp)

AV 4610 CI AeroTechnology Design II 3
Execution and completion of a team or individual project. Requires design reviews and written reports. Prerequisite: AV 3610. (F)

AV 4620 CI AeroTechnology Design III 3
Preparation and presentation of a team or individual project. Writing and speaking skills emphasized through technical reports and presentations. Prerequisite: AV 4610. (Sp)

AV 4660 CI Flight Senior Project 3
Students select, plan, and execute an approved senior project. Writing and speaking skills emphasized through technical reports and presentations. (F,Sp)

AV 5400 Regional Jet Ground School I 4
Introduction to a typical commercial jet aircraft in use by Regional Airlines. Course includes the following: Aircraft Systems, Standard Operating Procedures, and Flight Planning and Performance. Introduction to Airline Flight Operations in preparation for entry-level pilot positions with a regional airline. Prerequisite: AV 2660. (Sp)

AV 5410 Regional Jet Ground School II 4
Continuation of AV 5400. Prerequisite: AV 2660. (F)

Note: Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Aquatic, Watershed, and Earth Resources (AWER)

See Department of Watershed Sciences, pages 535-540.

Note: Effective Spring Semester 2007, courses listed with the AWER prefix will use the Watershed Sciences (WATS) prefix.

AWER 1020 Aquatic, Watershed, and Earth Resources Professional Orientation 1
Introduction and orientation to natural resource/environmental disciplines and related professional careers for Watershed Sciences majors. Discussion of education, curricula, faculty, professional societies, and employment opportunities. (F)

AWER 1200 BLS Biodiversity: Its Conservation and Future 3
Today, species extinctions are occurring at an unprecedented rate. People in developed countries are concerned with this loss. Solving this problem requires knowledge of what determines biodiversity, how it is being threatened, and how its loss can be countered. (F,Sp)

AWER 2250 Introductory Internship/Co-op 1-3*
Introductory-level educational experience in internship/cooperative education position approved by department. Prerequisite: Permission of department. (F,Sp,Su)

AWER 3000 DSC Oceanography 3
Examines fundamental interrelationships between physical environment of the oceans and the life forms they support. Suitable for nonbiologists. (Sp)

AWER 3100 DSC/CI Fish Diversity and Conservation 3
Systematics, physiology, ecology, evolution, and conservation of major groups of marine and freshwater fishes. Stresses functional morphology, physiological ecology, and community interactions explaining fish abundance and distribution. Prerequisite: BIOL 1010 or 1610 or 1620. (F)

AWER 3110 Fish Diversity Laboratory 1
Focuses on field collection, identification, and habitat relationships of freshwater fishes in North America. Prerequisite: AWER 3100 (may be taken concurrently). (F)

AWER 3600 Geomorphology 4
Geomorphic processes, origin of landforms and surficial deposits. Emphasizes fluvial and hillslope landscape elements, and surficial geologic mapping. Three one-hour lectures and one three-hour lab per week. Prerequisite: GEO 1010 or 1110 or GEOG 1000. Also taught as GEO 3600. (F)

</thead>
<tbody>
<tr>
<td>AWER 5640</td>
<td>Riparian Ecology and Management</td>
<td>3</td>
<td>Explores structure and function of riparian ecosystems and management options for maintaining sustainable ecological function. Prerequisite: NR/BIOL 2220, AWER 3700. (Sp)</td>
</tr>
<tr>
<td>AWER 5660</td>
<td>Watershed and Stream Restoration</td>
<td>2</td>
<td>Overview of the current theory and practice of watersheds and streams. Emphasizes field visits with restoration projects and specialists. Prerequisites: AWER/FRWS 5490/4490, AWER/GEO 5150, FRWS 5610 (or equivalent). Currently taught through Continuing Education as a summer short course. (Su)</td>
</tr>
<tr>
<td>AWER 5670</td>
<td>Watersheds and Stream Restoration Practicum</td>
<td>2</td>
<td>Capstone experience. Development of a restoration plan for a site, involving site planning and design. Currently taught through Continuing Education as a summer short course. (Su)</td>
</tr>
<tr>
<td>AWER 5680</td>
<td>Paleoclimatology*</td>
<td>3</td>
<td>Covers climate through the past four billion years of geologic time. Explores driving forces behind climate changes. Examines data and methods used in paleoclimatic research. Includes discussion of literature and stresses local paleoclimatic records. Three lectures per week, along with field trips. Prerequisite: GEO/AWER 3600 or permission of instructor. Also taught as GEO 5680/6680 and BMET 5680/6680. (Sp)</td>
</tr>
<tr>
<td>AWER 5760</td>
<td>Remote Sensing: Modeling and Analysis</td>
<td>3</td>
<td>Advanced techniques in the analysis of the earth's surface using remotely-sensed imagery and data in a digital format. Projects employ and/or develop research models. (Sp)</td>
</tr>
<tr>
<td>AWER 5930</td>
<td>Geographic Information Analysis</td>
<td>4</td>
<td>Techniques of geographic information systems, data structures, data input and output, and data manipulation and analysis. Prerequisites: STAT 2000 or higher; AWER 4930 or ENV 3500, or instructor’s permission. (Sp)</td>
</tr>
<tr>
<td>AWER 6120</td>
<td>Aquatic Production Biology**</td>
<td>2</td>
<td>Review of current literature on bacterial, algal, invertebrate, and fish production in lakes, rivers, and the sea. Particular emphasis is placed on whole-ecosystem productivity studies. (Sp)</td>
</tr>
<tr>
<td>AWER 6150</td>
<td>Fluvial Geomorphology**</td>
<td>3</td>
<td>Focuses on physical processes in streams that control their shape, plan form, slope, bed material, and distribution of channel bars. Emphasizes field analysis of these topics, and application of geomorphology to aquatic ecology and environmental restoration. Prerequisite: GEO/AWER 3600. Also taught as GEO 6150/5150. (F)</td>
</tr>
<tr>
<td>AWER 6160</td>
<td>Hillslope and Landscape Geomorphology**</td>
<td>3</td>
<td>Includes basics of hillslope weathering, transport, and hydrologic processes. Surveys classic and recent literature on hillslope-scale and landscape-scale geomorphic research. Three lectures and several Saturday field trips. Prerequisite: GEO/AWER 3600. Also taught as GEO 6160. (Sp)</td>
</tr>
<tr>
<td>AWER 6170</td>
<td>Fluvial Geomorphology Lab</td>
<td>2</td>
<td>Field analysis focuses on physical processes in streams which control their shape, plan form, slope, bed material, and distribution of channel bars. Application of geomorphology to aquatic ecology and environmental restoration. Prerequisite: GEO/AWER 3600. Also taught as GEO 6170/5170. (F)</td>
</tr>
<tr>
<td>AWER 6200</td>
<td>Watershed Analysis**</td>
<td>2</td>
<td>Explores watershed analysis, which is a procedure used to characterize the human, aquatic, riparian, and upland features, conditions, processes, and interactions within a watershed. Watershed analysis includes ecosystem analysis at the watershed level, providing a systematic way to understand and organize system information for the purpose of understanding the consequences of management actions prior to implementation. (Sp)</td>
</tr>
<tr>
<td>AWER 6230</td>
<td>Fish Ecology**</td>
<td>2</td>
<td>Reviews current literature on physiological, behavioral, population, and the community ecology of fishes. Particular emphasis is placed on current literature relevant to management of sport and endangered freshwater species. (Sp)</td>
</tr>
<tr>
<td>AWER 6240</td>
<td>Graduate Internship/Co-op</td>
<td>1-9*</td>
<td>Graduate-level educational experience in internship/cooperative education position approved by department. (F,Sp,Su)</td>
</tr>
<tr>
<td>AWER 6250</td>
<td>Remote Sensing of Land Surfaces</td>
<td>4</td>
<td>Basic principles of radiation and remote sensing. Techniques for ground-based measurements of reflected and emitted radiation, as well as ancillary data collection to support airborne and satellite remote sensing studies in agriculture, geography, and hydrology. Prerequisites: MATH 1100 or 1210; and PHYS 2110 or 2210. Also taught as BIE 5250/6250 and BMET 5250/6250. (Sp)</td>
</tr>
<tr>
<td>AWER 6330</td>
<td>Large River Management</td>
<td>3</td>
<td>Focuses on the scientific basis of river management and the constituencies participating in modern management of large rivers, including water developers, irrigators, municipalities, power consumers, recreationists, environmentalists, and scientists. Primary examples drawn from Colorado, Columbia, Rio Grande, and Missouri river basins. (F)</td>
</tr>
<tr>
<td>AWER 6520</td>
<td>Applied Hydraulics**</td>
<td>3</td>
<td>Basic fluid mechanics applied to wildland watershed systems and directed at nonengineering students. Explores nature of fluid state, fluid motion, and steady uniform and varied flow in open channels, under both subcritical and supercritical conditions. Surveys concepts of boundary layers, turbulence, convection, dispersion, and wave formation in unsteady flows. Explores problem formulation and solving. Prerequisites: GEO 5490/4490; MATH 2280 (recommended). Also taught as CEE 6520. (Sp)</td>
</tr>
<tr>
<td>AWER 6530</td>
<td>Water Quality and Pollution</td>
<td>3</td>
<td>Reviews biological and social problems caused by point and nonpoint source water pollution; toxicology; abiotic and biotic water quality parameters; and use criteria of the Clean Water Act. Graduate-level class will require additional readings of the peer-reviewed literature and an additional class meeting to have in-depth discussions of those readings. Each graduate student will be responsible for making a presentation at the beginning of class, and leading the discussion. (Sp)</td>
</tr>
<tr>
<td>AWER 6550</td>
<td>Assessment of Abundance and Related Parameters for Biological Populations</td>
<td>3</td>
<td>Students learn to estimate population abundance and associated error bounds using mark-recapture, area-swept, declining catch, line-transect, and other techniques. Emphasizes sampling design considerations to match objectives of an assessment to appropriate/feasible level of accuracy and precision. (Sp)</td>
</tr>
<tr>
<td>AWER 6600</td>
<td>Surface Hydrologic Field Methods*</td>
<td>3</td>
<td>Hydrologic concepts and terminology taught through collection, analysis, and interpretation of hydrologic data. Emphasizes principles and practice of several hydrologic measurements and water sampling in natural and manmade environments. Prerequisite: SOIL 3000 or instructor’s permission. Also taught as SOIL 6600/6500. (Sp)</td>
</tr>
<tr>
<td>AWER 6650</td>
<td>Principles in Fishery Management</td>
<td>3</td>
<td>Emphasizes management of fish populations within context of community and ecosystem dynamics. Stresses use of simulation models to assess effects of growth, recruitment, and mortality on age-structured populations. (Sp)</td>
</tr>
<tr>
<td>AWER 6680</td>
<td>Paleoclimatology*</td>
<td>3</td>
<td>Covers climate through the past four billion years of geologic time. Explores driving forces behind climate changes. Examines data and methods used in paleoclimatic research. Includes discussion of literature and stresses local paleoclimatic features. Three lectures per week, along with field trips. Prerequisite: GEO/AWER 3600 or permission of instructor. Also taught as GEO 6680/5680 and BMET 6680/5680. (Sp)</td>

</thead>
<tbody>
<tr>
<td>AWER 6740</td>
<td>Fundamentals of Remote Sensing Science</td>
<td>3</td>
<td>Develops the scientific principles behind remote sensing. Examines the basic physics of electromagnetic radiation and the interactions of radiation with the surface and the atmosphere. Prerequisites: MATH 1060, 1210; PHYS 2210. (F)</td>
</tr>
<tr>
<td>AWER 6760</td>
<td>Remote Sensing: Modeling and Analysis</td>
<td>3</td>
<td>Advanced techniques in the analysis of the earth's surface using remotely-sensed imagery and data in a digital format. Projects employ and/or develop research models. (Sp)</td>
</tr>
<tr>
<td>AWER 6800</td>
<td>Aquatic, Watershed, and Earth Resources</td>
<td>1²</td>
<td>Explores students to new developments in research and management in the fields of aquatic, watershed, and earth resources. Features participation by students, faculty, and guest lecturers. Students should register for only one semester per year, but attend all year. (F,Sp)</td>
</tr>
<tr>
<td>AWER 6940</td>
<td>Snow Hydrology</td>
<td>3</td>
<td>Focuses on snow science, including atmospheric formation, precipitation, distribution on the landscape, metamorphosis prior to melt, and snow pack melt dynamics. Also covers related issues, such as snow melt modeling, remote sensing, water supply, and biogeochemical cycling. Prerequisites: AWER 3700 or 4600 or SOIL 4600 or CEE 3430, or permission of instructor. Also taught as CEE 4930 or NR 3600 or instructor's permission. Also taught as AWER 4930 or NR 3600 or instructor’s permission. (Sp)</td>
</tr>
<tr>
<td>AWER 6960</td>
<td>Graduate Special Topics</td>
<td>1-6</td>
<td>Offers credit for special assignments, reading, and seminars beyond regularly scheduled courses. (F,Sp,Su)</td>
</tr>
<tr>
<td>AWER 6970</td>
<td>Directed Study</td>
<td>1-6</td>
<td>Offers credit for special assignments, reading, and seminars beyond regularly scheduled courses. (F,Sp,Su)</td>
</tr>
<tr>
<td>AWER 6980</td>
<td>Geographic Information Systems</td>
<td>4</td>
<td>Examines structure and operation of Geographic Information Systems (GIS). Explores design, theory, and implementation of GIS software, digitizing, fundamentals of vector and raster GIS processing, georeferencing, map accuracy, and site location. To receive graduate-level credit, students must complete a more rigorous final project directed toward their thesis or dissertation. (F)</td>
</tr>
<tr>
<td>AWER 6990</td>
<td>Geographic Information Analysis</td>
<td>4</td>
<td>Techniques of geographic information systems, data structures, data input and output, and data manipulation and analysis. Prerequisites: STAT 2000; AWER 4930 or NR 3600 or instructor’s permission. (Sp)</td>
</tr>
<tr>
<td>AWER 7120</td>
<td>Aquatic Production Biology</td>
<td>2</td>

<tbody>
<tr>
<td>BA 3460</td>
<td>Fundamentals of Personal Investing</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Examination of investment vehicles available to personal investor. Principal emphasis on corporate and government securities. Credit cannot be used toward requirements for finance major.</td>
<td></td>
</tr>
<tr>
<td>BA 3500</td>
<td>Fundamentals of Marketing</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Overview of marketing function, emphasizing concepts and terminology. Includes basic marketing activities of product management, pricing, distribution, promotion, marketing research, and consumer behavior. Prerequisites: Admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 3700</td>
<td>Operations Management</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers the concepts and tools related to managing a business operation. Topics include demand forecasting, operations strategy and resource planning, process layout, lean systems, inventory and quality, and project management. Prerequisites: STAT 2300 or 3000; MATH 1100; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>BA 4050</td>
<td>International Retailing</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>(dual listing 6050)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Issues related to retailing in international markets, such as motivations, cultural influence on consumer behavior, and entry strategies. Prerequisites: Grade of B- (2.67) or better in BA 3500; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (Prerequisites do not apply to students taking BA 6050.)</td>
<td></td>

<td></td>
<td>Basic issues related to retail management, such as merchandising, location, promotion, store management, and retail image. Prerequisites: Grade of B- (2.67) or better in BA 3500; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (Prerequisites do not apply to students taking BA 6070.)</td>
<td></td>
</tr>
<tr>
<td>BA 4240</td>
<td>Merchandise Planning and Control</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Issues related to pricing, budgeting, open-to-buy, and planning inventory. Prerequisites: Grade of B- (2.67) or better in BA 3500; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 4300</td>
<td>International Finance</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Overview of international financial management, including international financial markets, exchange rate behavior, and financing international trade. Prerequisites: Grade of B- (2.67) or better in BA 3400; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 4410</td>
<td>Financial Institutions</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Role of domestic and international financial institutions in supplying services to consumers, businessmen, and government. Prerequisites: Grade of B- (2.67) or better in BA 3400; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 4420</td>
<td>Insurance</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Studied from the standpoint of insurance services consumers, course explores types of life, property, and casualty insurance contracts; nature and uses of life and property insurance; and the organization, management, and government supervision of insurance companies. Prerequisites: Grade of B- (2.67) or better in BA 3400; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 4430</td>
<td>Real Estate Finance</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers theory, principles, and techniques of real estate investment, emphasizing present value and cash-flow approaches to real estate investment decisions. Prerequisites: Grade of B- (2.67) or better in BA 3400; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 4450</td>
<td>Financial Policy</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Analyzes working capital management, capital budgeting, capital management, and other short-term and long-term financial decisions. Prerequisites: Grade of B- (2.67) or better in BA 3400; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 4460</td>
<td>Investments</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Provides an understanding of security analysis and portfolio management. Market operations, risk and return; stock, bond, and option analysis; and portfolio theory and creation. Prerequisites: Grade of B- (2.67) or better in BA 3400; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 4510</td>
<td>Buyer Behavior</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Marketing analysis of the decision processes of individuals, households, businesses, and not-for-profit institutions. Builds on concepts from psychology, sociology, anthropology, and economics. Prerequisites: Grade of B- (2.67) or better in BA 3500; PSY 1010 or SOC 1010 or USU 1340; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)</td>
<td></td>
</tr>
<tr>

<tr>
<td></td>
<td>Management of marketing research function. Basic vs. decisional research, survey research, cost vs. value of information, research design, experimentation, and analysis techniques. Prerequisites: Grade of B- (2.67) or better BA 3500; choose one of the following statistics courses: STAT 1040, 2300, 3000, or PSY 2800; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 4540</td>
<td>Marketing Institutions</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Examination of strategic decision-making by institutions involved in the marketing channel. Primary emphasis on retail institutions. Explores types of marketing intermediaries, vertical integration, channel member power and conflict, and international channel management issues. Prerequisites: Grade of B- (2.67) or better in BA 3500; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 4550</td>
<td>Promotion Management</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Examines role of promotion concepts in development of a communication strategy. Based on an introduction to the nature of communications, course covers advertising, personal selling, and sales promotion, emphasizing the competitive and strategic value of communications in both the marketplace and society. Prerequisites: Grade of B- (2.67) or better in BA 3500; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 4590</td>
<td>Global Marketing Strategy</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Analytical approach to strategic marketing problems facing the firm competing in global markets. Emphasizes key analytical and decision-making frameworks concerning the global marketing environment and the marketing mix and their impact on the firm's performance. Prerequisites: Grade of B- (2.67) or better in BA 3500; CA 4540, 4550; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 4720</td>
<td>Production Planning and Control</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Examines concepts and tools used in the planning and control of production activity and material flow. Topics include production scheduling, capacity analysis, and push versus pull production. Prerequisites: Grade of B- (2.67) or better in BA 3700; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F)</td>
<td></td>
</tr>
<tr>
<td>BA 4750</td>
<td>Production Simulation</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Computer simulation of production environment, including scheduling, routing, labor capacity, inventory, and delivery. Emphasizes just-in-time concepts. Prerequisites: Grade of B- (2.67) or better in BA 3700; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 4790</td>
<td>Supply Chain Management</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Analysis of the concept of supply chains and how managing them supports operations strategy and organizational competitiveness. Topics include supply chain management, supply chain alliances, distribution planning, and logistics systems design. Prerequisites: Grade of B- (2.67) or better in BA 3700; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (Sp)</td>
<td></td>
</tr>
<tr>
<td>BA 4800</td>

</tbody>
</table>
|             | Application of quality management concepts to business processes. Students learn a variety of methods for documenting, analyzing, and improving a process. Topics include the DMAIC Cycle, process mapping, capacity analysis, root cause
analysis, mistake proofing, and creative problem solving. Prerequisites: Grade of B- (2.67) or better in BA 3700; STAT 2300 or 3000; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F)

BA 6050 International Retailing 3
(dual listing 4050)
Issues related to retailing in international markets, such as motivations, cultural influence on consumer behavior, and entry strategies.

BA 6070 Retail Management 3
(dual listing 4070)
Basic issues related to retail management, such as merchandising, location, promotion, store management, and retail image.

BA 6180 Intrasession MBA Workshop 0.5-1*
Intensive workshops designed to enhance the MBA experience.

BA 6350 Managerial Economics 3
Application of concepts and theories, based on managerial economics, to business problems. Addresses cost theory, pricing, market structures, and forecasting. (Sp)

BA 6410 Corporate Finance Essentials 1.5
Introduction of corporate finance principles for students entering a master’s degree program in the College of Business. Prerequisite: Acceptance into a College of Business master’s degree program. (Su)

BA 6420 Financial Problems 3
Corporate finance case course, dealing with problems in working capital management, capital budgeting, cost of capital problems, and corporate restructuring. (F)

BA 6440 Financial Decision Making 3
Presentation of financial modelling techniques impacting firm decisions. (Sp)

BA 6510 Marketing Techniques 1.5
Introduction of marketing principles for students entering a master’s degree program in the College of Business. Prerequisite: Acceptance into a College of Business master’s degree program. (Su)

BA 6520 Marketing Strategy 3
Advanced case approach to current marketing management problems. Emphasizes concepts, research, techniques, decision making, and marketing strategy development. (Sp)

BA 6540 Special Topics in Marketing 3
Selected topics in marketing pursued in depth. Topics and instructors vary semester to semester. Current topics include: Marketing Communications and Supplemental Aspects of Electronic Commerce, The Changing Environment of Marketing Institutions, and Buyer Behavior. Prerequisite: BA 6520. (Sp)

BA 6560 Market Analysis and Decision Making 3
Develops skills necessary to plan and implement an effective marketing strategy. Focuses on role of marketing information in managerial decision making. Uses marketing cases and/or simulation games throughout the course. (F,Sp)

BA 6710 Essentials of Operations Management 1.5
Introduction of operations management principles for students entering a master’s degree program in the College of Business. Prerequisite: Acceptance into a College of Business master’s degree program. (Su)

BA 6720 Operations Management 3
Study of basic process functions in managing a production or service organization, such as inventory control, production control, procurement, quality control, production planning, forecasting, etc. (F)

BA 6740 Decision Making in Operations Management 3
Selected topics in operations management pursued in depth. Topics and instructors vary from semester to semester. Prerequisite: BA 6720. (Sp)

BA 6860 Business Research Methods 3
Explores the fundamentals of qualitative and quantitative data collection and analysis. Students design and implement small, integrated research activities, then use the results to make business strategy recommendations. (Sp)

BA 6900 Independent Research and Reading 1-3*
(F,Sp,Su)

BA 6960 Professional Paper 3
A paper of professional quality prepared by each student. Designed to demonstrate the ability to complete a major business-related project and to effectively present the results. (F,Sp,Su)

BA 6970 Thesis 1-6*
(F,Sp,Su)

BA 6990 Continuing Graduate Advisement 1-3*
(F,Sp,Su)

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

**This course is also offered by online correspondence and/or CD through Continuing Education Time Enhanced Learning.

**Course Descriptions

Biological and Irrigation Engineering (BIE)

See Department of Biological and Irrigation Engineering, pages 171-176.

BIE 1880 Engineering Quantification of Biological Processes 3
Introduction to engineering practice of biological modeling and quantification of biological processes. Introduction to transport of heat and mass; bioenergetics, thermodynamics, and enzyme kinetics; metabolism; mechanical work processes; and modeling of biological systems. Recommended that students take BIE 1890 after taking calculus and biology. (Sp)

BIE 2330 Engineering Properties of Biological Materials 3
Relationships between composition, structure, and properties of biological materials. Definition, measurement, and use of mechanical, thermal, electromagnetic, chemical, and biological properties in computation and design. Prerequisites: BIOL 1610, BIE 1890, CHEM 1210, 1215. (F)

BIE 3000 Instrumentation for Biological Systems 2
Fundamentals of measurement systems used in bioprocess, biomedical, agricultural, biological, and environmental applications. Selection and use of sensors, data acquisition systems, and elementary controls. Prerequisite: ECE 2210 or ETE 2300. (Sp)

BIE 3200 Introduction to Unit Operations in Biological Engineering 3
Introduction to the fundamental unit operations required to process biological materials in bioprocessing, biomedical, and food engineering applications. Integration of biology and chemistry into biological engineering using basic concepts in heat, mass, and energy conservation and transport. Prerequisites: BIE 2330, CHEM 2300. (F)

BIE 3670 Transport Phenomena in Bio-Environmental Systems 3
Core course in both biological and environmental engineering. Students develop a detailed understanding of the principles, concepts, modes, and methods of calculating heat and mass transfer. Emphasis given to contaminant and nutrient flux, along with their state transformations, in order for the biological or environmental engineer to evaluate options for production, clean-up, and control of bio-environmental systems. Prerequisites: CEE 3500 and MAE 2300. Also taught as CEE 3670. (Sp)

BIE 3870 Biological Engineering Design I 1
Students select and plan a senior design project. A project proposal, including a technical description of the project and management plans, is required. (F,Sp,Su)

BIE 4250 Cooperative Practice 3
Planned work experience in industry or government. Detailed program must be approved prior to registration. Written report required. (F,Sp,Su)

BIE 4880 CI Biological Engineering Design II 3
Execution and completion of a comprehensive senior design project. Design reviews and written reports are required. Prerequisite: BIE 3870. (F,Sp,Su)

**BIE 5010: Principles of Irrigation Engineering**

Soil-water-plant relationships; evapotranspiration and water requirements; effective water use; irrigation scheduling; infiltration; irrigation systems planning. Prerequisites: CEE 3430, 3500, ENGR 2200. (F, Sp online, Su)

**BIE 5110: Sprinkle and Trickle Irrigation**

Sprinkle and trickle irrigation system demand, system selection and configuration, emitter and sprinkler characteristics and sizing, uniformity and efficiency, pipe network layout and sizing, and system operation, management, and maintenance. Prerequisite: BIE 5010/6010. (F)

**BIE 5150: Surface Irrigation Design**

Design and evaluation of surface irrigation systems. Field measurements for evaluating and improving uniformity and efficiency. Simulation of surface systems. Land leveling computation and equipment. Prerequisite: BIE 5010/6010. (F, Sp online, Su)

**BIE 5250: Remote Sensing of Land Surfaces**

Basic principles of radiation and remote sensing. Techniques for ground-based measurements of reflected and emitted radiation, as well as ancillary data collection to support airborne and satellite remote sensing studies in agriculture, geography, and hydrology. Prerequisites: MATH 1100 or 1210; and PHYS 2110 or 2210. Also taught as AWER 5250/6250 and BMET 5250/6250. (Sp)

**BIE 5300: Irrigation Conveyance and Control Systems**

Design, evaluation, and operation of irrigation distribution systems. Measurement and monitoring of flows and water levels, and canal and pipeline automation. Simulation of system hydraulics. (F)

**BIE 5350: Drainage and Water Quality Engineering**

Introduction to principles and practices of drainage. Engineering investigation and design of drains. Formation and function of wetlands caused by irrigation and drainage systems. Prerequisite: BIE 5010/6010. (Sp)

**BIE 5450: Field Evaluation of Agricultural Irrigation Systems**

Field measurements in pressurized and surface irrigation systems for performance evaluation and determination of water application uniformity and efficiency. (Su)

**BIE 5520: Irrigation Project Operation and Maintenance**

Organizing, administering, and financing irrigation and drainage projects. Operation and maintenance of irrigation distribution systems. Simulation of command area water demands. Prerequisite: BIE 5010/6010. (Sp)

**BIE 5550: Groundwater Systems Engineering I**

Groundwater exploration; well drilling and testing; pumping plant design, operation, and testing; aquifer evaluations; siting of multiple well systems. Development of pumping strategies for water supply and environmental control systems. Introduction to conjunctive use. Prerequisite: BIE 5010/6010. (F)

**BIE 5610: Food and Bioprocess Engineering**

Standardization and compounding of biomaterials and food products; preservation processing using heat, refrigeration, concentration, and dehydration. Basic unit operations in the bioprocessing industry. Prerequisite: BIE 3200. Also taught as NFS 5610/6610. (F)

**BIE 5680: Soil-based Waste Management**

Engineering management of wastes present in the vadose zone, including extraction, containment, and biological, chemical, and physical destruction technologies for sustainable agriculture and environmental quality. Aspects include engineering characterization, problem definition, treatment, and monitoring. Analysis and design emphasized through problems, examinations, and report writing. Prerequisites: CEE/PUBH 3610, CEE 3640, 3670, CEE/BIE 3670. Also taught as CEE 5680/6680. (Sp)

**BIE 5810: Biochemical Engineering**

Fundamentals of bioreactor design and bioengineering to produce biological commodities. Emphasizes mathematical models of microbial and enzymatic processes in environmental and industrial biotechnology. Prerequisites: BIE 3200 and BIE/CIE 3670; or BIE/CIE 3670, CEE/PUBH 3610, and CEE 3640. Also taught as CEE 5810/6810. (F)

**BIE 5830: Management and Utilization of Biological Solids and Wastewater**

Focuses on production, management, and disposal of biosolids and wastewater generated in food processing and wastewater treatment. Emphasizes beneficial use of biosolids and wastewater for agricultural production, forest enhancement, and land reclamation. Prerequisites: BIE 3200, BIE/CIE 3670, CEE/PUBH 3610, CEE 3640. Also taught as CEE 5830/6830. (F)

**BIE 5850: Biomaterials Engineering**

Explores identification and modification of properties of natural and artificial biomaterials. Design of applications for by-product recovery and recycling, environmental, food processing, and biomedical industries. Commercialization of biomaterial feed stocks, biotechnology output, and bioprocessing by-products into traditional and alternative products. Prerequisites: BIE 2330, BIE/NFS 5610/6610. (F)

**BIE 5890: Tissue Engineering**

Introduction to fundamentals of tissue engineering. Investigation of engineering design strategies for artificial organs, as well as treatments for disease disorders of nerves, blood vessels, bones, cartilage, skin, and liver. Exploration of the use of stem cell gene therapy in tissue engineering. Prerequisite: BIE 2330 or permission of instructor. (Sp)

**BIE 5910: Introduction to Biosensors**

Principles of biologically based sensing elements and interfacing techniques. Design and analysis methods of biosensing and transducing components in bio-interface. Applications of biosensors and bioelectronics in biomedical, bioprocessing, and biomechanical engineering. Prerequisite: BIE 2330 or permission of instructor. (F)

**BIE 5930: Special Studies**

Independent or group study of biological and irrigation engineering subjects not covered in regular course offerings. (F;Sp;Su)

**BIE 6010: Principles of Irrigation Engineering**

Soil-water-plant relationships; evapotranspiration and water requirements; effective water use; irrigation scheduling; infiltration; irrigation systems planning. Prerequisites: CEE 3430, 3500, ENGR 2200. (F, Sp online, Su)

**BIE 6110: Sprinkle and Trickle Irrigation**

Sprinkle and trickle irrigation system demand, system selection and configuration, emitter and sprinkler characteristics and sizing, uniformity and efficiency, pipe network layout and sizing, and system operation, management, and maintenance. Prerequisite: BIE 6010/5010. (F)

**BIE 6150: Surface Irrigation Design**

Design and evaluation of surface irrigation systems. Field measurements for evaluating and improving uniformity and efficiency. Simulation of surface systems. Land leveling computation and equipment. Prerequisite: BIE 6010/5010. (F, Sp online, Su)

**Course Descriptions**

BIE 6250 Remote Sensing of Land Surfaces (dual listing 5250)
Basic principles of radiation and remote sensing. Techniques for ground-based measurements of reflectance and emitted radiation, as well as ancillary data collection to support airborne and satellite remote sensing studies in agriculture, geography, and hydrology. Prerequisites: MATH 1100 or 1210; and PHYS 2110 or 2210. Also taught as AGER 6250/5250 and BMET 6250/5250. (Sp)

BIE 6260 Hydrology of Irrigation Agriculture
Impacts of irrigation activities on local and regional hydrology, wetlands, and natural systems. Determination of components of field and project water balances, including evapotranspiration. Effects of water conservation practices and changes in efficiency on timing and disposition of water resources and return flows. Irrigation scheduling and use of computer models. Prerequisite: BIE 6010/5010.

BIE 6300 Irrigation Conveyance and Control Systems (dual listing 5300)
Design, evaluation, and operation of irrigation distribution systems. Measurement and monitoring of flows and water levels, and canal and pipeline automation. Simulation of system hydraulics. (F)

BIE 6350 Drainage and Water Quality Engineering (dual listing 5350)
Introduction to principles and practices of drainage. Engineering investigation and design of drains. Formation and function of wetlands caused by irrigation and drainage systems. Prerequisite: BIE 6010/5010. (Sp)

BIE 6450 Field Evaluation of Agricultural Irrigation Systems (dual listing 5450)
Field measurements in pressurized and surface irrigation systems for performance evaluation and determination of water application uniformity and efficiency. (Su)

BIE 6520 Irrigation Project Operation and Maintenance (dual listing 5520)
Organizing, administering, and financing irrigation and drainage projects. Operation and maintenance of irrigation distribution systems. Simulation of command area water demands. Prerequisite: BIE 6010/5010. (Sp)

BIE 6550 Groundwater Systems Engineering I (dual listing 5550)
Groundwater exploration: well drilling and testing; pumping plant design, operation, and testing; aquifer evaluations; siting of multiple well systems. Development of pumping strategies for water supply and environmental control systems. Introduction to conjunctive use. Prerequisite: BIE 6010/5010. (F)

BIE 6610 Food and Bioprocess Engineering (dual listing 5610)
Standardization and compounding of biomaterials and food products; preservation processing using heat, refrigeration, concentration, and dehydration. Basic unit operations in the bioprocessing industry. Prerequisite: BIE 3200. Also taught as NFS 6610/5610. (F)

BIE 6680 Soil-based Waste Management (dual listing 5680)
Engineering management of wastes present in the vadose zone, including extraction, containment, and biological, chemical, and physical destruction technologies. Also taught as CEE 6680/5680. (Sp)

BIE 6810 Biochemical Engineering (dual listing 5810)
Fundamentals of bioreactor design and bioengineering to produce biological commodities. Emphasizes mathematical models of microbial and enzymatic processes in environmental and industrial biotechnology. Prerequisites: BIE 3200 and BIE/CEE 3670; or BIE/CEE 3670, CEE/PUBH 3610, and CEE 3640. Also taught as CEE 6810/5810. (F)

BIE 6830 Management and Utilization of Biological Solids and Wastewater (dual listing 5830)
Focuses on production, management, and disposal of biosolids and wastewater generated in food processing and wastewater treatment. Prerequisites: BIE 3200, BIE/CEE 3670, CEE/PUBH 3610, and CEE 3640. Also taught as CEE 6830/5830. (F)

BIE 6850 Biomaterials Engineering (dual listing 5850)
Explores identification and modification of properties of natural and artificial biomaterials. Design of applications for by-product recovery and recycling, environmental, food processing, and biomedical industries. Commercialization of biomaterial feed stocks, biotechnology output, and bioprocessing by-products into traditional and alternative products. Prerequisites: BIE 2330, BIE/NFS 6610/5610. (F)

BIE 6860 Research Orientation (dual listing 7860)
Promotes familiarization with departmental and graduate school rules, procedures, and research. (F)

BIE 6870 Research Planning (dual listing 7870)
Tools and techniques for writing research proposals and giving presentations. (Sp)

BIE 6890 Tissue Engineering (dual listing 5890)
Introduction to fundamentals of tissue engineering. Investigation of engineering design strategies for artificial organs, as well as treatments for disease disorders of nerves, blood vessels, bones, cartilage, skin, and liver. Exploration of the use of stem cell gene therapy in tissue engineering. Prerequisite: BIE 2330 or permission of instructor. (Sp)

BIE 6910 Introduction to Biosensors (dual listing 5910)
Principles of biologically based sensing elements and interfacing techniques. Design and analysis methods of biosensing and transducing components in bio-interface. Applications of biosensors and bioelectronics in biomedical, bioprocessing, and biomechanical engineering. Prerequisite: BIE 2330 or permission of instructor. (F)

BIE 6930 Special Problems
Independent study of problems in biological and agricultural engineering. (F,Sp,Su)

BIE 6970 Thesis Research
Credit for MS research and report requirements. (F,Sp,Su)

BIE 6990 Continuing Graduate Advisement for MS and PhD Students
Continuing graduate research for MS and PhD students. (F,Sp,Su)

BIE 7350 Groundwater Systems Engineering II
System analysis techniques applied to aquifer and stream/aquifer management. Development of economically, quantitatively, and environmentally optimal strategies for alternative water policies. Modeling techniques for managing aquifer systems under volumetric, economic, and environmental management goals. Prerequisites: CEE 5470/6470 or 6500. (Sp)

BIE 7600 Advanced Research Topics
Study of advanced biological and engineering topics. Analysis of project scale water management issues, software development, crop modeling, advanced drainage systems, remote sensing, groundwater systems, and other topics taken from the research interests of the faculty. Prerequisite: PhD enrollment. (Sp)

BIE 7860 Research Orientation (dual listing 6860)
Promotes familiarization with departmental and graduate school rules, procedures, and research. (F)
## Course Descriptions

### Biology (BIOL)

See Department of Biology, pages 177-190.

#### BIOL 1010 BLS Biology and the Citizen 3<sup>®</sup>
- Principles and methods of biology and how they impact the daily life and environment of the individual. (F,Sp,Su)

#### BIOL 1020 Biological Discovery: A Lab Course 1
- Field and laboratory investigative exercises. Emphasizes observation, hypothesis formulation and testing, data analysis, and writing. (F,Sp)

#### BIOL 1100 Introduction to Microbiology 3<sup>®</sup>
- Biology and the role of microorganisms in the world around us, with emphasis on their contributions to human disease. Offered only through Independent Study. No laboratory component. Not open to students with credit in BIOL 1110. (F,Sp,Su)

#### BIOL 1110 Elementary Microbiology 4<sup>®</sup>
- Biology and role of microorganisms in the world around us, with emphasis on their contributions to human disease. Not intended for biology majors. (F)

#### BIOL 1300 BLS Of Maggots, Mites, and Men 3
- Examines the natural history, evolution, and behavior of insects and spiders, as well as their impact on human individuals and societies. (F)

#### BIOL 1610 BLS Biology I (formerly BIOL 1210 BLS) 4
- Principles of cell biology, energetics, and genetics; plant structure, function, and development. Three lectures and one lab. To receive University Studies Breadth Life Sciences (BLS) credit, students must complete both BIOL 1610 and either BIOL 1620 or 3300. (F)

#### BIOL 1620 BLS Biology II (formerly BIOL 1220 BLS) 4
- Animal structure, function, and development; principles of evolution, ecology, and behavior. Three lectures and one lab. Prerequisite: BIOL 1610. (Sp)

#### BIOL 1750 Topics in Biology (Topic) 1-3<sup>®</sup>
- Provides classroom and practical experience in developing and maintaining an herbarium and extending its reach to the community. Students taking this course for one credit will complete classroom and laboratory work, while those earning two credits will in addition complete an herbarium research or service project. (F,Sp)

#### BIOL 1800 Herbarium Studies 1-2
- Provides classroom and practical experience in developing and maintaining an herbarium and extending its reach to the community. Students taking this course for one credit will complete classroom and laboratory work, while those earning two credits will in addition complete an herbarium research or service project. (F,Sp)

#### BIOL 2040 Introduction to Biotechnology 1
- Introduces freshmen to the emerging field of biotechnology and the impact this technology has on society. Also taught as AOVS 2040, NFS 2040, and PSB 2040. (Sp)

#### BIOL 2220 General Ecology 3
- Study of the interrelationships among organisms and their environments, addressing where and how organisms live. Adaptation, population growth, species interactions, biodiversity, and ecosystem function are explored for a wide variety of organisms and ecosystems. Prerequisites: BIOL 1610 and 1620. Also taught as NR 2220. (F,Sp)

#### BIOL 2300 Mushroom Identification 1
- Lecture course covering taxonomy, ecology, and importance of macro and micro fungi. Also taught as FRWS 2300. (F)

#### BIOL 2310 Mushroom Identification Lab 1-2<sup>®</sup>
- Lab course acquainting students with basic fungal taxonomic groups. Students collect, preserve, and identify fungi they collect. Edible fungi prepared and eaten. Also taught as FRWS 2310. (F)

#### BIOL 2410 Plants and Fungi in the Field 2
- Introduction to identification of green plants and macrofungi. Quantitative methods for field studies. Prerequisite: BIOL 2200 and 2420, each with a minimum grade of C. Course offered only at select branch campuses, not at the Logan campus. (F,Sp)

#### BIOL 2420 Human Physiology 4<sup>®</sup>
- Functioning of the human body, with emphasis upon major organ systems. Medical and athletic examples used to illustrate important concepts. (F,Sp,Su)

#### BIOL 2520 Pathophysiology 3
- Promotes an understanding of disease and dysfunctional variations of normal health across the body. Prerequisites: BIOL 2200 and 2420, each with a minimum grade of C. Course offered only at select branch campuses, not at the Logan campus. (F,Sp)

#### BIOL 2700 Predental Orientation and Observation 3
- Introduces predental students to the dental curriculum and characteristics of the dental profession. Each student assigned to a practicing dentist for part of the course. Prerequisite: Permission of advisor. (Sp)

#### BIOL 3000 DSC Discovering Utah's Biodiversity 3
- Lecture and field course designed to identify and study local organisms and their role in ecosystems. Topics include ecology, local geology, adaptations to the local environment, and human impacts. Major components include writing, as well as the collection and presentation of data. Prerequisite: Completion of a University Studies Breadth Life Sciences (BLS) course. (F,Sp)

#### BIOL 3010 DSC/CI Evolution 3
- Origins and evidence for the theory of biological evolution, and its significance for society and science. Prerequisite: University Studies Breadth Life Sciences (BLS) course. (Sp)

#### BIOL 3030 DSC Genetics and Society 3
- Course for nonscience majors. Addresses ethical, political, and social implications of advances in genetics and basic genetic principles, as well as contemporary issues in human genetics. Prerequisite: University Studies Breadth Life Sciences (BLS) course. Not open to biology majors or to those with credit in BIOL 3060. (Sp)

#### BIOL 3040 DSC Plants and Civilization 3
- Examines the importance of plants as food, shelter, clothing, medicine, and drugs. Social and historical role of plants in aesthetics, religion, energy, biotechnology, human exploration, and migration. Prerequisite: University Studies Breadth Life Sciences (BLS) course. (F)

#### BIOL 3060 QI Principles of Genetics (formerly BIOL 3200 QI) 4
- Introduction to transmission, population, and molecular aspects of modern genetics. Prerequisites: BIOL 1610; MATH 1050; CHEM 1110 or 1220. (F,Sp,Su)

#### BIOL 3065 Genetics Laboratory** 2<sup>®</sup>
- Experimental approach to genetics using bacteria, fungi, plants, insects, and humans. Students will be introduced to several computer and laboratory techniques, and will design many of the experiments. Prerequisite: BIOL 3060 (may be taken concurrently). (F)

#### BIOL 3100 CI Bioethics 3
- Discussion of current controversial ethical issues in medicine, animal rights, and environmental conservation. (Sp)
Course Descriptions

BIOL 3220 QI Field Ecology 2
Field trips and exercises to study ecological patterns and processes in terrestrial and aquatic habitats. Emphasis on hypothesis testing and collection and analysis of data from the field. Prerequisite: BIOL 2220 (may be taken concurrently); MATH 1100 or 1210. Recommended: Course in statistics. (F)

BIOL 3300 BLS General Microbiology 4
Biology, ecology, and diversity of microorganisms. Emphasis placed on bacteria, viruses, fungi, and protists, and their role in the environment. Two lectures, two labs. Prerequisites: BIOL 1610 (with a grade of C- or better); CHEM 1120 or 2300 or 2310 (may be taken concurrently). To receive University Studies Breadth Life Sciences (BLS) credit, students must complete both BIOL 1610 and 3300. (F,Sp)

BIOL 3500 DSC Plagues, Pests, and People 3
Examines the biology and diversity of medically important insects and their associated diseases. Emphasizes the basic principles and concepts in medical, veterinary, and forensic entomology, as well as the historical impact of insect-borne diseases. Prerequisite: University Studies Breadth Life Sciences (BLS) course. (Sp)

BIOL 3760 Independent Study 1-3®
Directed individual or group study. Prerequisite: BIOL 1620. Not counted as Biology degree elective or toward the Biology, Biomath, or Public Health minors. (F,Sp,Su)

BIOL 4000 Human Dissection 1
Exposure and dissection of the human body, with an emphasis on bones, joints, muscles, and internal organs. One evening lab per week. Prerequisite: BIOL 2320. (F)

BIOL 4060 CI Exploring Animal Behavior 3
In-depth investigation into current topics. Students will generate hypotheses; design and complete experiments in field and lab; and prepare a written lab report, book review, and poster for public presentation. Two lectures, one lab. Prerequisite: BIOL 1620, 2220. (Sp)

BIOL 4230 QI Applied Mathematics in Biology** 3
Formulation, analysis, and experimental tests of mathematical models in biology. Combines mathematics, computing, experimental design, and statistical analysis while applying the scientific method to biological systems. Lectures, recitations, and a laboratory. Prerequisites: C- or better in BIOL 1620 and MATH 2250; or permission of instructor. Programming recommended. Also taught as MATH 4230. (Sp)

BIOL 4250 Internship/Co-op 1-2
Internship/cooperative work experience in biology or prehealth biology to allow student to gain a professional level of experience. Advisor’s signature required. (F,Sp,Su)

BIOL 4400 QI Plant Physiology 4
Introduction to plant metabolism, water relations, and growth. Prerequisites: BIOL 1620; MATH 1050 or higher. (F)

BIOL 4410 Plant Structure 3
Morphology, anatomy, and development of seed plants, with an emphasis on angiosperms. Two lectures and one lab. Prerequisites: BIOL 1610, 1620. (Sp)

BIOL 4420 Plant Taxonomy 3
Identification of vascular plant species and recognition of families common in northern Utah. Introduction to principles and practices of plant taxonomy. Prerequisite: BIOL 1610. (Sp)

BIOL 4500 Applied Entomology 3
Fundamentals of insect biology, emphasizing species of economic importance. Principles and tactics of pest management. Laboratory includes survey of beneficial and harmful insects affecting humans and agriculture. Prerequisites: BIOL 1610 and 1620. (Sp)

BIOL 4710 Teaching Internship 1®
Advanced undergraduates function as teaching interns under supervision of faculty member. Only 1 credit may be counted toward Biology degree electives. Prerequisite: Consent of instructor. (F,Sp,Su)

BIOL 4750 Topics in Biology (Topic) 1-3®
Selected topics in biology not covered in other courses. Prerequisites: BIOL 3060 (dual listing 6190) Molecular Genetics 3
Molecular aspects of genetics, including DNA replication, structure, rearrangement, transposition, recombination, repair, genetic engineering, and gene expression. For 8000-level (graduate) credit, additional reading, recitation, and/or writing is required. Prerequisites: BIOL 3060; and CHEM 3700 or 5700. (Sp)

BIOL 5010 Biogeography 3
Distributions of plants and animals, including invertebrates, from terrestrial, freshwater, and marine systems, discussed from historical and ecological perspectives. Explores ecological patterns of body size, color, species density, home range, etc., as well as their causes. Prerequisite: BIOL 1620. (Sp)

BIOL 5020 QI Modeling Biological Systems* 3
(dual listing 6020)
Basic techniques of mathematical and computer simulation applied to a wide variety of biological systems: ecology, physiology, agroecosystems, and cell biology. Model formulation, validation, sensitivity and stability analysis, stochastic systems. Prerequisites: MATH 1220, STAT 3000, programming experience. (F)

BIOL 5030 Individual-Based Models in Ecology and Evolution* 3
Examines the nature, application, and student development of computer simulation models that follow the demographic fates and spatial movement of individual organisms in the context of ecological and evolutionary questions. Recommended prior to enrollment: Programming experience (preferably in C), upper-division courses in statistics and ecology or evolution, and BIOL 5020/6020. (Sp)

BIOL 5100 Neurobiology** 3
(dual listing 6100)
Physiology, organization, and development of nervous systems. Examples taken from vertebrate and invertebrate systems. Special emphasis placed on cellular and molecular substrates of electrical excitability. Prerequisites: BIOL 5600 or 5620; CHEM 1220; and PHYX 2120 or 2220. (F)

BIOL 5150 Immunology 3
Immune response in health and disease. Experimental approach to investigating immune function and abnormalities. Prerequisites: CHEM 1220; BIOL 3060; and BIOL 3300 or 5210. (Sp)

BIOL 5160 Methods in Biotechnology: Cell Culture 3
Techniques and fundamental knowledge for culturing mammalian and insect cells. Students will learn maintenance, growing, genetic engineering of cells, cytotoxicity, hybridoma creation, cloning, etc. Extensive laboratory experience is provided. Also taught as ADVS 5160, NFS 5160, and PSB 5160. (F)

BIOL 5190 Molecular Genetics 3
(dual listing 6190)
Molecular aspects of genetics, including DNA replication, structure, rearrangement, transposition, recombination, repair, genetic engineering, and gene expression. For 8000-level (graduate) credit, additional reading, recitation, and/or writing is required. Prerequisites: BIOL 3060; and CHEM 3700 or 5700. (Sp)

BIOL 5210 Cell Biology 3
Examines the mechanisms of cell structure and function at the molecular level. Prerequisites: BIOL 1620, 3060; CHEM 2300 or 2320; CHEM 3700 or 5700 highly recommended. (F)

BIOL 5220 Endocrine Aspects of Nutrition 2
(dual listing 6220)
Provides physiological background into hormones involved in nutrient regulation, as well as mechanisms of hormone action at the cellular and molecular levels. Includes action of steroids in the nucleus and membrane-based signal transduction pathways. Course includes lectures and literature reviews/ presentations. Prerequisite: CHEM 3700 or permission of instructor. Also taught as ADVS 5220/6220 and NFS 5220/6220. (Sp)

BIOL 5230 Developmental Biology 3
Examines the mechanisms of biological development using classical embryological and modern molecular and cellular approaches. Prerequisites: BIOL 3060 and 5210; CHEM 3700 and 5700 strongly recommended. (Sp)

BIOL 5240 Methods in Biotechnology: Protein Purification Techniques 3
Reviews basic methods of protein purification, including scaled-up use of 100L fermenter, large-scale centrifugation, diafiltration, chromatography, and use of
Course Descriptions

**Biol 5250**  **CI Evolutionary Biology**  3
Current topics in organic evolution from molecular to macroevolutionary scales. Prerequisite: BIOL 3060 or FRWS 4880 or permission of instructor; BIOL/NR 2220 recommended. (F,Sp)

**Biol 5260**  **Methods in Biotechnology: Molecular Cloning**  3
Laboratory-oriented course designed to teach molecular biology techniques such as DNA cloning, genetic probes, polymerase chain reaction, and DNA sequencing. Prerequisite: CHEM 3700 or 5710; or BIOL 3060; or permission of instructor. Also taught as ADVS 5260, NFS 5260, and PSB 5260. (F)

**Biol 5300**  **QI Microbial Physiology**  4
Lectures, discussions, and laboratory investigations concerning the physiology, structure, and metabolism of prokaryotic and eukaryotic microbes. Prerequisites: BIOL 3300, MATH 1210. (Sp)

**Biol 5310**  **Soil Microbiology**  3
Ecology and diversity of microorganisms in soils. Emphasis on factors controlling microbial activity and the role of microorganisms in organic matter decomposition and nutrient cycling. Prerequisites: BIOL 1610, 1620; CHEM 2300 or 2310; SOIL 3000. Also taught as SOIL 5310. (F)

**Biol 5320**  **Soil Microbiology Laboratory**  2
Techniques for measuring microbial activity and diversity in soils. Includes use of molecular and isotope methods. Prerequisite: Concurrent or prior enrollment in BIOL/ SOIL 5310. Also taught as SOIL 5320. (F)

**Biol 5330**  **Virology**  3
Structure, replication, genetics, and molecular biology of viruses. Virus-host interactions. Viral diseases and antiviral agents. Prerequisites: BIOL 3060 and 3300. (Sp)

**Biol 5370**  **Molecular Methods in Nutrition Science (dual listing 6370)**  2
Theory of modern techniques used to study macromolecules and ions. Prerequisite: CHEM 3700. Also taught as ADVS/NFS/PSB 5370/6370. (F)

**Biol 5380**  **Evolutionary Genetics (dual listing 6380)**  4
Examines theoretical and applied aspects of genes in natural and artificial populations. Topics include molecular evolution, population, and quantitative genetics, with emphasis on the interaction of genetics with evolution, ecology, and conservation biology. Prerequisite: BIOL 3060 or permission of instructor. (F)

**Biol 5410**  **Introduction to Plant Pathology**  4
Combined lecture-lab course emphasizing concepts in plant pathology. Symptoms and disease-causing organisms are described. Methods of control, the nature of epidemics, and disease prediction. Prerequisites: BIOL 1610, 1620; BIOL 3300 recommended. (Sp)

**Biol 5420**  **CI Forest and Shade Tree Pathology**  3
Nature, cause, and management of forest diseases. Also taught as FRWS 5420 and PLSC 5420. (Sp)

**Biol 5440**  **Plant Molecular, Cellular, and Developmental Biology I (dual listing 6440)**  3
Examines background and recent advances. Students analyze and discuss structure, genome, molecular, development, and photosynthesis topics from a research perspective. Prerequisites: BIOL 3060, 5210; CHEM 3700 or 5710. Also taught as PLSC 5440/6440. (Sp)

**Biol 5450**  **Plant Molecular, Cellular, and Developmental Biology II (dual listing 6450)**  3
Examines background and recent advances. Students analyze and discuss cell wall, growth regulator, and environmental response topics from a research perspective. Prerequisites: BIOL 3060, 5210; CHEM 3700 or 5710. Also taught as PLSC 5450/6450. (Sp)

**Biol 5530**  **Insect Systematics and Evolution**  3
Evolution, biology, and classification of insects, including basic external morphology. Emphasizes role of phylogeny in systematics and importance of systematics in comparative biology. Prerequisite: BIOL 1620. (F)

**Biol 5550**  **Freshwater Invertebrates**  3
Ecology, collection, and systematics of freshwater aquatic invertebrates. Focuses on insects, but also covers crustaceans, molluscs, and annelids. Several weekend field trips and a collection are required. Prerequisite: One year of general biology or zoology, or permission of instructor. Also taught as AWER 5550. (Sp)

**Biol 5560**  **Ornithology**  3
Surveys evolution, systematics, physiology, anatomy, ecology, behavior, and identification of birds. Includes lectures, laboratory and field exercises, field trips, and an independent project. Attendance required at one Saturday and one Friday-Sunday field trip. Prerequisites: BIOL 1620, MATH 1050 or higher. (Sp)

**Biol 5570**  **Herpetology**  3
Evolution, adaptations, distribution, natural history, behavior, and identification of amphibians and reptiles of the world, with special emphasis on North American species. Two lectures and one lab. Prerequisite: BIOL 1620. (Sp)

**Biol 5580**  **Mammalogy**  3
Evolution, adaptations, distribution, natural history, behavior, and identification of mammals of the world, with special emphasis on North American species. Two lectures and one lab. Prerequisite: BIOL 1620. (F)

**Biol 5590**  **Animal Community Ecology**  4
Examines the community concept, diversity and stability, null models, relative importance of competition and predation, food webs, disturbance, metapopulations, biogeography, and new directions. Prerequisites: BIOL 2220, STAT 3000. (Sp)

**Biol 5600**  **Comparative Animal Physiology**  3
Principles and mechanisms of physiology in vertebrate and invertebrate animals. For graduate (6000-level) credit, additional reading, recitation, and/or writing will be required. Prerequisites: BIOL 1620 and CHEM 1220, or permission of instructor. (F)

**Biol 5610**  **QI Animal Physiology Laboratory**  2
Laboratory exercises designed to explore principles of animal physiology, using computer simulations, tissue models, and animal preparations. Emphasis placed on hypothesis design and data interpretation. Prerequisite: BIOL 5600 or 5620 (either may be taken concurrently). (F,Sp)

**Biol 5620**  **Medical Physiology**  3
Cardiovascular, respiratory, endocrine, gastrointestinal, excretory, and nervous system function in the mammalian body. Emphasis on molecular mechanisms. Examples from mammalian diseases used to illustrate key concepts. Prerequisites: BIOL 1620; BIOL 2420 or 5600; CHEM 1120 or 3700 (may be taken concurrently) or 5710. (Sp)

**Biol 5730**  **Genomic Technologies**  4
Provides theoretical background in genomics/proteomics technologies and laboratory training in advanced techniques. Topics include: whole genome sequencing, transcriptome and proteome characterization, DNA and expressed gene libraries, and operation of modern genomics laboratory equipment. Prerequisites: BIOL 1620, 3060; CHEM 3700 or 5710; CS 2200; STAT 3000. Also taught as CHEM 5730. (Sp)

**Biol 5800**  **Undergraduate Research**  1-3
Faculty-directed research in biology. Prerequisites: BIOL 1620 and consent of instructor. Maximum of 3 credits of BIOL 5800 are acceptable toward Biology degree elective requirements. (F,Sp,Su)

**Biol 5810**  **Bachelor's Thesis**  3
Preparation of a written thesis, based upon individual investigation, under the supervision of faculty. Prerequisites: 3 credits of BIOL 5800 (or concurrent enrollment) and consent of instructor. (F,Sp,Su)

**Biol 5850**  **Microbiology Seminar (dual listing 6850)**  1
(F,Sp,Su)

**Business Information Systems (BIS)**

See Department of Business Information Systems, pages 199-204.

**BIS 2100**

Principles of Management Information Systems

Covers principles of management information systems on how to use and manage information technology to improve business processes, improve decision making, and gain competitive advantage. Includes MIS concepts and vocabulary, as well as information technology. Prerequisites: Cumulative GPA of 2.5 or higher; Computer Information Literacy (CIL) Exam or equivalent, or OSS 1400; STAT 1040 or MATH 1030 or MATH 1050 (MATH 1050 or equivalent is required for College of Business majors). (F,Sp,Su)

**BIS 2200**

(Formerly BIS 2550 CI)

Business Communication

Development and application of effective oral and written business communication skills. Language/mechanics, grammar, and document formatting. Prerequisites: ENGL 1010; STAT 1040 or MATH 1030 or 1050 or 1100 (MATH 1050 or 1100 is required for College of Business majors); GPA of 2.5 or higher; and passing score on College of Business English Usage Exam or ACT English section score of 29. (F,Sp,Su)

*Course Descriptions*

BIS 4550 CI Principles of International Business Communications 3
Culture-general and culture-specific study of business communication in the diverse world of international business from both theoretical and applied perspectives. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (Sp)

BIS 4950H Senior Honors Thesis/Project 3
Creative project that will then be written up, and presented, as a Senior Thesis as required for an Honors Plan. (Sp)

BIS 5100 Systems Design and Implementation 3
Management, evaluation, documentation, maintenance, and reengineering of business information systems projects. Prerequisites: BIS 3330; admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. Corequisite: BIS 5110. (F,Sp)

BIS 5110 Systems Design Laboratory 1
Required laboratory for BIS 5100, allowing students to complete assigned team projects. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)

BIS 5300 Advanced Data Communications 3
Principles of data communications, local and wide-area networks, hardware, software, media standards, management, and business applications. Management and strategic use of local-area networks (LANs) and wide-area networks (WANs) to solve business problems. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)

BIS 5450 Designing Graphical User Interfaces for Electronic Commerce (dual listing 6450) 3
Integration of specialized web-design software, current multimedia technology (e.g., video/audio streaming, computerized slide shows, graphic animations, digital graphics) and web-design principles to create graphical user interfaces for e-commerce sites. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)

BIS 5500 Business/Marketing Teaching Seminar 2
Capstone seminar focused upon student business teaching issues, professional development, and principles of effective instruction, emphasizing reflective teaching. Must be taken concurrently with BIS 5600. Prerequisites: Level 1 and Level 2 completion; student teaching placement; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)

BIS 5630 Business/Marketing Student Teaching 10
A 13-week culminating student teaching experience in which students assume full-time teaching responsibilities under the direction of cooperating teachers in major and minor fields. Must be taken concurrently with BIS 5500. Prerequisites: Level 1 and Level 2 completion; student teaching placement; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)

BIS 5650 Advanced Website Development (dual listing 6650) 3
Creation of static and dynamic HTML pages, CGI, Perl, and Java script. Students create websites using Access or Oracle as the database backend. This technical course maintains a business focus as a transaction-oriented commercial site. Prerequisites: BIS 3330 and 3500; admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)

BIS 5700 DSS Internet Management and Electronic Commerce 3
Familiarizes students with concepts and technologies relating to business and the Internet. Focuses on the new business environment that has evolved through the Internet, as well as associated technologies and strategies. Prerequisites: OSS 1400 or Computer and Information Literacy (CIL) Exam; admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. Some programming experience is helpful. (F,Sp)

BIS 5800 Security of Business Information Systems (dual listing 6800) 3
In-depth exploration of security issues in business information systems. Includes workstation, work-groups, intranet, and wide-area network security. Covers development of security policies and procedures. Prerequisites: BIS 3500 or graduate admission; admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F)

BIS 5950 Independent Readings 1-5
Designed for individual student projects as approved by the department. (F,Sp,Su)

BIS 6050 Advanced Web-Based Management Information Systems Development 3
Students learn how to design, develop, and implement an Internet commerce website. Includes instruction in modeling and building an advanced management website system. Prerequisites: BIS 3330 and 3500. (F,Sp)

BIS 6110 Workshop 1-3
Intensive workshops. (F,Sp,Su)

BIS 6120 Business Information Systems Development 3
Business information systems development, including analysis, design, and implementation. Students develop a working prototype to solve a real-world information systems problem. (Sp)

BIS 6150 Communication for Business 3
In-depth study of the process for preparing written business communications and related oral presentations. Preparation of reports relevant to student’s major. Prerequisite: BIS 2200 or equivalent. (F,Sp)

BIS 6180 Intrasession MBA Workshop 0.5-1
Intensive workshops designed to enhance the MBA experience. (F)

BIS 6200 Business Data Communication Systems 3
Introduction to business data communications, including concepts, network architecture, data communication software and hardware, distributed information systems, and business communication system services. (F)

BIS 6250 Graduate Internship 1-6
Graduate-level internship in business, industry, or government position approved by department. Requires written learning objectives, performance evaluation, and a final internship written report. Requires 75 hours internship per 1 semester credit. (F,Sp,Su)

BIS 6330 Database Implementation (dual listing 4330) 3
Application of database concepts using industrial database products. Includes structured query language (SQL) development, database programming development, front- and back-end interface development, web database design, database administration basics, and integration of database tools within a project context. Prerequisite: BIS 3330 or equivalent. (F,Sp)

BIS 6350 Managing Business Training Programs 3
Examines various management topics in the training and development field, including program development, implementation, and evaluation. Discusses the various roles of training program managers. (F)

BIS 6400 Local Area Network Management for Business 3
Application of networking concepts related to the management of local area networks. Includes topics related to setup, management, and maintenance of local area networks and installation of electronic mail handling systems. (F,Sp)

BIS 6410 Human-Computer Interface Design 3
Integrates aspects of industrial psychology, work physiology, human environments, job analysis, and hardware/software engineering in the study of designing effective, efficient input/output interfaces for business information systems.
## Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIS 6440</td>
<td>Information and Decision Making</td>
<td>3</td>
<td>Case-based approach to learning role of information technology when making quantitative and qualitative analyses, including statistical techniques to solve business problems through the use of information technology. Prerequisite: At least one graduate or undergraduate class in statistics. (Sp,Su)</td>
</tr>
<tr>
<td>BIS 6450</td>
<td>Designing Graphical User Interfaces for Electronic Commerce</td>
<td>3</td>
<td>Integration of specialized web design software, current multimedia technology (e.g., video/audio streaming, computerized slide shows, graphic animations, digital graphics) and web-design principles to create graphical user interfaces for e-commerce sites. (F,Sp)</td>
</tr>
<tr>
<td>BIS 6500</td>
<td>Developing Business Information Systems with Advanced Software Concepts</td>
<td>3</td>
<td>Creation of custom applications to solve typical business problems or support common functions, using Visual Basic programming and OLE Automation with MS Office software. Prerequisite: Knowledge of database and spreadsheet software. (F,Sp,Su)</td>
</tr>
<tr>
<td>BIS 6510</td>
<td>Information Systems for Business</td>
<td>3</td>
<td>Introduction to information systems at general management level. Includes strategic look at needs of an organization and how the function of information systems can help the organization become more effective. (F,Sp,Su)</td>
</tr>
<tr>
<td>BIS 6550</td>
<td>International Business Communication</td>
<td>3</td>
<td>Culture-general and culture-specific study of business communication in the diverse world of international business, from both theoretical and applied perspectives. (F,Sp,Su)</td>
</tr>
<tr>
<td>BIS 6600</td>
<td>Business Teaching Internship</td>
<td>1-3</td>
<td>Graduate-level business teaching experience at approved corporate, secondary, or post-secondary sites. (F,Sp,Su)</td>
</tr>
<tr>
<td>BIS 6640</td>
<td>E-Commerce Data Interchange Using XML</td>
<td>3</td>
<td>Designed to build e-commerce applications using XML (Extensible Markup Language) as the underlying technology. Students will also learn to parse XML documents, use Extensible Style Sheet language, and use XSQL (an Oracle technology) to tie XML with its database. Prerequisites: BIS 3100, 3330, and 3500.</td>
</tr>
<tr>
<td>BIS 6650</td>
<td>Advanced Website Development</td>
<td>3</td>
<td>Creation of static and dynamic HTML pages, CGI, Perl, and Java script. Students create websites using Access or Oracle as the database backend. This technical course maintains a business focus as a transaction-oriented commercial site. Prerequisites: BIS 3330 and 3500. (F,Sp,Su)</td>
</tr>
<tr>
<td>BIS 6660</td>
<td>The Adult Business Learner</td>
<td>3</td>
<td>Focuses on the adult business learner, the concept of the &quot;learning organization,&quot; and the different types of postsecondary institutions that provide adult training and education in business.</td>
</tr>
<tr>
<td>BIS 6700</td>
<td>Information Systems Strategies for Electronic Commerce</td>
<td>3</td>
<td>A management-oriented treatment of general information systems principles and topics relating to information systems strategies for electronic commerce, such as business models, mass customization, market research, security and assurance, entrepreneurship, intelligent agents, virtual corporations, electronic payments, and customer service. (F)</td>
</tr>
<tr>
<td>BIS 6720</td>
<td>Instruction and Training in Business and Marketing Education</td>
<td>3</td>
<td>Designed for experienced training and educational personnel. Focuses on ways to improve instructional techniques and approaches. Compares traditional teacher/trainer-style teaching to student-centered teaching and training. (Su)</td>
</tr>
<tr>
<td>BIS 6730</td>
<td>Teaching Methods in Business Education, Marketing Education, and Information Systems</td>
<td>3</td>
<td>Advanced methodology for teaching business, marketing, and information system subjects, including techniques for teaching word processing, keyboarding, Internet, basic business, accounting, marketing, economics, and other business subjects in cognitive, psychomotor, and affective instructional domains. Taught online.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIS 6750</td>
<td>Business Process Reengineering Using Information Technology</td>
<td>3</td>
<td>Examines methodologies and state-of-the-art thinking in the area of business process reengineering. Designed to help students understand how organizations manage change in contemporary global business environments by utilizing the latest information systems and technology techniques.</td>
</tr>
<tr>
<td>BIS 6760</td>
<td>The Administration and Organization of School-to-Careers Programs in Business</td>
<td>3</td>
<td>Covers the philosophy of the school-to-careers movement in the U.S., as well as how to organize and administer such a program. Includes discussion of the school-based, linking, and work-based components of such a program.</td>
</tr>
<tr>
<td>BIS 6770</td>
<td>Competency-based Instruction</td>
<td>3</td>
<td>Business teachers learn how to develop competency-based instruction by completing a CBI project. (F,Sp,Su)</td>
</tr>
<tr>
<td>BIS 6800</td>
<td>Security of Business Information Systems</td>
<td>3</td>
<td>In-depth exploration of security issues in business information systems. Includes workstation, workgroups, intranet, and wide-area network security. Covers development of security policies and procedures. Includes information necessary to pass Certified Information Systems Security Professionals exam. Prerequisite: BIS 3500 or graduate admission. (F)</td>
</tr>
<tr>
<td>BIS 6810</td>
<td>Introduction to the Research Process</td>
<td>3</td>
<td>Essential scientific research concepts of theory development and data collection. The technology of research, including writing and funding proposals, experimental and study design, and project management. Includes a hands-on research project conducted by the student. (Sp,Su)</td>
</tr>
<tr>
<td>BIS 6950</td>
<td>Independent Readings</td>
<td>1-3</td>
<td>Specialized projects for graduate students. (F,Sp,Su)</td>
</tr>
<tr>
<td>BIS 6970</td>
<td>Master's Paper</td>
<td>1-6</td>
<td>Master's-level thesis or Plan B research credit. (F,Sp,Su)</td>
</tr>
<tr>
<td>BIS 6990</td>
<td>Continuing Graduate Advisement</td>
<td>1-3</td>
<td>(F,Sp,Su)</td>
</tr>
<tr>
<td>BIS 7250</td>
<td>Graduate Research Internship</td>
<td>1-3</td>
<td>For doctoral students desiring to improve their research capability. Prior approval required. Repeatable to a maximum of six credits. (F,Sp,Su)</td>
</tr>
<tr>
<td>BIS 7330</td>
<td>School-Based Internship</td>
<td>3-6</td>
<td>Internship for doctoral candidates preparing to be school supervisors. Repeatable to a maximum of 9 credits. (F,Sp,Su)</td>
</tr>
<tr>
<td>BIS 7610</td>
<td>Critical Analysis of Issues</td>
<td>3</td>
<td>Examines critical analysis/thinking techniques, creative problem solving, and the identification of issues and trends in the field.</td>
</tr>
<tr>
<td>BIS 7950</td>
<td>Independent Readings</td>
<td>1-3</td>
<td>Independent readings for graduate students. Repeatable to a maximum of 6 credits. (F,Sp,Su)</td>
</tr>
<tr>
<td>BIS 7970</td>
<td>Doctoral Dissertation</td>
<td>1-12</td>
<td>Doctoral-level dissertation research credit. (F,Sp,Su)</td>
</tr>
<tr>
<td>BIS 7990</td>
<td>Continuing Graduate Advisement</td>
<td>1-9</td>
<td>Enrollment restricted to doctoral-level students only. Signature of department head required. (F,Sp,Su)</td>
</tr>
</tbody>
</table>

©Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.
**Biometeorology (BMET)**

See Department of Plants, Soils, and Biometeorology, pages 459-472.

**BMET 2000 BPS  The Atmosphere and Weather  3**
Survey of the processes governing the behavior of the atmosphere and the phenomenon of weather. Basic physical principles of radiation, energy, evaporation, and heat transport are introduced and connected to atmospheric circulation and weather. (F,Sp)

**BMET 3250  Aviation Weather  3**
Discussion, observation, and analysis of weather important for pilots and those associated with air travel. (Sp)

**BMET 3820 DSC/QI  Climate Change  3**
Emphasizes physical basis of climate (climate dynamics), as well as the mechanisms and processes for its fluctuations on sub-seasonal to interannual time scales (climate variations) and on regional to hemispheric/global time scales. Prerequisites: BMET 2000 or GEOG 1130. Also taught as AWER 3820. (Sp)

**BMET 4300  General Meteorology  3**
Introductory meteorology for students with background in physical sciences. Emphasis placed on physical processes (quantitatively) in the atmosphere, resulting in general weather phenomena around the world. Prerequisite: BMET 2000. Will not be taught during Fall 2005. Contact department for further information. (F)

**BMET 5250 Remote Sensing of Land Surfaces  4**
Basic principles of radiation and remote sensing. Techniques for ground-based measurements of reflected and emitted radiation, as well as ancillary data collection to support airborne and satellite remote sensing studies in agriculture, geography, and hydrology. Prerequisites: MATH 1100 or 1210; and PHYS 2110 or 2210. Also taught as AWER 5250/6250 and BIE 5250/6250. (Sp)

**BMET 5400 Introduction to Meteorology (dual listing 6400)  3**
Designed for senior and graduate students in different fields who desire some basic introduction to meteorology. Bridges a large gap between courses describing meteorological phenomena in broad and simple terms and other courses treating the atmosphere more theoretically. (F)

**BMET 5500 Land-Atmosphere Interactions (dual listing 6500)  3**
Examination of interactions between the surface and atmosphere. Consideration of flows of mass and energy in soil-vegetation-atmosphere continuum, and their linkage to local and regional climates. Detailed study of feedbacks between vegetation and atmosphere. (Sp odd)

**BMET 5680 Paleoclimatology* (dual listing 6680)  3**
Covers climate through the past four billion years of geologic time. Explores driving forces behind climate changes. Examines data and methods used in paleoclimate research. Includes discussion of literature and stresses local paleoclimate records. Three lectures per week, along with field trips. Prerequisite: GEO/L/WARE 3600 or permission of instructor. Also taught as GEO/L 6680/5680 and AWER 6680/5680.

**BMET 5700 Environmental Measurements (dual listing 6700)  3**
Examination of critical instrumentation and principles involved in measuring key properties of terrestrial environment. Consideration of measurements in soils, plants, and atmosphere. Will not be taught during Spring 2006. Contact department for further information. (Sp)

**BMET 6250 Remote Sensing of Land Surfaces (dual listing 5250)  4**
Basic principles of radiation and remote sensing. Techniques for ground-based measurements of reflected and emitted radiation, as well as ancillary data collection to support airborne and satellite remote sensing studies in agriculture, geography, and hydrology. Prerequisites: MATH 1100 or 1210; and PHYS 2110 or 2210. Also taught as AWER 6250/5250 and BIE 6250/5250. (Sp)

**BMET 6400 Introduction to Meteorology (dual listing 5400)  3**
Designed for senior and graduate students in different fields who desire some basic introduction to meteorology. Bridges a large gap between courses describing meteorological phenomena in broad and simple terms and other courses treating the atmosphere more theoretically. (F)

**BMET 6410 Applied Agricultural Meteorology  2**
Explores applied concepts in agricultural meteorology, with emphasis on weather-agriculture and microclimate-agriculture relationships. Includes crop modeling applications. Course materials, resources, and teaching provided in cooperation with Iowa State University. Not currently being taught. Contact department for further information.

**BMET 6500 Land-Atmosphere Interactions (dual listing 5500)  3**
Examination of interactions between the surface and atmosphere. Consideration of flows of mass and energy in soil-vegetation-atmosphere continuum, and their linkage to local and regional climates. Detailed study of feedbacks between vegetation and atmosphere. (Sp odd)

**BMET 6680 Environmental Biophysics  2**
Explores connections between biosphere and atmosphere at many scales. Introduces processes governing exchanges of mass and energy between surface and atmosphere, as well as connections to climate. Examines role of the biota at local to global scales. (Sp)

**BMET 6910 Special Problems in Climatology  3**
Study of physical causes and effects of various climate regimes found upon the Earth. Study of the basis and mechanisms of all types of physically-based climate models. Assists students in comprehending relative complexities and applicabilities of the whole range of climate models. (Sp)

**BUS 1000 Business Orientation  0.5**
Orients freshmen and transfer students to College of Business programs, academic and student services, professional organizations, and career possibilities. This course is not currently being offered. For information about when it may be offered, contact the College of Business.

**BUS 2250 Introductory Internship  1-9**
Introductory-level experience in a career-related position approved by the Cooperative Education Office. One credit for every 75 hours of internship experience, with a maximum of 9 credits. A maximum of 12 credits of 2250 and 4250 combined can be counted toward the minimum degree requirements for the College of Business. Prerequisite: Permission of instructor. (F,Sp,Su)

**BUS 3010 Intermediate Accounting I  3**
Study at the intermediate level in accounting theory and practice relating to financial reporting of assets. Prerequisites: Cumulative GPA of 2.5 or higher; grade of B- or better in ACCT 2010.
### Course Descriptions

**Course Descriptions**

CEE 2890 Environmental Engineering Sophomore Seminar

Introduces students to the field of environmental engineering, emphasizing design, ethics, and leadership in the environmental engineering profession. Emphasizes creative thinking, organizational skills, team work, professional ethics, and social responsibility. Prerequisite: Sophomore standing in environmental engineering. (Sp)

CEE 3010 Mechanics of Materials

Includes principal stresses; combined loading and stresses; deflection of beams by direction integration, moment-area, and superposition; and deflection of beams and frames by energy methods and columns. Includes laboratories to demonstrate the mechanical behavior of materials. Prerequisites: ENGR 2000 and 2040. (F)

CEE 3020 Structural Analysis

Classification of structural types and development of loads. Analysis of both statically determinate and indeterminate structures. Analysis of trusses, beams, frames, cables, and arches. Utilization of approximate methods of analysis focusing on structural behavior. Prerequisite: CEE 3010. (Sp)

CEE 3030 Uncertainty in Engineering Analysis

Principles of probability and statistics applied specifically to problems in civil and environmental engineering, including transportation, water quality, waste treatment, hydology, and materials. (F,Sp)

CEE 3080 Design of Reinforced Concrete Structures

Design of reinforced concrete structural elements, simple and continuous reinforced beams, columns, joints, and one-way slabs. Includes concrete materials laboratory. Prerequisite: CEE 3010. Prerequisite or corequisite: CEE 3020. (Sp)

CEE 3210 Introduction to Transportation Engineering

Introduction to basic concepts of roadway geometric design, and intersection and highway capacity analysis. Other topics include: traffic flow characteristics, traffic studies, signal design, and transportation project evaluation. Prerequisite: CEE 3030. (Sp)

CEE 3430 Engineering Hydrology

Provides a basic understanding of engineering hydrology through the hydrologic cycle, watershed characteristics, atmospheric water, rainfall-runoff processes, infiltration and evaporation, stream flow analysis, groundwater flow, and related designs. Prerequisite: CEE 3500. (Sp)

CEE 3500 Civil and Environmental Engineering Fluid Mechanics

Explores fluid properties, hydrostatics, fluid dynamics similitude, energy and momentum principles, closed conduit flow, open channel flow, and flow measurement. Includes laboratory exercises in flow measurement, open channel flow, pipe friction, physical modeling, and data collection. Prerequisites: MATH 1220; MATH 2210 or 2250; ENGR 2010, 2030. (F,Sp)

CEE 3510 Civil and Environmental Engineering Hydraulics

Steady flow in open channel and closed circuits, nonuniform flow in open channels, combined energy losses in pipelines, and distribution in pipe networks. Includes laboratory and computer exercises in data collection, pipe networks, and unsteady and nonuniform flow. Prerequisite: CEE 3500. (F,Sp)

CEE 3610 Environmental Management

Introduction to environmental health, emphasizing relationships among environmental quality, public health, environmental and occupational health regulations, human health risk assessment, institutions, and engineered systems in environmental health management. Prerequisites: CHEM 1210; BIOL 1610 or Breadth Life Sciences course; MATH 1210. Also taught as PUBH 3610. (F)

CEE 3640 Water and Wastewater Engineering

Engineering analysis and design of processes for treatment of water and wastewater. Major topics include water quality evaluation; physical, chemical, and biological treatment systems; design of facilities for production of drinking water and for treatment and reclamation of municipal and industrial wastewater; and management of residuals from water and wastewater treatment facilities. Prerequisite: CEE/PUBH 3610. (Sp)

CEE 3670 Transport Phenomena in Bio-Environmental Systems

Core course in both biological and environmental engineering. Students develop a detailed understanding of the principles, concepts, modes, and methods of calculating heat and mass transfer. Emphasis given to contaminant and nutrient flux, along with their state transformations, in order for the biological or environmental engineer to evaluate options for production, clean-up, and control of bio-environmental systems. Prerequisites: CEE 3500 and MAE 2300. Also taught as BIE 3670. (Sp)

CEE 3780 Solid and Hazardous Waste Management

Introduction to integrated management of municipal and industrial solid waste; household, commercial, and industrial hazardous waste; and resource recovery and recycling principles. Three lectures augmented by computer modeling and field trip experiences related to modern solid and hazardous waste management principles. Prerequisite: Acceptance into professional program in engineering. (F)

CEE 3870 Professional/Technical Writing in Civil and Environmental Engineering

Gives CEE students intensive practice with oral and written communication in business and technical CEE writing. Requires concurrent enrollment in CEE/PUBH 3610. (F)

CEE 3880 Civil Engineering Design I

Introduction to senior engineering students' integrated design experience. Design project is identified and proposal for its completion during the senior year is produced. Emphasizes project scheduling, and completion of design proposal. Prerequisite: CEE 3870. (Sp)

CEE 3890 Environmental Engineering Design I

Introduction to senior environmental engineering students' integrated design experience. Design project identified and proposal for its completion during the senior year is produced, under mentoring of course instructor. Emphasizes project identification, project scoping, manpower and materials budgeting, project scheduling, and completion of design proposal. Prerequisites: CEE/PUBH 3610, CEE 3640, CEE/BIE 3670. (Sp)

CEE 4020 Engineering Economics

Applications of the mathematics of finance to engineering decision making. (F)

CEE 4200 Engineering Soil Mechanics

Physical and mechanical properties of soils. Topics include: classification, permeability, soil stresses and settlement analysis, soil strength, slope stability, lateral earth pressures, introduction to foundations, numerical solutions, and computer applications. Prerequisites: CEE 3500 (taken previously or concurrently) and ENGR 2140. (Sp)

CEE 4790 CI Environmental Engineering Design II

Provides senior environmental engineering students with integrated design experience in two-semester sequence. Design projects proposed in CEE 3890 completed under mentoring of course instructor. Emphasizes team work, scheduling, design calculations, and completion of design report. Prerequisites: CEE 3890 and concurrent enrollment in environmental engineering technical elective course during fall semester. (F)

CEE 4870 CI Civil Engineering Design II

Provides senior engineering students with integrated design experience in two-semester sequence. Design projects proposed in Junior Design Proposal placed on team work, scheduling, design calculations, and completion of design report. Prerequisite: CEE 3880; senior design technical elective should be taken concurrently. (F)

CEE 4880 CI Civil Engineering Design III

Provides senior engineering students with integrated design experience in two-semester sequence. Design projects started in CEE 4870 will be completed with presentation, report, and defense of design project. Prerequisite: CEE 4870. (Sp)

CEE 4890 CI Environmental Engineering Design III

Provides senior environmental engineering students with integrated design experience in two-semester sequence. Completion of design projects begun in CEE 4790, with presentation, report, and defense. Prerequisite: CEE 4790. (Sp)

CEE 4930 Independent Study

Laboratory design or research project on problem selected by student. Requires review of literature, preparation of proposal describing project, completion of design or research project, and preparation of report. (F,Sp,Su)

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Prerequisites and Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>CEE 5010</td>
<td>Matrix Analysis/Finite Element</td>
<td>3</td>
<td>Analysis of structures using matrix methods. Application of software based on the stiffness method to practical analysis problems. Introduction of Finite Element method based on stiffness approach and mathematical derivation of simple finite elements, along with application to practical problems. Prerequisite: CEE 3020. (F)</td>
</tr>
<tr>
<td>CEE 5020</td>
<td>Finite Element Methods in Solid Mechanics I</td>
<td>3</td>
<td>Introduction to finite element methods and their application to the analysis and design of mechanical engineering systems. Prerequisite: MAE 3040. Also taught as MAE 5060. (F)</td>
</tr>
<tr>
<td>CEE 5050</td>
<td>Design of Wood and Masonry Structures</td>
<td>3</td>
<td>Design of beams, columns, joints, walls, and diaphragms in both wood and masonry materials. Current design codes will be utilized. Prerequisite: CEE 3080. (Sp)</td>
</tr>
<tr>
<td>CEE 5060</td>
<td>Mechanics of Composite Materials I</td>
<td>3</td>
<td>Stress-strain relations for nonisotropic composites, such as fiber-reinforced plastic laminates, properties and their uses, strength and life determination, and methods for design using composite materials. Prerequisite: MAE 3040 or CEE 3010. Also taught as MAE 5060. (F)</td>
</tr>
<tr>
<td>CEE 5070</td>
<td>Structural Steel Design</td>
<td>3</td>
<td>Structural steel design using load and resistance factor design (LRFD) method. Focuses on design of structural beams, columns, and connections utilizing steel design codes. Prerequisites: CEE 3020, 3080. (F)</td>
</tr>
<tr>
<td>CEE 5100</td>
<td>Infrastructure Evaluation and Renewal</td>
<td>3</td>
<td>Evaluation of existing structural systems and techniques to improve their performance. Focuses on structures which are seismically deficient. Prerequisites: CEE 3080, 5070. (Sp)</td>
</tr>
<tr>
<td>CEE 5190</td>
<td>Geographic Information Systems for Civil Engineers</td>
<td>3</td>
<td>Introduction to GIS concepts addressing data structures, spatial entities, and queries. Topics include location referencing methods, data collection techniques, current applications, and institutional and organizational issues. (Sp)</td>
</tr>
<tr>
<td>CEE 5220</td>
<td>Traffic Engineering</td>
<td>3</td>
<td>Topics covered include characteristics, measurements, and analysis of volume, speed, density, and travel time; capacity and level of service analysis; signalization and traffic control devices. (Sp)</td>
</tr>
<tr>
<td>CEE 5230</td>
<td>Geometric Design of Highways</td>
<td>3</td>
<td>Principles of highway location and planning, with full consideration of economic, environmental, and other impacts. Capacity analysis of intersections and highways, passing-lane design, and risk-cost based horizontal and vertical alignment design. Introduction to design software through coursework and term projects. Prerequisite: CEE 3210. (Sp)</td>
</tr>
<tr>
<td>CEE 5240</td>
<td>Urban and Regional</td>
<td>3</td>
<td>Examination of travel demand forecasting, data collection, and survey data analysis techniques. Focuses on transportation-land use interactions and impact of market-based policies on travel demand. Theories and applications of traditional and advanced trip distribution, mode choice, and route assignment models. (F)</td>
</tr>
<tr>
<td>CEE 5250</td>
<td>Environmental Engineering Cooperative Practice</td>
<td>2</td>
<td>Applied environmental employment with primary focus of work experience related to one of the environmental engineering specialty areas. Prerequisites: Senior status and permission of instructor. (F,Sp,Su)</td>
</tr>
<tr>
<td>CEE 5350</td>
<td>Foundation Analysis and Design</td>
<td>3</td>
<td>Applications of theories studied in soil mechanics. Design considerations for various foundation types, including shallow foundations, driven piles, drilled shafts, walls, soil anchorages, and mechanically-stabilized earth support systems. Field investigation techniques and computer applications. Prerequisite: CEE 4300. (F)</td>
</tr>
<tr>
<td>CEE 5380</td>
<td>Earthquake Engineering</td>
<td>3</td>
<td>Covers wide variety of earthquake engineering topics, including seismology and earthquake source characterization, strong ground motion, seismic hazard analysis, wave propagation, soil dynamics, ground response, local site effects, liquefaction, seismic slope stability, soil improvement, vibrational analyses, and structural seismic design. Prerequisite: CEE 4300. (Sp)</td>
</tr>
<tr>
<td>CEE 5430</td>
<td>Groundwater Engineering</td>
<td>3</td>
<td>Explores fundamentals of groundwater hydology by focusing on theory related to aquifer systems and flow analysis, regional groundwater balance, well hydraulics, aquifer testing, capture zone analysis, unsaturated flow, saltwater intrusion, and basics of flow modeling. Prerequisite: CEE 3430 or a similar hydrology course. (F)</td>
</tr>
<tr>
<td>CEE 5450</td>
<td>Hydrologic Modeling</td>
<td>3</td>
<td>Case studies of hydrologic modeling and decision methods: (1) Real-time flood warning; (2) extended streamflow prediction; (3) probabilistic water resource management; and (4) physical modeling of ungauged basins. Prerequisite: CEE 3430. (Sp)</td>
</tr>
<tr>
<td>CEE 5460</td>
<td>Water Resources Engineering</td>
<td>3</td>
<td>Engineering design course covering a wide range of topics, including: surface and groundwater hydrology, statistical analysis, water law, hydrowlectric power, water supply, irrigation, flood control, wastewater, drainage, dams and reservoirs, pipelines, open channels, and planning. (F)</td>
</tr>
<tr>
<td>CEE 5470</td>
<td>Sedimentation Engineering</td>
<td>3</td>
<td>Explores river response, sediment transport, sediment and watershed yield, flow resistance, scour and erosion, and floodplain management. Prerequisite: CEE 3500. (Sp)</td>
</tr>
<tr>
<td>CEE 5500</td>
<td>Open Channel Hydraulics with an Emphasis on Gradually Varied Flow</td>
<td>3</td>
<td>Theory and applications of steady uniform and gradually varied flow under both subcritical and supercritical flow conditions. Solutions to multiple-network canal systems by solving systems of combined ordinary differential and algebraic equations. Method for defining natural channel systems and solving steady-state flows in them. Prerequisites: CEE 3500, 3510. (F)</td>
</tr>
<tr>
<td>CEE 5540</td>
<td>Hydraulic Structures Design</td>
<td>3</td>
<td>Design of a variety of hydraulic structures is explored, both in the classroom and laboratory. Integrates student-developed, original computer programs, commercially available software; field trips; and hands-on laboratory design projects to further students' understanding of hydraulic structures. Prerequisites: CEE 3500 and 3510. (F)</td>
</tr>
<tr>
<td>CEE 5550</td>
<td>Hydraulics of Closed Conduits</td>
<td>3</td>
<td>Includes design and operation of piping systems; economics; feasibility and impact of pipelines; pipe, pump, and valve selection; transient and cavitation analysis; and pipeline operation and filling. Prerequisites: CEE 3500 and 3510. (Sp)</td>
</tr>
<tr>
<td>CEE 5610</td>
<td>Environmental Quality Analysis</td>
<td>3</td>
<td>Familiarizes students with various methods used for analysis of chemical parameters in environmental samples (water, soil, and air). Provides students with skills enabling them to make proper selection/evaluation of analytical procedure and evaluate data generated. Prerequisite: CHEM 1210. (F)</td>
</tr>
</tbody>
</table>
CEE 5620  Aquatic Chemistry  3
Provides students with understanding of principles of aquatic chemistry, emphasizing chemical equilibria, acid-base reactions, complex formation, oxidation-reduction reactions, complex formation, and dissolution chemistry. Prerequisite: CHEM 1210 or equivalent. Also taught as SOIL 5620. (F)

CEE 5670  Hazardous Chemicals Handling and Safety  2
Provides students with necessary skills and knowledge for working safely in areas associated with hazardous chemicals. Topics covered include: regulations, exposure routes, toxicology, chemical and physical hazards, personal protective equipment, sampling, monitoring, decontamination, and emergency response procedures. Prerequisite: CHEM 1210. Also taught as PUBH 5670. (Sp)

CEE 5680  Soil-based Waste Management  2
(dual listing 6680)
(Engineering management of wastes present in the vadose zone, including extraction, containment, and biological, chemical, and physical destruction technologies for sustainable agriculture and environmental quality. Aspects include engineering characterization, problem definition, treatment, and monitoring. Analysis and design emphasized through problems, examinations, and report writing. Prerequisites: CEE/PUBH 3610, CEE 3640, 3870, CEE/BIE 3670. Also taught as BIE 5680/6680. (Sp)

CEE 5689  Natural Systems Engineering  3
(dual listing 6690)
(Application of modeling tools commonly utilized in water resources systems for assessment of environmental impacts associated with engineered systems. Topics include: water resources modeling; physical, chemical, and biological process effects; assessment methods; data integration techniques; and impact assessment. Prerequisites: CEE/PUBH 3610, CEE 3500, 3510, 3640. (F)

CEE 5700  Field Sampling Techniques for Natural Systems Engineering  2
(dual listing 6700)
Provides students with hands-on approach to utilizing several of the most commonly applied spatial and temporal sampling techniques for data acquisition in support of natural systems modeling. Explores advanced and advanced surveying techniques for water quality, stream geomorphology, and hydraulics, utilizing levels, total stations, laser levels, GPS, and hydroacoustic technologies. Integrative sampling strategies across spatial and temporal scales emphasized for multi-disciplinary studies. Prerequisite: CEE 5690/6690. (F)

CEE 5710  Pollution Prevention and Industrial Ecology***  2
Explores pollution prevention and waste minimization concepts, focusing on implementation of these concepts in design of production processes and products. Discussion of pollution prevention/waste minimization concepts, energy and materials conservation, Life Cycle Analysis, materials and process audits, industrial process design for waste minimization and energy conservation, packaging, and ISO 14000. Prerequisites: CEE/BIE 3670, CEE 3790, MAE 2400. (Sp)

CEE 5720  Natural Systems Modeling  3
(dual listing 6720)
Provides hands-on approach to utilizing several of the most commonly applied modeling tools employed to estimate physical, chemical, and biological impacts of existing and proposed water resources systems. Focuses on utility and climation of specific modeling approaches, while also stressing integrative multi-disciplinary nature of impact assessment frameworks. Prerequisite: CEE 5690/6690. (Sp)

CEE 5730  Analysis and Fate of Environmental Contaminants  3
(dual listing 6730)
Provides students with understanding of methods used in analysis of environmental samples for organic contaminants. Examines various properties and processes determining the fate of organic contaminants in the environment. Prerequisites: CHEM 1210, 2300. Also taught as PUBH 5730/6730. (Sp)

CEE 5750  Air Quality Measurements  2
Laboratory-based course designed to familiarize participants with federally-approved reference measurement techniques for ambient and source air pollutants. Also provides understanding of temporal and spatial pollutant behavior. (Sp)

CEE 5760  Hydraulic Structures Field Course  1
Week-long course, with one day of in-class lectures and four days of field trips. Introduces students to field applications of hydraulic structures design. Field trips may involve backpacking to remote areas. (F,Su)

CEE 5790  Accident and Emergency Management***  3
Introduction to fundamentals of accident, hazard, and emergency management. Topics include legislation, chemical safety fundamentals; fire, explosion, and spill fundamentals; contaminant air transport fundamentals; hazard and risk assessment; dispersion applications; and hazard and risk management applications. Prerequisite: CHEM 1220. Also taught as PUBH 5790. (Sp)

CEE 5810  Biochemical Engineering  3
Fundamentals of bioreactor design and bioengineering to produce biological commodities. Emphasizes mathematical models of microbial and enzymic processes in environmental and industrial biotechnology. Prerequisites: BIE 3200 and BIE/CHEM 3670; or BIE/CHEM 3760, CEE/PUBH 3610, and CEE 3640. Also taught as BIE 5810/6810. (F)

CEE 5830  Management and Utilization of Biological Solids and Wastewater  3
Focuses on production, management, and disposal of biosolids and wastewater generated in food processing and wastewater treatment. Emphasizes beneficial use of biosolids and wastewater for agricultural production, forest enhancement, and land reclamation. Prerequisite: BIE/CHEM 3670. Also taught as BIE 5830/6830. (F)

CEE 5860  Air Quality Management  3
Introduction to air quality management. Explores the legislation, sources, behaviors, and effects of regulated and nonregulated air pollution, control techniques, and air dispersion modeling. Prerequisites: CEE 3640, 3780, CEE/BIE 3670, MAE 2300. (F)

CEE 5870  Hazardous Waste Incineration  2
Provides introduction to hazardous waste incineration principles. Topics include: thermodynamics, stoichiometry, thermochemistry, chemical kinetics, energy recovery, pollution control systems, and incinerator design principles. Prerequisites: CEE/BIE 3670, CEE 3780, MAE 2300; CEE 5860 (may be taken concurrently). (Sp)

CEE 5880  Remediation Engineering  3
Physical, chemical, and biological principles associated with remediation of hazardous waste contaminated soil, water, sediments, and air. Topics include: source removal and source control, product recovery, chemical treatment methods, biological remediation concepts, in situ processes, ex situ processes, and integrated process design. Prerequisites: CEE 3430, 3640, 3780, CEE/PUBH 3610. (F)

CEE 5900  Cooperative Practice II  3
A planned work experience in industry. Detailed program must have prior approval. Written report required. (F,Sp,Su)

CEE 6010  Finite Element Methods in Solid Mechanics II  3
Advanced theory and applications of finite element methods to both static and dynamic solid mechanics problems. Prerequisite: MAE 6020. (Sp)

CEE 6020  Structural Stability**  3
Elastic and inelastic buckling of columns; analysis of beam columns, thin-walled beams of open cross-section. Stability analysis of frame and plate structures. Large deflection theory. Historical notes on stability of structures. Computer applications. Prerequisite: CEE 3010. (F)

CEE 6030  Structural Optimization*  3
Introduction to optimization techniques for linear and nonlinear, unvariable, and multivariable functions with or without constraints. Computer applications, and applications to structural design. Prerequisite: CEE 3010 or instructor’s consent. (Sp)

CEE 6040  Structural Reliability*  3
Elements of probability theory and its application to structural engineering and mechanics. Statistical distribution of loads. Uncertainties in material parameters and their effects in design. Reliability-based safety analysis and computer applications. Prerequisite: Instructor’s consent. (F)
Course Descriptions

CEE 6050  Experimental Methods in Structural Engineering  3
Experimental techniques used in research and design in structural engineering and mechanics. Structural models. Theory and practical applications. Development of principles used to design research projects. Prerequisite: Instructor’s consent. Also taught as MAE 6050. (Sp)

CEE 6070  Mechanics of Composite Materials II  3
Second course in composite materials. Stress-strain states of laminated composite structures, including interlaminar stresses, failure criteria, and hygrothermal stresses. Prerequisite: MAE 5060. Also taught as MAE 6070. (F)

CEE 6080  Numerical Methods in Elasticity (dual listing 5080)  3

CEE 6090  Theory of Plates and Shells  3
Introduction to plate and shell theories. Development of bending and buckling of plates and shells through classical theory. Prerequisite: MAE 3040 or CEE 3010. Also taught as MAE 6090. (F)

CEE 6110  Probabilistic and Statistical Methods in Engineering  3
Explores principles related to probability and statistical methods commonly used in engineering practice, as well as applying these principles to the solution of engineering problems. Prerequisites: Undergraduate-equivalent knowledge in statistical methods or CEE 3000, plus 3000-level calculus and numerical methods. (F)

CEE 6120  Structural Dynamics and Seismic Design  3
Development and solutions for equations of motion for single- and multi-degree of freedom systems. Dynamic analysis by Modal Superposition and Response Spectra. Design of structures for seismically active areas. Also taught as MAE 6130. (Sp)

CEE 6180  Dynamics and Vibrations  3
Fundamentals of two-dimensional and three-dimensional rigid body dynamics, including Newtonian, Lagrangian, and Leavit Energy Methods. Equations of motion, mode shapes, and natural frequencies for continuous media and multi degree-of-freedom systems. Prerequisite: MAE 5300 or CEE 6130. Also taught as MAE 6180. (Sp)

CEE 6190  Geographic Information Systems (dual listing 5190) for Civil Engineers  3
Introduction to GIS concepts addressing data structures, spatial entities, and queries. Topics include location referencing methods, data collection techniques, current applications, and institutional and organizational issues. (Sp)

CEE 6200  Pavement Design  3
Analysis and design of flexible and rigid pavements for highways and runways, including the design of overlays. Equal emphasis on current practice and advanced concepts of pavement management. Prerequisite: CEE 3010. (F)

CEE 6210  Transportation Systems Analysis  3
Introduces systems approach to analysis of transportation services and infrastructure. Focuses on basic and advanced concepts, including operations research techniques, simulation, and artificial intelligence. Topics include facility sizing and location, financial and economic analysis of investment projects, and privatization. Prerequisite: CEE 3030 or equivalent. (F)

CEE 6220  Traffic Engineering (dual listing 5220)  3
Topics covered include characteristics, measurements, and analysis of volume, speed, density, and travel time; capacity and level of service analysis; signalization and traffic control devices. (Sp)

CEE 6230  Geometric Design of Highways (dual listing 5230)  3
Principles of highway location and planning, with full consideration of economic, environmental, and other impacts. Capacity analysis of intersections and highways, passing-lane design, and risk-cost based horizontal and vertical alignment design. Introduction to design software through coursework and term projects. Prerequisite: CEE 3210. (Sp)

CEE 6240  Urban and Regional Transportation (dual listing 5240) Planning  3
Examination of travel demand forecasting, data collection, and survey data analysis techniques. Focuses on transportation-land use interactions and impact of market-based policies on travel demand. Theories and applications of traditional and advanced trip distribution, mode choice, and route assignment models. (F)

CEE 6250  Transportation Data/Safety Analysis  3
Statistical analysis of transportation data, including safety and risk assessment. Regression and multivariate analysis, such as discriminant analysis, canonical correlation, and factor analysis. In-depth study of selected methodologies for analyzing transportation safety and designing counter measures. Prerequisite: CEE 3210 or equivalent. (F)

CEE 6260  Public Transportation  3
Principles of planning, design, and operation of transit systems in urban and rural areas. Determination of optimal route alignments, schedules, and station/stop spacings. Exploration of innovations in financing and pricing, including cost-cutting techniques. (Sp)

CEE 6270  Traffic Operations Analysis  3
Traffic flow fundamentals, macroscopic and microscopic models of traffic flow, shock wave analysis, car following principles, queuing systems, and simulation. (Sp)

CEE 6290  Transportation Network Analysis  3
Analytical approaches and algorithms to the formulation and solution of the equilibrium assignment problem for transportation networks. Emphasis on user equilibrium, comparison with system optimal stochastic user equilibrium, origin-destination matrix estimation, and network design problems. (Sp)

CEE 6300  Earth Structures  3
Design and construction of earth and rockfill dams, embankments, excavations, and retaining structures. Prerequisites: CEE 4300, 5350/6350. (Sp)

CEE 6310  Environmental Geotechnics  3
Geotechnical aspects of environmental systems, with concentration on waste containment facilities. Prerequisite: CEE 4300. (F)

CEE 6320  Deep Foundations  3
Analysis, design, and construction of deep foundations with emphasis on driven piles and drilled shafts. Prerequisites: CEE 4300, 5350/6350. (Sp)

CEE 6330  Ground Reinforcement, Improvement, and Treatment  3
Theory, design, and construction methods for ground reinforcement, improvement, and treatment applications. Prerequisites: CEE 4300, 5350/6350. (F)

CEE 6340  Laboratory and Field Methods in Geotechnical Engineering  3
Subsurface investigation, field testing and instrumentation, and laboratory testing. Prerequisites: CEE 4300, 5350/6350. (F)

CEE 6350  Foundation Analysis and Design (dual listing 5350)  3
Applications of theories studied in soil mechanics. Design considerations for various foundation types, including shallow foundations, driven piles, drilled shafts, walls, soil anchorages, and mechanically-stabilized earth support systems. Field investigation techniques and computer applications. Prerequisite: CEE 4300. (F)

CEE 6360  Geotechnical Principles  3
Theoretical soil behavior. Hydraulic conductivity, compression, and shearing properties. Prerequisites: CEE 4300, 5350/6350. (F)

CEE 6370  Buried Structures  3
Analysis of structural performance of buried structures (pipes, tanks, silos, etc.) using principles of mechanics of materials and finite element methods. Prerequisite: CEE 4300. (Sp)

<tbody>
<tr>
<td>CEE 6620</td>
<td>Field Sampling and Analysis of Environmental Systems</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Explores applied field sampling, as well as field and laboratory techniques used in the monitoring of environmental media. Includes theory and practice of field sampling, and measurement of physical, chemical, and biological processes in the environment. Prerequisite: Consent of instructor. (F)</td>
<td></td>
</tr>
<tr>
<td>CEE 6630</td>
<td>Process Dynamics in Environmental Engineering Systems</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Fundamental principles used in analysis and simulation of environmental systems. Emphasizes reaction kinetics, mass transfer, reactor analysis and design, and development of mathematical models to describe natural and engineered environmental systems. Prerequisites: CEE 3500, 3510. (F)</td>
<td></td>
</tr>
<tr>
<td>CEE 6640</td>
<td>Physical and Chemical Environmental Process Engineering</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Principles of physical and chemical environmental engineering processes, including sedimentation, filtration, gas transfer, aeration, absorption, ion exchange, membrane processes, coagulation, flocculation, precipitation, oxidation, reduction, and disinfection. Process modeling and analysis applications in treatment of water, wastewater, industrial wastes, vapor treatment, and soil remediation. Prerequisites: CEE/SOL 5620, CEE 6930. Corequisite: CEE 6670. (Sp)</td>
<td></td>
</tr>
<tr>
<td>CEE 6650</td>
<td>Biological Processes in Environmental Engineering</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Theory and design of biological processes used in environmental engineering. Stoichiometric, energetic, and kinetic analysis of biological treatment processes; modeling and design of suspended growth and fixed-film processes for treatment of municipal, industrial, and hazardous wastes; nutrient removal; and bioremediation. Prerequisites: CEE 6630, 6640, 6710. (Sp)</td>
<td></td>
</tr>
<tr>
<td>CEE 6660</td>
<td>Environmental Data Analysis and Experimentation</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Data analysis and experimental design for environmental science and engineering. Graphical data analysis, parametric and nonparametric statistics, frequency distributions, hypothesis testing, propagation of variance, censored data, correlation and causation, parameter estimation, factorial experimental design and response surfaces, environmental monitoring and uncertainty. (F)</td>
<td></td>
</tr>
<tr>
<td>CEE 6670</td>
<td>Environmental Process Laboratory</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Laboratory testing to demonstrate physical, chemical, and biological principles utilized in environmental engineering processes. Corequisites: CEE 6640, 6650. (Sp)</td>
<td></td>
</tr>
<tr>
<td>CEE 6680</td>
<td>Soil-based Waste Management</td>
<td>2</td>
</tr>
<tr>
<td>(dual listing 5680)</td>
<td>Engineering management of wastes present in the vadose zone, including extraction, containment, and biological, chemical, and physical destruction technologies for sustainable agriculture and environmental quality. Aspects include engineering characterization, problem definition, treatment, and monitoring. Analysis and design emphasized through problems, examinations, and report writing. Prerequisites: CEE/PUBH 3610, CEE 3640, 3870, CEE/BIE 3670. Also taught as BIE 6680/5680. (Sp)</td>
<td></td>
</tr>
<tr>
<td>CEE 6690</td>
<td>Natural Systems Engineering</td>
<td>3</td>
</tr>
<tr>
<td>(dual listing 5690)</td>
<td>Application of modeling tools commonly utilized in water resources systems for assessment of environmental impacts associated with engineered systems. Topics include: water resources modeling; physical, chemical, and biological process effects; assessment methods; data integration techniques; and impact assessment. Prerequisites: CEE/PUBH 3610, CEE 3640, 3510, 3640. (F)</td>
<td></td>
</tr>
<tr>
<td>CEE 6700</td>
<td>Field Sampling Techniques for Natural Systems Engineering</td>
<td>2</td>
</tr>
<tr>
<td>(dual listing 5700)</td>
<td>Provides students with hands-on approach to utilizing several of the most commonly applied spatial and temporal sampling techniques for data acquisition in support of natural systems modeling. Explores standard and advanced surveying techniques for water quality, stream geomorphology, and hydraulics, utilizing levels, total stations, laser levels, GPS, and hydroacoustic technologies. Integrative sampling strategies across spatial and temporal scales emphasized for multi-disciplinary studies. Taught first half of fall semester. Prerequisite: CEE 6690/5690. (F)</td>
<td></td>
</tr>
<tr>
<td>CEE 6710</td>
<td>Environmental Engineering Microbial Ecology</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Principles of microbial ecology applied to engineered and natural systems. Prerequisites: BIOL 3300, CEE/PUBH 3610. (F)</td>
<td></td>
</tr>
<tr>
<td>CEE 6720</td>
<td>Natural Systems Modeling</td>
<td>3</td>
</tr>
<tr>
<td>(dual listing 5720)</td>
<td>Provides hands-on approach to utilizing several of the most commonly applied modeling tools employed to estimate physical, chemical, and biological impacts of existing and proposed water resource systems. Focuses on utility and limitation of specific modeling approaches, while also stressing integrative multi-disciplinary nature of impact assessment frameworks. Prerequisite: CEE 6690/5690. (Sp)</td>
<td></td>
</tr>
<tr>
<td>CEE 6730</td>
<td>Analysis and Fate of Environmental Contaminants</td>
<td>3</td>
</tr>
<tr>
<td>(dual listing 5730)</td>
<td>Provides students with understanding of methods used in analysis of environmental samples for organic contaminants. Examines various properties and processes determining the fate of organic contaminants in the environment. Taught first half of spring semester. Prerequisites: CHEM 1210, 2300. Also taught as PUBH 6730/5730. (Sp)</td>
<td></td>
</tr>
<tr>
<td>CEE 6740</td>
<td>Environmental Quality Modeling</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Development and application of mathematical models for conventional and toxic pollutants in environmental systems. Description of advection, dispersion, sediment transport, partitioning, interphase transfer, and transformation kinetics applied to organic and inorganic pollutants. Equilibrium, steady state, and nonsteady systems. Prerequisite: CEE 6630. (Sp)</td>
<td></td>
</tr>
<tr>
<td>CEE 6750</td>
<td>Eco-Hydraulics for Natural Systems Engineering</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Provides students with advanced multi-disciplinary modeling course in the application of hydraulics and water resource modeling in light of impact assessment frameworks for natural systems modeling. Focuses on application on one-dimensional and two-dimensional hydraulic modeling as basis for examining quantitative impacts on stream and riparian ecosystems under altered flow, as well as channel conditions with particular emphasis on fish and aquatic macro-invertebrates. Prerequisite: CEE 6690/5690. (F)</td>
<td></td>
</tr>
<tr>
<td>CEE 6800</td>

### Chemistry and Biochemistry (CHEM)

See Department of Chemistry and Biochemistry, pages 205-211.

**CHEM 1010 BPS Introduction to Chemistry**
For nonscience majors. Includes basic chemical concepts and a survey of the various branches of chemistry. Heavy emphasis on everyday applications to problems involving environmental pollution, radioactivity, energy sources, and human health. No prerequisites. (F,Sp)

**CHEM 1110 BPS General Chemistry I**
For nonscience majors. Progression made from the basic tenets of general chemistry to introduction to organic chemistry, with ascent in terms of practical importance and sophistication. Prerequisite: Math ACT score of at least 23, or MATH 1050 or higher. (F,Sp)

**CHEM 1115 General Chemistry Laboratory**
(formerly CHEM 1130)
Laboratory course designed to accompany CHEM 1110. Covers basic aspects of general chemistry. (Sp)

**CHEM 1120 BPS General Chemistry II**
Continuation of CHEM 1110. Continued coverage of organic chemistry, along with introduction to biochemistry. Prerequisite: CHEM 1110. (Sp)
### Course Descriptions

<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1210</td>
<td>Principles of Chemistry I</td>
<td>4</td>
<td>First of a two-semester sequence, covering fundamentals of chemistry. Designed for science and engineering students. Prerequisite: Math ACT score of at least 25, or MATH 1050 or higher. High school chemistry recommended. (F.Sp)</td>
</tr>
<tr>
<td>CHEM 1215</td>
<td>Chemical Principles Laboratory I</td>
<td>1</td>
<td>Laboratory course designed to be taken concurrently with CHEM 1210. Experiments cover elementary kinetics, electrochemistry, gravimetric analysis, chromatography, and equilibria. Prerequisite: CHEM 1215. (F.Sp)</td>
</tr>
<tr>
<td>CHEM 1990</td>
<td>Introduction to the Chemistry and Biochemistry Professions</td>
<td>1</td>
<td>Seminar-format course designed to expose students to exciting areas of chemistry and biochemistry. Includes seminars on topical issues presented by faculty and invited guests. Discussion of career options. (Sp)</td>
</tr>
<tr>
<td>CHEM 2300</td>
<td>Principles of Organic Chemistry</td>
<td>3</td>
<td>Shape, bonding, nomenclature, stereochemistry, physical properties, and reactivity of organic molecules is covered for a range of molecules, beginning with simple alkanes and finishing with some of the more complex abiotic and biotic organic molecules known today. Prerequisite: CHEM 1210. (F)</td>
</tr>
<tr>
<td>CHEM 2310</td>
<td>Organic Chemistry I</td>
<td>4</td>
<td>First of a two-semester sequence, covering physical properties, nomenclature, mechanisms of reactions, and biological relevance of organic and bioorganic molecules. Prerequisite: CHEM 1220. (F)</td>
</tr>
<tr>
<td>CHEM 2315</td>
<td>Organic Chemistry Laboratory I</td>
<td>1</td>
<td>Laboratory course designed to accompany CHEM 2310. Covers basic aspects of experimental organic chemistry. Prerequisites: CHEM 1210 and 1215. (F)</td>
</tr>
<tr>
<td>CHEM 2320</td>
<td>Organic Chemistry II</td>
<td>4</td>
<td>Continuation of CHEM 2310. Prerequisite: CHEM 2310 or CHEM 2300 and permission of instructor. (Sp)</td>
</tr>
<tr>
<td>CHEM 2325</td>
<td>Organic Chemistry Laboratory II</td>
<td>1</td>
<td>Continuation of CHEM 2315. Prerequisite: CHEM 2315. (Sp)</td>
</tr>
<tr>
<td>CHEM 3000 QI</td>
<td>Quantitative Analysis</td>
<td>3</td>
<td>Basic theory and laboratory practice in analytical chemistry, including introduction to multiple equilibria and chemical separation methods. Prerequisites: CHEM 1215, 1225, MATH 1050 or higher. (F)</td>
</tr>
<tr>
<td>CHEM 3005</td>
<td>Quantitative Analysis Laboratory</td>
<td>1</td>
<td>One three-hour laboratory per week. Must be taken concurrently with CHEM 3000. Prerequisites: CHEM 1215, 1225, MATH 1050. (F)</td>
</tr>
<tr>
<td>CHEM 3070 QI</td>
<td>Physical Chemistry</td>
<td>3</td>
<td>Chemical applications of quantum mechanics, periodic table, and chemical bonding. Spectroscopy. Statistical thermodynamics. Chemical kinetics. Rate laws. Reaction mechanisms. Theories of reaction rates. Prerequisite: CHEM 3060. (Sp)</td>
</tr>
<tr>
<td>CHEM 3080 CI</td>
<td>Physical Chemistry Laboratory I</td>
<td>1</td>
<td>Experimental work to accompany CHEM 3060. Corequisite: CHEM 3060. (F)</td>
</tr>
<tr>
<td>CHEM 3090 CI</td>
<td>Physical Chemistry Laboratory II</td>
<td>1</td>
<td>Continuation of CHEM 3080. Experimental work to accompany CHEM 3070. Corequisite: CHEM 3070. (Sp)</td>
</tr>
<tr>
<td>CHEM 3510</td>
<td>Intermediate Inorganic Chemistry</td>
<td>2</td>
<td>Survey of basic structure, bonding, and reactivity across the periodic table. Prerequisites: CHEM 1220, 2310, and 2315. (Sp)</td>
</tr>
<tr>
<td>CHEM 3520</td>
<td>Inorganic Chemistry Laboratory</td>
<td>1</td>
<td>Covers basic aspects of inorganic synthesis and compound characterization. Corequisite: CHEM 3510. (Sp)</td>
</tr>
<tr>
<td>CHEM 3565 DSC</td>
<td>Environmental Chemistry***</td>
<td>3</td>
<td>Survey of issues and chemical nature of environmental problems, including air, soil, and water pollution. Prerequisite: CHEM 1010 or 1120 or 1220. (Sp)</td>
</tr>
<tr>
<td>CHEM 3700</td>
<td>Introductory Biochemistry</td>
<td>3</td>
<td>Brief survey of the chemistry of biologically important compounds and their role in microbial, animal, and plant metabolism. Prerequisite: CHEM 2300 or 2310. (Sp)</td>
</tr>
<tr>
<td>CHEM 3710</td>
<td>Introductory Biochemistry Laboratory</td>
<td>1</td>
<td>Laboratory course designed to accompany CHEM 3700. Corequisite: CHEM 3700. (Sp)</td>
</tr>
<tr>
<td>CHEM 4250</td>
<td>Cooperative Experience</td>
<td>1-2</td>
<td>Planned work outside the University. Specific experience must receive prior approval for credit to be earned. Consult advisor or department head for details. (F.Sp,Su)</td>
</tr>
<tr>
<td>CHEM 4800 CI</td>
<td>Research Problems</td>
<td>1-3</td>
<td>Directed undergraduate research. Departmental permission required. (F.Sp,Su)</td>
</tr>
<tr>
<td>CHEM 4890 CI</td>
<td>Undergraduate Biochemistry Seminar I</td>
<td>1</td>
<td>Presentation of scientific seminars, critiquing of and participation in departmental seminars, scientific literature searching, accessing and using scientific databases, career preparation and development. To be taken during senior year of biochemistry major. (F)</td>
</tr>
<tr>
<td>CHEM 4891 CI</td>
<td>Undergraduate Biochemistry Seminar II</td>
<td>1</td>
<td>Continuation of CHEM 4890. Prerequisite: CHEM 4890. (Sp)</td>
</tr>
<tr>
<td>CHEM 4990 CI</td>
<td>Undergraduate Seminar</td>
<td>2</td>
<td>Writing and speaking skills necessary for presenting scientific information. (F.Sp)</td>
</tr>
<tr>
<td>CHEM 5070</td>
<td>Biophysical Chemistry</td>
<td>3</td>
<td>Biological applications and theories of physical chemistry. Equilibrium, thermodynamics, chemical kinetics, transport properties, and spectroscopy. Prerequisites: CHEM 1220, MATH 1220; and PHYX 2120 or 2220. (F)</td>
</tr>
<tr>
<td>CHEM 5520</td>
<td>Advanced Inorganic Chemistry</td>
<td>2</td>
<td>Advanced treatment of the structure/bonding/reactivity relationships across the periodic table. Prerequisites: CHEM 3070, 3510. (F)</td>
</tr>
<tr>
<td>CHEM 5530</td>
<td>Advanced Synthesis Laboratory</td>
<td>2</td>
<td>Laboratory course in advanced synthetic techniques, including vacuum lines, inert atmosphere, Schlenk manipulations, liquid ammonia solvent, and tube furnace reactions. Prerequisites: CHEM 2325, 3070, 3520. (Sp)</td>
</tr>
<tr>
<td>CHEM 5640</td>
<td>Instrumental Analysis</td>
<td>3</td>
<td>Theory and application of physiochemical methods of analysis. Chromatography. Selected electrochemical and optical methods. Prerequisites: CHEM 3005, 3080. (Sp)</td>
</tr>
<tr>
<td>CHEM 5650</td>
<td>Instrumental Analysis Laboratory</td>
<td>2</td>
<td>Laboratory course to accompany CHEM 5640. Two three-hour labs per week. Prerequisites: CHEM 3005, 3080. (Sp)</td>
</tr>
<tr>
<td>CHEM 5670</td>
<td>Intermediate Environmental Chemistry**</td>
<td>3</td>
<td>Survey of chemical processes and pollutants in the environment. Sampling and analysis of pollutants to determine chemical fate. Prerequisites: CHEM 3000 and 3005; CHEM 3070 recommended. (Sp)</td>
</tr>
</tbody>
</table>
**Course Descriptions**

**CHEM 5680**  Environmental Chemistry Laboratory**  2  
Laboratory course to accompany CHEM 5670. Field sampling and laboratory analysis of air, water, and soil samples. Method building and hypothesis testing. Prerequisites: CHEM 3000, 3005. Corequisite: CHEM 5670. (Sp)

**CHEM 5700**  General Biochemistry I  3  
General biochemistry for science majors, including proteins, enzymes, catalysis, bioenergetics, and catabolic metabolism. Prerequisite: CHEM 2320. (F)

**CHEM 5710**  General Biochemistry II  3  
Continuation of CHEM 5700. General biochemistry for science majors, including anabolic metabolism, DNA, RNA, and protein synthesis. Prerequisite: CHEM 5700. (Sp)

**CHEM 5720**  General Biochemistry Laboratory  2  
Prerequisite: CHEM 5710 (may be taken concurrently). (Sp)

**CHEM 5730**  Genomic Technologies  4  
Provides theoretical background in genomics/proteomics technologies and laboratory training in advanced techniques. Topics include: whole genome sequencing, transcriptome and proteome characterization, DNA and expressed gene libraries, and operation of modern genomics laboratory equipment. Prerequisites: BIOL 1220, 3200; CHEM 3700 or 5710; CS 2200; STAT 3000. Also taught as BIOL 5730. (Sp)

**CHEM 6010**  Quantum Chemistry***  3  
Quantum mechanics applied to chemical problems. Theory of atoms and molecules. Prerequisites: CHEM 3070, MATH 2250. (F)

**CHEM 6020**  Molecular Spectroscopy***  3  
Spectroscopy of atoms and molecules. Prerequisite: CHEM 6010. (Sp)

**CHEM 6250**  Curricular Practical Training**  1-6*  
Work experience tied to academics, in the graduate student's major field of study, either chemistry or biochemistry, for which the student is paid. Prerequisite: Permission of department head prior to enrollment. (F,Sp,Su)

**CHEM 6300**  Advanced Modern Organic Chemistry***  3  
Covers topics in molecular structure, reaction mechanisms of organic molecules, and physical organic chemistry. Prerequisites: CHEM 2320, 3070. (F)

**CHEM 6500**  Reactivity and Mechanisms in Inorganic Chemistry***  3  
Inorganic reactions and mechanisms relevant to areas of main group, transition metals, and bioinorganic and organometallic chemistry. Prerequisite: CHEM 5520. (Sp)

**CHEM 6510**  Chemical Applications of Group Theory  1-6*  
Introduction to symmetry point groups and theorems of group theory for application to structure, bonding, and spectroscopy. Some familiarity with linear algebra is recommended. Prerequisite: CHEM 3070. (F)

**CHEM 6600**  Modern Chemical Analysis***  3  
Methodology and statistical treatment of chemical data, experimental design, quality control, and chemical separations. Prerequisite: CHEM 5640. (Sp)

**CHEM 6700**  Advanced Biochemistry I  3  
Advanced-level biochemistry course intended for biochemistry MS and PhD students. Covers proteins, enzyme mechanism, nucleic acid structure and function, and catabolic metabolism at a level appropriate for students preparing for the qualifying examination. This course (which is co-instructed with CHEM 5710, with additional projects for CHEM 6710) cannot be taken for credit by students who have previously taken CHEM 5700 for credit. (F)

**CHEM 6710**  Advanced Biochemistry II  3  
Advanced-level biochemistry course intended for biochemistry MS and PhD students. Covers anabolic metabolism and bioinformation processes at a level appropriate for students preparing for the qualifying examination. This course (which is co-instructed with CHEM 5710, with additional projects for CHEM 6710) cannot be taken for credit by students who have previously taken CHEM 5710 for credit. (Sp)

**CHEM 6720**  Advanced Biochemistry Laboratory  2*  
To obtain advanced laboratory skills, students complete specific laboratory experiments in research laboratories of departmental faculty members. (F,Sp)

**CHEM 6730**  Principles of Enzymology*  3  
Mechanisms of enzyme action, emphasizing recent advances in enzymology, including theory and modern experimental approaches to elucidation of mechanism. Prerequisite: CHEM 5700 or equivalent. (Sp)

**CHEM 6740**  Cellular Communication by Small Molecules and Proteins**  3  
Using post-translational modifications, small molecules, and protein motifs in cellular communication. Variances in the communication systems related to disease state and/or cell stress and therapeutic strategies to manipulate the communication systems. Prerequisite: CHEM 5700 or equivalent. Also taught as BIOL 6740. (Sp)

**CHEM 6750**  Principles of Structural Biology  3  
General principles of protein and nucleic acid structure. Approaches to understanding biological function through structural analysis. Prerequisite: CHEM 5700 or 6700 or instructor approval. (F)

**CHEM 6760**  Principles of Bioenergetics***  3  
Global biological energy cycles including carbon, nitrogen, and sulfur cycles; respiration; electron transfer; and energy transduction. Prerequisite: CHEM 5700 or equivalent. (F)

**CHEM 6910**  Special Problems in Chemistry  1-9*  
Selected problems in chemistry. Registration permitted only with written permission from department head. (F,Sp,Su)

**CHEM 6970**  Thesis Research  1-10*  
Research for MS degree. (F,Sp,Su)

**CHEM 6990**  Continuing Graduate Advisement  1-9*  
(F,Sp,Su)

**CHEM 7020**  Statistical Mechanics ***  3  
Statistical mechanics with applications to research problems of current interest. Prerequisite: CHEM 6010.

**CHEM 7030**  Special Topics in Physical Chemistry (Topic)**  3  
Covers special areas of current interest and activity in physical chemistry. (F,Sp)

**CHEM 7300**  Reactions and Synthesis in Modern Organic Chemistry**  3  
Reactions of modern organic chemistry and their application to organic synthesis. Prerequisite: CHEM 6300. (Sp)

**CHEM 7310**  Molecular Structure/Spectroscopy of Organic Compounds*  3  
Modern methods of predicting and determining molecular structure of organic compounds using advanced computational and spectroscopic tools. Prerequisite: CHEM 6300. (F)

**CHEM 7330**  Special Topics in Organic Chemistry (Topic)**  3  
Covers special areas of current interest and activity in organic chemistry. Prerequisite: CHEM 6300. (F,Sp)

**CHEM 7500**  Coordination Chemistry***  3  
Theory and spectroscopy of transition metal coordination complexes. Prerequisites: CHEM 3070, 6500, 6510. (Sp)

**CHEM 7510**  Bioinorganic Chemistry***  1-3  
Advanced systematic study of metal/organic chemical structure and function. Prerequisite: CHEM 6500. (F)

**CHEM 7530**  Special Topics in Inorganic Chemistry (Topic)**  3  
Topics of current interest in inorganic chemistry. Prerequisite: CHEM 6500. (Sp)

**CHEM 7600**  Analytical Spectroscopy**  3  
Practical description of spectroscopy-based analysis, emphasizing instrumentation and methods. Prerequisites: CHEM 5640, graduate standing, or instructor's permission. (Sp)
### Course Descriptions

**CHEM 7610** Chemical Separations* 3 
Survey of theory and practice of modern chemical separations, including extractions, chromatography, distillation, and phase separations. Prerequisite: CHEM 5640 or instructor’s permission. (F)

**CHEM 7620** Electrochemistry*** 3 
Survey of electrochemistry with emphasis on electrochemical analysis. Prerequisite: CHEM 5640. (F)

**CHEM 7640** Special Topics in Analytical Chemistry (Topic)* 1-3* 
Topics may include electronics from the scientist's perspective, laser-based spectroscopy, mass spectrometry, and chemometrics. Prerequisite: CHEM 6600. (F,Sp)

**CHEM 7770** Special Topics in Biochemistry (Topic)* 2-3* 
Topics of current interest in biochemistry.

**CHEM 7800** Seminar 1* 
Graduate seminar. (F,Sp)

**CHEM 7970** PhD Dissertation Research 1-12* 
(F,Sp,Su)

**CHEM 7990** Continuing Graduate Advisement 1-9* 
(F,Sp,Su)

*Taught 2006-2007. **Taught 2007-2008. ***Contact Department of Chemistry and Biochemistry for information about when this course will be taught. ©Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

**CHIN 3100** DHA Readings in Contemporary Chinese Culture 3 
Introduction to contemporary Chinese culture through readings from newspapers and other source materials. Prerequisite: CHIN 2020 or equivalent. (Sp)

**CHIN 3510** Chinese Business Language 3 
Designed to develop students’ business Chinese language skills in speaking, listening, reading, and writing, as well as cultural competence. Classwork focuses on Chinese business terms, business conversation, and basic business practices, as well as the Chinese cultural environment. Prerequisite: CHIN 2020 or equivalent. (F)

**CHIN 3880** Individual Readings in Chinese 1-2 
Individual study of selected readings in Chinese. Designed to broaden student’s reading comprehension beyond the level addressed in CHIN 3020. Prerequisite: Instructor’s permission. (F,Sp)

**CHIN 4920** Chinese Language Tutoring 1* 
Allows students to develop tutoring skills by assisting professors in lower-division courses or fulfilling instructional duties for a comparable amount of time in the language laboratory, public schools, or similar activities with departmental approval. May be repeated to a maximum of 3 credits. Prerequisite: Permission of instructor. (F,Sp)

**CHEM 7640** Special Topics in Analytical Chemistry (Topic)* 1-3* 
Topics of current interest in biochemistry.

**CHEM 7770** Special Topics in Biochemistry (Topic)* 2-3* 
Topics of current interest in biochemistry.

**CHEM 7800** Seminar 1* 
Graduate seminar. (F,Sp)

**CHEM 7970** PhD Dissertation Research 1-12* 
(F,Sp,Su)

**CHEM 7990** Continuing Graduate Advisement 1-9* 
(F,Sp,Su)

*Taught 2006-2007. **Taught 2007-2008. ***Contact Department of Chemistry and Biochemistry for information about when this course will be taught. ©Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

### Classics (CLAS)

See Department of Classics, Philosophy, and Speech Communication, pages 364-379.

**CLAS 1100** The Latin and Greek Element in English* 3 
Survey of classical word roots in English, with a view to enhancing students’ comprehension of English vocabulary and its Indo-European heritage. (F,Sp)

**CLAS 3210** Classical Mythology* 3 
Introduces major myths of the Classical world. Explores how these myths serve as keys to understanding the documents and arts of Classical civilization. (F,Sp)

### Communicative Disorders and Deaf Education (COMD)

See Department of Communicative Disorders and Deaf Education, pages 221-227.

**COMD 2400** Orientation and Observation 1* 
Introduces students to the professional responsibilities required of communicative disorders and deaf education specialists in a variety of employment settings. Observation of normal/abnormal communication abilities. Language, hearing, and speech disorders. (F,Sp)

**COMD 2500** Language, Speech, and Hearing Development 3 

**COMD 2910** CI Sign Language I 4 
Introduction to American Sign Language and Deaf Culture. Basic study of grammatical structure of ASL, as well as the history and folklore associated with the culture. Students have ample opportunities for laboratory practice of ASL. Course taught in a no-voice, total immersion atmosphere. (F,Sp,Su)

<tr>
<td>COMD 6690</td>
<td>Early Intervention for Infants and Toddlers with Vision Impairment and Their Families</td>
<td>1-3</td>
<td>Students will gain an understanding of and develop skills in working with infants and toddlers who are visually impaired and their families. (F,Sp,Su)</td>
</tr>
<tr>
<td>COMD 6700</td>
<td>Practicum in Education of Children who are Deaf and Hard of Hearing</td>
<td>1-3</td>
<td>Supervised diagnostic and remedial casework in education of the deaf and hard of hearing. (F,Sp,Su)</td>
</tr>
<tr>
<td>COMD 6710</td>
<td>Mainstreaming Children who are Deaf and Hard of Hearing</td>
<td>3</td>
<td>Rationale and procedures used to successfully mainstream children with hearing loss. Also methods of evaluating programs where children with hearing loss are to be placed. (F)</td>
</tr>
<tr>
<td>COMD 6720</td>
<td>Serving Preschoolers with Vision Impairments in Center Based Settings</td>
<td>1-3</td>
<td>To provide students with knowledge and skills in working with children with visual impairments in the preschool setting. (F,Sp,Su)</td>
</tr>
<tr>
<td>COMD 6730</td>
<td>Children with Multiple Disabilities and Hearing Loss</td>
<td>3</td>
<td>Students will gain a basic understanding of the problems and characteristics of children who have hearing loss plus one or more disabling conditions. Teaching strategies will also be discussed. (F)</td>
</tr>
<tr>
<td>COMD 6740</td>
<td>Teaching Reading to Deaf and Hard of Hearing Children</td>
<td>3</td>
<td>Exploration of resources and methods used to teach reading to deaf and hard of hearing children. Discussion of current research regarding the effectiveness of these methods and ideas for improving reading instruction. (F)</td>
</tr>
<tr>
<td>COMD 6750</td>
<td>Teaching the English Language to Individuals who are Deaf and Hard of Hearing</td>
<td>3</td>
<td>Evaluation and teaching of the English language to individuals who are deaf and hard of hearing. Language development and remediation using structure, modeling, natural approach, and grammar. Prerequisite: COMD 2500. (F)</td>
</tr>
<tr>
<td>COMD 6760</td>
<td>Early Intervention for Children who are Deaf and Hard of Hearing</td>
<td>3</td>
<td>Family-centered early intervention for infants and young children who are deaf and hard of hearing. Identification, testing, hearing aids, communication, auditory, language, and emerging literacy programming, parent and family programs, mentoring. (F)</td>
</tr>
<tr>
<td>COMD 6770</td>
<td>Audiology and Teachers of Children who are Deaf and Hard of Hearing</td>
<td>3</td>
<td>Focuses on the fields of hearing science and audiology and how information from these disciplines relates to education of deaf and hard of hearing children. (F)</td>
</tr>
<tr>
<td>COMD 6780</td>
<td>Socio-Cultural Aspects of Deafness</td>
<td>3</td>
<td>Leads students to understand how society, political institutions, and education have impacted the Deaf culture. (F)</td>
</tr>
<tr>
<td>COMD 6790</td>
<td>Psychological Principles and Individuals who are Deaf and Hard of Hearing</td>
<td>3</td>
<td>Psychological theories and research used to describe the deaf and hard of hearing. Exploration of principles that can be used in helping these individuals achieve emotional well-being. Also taught as PSY 6790/4790. (Sp)</td>
</tr>
<tr>
<td>COMD 6800</td>
<td>Student Teaching—Day-School Program</td>
<td>6-12</td>
<td>Full-time student teaching in a day-school program for the deaf. (F)</td>
</tr>

<td>COMD 6810</td>
<td>Disorders of Phonation</td>
<td>3</td>
<td>Advanced consideration of issues and methods in the diagnosis and treatment of voice problems associated with the larynx and the respiratory tract. (Sp)</td>
</tr>
<tr>
<td>COMD 6820</td>
<td>Principles of Intervention for Children who are Deaf and Hard of Hearing</td>
<td>3</td>
<td>Application of teaching principles to classrooms for the deaf and hard of hearing. Practicum with children is part of this course. Prerequisites: COMD 6640, 6650, and permission of instructor. (Sp)</td>
</tr>
<tr>
<td>COMD 6830</td>
<td>Student Teaching—Residential</td>
<td>6-12</td>
<td>Full-time student teaching at a residential school for the deaf. Prerequisite: Permission of instructor. (Sp)</td>
</tr>
<tr>
<td>COMD 6850</td>
<td>Seminar in Communicative Disorders and Deaf Education</td>
<td>1-3</td>
<td>Research and analysis of selected topics. (F,Sp,Su)</td>
</tr>
<tr>
<td>COMD 6860</td>
<td>Interdisciplinary Training</td>
<td>3</td>
<td>Provides interdisciplinary training in assistive technology, focusing on assistive devices related to powered mobility, seating and positioning, computer access, and augmentative and alternative communication. Prerequisite: Departmental permission. (F)</td>
</tr>
<tr>
<td>COMD 6870</td>
<td>Interdisciplinary Training in Assistive Technology I</td>
<td>3</td>
<td>Provides interdisciplinary training in assistive technology, focusing on assistive devices related to cognitive, hearing, visual, and dual sensory impairments. Funding issues also addressed. (Sp)</td>
</tr>
<tr>
<td>COMD 6880</td>
<td>Methods and Procedures in Early Intervention</td>
<td>3</td>
<td>Teaches specific methods and procedures necessary for working in early intervention programs serving families of infants and young children with hearing loss, including assessment procedures, specific home visit delivery procedures, and methods of working with support professionals and team members. (Sp)</td>
</tr>
<tr>
<td>COMD 6900</td>
<td>Independent Study</td>
<td>1-9</td>
<td>Prerequisite: Permission of instructor. (F,Sp,Su)</td>
</tr>
<tr>
<td>COMD 6910</td>
<td>Sign Language III</td>
<td>4</td>
<td>Students receive individual, detailed feedback concerning their expressive ASL skills. Students present material in American Sign Language, with a focus on improving identified areas of weakness. Cooperative learning is encouraged. Experiences with fluent users of ASL and interpreter mentors via the lab provide students with basic interpreting skills. Prerequisites: COMD 2910 and 3910; or instructor approval. (F,Sp)</td>
</tr>
<tr>
<td>COMD 6920</td>
<td>Sign Language IV</td>
<td>4</td>
<td>Basic concepts of linguistics are explored, as well as an in-depth analysis of ASL history, grammatical structure, and ASL poetry. Students apply linguistic principles to the analysis of American Sign Language, with ample opportunities to interact with fluent users of ASL via the lab experience. Prerequisites: COMD 2910 and 3910; or permission of instructor. (Sp)</td>
</tr>

Course Descriptions

Computer Science (CS)

See Department of Computer Science, pages 228-237.

CS 1020  Campus Computing and Beyond  1
Hands-on laboratory for CS 1030. Introduces the campus network and the Internet. Emphasizes general problem-solving strategies and skills. No prerequisites. (F,Sp,Su)

CS 1030  Foundations of Computer Science, and the Application of Computer Science to the Investigation of Physical Systems and Phenomena  3
(formerly CS 1010 BPS)
Investigation of computers and computing in today’s society, including the basic scientific and mathematical concepts that underlie computer science, computing, and computer systems. No prerequisites. (F,Sp,Su)

CS 1050  Problem Solving with Computers  3
Investigates problem-solving using methodologies of computer science. Emphasizes techniques used by computer scientists to solve problems, as well as the scientific method. Develops problem-solving methodology for both new and traditional computer applications. (F,Sp)

CS 1400  Introduction to Computer Science—CS 1  3
(formerly CS 1700)
Introduction to science of problem solving, programming, program development, algorithm analysis, and data structures. Students will learn to develop correct software in a current programming language environment. Computer science majors must enroll in CS 1405 concurrently with CS 1400. Prerequisite: Grade of C- or better in MATH 1050 or Math ACT score of at least 25. (F,Sp,Su)

CS 1405  Introduction to Computer Science—CS 1 Lab  1
(formerly CS 1710)
One-hour lab taught in conjunction with CS 1400. Students learn to develop correct software in a hands-on structured environment. Computer science majors are required to pass both the laboratory and the lecture, and are required to enroll in CS 1400 concurrently with CS 1405. For students not majoring in computer science, this laboratory is advised, but not required, for CS 1400. Prerequisite: Grade of C- or better in MATH 1050 or Math ACT score of at least 25. (F,Sp,Su)

CS 1410 QI  Introduction to Computer Science—CS 2  3
(formerly CS 1720 QI)
Introduction to science of problem solving, programming, program development, algorithm analysis, and data structures. Students will learn to develop correct software in a current programming language environment. Prerequisite: Grade of C- or better in CS 1400. (F,Sp,Su)

CS 2250  Cooperative Work Experience  1-9
Provides credit for students working at a participating firm under faculty supervision. Prerequisites: 2.5 GPA; permission of instructor. (F,Sp,Su)

CS 2420 QI  Algorithms and Data Structures—CS 3  3
(formerly CS 2220 QI)
Introduction to science of problem solving, programming, program development, algorithm analysis, and data structures. Students will learn to develop correct software in a current programming language environment. Prerequisites: 2.5 GPA; grade of C- or better in CS 1410. (F,Sp,Su)

CS 2450 QI  Software Engineering  3
(formerly CS 2370 QI)
Science of small and large software project development, taught in team and project management format. Students complete a well-documented functional product, working in teams of four to five students. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. (F,Sp)

CS 2550  Computer Organization  3
Fundamental building blocks of digital computers, and the underlying theories upon which these building blocks are assembled. Introduction to information representation, number systems, combinational logic circuits, sequential logic circuits, and instruction sets. Programming such systems at the assembly level. Prerequisites: 2.5 GPA; grade of C- or better in both CS 1400 and MATH 1050 and Math ACT score of at least 23. (F,Sp)

CS 2810  Computer Organization and Architecture  3
(formerly CS 3550)
Architecture of a computer system, as viewed by the programmer. Topics such as memory management, RISC vs. CISC, pipelining, parallelism, interrupts, and networking discussed in detail. Includes several homework assignments, at least one of which deals with interrupts and interrupt-driven applications. Prerequisites: 2.5 GPA; grade of C- or better in CS 2550. Not available to pre-Computer Science majors. (F,Sp)

CS 3000 QI  Undergraduate Seminar  1
Serves as a capstone course for the pre-computer science curriculum, as well as an introduction to the advanced standing curriculum. Also includes discussion of computer science as a career and discussion of the advanced standing test. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420, or concurrent enrollment in CS 2420. (F,Sp)

CS 3010 DSC/QI  Information Acquisition, Analysis, and Presentation  3
Introduces students to use of scientific method and computer technology in analysis of multi-faceted problem, and presentation of that analysis. Each semester, built around single topic such as global warming. Prerequisites: Completion of University Studies Computer and Information Literacy (CIL) and Quantitative Literacy (QL) requirements. (F,Sp,Su)

CS 3100  Operating Systems and Concurrency  3
Design and implementation of operating systems. UNIX will be used as one example, but all categories of operating systems will be discussed. Presentation of the concept of concurrency as it applies to operating system design and application. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (F,Sp)

CS 3410 DSC/QI  Algorithm Development: JAVA/Internet  3
Introduces students to algorithm development and programming for JAVA-based applications, especially those dealing with the Internet. Examines computer-based representation, storage, retrieval, and transmission of information, along with the algorithms used to perform such operations. Prerequisites: CS 1400 and completion of University Studies Computer and Information Literacy (CIL) and Quantitative Literacy (QL) requirements. (F,Sp,Su)

CS 3420 QI  Algorithm Development: C# and .NET  3
Introduces students to algorithm development and programming for C#-based applications, especially those dealing with the Internet. Examines computer-based representation, storage, retrieval, and transmission of information, along with the algorithms used to perform such operations. Prerequisites: CS 1400 and completion of University Studies Computer and Information Literacy (CIL) and Quantitative Literacy (QL) requirements. (Sp)

CS 3500 DSC/QI  Algorithm Development: Visual BASIC/Graphical User  3
Introduces students to algorithm development and programming in Visual BASIC, with special emphasis on graphical user interfaces for Windows applications and environments. Prerequisites: Completion of University Studies Computer and Information Literacy (CIL) and Quantitative Literacy (QL) requirements. (Su)

CS 3510 DSC/QI  Algorithm Development: COBOL/Business  3
Introduces students to algorithm development and programming in COBOL. Special emphasis given to algorithms and algorithms for use in business and information processing applications. Prerequisites: Completion of University Studies Computer and Information Literacy (CIL) and Quantitative Literacy (QL) requirements. (F)

CS 4250  Cooperative Work Experience  1-9
Provides credit for students working at a participating firm under faculty supervision. Prerequisites: 2.5 GPA; permission of instructor. (F,Sp,Su)

CS 4700  Programming Languages  3
Theories of programming design and implementation. Introduction to variety of programming languages, showing how they represent trade-offs with respect to these theories. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (F,Sp)

CS 4720  Computer Networking  1
Focuses on client/server model, which is the dominant architectural model for today's computer systems. Explores the network underlying this model,
Course Descriptions

specifically examining the topology, protocol(s), user interface(s), and hardware. Emphasizes the general theory and functionalities underlying the client/server model and computer networks in general. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (F)

CS 4730  Computer Networking II  3
Focuses on client/server model, which is the dominant architectural model for today’s computer systems. Emphasizes the specifics of the products of today’s dominant network companies, which are currently Novell and Microsoft. Completion of this course prepares students for certification under such products. Prerequisites: 2.5 GPA; grade of C- or better in CS 4720. Not available to pre-Computer Science majors. (Sp)

CS 4950  Undergraduate Research  1-4
Participation in research projects, under supervision of a computer science faculty member. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420 and permission of instructor. Not available to pre-Computer Science majors. (F,Sp,Su)

CS 5000  Theory of Computability  3
Theory of computation, including presentation of computability, decidability, and complexity. Includes formal grammars, finite and pushdown automata, and turing machines. Prerequisites: 2.5 GPA; grade of C- or better in both CS 2420, MATH 3310. Not available to pre-Computer Science majors. (Sp)

CS 5050  Advanced Algorithms  3
Study of algorithms and their analysis, including: design by induction, algorithms involving sequences and sets, graph algorithms, geometric algorithms, algebraic algorithms, reductions, NP-completeness, and parallel algorithms. Prerequisites: 2.5 GPA; grade of C- or better in both CS 2420, MATH 3310. Not available to pre-Computer Science majors. (F)

CS 5070  Computer Science Capstone  1
Students develop a project that includes the use of a significant portion of the computer science topics presented in the core curriculum. Completion of the project requires an oral presentation and a detailed written report. Prerequisites: 2.5 GPA; instructor permission. Not available to pre-Computer Science majors. (F,Sp,Su)

CS 5100  Graphical User Interfaces and Windows Programming  4
Design principles of GUIs and philosophy, structure, and programming in Windows environments. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (Sp)

CS 5200  Distributed and Network Programming  4
Introduction to programming concepts and techniques for distributed and networked environments. Explores concurrency, process synchronization, network protocols, connectionless and connection-oriented communications, network architectures and topology, load balancing, and transmission media. Prerequisites: 2.5 GPA; grade of C- or better in CS 3100. Not available to pre-Computer Science majors. (F)

CS 5300  Compiler Construction  4
Review of programming language structures, translation, loading, execution, and storage allocation. Compilation of declarations, expressions, statements, and procedures/functions. Organization and design of a compiler. Prerequisites: 2.5 GPA; grade of C- or better in CS 2610 and 4700. Not available to pre-Computer Science majors. (F)

CS 5370  Advanced Software Engineering  3
Advanced software engineering concepts, including the improvement process, requirements acquisition, development process models, object-oriented design, and software testing. Students must receive credit for both CS 5370 and CS 6370. Prerequisites: 2.5 GPA; grade of C- or better in CS 2450. Not available to pre-Computer Science majors. (F)

CS 5400  Computer Graphics I  4
Introduction to concepts of graphical techniques. Digital and pictorial representation of information. Prerequisites: 2.5 GPA; grade of C- or better in all of the following: CS 2420; MATH 1220; MATH 2250 or 2270. Not available to pre-Computer Science majors. (F)

CS 5450  Multimedia Systems*  4
Introduction to concepts and techniques underlying multimedia-based systems. Deals with both the hardware aspects of multimedia systems (e.g., transfer rates, capacities, resolution, etc.) and the software requirements of such systems. Each student required to develop a multimedia-based system. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (Sp)

CS 5500  Parallel Algorithms  3
Examines basic techniques for designing parallel algorithms, such as balanced trees, pointer jumping, partitioning, pipelining, accelerated cascading, list ranking, and tree contraction. Consideration of classic parallel algorithms in graphs, merging, sorting, planar geometry, string matching, and randomized techniques. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (Sp)

CS 5600  AI: Problem Solving and Expert Systems  3
Introduction to practical artificial intelligence methods for building problem solving and expert systems. Covers search, knowledge representation, and reasoning. Students will develop projects in LISP and expert system shells. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (F)

CS 5650  CVPRIP II: Computer Vision, Pattern Recognition, and Image Processing  3
Introduction to theories and techniques of machine intelligence, with emphasis on pattern recognition, computer vision, fuzzy logic, and neural networks. Prerequisites: 2.5 GPA; grade of C- or better in all of the following: CS 2420, MATH 2270, STAT 2000 or 3000. Not available to pre-Computer Science majors. (F)

CS 5660  Bioinformatics Tools and Techniques  3
Introduction to tools and techniques used in the study of bioinformatics, genomics, and computational biology. Explores usage of these tools and techniques for storage, retrieval (mining), processing, visualization, and analysis of biological information. Prerequisite: Permission of instructor. (F)

CS 5670  Computer Science Applications in Bioinformatics II  3
Builds on material presented in CS 5660, presenting more advanced topics in bioinformatics, such as data mining, machine learning, and evolutionary algorithms. Students cannot receive credit for both CS 5670 and 6670. Prerequisites: 2.5 GPA; grade of C- or better in CS 5660. Not available to pre-Computer Science majors. (Sp)

CS 5700  Object-Oriented Software Development  3
Study of fundamental object-oriented principles, e.g., abstraction, encapsulation, classification, and inheritance. Application of these principles in all phases of software development, with emphasis on analysis, design, and testing. Introduction to software design patterns. Prerequisites: 2.5 GPA; grade of C- or better in CS 2450. Not available to pre-Computer Science majors. (F)

CS 5800  Introduction to Database Systems  3
Comparison of various database systems. Normal forms, protection, concurrency, security and integrity, and distributed and object-oriented systems. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (F)

CS 5850  Systems Analysis  3
Theory and practice of analysis, design, and implementation of information systems. Students will construct an information system. Prerequisites: 2.5 GPA; grade of C- or better in CS 5800. Not available to pre-Computer Science majors. (Sp)

CS 5890  Topics in Computer Science (Topic)  1-4
Current topics in computer science as determined by advances in the field. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420 and permission of instructor. Not available to pre-Computer Science majors. (F,Sp,Su)

CS 5950  Independent Study  3
Provides for independent study of selected topics. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420 and permission of instructor. Not available to pre-Computer Science majors. (F,Sp,Su)

CS 6050  Computational Geometry: Algorithms and Applications  3
Computational geometry is the study of computation involving geometric objects, such as lines, polygons, and circles. It has application in bioinformatics, graphics,

## Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>CS 7100</strong></td>
<td>Advanced MultiAgent Systems*</td>
<td>3</td>
<td>Advanced topics in multiAgent systems, including algorithms for finding solutions, social welfare with preferences and utilities, multiAgent learning, and distributed search problems. Prerequisites: 3.0 GPA; grade of B- or better in CS 6100 (or permission of instructor) and enrollment in Computer Science master’s or PhD program. (Sp)</td>
</tr>
<tr>
<td><strong>CS 7350</strong></td>
<td>Patterns in Computer Software Systems</td>
<td>3</td>
<td>Investigates patterns in computer software systems and how they can be better cataloged, understood, and reused to improve development productivity and quality. Includes readings of current literature, writing research papers, and participation in group discussions. Prerequisites: 3.0 GPA; grade of B- or better in CS 5700 and enrollment in Computer Science master’s or PhD program. (Sp)</td>
</tr>
<tr>
<td><strong>CS 7380</strong></td>
<td>Software Testing*</td>
<td>3</td>
<td>Explores current issues, including testing object-oriented software, test data generation and sufficiency, domain-based testing, functional testing, and code-based testing. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F)</td>
</tr>
<tr>
<td><strong>CS 7450</strong></td>
<td>Advances in Computer Security Research*</td>
<td>3</td>
<td>Covers recent research directions in computer security. Reviews current state of the field, and explores possible research directions for further work. Prerequisites: 3.0 GPA; grade of B- or better in CS 6450 and enrollment in Computer Science master’s or PhD program. (F)</td>
</tr>
<tr>
<td><strong>CS 7500</strong></td>
<td>Fault-Tolerant Systems</td>
<td>3</td>
<td>Advanced study of design and implementation of operating systems for fault-tolerant parallel and distributed systems. Topics chosen will provide students with knowledge of current research issues, practices, and techniques for the design and development of such systems. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (Sp)</td>
</tr>
<tr>
<td><strong>CS 7550</strong></td>
<td>Interconnection Networks for Parallel Computer Systems</td>
<td>3</td>
<td>Explores the design of large-scale parallel processing systems generally suited for multiprocessor implementation. Emphasizes interconnection patterns among the processing elements in parallel processors. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F)</td>
</tr>
<tr>
<td><strong>CS 7650</strong></td>
<td>Advanced CVPRIP: Computer Vision, Pattern Recognition, and Image Processing</td>
<td>3</td>
<td>Investigates new developments in representation and processing of gray-level and color images, including thresholding, segmentation, curve detection, etc. Also examines visual perception, as well as statistical and syntactical pattern classification. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (Sp)</td>
</tr>
<tr>
<td><strong>CS 7660</strong></td>
<td>Robotics and Autonomous Systems</td>
<td>3</td>
<td>Surveys current advances in robotic and autonomous systems. Reviews current scientific literature in the field, with emphasis on understanding the problems solved and the approaches used. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F)</td>
</tr>
<tr>
<td><strong>CS 7670</strong></td>
<td>Data Mining and Machine Learning</td>
<td>3</td>
<td>Covers cutting-edge research in machine learning, data mining, and intelligent information retrieval. Focuses on how these topics relate to data mining. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (Sp)</td>
</tr>
<tr>
<td><strong>CS 7680</strong></td>
<td>Advanced Computer Vision*</td>
<td>3</td>
<td>Emphasizes current topics and research in the general area of computer vision. Focuses on detection, recognition, tracking, and analysis of human activity by using computer vision. Prerequisites: 3.0 GPA; grade of B- or better in CS 5650 and enrollment in Computer Science master’s or PhD program. (Sp)</td>
</tr>
<tr>
<td><strong>CS 7900</strong></td>
<td>Seminar</td>
<td>2</td>
<td>Series of lectures and presentations on current topics in computer science. Students participate by giving presentations. As part of the course, students are expected to prepare their dissertation proposal. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (Sp)</td>
</tr>
<tr>
<td><strong>CS 7910</strong></td>
<td>Special Topics in Intelligent Systems (Topic)</td>
<td>3</td>
<td>Discussion of current topics in intelligent systems, such as parallelism and software systems. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. Taught on demand. (F,Sp,Su)</td>
</tr>
<tr>
<td><strong>CS 7920</strong></td>
<td>Special Topics in Parallelism (Topic)</td>
<td>3</td>
<td>Topics of current interest in the area of parallelism. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)</td>
</tr>
<tr>
<td><strong>CS 7930</strong></td>
<td>Special Topics in Software Systems (Topic)</td>
<td>3</td>
<td>Topics of current interest in the area of software systems. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)</td>
</tr>
<tr>
<td><strong>CS 7940</strong></td>
<td>Brain Building</td>
<td>3</td>
<td>Examines the state of the techniques associated with the building of artificial brains. Prerequisites: 3.0 GPA; instructor’s permission and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)</td>
</tr>
<tr>
<td><strong>CS 7950</strong></td>
<td>Reading and Reports</td>
<td>3</td>
<td>Directed reading on cutting-edge topics in computer science. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)</td>
</tr>
<tr>
<td><strong>CS 7960</strong></td>
<td>Topics in Bioinformatics (Topic)</td>
<td>3</td>
<td>Topics of current interest in bioinformatics. Prerequisite: Permission of instructor. (F,Sp,Su)</td>
</tr>
<tr>
<td><strong>CS 7970</strong></td>
<td>Dissertation Research</td>
<td>1-15</td>
<td>PhD dissertation research. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)</td>
</tr>
<tr>
<td><strong>CS 7990</strong></td>
<td>Continuing Graduate Advisement</td>
<td>1-6</td>
<td>Continuing PhD-level advisement. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)</td>

## Dance West Summer, Dance Education (DE)

See Department of Health, Physical Education and Recreation, pages 321-331.

**DE 1700W** | Jazz | 1 | Provides training and experience in the styles of jazz, one of the popular forms of American dance. (Su) |
| **DE 1800W** | Dance West Performance | 1-3 | Students will learn dances to be performed in “The West: America’s Odyssey.” Prerequisite: Audition. (Su) |
| **DE 1840W** | Beginning Classical Ballet | 2 | A discipline in recognized classic form. Includes barre exercises, port de bras, and center practice in balance, jumping, and turns. (Su) |
| **DE 1870W** | Beginning Classical Modern Dance | 2 | Designed to develop coordination, ease, and poise in handling the body. Focuses on dance as an art using the body as a medium of expression. (Su) |
| **DE 2850W** | Intermediate Classical Ballet | 2 | Barre exercises, port de bras, and center practice in balance, jumps, beats, and turns with more emphasis on exactness and precision of line. Prerequisite: One year of ballet or permission of instructor. (Su) |
Course Descriptions

DE 2880W Intermediate Classical Modern Dance 2
Stresses alignment of the skeletal structure, freedom and movement of the torso, and technical work enabling the dancer to secure the natural axis of balance. Prerequisite: One year modern dance or permission of instructor. (Su)

DE 3800W Advanced Ballet 3
Pointe and Pas de Deux. Intensified center floor work concentrating on longer adagio and allegro combinations. Prerequisite: Five years of ballet or permission of instructor. (Su)

DE 4500W American Character Ballet 3
History through movement from seventeenth century European dance through contemporary styles. (Su)

Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Electrical and Computer Engineering (ECE)

See Department of Electrical and Computer Engineering, pages 253-259.

ECE 1000 Introduction to Electrical and Computer Engineering 2
(formerly ECE 1010)
Basic concepts and techniques for electrical and computer engineering majors. Introduction to analog and digital electronics with fundamental laboratory skills. One lecture and one lab. Prerequisites: MATH 1050 and 1060, or AP Calculus score of at least 3 on the AB test, or Math ACT score of at least 27. Enrollment limited to electrical engineering and computer engineering majors only. (F)

ECE 2210 Electrical Engineering for Nonmajors 4
(formerly ECE 2200)
Introduction to electrical engineering, including DC circuits, electronic circuits, digital circuits, and power circuits. Not for ECE majors. Three lectures, one lab. Prerequisite: MATH 1210. Concurrent enrollment in PHYS 2220 is suggested. (F,Sp)

ECE 2270 Electrical Circuits 4
(formerly ECE 2410)
Introduction to electrical circuits and basic circuit elements. Circuit theory, analysis techniques, and introduction to design. AC analysis. First-order inductive and capacitive circuits. Operational amplifiers. AC steady-state analysis. Introduction to computer-aided design and analysis. Three lectures, one lab. Corequisite or Prerequisite: MATH 2250. (F,Sp)

ECE 2700 Digital Circuits 4
(formerly ECE 2530)
Combination of combinational and sequential logic circuits with discrete and programmable logic devices. Simulations and timing analysis. Use of CAD tools. Design of digital systems. Three lectures, one lab. (F,Sp)

ECE 3260 DSC/QI Science of Sound 3
Applications of principles of acoustics (study of sound) to everyday life. Explores physical acoustics, psychoacoustics, musical acoustics, and architectural acoustics. Uses algebra and reasoning to solve problems in acoustics. (F)

ECE 3410 Microelectronics I 4
Fundamentals of transistors, operational amplifiers, and other integrated circuits, along with their utilization in amplifiers, switches, and other applications. Laboratory work required. Prerequisite: ECE 2270. Prerequisite or corequisite: ECE 3860. (F,Sp)

ECE 3620 Circuits and Signals 3
Continuation of basic circuit concepts. Second-order response, time-domain analysis of higher-order systems. Impulse response and convolution. Transform domain analysis of circuits and other systems. Some lab and computational work required. Prerequisites: MATH 2250, ECE 2270, CS 1410. Corequisite or prerequisite: PHYS 2220. (F,Sp)

ECE 3640 Signals and Systems 3
Systems realizations. Time and transform domain analysis of discrete-time systems. Vector-space concepts and Fourier series. Fourier transforms in continuous and discrete time. Some lab and computational work required. Prerequisite: ECE 3620. (F,Sp)

ECE 3710 Microcomputer Hardware and Software 4
Synthesis of microcomputer systems, including interfacing, component analysis, signaling requirements, and programming. Covers architecture basics, including instruction sets, assembly language programming, loading, timing, and interrupts. Includes hands-on implementation. Three lectures, one lab. Prerequisites: ECE 2270, 2700, CS 1410. (F,Sp)

ECE 3720 Microcomputer Systems Programming 3
Advanced assembly language and systems programming concerned with performance and I/O. Study of modern computer architecture issues, such as caching, pipelining, concurrent instruction execution, memory access time, and role and structure of device drivers. Prerequisite: ECE 3710. (Sp)

ECE 3820 CI Design I 2
Students work on an engineering project as part of a multidisciplinary team. Emphasizes engineering design, project management, technical writing, technical presentations, and project documentation. Prerequisite: Professional standing. (Sp)

ECE 3860 Transmission Lines 1
Covers transmission line analysis and high frequency effects, including reflections, standing waves and interference, VSWR, crosstalk, and coupling. Intended to be taken by computer engineers. Meets simultaneously with ECE 3870 during the first five weeks of the semester. Prerequisites: ECE 2270, PHYS 2220, MATH 2250. This course is not currently being offered. For information about when it may be offered, contact the department.

ECE 3870 Electromagnetics I 3
Discussion of Maxwell’s equations, electromagnetic waves, power and energy, reflection and refraction processes, transmission lines, waveguides, and antennas. Explores electrostatic and magnetostatic fields produced by charge and current distributions, as well as electromagnetic forces and materials. Prerequisites: ECE 2270, MATH 2210, 2250, PHYS 2220. (F,Sp)

ECE 4250 Internship/Co-op 3
Planned, career-related work experience in industry. Students must register with USU Co-op Office and have program approved by the ECE co-op advisor. Written report required. Prerequisite: Professional standing. (F,Sp,Su)

ECE 4650 Optics I 3
dual listing 6650)
Topics include mathematics of wave motion, electromagnetic theory of light, light propagation, geometrical optics, and superposition of waves. For graduate credit, additional reading, recitation, use of optical-design software, and/or writing will be required. Also taught as PHYS 4650/6650. Prerequisite: ECE 3870. (F)

ECE 4680 Optics II 3
dual listing 6680)
Topics include polarization, interference, diffraction, Fourier optics, coherence theory, and the quantum nature of light. For graduate (6000-level) credit, additional reading, recitation, use of optical-design software, and/or writing will be required. Prerequisite: PHYS/ECE 4650 or PHYS/ECE 6650. Also taught as PHYS 4680/6680. (Sp)

ECE 4740 Computer and Data Communications 3
Systems approach to computer and data communications. Includes transmission lines, hardware controllers, computer interfaces, and protocols relating to local and wide area networks. Prerequisite: ECE 3720. (F)

ECE 4840 CI Design II 3
Individual or team engineering project, including design, development, and testing. Interdisciplinary projects strongly encouraged. Design reviews and written progress reports required. Prerequisite: ECE 3820. (F,Sp,Su)

ECE 4850 CI Design III 2
Individual or team engineering project, including design, development, and testing. Interdisciplinary projects strongly encouraged. Written and oral reports required, describing technical details of design project. Prerequisite or corequisite: ECE 4840. (F,Sp,Su)
Course Descriptions

**ECE 4930** Special Studies for Undergraduates 1-3
Independent or group study of engineering problems not covered in regular course offerings. (F,Sp,Su)

**ECE 5230** Spacecraft Systems Engineering 3
Spacecraft communications, telemetry systems, and command and data handling. Introduction to astrodynamics and orbit design. Electrical power generation and storage. Spacecraft subsystems (e.g., guidance, navigation, and control). Prerequisite: MATH 2250. (F)

**ECE 5240** Space System Design 3
Students in teams perform a space system design involving all aspects, including technical, cost, and schedule. Class is linked to national design competitions and/or current USU spacecraft design projects. Prerequisite: ECE 5230 or MAE 5520. Also taught as MAE 5530. (Sp)

**ECE 5310** Control Systems 3
Study of analog and computer controlled systems, classical and modern control system design methods, s-domain and z-domain transfer function models, state space, dynamics of linear systems, and frequency domain analysis and design techniques. Introduction to controllability and observability, and full-state pole placement controller design. Laboratory work required. Prerequisite: ECE 3640. (F)

**ECE 5320** Mechatronics 4
Principles, modeling, interfacing, and signal conditioning of motion sensors and actuators. Hardware-in-the-loop simulation and rapid prototyping of real-time closed-loop computer control of electromechanical systems. Modeling, analysis, and identification of discrete-time or sampled-data dynamic systems. Commonly used digital controller design methods. Introduction to nonlinear effects and their compensation in mechatronic systems. Laboratory work and a design project required. Three lectures and one lab. Prerequisite: ECE 5310. (Sp)

**ECE 5340** Mobile Robots 4
Hardware, including embedded processors, sensors, DC motors, interface electronics, wheeled platforms, and battery power. Software, including low-level device drivers and mobile robot simulation. Algorithms, including reactive and planning approaches. Advanced sensors. Mobile robot kinematics, dynamics, and control. A project is required. (F)

**ECE 5420** Microelectronics II 3
Design of electronic circuits for applications in instrumentation, communication, control, and power systems. Prerequisite: ECE 3410. (Sp)

**ECE 5430** Applied CMOS Electronics (dual listing 6430) 3
Analysis, design, and application of digital and analog MOS integrated circuits in electronic systems. Includes device-level VLSI, fabrication technology, and semiconductor device physics. Prerequisites: ECE 3410 and 5630. (Sp)

**ECE 5460** Digital VLSI System Design I 3
Team-oriented design of large digital systems using hardware description languages. Schematic capture and standard-cell libraries. Behavioral system modeling and simulation. Preparation of behavioral models for floor-planning, testability, and design synthesis. Extensive use of CAD tools. Design project. Prerequisite: ECE 5530. (Sp)

**ECE 5470** Digital VLSI System Design II 3
Continuation of ECE 5460/6460. Logic synthesis, timing analysis, and structural simulation and back annotation. Design refinement to the point of final mask artwork production. Design validation through VLS, DRC, and gate-level or device-level simulation. Formal methods of circuit verification. Extensive use of CAD tools. Design project. Prerequisite: ECE 5460/6460. (F)

**ECE 5480** Electromagnetic Compatibility 3
Introduces concepts and techniques of electromagnetic compatibility to students who will be designing and working with high-speed electronic systems. Prerequisites: ECE 3640, 3870. (Sp)

**ECE 5530** Digital System Design 3
Presents modern top-down, bottom-up approach to design of digital systems, emphasizing programmable devices. Extensive use of CAD tools. Designing with ABEL, and introduction to designing with Verilog HDL. Laboratory work required. Prerequisite: ECE 2700. (F,Sp)

**ECE 5560** Introduction to Digital Signal Processing 3
Theory and principles of digital signal processing, including discrete-time signals and systems, Z-Transforms, Fourier analysis, FIR and IIR digital filter design, discrete Fourier transforms, and multi-rate processing. Laboratory work required. Prerequisite: ECE 3640. (F)

**ECE 5640** Real-Time Processors 4
Real-time processor architectures and methods used for digital signal processing. Includes C and assembly language programming, modern DSP architectures, tools for real-time system development, and finite word-length effects. Laboratory includes implementation of hardware-based real-time systems. Three lectures, one lab. Prerequisites: ECE 3640 and 3710. (Sp)

**ECE 5660** Communication Systems I 3
Explores fundamentals of analog and digital communication systems. Focuses on modulation, demodulation, detection, and synchronization. Prerequisites: ECE 3640 and MATH 5710; or graduate standing. (Sp)

**ECE 5740** Concurrent Programming 3
Analysis of problems associated with the use of multiple threads and processes (e.g., deadlock, livelock, and starvation) and methods for avoiding them. Proper usage of synchronization operations (mutual exclusion, critical sections, semaphores, and monitors) and communication operations (message passing, remote procedure calls, remote method invocation, and rendezvous). Extensive programming exercises in C and JAVA. (F)

**ECE 5750** High-Performance Microprocessor Architecture 3
Modern architecture fundamentals, instruction set analysis and design, pipelined and superscalar architectures, software-hardware interaction, memory hierarchy, and virtual memory stresses processor-specific low-level code optimization. Prerequisite: ECE 3710 or equivalent. (Sp)

**ECE 5770** Microcomputer Interfacing 4
Design of hardware and software interfaces to microcomputers for instrumentation and control applications. Three lectures, one lab. Prerequisite: ECE 3710. (Sp)

**ECE 5780** Real-Time Systems 4
Real-time system design and implementation of basic concepts, including interrupts and controllers, context switch, concurrent processes, semaphores, message passing, rate monotonic and deadline scheduling, hardware system design and test issues, and typical engineering practice. Includes hands-on implementation. Three lectures, one lab. (F)

**ECE 5800** Electromagnetics II 3
General plane wave solution of Maxwell’s equations, potential functions, radiation, 2-D solution to Laplace’s equation, and fundamental electromagnetic theory. Prerequisite: ECE 3870. (F)

**ECE 5810** Microwaves I 3
Impedance matching, microwave network analysis, waveguides, nonlinear elements, analysis and design of power dividers, filters, and ferromagnetic circuits. Laboratory work required. Prerequisite: ECE 5800. (Sp)

**ECE 5820** Electromagnetics Laboratory 3
Measurement theory, practice, and safety. Design and characterization of microwave filters, amplifiers, and antennas. Also includes practical considerations. Prerequisites: ECE 3870 and 5420; or equivalent. (F)

**ECE 5850** Antennas I 3
Theory and application of electromagnetic radiation and radiating structures. Emphasis on antenna designs for modern wireless communications and radar systems. Prerequisite: ECE 3870. (F)

**ECE 5870** Wireless Communication and Laboratory 3
Characteristics of the physical channel, fading and multipath, frequency reuse, interference, and system capacity. Equalization, diversity, and channel coding. Laboratory experiments focus on design issues and tradeoffs in a wireless communication system. Prerequisites: ECE 3870, 5660. (F)

**ECE 5930** Special Topics in Electrical and Computer Engineering 1-4
Independent or group study of engineering problems not covered in regular course offerings. (F,Sp,Su)
Course Descriptions

ECE 6010 Stochastic Processes in Electronic Systems 3
Introduction to stochastic processes in communications, signal processing, digital and computer systems, and control. Topics include continuous and discrete random processes, correlation and power spectral density, optimal filtering, Markov chains, and queuing theory. Prerequisite: Graduate status. (F)

ECE 6030 Mathematical Methods for Signals and Systems 3
Signal representation using vector spaces. Linear algebraic techniques for signal modeling and estimation. Optimal detection and estimation algorithms, with applications. Prerequisite: Graduate status. (F)

ECE 6100 Electromagnetics Seminar 1
Weekly seminar or colloquium for advanced electromagnetics students. Taught on demand. (Sp)

ECE 6240 Space Environment and Engineering 3
Study of space environment and models used for engineering analysis. Topics include considerations for engineering in the space environment, such as plasma interactions, debris, chemical reactions, radiation effects, and thermal issues. Prerequisite: MATH 2250. Corequisite: ECE 5230. Also taught as PHYS 6240. (F)

ECE 6250 Graduate Internship/Co-op 1-3
Planned work experience in industry. Detailed program; must have prior approval. Written report required. Prerequisite: Permission of instructor. (F,Sp,Su)

ECE 6320 Linear Multivariable Control 3
Modeling, analysis, and design of multi-input, multi-output control systems, including both state space and transfer matrix approaches, with an emphasis on stability. Prerequisite: ECE 5310 or MAE 5310. Also taught as MAE 6320. (F)

ECE 6340 Spacecraft Attitude Control 3
Spacecraft attitude dynamics and controls. Spin stabilized, three axis, and dual spin modes. Attitude determination techniques. Prerequisite: ECE 5310 or MAE 5310. Also taught as MAE 6340. (Sp)

ECE 6350 Robotics 3
Fundamentals of robotic systems, including kinetics, kinematics, sensors, actuators, control algorithms, motion planning, and computer systems. Integration of critical design components to develop complete systems. Robotic manipulator analysis and design. Applications in manufacturing, Mobile robots, including wheeled, legged, and alternative locomotion robots. Prerequisite: ECE/MAE 6320 or instructor approval. Also taught as MAE 6350. (Sp)

ECE 6430 Applied CMOS Electronics (dual listing 5430) 3
Analysis, design, and application of digital and analog MOS integrated circuits in electronic systems. Includes device-level VLSI, fabrication technology, and semiconductor device physics. Prerequisites: ECE 5420 and 5530. (Sp)

ECE 6460 Digital VLSI System Design I (dual listing 5460) 3
Team-oriented design of large digital systems using hardware description languages. Schematic capture and standard-cell libraries. Behavioral system modeling and simulation. Preparation of behavioral models for floor-planning, testability, and design synthesis. Extensive use of CAD tools. Design project. Prerequisite: ECE 5530. (Sp)

ECE 6470 Digital VLSI System Design II (dual listing 5470) 3
Continuation of ECE 6460/5460. Logic synthesis, timing analysis, and structural simulation and back annotation. Design refinement to the point of final mask artwork production. Design validation through LVS, DRC, and gate-level or device-level simulation. Formal methods of circuit verification. Extensive use of CAD tools. Design project. Prerequisite: ECE 6460/5460. (F)

ECE 6490 Radar I 3
Emphasizes the system aspects of radar. After introducing the basic concepts of radar, methods for the prediction of radar performance are developed and the principles of CW, FM, MTI, and tracking radars are presented. Prerequisites: ECE 3640 and 5800 or equivalent knowledge. (Sp)

ECE 6560 Spacecraft Navigation 3
Fundamentals of aircraft and spacecraft navigation systems. Techniques in celestial and inertial navigation. Global Positioning System (GPS) principles. Least squares estimation and Kalman filtering for optimal estimation of stochastic systems. Prerequisite: MAE 5310 or ECE 5310 or equivalent. Also taught as MAE 6560. (Sp)

ECE 6600 Computer Networking I 3
Topics include network topology, flow, capacity and queueing analysis, detailed description of the standard layers, and specific networking systems, including local area networks. Some lab work included. (F)

ECE 6620 Introduction to Digital Image Processing 3
Digital processing theory and techniques for two-dimensional signals. Topics include two-dimensional transforms, image perception, sampling, modeling, enhancement, and data compression. Prerequisites: ECE 5630 and 6010. (Sp)

ECE 6650 Optics I 3
Topics include mathematics of wave motion, electromagnetic theory of light, light propagation, geometrical optics, and superposition of waves. For graduate (6000-level) credit, additional reading, recitation, use of optical-design software, and/or writing will be required. Also taught as PHYS 6650/4650. Prerequisite: ECE 3870. (F)

ECE 6670 Communication Systems II 3
Communication over bandlimited channels, equalization, multiple antenna systems, space-time codes, spread spectrum, CDMA, OFDM. Prerequisites: ECE 5660, 6010, 6030. (F)

ECE 6680 Optics II (dual listing 4680) 3
Topics include polarization, interference, diffraction, Fourier optics, coherence theory, and the quantum nature of light. For graduate (6000-level) credit, additional reading, recitation, use of optical-design software, and/or writing will be required. Prerequisite: PHYS/ECE 4650 or PHYS/ECE 6650. Also taught as PHYS 6680/4680. (Sp)

ECE 6750 Concurrent Systems Engineering I 3
Reliable and efficient software design for multiprocessor and multithreaded applications on real-time or embedded systems. Use of CASE tools to develop substantial concurrent programs for single and multiprocessor systems. Prerequisite: BS degree in Electrical and Computer Engineering or Computer Science. (Sp)

ECE 6760 Fault-tolerant Systems 3
Methods for design and implementation of fault-tolerant computer systems, emphasizing small real-time and embedded applications. Detection, assessment, confinement, and treatment of faults. Checkpointing, rollback, and secure protocols. Fault-tolerance on distributed systems. Prerequisite: BS degree in Electrical and Computer Engineering or Computer Science. (F)

ECE 6780 Device Drivers 3
Design and implementation of UNIX and Windows device drivers. Includes hardware/software design tradeoffs in light of modern operating systems. Students implement working device drivers. Prerequisite: ECE 5780. (Sp)

ECE 6800 Electrical Engineering Colloquium 0.5
Weekly seminars or colloquia. Students are normally required to enroll for two semesters. (F,Sp)

ECE 6830 Microwaves II 3
Microwave amplifier design for noise, gain, and power match; microwave semiconductor and vacuum-tube devices; microwave oscillators; and microwave system performance characterization. Laboratory work required. Prerequisite: ECE 5810 or equivalent. (F)

ECE 6930 Special Topics in Electrical Engineering 1-6
Independent or group study in electrical engineering topics, such as automated systems, optics and laser engineering, electro-acoustics, solid-state materials, devices, and intelligent systems engineering. (F,Sp,Su)

ECE 6950 Design Project (F,Sp,Su)

### Economics (ECON)

See Department of Economics, pages 240-250.

#### ECON 1500 BAI
Introduction to Economic Institutions, History, and Principles

3

- Designed to build an understanding of economic institutions, history, and principles. Relationship between private and public sectors of U.S. economy.
- Analysis of major economic institutions, such as property rights, markets, business organizations, labor unions, money and banking, trade, and taxation.
- No prerequisites. (F,Sp)

#### ECON 1550 BSS
Introduction to Environmental and Natural Resource Economics

3

- Introduction to the concepts of economics in the context of environmental and natural resource management. (F)

#### ECON 2010 BSS
Introduction to Microeconomics

3

- Designed to build an understanding of the economics of the marketplace from the perspectives of individual consumer and producer or business. Development and application of microeconomic principles to demonstrate the role and limitations
### Course Descriptions

- **ECON 3030** DSS Introduction to Agribusiness Marketing 3
  Principles and practices used by agribusiness firms to market products. Topics covered include the use of futures markets, international trade, marketing orders, and commodity marketing problems. Prerequisite: ECON 1500. (F,Sp)

- **ECON 3050** DSS Introduction to Agribusiness Management 3
  Application of principles and practices used by managers of agribusiness firms. Prerequisites: ECON 1500, ACCT 2010. (Sp)

- **ECON 3170** Law and Economics 3
  Explains legal and political rules, the organization of government, and other institutional processes. Uses standard microeconomic tools and concepts, such as scarcity, choice, preferences, incentives, and supply and demand. Prerequisite: POLS 1100. Also taught as POLS 3170. (F)

- **ECON 3400** DSS International Economics for Business 3
  Primary issues in international economics as applied to contemporary business problems. Topics include trade patterns and policies, capital markets, and technology transfer. Prerequisite: ECON 2010. (F,Sp,Su)

- **ECON 3900** Independent Reading and Research 1-3
  (F,Sp,Su)

- **ECON 4010** DSS Managerial Economics 3
  Microeconomic principles applied to economic decision-making and policy formulation, with emphasis at the level of business firm and the individual consumer. Designed for undergraduate business and accounting majors. Credit will not be given for both ECON 4010 and 5010. Prerequisites: ECON 1550 or 2010; MATH 1100; STAT 2300. (F,Sp)

- **ECON 4020** Macroeconomics for Managers 3
  Macroeconomic analysis applied to forecasting and understanding fluctuations in the levels of income, employment, and production. Designed for undergraduate business and accounting majors. Credit will not be given for both ECON 4020 and 5000. Prerequisite: ECON 1500. (F,Sp)

- **ECON 4030** CI Agribusiness Finance 3
  Financial considerations in organizing and operating farms, ranches, and agribusiness firms. Prerequisites: ECON 2010, or ECON 3030 and 3050; ACCT 2010. (F)

- **ECON 4310** QI Mathematical Methods for Economics 3
  (dual listing 5310)
  Review of single-variable calculus (differentiation and integration); multivariate calculus (including the chain rule and implicit differentiation); optimization (unconstrained and constrained); linear algebra and applications (including linear programming). Economic applications. Prerequisites: ECON 2010; MATH 1100 or its equivalent. (F)

- **ECON 4950H** Senior Honors Thesis/Project 3
  Creative project that will then be written up, and presented, as a Senior Thesis as required for an Honors Plan. (Sp)

- **ECON 4990** Senior Seminar 1-3
  Introduces students to current research and special topics in economics. (F,Sp)

- **ECON 5000** Microeconomics 3
  Analysis of behavior of consumers and business firms. Application of theory to the solution of real-world problems. Credit will not be given for both ECON 4010 and 5010. Prerequisites: ECON 2010, MATH 1100, and STAT 2300. (F,Sp)

- **ECON 5010** Microeconomics 3
  Analysis of behavior of consumers and business firms. Application of theory to the solution of real-world problems. Credit will not be given for both ECON 4010 and 5010. Prerequisites: ECON 2010, MATH 1100, and STAT 2300. (Sp)

- **ECON 5020** CI Economics and Public Policy 3
  A study of selected federal policies and their impacts on product and factor markets, with major focus on an economic analysis of public policy actions. Prerequisites: ECON 4020 or 5000, ECON 4010 or 5010. (Sp)

- **ECON 5030** Agricultural Marketing and Price Analysis 3
  Agribusiness market strategies and price analysis. Designed for upper-division students. Prerequisite: ECON 4010 or 5010. (F)

- **ECON 5050** Farm and Ranch Planning and Analysis 3
  Economic principles and tools in operation of farm and ranch enterprises. Designed for upper-division students. Prerequisites: ECON 4010 or 5010; and ECON 4000. (Sp)

- **ECON 5100** History of Economic Thought 3
  Origin and development of economic theories of leading thinkers in western civilization. Prerequisite: ECON 2010. (Sp)

- **ECON 5110** DSS Economic History of the United States 3
  Development of agriculture, industry, transportation, and finance from colonial times. Prerequisite: ECON 2010. (F)

- **ECON 5120** Economics of Russia and Eastern Europe, 9th Century to 21st Century 3
  Development of the economics of Russia and Eastern Europe from earliest times to the present, emphasizing the interaction between economic forces and policies of the state. Prerequisite: ECON 2010. Also taught as POLS 5120. (F)

- **ECON 5150** DSS Comparative Economic Systems 3
  History, economic theories, and comparative policies of communist, socialist, and capitalist economies. Problems facing transition economies. Prerequisite: ECON 2010. (Sp)

- **ECON 5300** Industrial Organization—Game Theory 3
  Emphasizes market structure, firm conduct, and economic efficiency. Topics include competition, game theory, monopoly, oligopoly, monopolistic competition, firm strategies, and anti-trust policy in the United States. Prerequisites: ECON 4020 or 5000, ECON 4010 or 5010. (F)

- **ECON 5310** QI Mathematical Methods for Economics 3
  (dual listing 4310)
  Review of single-variable calculus (differentiation and integration); multivariate calculus (including the chain rule and implicit differentiation); optimization (unconstrained and constrained); linear algebra and applications (including linear programming). Economic applications. Prerequisites: ECON 2010; MATH 1100 or its equivalent. (F)

- **ECON 5330** QI Applied Econometrics 3
  Introduction to basic statistics, simple linear regression, multiple regression, and simultaneous equation models for economics. Prerequisites: STAT 2000 or 2300 or 3000. (Sp)

- **ECON 5350** CI Agribusiness, Cooperatives, and Management 3
  Applications of economic and management principles to farm marketing and supply firms. Includes independent work on a set of case studies designed to enhance understanding of current issues in agribusiness and provide practice in solving everyday management problems. Prerequisites: ECON 3050, ECON 4010 or 5010, ECON 4020 or 5000. (Sp)

- **ECON 5400** International and Development Economics 3
  Intermediate-level issues in international trade, international finance, and economic development. Topics include competitive and noncompetitive trade models, trade policy, balance of payments accounting, exchange rates, international lending and investment, economic growth, and poverty alleviation. Prerequisites: ECON 4020 or 5000; ECON 4010 or 5010. (F)

- **ECON 5500** Public Finance 3
  Government fiscal institutions-expenditure programs, budget procedures, tax systems, debt issues, levels of government, and the issues surrounding their operations. Prerequisites: ECON 4020 or 5000, ECON 4010 or 5010. (F)

- **ECON 5560** Natural Resource and Environmental Economics 3
  Economics of developing, managing, and conserving natural resources and the environment. Topics include resource usage and conservation, environmental quality, public and private resource management, and valuation of nonmarket goods. Prerequisite: ECON 1550 or 2010. (Sp)
## Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 5600</td>
<td>Financial Economics</td>
<td>3</td>
<td>Introduction to development of our present system of money, banking, and financial institutions. Analysis of central bank policy, capital markets, speculative markets, and portfolio theory. Prerequisites: ECON 4020 or 5000, ECON 4010 or 5010. (Sp)</td>
</tr>
<tr>
<td>ECON 5660</td>
<td>Training and Organizational Development</td>
<td>2</td>
<td>Theoretical basis for training and development in organizations. Practical experience in the design and development of training and other educational programs in an organizational setting. Prerequisite: ECON 2010. (Sp)</td>
</tr>
<tr>
<td>ECON 5680</td>
<td>Labor Economics</td>
<td>3</td>
<td>Labor force development and behavior, occupational choice and mobility, human capital formation, labor market information and institutions, and manpower policies. Prerequisite: ECON 2010. (Sp)</td>
</tr>
<tr>
<td>ECON 5850</td>
<td>Regional and Community Economic Development*</td>
<td>3</td>
<td>Building on microeconomic theory, models for regional and urban structure and change are explored. Policy decision models are also developed. Prerequisites: ECON 4020 or 5000, ECON 4010 or 5010. (F)</td>
</tr>
<tr>
<td>ECON 5950 CI</td>
<td>Senior Project</td>
<td>3</td>
<td>A current economic problem is identified and analyzed, bringing together other agricultural economics and economics course concepts and methods. (Sp)</td>
</tr>
<tr>
<td>ECON 6000</td>
<td>Macroeconomic Theory I</td>
<td>3</td>
<td>Lays a foundation of advanced macroeconomic analysis, integrating theory, data, and computational methods. Special attention given to real-world issues, with an emphasis on how economists use macro models and data to improve business and public policy decisions. Topics covered include neoclassical and endogenous growth theories, real business cycle and new Keynesian theories of economic fluctuations, monetary theory, macroeconomic policy, and open-economy macroeconomics. (F)</td>
</tr>
<tr>
<td>ECON 6030</td>
<td>Agricultural Marketing</td>
<td>3</td>
<td>Covers a variety of topics relating to price analysis for agricultural commodities. Explores econometric and time series modeling and forecasting of agricultural prices. Includes a section on futures and options, focusing on fundamental and technical analysis. Prerequisite: ECON 6330. (F)</td>
</tr>
<tr>
<td>ECON 6040</td>
<td>Agricultural Production/Policy</td>
<td>3</td>
<td>Includes analysis of marketing margins and a section on food demand and nutrition. Also explores food safety issues. Prerequisite: ECON 6300. (F)</td>
</tr>
<tr>
<td>ECON 6050</td>
<td>Fundamentals of Economics</td>
<td>3</td>
<td>Introduction of economic principles for students entering a master’s degree in the College of Business. Prerequisite: Acceptance into a College of Business master’s degree program. (Su)</td>
</tr>
<tr>
<td>ECON 6060</td>
<td>Research Methods</td>
<td>2</td>
<td>Provides introduction to application of scientific methods in economics, with an emphasis on proposal writing. (Sp)</td>
</tr>
<tr>
<td>ECON 6100</td>
<td>Microeconomic Theory I</td>
<td>3</td>
<td>Provides a rigorous introduction to graduate-level microeconomic theory. While the specific focus is on the theoretical construct of graduate-level microeconomic models, the broad objective of the class is to lay the foundation for empirical applications in microeconomics. To meet this broad objective, the course covers theory of the firm, consumer theory, market structure, theory of public goods and externalities, and welfare economics. (F)</td>
</tr>
<tr>
<td>ECON 6250</td>
<td>Graduate Internship</td>
<td>1-3°</td>
<td>Prerequisites: ECON 6000, 6100, 6330, (F,Sp,Su)</td>
</tr>
<tr>
<td>ECON 6300</td>
<td>Quantitative Analysis for Business and Policy Decisions</td>
<td>3</td>
<td>Provides an introduction to applied mathematical programming, operations research, simulation, risk analysis, adaptive management, and other decision theoretic tools used by government policy makers and managers of firms. (Sp)</td>
</tr>
<tr>
<td>ECON 6330</td>
<td>Applied Econometrics</td>
<td>3</td>
<td>Provides graduate-level introduction to applied regression tools, including: simple and multivariate regression analysis; linear, nonlinear, and qualitative dependent variable models; distributed lags; seemingly unrelated regression; and model specification and validation tests. Prerequisite: Background in statistics and calculus. (F)</td>
</tr>
<tr>
<td>ECON 6500</td>
<td>Introduction to Natural Resource Economics</td>
<td>3</td>
<td>Introduction to the legal and regulatory foundations of natural resource policy, with specific attention to water, minerals, rangelands, forests, fish, and off-site impacts of agricultural and industrial production. Topics include externalities, property rights, public goods, public choice, and public trust. Prerequisite: ECON 4010 or 5010 or 5560. (Sp)</td>
</tr>
<tr>
<td>ECON 6510</td>
<td>Introduction to Environmental Economics</td>
<td>3</td>
<td>Introduction to the foundations of environmental economics. Adaptation of market mechanisms to ameliorate pollution problems and provide amenity services. Methods for determining the value of nonmarketed goods and services. Topics include economic principles regarding social choice and market exchange, as well as current and historical issues involving pollution, environmental regulation, and the effects of environmental regulation on the profitability of private and public entities. Prerequisite: ECON 4010 or 5010 or 5560 or 6500. (F)</td>
</tr>
<tr>
<td>ECON 6520</td>
<td>Practicum in Environmental and Natural Resource Economics</td>
<td>3</td>
<td>Introduction to the application of regional economic models, cost-benefit analysis, and the valuation of amenity and other nonpecuniary resource services for Regulatory Impact Reviews, Environmental Impact Statements, etc. Prerequisite: ECON 5560 or 6500 or 6510. (F)</td>
</tr>
<tr>
<td>ECON 6700</td>
<td>Regional and Community Economic Development</td>
<td>3</td>
<td>Extension of microeconomic foundations of regional and urban economics to recent advances in economic growth and development, economic structure, land-use, public finance, housing, social welfare, environmental quality, and transportation. Prerequisite: ECON 6100. (Sp)</td>
</tr>
<tr>
<td>ECON 6710</td>
<td>Community Planning and Impact Analysis</td>
<td>3</td>
<td>Focuses on tools used by local and regional economic development specialists as they relate to planning and impact assessment. Specific topics will include I/O models, IMPLAN models, and computable CGE modeling approaches as they are used in a planning environment. Prerequisite: ECON 6700. (F)</td>
</tr>
<tr>
<td>ECON 6900</td>
<td>Readings and Conference</td>
<td>1-3°</td>
<td>Directly directed readings. Credits from this course toward any economics graduate degree require approval of the student’s advisory committee, the department graduate committee, and the department head. Prerequisites: ECON 5000 and 5010. (F,Sp,Su)</td>
</tr>
<tr>
<td>ECON 6910</td>
<td>Independent Research</td>
<td>1-3°</td>
<td>Directly directed readings. Credits from this course toward any economics graduate degree require approval of the student’s advisory committee, the department graduate committee, and the department head. Prerequisites: ECON 5000 and 5010. (F,Sp,Su)</td>
</tr>
<tr>
<td>ECON 6970</td>
<td>Thesis Research</td>
<td>1-9°</td>
<td>Master’s level research. (F,Sp,Su)</td>
</tr>
<tr>
<td>ECON 6990</td>
<td>Continuing Graduate Advisement</td>
<td>1-9°</td>
<td>Master’s level advisement. (F,Sp,Su)</td>
</tr>
<tr>
<td>ECON 7060</td>
<td>Research Methods</td>
<td>2</td>
<td>Provides introduction to application of scientific methods in economics, with an emphasis on proposal writing. (Sp)</td>
</tr>
<tr>
<td>ECON 7130</td>
<td>Microeconomic Theory I</td>
<td>3</td>
<td>Provides a rigorous introduction to graduate-level microeconomic theory. While the specific focus is on the theoretical construct of graduate-level microeconomic models, the broad objective of the class is to lay the foundation for empirical applications in microeconomics. To meet this broad objective, the course covers theory of the firm, consumer theory, market structure, theory of public goods and externalities, and welfare economics. (F)</td>
</tr>
</tbody>
</table>
Course Descriptions

**ECON 7140**  Microeconomic Theory II  3  
Extends the theoretical foundations of microeconomics with an emphasis on model building in economics. Topics include static games of complete and incomplete information, dynamic games of complete and incomplete information, imperfectly competitive markets, risk and uncertainty, public goods, general equilibrium, and information economics. Prerequisites: ECON 7130, 7360. (Sp)

**ECON 7150**  Microeconomic Theory III  3  
Explores the uses of microeconomic theory in fields such as Game Theory, Industrial Organization, and Labor Economics. Study of topics such as multi-stage and repeated games, bargaining, principal-agent models of economic behavior, auctions and bidding, labor market discrimination, price discrimination and two-part tariffs, and the labor-leisure choice. Course is based on both classic and contemporary papers in each of these fields. Prerequisite: ECON 7140. (Sp)

**ECON 7230**  Macroeconomic Theory I  3  
Lays a foundation of advanced macroeconomic analysis, integrating theory, data, and computational methods. Special attention given to real-world issues, with an emphasis on how economists use macro models and data to improve business and public policy decisions. Topics covered include neoclassical and endogenous growth theories, real business cycle and new Keynesian theories of economic fluctuations, monetary theory, macroeconomic policy, and open-economy macroeconomics. (F)

**ECON 7240**  Macroeconomic Theory II  3  
Extends the foundations of ECON 7230 with a more in-depth look at the theory and computational aspects of various models of economic growth and business cycles. Prerequisites: ECON 7230, 7360. (Sp)

**ECON 7250**  Macroeconomic Theory III  3  
Focuses on emerging topics in macroeconomics, relying heavily on skills acquired in ECON 7230 and 7240. Topics to be covered include, but are not limited to, endogenous growth, real and monetary business cycle, capital theory, fiscal and monetary policy, and economic transition. Prerequisite: ECON 7240. (F)

**ECON 7310**  Econometrics I  3  
 Begins with a review of probability and statistics. Remainder of course is spent discussing the Classical linear regression model, least squares and maximum likelihood estimation, finite and asymptotic sample properties, inference, prediction, and nonlinear optimization. Prerequisite: ECON 7390. (Sp)

**ECON 7320**  Econometrics II  3  
Extension of ECON 7310, covering topics such as nonspherical disturbances, panel data, simultaneous equations, time series and distributed lag models, and limited and qualitative dependent variable models. Prerequisite: ECON 7310. (F)

**ECON 7330**  Econometrics III  3  
Provides in-depth coverage of current topics/techniques in applied econometric time series analysis, with an emphasis on econometric model development, estimation, and interpretation. Topics include difference equations, lag operators, stationary ARMA processes, modeling economic time series including trends and volatility, testing for trends and unit roots, vector autoregressions, the Kalman filter including the state space representation of a dynamic system, cointegration, and error-correction models. Prerequisite: ECON 7320. (Sp)

**ECON 7350**  Mathematical Economics I  3  
Includes linear equations, matrix algebra, multivariate calculus, static optimization, comparative static analysis, constrained optimization, and Kuhn-Tucker conditions. (F)

**ECON 7360**  Mathematical Economics II  3  
Extends the presentation of ECON 7350 by covering applications of constrained optimization, the envelope theorem and applications, differential equations, dynamic economics, and optimal control. Prerequisite: ECON 7350. (F)

**ECON 7400**  International Trade Theory and Policy I  3  
Focuses on recent developments in the theory of trade and trade policy, including: (1) the incorporation of imperfect competition into the theory of international trade, (2) international factor movements, (3) the empirical investigation of trade flows, and (4) strategic trade policies. Prerequisites: ECON 7140, 7240. (Sp)

**ECON 7410**  International Trade Theory and Policy II  3  
Focuses on the international monetary system and currency markets, with an emphasis on balance of payment adjustment and exchange rate determination. Different exchange rate regimes are introduced, and issues regarding exchange rate overshooting and currency substitution are addressed. Topics covered also include the international banking system, international investment decisions on funding and capital structure, foreign exchange risk hedging and management, and foreign exchange instruments and techniques. Prerequisites: ECON 7130, 7230, 7360. (F)

**ECON 7500**  Resource Economics  3  
Focuses on formal economic models associated with optimal exploitation of renewable and nonrenewable resources. Applications to minerals, groundwater, energy resources, soil, forests, fisheries, rangelands, watersheds, wildlife, etc. Prerequisites: ECON 7140, 7240. (F)

**ECON 7510**  Environmental Economics  3  
Covers the theory of environmental policy. Topics include, but are not limited to, externalities, uncertainty and the choice of policy instruments, market imperfections and the number of participants, nonconvexities in the production set, the charges and standards approach, marketable emission permits, the environment and development, international environmental issues, and ecological economics. Prerequisite: ECON 7500. (Sp)

**ECON 7800**  Development Economics  3  
Focuses on a broad introduction to formalized economic models associated with developing regions/countries and theories of growth. Examines the interconnection between development and economic inequality, poverty and undernutrition, population growth, rural-urban migration, and agricultural development theories. Prerequisites: ECON 7140, 7240. (Sp)

**ECON 7950**  Department of Economics  Graduate Seminar  1-9  
Exposes students to new developments in research and management in the field of economics. Features participation by students, faculty, and guest lecturers. (F,Sp)

**ECON 7970**  Dissertation Research  1-9  
PhD dissertation research. (F,Sp,Su)

**ECON 7990**  Continuing Graduate Advisement  1-9  
PhD-level advisement. (F,Sp,Su)

Education and Human Services (EDUC)

See College of Education and Human Services, pages 116-117.

**EDUC 5000H**  Senior Honors Seminar  2  
For students in the College of Education and Human Services to explore an honors interdisciplinary theme selected by the Honors Committee as a culmination of an honors experience. (Sp)

**EDUC 5560**  Special Topics  0.5-4  
Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

**EDUC 6010**  Introduction to Program Evaluation: Evaluation Models and Practical Guidelines  3  
Alternative approaches and practical guidelines for conducting evaluation studies. Through case studies and simulations, addresses impact of social, political, and ethical issues on evaluation. Also taught as PSY 6010.

**EDUC 6080**  Leadership and the School Principal  3  
Focuses on the school principalship. Provides an overview of the roles and responsibilities of the principal, with emphasis placed on understanding leadership and instructional leadership. Introduces students to knowledge, dispositions, and skills required of successful school principals. (F,Sp,Su)
Course Descriptions

EDUC 6240 Introduction to Student Development Theory 3
Helps students gain an overall understanding of student development theories and how these theories should influence and inform practice. Students will be able to identify theories and suggest ways to apply them to enhance students' development. Course requirement for the Master of Social Sciences degree program in Human Resource Management.

EDUC 6250 History and Development of Higher Education and Student Services 3
Introduces students to the history and development of higher education and the student personnel field by acquainting them with the history of the profession, some of the profession’s theoretical and organizational foundations, and basic issues faced by student services professionals. Course requirement for the Master of Social Sciences degree program in Human Resource Management.

EDUC 6260 Law and Higher Education: A Guide for Student Services Personnel Administrators 3
Helps students become familiar with and gain a working knowledge of education law in postsecondary education, court litigation, scope of authority, liability risks, students’ rights and responsibilities, discipline codes, risk management, federal laws affecting university programs, etc. Course requirement for the Master of Social Sciences degree program in Human Resource Management.

EDUC 6270 Organizational Administration/Strategies in Student Services 3
Explores university governance models, resource acquisition and allocation, financial management, and administrative leadership. Critically examines history, current issues, and trends in the field of student services organizational administration. Course requirement for the Master of Social Sciences degree program in Human Resource Management.

EDUC 6410 Educational Foundations 2
Examines current educational issues and trends within contexts of history, philosophy, and cultural foundations. (F,Su)

EDUC 6500 Public School Finance* 3
Background and understanding of public school finance. Principles and practices utilized in collecting, distributing, and managing district and school revenues, with emphasis on Utah. Collective bargaining practices and capital facilities development also emphasized. (F,Su)

EDUC 6550 Research for Classroom Teachers 3
Assists teachers in applying measurement issues and research methods to classroom problems; in locating, interpreting, and using research reports; and in writing research-related papers on teaching. (F,Sp,Su)

EDUC 6560 Special Topics 0.5-4*
Provides opportunities to research methods, including identification of research problem, review and evaluation of research literature, and design and implementation of research project. Prerequisite: PSY 2800. Also taught as ELED/SCED 6200. (F,Su)

EDUC 6600 Research Design and Analysis I 3
Research design and statistical concepts for research in education, human services, and psychology, with emphasis on the selection and interpretation of statistical analyses. Prerequisites: EDUC/PSY 6570, passing score on 6600 Pretest via WebCT, and permission of instructor: Also taught as PSY 6600. (F,Sp,Su)

EDUC 6700 Single-Subject Research Methods and Designs 3
Examines single-subject research methodology for applied research in schools, including measurement, design, and analysis issues. Also taught as SPED 6700/7700. (F)

EDUC 6710 Diversity in Education 3
Provides educators with background and techniques for more effectively addressing the needs of students in culturally and linguistically diverse society.

EDUC 6740 School Law* 3
Acquaints students with legal issues relating to public education. Considers rights and responsibilities of students, teachers, and educational practitioners. Relates these rights to school programs and operations as determined by state and federal laws and court decisions. (F,Su)

EDUC 6770 Qualitative Methods I 3
Introduction to qualitative research, including foundations; research designs and strategies of inquiry (case studies, ethnography, phenomenology, grounded theory, biographical, historical, participative inquiry); sampling; fieldwork and data collection; and analysis. Prerequisite: EDUC/PSY 6570. (F,Sp)

EDUC 6780 Qualitative Methods II (dual listing 7780) 3
Builds on and applies concepts covered in EDUC 6770, emphasizing analysis of data, critique of qualitative research, and design and implementation of qualitative research. Students registered for 7780 conduct a qualitative research project. Prerequisite: EDUC 6770. (Sp)

EDUC 6930 Supervision and Administrative Internship—Elementary 3
Jointly (with EDUC 6940) provides experience in supervision and administration in elementary school settings as they relate to the performances of the six Interstate School Leaders Licensure Consortium (ISLLC) Standards for School Leaders. Prerequisite: EDUC 6080. (F,Sp,Su)

EDUC 6940 Supervision and Administrative Internship—Secondary 3
Jointly (with EDUC 6930) provides experience in supervision and administration in secondary school settings as they relate to the performances of the six Interstate School Leaders Licensure Consortium (ISLLC) Standards for School Leaders. Prerequisite: EDUC 6080. (F,Sp,Su)

EDUC 6950 Leadership Portfolio Development 1
Creation of leadership portfolio as culminating activity for completion of Administrative/Supervisory Endorsement. Portfolio includes leadership vision, educational philosophy, and professional resume. (F,Sp,Su)

EDUC 7050 Theories of Instructional Supervision* 3
Principles and theoretical base of supervision as they relate to improving instructional practices. Emphasizes research findings and recommended practices. (F,Su)

EDUC 7080 Theories of Organizational Leadership in Education 3
Introduces prospective school administrator to theories of organizational behavior and practices of managing and leading people within the context of the school organization. (F,Sp,Su)

EDUC 7100 Practices of Instructional Supervision* 2
Application of instructional supervision theories and practices of supervisory behaviors as they relate to improvement of instruction. Prerequisite: EDUC 7050. (Sp)

EDUC 7150 Curriculum Theory* 3
Examines the role of interpretivist/phenomenological, political, cultural, and theoretical perspectives in the development of school curriculum. Prerequisite: EDUC 6080. (F)

EDUC 7300 Historical, Social, and Cultural Foundations of Education 3
Examines relationship of modern school in terms of historical, cultural, and social foundations of education. Prerequisites: EDUC 6410, ELED 6200/7200, or permission of instructor. (F)

EDUC 7310 Teaching-Learning Foundations in Education 3
Seminar in which learning theories and teaching models/skills are demonstrated, critically examined, and integrated. Prerequisite: Graduate course in educational psychology or equivalent. (Sp)

## Elementary Education (ELED)

See Department of Elementary Education, pages 260-272.

### ELED 1010 Orientation to Elementary Education
Level I. Students assess themselves as prospective teachers. Students will also have an opportunity to do observations in the public schools (grades K-8) and complete volunteer service in other community educational settings. (F,Sp,Su)

### ELED 3000 CI Foundation Studies and Practicum in Teaching and Classroom Management Level II
4-6°
Introduction to historical, philosophical, and social factors shaping contemporary educational practice in kindergarten, elementary, and middle school. Through these factors, students investigate various aspects of teaching and classroom management. Extensive practicum included. (F,Sp,Su)

### ELED 3005 Beginning Classroom Management
1
Explores essential principles of classroom motivation and management. Focuses on understanding a learning environment where children work well independently and collaboratively. Prerequisite: Admission to Level II of the SODIA teacher education program. (F,Sp)

### ELED 3010 Practicum Remediation Level II
2-4
Students work to develop defensible teaching ideas and to translate these ideas into practical experiences in elementary classroom settings. Specific arrangements for scheduling, placement with a cooperating teacher, and course requirements are handled by professors from the program level recommending remediation and the Elementary Education Advising Office. (F,Sp)

### ELED 3100 Teaching Reading I
3°
Focuses on variety of approaches to reading instruction and issues in reading curriculum development. Includes reading theories, stages of reading growth, and assessment practices. Prerequisite: Admission to teacher education. (F,Sp,Su)

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

*This course is taught during alternate years. For information about when it will be taught, contact the College of Education and Human Services.

<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ELED 4610</td>
<td>Curriculum, Methods, and Assessment for the Middle Grades</td>
<td>3</td>
<td>Integrates current approaches to curriculum design with instructional models and assessment of learning appropriate for grades 5-9. Taught spring of even-numbered years. Also taught as SCED 4610/6610. (Sp)</td>
</tr>
<tr>
<td>ELED 4620</td>
<td>Service Learning Applications for the Middle Grades</td>
<td>3</td>
<td>Examines literature related to service learning for the middle grades and application of service learning in curriculum. Also taught as SCED 4620/6620. (Su)</td>
</tr>
<tr>
<td>ELED 4630</td>
<td>Methods for Teaching Middle Level Mathematics ...</td>
<td>3</td>
<td>Teaching methods course for elementary teachers seeking a middle-level (Level II) mathematics endorsement. Prerequisites: Satisfactory completion of MATH 1210 and ELED 4060 or an equivalent elementary mathematics methods course.</td>
</tr>
<tr>
<td>ELED 4710</td>
<td>Diversity in Education</td>
<td>3</td>
<td>Provides educators with background and techniques for more effectively addressing the needs of students in a culturally and linguistically diverse society. Diversity topics also include religion, socioeconomic class, ability differences, gender, and sexual orientation. Prerequisite: Admission into a teacher education program. Also taught as SCED 4710. (F,Sp,Su)</td>
</tr>
<tr>
<td>ELED 4730</td>
<td>Educational Linguistics</td>
<td>3</td>
<td>Examines theoretical foundations, functions, and characteristics of first language acquisition and language variation in the Pre-K-12 classroom context. Also emphasizes social context of language in K-12 classroom interaction, instruction, and curriculum. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as SCED 4730/6730. (F,Su)</td>
</tr>
<tr>
<td>ELED 4740</td>
<td>Second Language Acquisition in the Classroom</td>
<td>3</td>
<td>Explores the processes of second language acquisition, including the influences of linguistic, cognitive, and sociocultural factors, as well as the relationship to first language acquisition. Emphasizes implications for teaching in the K-12 classroom environment. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as SCED 4740/6740. (Sp,Su)</td>
</tr>
<tr>
<td>ELED 4760</td>
<td>ESOL Instructional Strategies</td>
<td>3</td>
<td>Includes strategies for promoting oral language, reading, and writing for K-12 English language learners. Methods for integration for second language learners into the larger school community. Discussion of parental involvement. Prerequisite: Admission into a teacher education program. Also taught as SCED 4760/6760. (F,Sp)</td>
</tr>
<tr>
<td>ELED 4770</td>
<td>ESOL Instructional Strategies</td>
<td>3</td>
<td>Focuses on methods which help English language learners in content-area classrooms to increase academic learning and integration into the larger school community. Prerequisite: Admission into a teacher education program. Also taught as SCED 4770/6770. (F,Sp)</td>
</tr>
<tr>
<td>ELED 4780</td>
<td>Assessment for Language Learners</td>
<td>3</td>
<td>Explores principles and techniques for developing, analyzing, and interpreting assessment measures for English language learners, including oral, writing, reading, and content-area assessment, as well as assessments used in public schools. Prerequisite: Admission into a teacher education program. Also taught as SCED 4780/6780. (F,Sp)</td>
</tr>
<tr>
<td>ELED 4900</td>
<td>Senior Project</td>
<td>1-5</td>
<td>All honors students are required to submit a senior project for graduation from the Honors Program. Students work with a departmental advisor on a topic of their choice. (F,Sp)</td>
</tr>
<tr>
<td>ELED 4970</td>
<td>Senior Thesis</td>
<td>1-5</td>
<td>An in-depth paper or project culminating in a formal presentation. Required of all students for graduation from the Honors Program in Elementary Education. (F,Sp)</td>
</tr>
<tr>
<td>ELED 5000</td>
<td>Practicum in Improvement (dual listing 6000)</td>
<td>1-6</td>
<td>Open topics course focusing upon effective teaching methods, teaching performance, curriculum decision-making, and characteristics of learners. Also taught as SCED 5000/6000. (F,Sp,Su)</td>
</tr>
<tr>
<td>ELED 5050</td>
<td>Student Teaching—Kindergarten</td>
<td>3-6</td>
<td>Constitutes 6 semester credit hours of student teaching in a kindergarten classroom. Student teachers need to demonstrate competency and professionalism in teaching. An understanding of developmentally appropriate curriculum is necessary. (F,Sp)</td>
</tr>
<tr>
<td>ELED 5100</td>
<td>Student Teaching—Primary Grades (1-3)</td>
<td>6</td>
<td>Constitutes 6 semester credit hours of student teaching in a primary grade (1-3). Student teachers will demonstrate competency in designing and implementing a developmentally appropriate learning environment. (F,Sp)</td>
</tr>
<tr>
<td>ELED 5150</td>
<td>Student Teaching—Elementary</td>
<td>6</td>
<td>Constitutes 6 semester credit hours of student teaching at the upper elementary grade level. Student teachers need to demonstrate competency and professionalism in teaching. Students begin their transition from university student to professional teacher. (F,Sp)</td>
</tr>
<tr>
<td>ELED 5200</td>
<td>Student Teaching—Middle Level (Grades 7-8)</td>
<td>6</td>
<td>Constitutes 6 semester credits of student teaching at the middle school level. Student teachers need to demonstrate competency and professionalism in teaching. Students begin their transition from university student to professional teacher. (F,Sp)</td>
</tr>
<tr>
<td>ELED 5250</td>
<td>Student Teaching—Seminar</td>
<td>3</td>
<td>Designed to provide student teachers/interns with teaching skills and strategies that will assist them in the classroom. Accompanies one of ELED 5050, 5100, 5150, or 5200. Course content is implemented into the student teaching experience. (F,Sp)</td>
</tr>
<tr>
<td>ELED 5300</td>
<td>Associate Teaching—Level V</td>
<td>3-6</td>
<td>Designed to allow students who have completed student teaching to extend their teaching time in a classroom. In order to better prepare for their own classroom, students continue to develop individual teaching skills and competencies. (F,Sp)</td>
</tr>
<tr>
<td>ELED 5900</td>
<td>Independent Study</td>
<td>0.5-2</td>
<td>(F,Sp,Su)</td>
</tr>
<tr>
<td>ELED 6000</td>
<td>Practicum in Improvement (dual listing 5000)</td>
<td>1-6</td>
<td>Open topics course focusing upon effective teaching methods, teaching performance, curriculum decision-making, and characteristics of learners. Also taught as SCED 6000/5000. (F,Sp,Su)</td>
</tr>
<tr>
<td>ELED 6020</td>
<td>Foundations and Change in Early Childhood Education</td>
<td>3</td>
<td>Survey course designed to acquaint professionals with historical and philosophical foundations of early childhood education, leading to examination of contemporary trends and issues. (Sp)</td>
</tr>
<tr>
<td>ELED 6040</td>
<td>Designing and Interpreting Measurements for Assessing Student Learning</td>
<td>3</td>
<td>Teachers and instructional supervisors develop their talents for (a) designing and interpreting measurements for monitoring students' learning and (b) interpreting scores from standardized and government-mandated tests. Also taught as SCED 6040. (F,Su)</td>
</tr>
<tr>
<td>ELED 6100</td>
<td>Motivation and Management in Inclusive Settings</td>
<td>3</td>
<td>Leads in-service teachers to develop classroom management strategies for gaining and maintaining students' cooperation. Also taught as SCED 6100. (Sp,Su)</td>
</tr>
<tr>
<td>ELED 6150</td>
<td>Foundations of Curriculum</td>
<td>3</td>
<td>Examination of theories, principles, and foundations of curriculum, emphasizing program planning and current curriculum trends. Also taught as SCED 6150. (F,Su)</td>
</tr>
</tbody>
</table>

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ELED 6190</td>
<td>Theories of Teaching and Learning</td>
<td>3</td>
<td>Demonstration, analysis, and evaluation of various models of teaching, emphasizing research-based principles of learning. Also taught as SCED 6190. (Sp,Su)</td>
</tr>
<tr>
<td>ELED 6200</td>
<td>Curriculum and Issues in Early Childhood Education</td>
<td>2</td>
<td>Examination of current issues and research topics in early childhood education important to the improvement of K-3 programs. (F)</td>
</tr>
<tr>
<td>ELED 6220</td>
<td>Workshop in Early Childhood Education</td>
<td>1-6</td>
<td>Exploration of current topics important in teaching young children. (Su)</td>
</tr>
<tr>
<td>ELED 6230</td>
<td>Literacy Learning in Early Childhood</td>
<td>3</td>
<td>Investigation of early literacy development and effective classroom practices in kindergarten and the primary grades. Relevant research is examined. (F,Su)</td>
</tr>
<tr>
<td>ELED 6240</td>
<td>Workshop in Science Education</td>
<td>1-6^a</td>
<td>Exploration of current topics in science education. (Su)</td>
</tr>
<tr>
<td>ELED 6250</td>
<td>Graduate Cooperative Work Experience</td>
<td>1-10^a</td>
<td>Cooperative education work experience at a professional level. Prior approval required. (F,Sp,Su)</td>
</tr>
<tr>
<td>ELED 6260</td>
<td>Supervised Practicum in Early Childhood Education</td>
<td>2</td>
<td>Encompasses approximately 125 hours of supervised practicum in a kindergarten classroom and observations in prekindergarten settings. Participants demonstrate their ability to integrate and apply early childhood theory and research in kindergarten.</td>
</tr>
<tr>
<td>ELED 6300</td>
<td>Workshop in Mathematics Education</td>
<td>1-6^a</td>
<td>Exploration of current topics and methods in mathematics education. In the past, topics have included: relevant mathematics in rural settings, integration of mathematics and children’s literature, and ethnomathematics. (Su)</td>
</tr>
<tr>
<td>ELED 6310</td>
<td>Content Area Reading and Writing</td>
<td>3</td>
<td>Practical approaches for teaching reading/writing and learning skills to elementary, middle, and high school students in all content areas. Also taught as SCED 6310. (Su)</td>
</tr>
<tr>
<td>ELED 6320</td>
<td>Literacy and Cognition</td>
<td>3</td>
<td>Examination of cognitive and sociocultural research related to K-12 students’ acquisition and use of reading, writing, and learning strategies. Explores implications for school policies and classroom instruction. Also taught as SCED 6320/7320. (Sp)</td>
</tr>
<tr>
<td>ELED 6330</td>
<td>Utah Writing Project</td>
<td>1-6</td>
<td>Workshop, seminar, and institute experiences in the Utah Writing Project, focusing on writing process, principles, and research-based strategies for improving writing instruction in grades K-12. Also taught as SCED 6330. (Su)</td>
</tr>
<tr>
<td>ELED 6340</td>
<td>Issues and Trends in Literacy</td>
<td>2^b</td>
<td>Exploration of current issues and instructional trends in the teaching of reading and writing. Emphasis on reading widely and critically in the professional literature. Prerequisites: ELED 3100, 4040; or teaching experience in elementary or middle school. Also taught as SCED 6340. (F,Su)</td>
</tr>
<tr>
<td>ELED 6350</td>
<td>Reading Assessment and Intervention</td>
<td>3</td>
<td>Covers the correlates and diagnosis of reading problems, as well as methods and materials for remedial reading instruction. Prerequisites: ELED 3100, 4040; or teaching experience in elementary, middle, or secondary school. Also taught as SCED 6350. (Sp)</td>
</tr>
<tr>
<td>ELED 6360</td>
<td>Research in Reading</td>
<td>3</td>
<td>Covers classical, historical, and contemporary research studies in reading, with an emphasis upon understanding and translating findings into classroom practices. Prerequisites: ELED 3100, 4040; or teaching experience in elementary or middle school. Also taught as SCED 6360. (Su)</td>
</tr>
<tr>
<td>ELED 6370</td>
<td>Supervised Internship in Reading and Writing</td>
<td>1-3</td>
<td>Individual practicum experience designed to allow graduate students to implement and focus on one or more aspects of reading and writing instruction in a classroom or clinical setting. Prerequisite: Consent of Instructor. Also taught as SCED 6370.</td>
</tr>
<tr>
<td>ELED 6380</td>
<td>Improvement of Language Arts Instruction</td>
<td>3</td>
<td>Exploration of current topics and instructional practices in elementary language arts. Taught spring during one year, and then taught summer during the next year. (Sp,Su)</td>
</tr>
<tr>
<td>ELED 6390</td>
<td>Teaching with Tradebooks in the Elementary and Middle Level Classroom</td>
<td>3</td>
<td>Explores the use of trade books in the elementary and middle level classroom. Focuses on how teachers can use various genres to invite children to read and write. Prerequisites: ELED/SCED 6310 or 6360. Also taught as SCED 6390. (Su)</td>
</tr>
<tr>
<td>ELED 6400</td>
<td>Multiple Talent Approach to Teaching</td>
<td>2</td>
<td>Explores one model for embedding the teaching of creative and critical thinking in regular curricula. Includes practical application requirements. Also taught as SCED 6400. (Su)</td>
</tr>
<tr>
<td>ELED 6420</td>
<td>Education of Gifted and Talented Learners</td>
<td>2</td>
<td>Provides multiple cultural and historical perspectives on giftedness and talent. Explores characteristics of gifted individuals, with emphasis on identifying needs. Provides general overview of possible services for gifted learners. Must be taken concurrently with ELED/SCED 6430. Also taught as SCED 6420. (F)</td>
</tr>
<tr>
<td>ELED 6430</td>
<td>Practicum: Individual Case Study</td>
<td>1</td>
<td>Practicum experience in association with ELED/SCED 6420. Requires intensive supervised study of gifts and talents of individual child of student’s choice. Must be taken concurrently with ELED/SCED 6420. Also taught as SCED 6430. (F)</td>
</tr>
<tr>
<td>ELED 6440</td>
<td>Creativity in Education</td>
<td>2</td>
<td>Exploration of theories, research, and strategies concerning creativity, and their application to personal creativity and to improvement of classroom practice. Also taught as SCED 6440. (Su)</td>
</tr>
<tr>
<td>ELED 6460</td>
<td>Identification and Evaluation in Gifted Education</td>
<td>2</td>
<td>Provides educators with theory and models for identifying students as gifted, creative, and talented. Presents models for evaluation of programs for gifted learners. Explores instruments for use in identification and evaluation. Must be taken concurrently with ELED/SCED 6470. Also taught as SCED 6460. (Sp)</td>
</tr>
<tr>
<td>ELED 6470</td>
<td>Practicum: Team Consultation</td>
<td>1</td>
<td>Practicum experience in association with ELED/SCED 6460. Requires participation, as part of a consultative team, to improve practice in an approved setting for a specific child, classroom, school, school district, or other educational entity. Must be taken concurrently with ELED/SCED 6460. Also taught as SCED 6470. (Sp)</td>
</tr>
<tr>
<td>ELED 6480</td>
<td>Methods and Materials in Gifted Education</td>
<td>2</td>
<td>Explores programming and curriculum models in gifted education, with special attention to the development of instructional materials for use with students. Must be taken concurrently with ELED/SCED 6490. Also taught as SCED 6480. (F)</td>
</tr>
<tr>
<td>ELED 6490</td>
<td>Practicum: Classroom Applications</td>
<td>1</td>
<td>Practicum experience in association with ELED/SCED 6480. Requires application of at least three curriculum, cognitive, or affective models in the student’s current teaching assignment. Must be taken concurrently with ELED/SCED 6480. Also taught as SCED 6490. (F)</td>
</tr>
<tr>
<td>ELED 6500</td>
<td>Interdisciplinary Workshop</td>
<td>1-2^c</td>
<td>Field-based research study contributing toward graduate degrees. Supervisory licensure related to assessment of ongoing or newly proposed program of instruction. (F,Sp,Su)</td>
</tr>
<tr>
<td>ELED 6550</td>
<td>Practicum in the Evaluation of Instruction</td>
<td>1-4^c</td>
<td>Field-based research study contributing toward graduate degrees. Supervisory licensure related to assessment of ongoing or newly proposed program of instruction. (F,Sp,Su)</td>
</tr>
</tbody>
</table>
Course Descriptions

ELED 6560 Practicum in Improvement of Instruction 1-4
Field-based program focusing upon characteristics of effective teaching methodologies, teaching performance, curriculum decision making, value guidelines, and the characteristics of the learner. (F,Sp,Su)

ELED 6570 Advanced Comprehension 3
Designed to enhance teachers’ understanding of research and practice related to teaching vocabulary and reading comprehension and fostering motivation for reading. Prerequisite: ELED/SCED 6310 or 6360. Also taught as SCED 6570. (All years)

ELED 6580 Character and Values Education 2
Overview of research, theory, and practical approaches to values education, emphasizing processes of moral development and socialization. Also taught as SCED 6580. (Su)

ELED 6590 Supervising School Reading Program 2
Examine strategies for improving school reading programs. Emphasizes simulations, guided practice, and small group discussions. Prerequisites: ELED/SCED 6350 and 6360. Also taught as ELED 6590. (Sp)

ELED 6600 Philosophy and Organization of the Middle Level School 3
Focuses on characteristics of young adolescents and how middle level schools can be organized to meet those characteristics through interdisciplinary learning, advisory programs, and exploratory mini-courses. Graduate students have additional course requirements for design and implementation of a project. Taught fall of odd-numbered years. Also taught as SCED 6600/4600. (F)

ELED 6610 Curriculum, Methods, and Assessment for the Middle Grades 3
Integrates current approaches to curriculum design with instructional models and assessment of learning appropriate for grades 5-9. To receive credit for 6610, graduate students design and implement an action research project related to curricular or pedagogical interests, then share their findings in class. Project will include review of literature related to student’s interest. Prerequisite: ELED/SCED 6600. Taught spring of even-numbered years. Also taught as SCED 6610/4610. (Sp)

ELED 6620 Service Learning Applications for the Middle Grades 3
Examines literature related to service learning for the middle grades and application of service learning in curriculum. Also taught as SCED 6620/4620. (Su)

ELED 6630 Methods for Teaching Middle-Level Mathematics 3
Teaching methods course for elementary teachers seeking a middle-level (Level II) mathematics endorsement. Prerequisites: Satisfactory completion of MATH 1210 and ELED 4060 or an equivalent elementary mathematics methods course.

ELED 6700 Improvement of Science Instruction 3
For practicing elementary and middle-school teachers or those seeking alternative licensure in science education. Survey of current research in science education and strategies for implementing best practice in classroom settings. Considers a Science/Technology/Society approach to teaching science, as well as the use of action research to improve practice. (F)

ELED 6720 Practicum in Science Instruction 1
Optional practicum to be taken semester following enrollment in ELED 6700. (Sp)

ELED 6730 Educational Linguistics 3
Examines theoretical foundations, functions, and characteristics of first language acquisition and language variation in the Pre-K-12 classroom context. Also emphasizes social context of language in K-12 classroom interaction, instruction, and curriculum. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as SCED 6730/4730. (F,Su)

ELED 6740 Second Language Acquisition in the Classroom 3
Explores the processes of second language acquisition, including the influences of linguistic, cognitive, and sociocultural factors, as well as the relationship to first language acquisition. Emphasizes implications for teaching in the K-12 classroom environment. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as SCED 6740/4740. (Sp,Su)

ELED 6750 Improvement of Mathematics Instruction 2
Examines advanced concepts in curriculum theory and methods of teaching mathematics in the elementary and middle school. Prerequisite: ELED 4050 or teaching experience in elementary or middle school. (Sp)

ELED 6760 ESOL Instructional Strategies (dual listing 4760) 3
Includes strategies for promoting oral language, reading, and writing for K-12 English language learners. Methods for integration for second language learners into the larger school community. Discussion of parental involvement. Prerequisite: Admission into a teacher education program. Also taught as SCED 6760/4760. (F,Sp)

ELED 6770 Improvement of Social Studies Instruction (dual listing 4770) in the Content Areas 3
Focuses on methods which help English language learners in content-area classrooms to increase academic learning and integration into the larger school community. Prerequisite: Admission into a teacher education program. Taught as SCED 6770/4770. (F,Sp)

ELED 6780 Assessment for Language Learners (dual listing 4780) 3
Explores principles and techniques for developing, analyzing, and interpreting assessment measures for English language learners, including oral, written, reading, and content-area assessment, as well as assessments used in public schools. Prerequisite: Admission into a teacher education program. Also taught as SCED 6780/4780. (F,Sp)

ELED 6800 Improvement of Social Studies Instruction 3
Emphasizes study of newer concepts in curriculum and methods of instruction for elementary social studies programs. Designed for experienced teachers. Prerequisite: ELED 4050 or teaching experience in elementary or middle school.

ELED 6840 Workshop: Intermountain Conference on Education of the Gifted and Talented 1-2
Provides instruction by leading national authorities in gifted and talented education, as well as networking with educators of the gifted from throughout the Intermountain West. Also taught as SCED 6840. (Su)

ELED 6900 Independent Study 0.5-3 (F,Sp,Su)

ELED 6910 Independent Research 0.5-3 (F,Sp,Su)

ELED 6940 Supervision and Administration Internship 3
Provides experience in supervision and administration in school systems. (F,Sp,Su)

ELED 6960 Master’s Creative Project 3
Provides students with opportunity to design and carry out a creative project closely related to area of teaching specialty. Requires written report. (F,Sp,Su)

ELED 6970 Thesis 1-9
Master’s level research and thesis writing with guidance and criticism. (F,Sp,Su)

ELED 6990 Continuing Graduate Advisement 1-9 (F,Sp,Su)

ELED 7020 Foundations and Change in Early Childhood Education (dual listing 6020) 3
Survey course designed to acquaint professionals with historical and philosophical foundations of early childhood education, leading to examination of contemporary trends and issues. (Sp)

ELED 7050 Internship in Program Evaluation 1-4
Experience in practical aspects of program evaluation through planned, supervised evaluation project participation approved by student’s supervisory committee. (F,Sp,Su)

*Teaches students to analyze rhetoric (the art of using language to influence other people) as it operates in a variety of texts. Students learn to define and understand rhetorical situations and to evaluate rhetorical strategies chosen by other writers. (F,Sp)

**Study of a variety of genres written specifically for adolescent audience. Intended for those interested in teaching secondary school English. (F,Sp)

***Introduction to study of diverse literatures of the United States, including Native American, Asian American, Hispanic/Latino, and African American. (F,Sp)

****Study of aesthetic merit of poetry and prose available for children, ages 1-12. Intended for those interested in teaching or writing for children. (Sp)

*****Multidisciplinary introduction to study of Native Americans, emphasizing folklore, history, anthropology, literature, traditions, and contemporary issues such as the environment. (F,Sp)

******Study of folklore and folklife as they relate to regional cultures. Also taught as HIST 3700. (F,Sp)

*******Issues, problems, and methodologies in folklore study. Focus and instructor variable. Also taught as HIST 3710. (Sp)

********Examines the diversity of literacy skills in American ethnic groups and explores appropriate teaching methods. Topics include effects of socio-economic status, child-rearing practices, first and second language acquisition, American dialects, etc. (F,Sp)

*********Covers sociolinguistic aspects of English use, as well as strict grammatical history. (Sp)

**********Examines the diversity of literacy skills in American ethnic groups and explores appropriate teaching methods. Topics include effects of socio-economic status, child-rearing practices, first and second language acquisition, American dialects, etc. (F,Sp)

***********Covers sciences of sociolinguistics and anthropological linguistics. Introduces concepts dealing with relationship of language to society and culture, and interaction of language with society and culture. (F)

************Study of dramatic theory and sample plays, combined with practice in writing short plays. Students must write a minimum of three plays. Prerequisite: THEA 1210. Also taught as THEA 4250. (F)

*************Selected works of William Shakespeare, with attention to biographical and cultural contexts. (F,Sp)

**************Selected works of either a single author or a closely related group of authors based in the United States, with attention to biographical and cultural contexts. (F,Sp)

***************Selected works of either a single author or a closely related group of authors based in Great Britain, with attention to biographical and cultural contexts. (F,Sp)

**************Selected works of either a single author or a closely related group of authors based outside the United States, with attention to biographical and cultural contexts. (F)
Course Descriptions

ENGL 4340 Studies in Prose Fiction** 3
Analysis of the genre of prose fiction, emphasizing nature and evolution of specific forms. (Sp)

ENGL 4350 Studies in Poetry* 3
Analysis of the genre of poetry, emphasizing nature and evolution of specific forms. (F)

ENGL 4360 Studies in Drama/Film* 3
Analysis of dramatic and cinematic genres, emphasizing nature and evolution of specific forms. (Sp)

ENGL 4370 Studies in Nonfiction Prose** 3
Analysis of the genre of nonfiction prose, emphasizing nature and evolution of specific forms. (F)

ENGL 4400 CI Professional Editing 3
Editing of technical and scientific documents, working with deadlines, different levels of editing, editing marks, working with groups of editors and clients, and total document design, including graphics. Prerequisites: Admittance to program and completion of ENGL 3400 and 3410 with grades of B- or better. (F)

ENGL 4410 Document Design and Graphics 3
Explores elements of page layout, graphic design, type fonts, and design of documents to suit client's needs. Prerequisites: Admittance to program and completion of ENGL 3400 and 3410 with grades of B- or better. (F,Sp)

ENGL 4420 Advanced Fiction Writing 3
Offers advanced study in art and skill of writing publishable fiction. Relies on workshop method. Prerequisite: ENGL 3420 or equivalent. (Sp)

ENGL 4430 Advanced Poetry Writing 3
Provides course for undergraduate students desiring to write publishable poetry. Relies on workshop method. Prerequisite: ENGL 3430 or equivalent. (Sp)

ENGL 4440 Advanced Nonfiction Writing 3
Offers advanced study in the art and skill of writing publishable literary or creative nonfiction. (Sp)

ENGL 4500 CI Teaching Writing 3
Prepares students to teach writing at secondary level. Teaches appropriate pedagogical techniques for teaching writing for a variety of purposes and contexts to diverse students. Techniques taught include designing effective writing assignments, responding constructively to student writing, assessing student writing, and incorporating technology into writing courses. (F,Sp)

ENGL 4510 CI Teaching Literature 3
Prepares students to teach literature through a variety of texts. Explores multiple pedagogical strategies for teaching diverse literary traditions to students of various backgrounds and developmental levels. (F,Sp)

ENGL 4610 Western American Literature** 3
Examines major themes and important writers (both "popular" and "literary") in western regional writing. Investigation of significance of environment, history, gender, and ethnicity in a variety of genres. Appropriate for American Studies majors and minors. (F,Sp)

ENGL 4620 CI Advanced Seminar in American Studies 3
Practical introduction to theories and methods of American Studies, utilizing interdisciplinary research around a central theme, subject, or text(s). Strongly recommended for American Studies majors and American Studies minors. Open to students who have taken three courses in literature and/or history. Also taught as HIST 4620. (F,Sp)

ENGL 4630 American Nature Writers* 3
Interdisciplinary study of historical, social, literary, and environmental contexts of nature writing. Examines key authors, major theories, enduring concerns (e.g., conservation, preservation, and management), and current issues (including gender and ethnicity). Appropriate for American Studies majors and minors. (F,Sp)

ENGL 4640 CI Studies in the American West 3
Interdisciplinary course in American Studies, exploring the region of the West through the analysis of literary texts, historical sources, and socio-cultural materials. Also taught as HIST 4640. (F,Sp)

ENGL 4700 Folk Material Culture** 3
Study of folk objects and their connections with culture and history. Also taught as HIST 4700. (Sp)

ENGL 4750 Advanced Folklore Workshop: Fife Conference 3
Focuses on a theme or topic in folklore, and offers lectures from nationally prominent scholars in the area. Taught during one week, every day and all day. Also taught as HIST 4750. (Su)

ENGL 4900 Internship/Cooperative Work Experience 1-15
Offers credit for professional experience obtained outside the classroom, prior to graduation. Requires statement of professional goals and summary report following the experience. Prerequisite: Departmental approval. (F,Sp,Su)

ENGL 4910 Tutoring Practicum 1
In-service training class for first-semester Writing Center staff members. Repeatable for up to 2 credits. (F,Sp)

ENGL 5210 Topics in Linguistics* 3
Provides students with opportunity to study topics which are not regularly taught, but which are designed to enrich understanding of linguistics. Typical topics include Old English, roots of English in Germanic, discourse analysis, and English as a world language. (F)

ENGL 5300 CI Literature and Gender 3
Exploration of cultural relations between literature and gender. Topics vary. (F,Sp)

ENGL 5320 CI Literature and Cultural Difference 3
Exploration of relations between literature and cultural difference. Topics vary. (Sp)

ENGL 5340 CI Studies in Literary and Cultural Theory 3
Applications in literary and cultural studies. Topics vary. (F)

ENGL 5350 CI Literary Studies Capstone 3
Communicative intensive capstone course in which students synthesize and assess their knowledge of the discipline. Should be taken during the senior year. Enrollment limited to English majors only. (Sp)

ENGL 5400 Specialized Documents 3
Students in the Professional and Technical Writing emphasis prepare documents frequently encountered in business and government, including proposals, environmental impact statements, brochures, and newsletters. Prerequisites: Admittance to program and completion of ENGL 3400 and 3410 with grades of B- or better. (F,Sp)

ENGL 5410 Interactive Media 3
Students in the Professional and Technical Writing emphasis examine process of publishing online documents, studying multimedia, hypermedia, and hypertext environments. Topics vary and include building complex CD-ROM environments, help file authoring, and designing websites. Prerequisites: Admittance to program and completion of ENGL 3400 and 3410 with grades of B- or better. (F,Sp)

ENGL 5420 Publications Production 3
Students in the Professional and Technical Writing emphasis examine process of publishing printed documents, beginning with idea and ending with hard copy, printed and bound. Prerequisites: Admittance to program and completion of ENGL 3400 and 3410 with grades of B- or better. (F,Sp)

ENGL 5430 CI Professional Writing Capstone 3
Capstone course for students in Professional and Technical Writing emphasis, in which students develop a professional portfolio of their own writing. Should be taken during the senior year. Prerequisites: Admittance to program and completion of ENGL 3400 and 3410 with grades of B- or better. (F,Sp)

ENGL 5450 Creative Writing Capstone 3
Students synthesize and assess their knowledge of literary writing, compose a portfolio of creative work in their chosen genre, and consider and assess their experience in the creative writing process. (Sp)

ENGL 5490 Usability Studies: Theory and Practice 3
Study of current approaches to improving user experiences with technologies and their related texts through research-based changes to product design and documentation. Prerequisite: ENGL 3450 or 3460. (F,Sp)

**Course Descriptions**

**ENGL 5550** English Teaching Capstone  3

Students synthesize and assess their knowledge of the field and their teaching, reading, and writing strengths; and evaluate the program through formal reflection on their own professional growth. Enrollment limited to English majors only. (Sp)

**ENGL 5690 CI** American Studies Capstone Seminar  3

Required for students majoring in American Studies. Enables students to synthesize American Studies theory and methods with interdisciplinary cognate courses. Supports senior thesis design and writing, allowing topics to reflect individual programs of study. Also taught as HIST 5690. (Sp)

**ENGL 5700** Folk Narrative  3

Forms and functions of folk narrative genres: myth, legend, folktale, memorate, and ballad. Also taught as ANTH 5700 and HIST 5700. (Sp)

**ENGL 5900** Senior Honors Seminar (dual listing 7450)  1-3

Capstone course for students enrolled in English Honors Program. Prerequisite: Enrollment in English Honors Program. (F,Sp,Su)

**ENGL 5910 CI** Senior Honors Thesis  1-6

Students work in conjunction with English faculty member to write a thesis. Prerequisite: Enrollment in English Honors Program. (F,Sp,Su)

**ENGL 5920** Directed Study  1-3

Provides students with opportunity to work individually with faculty member. Contract for work to be completed must be signed by faculty member and student, then filed with English Department. (F,Sp,Su)

**ENGL 6320** Literary Theory  3

Introduces students to advanced literary theories and provides training in sophisticated critical methods. (F,Sp)

**ENGL 6330** Topics in Literary Studies  3

Allows in-depth study of specific literary topics and theoretical questions. (F,Sp)

**ENGL 6340** British Literature and Culture  3

Explores British literature and provides training in literary and cultural criticism. Promotes research and writing skills. (F,Sp)

**ENGL 6350** American Literature and Culture  3

Explores American literature and provides training in literary and cultural criticism. Promotes research and writing skills. (F,Sp)

**ENGL 6360** World Literature and Culture  3

Explores world literature and provides training in literary and cultural criticism. Promotes research and writing skills. (F,Sp)

**ENGL 6400** Advanced Editing (dual listing 7400)  3

Examines complex roles editors assume in creating technical and nontechnical documents. Principal components include working with substance of documents, mediating the writer-reader relationship, and exemplifying the application of rhetorical theory in editing. (F,Sp)

**ENGL 6410** Theory and Research in Professional Communication (dual listing 7410)  3

Introduction to contemporary theories of written discourse. Emphasizes the implications of these theories for research in professional communication. (F,Sp)

**ENGL 6420 (dual listing 7420)** Usability Studies and Human Factors in Professional Communication  3

Examines concepts and practices of usability studies and human factors in the design and production of print and online documents. Emphasizes developing objectives, criteria, and measures for conducting tests in the lab and field. (F,Sp)

**ENGL 6430 (dual listing 7430)** Publications Management  3

Covers processes for developing and producing publications, including information development cycles, supervision, and budgets. (F,Sp)

**ENGL 6440 (dual listing 7440)** Studies in Culture and Professional Communication  3

Covers topics in rhetorical, critical, and cultural theory, emphasizing their application to contemporary practices in professional communication. (F,Sp)

**ENGL 6450** Reading Theory and Document Design (dual listing 7450)  3

Examines how reading theory interacts with rhetoric of graphics, layout, and type to influence the way documents are designed for maximum information and readability. (F,Sp)

**ENGL 6460 (dual listing 7460)** Studies in Digital Media  3

Focuses on the production of advanced digital media documents. Examination of theories underlying such publications, plus the related hardware and software. Topics vary. (F,Sp)

**ENGL 6470 (dual listing 7470)** Studies in Specialized Documents  3

Focuses on writing and design of specific genres in professional communication. Genres include environmental impact statements, software documentation, proposals, manuals, annual reports, newsletters, and fact sheets. Topics vary. (F,Sp)

**ENGL 6480 (dual listing 7480)** Studies in Technology and Writing  3

Study of theoretical aspects of technologies affecting writing in professional contexts. Course topics may include an examination of the history of computing, rhetorics of hypertext, or theories of communication in virtual space. Topics vary. (F,Sp)

**ENGL 6490** Portfolio  3

Design and preparation of a portfolio containing at least five documents, each accompanied by a justification and discussion.

**ENGL 6600** American Studies Theory and Method  3

Provides students with theory and method of graduate-level research in American Studies. Also taught as HIST 6600. (F)

**ENGL 6610** Seminar on the American West  3-4

Readings and research on topics in the American West. Interdisciplinary focus suitable for graduate students in History and American Studies. Also taught as HIST 6610. (F)

**ENGL 6620** Seminar in Native American Studies  3-4

Readings and research on topics in Native American history and culture. Interdisciplinary focus suitable for graduate students in History and American Studies. Also taught as HIST 6620. (F)

**ENGL 6630** Studies in Film and Popular Culture  3

Offered annually on a rotating basis by professors in folklore and English (Cultural Studies, Literature, British and Commonwealth). Topics and theoretical approaches vary, but the primary focus is on feature films. Also taught as HIST 6630. (Sp)

**ENGL 6670** Folklore Theory and Method  3

Serves as orientation for new graduate students in folklore. Introduces students to comparative annotation, folklore indices, oral-formulaic theory, performance theory, contextual analysis, and other approaches. Also taught as HIST 6670. (F)

**ENGL 6710** Regional Folklore  3

Study of folklore and folklife as a regionalizing process. Regions examined through their folk culture range. Also taught as HIST 6710. (Sp)

**ENGL 6720** Folklore Fieldwork  3

Basic methodology class for folklorists and oral historians. Students learn interviewing techniques and other methods for observing and recording the performance of tradition and traditional history. Also taught as HIST 6720. (Sp)

**ENGL 6730** Public Folklore  3

Provides history and analysis of governmental involvement in protecting, promoting, and otherwise manipulating and utilizing cultural heritage. Also taught as HIST 6730. (F)

**ENGL 6740** Folk Narrative  3

Covers principal narrative genres in folk tradition (myth, tale, legend, ballad) and the basic theories for their analysis and discussion. Also taught as HIST 6740. (Sp)

Survey of major research methods (qualitative and quantitative) for conducting professional communication research in academic and nonacademic settings. Coursework will culminate in a formal proposal to conduct a discipline-appropriate study in the workplace. (Sp)

Examines complex roles editors assume in creating technical and nontechnical documents. Principal components include working with substantive of documents, examining the writer-reader relationship, and exemplifying the application of rhetorical theory in editing. (F,Sp)

Introduction to contemporary theories of written discourse. Emphasizes the implications of these theories for research in professional communication. (F,Sp)

Examines concepts and practices of usability studies and human factors in the design and production of print and online documents. Emphasizes developing objectives, criteria, and measures for conducting tests in the lab and field. (F,Sp)

Covers processes for developing and producing publications, including information development cycles, supervision, and budgets. (F,Sp)

Covers topics in rhetorical, critical, and cultural theory, emphasizing their application to contemporary practices in professional communication. (F,Sp)

Examines how reading theory interacts with rhetoric of graphics, layout, and type to influence the way documents are designed for maximum information and readability. (F,Sp)

Covers topics in rhetorical, critical, and cultural theory, emphasizing their application to contemporary practices in professional communication. (F,Sp)

Examines how reading theory interacts with rhetoric of graphics, layout, and type to influence the way documents are designed for maximum information and readability. (F,Sp)

Focuses on the production of advanced digital media documents. Examination of theories underlying such publications, plus the related hardware and software. Topics vary. (F,Sp)

Focuses on writing and design of specific genres in professional communication. Genres include environmental impact statements, software documentation, proposals, manuals, annual reports, newsletters, and fact sheets. Topics vary. (F,Sp)

Focuses on writing and design of specific genres in professional communication. Genres include environmental impact statements, software documentation, proposals, manuals, annual reports, newsletters, and fact sheets. Topics vary. (F,Sp)

Study of theoretical aspects of technologies affecting writing in professional contexts. Course topics may include an examination of the history of computing, rhetorics of hypertext, or theories of communication in virtual space. Topics vary. (F,Sp)

Examination of principles and their implementation in online writing instruction. Emphasis placed on writing instruction within English departments. (Sp)

Prepares students to teach general purpose technical writing courses at the undergraduate level. Students read and discuss articles on technical writing and practice writing a series of technical documents. (F,Sp)
## Course Descriptions

### Engineering (ENGR)

**See College of Engineering, pages 118-122.**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
</table>
| ENGR 1000   | Introduction to Engineering Design              | 2       | (formerly ENGR 1010)  
  Introduction to engineering design, problem solving, and computer application skills. Orient students to college programs, academic advising, student services, professional societies, ethics, and engineering careers. A background in trigonometry is strongly recommended. (F) |
| ENGR 1940   | Women in Engineering Seminar                    | 1       | Designed for incoming female freshman engineering students. Speakers selected from practice share their knowledge and experience about the many career options available in engineering. Discussions center on ways in which women balance their professional and personal lives. Provides information and strategies for the academic and interpersonal skills needed for women to succeed in engineering. (F) |
  Force and position vectors; equilibrium of particles; rigid bodies; equivalent system of forces; equilibrium; free body diagrams; static analysis of trusses, frames, and machines; centroids and centers of gravity; friction; and moments of inertia. Prerequisites: MATH 1210, 1220. (F,Sp) |
| ENGR 2030   | Engineering Mechanics Dynamics                  | 3       | (formerly ENGR 2020)  
  Equations of motion, kinetics of particles, kinetics of rigid bodies, work and energy, impulse and momentum, three-dimensional kinematics, and vibrations. Prerequisites: ENGR 2010, MATH 1210, 1220. (F,Sp) |
| ENGR 2140   | Strength of Materials                            | 2       | (formerly ENGR 2040)  
  Stress, strain, and deflection due to axial loads; moment and torsion; shear and moment diagrams; and equations of equilibrium and compatibility. Prerequisite: ENGR 2010. (F,Sp) |
| ENGR 2200   | Engineering Numerical Methods I                 | 3       | Introduction to use of digital computers and elementary numerical analysis, with emphasis on practical applications and software development. Prerequisite: MATH 1220. Prerequisite or corequisite: MATH 2250. (F) |
| ENGR 2450   | Engineering Numerical Methods II                | 2       | (formerly ENGR 2210)  
  Numerical solution techniques for solving ordinary and partial differential equations, emphasizing practical applications and software development. Prerequisite: ENGR 2200. (Sp) |
| ENGR 2930   | Special Problems                                 | 1-18     | Independent or group student study of engineering problems not covered in regular course offerings. (F,Sp,Su) |
| ENGR 5500   | High Performance Computing for Engineers        | 3       | Introduction to high performance computing on Beowulf clusters with distributed memory paradigm. Hands-on design and profiling of algorithms and software to solve large scale problems in engineering. Topics in scientific visualization. Prerequisites: MAE 2210 or CS 1410. (F) |

<td>Examines the historical, legal, and political context of outdoor recreation policy on public lands, government agency culture, regulation, and partnering; relationship of outdoor recreation to tourism; and theory and application of principal planning tools for outdoor recreation settings. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ENVS 4250</td>
<td>Advanced Internship/Co-op</td>
<td>1-9</td>
</tr>
<tr>
<td></td>
<td>Directed and evaluated cooperative education or work experience for undergraduates in public and private organizations. Prerequisite: Permission of department. (F, Sp, Su)</td>
<td></td>
</tr>
<tr>
<td>ENVS 4400</td>
<td>Economic Applications in Natural Resource Management</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Applied economics course exposing students to tools used in natural resource decision-making. Includes principles and techniques of nonmarket valuation, linear programming, budgeting, benefit-cost analysis, and regional economic analysis as encountered by natural resource managers. Prerequisites: ENVS 3000, MATH 1050 or higher, and passing score on Computer and Information Literacy (CIL) exam. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ENVS 4440</td>
<td>Stegner Center Annual Symposium</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>(dual listing 6440)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Offered through the University of Utah College of Law. Topics vary each year, but always focus on natural resource policy-related issues. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ENVS 4500</td>
<td>Wildland Recreation Behavior</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Social, psychological, and geographic influences on human behaviors in wildland recreation settings. Emphasis on critical problems affecting public land recreation management. (F)</td>
<td></td>
</tr>
<tr>
<td>ENVS 4600</td>
<td>Natural Resource Interpretation</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Planning processes and techniques for providing interpretive programs developed for wildland recreation areas and visitor centers. Evaluation and planning of visitor information efforts. (F)</td>
<td></td>
</tr>
<tr>
<td>ENVS 4920</td>
<td>Special Projects in Recreation Management</td>
<td>1-3</td>
</tr>
<tr>
<td></td>
<td>Participation in special projects to assist public recreation agencies or nonprofit organizations, while gaining hands-on experience in recreation management, planning, and monitoring. Many experiences entail intensive, short-duration efforts away from campus. Prerequisite: Permission of department. (F, Sp, Su)</td>
<td></td>
</tr>
<tr>
<td>ENVS 4950</td>
<td>Special Topics</td>
<td>1-3</td>
</tr>
<tr>
<td></td>
<td>Individual study and research upon selected environmental and societal problems. Prerequisite: Permission of department. (F, Sp, Su)</td>
<td></td>
</tr>
<tr>
<td>ENVS 4960</td>
<td>Directed Readings</td>
<td>1-3</td>
</tr>
<tr>
<td></td>
<td>Individual reading research on selected environmental and societal readings. Prerequisite: Permission of department. (F, Sp, Su)</td>
<td></td>
</tr>
<tr>
<td>ENVS 4970</td>
<td>Undergraduate Research</td>
<td>1-3</td>
</tr>
<tr>
<td></td>
<td>Individual or team research. Prerequisite: Permission of department. (F, Sp, Su)</td>
<td></td>
</tr>
<tr>
<td>ENVS 4980</td>
<td>Intended to bring upperclassmen up-to-date on environmental and societal topics. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ENVS 4990</td>
<td>Environmental and Natural Resource Professionalism Seminar</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Introduces concepts of professionalism in natural resources, including ethical issues in science and management, organizational culture, and workplace expectations. Analyzes current issues with practicing professionals. Reinforces leadership and team-building skills. Prerequisites: ENVS 1990, 3000. (F)</td>
<td></td>
</tr>
<tr>
<td>ENVS 5000</td>
<td>Collaborative Problem-Solving for Environment and Natural Resources</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Project-based capstone course for environmental studies majors. Students work in teams to develop plans and alternative solutions relevant to actual issues or land areas, integrating knowledge from a range of environmental and natural resource disciplines. Prerequisites: Senior standing; ENVS 3000, 4000. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ENVS 5110</td>
<td>Environmental Education</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers teaching about the environment, and using the environment and the natural world to teach other subjects, with a strong emphasis on participation and on practicing teaching techniques. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ENVS 5300</td>
<td>Natural Resources Law and Policy*</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Legal and administrative regulation of forests and associated resources (water, air, fish, wildlife, and scenery). Emphasis on agency organizational culture, federal legislation, court cases, administrative procedures, and federal natural resources agencies’ interactions with tribal, state, and local governments. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ENVS 5320</td>
<td>Water Law and Policy in the United States</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Introduction to policies, laws, institutions, and practices guiding western water allocation, emphasizing how to efficiently and equitably allocate increasingly scarce supplies. Explores reserved water rights, water markets, stream adjudication, public trust doctrine, basinwide management, and riparian management. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ENVS 5550</td>
<td>Sustainable Development*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>(dual listing 6550)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Examines the challenges and opportunities humanity faces in sustainably managing human resources. Provides a global perspective on the status of both renewable and nonrenewable resources, as well as the impact of globalization and policies designed to meet long-term human needs. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ENVS 5570</td>
<td>Sustainable Living</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Theories and techniques for decision-making about environmental impacts of consumer decision-making, and about alternatives for a sustainable future. Incorporates meanings of sustainable living, relationships between lifestyle choices and the environment, and feasible steps toward ecological sustainability. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ENVS 5640</td>
<td>Conflict Management in Natural Resources</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Introduction to conflict management techniques for those involved in natural resource management. Also taught as SOC 5640/6640. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ENVS 5800</td>
<td>Field Studies in Collaborative Natural Resource Stewardship</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Two-week field course introduces students to methods and philosophical approaches incorporated in Tehabi, a summer-long internship program focusing on collaborative stewardship of natural resources. Enrollment limited to students accepted into the Tehabi program. (Su)</td>
<td></td>
</tr>
<tr>
<td>ENVS 5810</td>
<td>Internship in Collaborative Natural Resource Stewardship</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Mentored internship involving participation in the Tehabi program, which teaches collaborative stewardship of natural resources within a federal, state, or nonprofit agency. Enrollment limited to students accepted into the Tehabi program. (Su)</td>
<td></td>
</tr>
<tr>
<td>ENVS 6000</td>
<td>Theoretical Foundations in Natural Resources</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>(dual listing 7000)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Overview of interdisciplinary theories and frameworks concerning how human societies affect, and are affected by, ecosystem processes at local, regional, and global scales. Focuses on systems theory, social and environmental sustainability, and scientific integration for ecosystem planning, policy, and management. (F)</td>
<td></td>
</tr>
<tr>
<td>ENVS 6110</td>
<td>Fisheries and Wildlife</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>(dual listing 4110)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Examines of policy issues and administrative approaches in fish and wildlife management, with particular emphasis on nonbiological issues facing wildlife managers and administrators. (F)</td>
<td></td>
</tr>
<tr>
<td>ENVS 6130</td>
<td>Policy Aspects of Wildland Recreation</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Political, legal, and economic bases for wildland recreation management. Relationship between outdoor recreation and tourism. Lectures concurrent with ENVS 4130. Also includes weekly discussion session focusing on relevant scientific research and policy analyses. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ENVS 6200</td>
<td>Bioregional Analysis and Planning</td>
<td>5</td>
</tr>
<tr>
<td></td>
<td>Compilation and analysis of data for assessing biophysical and socio-economic features of landscapes, and for evaluating impacts of land-use policies across both landscapes and time. Provides real-world learning experience in working with stakeholders and agency decision-makers. (F)</td>
<td></td>

- **Prerequisite:** ENVS 6200. (Sp)
- **Course Notes:**
  - **dual listing 6800**
  - **dual listing 6700**
  - **dual listing 6870**
  - **dual listing 6840**
  - **dual listing 5550**
  - **dual listing 7300**
  - **dual listing 7700**
  - **dual listing 5640**
  - **dual listing 6000**
  - **dual listing 6300**
  - **dual listing 7840**

**General Concepts:**
- General concepts, history, and issues in all major areas of the science of ecology including: environmental biophysics; and physiological, behavioral, evolutionary, community, ecosystem, and applied ecology in both terrestrial and aquatic environments. Also taught as AWER 6870, BIOL 6870, and FRWS 6870. (F)
- Assessment of current knowledge and knowledge gaps concerning impacts of wildland recreation on wildlife, plants, soil and water resources, and processes. Strategies for coexistence of recreation visitors and nonhuman ecosystem elements. (Sp)
- Examines how people respond as individuals to nature and environmental phenomena, drawing on theory and research from social psychology, environmental psychology, and behavior analysis. Emphasizes applications to knowledge, attitude, and behavior change strategies for improving environmental sustainability. (Sp)
- The Ecology Center schedules regular seminars throughout the school year with ecological scientists from other institutions participating. Ecology majors are required to attend a minimum of 10 such lectures. Students should register for fall semester, but attend through spring semester. Also taught as AWER 6960, BIOL 6960, and FRWS 6960. (F)
- Experience conceptualizing and prioritizing research problems involving human societies and ecosystems. Reviews approaches for creating and testing interdisciplinary hypotheses pertaining to human-ecosystem interactions. Explores methods for integrating social and biophysical data. (Sp)
- Experience using various quantitative and qualitative techniques and tools to collect and analyze data in research projects focused on human-ecosystem interactions. Topics range from survey sampling to use of simulation models and spatial statistics involving Geographic Information Systems (GIS). (F)

## Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ETE 3070</td>
<td>K-8 Engineering and Technology Education</td>
<td>3</td>
<td>Introduction to technology education and to science, technology, and society (STS) curricula for elementary schools, emphasizing teaching, developing, and managing technology-based activities. (F)</td>
</tr>
<tr>
<td>ETE 3220</td>
<td>Architecture and Construction Systems</td>
<td>3</td>
<td>Classroom laboratory practicum for design, practice, and performance of technology education demonstrations and lab activities. Prerequisites: ETE 1000; ETE 3300 (must be taken concurrently). (F)</td>
</tr>
<tr>
<td>ETE 3230</td>
<td>Machine and Production Drafting</td>
<td>3</td>
<td>Techniques of teaching as applied to individual and group instruction. Students complete 30 hours of tutoring students and assist teachers with managerial, clerical, and other professional tasks. Prerequisites: ETE 1000; ETE 3200 (must be taken concurrently). (F)</td>
</tr>
<tr>
<td>ETE 3270</td>
<td>Advanced Computer-Aided Drafting</td>
<td>3</td>
<td>Designed to enhance CADD productivity, encourage customization, and introduce students to advanced CADD techniques, including programming and introduction to parametric design. Prerequisite: ETE 1200. (Sp)</td>
</tr>
<tr>
<td>ETE 3300</td>
<td>Clinical Experience I</td>
<td>1</td>
<td>Field-based experiences in secondary schools. Students complete 30 hours of tutorng students and assist teachers with managerial, clerical, and other professional tasks. Prerequisites: ETE 1000; ETE 3200 (must be taken concurrently). (F)</td>
</tr>
<tr>
<td>ETE 3380</td>
<td>Microprocessor and Computer Interfacing</td>
<td>3</td>
<td>Microcomputer interface applications, including digital system interface, serial and parallel interfacing, and D/A and A/D converters. Prerequisites: ETE 2240, 2370. (Sp)</td>
</tr>
<tr>
<td>ETE 3390</td>
<td>Microcontrollers</td>
<td>3</td>
<td>Study of microcontrollers and applications. Includes programming and building circuits. Prerequisite: ETE 3380. (F)</td>
</tr>
<tr>
<td>ETE 3400</td>
<td>Communication Circuits</td>
<td>3</td>
<td>Introduction to radio frequency communication circuits. Includes oscillators, modulation, transmitters, receivers, transmission lines, antennas, RF propagation, digital signal processing, GPS, and spread spectrum. Prerequisites: ETE 2300 and 2400. (Sp)</td>
</tr>
<tr>
<td>ETE 3440 DSC</td>
<td>Science, Technology, and Modern Society</td>
<td>3</td>
<td>Designed to challenge students from all academic majors to develop an understanding of the dynamic interaction between science, technology, and society. Explores responsibility of humans for directing the utilization of technology as a creative enterprise. Also taught as ASTE 3440. (F,Sp)</td>
</tr>
<tr>
<td>ETE 3510</td>
<td>Introduction to Networking</td>
<td>3</td>
<td>Study of hardware and software required to build, install, maintain, and support a local area network. Emphasizes laboratory applications. Prerequisite: BIS 5400 (may be taken concurrently). (F)</td>
</tr>
<tr>
<td>ETE 3710</td>
<td>Electronics/Computer Design I</td>
<td>1</td>
<td>Students select and plan a senior project. Requires written proposal, including technical description of the project and management plans. Prerequisite: ETE 2320 (may be taken concurrently). (F)</td>
</tr>
<tr>
<td>ETE 3740</td>
<td>Facility and Equipment Maintenance</td>
<td>3</td>
<td>Systems approach to facility, equipment, and tool maintenance, including principles of woodworking, machine construction, adjustment, and sharpening.</td>
</tr>
<tr>
<td>ETE 3900</td>
<td>Principles and Objectives of Career and Technical Education</td>
<td>3</td>
<td>Comprehensive study of philosophy and purposes of career and technical education programs and their place in the total program of modern education.</td>
</tr>
<tr>
<td>ETE 3930</td>
<td>Evaluation of Career and Technical Education</td>
<td>2</td>
<td>Factors for evaluation of attitudes, skills, work habits, technical information, and instrument construction.</td>
</tr>
<tr>
<td>ETE 4200</td>
<td>Clinical Experience II</td>
<td>1</td>
<td>Field-based experience, in which students complete 30 hours of teaching-related experiences in the classroom. Prerequisites: ETE 3200, 3300; ETE 4400 (must be taken concurrently). (Sp)</td>
</tr>
<tr>
<td>ETE 4310</td>
<td>Corrosion and Corrosion Control</td>
<td>2</td>
<td>Analysis of corrosion mechanisms for ferrous metals, nonferrous metals, and nonmetallic materials, as well as the control of corrosion. Prerequisites: CHEM 1110 and MATH 1060. (Sp)</td>
</tr>
<tr>
<td>ETE 4400</td>
<td>Methods of Teaching Engineering and Technology Education II</td>
<td>3</td>
<td>Techniques of teaching as applied to individual and group instruction. Students apply various methods in presenting lessons. Prerequisites: ETE 3200, 3300; ETE 4300 (must be taken concurrently). (Sp)</td>
</tr>
<tr>
<td>ETE 4440</td>
<td>Technology and Society</td>
<td>3</td>
<td>Challenges students to develop an understanding of the dynamic interaction between science, technology, and society. Explores the responsibility of humans to direct the utilization of technology as a creative enterprise. Students critically investigate technological innovations, issues, and impacts on society from a global perspective. (F,Sp)</td>
</tr>
<tr>
<td>ETE 4700</td>
<td>Student Teaching in Postsecondary Schools</td>
<td>4</td>
<td>Planning, presenting, and evaluating instruction for students in postsecondary industrial and technical programs under the supervision of an experienced teacher. Enrollment by permission only.</td>
</tr>
<tr>
<td>ETE 4710 CI</td>
<td>Electronics/Computer Design II</td>
<td>3</td>
<td>Execution and completion of a team or individual project. Requires design reviews and written reports. Prerequisite: ETE 3710. (Sp)</td>
</tr>
<tr>
<td>ETE 4930</td>
<td>Independent Study</td>
<td>1-4*</td>
<td>Upon application, students may propose and complete work above and beyond regular coursework to support or supplement their major. (F,Sp,Su)</td>
</tr>
<tr>
<td>ETE 4940</td>
<td>Related Industrial Experience</td>
<td>1-12*</td>
<td>Provision for enrollment in industry schools conducted on university level. Approved by department upon application for trade competency examination and work experience in industry. (F,Sp,Su)</td>
</tr>
<tr>
<td>ETE 5040</td>
<td>Manufacturing Enterprise</td>
<td>3</td>
<td>Focuses on management technology used to establish a manufacturing enterprise, engineer a product and production system, finance the operation, and market the product. Prerequisite: ETE 1030.</td>
</tr>
<tr>
<td>ETE 5220 CI</td>
<td>Program and Course Development</td>
<td>3</td>
<td>Review of basic principles and practices of curriculum and course development used in applied technology and technology education. Emphasizes components needed to develop a curriculum guide. Prerequisites: ETE 3200, 3300. (Sp)</td>
</tr>
<tr>
<td>ETE 5230</td>
<td>Technical Training Innovative Program</td>
<td>1-4*</td>
<td>Prepares prospective and incumbent teachers to implement and conduct contemporary programs. Includes skill development and the philosophy needed for curriculum innovation.</td>
</tr>
</tbody>
</table>

<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ETE 5240</td>
<td>Principles of Technology</td>
<td>2-3</td>
<td>Introduction to applied technology principles forming the basis for today’s society.</td>
</tr>
<tr>
<td>ETE 5500</td>
<td>Student Teaching Seminar</td>
<td>2</td>
<td>Focuses on observations and problems arising during student teaching. Includes review of teaching plans, procedures, adaptive classroom practices, and evaluation. Prerequisite: ETE 5630 (must be taken concurrently). (F)</td>
</tr>
<tr>
<td>ETE 5630</td>
<td>Student Teaching in Secondary Schools</td>
<td>10</td>
<td>Candidates assigned to cooperating teachers in public secondary schools within their major and minor subjects. Students have professional responsibilities with teaching. Prerequisite: ETE 5500 (must be taken concurrently). (F)</td>
</tr>
<tr>
<td>ETE 5800</td>
<td>Seminar—Technology Education</td>
<td>1-3*</td>
<td>Provides opportunity for students to participate in variety of enriching experiences, such as guest speakers, field trips, demonstrations, and conferences.</td>
</tr>
<tr>
<td>ETE 5900</td>
<td>Workshop in Engineering and Technology Education</td>
<td>1-4*</td>
<td>Special workshops for education or industry. May be repeated providing content varies.</td>
</tr>
<tr>
<td>ETE 5910</td>
<td>Special Problems in Engineering and Technology Education</td>
<td>1-4*</td>
<td></td>
</tr>
<tr>
<td>ETE 5920</td>
<td>Related Technical Training</td>
<td>1-12*</td>
<td></td>
</tr>
<tr>
<td>ETE 6090</td>
<td>Program Design</td>
<td>3</td>
<td>Study of contemporary program design and development in technology and industrial education. Reviews complete curriculum developmental process. (F,Sp,Su)</td>
</tr>
<tr>
<td>ETE 6100</td>
<td>Contemporary Issues</td>
<td>3</td>
<td>Study of present and future foundational professional developments in technology and industrial education. Students identify and investigate contemporary trends and issues affecting and facing technology and industrial education. (F,Sp,Su)</td>
</tr>
<tr>
<td>ETE 6150</td>
<td>Evaluation and Assessment</td>
<td>3</td>
<td>Study of various methods used to measure and evaluate student achievement, including cognitive, affective, and psychomathic. Reviews principles of learning and teaching, and of evaluation of instruction. (F,Sp,Su)</td>
</tr>
<tr>
<td>ETE 6200</td>
<td>Composite Manufacturing Processes and Repair</td>
<td>3</td>
<td>Composite manufacturing processes, composite materials survey, tooling design and fabrication, autoclave processes, vacuum bag techniques, filament winding processes, equipment requirements, materials cutting and storage, and composite materials testing. (Sp)</td>
</tr>
<tr>
<td>ETE 6250</td>
<td>Internship</td>
<td>1-6</td>
<td>Advanced instruction through supervised work experience in teaching, supervising, or administering educational or industrial program. (F,Sp,Su)</td>
</tr>
<tr>
<td>ETE 6310</td>
<td>Corrosion and Corrosion Control</td>
<td>2</td>
<td>Analysis of corrosion mechanisms for ferrous metals, nonferrous metals, and nonmetallic materials, as well as the control of corrosion. Prerequisites: CHEM 1110 and MATH 1060. (Sp)</td>
</tr>
<tr>
<td>ETE 6440</td>
<td>Technology and Society</td>
<td>3</td>
<td>Students learn techniques for conducting an occupational analysis (both job and task analysis) and for developing performance-based or competency-based curriculum. Explores industrial and educational applications for this style of curriculum development.</td>
</tr>
<tr>
<td>ETE 6450</td>
<td>Administration and Organization</td>
<td>3</td>
<td>Administrative and supervisory techniques for successful operation of technology education and applied technology education programs. (F,Sp,Su)</td>

<td>Engineering Design and Analysis for Technology Education</td>
<td>3</td>
<td>Engineering design methodology for technology education teacher educators. Focuses on science principles and predictive mathematics comprising the engineering sciences needed to solve problems in a design framework that is analytical, predictive, and repeatable. (F)</td>
</tr>
<tr>
<td>ETE 7040</td>
<td>Dynamic and Network Engineering Processes for Technology Education</td>
<td>3</td>
<td>Examines dynamic and network processes in engineering through the use of simulation software. Students use these techniques to develop standards-based engineering curricular modules for use in grades 6 through 12. (Sp)</td>
</tr>
<tr>
<td>ETE 7230</td>
<td>Foundations of Technology</td>
<td>3</td>
<td>Study of the objectives, legislative foundations, principles, philosophy, impact, and organization of technology and industrial education. (F,Sp,Su)</td>
</tr>
<tr>
<td>ETE 7400</td>
<td>Occupational Analysis and Curriculum Development*</td>
<td>3</td>
<td>Students learn techniques for conducting an occupational analysis (both job and task analysis) and for developing performance-based or competency-based curriculum. Explores industrial and educational applications for this style of curriculum development.</td>
</tr>
<tr>
<td>ETE 7460</td>
<td>Finance and Grant Writing</td>
<td>3</td>
<td>Procedures in financial administration of industrial education monies. Budget preparation, budget operation and control, and school accounting. In-depth review of steps and techniques needed for grant writing. (F,Sp,Su)</td>
</tr>

</table>

Utah State University 2006-2007 General Catalog
Course Descriptions

ETE 7500  Internationalizing Institutions of Higher Education 3
Explores the need and methodology of internationalizing higher education institutions, with the purpose of understanding the global society and delivering education worldwide. (F,Sp,Su)

ETE 7600  Academic Issues and Politics in Higher Education 3
Study of higher education in Utah, the social political impacts, and the role of faculty members in higher education institutions. (F,Sp,Su)

ETE 7810  Research Seminar 1-6
Identification of research problems, consideration of research strategies and methods, application of research and statistical concepts in departmental focus, and interaction with faculty. (F,Sp,Su)

ETE 7900  Independent Study 1-3
Individually directed reading and conference. Departmental approval required before registration. (F,Sp,Su)

ETE 7970  Dissertation Research 1-15
ETE 7970  Continuing Graduate Advisement 1-3

---

FCHD 1100  Critical Issues in Family, Consumer, and Human Development 1
Introduction to the majors, minors, emphases, and disciplines in family, consumer, and human development. Emphasizes career opportunities and how scholars in this field address critical social issues. Available online only. (F,Sp,Su)

FCHD 1500  BSS Human Development Across the Lifespan 3
Overview of human development across the lifespan, from conception to death. (F,Sp)

FCHD 2400  BSS Marriage and Family Relationships 3
Overview of couple and family relationships, including marriage, child bearing and rearing, intergenerational relationships, and alternative family forms. (F,Sp)

FCHD 2450  BSS The Consumer and the Market 3
Explores how the marketplace operates, including factors influencing consumer purchases, current consumer problems, and assistance provided to consumers by federal and state agencies, businesses, and other organizations. (F,Sp)

FCHD 2500  Child Development Associate Workshop 3
Training provided by an approved instructor and following an approved curriculum that leads to the fulfillment of requirements for the National Child Development Associate (CDA) credential. Elective credits granted for this course. (F,Sp,Su)

FCHD 2550  Child Development Associate Training and Practicum 6
During and after the coursework associated with FCHD 2500, students fulfill a practicum. At the conclusion of FCHD 2500, the CDA advisor/trainer conducts a comprehensive observation of the CDA candidate and the CDA observation instrument is completed and included as part of application materials submitted for the final assessment by the CDA granting organization (Council for Early Childhood Professional Recognition). When the CDA candidate receives the CDA credential, then he or she receives credit for FCHD 2550. Prerequisite: FCHD 2500. (F,Sp,Su)

---

FCHD 2600  Seminar in Early Childhood Education 2
Orientation to the profession of early childhood education, current philosophies, teaching techniques, and approaches to curricula found in programs for young children. Must be taken concurrently with FCHD 2630. Prerequisite: Admission to teacher education or instructor's permission. (F,Sp)

FCHD 2610  Child Guidance 3
Review of parenting styles and child guidance philosophies with emphasis on principles and techniques. (F,Sp,Su)

FCHD 2630  Practicum in Early Childhood Education 2
Students participate in developmentally appropriate preschool programs as classroom aides. Must be taken concurrently with FCHD 2600. Prerequisite: Admission to teacher education or instructor’s permission. (F,Sp)

FCHD 3100  Abuse and Neglect in Family Context 3
Causes, treatment, and laws regarding family violence, including child abuse and neglect, partner abuse, and elder abuse. Prerequisites: Sophomore standing, FCHD 1500, 2400. (F,Sp)

FCHD 3110  Human Sexuality 3
Development and expression of human sexual values, attitudes, and behaviors in family and cultural contexts. Prerequisites: FCHD 1500, 2400. (F,Sp)

FCHD 3130  QI Research Methods 3
Common methodologies used in current family and human development research. Emphasis on becoming a knowledgeable and informed consumer of research. Enrollment limited to FCHD and FCHD majors only. Prerequisite: STAT 1040. (F,Sp)

FCHD 3210  CI Families and Cultural Diversity 3
Similarities and differences in family patterns and functions in terms of race and ethnicity, gender, social class, and international development. Prerequisites: FCHD 1500, 2400, ENGL 2010. Enrollment limited to FCHD majors only (F,Sp)

FCHD 3280  Economic Issues for Individuals and Families 3
Focuses on issues related to economic well-being of individuals and families, with special emphasis on income and wealth, poverty, consumption and saving, work and leisure, human capital investment, and aging. (Sp)

FCHD 3310  Consumer Policy 3
Examines different tools for policy analysis. Provides conceptual and analytical framework for understanding the role of consumer sciences professionals as political actors and the potential to influence the shaping of public policy, particularly consumer and government policies. (Sp)

FCHD 3340  Housing: Societal and Environmental Issues 3
Studies housing in the contemporary U.S., including affordability, access, expectations, aesthetic considerations, and effects of public and private policies on housing choices. (F)

FCHD 3350  BSS/QI Family Finance 3
Achieving personal and family financial goals, including financial planning and record keeping, different types of insurance, taxes, use of credit, investments, retirement, and estate planning. Prerequisite: Choose one of MATH 1030, 1050, or STAT 1040. Note: Effective Fall Semester 2007, this course will have no prerequisites and will no longer fulfill the Quantitative Intensive (QI) University Studies requirement. (F,Sp,Su)

FCHD 3450  Consumer Credit Problems 3
Consumer credit problems, debt reduction strategies, credit collection policies and practices, bankruptcy, and government assistance programs. Prerequisite: FCHD 3350. (F)

FCHD 3510  Infancy and Early Childhood 3
Development and growth of the child from conception to five years. Physical, social, and emotional growth; and parenting skills. Prerequisites: Junior standing and FCHD 1500, 2400. (F,Sp)
Course Descriptions

FCHD 3520  Children in the Middle Years  3
Growth and development of normal children. Guidance principles related to behavior of children at these age levels. Prerequisites: Junior standing and FCHD 1500, 2610. (F,Sp)

FCHD 3530  Adolescence  3
Social, psychological, and physical aspects of adolescence in modern societies. Social and cultural expectations and influences on adolescents stemming from the family, peers, school, and the community. Prerequisites: Junior standing and FCHD 1500. (F,Sp)

FCHD 3540  Adult Development and Aging  3
Interdisciplinary perspective on developmental issues in adulthood and old age. Biosocial, cognitive, and psychosocial changes in older adults in family, community, cultural, and socio-political contexts. Prerequisites: Junior standing and FCHD 1500. (F,Sp)

FCHD 3550  Infant Lab  1
Practical experience in laboratory setting with children birth through two years of age. Lab supplements/complements course content of FCHD 3510. Prerequisites: Junior standing, FCHD 1500, 2610. Corequisite: FCHD 3510. (F,Sp)

FCHD 3560  Middle Childhood Lab  1
Practical experience in laboratory setting with children in the middle years. Lab supplements/complements course content of FCHD 3520. Prerequisites: Junior standing, FCHD 1500, 2610. Corequisite: FCHD 3520. (F,Sp)

FCHD 4220  Family Crises and Interventions  3
Normative and nonnormative stressors provoking individual and family crises. Principles and techniques for family interventions. Prerequisites: Junior standing, FCHD 2400. (F,Su)

FCHD 4230  Families and Social Policy  3
Local, state, and federal policies with implications for individuals and families across the lifespan. Prerequisites: Junior standing and FCHD 2400. (F,Sp)

FCHD 4240  Social and Family Gerontology  3
Social, cultural, and family contexts of aging. Intergenerational family relations in later life. Social policies and services affecting older adults and their families. Prerequisites: Junior standing and FCHD 2400, 3540. (F,Sp)

FCHD 4330  Family Finance Career Seminar  1
Exploration of career options through readings, guest lecturers, interviews of practitioners, and development of an internship and career plan. Prerequisite: FCHD 3350. (F)

FCHD 4350  Advanced Family Finance  3
Managing personal and family financial resources to achieve goals relating to investments, retirement, and estate planning. Prerequisite: FCHD 3350. (Sp)

FCHD 4460  Financial Counseling  3
Development and application of financial counseling and presentation skills. Analysis of various financial problems and development of appropriate solutions and resources. Prerequisites: FCHD 3350, 3450. Enrollment limited to FCHD majors with a Family Finance Emphasis. (Sp)

FCHD 4550  Practicum: Consumer Science  1-12
Placement experience in applying skills and knowledge in community agencies. Prerequisites: Junior standing, completion of 24 credits in major. Enrollment limited to Family and Consumer Sciences majors who have at least junior standing, or to FCHD majors with a Family Finance Emphasis, who have completed at least 30 credits in the major. The application deadlines are: February 15 for fall semester, June 15 for spring semester, and October 15 for summer semester. (F,Sp,Su)

FCHD 4690  Practice Teaching in Child Development Laboratories  3 or 6
Intensive teaching practicum in the Child Development Lab program. Students must sign up at least three full semesters in advance in FL 214. Prerequisites: Junior standing, FCHD 4550, and departmental permission. (F,Sp,Su)

FCHD 4790  Gerontology Practicum  1-3
Placement experience in gerontology settings. Practical opportunities to apply theory, knowledge, and skills. Prerequisites: Senior standing and FCHD 3540, 4240. Apply one semester in advance. The application deadlines are: February 15 for fall semester, June 15 for spring semester, and October 15 for summer semester. (F,Sp,Su)

FCHD 4890  Practicum  1-12
Placement experience in applying skills and knowledge in community agencies. Enrollment limited to FCHD majors only. Prerequisites: Junior standing and FCHD 4900; must have completed a total of 30 FCHD credits and the practicum application. The application deadlines are: February 15 for fall semester, June 15 for spring semester, and October 15 for summer semester. (F,Sp,Su)

FCHD 4990  Readings and Conference  1-6
Directed independent study of topics preselected by faculty and student. Instructor permission required before registration. (F,Sp,Su)

FCHD 5340  Housing Finance and Regulations  3
Exploration of mortgage loan industry, with in-depth examination of various lending products and procedures. Study of regulations affecting housing, including Fair Housing, predatory lending, and mortgage default. Prerequisites: FCHD 3340, 3350, Enrollment limited to Family, Consumer, and Human Development majors and Family and Consumer Sciences majors. (Sp)

FCHD 5540  Family Life Education Methods  3
Introductory course focused on theory, principles, and skills necessary to prepare, present, and evaluate family life education programs and workshops. Prerequisites: Junior standing, FCHD 1500 and 2400. Enrollment limited to Family, Consumer, and Human Development majors only. (F,Sp)

FCHD 5550  Interdisciplinary Workshop  1-3
(F,Sp,Su)

FCHD 5590  Financial Counseling Practicum  3
Students apply their knowledge by conducting one-on-one counseling sessions, observing other counselors, and teaching workshops. Students develop valuable management, communication, and counseling skills. Students should sign up as far in advance as possible after being admitted to the Family Finance emphasis. Prerequisites: FCHD 4220, 4460, 5340 (may be taken concurrently). Enrollment limited to FCHD majors with a Family Finance Emphasis. The application deadlines are: February 15 for fall semester, June 15 for spring semester, and October 15 for summer semester. (F,Sp,Su)

FCHD 6010  Survey of Family Relations Research  3
Overview and critique of substantive areas of research in marriage and the family. Prerequisite: FCHD 2400 or equivalent. (F)

FCHD 6020  Survey of Human Development Research  3
Examines contemporary research and developmental issues. Highlights social development from social-historical and social change framework. Prerequisite: FCHD 1500 or equivalent. (Sp)

FCHD 6030  Research Methods  3
Overview of methods for studying family relations and human development, including sampling, measurement, research design, and data analyses/interpretations. Research proposal required. Prerequisite: FCHD 3130 or equivalent. (Sp)

</table>
Course Descriptions

**FCCH 7970** Dissertation Research 1-9
Research for dissertation, as arranged with advisor. Prerequisite: Advisor’s permission. (F,Sp,Su)

**FCCH 7980** Advanced Graduate Practicum 1-9
Professional supervision of doctoral students, applying general principles from the study of research in family and human development. Prerequisite: Advisor's permission. (F,Sp,Su)

**FCCH 7990** Continuing Graduate Advisement 1-9
Continuing registration to complete dissertation requirements. Prerequisite: Twenty credits of FCCH 7970. (F,Sp,Su)

---

**FCSE 1140** Introductory Sewing 2
Introductory-level sewing techniques geared toward beginning sewing students. Includes use of sewing machines and sergers. No previous sewing experience needed. (F,Sp)

**FCSE 2040** Clothing Production Principles 3
Intermediate-level clothing construction techniques, pattern alteration and fitting, and use of sewing machine and serger. Previous sewing experience recommended. (F,Sp)

**FCSE 2510** Orientation to Family and Consumer Sciences Education 3
Overview of the integrated Family and Consumer Sciences Education system. Students learn how family and human development, nutrition, finance, clothing production, and consumerism is planned, implemented, and evaluated through FCSE programs in the public schools. Enrollment limited to FCSE majors only. (Sp)

**FCSE 3030** DSS Textile Science 4
Study of fibers, yarns, fabric constructions, and finishes as related to appreciation, selection, use, and care of current textiles. Evaluation of physical, economic, and aesthetic properties of textile products to determine suitability for desired end use. (Sp)

**FCSE 3040** Advanced Clothing Production Principles 3
Develops skills in flat pattern design and tailoring techniques. Prerequisite: FCSE 2040. (F)

**FCSE 3060** DSS/CI Human Behavior Related to Dress 3
Analyzes economic, historic, psychological, social, and cultural contexts shaping individual and group dress and appearance. Prerequisite: Completion of a course having University Studies Breadth Social Sciences (BSS) designation. (F)

**FCSE 3080** Dress and Humanity 3
Explores relationship of dress and humanity. Collaborative group assignments, discussions of history related to dress, cultures as related to dress, and the influence dress has in today’s society. (F,Su)

**FCSE 3300** Family and Consumer Sciences Education Clinical Experience I 1
Provides on-site experience for students to model a secondary family and consumer sciences education teacher. Students are expected to learn teaching and classroom management principles. Must be taken concurrently with FCSE 3400. Prerequisite: Admission to Secondary Education Professional Education Component. (Sp)

**FCSE 3400** Family and Consumer Sciences Education Methods I 3
Methods of successfully planning and maintaining family and consumer sciences education programs in secondary schools. History and philosophy of applied technology education. Prerequisite: Admission to Secondary Education. FCSE 3400 and 3300 must be taken concurrently. (Sp)

**FCSE 4250** Internship in Family and Consumer Sciences Education 1-12
Midmanagement-level experience in a position approved by the department. One credit earned for each 60 hours of experience. Prerequisite: Junior standing. (F,Sp,Su)

**FCSE 4300** Family and Consumer Sciences Education Clinical Experience II 1
Provides on-site experience for students to model a secondary family and consumer sciences education teacher. Students expected to learn teaching and classroom management principles. Prerequisites: FCSE 3300, 3400. (F)

**FCSE 4400** Family and Consumer Sciences Education Methods II 3
Development of competency in curriculum planning, and skill and sensitivity in the use of various teaching-learning strategies and resources. Includes assessment for vocational education. Prerequisites: FCSE 3300, 3400. (F)

**FCSE 4900** Independent Study in Family and Consumer Sciences Education 1-5
Prior to registration, students must identify a project of interest and discuss the project with instructor. Prerequisite: Junior standing and approval of faculty. (F,Sp,Su)

**FCSE 5500** Student Teaching Seminar 2
Taken during student teaching in secondary schools to complement school experience. Focuses upon problems arising during student teaching. Includes teaching plans, procedures, adaptive classroom practices, and evaluation. Prerequisites: FCSE 4300, 4400. Must be taken concurrently with FCSE 5600. (Sp)

**FCSE 5550** Workshop Topics in Family and Consumer Sciences Education 0.5-3
Concentrated offerings to increase knowledge, skills, or creative expression in current Family and Consumer Sciences Education topics or curriculum areas. (F,Sp,Su)

**FCSE 5620** Student Teaching in Secondary Schools 10
After assignment to a cooperating family and consumer sciences educator, students are given professional responsibilities associated with teaching. Prerequisites: FCSE 4300, 4400. Must be taken concurrently with FCSE 5550. (Sp)

**FCSE 6210** Using and Interpreting SPSS to Analyze Social Research Data** 3
Explores the use of SPSS for descriptive statistics, contingency tables, ANOVA models, and multiple regression. Discussion of syntax, procedure options, and interpretation of output. (Sp)

**FCSE 6240** Graduate Topics in Family and Consumer Sciences Education 1-3
Surveys selected topics in family and consumer sciences education. Topics will be unique each time course is offered. (F,Sp,Su)

**FCSE 6250** Graduate Internship in Family and Consumer Sciences Education 1-6
Designed for graduate students who wish to acquire or upgrade their experience in an occupational field related to their area of study. One credit earned for each 60 hours of experience. Repeatable for up to 6 credits. Prerequisite: Instructor approval prior to enrollment. (F,Sp,Su)

**FCSE 6280** Research Methods in Family and Consumer Sciences Education 2
Explores techniques and tactics for designing and analyzing social science human behavior research. Emphasizes designs and instrumentation. Prospectus required. This course is currently inactive. Contact department for information about when this course may be taught.

## French (FREN)

See Department of Languages, Philosophy, and Speech Communication, pages 364-379.

### Lower Division

- **FREN 1010** French First Year I
  - Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Not open to those with more than one year high school French or equivalent. (F,Sp)
  - Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

### Upper Division

Upper-division French courses (3000-level and above) are available only to students who have completed FREN 2020 or who can demonstrate equivalent proficiency through testing. (Exception: FREN 3500, Topics in French Literature in Translation, does not require the 2020-level prerequisite, and will not count toward the Bachelor of Arts degree language requirement.)

Utah State University 2006-2007 General Catalog
Course Descriptions

Forest, Range, and Wildlife Sciences (FRWS)

See Department of Wildland Resources, pages 541-547.

Note: Effective Spring Semester 2007, courses listed with the FRWS prefix will use the Wildland Resources (WILD) prefix.

FRWS 2000 Introduction to Forest, Range, and Wildlife Sciences 1
With a combination of field trips, computer lab exercises, and classroom discussions, students gain an overview of forest, range, and wildlife sciences, including a review of career opportunities for students completing a BS degree in forest, range, or wildlife. (F,Sp)

FRWS 2200 BLS Ecology of Our Changing World 3©
Foundations of ecological and evolutionary relationships of organisms with other organisms and with the physical environment, emphasizing populations, communities, and ecosystems. Integration of basic science with applications of science to understanding human interactions with the environment. (F,Sp)

FRWS 2250 Introductory Internship/Co-op 1-3©
Introductory-level educational experience in internship/cooperative education position approved by department. Prerequisite: Departmental signature. (F,Sp,Su)

FRWS 2300 Mushroom Identification 1
Lecture course covering taxonomy, ecology, and importance of macro and micro fungi. Also taught as BIOL 2300. (F)

FRWS 2310 Mushroom Identification Lab 1-2©
Lab course acquainting students with basic fungal taxonomic groups. Students collect, preserve, and identify fungi they collect. Edible fungi prepared and eaten. Also taught as BIOL 2310. (F)

FRWS 2500 Computer Applications in Natural Resources 3
Advanced spreadsheet, graphics, aerial photography, and Geographic Information Systems for natural resource management. (F)

FRWS 3300 Management Aspects of Wildlife Behavior 3
Principles, concepts, and mechanisms of animal behavior, emphasizing behavioral ecology, development, and comparative aspects of special relevance to management of fish and wildlife. (Sp)

FRWS 3600 Wildland Plant Ecology and Identification 4
Autecology and identification of dominant grass, forbs, and woody plants of the Intermountain West. Emphasizes native species; however, introduced or noxious weeds are included. Explores plant structure and function, as related to the environment. Enrollment limited to FRWS Department majors. Department authorization required for all nonmajors. (F)

FRWS 3610 Wildland Animal Ecology and Identification 4
Autecology and identification of important mammals, birds, reptiles, and amphibians of the Intermountain West. Emphasizes native species distribution and habitat requirements in relation to the environment. Prerequisite: NR/Biol 2220. Enrollment limited to FRWS Department majors. Department authorization required for all nonmajors. (F)

FRWS 3700 CI Inventory and Assessment in Natural Resource and Environmental Management 3
Lectures, laboratory exercises, and field-based projects introduce students to the concepts, strategies, and analytical methods of science-based assessment of natural resources. Prerequisite: FRWS 3700 or permission of instructor. (Sp)

FRWS 3800 Wildland Ecosystems 3
Structure, function, and dynamics of terrestrial ecosystems in response to natural and anthropogenic impacts, with emphasis on the Intermountain West and Great Plains. Prerequisites: NR/Biol 2220, and SOIL 3000 (or concurrent enrollment). (Sp)

FRWS 3810 Plant and Animal Populations 3
Basics of plant and animal population ecology, including population regulation, life histories, single and multi-species interactions, and metapopulations. Case studies will cover topics of both management and conservation concern. Prerequisites: NR/Biol 2220, MATH 1100 or higher. (Sp)

FRWS 3850 Vegetation and Habitat Management 3
Applying ecological principles and concepts to manipulate the composition, structure, and productivity of wildland vegetation for a range of objectives, including the creation and maintenance of wildlife habitat, using biological, chemical, and mechanical methods, as well as fire. Prerequisites: SOIL 3000; FRWS 3600 (may be taken concurrently). (F)

FRWS 3900 Managing Dynamic Ecological Systems 4
Emphasizes how people from diverse natural resource disciplines benefit from integrating Eastern and Western philosophical and cultural beliefs with behavioral principles and processes to manage dynamic systems with due consideration for the ecological, cultural, and economic values of societies. (Sp)

FRWS 4000 Principles of Rangeland Management 3
Modern principles of rangeland management, including history of the profession, ecology, plant physiology, impacts of grazing on individual plants and plant communities, grazing management, range animal nutrition, rangeland watersheds, and the economics and planning of rangeland practices. Also introduces range-wildlife relations and vegetation manipulation. (Sp)

FRWS 4050 Urban Fish and Wildlife Management 3©
Concentrates on: understanding impacts of urbanization on wildlife and habitat; developing basic understanding of wildlife needs; completing urban wildlife habitat inventory; and preparing urban wildlife conservation and management plan. (F,Sp,Su)

FRWS 4250 Advanced Internship/Co-op 1-9©
Advanced-level educational experience in internship/cooperative education position approved by department. Prerequisite: Departmental signature. (F,Sp,Su)

FRWS 4500 Principles of Wildlife Management 3
Provides students with a working knowledge of the application of basic concepts in ecology and animal behavior to the management of wildlife resources to achieve diverse objectives of conservation, control, or cropping. Prerequisites: FRWS 3610 and 3810. (Sp)

FRWS 4520 Wildland Fire Behavior 3
Comprehensive examination of fuels, weather, and topography and how they interact to determine wildland fire behavior, including rate of spread, energy release, and intensity. This course is not currently being offered. For information about when it may be offered, contact the department.

FRWS 4540 Forest Harvest and Utilization 2
Elements of timber harvest systems, including policies and practices for minimizing biophysical impacts. Utilization of wood resources. (F)

FRWS 4600 Conservation Biology* 3
Patterns and processes creating biological diversity. Causes and consequences of diversity losses from genes to ecosystems, including habitat fragmentation and exotic invasion. Conservation laws and organizations. Approaches to conserving diversity loss, including reserve design, corridors, and species reintroductions. Prerequisite: NR/Biol 2220. (Sp)

FRWS 4700 Ecological Foundations of Restoration 3
Explores meanings of "restoration," use of reference communities, restoration of processes versus structure, species reintroductions, managing natural processes to meet restoration goals, and fundamentals of physiological, population, community, and ecosystem ecology from a restoration perspective. Prerequisites: NR/Biol 2220, FRWS 3850. (Sp)

Course Descriptions

FRWS 6240  Graduate Internship/Co-op  1-9
Graduate-level educational experience in internship/cooperative education position approved by department. (F,Sp,Su)

FRWS 6270  Advanced Silviculture  3
In forestry, there is a trend toward more complex silviculture to implement increasingly complex stand-level objectives. This course covers important techniques used in the development and implementation of silvicultural prescriptions for this sort of stand management. Prerequisite: Permission of instructor. (Sp)

FRWS 6350  Wildland Soils  3
(dual listing 5350)
Application of basic principles of soil science to wildland ecosystems. Effects of disturbance and land use on wildland soil properties. Role of soils in natural resource management. Prerequisites: CHEM 1110; SOIL 3000, and one additional upper-division Soils course, or permission of instructor. Also taught as SOIL 6350/5350. (Sp)

FRWS 6440  Ecology of Animal Populations*  4
Growth, fluctuation, balance, and control of animal populations. Prerequisite: FRWS 6400  Ecology of Animal Populations* 4

FRWS 6450  Vegetation Sampling Design  4
Advanced intrastand vegetation sampling design and elementary (nonmultivariate) between stand comparisons, primarily for research purposes. Prerequisites: STAT 5200; FRWS 6770. (Su)

FRWS 6500  Biometry: Design and Analysis of Ecology Research  4
Examines research design from statistical perspective, showing how data analysis is largely determined by research design and its implementation. Reviews statistical tools for analysis of ecological data in the context of design. Prerequisite: Graduate standing. (F)

FRWS 6510  Topics in Spatial Ecology**  1-3
Seminars on analysis and interpretation of spatially explicit ecological data. Topics vary yearly, and range from spatial statistics to assessing uncertainty in environmental information systems to spatial analyses of plant and animal populations. Prerequisites: Graduate-level course in statistics and permission of instructor. (Sp)

FRWS 6610  Regional Terrestrial Ecosystems  4
Synthesis of structural functional and regulatory processes and their interactions with humans in terrestrial ecosystems found in the Intermountain West and Great Plains. Prerequisites: NR/Biol 2220, SOIL 3000; or equivalent courses. This course is not currently being offered. For information about when it may be offered, contact the department.

FRWS 6710  Landscape Ecology  3
(dual listing 7710)
Focuses on landscape-scale patterns and processes, and ways of understanding ecological complexity. Explores conceptual underpinnings of larger-scale ecology. Emphasizes understanding of current peer-reviewed literature. (Sp)

FRWS 6720  Advanced Conservation Biology*  3
(dual listing 7720)
Examines cases and consequences of population and species declines, including activities such as habitat fragmentation and introduction of exotic species, as well as natural causes due to genetics and demography. (Sp)

FRWS 6740  Physical Processes in Remote Sensing  3
Assures that students are well-versed in the science and technology of remote sensing. Covers various algorithms and their ability to extract biophysical information from remotely sensed images. Helps students gain firm knowledge of the capabilities and limitations of these algorithms and their use in understanding landscape level biophysical interactions. (Sp)

FRWS 6750  Applied Remote Sensing  3
(dual listing 5750)
Covers the application of remote sensing to landcover mapping and resource monitoring at a quantitative level. Students instructed on the effects of atmosphere and surface interaction on the reflectance collected by electro-optical sensors, as well as on the proper use and interpretation of various calibration and classification algorithms. (F)

FRWS 6770  Plant Community Ecology*  3
Theory and concepts of plant community ecology. Plant community composition, distribution in space, and dynamics in time. Species environmental response models, competition theory, statistical-predictive models, and concepts of multivariate analysis in plant ecology. Prerequisites: NR/Biol 2220 or equivalent; and ecology core courses (may be taken concurrently). (Sp)

FRWS 6800  Forest, Range, and Wildlife Sciences Departmental Seminar  1
Review of current research by graduate students and faculty. (F,Sp)

FRWS 6850  Population Ecology  3
(dual listing 7850)
Using framework of mathematical modeling, reviews basic ecological processes (e.g., competition, predation, and environmental stresses) that determine numbers of individuals in plant and animal populations. This course is not currently being offered. For information about when it may be offered, contact the department.

FRWS 6870  Ecology Seminar  1
The Ecology Center schedules regular seminars throughout the school year with ecological scientists from other institutions participating. Ecology majors are required to attend a minimum of 10 such lectures. Students should register for fall semester, but attend through spring semester. Also taught as AWER 6870, ENVS 6870, and BIOL 6870. (F,Sp)

FRWS 6880  Current Issues in Conservation Genetics and Management*  2
(dual listing 7880)
Reviews variety of topics in fast-moving field of conservation genetics. Explores management applications and implications, with particular emphasis on current primary literature. Recommended prerequisite: Prior course in genetics. (Sp)

FRWS 6900  Graduate Special Topics  1-6
(dual listing 7800) Sciences Departmental Seminar  1
Offers credit for special assignments, reading, and seminars beyond regularly scheduled courses. (F,Sp,Su)

FRWS 6910  Directed Study  1-6
Offers credit for special assignments, reading, and seminars beyond regularly scheduled courses. (F,Sp,Su)

FRWS 6960  Graduate General Ecology  5
General concepts, history, and issues in all major areas of the science of ecology including: environmental biophysics; and physiological, behavioral, evolutionary, community, ecosystem, and applied ecology in both terrestrial and aquatic environments. Also taught as AWER 6960, BIOL 6960, and ENVS 6960. (F)

FRWS 6970  Thesis Research  1-12
Original research for MS degree on a problem in rangeland resources. (F,Sp,Su)

FRWS 6990  Continuing Graduate Advisement  1-9
(F,Sp,Su)

FRWS 7000  Theory and Applications of Rangeland Ecosystem Management  3
Application of range management principles, new theory, and public policy to on-the-ground decision-making in public and private lands. Field trips required. (F)

FRWS 7030  Plant-Herbivore Interactions*  3
Emphasizes principles of self-organization as applied to plant (tolerance and avoidance of herbivory) and herbivore (food and habitat selection) behavior. Stresses importance of history and ongoing interactions with the environment in understanding the dynamics of plant-herbivore interactions. (Sp)

FRWS 7200  Plant Physiological Ecology**  3
Plant response to environmental factors; includes environmental biophysics, physical and physiological factors influencing productivity, water use, resistance to stress, reproduction, establishment of plants, and competition with neighboring plants. (F)

FRWS 7220  Community-based Conservation Partnerships**  3
(dual listing 5220)
Seeks to infuse ecology with applied conservation and management approaches. Conservation and management of natural resources requires an understanding of ecological relationships and strategies for working with diverse stakeholders. PhD-level students present their research. (Sp)
FRWS 7300  Wildlife Damage Management Principles  3
(dual listing 5300)
Explains current legal, ethical, and biological principles for the control and/or
management of problem vertebrate species. (Sp)

FRWS 7400  Plant Population Ecology*  3
Dynamics of plant populations as influenced by interactions with their abiotic
and, especially, biotic environments. Topics include dormancy and germination
strategies, intra- and interspecific competition, facilitation, disturbance, herbivory,
pathogenic and mutualistic fungi, pollination, seed dispersal, and vegetative
reproduction. (F)

FRWS 7420  Analysis of Ecological Communities**  5
Advanced treatment of classification and ordination of ecological communities,
emphasizing ecological data structures and methods of common use in
ecological research. Prerequisite: STAT 3000 or FRWS 6500 or consent of
instructor. (Sp)

FRWS 7710  Landscape Ecology  3
(dual listing 6710)
Focuses on landscape-scale patterns and processes, and ways of understanding
ecological complexity. Explores conceptual underpinnings of large-scale ecology.
Emphasizes understanding of current peer-reviewed literature. (Sp)

FRWS 7720  Advanced Conservation Biology*  3
(dual listing 6720)
Examines cases and consequences of population and species declines, including
activities such as habitat fragmentation and introduction of exotic species, as well
as natural causes due to genetics and demography. (Sp)

FRWS 7800  Forest, Range, and Wildlife
(dual listing 6800)
Sciences Departmental Seminar  1°
Review of current research by graduate students and faculty. (F,Sp)

FRWS 7850  Population Ecology  3
(dual listing 6850)
Using framework of mathematical modeling, reviews basic ecological processes
(e.g., competition, predation, and environmental stresses) that determine
numbers of individuals in plant and animal populations. This course is not
currently being offered. For information about when it may be offered, contact the
department.

FRWS 7880  Current Issues in Conservation
(dual listing 6880) Genetics and Management*  2
Reviews variety of topics in fast-moving field of conservation genetics. Explores
management applications and implications, with particular emphasis on current
primary literature. Recommended prerequisite: Prior course in genetics. (Sp)

FRWS 7900  Graduate Special Topics  1-6°
Offers credit for special assignments, reading, and seminars beyond regularly
scheduled courses. (F,Sp,Su)

FRWS 7910  Directed Study  1-6°
Offers credit for special assignments, reading, and seminars beyond regularly
scheduled courses. (F,Sp,Su)

FRWS 7970  Dissertation Research  1-12°
Original research and study for PhD degree. (F,Sp,Su)

FRWS 7990  Continuing Graduate Advisement  1-9°
(F,Sp,Su)

*Repeatable for credit. Check with major department for limitations on number of credits that
can be counted for graduation.
©This course is also offered by online correspondence and/or CD through Continuing
Education Time Enhanced Learning.

Course Descriptions

Geology (GEO)
(formerly GEOL)

See Department of Geology, pages 315-320.

GEO 1010  BPS  Geology of National Parks:
Introduction to Geology  3°
(formerly GEOL 1100 BPS)
Plate tectonics and internal and external earth processes, using national parks
for examples. Emphasizes mineral and rock identification, as well as recognition
of basic geologic features. Two lectures per week and seven weeks of lab. (F,Sp)

GEO 1060  BPS  Introduction to Environmental Geoscience  3
(formerly GEOL 1200 BPS)
Explores the earth’s internal and external processes. Interprets the roles these
processes play in human habitation of the planet. Evaluates the interplay
occurring between humans and the earth, as in the distribution of resources and
the development of civilization. (Sp)

GEO 1110  BPS  The Dynamic Earth: Physical Geology  4
(formerly GEOL 1150 BPS)
Physical processes, both internal and external, shaping the Earth. Igneous,
metamorphic, and sedimentary environments and products. Emphasizes geology
as an applied science, relying on other basic sciences as tools for interpretation
and understanding. Three lectures and one two-hour lab per week. (F,Sp)

GEO 1120  Geology of National Parks Field Trip  1
(formerly GEOL 1110)
One weekend field trip to a western national park, allowing students to observe
geologic features and processes, and to gain hands-on practice in
rock identification. Limited to 30 participants. Requires some strenuous hiking.
Prerequisite or corequisite: GEO 1010. (F,Sp)

GEO 2250  Introductory Internship/Co-op  1-4°
Introductory educational work experience. (F,Sp,Su)

GEO 2500  Geology Field Excursions  1°
Geologic features and processes observed in the field. Prerequisite: GEO 1010
or 1110. (F,Sp)

GEO 3100  DSC  Natural Disasters  3
Hazardous geologic processes affecting humans. Cause, prediction, avoidance,
and frequency of natural disasters, including earthquakes, volcanic eruptions,
tsunamis, landslides, floods, subsidence, meteorite impacts, and global changes.
Topics discussed in the context of earth systems and cycles. Three lectures per
week. Prerequisite: One Breadth Physical Sciences (BPS) course. (Sp)

GEO 3200  DSC  The Earth Through Time  4°
Investigates dynamic nature of Earth’s physical and biological processes, and
how these processes have shaped Earth’s 4.5 billion-year history. Emphasis
on interpretation of the story of the geologic record (rocks and landforms) and
Earth’s sequential physical and biological changes. Three lectures and one two-
hour lab per week. Prerequisite: GEO 1010 or 1110. (Sp)

GEO 3300  BPS  Geology of the World’s Oceans  3
Geologic evidence for the development of ocean basins and continental margins
through plate tectonic processes. Also, the interaction of the geo- and biospheres
and their effect on the evolution of the oceans and atmosphere. Discussion of
shoreline and marine environments, the organisms inhabiting them, and the
physical and chemical processes in operation therein. Three lectures per week.
Prerequisite: One University Studies Breadth Physical Sciences (BPS) course. (Sp)

GEO 3500  Mineralogy and Crystallography  4
Introduction to crystallography, crystal chemistry, and descriptive mineralogy.
Three lectures and one three-hour lab per week. Prerequisites: CHEM 1210 and
GEO 1110. (F)

GEO 3520  Optical Mineralogy and Petrography  2
Introduction to the theory of optical crystallography. Determination of minerals
using the petrographic microscope. One lecture and one lab per week.
Prerequisite: GEO 3500. (Sp)
### Course Descriptions

<td>1-4*</td>
<td>Directed study of selected topics. Written report required. Prerequisite: Permission of instructor. (F,Sp)</td>
</tr>
<tr>
<td>GEO 5150</td>
<td>Geologic Field Camp*</td>
<td>3</td>
<td>Focuses on physical processes in streams that control their shape, plan form, slope, bed material, and distribution of channel bars. Emphasizes field analysis of these topics, and application of geomorphology to aquatic ecology and environmental restoration. Prerequisite: GEO/AWER 3600. Also taught as AWER 5150/6150. (F)</td>
</tr>
<tr>
<td>GEO 5170</td>
<td>Fluvial Geomorphology</td>
<td>2</td>
<td>Field analysis focuses on physical processes in streams which control their shape, plan form, slope, bed material, and distribution of channel bars. Application of geomorphology to aquatic ecology and environmental restoration. Prerequisite: GEO/AWER 3600. Also taught as AWER 5170/6170. (F)</td>
</tr>
<tr>
<td>GEO 5200</td>
<td>Geology Field Camp*</td>
<td>5</td>
<td>Integrative approach to examining geologic relationships in the field, deciphering geologic evolution of map regions, and interpreting the structure and distribution of rocks. Results presented in reports, maps, cross-sections, and graphical formats. Requires 40-45 hours of lab per week for 3.5-4.0 weeks. Prerequisites: GEO 3500, 3550, 3600, 3700, 4700. (Su)</td>
</tr>
<tr>
<td>GEO 5410</td>
<td>Introduction to Clay Mineralogy*</td>
<td>2</td>
<td>Introduction to and application of techniques, such as X-ray diffraction, differential thermal analysis, and chemical analysis, to study of clay minerals. Examination of the effects of clay mineral structures on physical and chemical properties. Three lectures and one lab per week; half semester. Prerequisite: GEO 3500. (Sp)</td>
</tr>
<tr>
<td>GEO 5420</td>
<td>Metallic Mineral Deposits*</td>
<td>4</td>
<td>Origin and occurrence of metallic mineral deposits, study of representative ore suites, and field trips to active mines. Three lectures and one lab per week. Prerequisite: GEO 4500. (Sp)</td>
</tr>
<tr>
<td>GEO 5430</td>
<td>Paleontology*</td>
<td>2</td>
<td>Survey of prominent microfossil and invertebrate taxa, including their diagnostic morphologic features, stratigraphic ranges, and environmental tolerances. Equips students with the necessary information and techniques to enable them to recognize and utilize fossils in stratigraphic and paleoenvironmental interpretation. Three lectures and one lab per week. Half semester; may be paired with GEO 5440. Prerequisite: GEO 3200. (F)</td>
</tr>
<tr>
<td>GEO 5440</td>
<td>Paleocology*</td>
<td>2</td>
<td>Interrelationships between various organisms and between organisms and their environment. Provides field, laboratory, and quantitative techniques for the interpretation of ancient environments and the analysis of past biotic interrelationships. Three lectures and one lab per week. Half semester; may be paired with GEO 5430. Prerequisite: GEO 5430. (F)</td>
</tr>
<tr>
<td>GEO 5460</td>
<td>Advanced Physical Sedimentology*</td>
<td>3</td>
<td>Detailed interpretation of sedimentary rocks, based on petrography and sedimentary characteristics. Source terranes, tectonic settings, depositional environments, and diagenetic changes during burial. Three lectures and two labs per week. Half semester. Prerequisites: GEO 3500 and 3550. (F)</td>
</tr>
<tr>
<td>GEO 5470</td>
<td>Chemical Sedimentary Rocks*</td>
<td>2</td>
<td>Application of field observations, hand-sample, thin-section, and X-ray diffraction analyses to the interpretation of chemical sedimentary rocks. Emphasizes determination of depositional environment and evaluation of diagenetic changes. Three lectures and one lab per week. Half semester. Prerequisites: GEO 3500 and 3550. (Sp)</td>
</tr>
<tr>
<td>GEO 5480</td>
<td>Sedimentary Basin Analysis</td>
<td>3</td>
<td>Detailed coverage of techniques of sedimentary basin analysis, including depositional systems, provenance, basin modeling, and fluid and heat flow history. Survey of types of sedimentary basins worldwide. Prerequisites: GEO 3500 and 3550. (F)</td>
</tr>
<tr>
<td>GEO 5500</td>
<td>Advanced Igneous Petrology*</td>
<td>4</td>
<td>Advanced concepts in the origin and evolution of magmatic systems, effects of different tectono thermal regimes on magma genesis, magma dynamics, and phase equilibria in magmatic systems. Concepts illustrated by rock suites from classic locations. Three lectures and three laboratory hours each week. Prerequisite: GEO 4500 or equivalent. (F)</td>
</tr>
<tr>
<td>GEO 5510</td>
<td>Groundwater Geology*</td>
<td>3</td>
<td>Provides graduate students and senior undergraduates with understanding of fundamental principles of groundwater geology and hydrology, and helps prepare them for careers in hydrogeology or environmental geology. Three lectures per week. Prerequisites: GEO 1110 and MATH 1210 or permission of instructor; GEO/AWER 3600 recommended. (F)</td>
</tr>
<tr>
<td>GEO 5520</td>
<td>Techniques of Groundwater Investigations*</td>
<td>3</td>
<td>Survey of techniques used in groundwater investigations for collecting physical and chemical data. Includes well drilling and construction; water level, flow rate, and discharge measurements; hydraulic and tracer tests; and groundwater sampling. Prerequisite: GEO 5510 or permission of instructor. (Sp)</td>
</tr>
<tr>
<td>GEO 5530</td>
<td>Petroleum Systems: Principles of Exploration and Development*</td>
<td>3</td>
<td>Analysis of the petroleum system from source to trap. Examines processes of generation, migration, and accumulation of oil and gas. Overview of petroleum economics and technology. Prerequisites: GEO 3550 and 3700; or permission of instructor. (Sp)</td>
</tr>
<tr>
<td>GEO 5540</td>
<td>Quantitative Methods in Geology*</td>
<td>3</td>
<td>Application of various quantitative methodologies to geologic problems. Two lectures and one lab per week. (F)</td>
</tr>
<tr>
<td>Course Code</td>
<td>Course Title</td>
<td>Credits</td>
<td>Description</td>
</tr>
<tr>
<td>-------------</td>
<td>-----------------------------------------------------------------------------</td>
<td>---------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>GEO 5550</td>
<td>Geochemical Application of Electron Microprobe and X-Ray Fluorescence Analysis*</td>
<td>4</td>
<td>Theory and application of X-ray fluorescence spectrometry and the electron microprobe to problems in geochemistry and materials analysis. Two hours lecture and six hours laboratory per week. Prerequisite: CHEM 1210 or equivalent, or permission of instructor. (Sp)</td>
</tr>
<tr>
<td>GEO 5560</td>
<td>Subsurface Analyses: Principles and Techniques*</td>
<td>1</td>
<td>Survey of techniques used to characterize subsurface geologic environments. Includes map and three-dimensional depictions, well-log analyses, reflection seismology, and volumetric and risk analysis. Prerequisites: GEO 3550, 3700, or permission of instructor. (Sp)</td>
</tr>
<tr>
<td>GEO 5600</td>
<td>Geochemistry</td>
<td>3</td>
<td>Application of thermodynamics, solution chemistry, phase diagrams, and both radioactive and stable isotopes to the understanding of earth processes. Three lectures per week. Prerequisite: GEO 3500. (F)</td>
</tr>
<tr>
<td>GEO 5610</td>
<td>Tectonic Evolution of North America*</td>
<td>3</td>
<td>Survey of tectonic styles and processes along plate margins, using the tectonic evolution of western North America as the prime example. Two lectures and one two-hour lab per week. Prerequisite: GEO 3700.</td>
</tr>
<tr>
<td>GEO 5620 QI</td>
<td>Global Geophysics*</td>
<td>3</td>
<td>Application of physics to understanding geologic processes, the earth’s interior, and the theory of plate tectonics. Two lectures and one two-hour lab per week. Prerequisites: GEO 3700 and PHYX 2220.</td>
</tr>
<tr>
<td>GEO 5630</td>
<td>Photogeology*</td>
<td>2</td>
<td>Interpretation of geologic features on aerial photographs. Three two-hour labs per week. Half semester; may be paired with GEO 4700. Prerequisites: GEO 3600, 3700.</td>
</tr>
<tr>
<td>GEO 5650</td>
<td>Senior Thesis</td>
<td>1-4</td>
<td>Prerequisite: Permission of instructor. (F,Sp)</td>
</tr>
<tr>
<td>GEO 5680</td>
<td>Paleoclimatology*</td>
<td>3</td>
<td>Covers climate through the past four billion years of geologic time. Explores driving forces behind climate changes. Examines data and methods used in paleoclimate research. Includes discussion of literature and stresses local paleoclimate records. Three lectures per week, along with field trips. Prerequisite: GEO/AWER 3600 or permission of instructor. Also taught as AWER 5680/6680. (Sp)</td>
</tr>
<tr>
<td>GEO 5900</td>
<td>Topics for Teachers</td>
<td>1-4</td>
<td>Special topics in geology for elementary and secondary science teachers to provide an understanding of the geology of Utah and the Western United States. Emphasis on field and lab activities. Prerequisite: Introductory geology course or permission of instructor.</td>
</tr>
<tr>
<td>GEO 6050</td>
<td>Graduate Seminar in Tectonics (Topic)</td>
<td>1-3</td>
<td>Advanced topics of current interest in tectonics and orogenesis. (F,Sp)</td>
</tr>
<tr>
<td>GEO 6100</td>
<td>Graduate Seminar in Geomorphology (Topic)</td>
<td>1-3</td>
<td>Advanced topics of current interest in geomorphology and landscape evolution. (F,Sp)</td>
</tr>
<tr>
<td>GEO 6120</td>
<td>Advanced Geomorphology*</td>
<td>3</td>
<td>Process geomorphology seminar focusing on hillslope, tectonic, and climatic geomorphology research. (Sp)</td>
</tr>
<tr>
<td>GEO 6150</td>
<td>Fluvial Geomorphology*</td>
<td>3</td>
<td>Focuses on physical processes in streams that control their shape, plan form, slope, bed material, and distribution of channel bars. Emphasizes field analysis of these topics, and application of geomorphology to aquatic ecology and environmental restoration. Prerequisite: GEO/AWER 3600. Also taught as AWER 6150/5150. (F)</td>
</tr>
<tr>
<td>GEO 6160</td>
<td>Hillslope and Landscape Geomorphology*</td>
<td>3</td>
<td>Includes basics of hillslope weathering, transport, and hydrologic processes. Surveys classic and recent literature on hillslope-scale and landscape-scale geomorphic research. Three lectures and several Saturday field trips. Prerequisite: GEO/AWER 3600. Also taught as AWER 6160. (Sp)</td>
</tr>
<tr>
<td>GEO 6170</td>
<td>Fluvial Geomorphology Lab</td>
<td>2</td>
<td>Field analysis focuses on physical processes in streams which control their shape, plan form, slope, bed material, and distribution of channel bars. Application of geomorphology to aquatic ecology and environmental restoration. Prerequisite: GEO/AWER 3600. Also taught as AWER 6170/5170. (F)</td>
</tr>
<tr>
<td>GEO 6200</td>
<td>Graduate Seminar in Geochemistry (Topic)</td>
<td>1-3</td>
<td>Advanced topics of current interest in geochemistry. (F,Sp)</td>
</tr>
<tr>
<td>GEO 6240</td>
<td>Structural Analysis of Deformed Geological Materials*</td>
<td>3</td>
<td>Explores how rocks, sediments, ice, and soils deform. By examining the geometry, kinematics, mechanics, and mechanisms of deformation, students learn how to interpret deformed materials in the field and laboratory.</td>
</tr>
<tr>
<td>GEO 6250</td>
<td>Mechanics and Processes in Earth Sciences*</td>
<td>3</td>
<td>Fundamentals of solid and fluid mechanics with applications to the earth sciences. Applications to rock deformation, fluid flow, glacier movement, and slope stability. For graduate students only. Two lectures, one lab per week. Prerequisites: GEO 3700, MATH 1210; or permission of instructor. (F)</td>
</tr>
<tr>
<td>GEO 6300</td>
<td>Graduate Seminar in Petrology (Topic)</td>
<td>1-3</td>
<td>Advanced topics of current interest in petrology of igneous, metamorphic, or sedimentary rocks. (F,Sp)</td>
</tr>
<tr>
<td>GEO 6350</td>
<td>Graduate Seminar in Paleontology and Paleocology (Topic)</td>
<td>1-3</td>
<td>Advanced topics in paleontology, paleoecology, and the evolution of ancient life. (F,Sp)</td>
</tr>
<tr>
<td>GEO 6400</td>
<td>Graduate Seminar in Sedimentary Geology (Topic)</td>
<td>1-3</td>
<td>Advanced topics of current interest in sedimentary geology, depositional systems, and basin evolution. (F,Sp)</td>
</tr>
<tr>
<td>GEO 6410</td>
<td>Introduction to Clay Mineralogy*</td>
<td>2</td>
<td>Detailed interpretation of sedimentary rocks, based on petrography and sedimentary characteristics. Source terranes, tectonic settings, depositional environments, and diagenetic changes during burial. Three lectures and two labs per week. Half semester. Prerequisite: GEO 3500. (Sp)</td>
</tr>
<tr>
<td>GEO 6440</td>
<td>Paleoclimatology</td>
<td>2</td>
<td>Interrelationships between various organisms and between organisms and their environment. Provides field, laboratory, and quantitative techniques for the interpretation of ancient environments and the analysis of past biotic interrelationships. Three lectures and one lab per week. Half semester; may be paired with GEO 4530. Prerequisite: GEO 4530. (F)</td>

Utah State University 2006-2007 General Catalog

635
## Course Descriptions

**GEO 6480  Sedimentary Basin Analysis**
(dual listing 5480)
Detailed coverage of techniques of sedimentary basin analysis, including depositional systems, provenance, basin modeling, and fluid and heat flow history. Survey of types of sedimentary basins worldwide. Prerequisites: GEO 3500 and 3550. (F)

**GEO 6500  Advanced Igneous Petrology***
(dual listing 5500)
Advanced concepts in the origin and evolution of magmatic systems, effects of different tectono thermal regimes on magma genesis, magma dynamics, and phase equilibria in magmatic systems. Concepts illustrated by rock suites from classic locations. Three lectures and three laboratory hours each week. Prerequisite: GEO 4500 or equivalent. (F)

**GEO 6510  Graduate Seminar in Hydrology (Topic)**
(dual listing 7510)
Advanced topics of current interest in hydrology. (F,Sp)

**GEO 6520  Techniques of Groundwater Investigations**
(dual listing 5520)
Survey of techniques used in groundwater investigations for collecting physical and chemical data. Includes well drilling and construction; water level, flow rate, and discharge measurements; hydraulic and tracer tests; and groundwater sampling. Prerequisite: GEO 5510 or permission of instructor. (Sp)

**GEO 6540  Quantitative Methods in Geology***
(dual listing 5540)
Application of various quantitative methodologies to geologic problems. Two lectures and one lab per week.

**GEO 6550  Geochemical Application of Electron Microprobe and X-Ray Fluorescence Analysis***
(dual listing 5550)
Theory and application of X-ray fluorescence spectrometry and the electron microprobe to problems in geochemistry and materials analysis. Two hours lecture and six hours laboratory per week. Prerequisite: CHEM 1210 or equivalent, or permission of instructor. (Sp)

**GEO 6600  Graduate Seminar in Geophysics (Topic)**
(dual listing 7600)
Advanced topics of current interest in geophysics. (F,Sp)

**GEO 6610  Tectonic Evolution of North America***
(dual listing 5610)
Survey of tectonic styles and processes along plate margins, using the tectonic evolution of western North America as the prime example. Two lectures and one lab per week. Prerequisite: GEO 3700.

**GEO 6620  Global Geophysics***
(dual listing 5620)
Application of physics to understanding geologic processes, the earth’s interior, and the theory of plate tectonics. Two lectures and one two-hour lab per week. Prerequisites: GEO 3700 and PHYX 2220.

**GEO 6680  Paleoclimatology***
(dual listing 5680)
Covers climate through the past four billion years of geologic time. Explores driving forces behind climate changes. Examines data and methods used in paleoclimatic research. Includes discussion of literature and stresses local paleoclimatic records. Three lectures per week, along with field trips. Prerequisite: GEO/AWER 3600 or permission of instructor. Also taught as AWER 6680/5680. (Sp)

**GEO 6700  Graduate Seminar in Structural Geology (Topic)**
(dual listing 7700)
Advanced topics of current interest in structural geology. (F,Sp)

**GEO 6800  Seminar**
1-4

**GEO 6900  Graduate Internship/Co-op Experience**
1-6
Graduate educational work experience. Prerequisite: Approval of contract between student and department prior to enrolment. (F,Sp,Su)

**GEO 6970  Thesis**
(F,Sp,Su)

**GEO 6990  Continuing Graduate Advisement**
(F,Sp,Su)

**GEO 7050  Graduate Seminar in Tectonics (Topic)**
(dual listing 6050)
Advanced topics of current interest in tectonics and orogenesis. (F,Sp)

**GEO 7100  Graduate Seminar in Geomorphology (Topic)**
(dual listing 6100)
Advanced topics of current interest in geomorphology and landscape evolution. (F,Sp)

**GEO 7120  Advanced Geomorphology***
(dual listing 6120)
Process geomorphology seminar focusing on hillslope, tectonic, and climatic geomorphology research. (Sp)

**GEO 7200  Graduate Seminar in Geochemistry (Topic)**
(dual listing 6200)
Advanced topics of current interest in geochemistry. (F,Sp)

**GEO 7300  Graduate Seminar in Petrology (Topic)**
(dual listing 6300)
Advanced topics of current interest in petrology of igneous, metamorphic, or sedimentary rocks. (F,Sp)

**GEO 7350  Graduate Seminar in Paleontology and Paleoecology (Topic)**
(dual listing 6350)
Advanced topics in paleontology, paleoecology, and the evolution of ancient life. (F,Sp)

**GEO 7400  Graduate Seminar in Sedimentary Geology (Topic)**
(dual listing 6400)
Advanced topics of current interest in sedimentary geology, depositional systems, and basin evolution. (F,Sp)

**GEO 7510  Graduate Seminar in Hydrology (Topic)**
(dual listing 6510)
Advanced topics of current interest in hydrology. (F,Sp)

**GEO 7600  Graduate Seminar in Geophysics (Topic)**
(dual listing 6600)
Advanced topics of current interest in geophysics. (F,Sp)

**GEO 7700  Graduate Seminar in Structural Geology (Topic)**
(dual listing 6700)
Advanced topics of current interest in structural geology. (F,Sp)

**GEO 7800  Graduate Seminar Series**
1

**GEO 7970  Dissertation Research**
1-12

**GEO 7990  Continuing Graduate Advisement**
(F,Sp,Su)

---

This course is taught alternating years. Check with department for information about when course will be taught.

Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

This course is also offered by online correspondence and/or CD through Continuing Education Time Enhanced Learning.

---

**Geography (GEOG)**

See Department of Environment and Society, pages 293-302.

**GEOG 1000  BPS  Physical Geography**
(formerly GEOG 1130 BPS)
Geographic analysis of physical processes and spatial distribution of natural elements (i.e., the atmosphere, hydrosphere, lithosphere, and biosphere). (F,Sp,Su)

</thead>
<tbody>
<tr>
<td>GEOG 1005</td>
<td>Physical Geography Lab</td>
<td>1</td>
<td>Laboratory exercises in natural physical geography. Provides initial field and laboratory experiences in the earth system. Required for all geography majors. Prerequisite: GEOG 1000 (may be taken concurrently). (F,Sp)</td>
</tr>
<tr>
<td>GEOG 1300</td>
<td>World Regional Geography</td>
<td>3°</td>
<td>Survey of world cultural regions, with an analysis of political, economic, and resource patterns in their physical setting. (F)</td>
</tr>
<tr>
<td>GEOG 1400</td>
<td>Human Geography</td>
<td>3</td>
<td>Spatial study within selected socio-cultural settings, including cultural landscapes, rural-urban linkages, languages, religions, politics, and economic activities. (Sp)</td>
</tr>
<tr>
<td>GEOG 2130</td>
<td>Population Geography</td>
<td>3</td>
<td>Spatial analysis of demographic data emphasizing global distribution, population growth, measures of density, migration, settlement, and economic development. (Sp)</td>
</tr>
<tr>
<td>GEOG 3430</td>
<td>Political Geography</td>
<td>3</td>
<td>Study of relationship between Earth, people, and the state. Global political phenomena studied from a geographic perspective. Explores impact of natural resources territorial seas and the nature of the state. Also taught as POLS 3430. (Sp)</td>
</tr>
<tr>
<td>GEOG 3610</td>
<td>Geography of Rural/Urban Planning*</td>
<td>3</td>
<td>Introduces students to theoretical and practical nature of maps, basic mapping processes, issues of scale, basic photogrammetry, interpretation of remotely sensed imagery, geographic referencing strategies, and geographic information systems. Includes weekly laboratory sessions. (F)</td>
</tr>
<tr>
<td>GEOG 3850</td>
<td>Map, Air Photo, and GIS Interpretation</td>
<td>4</td>
<td>Spatial analysis of demographic data emphasizing global distribution, population growth, measures of density, migration, settlement, and economic development. (Sp)</td>
</tr>
<tr>
<td>GEOG 4200</td>
<td>CI Regional Geography</td>
<td>3°</td>
<td>Survey of world cultural geography for a variety of regions. Can be repeated for different region as offered (e.g., Pacific Rim, Africa, Middle East, Europe, Asia, Latin America, and North America). (F,Sp,Su)</td>
</tr>
<tr>
<td>GEOG 4300</td>
<td>Geography Education Classroom Practicum</td>
<td>1-3°</td>
<td>Allows geography education students to participate in actual geography classroom teaching with experienced geography teachers. Students observe work with individuals and groups of students, team-teach lesson(s) with the teacher, and self-teach individual lesson(s). (F,Sp,Su)</td>
</tr>
<tr>
<td>GEOG 4800</td>
<td>Teaching Geography</td>
<td>3</td>
<td>Designed specifically for geography education/social studies education students preparing to teach grades K-12. Exploration of national and state standards and core curriculum, as well as state-of-the-art geography education technology and teaching resources. Students develop teaching lessons, and gain classroom teaching experience with local geography teachers. (F,Sp,Su)</td>
</tr>
<tr>

Course Descriptions

GEOS 6900 Graduate Special Topics 1-4®
(dual listing 5900)
Designed for geography students involved in field research and/or internships. Provides opportunity for students to gain practical applied experience in their specialized academic emphasis in geography. (F,Sp,Su)

GERM 1010 German First Year I 4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Not open to those with more than one year high school German or equivalent. (F,Sp)

GERM 1020 German First Year II 4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Prerequisite: GERM 1010 or at least one (but not more than two) years of German in high school or equivalent. (F,Sp)

GERM 1800 German I Study Abroad 1-4®
Intensive study in a German-speaking country, advancing proficiency in the four language skills and multicultural knowledge at the beginning level. No prerequisites. (Su)

GERM 2010 German Second Year I 4
Further development of first-year competencies with emphasis on language structure, vocabulary expansion, reading, writing, and conversation in the context of cross-cultural analysis. Prerequisite: GERM 1020 or equivalent. (F,Sp)

GERM 2020 German Second Year II 4
Further development of first-year competencies with emphasis on language structure, vocabulary expansion, reading, writing, and conversation in the context of cross-cultural analysis. Prerequisite: GERM 2010 or equivalent. (F,Sp)

GERM 2550 German Civilization* 3
Covers the most important developments in German-speaking countries from the High Middle Ages to the present. Deals with political, social, literary, historical, and artistic expressions of an emerging culture. Taught in English. (F)

GERM 2570 Contemporary Germany** 3
Covers the most important elements of contemporary German culture in its literary, social, and artistic manifestations, and the political and historical dimensions of agents of change. Taught in English. (Sp)

GERM 2800 German II Study Abroad 1-4®
Intensive study in a German-speaking country, advancing proficiency in the four language skills and multicultural knowledge at the second-year level. (Su)

GERM 2880 Individual Readings 1-4®
Individual study of selected readings in German. Prerequisite: Instructor’s permission. (F,Sp)

Upper Division

Upper-division German courses (3000 level and above) are available only to students who have completed GERM 2020 or who can demonstrate equivalent proficiency through testing. All upper-division courses are taught in German, unless otherwise indicated.

GERM 3000 DHA Introduction to German Studies 3
Introduction to the discipline of German Studies (history, literature, the arts, philosophy, science, economics, politics, etc.), addressing information resources, research methods, student career goals, and practice. Advances oral and written language proficiency. (F)

GERM 3040 CI Advanced German Grammar and Composition 3
Thorough review of German grammar and style. Application of rules of writing to compositions. Oral presentations of contemporary topics with graded difficulty. (F) (Sp)

GERM 3300 DHA Contemporary German Speaking Cultures 3
Multidisciplinary examination of current trends in contemporary cultures. Written, oral, visual, and electronic texts from the post-World War II period will be analyzed and placed in sociopolitical, economic, historical, and literary contexts. Emphasis on Germany as a multicultural society, and on related popular and minority cultural discourse. Interactive format. (Sp)

GERM 3510 CI Business German* 3
Study of current German business and commercial practices, terminology, and business-related communications skills in a multi-disciplinary and global world context. Advances the four language skills. (Sp)

GERM 3540 CI Techniques in Translating German Texts* 3
Approaches to translation. Specialized vocabulary, reference materials, and aids. Translation theory. Practical exercises. (F)

GERM 3550 DHA Cultural History of German Speaking Peoples** 3
Covers the most important developments in German-speaking peoples from 800 A.D. until the end of World War II. Examination of written, oral, visual, and electronic texts integrated in the context of Western philosophy and humanist thought. Interactive format. (F)

GERM 3600 DHA Survey of German Literature I** 3
Overview, with selected readings, of the major literary trends in German-speaking cultures from the medieval period to the early nineteenth century, including the study of genres, epochs, styles, and theories in the context of evolving cultures. (F)

GERM 3610 DHA Survey of German Literature II** 3
Overview, with selected readings, of the major literary trends in German-speaking cultures from the early nineteenth century to the present, including the study of genres, epochs, styles, and theories in the context of evolving cultures. (Sp)

GERM 3800 German III Study Abroad 1-4®
Intensive study in a German-speaking country, advancing proficiency in the four language skills and multicultural knowledge at the third-year level. (Su)

GERM 3880 Individual Readings 1-4®
Individual study of selected readings in German. Prerequisite: Instructor’s permission. (F,Sp)

GERM 4200 Applied German Linguistics and Phonetics** 3
Discussion of syntactical and morphological problems of German, principles of language learning, and analysis of phonological and phonetic patterns. (Sp)

GERM 4600 Faust’s Legacy** 3
Examination of the legendary figure of Faust through historical and contemporary perspectives. Analysis of the Faust theme and character as presented in literature, films, stage productions, and musicals. Taught in English. (F)

GERM 4610 German Narratives** 3
Readings from a wide range of narrative texts representing various historical periods. Focus on literary traditions within historical contexts. Examination of styles, motifs, and the theory of the novel. (Sp)

GERM 4650 DHA Trends in Modern German Literature* 3
Study of literary movements, topics, and styles of modern (twentieth century) German literature. Concentration on texts representing a variety of aesthetic expressions, central to experiences of twentieth-century life. (F)

†Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Course Descriptions

HEP 3200  Consumer Health  3  Focuses on helping students become discriminating consumers of health
information, health products, and health services. (F,Su)

HEP 3300  Clinical Experience I  1  Clinical experience in school health education. Prerequisite: Acceptance into
School Health major or minor. (F,Sp)

HEP 3400  Stress Management  3  Concepts and principles of personal stress management, with special emphasis
on effective stress management coping strategies, maximizing positive stress
outcomes, and minimizing negative stress effects, to aid in obtaining and
maintaining a balanced health homeostatic condition. (F,Sp)

HEP 3500  Elementary School Health Education  2  Explores child health status and the vital roles that the school/elementary teacher
plays in enabling children to acquire healthful lifestyle behaviors while increasing
their potential for academic success. (F,Sp)

HEP 3600  CI Introduction to Community Health  3  Introduction to agencies, facilities, and programs playing a role in protection
and promotion of health in the community. Special emphasis on competencies
necessary for the health educator to function in a variety of community settings.
(F)

HEP 3800  Grant Proposal Writing  3  Teaches practical skills needed to plan and write proposals for federal, state,
local, and private funding. Students develop proposals in area in which they
have developed expertise, and coordinate with a local agency for funding.
Prerequisites: HEP 2500, ENGL 2010, and passing score on Computer and
Information Literacy (CIL) Exam. (Sp)

HEP 3900  Social Marketing in Health Education  3  Explores social marketing techniques used in health promotion and examines
the marketing process, which includes formative research, target audience
analysis and segmentation, marketing mix, marketing strategies, pretesting,
implementation, and evaluation. Prerequisites: HEP 2500 and passing score on
Computer and Information Literacy (CIL) Exam. (Sp)

HEP 4100  Foundations of Community Health  3  Professional preparation course for health education majors. Primary emphasis
on ethical issues, behavioral and sociological theories used in the profession,
philosophical issues, technology, and health education methodologies.
Prerequisite: HEP 2500. (Sp)

HEP 4200  QI Planning and Evaluation for Health Education  3  Provides in-depth study of planning, implementation, and evaluation of school and
community health education programs. Students obtain hands-on experience
planning a health education program. Prerequisites: HEP 3600; MATH 1030 or
STAT 1040. (F)

HEP 4250  Advanced Cooperative Work Experience  1-15  Professional-level cooperative education work experience as student advances
toward completion of the program. Prerequisite: Consent of instructor. (F,Sp,Su)

HEP 4300  Clinical Experience II  1  Clinical experience in school health education. Prerequisite: Acceptance into
School Health major or minor. (F,Sp)

HEP 4400  Creative Methods in Teaching Health Education  3  Planning, designing, and evaluating comprehensive school health education
curricula and instruction for secondary school students, utilizing various creative
instructional strategies and materials. Participation in peer teaching experiences.
Prerequisite: Junior standing and acceptance into School Health Education. (F,Sp)

HEP 4500  Sexuality Education Within the Schools  3  Emphasizes broad understanding of human sexuality, with specific focus on
adolescent sexuality/behavior, age and topic appropriate instruction, state law,
and effective curriculum/strategies for human sexuality education within the
secondary schools. Prerequisite: Formal acceptance into the School Health
Education emphasis or School Health minor, or consent of instructor. (Sp)

HEP 4600  Field Work in Health Education  1-9  Supervised student participation in school or community health programs or
directed projects. Prerequisites: HEP 3600, 4100, and consent of instructor.
(F,Sp,Su)

HEP 4700H  Honors Senior Thesis  1-6  Requirements for the honors thesis include: (1) a detailed review of scholarly
literature on the health topic of interest to the student, and (2) the collection of
primary data on the topic of interest (e.g., through interviews, surveys, focus
groups, etc.), which must include references. The student must meet regularly
with the faculty mentor, who will help with the development of the honors thesis.
(F,Sp,Su)

HEP 5000  CI Race, Culture, Class, and Gender Issues in Health  3  Focuses on how multicultural issues affect health status and health choices.
Special emphasis on how race, ethnicity, culture, socioeconomic status, and
gender impact health status and access to health care. Prerequisite: Junior
standing. (Sp)

HEP 5100  CI Cultural and Complementary Medicine  3  Provides in-depth view into health beliefs, traditions, and practices of various
cultures and of the major minority groups in the U.S. Emphasizes ancient,
eastern, and native health practices collectively known as complementary
medicine and healing modalities. (Arr)

HEP 5200  International Health  3  Explores meaning of "health" through the lens of different cultures. Provides an
international comparison of health status, including morbidity and mortality data.
Evaluates different programs, policies, and strategies for addressing international
health problems. Prerequisite: Junior standing. (Arr)

HEP 5500  CI Student Teaching Seminar  2  Weekly seminar dealing with the professional practice of school health education.
Prerequisite: HEP 4400. (F,Sp)

HEP 5630  CI Student Teaching  10  Practical experience teaching health in the public school system. Prerequisite: HEP 4400. (F,Sp)

HEP 5700  CI Special Topics in Health  1-6  In-depth review and discussion of special topics in health. (Arr)

HEP 5900  Independent Study  1-3  Prerequisite: Consent of instructor. (F,Sp,Su)

HEP 5950  Independent Research  1-3  Prerequisite: Consent of instructor. (F,Sp,Su)

HEP 6000  Evaluating Health-Promotion Programs  3  Students learn to develop and carry out a health-promotion program evaluation,
interpret the results of an evaluation, and identify implications for future program
planning. (Sp)

HEP 6100  CI Current Trends in Health Promotion  3  Focuses on trends and issues in the promotion of health behaviors in a variety
of settings. Analyzes and challenges prevailing assumptions and philosophies in
relation to health promotion. (F)

HEP 6250  Graduate Cooperative Work Experience  1-15  Professional level of education work experience in a cooperative education
position for graduate students. Prerequisite: Consent of instructor. (F,Sp,Su)

HEP 6300  Stress Management  3  Explores concepts and principles of personal stress management, with special
emphasis on effective stress management coping strategies, maximizing positive
stress outcomes, and minimizing negative stress effects, thus aiding in obtaining
and maintaining a balanced, healthy homeostatic condition. (Arr)

HEP 6600  Field Work in Health Education  3  Supervised student participation in school or community health projects or
directed projects. Prerequisite: Consent of instructor. (F,Sp,Su)
## Course Descriptions

### History (HIST)

See Department of History, pages 332-337.

**HIST 1060** BHU Introduction to Islamic Civilization 3
Survey of Islamic civilization from the Prophet Muhammad to the present.

**HIST 1100** BHU Foundations of Western Civilization: Ancient and Medieval 3  
(formerly HIST 1040 BHU)
Survey of institutions and developments of early and medieval Western civilization from its Mediterranean origins to the beginning of the early modern period. (F,Sp,Su)

**HIST 1110** BHU Foundations of Western Civilization: Modern 3  
(formerly HIST 1050 BHU)
Survey of the institutions and developments in Western civilization from 1500 to the present. (F,Sp,Su)

**HIST 1500** BHU Cultural and Economic Exchange in the Pre-Nineteenth Century World 3  
(formerly HIST 1020 BHU)
Surveys pre-Nineteenth Century cultural and economic interactions in important zones of exchange. Regional focus determined by instructor. Themes may include: trade, religious conversion, migration, slavery, warfare, and other types of cross-cultural exchange. (F,Sp)

**HIST 1510** BHU The Modern World 3  
(formerly HIST 1030 BHU)
Survey of world history from the beginning of the nineteenth century to the present. (F,Sp,Su)

**HIST 1600** BHU American Cultures in Film 3
Introduction to major ethnic groups in America and their treatment in recent feature films. Also taught as ENGL 1600. (F,Sp)

**HIST 1700** BAI American Civilization 3  
(formerly HIST 1710 BHU)

**HIST 2010** Special Topics Seminar 3
Study of special cross-cultural topics, including Imperial Paris, British India, Slavery in America, and U.S. History.

**HIST 2210** BHU Introduction to Folklore 3  
(formerly HIST 1710 BHU)
Introduction to major genres of folklore (folk narrative, custom, folk music and song, vernacular architecture and arts), folk groups (regional, ethnic, occupational, familial), and basic folklore research method (collecting and archiving). Also taught as ANTH 2210 and ENGL 2210. (F,Sp)

**HIST 2700** BAI United States to 1877 3
Survey of the development of American society, economy, culture, and politics to 1877. (F,Sp,Su)

**HIST 2710** BAI United States 1877-Present 3
Survey of the development of American society, economy, culture, and politics since 1877. (F,Sp,Su)

**HIST 2720** Survey of American Folklore 3
Principal ethnic, regional, and occupational folk groups in America. Relations between folklore and American history, literature, and society. Key genres in American folklore (narrative, art, song, etc.) and their role in American culture. Also taught as ENGL 2720 and ANTH 2720. (Sp)

**HIST 3070** DHA Perspectives in Folklore 3  
(formerly HIST 1060 BHU)
Survey of the development of American society, economy, culture, and politics since 1877. (F,Sp,Su)

**HIST 3110** DHA/CI Ancient Near East 3
Survey of history and civilization of ancient Mesopotamia, Egypt, and Israel, from prehistory to 500 B.C. Writing intensive. Prerequisite: ENGL 2010 or equivalent. Also taught as ART 3110.

**HIST 3130** DHA/CI Greek History 3
History of Greece from Neolithic period to modern times. Special emphasis on politics, art, literature, and civilization. Writing intensive. Prerequisite: ENGL 2010 or equivalent.

**HIST 3140** Greek Intellectual History: Tradition, Challenge, and Response 3
Through reading and discussing Greek literature and philosophy, attempts to understand the major Greek philosophers, in the context of the major literary authors of the period and contemporary political developments.

**HIST 3150** CI Roman History 3
History of Rome from Neolithic era to “fall” of the Western Empire. Special emphasis on politics, art, literature, and civilization. Writing intensive. Prerequisite: ENGL 2010. (Sp)

**HIST 3220** DHA/CI Medieval European Civilization, 500-1500 3
Provides students with overview of major themes in medieval European history from 500 to 1500 A.D. Also introduces major historiographical problems related to this period. Writing intensive and document based. Prerequisite: ENGL 2010 or equivalent.

**HIST 3230** Early Modern Europe 3
Explores major themes of early modern European history, such as secularization, the rise of the nation state, the Reformation, and the birth of capitalism. Introduces major historiographical issues of the period. Reading and writing intensive. Prerequisite: ENGL 2010 or equivalent.

**HIST 3240** Modern Europe from 1789 to the Present 3
Historical survey of Europe from the French Revolution to the present, with special emphasis on political and cultural implications of imperialism. Prerequisite: HIST 1050.

**HIST 3250** DHA/CI Renaissance Europe 1300 to 1520 3
Emphasizing writing and primary sources, covers significant changes in Europe in government, society, and intellectual life caused by the Black Death, the humanist revolution in arts and literature, and the centralizing efforts of popes and monarchs. (F,Sp)

**HIST 3260** History of Spain and Portugal 3
History of Iberian peninsula from fifteenth century to the present. Age of Exploration, conquest and colonization in the Americas and Africa, eighteenth century reforms, constitutional monarchies, civil wars, and twentieth century dictatorships. Writing intensive. Prerequisite: ENGL 2010 or equivalent.

**HIST 3280** East Central Europe Since 1520 3
Examines history of East Central Europe, with special emphasis on growth of nationalism and establishment of the states of Czechoslovakia, Hungary, and Poland. Emphasizes research and writing.

The course descriptions above provide a comprehensive overview of various courses, including their titles, credits, and descriptions. Each course offers unique insights into different historical and cultural aspects, catering to a diverse range of academic interests. Whether focusing on European history, American studies, African American Experience, or international relations, these courses encompass a broad spectrum of topics, from prehistoric times to contemporary issues.
## Course Descriptions

<td></td>
<td></td>
<td>historical writing. History master’s students are required to complete HIST</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>6010, 6020, or another theory-enriched course.</td>
</tr>
<tr>
<td>HIST 6020</td>
<td>Approaches to History</td>
<td>3</td>
<td>Uses readings in particular instructor’s field to underscore theories and</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>different historians bring to their subject. History master’s students are</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>required to complete HIST 6010, 6020, or another theory-enriched course.</td>
</tr>
<tr>
<td>HIST 6030</td>
<td>Research Seminar</td>
<td>3</td>
<td>Research in graduate courses.</td>
</tr>
<tr>
<td>HIST 6100</td>
<td>Special Topics: Ancient History</td>
<td>3</td>
<td>Intensive readings and group discussions of selected topics in ancient history.</td>
</tr>
<tr>
<td>HIST 6130</td>
<td>Special Topics: Early Modern European History</td>
<td>3</td>
<td>Intensive readings and group discussions of selected topics in early modern</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>European history.</td>
</tr>
<tr>
<td>HIST 6160</td>
<td>Special Topics: Modern European History</td>
<td>3</td>
<td>Intensive readings and group discussions of selected topics in modern Europeanhistory.</td>
</tr>
<tr>
<td>HIST 6200</td>
<td>Special Topics: Comparative World History</td>
<td>3</td>
<td>Intensive readings and group discussions of selected topics in comparative world history.</td>
</tr>
<tr>
<td>HIST 6230</td>
<td>Special Topics: Middle Eastern History</td>
<td>3</td>
<td>Intensive readings and group discussions of selected topics in middle eastern history.</td>
</tr>
<tr>
<td>HIST 6260</td>
<td>Special Topics: Asian History</td>
<td>3</td>
<td>Intensive readings and group discussions of selected topics in Asian history.</td>
</tr>
<tr>
<td>HIST 6300</td>
<td>Special Topics: African History</td>
<td>3</td>
<td>Intensive readings and group discussions of selected topics in African history.</td>
</tr>
<tr>
<td>HIST 6330</td>
<td>Special Topics: Latin American History</td>
<td>3</td>
<td>Intensive readings and group discussions of selected topics in Latin American history.</td>
</tr>
<tr>
<td>HIST 6400</td>
<td>Special Topics: American History</td>
<td>3</td>
<td>Intensive readings and group discussions of selected topics in American history.</td>
</tr>
<tr>
<td>HIST 6430</td>
<td>Special Topics: Western American History</td>
<td>3</td>
<td>Intensive readings and group discussions of selected topics in Western American history.</td>
</tr>
<tr>
<td>HIST 6460</td>
<td>Seminar in Environmental History</td>
<td>3</td>
<td>Focuses on historical writings seeking to explain relationship between society</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>and nature. Many of assigned readings are set in the non-Western world.</td>
</tr>
<tr>
<td>HIST 6500</td>
<td>Archiving Internship</td>
<td>2-4</td>
<td>Directed internship at a regional archive. Internship should reflect eight to</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>sixteen hours of work per week during the semester. (F,Sp,Su)</td>
</tr>
<tr>
<td>HIST 6520</td>
<td>Editing Internship</td>
<td>2</td>
<td>Training in requirements of editorial work in scholarly journals and books.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Emphasis placed on editing techniques and mechanics of editorial work. Can be</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>repeated once for credit. (F,Sp,Su)</td>
</tr>
<tr>
<td>HIST 6540</td>
<td>Museum Internship</td>
<td>2-4</td>
<td>Directed internship at a regional museum. Internship should reflect eight to</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>sixteen hours of work per week during the semester. (F,Sp,Su)</td>
</tr>
<tr>
<td>HIST 6560</td>
<td>Professional Internship</td>
<td>2-4</td>
<td>Directed internship involving participation in a historical research project</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>for a government agency, corporation, municipality, or some other entity.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>(F,Sp,Su)</td>
</tr>
<tr>
<td>HIST 6580</td>
<td>Teaching Internship</td>
<td>2</td>
<td>Involves working with the teacher of an upper-division undergraduate course.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Intern prepares, explains, and grades one of the written assignments in the</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>course, as well as completing work required of the undergraduates. Can be</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>repeated once for credit. (F,Sp,Su)</td>
</tr>
<tr>
<td>HIST 6600</td>
<td>American Studies Theory and Method</td>
<td>3</td>
<td>Provides students with theory and method of graduate-level research in American Studies. Also taught as ENGL 6600. (F)</td>
</tr>
<tr>
<td>HIST 6610</td>
<td>Seminar on the American West</td>
<td>3-4</td>
<td>Readings and research on topics in the American West. Interdisciplinary focus</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>suitable for graduate students in History and American Studies. Also taught</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>as ENGL 6610. (F)</td>
</tr>
<tr>
<td>HIST 6620</td>
<td>Seminar in Native American Studies</td>
<td>3-4</td>
<td>Readings and research on topics in Native American history and culture.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Interdisciplinary focus suitable for graduate students in History and American Studies. Also taught as ENGL 6620. (F)</td>
</tr>
<tr>
<td>HIST 6630</td>
<td>Studies in Film and Popular Culture</td>
<td>3</td>
<td>Offered annually on a rotating basis by professors in folklore and English</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>(Cultural Studies, Literature, British and Commonwealth). Topics and</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>theoretical approaches vary, but the primary focus is on feature films. Also</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>taught as ENGL 6630. (F)</td>

</tbody>
</table>
Course Descriptions

HIST 6700  Folklore Theory and Method  (3)
Serves as orientation for new graduate students in folklore. Introduces students to comparative annotation, folklore indices, oral-formulaic theory, performance theory, contextual analysis, and other approaches. Also taught as ENGL 6700. (F)

HIST 6710  Regional Folklore  3
Study of folklore and folk life as a regionalizing process. Regions examined through their folk culture range. Also taught as ENGL 6710. (Sp)

HIST 6720  Folklore Fieldwork  3
Basic methodology class for folklorists and oral historians. Students learn interviewing techniques and other methods for observing and recording the performance of tradition and traditional history. Also taught as ENGL 6720. (F,Sp)

HIST 6730  Public Folklore  3
Provides history and analysis of governmental involvement in protecting, promoting, and otherwise manipulating and utilizing cultural heritage. Also taught as ENGL 6730. (F,Sp)

HIST 6740  Folk Narrative  3
Covers principal narrative genres in folk tradition (myth, tale, legend, ballad) and the basic theories for their analysis and discussion. Also taught as ENGL 6740. (Sp)

HIST 6750  Advanced Folklore Workshop (the Fife Conference)  3
Intensive workshop focusing on a topic in folklore. Brings in nationally known experts as lecturers and discussants. Students attend all sessions, then write a critical paper during the summer semester. Also taught as ENGL 6750. (Su)

HIST 6760  Cultural and Historical Museums  3
Examines outdoor cultural and historical museums, examining their function in modern multi-cultural societies. Also taught as ENGL 6760. (Sp)

HIST 6770  Seminar in Folklore and Folk Life  3^a
Conducts close, professional-level study of major areas of folklore and folk life research. Also taught as ENGL 6770. (F,Sp)

HIST 6800  Paleography  3
Skills course covering subjects such as technology of writing, interpretation of hands, and mastery of abbreviations. Useful to any student working with old manuscripts, it is essential for those writing theses in medieval or early modern European history.

HIST 6820  Writing Scholarly Reviews  3
Prepares students for writing, editing, and publishing reviews in their chosen discipline. Taught by book review editors at Western American Literature and Western Historical Quarterly.

HIST 6840  Archives Management  3
Study of management of archival collections. Emphasis on processing and conservation of manuscript and photographic materials. Case studies in identification, processing, and preservation.

HIST 6860  Historical Criticism: Practicum  1-3
Preparation of critiques for student-presented projects entered into Utah History Fair state-wide competition. Operation of one-day workshop for History Fair finalists.

HIST 6880  Special Topics: Advanced History Workshop  1-3^a
From teaching values of democracy in public school setting to writing publishable biographies. Department of History sponsors advanced credit workshops on a range of subjects.

HIST 6900  Directed Studies  1-3^a
Directed readings in any special historical field. For each credit granted, a minimum of four books must be read. Instructor signature required. (F,Sp)

HIST 6970  Thesis Research  1-6^a
(F,Sp,Su)

HIST 6990  Continuing Graduate Advisement  1-6^a
(F,Sp,Su)
^cRepeatability for credit. Check with major department for limitations on number of credits that can be counted for graduation.
^dThis course is also offered by online correspondence and/or CD through Continuing Education Time Enhanced Learning.

Honors (HONR)

See Honors Program, page 338.

HONR 1300H BAI  U.S. Institutions  3
Interdisciplinary course providing basic understanding of history, principles, form of government, and economic system of the United States. Open only to students enrolled in USU Honors Program. (F)

HONR 1320H BHU  Civilization: Humanities  3
Interdisciplinary course providing basic understanding of broad range of themes cutting across human history and continuing to be important in contemporary society. Covers both Western and non-Western civilization. Open only to students enrolled in USU Honors Program. (F)

HONR 1330H BCA  Civilization: Creative Arts  3
Interdisciplinary course exploring questions such as: “What is art, and how do you judge it?” and “How does artistic expression vary across cultures?” Covers several forms of art. Students attend concerts, visit galleries, and attend theatrical performances. Open only to students enrolled in USU Honors Program. (F,Sp)

HONR 1340H BSS  Social Systems and Issues  3
Interdisciplinary course that considers how a society of self-interested individuals can live together in peace and harmony. Topic explored from perspectives of different disciplines. Open only to students enrolled in USU Honors Program. (F,Sp)

HONR 1350H BLS  Integrated Life Science  3
Interdisciplinary course focusing on basic concepts of life science. Demonstrates role of modeling, prediction, and observation in the process of scientific discovery, which occurs within an historical and social context. Open only to students enrolled in USU Honors Program. (F)

HONR 1360H BPS  Integrated Physical Science  3
Interdisciplinary course focusing on basic concepts of physical science, including structure of matter and magnitude and character of the forces of nature. Demonstrates role of modeling, prediction, and observation in the process of scientific discovery, which occurs within an historical and social context. Open only to students enrolled in USU Honors Program. (F)

HONR 2000H  Scholars Forum  1
Includes orientation to the Honors Program and to undergraduate research. Taught online. (F)

HONR 2100H  Honors Inquiry Seminar  1
Introduces students to the nature of inquiry. Assists students in planning their undergraduate education to enable them to graduate with Honors. Prerequisite: Admission to Honors Program. (Sp)

HONR 2200H  Honors Enrichment  0.5^b
Provides opportunity for Honors students to enhance their academic experience by attending and reflecting on a series of colloquia, as well as cultural and arts events. During the semester, students attend activities chosen from a menu prepared by the Honors Program. Each event affords an opportunity to react in writing, as well as orally during the bimonthly seminars. Grading based on attendance, participation, and written work. Prerequisite: Admission to Honors Program. (F,Sp)

HONR 3010H DSC  Special Topics: Life and Physical Sciences  3^c
Focuses on basic scientific concepts and methods of inquiry used by scientists. Considers science from a broad perspective, showing how various disciplines are related. Open only to students enrolled in USU Honors Program. (Sp)
Course Descriptions

HONR 3020H DHA  Special Topics: Humanities/Creative Arts  3®
Humanities section focuses on important historical and contemporary cultural themes, both Western and non-Western. Creative Arts section examines one or more art forms across cultures. Covers several forms of art. Students attend concerts, visit galleries, and attend theatrical performances. Open only to students enrolled in USU Honors Program. (F)

HONR 3030H DSS  Special Topics: Social Sciences  3®
Examines one or more social institutions and asks how we live within these structures from the perspectives of different disciplines. Open only to students enrolled in USU Honors Program. (Sp)

HONR 3900H  Independent Study  1-3
Independent research, library and/or laboratory work, or creative effort working in a one-to-one relationship with a faculty member. Limited to students actively pursuing an Honors degree. (F,Sp)

HONR 4000H  Reading Seminar  1®
Opportunity to read, discuss, and write about classic books. Open only to students enrolled in USU Honors Program. (F,Sp)

HONR 4700H  Honors Fellows  0.5®
Junior or senior Honors students assist in leading Honors seminars and tutorials. (F,Sp)

HONR 4800H  Thesis/Project Seminar  1
Oral presentation and discussion of Honors senior theses/projects. Guest presentations focus on essential contrasts and similarities in “ways of knowing” among various academic specialties. (F,Sp)

HONR 4900H  Senior Thesis/Project  1-3®
All Honors students are required to submit a senior thesis/project for graduation with an Honors degree. Thesis/project may be in any area of student’s choice, prepared in cooperation with an advisor drawn from the faculty at large. (F,Sp,Su)

Health Sciences (HS)
See Weber State University/Utah State University Nursing Program, pages 434-435.

HS 2230  Introductory Pathophysiology  3
An introduction to the nature of disease and its effect on body systems. (Su)

Interior Design (ID)

ID 1700  Interior Design Professional Seminar  1®
Weekly seminars to provide an orientation to the professional aspects of interior design. Exploration of related careers and professional societies. Invited participation by outside speakers. Repeatable for up to eight credits. (F,Sp)

ID 1750  BCA  Design in Everyday Living  3
Investigation of the basic elements and principles of design related to everyday living experiences and the practical application of relevant theory. (Su)

ID 1790  BCA  Interior Design Theory  3
Explores basic philosophy of interior design. Analyzes design elements and principles when applied to interior spaces. Evaluation of contemporary design theories as factors influencing design trends. (Sp)

ID 2710  Architectural Graphics I  4
Competency development in use of drafting tools, symbols, and techniques used in interior design presentation. Includes communication skills related to techniques and approaches to graphic presentations of interior design solutions: floor plans, elevations, sections, axonometrics, details, and dimensioning. (F)

ID 2720  Architectural Graphics II  4
Introduction to three-dimensional drawing: isometric and perspective. Development of methods of rapid graphic communication techniques and approaches to complete professional presentations. Exploration of various types of media and presentation methods. Prerequisite: ID 2710. (Sp)

ID 2730  Interior Space Planning and Human Dimensions  4
Focuses on physical, psychological, and human factors influencing design of interior space. Includes research, programming, analysis, and design of residential and nonresidential spaces. Prerequisite: ID 2710. (Sp)

ID 2750  Computer Aided Drafting and Design I  3
Introduction to computer aided drafting and design for students. Prerequisite: BIS 1400 or passing grade on Computer and Information Literacy (CIL) Exam. (F)

ID 2760  Computer Aided Drafting and Design II  3
Advanced exploration and study of computer aided design, creative applications, and proficiencies. Prerequisite: ID 2750. (Sp)

ID 3730  Interior Materials and Construction  3
Identification of current interior materials; their characteristics, use, and care. Experience in specification estimation, workroom procedures, and development of a working resource file. Prerequisite: ID 2730. (F)

ID 3740  DHA  History of Interior Furnishings and Architecture I  3
Identification of historical architectural styles and elements in interior furnishings and materials, dating from ancients, middle ages, Italian renaissance, the Hispanic periods, and the French periods. (F)

ID 3750  DHA/CI  History of Interior Furnishings and Architecture II  3
Identification of historical architectural styles and elements in interior furnishings and materials, including the English period and the American period, Victorian through the present. (Sp)

ID 3760  Commercial Design Studio  4
Studio projects of various complexity and type, having commercial focus. May include hospitality, retail, medical, office, and other commercial and institutional design opportunities. Prerequisite: ID 2730. (F)

ID 3770  Residential Design Studio  4
Studio projects of various complexity and type, having residential focus. Analysis of various approaches to problem solving. Graphic and verbal presentation, emphasizing high-end design evaluation. Prerequisite: ID 3760. (Sp)

ID 3780  Design Detailing  3
Detailing of interior components. Preparation of detail drawings for use by the trades for interior components. Student develops construction documents and prepares scale model for senior exhibit. (Sp)

ID 3790  Architectural Systems  3
Study of architectural systems in contemporary buildings. Investigation of construction drawings and their interpretation. Includes related codes and professional terminology. (F)

ID 4700  Topics in Interior Design  3®
Current topics associated with interior design. Prerequisites: Approval of instructor and junior class standing. (F,Sp,Su)

ID 4710  Interior Design Advanced Internship I  1-12®
Placement experience in applying skills and knowledge in businesses and community agencies. One credit for each 50 hours of experience. Prerequisites: Approval of instructor and junior class standing. (F,Sp,Su)

ID 4720  Interior Design Advanced Internship II  1-12®
Placement experience in applying skills and knowledge in businesses and community agencies. One credit for each 50 hours of experience. Prerequisite: ID 4710. (F,Sp,Su)
Course Descriptions

Intensive English Language Institute (IELI)
See Intensive English Language Institute, page 341.

IELI 1120 Writing I 4
Develops writing skills. Focuses on description, narration, and canonical word order at sentence and paragraph levels. (F,Sp)

IELI 1160 Reading I 4
Builds reading skills. Students read texts individually and collaboratively. Focuses on active reading (e.g., making use of background knowledge, predicting, and critically assessing reading passages). (F,Sp)

IELI 1220 Writing from Sources 4
Focuses on sentence and paragraph writing. Students gather information from various sources, transform and organize it, and present it in both verbal and written form. (F,Sp,Su)

IELI 1230 Cross-Cultural Talk 3
Multilevel course designed to improve oral communication through small group work and one-on-one conversation with American undergraduate teaching fellows. Emphasizes interactive language fluency. Repeatable for credit for students who place at the basic level on the IELI placement exam. (F,S,Su)

IELI 1240 Integrated Skills 3
Multilevel speaking and listening course designed to develop basic to intermediate language skills through content-based instruction. Repeatable for credit for students who place at the basic level on the IELI placement exam. (F,S,Su)

IELI 1260 Reading II 4
Builds low intermediate to intermediate level reading skills. Students distinguish main ideas from supporting ideas. Extensive vocabulary work. Focuses on active reading, summarizing, and vocabulary attack skills. (F,Sp,Su)

IELI 2310 Comprehending Academic Discourse 3
Introduction to listening strategies and note-taking, focusing on organization and information. Develops strategies for listening to authentic passages, such as news and documentaries. (F,Sp,Su)

IELI 2320 Writing Authentic Texts 4
Assists students in developing more sophisticated writing skills, from more complex sentences to coherent paragraphs and various kinds of compositions. Students learn to use the library and the Internet to find resources for their writings. (F,Sp,Su)

IELI 2330 Spoken discourse and Cultural Communication 3
Emphasizes interpersonal communication and academic tasks with American undergraduate teaching fellows. Focuses on the dynamics of assuming various roles in small group discussions and presentations. (F,Sp,Su)

IELI 2360 Reading Authentic Texts 4
Introduces strategies for reading several genres typical of university assignments, including excerpts from textbooks in several disciplines and popular magazine articles having academic value. Brief overview of scholarly journals. Introduction to strategies and exercises for vocabulary development. (F,Sp,Su)

IELI 2410 Comprehending Lecture Discourse 3
Develops techniques for understanding the planned and spontaneous academic discourse of university classrooms. Focuses on information processing. (F,Sp,Su)

IELI 2420 Writing from Academic Sources 4
Introduction to various academic writing demands. Students gather information from various sources, including interviews, surveys, and academic texts (textbooks, journals, etc.); analyze and summarize the information; and write documented essays and reports. (F,Sp,Su)

IELI 2440 Academic Discourse 3
Designed to assist students in developing oral competency, with emphasis on comprehensibility in individual and group academic presentations. (F,Sp,Su)
Course Descriptions

IELI 2450  Topics for ESL  4®  
Introduction to contemporary topics in culture and language. Focuses on language development through content-based instruction. Repeatable for up to 12 credits. (F,Sp,Su)

IELI 2460  Reading from Academic Sources  4  
Focuses on processes and strategies for a variety of academic and disciplinary genres; strategies for learning from lengthy and complex texts; and vocabulary, speed, and comprehension development. (F,Sp,Su)

IELI 2470  Cross-Cultural Perspectives of American Culture  4  
Provides understanding of what culture is and how it influences behavior and beliefs. Provides cross-cultural perspectives on value systems and institutions. (F,Sp,Su)

IELI 7920  College Teaching Seminar  1-3®  
Workshop designed for international students who will hold teaching assistantships at the University. To be accepted into the workshop, students must take a qualifying language test. (F,Sp)

® Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Instructional Technology (INST)

See Department of Instructional Technology, pages 339-340.

INST 1000  Information Literacy  3  
Designed to develop ability to locate, evaluate, and use information. Develops competencies needed for lifelong pursuits of information through the use of libraries and electronic resources. (F,Sp)

INST 3000  Principles and Practices of Technology for Secondary Teachers  2  
Integrated experience for pre-service secondary teachers to apply instructional design principles in their instruction. Hands-on experience using a wide variety of technological tools in practical learning environments. Application of technology as both process and product. Prerequisite: Admission to teacher education. Students completing their degrees under previous requirements may take INST 3000 instead of INST 5200. Students should consult with their advisor to determine which of these two courses they should complete.

INST 3500  Technology Tools for Secondary Teachers  1  
Integration of technology into the teaching/learning environment. Practical, hands-on experience for pre-service secondary teachers. Use of a variety of technological tools. Introduction to current standards for teachers. Application of technology as both process and product. Prerequisite: Admission to teacher education. (F,Sp,Su)

INST 4010  Principles and Practices of Technology for Elementary Teachers  3  
Integrated experience for pre-service elementary teachers to apply instructional design principles in their instruction. Hands-on experience using a wide variety of technological tools in practical learning environments. Application of technology as both process and product. Prerequisite: Admission to teacher education. (F,Sp,Su)

INST 4210  Information Access and Literacy Skills  2  
Information problem-solving skills basic to lifelong information access in today's networked world. Used as part of the Engineering and Technology Education/Instructional Technology minor program. Taught off campus through special programs. (Sp)

INST 4230  Introduction to Adult Learning  3  
Covers philosophical and theoretical foundations of adult education, as well as practical applications for incorporating them into current educational settings. Used as part of the Engineering and Technology Education/Instructional Technology minor program. Taught off campus through special programs. (Sp)

INST 4250  Instructional Design I  3  
Guided experience in analysis, design, and development of instructional product development utilizing the ADDIE model. Used as the first project experience for the Engineering and Technology Education degree and the Instructional Technology undergraduate minor. Taught off campus through special programs. (Su)

INST 4260  Instructional Design II  3  
Guided experience in development, implementation, and evaluation of instructional product development utilizing the ADDIE model. Used as the first project experience for the Engineering and Technology Education degree and the Instructional Technology undergraduate minor. Taught off campus through special programs. (Su)

INST 4290  Applying Instructional Design  3  
Individual experience in instructional product development utilizing the ADDIE model. Used as the capstone experience for the Engineering and Technology Education degree and the Instructional Technology undergraduate minor. Taught off campus through special programs. (F)

INST 4300  Clinical Experience in School Library Media  1  
School library media clinical observation experience. Students involved in observing management and assisting in middle and secondary library media centers, arranged by department. Minimum of 40 hours of observation experience required. (Sp)

INST 4500  Integration and Innovation of Technology in Education  1  
Based on current educational standards, and using appropriate tools, students design and create an electronic/digital portfolio specific to content area(s) of their anticipated teaching license. Emphasizes integration of technology as both product and process. Prerequisite: Admittance to teacher education. (F,Sp,Su)

INST 4910  Undergraduate Research and Creative Opportunity  1-3®  
Cooperative process of discovery, investigation, research, or creativity between faculty and one or more students. (F,Sp,Su)

INST 5000  Foundations of Library Media Programs  3  
(dual listing 6060)  
Introduction to historical and philosophical foundations of library media programs for teachers, administrators, and media specialists. Examines role of library media programs in schools and their contributions to the curriculum. Taught off campus through Utah Education Network. (F)

INST 5010  Information Organization and Management  3  
(dual listing 6110)  
Information Organization and Management explores functions of information technology including circulation, cataloging, automation tools, and technical services within school library media programs. Also considers policies and techniques for facilitating access to information in a school library media center. Taught off campus through Utah Education Network. (F)

INST 5020  Collection Development  3  
Collection Development focuses on building and maintaining collections for library media programs. Discusses policy development for selection, protecting intellectual freedom, and reviewing, evaluating, and maintaining materials in all formats. Evaluation of school library collections also investigated. Taught off campus through Utah Education Network. (Sp)

INST 5030  Information Access  3  
(dual listing 6030)  
Information Access introduction to finding information and resources using print and electronic sources. Emphasizes reference services, knowledge of basic reference/information sources, and resource sharing; and teaching information retrieval strategies within a school library media program. Taught off campus through Utah Education Network. (Sp)

INST 5040  Library Media Center Administration  3  
(dual listing 6040)  
Library Media Center Administration includes study of organization, personnel, budgets, programs, and management of a library media center. Students define their role within a school setting and in relation to that of the principal and teachers. Prerequisite: INST 5000/6060 or approval of instructor. Taught off campus through Utah Education Network. (Su or Arr).

**Course Descriptions**

**INST 5050 Library Media Programs** (dual listing 6050)

Presents a wide variety of activities which are integral to a school library media program, including reading guidance, instructional development, curriculum development, media skill instruction, and information literacy. Prerequisite: INST 5040/6040 or approval of instructor. Taught off campus through Utah Education Network. (Su or Arr)

**INST 5100 Management and Maintenance of Information Technologies** (dual listing 6100)

Introductory course in basic operation of technology tools used in school setting. Includes operation of video equipment, video cameras, Internet sites, CD-ROM, satellite receiving equipment, computer scanners, computer networks, and computer presentation systems. Taught off campus through Utah Education Network. (Arr)

**INST 5190 Library Media Practicum** (dual listing 6190)

Observation and guided field experience in a library media center under professional library media specialists and instructional technology professionals. Bridge of theory into practice for students seeking licensure. This course is required for those having limited or no school library media experience, as evaluated by their faculty advisor. Prerequisites: INST 5040/6040, 5050/6050; or approval of instructor. (F,Sp,Su)

**INST 5200 Principles and Practices of Technology for Secondary Teachers**

Integrated experience for pre-service secondary teachers to apply instructional design principles in their instruction. Hands-on experience using a wide variety of technological tools in practical learning environments. Application of technology as both process and product. Prerequisite: Admittance to teacher education. (F,Sp)

**INST 5210 Digital Audio-Video Production**

Fundamental theories and practice in camera and computer-based audio and video production, including recording, editing, and digitizing audio and video segments for education and training applications. (F,Su)

**INST 5230 Instructional Graphic Production**

Fundamental practices of using the computer to design and produce a wide variety of instructional graphics and animations. (F,Su)

**INST 5240 Producing Distance Education Resources**

Focuses on production of Internet-based instructional resources for use in distance, flexible, and open learning. (Sp,Su)

**INST 5250 Computer-Based Instruction Authoring**

Fundamentals of programming computer-based instruction utilizing the Authorware authoring system. Prerequisite: Basic computer competencies. (Sp,Su)

**INST 5260 Learning and Applying HTML**

Asynchronous online course, teaching web publishing using HTML (Hyper-Text Markup Language). Explores current web technologies and includes design and evaluation. (F,Sp,Su)

**INST 5270 Multimedia Special Topic Studio 1**

Selected special topics related to the development of multimedia products for instruction and training. (F,Sp,Su)

**INST 5280 Multimedia Special Topic Studio 2**

Selected special topics related to the development of multimedia products for instruction and training. (F,Sp,Su)

**INST 5300 Multimedia Production for Instruction and Training**

Students use knowledge acquired in prerequisite courses to design, produce, and master a multimedia instructional product. Prerequisites: INST 5210, 5220, 5230, 5240. (Sp)

**INST 5400 Computer Applications for Instruction and Training**

Introduction to use of computer applications, with special emphasis on software used in instruction and training. (F,Sp,Su)

**INST 5520 Learning and Teaching at a Distance**

Focuses on issues and methods of teaching and learning in distance education. Students develop strategies for effectively integrating technologies and facilitating learning at a distance. (Sp)

**INST 5550 Practicum in Distance Learning**

Students demonstrate effective practice by applying instructional development principles for designing, implementing, and evaluating instruction for distant learners. Prerequisite: INST 5520. (Su)

**INST 5600 Designing Instruction for Students At-Risk**

Participants use information technologies for ongoing problem solving during and after the course. Competencies emphasized include the design, implementation, and evaluation of specific effective instructional practices appropriate for all students, and particularly for students at risk of academic failure. (F,Sp,Su)

**INST 5750 Instructional Technology Workshop**

Special training and experience in latest concepts and innovations in instructional technology. Content changes to reflect most recent topics and problems facing the profession. (Su)

**INST 5900 Independent Study**

Individually directed study and projects. Prerequisite: Departmental permission. (F,Sp,Su)

**INST 6000 Foundations of Instructional Technology**

Considers the present, past, and future of instructional technology, while helping individual student to develop personal understanding of and orientation to the field. Prerequisite: Matriculation into Instructional Technology master’s program. (F)

**INST 6010 Technology and its Role in the Transformation of Education**

Explores the critical role of educational technology as one tool in the transformation of education. Involves students in change-related projects in the local environment. Taught off-campus through EDNET. (F)

**INST 6020 Collection Development**

Focuses on building and maintaining collections for library media programs. Discusses policy development for selection, protecting intellectual freedom, and reviewing, evaluating, and maintaining materials in all formats. Evaluation of school library collections also investigated. Taught off campus through Utah Education Network. (Sp)

**INST 6030 Information Access**

Introduction to finding information and resources using print and electronic sources. Emphasizes reference services, knowledge of basic reference information sources, and resource sharing, and teaching information retrieval strategies within a school library media program. Taught off campus through Utah Education Network. (Sp)

**INST 6040 Library Media Center Administration**

Includes study of organization, personnel, budgets, programs, and management of a library media center. Students define their role within a school setting and in relation to that of the principal and teachers. Prerequisite: INST 6060/5000 or approval of instructor. Taught off campus through Utah Education Network. (Su or Arr)

**INST 6050 Library Media Programs**

Presents a wide variety of activities which are integral to a school library media program, including reading guidance, instructional development, curriculum development, media skill instruction, and information literacy. Prerequisite: INST 6040/5040 or approval of instructor. Taught off campus through Utah Education Network. (Su or Arr)

Introduction to historical and philosophical foundations of library media programs for teachers, administrators, and media specialists. Examines role of library media programs in schools and their contributions to the curriculum. Taught off-campus through Utah Education Network. (F)

Introductory course in basic operation of technology tools used in school setting. Includes operation of video equipment, video cameras, Internet sites, CD-ROM, satellite receiving equipment, computer scanners, computer networks, and computer presentation systems. Taught off-campus through Utah Education Network. (Art)

Examines functions of information technology including circulation, cataloging, automation tools, and technical services within school library media program. Also considers policies and techniques for facilitating access to information in a school library media center. Taught off-campus through Utah Education Network. (F)

Examination of learning theory and communication theory, and their implications for instruction. Taught off-campus through EDNET. (Sp)

Observation and guided field experience in a library media center under professional library media specialists and instructional technology professionals. Bridge of theory into practice for students seeking certification. This course is required for those having limited or no school library media experience, as evaluated by their faculty advisor. Prerequisites: INST 6040/5040, 6050/5050; or approval of instructor. (F,Sp,Su)

Fundamental theories and practice in the design and development of Digital Video Disc (DVD) based instructional resources. (F,Su)

Introduces front-end analysis state of instructional design and development. Examines processes for conducting instructional needs assessment, audience analysis, learning environment analysis, and instructional task analysis. Prerequisite: Matriculation into Instructional Technology master’s program. (F)

Examines theory and practice of designing instruction. Emphasizes practical applications of design principles and techniques for creating instructional materials. Prerequisite: Matriculation into Instructional Technology master’s program. (F)

Detailed study of communication and learning theories as applied to the instructional design process. Examines principles and research upon which instructional design and instructional technology are based. Prerequisite: Matriculation into Instructional Technology master’s program. (F)

Focuses on techniques and methods for putting well-designed instruction and training into use in both traditional and nontraditional settings. Prerequisite: Matriculation into Instructional Technology master’s program. (Sp)

Examines theories and implementation of both formative and summative evaluation of instruction. Includes expert and learner feedback, rapid prototyping, and cost analysis. Prerequisite: Matriculation into Instructional Technology master’s program. (Sp)

Geared toward assisting master’s students in completing their degrees. Provides continuity from the first semester and encourages continued professional development in the discipline. (F,Sp,Su)
Course Descriptions

**INST 6770** Practicum in the Improvement of Instruction 1-4◊
A field-based program focused upon characteristics of effective teaching methodologies, teaching performance, curriculum decision making, value guidelines, and the characteristics of the learner. Taught on demand.

**INST 6780** Instructional Technology Programs 1-3◊
Designed primarily as an in-service experience for teachers, trainers, administrators, and instructional technology personnel to improve local programs and services. Taught on demand.

**INST 6790** Instructional Technology in Education and Training 1-3◊
Offered on request to instructional designers, teachers, administrators, and media personnel who have special needs related to instructional technology and seek assistance in improving their local programs. Taught on demand.

**INST 6800** Projects in Instructional Technology 6
Guided experience in the development of instructional products. Includes several small, complete projects including analysis, design, development, implementation, and evaluation. Integrates teamwork, project management, and public presentation skills. Prerequisite: INST 6250 and matriculation into Instructional Technology master’s program. (F)

**INST 6810** Research Seminar 1◊
Provides opportunity for exchange of ideas by Instructional Technology master’s students pursuing a Plan A option. Includes discussion of publications and products. (F,Sp,Su)

**INST 6820** Instructional Technology Design and Development Studio 1 6◊
Provides students with opportunity to work in teams with clients and leaders in the field on cutting-edge design and development projects. Students should plan to spend at least 20 hours per week working on the assigned project. Prerequisite: INST 6800. (Sp)

**INST 6870** Current Issues Seminar 1-3◊
Allows exploration of new cutting-edge topics in the field. Topics vary and are announced the semester prior to registration. Topics may be theory or practice based. (Arr)

**INST 6900** Independent Study 1-6◊
Individually directed study and projects. Prerequisite: Departmental permission. (F,Sp,Su)

**INST 6910** Independent Research 1-6◊
Individually directed research. Prerequisite: Departmental permission. (F,Sp,Su)

**INST 6940** Internship 1-6◊
An on-site experience in which the student applies knowledge and skills in a work environment. Used as culminating experience for the MS, Plan C. (F,Sp,Su)

**INST 6950** Creative Project 1-6◊
Individual experience in instructional product development. May be used as the culminating experience for the MED and MS Plan C. (F,Sp,Su)

**INST 6970** Thesis 1-6◊
Individual work in MS thesis and Plan B report writing with guidance and criticism. (F,Sp,Su)

**INST 6990** Continuing Graduate Advisement 1-8◊
Allows students access to faculty and facilities to complete graduate thesis, project, and papers. (F,Sp,Su)

**INST 7000** Pro-seminar I in Instructional Technology 3
Lectures and discussions on advanced topics in instructional technology and related disciplines. Required for Instructional Technology EdS and PhD students. (F)

**INST 7010** Pro-seminar II in Instructional Technology 3
Continuation of INST 7000. Lectures and discussions on advanced topics in instructional technology and related disciplines. Required for Instructional Technology EdS and PhD students. Prerequisite: INST 7000. (Sp)

**INST 7150** Advanced Seminar in Instructional Technology 3◊
In-depth study of various topics including learning theory, instructional design, instructional theory, instructional development tools, production techniques, and instructional applications in different cultures. Specific topics for each semester will be announced. (F,Sp,Su)

**INST 7200** Quantitative and Design Research in Instructional Technology* 3
Examines current trends, applications, methods, and research questions that are appropriate to the use of quantitative and design research within the field of instructional technology. (F)

**INST 7300** Qualitative and Interpretive Research in Instructional Technology 3
Examines current trends, applications, methods, and research questions that are appropriate to the use of qualitative and interpretive research within the field of instructional technology. (Sp)

**INST 7450** Internship in Program Evaluation 1-4◊
Experience in practical aspects of program evaluation through planned, supervised evaluation project. Participation must be approved by student’s supervisory committee. (F,Sp,Su)

**INST 7460** Internship in Research 1-6◊
Experience in conducting research through planned, supervised evaluation project. Participation must be approved by student’s supervisory committee. (F,Sp,Su)

**INST 7820** Practicum in Instructional Technology 2◊
Preparation of project funding proposal for submission to a funding agency. Prerequisite: Permission of instructor. Enrollment limited to Instructional Technology EdS and PhD students only. (F,Sp,Su)

**INST 7870** Current Issues Seminar 1-3◊
Allows exploration of new cutting edge topics in the field. Topics vary and are announced the semester prior to registration. Topics may be theory or practice based. (Arr)

**INST 7900** Independent Study 1-6◊
Individually directed study and projects. Prerequisite: Departmental permission. (F,Sp,Su)

**INST 7910** Independent Research 1-6◊
Provides for individually directed research. Prerequisite: Departmental permission. (F,Sp,Su)

**INST 7920** College Teaching Seminar 1-3◊
Develops skills and knowledge necessary for college teaching. Activities are designed to help participants in a variety of areas, including instructional development and presentation skills development. (Arr)

**INST 7960** Practicum, Educational Specialist 1-9◊
Culminating project/externship in partial fulfillment of the Educational Specialist degree. (F,Sp,Su)

**INST 7970** Dissertation 1-18◊
Individual work on research projects in the PhD program. (F,Sp,Su)

**INST 7990** Continuing Graduate Advisement 1-9◊
Allows graduate students access to faculty and facilities to complete graduate dissertation. (F,Sp,Su)

◊ Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.
Course Descriptions

Italian (ITAL)

See Department of Languages, Philosophy, and Speech Communication, pages 364-379.

ITAL 1010  Italian First Year I  4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Native speaker instructor. Self-study with tutorial assistance. (F)

ITAL 1020  Italian First Year II  4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Native speaker instructor. Self-study with tutorial assistance. Prerequisite: ITAL 1010 or equivalent. (F)

ITAL 2010  Italian Second Year I  4
Second-year overview of speaking, listening, reading, and writing, with exposure to cultures and customs. Native speaker instructor. Self-study with tutorial assistance. Prerequisite: ITAL 2020 or equivalent. (F)

ITAL 2020  Italian Second Year II  4
Second-year overview of speaking, listening, reading, and writing, with exposure to cultures and customs. Native speaker instructor. Self-study with tutorial assistance. Prerequisite: ITAL 2020 or equivalent. (F)

INTERDISCIPLINARY STUDIES (ITDS)

See Interdisciplinary Studies Major, pages 342-343.

ITDS 4900  Senior Thesis/Project  3
Students majoring in Interdisciplinary Studies are required to complete a 3-credit thesis or project as part of the major. The thesis or project must be either a research paper or a creative activity appropriate to the theme of the Interdisciplinary Studies major. Each student works with his or her faculty advisor to determine an appropriate topic of study or a project. The student and advisor outline the protocol and parameters of the thesis or project. Prerequisite: Instructor’s permission. (F,Sp,Su)

Japanese (JAPN)

See Department of Languages, Philosophy, and Speech Communication, pages 364-379.

JAPN 1010  Japanese First Year I  4
First course in beginning Japanese. Proficiency in reading and writing an additional 500 Kanji. Prerequisite: JAPN 2020 or equivalent. (F)

JAPN 1020  Japanese First Year II  4
Second course in beginning Japanese. Introduction to the basic 100 Kanji. Mastery of more complicated sentences, including conditional temporal, volitional, and potential expressions. Exposure to Japanese culture and customs. Prerequisite: JAPN 1010 or equivalent. (Sp)

JAPN 2010  Japanese Second Year I  4
First course in intermediate Japanese. Proficiency in reading and writing 150 additional Kanji. Mastery of the last basic grammar topics, such as passive, causative, passive causative, and giving/receiving expressions. Introduction to honorific/humble expression. Exposure to Japanese culture and customs. Prerequisite: JAPN 2010 or equivalent. (F)

JAPN 2020  Japanese Second Year II  4
Second course in intermediate Japanese. Proficiency in reading 150 additional Kanji and writing 200 additional Kanji. Mastery of frequently used idioms and expressions. Exposure to more authentic reading materials. Competency in writing short essays. Exposure to Japanese culture and customs. Prerequisite: JAPN 2010 or equivalent. (Sp)

JAPN 3010  Japanese Third Year I  4
First segment of the third-year Japanese reading/writing course. Proficiency in reading and writing an additional 500 Kanji. Prerequisite: JAPN 3010 or equivalent. (F)

JAPN 3020  Japanese Third Year II  4
Second segment of the third-year Japanese reading/writing course. Proficiency in reading and writing an additional 500 Kanji. Prerequisite: JAPN 3010 or equivalent. (Sp)

JAPN 3050  Japanese Calligraphy  1
Study of Japanese writing system through practicing the art of calligraphy. No prerequisites. Also taught as ART 3050. (Sp)

JAPN 3100  Readings in Contemporary Japanese Culture  3
Introduction to contemporary Japanese culture through readings from newspapers and other source materials. Prerequisites: JAPN 3010 and 3020. (F)

JAPN 3510  Japanese for the Business Environment  3
Mastery of technical terms related to Japanese business and its environment. Communicative competency in contemporary Japanese society. Prerequisite: JAPN 3020. (Sp)

JAPN 3560  Studies in Japanese Film  3
Offers an introduction to the historical and theoretical study of Japanese cinema. Course screenings include some of the films made by well-known directors during the 1960s and 1970s, as well as the cutting-edge of contemporary films. (Sp)

JAPN 4250  Internship/Coop  3-9
Cooperative education through internship programs provided by companies in Japan. Intended for students participating in the U.S.-Japan internship program. Prerequisites: JAPN 3010, 3020, and 3510. (Su)

JAPN 4920  Japanese Language Tutoring  1
Allows students to develop tutoring skills by assisting professors in lower-division courses or fulfilling instructional duties for a comparable amount of time in the language laboratory, public schools, or similar activities with departmental approval. May be repeated to a maximum of 3 credits. Prerequisite: Permission of instructor. (F,Sp)

JAPN 3055  Japanese Translation  3
Techniques of translating Japanese into English or English into Japanese. (F)

JAPN 4950  Independent Study  1-6
Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Journalism and Communication (JCOM)

See Department of Journalism and Communication, pages 350-355.

JCOM 1130  Beginning Newswriting for the Mass Media  3
(formerly JCOM 1110)
Techniques of writing news for various media. News values, philosophy, and practice. Elementary news-gathering and interviewing skills. Practice in various newswriting forms. Structures of the news industries and work place. Prerequisites: ENGL 1010 or equivalent, English Proficiency Test. (F,Sp,Su)

JCOM 1500  BSS Introduction to Mass Communication (formerly JCOM 1000 BSS)  3
History, philosophy, structures, and functions of the mass media (newspapers, magazines, TV and radio, advertising, and public relations) and their intersection with other social institutions. Media economics and the impacts of new technologies on media institutions and society. (F,Sp)

JCOM 2010  BSS Media Smarts: Making Sense of the Information Age  3
(formerly JCOM 2000 BSS)
Critical analysis of the roles and performance of mass media content and messages, and their influence on society. Emphasizes critical reading of news, entertainment, and advertising content regarding women, minorities, children, and other groups. Basic mass media ethics and law. Prerequisite: ENGL 1010. (F,Sp)
Course Descriptions

JCOM 2160 CI Introduction to Online Journalism (formerly JCOM 2110 CI) Use of interactive computer networks, databases, and other electronic resources for news reporting and writing. Practice in research and information evaluation for news stories and features in news and public relations contexts. Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010. (F,Sp)

JCOM 2170 CI Reporting Public Affairs (formerly JCOM 2120 CI) Theory and practice of reporting public affairs, community news, and features. Emphasizes advanced news gathering techniques, understanding local political structures, news and feature writing skills, interviewing, media law, ethics, and cultural sensitivity. Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010. (F,Sp)

JCOM 2180 Beginning Photojournalism (formerly JCOM 2150) Theory and practice of photojournalism. Roles and functions of photographic images in the news media, both print and electronic. Practice in use of cameras and in darkroom techniques. Students furnish cameras and some materials. (F,Sp)

JCOM 2220 Introduction to Video Media (formerly JCOM 2200) Introduction to the theories and practice of video production and functions in broadcasting and the electronic mass media, including concepts, techniques, and impacts of various video approaches. Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010. (F,Sp)

JCOM 2230 Writing for Electronic Media (formerly JCOM 2210) Theory and practice of reporting public affairs for broadcast and electronic media. Emphasizes news gathering, understanding local political structures, news and feature writing, commercial and continuity writing, interviewing, media law, ethics, and cultural sensitivity. Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010. (F)

JCOM 2300 Introduction to Public Relations Survey of theories and practice of public relations in a variety of business, corporate, governmental, and nonprofit organizational settings. Elements of promoting organizational messages and communicating with various publics. Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010. (F,Sp)

JCOM 2310 CI Writing for Public Relations Theory and practice of information-gathering for public relations, including basic news releases, features, speeches, annual reports, newsletters and brochures, broadcasting, and other forms. Emphasizes advanced news gathering techniques, interviewing, media law, ethics, and cultural sensitivity. Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010. (F,Sp)

JCOM 3010 Communication Research Methods Analysis of communication theories and their application in research settings. Basics of communication research methods and analysis of research results in mass media and public relations contexts. This course is not currently being offered. For information about when it may be offered, contact the department.

JCOM 3110 CI Beyond the Inverted Pyramid Theory and practice of longer literary forms for newspapers and magazines. Feature writing, investigative and interpretive journalism, emphasizing advanced information-gathering and writing skills. Prerequisite: Minimum grade of C in JCOM 2170 or permission of instructor. (F,Sp)

JCOM 3120 CI Copy Editing and Publication Design Editing and preparation of news stories and artwork for publication. Principles and practice of publication layout and design. Prerequisites: Minimum grades of C in JCOM 2170, 2230, or 2310; or permission of instructor. (F,Sp)

JCOM 3140 DSS Opinion Writing Study and practice of persuasive editorial and opinion writing for the mass media. (F,Sp)

JCOM 3300 DSS Strategic Research Methods in Public Relations Quantitative and qualitative research methods standard to real-life applications in public relations problems and campaigns, including survey methods, focus groups, case analysis, and strategic assessments. Prerequisite: Minimum grade of C in JCOM 2310 or permission of instructor. (F,Sp)

JCOM 3400 DSS Gender and Communication Processes through which various forms of communication create gender roles and ideals for women and men, resulting in different gender-based communication patterns. Social implications and emphasis on gender in media professions. This course is not currently being offered. For information about when it may be offered, contact the department.

JCOM 3410 DSS Film as Cultural Communication Analysis of the economic, ideological, political, and cultural constraints influencing film content. (F,Sp)

JCOM 4000 Senior Seminar in Mass Communication Capstone seminar required of all majors. Includes small discussion groups to pull together and synthesize experiences of students in all emphases. Examination of fundamental mass communication issues. Preparation for mass media careers. Prerequisite: Senior standing. (F,Sp)

JCOM 4010 DSS Mass Communication Ethics Study of ethical systems and philosophies and their applications to the practice of mass communication. Prerequisite: Junior standing. (Sp)

JCOM 4020 DSS Mass Media and Society Study of theories and practice of the impact of mass media in conjunction with other social institutions: political, social, cultural, ideological, economic, and religious. Prerequisite: Junior standing.

JCOM 4030 DSS Mass Media Law (dual listing 6430) Principles and theories of constitutional and case law governing the mass media, including libel and privacy, copyright, press freedom, broadcast regulation, and press responsibility. Prerequisite: Junior standing or permission of instructor. (F,Sp)

JCOM 4100 Hard News Café Advanced reporting and writing for student news website. Includes advanced reporting techniques, photojournalism, and posting of news reports and materials to interactive website. Prerequisite: Minimum grade of C in JCOM 3110 or permission of instructor. Will be first taught during Spring Semester 2006. (F,Sp, Su)®

JCOM 4110 CI Computer-Assisted Reporting Advanced computer-based investigative and in-depth information-gathering and newswriting, including extensive use of computer databases to collect and analyze data. Prerequisites: Minimum grades of C in JCOM 2170 or 2230 or 2310; or permission of instructor. (Sp)

JCOM 4120 CI Sports Writing Information-gathering and writing of news and feature stories about sports for print and electronic mass media. Prerequisites: Minimum grades of C in JCOM 2170 or 2230 or 2310; or permission of instructor. (F,Sp)

JCOM 4150 Advanced Digital Photojournalism Advanced lab work in the use of cameras and photographic production techniques, photo imaging, and manipulation. Concludes with student exhibition of work. Prerequisite: Minimum grade of C in JCOM 2180 or permission of instructor. (F,Sp)

JCOM 4210 CI Newscast I Basics of electronic newsgathering and writing for electronic media. Use of electronic video equipment for creation of on-air newscast and other visual news materials. Prerequisite: Minimum grade of C in JCOM 2220. (F,Sp)

JCOM 4220 CI Newscast II Newsroom organization and practice in electronic and video news production, including directing and producing, writing for video news, use of studio equipment, use of video production equipment, staff management, and control room operations. Prerequisites: Minimum grades of C in JCOM 2230 and 4210. (F,Sp)

JCOM 4230 Corporate Video Project-based lab work in studio video productions for real-world clients. Use of video field equipment and production facilities. Completion of video packages.
## Course Descriptions

### JCOM 4500 Projects in Communication 1-5
Individualized directed study in communication topics, based upon student proposal to instructor. Prerequisite: Permission of instructor. Repeatable for up to 6 credits. (F,Sp,Su)

### JCOM 4510 Communication Internship 1-3
Supervised, real-world training and practice in communication work places, including news and business environments. Prerequisite: Permission of instructor. Maximum of 6 credits may count toward the student’s major. (F,Sp,Su)

### JCOM 4520H Senior Thesis 1-3
Planning and execution of an in-depth research paper or project, as approved by the instructor, culminating in a formal public presentation. Required of all journalism and communication students for graduation in Honors Program. Students must also complete HONR 4800H. (F,Sp)

### JCOM 4530 Special Topics in Communication 3
Advanced study in specialized communication topic areas. A maximum of 5 credits may be applied toward the major. (F,Sp,Su)

### JCOM 5010 Mass Media Historiography 3
Survey of the history and development of the mass media, and their influence on other social institutions. Theory and practice of historical research, with heavy emphasis on use of databases, archival, and other primary sources to conduct original historical research. (F,Sp)

### JCOM 5020 Mass Communication Theory 3
Advanced study of major mass communication theories and issues, and their evidence in case studies. Application of theory to significant societal problems. (F)

### JCOM 5030 International Communications Problems 3
Study of mass communication influences and effects within and between nations. Systems and techniques of mass communication as functions of national identity and development. (F,Sp)

### JCOM 5110 CI Literary Journalism 3
In-depth analysis and practice of literary and stylistic elements of long-form journalistic and other nonfiction writers. (F)

### JCOM 5210 Website Design and Production 3
Principles and practice of planning, designing, and programming professional Web pages, including Internet communication analysis and planning, graphic design, and development using industry-standard programming languages and design applications. Prerequisite: Permission of instructor. (F)

### JCOM 5220 Advanced Video Production 3
Advanced production of long-form video productions and packages, including writing scripts, directing and production, control room applications, and advanced video production techniques. Prerequisite: Minimum grade of C in JCOM 4220 or 4230; or permission of instructor. (F)

### JCOM 5230 Advanced Video Documentary Production 3
Advanced production of long-form video productions and packages, including writing scripts, directing and production, control room applications, and advanced video production techniques. Prerequisite: Minimum grade of C in JCOM 4220 or 4230; or permission of instructor. (Sp)

### JCOM 5300 CI Case Studies in Public Relations 3
Advanced study and practice in public relations cases, processes, techniques, campaigns, and marketing communications strategies. Analysis of approaches to corporate reputation issues, organizational positioning, and use of mass media strategies. Prerequisite: Minimum grade of C in JCOM 3300. (F,Sp)

### JCOM 5310 Mass Media Management 3
Examine theories, methods, and practice of management of mass media businesses, including personnel, marketing, and market positioning. Prerequisite: Permission of instructor. (F,Sp)

### JCOM 5320 Public Relations Agency 3
Advanced hands-on experience in real-world workings of professional public relations agency, including client communications needs analysis, communications planning, strategies, market positioning, publicity, and campaign execution. Prerequisite: Permission of instructor. (F,Sp)

### JCOM 5400 Mass Media Criticism 3
Critical analysis of mass media content, emphasizing the media's social, cultural, and political impacts. Use of advanced research techniques. Senior standing required for enrollment in JCOM 5400; permission of instructor required for enrollment in JCOM 6400. (Sp)

### JCOM 5410 Gender and the Media 3
Examines the nature of gender-based images in a variety of mass media, from advertising to magazines, television, and film. Analysis of gender stereotypes and portrayals in news and entertainment media, along with resulting social impacts. Senior standing required for enrollment in JCOM 5410; permission of instructor required for enrollment in JCOM 6410. (F,Sp)

### JCOM 5420 The Mass Media and Politics 3
Examination of the role of the mass media in the political process, including both campaigns and governance. Examination of political advertising, news coverage, polling, opinion formation strategies, and politicians' use of new media technologies. (F)

### JCOM 6000 Introduction to Graduate Study in Mass Communication 3
Overview of mass communication theories and research methodologies designed to prepare the student for the graduate course of study and to assist in planning research agenda. (F)

### JCOM 6010 Mass Media Historiography 3
Survey of the history and development of the mass media, and their influence on other social institutions. Theory and practice of historical research, with heavy emphasis on use of databases, archival, and other primary sources to conduct original historical research. (F)

### JCOM 6020 Mass Communication Theory 3
Advanced study of major mass communication theories and issues, and their evidence in case studies. Application of theory to significant societal problems. (F)

### JCOM 6030 International Communications Problems 3
Study of mass communication influences and effects within and between nations. Systems and techniques of mass communication as functions of national identity and development. (F,Sp)

### JCOM 6040 Seminar in Mass Media Research Methods 3
Introduction to the major theoretical perspectives and methodologies in mass communication research. Repeatable for credit with departmental permission. (Sp)

### JCOM 6050 Seminar in Mass Media Issues and Problems 3
Variable topic seminar concerning research of issues and problems in mass media principles and practice. Repeatable for credit with departmental permission. (F,Sp)

### JCOM 6110 Literary Journalism 3
In-depth analysis and practice of literary and stylistic elements of long-form journalistic and other nonfiction writers. (F)

## Course Descriptions

### Landscape Architecture and Environmental Planning (LAEP)

See Department of Landscape Architecture and Environmental Planning, pages 356-363.

<table>
<thead>
<tr>
<th>Course ID</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAEP 1030</td>
<td>BCA Introduction to Landscape Architecture</td>
<td>3</td>
<td>Environment as a basis for land use and design decisions. Topics discussed include environmental awareness, the planning and design process, and design related to open space, communities, and the region. Three one-hour lectures per week. (F,Sp,Su)</td>
</tr>
<tr>
<td>LAEP 1200</td>
<td>Basic Graphics in Landscape Architecture</td>
<td>4</td>
<td>Graphic techniques for landscape architectural drawings, including plans, elevations, isometrics, perspective, rendering, and model construction. Various media explored for preparing drawings and sketches for presentation. Two three-hour studios per week. (F)</td>
</tr>
<tr>
<td>LAEP 1350</td>
<td>Theory of Design</td>
<td>4</td>
<td>Basic elements of design with emphasis upon their relationship to landscape architecture. Form and spatial relationships are stressed through student development of two- and three-dimensional design models. Design theory applied to materials of landform, vegetation, water, and architecture. Two three-hour studios per week. Prerequisite: LAEP 1200. (Sp)</td>
</tr>
<tr>
<td>LAEP 2250</td>
<td>Internship and Cooperative Education 1-5</td>
<td></td>
<td>Course credit for professional experience outside the classroom prior to graduation. A statement of professional goals and a summary report following the experience are required.</td>
</tr>
<tr>
<td>LAEP 2300</td>
<td>History of Landscape Architecture</td>
<td>3</td>
<td>An examination of landscape change in the context of its history from ancient to present times, with a primary emphasis on the visual qualities of designed landscapes. Three one-hour lectures per week. (F)</td>
</tr>
<tr>
<td>LAEP 2600 QI</td>
<td>Landscape Construction I</td>
<td>4</td>
<td>Introduction to site engineering, grading, cut and fill calculation, stormwater drainage, and erosion control. Two one-hour lectures and two two-hour studios per week. Prerequisite: LAEP 1200 (may be taken concurrently). (F)</td>
</tr>
<tr>
<td>LAEP 2650</td>
<td>Architecture and the Built Environment</td>
<td>4</td>
<td>Exploration of architectural form and structure in exterior environments. Emphasis placed on space created by architectural forms and their relationship to the surrounding landscape. Energy and water conservation measures with respect to the built environment. Prerequisite: LAEP 1200. (Sp)</td>
</tr>
<tr>
<td>LAEP 2700 CI</td>
<td>Site Analysis and Design</td>
<td>5</td>
<td>Site survey, analysis, and design synthesis. Focuses on human behavior and natural resources as design considerations for future land use planning. Student teams survey and analyze sites’ landscape and cultural resources for future land use planning. (F)</td>
</tr>
<tr>
<td>LAEP 2720</td>
<td>Site Planning and Design</td>
<td>5</td>
<td>Serves as a lower-division capstone course, synthesizing lower-division landscape architecture coursework and applying that knowledge to site scale design projects. Includes units on design methodology, site planning and circulation, and creative problem solving. Three three-hour studios per week. Prerequisite: LAEP 2700 or 6370. (Sp)</td>
</tr>
<tr>
<td>LAEP 3100</td>
<td>Recreation/Open Space</td>
<td>5</td>
<td>Focuses on regional and urban open space planning and design including project scale recreation design. Includes design seminars, field trips, and guest lecturers. Three three-hour studios per week. Prerequisites: Matriculation in Bachelor of Landscape Architecture (BLA) degree; LAEP 2720 or permission of instructor. (F)</td>
</tr>
<tr>
<td>LAEP 3120</td>
<td>Residential Planning and Design</td>
<td>5</td>
<td>Focuses on large-scale residential projects, planned unit developments, and community facilities. Three three-hour studios per week. Prerequisite: LAEP 3100. (Sp)</td>
</tr>
<tr>
<td>LAEP 3300</td>
<td>Advanced Computer Applications in Landscape Architecture</td>
<td>4</td>
<td>Emphasizes the major analytical and technical components of resource planning and design using computer techniques. Two three-hour studios per week. Prerequisite: LAEP 2720 or instructor’s permission. (F)</td>
</tr>
<tr>
<td>LAEP 3500</td>
<td>Planting Design</td>
<td>2-4</td>
<td>Emphasizes plant and environment relationships and plant community dynamics as they relate to planting design. In addition, basic planting design principles will be introduced. Involves application of planting design principles to a variety of project types. One segment will focus on land reclamation planting in nonirrigated landscapes. Two three-hour studios per week. Prerequisite: PLSC 2620. (F)</td>
</tr>
<tr>
<td>LAEP 3610</td>
<td>Landscape Construction II</td>
<td>4</td>
<td>Introduction to construction materials, wood construction, and free-standing and retaining walls. Introduction to layout and dimensioning, basic theory and technical aspects of roadway alignment, and theory and design of sprinkler irrigation. Two three-hour studios per week. Prerequisites: LAEP 2600, MATH 1050. (Sp)</td>
</tr>
<tr>
<td>LAEP 3700</td>
<td>City and Regional Planning</td>
<td>3</td>
<td>Introduction to historic and current theory and methods of city and regional planning. Includes legislative, administrative, and implementation practices of the general comprehensive plan. Three lectures per week. (Sp)</td>
</tr>
<tr>
<td>LAEP 4100</td>
<td>Urban Theory, Systems, and Design</td>
<td>5</td>
<td>Focuses on urban environment for design expression and processes associated with the creation of cities. Explores different aspects of urban theories and design approaches (conceptual, perceptual, and analytical) as applied to large urban areas and site-specific spaces. Prerequisite: LAEP 3120. (F)</td>
</tr>
<tr>
<td>LAEP 4110</td>
<td>Construction Document Preparation</td>
<td>4</td>
<td>Design project through detail design development and completion of the working drawings and specifications. Two three-hour studios per week. Prerequisites: LAEP 3120 and 3610. (F)</td>
</tr>
<tr>
<td>LAEP 4120</td>
<td>Emerging Areas in Landscape Architecture I</td>
<td>2</td>
<td>Exploration of new and emerging areas in the profession of landscape architecture. National and international issues in regional landscape planning, landscape restoration/bioengineering, and visual resource management are among several issues which may be examined. Three three-hour studios per week. Prerequisite: LAEP 3120. (F,Sp,Su)</td>
</tr>
<tr>
<td>LAEP 4130</td>
<td>Emerging Areas in Landscape Architecture II</td>
<td>2</td>
<td>Exploration of new and emerging areas in the profession of landscape architecture. National and international issues in regional landscape planning, landscape restoration/bioengineering, and visual resource management are among several issues which may be examined. Three three-hour studios per week. Prerequisite: LAEP 3120. (F,Sp,Su)</td>
</tr>
<tr>
<td>LAEP 4250</td>
<td>Internship and Cooperative Education 1-5</td>
<td></td>
<td>Course credit for professional experience outside the classroom prior to graduation. Statement of professional goals and a summary report following the experience are required. (F,Sp,Su)</td>
</tr>
<tr>
<td>LAEP 4350</td>
<td>Travel Course</td>
<td>1-3</td>
<td>Major field trip to examine a variety of projects in planning and design. (F,Sp,Su)</td>
</tr>
<tr>
<td>LAEP 4810</td>
<td>Tutorial</td>
<td>1</td>
<td>Directed readings and discussions of landscape issues. Prerequisite: Instructor’s permission. (F,Sp,Su)</td>
</tr>
<tr>
<td>LAEP 4900</td>
<td>Special Problems</td>
<td>1-5</td>
<td>Selected problems to meet individual needs for students’ completion of professional education. Hours arranged. Prerequisite: Instructor’s permission. (F,Sp,Su)</td>
</tr>
<tr>
<td>LAEP 4920 CI</td>
<td>Professional Practice</td>
<td>2</td>
<td>Readings and reports on current topics and trends in professional practice. Also covers contracts, specifications, professional ethics, and general office management. (Sp)</td>
</tr>
</tbody>
</table>

</thead>
<tbody>
<tr>
<td>LAEP 4950</td>
<td>Seminar</td>
<td>1</td>
<td>Directed readings and reports on current and emerging areas of the profession. One recitation hour per week. (F,Sp,Su)</td>
</tr>
<tr>
<td>LAEP 5400</td>
<td>Low Water Landscaping (dual listing 6400)</td>
<td>3</td>
<td>Examines arid ecosystems, emphasizing the Intermountain West, and recreating such ecosystems in a range of arid landscapes. Also covers procurement, propagation, establishment, and maintenance of plants appropriate for low water landscapes. Also taught as PLSC 5400/6400. (F)</td>
</tr>
<tr>
<td>LAEP 6100</td>
<td>Regional Landscape Analysis and Planning</td>
<td>5</td>
<td>Focuses on the challenges and opportunities inherent in conducting landscape planning and analysis on a broad scale. Students integrate a variety of landscape planning project scales through literature review, selected case studies, and a major applied studio project. Prerequisites: LAEP 6740, 6750. (F)</td>
</tr>
<tr>
<td>LAEP 6110</td>
<td>Landscape Planning for Wildlife</td>
<td>3</td>
<td>Application of principles of landscape ecology to planning for wildlife in urban, suburban, and exurban landscapes. Discussion of restoration of disturbed habitats in these environments. Includes real-world projects and field trips. Addresses issues of landscape restoration and bioengineering. (Sp)</td>
</tr>
<tr>
<td>LAEP 6120</td>
<td>Regional Landscape Policy and Implementation</td>
<td>2</td>
<td>Case studies and/or implementation strategies for planning alternatives developed in LAEP 6100. Prerequisites: LAEP 6740, 6750. (Sp)</td>
</tr>
<tr>
<td>LAEP 6160</td>
<td>Professional Practice</td>
<td>2</td>
<td>Assigned readings and reports on current topics and trends in the practice of landscape architecture and environmental planning. (Sp)</td>

<tr>
<td>LAEP 6250</td>
<td>Internship and Cooperative Education Program</td>
<td>1-5</td>
<td>Course credit given for professional experience outside the classroom prior to graduation. Statement of professional goals and summary report following the experience are required. Prerequisite: LAEP 6100. (F,Sp,Su)</td>
</tr>
<tr>
<td>LAEP 6310</td>
<td>Recreation and Open Space Planning and Design</td>
<td>5</td>
<td>Focuses on planning and design of open space and recreational areas, as well as facilities of various types and scales. Students develop skills in analysis, research, planning strategy, and design technique to create functional spaces based on client needs and site limitations. Prerequisite: LAEP 2720 or permission of instructor. (F)</td>
</tr>
<tr>
<td>LAEP 6320</td>
<td>Residential Planning and Design</td>
<td>5</td>
<td>Studio course introducing methods for the planning and design of residential projects of various types and scales. Students develop skills in critical analysis, design technique, and planning strategy to create functional spaces based on client needs and site requirements. Prerequisite: LAEP 6310. (Sp)</td>
</tr>
<tr>
<td>LAEP 6350</td>
<td>Planting Design for Sustainability</td>
<td>4</td>
<td>Emphasizes plant/environmental relationships, as well as plant community dynamics, aesthetics, function, and sustainability. Includes lectures, readings, projects, and papers. (Sp)</td>
</tr>
<tr>
<td>LAEP 6370</td>
<td>City and Regional Planning</td>
<td>3</td>
<td>Introduction to historic and current theory and methods of city and regional planning. Includes legislative, administrative, and implementation practices within the planning process. Emphasizes public transportation and mobility issues. (Sp)</td>
</tr>
<tr>
<td>LAEP 6400</td>
<td>Low Water Landscaping (dual listing 5400)</td>
<td>3</td>
<td>Examines arid ecosystems, emphasizing the Intermountain West, and recreating such ecosystems in a range of arid landscapes. Also covers procurement, propagation, establishment, and maintenance of plants appropriate for low water landscapes. Also taught as PLSC 6400/5400. (Sp)</td>
</tr>
<tr>
<td>LAEP 6410</td>
<td>Redefining the Urban Landscape</td>
<td>5</td>
<td>Focuses on urban environment for design expression and processes associated with the creation of cities. Explores different aspects of urban design theories and design approaches (conceptual, perceptual, and analytical), as applied to large urban areas and site-specific spaces. (F)</td>
</tr>
<tr>
<td>LAEP 6550</td>
<td>Travel Course</td>
<td>1-3</td>
<td>Major field trip to examine a variety of projects in planning and design. (F,Sp,Su)</td>
</tr>
<tr>
<td>LAEP 6740</td>
<td>Planning Theory and Implementation Issues</td>
<td>3</td>
<td>Explores theoretical underpinnings of planning and landscape theory, from the rational model to contemporary alternatives. Leads to discussions of issues of sprawl, sustainability, and transportation, including their effects on the built environment, agricultural lands, and open-space systems. (F)</td>
</tr>
<tr>
<td>LAEP 6750</td>
<td>Implementation and Regulatory Techniques in Planning</td>
<td>3</td>
<td>Review and analysis of the legal basis and techniques for land use and resource planning, including historic and visual resources at the federal, state, and local levels. Relies on readings in case law and specific case studies, as well as research focused on the evaluation of planning processes and strategies. Prerequisite: Graduate standing. (F,Sp)</td>
</tr>
<tr>
<td>LAEP 6860</td>
<td>Faculty/Interdisciplinary Seminar</td>
<td>1</td>
<td>Explores current and emerging areas of the profession. Also includes preparation of thesis proposals and abstracts, and discussion of graduate degree completion requirements. Prerequisite: Graduate standing. (F)</td>
</tr>
<tr>
<td>LAEP 6900</td>
<td>Special Problems</td>
<td>1-5</td>
<td>Selected problems to meet individual student interests and areas of concentration. Registration by permission of departmental faculty. Prerequisite: Graduate standing. (F,Sp,Su)</td>
</tr>
<tr>
<td>LAEP 6910</td>
<td>Reading Seminar I</td>
<td>1</td>
<td>Selected readings directed by department faculty. Prerequisite: Graduate standing. (F)</td>

### Language (LANG)

See Department of Languages, Philosophy, and Speech Communication, pages 364-379.

LANG 3550 DHA Culture of East Asia

Helps students explore and appreciate the culture of three East Asian countries: China, Japan and Korea. Students gain sincere view and understanding of these East Asian cultures through readings, hands-on cultural activities, viewing video materials, writing, and discussions. Topics include: major historical and social events, customs and traditions, thoughts and beliefs, people, food, contemporary issues, art, literature, and film. (F,Sp)

Course Descriptions

**Mechanical and Aerospace Engineering (MAE)**

See Department of Mechanical and Aerospace Engineering, pages 400-406.

**MAE 1200 Engineering Graphics**

Introduction to technical sketching, solid modeling, and engineering graphics. Concurrent engineering design process applied to a project. Students start with hand sketches, then move through variational geometry solid models, with tolerance analysis and control, until they have produced a complete set of manufacturing drawings conforming to the ASME standard. Prerequisite: MATH 1060. (F,Sp)

**MAE 2160 Material Science (formerly MAE 2060)**

Study of atomic and microscopic structures of metals, polymers, ceramics, and composite materials, and how these structures affect material properties. Prerequisites: CHEM 1210 and ENGR 2140 (both may be taken concurrently). (F,Sp)

**MAE 2200 Engineering Numerical Methods I**

Introduction to computational methods, emphasizing software development using FORTRAN 95. Prerequisite: MAHE 1220. (F)

**MAE 2250 Cooperative Practice**

Planned work experience in industry. Detailed program must have prior approval. Written report required. (F,Sp,Su)

**MAE 2300 Thermodynamics I (formerly MAE 2400)**

First and second laws of thermodynamics; analysis of open and closed systems; equations of state; power and refrigeration cycles; and problem solving methodology. Prerequisites: MATH 1220; MATH 2210 (may be taken concurrently). (Sp,Su)

**MAE 2450 Engineering Numerical Methods II (formerly MAE 2210)**

Explores basic tools of numerical analysis, solution to ordinary and partial differential equations, software development using FORTRAN 95, and applications using computer algebra packages. Prerequisites: MAE 2200; MATH 2210, 2250 (may be taken concurrently). (Sp)

**MAE 2650 Manufacturing Processes (formerly MAE 2600)**

Introduction to manufacturing processes and CAD/CAM. Material forming, machining, finishing, and joining. Integration of manufacturing and CAD, plus the fundamentals and application of statistical process control. (Sp,Su)

**MAE 3040 Mechanics of Solids**

Stress, strain, and deflection due to flexure and shear. Combined stresses, instability, nonsymmetric bending, torsion, and energy methods. Prerequisite: ENGR 2140. (F)

**MAE 3320 Advanced Dynamics**

Particle and rigid body dynamics. Work and kinetic energy, conservation of energy, impulse-momentum, conservation of linear and angular momentum. Kinematics and kinetics in 2-D and 3-D. Newtonian and Lagrangian Mechanics. Prerequisites: ENGR 2030; MAE 2210 (may be taken concurrently). (F)

**MAE 3340 Instrumentation and Measurements**

Principles and application of mechanical instrumentation and experimentation. Sensing elements, signal conditioning, data acquisition, statistical analysis of data, and instrumentation system design. Prerequisites: ENGR 2140, ECE 2210, MAE 3400, 3420. (Sp)

**MAE 3400 Thermodynamics II**

Second law analysis, power and refrigeration cycles, property relations, gas mixtures, psychrometrics, chemical reactions, chemical equilibrium, introduction to heat transfer, steady state and transient conduction. Prerequisites: MAE 2300; MAE 2200 (may be taken concurrently). (F)
### Course Descriptions

**MAE 3420 Fluid Mechanics**  
3  
Application of fluid dynamic theory to inviscid and viscous, incompressible and compressible, and external and internal fluid flows, with emphasis on laminar and turbulent boundary layers. Prerequisites: ENGR 2020, MAE 2200, 2300 (MAE 2200 may be taken concurrently). (F)

**MAE 3440 QI Heat and Mass Transfer**  
3  
Introduction to convection, external flow, internal flow, free convection, boiling and condensation, heat exchangers, radiation and diffusion mass transfer. Includes design project. Prerequisites: MAE 3400, 3420; MAE 2450 (may be taken concurrently). (Sp)

**MAE 3800 Design I**  
2  
First course in senior design sequence. Design process, teaming skills, engineering economics, project selection and management, proposal writing, technical writing, and technical presentations. Prerequisite: ENGR 2140. (Sp)

**MAE 4300 Machine Design**  
3  
Computer-aided design and synthesis of mechanisms, mechanical linkages, cams, fasteners, welds, gears, bearings, power transmission components, and lubrication. Component failure analysis based on metal fatigue related to dynamic loading. Prerequisite: MAE 3040. (Sp)

**MAE 4400 CI Fluids/Thermal Laboratory**  
2  
Laboratory experiences in observation and measurement of fundamental fluid and thermal phenomena. Prerequisites: MAE 3340, 3440. (F)

**MAE 4800 CI Design II**  
3  
Senior design project, including a technical presentation and a critical design review. Prerequisites: MAE 3440, 3800, 4300. (F,Sp)

**MAE 5020 Finite Element Methods in Solid Mechanics I**  
3  
Introduction to finite element methods and their application to the analysis and design of mechanical engineering systems. Prerequisite: MAE 3040. Also taught as CEE 5020. (F)

**MAE 5060 Mechanics of Composite Materials I**  
3  
Stress-strain relations for nonisotropic composites, such as fiber-reinforced plastic laminates, properties and their uses, strength and life determination, and methods for design using composite materials. Prerequisite: MAE 3040 or CEE 3010. Also taught as CEE 5060. (Sp)

**MAE 5300 Vibrations**  
3  
Vibration of single and multiple degree of freedom, and discrete mass systems. Natural frequencies and mode shapes for free, damped, and undamped systems. Forcing functions and transient responses. Matrix methods, numerical solution, and random vibrations. Applications and design. Prerequisites: ENGR 2020, 2140. (F)

**MAE 5310 Dynamic Systems and Controls**  
3  
Study of continuous-time systems, classical and modern systems design methodologies, transfer function models, state space, dynamics of linear systems, and frequency domain analysis and design techniques. Introduction to controllability and observability, and full-state pole placement controller design. Laboratory work required. Prerequisite: MAE 3340. (F)

**MAE 5410 Design and Optimization of Thermal Systems**  
3  
Discussion of the basic considerations that occur in the design of thermal systems, including problem formulation, appropriate modeling and solution methodologies, optimization techniques, and economic analysis. Prerequisite: MAE 3440. (F)

**MAE 5420 Compressible Fluid Flow**  
3  
Application of conservation of mass, momentum, and energy to the design and analysis of compressible fluid systems. Prerequisites: MAE 3400, 3440. (Sp)

**MAE 5440 Computational Fluid Dynamics**  
3  
Introduction to computational fluid dynamics and heat transfer using the finite-volume method. Extensive code development. Application of a commercial CFD solver to a problem of interest. Prerequisites: MAE 3420 and 3440. (Sp)

**MAE 5470 Internal Combustion Engines**  
3  
Thermodynamics of internal combustion engines; idealized cycles, fuels, fuel metering, engine characteristics, pressure measurement, and engine testing. This course is not currently being offered. For information about when it may be offered, contact the department.

**MAE 5500 Aerodynamics**  
3  
Fundamentals of incompressible, inviscid flow; aerodynamic forces and moments; airfoil characteristics; incompressible flow around two-dimensional airfoils and finite wings; three-dimensional incompressible flow; and introduction to aircraft performance. Prerequisite: MAE 3420. (F)

**MAE 5510 Dynamics of Atmospheric Flight**  
3  
Aircraft equations of motion; aerodynamic forces and moments; aircraft stability and control in roll, pitch, and yaw; aircraft motion with six degrees of freedom; aircraft performance and design; and design project. Prerequisite: MAE 5500. (Sp)

**MAE 5520 Elements of Space Flight**  
3  
Introduction to astrodynamics and orbital design. Spacecraft systems engineering including spacecraft subsystems (e.g., attitude control, communications, power, structures). Introduction to propulsion and launch vehicles. Prerequisites: MAE 3320 or PHYS 3550; or both ECE 2270 and 2700. (F)

**MAE 5530 Space System Design**  
3  
Students in teams perform a space system design involving all aspects, including technical, cost, and schedule. Class is linked to national design competitions and/or current USU spacecraft design projects. Prerequisite: ECE 5230 or MAE 5520. Also taught as ECE 5240. (Sp)

**MAE 5540 Propulsion Systems**  
3  
Fundamentals of rocket and air breathing propulsion, including space flight dynamics, nozzle theory, combustion processes, and flight performance. Rocket propulsion systems, including solid, liquid, hybrid, and combined cycles. Air breathing propulsion systems, including ramjet, scramjet, turbojet, and turbofan engine concepts. Prerequisite: MAE 5420 or consent of instructor. (Sp)

**MAE 5580 Aircraft Design**  
3  
Design and optimization of aircraft systems. Students work in teams to design and optimize an aircraft to satisfy a specific set of mission requirements, including mission effectiveness, cost, and scheduling. Class is linked to national design competitions and/or current USU aircraft design projects. Prerequisite: Permission of instructor. (F)

**MAE 5600 Manufacturing Process Planning and Statistical Quality Control**  
3  
Explores how to produce products in today's manufacturing environment. Topics include forecasting, planning, facility layout, job design, planning, scheduling, total quality management, and statistical process control as they relate to manufacturing firms. Prerequisite: MAE 2650. (F)

**MAE 5610 Hydraulics and Pneumatics**  
3  
Hydraulic and pneumatic circuit theory, components, and systems analysis and design. Efficiency and performance evaluation, based on steady and transient flow principles and force and energy transfer concepts. Introduction to electrohydraulic control systems. Prerequisite: MAE 3420. (Sp)

**MAE 5620 Manufacturing Automation**  
3  
Principles of automation technology as applied to manufacturing systems. Topics include motion control, PLC, robotics, CNC, and system integration. Prerequisite: MAE 2650. (F)

**MAE 5630 Machining Theory and Applications**  
3  
Introduces fundamental metal cutting theory (such as chip formation, cutting forces and temperatures, and tool wear) and its applications, including high-speed machining of aerospace and other difficult-to-machine alloys. Prerequisites: MAE 2650 and 3040. (Sp)

**MAE 5640 Design for Manufacturability**  
3  
Product design for economic production. Manufacturing processes (especially primary processes), associated tooling cost and design, and resultant product design requirements. Prerequisites: MAE 2650 and 3060. (F)

*Course Descriptions*
Course Descriptions

MAE 6510 Aircraft Dynamics and Flight Simulation** 3 Aircraft control and maneuverability, control response and transfer functions, nonlinear dynamics with gyroscopic and aerodynamic coupling, Euler angle formulations, direction cosine formulation, quaternion formulation, numerical integration methods, software design and development. Prerequisite: MAE 5510. (Sp)

MAE 6530 Propulsion Systems 3 Fundamentals of turbine and rocket propulsion, including nozzle theory and thermodynamic relations, combustion processes, and flight performance. Rocket propulsion topics, including solid, liquid, and hybrid rocket engines; and advanced engine concepts. Turbojet, turbofans, afterburners, and advanced unducted fan concepts. Prerequisite: MAE 5420. (Sp)

MAE 6540 Astrodynamics*** 3 Advanced topics in astrodynamics to include: general and special perturbations, universal variable, methods of orbit determination, Lambert’s theorem, the restricted three-body problem, and space mission planning. Prerequisite: MAE 5520. (F)

MAE 6550 Advanced Structural Analysis 3 Explores advanced structures in modern civil, mechanical, and aerospace systems. Emphasizes concepts through problem solving, and fosters an in-depth understanding of the subject. Provides understanding of the fundamental principles to analyze and design advanced structures. Prerequisite: MAE 6040. (Sp)

MAE 6560 Spacecraft Navigation 3 Fundamentals of aircraft and spacecraft navigation systems. Techniques in celestial and inertial navigation. Global Positioning System (GPS) principles. Least squares estimation and Kalman filtering for optimal estimation of stochastic systems. Prerequisite: MAE 5310 or ECE 5310 or equivalent. Also taught as ECE 6560. (Sp)

MAE 6620 Advanced Topics in Metal Cutting 3 Advanced topics in metal cutting mechanics, tool wear and tool life, chip control and breaking, high-speed and dry machining, surface roughness and integrity, and the optimization and monitoring of machining operations. Prerequisites: MAE 3800, 5630. (Sp)

MAE 6640 Life Cycle Engineering 3 Familiarizes students with re-engining, cost/benefit analysis, value engineering, and life cycle design. Students will analyze costs and benefits of design decisions over the product life (needs, market, use, service, reliability, retirement, etc.) while improving the life cycle design of industrial products. Prerequisite: Graduate standing or permission of instructor. (F)

MAE 6800 Advanced Machine Design*** 3 Advanced topics in fluid film and boundary lubrication. Dynamics and vibration consideration in design of machine systems and fatigue failure theories. Prerequisite: MAE 4300. (Sp)

MAE 6900 Seminar 0.5* Overview of graduate program requirements, current research, and research opportunities. Presentations from graduate students, faculty, and outside speakers. Master’s degree candidates must include 1 credit and doctoral degree candidates must include 2 credits of MAE 6900 in an approved program of study. Prerequisite: Graduate standing or approval of department head. (F,Sp)

MAE 6930 Special Problems 1-3* Independent or group study of engineering problems not covered in regular course offerings. (F,Sp,Su)

MAE 6950 Design Project 3 Individual projects involving the design, development, and/or testing of components, devices, or systems. Formal report required. (F,Sp,Su)

MAE 6970 Thesis Research 1-9* (F,Sp,Su)

MAE 6990 Continuing Graduate Advisement 1-12* (F,Sp,Su)

MAE 7040 Elasticity*** 3 Energy theorems, variational techniques, complex variable solutions, and three-dimensional solutions for linear elastic materials. Prerequisite: MAE 6040 or instructor’s consent. (Sp)

MAE 7050 Plasticity*** 3 Analysis of stresses, deformation, and collapse in devices constructed of plastic material. Prerequisite: MAE 6040 or CEE 6080/5080 or instructor’s consent. Also taught as CEE 7050. (Sp)

MAE 7080 Advanced Plate and Shell Theory 3 Analysis of plate and shell structures by classical and numerical methods. Emphasis on numerical solutions. Prerequisite: Instructor’s consent. Also taught as CEE 7080. (F)

MAE 7330 Nonlinear and Adaptive Control 3 Methods of nonlinear and adaptive control system design and analysis. Includes qualitative and quantitative theories, graphical methods, frequency domain methods, sliding surface design, linear parameter estimation methods, and direct and indirect adaptive control techniques. Prerequisite: ECE/MAE 6320. Also taught as ECE 7330. (Sp)

MAE 7350 Intelligent Control Systems*** 3 Intelligent control strategies, including neural network, fuzzy logic, associated memory networks, and rule-based control systems. Prerequisite: ECE/MAE 6320 or instructor approval. Also taught as ECE 7350. (Sp)

MAE 7360 Optimal and Robust Control 3 Advanced methods of control system analysis and design. Operator approaches to optimal control, including LQR, LQG, and L1 optimization techniques. Robust control theory, including QRT, H-infinity, and interval polynomial approaches. Prerequisite: ECE/MAE 6320 or instructor approval. Also taught as ECE 7360. (F)

MAE 7380 Advanced Dynamics and Vibrations*** 3 Advanced techniques in dynamics and vibrations. Prerequisite: ECE/MAE 6180. (F)

MAE 7580 Advanced Finite Element Analysis in Fluid Mechanics 3 Application of the finite element method of analysis to problems in fluid mechanics. Use of higher order element to two- and three-dimensional flows. Prerequisites: CEE 3510, CEE/MAE 6570; or MAE 3420, CEE/MAE 5020. Also taught as CEE 7580. (Sp)

MAE 7750 Distributed Control Systems* 3 Design and implementation issues concerning distributed control systems. Real-time processing, distributed stability methods, network techniques and standards, system development and management, smart sensors, and control actuators. Survey of current literature. Prerequisite: ECE/MAE 6320. Also taught as CEE 7750. (Sp)

MAE 7930 Special Problems 1-3* Independent or group study of engineering problems not covered in regular course offerings. (F,Sp,Su)

MAE 7970 Dissertation Research 1-12* (F,Sp,Su)

MAE 7990 Continuing Graduate Advisement 1-12* (F,Sp,Su)

* Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.
****Taught alternate years. For further information, consult department.

<td>Introduction to Algebraic Structures</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>First course in theory of algebraic structures. Topics include elementary group and ring theory. Prerequisites: C- or better in MATH 2210, 2270, 2280; or C- or better in MATH 2210, 2270, 2250. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>MATH 4400</td>
<td>History of Mathematics and Number Theory</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Chronological parallel of math history with civilization, evolution of mathematical thought, historical foundations of numbers, computation, geometry, algebra, trigonometry, and calculus. Introduction to number theory. Prerequisites: At least one of MATH 4200 and 4310 with a C- or better, and concurrent enrollment in the other. (Sp)</td>
<td></td>
</tr>
<tr>
<td>MATH 4500</td>
<td>Methods of Secondary School Mathematics Teaching</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>A teaching methods course required of all prospective secondary school mathematics teachers. Prerequisites: C- or better in MATH 3110; and one of MATH 4200 or 4310 with a C- or better. (F,Sp)</td>
<td></td>
</tr>
</tbody>
</table>
Course Descriptions

MATH 4620  Computer Aided Math for Secondary Math Teachers  
Problem solving using symbolic manipulation software on computers. Topics include material introduced in MATH 1210, 1220, 2210, 2260, 2270, and 2280. Includes instruction in the use of modern computerized devices in the classroom. Prerequisites: C- or better in MATH 2210, 2250; or C- or better in MATH 2210, 2270, 2280. (F)

MATH 4700  Engineering Mathematics and Statistics  
Advanced engineering mathematics and statistics including: random variables; distributions; central limit theory; hypothesis testing; Anova; quality control, Fourier series; introductory analytic and numerical methods for elliptic, parabolic, and hyperbolic PDEs; and modern software packages. Prerequisites: C- or better in MATH 2210; C- or better in MATH 2250 or 2280. (F,Sp)

MATH 4910  Directed Reading and Conference  
Registration requires prior arrangement with specific instructor. (F,Sp,Su)

MATH 5110  Differential Geometry  
Introduction to geometry of curves and surfaces in three dimensions, using graphic and symbolic software. Prerequisites: C- or better in MATH 2210, 2250; or C- or better in MATH 2210, 2270, 2280. (F)

MATH 5210  Introduction to Analysis I  
One and several variable calculus from an advanced point of view. Proofs of all main theorems in calculus. Prerequisite: C- or better in MATH 4200 or 5510. (F)

MATH 5220  Introduction to Analysis II  
Continuation of MATH 5210. Rigorous development of multivariable advanced calculus. Prerequisite: C- or better in MATH 5210. (Sp)

MATH 5270  Complex Variables  
Basic theory and applications of complex variables for mathematics, physics, and engineering students. Topics include analytic functions, contour integration, and residue theorem conformal mappings. Prerequisites: C- or better in MATH 2210, 2250; or C- or better in MATH 2210, 2270, 2280. (Sp)

MATH 5310  Introduction to Modern Algebra  
Continuation of MATH 4310. Topics include: Sylow theory for finite groups, factorization theory for commutative rings, and Galois theory. Prerequisite: C- or better in MATH 4310. (Sp)

MATH 5340  Theory of Linear Algebra  
Vector space theory, linear transformations and matrices, eigenvalues and eigenvectors, inner product spaces, orthogonality, canonical forms, and Hermitian matrices. Prerequisite: C- or better in MATH 2250 or 2270; or consent of instructor. (Sp)

MATH 5410  Methods of Applied Mathematics  
Basic modeling and qualitative understanding, including dimensional analysis (Buckingham Pi theorem). Asymptotic solutions, perturbation approaches, boundary layers in differential equations, variational calculus, Hamilton’s principle, and conservation of energy. Emphasizes practical approaches to science and engineering problems. Prerequisites: C- or better in MATH 2210, 2250; or C- or better in MATH 2210, 2270, 2280. (F)

MATH 5420  Partial Differential Equations  
Modeling with partial differential equations, diffusion, and wave equations. Classical solution techniques including: maximum principles, separation of variables (eigenfunctions), method of characteristics, Fourier and Laplace transforms, and singularity methods (Green’s Functions). Emphasizes understanding and solving physical equations. Prerequisite: C- or better in MATH 2250 or 2280. (Sp)

MATH 5460  Introduction to the Theory and Application of Nonlinear Dynamical Systems  
Qualitative behavior of nonlinear maps and ordinary differential equations. Stability of solutions, bifurcation theory, chaos, and applications. Prerequisite: C- or better in MATH 2250 or 2280. (Sp)

MATH 5500  Capstone Mathematics and Statistics for Teachers  
Builds on competencies attained in mathematics and statistics, enabling students to connect with and relate mathematics and statistics to real-world problem solving, while enhancing their capacity to explain conceptual mathematics. Prerequisites: C- or better in MATH 4200, 4310, and 4400. (F)

MATH 5510  Introduction to Topology  
Elementary point-set topology, topological spaces, separation axioms, metric spaces, compactness, connectedness, order topology, countability axioms, continuity, and homeomorphisms. Prerequisite: C- or better in MATH 4200. (F)

MATH 5570  Actuarial Math I  
Introduction to theory of risk and its application to construction and analysis of models for insurance systems. Prerequisites: C- or better in MATH 5710, STAT 3000, and permission of instructor. (F)

MATH 5580  Actuarial Math II  
Continuation of MATH 5570. Prerequisite: C- or better in MATH 5570. (Sp)

MATH 5610  Computational Linear Algebra and Solution of Systems of Equations  
Numerical solutions of systems of linear and nonlinear equations, methods for eigensystems, least squares problems, finding roots of functions and nonlinear systems, constrained and unconstrained optimization. Prerequisites: C- or better in MATH 2210, C- or better in MATH 2250 or 2270, and a high-level programming language. (F)

MATH 5620  Numerical Solution of Differential Equations  
Numerical solution of differential equations, initial and boundary value problems, finite difference, finite element, and spectral methods (FFT) applied to ODEs and PDEs. Prerequisites: C- or better in MATH 2210; C- or better in MATH 2250 or 2270; C- or better in MATH 2280, and a high-level programming language. (Sp)

MATH 5640  Optimization  
One-semester introductory survey of optimization, including both continuous and combinatorial problems. Topics include: linear programming, constrained and unconstrained optimization, network models, dynamic programming, and integer programming. Prerequisites: C- or better in MATH 2210; C- or better in MATH 2250 or 2270; C- or better in MATH 2280, and a high-level programming language. (Sp)

MATH 5710  Introduction to Probability  
Discrete and continuous probability, random variables, distribution and density function, joint distributions, conditional probabilities and expectations, Bayes’ theorem, moments, moment generating functions, inequalities, convergence in probability and distribution, and central limit theorem. Prerequisites: C- or better in MATH 2210, and C- or better in MATH 2250 or 2270. (F,Sp)

MATH 5720  Introduction to Mathematical Statistics  
Basic theory of point and interval estimation and hypothesis testing. Topics include: sufficiency and completeness; method-of-moments, best unbiased, maximum likelihood, Bayes’, and empirical Bayes’ estimators; Neyman-Pearson lemma; and likelihood ratio tests. Prerequisite: C- or better in MATH 5710. (Sp)

MATH 5760  Stochastic Processes  
Application of stochastic processes to engineering and science. Topics include Markov chains, Poisson processes, renewal theory, and Brownian motion. Prerequisite: C- or better in MATH 5710. (F)

MATH 5810  Topics in Mathematics  
Topics in Mathematics  
Prerequisite: Permission of instructor. (F,Sp,Su)

MATH 5910  Directed Reading and Conference  
Prerequisite: Prior arrangement with a specific instructor. (F,Sp,Su)

MATH 5950H Honors Senior Project  
A senior project required for completion of the departmental honors program. Prerequisite: Permission of instructor. (F,Sp,Su)

MATH 5950H Honors Senior Project  
A senior project required for completion of the departmental honors program. Prerequisite: Permission of instructor. (F,Sp,Su)

MATH 6110  Differential Geometry  
Topics include material introduced in MATH 1210, 1220, 2210, 2260, 2270, and 2280. Includes instruction in the use of modern computerized devices in the classroom. Prerequisites: C- or better in MATH 2210, 2250; or C- or better in MATH 2210, 2270, 2280. (F)

MATH 6120  Differential Geometry  
Differential Geometry*  
Stability of solutions, bifurcation theory, chaos, and applications. Prerequisite: C- or better in MATH 2210, 2250; or C- or better in MATH 2210, 2270, 2280. (F)

MATH 6210  Real Analysis*  
Measure theory, abstract integration, differentiation, introduction to functional analysis, Hilbert and Banach spaces. Prerequisite: C- or better in MATH 5210, MATH 6210 must be completed prior to 6220. (F,Sp)

**Management and Human Resources (MHR)**

See Department of Management and Human Resources, pages 383-387.

**MHR 1160 Developing Self-Management Skills**
1
A practical course designed to provide basic self-management skills contributing to personal effectiveness. For freshmen and sophomores only. (F,Sp,Su)
## Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MHR 2050</td>
<td>Legal and Ethical Environment of Business</td>
<td>3</td>
<td>Surveys the legal and ethical environment of business. Introduction to elementary legal research and writing and critical thinking techniques. Lecture and laboratory. Prerequisites: STAT 1040 or MATH 1030 or 1050 (MATH 1050 or equivalent is required for College of Business majors); and GPA of 2.5 or higher. <em>(F,Sp,Su)</em></td>
</tr>
<tr>
<td>MHR 2160</td>
<td>Student Applied Leadership Training</td>
<td>1-3*</td>
<td>Available to students involved in structured leadership training provided as part of their role and responsibility at the University. For details, contact the Office of University Advising and Transfer Services (SC 304). Prerequisite: Approval of course coordinator. <em>(F,Sp,Su)</em></td>
</tr>
<tr>
<td>MHR 2350</td>
<td>Small Business Management</td>
<td>3*</td>
<td>Provides practical overview of management principles and practices as they apply to the small business enterprise. For nonbusiness majors.</td>
</tr>
<tr>
<td>MHR 3110</td>
<td>Managing Organizations and People</td>
<td>3</td>
<td>Overview of the role of management, and an introduction to leadership theory and practice. Includes defining of mission and goals, organizing work, and managing human performance. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. <em>(F,Sp,Su)</em></td>
</tr>
<tr>
<td>MHR 3510</td>
<td>Fundamentals of Entrepreneurship</td>
<td>3</td>
<td>Introduction to entrepreneurship and the processes of new ventures. The objective is to help students become familiar with entrepreneurship and ascertain the degree to which it represents a viable career path. Focuses on identifying, analyzing, and developing business opportunities. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. <em>(F)</em></td>
</tr>
<tr>
<td>MHR 3520</td>
<td>Relationship and Organizational Competencies for Entrepreneurs</td>
<td>3</td>
<td>Development of the relationship and organizational competencies for entrepreneurs. Focuses on the development of persuasion, delegation, and organizational skills for individuals who launch businesses and/or play a key role in their growth. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. <em>(Sp)</em></td>
</tr>
<tr>
<td>MHR 3710</td>
<td>Developing Team and Interpersonal Skills</td>
<td>3</td>
<td>Experientially-driven course focusing on the role of teams in organizations and on developing skills which individuals and teams need to be effective. Topics include self-awareness, supportive communication, problem solving, and conflict management. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. <em>(F,Sp)</em></td>
</tr>
<tr>
<td>MHR 3720</td>
<td>Leading Organization Change</td>
<td>3</td>
<td>Explores the topic of organizational change and transformation, with special emphasis on the role of leadership, vision, and organization culture in change programs. Extensive use of case studies and experiential exercises. Also covers the history of organization development, change facilitation, and dealing with resistance to change. Prerequisites: MHR 3110; admissitance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits.</td>
</tr>
<tr>
<td>MHR 3810</td>
<td>Employment Law and Policy Development</td>
<td>3</td>
<td>Examines laws related to employment, labor relations, civil rights, compensation, safety, health, and retirement. Provides hands-on experience in drafting and reviewing human resource policies in a business setting. Addresses implementing and influencing public policy. Prerequisites: MHR 2050; admissitance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. <em>(F,Sp)</em></td>
</tr>
<tr>
<td>MHR 3820</td>
<td>International Management</td>
<td>3</td>
<td>Exploration of international culture and context of management, the impact of globalization on businesses today, and the pressures and complexities of operating in global markets, including the processes of managing multi-cultural human resources. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. <em>(F,Sp)</em></td>
</tr>
<tr>
<td>MHR 4510</td>
<td>Senior Seminar in Entrepreneurship</td>
<td>3</td>
<td>Theoretical and practical aspects of starting or buying a business. Includes development of a business plan, as well as conducting due diligence for buying a business or extensive consulting with a start-up or growth business.</td>
</tr>
<tr>
<td>MHR 4630</td>
<td>Human Resource Management</td>
<td>3</td>
<td>Introduces the process of managing human resources, including human resource planning, recruitment, selection, training, performance evaluation, compensation, career management, and labor relations. Also discusses diversity, human resource strategy, and related ethical issues. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. <em>(F,Sp)</em></td>
</tr>
<tr>
<td>MHR 4710</td>
<td>Senior Leadership Project</td>
<td>3</td>
<td>Students plan and complete advanced leadership projects, present results, and document accomplishments. Students gain practical experience and demonstrate ability to manage complex projects, contributing to organizational goals and their own career objectives. Prerequisite: Permission of instructor.</td>
</tr>
<tr>
<td>MHR 4730</td>
<td>Business and Society</td>
<td>3</td>
<td>Examines the relationship of business enterprises with their external environment and helps students to develop an analytical framework for addressing the business and society relationship over one’s career in business or government. Helps students recognize, formulate, and analyze moral issues, as well as trace decisions forward to personal, cultural, and societal consequences. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits.</td>
</tr>
<tr>
<td>MHR 4800</td>
<td>Independent Research and Readings</td>
<td>1-3*</td>
<td>Provides opportunity for student to pursue special interests under tutorship of faculty. Prerequisite: Approval of faculty member and department head. <em>(F,Sp,Su)</em></td>
</tr>
<tr>
<td>MHR 4880</td>
<td>CI Business Strategy in an Entrepreneurial Context</td>
<td>3</td>
<td>Integrative capstone course dealing with processes, methods, and steps involved in starting and growing small to mid-size business ventures. Emphasizes cross-functional challenges of market entry, finance, operations, managing business growth, and entrepreneurs’ responsibilities to society. Prerequisites: Senior standing; MHR 3110, BA 3400, 3500, 3700; admissitance to a USU major; cumulative GPA of 2.67 or higher. <em>(F,Sp,Su)</em></td>
</tr>
<tr>
<td>MHR 4950H</td>
<td>Senior Honors Thesis/Project</td>
<td>3</td>
<td>Creative project that will be written up, and presented, as a Senior Thesis as required for an Honors Plan. <em>(Sp)</em></td>
</tr>
<tr>
<td>MHR 5350</td>
<td>Contemporary Manufacturing</td>
<td>3</td>
<td>Examines contemporary principles, techniques, and research findings of high-performance manufacturing. Analysis of leading models of management and continuous improvement, based upon best company practices, particularly lean, just-in-time manufacturing. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. <em>(F)</em></td>
</tr>
<tr>
<td>MHR 5640</td>
<td>Selected Topics in Management and Human Resources</td>
<td>1-3*</td>
<td>Selected topics in management and/or human resources are pursued in depth. Topics and instructor may vary.</td>
</tr>
<tr>
<td>MHR 6010</td>
<td>Advanced Business Law</td>
<td>3</td>
<td>Detailed investigation of business law, including law of contracts, torts, property, secured transactions, commercial paper, and business organizations. Prerequisite: MHR 2050.</td>
</tr>
<tr>
<td>MHR 6050</td>
<td>Management Principles</td>
<td>1.5</td>
<td>Introduction of management principles for students entering a master’s degree program in the College of Business. Prerequisite: Acceptance into a College of Business master’s degree program. <em>(Su)</em></td>
</tr>
</tbody>
</table>

<td>Examines contemporary principles, techniques, and research findings of high-performance manufacturing. Analysis of leading models of management and continuous improvement, based upon best company practices, particularly lean, just-in-time manufacturing. (F)</td>
</tr>
<tr>
<td>MHR 6370</td>
<td>Project Management</td>
<td>3</td>
<td>Teaches concepts of project management, while intensively involving students in production and operations related projects. Requires integrative organizational and industry research and a professional report.¹</td>
</tr>
<tr>
<td>MHR 6410</td>
<td>New Venture Creation</td>
<td>3</td>
<td>Focuses on development of new ventures, including entrepreneurial competencies, venture teams, recognizing business opportunities, gathering resources, new venture finance, entry strategies, legal structure, licensing and regulatory requirements, patents, copyrights, and product liability.¹</td>
</tr>
<tr>
<td>MHR 6430</td>
<td>New Venture Growth and Expansion</td>
<td>3</td>
<td>Analyzes the growth phase of business development. Topics include organizational competencies and systems, growth strategies, growth finance and staging, cash-flow, franchising, estate and family business issues, harvest strategies including buyouts and public offerings, and employment law for small employers.¹</td>
</tr>
<tr>
<td>MHR 6470</td>
<td>Entrepreneurship Project</td>
<td>3</td>
<td>Teaches concepts of project management, while intensively involving students in entrepreneurship-related projects such as initiating a start-up or consulting with management of an emerging business. Requires integrative organizational and industry research and a professional report.¹</td>

<td>Managing Individuals and Groups</td>
<td>3</td>
<td>Focuses on development of interpersonal and team skills. Includes development of organizational systems supporting effective use of human resources, including performance management, motivation, selection, training, rewards, and career development. (F)</td>
</tr>
<tr>
<td>MHR 6510</td>
<td>Performance Management</td>
<td>1-3</td>
<td>Introduces Human Resource Management, and then undertakes an in-depth analysis of performance management process, including job analysis, choice of raters, performance feedback, employee motivation and discipline, and training for improvement of individual performance. (F)²</td>
</tr>
<tr>
<td>MHR 6550</td>
<td>Human Resource Planning and Staffing</td>
<td>3</td>
<td>Focuses upon creation of competitive advantage through strategic human resources planning and staffing. Topics include job analysis, preparing candidate specifications, recruitment, assessment, and placement. Also covers pertinent laws/regulations and applicable descriptive/inferential statistics. (F)</td>
</tr>
<tr>
<td>MHR 6620</td>
<td>Training and Organizational Development</td>
<td>3</td>
<td>Provides advanced treatment of employee, management, and organizational development. Specific topics include: historical background, needs assessment, program design and implementation, outcomes evaluation, and how individuals and organizations change. (Sp)</td>
</tr>
<tr>
<td>MHR 6630</td>
<td>Compensation and Benefits</td>
<td>3</td>
<td>Strategic analysis of compensation and benefits policies and programs. Includes job evaluation systems, job pricing, wage and salary surveys, statistical methods used in compensation, group and individual pay for performance, executive compensation, and employee benefits. (Sp)</td>
</tr>
<tr>
<td>MHR 6640</td>
<td>Selected Topics in Management (dual listing 5640) and Human Resources</td>
<td>1-3°</td>
<td>Selected topics in management and/or human resources are pursued in depth. Topics and instructor may vary.¹</td>
</tr>
<tr>
<td>MHR 6650</td>
<td>Team and Interpersonal Effectiveness</td>
<td>3</td>
<td>Experiential course designed to develop team effectiveness, and specific managerial and leadership skills contributing to interpersonal competence and effectiveness in work groups and organizations. (F)</td>
</tr>
<tr>
<td>MHR 6670</td>
<td>Employee Relations and the Labor Movement</td>
<td>3</td>
<td>Comprehensive survey of union-management relationships, including labor markets and the labor movement, labor history and law, union organization and government, and contract negotiation and administration. Includes exercises and cases in negotiations and grievance processes. (Sp)</td>
</tr>
<tr>
<td>MHR 6680</td>
<td>Human Capital Management</td>
<td>3</td>
<td>Introduction to human capital management practices. Specific objectives include developing a working understanding of the links between HRM and firm outcomes, gaining a working knowledge of HR database technologies, and achieving an ability to develop and use fundamental HR costing techniques.¹</td>
</tr>
<tr>
<td>MHR 6690</td>
<td>Resource Strategy</td>
<td>3</td>
<td>Capstone course in Human Resource Management, designed to integrate concepts learned in specialized courses to the management of a total Human Resource function, with integration from both strategic and tactical perspectives. Covers domestic and international issues, as well as organizational change and development. (F)</td>
</tr>
<tr>
<td>MHR 6760</td>
<td>Employment Law</td>
<td>3</td>
<td>Examines laws related to employment, labor relations, civil rights, compensation, safety, health, and retirement. Provides experience in dispute resolution techniques in a nonunion employment setting, including negotiation, mediation, and arbitration. (F)</td>
</tr>
<tr>
<td>MHR 6770</td>
<td>Ethics for the Business Professional</td>
<td>1.5</td>
<td>Taking a stakeholder perspective on business, this course introduces students to several moral and ethical frameworks. Current case analyses and experiential activities allow students to confront ethical dilemmas and work through acceptable alternatives. (F)</td>
</tr>
<tr>
<td>MHR 6890</td>
<td>Global Business Strategy</td>
<td>3</td>
<td>Integrative capstone course, taking a CEO's perspective, addressing global competitiveness, strategic assessment, policy development, and strategy execution. Must be taken at end of advanced MBA program. (Su)</td>
</tr>
<tr>
<td>MHR 6900</td>
<td>Independent Research and Readings</td>
<td>1-3°</td>
<td>Provides opportunity for students to pursue special interests under tutelage of the faculty. Prerequisite: Approval of faculty member and department head. (Sp,Sp)</td>
</tr>
<tr>
<td>MHR 6960</td>
<td>Professional Paper</td>
<td>3</td>
<td>Preparation of paper of professional quality, designed to demonstrate ability to complete a major project and effectively present the results.</td>
</tr>
<tr>
<td>MHR 6970</td>
<td>Thesis</td>
<td>1-4°</td>
<td>Designed for students preparing a master's degree thesis. (F,Sp,Su)</td>
</tr>
<tr>
<td>MHR 6990</td>
<td>Continuing Graduate Advisement</td>
<td>1-3°</td>
<td>(F,Sp,Su)</td>

¹This course will be taught as needed. For information about availability, check with Management and Human Resources Department.

²Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

³This course is also offered by online correspondence and/or CD through Continuing Education Time Enhanced Learning.
Course Descriptions

Military Science (MS)
See Department of Military Science, pages 407-408.

Basic Course

MS 1010  Introduction to Leadership  2  
Establishes a foundation for self and team development through participation in adventure training and team-building activities. Among the subjects presented are: land navigation, leader behavior and unit effectiveness, and effective time management. A two-hour weekly leadership lab is required, as well as one weekend field training exercise. (F,Sp,Su)

MS 1020  Leadership Skills  2  
Emphasizes self and team development through participation in classroom and leadership lab. Subject matter includes small unit operations, branches of the Army, troop leading procedures, communications skills, and the organization of company-sized Army units. A two-hour weekly leadership lab is required, as well as one weekend field training exercise. (F,Sp,Su)

MS 2010  Leadership Development  2  
Builds on previous leadership instruction, enhancing student skills in land navigation, small unit tactics, written and oral communication, event planning, group coordination and effectiveness, and first aid. During this course, students develop basic skills for leading others in a tactical environment. A two-hour weekly leadership lab is required, as well as one weekend field training exercise. (F,Sp,Su)

MS 2020  Small Unit Leadership  2  
Focuses on leader effectiveness. Analyzes selected historical leaders and battles, using the principles of war and other tenets. Student-led discussions highlight lessons learned relative to leadership and organizational success. Oral communication skills are central to this course. A two-hour weekly leadership lab is required, as well as one weekend field training exercise. (F,Sp,Su)

MS 2400  Physical Readiness  1  
Physical conditioning course employing U.S. Army principles of fitness. Subjects include: body composition, nutrition, cardiorespiratory fitness, muscle endurance and strength, circuit training, and drills. (F,Sp,Su)

MS 2420  Ranger Preparation  2  
Participation in Army ROTC Ranger Challenge program. Advanced military training with practical application of skills taught in MS 1010 and 4020. (F,Sp)

MS 2430  Air Assault  2  
Two-week course conducted at an Army installation in the continental U.S. Provides students with training in helicopter operations, including sling loading and rappelling. Prerequisite: Instructor’s approval. (F,Su)

MS 2440  Airborne Operations  2  
Three-week course conducted at Fort Benning, Georgia. Provides students with training in military skydiving techniques with practical application. Prerequisite: Instructor’s approval. (F,Su)

MS 2510  ROTC Basic Camp  1-6  
Five-week leadership camp conducted at Fort Knox, Kentucky. Designed to introduce students to basic military skills and leadership without incurring a military obligation. Training includes rappelling, marksmanship, small unit tactics, physical fitness, and leadership. Open only to students who have not completed MS 1010, 1020, 2010, and 2020. Graduates are qualified for Advanced Course entry into ROTC. Prerequisites: Must pass physical exam and must obtain instructor’s approval. (F,Su)

Advanced Course

MS 3010  Organizational Leadership and Small Unit Tactics  3  
Develops leadership skills within the framework of the U.S. Army. Focuses on theory and application of decision making, planning, organizing, management control, and communications. Also emphasizes small unit tactics and advanced land navigation skills. A two-hour weekly leadership lab is required, as well as one weekend field training exercise. (F,Sp,Su)

MS 3020  Advanced Tactics and Operations  3  
Focuses on theory and application of small unit tactics, leadership, and land warfare. Subjects include preparing and issuing combat orders, organizing for combat, unit and individual movement techniques, communications, and security. A two-hour weekly leadership lab is required, as well as one weekend field training exercise. (F,Sp,Su)

MS 3110  Staff Organization and Operations  1-3  
Special project staff work for joint Army/Air Force campus ceremonies, leadership labs, field training exercises, and training camps. (F,Sp,Su)

MS 3210  Independent Study  1-3  
Students select advanced topics of interest and arrange credit under program advisor supervision in areas related to military science. (F,Sp,Su)

MS 4010  Command and Staff Functions  3  
Addresses functions/roles of the commander/leader and the staff. Explores organizational planning and problem solving, written and oral communications, training management, and evaluation systems. A two-hour weekly leadership lab is required, as well as three one-hour physical fitness sessions per week and one weekend field training exercise. (F,Sp,Su)

MS 4020  Officer Perspectives  3  
Conference course addressing roles and responsibilities of junior Army officers. Examines environmental stewardship, threats to U.S. security, Army modernization initiatives, the military justice system, and the law of war. A two-hour weekly leadership lab is required, as well as three one-hour physical fitness sessions per week and one weekend field training exercise. (F,Sp,Su)

MS 4110  Advanced Staff Operations  1-3  
Special project staff work for joint Army/Air Force campus ceremonies, leadership labs, field training exercises, and training camps. Students in this course provide mentoring and guidance to students in MS 3110. Prerequisite: Instructor’s permission. (F,Sp,Su)

MS 4400  Advanced Physical Readiness  1  
Provides advanced instruction in physical fitness employing Army techniques and procedures. Students assist Military Science faculty in the planning/conduct of physical fitness training activities performed by lower-division students. Prerequisite: Instructor’s permission. (F,Sp)

MS 4510  ROTC Advanced Camp  1-10  
Five-week leadership camp conducted at Fort Lewis, Washington. Stresses small-unit leadership under varying and challenging conditions. Prerequisites: Successful completion of basic course requirements and instructor’s approval. (F,Sp,Su)

MS 4520  Cadet Troop Leadership Training  2  
Two-week course conducted at an Army installation in the continental U.S. or overseas. Provides firsthand experience in an Army unit. Students learn about military life and the duties of a lieutenant. Prerequisites: MS 3010, 3020, 4510, and instructor’s approval. (F,Sp,Su)

MS 4610  DHA Military History Seminar  1-3  
One-week course in which students travel to, research, and report on significant Civil War sites in the Eastern United States. Available to all students. Requires purchase of airfare and some meals. (F,Sp,Su)

Music Courses (MUSC)
See Department of Music, pages 409-426.

MUSC 1010  BCA Introduction to Music  3  
Nonteaching course to develop understanding and enjoyment of music. Through study of musical elements, as well as historical, cultural, and social influences, an awareness of the relationship between techniques and aesthetic values in world music can be developed. (F,Sp,Su)
MUSC 1100  BCA  Fundamentals of Music  3®
(formerly MUSC 1020 BCA)
In-depth look at the basic elements of music. Notes, rhythm, scales, intervals, key signatures, chords, cadences, and chord progressions. Includes basic ear training. (F,Sp)

MUSC 1110  Music Theory I  3
Fundamentals of music. Traditional diatonic harmony in four parts, using triads in root position, first inversion, and second inversion. Prerequisite: Knowledge of music notation. (F)

MUSC 1120  Music Theory II  3
Traditional harmony in four parts, using nonchord tones, seventh chords, and secondary dominant functions. Prerequisite: MUSC 1110. (Sp)

MUSC 1130  Aural Skills I  1
First in a four-semester sequence of aural skills (ear training) courses which develop the skills of sight singing, dictation, and the composite skill of critical listening. (F)

MUSC 1140  Aural Skills II  1
Second in a four-semester sequence of aural skills (ear training) courses which develop the skills of sight singing, dictation, and the composite skill of critical listening. Prerequisite: MUSC 1130. (Sp)

MUSC 1150  Beginning Group Piano  1
(formerly MUSC 1400)
Group piano instruction for nonmusic majors. (Sp)

MUSC 1160  Intermediate Group Piano  1
(formerly MUSC 1410)
Group piano instruction for nonmusic majors. (Sp)

MUSC 1170  Keyboard Harmony I  1
(formerly MUSC 1150)
Development of keyboard skills, in conjunction with MUSC 1110, for music majors and minors. (F)

MUSC 1180  Keyboard Harmony II  1
(formerly MUSC 1160)
Development of keyboard skills, in conjunction with MUSC 1120, for music majors and minors. Prerequisite: Completion of MUSC 1170 with a C- or better, or faculty authorization. (Sp)

MUSC 1310  Introduction to Music Therapy  2
Introduces students to the field of music therapy through lectures, readings, and experiential work. For music therapy majors only. (F)

MUSC 1320  Music Therapy Ensemble  1®
Intended for music therapy majors. Designed to help students increase their performance skills in the areas of accompanying, improvisation, and popular music styles. (F,Sp)

MUSC 1420  Pedagogy Practicum  3®
Provides piano students with actual teaching situations for the practical application of principles studied in piano pedagogy. Supervised training, presentation, and evaluation of lessons. (F,Sp)

MUSC 1430  Piano Pedagogy I  3
Designed to prepare qualified pianists to teach piano effectively and to acquaint them with new materials and techniques from the beginning to intermediate levels. (F)

MUSC 1440  Piano Pedagogy II  3
Designed to prepare qualified pianists to teach piano effectively and to acquaint them with new materials and techniques from the intermediate to early advanced levels. (Sp)

MUSC 1450  Group Organ  1®
Acquaints students with basic techniques of organ playing. Concentrates on hymn playing, and music for preludes and postludes. (F,Sp)

MUSC 1460 CI  Organ Literature I**  3
Examines the history of the organ, as well as composers and literature from the Romantic Period through the end of the Twentieth Century. (F)

MUSC 1470 CI  Organ Literature II**  3
Examines the history of the organ, as well as composers and literature from the Middle Ages through the Baroque Period. (Sp)

MUSC 1480 Individual Piano Instruction for Nonmusic Majors  1-2®
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private piano instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1490 Individual Organ Instruction for Nonmusic Majors  1-2®
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private organ instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1500  String Techniques I  1
Designed to give prospective music teachers a basic playing experience and theoretical understanding of the string instruments. (F,Sp)

MUSC 1520  Individual Viola Instruction for Nonmusic Majors  1-2®
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private viola instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1530  Individual Violin Instruction for Nonmusic Majors  1-2®
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private violin instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1540  Individual String Bass Instruction for Nonmusic Majors  1-2®
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private string bass instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1550  Beginning Group Guitar  1
Fundamentals of guitar; basic chords, note reading, tablature reading, and accompaniment styles, including strumming and fingerpicking. (F,Sp)

MUSC 1560  Intermediate Group Guitar  1
Intermediate-level strumming and fingerpicking techniques, barre chords, and solos written in standard notation and tablature will be presented. (F,Sp)

MUSC 1580  Individual Guitar Instruction for Nonmusic Majors  1-2®
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private guitar instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1600  Voice Techniques  1
Acquaints the nonvocal major with the vocal instrument; its mechanism, terminology, and techniques. (F,Sp)

MUSC 1610  Introduction to Musical Theatre  2
Survey course dealing with history, evolution, influence, practice, and production of the American Musical Theatre. (Sp)

MUSC 1620  Introduction to Opera  2
Survey course tracing history and style of opera from Peri and Caccini’s “Euridice” of 1594 to contemporary works of John Eaton and Phillip Glass. (F)

MUSC 1630  Individual Vocal Instruction for Nonmusic Majors  1-2®
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private vocal instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1700  Individual Flute Instruction for Nonmusic Majors  1-2®
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private flute instruction at any and all stages of advancement. (F,Sp,Su)
Course Descriptions

MUSC 1710  Individual Oboe Instruction for Nonmusic Majors  1-2
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private oboe instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1720  Individual Clarinet Instruction for Nonmusic Majors  1-2
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private clarinet instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1730  Individual Bassoon Instruction for Nonmusic Majors  1-2
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private bassoon instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1740  Individual Saxophone Instruction for Nonmusic Majors  1-2
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private saxophone instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1800  Percussion Techniques  1
Provides basic playing experience and theoretical understanding of percussion instruments. Designed for music majors. (F)

MUSC 1810  Individual Trumpet Instruction for Nonmusic Majors  1-2
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private trumpet instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1820  Individual Trombone Instruction for Nonmusic Majors  1-2
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private trombone instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1830  Individual French Horn Instruction for Nonmusic Majors  1-2
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private French horn instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1840  Individual Tuba/Euphonium Instruction for Nonmusic Majors  1-2
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private tuba/euphonium instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1850  Individual Percussion Instruction for Nonmusic Majors  1-2
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private percussion instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 2110  Music Theory III  3
Traditional chromatic harmony in four parts, using modulation, mode mixture, and neapolitan and augmented sixth chords. Prerequisites: MUSC 1110 and 1120. (F)

MUSC 2130  Aural Skills III (formerly MUSC 2150)  1
Third in a four-semester sequence of aural skills (ear training) courses which develop the skills of sight singing, dictation, and the composite skill of critical listening. Prerequisites: MUSC 1130 and 1140. (F)

MUSC 2140  Aural Skills IV (formerly MUSC 2160)  1
Fourth in a four-semester sequence of aural skills (ear training) courses which develop the skills of sight singing, dictation, and the composite skill of critical listening. Prerequisites: MUSC 1130, 1140, and 2130. (Sp)

MUSC 2170  Keyboard Harmony III  1
Development of keyboard skills, in conjunction with MUSC 2110, for music majors. Prerequisite: Completion of MUSC 1180 with a C- or better, or faculty authorization. (F)

MUSC 2180  Computer Applications in Music  2
Presents operational knowledge of computer hardware and music software. Students use M101 work station to learn music notation, sequencing, and other select applications. Enrollment limited to Music majors only. (F,Sp)

MUSC 2210  Instrumental Conducting Ensemble  1
Lab group for MUSC 4240. Music and nonmusic majors play major and secondary instruments in two concerts per semester. (F)

MUSC 2310  Introduction to Observational and Behavioral Methods in Music Therapy  2
Basic behavioral terminology and methods, including systematic observations and recording methods for use in music therapy. Students conduct observations in clinical settings in the community. (F)

MUSC 2320  Music Therapy Methods and Materials  2
Music interventions and techniques appropriate for a wide range of patient populations, including hospitalized children, older adults, and individuals with orthopedic handicaps. Prerequisites: MUSC 1310 and 2310. (Sp)

MUSC 2350  Conducting (formerly MUSC 3170)  2
Designed to provide students with basic conducting techniques. Prerequisites: MUSC 2110 and must be a premusic or music major. (F)

MUSC 2410  Individual Organ Instruction (Second Instrument) for Music Majors  1
Designed to give music majors private organ instruction at any and all stages of advancement. One credit given for 30-minute lessons. Must be a premusic major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 2420  Piano Literature I**  3
Acquaints pianists with the standard piano composers and keyboard literature from the 14th Century to the Classical Period. (F)

MUSC 2430  Piano Literature II**  3
Acquaints pianists with the standard piano composers and keyboard literature from the Classical Period to the Romantic Period. (Sp)

MUSC 2440  Piano Literature III*  3
Acquaints pianists with the standard piano composers and keyboard literature from the Romantic Period to Impressionism. (F)

MUSC 2450  Piano Literature IV*  3
Acquaints pianists with the standard piano composers and keyboard literature from the Impressionist Period to the present day. (Sp)

MUSC 2460  Individual Jazz Piano Instruction for Nonmusic Majors  1-2
Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private jazz piano instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 2470  Individual Jazz Piano Instruction (Second Instrument) for Music Majors  1
Designed to give music majors private jazz piano instruction at any and all stages of advancement. One credit given for 30-minute lessons. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 2490  Individual Piano Instruction (Second Instrument) for Music Majors  1
Designed to give music majors private piano instruction at any and all stages of advancement. One credit given for 30-minute lessons. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 2500  Individual String Bass Instruction for Nonmusic Majors  1-2
Designed to give music majors private string bass instruction at any and all stages of advancement. One credit given for 30-minute lessons. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

Course Descriptions

MUSC 2870  Individual French Horn Instruction (Second Instrument) for Music Majors  
Designed to give music majors private French horn instruction at any and all stages of advancement. One credit given for 30-minute lessons. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 2880  Individual Tuba/Euphonium Instruction (Second Instrument) for Music Majors  
Designed to give music majors private tuba/euphonium instruction at any and all stages of advancement. One credit given for 30-minute lessons. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 2890  Individual Percussion Instruction (Second Instrument) for Music Majors  
Designed to give music majors private percussion instruction at any and all stages of advancement. One credit given for 30-minute lessons. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 3010 DHA  Masterpieces of Music  
Acquaints students with great masterpieces of music representing all periods of music history. Examines lives and times of various composers. (F,Sp)

MUSC 3020 DHA  History of Jazz  
Designed to give students an understanding of the development of jazz, popular music, and contemporary idioms, and their contributions to music and culture. (Sp)

MUSC 3100  Motivation and Classroom Management Strategies in Secondary Classroom Music  
Provides experience in current materials, methods, and management of general music education program in secondary (grades 6-12) public schools. Designed for music education majors. (Sp)

MUSC 3110  Music History I: Origins through Baroque  
History and literature of early, Renaissance, and Baroque periods. Prerequisite: MUSC 2110. (Sp)

MUSC 3120  Music History II: Classical and Romantic Periods  
History and literature of the music of the classical and romantic periods. Prerequisite: MUSC 3110. (F)

MUSC 3130 CI  Music Theory IV  
Study of Twentieth Century tonal, atonal, and avante garde harmonies and compositional techniques. Prerequisites: MUSC 3110 and 3120. (Sp)

MUSC 3140  Musical Form and Analysis  
Study of imitative, cantus firmus, ostinato, and free contrapuntal procedures of Western music. Explores techniques of Sixteenth Century counterpoint. Also includes study of phrase and period structure, small part fonts, theme and variations, rondo and sonata forms, and vocal forms. Prerequisite: MUSC 2110. (Sp)

MUSC 3160  World Music  
Explores music traditions of non-Western cultures throughout the world. Prerequisites: MUSC 2110. (Sp)

MUSC 3180  Scoring and Arranging  
Theoretical and practical study of scoring for orchestral instruments in various combinations, ranging from small ensembles to full orchestra. Prerequisites: MUSC 2140 and 2180; or MUSC 3900; or permission of instructor. (F,Sp)

MUSC 3190  Music History III: Music of the Twentieth Century  
Explores historical and cultural context of important composers and works of the modern and postmodern eras, including the influence of non-Western musical traditions. (Sp)

MUSC 3220  Choral Methods and Materials  
Investigates factors relating to administration and teaching of choral music in middle and secondary schools. (F)

MUSC 3230  Choral Literature  
Survey of choral music from the Renaissance, Baroque, Classical, Romantic, and Twentieth Century suitable for middle and secondary school choirs. (Sp)

MUSC 3240  Instrumental Methods and Materials  
Examination of teaching methods and materials related to wind and percussion pedagogy. Study of literature, organization and administration, and teaching techniques. (Sp)

MUSC 3260  Elementary School Music  
Methods and materials in singing, rhythms, creating music, listening, using classroom instruments, fundamentals of music, and movement skills, with emphasis on contemporary approaches to music education. Recommended: MUSC 1010. Enrollment limited to students who have earned at least 45 credits and who have been accepted into one of the following majors: Pre-music, music education, music therapy, pre-early childhood education, pre-elementary education, early childhood education, special education, composite early childhood education/special education, composite early childhood education/elementary education, communicative disorders and deaf education, composite early childhood education/deaf education, elementary education, composite elementary education/special education, composite elementary education/early childhood education, or composite elementary education/deaf education. (F,Sp,Su)

MUSC 3310  Music Therapy and the Exceptional Child  
Effects of music on physical, social, cognitive, and communication skills of children with disabilities. (F)

MUSC 3320  Psychology of Music I**  
Psychological foundations of musical behavior, including psychoacoustics, rhythmic, melodic, and harmonic foundations; affective behaviors and music; musical preferences; functional music; musical ability; and music learning. (Sp)

MUSC 3330  Music Therapy Practicum  
Supervised practicum experience in a community setting with disabled adults, children, older adults, or individuals in a medical setting. Prerequisite: MUSC 2320. (F,Sp)

MUSC 3360  MIDI Studio Techniques  
Elements of synthesizer sound production and basic studio techniques. (Sp)

MUSC 3370  Sound Recording and Reinforcement Techniques  
Explores techniques of studio recording, including microphones, mixing, and signal processing. (Sp)

MUSC 3400  Individual Piano Instruction for Music Majors  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private piano instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 3410  Ensemble and Accompanying  
Accompanying vocal and instrumental works. Ensemble music for two pianos and four hands. Sight reading and repertoire development. Admission by audition only, with 16 students per section. (F,Sp)

MUSC 3420  Keyboard Skills I  
Study of sightreading, transposing, improvising, figured bass, scales, chords, and score rendering. (F)

MUSC 3430  Keyboard Skills II  
Continuation of MUSC 3420, with further study of sightreading, transposing, improvising, figured bass, scales, chords, and score reading. (Sp)

MUSC 3440  Individual Jazz Piano Instruction for Music Majors  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private jazz piano instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

Course Descriptions

**MUSC 4530** Individual Cello Instruction for Music Majors 1-2*  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private cello instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

**MUSC 4540** Individual String Bass Instruction for Music Majors 1-2*  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private string bass instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

**MUSC 4550** Acoustic Guitar Ensemble 1*  
Offers opportunity for guitarists to rehearse and perform intermediate and advanced music written for acoustic guitar. (F,Sp,Su)

**MUSC 4600** DHA University Chorale 1*  
Select mixed choir performing a wide range of choral literature. Admission by audition only. (F,Sp)

**MUSC 4610** National Standards Choir 1*  
Choral ensemble focusing on music education through choral performance. Explores methods for teaching music through performance to middle and high school students. Special attention paid to National Standards in Music. This course is not currently being offered. For information about when it may be offered, contact the department.

**MUSC 4620** Choral Conducting Practicum 1*  
Application of principles of choral music education in public school setting. Admission by audition only. (F,Sp)

**MUSC 4650** DHA Chamber Singers 1*  
Select small ensemble performing a wide range of choral literature. Admission by audition only. (F,Sp)

**MUSC 4700** DHA Wind Orchestra 1*  
Highly-selective group, performing important traditional and contemporary works from the wind band repertory. Entrance by audition only. (F,Sp)

**MUSC 4710** Jazz Combo 1-2*  
Study and performance of the finest literature for the small jazz ensemble. Prerequisites: Audition and permission of instructor. (F,Sp)

**MUSC 4720** Saxophone Quartet 1-2*  
Study and performance of the finest classical, jazz, and popular music for the saxophone quartet. Prerequisites: Audition and permission of instructor. (F,Sp)

**MUSC 4730** CI Directed Project in Instrumental Pedagogy 2*  
Acquaints students with curricular and business issues of private music teaching. Through written assignments, reviews of literature, and interviews with professionals, students develop strategies for setting up, marketing, and maintaining a private studio. (F,Sp,Su)

**MUSC 4900** Baroque Counterpoint 2  
Writing and analysis of tonal counterpoint in two, three, and four parts. Prerequisites: MUSC 1110, 1120, 2110, 3140. (F)

**MUSC 4910** Music Composition 2*  
Instruction in principles of music composition, and guidance in completing individual composition projects. Also, analysis of selected Twentieth Century masterworks. Prerequisites: MUSC 1110, 1120, 2110, 3140. (Sp)

**MUSC 4920** Individual Recital 1-6*  
Performance of pieces selected by the student and approved by the instructor, for performance in accordance with specific music area requirements. (F,Sp,Su)

**MUSC 4930** Readings and Conference 1-6*  
Undergraduate course designed to provide special interest study. (F,Sp,Su)

**MUSC 4940H** Senior Thesis 1-6*  
As partial fulfillment of Honors Program requirements, students design and complete a major paper/project. Examples of projects include performance, composition, and musical analysis. (F,Sp,Su)

**MUSC 6100** Graduate Performance Ensemble 1-2*  
Designed to give students opportunity for a high-level music experience in choral and instrumental performance ensembles. (F,Sp)

**MUSC 6110** Advanced Conducting 2  
Students master technical and musical skills of conducting high-level choirs on assigned choral selections while being critiqued by the assistant director. (F,Sp)

**MUSC 6120** Advanced Rehearsal Techniques 2  
Provides students with conducting experience within their major performance areas; i.e., chorale, band, orchestra. This is accomplished through observation of rehearsal techniques and procedures, and by conducting rehearsals at the instructor’s discretion. (F,Sp)

**MUSC 6130** Seminar in Music: Philosophy, Aesthetics, and Trends 2  
Study of philosophical bases for human responses to music and resulting musical behaviors. (F,Su)

**MUSC 6160** Practicum in Choral Performance 1-4*  
Provides the graduate student with insight into advanced choral techniques and methods of preparing choirs for performance by rehearsing one of the University choirs on assigned choral selections while being critiqued by the assistant director. (F,Sp)

**MUSC 6600** DHA University Chorale 1*  
Select mixed choir performing a wide range of choral literature. Admission by audition only. (F,Sp)

**MUSC 6620** Seminar in Choral Literature 2  
Designed to study and internalize principal forms of choral music through discussion of historical evolution and stylistic characteristics of the periods of music. Embraces significant choral functions of every style period. (Sp,Su)

**MUSC 6630** Individual Instruction for Graduates 1-2*  
Instructs graduate students in private instruction at any and all stages of advancement. Prerequisite: Instructor’s permission. (F,Sp)

**MUSC 6910** Individual Recital 1-3*  
Preparation and presentation of graduate recital, under supervision of major professor. (F,Sp,Su)

**MUSC 6920** Individual Recital 1-3*  
Preparation and presentation of graduate recital, under supervision of major professor. (F,Sp,Su)

**MUSC 6970** Research and Thesis 2-6*  
Individual work in thesis writing with guidance and criticism. (F,Sp,Su)

**NAV 3040** Navajo Literacy and Grammar for Native Speakers 3  
Designed to develop advanced skills in the grammar, comprehension, reading, and writing of Navajo. Integrates Diné holistic teaching concepts in accordance with the “Hózhóogo líná” four-direction Diné philosophy of learning paradigm. Prerequisite: Permission of instructor. (F)

**NAV 3050** Navajo Descriptive and Narrative Writing 3  
Prepares students to take the Navajo Language Proficiency Exam, and integrates holistic teachings in accordance with the “Hózhóogo líná” four-direction Diné philosophy of learning paradigm. Prerequisite: Permission of instructor. (F)
## Course Descriptions

### National Environmental Policy Act (NEPA)

**NEPA 6200**  
Introduction to National Environmental Policy Act (NEPA) and the Council on Environmental Quality regulations. Explores various levels of NEPA documentation and the skills necessary to identify the actions needed for a thorough environmental analysis.

**NEPA 6210**  
Teaches how to identify the writing and editing requirements unique to NEPA documents, including making graphics, writing chapters, and reviewing documents for accuracy.

**NEPA 6220**  
Focuses on how to review the full range of NEPA documents, including Environmental Impact Statements (EISs), Environmental Assessments (EAs), Findings of No Significant Impacts (FONSiS), and Records of Decisions (RODs).

**NEPA 6230**  
Explains meaning and application of risk communication. Explores full range of response communication, including development of a communication plan and strategy, standing before an audience, and responding to comments in writing.

**NEPA 6260**  
Teaches how to manage cultural and natural resources on public lands. Addresses pertinent laws and associated executive orders and regulations pertaining to the preservation of these resources and budget issues.

**NEPA 6270**  
Explores how environmental compliance is not only desirable and necessary, but is also a personal responsibility. Identifies key laws and regulations, with associated penalties affecting environmental compliance.

**NEPA 6280**  
Teaches general principles of interdisciplinary team building. Explores how information flows and how this can impact the success of a team. Students work as a team to apply the principles learned to scenarios of day-to-day actions.

**NEPA 6300**  
Provides a systematic approach to the writing and reviewing of environmental Statements of Works (SOWs). Provides hands-on experience, course includes case studies and examples applying to actual environmental projects.

**NEPA 6310**  
Designed to teach students how to use a “document management process” to become more efficient writers of NEPA documents.

**NEPA 6320**  
Explores cumulative impacts leading to sound cumulative impact analysis. Student assess various impact methodologies and learn to record cumulative impact information in ways that support clear, legally sufficient EAs/EISs.

**NEPA 6330**  
Trains students in NEPA conflict negotiation and management. Includes introduction to the nature of public conflict and management styles, along with environmental negotiation techniques.

**NEPA 6340**  
NEPA regulations require public participation on environmental documents. In this course, students learn how to establish a comprehensive database of respondents and a systematic method of sending and receiving documents. They also learn how to establish a coding structure reflecting demographic categories and subcategories. Since this course is not currently required for the Certificate Program in National Environmental Policy Act (NEPA), it may not be offered in the foreseeable future. For further information, contact the director of the NEPA Certificate Program.

**NEPA 6350**  
Provides students with necessary tools (templates, checklists, and materials) and knowledge (including data analysis) for conducting an effective socio-economic impact analysis, as required by NEPA and CEQ regulations.

**NEPA 6360**  

**NEPA 6370**  
Consists of a project, internship, or comprehensive examination to be negotiated by the student, based upon opportunities available at the time and preferences of the student. Helps USU to certify that students receiving the certificate have basic mastery of the material presented in the program coursework.

### Nutrition and Food Sciences (NFS)

See Department of Nutrition and Food Sciences, pages 436-446.

**NFS 1000**  
Weekly seminars present and discuss current issues in food, diet, and health. Presentations about topics and research in food and nutrition, with orientation to programs in the Department of Nutrition and Food Sciences. (F)

**NFS 1020 BLS Science and Application of Human Nutrition**  
Role of dietary choices in providing nutrients and their relationship to the social, mental, and physical well-being of people. How to evaluate nutritional status with personal data using computer diet analysis program. (F,Sp,Su)

**NFS 1050**  
Food Safety Manager Certification  
Covers food safety information required by the Utah Food Safety Manager Certification Act. Includes role of food handlers in controlling food-borne disease, time-temperature, employee hygiene, sanitation methods, preventing contamination from time of purchase to time of serving, food service facilities/ equipment, and HACCP. (F,Sp,Su)

**NFS 1240**  
Culinary Basics  
Develops fundamental skills specific to culinary arts. Investigates principles of ingredients and preparation methods. Practice provided in knife skills and cooking methods. Explores the effects of cooking on food quality. Enrollment limited to Nutrition and Food Sciences majors, Family and Consumer Sciences majors, and Family and Consumer Sciences Education majors only. (F,Sp,Su)

**NFS 1250**  
Sanitation and Safety  
Principles of sanitation and safety applied to food operations. Emphasizes personal hygiene habits and food handling practices that protect the health and safety of employees and consumers. (Sp)

**NFS 2020**  
Nutrition Throughout the Life Cycle  
Application of nutrition principles to the human life cycle: nutrient functions, needs, sources, and alterations during pregnancy, lactation, growth, development, maturation, and aging. Prerequisite: NFS 1020. (Sp)

<tbody>
<tr>
<td>NFS 2030</td>
<td>Catering</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Provides skills and knowledge needed for preparing food. Analysis of the preparation of food and beverages for banquet and catering functions. Prerequisites: NFS 1240 and 1250. Offered Fall 2006 only. Will not be offered at Logan campus after Fall 2006. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 2040</td>
<td>Introduction to Biotechnology</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Introduces freshmen to the emerging field of biotechnology and the impact this technology has on society. Also taught as ADVS 2040, BIOL 2040, and PSB 2040. (Sp)</td>
<td></td>
</tr>
<tr>
<td>NFS 2050</td>
<td>Ala Carte</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Provides skills and knowledge necessary to apply principles of basic food preparation and service in a restaurant setting. Prerequisites: NFS 1240, 1250, and 2030. Will not be offered after Spring 2007. (Sp)</td>
<td></td>
</tr>
<tr>
<td>NFS 3000</td>
<td>Beginning Baking</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Introduction to theories and techniques of baking. Focuses on yeast dough production and basic desserts. Prerequisites: NFS 1240, 2030, 2050. Will not be offered after Fall 2008. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 3020</td>
<td>Nutrition and Physical Performance</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Includes information on macro/micronutrient metabolism during exercise, specific problems experienced by athletes or highly active persons, myths, ergogenic aids, and current interests. Prerequisite: NFS 1020. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 3030</td>
<td>Advanced Baking</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Focuses on pastry, advanced dessert preparation and presentation, and related topics. Prerequisite: NFS 3000. Will not be offered after Spring 2009. (Sp)</td>
<td></td>
</tr>
<tr>
<td>NFS 3060</td>
<td>Garde-Manger</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Emphasizes cold food preparation, presentation techniques, food displays, and meat fabrication. Prerequisite: NFS 2050. Will not be offered after Fall 2007. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 3100</td>
<td>Sensory Evaluation of Food</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Design and implementation of sensory testing of foods. Emphasizes physiology of senses, testing methods, statistical analysis, and taste panel experience. Prerequisite: STAT 3000. (Sp)</td>
<td></td>
</tr>
<tr>
<td>NFS 3110</td>
<td>DSC Food, Technology, and Health</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Impact of food technology on food spoilage, food preservation, food quality, and foodborne diseases. Basic processing operations and regulations ensuring a safe food supply. Prerequisite: University Studies Breadth Life Sciences (BLS) course. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 3250</td>
<td>Occupational Experience in Nutrition and Food Sciences</td>
<td>1-3</td>
</tr>
<tr>
<td></td>
<td>On-the-job training. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>NFS 3500</td>
<td>Beverage Management</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Studies in selection and service of beverages for the food service industry. Issues addressed include equipping, staffing, operating, marketing, and purchasing beverages. Addresses issues of responsible alcohol service. Will not be offered after Fall 2008. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 3510</td>
<td>The Business of Feeding</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers menu design, procurement, and starting the business. Will not be offered after Spring 2006. (Sp)</td>
<td></td>
</tr>
<tr>
<td>NFS 3600</td>
<td>Medical Terminology for Health Care Professionals</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Internet-based course teaches medical terminology by focusing on medical word-building rules, prefixes, suffixes, and whole-body terminology related to human body systems. Also includes coverage of anatomy, pathological conditions, and diagnostic treatments and procedures. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>NFS 4020</td>
<td>Advanced Nutrition</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Structures, properties, and metabolism of protein, lipids, carbohydrates, vitamins, and minerals. Includes digestion, absorption, hormonal control, cellular biochemistry, metabolic interrelationships, excretion, etc. Prerequisites: NFS 1020, CHEM 3700, BIOL 2420. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 4030</td>
<td>Advanced Nutrition Applications</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Applications of metabolism of protein, lipids, carbohydrates, vitamins, and minerals. Must be taken concurrently with NFS 4020. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 4040</td>
<td>Dairy Foods</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Explores manufacture of various dairy foods, including pasteurized milk, UHT milk, cream, cheddar cheese, cottage cheese, process cheese, yogurt, butter, and milk and whey powders. Three lectures and one lab. Prerequisite: Enrollment in a major within the Animal, Dairy and Veterinary Sciences Department. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 4050</td>
<td>CI Education and Counseling Methods in Dietetics I</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Principles of education, counseling, and communication as applied to the field of nutrition education and clinical dietetics practice. Prerequisite: Junior level in Coordinated or Didactic Program in Dietetics. Corequisite: NFS 4550. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 4060</td>
<td>CI Education and Counseling Methods in Dietetics II</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Continuation of NFS 4050. Prerequisite: NFS 4050. Corequisite: NFS 4560. (Sp)</td>
<td></td>
</tr>
<tr>
<td>NFS 4070</td>
<td>Experimental Foods</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Science principles underlying modern food theory and practice. Relation of physical and chemical properties of food components and their systems to food preparation. Prerequisite: CHEM 1120 or 2300 or 2310. (Sp)</td>
<td></td>
</tr>
<tr>
<td>NFS 4250</td>
<td>Culinary Skills and Management Rotation</td>
<td>3-9</td>
</tr>
<tr>
<td></td>
<td>Internship experience in various food service settings. Specific locations and durations to be arranged by instructor. Prerequisite: Junior standing. Will not be offered after Summer 2009. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>NFS 4420</td>
<td>QI Nutrition Research Methodology</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Development of experimental design, data collection, statistical analysis, interpretation, and presentation of results. Clinical, community, and management data analysis. Interpretation and presentation, including bench marking, cost/benefit analysis, and continuous quality improvement projects. Enrollment limited to seniors within the Coordinated Program in Dietetics (CPD) or Didactic Program in Dietetics (DPD). Prerequisites: STAT 1040, MATH 1050. (Sp)</td>
<td></td>
</tr>
<tr>
<td>NFS 4440</td>
<td>QI Fundamentals of Food Engineering</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Engineering concepts taught in a fundamental sense and applied to food processing. Concepts include: general problem solving techniques, material and energy balances, fluid dynamics, heat transfer, refrigeration, and kinetics of common biological processes used in food preparation. Prerequisite: PHYS 2110. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 4480</td>
<td>Community Nutrition</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Introduction to public health nutrition, food programs, and national nutrition monitoring. Prerequisite: NFS 1020. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 4550</td>
<td>Nutrition Assessment/Clinical Nutrition</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Introduction to the profession of dietetics, assessment of nutrition status, and nutrition care planning. Pathophysiology of disease states and applied medical nutrition therapy. Prerequisite: CHEM 3700. Enrollment restricted to Nutrition and Food Sciences majors only. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 4560</td>
<td>CI Clinical Nutrition II</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Continuation of NFS 4550. Prerequisite: NFS 4550. (Sp)</td>
<td></td>
</tr>
<tr>
<td>NFS 4570</td>
<td>Clinical Nutrition Experience I</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Practical experience in health care facilities. Integration and application of material learned in NFS 4550. Corequisite: NFS 4550. Prerequisite: Acceptance into Coordinated Program in Dietetics. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 4580</td>
<td>Clinical Nutrition Experience II</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Continuation of NFS 4570. Corequisite: NFS 4560. Prerequisite: NFS 4570. (Sp)</td>
<td></td>
</tr>
<tr>
<td>NFS 4660</td>
<td>CI Medical Dietetics</td>
<td>12</td>
</tr>
<tr>
<td></td>
<td>In-depth study of nutrition relationships in disease development and treatment with clinical experience in medical facilities in Salt Lake City. Prerequisites: NFS 4550, 4560, 4570, 4580. (F)</td>
<td></td>
</tr>
<tr>
<td>NFS 4710</td>
<td>Quantity Food Preparation</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Principles of food preparation applied to large quantity production, menu planning, food selection, storage, and equipment. Prerequisite: NFS 4070 or consent of instructor. (F)</td>
<td></td>
</tr>
</tbody>
</table>
### Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Description</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>NFS 4720</td>
<td>Food Service Organization and Management</td>
<td>Principles of organization, management theory, financial controls, human and labor relations, employee training, layout, and sanitation. Prerequisite: NFS 4710.</td>
<td>2</td>
</tr>
<tr>
<td>NFS 4730</td>
<td>Quantity Food Preparation Lab</td>
<td>Practical experience in quantity food preparation. Integration and application of NFS 4710. Corequisite: NFS 4710. Prerequisites: NFS 1240 and acceptance into Coordinated Program in Dietetics.</td>
<td>2</td>
</tr>
<tr>
<td>NFS 4740</td>
<td>Food Service Organization and Management Lab</td>
<td>Practical experience in food service management. Integration and application of NFS 4720. Prerequisite: NFS 4730. Corequisite: NFS 4720.</td>
<td>2</td>
</tr>
<tr>
<td>NFS 4750</td>
<td>Management of Dietetics</td>
<td>Principles of management in dietetics and current practice issues. Prerequisite: Must be enrolled in final year in Coordinated Program in Dietetics (CPD) or Didactic Program in Dietetics (DPD).</td>
<td>3</td>
</tr>
<tr>
<td>NFS 4780</td>
<td>Maternal and Child Nutrition</td>
<td>Normal and clinical nutritional requirements in pregnancy, lactation, and pediatrics. To be taken in Salt Lake City in conjunction with NFS 4660 or by Didactic Program in Dietetics (DPD) students in their final year.</td>
<td>3-4</td>
</tr>
<tr>
<td>NFS 4810</td>
<td>History and Practices in World Cuisines</td>
<td>Preparation of foods from around the world, incorporating historical and current food trends. Prerequisites: NFS 3030 and 3060. Will be offered Spring 2007 and Spring 2009. Will not be offered after Spring 2009.</td>
<td>4</td>
</tr>
<tr>
<td>NFS 4900</td>
<td>Special Problems</td>
<td>Individual problems and research problems in Nutrition and Food Sciences.</td>
<td>1-4</td>
</tr>
<tr>
<td>NFS 4990</td>
<td>Nutrition and Food Sciences Seminar</td>
<td>Senior student paper and presentation on current topics in nutrition and food sciences. Prerequisite: Senior in NFS.</td>
<td>1</td>
</tr>
<tr>
<td>NFS 5020</td>
<td>Meat Technology and Processing</td>
<td>Emphasizes understanding the conversion of muscle to meat, fabrication of carcasses into primal and retail cuts, and principles underlying manufacture of processed meats.</td>
<td>4</td>
</tr>
<tr>
<td>NFS 5030</td>
<td>Dairy Technology and Processing</td>
<td>Processing milk into fluid milk products, cheeses, ice cream, yogurt, concentrated milks, and powders. Identity standards of regulated dairy products. Physical, chemical, and biochemical changes that occur during manufacture and storage. Microbiological, chemical, and physical deterioration and control.</td>
<td>4</td>
</tr>
<tr>
<td>NFS 5110</td>
<td>Food Microbiology</td>
<td>Microorganisms in food spoilage, poisoning, preservation, and sanitation. Prerequisite: BIOL 3300.</td>
<td>4</td>
</tr>
<tr>
<td>NFS 5120</td>
<td>Biologic Markers of Diet and Disease Risk Lab</td>
<td>Measurement and interpretation of biologic markers of nutritional status and disease risk. Markers measured in a variety of human tissues. Prerequisites: NFS 1020, BIOL 2420, CHEM 3700, MATH 1210, and STAT 2000.</td>
<td>2</td>
</tr>
<tr>
<td>NFS 5160</td>
<td>Methods in Biotechnology: Cell Culture</td>
<td>Techniques and fundamental knowledge for culturing mammalian and insect cells. Students will learn maintenance, growing, genetic engineering of cells, cytotoxicity, hybridoma creation, cloning, etc. Extensive laboratory experience is provided. Also taught as ADVS 5160, BIOL 5160, and PSB 5160.</td>
<td>3</td>
</tr>
<tr>
<td>NFS 5200</td>
<td>Nutritional Epidemiology</td>
<td>Introduction to epidemiologic methods and their application to the study of nutrition, human health, and disease. Useful for students with career interests in nutrition, food sciences, dietetics, human health sciences, veterinary sciences, biology, public health, anthropology, social work, and public policy. Prerequisites: STAT 1040, NFS 1020.</td>
<td>2</td>
</tr>
<tr>
<td>NFS 5210</td>
<td>Advanced Public Health Nutrition (dual listing 6210)</td>
<td>Effects of diet on development and prevention of disease. Conditions of public health significance, including birth defects, coronary heart disease, hypertension, stroke, Alzheimer's disease and other causes of dementia, cancer, osteoporosis, diabetes, and international health problems. Discussion of health concerns of minority populations, cross-cultural studies, government policy, and establishment of dietary recommendations. Prerequisites: STAT 1040 or higher, CHEM 3700 or higher.</td>
<td>2</td>
</tr>
<tr>
<td>NFS 5220</td>
<td>Endocrine Aspects of Nutrition (dual listing 6220)</td>
<td>Provides physiological background into hormones involved in nutrient regulation, as well as mechanisms of hormone action at the cellular and molecular levels. Includes action of steroids in the nucleus and membrane-based signal transduction pathways. Course includes lectures and literature reviews/presentations. Prerequisite: CHEM 3700 or permission of instructor. Also taught as ADVS 5220/6220 and BIOL 5220/6220.</td>
<td>2</td>
</tr>
<tr>
<td>NFS 5240</td>
<td>Methods in Biotechnology: Protein Purification Techniques</td>
<td>Reviews basic methods of protein purification, including scaled-up use of 100L fermenter, large-scale centrifugation, diafiltration, chromatography, and use of BioCAD. Prerequisite: CHEM 3700. Also taught as ADVS 5240, BIOL 5240, and PSB 5240.</td>
<td>3</td>
</tr>
<tr>
<td>NFS 5250</td>
<td>Occupational Experiences in Nutrition and Food Sciences</td>
<td>On-the-job training.</td>
<td>1-3</td>
</tr>
<tr>
<td>NFS 5260</td>
<td>Methods in Biotechnology: Molecular Cloning</td>
<td>Laboratory-oriented course designed to teach molecular biology techniques such as DNA cloning, genetic probes, polymerase chain reaction, and DNA sequencing. Prerequisite: CHEM 3700 or 5510, or BIOL 3060; or permission of instructor. Also taught as ADVS 5260, BIOL 5260, and PSB 5260.</td>
<td>3</td>
</tr>
<tr>
<td>NFS 5300</td>
<td>Advanced Micronutrient Nutrition (dual listing 6300)</td>
<td>Explores the function, interaction, and practical significance of micronutrients in human metabolism and the ability of the diet to meet these needs. Relates nutrient biochemical functions to specific deficiency symptoms. Prerequisite: NFS 4020.</td>
<td>3</td>
</tr>
<tr>
<td>NFS 5370</td>
<td>Molecular Methods in Nutrition Science (dual listing 6370)</td>
<td>Theory of modern techniques used to study macromolecules and ions. Prerequisite: CHEM 3700. Also taught as ADVS/BIOL/PSB 5370/6370.</td>
<td>2</td>
</tr>
<tr>
<td>NFS 5400</td>
<td>Nutrition Update: Present Knowledge ** (dual listing 6400)</td>
<td>Enriches and updates knowledge of nutrition, as well as implications for well-being of people, through presentation of recent advances in nutrition accomplished by worldwide research efforts of scientists from academia, government, and industry. Available only through Continuing Education Independent Study Division.</td>
<td>2</td>
</tr>
<tr>
<td>NFS 5500</td>
<td>Food Analysis (dual listing 6500)</td>
<td>Application and theory of physical, chemical, and instrumental techniques for determination of composition and quality of food. Prerequisite: NFS 5560/6560.</td>
<td>4</td>
</tr>
<tr>
<td>NFS 5600</td>
<td>Food Laws and Regulations (dual listing 6600)</td>
<td>Provides background of federal/state laws and regulations and case law history affecting food production, processing, packaging, marketing, and distribution of food products.</td>
<td>4</td>
</tr>
<tr>
<td>NFS 5560</td>
<td>Food Chemistry</td>
<td>Chemical structure, properties, and reactions and interactions of the important chemical constituents of food. Prerequisites: CHEM 3700 and 3710.</td>
<td>4</td>

</tbody>
</table>
Course Descriptions

Basic unit operations in the bioprocessing industry. Prerequisite: BIE 3200. Also taught as BIE 6610/5610. (F)

NFS 6620 Microbiology of Fermented Dairy Foods** 1
Explores the microbiology and physiology of dairy starter and nonstarter bacteria. Particular emphasis placed on important metabolic functions and biochemical pathways used by these microorganisms in food fermentations and their influence on product attributes. (Sp)

NFS 6640 Food Proteins** 1
Covers topics in protein structure, folding, functional properties, allergens, and purification. (F)

NFS 6650 Meat Science* 2
Structure of muscle tissue, chemistry of contraction and relaxation, factors affecting meat tenderness, and postmortem changes and their effect on meat quality. Prerequisite: CHEM 3700. (Su)

NFS 6660 Cheese Science** 2
Studies application of chemistry and microbiology to the manufacture of cheese. (Su)

NFS 6670 Food Biosecurity and Crisis Management*
Food biosecurity addresses the intentional contamination of a food product. Crisis management focuses on how a food company deals with a crisis situation; including product recalls, dealing with the media, and damage control. (F)

NFS 6680 Food Enzymes** 2
Covers topics in food enzymes, including enzyme classification and nomenclature, reaction kinetics, food applications, and immobilization technology. (F)

NFS 6690 Genetics of Lactic Acid Bacteria** 1
Describes structural and functional characteristics of four major genetic elements described in lactic acid bacteria: plasmid DNA, transposable elements, bacteriophages, and the chromosome. (Sp)

NFS 6700 Dairy Chemistry*
Students gain an understanding of the chemical structure, properties, biosynthesis, and reactions of the main constituents in milk. Students apply this knowledge to the development and processing of dairy foods. (Sp)

NFS 6720 Metabolomics*
Metabolomics is the study of all metabolites within a biological sample. The "metabolome" results from genetics and environment, and is the best descriptor of phenotype. The promise of metabolomics is a molecular understanding of the effect of diet on health. (F)

NFS 6730 Understanding Crystallization in Food Systems*
Introduces basic concepts of crystallization mechanisms, including theories governing the crystallization process and their applications in food systems. Emphasizes the importance of controlling crystallization and its influence on final product quality and stability. (Sp)

NFS 6740 Waste and Energy Management*
Explores energy and waste management, including waste treatment methods and ways to reduce energy, or substitute with less-costly energy, in the food processing industry. Students learn through lectures, cooperative learning, site visits, and example problems. (F)

NFS 6750 Advanced Dietetics Practicum 1-6
(dual listing 5750)
Advanced dietetics practicum in clinical nutrition, community nutrition, food service management, or research. Prerequisite: Must be enrolled in final year in Coordinated Program in Dietetics (CPD) or Didactic Program in Dietetics (DPD). (F,Sp,Su)

NFS 6760 Special Topics in Nutrition and Food Science 1-3
Selected topics in nutrition and food science, based on individual faculty interests. (F,Sp,Su)

NFS 6780 Advanced Institutional Food Service Management 3
Principles of management applied to institutional food services and advanced professional certification curriculum. To enroll, student must be an MS candidate in dietetics or be eligible to take the national SFNS (School Food and Nutrition Service) exam. (Sp)

NFS 6800 Molecular and Cellular Nutrition** 1
Seminar course focusing on literature covering bioactive food components and nutrient action in transcriptional regulation. (F)

NFS 6810 Nutrigenomics*
Examination and discussion of how our unique genetic makeup affects the way we respond to our nutritional environment and how that impacts health and risk of disease. Also includes discussion of ethical and social issues related to nutritional genomics research. (Sp)

NFS 6820 Biomedical Aspects of Nutrition/Human Diseases Interaction** 1
Study of the role nutrition plays in human disease development, prevention, and treatment. Highlights common and challenging nutrition issues in human diseases through understanding of human nutrition and pathophysiology of diseases. (Sp)

NFS 6900 Special Problems 1-4
Individual problems and research problems for upper-division students in Nutrition and Food Sciences. (F,Sp,Su)

NFS 6910 Teaching Experiences in Nutrition and Food Sciences 1-2
Students work with faculty in the Nutrition and Food Sciences department to gain experience in teaching. (F,Sp,Su)

NFS 6970 Thesis Research 1-12
For students working on MS research. (F,Sp,Su)

NFS 6990 Continuing Graduate Advisement 1-12
(F,Sp,Su)

NFS 7800 Seminar 1
Reports and discussion on research and current literature. (F,Sp)

NFS 7970 Dissertation Research 1-12
For students working on PhD research. (F,Sp,Su)

NFS 7990 Continuing Graduate Advisement 1-12
(F,Sp,Su)

Natural Resources (NR)

See College of Natural Resources, pages 126-128.

NR 1010 BSS Humans and the Changing Global Environment 3
Introduction to historical nature and extent of human environmental transformation at global and regional levels. Examination of how socio-economic, political, and scientific factors influence past and current perceptions, use and conservation of natural environments in Western and other cultures, and future options available. (F,Sp)

NR 2220 General Ecology 3
Study of the interrelationships among organisms, humans, and their environments, addressing where and how organisms live. Adaptation, population growth, species interactions, biodiversity, and ecosystem function are explored for a wide variety of organisms and ecosystems. Prerequisites: BIOL 1610 and 1620. Also taught as BIOL 2220. (F,Sp)

Course Descriptions

Office Systems Support (OSS)

See Office Systems Support AAS Degree, pages 447-448.

OSS 1110  Keyboarding  2
(Formerly BIS 1110)
For students with no previous keyboarding experience. Designed so student can touch type and learn basic concepts related to word processing and document formatting.

OSS 1400  Microcomputer Applications  3
(Formerly BIS 1400)
Introduction to operating systems, word processing, Internet, graphics, database, and spreadsheet applications. Includes preparation for University Studies Computer and Information Literacy (CIL) examination. Prerequisite: Ability to keyboard at a minimum of 25 wpm. (F,Sp,Su)

OSS 1410  Special Topics  1-3
(Formerly OSS 1410)
Selected topics related to using computers. (F,Sp,Su)

OSS 1420  Word Processing Applications  3
(Formerly BIS 1420)
Word processing software instruction designed for office applications. Emphasizes creating business documents and improving keyboarding skills. Assumes ability to keyboard by touch at a minimum of 50 wpm.

OSS 1550  CI Business Correspondence  3
(Formerly BIS 1550 CI)
Development and application of effective business writing skills, emphasizing business correspondence. Includes thorough review of grammar, spelling, and punctuation related to business correspondence.

OSS 2300  Data Communications and Networking  3
(Formerly BIS 2300)
Emphasizes data communications in a LAN and WAN networking environment. Includes network protocols, cable technology, telecommunications standards, security issues, and general telecommunications management issues. Prerequisite: OSS 1400 or Computer and Information Literacy (CIL) Exam. (F,Sp)

OSS 2400  Web Design Applications  3
(Formerly BIS 2400)
Design, development, and evaluation of documents for electronic media utilizing the worldwide web. Prerequisite: OSS 1400 or Computer and Information Literacy (CIL) Exam. (F,Sp,Su)

OSS 2450  Spreadsheets and Databases  3
(Formerly BIS 2450)
Use of spreadsheets and databases to accomplish application development. Prerequisite: OSS 1400 or Computer and Information Literacy (CIL) Exam. (F,Sp,Su)

OSS 2500  Visual Basic Applications  3
(Formerly BIS 3480)
Designed to teach nontechnical students to develop application solutions using Visual Basic. Features of Microsoft Access requiring knowledge of Visual Basic are introduced. Prerequisite: OSS 2450. (F,Sp)

OSS 2520  Integrating Office Technology  3
(Formerly BIS 2520)
Advanced applications of office technology for production of business documents, emphasizing efficient use of word processing, graphics, and desktop publishing. Prerequisites: OSS 1420, BIS 2200.

OSS 2600  Office Procedures  3
(Formerly BIS 2600)
Finishing course which integrates office knowledge and skills. Applies administrative activities which are part of the office process. Prerequisites: OSS 2520; OSS 1550 or BIS 2200.

OSS 2800  Principles of Selling  2
(Formerly BIS 3550)
Focuses on the sales process, including prospecting, qualifying customers, planning and delivering the sales presentation, overcoming objections, closing the sale, and satisfying the customer’s needs.

Physical Education Activity (PE)

See Department of Health, Physical Education and Recreation, pages 321-331.

PE 1010  Aerobics  1
(Formerly PE 1330)
Fitness program, primarily designed to improve cardiovascular fitness, muscular endurance, and flexibility. (F,Sp)

PE 1015  Cycling  1
(Formerly PE 1210)
Conditioning class emphasizing training. Introduction to road safety principles, various riding techniques, and cycle maintenance. Sections of road and mountain cycling offered. Beginning and intermediate classes are offered for both road and mountain cycling. (F,Sp,Su)

PE 1016  Spinning  1
(Formerly PE 1340)
Intense cardiovascular conditioning class performed on stationary bikes. (F,Sp)

PE 1046  Jog/Walk  1
(Formerly PE 1300)
Provides students with opportunity to achieve and maintain personal fitness through jogging and/or walking. (F,Sp,Su)

PE 1057  Yoga  1
(Formerly PE 1360)
Provides a simultaneous path to and discovery of ineffability, utilizing physical and mental techniques derived from and inspired by the Ait tradition of Tibet, as well as from other sources. (F,Sp,Su)

PE 1063  Conditioning  1
(Formerly PE 1310)
Designed to improve overall flexibility, strength, and endurance capacity of the body. (F,Sp)

PE 1085  Weight Training  1
(Formerly PE 1320)
Demonstration of proper weight training techniques. Helps students understand basic concepts related to weight training, in order to gain strength, improve muscle tone, and start or continue a healthy lifestyle. (F,Sp,Su)

PE 1100  Tennis  1
(Formerly PE 1250)
Designed for students desiring a basic understanding of tennis. Improvement of skills and strategies through active participation in drills and games. Beginning and intermediate level sections are offered. (F,Sp,Su)

PE 1103  Table Tennis  1
Designed for students desiring a basic understanding of table tennis. Improvement of skills and strategies through active participation in drills and games. (F,Sp)

PE 1105  Badminton  1
(Formerly PE 1200)
Through active participation, students learn basic skills, rules, and strategies of singles and doubles badminton. (F,Sp)

PE 1110  Racquetball  1
(Formerly PE 1240)
Designed to help students understand the general rules and strategies of racquetball, improve competitive skills, and play safely and effectively. Beginning and intermediate classes are offered. (F,Sp)

<tr>
<td>(formerly PE 1110)</td>
<td>Designed to help students develop and understand the skills and strategies of recreational flag football through active participation. (F)</td>
<td></td>
</tr>
<tr>
<td>PE 1245</td>
<td>Ultimate Frisbee</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1140)</td>
<td>Designed to enhance each student's skills and abilities in ultimate frisbee. Emphasizes cardiovascular and muscular fitness. Course is progressive, with increase in intensity as the individual improves abilities. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>PE 1300</td>
<td>Swimming</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1400)</td>
<td>Designed for swimmers and nonswimmers desiring to improve swimming skills and enhance cardiovascular and muscular fitness. Emphasizes swimming safety and enjoyment in a variety of water activities. Beginning, intermediate, and lap swim sections offered. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>PE 1315</td>
<td>Water Aerobics</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1350)</td>
<td>Provides students with opportunity to maintain personal fitness, with an emphasis on non-weight-bearing cardiovascular activity in water. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>PE 1400</td>
<td>Self-Defense</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1500)</td>
<td>Covers skill development in terms of defensive capability, environment assessment, situation management, and the legal ramifications of the use of force. Available to the general University student body. Class offerings include Aikido, Tai Chi, Karate, Aerobic Kickboxing, and Rape Aggression Defense. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>PE 1505</td>
<td>Kayaking</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1710)</td>
<td>Provides basic skills and knowledge in kayaking. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>PE 1510</td>
<td>Fly Fishing</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1280)</td>
<td>Provides students with the opportunity to develop the skills, knowledge, and strategies for successful participation and enjoyment. Classes are offered in beginning and intermediate fly tying, rod building, and casting. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>PE 1515</td>
<td>Sailing</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1740)</td>
<td>Provides skills and knowledge in the fundamentals of sailing and water safety. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>PE 1520</td>
<td>Hiking</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1620)</td>
<td>Provides skills and knowledge in hiking, with an emphasis on leave no trace techniques and safe operations in an outdoor environment. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>PE 1523</td>
<td>Orienteering</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1630)</td>
<td>Provides skills and knowledge in the fundamentals of orienteering with an emphasis on wilderness travel techniques and safety in the outdoors. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>PE 1527</td>
<td>Rock Climbing: Basic</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1640)</td>
<td>Provides skills and knowledge in basic rock climbing, teaching safe judgment and proper techniques in a climbing gym. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>PE 1532</td>
<td>Outdoor Survival</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1650)</td>
<td>Provides skills and knowledge in the fundamentals of outdoor survival and developing a wilderness ethic to allow for safe participation in wilderness activities. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>PE 1538</td>
<td>Yurt Camping</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1830)</td>
<td>Provides skills and knowledge for safe winter camping using a yurt for shelter. Assists in the development of high outdoor ethics. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>PE 1543</td>
<td>Wilderness First Aid</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1670)</td>
<td>Provides outdoor leaders with an introduction to wilderness first aid. Upon completion of course, students may receive a two-year wilderness first aid certification. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>PE 1570</td>
<td>National Outdoor Leadership</td>
<td>3-18°</td>
</tr>
<tr>
<td>(formerly PE 1690)</td>
<td>School Course</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Provides students with the opportunity to earn USU credit for attending National Outdoor Leadership (NOLS) courses. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>PE 1600</td>
<td>Winter Exploration</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1810)</td>
<td>Provides skills and knowledge for safe winter camping using backpacking equipment. Assists in the development of high outdoor ethics. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>PE 1605</td>
<td>Skiing</td>
<td>1°</td>
</tr>
<tr>
<td>(formerly PE 1000)</td>
<td>Alpine ski instruction for all students. Offered for beginning, intermediate, and advanced levels. Focuses on knowledge, techniques, equipment, and safety necessary for participating in and enjoying alpine skiing, snowboarding, and telemark skiing. (Sp)</td>
<td></td>
</tr>
</tbody>
</table>
Course Descriptions

PE 1625 Cross Country Skiing 1®
(formerly PE 1020)
Focuses on knowledge, techniques, equipment, and safety necessary to participate in and enjoy winter recreational activities, including cross country ski touring and snowshoeing. (Sp)

PE 1655 Snowshoeing 1®
(formerly PE 1820)
Provides skills and knowledge of snowshoeing, with an emphasis on leave no trace techniques and development of safe winter activity skills. (F,Sp)

PE 1670 Ice Skating 1®
(formerly PE 1840)
Teaches basic, intermediate, conditioning, and competitive skill development. Includes sections of ice hockey and curling. (F,Sp,Su)

PE 1700 Dance 1®
(formerly PE 1900)
Designed to help students enhance their basic skills and enjoyment of dance through the following forms: jazz, modern, ballet, ballroom, social, Latin, western swing, etc. (F,Sp)

PE 1910 African Dance 1®
Introduces students to African dance using live drummers. Each class incorporates a series of warm-up exercises, followed by specific dances inspired by traditional African ceremonies and events, all accompanied by a traditional African drum ensemble. (F,Sp,Su)

PE 2000 Personal Instruction and Conditioning 1®
Designed for students and prospective members of varsity teams, as well as for the student/athlete requiring a personalized program. (F,Sp,Su)

PE 2010 Varsity Cross Country 1®
Designed to meet the needs of varsity student/athletes in cross country. (F)

PE 2020 Varsity Football 1®
Designed to meet the needs of varsity student/athletes in football. (F)

PE 2030 Varsity Soccer 1®
Designed to meet the needs of varsity student/athletes in soccer. (F)

PE 2040 Varsity Volleyball 1®
Designed to meet the needs of varsity student/athletes in volleyball. (F)

PE 2050 Varsity Indoor Track and Field 1®
Designed to meet the needs of varsity student/athletes in indoor track and field. (Sp)

PE 2060 Varsity Basketball 1®
Designed to meet the needs of varsity student/athletes in basketball. (Sp)

PE 2070 Varsity Gymnastics 1®
Designed to meet the needs of varsity student/athletes in gymnastics. (Sp)

PE 2080 Varsity Track and Field 1®
Designed to meet the needs of varsity student/athletes in track and field. (Sp)

PE 2090 Varsity Softball 1®
Designed to meet the needs of varsity student/athletes in softball. (Sp)

PE 2100 Varsity Golf 1®
Designed to meet the needs of varsity student/athletes in golf. (F,Sp)

PE 2110 Varsity Tennis 1®
Designed to meet the needs of varsity student/athletes in tennis. (F,Sp)

PE 2120 Varsity Weight Training 1®
Designed for varsity athletes. Emphasizes strength development. (F,Sp,Su)

PE 3000 Dynamic Fitness 3®
Designed to develop positive health practices in the areas of physical activity, diet, rest, and relaxation of living through classroom, laboratory, and activity experiences. (F,Sp,Su)

PE 4000 Lifeguard Training 2®
Designed to prepare students as pool or nonsurf open water lifeguards. Presents knowledge and skills necessary for lifeguard functions. American Red Cross certification available. (F,Sp)

PE 4050 Water Safety Instructor 2®
Attention given to methods of teaching swimming and lifesaving. Presents knowledge and skills necessary for lifeguard functions. American Red Cross certification available. (F,Sp)

PE 4200 Athletic Transition 2®
Life skills course designed to meet the needs of fourth-year and fifth-year student athletes. Provides personal and career assistance. (F,Sp)

®Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Physical Education Professional (PEP)

See Department of Health, Physical Education and Recreation, pages 321-331.

PEP 2000 Introduction and History of Physical Education 2®
Acquaints P.E. students with four areas of physical education, including: the department, with respect to the University and the College of Education and Human Services; the history of physical education; the effects of sociology on physical education; and future employment opportunities in the fields of physical education. (F,Sp)

PEP 2020 Introduction to Physical Therapy 2®
Introduces prephysical therapy students to the discipline of physical therapy and familiarizes them with its associated spectrum of opportunities and responsibilities. (F)

PEP 2050 Sport Rules and Regulations of the Utah High School Athletic Association 1®
Knowledge of the rules and mechanics of officiating all Utah high school sports. (Sp)

PEP 2100 Skills 1 (Swimming, Volleyball, Football) 1®
Provides physical education majors and minors with the knowledge, skills, practice, and understanding of swimming, volleyball, and football needed for successful participation. Exposes students to a variety of teaching methods for these three sports. (F,Sp)

PEP 2200 Skills 2 (Lifetime Activities) 1®
Provides physical education majors and minors with the knowledge, skills, practice, and understanding of lifetime activities needed for successful participation. Exposes students to a variety of teaching methods for these activities. (F,Sp,Su)

PEP 2300 Skills 3 (Softball, Basketball, Soccer) 1®
Provides physical education majors and minors with the knowledge, skills, practice, and understanding of softball, basketball, and soccer needed for successful participation. Exposes students to a variety of teaching methods for these three sports. (F,Sp)

PEP 2400 Skills 4 (Tennis, Badminton, Track and Field) 1®
Provides physical education majors and minors with the knowledge, skills, practice, and understanding of tennis, badminton, and track and field needed for successful participation. Exposes students to a variety of teaching methods for these three sports. (F,Sp)

PEP 2500 Rhythms and Movement 1®
Focuses on fundamental motor skills, mixers, aerobic, line, folk, ballroom, and square dance. Provides opportunities to practice rhythms and movement, as well as opportunities to practice teaching. Designed for physical education majors and minors. (F,Sp)
Course Descriptions

PEP 3050  Physical Education in the Elementary School  3
Prepares students to teach elementary physical education. Focuses on developmentally appropriate activities, locomotor and manipulative skills, fitness, games, rhythms, motor learning, and lesson planning. Students will teach physical education lessons in the elementary school. (F,Sp,Su)

PEP 3100  Athletic Injuries  3
Care and prevention of common athletic injuries and standard taping techniques. Emphasizes recognition, first aid, and referral for these injuries. Taping techniques taught in a lab setting. (F,Sp)

PEP 3200 CI  Motor Learning and Skill Analysis  3
Exploration of materials, methods, and mechanisms of learning and performing motor skills. A variety of sport skills taught in lab, using cues, demonstrations, feedback, and game-like drills. Performance of skill analysis for variety of sport skills. (F,Sp,Su)

PEP 3250  Anatomical Kinesiology  3
Study of the anatomical bases of human movement. Laboratory provides application of principles. (Sp)

PEP 3300  Clinical Experience I  1
Public school clinical experience in physical education. Prerequisite: Admission into Teacher Education program. (F,Sp)

PEP 3350  Methods of Individual and Dual Sports  1
Prepares students by providing strategies and materials for implementing a quality physical education program in individual and dual sports. Discussion of lesson and unit planning, as well as student evaluation. Prerequisites: PEP 2200, 2400. (Arr)

PEP 3400  Methods of Team Sports  1
Prepares students by providing strategies and materials for implementing quality physical education program in team sports. Discussion of lesson and unit planning, as well as student evaluation. Prerequisites: PEP 2100, 2300. (Arr)

PEP 3500  Methods of Fitness Education  1
Emphasizes classroom components for teaching lecture/activity fitness course. Students peer teach in a lecture environment. Discussion of strategies and materials for planning and implementing a quality physical education academic fitness course. Includes lecture planning, presentation, unit preparation, and evaluation. Prerequisites: PE 3000, PEP 3350, 3400. (Arr)

PEP 3550  Strategies and Methods of Teaching Team, Individual, and Dual Sports and Fitness  3
Designed to provide future physical education teachers with sound strategies and methods for teaching lifetime activities including fitness, as well as team, individual, and dual sports. (F,Sp)

PEP 3600  Elementary Physical Education Practicum  3
Prepares teachers to teach elementary physical education as a support minor. Prerequisite: PEP 3050. (Arr)

PEP 3650  Movement Exploration for Elementary Teachers  2
Covers creative movement and international folk dance. Experiences range from classroom management and curriculum development to large open-space activities and performance. Includes art and sound activities. (F)

PEP 4000  Mental Aspects of Sports Performance  3
Provides current knowledge of sport psychology. Applies this knowledge to teaching sports and coaching in public schools. Also taught as PSY 4000. (F,Sp,Su)

PEP 4100  Exercise Physiology and Principles of Conditioning  4
Designed to expose students to theory and application of exercise physiology and principles of training and conditioning. Laboratory experience provides hands-on practice for concepts taught in the classroom. Prerequisites: BIOL 2320, 2420, MATH 1050. (F,Sp)

PEP 4150  Advanced Care and Prevention of Athletic Injuries  3
Final preparation and competency demonstration of knowledge and skills prior to taking the national certification exam for the Athletic Training credential. Prerequisites: PEP 3100, instructor approval, and NATA certification eligibility.

PEP 4200 QI  Biomechanics  4
Understanding and application of human anatomical kinesiology and biomechanical principles fundamental to efficient human movement. In required concurrent one-hour lab, students obtain hands-on application of principles of anatomical kinesiology and biomechanics fundamentals. Prerequisites: BIOL 2320, 2420; MATH 1050 or equivalent. (F,Sp)

PEP 4250  Advanced Cooperative Work Experience  1-10
Cooperative education work experience offers student opportunity to work in related field work of the major. Prerequisite: Instructor approval. (F,Sp,Su)

PEP 4300  Clinical Experience II  1
Public school clinical experience in physical education. Prerequisite: Admission into Teacher Education program. (F,Sp)

PEP 4350  Administration of Physical Education  2
Designed to help students understand objectives of physical education and sport, and incorporate them into a philosophy to assist in developing quality programs at the secondary level. Covers all aspects of physical education and sport administration including, but not limited to, budget, personnel, facilities management, programs, and activities. (F,Sp)

PEP 4400 QI  Evaluation in Physical Education  3
Focuses on the nature and use of a variety of tests in physical education. Practical application, interpretation, and use of test results are stressed. (F,Sp)

PEP 4500  Methods of Coaching  3
Addresses issues associated with secondary coaching, including fund-raising, discipline, parents, booster clubs, equipment, team selection, etc. Students also get hands-on individual sports methods time with local teams. (F,Sp)

PEP 4600  Methods of Coaching Football and Soccer  1
Outlines the methods, strategies, and techniques for coaching scholastic football and soccer. Emphasizes young player skill development and high school coaches’ administration of these sports. Prerequisite: PEP 4500 (may be taken concurrently). (Arr)

PEP 4700  Methods of Coaching Volleyball, Track and Field  1
Outlines the methods, strategies, and techniques for coaching scholastic volleyball, as well as track and field. Emphasizes young player skill development and high school coaches’ administration of these sports. Prerequisite: PEP 4500 (may be taken concurrently). (Arr)

PEP 4800  Methods of Coaching Basketball, Baseball, and Softball  1
Outlines methods, strategies, and techniques of coaching scholastic basketball, baseball, and softball. Emphasizes young player skill development and high school coaches’ administration of these sports. Prerequisite: PEP 4500 (may be taken concurrently). (Arr)

PEP 4850  Methods of Teaching and Coaching Women’s Gymnastics  3
Instructs students in required coaching methods for women’s gymnastics from the beginning to advanced levels. Also includes section on judging. (Arr)

PEP 4900 CI  Methods of Physical Education  3
Designed to prepare physical education majors and minors to teach physical education in the schools. Emphasizes planning, teaching, strategies, and methods. Admission to the Teacher Education program is required. Must be taken concurrently with either PEP 3300 or 4300. Prerequisites: Two courses selected from PEP 3350, 3400, and 3500. (F,Sp)

PEP 4950H  Honors Senior Thesis  1-6
Culminating experience within the department for honors students. Student works closely with faculty mentor in an extensive project in the student’s area of interest. (F,Sp)
### Course Descriptions

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PEP 5050</td>
<td>Psychological Aspects of Sports Performance</td>
<td>3</td>
<td>Psychological theory and principles applied to sports. Includes motivational techniques, psychological evaluation, stress and anxiety in sports, and personality and sports performance. Also taught as PSY 5050/6050. (Arr)</td>
</tr>
<tr>
<td>PEP 5070</td>
<td>Sport Sociology</td>
<td>3</td>
<td>Develops understanding of the social significance of sport. Applies the sociological perspective to a variety of contemporary issues, enabling students to better understand how sport affects and reflects American culture. (Sp)</td>
</tr>
<tr>
<td>PEP 5100</td>
<td>Fitness Assessment and Exercise Programs</td>
<td>4</td>
<td>Application of physiologic principles, assessment techniques, and exercise prescription for developing quality fitness programs that impact health. Students gain experience in a personal fitness program and in the use and interpretation of fitness tests. Prerequisite: PEP 4100. (F)</td>
</tr>
<tr>
<td>PEP 5430</td>
<td>CI The History and Philosophy of Physical Education</td>
<td>3</td>
<td>Designed to familiarize physical education majors (or nonmajors) with history of physical education and sport, as well as philosophical influences which have contributed to development of contemporary physical education and sport. Considers historical development of yesterday's pastimes into today's complex, institutionalized forms of sport and physical education. (F)</td>
</tr>
<tr>
<td>PEP 5500</td>
<td>Student Teaching Seminar</td>
<td>2</td>
<td>Capstone seminar focused upon student teaching issues, professional development, and principles of effective instruction. Prerequisites: PEP 4900, completion of Level I and II field experiences. (F,Sp)</td>
</tr>
<tr>
<td>PEP 5560</td>
<td>Practicum in Improving School System Programs</td>
<td>1-4</td>
<td>In-service seminar for experienced teachers, emphasizing improvement in instruction. (F,Sp,Su)</td>
</tr>
<tr>
<td>PEP 5630</td>
<td>Student Teaching in Secondary Schools</td>
<td>10</td>
<td>A 13-week culminating experience in which students assume full-time teaching responsibilities under the direction of cooperating teachers in physical education. Prerequisites: PEP 4900, completion of Level I and Level II field experiences. (F,Sp)</td>
</tr>
<tr>
<td>PEP 5700</td>
<td>Special Topics in Physical Education</td>
<td>1-6</td>
<td>In-depth review and discussion of special topics in physical education. (F,Sp,Su)</td>
</tr>
<tr>
<td>PEP 5900</td>
<td>Independent Study</td>
<td>1-3</td>
<td>Provides opportunity for undergraduate or graduate students to participate in independent inquiry under guidance of a professor. (F,Sp,Su)</td>
</tr>
<tr>
<td>PEP 5910</td>
<td>Independent Research</td>
<td>1-3</td>
<td>Allows undergraduate students to pursue personal research interest by formalizing an independent project under the guidance of a professor. (F,Sp,Su)</td>
</tr>
<tr>
<td>PEP 6000</td>
<td>Administration of Athletics</td>
<td>3</td>
<td>Prepares students to organize and administer interscholastic and intercollegiate sports at the public school or university level. Consideration is given to both the challenges and standards associated with such programs. (Arr)</td>
</tr>
<tr>
<td>PEP 6010</td>
<td>Leadership in Health, Physical Education, and Recreation</td>
<td>3</td>
<td>Group approach to improvement and innovation in leadership and supervisory skills. (Sp)</td>
</tr>
<tr>
<td>PEP 6050</td>
<td>Psychological Aspects of Sports Performance</td>
<td>3</td>
<td>Psychological theory and principles applied to sports. Includes motivational techniques, psychological evaluation, stress and anxiety in sports, and personality and sports performance. Also taught as PSY 6050/5050. (Arr)</td>
</tr>
<tr>
<td>PEP 6070</td>
<td>Sport in Society</td>
<td>3</td>
<td>Introduces students to complex role and social significance of sport in contemporary society. Familiarizes students with aims, scope, and potential contributions of sport in society. (Sp)</td>
</tr>
<tr>
<td>PEP 6250</td>
<td>Graduate Cooperative Work Experience</td>
<td>1-10</td>
<td>Professional level of educational work experience in a cooperative education position for graduate students. (F,Sp,Su)</td>
</tr>
<tr>
<td>PEP 6290</td>
<td>Corporate Wellness Marketing</td>
<td>3</td>
<td>Reviews history of corporate fitness in America, as well as common organizational and management practices. Emphasizes marketing practices promoting individual and business involvement. (Sp)</td>
</tr>
<tr>
<td>PEP 6400</td>
<td>Exercise in Health, Fitness, and Sport</td>
<td>4</td>
<td>Emphasizes physiological and health benefits of exercise. Discusses role of exercise in disease prevention, along with medications given to treat illness and disease. (F)</td>
</tr>
<tr>
<td>PEP 6420</td>
<td>Curriculum in Physical Education</td>
<td>3</td>
<td>Curriculum development studied in terms of student needs in relation to present-day society. Includes current practices and trends in the area of curriculum. (Arr)</td>
</tr>
<tr>
<td>PEP 6430</td>
<td>History and Philosophy of Physical Education and Sport</td>
<td>3</td>
<td>History of physical education; philosophical influences which have contributed to contemporary physical education; and methods of educational instruction using the primary philosophical positions. (F)</td>
</tr>
<tr>
<td>PEP 6450</td>
<td>Fitness Assessment and Exercise Testing</td>
<td>3</td>
<td>Exposure to fitness assessment in clinical cardiac settings, as well as in corporate wellness settings. Exercise testing and interpretations, using different testing protocols in emphasized variant electrocardiograms, studied as part of the disease process. Prerequisite: PEP 6400. (Sp)</td>
</tr>
<tr>
<td>PEP 6500</td>
<td>Practicum in Corporate Wellness</td>
<td>1-10</td>
<td>Experiences designed for the practical implementation of coursework. Involves random populous rehabilitation, as well as executive and industry, senior citizen centers, and rest homes. (F,Sp,Su)</td>
</tr>
<tr>
<td>PEP 6540</td>
<td>Wellness Programming</td>
<td>3</td>
<td>Emphasizes exercise prescription writing and exercise prescription implementation. Students test prescriptions in laboratory setting. Prerequisites: PEP 6400, 6450. (Sp)</td>
</tr>
<tr>
<td>PEP 6690</td>
<td>Analysis of Teaching Physical Education</td>
<td>3</td>
<td>Designed to provide graduate students with practicum experiences in the analysis of physical education, via micro teaching and observation of physical education classes. (Arr)</td>
</tr>
<tr>
<td>PEP 6700</td>
<td>Special Topics in Physical Education (dual listing 5700)</td>
<td>1-6</td>
<td>In-depth review and discussion of special topics in physical education. (F,Sp,Su)</td>
</tr>
<tr>
<td>PEP 6730</td>
<td>Worksite Guidance and Counseling</td>
<td>3</td>
<td>Provides cardiac rehabilitation/corporate wellness graduate students with basic understanding of exercise and health psychology. (Arr)</td>
</tr>
<tr>
<td>PEP 6800</td>
<td>Biomechanics and Ergonomics of Health, Industry, and Sport</td>
<td>3</td>
<td>Understanding and application of biomechanical and ergonomic principles fundamental to efficient human movement in health, industry, and sport. Prerequisite: PEP 4200. (Sp)</td>
</tr>
<tr>
<td>PEP 6810</td>
<td>Research Methods in Health Sciences</td>
<td>3</td>
<td>Explores basic to advanced concepts contained in research and statistical design, as applicable to health sciences. (F)</td>
</tr>
<tr>
<td>PEP 6820</td>
<td>Wellness Certification and Technology</td>
<td>2</td>
<td>Provides instruction and experience in wellness technology and wellness certification. Students learn use of current technology in the fitness industry and obtain certain wellness certifications. (Arr)</td>
</tr>
<tr>
<td>PEP 6830</td>
<td>Motor Learning</td>
<td>3</td>
<td>Comprehensive review and analysis of research in the area of motor skills which bears upon the teaching of physical education activities. (Arr)</td>
</tr>

</table>

Utah State University 2006-2007 General Catalog
### Course Descriptions

**PEP 6900  Independent Study** 1-3<sup>®</sup>
Student conducts independent projects under direction of one or more professors. Provides student with opportunity for individualized study. (F,Sp,Su)

**PEP 6910  Independent Research** 1-3
Allows graduate students to pursue personal research interests by formulating an independent project under the guidance of a graduate professor. (F,Sp,Su)

**PEP 6960  Master's Project** 3
Allows students opportunity to develop creative and applicable educational project. (F,Sp,Su)

**PEP 6970  Thesis** 1-9<sup>®</sup>
(F,Sp,Su)

**PEP 6990  Continuing Graduate Advisement** 1-9<sup>®</sup>
Provides graduate students with continued support and advisement. Usually taken following completion of all coursework required for the degree. (F,Sp,Su)

**PEP 7550  Practicum in the Evaluation of Instruction** 1-6<sup>®</sup>
Field-based experience involving supervision of student teachers in Department of Health, Physical Education and Recreation. (F,Sp,Su)

<sup>®</sup>Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

### Personal Financial Planning (PFP)

See School of Accountancy, pages 131-135.

**PFP 1050  Introduction to Personal Financial Planning** 1-3
Introduction to concepts of financial planning for individuals. Taught only as a special extension course as requested.

**PFP 5060  Personal Financial Planning and Advising** (dual listing 6060) 3
Fundamental concepts and principles of personal financial planning for individuals. (F)

**PFP 5070  Retirement Planning** (dual listing 6070) 3
Concepts and principles of retirement planning, including retirement and benefit plans, deferred compensation, and investments. (Sp)

**PFP 5080  Estate Planning** (dual listing 6080) 3
Concepts and principles of estate planning for individuals, including goal identification, data gathering, forms of property ownership, documents, probate, and transfer taxes. (Sp)

**PFP 5090  Personal Financial Plans** (dual listing 6090) 3
Capstone course in personal financial planning. Knowledge from other financial planning courses used to prepare comprehensive personal financial plans. Prerequisites (may be taken concurrently): ACCT 3410; BA 3460 or 4460; PFP 5060/6060, 5070/6070, 5080/6080.

**PFP 6600  Personal Financial Planning and Advising** (dual listing 5060) 3
Fundamental concepts and principles of personal financial planning for individuals. (F)

**PFP 6700  Retirement Planning** (dual listing 5070) 3
Concepts and principles of retirement planning, including retirement and benefit plans, deferred compensation, and investments. (Sp)

**PFP 6080  Estate Planning** (dual listing 5080) 3
Concepts and principles of estate planning for individuals, including goal identification, data gathering, forms of property ownership, documents, probate, and transfer taxes. (Sp)

**PFP 6090  Personal Financial Plans** (dual listing 5090) 3
Capstone course in personal financial planning. Knowledge from other financial planning courses used to prepare comprehensive personal financial plans. Prerequisites (may be taken concurrently): ACCT 3410; BA 3460 or 4460; PFP 6060/5060, 6070/5070, 6080/5080.

**PFP 6560  Business Law and Professional Responsibilities** 3
Examines the ethical and legal responsibilities of business professionals. Includes the application of law to business organizations, contracts, government regulation of business, and the uniform commercial code. (F,Sp)

### Philosophy (PHIL)

See Department of Languages, Philosophy, and Speech Communication, pages 364-379.

**PHIL 1000  BHU Introduction to Philosophy** (formerly PHIL 1010 BHU) 3
Introduction to philosophical questions regarding truth, knowledge, reality, mind, God, morality, and meaning. Examination of various philosophical responses to these questions. (F,Sp)

**PHIL 1120  BHU Social Ethics** (formerly PHIL 2500 BHU) 3
Examination of principles and arguments underlying current debate in American law and politics. Topics may include abortion, euthanasia, capital punishment, discrimination and affirmative action, sexual harassment, freedom of expression, welfare, and duties to help the poor in other nations. (F)

**PHIL 1200  BHU Practical Logic** 3
Recognition of arguments and their logical structure. Study of formal and informal fallacies in reasoning. Enthymemes, analogical arguments, syllogisms, and Venn diagrams. Logical analysis of writing in the arts and sciences. (Sp)

**PHIL 2200  QI Deductive Logic** 3
Study of deductive arguments and techniques for evaluating their validity. Recognizing formal fallacies in reasoning. Symbolizing English sentences and arguments to make their meanings precise. Study of quantifiers and relations. Prerequisite: MATH 1030 or STAT 1040. (F,Sp)

**PHIL 2400  BHU Ethics** 3
Study of judgments concerning what is good or bad, right or wrong. How judgments are justified and related to action. Relativism, subjectivism, absolutism, freedom, and responsibility. (Sp)

**PHIL 3100  CI Ancient Philosophy** 3
Development of philosophical thought in the Ancient Greek world. Readings from the pre-Socratics, Plato, Aristotle, the Stoics, and Epicureans. (F)

**PHIL 3110  CI Medieval Philosophy** 3
Neo-Platonism with stress on Plotinus, St. Augustine, and early Christian philosophy; early medieval thought; St. Thomas Aquinas and the rise of scholasticism; and philosophical thought in the Renaissance. (Sp)

**PHIL 3120  CI Early Modern Philosophy** 3
Philosophers and philosophical disputes in Western Europe from 1400-1750. Figures and topics may include: Bacon, Hobbes, Descartes, Locke, Hume, nominalism, empiricism, rationalism, religion, politics, and morals. (F)

**PHIL 3150  CI Kant and His Successors** 3
Philosophers and philosophical disputes in Western Europe from 1750-1900. Study of Kant, Hegel, Bentham, Mill, Marx, Schopenhauer, and Nietzsche. Examination of critical idealism, philosophy of history, utilitarianism, communism, and origins of existentialism. (Sp)

- PHIL 3160 CI Contemporary Philosophy: Twentieth century philosophical thought, including existentialism, logical positivism, analytic philosophy and postmodernism, as expressed in the works of Heidegger, Husserl, Wittgenstein, Camap, Russell, Quine, Sartre, Derrida, and others. (F)
- PHIL 3180 DHA/CI Contemporary European Philosophy: Study of twentieth-century philosophical movements originating and developing on the European continent. Movements to be considered may include: existentialism, phenomenology, hermeneutics, and post-metaphysical philosophy. (F)
- PHIL 3500 Medical Ethics: Key issues in medicine, including: consent, competency, confidentiality, euthanasia, abortion, and the justification of health care. (F)
- PHIL 3510 DHA Environmental Ethics: Key issues in the treatment of nature, such as: the value of wilderness, animal rights, comparative views of nature, and moral issues in economic approaches to the wilderness. (F,Sp)
- PHIL 3520 DHA Business Ethics: Key issues in business, including: foreign bribery, corporate responsibility, corporate culture, ethical theories, justice, and preferential treatment. (Sp)
- PHIL 3700 Philosophy of Religion: Problems in defining "religion" and the existence of God; the problem of evil; the immortality of the soul; religious experience; faith; alternatives to theism; religious language. (F)
- PHIL 3710 Philosophies of East Asia*: Study of three Asian philosophies: Confucianism, Taoism, and Buddhism. Focus on appreciating the merits of each system of thought. Emphasis on class discussion and participation. (F)
- PHIL 3720 Philosophical Theology After Kant*: Explores attempts to reconstruct the reasonable basis of religion in the two centuries after the Enlightenment. (F)
- PHIL 3730 CI Philosophy of the New Testament*: Historical and intellectual context of the development of the New Testament. Character, ideas, and historical setting of the various documents. (Sp)
- PHIL 3750 Religion and Science in the Modern World*: Study of problems addressing the relation of religion to science in the modern world (e.g., evolution, Big Bang, origin of life). (Sp)
- PHIL 3800 DHA Philosophy in Literature**: Study of philosophical concepts, problems, and issues as they have been presented and dramatized in works of literature and cinema. Discussion of issues concerning ethics, epistemology, ontology, and logic. Students read or view works from a variety of media, including novels, short stories, and films. (F)
- PHIL 3810 DHA Aesthetics: Analysis of traditional theories of aesthetics and art criticism. Theories are applied to illustrative examples, including music, painting, photography, sculpture, dance, literature and cinema. (Sp)
- PHIL 4300 DHA Epistemology*: Study of foundations of knowledge and belief systems, and related topics in epistemology, including perception, certainty, and skepticism. (F)
- PHIL 4310 DHA Philosophy of Science: Study of different views of the nature of science: the classical traditions of Hempel and Popper, Kuhn's subjectivism, and Feyerabend's anarchism. Topics include confirmation, induction, scientific realism, reductionism, and the growth of scientific knowledge. (Sp)
- PHIL 4320 DHA History of Scientific Thought**: Examination of key episodes in the history of science and associated ideas about the nature of scientific knowledge and how this knowledge may be acquired. Also taught as HIST 4320. (Sp)
- PHIL 4400 Metaphysics**: Study of fundamental problems of existence. Topics include: mind and its relation to the body, determinism and human freedom, fatalism, idealism and realism, truth, and our knowledge of the world. (F)
- PHIL 4410 DHA Philosophy of Mind: Beginning with the context of Cartesian mind/body dualism, a thorough examination of Cartesian privacy, privileged access, and the problem of other minds is conducted. Ancillary topics may include the mind/machine controversy and animal intelligence. (F)
- PHIL 4420 Philosophy of Language**: Nature and uses of language, concepts of meaning, reference, truth, syntax, semantics, pragmatics, metaphors, ambiguity, vagueness, and definition. Application in linguistics, psychology, anthropology, and literary criticism. (Sp)
- PHIL 4500 Contemporary Ethical Theory*: Careful examination of one or more topics playing a central role in current moral philosophy. Focus on work produced in philosophical literature within last twenty years. (Sp)
- PHIL 4530 DSC Ethics and Biotechnology (dual listing 6530): Interdisciplinary examination of key issues such as: cloning, human genetic screening and therapy, and transgenic animals and food. (Sp)
- PHIL 4540 DHA Human Values and Information (dual listing 6540): Philosophical investigation of relations between technological change, human values, and the good life. Emphasis on growth of computer-mediated communication and its impact on values such as autonomy and privacy. (Sp)
- PHIL 4560 Philosophy of Law*: Examines the nature of law, relations between law and morality, the obligation to obey law, ways to interpret law, the justification of legal punishment, and appropriate conditions for civil and criminal liability. (F)
- PHIL 4610 DHA Social and Political Philosophy**: Explores the nature of a just society, political obligation, and justification and proper limits of political power. (Sp)
- PHIL 4900 Special Topics: Detailed consideration of a particular philosopher or philosophical problem. Instructor approval required. Course may be repeated when a different topic is discussed. (F,Sp)
- PHIL 4910 Readings and Research: Independent study of a particular philosopher or philosophical topic. Consent of instructor required. Course may be repeated when a different topic is discussed. (F,Sp)
- PHIL 4920H Senior Honors Seminar: Credit for completing and presenting a senior honors thesis project. Requirement may be fulfilled by publishing the thesis in an academic journal, defending the thesis before a faculty committee, presenting the thesis at an academic conference, or presenting the thesis in the philosophy session during Scholar's Day. (Sp)
- PHIL 4930H Senior Honors Thesis: Independent study research credits for preparation of a senior honors thesis to fulfill requirements for a degree in philosophy with department honors. Prerequisite: Permission of instructor prior to enrollment. (F,Sp,Su)
- PHIL 4990 Philosophy Seminar: Advanced study of recent work in philosophy. Topic will vary by instructor. Especially appropriate for students planning to go on to graduate or professional school. (Sp)
- PHIL 5200 Symbolic Logic**: Study of the metatheory for truth functional and predicate logic. Examination of systems employing modal, epistemic, and deontic operators. Set theory, fuzzy logic, and Godel's undecidability theorem may also be considered. If time permits, applied logic will be considered. Prerequisite: PHIL 2200 or instructor's approval. (Sp)
PHIL 5510 Ethics and the Environment** 3
Study and analysis of both individualistic and holistic approaches to environmental ethics, with emphasis on contemporary debates within the field and their implications for the formation of public policies. Prerequisite: PHIL 3510 or graduate standing. (F)

PHIL 5600 Legal Ethics*** 3
Study and analysis of major issues arising in the practice of law within the context of the American adversarial system of justice. Prerequisite: PHIL 4600, graduate standing, or permission of instructor. (F)

PHIL 6420 Philosophy of Language** 3
(Sp)

PHIL 6530 Ethics and Biotechnology* 3
Interdisciplinary examination of key issues such as: cloning, human genetic screening and therapy, and transgenic animals and food. To receive graduate credit, extra readings and a 25-30 page paper will be required. (Sp)

PHIL 6540 Human Values and Information Technology* 3
Philosophical investigation of relations between technological change, human values, and the good life. Emphasis on growth of computer-mediated communication and its impact on values such as autonomy and privacy. To receive graduate credit, extra readings and a 25-30 page paper will be required. (Sp)

PHIL 6890 Philosophy of Science 3
(Sp)

PHIL 6900 Independent Study 1-4
F(Sp, Su)

_course_descriptions_

PHYS 1020 BPS Energy 3
Study of energy resources, utilization, conversion, and conservation, including energy balance and flow in biological and geological systems. Social impacts of energy resource development, including public policy and planning. Prerequisites: At least one university-level mathematics or statistics course, and completion of University Studies Computer and Information Literacy (CIL) examination.

PHYS 1800 BPS Introductory Astronomy (formerly PHYX 1000 BPS) 3
Exploration of solar system and universe. Laws of motion, fundamental interactions, structure of matter, electromagnetic radiation, and conceptual models of celestial motions. Conceptual and quantitative homework problems and exams, along with writing assignments and observation reports, are required. Facility with high school mathematics is expected.

PHYS 1080 BPS Intelligent Life in the Universe 3
Study of the likelihood of extraterrestrial intelligence and its probable locations. Nature and evolution of life on Earth, as well as stellar evolution and planetary environments. Discussion of psychology of UFO phenomena. Prerequisites: At least one university-level mathematics or statistics course, and completion of University Studies Computer and Information Literacy (CIL) examination.

PHYS 1100 BPS Great Ideas in Physics 3
Descriptive introduction to the principles underlying contemporary physics. Great ideas will include relativity and quantum mechanics and such consequences and applications as the twin paradox, black holes, nuclear energy, magnetic imaging, lasers, superconductivity, and the paradox of Schrödinger's cat. Facility with high school algebra is expected.

PHYS 1200 BPS Introduction to Physics by Hands-on Exploration 4
Explores structure of matter, electricity and magnetism, light, and sound through hands-on, inquiry-based activities. Facility with high school algebra is expected. Required laboratory.

PHYS 1800 BPS Physics of Technology 4
Overview of the classical physics on which industrial technology is based. Elements of kinematics, forces, energy, momentum, thermodynamics, electric and magnetic fields, waves, and optics. Required laboratory. Prerequisites: MATH 1050 and 1060.

PHYS 2110 The Physics of Living Systems I 4
Study of kinematics and dynamics of particles and systems of particles. Introduction to Newton's Laws of motion, momentum and energy conservation, rotations, and thermodynamics, with applications in biology and biotechnology. Required recitation and lab. Prerequisite: MATH 1100 or 1210.

PHYS 2120 BPS The Physics of Living Systems II 4
Introduction to electromagnetism, optics, and quantum phenomena— including the microscopic structure of matter, with applications in biology and biotechnology. Required recitation and lab. Prerequisite: MATH 1100 or 1210, PHYS 2110.

PHYS 2200 Elements of Mechanics 2
Calculus-based introduction to particle mechanics. Kinematics, Newton's laws of motion, momentum, work and energy, and angular momentum. Required recitation and lab. Prerequisite: MATH 1210.

PHYS 2210 QI General Physics—Science and Engineering I 4
Calculus-based introduction to Newton's Laws of motion, momentum and energy conservation, rotations, oscillations, and thermodynamics, with applications in the physical sciences and technology. Required recitation and lab. Prerequisite: MATH 1210.

PHYS 2220 BPS/QI General Physics—Science and Engineering II 4
Calculus-based introduction to electromagnetism, waves, optics, and modern physics, with applications in the physical sciences and technology. Required recitation and lab. Prerequisites: MATH 1210; PHYS 2200 or 2210, or a minimum score of 4 on the AP B exam, or a minimum score of 3 on the AP C (mechanics) exam.

PHYS 2400 Introductory Topics in Physics (Topic) 1-3
Explores issues in contemporary physics at an introductory level. Prerequisite: Approval of instructor.

PHYS 2500 Introduction to Computer Methods in Physics 2
Introduction to computer assistance in physics. Topics include: (1) use of numerical, graphical, and symbolic manipulation software to solve physics problems; and (2) interfacing computers to instrumentation for control and data acquisition. Prerequisite: PHYS 2110 or 2210 or 2220.

PHYS 2710 Introductory Modern Physics 3
Overview of the origins, principles, and practical applications of quantum mechanics. Atomic structure and periodic table, molecular bonding, solids, electronic properties of metals and semiconductors, and superconductivity. Prerequisites: MATH 1220, PHYS 2120 or 2220.

PHYS 3010 DSC/QI Space Exploration from Earth to the Solar System 3
Comparative introduction to the Earth and other planets in our solar system, including geological structure and atmosphere. Emphasis on space exploration methods, including spacecraft and detection instrumentation. Examines latest results of Mars missions, Jupiter and Saturn exploration, etc. Prerequisites: Completion of University Studies Quantitative Literacy (QL) and Breadth Physical Sciences (BPS) requirements.

PHYS 3020 DSC Great Scientists 3
Lives and work of men and women responsible for scientific revolution: Maxwell (loved children), Einstein (despised authority), Curie (suffered discrimination against women), Schrödinger (fled from Hitler), Watson and Crick (the DNA story), Feynman (look picker), Rubin (as a young girl built her own telescope).
Course Descriptions

and others. Prerequisite: Fulfillment of University Studies Breadth Physical Sciences (BPS) or Breadth Life Sciences (BLS) requirement.

**PHYS 3030 DSC/QI The Universe** 3
Study of properties and origin of the universe, based on Einstein’s theory of gravity. Topics include curved space-time; black holes, white holes, and worm holes; the big bang; multiple universes; and the births of stars, galaxies, heavy atoms, and planets. Prerequisite: Completion of University Studies Quantitative Literacy (QL) requirement and PHYS 1040.

**PHYS 3040 QI Space Weather—Dangers to the High-Tech World** 3
Space weather can be as destructive to high technology as ordinary weather is to property and crops. Examines increasing vulnerability of society to events in space resulting from changes on the Sun and from human activity. Explores how we learn about space weather with satellites, radars, lidars, and numerical models. Prerequisites: Completion of University Studies Quantitative Literacy (QL) and Breadth Physical Sciences (BPS) requirements.

**PHYS 3500 Topics in Physics (Topic)** 1-3
Introduces and explores issues in contemporary physics at an intermediate undergraduate level. Focuses on phenomena and experimental methods. Prerequisite: PHYS 2710 and approval of instructor.

**PHYS 3550 Intermediate Classical Mechanics** 3
Newton’s laws of motion, work and energy, systems of particles, Lagrange’s and Hamilton’s equations, accelerated reference frames, central force problem, harmonic oscillations, and rigid body rotations. Prerequisites: PHYS 2710, MATH 2210; MATH 2250 (may be taken concurrently).

**PHYS 3600 Intermediate Electromagnetism** 3
Electrostatics, electric potential, current, magnetostatics, induction, AC circuits, Maxwell’s equations, and electromagnetic waves. Prerequisites: PHYS 2710, MATH 2210; MATH 2250 (may be taken concurrently).

**PHYS 3700 Thermal Physics** 3
Rigorous treatment of laws of thermodynamics and statistical mechanics. Concepts of work, temperature, heat, energy, and entropy; and their application to reversible and irreversible processes. Criteria for equilibrium. Prerequisite: PHYS 2710.

**PHYS 3710 Intermediate Modern Physics** 3
Introduction to the principles and applications of special and general relativity. Space-time, relativistic kinematics and dynamics, gravity and geometry, black holes, Big Bang, nuclei, radioactivity, and nuclear reactions. Interconnections between modern cosmology and elementary particle physics. Prerequisites: MATH 1220, PHYS 2120 or 2220.

**PHYS 3750 Foundations of Wave Phenomena** 3
Survey of wave phenomena in physics, with emphasis on application of mathematical techniques to the wave equation, Schrödinger equation, and Maxwell equations. Prerequisites: PHYS 2710, MATH 2210; MATH 2250 (may be taken concurrently).

**PHYS 3870 CI Intermediate Laboratory I** 2
Modern experimental techniques, data and error analysis, experimental design, and communication skills. Exercises complement upper-level theory courses, and include some experiments of historical importance. Prerequisite: PHYS 2500.

**PHYS 3880 CI Intermediate Laboratory II** 2
Continuation of PHYS 3870. Prerequisite: PHYS 3870.

**PHYS 3900 Projects in Physics** 1-3
Individual study pursued under direction of staff member. Prerequisite: Approval of instructor.

**PHYS 4010 DSC/QI Chaos Under Control** 3
Introduction to principles and applications of new sciences of fractals, chaos, and complexity. Importance of describing physical, geological, biological, and natural resource structures with fractals. Practical benefits of understanding and controlling erratic behavior in physical and living systems. Technological consequences of self-organized, adaptive behavior. Prerequisites: Completion of University Studies Quantitative Literacy (QL) and Breadth Physical Sciences (BPS) requirements.

**PHYS 4020 DSC/QI Science, Art, and Music** 3
Explores how science constrains production and appreciation of visual and auditory art. Relevance to art of: physics of sound and light, perspective and observer in relativity and quantum mechanics, symmetry, fractals, chaos, complex adaptive behavior, and self-organization. Prerequisites: Completion of University Studies Computer and Information Literacy (CIL) examination, Quantitative Literacy (QL), and Physical or Life Sciences breadth (BPS or BLS) requirements.

**PHYS 4250 CI Cooperative Work Experience** 1-6
Planned work experience in industry or national laboratories. A detailed plan and the purpose of the experience must have prior approval. A written report is required. Prerequisite: PHYS 2710.

**PHYS 4550 Advanced Classical Mechanics** 3
Lagrange’s equations, Liouville’s theorem, continuia, Euler’s equations, small vibrations, and special relativity. Prerequisites: PHYS 3550, 3750.

**PHYS 4600 Advanced Electromagnetism** 3
Potential formulations of electrodynamics, energy and momentum, waves and boundary conditions, waves in dielectrics and conductors, guided waves, dipole radiation, and relativistic electrodynamics. Prerequisites: PHYS 3600 or ECE 3870; PHYS 3550, 3750.

**PHYS 4650 Optics I** 3
(dual listing 6650)
Topics include mathematics of wave motion, electromagnetic theory of light, light propagation, geometrical optics, and superposition of waves. For graduate (6000-level) credit, additional reading, recitation, use of optical-design software, and/or writing will be required. Also taught as ECE 4650/6650. Prerequisite: ECE 3870.

**PHYS 4680 Optics II** 3
(dual listing 6680)
Topics include polarization, interference, diffraction, Fourier optics, coherence theory, and the quantum nature of light. For graduate (6000-level) credit, additional reading, recitation, use of optical-design software, and/or writing will be required. Prerequisite: PHYS/ECE 4650 or PHYS/ECE 6650. Also taught as ECE 4680/6680.

**PHYS 4700 Quantum Mechanics I** 3
Principles of quantum mechanics, operators in Hilbert space, matrix mechanics, angular momentum, spin, perturbation theory, and applications. Prerequisites: PHYS 3550, 3600, 3750.

**PHYS 4710 Quantum Mechanics II** 3
Continuation of PHYS 4700. Prerequisite: PHYS 4700.

**PHYS 4900 CI Research in Physics** 1-3
Research experience pursued with faculty mentor. Prior to registration, student must make arrangements with the Physics Department’s undergraduate research advisor. Prerequisite: PHYS 2710.

**PHYS 5340 Methods of Theoretical Physics I** 3
Physics applications of vector calculus and differential geometry, group theory, infinite series, complex analysis, differential equations, Sturm-Liouville theory, orthogonal functions, integral equations, and the calculus of variations.

**PHYS 5350 Methods of Theoretical Physics II** 3
Continuation of PHY5 5340. Prerequisite: PHYS 5340.

**PHYS 5500 Intermediate Topics in Physics (Topic)** 1-3
Explores issues in contemporary physics at the advanced undergraduate and beginning graduate level.

**PHYS 5800 Physics Colloquium** 1
A series of invited lectures on specialized topics in physics and related subjects.

**PHYS 5870 CI Advanced Laboratory** 3
Experimental experience with such modern techniques as scanning tunneling microscopy, LEED, Auger spectroscopy, and Fourier transform infrared spectroscopy. Prerequisite: PHYS 2710.

**PHYS 6010 Classical Mechanics I** 3
Lagrange’s equations, Hamilton’s principle, Hamilton’s equations, canonical transformations, Hamilton-Jacobi theory, central forces, noninertial reference
### Course Descriptions

frames, rigid body motion, small oscillations, relativistic mechanics, canonical perturbation theory, continuum mechanics. Prerequisite: PHYS 4550 or equivalent.

**PHYS 6020** Classical Mechanics II 3
Continuation of PHYS 6010. Prerequisite: PHYS 6010.

**PHYS 6110** Electrodynamics I 3
Fundamental laws of electrostatics and magnetostatics; dielectric media, Maxwell’s equations, time varying fields, and electromagnetic waves. Waveguides and radiation by moving charges. Prerequisite: PHYS 4600 or equivalent.

**PHYS 6120** Electrodynamics II 3
Continuation of PHYS 6110. Prerequisite: PHYS 6110.

**PHYS 6210** Quantum Mechanics I 3
Advanced quantum mechanics stressing the formalism of states and operators in the study of quantum dynamics, angular momentum, symmetry and group theory, perturbation theory and scattering. Prerequisite: PHYS 4710 or equivalent.

**PHYS 6220** Quantum Mechanics II 3
Continuation of PHYS 6210. Prerequisite: PHYS 6210.

**PHYS 6240** Space Environment and Engineering 3
Study of space environment and models used for engineering analysis. Topics include considerations for engineering in the space environment such as plasma interactions, debris, chemical reactions, radiation effects, and thermal issues. Prerequisite: MATH 2250. Corequisite: ECE 5230. Also taught as ECE 6240.

**PHYS 6250** Cooperative Work Experience 1-6
Allows students to register for credit when working in a physics-related position. Prerequisite: Permission of department head prior to enrollment.

**PHYS 6310** Solar-terrestrial Physics I 3
Study of solar-terrestrial physics, including planetary magnetic fields, the interaction of the sun with planetary properties (magnetic fields and atmospheres), and an overview of ionospheric measurement techniques. Study of the upper atmosphere and the physics occurring in each of the layers and zones, including the equatorial and polar ionosphere. Prerequisite: PHYS 4600 or equivalent.

**PHYS 6320** Solar-terrestrial Physics II 3
Continuation of PHYS 6310. Prerequisite: PHYS 6310.

**PHYS 6330** Plasma Physics I 3
Characteristics of the plasma state and plasma generation; velocity distribution functions, collisions and Boltzmann’s equation; wave modes in a plasma; transport theory; plasma devices. Prerequisite: PHYS 4600 or equivalent.

**PHYS 6340** Plasma Physics II 3
Continuation of PHYS 6330. Prerequisite: PHYS 6330.

**PHYS 6410** Statistical Mechanics I 3

**PHYS 6420** Statistical Mechanics II 3
Continuation of PHYS 6410. Prerequisite: PHYS 6410.

**PHYS 6530** Solid State Physics I 3
Development of the modern theory of the solid state. Emphasis placed on understanding the bulk properties of the solids, including crystal structure, cohesive properties, electronic structure, and lattice dynamics. Explores response to added stimuli, such as electric, magnetic, and optical fields. Prerequisites: PHYS 4600 and 4710; PHYS 6410 (can be taken concurrently).

**PHYS 6540** Solid State Physics II 3
Continuation of PHYS 6530. Prerequisite: PHYS 6530.

**PHYS 6550** Physics of Materials I 3
Application of microscopic (quantum) and macroscopic (classical) physics to study materials properties (e.g., bonding, structure, atomic dynamics, electrical, magnetic, thermal, optical), characterization methods, and a survey of materials. Prerequisites: PHYS 3700, 4710.

**PHYS 6560** Physics of Materials II 3
Continuation of PHYS 6550. Prerequisite: PHYS 6550.

**PHYS 6650** Optics I 3
(dual listing 4650)
Topics include mathematics of wave motion, electromagnetic theory of light, light propagation, geometrical optics, and superposition of waves. For graduate (6000-level) credit, additional reading, recitation, use of optical-design software, and/or writing will be required. Prerequisite: PHYS/ECE 4650 or PHYS/ECE 6650. Also taught as ECE 6680/4680.

**PHYS 6680** Optics II 3
(dual listing 4680)
Topics include polarization, interference, diffraction, Fourier optics, coherence theory, and the quantum nature of light. For graduate (6000-level) credit, additional reading, recitation, use of optical-design software, and/or writing will be required. Prerequisite: PHYS/ECE 4650 or PHYS/ECE 6650. Also taught as ECE 6680/4680.

**PHYS 6910** Relativity I 3
Foundations of spacetime physics. Survey of the basics of special and general relativity, including kinematics, mechanics, and electrodynamics in flat spacetime, the description of curved spacetime, and the Einstein equations. Exact solutions, applications, tests, and the mathematical techniques of general relativity. Prerequisites: PHYS 6020, 6120.

**PHYS 6920** Relativity II 3
Continuation of PHYS 6910. Prerequisite: PHYS 6910.

**PHYS 6930** Quantum Field Theory I 3
Detailed study of the relativistic quantum description of scalar, spinor, and vector fields in spacetime. Topics include gauge theories, canonical and path integral quantization, and interactions.

**PHYS 6940** Quantum Field Theory II 3
Continuation of PHYS 6930. Prerequisite: PHYS 6930.

**PHYS 6970** Thesis Research 1-10
Advanced research under guidance of one or more faculty members.

**PHYS 6990** Continuing Graduate Advisement 1-15
Continuation of PHYS 6930. Prerequisite: PHYS 6930.

**PHYS 7210** Spacecraft Instrumentation 3
Theory, engineering, and data reduction techniques of spacecraft instrumentation for space science and spacecraft systems. Prerequisite: ECE 6240. Also taught as ECE 7210.

**PHYS 7500** Advanced Topics in Physics (Topic) 3
Explores issues in contemporary physics at the advanced graduate level.

**PHYS 7510** Seminar 1-3

**PHYS 7590** Continuing Graduate Advisement 1-9

®Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

### Plant Science (PLSC)

See Department of Plants, Soils, and Biometeorology, pages 459-472.

**PLSC 2100** BLS Introduction to Horticulture 3
Introduction to production of nursery, greenhouse, fruit, and vegetable crops. Explores residential and commercial landscape construction and management. Students also learn about interior plants, arbiculture, turf science, landscape plant materials, and home gardening. (F)

Overview of pest control considerations, procedures, and principles. Topics include integrated pest management, organic and chemical pest control, environmental considerations, safety, life cycles of pests, and commercial pesticide licensing. (Sp)

Provides credit for on-the-job training in jobs related to plants or soils. (F,Sp,Su)

Identification, culture, and utilization of woody ornamental plants in the landscape, including annual and perennial flowering plants, herbaceous ground covers, ornamental grasses, and herbs. (F)

Identification, culture, use, and maintenance of indoor foliage and flowering plants used in the interior plantscaping industry. (F)

Identification, culture, and utilization of woody ornamental plants in the landscape, including shade trees, flowering trees and shrubs, hedge plants, and vines. Review of native plants commonly used in the landscape. (F)

Identification of plants important in horticulture/agronomy and the morphological features making them useful for various agricultural purposes. (F)

Student-selected practical problems in horticulture and/or agronomy. (F,Sp,Su)

Principles of basic flower design using fresh, dried, and artificial flowers. Proper care of cut flowers and foliages. Basic plant physiology behind such principles. Lab fee required. (F)

Judging of potted ornamental plants and cut flowers for quality. Contemporary floral design and floral art. Prerequisite: PLSC 3010 or professional design experience. Lab fee required. (Sp)

Design and management of commercial greenhouse facilities. Production requirements of primary greenhouse crops. (Sp)

Methods, technology, and scientific basis of landscape, fruit, and vegetable gardening in the arid west. Interaction of gardening with the urban environment. This course is not currently being offered. For information about when it may be offered, contact the department.

Functional and aesthetic relationships of plants and structures in the landscape in connection with installation considerations. Use of imaging and CAD software in initial computer design layout. Prerequisite: PLSC 2620. Recommended: PLSC 2600. (Sp)

Principles and practices of landscape management, including plant site analysis, pruning, soil and irrigation management, pest management, equipment considerations, cost estimating, and sustainability. Prerequisites: PLSC 2600, 2620. (F)

Environmental effects on plant structure and function. Control of plant development for enhanced production of marketable goods. Introduction to principles using examples from horticulture and agronomy. Applications in these fields emphasized. Prerequisites: Integrated Science or comparable breadth course, BIOL 1010 or 1610. (Sp)

Propagation of plants by sexual and asexual means. Covers fundamental physiology of propagation, as well as cultural practices and techniques used in crop production. Recommended: BIOL 1610. (F)

Fundamentals of turfgrass science: species adaptation, identification, and cultural requirements; turfgrass growth and development; establishment; primary cultural practices (fertilization, irrigation, mowing); secondary cultural practices; pest management; integrated management planning for turfgrass systems. Prerequisite: BIOL 1010 or 1610. (F)

Explains why water conservation is important, and how water can be conserved through precision irrigation and conversion to low-water-use landscapes. This course is not currently being offered. For information about when it may be offered, contact the department.

Economic importance, use, distribution, origin, history, classification, identification, botanical nature, marketing, processing, storage, certification, grading, diseases, insects, commercial production, and improvement of cereal, root, and oilseed crops. Two lectures, one lab per week. (F odd)

Cultivation and management of legumes and grasses used throughout the world for grazing, stored feed, soil improvement, and conservation. Forage plant growth and development, nutrient and water utilization, and responses to environmental stress. Prerequisite: Integrated Science or comparable breadth course. (F even)

Forage production and pasture ecology. Explores crop performance in research and commercial applications. Prerequisite: BIOL 1010 or 1610. (F)

Cultivars, physiology, anatomy, propagation, sites, soils, climate, culture, irrigation, fertilizers, insects, diseases, integrated management, plant and fruit growth and development, harvesting, storage, pruning, orchard architecture, environmental protection, and economics for both tree and small fruits. Prerequisite: BIOL 1010 or 1610. (Sp)

Introduction to principles involved in cereal chemistry and processing. Covers starch chemistry, dry milling, wet milling, decortication, malting, and extrusion. Processing of all major cereals also covered. Prerequisite: MATH 1030 or STAT 1040 or completion of University Studies Quantitative Literacy (QL) requirement. (Sp Even)

Fertilization, irrigation, and cultivation practices for managed landscapes. Construction issues, including compaction, soil modification, and specialized construction practices for golf courses and sports turf. Prerequisites: SOIL 3000, PLSC 3800. (Sp)

Explores how principles of evapotranspiration, soil and plant properties, and urban landscape sprinkler irrigation systems can be combined for proper irrigation scheduling. Evaluating and analyzing landscape water demand. (Sp)

Qualitatively analyzes the relationship between physiological processes and growth of whole plants. Energy balance and water use efficiency. Light interception and canopy geometry. Canopy photosynthesis and respiration. Carbon partitioning and source/sink relationships. Prerequisites: BIOL 4400, MATH 1050, or consent of instructor. (Sp)
PLSC 5210  |  Crop Physiology Laboratory  |  1  
(dual listing 6210)  
Measurement and analysis of physiological processes that result in whole plant growth. Includes an individual lab project. Take concurrently with PLSC 5200 or 6200. (Sp)

PLSC 5300  |  Principles of Cytogenetics*  |  3  
Examination and analysis of variation in chromosome structure, behavior, and number. Includes discussions of developmental and evolutionary effects of this variation, and practical applications in plant and animal genetics. Prerequisite: BIOL 3060. (Sp)

PLSC 5400  |  Low Water Landscaping  |  3  
(dual listing 6400)  
Examines and ecosystems, emphasizing the Intermountain West, and recreating such ecosystems in a range of amenity landscapes. Also covers procurement, propagation, establishment, and maintenance of plants appropriate for low water landscapes. Also taught as LAEP 5400/6400. (F)

PLSC 5420 CI  |  Forest and Shade Tree Pathology  |  3  
Nature, cause, and management of forest diseases. Also taught as BIOL 5420 and FRWS 5420. (Sp)

PLSC 5430  |  Plant Nutrition***  |  2  
(dual listing 6430)  
Mechanisms of nutrient acquisition, rhizosphere interactions, root morphology and distribution, short- and long-distance transport, nitrogen fixation, and biochemical function of essential and beneficial elements. (F odd)

PLSC 5440  |  Plant Molecular, Cellular, and Developmental Biology I**  |  3  
Examines background and recent advances. Students analyze and discuss structure, genome, molecular development, and photosynthesis topics from a research perspective. Prerequisites: BIOL 3060, 5210; CHEM 3700 or 5710. Also taught as BIOL 5440/6440. (Sp)

PLSC 5450  |  Plant Molecular, Cellular, and Developmental Biology II**  |  3  
Examines background and recent advances. Students analyze and discuss cell wall, growth regulator, and environmental response topics from a research perspective. Prerequisites: BIOL 3060, 5210; CHEM 3700 or 5710. Also taught as BIOL 5450/6450. (Sp)

PLSC 5550  |  Weed Biology and Control  |  4  
(dual listing 6550)  
Management strategies for undesirable plant species in native and agroecosystems. Interference and allelopathy, undesirable plant invasion and spread, noxious weed eradication principles and practices, integrated plant management strategies, herbicide interactions with weeds and crops, and economics of management emphases. (F)

PLSC 5600  |  Plant Water Relations  |  2  
(dual listing 6600)  
Explores basic concepts such as the soil-plant-atmosphere continuum. Explains how water affects the physiological processes that control the quantity and quality of growth. Includes discussion of crop physiology and plant physiology. (F)

PLSC 5650  |  Urban/Community Forestry  |  3  
Social, biological, and administrative aspects of managing urban/community forests, including field and classroom exercises and a management planning project. Also taught as FRWS 5650. (Sp)

PLSC 5700  |  Principles of Plant Breeding***  |  3  
Principles of plant breeding. Breeding techniques for self-pollinated, cross-pollinated, and asexually reproducing crops. Real-life breeding problems solved, showing that resource identification and allocation are the critical points in developing a successful program. Prerequisite: BIOL 3060. (Sp)

PLSC 5750  |  Crop Biotechnology*  |  2  
Genetic and cellular approaches to crop improvement. Emphasizes cell culture, transformation, markers, marker-assisted selection, mapping simple and quantitatively inherited traits, fine mapping, gene cloning, mutagenesis, and microarrays bioinformatics. Prerequisite: BIOL 3060. (Sp)

PLSC 5760  |  Crop Ecology  |  2  
Features of agroecosystems compared with natural ecosystems; input of energy and materials to manipulate agroecosystems and produce maximum, sustained quality and yield of agricultural products. Prerequisites: BIOL 4400, PLSC 5200/6200, or instructor's consent. Will not be taught Spring 2006. Contact department for further information. (Sp)

PLSC 6100  |  Landscape Irrigation Management  |  3  
(dual listing 5100)  
Explores how principles of evapotranspiration, soil and plant properties, and urban landscape sprinkler irrigation systems can be combined for proper irrigation scheduling. Evaluating and analyzing landscape water demand. (Sp)

PLSC 6200  |  Crop Physiology  |  2  
(dual listing 5200)  
The relationship between physiological processes and growth of whole plants. Energy balance and water use efficiency. Light interception and canopy geometry. Canopy photosynthesis and respiration. Carbon partitioning and source/sink relationships. Prerequisites: BIOL 4400, MATH 1050, or consent of instructor. (Sp)

PLSC 6210  |  Crop Physiology Laboratory  |  1  
(dual listing 5210)  
Measurement and analysis of physiological processes that result in whole plant growth. Includes an individual lab project. Take concurrently with PLSC 6200 or 5200. (Sp)

PLSC 6220  |  Professional Experience in Water Efficient Landscaping  |  6  
Internship component of water efficient landscaping master’s program. Summer employment with water purveyors, consulting firms, and businesses involved in landscape irrigation. (Su)

PLSC 6230  |  Readings in Landscape Water Conservation  |  1  
Background topics in water development and policy in the West. Current topics on various aspects of water conservation in urban landscapes. (Sp)

PLSC 6240  |  Water Efficient Landscaping Seminar  |  2  
Students develop skills in public speaking by presenting their summer internship experience to the Plants, Soils, and Biometeorology faculty. Students also work on a culminating academic endeavor for the program. (F)

PLSC 6400  |  Low Water Landscaping  |  3  
(dual listing 5400)  
Examines and ecosystems, emphasizing the Intermountain West, and recreating such ecosystems in a range of amenity landscapes. Also covers procurement, propagation, establishment, and maintenance of plants appropriate for low water landscapes. Also taught as LAEP 6400/5400. (F)

PLSC 6430  |  Plant Nutrition***  |  2  
(dual listing 5430)  
Mechanisms of nutrient acquisition, rhizosphere interactions, root morphology and distribution, short- and long-distance transport, nitrogen fixation, and biochemical function of essential and beneficial elements. (F odd)

PLSC 6440  |  Plant Molecular, Cellular, and Developmental Biology I**  |  3  
Examines background and recent advances. Students analyze and discuss structure, genome, molecular development, and photosynthesis topics from a research perspective. Prerequisites: BIOL 3060, 5210; CHEM 3700 or 5710. Also taught as BIOL 6440/5440. (Sp)

PLSC 6450  |  Plant Molecular, Cellular, and Developmental Biology II**  |  3  
Examines background and recent advances. Students analyze and discuss cell wall, growth regulator, and environmental response topics from a research perspective. Prerequisites: BIOL 3060, 5210; CHEM 3700 or 5710. Also taught as BIOL 6450/5450. (Sp)

PLSC 6550  |  Weed Biology and Control  |  4  
Management strategies for undesirable plant species in native and agroecosystems. Interference and allelopathy, undesirable plant invasion and spread, noxious weed eradication principles and practices, integrated plant management strategies, herbicide interactions with weeds and crops, and economics of management emphases. (F)
### Course Descriptions

**PLSC 6570  **Herbicide Physiology and Mode of Action*  3
Entrance, movement, and metabolism of major herbicides; and a critical study of the physiological processes affected by them. Prerequisites: BIOL 4400, PLSC 6550/5550 or instructor’s consent. (Sp)

**PLSC 6600  **Plant Water Relations  2
(dual listing 5600)
Explores basic concepts such as the soil-plant-atmosphere continuum. Explains how water affects the physiological processes that control the quantity and quality of growth. Includes discussion of crop physiology and plant physiology. (F)

**POLS 3160  **Practicing American National Government  3
Includes survey of legislative, executive, and judicial governing. Offers academic basis for Washington, DC experience. (F,Sp, Su)

**POLS 3170  **Law and Economics  3
Explains legal and political rules, the organization of government, and other institutional processes. Uses standard microeconomic tools and concepts, such as scarcity, choice, preferences, incentives, and supply and demand. Prerequisite: POLS 1100. Also taught as ECON 3170. (F)

**POLS 3180  **Introduction to Public Administration  3
Overviews management of United States governmental affairs. Helps students understand how the government is structured to accomplish the execution and implementation of public policy. Prerequisite: POLS 1100. (F)

**POLS 3190  **DSS Gender, Power, and Politics*  3
Examines the question of gender inequality in politics, focusing on contemporary political issues cross-culturally and in different political systems. (F)

**POLS 3210  **DSS Western European Government and Politics**  3
Britain, France, Germany, Scandinavia, and the European Union. (F)

**POLS 3220  **DSS Russian and East European Government and Politics*  3
(F)

**POLS 3230  **Middle Eastern Government and Politics**  3
General overview of political cultures and political developments in the Middle East. (F)

**POLS 3250  **DSS Chinese Government and Politics  3
(F)

**POLS 3270  **DSS Latin American Government and Politics**  3
Survey of most of the governments and politics of Latin America, emphasizing events, policies, and governmental actions of the past decade. (F)

**POLS 3310  **DSS American Political Thought  3
Survey of American political thought from colonial times to the present. (F)

**POLS 3320  **The Foundations of American Constitutionalism  3
Introduces students to debate over constitutions, constitutionalism, and constitution-making which occurred during the period (roughly) from the Revolution to the election of 1800.

**POLS 3400  **DSS United States Foreign Policy  3
Formulation, execution, and impact of United States foreign policy. (F,Sp)

**POLS 3430  **Political Geography  3
The relationship between earth and state. World political phenomena studied from a geographic point of view, including international boundaries, territorial seas, and landlocked states. Also taught as GEOG 3430. (Sp)

**POLS 3810  **DSS Introduction to Public Policy  3
Examines different approaches to the study of public policy and different value dimensions in the design of policies. (F)

**POLS 4000  **Political Analysis  3
Political data, quantitative and analytical techniques. Prerequisite for majors: POLS 3000. (F)

**POLS 4120  **American Constitutional Law  3
Analyzes the separation of powers, checks and balances, federalism, the Bill of Rights, and other constitutional amendments. (F)

**POLS 4130  **Constitutional Theory  3
Introduces students to modern constitutional theory, with particular emphasis on American constitutional theory. Prerequisite: POLS 1100. (Sp)

**POLS 4140  **Political Organizations  3
Focuses on formal and informal constitutional rules, examining how different sets of rule structures impact the collective decisions of individuals in society and how individuals can influence or shape the rules structuring their lives. Prerequisite: POLS 1100.

---

### Political Science (POLS)

See Department of Political Science, pages 473-478.

**POLS 1100  **BAI United States Government and Politics  3
U.S. Constitution, political parties and elections, interest groups, Congress, president, bureaucracy, courts, and civil rights and liberties. This course meets the Americanization requirement. (F,Sp)

**POLS 2100  **Introduction to International Politics  3
Analysis of the nation-state system as well as interdependence of the global community. (F,Sp)

**POLS 2200  **BSS Comparative Politics  3
Comparisons of differences in political culture, institutions, and processes, including authoritarian and democratic systems, violence and corruption, political development, and public policy. (F,Sp)

**POLS 2300  **Introduction to Political Theory (formerly POLS 2350)  3
A survey course covering ancient and modern political theory. (F,Sp)

**POLS 3000  **QI Introduction to Political Research  3
Methodology, methods, and approaches used to study and analyze political events and relationships, including the use of library resources. Prerequisite: STAT 1040 or MATH 1030. (F,Sp)

**POLS 3100  **Global Issues*  3
The origins and consequences of conflict and cooperation in an interdependent global community are examined in order to analyze how transnational, as well as competing national, interests and institutions affect economic, political, and environmental choices and outcomes. (F)

**POLS 3110  **DSS Parties and Elections**  3
Political parties, campaigns, and elections. (Sp)

**POLS 3120  **DSS Law and Politics  3
Examines history, processes, and theories underlying American law and politics. Makes selective comparison of the American legal system with other legal systems. (F)

**POLS 3130  **DSS United States Legislative Politics  3
Legislative process. (Sp)

**POLS 3140  **DSS The Presidency*  3
Examines the origins, purposes, and scope of the executive power in the American constitutional system. (F)

**POLS 3150  **State and Local Government  3
Includes state and local politics, in addition to metro-urban politics. (Sp)

**POLS 3160  **Practicing American National Government  3
Includes survey of legislative, executive, and judicial governing. Offers academic basis for Washington, DC experience. (F,Sp, Su)

Course Descriptions

POLS 5940 Administrative Internship 1-12®
A semester administrative internship at the local or state level. Instructor approval required. (F,Sp,Su)

POLS 6010 Research Design 3
A graduate survey of the philosophy and methods of political analysis. Topics ranging from the methodology of inquiry to elementary statistical methods will be covered. (F)

POLS 6020 Public Policy Analysis 3
Examines and reviews leading theories of policy analysis and the policy-making process at an advanced level. (Sp)

POLS 6030 Political Theory, Political Economy, and Capitalism 3
Provides an introduction to the study of political economy by considering the connections among political theory, political economy, and capitalism. This course is not currently being offered. For information about when it may be offered, contact the department.

POLS 6040 Public Choice 3
Introduction to applying the microeconomic theory of markets to political processes. This course is not currently being offered. For information about when it may be offered, contact the department.

POLS 6100 Introduction to Public Administration 3
Introduction to issues of public and nonprofit management. Provides overview of macro and micro forces influencing public and nonprofit management.

POLS 6110 Budgeting and Finance 3
Surveys all major activities concerning allocation, investment, and control of public funds, as well as budgeting and revenues in context of fiscal policy making (Alt Sp)

POLS 6120 Program Assessment and Evaluation 3
Practical guidelines for conducting evaluation studies. Discussion of performance measurement, social indicators, quantitative and qualitative methods, and experimental and quasi-experimental designs as used in applied policy and program research. (Alt F)

POLS 6130 Law and Administration 3
Exploration and analysis of constitutional and legal basis in which American Public Administration is set, including separation of powers, checks and balances, delegation of discretionary authority, and common law and equity. (Alt Su)

POLS 6140 Leadership in Public Organizations 3
Analysis of leadership behavior and managerial activities. Examination of major theories of leadership and motivation, including leadership vs. management, leadership qualities and characteristics, and leadership skills. (Alt Su)

POLS 6210 Conflict and Security 3
Examines the many causes of conflict at different levels. Identifies the means by which resolution can be achieved, as well as the challenges and barriers associated with such efforts. (Sp)

POLS 6220 International Relations Theory 3
Reading seminar on theory and method in the interplay of politics and economics in international relations. This course is not currently being offered. For information about when it may be offered, contact the department.

POLS 6230 Terrorism and Counter-Terrorism** 3
Explores the history, causes, and consequences of terrorism, as well as its impact on the global arena. Teaches students why understanding of terrorism is crucial, in order to allow effective, intelligent responses. (Sp)

POLS 6240 Democratic Theories and Practice 3
Examines the “classic” alternative understanding in the history of political thought, regarding the reasons people go to war. Explores consequent proposals to erase the sources or alleviate the results of armed conflicts. (F,Sp)

POLS 6400 United States Foreign Policy 3
Examines the “classic” alternative understanding, in the history of political economy, ranging from the 18th Century to writings of the 21st Century. (F)

POLS 6810 Graduate Seminar 1-4®
American politics; comparative politics; political theory; international politics; public law; public administration. (F,Sp,Su)

POLS 6910 Graduate Tutorial 1-3®
Prerequisite: instructor’s consent. (F,Sp,Su)

POLS 6920 Internship 1-15®
Internship in a public administration agency. Instructor approval required. (F,Sp,Su)

POLS 6970 Thesis Research 1-9®
Prerequisite: admission to candidacy. (F,Sp,Su)

POLS 6990 Continuing Graduate Advisement 1-3®
Can be counted for graduation.

POLS 6999 Continuing Graduate Advisement 1-3®
This course is also offered by online correspondence and/or CD through Continuing Education Time Enhanced Learning.

POLS 6960 Continuing Graduate Advisement 1-3®

POLS 6961 Continuing Graduate Advisement 1-3®

POLS 6962 Continuing Graduate Advisement 1-3®

POLS 6963 Continuing Graduate Advisement 1-3®

POLS 6964 Continuing Graduate Advisement 1-3®

POLS 6965 Continuing Graduate Advisement 1-3®

Portuguese (PORT)

See Department of Languages, Philosophy, and Speech Communication, pages 364-379.

PORT 1010 Portuguese First Year I 4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. (F)

PORT 1020 Portuguese First Year II 4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Prerequisite: PORT 1010 or equivalent. (F,Sp)

PORT 1050 Intensive Portuguese for Spanish Speakers 4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Intensive course for Spanish speakers. (Sp)

PORT 2010 Portuguese Second Year I 4
Continued development of communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Prerequisite: PORT 1020 or equivalent. (F)

PORT 2020 Portuguese Second Year II 4
Continued development of communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Prerequisite: PORT 2010 or equivalent. (Sp)

PORT 2880 Individual Readings 1-4®
Individual study of selected readings in Portuguese. Instructor’s permission required. (F,Sp)

PORT 3040 CI Advanced Portuguese Grammar and Composition 3
Review of the more complex Portuguese grammatical points and development of writing skills through composition. Prerequisite: PORT 2020 or equivalent. (F,Sp)
## Course Descriptions

### PORT 3570  
**Brazilian Culture and Civilization  3**  
| Historical, social, political, economic, and cultural conditions and institutions of Brazil. (F) |

### PORT 3630  
**Survey of Brazilian Literature  3**  
| Selected readings and discussions of major works and authors in Brazilian literature. Prerequisites: PORT 3040 and 3570. (Sp) |

### PORT 3800  
**Portuguese III Study Abroad  1-4**  
| Intense review of selected problematic areas of Portuguese grammar for students with advanced language skills. Prerequisite: PORT 2020 or equivalent. Taught only in USU’s overseas Portuguese program. (Su) |

### PORT 4880  
**Individual Readings  1-4**  
| Readings in Brazilian and/or Portuguese literature. Prerequisite: Instructor’s permission. (F,Sp) |

### PORT 4920  
**Portuguese Language Tutoring  1**  
| Allows students to develop tutoring skills by assisting professors in lower-division courses or fulfilling instructional duties for a comparable amount of time in the language laboratory, public schools, or similar activities with departmental approval. May be repeated to a maximum of 3 credits. Prerequisite: Permission of instructor. (F,Sp,Su) |

### PRP 3000  
**Recreation Programming  3**  
| Studies recreation programming, including methods, models, and classification. Also includes analysis of activities, organizational structures, and evaluation techniques. (Sp) |

### PRP 3200  
**Recreation Event Planning and Management  3**  
| Explores principles of special event and festival planning, emphasizing development and integration of operational strategies. Concentrates on conceptualization, analysis, economic impacts, marketing, and evaluation of small-scale to large-scale community events. Prerequisite: PRP 3000. (F,Sp) |

### PRP 3500 CI  
**Community Recreation Administration  3**  
| Examines community recreation organization with emphasis on administrative skills and functions, including budgeting, personnel management, and grantsmanship. Prerequisites: PRP 1000 and 3000. (F) |

### PRP 3750  
**Commercial Recreation and Tourism  3**  
| Examines history, organization, and management of commercial recreation and tourism enterprises. Studies entrepreneurship, feasibility, marketing, and management of projects. (Sp) |

### PRP 3900  
**Introduction of Therapeutic Recreation for Diverse Populations  3**  
| Explores characteristics, behaviors, and programming techniques used to meet recreational needs of varied population groups and all degrees of disabilities. (F) |

### PRP 4000  
**Therapeutic Recreation  3**  
| Examines special population groups served by recreation, including institutional procedures, clinical application, and activity programming. Prerequisite: PRP 3900. |

### PRP 4200  
**Advanced Therapeutic Recreation*  3**  
| Examines current trends and issues in therapeutic recreation and how they affect the therapeutic recreation profession. Instruction in licensing requirements for eligibility for TRT and TRS licensure and certification. Prerequisite: PRP 4000. |

### PRP 4250  
**Advanced Cooperative Work Experience  1-12**  
| Cooperative education work experience with increased levels of complexity, wherein students gain a more professional level of experience as they advance toward completion of the program. (F,Sp,Su) |

### PRP 4300  
**Legal Aspects of Recreation and Leisure  3**  
| Focuses on legal aspects of recreation and park programs, management, and administration. Provides basic knowledge and understanding of risk management process, legal terms, and their application. Prerequisites: PRP 1000 and 3000. (Sp) |

### PRP 4400  
**Recreation Facility Design and Management  3**  
| Studies recreation park facility design and management issues including: feasibility studies, master plans, features, trends and issues in equipment design, maintenance, accessibility, and safety. Prerequisite: PRP 3000. (F) |

### PRP 4700  
**Internship Seminar  1**  
| In preparation for PRP 4750, students identify internships and prepare written materials and objectives for internship assignment. (Sp) |

### PRP 4750  
**Recreation Internship  6**  
| Practical, off-campus management experience with cooperating parks and recreation agency. Prerequisites: PRP 1000, 3000, 4300, 4700; and 200 hours of documented work experience. (F,Sp,Su) |

### PRP 4970H  
**Honors Senior Thesis  1-6**  
| Culminating experience within the department for honors students. Student works closely with faculty mentor in an extensive project in the student’s area of interest. (F,Sp,Su) |

### PRP 5000 CI  
**Seminar in Recreation  3**  
| Student analysis, papers, and presentations of current issues and problems in recreation. Includes discussions with professionals and development of resume. Prerequisites: PRP 1000, 2500, 3500, 3750, 3900, 4000, 4400. (F,Sp) |

### PRP 5900  
**Independent Study  1-3**  
| Students work on special projects and research out of the classroom, with approval and guidance of instructor. (F,Sp,Su) |

### PRP 5910  
**Independent Research  1-3**  
|  |

---

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

*This course is taught alternating years. Check with department for information about when course will be taught.
Course Descriptions

Plants, Soils, and Biometeorology (PSB)

See Department of Plants, Soils, and Biometeorology, pages 459-472.

**PSB 1050 Plants, Soils, and Biometeorology Orientation 1-2**
Orientation to the teaching, research, and extension programs of the department, and to career opportunities. Optional orientation to a specific major: Horticulture, Crop Science, or Environmental Soil/Water Science. (F)

**PSB 2040 Introduction to Biotechnology 1**
Introduces freshmen to the emerging field of biotechnology and the impact this technology has on society. Also taught as ADVS 2040, BIOL 2040, and NFS 2040. (Sp)

**PSB 2800 Fundamentals of Organic Agriculture 3**
Organic agriculture uses a holistic systems approach for maintaining plant, animal, and soil health. In this course, animal and crop production approaches and disease, as well as insect and weed management strategies, are scientifically assessed, critically compared, and used in decision making and problem solving exercises. (Sp)

**PSB 4250 Internship in Plants, Soils, and/or Biometeorology 1-4**
Professional internship in crop science, horticulture, environmental soil/water science, and/or biometeorology. (F,Sp)

**PSB 4800 Teaching Practicum for Undergraduate Students 1-3**
Offers undergraduate students an opportunity for guided teaching and methods for student evaluation in a variety of Plants, Soils, and Biometeorology courses. Taught infrequently. Contact department for further information. (F,Sp)

**PSB 4890 CI Senior Seminar 1**
Student preparation for careers. Familiarization with placement processes. Discussion of role in society and career opportunities for graduates. Experiences in team building. Opportunities for oral presentations of solutions to current issues and scientific information. Must take during both fall and spring semesters. (F,Sp)

**PSB 4900 Special Problems 1-4**
Special topics and problems in crop science, horticulture, environmental soil/water science, and/or biometeorology. Subject, time, and credit arranged individually as needed. Department approval required. (F,Sp,Su)

**PSB 5160 Methods in Biotechnology: Cell Culture 3**
Techniques and fundamental knowledge for culturing mammalian and insect cells. Students will learn maintenance, growing, genetic engineering of cells, cytotoxicity, hybridoma creation, cloning, etc. Extensive laboratory experience is provided. Also taught as ADVS 5160, BIOL 5160, and NFS 5160. (F)

**PSB 5200 Site-Specific Agriculture and Landscape/Horticultural Management 3**
Integration of site-specific management technology, such as computers, GPS, yield monitors, variable rate controllers, mechanized samplers, and postharvest processing controllers with planning, tillage, planting, chemical applications, and harvesting to optimize off-site inputs and environmental/economical sustainability in crop or landscape management. (Sp)

**PSB 5240 Methods in Biotechnology: Protein Purification Techniques 3**
Reviews basic methods of protein purification, including scaled-up use of 100L fermenter, large-scale centrifugation, dialfiltration, chromatography, and use of BioCAD. Prerequisite: CHEM 3700. Also taught as ADVS 5240, BIOL 5240, and NFS 5240. (Sp)

**PSB 5260 Methods in Biotechnology: Molecular Cloning 3**
Laboratory-oriented course designed to teach molecular biology techniques such as DNA cloning, genetic probes, polymerase chain reaction, and DNA sequencing. Prerequisite: CHEM 3700 or 5710; or BIOL 3060; or permission of instructor. Also taught as ADVS 5260, BIOL 5260, and NFS 5260. (F)

**PSB 5370 Molecular Methods in Nutrition Science (dual listing 6370) 2**
Theory of modern techniques used to study macromolecules and ions. Prerequisite: CHEM 3700. Also taught as ADVS/BIOL/NFS 5370/6370. (F)

**PSB 6370 Molecular Methods in Nutrition Science (dual listing 5370) 2**
Theory of modern techniques used to study macromolecules and ions. Prerequisite: CHEM 3700. Also taught as ADVS/BIOL/NFS 6370/5370. (F)

**PSB 6700 Integrative Topics in Plants, Soils, and Biometeorology 1-3**
Team-taught special topics course encouraging interdisciplinary analysis of a research or policy area from the current literature, encompassing the three departmental subdisciplines. Emphasis on written and oral student presentations. This course is not currently being offered. For information about when it may be offered, contact the department.

**PSB 6800 Graduate Student Teaching Practicum 1-3**
Offers graduate students an opportunity for guided teaching and methods for student evaluation in a variety of Plants, Soils, and Biometeorology courses. (F,Sp)

**PSB 6890 Plants, Soils, and Biometeorology Graduate Seminar 1**
Review and critique of presentations. Communication practice in extemporaneous, extension, research, poster, and lecture presentations. PSB graduate students must enroll during both fall and spring semesters. (F,Sp)

**PSB 6900 Special Problems in Plants, Soils, and/or Biometeorology 1-8**
Must take during both fall and spring semesters. (F,Sp,Su)

**PSB 6970 Research and Thesis 1-18**
Must take during both fall and spring semesters. (F,Sp,Su)

**PSB 6990 Continuing Graduate Advisement 1-12**
Must take during both fall and spring semesters. (F,Sp,Su)

**PSB 7800 Graduate Student Teaching Practicum 1-3**
Offers graduate students an opportunity for guided teaching and methods for student evaluation in a variety of Plants, Soils, and Biometeorology courses. (F,Sp)

**PSB 7890 Plants, Soils, and Biometeorology Graduate Seminar 1**
Review and critique of presentations. Communication practice in extemporaneous, extension, research, poster, and lecture presentations. PSB graduate students must enroll during both fall and spring semesters. (F,Sp)

**PSB 7900 Special Problems in Plants, Soils, and/or Biometeorology 1-8**
Must take during both fall and spring semesters. (F,Sp,Su)

**PSB 7970 Research and Thesis 1-18**
Must take during both fall and spring semesters. (F,Sp,Su)

**PSB 7990 Continuing Graduate Advisement 1-12**
Must take during both fall and spring semesters. (F,Sp,Su)

Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Psychology (PSY)

See Department of Psychology, pages 479-488.

Note: Prerequisites for Psychology courses are strictly enforced. In the course listings below, prerequisites are indicated at the end of course descriptions. A student must be admitted as a psychology major or must complete at least 45 semester credits with a GPA of 3.0 or higher prior to taking psychology courses numbered 3000 or above. However, students who have been admitted to the Teacher Education program may take PSY 3660, provided they have met the prerequisites. A student must be admitted as a psychology major or must attend an orientation sponsored by the major department. (F,Sp,Su)
Course Descriptions

**PSY 1010 BSS General Psychology** 3
Explores basic areas of psychology, and how each explains human thought and behavior at the individual, familial, and cultural levels. (F,Sp,Su)

**PSY 1100 Developmental Psychology: Infancy and Childhood** 3
Introduction to psychological development with emphasis on perceptual, language, cognitive, and social development in children. Prerequisite: PSY 1010. (F,Sp)

**PSY 1210 Psychology of Human Adjustment** 3
Examination of life situations affecting human adjustment to everyday living, with emphasis on practical applications. Prerequisite: PSY 1010. (F,Sp)

**PSY 1220 Career and Life Planning** 3
Students assess and clarify their interests, values, skills, and temperaments. Emphasizes discovering relationships between these personal characteristics and the realities of educational and employment opportunities. Explores setting goals, creating action plans, and coping with change. (F,Sp)

**PSY 1400 Analysis of Behavior: Basic Principles** 3
A laboratory course about the scientific methods used in the study of animal and human behavior. Prerequisite: PSY 1010. (F,Sp,Su)

**PSY 1410 Analysis of Behavior: Basic Principles Lab** 1
Laboratory experience accompanying PSY 1400. Prerequisite: PSY 1010. (F,Sp,Su)

**PSY 1730 Strategies for Academic Success** 1-3
Orients students to the systems, tools, and resources unique to higher education that are needed to maximize academic success (e.g., library, computer lab use, etc.). Also helps students develop critical thinking, study, and learning strategies necessary for college success. (F,Sp)

**PSY 1750 Comprehension Strategies for College Reading** 1
Practical course emphasizing application of strategies and development of critical thinking skills needed to comprehend and distill meaning from college-level texts. (F,Sp)

**PSY 2100 Developmental Psychology: Adolescence** 3
Characteristics of adolescents and their psychological, educational, and adjustment problems are discussed in detail. Prerequisite: PSY 1010. (Sp)

**PSY 2250 Introductory Cooperative Work Experience** 1-6
Educators and employers cooperate to provide opportunities for students to apply classroom theory and principles in job environments, thereby gaining practical experience in their field. Prerequisite: Approval of Psychology Department coop education counselor. (F,Sp,Su)

**PSY 2800 QI Psychological Statistics** 3
Elementary study of statistical procedures in handling test scores and other data, and of the concepts needed for each current type of educational and psychological literature. Prerequisite: STAT 1040. (F,Sp)

**PSY 2950 Orientation to Psychology as a Career and Profession** 3
As an orientation to psychology, students clarify goals, identify steps necessary to achieve goals, prepare a vita, and gain skills in a variety of important tools for the major (including APA writing, ethics, and library usage). Prerequisites: PSY 1010 and consent of Psychology Advising Office. (F,Sp,Su)

**PSY 3110 Health Psychology** 3
Introduction to “biopsychosocial model” of health and well-being. Focuses on reciprocal interactions among biological, psychological, and social factors in human functioning and disease. Explores cultural approaches to health, illness, and treatment. Prerequisite: PSY 1010. (Sp)

**PSY 3120 DSS Abuse, Neglect, and the Psychological Dimensions of Intimate Violence** 3
Overview of child maltreatment, animal abuse, dating, courtship, domestic violence, and abuse of the elderly. Stresses the psychological factors related to the causes, consequences, and treatment of abuse and neglect. Presents multidisciplinary perspectives, including historical, legal, medical, psychiatric, and psychological approaches. Prerequisite: PSY 1010. (F,Sp)

**PSY 3210 DSS Abnormal Psychology** 3
Introduction to “abnormal” human behavior. Covers characteristics, etiology, and treatment of a variety of psychological disorders. Prerequisite: PSY 1010. (F,Sp)

**PSY 3400 DSS Analysis of Behavior: Advanced** 4
In-depth examination of principles introduced in PSY 1400. Considers principles governing more complex human and animal behavior, as well as emotional and motivational factors in behavior. Lab included as part of credit. Prerequisites: PSY 1400 and 1410. (F,Sp)

**PSY 3450 Perception and Psychophysics** 3
Analysis of how sensory processes and principles help determine behavior. Introduction to methods used to measure sensory-determined behavior. Methods, results, and principles of sensory communication. Lab required as part of 3 credits. Prerequisite: PSY 1010. (F)

**PSY 3460 Physiological Psychology** 3
Introductory course examining relationship between central system anatomy and physiology, and behavior and emotional functioning. Also considers neural and biochemical substrates of behavior. Lab required as part of 3 credits. Prerequisite: PSY 1010. (Sp)

**PSY 3500 DSS Scientific Thinking and Methods in Psychology** 3
Social science research is commonly reported by the media, and by political and governmental interests. Students learn how to legitimately interpret such research through a study of accepted research methods and analysis procedures, and through critical study of the common interpretive mistakes made by media writers. Prerequisite: PSY 1010. (F,Sp)

**PSY 3510 DSS Social Psychology** 3
Study of the individual in society; problems, theories, and methods of social psychology; will relate reading assignments to current social issues. Prerequisite: PSY 1010. (F,Sp)

**PSY 3550 DSS Multicultural Psychology** 3
Principles and practices for development of conditions for effective learning. Lab required. Prerequisite: PSY 1100 or 2110. (F,Sp)

**PSY 3720 Behavior Modification** 3
Approaches to behavior modification in a variety of settings. Students required to complete an individual project. Prerequisites: PSY 1010, 1400, 1410, 3400. (Sp)

**PSY 4000 Mental Aspects of Sports Performance** 3
Provides an understanding of theory and applications in the specialty area of sports psychology, including enhancement of motivation and performance, stress, anxiety, aggression and time management, and the relation of these issues to physical development and coaching styles. Also taught as PEP 4000. (F,Sp,Su)

**PSY 4210 DSS Personality Theory** 3
Explanatory study of various personality theories, their origin, and approaches to the understanding of human behavior. Prerequisites: PSY 1010 and 2800. (Sp)

**PSY 4230 DSS Psychology of Gender** 3
Critical analysis of evidence for sex differences, gender roles, the effect of gender on traditional psychology, and other topics, including parenthood, cultural influence, and sexual orientation. (Sp)

**PSY 4240 DSS Multicultural Psychology** 3
Explores cultural influences on basic psychological processes, including perception, cognition, language, emotion, intelligence, attitudes, values, and intergroup relations. Prerequisite: PSY 1010. (F)
Course Descriptions

**PSY 4250** Advanced Cooperative Work Experience 1-12
Cooperative education work experience position; increased level of complexity and a more professional level of experience as student advances toward completion of the program. Prerequisite: Approval of Psychology Department cooperative education coordinator. (F,Sp,Su)

**PSY 4420** DSS Cognitive Psychology 3
In-depth study of basic concepts, methods, and theories involved in perception, memory, and thinking. Lab required. Prerequisite: PSY 1010. (Sp)

**PSY 4430** Cognitive Psychology Laboratory 1
Required laboratory, designed to accompany PSY 4420. Focuses on conducting cognitive experiments via computer simulations and sampling data collection. Designed to increase skills in designing data collection and interpreting experimental data. (Sp)

**PSY 4510** CI Effective Social Skills Interventions 3
Examination of theory and practice of social skills training with children, adolescents, and adults. Prerequisites: PSY 1010, 1100, and either PSY 3210 or 3510. (Sp)

**PSY 4790** Psychological Principles and Individuals (dual listing 6790) who are Deaf and Hard of Hearing 3
Psychological theories and research used to describe the deaf and hard of hearing. Exploration of principles that can be used in helping these individuals achieve emotional well-being. Also taught as COMD 4790/6790. (Sp)

**PSY 4910** Undergraduate Research Creative Opportunity 1-3
A cooperative process of discovery, investigation, research, or creativity between faculty and one or more students. Prerequisite: Approval of Psychology Department URCO coordinator. (F,Sp,Su)

**PSY 4920** Practicum 1-3
Field work in applied psychological setting at BS level. (F,Sp,Su)

**PSY 5020** Multicultural Issues in Psychology 3
Examines role of culture in human development, with emphasis on understanding relations between culture, ethnicity, and identity and how images of "cultural selves" and "cultural others" are produced and "naturalized." (F)

**PSY 5050** Psychological Aspects of (dual listing 6050) Sports Performance 3
Psychological theory and principles applied to sports. Includes motivational techniques, psychological evaluation, stress and anxiety in sports, personality and sports performance. Also taught as PEP 5050/6050. (Sp)

**PSY 5100** History and Systems of Psychology 3
Theoretical and historical developments in psychology with primary emphasis on nineteenth and twentieth century developments, although earlier precursors are also considered. Prerequisite: PSY 1010. (Sp)

**PSY 5200** CI Introduction to Interviewing and Counseling 3
Theory, models, and practice in basic principles of interviewing and counseling, including listening skills, facilitation of verbal interaction, gathering information, attending to nonverbal behavior, interpersonal dynamics, and promoting helping relationships. Prerequisites: Psychology major or minor, registration in master's program requiring PSY 5200, or consent of instructor. (F)

**PSY 5330** Psychometrics 3
Overview of measurement development principles and statistics. Evaluation, interpretation, and uses of standardized tests of aptitude, intelligence, achievement, personality, and adjustment. Prerequisites: PSY 1010, 2800. (F)

**PSY 5500** Interdisciplinary Workshop 1-3
(F,Sp,Su)

**PSY 5720** Behavior Analysis Practicum 3
Students receive supervised training in applying behavior analysis principles in community, school, and institutional settings. Either SPED 5050 or PSY/SPED 5720 fulfill part of practicum requirement for Behavior Analysis track. Prerequisite: Permission of instructor. Also taught as SPED 5720. (F)

**PSY 5900** Independent Study 1-3
Individual discussion and intensive study of a particular problem or area. Prerequisite: Instructor's consent. (F,Sp,Su)

**PSY 5910** Independent Research 1-3
Experiments and demonstration projects are conducted and reported. Prerequisite: Instructor's consent. (F,Sp,Su)

**PSY 5930** Instructional Apprenticeship in Psychology 1-3
Didactic and applied experience in course preparation and instructional techniques applicable to the teaching of psychology. Intended for students planning careers as instructors at the secondary and postsecondary levels. Prerequisite: Instructor's consent. (F,Sp,Su)

**PSY 5950** CI Undergraduate Apprenticeship I 3
Orientation to profession of psychology. Students clarify career goals, identify steps necessary to achieve goals, prepare a vita, plan and begin executing their apprenticeship experience with faculty member(s) or approved agency, and present progress reports to diverse audiences. Prerequisites: Psychology major, junior standing, and consent of on-campus USU Psychology Advising Office. (F,Sp)

**PSY 5960** CI Undergraduate Apprenticeship II 3
Under supervision of departmentally approved agency and/or faculty member(s), students complete their pre-approved apprenticeship, which involves conducting research and/or providing community service. Students prepare a report of this experience and present it to diverse audiences. Prerequisites: PSY 5950, Psychology major, senior standing, and consent of on-campus USU Psychology Advising Office. (F,Sp)

**PSY 6010** Introduction to Program Evaluation: Evaluation Models and Practical Guidelines 3
Alternative approaches and practical guidelines for conducting evaluation studies. Through case studies and simulations, addresses impact of social, political, and ethical issues on evaluation. Also taught as EDUC 6010.

**PSY 6020** Multicultural Issues in Psychology 3
Examines role of culture in human development, with emphasis on understanding relations between culture, ethnicity, and identity and how images of "cultural selves" and "cultural others" are produced and "naturalized." (F)

**PSY 6050** Psychological Aspects of (dual listing 5050) Sports Performance 3
Psychological theory and principles applied to sports. Includes motivational techniques, psychological evaluation, stress and anxiety in sports, personality and sports performance. Also taught as PEP 6050/5050. (Sp)

**PSY 6100** History and Systems of Psychology 3
Theoretical and historical developments in psychology with primary emphasis on nineteenth and twentieth century developments, although earlier precursors are also considered. Prerequisite: PSY 1010. (Sp)

**PSY 6150** Empirically Supported Treatments for Psychological Disorders of Children and Adolescents 3
Introduction to single-subject treatment designs and basic principles of applied behavior analysis. Behaviorally-oriented treatment approaches for psychological disorders of childhood. Should be taken concurrently with a clinical practicum or assistantship. (Sp)

**PSY 6210** Group Counseling 3
Introduction to group counseling with illustrative experiences to show how theory may be applied. Prerequisite: PSY 6350. (F)

**PSY 6240** Introduction to School Counseling and Guidance 3
Introduction to role and function of school counselors. Overview of history of school guidance and counseling, and role of counselors in comprehensive guidance program. (F)

</tr>
</thead>
<tbody>
<tr>
<td>PSY 6250</td>
<td>Internship in School Counseling and Guidance</td>
<td>1-10</td>
<td>Internship in approved school system involving comprehensive guidance activities, under supervision of certified school counselor. (F,Sp,Su)</td>
</tr>
<tr>
<td>PSY 6260</td>
<td>Career Development: Theory and Practice</td>
<td>3</td>
<td>Consideration of career patterns and factors influencing career development and career effectiveness. (Sp)</td>
</tr>
<tr>
<td>PSY 6270</td>
<td>Child Psychopathology</td>
<td>3</td>
<td>Focuses on issues relevant to the understanding of child emotional and behavioral disorders. Discussion of symptom characteristics, assessment, and treatment protocols, as well as research pertaining to the major mental health problems found in children and adolescents. Prerequisite: Admission to graduate program in psychology or permission of instructor. (F)</td>
</tr>
<tr>
<td>PSY 6290</td>
<td>Diversity Issues in Treatment and Assessment</td>
<td>3</td>
<td>Introduction to diversity issues in counseling and psychological/educational assessment, including culture, gender, language, and related issues. Training in models for providing effective psychological services to clients, taking into account their unique background. Prerequisite: PSY 6350 or instructor’s consent. (Sp)</td>
</tr>
<tr>
<td>PSY 6310</td>
<td>Intellectual Assessment</td>
<td>3</td>
<td>Training and supervised experience in administering and interpreting individual intellectual ability tests, such as the Wechsler and Stanford-Binet scales. Prerequisite: Matriculation into School Psychology program or Combined Psychology program. (F)</td>
</tr>
<tr>
<td>PSY 6320</td>
<td>Objective Assessment of Personality and Affect</td>
<td>3</td>
<td>Research bases and clinical applications of objective psychological assessment instruments and techniques, designed to measure adolescent and adult personality, affect, and psychotherapy. Prerequisite: PSY 6310, (Sp)</td>
</tr>
<tr>
<td>PSY 6330</td>
<td>Psychometrics</td>
<td>3</td>
<td>Overview of measurement development principles and statistics. Evaluation, interpretation, and uses of standardized tests of aptitude, intelligence, achievement, personality, and adjustment. Prerequisites: PSY 1010, 2800. (F)</td>
</tr>
<tr>
<td>PSY 6340</td>
<td>Psychological and Educational Consultation</td>
<td>3</td>
<td>Overview of theory and practice of consultation as provided by counselors, psychologists, and other mental health education professionals. Consultation with teachers, parents, medical professionals, and organizations, emphasizing applications in educational settings. (F)</td>
</tr>
<tr>
<td>PSY 6350</td>
<td>Introduction to Theory and Practicum in Counseling</td>
<td>3</td>
<td>Introduction to basic theories and techniques of counseling, with applied practice in role-playing, interviewing, and actual counseling sessions with practice subjects. Prerequisite: Matriculation in School Counseling, School Psychology, or Combined Psychology program. (F)</td>
</tr>
<tr>
<td>PSY 6360</td>
<td>Practicum in Counseling and Psychotherapy</td>
<td>3</td>
<td>Supervised practicum in counseling and psychotherapy conducted within Psychology Community Clinic. Closely supervised practice in assessment, counseling, psychotherapy, and consultation with individuals, couples, and families. Prerequisite: PSY 6350. (Sp,Su)</td>
</tr>
<tr>
<td>PSY 6370</td>
<td>Practicum in School Counseling</td>
<td>3</td>
<td>Supervised practicum in public school setting, under direction of certified school counselor. Taken by students in School Counseling master’s program. (F,Sp,Su)</td>
</tr>
<tr>
<td>PSY 6380</td>
<td>Practicum in School Psychology</td>
<td>3</td>
<td>Supervised practicum in school psychology in public school or closely related setting. Taken by second-year students in School Psychology master’s program. (F,Sp,Su)</td>
</tr>
<tr>
<td>PSY 6410</td>
<td>Psychoeducational Assessment</td>
<td>3</td>
<td>Training and supervised experience in assessment of school-age and preschool-age children. Administration and interpretation of cognitive, developmental, and academic achievement measures, along with other psychoeducational assessment instruments and methods. (Sp)</td>
</tr>
<tr>
<td>PSY 6450</td>
<td>Introduction to School Psychology</td>
<td>1</td>
<td>Introductory overview of field of school psychology. Role and function of school psychologist, historical context of school psychology, and trends and new developments in service provision. Prerequisite: Matriculation into School Psychology master’s program or Combined Psychology doctoral program. (F)</td>
</tr>
<tr>
<td>PSY 6460</td>
<td>Professional Issues in School Counseling and School Psychology</td>
<td>3</td>
<td>Legal, ethical, and professional issues relevant to school counselors and school psychologists. Issues and practices in providing counseling and psychological services to “at-risk” students. Prerequisite: Graduate standing in psychology or instructor’s consent. (Sp)</td>
</tr>
<tr>
<td>PSY 6470</td>
<td>Health Psychology</td>
<td>3</td>
<td>Explores psychological and behavioral principles relating to health and illness. Focuses on development and maintenance of health behaviors. Emphasizes integration of research findings with clinical intervention. Prerequisite: Graduate standing in Psychology; or graduate standing in Health, Physical Education and Recreation. (F)</td>
</tr>
<tr>
<td>PSY 6500</td>
<td>Interdisciplinary Workshop</td>
<td>1-2</td>
<td>Series of self-instructional modules and videos and a variety of elective training. Module topics include developmental disabilities, legal aspects and issues, assessment, intervention, assistive technology, transition, and prevention/intervention for aggression and violence. (F,Sp,Su)</td>
</tr>
<tr>
<td>PSY 6510</td>
<td>Social Psychology***</td>
<td>3</td>
<td>Provides all graduate students with common knowledge base in social psychology. Emphasizes overview of recent developments, while also discussing social psychology principles as a guide in executing evaluation research and helping clients. Understanding of both emphases ensures breadth as psychologists. Prerequisite: PSY 3510, (Sp)</td>
</tr>
<tr>
<td>PSY 6530</td>
<td>Developmental Psychology</td>
<td>3</td>
<td>Advanced survey course in general developmental psychology. Theory and research in human development across the lifespan, with particular emphasis on child and adolescent development. (F)</td>
</tr>
<tr>
<td>PSY 6570</td>
<td>Introduction to Educational and Psychological Research</td>
<td>3</td>
<td>Provides introduction to research methods, including identification of research problem, review and evaluation of research literature, and design and implementation of research project. Prerequisite: PSY 2800. Also taught as EDUC 6570. (F,Sp,Su)</td>
</tr>
<tr>
<td>PSY 6600</td>
<td>Research Design and Analysis I</td>
<td>3</td>
<td>Research design and statistical concepts for research in education, human services, and psychology, with emphasis on the selection and interpretation of statistical analyses. Prerequisites: EDUC/PSY 6570, passing score on 6600 Pretest via WebCT, and permission of instructor. Also taught as EDUC 6600. (F,Sp,Su)</td>
</tr>
<tr>
<td>PSY 6650</td>
<td>Theories of Learning: The Behavioral Perspective***</td>
<td>3</td>
<td>In-depth examination of the major behavioral theories of learning, including classical and operant conditioning. (F)</td>
</tr>
<tr>
<td>PSY 6660</td>
<td>Cognition and Instruction***</td>
<td>3</td>
<td>Survey of theory and principles in cognitive psychology, with special emphasis on applying these principles in instructional settings. (Sp)</td>
</tr>
<tr>
<td>PSY 6750</td>
<td>Empirically Supported Treatments for Adult Psychological Disorders</td>
<td>3</td>
<td>Emphasizes development of knowledge regarding criteria for determining if a treatment is empirically supported. Explains methods for indentifying specific empirically supported treatments. Develops skills for applying these treatments to psychological disorders and for understanding how to evaluate the efficacy of treatments. (Sp)</td>
</tr>

## Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY 6790</td>
<td>Psychological Principles and Individuals who are Deaf and Hard of Hearing</td>
<td>3</td>
<td>Psychological theories and research used to describe the deaf and hard of hearing. Exploration of principles that can be used in helping these individuals achieve emotional well-being. Also taught as COMD 6790/4790. (Sp)</td>
</tr>
<tr>
<td>PSY 6800</td>
<td>Addictive Behaviors*</td>
<td>3</td>
<td>Provides students with an overview of the theoretical issues, research, and models that underlie our understanding of behavioral syndromes commonly referred to as “addictive behaviors.” Emphasizes chemical dependency problems, as well as the well-studied pattern of addiction. (F)</td>
</tr>
<tr>
<td>PSY 6810</td>
<td>Seminar *</td>
<td>1-3*</td>
<td>Special topics designed to help students develop in-depth knowledge of emerging research, theory, and practice in psychology. Taught in seminar format by USU faculty or visiting scholars. (F,S,Su)</td>
</tr>
<tr>
<td>PSY 6820</td>
<td>Clinical Applications of Biofeedback***</td>
<td>3</td>
<td>Training in clinical applications of biofeedback for treating common health, psychological, and stress-related problems. Practical experience provided in use of different modalities of biofeedback (e.g., neurofeedback, skin temperature training, and electrodertal training). Stresses importance of integrating biofeedback into other appropriate treatments. Prerequisite: Graduate standing in psychology or instructor’s consent. (F)</td>
</tr>
<tr>
<td>PSY 6850</td>
<td>Introduction to the Combined Doctoral Program</td>
<td>1</td>
<td>This seminar is designed to orient beginning PhD students to the combined program and to the School of Graduate Studies. Opportunity provided for students to meet and talk with all faculty members concerning their research. Students also begin their own research and become acquainted with required paperwork for their program. (F)</td>
</tr>
<tr>
<td>PSY 6860</td>
<td>Transcultural Assessment Lab</td>
<td>1</td>
<td>Psychoeducational assessment laboratory experience to be taken by students in the School Psychology and Combined Psychology programs in conjunction with PSY 6920. (Sp)</td>
</tr>
<tr>
<td>PSY 6890</td>
<td>Assessment of Child and Adolescent Psychopathology and Personality</td>
<td>3</td>
<td>Theoretical foundations and applied training in methods of assessing and classifying behavioral, social, and emotional problems of children and adolescents. Prerequisite: Matriculation into Combined Psychology doctoral program or School Psychology master’s program. (Su)</td>
</tr>
<tr>
<td>PSY 6900</td>
<td>Independent Study 1-3*</td>
<td>1-3*</td>
<td>Individual discussion and intensive study of a particular problem or area. Prerequisite: Instructor's consent. (F,S,Su)</td>
</tr>
<tr>
<td>PSY 6910</td>
<td>Independent Research 1-3*</td>
<td>1-3*</td>
<td>Experiments and demonstration projects are conducted and reported. Prerequisite: Instructor’s consent. (F,S,Su)</td>
</tr>
<tr>
<td>PSY 6930</td>
<td>University Teaching Apprenticeship 1-3*</td>
<td>1-3*</td>
<td>Prepares graduate students for college teaching. Students learn to prepare study guides, examinations, and lectures, and learn to use audio-visual aids. Students also examine various current methods of instruction and course evaluation schemes. (F,S,Su)</td>
</tr>
<tr>
<td>PSY 6950</td>
<td>Internship in School Psychology</td>
<td>3</td>
<td>Internship in approved school system involving assessment, counseling, consultation, and program development, under the supervision of a certified school psychologist. Prerequisite: Permission of instructor. (F,S,Su)</td>
</tr>
<tr>
<td>PSY 6970</td>
<td>Thesis</td>
<td>1-6*</td>
<td>(F,S,Su)</td>
</tr>
<tr>
<td>PSY 6990</td>
<td>Continuing Graduate Advisement</td>
<td>1-12*</td>
<td>(F,S,Su)</td>
</tr>
<tr>
<td>PSY 7020</td>
<td>Advanced Evaluation Methodology and Techniques*</td>
<td>3</td>
<td>Provides advanced theory and practice in focus group interviews, on-site visit techniques, observation and anchor scales, multiple-site evaluation standards, and advanced reporting techniques. Prerequisite: PSY 6010. (Sp)</td>
</tr>
<tr>
<td>PSY 7030</td>
<td>Instrument Development***</td>
<td>3</td>
<td>In-depth study of factors and techniques critical for designing and developing evaluation and research instruments. (F)</td>
</tr>
<tr>
<td>PSY 7040</td>
<td>Practicum in Evaluation Planning and Contracting</td>
<td>3</td>
<td>Provides detailed information on methods for planning program evaluations, negotiating agreements with client/sponsor, and finalizing evaluation contracts. Taught every third year. Prerequisite: EDUC/PSY 6010. (Sp)</td>
</tr>
<tr>
<td>PSY 7050</td>
<td>Internship in Program Evaluation 1-9*</td>
<td>1-9*</td>
<td>Experience in practical aspects of program evaluation through planned, supervised evaluation project participation approved by student’s supervisory committee. Prerequisite: EDUC/PSY 6010. (F,S,Su)</td>
</tr>
<tr>
<td>PSY 7060</td>
<td>Internship in Research 1-9*</td>
<td>1-9*</td>
<td>Research experience gained through conducting planned, supervised research project. Prerequisites: Approval by supervisory committee and EDUC/PSY 6570. (F,S,Su)</td>
</tr>
<tr>
<td>PSY 7070</td>
<td>Advanced Measurement Theories and Practice</td>
<td>3</td>
<td>Covers psychometric topics, including classical test theory, generalizability theory, item response theory, and issues concerning bias in psychological testing. Prerequisites: PSY 5330/6330, EDUC/PSY 6600. (Sp)</td>
</tr>
<tr>
<td>PSY 7090</td>
<td>Research and Evaluation Methodology Program Seminar 1*</td>
<td>1*</td>
<td>Provides opportunity for all doctoral students in the Research and Evaluation Methodology Program to meet on a regular basis to read journal articles, explore student and faculty research projects, and discuss current issues in the field. (F,S)</td>
</tr>
<tr>
<td>PSY 7100</td>
<td>Biological Basis of Behavior***</td>
<td>3</td>
<td>Explores normal and abnormal behavior from a basic neuroanatomical/neurophysiological perspective. Discusses pharmacological/nonpharmacological applications. (Sp)</td>
</tr>
<tr>
<td>PSY 7110</td>
<td>Advanced Theories in Cognitive Psychology</td>
<td>3</td>
<td>In-depth study of theories, models, and current research in the field of cognitive psychology, including memory, perception, problem-solving, and decision making. Prerequisite: PSY 4420 or 6660. (F)</td>
</tr>
<tr>
<td>PSY 7230</td>
<td>Theory and Research in Personality***</td>
<td>3</td>
<td>Overview of theoretical approaches, research, and clinical applications regarding personality differences. (F)</td>
</tr>
<tr>
<td>PSY 7250</td>
<td>Professional Ethics and Standards***</td>
<td>1-3</td>
<td>Designed to train clinicians and researchers in the field of psychology to operate within the professional ethics and standards of the field. (F)</td>
</tr>
<tr>
<td>PSY 7270</td>
<td>Psychopathology***</td>
<td>3</td>
<td>Summarizes research on risk, epidemiologic factors, and etiological perspectives regarding emotional and behavioral disorders of adolescents and adults. Models of classification of disorders are outlined, emphasizing the DSM system. Focuses on anxiety, mood, somatoform, dissociative, personality, and psychosocial disorders, as well as schizophrenia, drug/alcohol dependence, violence, and psychological factors affecting physical illness. (F)</td>
</tr>
<tr>
<td>PSY 7320</td>
<td>Advanced Personality Assessment</td>
<td>2</td>
<td>Theory and clinical training in personality assessment, with additional techniques than those covered in PSY 6320. Focuses on the comprehensive scoring system of Rorschach. Prerequisite: PSY 6320 or instructor’s consent. (Su)</td>
</tr>
<tr>
<td>PSY 7350</td>
<td>Practicum in School Psychology</td>
<td>3*</td>
<td>Doctoral-level practicum in a school or closely related setting. Supervised experience in developmental, learning, and school-related problems. Appropriate assessment and consultation with teachers, administrators, parents, and other related individuals. Prerequisite: Permission of program chair. (F,S,Su)</td>
</tr>
<tr>
<td>PSY 7360</td>
<td>Practicum in Counseling Psychology</td>
<td>3*</td>
<td>Doctoral-level practicum in a counseling setting. Supervised experience in individual, group, and family counseling. Appropriate assessment and consultation. Prerequisite: Permission of program chair. (F,S,Su)</td>
</tr>
</tbody>
</table>
Course Descriptions

PSY 7370  Practicum in Clinical Psychology  3
Doctoral-level practicum in a clinical setting. Supervised experience in individual, group, and family psychotherapy. Includes psychological assessment and consultation. Prerequisite: Permission of program chair. (F,Sp,Su)

PSY 7380  Practicum in Psychology  1-6
Doctoral-level practicum in a variety of health service settings. Supervised experience in individual, group, and family psychotherapy assessment and consultation as needed. Prerequisite: Permission of program chair. (F,Sp,Su)

PSY 7610  Research Design and Analysis II  3
Advanced treatment of research design and statistical concepts and issues in educational, human services, and psychological research. Prerequisite: EDUC/PSY 6860. Also taught as EDUC 7610. (F,Sp,Su)

PSY 7670  Literature Reviews in Education and Psychology  2
Advanced concepts in designing, writing, and critiquing literature reviews. Prerequisites: PSY/EDUC 6600 and consent of instructor. Also taught as EDUC 7670. (Sp, Su)

PSY 7700  Grant Writing**  3
Students learn to identify funding sources, select strategies for seeking resources, and write proposals for research, development, training, and service activities in education, psychology, and related fields. Prerequisite: PSY/EDUC 6570. (Sp)

PSY 7780  Multivariate Methods in Psychology and Education  3
Focuses on application of multivariate methods (factor analytic techniques, structural equation modeling, canonical correlation, multivariate analysis of variance, etc.) in research and measurement in psychology, education, and other social and behavioral sciences. Prerequisites: EDUC/PSY 6860, 7610. (F)

PSY 7810  Seminar  1-3
Special topics designed to help students develop in-depth knowledge of emerging research, theory, and practice in psychology. Taught in seminar format by USU faculty or visiting scholars. (F,Sp,Su)

PSY 7820  Neuropsychology: Principles and Assessment***  2 or 4
Overview of neuropsychological symptoms, common syndromes, and underlying neural structures. Coverage of neuropsychological assessment approaches, diagnostic issues, and supervised experience with selected neuropsychological tests. Includes some discussion of rehabilitation, but primarily emphasizes assessment. (Sp)

PSY 7840  Psychopharmacology***  1
Provides psychology graduate students with basic working knowledge of the field of psychopharmacology and the medical use of psychotropic drugs. Prerequisite: PSY 6320. 1

PSY 7900  Independent Study  1-3
Individual discussion and intensive study of a particular problem or area. Prerequisite: Instructor’s consent. (F,Sp,Su)

PSY 7910  Independent Research  1-3
Experiments and demonstration projects are conducted and reported. Prerequisite: Instructor’s consent. (F,Sp,Su)

PSY 7950  Internship in Professional Psychology  1
One-year, supervised, full-time internship required of doctoral candidates in professional psychology (clinical, counseling, and/or school psychology). Prerequisite: All doctoral coursework completed, with the possible exception of the dissertation if approved by the student’s committee, prior to initiating the internship. (F,Sp,Su)

PSY 7970  Dissertation  1-18
(F,Sp,Su)

PSY 7990  Continuing Graduate Advisement  1-12
(F,Sp,Su)

This course is offered infrequently. For more information, contact Psychology Department.

Public Health (PUBH)

See Department of Biology, pages 177-190.

PUBH 3120  Family and Community Health  3
Focuses on health aspects of various population groups within the community. Particular emphasis placed on guidelines for optimal family health. (Sp)

PUBH 3310  Occupational Health and Safety  3
Covers the principles of occupational health and safety, including regulatory standards. Emphasizes on-the-job health and safety problems from the occupational health and safety professional and management view. Prerequisite: CHEM 1220. (F)

PUBH 3610  Environmental Management  3
Introduction to environmental health, emphasizing relationships among environmental quality, public health, environmental and occupational health regulations, human health risk assessment, institutions, and engineered systems in environmental health management. Prerequisites: CHEM 1210; BIOL 1610 or University Studies Breadth Life Sciences (BLS) course; MATH 1210. Also taught as CEE 3610. (F)

PUBH 4000  Public Health Field Experience  3-6
Field experience in the practice of public health, as appropriate to each student's area of public health emphasis: public health education, environmental health, or industrial hygiene. Prerequisite: Junior standing in public health. (F,Sp,Su)

PUBH 4030  Communicable Disease Control  3
Comprehensive study of communicable diseases, including etiological agents, reservoirs of infection, and mechanisms of transmission, control, and prevention. Recommended prerequisite: A course in microbiology. (F)

PUBH 4040  Fundamentals of Epidemiology  3
Introduction to the study of the distribution and causes of communicable and noncommunicable diseases of humans and other animals. Recommended prerequisite: A course in statistics. (Sp)

PUBH 4300  Industrial Hygiene Seminar  1
Participant seminar on current developments in industrial hygiene. (F)

PUBH 4310  Industrial Hygiene Recognition of Hazards  4
Through classroom and field experiences, provides an introduction to industrial hazards and familiarizes students with manufacturing and industrial processes in which industrial hygienists commonly work. Prerequisite: PUBH 3310 (may be taken concurrently). (F)

PUBH 4320  Industrial Hygiene Chemical Hazard Evaluation  3
Survey of principles and methods used to evaluate industrial chemical health hazards. Practical application in a field sampling project. Prerequisite: PUBH 3310. (Sp)

PUBH 4330  Industrial Hygiene Physical Hazards  3
Through lectures and labs, covers the potential health effects, methods of exposure evaluation, and principles of control of noise, vibration, heat and cold, and nonionizing and ionizing radiation hazards that can occur in the workplace. Prerequisite: PUBH 3310 or 4310. (Sp)

PUBH 4380  Industrial Hygiene Internship  3-6
Field experience in the practice of industrial hygiene. Participation in an active program serving employees in either the private or public sector. Prerequisites: PUBH 4300, 4320, and 4330. (F,Sp,Su)

PUBH 4410  Industrial Safety  3
Through lectures, demonstrations, and hands-on activities, covers recognition and control of industrial safety hazards (including power tools, fire, electricity, excavations, confined spaces, and falls), material handling, process safety.
## Course Descriptions

Protective equipment, safety promotion and training, and standards and programs. (Sp)

### PUBH 4850 Special Topics in Public Health 1-3®
Prerequisite: Junior standing in public health. (F,Sp,Su)

### PUBH 5000 Public Health Seminar 1®
Participant seminar on current problems in public health. (Sp)

### PUBH 5330 QI Industrial Hygiene Chemical Hazard Control 3
Covers methods to control chemical occupational health hazards, with an emphasis on the function, design, and management of local exhaust ventilation. Prerequisites: PUBH 4310, MATH 1210. (F)

### PUBH 5340 Industrial Hygiene and Safety Programs 2
Provides students with the foundation to administer and manage occupational health and safety programs commonly encountered in the workplace. Prerequisites: PUBH 4320 and 4330. (Sp)

### PUBH 5500 CI Public Health Management 2
Presentation of basic organizational and financial management tools, which students will utilize in written and oral reports on an educational, environmental, or occupational health problem of their choice. Prerequisite: PUBH 4000 or 4380 or permission of instructor. (F,Sp)

### PUBH 5670 Hazardous Chemicals Handling and Safety 2
Provides students with necessary skills and knowledge for working safely in areas associated with hazardous chemicals. Topics covered include: regulations, exposure routes, toxicology, chemical and physical hazards, personal protective equipment, sampling, monitoring, decontamination, and emergency response procedures. Prerequisite: CHEM 1210. Also taught as CEE 5670. (Sp)

### PUBH 5730 Analysis and Fate of (dual listing 6730) Environmental Contaminants 3
Provides students with understanding of methods used in analysis of environmental samples for organic contaminants. Examines various properties and processes determining the fate of organic contaminants in the environment. Taught first half of spring semester. Prerequisites: CHEM 1210, 2300. Also taught as CEE 5730/6730. (Sp)

### PUBH 5790 Accident and Emergency Management 3
Introduction to fundamentals of accident, hazard, and emergency management. Topics include legislation; chemical safety fundamentals; fire, explosion, and spill fundamentals; contaminant air transport fundamentals; hazard and risk assessment; dispersion applications; and hazard and risk management applications. Prerequisite: CHEM 1220. Also taught as CEE 5790. (Sp)

### PUBH 6730 Analysis and Fate of Environmental Contaminants 3
Provides students with understanding of methods used in analysis of environmental samples for organic contaminants. Examines various properties and processes determining the fate of organic contaminants in the environment. Taught first half of spring semester. Prerequisites: CHEM 1210, 2300. Also taught as CEE 6730/5730. (Sp)

### REH 6100 Introduction to Rehabilitation Counseling 3
Overview of history, philosophy, and legal basis of rehabilitation programs, both public and private. Independent living programs. Roles of the rehabilitation counselor and the process of rehabilitation. Skill development including literature use, writing, and professional organizations. (F)

### REH 6110 Medical Aspects of Disability 3
Overview of basic medical issues affecting employment and independent living for persons with disabilities. Explores basic anatomy and systems, as well as disorders and diseases of these systems. Covers medical terminology applicable to rehabilitation counseling. (F)

### REH 6120 Psychosocial Aspects of Disability 3
Explores psychological and sociological aspects of disabilities, including adjustment factors in living with disabilities (i.e., individual, family, sexuality, other service providers, etc.). Examines societal attitudes, women's issues, and deaf culture issues. Includes group counseling applications for persons with disabilities. (Su)

### REH 6130 Rehabilitation Counseling Skill Development 2
Utilizes role playing of simulated interviews and rehabilitation counseling sessions to develop the basic skills necessary to function as a human service helper. Must be taken concurrently with REH 6140. Prerequisite: Permission of instructor. (Su)

### REH 6140 Practicum in Rehabilitation 2®
Under faculty supervision, students receive minimum of 100 hours of firsthand experience working with persons with disabilities in rehabilitation agency or facility. Must be taken the first time concurrently with REH 6130. With faculty approval, may be repeated for credit. Prerequisite: Permission of instructor. (F,Sp,Su)

### REH 6150 Case Studies in Rehabilitation 3
Coordination of community resources, individual assessment information, ethical issues, eligibility determination, and development of individualized rehabilitation programs and independent living plans. Time, fiscal, and caseload management skills for rehabilitation professionals. Emphasizes client choice in rehabilitation planning. (Sp)

### REH 6160 Job Analysis, Development, and Placement for Persons with Disabilities 3
Applies career development theories to job placement. Presents job placement factors resulting in employment for persons with disabilities, including job analysis, job development and retention, advocacy, assistive technology, ADA, occupational information systems, and labor market analysis. (Sp)

### REH 6170 Internship in Rehabilitation 4-12®
Direct supervised provision of rehabilitation services to persons with disabilities in a community facility or agency. Total of 300 hours of direct service required for each 6 semester credits. Repeatable for up to 12 credits. Prerequisite: Permission of instructor. (F,Sp,Su)

### REH 6180 Rehabilitation of Persons with Severe Mental Illness, Substance Abuse, and Severe Learning Disabilities 3
Overview of rehabilitation of persons with severe mental illness, substance abuse, and severe learning disabilities. Includes psychotherapeutic interventions, group counseling, individual counseling, employment assistance, independent living skills training, and other services. (Sp)

### REH 6190 Vocational Assessment for Persons with Disabilities 3
Addresses vocational assessment for persons with disabilities. Includes overview of traditional vocational assessment, but focuses on contemporary methodology developed for individuals with severe disabilities. Discussion of functional assessment, including client choice and ecological assessment issues. (F)

### REH 6200 Theories of Counseling Applied to Persons with Disabilities 3
Introduction to established counseling theories and their implications for providing services to persons with disabilities. Discussion of individual and group counseling paradigms. Emphasizes development of students' individual counseling philosophies. (F)

---

**Rehabilitation Counseling (REH)**

*See Department of Special Education and Rehabilitation, pages 512-522.*

### REH 1010 BSS Disability in the American Experience 3
Discussion of definitions and types of disabilities, ethical issues, society's prejudice and discrimination against people with disabilities, and the individual's adjustment to the disability experience. Disability as a natural part of life. Also taught as SPED 1010.
Course Descriptions

Russian (RUSS)

See Department of Languages, Philosophy, and Speech Communication, pages 364-379.

RUSS 1010 Russian First Year I 4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Not open to those with more than one year high school Russian or equivalent. (F)

RUSS 1020 Russian First Year II 4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Prerequisite: RUSS 1010, or not more than three years of high school Russian. (Sp)

RUSS 2010 Russian Second Year I 4
Further development of first-year competencies with emphasis on language structure, vocabulary expansion, reading, writing, and conversational exchange in the context of culture. Prerequisite: RUSS 1020 or two or more years of high school Russian. (F)

RUSS 2020 Russian Second Year II 4
Further development of first-year competencies with emphasis on language structure, vocabulary expansion, reading, writing, and conversational exchange in the context of culture. Prerequisite: RUSS 2010 or three or more years of high school Russian. (Sp)

RUSS 2880 Individual Readings 1-4* Individual study of selected readings in Russian. Prerequisite: Instructor’s permission. (F,Sp)

RUSS 3040 Advanced Russian Grammar and Composition 3
Detailed presentation of Russian grammar. Class discussions and work on oral and written assignments. Prerequisite: RUSS 2020 or equivalent. (F) (Sp)

RUSS 3050 Advanced Russian Grammar and Composition 3
Detailed presentation of Russian grammar. Class discussions and work on oral and written assignments. Prerequisite: RUSS 2020 or equivalent. (F) (Sp)

RUSS 3300 DHA Contemporary Russian Language and Culture 3
Discussion of contemporary Russia, including its geography, business, government, literature, art, etc. Prerequisite: RUSS 2020 or equivalent. (F,Sp)

RUSS 3510 CI Business Russian* 3
Study of current Russian business and commercial terminology and practices. Development of communication skills for international Russian business purposes. Prerequisite: RUSS 2020 or equivalent. (F)

RUSS 3540 Russian Translation for Science, Business, and Culture 3
Familiarization with approaches to translation, special grammatical structures, specialized vocabulary, and reference materials and aids. Practical exercises. Prerequisite: RUSS 2020 or equivalent. (Sp)

RUSS 4920 Russian Language Tutoring 1
Allows students to develop tutoring skills by assisting professors in lower-division courses or fulfilling instructional duties for a comparable amount of time in the language laboratory, public schools, or similar activities with departmental approval. May be repeated to a maximum of 3 credits. Prerequisite: Permission of instructor. (F,Sp)

RUSS 4880 Individual Readings 1-4*
Readings in technical, scientific, or literary Russian. Prerequisite: Instructor’s permission. (F,Sp)

Secondary Education (SCED)

See Department of Secondary Education, pages 493-497.

SCED 1000 Volunteer Experience 1
Optional course providing orientation to agencies coordinating volunteer experiences in the community; such experiences are part of standards for admission to secondary teacher education. (F,Sp, Su)

SCED 3100 Motivation and Classroom Management 3
Designed to help pre-service secondary school teachers to address two questions: (1) What diverse traits, talents, attitudes, and experiences do pre-adolescent and adolescent students bring to the middle school, junior high school, and high school environment? and (2) In light of these diverse traits, talents, attitudes, and experiences, how should teachers work with students to build cooperative classroom communities where students are motivated to engage in productive learning activities? (F,Sp)

SCED 3210 DSS/CI Educational and Multicultural Foundations 3
Provides preservice teachers with the opportunity to critically examine the political, economic, and educational policies influencing students’ access to equitable educational experiences. Examines historical and philosophical foundations influencing the nature of multicultural education in our democratic society, how personal biases can influence instructional practices, and development of multicultural curriculum relevant to specific content areas. (F, Sp)

SCED 3300 Clinical Experience I 1
First clinical practicum (40 hours minimum) in middle and secondary schools, arranged by special methods instructors in department. Required at level 1. Prerequisite: Program admission. (F,Sp)
SCED 3400 Teaching Science I 3
Laboratory practicum focused on design, practice, and performance of secondary science demonstrations and investigative lab activities. Must be taken at Level 1. Prerequisite: Program admission. (F,Sp)

SCED 3500 Teaching Social Studies 3
Methods course focused on social studies curriculum and instruction for preservice secondary teachers with teaching majors or minors in history or any of the social sciences. Should be taken at Level 1. Prerequisite: Program admission. (F,Sp)

SCED 3600 Teaching English 3
Methods course focused on English curriculum and instruction for preservice secondary teachers with teaching majors or minors in English. May be taken at either Level 1 or Level 2. Prerequisite: Program admission. (F,Sp)

SCED 4200 CI Reading, Writing, and Technology 3
Performance-based class focused on a wide range of academic skills related to reading, writing, and advanced technology access. Prerequisite: Program admission and completion of Level 1. (F,Sp)

SCED 4210 Cognition and Evaluation of Student Learning 3
Designed to lead the preservice secondary school teacher to address two questions: (1) How do students construct concepts; discover relationships; and develop knowledge-level skills, comprehension and communication skills, and problem-solving abilities? (2) How do teachers monitor students’ progress, evaluate and communicate their achievement, and interpret the results of system-wide and standardized test results to students and their parents? (F,Sp)

SCED 4300 Clinical Experience I 1
Second clinical practicum (40 hours minimum) in middle and secondary schools, arranged by special methods instructors in department. Required at level 2. Prerequisite: Program admission and completion of Level 1. (F,Sp)

SCED 4400 Teaching Science II 3
Methods course focused on science curriculum and instruction for preservice secondary teachers with teaching majors in any of the science areas. Must be taken at Level 2. Prerequisite: Program admission, completion of Level 1, and SCED 3400. (F,Sp)

SCED 4600 Philosophy and Organization of the Middle Level School 3
Focuses on characteristics of young adolescents and how middle level schools can be organized to meet those characteristics through interdisciplinary teaching, advisory programs, and exploratory mini-courses. Also taught as ELED 4600/6600. (F,Sp)

SCED 4610 Curriculum, Methods, and Assessment for the Middle Grades 3
Integrates current approaches to curriculum design with instructional models and assessment of learning appropriate for grades 5-9. Also taught as ELED 4610/6610. (Sp,Su)

SCED 4620 Service Learning Applications for the Middle Grades 3
Examines literature related to service learning for the middle grades. Application of service learning in curriculum. Also taught as ELED 4620/6620. (Su)

SCED 4710 Diversity in Education 3
Provides educators with background and techniques for more effectively addressing the needs of students in a culturally and linguistically diverse society. Diversity topics also include religion, socioeconomic class, ability differences, race, gender, and sexual orientation. Prerequisite: Admission into a teacher education program. Also taught as ELED 4710. (Sp,Su)

SCED 4730 Educational Linguistics 3
Examines theoretical foundations, functions, and characteristics of first language acquisition and language variation in the Pre-K-12 classroom context. Also emphasizes social context of language in K-12 classroom interaction, instruction, and curriculum. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 4730/6730. (F,Sp)

SCED 4740 Second Language Acquisition in the Classroom 3
Explores the processes of second language acquisition, including the influences of linguistic, cognitive, and social-cultural factors, and their relationship to first language acquisition. Emphasizes implications for teaching in the K-12 classroom environment. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 4740/6740. (Sp,Su)

SCED 4760 ESOL Instructional Strategies in the Content Areas 3
Includes strategies for promoting oral language, reading, and writing for K-12 English language learners. Methods for integration for second language learners into the larger school community. Discussion of parental involvement. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 4760/6760. (F,Sp)

SCED 4770 ESOL Instructional Strategies in the Content Areas (dual listing 6770) 3
Includes strategies for promoting oral language, reading, and writing for K-12 English language learners. Methods for integration for second language learners into the larger school community. Discussion of parental involvement. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 4770/6770. (F,Sp)

SCED 4800 Assessment for Language Learners (dual listing 6780) 3
Explores principles and techniques for developing, analyzing, and interpreting assessment measures for English language learners, including oral, written, and content-area assessment, as well as assessments used in public schools. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 4800/6780. (F,Sp)

SCED 4900H Senior Thesis 1-6
Student-initiated research project under faculty supervision. Requires prior approval of department head, honors committee, and instructor. Prerequisite: Approval of department head. (F,Sp)

SCED 5000 Practicum in Improvement (dual listing 6000) of Instruction 1-6
Open topics course focusing upon effective teaching methods, teaching performance, curriculum decision-making, and characteristics of learners. Also taught as ELED 5000/6000. (F,Sp,Su)

SCED 5400 Laboratory Practicum 3
Laboratory practicum for inservice teachers, focused on design, practice, and performance of secondary science demonstrations and investigative lab activities. (F,Sp)

SCED 5500 Student Teaching Seminar 2
Ten-week capstone seminar focused upon student teaching issues, professional development, and principles of effective instruction, emphasizing reflective teaching. Prerequisites: Level 1 and Level 2 completion, and student teaching placement. (F,Sp)

SCED 5630 Student Teaching in Secondary Schools 10
Thirteen-week culminating practicum in which students assume full-time teaching responsibilities under direction of cooperating teachers in major and minor fields. Prerequisites: Level 1 and Level 2 completion, and student teaching placement. (F,Sp)

SCED 5700 Modified Student Teaching 2-4
Culminating practicum experience for students seeking dual licensure, earning half of their student teaching credit in a secondary school setting. Prerequisite: Program admission and completion of Level 1 and Level 2. (F,Sp)

SCED 5800 Secondary School Internship 2-6
Advanced practical teaching experience under combined public school and University supervision. Offered only by arrangement with Director of Field Experiences. Prerequisites: Level 1 and Level 2 completion, and special recommendation. (F,Sp)
## Course Descriptions

<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SCED 5900</td>
<td>Independent Study</td>
<td>1-3°</td>
<td>Prerequisite: Instructor approval. (F,Sp)</td>
</tr>
<tr>
<td>SCED 6000</td>
<td>Practicum in Improvement of Instruction</td>
<td>1-6°</td>
<td>Open topics course focusing upon effective teaching methods, teaching performance, curriculum decision-making, and characteristics of learners. Also taught as ELED 6000/5000. (F,Sp,Su)</td>
</tr>
<tr>
<td>SCED 6040</td>
<td>Designing and Interpreting Measurements for Assessing Student Learning</td>
<td>3</td>
<td>Teachers and instructional supervisors develop their talents for (a) designing and interpreting measurements for monitoring students’ learning and (b) interpreting scores from standardized and government-mandated tests. Also taught as ELED 6040. (F,Sp,Su)</td>
</tr>
<tr>
<td>SCED 6100</td>
<td>Motivation and Management in Inclusive Settings</td>
<td>3</td>
<td>Leads in-service teachers to develop classroom management strategies for gaining and maintaining students’ cooperation. Also taught as ELED 6100. (Sp,Su)</td>
</tr>
<tr>
<td>SCED 6150</td>
<td>Foundations of Curriculum</td>
<td>3</td>
<td>Examination of theories, principles, and foundations of curriculum, emphasizing program planning and current curriculum trends. Also taught as ELED 6150. (F,Su)</td>
</tr>
<tr>
<td>SCED 6190</td>
<td>Theories of Teaching and Learning</td>
<td>3</td>
<td>Demonstration, analysis, and evaluation of various models of teaching, emphasizing research-based principles of learning. Also taught as ELED 6190. (Sp,Su)</td>
</tr>
<tr>
<td>SCED 6250</td>
<td>Mathematics Curriculum and Instruction</td>
<td>2</td>
<td>SCED 6300 English Curriculum and Instruction</td>
</tr>
<tr>
<td>SCED 6300</td>
<td>English Curriculum and Instruction</td>
<td>2</td>
<td>Examination of current curriculum standards, trends, and effective methods of instruction for mathematics in middle and secondary schools. (Su)</td>
</tr>
<tr>
<td>SCED 6310</td>
<td>Content Area Reading and Writing</td>
<td>3</td>
<td>Practical approaches for teaching reading/writing and learning skills to elementary, middle, and high school students, in all content areas. Also taught as ELED 6310. (Su)</td>
</tr>
<tr>
<td>SCED 6320</td>
<td>Literacy and Cognition</td>
<td>3</td>
<td>SCED 6320 English Curriculum and Instruction (dual listing 7320)</td>
</tr>
<tr>
<td>SCED 6330</td>
<td>Utah Writing Project</td>
<td>1-6</td>
<td>Workshop, seminar, and institute experiences in the Utah Writing Project, focusing on writing process, principles, and research-based strategies for improving writing instruction in grades K-12. Also taught as ELED 6330. (Su)</td>
</tr>
<tr>
<td>SCED 6340</td>
<td>Issues and Trends in Literacy</td>
<td>2°</td>
<td>Exploration of current issues and instructional trends in the teaching of reading and writing. Emphasis on reading widely and critically in the professional literature. Prerequisites: ELED 3100, 4040; or teaching experience in elementary or middle school. Also taught as ELED 6340.</td>
</tr>
<tr>
<td>SCED 6350</td>
<td>Reading Assessment and Intervention</td>
<td>3</td>
<td>Covers the correlates and diagnosis of reading problems, as well as methods and materials for remedial reading instruction. Prerequisites: ELED 3100, 4040; or teaching experience in elementary, middle, or secondary school. Also taught as ELED 6350. (Sp)</td>
</tr>
<tr>
<td>SCED 6360</td>
<td>Research in Reading</td>
<td>3</td>
<td>Covers classical, historical, and contemporary research studies in reading, with an emphasis upon understanding and translating findings into classroom practices. Prerequisites: ELED 3100, 4040; or teaching experience in elementary or middle school. Also taught as ELED 6360. (Su)</td>
</tr>
<tr>
<td>SCED 6370</td>
<td>Supervised Internship in Reading and Writing</td>
<td>1-3</td>
<td>Individual practicum experience designed to allow graduate students to implement and focus on one or more aspects of reading and writing instruction in a classroom or clinical setting. Prerequisite: Consent of Instructor. Also taught as ELED 6370. (F,Sp,Su)</td>
</tr>
<tr>
<td>SCED 6380</td>
<td>Understanding and Supporting Adolescent Literacy Development</td>
<td>3</td>
<td>Focuses on instructional practices, as well as research and theory related to fostering the literacy development of middle school and high school students. (Sp,Su)</td>
</tr>
<tr>
<td>SCED 6390</td>
<td>Teaching with Tradebooks in the Elementary and Middle Level Classroom</td>
<td>3</td>
<td>Explores the use of trade books in the elementary and middle level classroom. Focuses on how teachers can use various genres to invite children to read and write. Prerequisites: SCED/ELED 6310 or 6360. Also taught as ELED 6390. (Su)</td>
</tr>
<tr>
<td>SCED 6400</td>

Course Descriptions

SCED 6570  Advanced Comprehension  3
Designed to enhance teachers’ understanding of research and practice related to teaching vocabulary and reading comprehension and fostering motivation for reading. Prerequisite: ELED/SCED 6310 or 6360. Also taught as ELED 6570. (All years)

SCED 6580  Character and Values Education  2
Overview of research, theory, and practical approaches to values education, emphasizing processes of moral development and socialization. Also taught as ELED 6580. (Su)

SCED 6590  Supervising School Reading Program  2
Examines strategies for improving school reading programs. Emphasizes simulations, guided practice, and small group discussions. Prerequisites: ELED/SCED 6350 and 6360. Also taught as ELED 6590. (Sp)

SCED 6600  Philosophy and Organization of the Middle Level School  3
Focuses on characteristics of young adolescents and how middle level schools can be organized to meet those characteristics through interdisciplinary teaming, advisory programs, and exploratory mini-courses. Also taught as ELED 6600/4600. (F,Su)

SCED 6610  Curriculum, Methods, and Assessment for the Middle Grades  3
Examines the processes of second language acquisition, including the influences of linguistic, cognitive, and sociocultural factors, as well as the relationship to first language acquisition. Emphasizes implications for teaching in the K-12 classroom environment. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 6730/4730. (F,Su)

SCED 6620  Service Learning Applications for the Middle Grades  3
Examines literature related to service learning for the middle grades. Application of service learning in curriculum. Also taught as ELED 6620/4620. (Su)

SCED 6730  Educational Linguistics  3
Examines theoretical foundations, functions, and characteristics of first language acquisition and language variation in a Pre-K-12 classroom context. Also emphasizes social context of language in K-12 classroom interaction, instruction, and curriculum. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 6730/4730. (F,Su)

SCED 6740  Second Language Acquisition in the Classroom  3
Examines the processes of second language acquisition, including the influences of linguistic, cognitive, and sociocultural factors, as well as the relationship to first language acquisition. Emphasizes implications for teaching in the K-12 classroom environment. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 6740/4740. (Sp,Su)

SCED 6760  ESOL Instructional Strategies  3
Includes strategies for promoting oral language, reading, and writing for K-12 English language learners. Methods for integration for second language learners into the larger school community. Discussion of parental involvement. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 6760/4760. (F,Sp)

SCED 6770  ESOL Instructional Strategies in the Content Areas  3
Focuses on methods which help English language learners in content-area classrooms to increase academic learning and integration into the larger school community. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 6770/4770. (F,Sp)

SCED 6780  Assessment for Language Learners  3
Explores principles and techniques for developing, analyzing, and interpreting assessment measures for English language learners, including oral, reading, and content-area assessment, as well as assessments used in public schools. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 6780/4780. (F,Sp)

SCED 6840  Workshop: Intermountain Conference on Education of the Gifted and Talented  1-2
Provides instruction by leading national authorities in gifted and talented education, as well as networking with educators of the gifted from throughout the Intermountain West. Also taught as ELED 6840. (Su)

SCED 6900  Independent Study  1-3
Individually directed readings and conference. Departmental permission required before registration. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 6910  Independent Research  1-3
Individually directed research projects. Departmental permission required before registration. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 6940  Internship in Supervision  3
Provides experience in supervision with selected public school personnel in approved settings. Experiences arranged by student’s graduate committee. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 6960  Creative Project  3
Individually directed creative project, with a focus closely related to coursework or to area of teaching specialization. Only students pursuing the Plan B MEd option should enroll in this course. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 6970  Master's Thesis  3-6
Individually directed research in thesis writing, with guidance from committee chair. Designed for use on MA and MS degrees only. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 6980  Portfolio Project  3
Individually directed portfolio for students in the M.Ed Plan B degree, only to be taken at the end of student’s program of study. Designed for students to integrate and apply concepts learned in the master’s program. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 6990  Continuing Graduate Advisement  1-9
Experiences in supervising and advising graduate students. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 7000  Student Teacher Supervision  1-3
Experiences in providing guidance for secondary student teachers in public schools. Analysis of roles and responsibilities of cooperating teachers and university supervisors. Prerequisite: Instructor’s approval. (F,Sp)

SCED 7050  Internship in Program Evaluation  1-6
Provides experiences in practical aspects of program evaluation through planned and supervised evaluation project participation. Must be approved by student’s graduate committee. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 7060  Internship in Research  1-6
Provides experiences in conducting research through planned and supervised research project participation. Must be approved by student’s graduate committee. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 7320  Literacy and Cognition  3
Provides instruction by leading national authorities in gifted and talented education, as well as networking with educators of the gifted from throughout the Intermountain West. Also taught as ELED 6840. (Su)

SCED 7330  Internship in Supervision  1-3
Provides opportunities for practicing supervision with selected public school personnel in approved settings. Experiences arranged by student’s graduate committee. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 7350  Internship in Curriculum Development  1-3
Provides opportunities for practicing supervision with selected public school personnel in approved settings. Experiences arranged by student’s graduate committee. Prerequisite: Instructor’s approval. (F,Sp,Su)
**Course Descriptions**

**Science (SCI)**

See College of Science, pages 129-130.

**SCI 4300 Science in Society** 2
Investigation of interactions between current scientific topics and societal goals and concerns. Intended as a capstone course for science teaching majors. Prerequisite: Senior standing and consent of instructor. (F,Sp)

**Sociology (SOC)**

See Department of Sociology, Social Work and Anthropology, pages 500-511.

**SOC 1010 BSS Introductory Sociology** 3
Examination of social behavior of humans and social institutions. Theories and methods for studying society and social issues, along with insights from related disciplines. (F,Sp)

**SOC 1020 Social Problems** 3
Study of major U.S. and international social problems. Examination of how issues are defined as social problems and ways groups attempt to solve the problems. (F,Sp)

**SOC 2370 Sociology of Gender** 3
(formerly SOC 2500)
Examines impacts of social constructions of gender on individual and collective experience. Investigates how gender is shaped through social processes and through the effects of social institutions. Particular attention given to relation of gender to social stratification. (F)

**SOC 3010 Race, Class, and Gender** 3
Examines theories and research concerning how race, class, and gender intersect in the lives of societal members. (F,Sp)

**SOC 3110 CI Methods of Social Research** 3
Methods and techniques of analyzing social data. Examines surveys, field research, observational studies, and other social science techniques. Emphasizes analysis of data and published research. Prerequisite: Completion of 6 credits in departmental courses. (F,Sp)

**SOC 3120 QI Social Statistics I** 3
Examines use of statistics in social sciences. Particular focus on use of statistical analysis with surveys and census-type data. Includes parametric and nonparametric statistics utilized most in social analysis. Prerequisite: Completion of 6 credits in departmental courses and STAT 1040 or equivalent. (F,Sp)

**SOC 3200 DSS Population and Society** 3
Examination of interrelationships between population change and social structure in national and international context. Examines contributions of fertility, mortality, and migration to population characteristics, particularly sex, age, and ethnic composition. Stressess demographic data and analysis. (F,Sp)

**SOC 3320 Sociology of Work and Organization** 3
Emphasizes analysis of work, social stratification, and class systems. (Sp)

**SOC 3330 Medical Sociology** 3
In-depth analysis of major contributions of sociology to the field of medicine. (F)

**SOC 3410 Juvenile Delinquency** 3
Focuses on nature, extent, and causes of delinquent behavior. Examines workings of juvenile justice system and programs for delinquency prevention. (F,Sp)

**SOC 3420 Criminology** 3
Examines theoretical explanations for crime in the U.S. Describes characteristics of major forms of criminal behavior. (F,Sp)

**SOC 3430 Social Deviance** 3
Examines behavior that is considered socially deviant. Emphasizes social aspects of deviance and the definition of deviance. (F,Sp)

**SOC 3500 Social Psychology** 3
Examines interaction between the social system and the individual. Examines human behavior in terms of positions people occupy in the social structure. (F,Sp)

**SOC 3600 Sociology of Urban Places** 3
Examines social behavior in urban and nonmetropolitan areas. Examines social change, especially regarding law enforcement, courts, and corrections. (F,Sp)

**SOC 3610 DSS Rural Sociology** 3
Examines patterns and processes of social change in rural and nonmetropolitan sectors of the U.S. and other advanced industrial societies. Considers how rural social change is influenced by demographic, economic, political, and natural resource conditions at regional, national, and global scales. (F)

**SOC 3750 Sociology of Aging** 3
Examines theoretical explanations for aging in the U.S. Examines psychological, social, and biological aspects of aging. (F,Sp)

**SOC 4010 Contemporary Sociological Theory** 3
Study of major theories and schools of thought in sociology from the late nineteenth century through recent and current works. Emphasizes contemporary issues, insights, and uses of sociological theory. (F,Sp)

**SOC 4330 Sociology of Religion** 3
Discussion of theories and research used by sociologists to understand social dimensions of religion. Includes ways in which religion influences and is influenced by other societal institutions, such as politics, the economy, and the class system. (F)

**SOC 4350 Political Sociology** 3
Examines prevalent theories and concepts related to global development, underdevelopment, and social change. Examines political aspects of social change, emphasizing the role of social change in the global economy. (Sp)

**SOC 4420 CI Criminal Law and Justice** 3
Examines legal systems and the role of law enforcement in society. Focuses on law enforcement, courts, and corrections. (Sp)

**SOC 4620 DSS Sociology of the Environment and Natural Resources** 3
Examines the social aspects associated with the environment and natural resources. Topics include: environmental attitudes and perceptions, environmentalism as a social movement, resource scarcity and land use, and social change in resource-based communities. (Sp)

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 4710</td>
<td>Asian Societies</td>
<td>3</td>
<td>Explores history; social, economic, and political institutions; and peoples and cultures of Asian Societies. (Sp)</td>
</tr>
<tr>
<td>SOC 4720</td>
<td>Applied Community Development</td>
<td>3</td>
<td>Involves a service-learning placement with an organization engaging in community development. Overview of community development models and theories, as well as the service-learning activity. Includes reflective evaluation of theories based upon the service-learning experience. (Sp)</td>
</tr>
<tr>
<td>SOC 4730</td>
<td>Women in International Development</td>
<td>3</td>
<td>Examines status of women in developing countries, and the role they play in the development process. (Sp)</td>
</tr>
<tr>
<td>SOC 4800</td>
<td>Seminar in Sociology</td>
<td>1-3†</td>
<td>Seminars in various areas of sociology: (a) theory, (b) methodology, (c) demography, (d) social organization, (e) social deviance, (f) social psychology, (g) human ecology, (h) gerontology. (F,Sp)</td>
</tr>
<tr>
<td>SOC 4900</td>
<td>Independent Readings in Sociology</td>
<td>1-5†</td>
<td>Independent readings in various areas of sociology: (a) theory, (b) methodology, (c) demography, (d) social organization, (e) social deviance, (f) social psychology, (g) human ecology. Prerequisite: Permission of instructor. (F,Sp,Su)</td>
</tr>
<tr>
<td>SOC 5100</td>
<td>Interpreting Social Research</td>
<td>3</td>
<td>Examines research design issues (conceptualization and measurement, sampling), modes of observation (experiments, surveys, field research, evaluation research), and interpreting social research findings (basic understanding of statistical analysis), as well as focusing on the ethics and politics of social research. (F,Su)</td>
</tr>
<tr>
<td>SOC 5130</td>
<td>Ethnographic Field School</td>
<td>3-6</td>
<td>Provides practical training in use of ethnographic field methods, qualitative data analysis, and ethnographic report-writing. Combines classroom instruction with supervised off-campus field research, while living in a cross-cultural setting. Fulfills program methods requirement. Application and additional fee required. Also taught as ANTH 5130/6130. (Su)</td>
</tr>
<tr>
<td>SOC 5140</td>
<td>Conflict Management in Natural Resources</td>
<td>3</td>
<td>Introduction to conflict management techniques for those involved in natural resource management. Also taught as ENVS 5640/6640. (Sp)</td>
</tr>
<tr>
<td>SOC 5560</td>
<td>DSS Developing Societies</td>
<td>3</td>
<td>Reviews how sociology, cultural geography, and economic anthropology analyze processes of globalization in postcolonial societies. Examines changing livelihoods, patterns of spatial incorporation and societal evolution, and emergent policy problems associated with rapid socioeconomic change. Also taught as ANTH 5560/6560 and GEOG 5650/6650. (F)</td>
</tr>
<tr>
<td>SOC 6010</td>
<td>Development of Sociological Theory</td>
<td>3</td>
<td>Examines development of social theory from early to premodern times. Special attention given to nineteenth century European influences on development of American sociological theory. (F)</td>
</tr>
<tr>
<td>SOC 6020</td>
<td>Modern Social Theory</td>
<td>3</td>
<td>Examines current analytical and empirical theories from sociology as science perspective. Also explores network, exchange, conflict, functional, and interactionist approaches to, and difficulties with, scientific theorizing. (F)</td>
</tr>
<tr>
<td>SOC 6100</td>
<td>Advanced Methods of Social Research</td>
<td>3</td>
<td>Examines philosophical bases, techniques, and political and ethical aspects of social research. (F)</td>
</tr>
<tr>
<td>SOC 6130</td>
<td>Ethnographic Field School</td>
<td>3-6</td>
<td>Provides practical training in use of ethnographic field methods, qualitative data analysis, and ethnographic report-writing. Combines classroom instruction with supervised off-campus field research, while living in a cross-cultural setting. Fulfills program methods requirement. Application and additional fee required. Also taught as ANTH 6130/5130. (Su)</td>
</tr>
<tr>
<td>SOC 6150</td>
<td>Social Statistics II</td>
<td>3</td>
<td>Statistical procedures for sociological analysis; nonparametric statistics; inferential statistics, cross-tabulation, and log-linear analysis; correlation; regression; ANOVA; and other multivariable social science statistical treatments. (Sp)</td>
</tr>
<tr>
<td>SOC 6200</td>
<td>Social Demography</td>
<td>3</td>
<td>Focuses on relationships between demographic and sociological processes. Study of theoretical perspectives and empirical analyses of the determinants. Consequences of change in population size, composition, and distribution, as well as changes in demographic processes. (F)</td>
</tr>
<tr>
<td>SOC 6230</td>
<td>Techniques of Demographic Analysis</td>
<td>3</td>
<td>Provides instruction in use of rates, ratios, life tables, and related measures to describe, analyze, and estimate population. Review of measures designed to examine the three demographic processes: fertility, mortality, and migration. Utilization of analytical tools to explore population composition. Special emphasis placed on use of U.S. Census data to create population profiles. (Sp)</td>
</tr>
<tr>
<td>SOC 6250</td>
<td>Sociology Internship/Co-op</td>
<td>1-6</td>
<td>Professional level of educational work experience in an internship/cooperative education position for graduate students. (F,Sp,Su)</td>
</tr>
<tr>
<td>SOC 6310</td>
<td>Sociology of Work and Occupations</td>
<td>3</td>
<td>Uses an applied and comparative cross-cultural perspective to examine work in pre-industrial (agricultural/pastoral), industrializing, industrialized, and post-industrial societies. (Sp)</td>
</tr>
<tr>
<td>SOC 6420</td>
<td>Gender and Social Inequality</td>
<td>3</td>
<td>Contemporary American gender stratification, including (1) What is the problem? (2) Why is it a problem? (3) How does it interact with other stratifiers? (4) What caused it or is causing it? (5) How and why is it maintained? and (6) When does it vary and why? Comparison of different views on these issues. (Sp)</td>
</tr>
<tr>
<td>SOC 6450</td>
<td>Special Topics in Social Problems</td>
<td>3</td>
<td>Seminars on various topics appropriate to sociological analysis of contemporary social problems. Subject matter will reflect current faculty research and interests. (F,Sp)</td>
</tr>
<tr>
<td>SOC 6460</td>
<td>Sociology of Health</td>
<td>3</td>
<td>Examination of social and cultural factors influencing health. Analysis of health behaviors as consequences of variety of diverse personal and social processes. (F)</td>
</tr>
<tr>
<td>SOC 6620</td>
<td>Environment, Technology, and Social Change</td>
<td>3</td>
<td>Focuses on human interactions with the physical environment and changes brought about by this interaction. Topics of major emphasis include: approaches to environmental sociology; environmental values and attitudes; social movements pertaining to environmental concern; and social change responses to technology and resource scarcity. (Sp)</td>
</tr>
<tr>
<td>SOC 6630</td>
<td>Natural Resources and Social Development</td>
<td>3</td>
<td>Focuses on social dimensions of natural resources use, development, scarcity, and allocations. Examines ways in which changing resource conditions impact human social organization. Emphasis on topics including: social characteristics of resource-dependent communities and areas; social organizational responses to changes in availability of, or access to, natural resources; and social impacts of natural resource development activities. (Sp)</td>
</tr>
<tr>
<td>SOC 6640</td>
<td>Conflict Management in Natural Resources</td>
<td>3</td>
<td>Introduction to conflict management techniques for those involved in natural resource management. Also taught as ENVS 6640/5640. (Sp)</td>
</tr>
<tr>
<td>SOC 6650</td>
<td>Developing Societies</td>
<td>3</td>
<td>Reviews how sociology, cultural geography, and economic anthropology analyze processes of globalization in postcolonial societies. Examines changing livelihoods, patterns of spatial incorporation and societal evolution, and emergent policy problems associated with rapid socioeconomic change. Also taught as ANTH 6650/5650 and GEOG 6650/5650. (F)</td>

### SOIL 3100 DSC Soil and Civilization
- Lectures, readings, and discussions to explore effects of soil physical, chemical, and biological properties on civilization throughout history. Influence of soils on settlement patterns, land use/management, and civilization decline. Case studies focus on current soil and land use issues in western North America. (Sp)

### SOIL 3000 Fundamentals of Soil Science
- Fundamentals of soil science, emphasizing physical, chemical, mineralogical, and biological properties of soils, and how these properties relate to plant growth and environmental quality. Prerequisites: CHEM 1110, MATH 1050, or equivalents. (F,Sp)

### SOIL 2000 BPS Soils, Waters, and the Environment
- Introduction to principles of physical and biological science. Discussion of current environmental topics, focusing on soil and the waters that contact the soil. Topics include water quality, global climate change, deforestation, soil conservation, and agricultural sustainability. (Sp)

### SOIL 6750 Social Change and Development*
- Readings from both domestic and international scholarship are used to examine the important social, economic, and political forces that shape patterns of social change and development. (Sp)

### SOIL 6700 Advanced Rural Sociology*
- Analysis of major developments in the study of rural society and rural communities. Emphasis on rural social changes related to economic, demographic, organizational, and technological trends at societal and global levels. (Sp)

### SOIL 6730 Gender and International Development*
- Examines gender issues in economic and social development. Focuses on theory and methodologies for gender analysis. (Sp)

### SOIL 6750 Social Change and Development*
- Readings from both domestic and international scholarship are used to examine the important social, economic, and political forces that shape patterns of social change and development. (Sp)

### SOIL 6800 Seminar in Sociology
- Seminars in various areas of sociology: (a) theory, (b) methodology, (c) demography, (d) social organization, (e) social deviance, (f) social psychology, (g) social problems, (h) international development, (i) domestic development, (j) social mobility, (k) environmental sociology, (l) other. (F,Sp,Su)

### SOIL 6900 Independent Readings in Sociology
- Independent readings in various areas of sociology: (a) theory, (b) methodology, (c) demography, (d) environmental/natural resource sociology, (e) sociology of development, (f) social problems. (F,Sp,Su)

### SOIL 6970 Thesis Research
- (F,Sp,Su)

### SOIL 6990 Continuing Graduate Advisement
- (F,Sp,Su)

### SOIL 7010 Issues in Sociological Theory*
- Explores current philosophical discussions on theoretical approaches to understanding society. Examines feminist, post-structuralist, and postmodernist conceptualizations of power, knowledge, and identity. (Sp)

### SOIL 7100 Advanced Survey Techniques*
- Examines the empirical and methodological literature regarding techniques for designing and implementing mail, telephone, and internet surveys for sociological research. Focuses on practical lessons for sampling, data collection, and survey data organization. (Sp)

### SOIL 7110 Advanced Sociological Analysis*
- Provides review of several quantitative approaches utilized in contemporary social research. Students undertake small-scale analytical exercises in topics including, but not limited to, log-linear and structural equation modeling, logistic regression, and event history analysis. (F)

### SOIL 7150 Advanced Qualitative Methods in Sociology*
- Examines the empirical and methodological literature regarding techniques for designing and implementing qualitative data collection and analysis for sociological research. Emphasizes practical tools for graduate students seeking to use qualitative methods for their thesis or dissertation research. (Sp)

### SOIL 7210 Teaching Sociology
- Provides a learning opportunity for graduate students who will be graduate instructors or teaching assistants. Reviews teaching strategies (meeting a class for the first time, teaching a large lecture class) and course development (constructing a syllabus, developing tests and writing assignments). (F)

### SOIL 7250 Advanced Seminar in Social Demography*
- Detailed comparative and multilevel examination of substantive and methodological issues in the study of nuptiality, fertility, morbidity and mortality, migration, and social mobility. Covers theories, data collection strategies, measurement issues, and analytical techniques. (Sp)

### SOIL 7400 Perspectives on Inequality and Social Problems*
- Examines major theoretical and empirical approaches to the sociological analysis of inequality and social problems. (F)

<td>3</td>
<td></td>
<td>Examines properties, distribution, movement, uses, treatment, and care of our planet’s most vital resource. Through examples from everyday life and case studies, explores the many implications of the physical properties of water on the natural and constructed world. (Sp)</td>
</tr>
<tr>
<td>SOIL 4000</td>
<td>Soil and Water Conservation</td>
<td>4</td>
<td>Applied soil and water conservation in an agronomic setting. Management of soil-water-plant-atmosphere continuum. Soil conservation techniques as they apply to actual situations. (F)</td>
<td></td>
</tr>
<tr>
<td>SOIL 4700</td>
<td>Irrigated Soils</td>
<td>3</td>
<td>Soil salinity, soil-moisture-plant relationships, water supply and quality, irrigation water measurements, soil moisture movement, and irrigation methods. Prerequisite: SOIL 3000 or equivalent, or instructor’s consent. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOIL 5050</td>
<td>Principles of Environmental Soil Chemistry**</td>
<td>3</td>
<td>Introduction to common chemical processes occurring among solid, liquid, and gas phases in soil systems. Emphasis placed on chemistry of arid land soils. Prerequisites: CHEM 1110 or higher, MATH 1050 or higher. (Sp odd)</td>
<td></td>
</tr>
<tr>
<td>SOIL 5130</td>
<td>Soil Genesis, Morphology, and Classification</td>
<td>4</td>
<td>Morphology, development, and classification of soils. Lectures and weekly field exercises emphasize soil as a natural body of the landscape: its properties, distribution, behavior, and interpretations for diverse land uses. Prerequisite: Understanding of fundamental soil science; SOIL 3000 recommended. (F even)</td>
<td></td>
</tr>
<tr>
<td>SOIL 5310</td>
<td>Soil Microbiology*</td>
<td>3</td>
<td>Ecology and diversity of microorganisms in soils. Emphasis on factors controlling microbial activity and the role of microorganisms in organic matter decomposition and nutrient cycling. Prerequisites: BIOL 1610, 1620; CHEM 2300 or 2310; SOIL 3000. Also taught as BIOL 5310. (F)</td>
<td></td>
</tr>
<tr>
<td>SOIL 5320</td>
<td>Soil Microbiology Laboratory*</td>
<td>2</td>
<td>Techniques for measuring microbial activity and diversity in soils. Includes use of molecular and isotope methods. Prerequisite: Concurrent or prior enrollment in BIOL/5310. Also taught as BIOL 5320. (F)</td>
<td></td>
</tr>
<tr>
<td>SOIL 5350</td>
<td>Wildland Soils</td>
<td>3</td>
<td>Application of basic principles of soil science to wildland ecosystems. Effects of disturbance and land use on wildland soil properties. Role of soils in natural resource management. Prerequisites: CHEM 1110, SOIL 3000, and one additional upper-division Soils course, or permission of instructor. Also taught as FRWS 5350/6350. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOIL 5550 QI</td>
<td>Soils and Plant Nutrient Bioavailability</td>
<td>3</td>
<td>Description of forms, transformations, and movement of plant nutrients in soils. Discussion of factors affecting nutrient supply, both qualitatively and quantitatively, for nutrient elements essential for plant growth. Prerequisites: SOIL 3000; CHEM 1110 or 1210. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOIL 5560</td>
<td>Analytical Techniques for the Soil Environment</td>
<td>2</td>
<td>Analysis of chemical and biological soil characteristics. Results interpreted for soil fertility, land use, and environmental remediation. Graduate credit requires a paper reviewing analysis of element or compound class. Prerequisite: SOIL 5050/650 or 5550/6550 (may be taken concurrently), or instructor’s permission. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOIL 5600</td>
<td>Surface Hydrologic Field Methods**</td>
<td>3</td>
<td>Hydrologic concepts and terminology taught through collection, analysis, and interpretation of hydrologic data. Emphasizes principles and practice of several hydrologic measurements and water sampling in natural and manmade environments. Prerequisite: SOIL 3000 or instructor’s permission. Also taught as AWER 5600/6600. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOIL 5620</td>
<td>Aquatic Chemistry</td>
<td>3</td>
<td>Provides students with understanding of principles of aquatic chemistry, emphasizing chemical equilibria, acid-base reactions, complex formation, oxidation-reduction reactions, complex formation, and dissolution chemistry. Prerequisite: CHEM 1210 or equivalent. Also taught as CEE 5620. (F)</td>
<td></td>
</tr>
<tr>
<td>SOIL 5650</td>
<td>Environmental Soil Physics (dual listing 6650)</td>
<td>3</td>
<td>Characterization of the physical properties of soils and other porous media. Measurement, prediction, and control of processes taking place in and through soils (e.g., water flow and solute transport), including atmospheric and groundwater interactions. (F)</td>
<td></td>
</tr>
<tr>
<td>SOIL 5750</td>
<td>Environmental Quality: Soil and Water</td>
<td>2</td>
<td>Senior capstone course for Environmental Soil/Water Science (ESWS) major. Students analyze current soil and water environmental quality problem(s), formulate remediation or mitigation plans, and present findings in oral and written reports. Prerequisites: SOIL 5130 and the 5000-level Soil courses. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOIL 6050</td>
<td>Principles of Environmental Soil Chemistry**</td>
<td>3</td>
<td>Introduction to common chemical processes occurring among solid, liquid, and gas phases in soil systems. Emphasis placed on chemistry of arid land soils. Prerequisites: CHEM 1110 or higher, MATH 1050 or higher. (Sp odd)</td>
<td></td>
</tr>
<tr>
<td>SOIL 6130</td>
<td>Soil Genesis, Morphology, and Classification</td>
<td>4</td>
<td>Morphology, development, and classification of soils. Lectures and weekly field exercises emphasize soil as a natural body of the landscape: its properties, distribution, behavior, and interpretations for diverse land uses. Prerequisite: Understanding of fundamental soil science; SOIL 3000 recommended. (F even)</td>
<td></td>
</tr>
<tr>
<td>SOIL 6140</td>
<td>Unsaturated Flow and Transport**</td>
<td>3</td>
<td>Measurement, prediction, and control of transport processes taking place in and through partially saturated porous formations (e.g., water flow and solute-transport), emphasizing parameter estimation and multi-dimensional flow. (F)</td>
<td></td>
</tr>
<tr>
<td>SOIL 6190</td>
<td>Salt-affected Soils**</td>
<td>2</td>
<td>Emphasis on chemistry of salt-affected soils. Topics include carbonate chemistry, cation exchange, and reclamation of sodium and salt-affected soils. Exploration of effects of sodium accumulation on soil hydraulic conductivity and the biochemistry of salt and potentially toxic elements. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOIL 6200</td>
<td>Biogeochemistry of Terrestrial Ecosystems**</td>
<td>3</td>
<td>Inputs, outputs, and cycling patterns of major nutrients. Emphasis on mechanisms for transformations, factors influencing process rates, and the impacts of management and global change on nutrient cycles and air and water quality. Prerequisites: BIOL 1620, SOIL 3000, CHEM 2300 or 2310, or permission of instructor. Also taught as BIOL 6200 and FRWS 6200. (F)</td>
<td></td>
</tr>
<tr>
<td>SOIL 6350</td>
<td>Wildland Soils</td>
<td>3</td>
<td>Application of basic principles of soil science to wildland ecosystems. Effects of disturbance and land use on wildland soil properties. Role of soils in natural resource management. Prerequisites: CHEM 1110, SOIL 3000, and one additional upper-division Soils course, or permission of instructor. Also taught as FRWS 6350/5350. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOIL 6400</td>
<td>Spatial and Temporal Estimation Methods for Environmental Sciences**</td>
<td>2</td>
<td>Introduction to methods for obtaining spatial information and interpolation schemes. Incorporation of uncertainty into dynamic models (temporal predictions). Methods and models for combining spatial and temporal information, with applications to monitoring and forecasting natural processes. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOIL 6550</td>
<td>Soils and Plant Nutrient Bioavailability</td>
<td>3</td>
<td>Description of forms, transformations, and movement of plant nutrients in soils. Discussion of factors affecting nutrient supply, both qualitatively and quantitatively, for nutrient elements essential for plant growth. Prerequisites: SOIL 3000; CHEM 1110 or 1210. (Sp)</td>
<td></td>

<td>DHA Latin American Culture and Civilization</td>
<td>3</td>
<td>Historical, social, political, economic, and cultural conditions and institutions of Latin American countries. (Sp)</td>
</tr>
<tr>
<td>SPAN 3600</td>
<td>DHA Survey of Spanish Literature I</td>
<td>3</td>
<td>Selective readings and discussions of major works and authors in Spanish literature from El Cid through Calderon. Prerequisites: ENGL 1010 and 2010; SPAN 3040; and either SPAN 3550 or 3570. (F, Sp)</td>
</tr>
<tr>
<td>SPAN 3610</td>
<td>DHA Survey of Spanish Literature II</td>
<td>3</td>
<td>Selective readings and discussions of major works and authors in Spanish literature from the eighteenth to twentieth centuries. Prerequisites: ENGL 1010 and 2010; SPAN 3040; and either SPAN 3550 or 3570. (F, Sp)</td>
</tr>
<tr>
<td>SPAN 3620</td>
<td>DHA Survey of Latin American Literature I</td>
<td>3</td>
<td>Selective readings and discussions of major works and authors in Latin American literature from Pre-Columbian works through the beginnings of Modernism. Prerequisites: ENGL 1010 and 2010; SPAN 3040; and either SPAN 3550 or 3570. (F, Sp)</td>
</tr>
</tbody>
</table>

---

**Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.**

**Taught 2006-2007.**

**Taught 2007-2008.**

---

**SOIL 6600** Surface Hydrologic Field Methods** 3**

Hydrologic concepts and terminology taught through collection, analysis, and interpretation of hydrologic data. Emphasizes principles and practice of several hydrologic measurements and water sampling in natural and manmade environments. Prerequisite: SOIL 3000 or instructor’s permission. Also taught as AWER 6600/5600. (Sp)

---

**SOIL 6720** Chemistry of Arid Land Soils** 3**

Chemical equilibria and kinetics of arid land soils. Special emphasis on solubility relationships of soil minerals and on carbonate chemistry. (Sp)

---

**SOIL 7200** Soil Interfacial Processes and Reactive Transport** 3**

Course divided into two blocks. Subject matter for first block is soil electrochemistry and surface chemistry. Second block applies material from first block to system in which transport limits reaction time. (Sp)

---

**SOIL 7210** Advanced Topics in Pedology 2°

Strategies for designing and critiquing pedological research through literature, discussions, and field trips. Topics will change, depending upon student interest, and can include factors and processes involved in pedogenesis, soil mineralogy, soil-biota relationships, and landscape evolution. Prerequisite: SOIL 6130/5130.

---

**SOIL 8130** Chemistry of Arid Land Soils** 3**

Chemical equilibria and kinetics of arid land soils. Special emphasis on solubility relationships of soil minerals and on carbonate chemistry. (Sp)

---

**SOIL 3000** Analytical Techniques for the Soil Environment 2

Analysis of chemical and biological soil characteristics. Results interpreted for soil fertility, land use, and environmental remediation. Graduate credit requires a paper reviewing analysis of element or compound class. Prerequisite: SOIL 6050/5050 or 6550/5550 (may be taken concurrently), or instructor’s permission. (Sp)

---

**SOIL 6550** Environmental Soil Physics 3

Characterization of the physical properties of soils and other porous media. Measurement, prediction, and control of processes taking place in and through soils (e.g., water flow and solute transport), including atmospheric and groundwater interactions. (F)
# Course Descriptions

**SPAN 3630 DHA Survey of Latin American Literature II**
3
Selective readings and discussions of major works and authors in Latin American literature from Modernism to the present. Prerequisites: ENGL 1010 and 2010; SPAN 3040; and either SPAN 3550 or 3570. (F,Sp)

**SPAN 3650 Spanish Literature—Study Abroad**
1-4
Selective readings and discussions of major works and authors in Spanish literature. Taught only in Studies Overseas in Spanish program. Prerequisites: ENGL 1010 and 2010; SPAN 3040; and either SPAN 3550 or 3570 (or equivalents). (Su)

**SPAN 3660 Latin American Literature—Study Abroad**
1-4
Selective readings and discussions of major works and authors in Latin American literature. Taught only in Studies Overseas in Spanish program. Prerequisites: ENGL 1010 and 2010; SPAN 3040; and either SPAN 3550 or 3570 (or equivalents). (Su)

**SPAN 3800 Spanish III Study Abroad**
1-4
Intensive review of selected problematic areas of Spanish grammar for students with advanced language skills. Taught only in studies overseas in Spanish program. (Su)

**SPAN 4200 Applied Spanish Linguistics and Phonetics**
3
Analysis of selected phonological, morphological, syntactic, and semantic features of the Spanish language, including Spanish-English contrastive analysis. Prerequisite: SPAN 3040. (Sp)

**SPAN 4800 Hispanic Culture and Civilization—Study Abroad**
1-4
Historical, social, political, economic, and cultural conditions and institutions of Hispanic countries. Taught only in studies overseas in Spanish program. (Su)

**SPAN 4880 Individual Readings**
1-4
Individual readings or projects in Spanish. Prerequisite: Instructor’s permission. (F,Sp)

**SPAN 4900 Topics of Spanish Literature**
3
Repeatable for additional credit when topics vary. Prerequisites: At least two of the following: SPAN 3600, 3610, 3620, and 3630. (F,Sp)

**SPAN 4910 Topics of Latin American Literature**
3
Repeatable for additional credit when topics vary. Prerequisites: At least two of the following: SPAN 3600, 3610, 3620, and 3630. (F,Sp)

**SPAN 4920 Spanish Language Tutoring**
1
Allows students to develop tutoring skills by assisting professors in lower-division courses or fulfilling instructional duties for a comparable amount of time in the language laboratory, public schools, or similar activities with departmental approval. May be repeated to a maximum of 3 credits. Prerequisite: Permission of instructor. (F,Sp, Su)

**SPAN 4990 Spanish Degree Assessment**
1
Final requirement for all Spanish majors and minors, to be completed their last semester before graduation. Includes review of coursework and comprehensive exit examination, individualized according to the courses taken for the degree. Prerequisite: Permission of instructor. (F,Sp, Su)

**SPAN 6200 Spanish Linguistics and Phonetics**
3
Analysis of phonology, morphology, and syntax of the Spanish language. Prerequisite: SPAN 2020, another 3000-level or higher SPAN course, or demonstrated proficiency through testing. (Sp)

**SPCH 2110 CI Interpersonal Communication**
3
(formerly SPCH 2600 CI)
Examination of theories, methods, and competencies relevant to studying, establishing, and maintaining interpersonal relationships in family, intercultural, professional, and other contexts. Classroom experiences with topics such as perception, language, nonverbal behavior, conflict resolution, and listening. (F,Sp)

**SPCH 2270 Argumentation and Debate**
3
(formerly SPCH 4280)
Techniques of analysis, investigation, evidence, reasoning, brief making, refutation, and construction and delivery of the arguumentative speech and academic debate. (F)

**SPCH 2280 Listening**
2
Development of comprehension, critical, and relationship listening skills. Experience in developing listening training for kindergarten to adult education. (Sp)

**SPCH 3000 Speech Communication Teaching Practicum**
1
Intensive speech teaching workshop. Supervised on-campus teaching experience. Must be completed prior to student teaching experience. Repeatable to a maximum of 2 credits. (Sp)

**SPCH 3050 DSS Technical and Professional Communication**
3
Skill development in oral technical reporting, interviewing, and interpersonal communication to meet the unique communication requirements of business, industry, and the professions. (Su)

**SPCH 3250 CI Organizational Communication**
3
Study of internal communication requirements of organizations. Analysis of communication problems associated with conflict, diversity, interpersonal influence, communication technology, and information flow. Development of effective communication practices. (F)

**SPCH 3300 Clinical Experience I**
1
First clinical practicum in middle and secondary schools. Arranged by special methods instructor. Required at Level I. Must be taken concurrently with SPCH 5370. Prerequisites are set by the Secondary Education Department. (F)

**SPCH 3330 DSS Intercultural Communication**
3
Study of how communication shapes culture and how culture, in turn, affects communication. Development of active intercultural communication in professional and personal contexts. (F)

**SPCH 3400 CI Persuasion**
3
Survey of theory and research investigating the process of social influence. Topics include: compliance-gaining strategies, enactment and detection of deception, verbal and nonverbal influence, attitude change, conformity, communicator characteristics, credibility, emotional appeals, and ethics. (F)

**SPCH 3600 Communication and Conflict**
3
Study of contemporary theories on conflict and communication. Analyses of the roles of culture, gender, and personal and/or organizational ethics in conflict and disputes. Discussion and application of negotiation, mediation, and facilitation skills. (F)

**SPCH 4300 Clinical Experience II**
1
Second clinical practicum in middle and secondary schools. Arranged by special methods instructor. Required at Level II. Must be taken concurrently with SPCH 5370. Prerequisites are set by the Secondary Education Department. (F)

**SPCH 4800 CI Nonverbal Communication**
3
Examination of theories, methods, and competencies relevant to studying, enacting, and perceiving gestures, facial expressions, body movements, touches, and other nonverbal cues. Investigation of environmental, cultural, and social influences on nonverbal communication in a variety of contexts.

**SPCH 5000 Studies in Speech Communication**
1-5
Study of special topics in interpersonal, small group, organizational, or intercultural communication theory and research. Prerequisite: Permission of instructor. (F,Sp)

---

**Speech Communication (SPCH)**

See Department of Languages, Philosophy, and Speech Communication, pages 364-379.

**SPCH 1020 CI Public Speaking**
3
(formerly SPCH 1050 CI)
Speaking in formal public communication situations. Development of skills in speech preparation, audience adaptation, and delivery. (F,Sp)

---

Utah State University 2006-2007 General Catalog
Course Descriptions

**SPCH 5090 Small Group Theory** 3
Study of theories of group processes such as decision-making, leadership, power, conflict, deviance, and the development of group structures, functions, norms, and roles.

**SPCH 5100 CI Theories of Speech Communication** 3
Social, scientific, and humanistic inquiry into the process of human communication. Multi-theoretical approach, including perspectives and research on interpersonal, persuasive, organizational, intrapersonal, group, and intercultural communication. (Sp)

**SPCH 5250 Environmental Rhetoric** 3
Study of persuasive tactics and strategies as used by social advocates. Focuses on environmental issues and organizations. Analysis of environmental messages with an emphasis on the development of writing and critical thinking skills. (Sp)

**SPCH 5280 Communication Education Theory** 3
Study of contemporary theories and research in communication education. Emphasis on communication competency development, communication apprehension, critical thinking, communication assessment, development of communication ethics, freedom of speech, instructional communication, and history of communication education. (Sp)

**SPCH 5370 Methods in Teaching Speech Communication** 3
Development of materials and strategies for teaching secondary school speech communication. Prerequisite: Admission to teacher education. (F)

---

**Special Education (SPED)**

See Department of Special Education and Rehabilitation, pages 512-522.

**SPED 0100 Strategies for Reading** 1-3
Practical course with major emphasis on improvement of reading, writing, and comprehension skills that are essential for academic success. Remedial class not carrying USU or transfer credit. Remedial fee required. (F,Sp)

**SPED 1000 Principles of Effective Peer Teaching** 2
High school peer tutors are given university credit for tutoring low readers for one hour each day. Tutors are taught a systematic tutoring and mentoring process. In addition, specific criteria are included to evaluate tutors’ instructional performance. (F,Sp)

**SPED 1010 BSS Disability in the American Experience** 3
Discussion of definitions and types of disabilities, ethical issues, society’s prejudice and discrimination against people with disabilities, and the individual’s adjustment to the disability experience. Disability as a natural part of life. Also taught as REH 1010. (3 cr)

**SPED 2010 Effective Behavior Management Practices for Paraeducators** 1-3
Teaches paraeducators to apply effective behavior management practices to individuals with disabilities in a variety of settings. Introduction to proactive behavior management strategies, basic concepts of behavior management, and the application of intervention plans.

**SPED 2150 Introductory Experience with Students with Disabilities** 1-4
Introductory seminar and practicum from which students learn basic instructional techniques from videodisc simulations, then apply them in public schools. (F,Sp,Su)

**SPED 2790 Special Topics** 1-4
**SPED 3030 Educational and Multicultural Foundations** 3
Explores historical and cultural aspects of schooling and the inclusion of students with disabilities and bilingual students in general education classrooms. Examines how schooling practices change from elementary to high school and commonalities that bind the teaching profession. (Sp)

---

**SPED 4000 Education of Exceptional Individuals** 2
Characteristics of all types of exceptional children with emphasis on the educational and psychological implications of these conditions to the development of the child. (F,Sp,Su)

**SPED 4790 Special Topics** 1-4
**SPED 4910 Undergraduate Research and Creative Opportunities** 1-4
Individually directed study at the undergraduate level. Permission of instructor required. (F,Sp,Su)

**SPED 4970H Honors Thesis** 1-6
Provides an opportunity for honors students in the Department of Special Education and Rehabilitation to interact with other honors students in the College of Education and Human Services and explore an interdisciplinary area of interest. A written paper will be required. (F,Sp,Su)

**SPED 5010 QI Applied Behavioral Analysis 1: Principles, Assessment, and Analysis** 3
Covers topics related to collecting data, using data to make decisions, analyzing data, graphing data, and applying principles of behavior management and instruction to children and youth. Prerequisite: Admission to special education major or permission of instructor. (F)

**SPED 5040 Foundations of Effective Assessment and Instructional Practices** 3
Principles of standardized and curriculum-based assessment. Foundations for designing effective instructional programs to help students achieve mastery and proficiency. Prerequisite: Admission to special education major and SPED 5010 or permission of instructor. (F)

**SPED 5050 Applied Behavioral Analysis 2: Applications** 3
Expands knowledge of basic applied behavior analysis principles. Develops skills for remediating behavior problems using functional behavioral assessment. Prerequisite: Admission to special education major or permission of instructor. (Sp)

**SPED 5060 Consulting with Parents and Teachers** 3
Provides strategies for communicating with parents and teachers, as members of a multidisciplinary team, to assist parents and other teachers in collaborative problem solving. Prerequisite: Admission to special education major or permission of instructor. (Sp)

**SPED 5070 Policies and Procedures in Special Education** 1-3
Provides an understanding of federal and state laws for persons with disabilities and procedures for organizing a special education classroom and auxiliary staff. Prerequisite: Admission to special education major or permission of instructor. (F)

**SPED 5200 CI Student Teaching in Special Education: Dual Majors** 3-15
Undergraduate student teaching for dual majors. (F,Sp,Su)

**SPED 5210 CI Student Teaching in Special Education: Dual Majors** 3-15
Undergraduate student teaching for dual majors. (F,Sp,Su)

**SPED 5220 Special Education Student Teaching Seminar** 3
Weekly seminar taken concurrently with student teaching (SPED 5200 or 5210). Focuses on problems arising during student teaching and the development of a teaching portfolio. Prerequisites: Admission to teacher education and completion of the SPED sequence. (F,Sp,Su)

**SPED 5230 Student Teaching in Special Education: Alternative Preparation** 3-15
Student teaching for students in alternative teacher preparation programs. (F,Sp,Su)

**SPED 5300 Orientation to Teaching Students with Mild/Moderate Disabilities** 2
Provides preservice teachers with overview of information and resources, examples, and practice in applying effective instructional and behavior
### Course Descriptions

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPED 5310</td>
<td>Teaching Reading and Language Arts to Students with Mild/Moderate Disabilities</td>
<td>2-4</td>
<td>Curriculum, instructional methods, assessment, and data-based decision making related to teaching reading and language arts to students with mild/moderate disabilities. (F)</td>
</tr>
<tr>
<td>SPED 5320</td>
<td>Teaching Content Areas and Transition to Students with Mild/Moderate Disabilities</td>
<td>3</td>
<td>Students learn to teach content area material, learning strategies, and transition-related skills to students with mild/moderate disabilities. Also includes assessment and decision making strategies related to these curricular areas. (F)</td>
</tr>
<tr>
<td>SPED 5330</td>
<td>Eligibility Assessment for Students with Mild/Moderate Disabilities</td>
<td>1</td>
<td>Choosing and administering eligibility assessment tests for students who may have mild/moderate disabilities. Interpretation of test results and applying results to decisions regarding students’ eligibility for special education services. (F)</td>
</tr>
<tr>
<td>SPED 5340</td>
<td>Teaching Math to Students with Mild/Moderate Disabilities</td>
<td>3</td>
<td>Explains procedures for teaching mathematics to students with mild/moderate disabilities, so that each progresses as fast as his or her capabilities will allow. Prerequisite: Admission to special education major or permission of instructor. (Sp)</td>
</tr>
<tr>
<td>SPED 5350</td>
<td>Teaching Students with Mild/Moderate Disabilities I</td>
<td>3</td>
<td>Provides students with information and skills in the area of classroom and individual behavior management procedures. Emphasizes research-validated strategies that students will apply to everyday instructional situations. Prerequisite: Admission to the Alternative Teacher Preparation Licensure Program. (F)</td>
</tr>
<tr>
<td>SPED 5360</td>
<td>Teaching Students with Mild/Moderate Disabilities II</td>
<td>3</td>
<td>Provides students with instructional and management skills. Through case studies and classroom simulations, students learn research-validated instructional and management skills. Prerequisite: Admission to the Alternative Teacher Preparation Licensure Program. (Sp)</td>
</tr>
<tr>
<td>SPED 5400</td>
<td>Orientation to Teaching Students with Severe Disabilities</td>
<td>2</td>
<td>Provides preservice teachers with overview of information, resources, examples, and practices in applying effective instructional and behavior management strategies to students with severe disabilities. (F)</td>
</tr>
<tr>
<td>SPED 5410</td>
<td>Practicum: Direct Instruction Reading and Language Arts for Students with Mild/Moderate Disabilities</td>
<td>1-3</td>
<td>Students learn to use Direct Instruction techniques, positive management, curriculum-based assessment, and data-based decision-making to teach reading and language arts to children with mild/moderate disabilities. Students are placed in a classroom, where they teach a group of children daily. (F)</td>
</tr>
<tr>
<td>SPED 5420</td>
<td>Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities</td>
<td>4</td>
<td>Use of effective instructional techniques, positive management, curriculum-based assessment, and data-based decision-making to teach mathematics content to children with mild/moderate disabilities. Students placed in a classroom, where they teach one or more group(s) of children daily. (Sp)</td>
</tr>
<tr>
<td>SPED 5430</td>
<td>Field-Based Applications for Students with Mild/Moderate Disabilities</td>
<td>3</td>
<td>Designed to help students acquire and consistently demonstrate effective teaching practices to aid students with mild/moderate disabilities. Teaches students to analyze and solve instructional and management problems. Prerequisite: Admission to the Alternative Teacher Preparation Licensure Program. (F)</td>
</tr>
<tr>
<td>SPED 5510</td>
<td>Curriculum for Students with Severe Disabilities</td>
<td>3-4</td>
<td>Provides information about commercially available curricular materials, as well as how to plan for and design functional academic curricula, for persons with severe disabilities. Prerequisite: Admission to Special Education major or permission of instructor. (F)</td>
</tr>
<tr>
<td>SPED 5520</td>
<td>Curriculum for Secondary-Level Students with Severe Disabilities</td>
<td>3</td>
<td>Provides information on developing and implementing secondary-level classroom, community, domestic, leisure, and transition instructional programs. Prerequisite: Admission to Special Education major or permission of instructor. (Sp)</td>
</tr>
<tr>
<td>SPED 5530</td>
<td>Technology for Teaching Exceptional Learners</td>
<td>3</td>
<td>Familiarizes students with existing technology (IT and AT), federal and state technology legislation, and resources to fund technology in the classroom. Teaches methods for evaluating technology needs of individuals with disabilities. Prerequisite: Admission to Special Education major or permission of instructor. Taught on campus during spring semester only. Occasionally offered off campus during fall semester. (F,Sp)</td>
</tr>
<tr>
<td>SPED 5540</td>
<td>Assessment of Persons with Severe Disabilities</td>
<td>1</td>
<td>Seminar providing students with knowledge and skills necessary for conducting assessment activities with pupils having severe disabilities. Covers norm-referenced/standardized, criterion-referenced, and alternative assessment instruments. Students complete assignments in administering, interpreting, and communicating results of each type of assessment. As a result of this training and these assignments, students should develop increased skills in administration, interpretation, and communication of assessment activities typical of students having severe disabilities. (Sp)</td>
</tr>
<tr>
<td>SPED 5550</td>
<td>Field-Based Applications for Students with Severe Disabilities</td>
<td>3</td>
<td>Designed to help students acquire and consistently demonstrate effective teaching practices to aid students with severe disabilities. Teaches students to analyze and solve instructional and management problems. Prerequisite: Admission to Severe Alternative Teacher Preparation Program. (Sp)</td>
</tr>
<tr>
<td>SPED 5560</td>
<td>Practicum in Improving School System Programs</td>
<td>1-4</td>
<td>Practicum or seminar providing information/experience in public school instruction. Permission of instructor required.</td>
</tr>
<tr>
<td>SPED 5570</td>
<td>Advanced Field-Based Applications for Students with Severe Disabilities</td>
<td>3</td>
<td>Designed to help students become competent in various effective teaching practices with students who have severe disabilities. Prerequisites: Admission to Severe Alternative Teacher Preparation Program and completion of SPED 5550. (F)</td>
</tr>
<tr>
<td>SPED 5580</td>
<td>Practicum: Introduction to Instruction of Students with Severe Disabilities</td>
<td>3</td>
<td>A field-based class providing experience in observing and teaching functional academic curricula to students with severe disabilities. Prerequisite: Permission of instructor. (F)</td>
</tr>
<tr>
<td>SPED 5590</td>
<td>Practicum: Advanced Systematic Instruction of Students with Severe Disabilities</td>
<td>4</td>
<td>Provides opportunity to assess students’ needs and to design programs for community, domestic, leisure, and transitional skills. Prerequisite: Permission of instructor. (Sp)</td>
</tr>
<tr>
<td>SPED 5610</td>
<td>Practicum: Advanced Systematic Instruction of Students with Severe Disabilities</td>
<td>3</td>
<td>Provides information about young children with disabilities, including historical development of services, skill areas, family involvement, teaming, and the array of service environments. Prerequisite: Admission to Special Education major or permission of instructor. (Sp)</td>
</tr>

<td>In-depth presentation of best practices for educational services for students with dual sensory impairments. (F)</td>
<td></td>
</tr>
<tr>
<td>SPED 6060</td>
<td>Legal Issues in Special Education</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Provides knowledge of a wide range of legal issues concerning the provision of special education services to students with disabilities. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SPED 6070</td>
<td>Infusing Mobility and Communication for Students with Dual Sensory Impairments</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Reviews methods for providing orientation and mobility training to students with dual sensory impairments. Provides methods for infusing these and communication objectives into normal age-based routine activities. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SPED 6080</td>
<td>Collaboration and Management of Services for Students with Dual Sensory Impairments</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Reviews methods of planning and coordination of services for students with dual sensory impairments (e.g., transition, lifestyle planning, transition team coordination). Service management addressing issues of scheduling, monitoring, and training of staff and peers. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SPED 6090</td>
<td>Curriculum and Environmental Variations and Management</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Presents instructional and curricular strategies to promote utilization of residual vision or hearing skills. Overviews tactile cuing and movement-based approaches, with emphasis on integration within natural context and functional activities. Review of model delivery methods. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SPED 6110</td>
<td>Social and Psychological Implications of Visual Impairments</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Explores attitudes and beliefs related to visual impairment and blindness. Emphasizes impact of vision loss on the psychosocial functioning of individuals and their families. Studies self-concept, self-esteem, and strategies to enhance these areas in visually impaired children. (Su)</td>
<td></td>
</tr>
<tr>
<td>SPED 6120</td>
<td>Ocular Disorders and Examination Techniques of Low Vision</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Students demonstrate the ability to identify the important parts of the visual system, to understand and interpret eye reports, and to translate the information into an educational plan. Participants also conduct and supervise vision screening clinics. In addition, participants demonstrate a basic understanding of approaches and practices of low-vision services. Includes low-vision aids, optics, and environmental modifications. (F)</td>
<td></td>
</tr>
<tr>
<td>SPED 6130</td>
<td>Literary Braille Codes and Technologies</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Focuses on reading and writing literary braille. Includes literary braille contractions, short-form words, punctuation, and rules of usage for basic Grade 2 braille, using the Perkins Braille Writer. Emphasizes accuracy, beginning formatting, and ability to apply the rules. Using a slate and stylus, as well as computerized braille writers, students learn to write literary braille. (F)</td>
<td></td>
</tr>
<tr>
<td>SPED 6140</td>
<td>Nemeth Braille Codes and Braille Technologies</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Transcription of print mathematical symbols into appropriate formats, using Nemeth Braille Code of Mathematics. Computation skills using adapted abacus for basic mathematical operation. Explores braille music, foreign language braille, computer braille, and Grade 3 braille. Emphasizes literary braille in more extended writing projects. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SPED 6150</td>
<td>Teaching Children with Dual Sensory Impairments (Deaf/Blind)</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Provides basic understanding of the needs of learners (ages 0-22) having sensory impairments with multiple disabilities. Includes role and characteristics of the transdisciplinary team, learning environments, resources, assessment procedures, and instructional strategies. Identifies inclusion procedures, transitional issues, and methods of encouraging parental involvement. (Su)</td>
<td></td>
</tr>
<tr>
<td>SPED 6160</td>
<td>Introduction to Orientation and Mobility</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Introduces students to orientation and mobility, as well as basic assessment techniques. Students learn to use the results of these assessments, along with specific teaching techniques in pre-cane orientation and mobility skills, in teaching children with visual impairments. Students also become familiar with basic indoor (non-cane) mobility techniques, learn to identify and teach orientation cues in the environments, and develop lesson plans to teach concepts necessary for future cane travel. (Su)</td>
<td></td>
</tr>
<tr>
<td>SPED 6170</td>
<td>Instructional Management for Students with Visual Impairments (0-21)</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Emphasizes best practices for instructional management of children with visual impairments in early intervention settings, preschool programs, and early elementary grades. Also addresses practices for older students in upper elementary through high school grades. Explores strategies for development of</td>

Course Descriptions

basic concepts, socialization skills, emergent literacy, effective braille reading and writing, daily living skills, career understanding, and recreational and leisure skills. Focuses on understanding agency and community resources, family collaboration, modification and adaptation of materials and environments, and adapted technology. (Sp)

SPED 6180 Field Studies in Visual Impairments 1
Participants work with visually impaired students in a variety of educational sites. Emphasizes use of adapted technology, implementation of teaching activities, student assessment, and modification of educational materials. Corequisite: SPED 6130 or 6170. (F,Sp)

SPED 6220 Characteristics of Children with Emotional and Behavioral Disorders 3
Examines theories and practices of instructional leadership for at-risk students. Instructs students in services and programs available for at-risk students. (Sp)

SPED 6230 Education of Students with Emotional and Behavioral Disorders 2
Methods of teaching students with emotional and behavioral disorders, including educational strategies and behavioral treatments.

SPED 6260 Intervention Strategies for Young Children with Disabilities 3
Provides information on curricula, instructional strategies, service environments, and staffing roles for teachers of young children (0-5) with disabilities. (F)

SPED 6280 Instructional Leadership for At-Risk Students 3
Examines theories and practices of instructional leadership for at-risk students. (F,Sp)

SPED 6290 Teaching Social Skills, Self-Management, and Values 3
Discuss current research and practices related to teaching social skills, self-management, and values. Explores teaching procedures and curriculum programs. (Sp)

SPED 6300 Collaboration Skills for Classroom Teachers 3
Emphasizes knowledge, attitudes, and skills which special educators must possess to effectively collaborate with parents and professionals. (F)

SPED 6320 Seminars in Learning Characteristics of Students with Dual Sensory Impairments 2
Investigates characteristics of dual sensory impairment, learning styles, and environmental demands. Awareness of eye and ear anatomy. Interprets formal assessments. Development of instructional strategies. (Su)

SPED 6410 Field Studies I: Analysis of Service for Students with Dual Sensory Impairments 2
First of three field experiences for students in the DSI program. Emphasizes team-based review and analysis of services. (F)

SPED 6420 Field Studies II: Analysis of Service for Students with Dual Sensory Impairments 2
Practicum in integrated programs for students with dual sensory impairments within the context of the model classroom. Emphasizes transdisciplinary methods for assessment, instructional design, and planning skills.

SPED 6430 Field Studies III: Analysis of Service for Students with Dual Sensory Impairments 2
Advanced practicum in integrated programs for students with dual sensory impairments. Emphasizes an overall management of instructional environment and services.

SPED 6500 Interdisciplinary Workshop 1-3
Series of self-instructional modules and videos and a variety of elective training. Module topics include developmental disabilities, legal aspects and issues, assessment, intervention, assistive technology, transition, and prevention/intervention for aggression and violence. (F,Sp,Su)

SPED 6550 Practicum in the Evaluation of Instruction 1-4
Field-based research course contributing toward graduate degrees and supervisory licensure related to the assessment of an ongoing or newly proposed program of instruction. (F,Sp,Su)

SPED 6560 Improvement of Instruction 1-4
Focuses on effective teaching methodologies, teaching performance, and curriculum decision making. (F,Sp,Su)

SPED 6700 Single-Subject Research Methods and Designs 3
Examines single-subject research methods for applied research, including measurement, design, and analysis issues. Also taught as EDUC 6700/7700. (F,Sp,Su)

SPED 6720 Advanced Behavior Analysis in Education 3
Discussion of advanced topics and issues in behavior analysis, including rule-governed behavior, stimulus control, setting events, functional analysis, and verbal behavior. Topics integrated into educational practice. Prerequisite: SPED 5050 or equivalent. (F)

SPED 6790 Special Topics 1-4

SPED 6810 Seminar in Special Education 3
(F,Sp,Su)

SPED 6890 Independent Study 1-2
Prerequisite: Permission of instructor. (F,Sp,Su)

SPED 6910 Independent Research 1-2
Prerequisite: Permission of instructor. (F,Sp,Su)

SPED 6930 Internship in Special Education 2-10
Professional and supervised intern experience for master’s program. Prerequisite: Permission of Instructor. (F,Sp,Su)

SPED 6960 Creative Project 1-6
Culminating experience of MEd program. Prerequisite: Proposal approval by supervisory committee. (F,Sp,Su)

SPED 6970 Thesis 1-9
Culminating experience of MS program. Prerequisite: Proposal approval by supervisory committee. (F,Sp,Su)

SPED 6990 Continuing Graduate Advisement 1-8
(F,Sp,Su)

SPED 7050 Internship in Program Evaluation 1-5
Guided experience in evaluation of educational programs in schools, treatment centers, homes, and communities. Prerequisite: Permission of instructor. (F,Sp,Su)

SPED 7060 Research Internship 1-5
Guided experience in conducting educational research. Prerequisite: Permission of instructor. (F,Sp,Su)

SPED 7070 Grant Writing 1-3
Guided experience in preparation of grant proposals. Permission of instructor required. (F,Sp,Su)

SPED 7330 College Teaching Internship 1-3
Guided experience in teaching university courses. (F,Sp,Su)

SPED 7500 Internship in Program Evaluation 1-5
Guided experience in evaluation of educational programs in schools, treatment centers, homes, and communities. Prerequisite: Permission of instructor. (F,Sp,Su)
Course Descriptions

**SPED 7700 (dual listing 6700)** Single-Subject Research Methods and Designs 3
Examines single-subject research methods for applied research, including measurement, design, and analysis issues. Also taught as EDUC 7700/6700. (F,Su)

**SPED 7710** Advanced Single-Subject Research Methods and Design 3
Explores advanced concepts and procedures in within-subject research methods. Builds on knowledge and skills acquired in SPED 7700 regarding scientific questions, measures, research designs, data analysis, and inference. Students analyze research and design, conduct, and report a scientific study. Prerequisite: SPED 7700. (Sp)

**SPED 7720 (dual listing 6720)** Discussion of advanced topics and issues in behavior analysis, including rule-governed behavior, stimulus control, setting events, functional analysis, and verbal behavior. Topics integrated into educational practice. Prerequisite: SPED 5050 or equivalent. (F)

**SPED 7800** Seminar: Issues in Special Education and Rehabilitation 1-3\(^*\)
Critical analysis of variety of special education and rehabilitation issues and trends. Empirical and theoretical information presented in a seminar format. (F,Sp,Su)

**SPED 7810** Research Seminar in Special Education and Rehabilitation 1-3\(^*\)
Identification of research problems and discussion of research strategies and methods. Applications of research, data analysis, and statistical concepts. (F,Sp,Su)

**SPED 7820** Seminar: Special Topics 1-3\(^*\)
In-depth study of special topics in special education and rehabilitation. Seminars examine historical aspects, relevant research, and theoretical positions on selected topics. (F,Sp,Su)

**SPED 7830** Special Education Personnel Preparation Methods 2
Focuses on critical issues in preparing special education teachers. Includes teaching, supervision, and overall program development. Students demonstrate supervision and teaching competencies. (Sp)

**SPED 7900** Independent Study 1-3\(^*\)
Prerequisite: Permission of instructor. (F,Sp,Su)

**SPED 7910** Independent Research 1-3\(^*\)
Prerequisite: Permission of instructor. (F,Sp,Su)

**SPED 7920** Doctoral Program Professional Seminar 3
Orients new students to doctoral program, utilizing five goals: (1) familiarize students with requirements of the program and of the Graduate School, (2) acquaint students with the faculty and the resources available, (3) initiate a career planning process, (4) teach students some fundamental concepts underlying scientific research, and (5) teach students to conduct literature reviews. (F)

**SPED 7930** Internship in Special Education 1-12\(^*\)
Professional, supervised internship experience for doctoral students. Prerequisite: Permission of instructor. (F,Sp,Su)

**SPED 7940** Journal Reading Group 1-2\(^*\)
Seminar discussion of recent empirical and theoretical journal articles in special education and related fields. (F,Sp,Su)

**SPED 7970** Dissertation 1-15\(^*\)
Variable credit for dissertation project in connection with doctoral program in special education. (F,Sp,Su)

**SPED 7990** Continuing Graduate Advisement 1-9\(^*\)
(F,Sp,Su)

---

**Statistics (STAT)**

See Department of Mathematics and Statistics, pages 388-399.

**STAT 1040 QL** Introduction to Statistics 3\(^*\)
Descriptive and inferential statistical methods. Emphasis on conceptual understanding and statistical thinking. Examples presented from many different areas. Prerequisite: Math ACT score of 19 or greater, C- or better in MATH 1010, or 70 percent or greater on MATH 1050 placement test. (F,Sp,Su)

**STAT 2000 QI** Statistical Methods 3\(^*\)
Introduction to statistical concepts, graphical techniques, probability, distributions, estimation, one and two sample testing, chi-square tests, and simple linear regression. Prerequisite: C- or better in MATH 1050. (F,Sp)

**STAT 2250** Internship and Cooperative Studies 1-6
Lower-division internship/cooperative work experience in statistics. (F,Sp,Su)

**STAT 2300 QL** Business Statistics 4\(^*\)
Descriptive and inferential statistics, probability, sampling, estimation, tests of hypotheses, linear regression and correlation, chi-square tests, analysis of variance, and multiple regression. Prerequisite: C- or better in MATH 1050. (F,Sp,Su)

**STAT 2950** Directed Reading and Conference 1-3\(^*\)
Prerequisite: Prior arrangement with specific instructor. (F,Sp,Su)

**STAT 3000 QI** Statistics for Scientists 3
Introduction to statistical concepts, graphical techniques, discrete and continuous distributions, parameter estimation, hypothesis testing, and chi-square tests. Prerequisite: C- or better in MATH 1100 or 1210. (F,Sp,Su)

**STAT 4250** Advanced Internship/Co-op 1-6\(^*\)
Advanced educational work experience in statistics. Prerequisite: Approval of instructor. (F,Sp,Su)

**STAT 4500** Methods of Teaching Statistics in Secondary and Middle School 3
Teaching methods course required for all prospective mathematics and statistics composite teaching majors. (F,Sp)

**STAT 4950** Directed Reading and Conference 1-3\(^*\)
Prerequisite: Prior arrangement with specific instructor. (F,Sp,Su)

**STAT 5100 CI/QI** Linear Regression and Time Series 3
Methods for prediction and hypothesis testing in multiple linear regression models, including analysis of variance and covariance, logistic regression, introduction to time series, and signal processing. Prerequisite: C- or better in STAT 2000 or 3000. (F)

**STAT 5120** Categorical Data Analysis 3
Analysis of categorical data, contingency tables, goodness of fit, random sampling, log-linear and logistic regression models, and sampling for proportions, as well as stratified and cluster sampling. Prerequisite: C- or better in STAT 5100. (F)

**STAT 5200** Design of Experiments 3
Design, analysis, and interpretation of experiments, split plots, incomplete blocks, confounding, fractional factorials, nested designs, two- and three-way analysis of variance, covariance, and multiple regression. Prerequisite: C- or better in STAT 2000 or 3000. (Sp)

**STAT 5300 QI** Statistical Process Control 3
Techniques and applications of statistics in modern management of industrial processes. Control charts, acceptance sampling, design of industrial experiments, and analysis of process failures. Prerequisite: C- or better in STAT 2000 or 3000. This course is not currently being offered. For information about when it may be offered, contact the department.

**STAT 5410** Applied Spatial Statistics 3
Explores spatial point patterns, spatially continuous data, area (grid) data, nearest neighbor distances, K function, complete spatial randomness, variogram, kriging, correlogram, and Moran’s I. For graduate (5000-level credit), a major

Utah State University 2006-2007 General Catalog 719
Course Descriptions

STAT 5570  Statistical Bioinformatics  3
Explores the bioconductor project. Discusses the following topics in gene expression analysis: microarray experiments, data normalization, tests of differential expression, multiple testing issues, and clustering analysis. Also explores the following sequence analysis topics: scoring alignments, hidden Markov models, and phylogenetic trees. Considers databases and ontologies. Prerequisite: C- or better in STAT 5100 or 5200. (Sp)

STAT 5600 CI  Applied Multivariate Statistics  3
Introduction to multivariate statistical procedures for data analysis. Topics include MANOVA, principal component analysis, factor analysis, clustering, and classification. Prerequisite: C- or better in STAT 5100. (Sp)

STAT 5810  Topics in Statistics 1-3*
Prerequisite: Consent of instructor. (F) (Sp)

STAT 5890 CI  Problem Solving in Statistics  3
Capstone course for Statistics majors, applying course material covered in the undergraduate major. Prerequisite: Permission of instructor. (Sp)

STAT 5940  Directed Reading and Conference  1-3*
Prerequisite: Prior arrangement with specific instructor. (F,Sp,Su)

STAT 5950H Senior Honors Project 1-4
A senior project, required for completion of the departmental honors program and developed under the direction of a departmental faculty member. Prerequisite: Permission of instructor. (F,Sp,Su)

STAT 5970 Seminar 1-3*
Review of current literature and developments in the field of statistics. (F,Sp)

STAT 6100 Advanced Regression Analysis*  3
Examines topics in the theory of linear models: least squares estimation, the general linear hypothesis, regression diagnostics for multicollinearity, outliers, and influential points. Also includes discussion of robust regression, nonlinear regression, generalized linear models, and regression models for survival data. Prerequisites: C- or better in MATH 5720 and STAT 5100. (F)

STAT 6180 Time Series  3
The domain and frequency domain series analysis, including Box-Jenkins methods, spectral analysis and filtering, introduction to state space methodology. Prerequisites: C- or better in STAT 5100, MATH 5720. This course is not currently being offered. For information about when it may be offered, contact the department.

STAT 6190 Wavelet Methods for Time Series**  3
Examines topics in time series models, time and frequency domain analysis, discrete wavelet transform, and wavelet ANOVA, as well as applications in physics and finance. Prerequisites: C- or better in MATH 5720 and STAT 5100. (Sp)

STAT 6200  Analysis of Unbalanced Data and Complex Experimental Designs*  3

STAT 6250 Graduate Internship/Co-op**  1-8*
Educational work experience at the graduate level. Prerequisite: Permission of instructor.

STAT 6410  Applied Spatial Statistics (5410)  3
Explores point pattern analysis, spatially continuous data, area (grid) data, nearest neighbor distances, K-function, complete spatial randomness, variogram, kriging, correlogram, and Moran’s I. For graduate (6000-level credit), a major project is required. Prerequisite: C- or better in STAT 3000. Knowledge of a statistical package (e.g., S-Plus, R, SAS, etc.) or any programming language (e.g., C/C++, FORTRAN, etc.) is strongly recommended. (F)

STAT 6530 Modern Nonparametric Statistics**  3
Examines topics in resampling methods including: the jackknife and the bootstrap, bias, variance, and confidence intervals. Also explores the following topics in smoothing methods: histograms, kernel density estimates, and local polynomial regression. Includes testing procedures using ranks and empirical cumulative distribution functions. Prerequisites: C- or better in MATH 5710 and STAT 3000. (Sp)

STAT 6550  Statistical Computing***  3
Survey of algorithms and tools for modern statistical computing. Topics include simulation design and implementation, algorithms for linear regression and subset selection, smoothing algorithms, fast Fourier transform, EM algorithm, numerical methods for maximum likelihood estimation, and neural networks. Prerequisites: C- or better in STAT 5110, MATH 5720, and knowledge of a programming language. (Sp)

STAT 6560  Graphical Methods***  3
Statistical graphics and scientific visualization of one, two, and higher dimensional data. Well-chosen and designed graphics are vital in exploratory data analysis, model diagnostics, and data presentation. Includes specific methods and general principles, such as effective use of color and motion. Prerequisites: C- or better in STAT 3000 and programming experience. (F)

STAT 6600 Multivariate Analysis  3
Statistical methods for analyzing multivariate data and the theory behind them. Topics include multivariate normal distribution and multivariate distributions derived from it, multivariate t-tests, regression, MANOVA, principal components and factor analysis, multidimensional scaling, classification, and cluster analysis. Prerequisites: C- or better in MATH 5720 and concurrent enrollment in STAT 5110. This course is not currently being offered. For information about when it may be offered, contact the department.

STAT 6650 Statistical Learning: Multivariate Statistical Analysis for Bioinformatics, Data Mining, and Machine Learning**  3
Explores supervised learning, linear methods for regression and classification, model assessment and selection, model inference and averaging, additive models, boosting, neural networks, support vector machines, and unsupervised learning. Prerequisites: C- or better in MATH 5720 and STAT 5100. Programming experience in R or a related language is strongly recommended. (F)

STAT 6670 Mathematical Statistics I  3
Consistency, loss functions, risk, and notions of optimality of estimations. Hypothesis testing and confidence regions. Large sample theory, notions of robustness. Prerequisite: C- or better in MATH 5720. (F)

STAT 6672 Mathematical Statistics II  3
Modes of convergence of random variables, laws of large numbers, characteristic functions, and the central limit theorem. Prerequisite: C- or better in MATH 5720. (F)

STAT 6810 Topics in Statistics (Topic)**  3*
Prerequisite: Consent of instructor. (F) (Sp)

STAT 6820 Topics in Statistics (Topic)**  3*
Prerequisite: Permission of instructor. (F) (Sp)

STAT 6890 Practical Statistical Consulting***  1-3*
Introduction to statistical consulting for graduate students, for faculty in other research departments, and for business, industry, and government. Prerequisite: Permission of instructor. (F,Sp,Su)

STAT 6910 Seminar in Statistics***  1-3*
Review of current literature and developments in statistics. Prerequisite: Permission of instructor. (F,Sp)

STAT 6950 Directed Reading and Conference***  1-4*
Prerequisite: Prior arrangement with specific instructor. (F,Sp,Su)

STAT 6970 Thesis and Research  1-6*
Outlining and conducting research in statistics. Thesis preparation. (F,Sp,Su)

STAT 6990 Continuing Graduate Advisement  1-9*
(F,Sp,Su)

* Repealable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Social Work (SW)

See Department of Sociology, Social Work and Anthropology, pages 500-511.

SW 1010 | Introduction to Social Welfare | 3 |

Foundation course to facilitate development of an approach to thinking about social welfare. Explores broad common base of social work professional values, knowledge, skills, social policies, and programs. (F,Sp)

SW 2100 | Human Behavior in the Social Environment | 3 |

(formerly SW 2500)

Interrelatedness of social, cultural, and environmental factors that combine with biological and psychological components to mold human behavior. Relevance of these factors to generalist social work practice. Prerequisite: SW 1010. (Sp)

SW 2400 | Social Work with Diverse Populations | 3 |

Examines characteristics of various populations, including patterns, dynamics, and consequences of discrimination, economic deprivation, and oppression. Emphasis placed on empowerment of groups and individuals, as well as the accumulation of multicultural competence. Prerequisite: SW 1010. (Sp)

SW 3050 | Practice I | 3 |

Introduction of generalist social work framework as integrative tool, with special attention shown to strengths and empowerment perspective. Individuals as targets for change. Prerequisite: Admission to social work bachelor’s program, SW 1010, 2100, 2400. (F)

SW 3350 | Child Welfare | 3 |

Developments in programs for meeting such needs of children as substitute parental care, adoptions, delinquency problems, mental retardation, and unmarried motherhood. Prerequisites: SW 1010, 2100, 2400.

SW 3360 | Adolescents: Theories, Problems, and Issues | 3 |

Focuses on major social problems confronting youth today: teenage pregnancy, substance abuse, unemployment, education, and mental health. Investigation of theories explaining these problems and society’s efforts to resolve these problems. Prerequisites: SW 1010, 2100, 2400.

SW 3450 | School Social Work* | 3 |

Overview of social work practice in an educational setting.

SW 3550 | Social Gerontology* | 3 |

Overview of field of aging and its connection to the practice of social work.

SW 3650 | Mental Health | 3 |

Services offered for the prevention and treatment of mental illness and the feasibility of social action programs on a community level. Prerequisites: SW 1010, 2100, 2400.

SW 3750 | Medical Social Services | 3 |

Introduction to role of social worker in health settings. Emphasizes definition of health and disease, patient rights, and consumer participation. Examination of basic health programs, major trends in health planning, and alternate models of health delivery. Prerequisites: SW 1010, 2100, 2400.

SW 3850 | Spirituality and Social Work* | 3 |

Provides a framework of knowledge, values, skills, and experiences for spiritually sensitive social work practice.

SW 3950 | Occupational and Environmental Health* | 3 |

Overview of the issues of occupational and environmental health from a public policy and psycho social perspective. Presents issues concerning industrial and environmental hazards relating to occupational injury and illness. Explores policies addressing these issues, as well as legislation and social problems.

SW 4100 | Social Work Research | 3 |

Survey of qualitative and quantitative scientific methods of research in social work. Articulation of research with practice and policy. Prerequisites: SW 1010, 2100, 2400. (F)

SW 4150 | Practice II | 3 |

Introduction to generalist social work practice at the micro level. Emphasizes study of skills from a strengths and empowerment perspective with individuals, families, and small groups. Special attention paid to ethical issues and working with diverse population. Prerequisite: SW 3050. (Sp)

SW 4160 | Practice III | 3 |

Introduction to generalist social work practice at the macro level. Emphasizes study of skills from a strengths and empowerment perspective with groups, organizations, and community systems. Special attention paid to ethical issues and working with diverse populations. Prerequisite: SW 4150. (Sp)
Course Descriptions

**THEA 1000**  
**Theatre Orientation for Majors**  
Departmental policies, procedures, requirements, and philosophy. Introduction to fundamental audition and portfolio presentation techniques. (F)

**THEA 1013 BCA**  
**Understanding Theatre**  
(formerly THEA 1010 BCA)  
Survey of dramatic principles and structure, genre, and conventions for nonmajors. Functions and contributions of theatre artists and practices of the contemporary stage. (F,Sp,Su)

**THEA 1023 BCA**  
**Introduction to Film**  
(formerly THEA 1020 BCA)  
Study of elements of film narrative in fictional and nonfictional movies to provide a deeper understanding of content and film form. (F)

**THEA 1030 BHU**  
**Exploring Performance Through Aesthetic Texts**  
Introduces concepts and practices of performance studies and oral language arts. Integrates interpretation, analysis, and performance of major literary genres and oral forms of communication that contain aesthetic qualities. Students learn theatre techniques to create original performance pieces. (F,Sp,Su)

**THEA 1033**  
**Beginning Acting**  
(formerly THEA 1400)  
Demonstration of skills in actor awareness (personal and group), organic acting techniques, scene study with partners, and monologue preparation. Provides understanding of theories and methodologies. Skills demonstrated in areas of body movement, diction, observation, concentration, imagination, and "action." (F,Sp)

**THEA 1113**  
**Beginning Voice**  
(formerly THEA 1450)  
Training in basic vocal principles (Rodenburg, Linklater). Covers proper breath placement and support, physical alignment, projection, and resonance. Students learn basic warm-up to prepare the voice for performance. (F)

**THEA 1223**  
**Stage Makeup**  
(formerly THEA 1530)  
Emphasizes one-dimensional and three-dimensional illusionary work, focusing on knowledge and skills in "corrective" aging and period makeup, with introductions to related areas, such as hair, hands, and prosthetics. Enrollment restricted to students who are theatre arts majors or who have received departmental authorization. (F,Sp)

**THEA 1430**  
**Movement for Actors I**  
Introductory, experiential course in movement styles, including Laban Movement Analysis, Alexander Technique, Feldenkrais, Grotowski, and others. Improvisation will be emphasized to develop a creative approach to character, emotion, and action through movement. (F,Sp)

**THEA 1513**  
**Stage and Costume Crafts**  
(formerly THEA 1500)  
Introduction to different physical theatre forms, standard stage equipment, and methods of staging plays. Basic practices in set construction, stage lighting, sound, and costume construction. Enrollment limited to Theatre Arts majors and to students receiving departmental permission. (F,Sp)

**THEA 1713**  
**Introduction to Playscript Analysis**  
(formerly THEA 1210)  
Introductory course focusing on plot, character, language, and thematic analysis of varied historical and modern performance texts in the context of contemporary staging practice. Enrollment limited to theatre majors and minors only. (F,Sp)

**THEA 2410**  
**Directing**  
Provides instruction and practice in play selection, script analysis, research, blocking, leadership, communication skills, conduct of rehearsals, self-awareness, production organization and operation, and personal organization for stage direction. Principles apply in professional, civic, and educational settings. Prerequisite: THEA 1033 (F,Sp)

**THEA 2420**  
**Intermediate Acting: Scene Study**  
Scene study from the modern and contemporary theatre using the principles studied in THEA 1033. Prerequisite: THEA 1033. (F,Sp)

**THEA 2430**  
**Movement for Actors II**  
Theory and practice in physical theatre movement styles, including Grotowski, Mime, Commedia dell’Arte, and others. Emphasis on creative approach for projecting character, emotion, and action through use of the body. History and practical experience in advanced movement styles. Prerequisite: THEA 1430. (F,Sp)

**THEA 2440**  
**Introduction to Dance for Theatre: Jazz, Ballet, and Tap**  
Offers an introduction to the three most influential styles of dance in musical theatre: jazz, ballet, and tap. Enables dancers to learn new steps quickly by utilizing the appropriate techniques. Time steps and turns are mastered. (F)

**THEA 2470**  
**Movement: Stage Combat**  
Techniques in stage combat. Prerequisite: THEA 1430. (F,Sp)

**THEA 2480**  
**Intermediate Voice for Theatre**  
Training in vocal technique, incorporating breath support, vocal range, power, and projection. Training in speech and articulation. Work in various vocal theories (Berry, Linklater, Hart). Instruction in the International Phonetic Alphabet. Prerequisite: THEA 1113. (Sp)

**THEA 2490**  
**Intermediate Acting: Shakespeare**  
Exploring language and techniques of playing Shakespeare through scene study and monologues. Prerequisite: THEA 1033. (F,Sp)

**THEA 2510**  
**Scene Painting/Properties**  
Instruction in scene painting techniques. Construction and alteration of stage properties. For theatrical technicians and designers. Demonstration and lab work included. Prerequisite: THEA 1513. (F,Sp)

**THEA 2540**  
**Lighting Design**  
Introduction to basic elements of lighting design. Demonstration of techniques used to create and execute a lighting design. Provides basic understanding of light energy, angle, color, and technology available for designing with this medium. (F,Sp)

<tr>
<td>THEA 3510</td>
<td>Scene Design</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Preparation for designing sets used in theatre. Development of skills in drafting, rendering, model-making, research, and portfolio development. Prerequisite: THEA 1513. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>THEA 3520</td>
<td>Stage Costume Design</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Theory and practice in design and selection of costumes for nonrealistic, historical, and modern plays. Study of relationship of costume to character and production. Prerequisites: THEA 1513 and 3570; or permission of instructor. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>THEA 3570</td>
<td>Historic Clothing</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Historic survey of development of clothing from ancient Egyptians to the present day. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>THEA 4030</td>
<td>DHA Storytelling</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>(dual listing 6030)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Reviews background and techniques of traditional telling. Explores psychological, educational, therapeutic, historical, and folkloric aspects of storytelling. For 6030 credit, graduate students must participate in microteaching sessions in areas of expertise, with additional storytelling research or service. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>THEA 4250</td>
<td>Playwriting</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Study of dramatic theory and sample plays, combined with practice in writing short plays. Minimum of three plays required. Prerequisite: THEA 1713. Also taught as ENGL 4250. (F)</td>
<td></td>
</tr>
<tr>
<td>THEA 4300</td>
<td>Clinical Experience in Teaching II</td>
<td>1</td>
</tr>

Repeatability:
- Theatrical Arts majors and students who have completed THEA/ENGL 4250 will have priority. (Sp)
- Repeatability for credit. Check with major department for limitations on number of credits that can be counted for graduation.
Course Descriptions

University Studies (USU)

See General Education Requirements, pages 49-51. Also see University Studies Depth Education Requirements, pages 52-57.

USU 1000 Introduction to Computers and Information Literacy 1
Introduction to basic concepts of computers and information literacy. Preparation for USU Computer and Information Literacy (CIL) test. For students having some familiarity with computers, but needing additional instruction. Taught during the first seven weeks of fall or spring semester. **Note:** USU 1000 cannot be counted toward the breadth requirements. (F,Sp)

USU 1010 University Connections 1-3
Provides an environment of challenge and support to help new students make a successful transition to USU. Class curriculum and activities provide an environment wherein students become familiar with the broad academic, social, and cultural opportunities offered by USU and the surrounding community. (F,Sp)

USU 1100 First-Year Seminar 3
Characterized by investigation of a topic that is most likely a research, scholarly, or artistic specialty of the faculty member. Topic presented in pedagogically interesting ways. May include fieldwork or trips to enhance study of the topic. **Note:** USU 1100 cannot be counted toward the breadth requirements.

USU 1300 BAI U.S. Institutions 3©
Provides basic understanding of the history, principles, form of government, and economic system of the United States. Emphasis on ideas and critical thinking, rather than dates, names, and places. (F,Sp,Su)

USU 1320 BHU Civilization: Humanities 3
Provides basic understanding of a broad range of themes, which cut across human history and continue to be important in contemporary society. (F,Sp,Su)

USU 1330 BCA Civilization: Creative Arts 3
Students will explore questions such as: What is Art? How is it judged? How does artistic expression vary across cultures? Course will cover several forms of art, and students will attend concerts, visit galleries, and attend theatrical performances. (F,Sp,Su)

USU 1340 BSS Social Systems and Issues 3
Examines debates in the social sciences about contexts which shape human experience. Compares experiences between life stages, individuals, groups, and/or historical periods. Contrasts different social science disciplines. (F,Sp,Su)

USU 1350 BLS Integrated Life Science 3
Interdisciplinary course focusing on basic concepts of life science. Demonstrates role of modeling, prediction, and observation in the process of scientific discovery, which occurs within an historical and social context. (F,Sp,Su)

USU 1360 BPS Integrated Physical Science 3
Interdisciplinary course focusing on basic concepts of physical science, including structure of matter and magnitude and character of the forces of nature. Demonstrates role of modeling, prediction, and observation in the process of scientific discovery, which occurs within an historical and social context.

USU 3330 DHA Arts Symposium 1-2©
Students attend a number of cultural events offered at USU and in the community, as well as write critiques of the events. **Prerequisite:** Completion of at least 30 credits. **Note:** USU 3330 may be applied to the depth requirements, but not to the breadth requirements. Two credits of USU 3330 are needed to fulfill the DHA requirement.

USU 4900 Undergraduate Research 1-3
Research experience pursued with a faculty mentor. Prior to registration, student must make arrangements with a faculty mentor within his or her department. **Note:** USU 4900 cannot be counted toward fulfillment of University Studies requirements.

USU 6900 Responsible Conduct of Research 1
Provides an underpinning of ethical conduct for students entering into the research enterprise while at USU. Designed for upper-level undergraduates and graduate students, with each weekly session being split between lecture and discussion activities. Subjects covered include those required of all trainees being supported on Public Health Service grants. **Note:** USU 6900 cannot be counted toward fulfillment of University Studies requirements.©Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.©This course is also offered by online correspondence and/or CD through Continuing Education Time Enhanced Learning.

Watershed Sciences (WATS)

See Department of Watershed Sciences, pages 535-540.

The WATS course prefix will not be used until Spring Semester 2007. For Fall Semester 2006, these courses will continue to use the Aquatic, Watershed, and Earth Resources (AWER) prefix. For AWER course descriptions, see pages 566-568.

Women and Gender Studies (WGS)

See Women and Gender Studies, page 548.

WGS 1010 Introduction to Women and Gender Studies 3
Survey course covering fundamentals of women and gender studies. Explores women's and men's diverse experiences, perspectives, and contributions to society and its institutions. Examines cultural beliefs and stereotypes concerning women's and men's roles in society. Reviews feminist theory, socialization, ideology, and history of women's movement. (Sp)

WGS 2010 Women and Leadership 3
Engages students in academic and practical experiences that strengthen their sense of self and prepare them to pursue leadership roles. Discussion of research and readings pertinent to the study of women's leadership and activism. Development of and participation in a personal leadership project providing a substantive opportunity to apply information and skills learned through the class. (Sp)

WGS 4550 DHA/CI Women and Gender in America 3
Writing intensive course drawing on film, primary documents, and readings to trace the history of women, emphasizing race, class, and gender influences of each era. Also taught as HIST 4550. (F)

WGS 4900 Directed Study: Women and Gender Studies 1-3©
Directed research, writing, and reading in relation to gender studies. Provides students with an in-depth opportunity to work individually with a faculty member. Contract for work to be completed must be signed by the Women and Gender Studies director, the faculty member, and the student, then filed with the Women and Gender Studies Program. **Prerequisite:** Permission of program chair. (F,Sp,Su)

Wildland Resources (WILD)

See Department of Wildland Resources, pages 541-547.

The WILD course prefix will not be used until Spring Semester 2007. For Fall Semester 2006, these courses will continue to use the Forest, Range, and Wildlife Sciences (FRWS) prefix. For FRWS course descriptions, see pages 630-632.
