348 Utah State University 2007-2009 General Catalog
Sample Four-year Plan for International Studies Major

Minimum GPA for Admission: 2.5, Career
Minimum GPA for Graduation: 3.0, major courses; 2.0, Career
Minimum Grade Accepted: C- in major requirements

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (32 credits)
Fall Semester (16 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .................. 3
ANTH 1010 (BSS) Cultural Anthropology (3 cr) or
ANTH 2010 (BSS) Peoples of the Contemporary World (3 cr) .......... 3

(prereq: ECON 2010) (3 cr) ......................................................... 3
GEOG 1300 (BSS) World Regional Geography (F) ............................ 3
HIST 1500 (BHU) Cultural and Economic Exchange in the
Pre-Nineteenth Century World (F,Sp) (3 cr) or
HIST 1510 (BHU) The Modern World (F,Sp,Su) (3 cr) .................... 3
POLS 2100 Introduction to International Politics (F,Sp) ................... 3

B. Electives (3 credits)
Any course listed in any of the four area options is acceptable.

Additional Information
For detailed information about requirements for the International
Studies major and minor, see the major requirement sheet, which can
be obtained from the Political Science Department, or online at:
http://www.usu.edu/majorsheets/
The Department of Journalism and Communication maintains professional studios and labs, designed to train students in various communications and journalism skills. These include the multimedia computer newsroom, a digital nonlinear video editing lab, a full TV studio, and a digital (Mac) photography lab. Students receive instruction in traditional journalistic basics, such as writing, information-gathering, reporting, and video production; in new technologies of online information gathering; and in critical skills of media literacy.

**Requirements**

**Course Requirements**

Journalism majors must complete a minimum of 30 credits and a maximum of 36 credits (38 for Broadcast/Electronic Media emphasis) in Journalism and Communication courses, while pursuing one of the three course sequences outlined below. Of the 120 semester credits required for graduation from Utah State University, Journalism majors must complete at least 65 credits in other departments within the College of Humanities, Arts, and Social Sciences. In addition, majors must complete a minor/cognate area outside of the Journalism and Communication Department, selected with the approval of an advisor.

Therefore, the basic Journalism course of study is as follows: Journalism and Communication courses, 30-36 credits; General Education requirements, 27-31 credits; Depth Education requirements, 15 credits; courses in the minor/cognate area, 12-21 credits; electives from outside the Journalism and Communication Department, 17-33 credits; Total Credits, 120.

**Major Status**

Students may apply for major status upon completion of a minimum of 60 semester credits, including the Journalism Premajor Core requirements, while maintaining a 2.5 cumulative GPA. Students may declare themselves as Journalism Premajors at any time after their admission to the University. Majors must maintain a minimum 2.5 GPA, both overall and in the major. Students whose GPA drops below 2.5 will be placed on probation and may be dropped from the major if grades do not improve within one semester. All courses in the major must be taken for a grade (not Pass-Fail). Courses must be taken in sequence.

Students transferring from other institutions may be accepted into the major if they fulfill these requirements. Up to 9 transferred semester credits may count toward the major, if approved by an advisor.

The Department of Journalism and Communication, as well as Utah State University, allows students to take a class a maximum of three times. Failure to achieve the Journalism and Communication Department’s minimum grade of C+ in three attempts in any of the three premajor core classes, or a minimum grade of C in any other JCOM course required for the major, will result in the student being dropped from the Journalism major.

Students attempting to register for any JCOM class for the third time will be required to meet with the department head, who will remind them of the three-and-out rule. Students will be asked to sign a form attesting to their understanding of this rule.

Students must complete the premajor core (JCOM 1130, 1500, and 2010) with a C+ or better before continuing in the Journalism major. Students lacking the minimum grades in the premajor core will be blocked from taking courses in the Broadcast/Electronic Media, Print Journalism, and Public Relations/Corporate Communications emphases.
Department of Journalism and Communication

Students dropped from the Journalism major for failure to achieve the minimum grades within three attempts, or for failure to maintain a GPA of at least 2.5, should speak with an advisor. Options may include switching to another major or creating an Interdisciplinary Studies major.

Premajor Core Requirement (9 credits)
The following courses are required for all majors, and must be completed prior to application for major status:
JCOM 1500 (BSS) Introduction to Mass Communication (F,Sp) ................. 3
JCOM 1130 Beginning Newswriting for Mass Media (F,Sp,Su) ............... 3
JCOM 2010 (BSS) Media Smarts: Making Sense of the
Information Age (F,Sp) ......................................................... 3

Prior to taking JCOM 1130, students must complete ENGL 1010, Introduction to Writing (or equivalent) and an English proficiency test. Majors must complete each of the premajor requirements with a C+ or better.

Major Requirements (6 credits)
The following courses are required for all majors after acceptance into the department:
JCOM 2160 (CI) Introduction to Online Journalism (F,Sp) ..................... 2
(prereq: min of C+ in JCOM 1130, 1500, and 2010)
JCOM 4000 Senior Seminar in Mass Communication (F,Sp) .............. 1
(prereq: senior standing)
JCOM 4030 Mass Media Law (F,Sp) ........................................ 3
(prereq: junior standing or instructor's permission)

Emphasis Areas
Each student must select one of the following emphasis areas:

Broadcast/Electronic Media Emphasis (30-38 credits)

A. Premajor Core Requirements (9 credits)
Journalism majors must complete the Premajor Core Requirements before taking courses in section B below.

B. Broadcast/Electronic Media Requirements (12 credits)
JCOM 2220 Introduction to Video Media (F,Sp) ................................ 3
JCOM 2230 Writing for Electronic Media (F,Sp) .............................. 3
Additional major requirements (JCOM 2160, 4000, 4030) ................. 6

C. Newscast or Corporate Video/Multimedia (6-8 credits)
Students should complete one of the two options of courses listed below.
JCOM 4210 (CI) Newscast I (F,Sp) (4 cr) and
JCOM 4220 (CI) Newscast II (F,Sp) (4 cr) ..................................... 8
Or
JCOM 4230 Corporate Video (F,Sp) (3 cr) and
JCOM 5210 Website Design and Production (F,Sp) (3 cr) .................. 6

D. Communication Electives (3-9 credits)
Students should consult with their advisor to choose appropriate electives.

Print Journalism Emphasis (30-36 credits)

A. Premajor Core Requirements (9 credits)
Journalism majors must complete the Premajor Core Requirements before taking courses in section B below.

B. Print Journalism Requirements (15 credits)
JCOM 2170 (CI) Reporting Public Affairs (F,Sp) ............................ 3
JCOM 3110 (CI) Beyond the Inverted Pyramid (F,Sp) ........................ 3
JCOM 3120 (CI) Copy Editing and Publication Design (F,Sp) ......... 3
Additional major requirements (JCOM 2160, 4000, 4030) ............... 6

C. Communication Electives (6-12 credits)
Students should consult with their advisor to choose appropriate electives.

Public Relations/Corporate Communications Emphasis (30-36 credits)

A. Premajor Core Requirements (9 credits)
Journalism majors must complete the Premajor Core Requirements before taking courses in section B below.

B. Required Courses (12 credits, may be taken concurrently)
JCOM 2300 Introduction to Public Relations (F,Sp) ......................... 3
JCOM 2310 (CI) Writing for Public Relations (F,Sp) ....................... 3
Additional major requirements (JCOM 2160, 4000, 4030) ............... 6

C. Upper-division Required Courses (6 credits; must be taken in sequence after completion of JCOM 2300, 2310)
JCOM 3300 Strategic Research Methods in Public Relations (F,Sp) .... 3
JCOM 5300 (CI) Case Studies in Public Relations (F,Sp) (3 cr) or
JCOM 5320 Public Relations Agency (F,Sp) (3 cr) .......................... 3

D. Electives (3-9 credits; at least 3 credits in skills course and 3 credits upper division. A 3-credit upper-division skills course meets all elective requirements.)

Other Communications Electives
In addition to the Pre-major, major, and emphasis area courses listed above, students must select additional electives from courses in the Department of Journalism and Communication, to ensure a total of 30-36 credits completed in the Journalism and Communication Department.

Sample Four-year Plan for Journalism Major,
Broadcast/Electronic Media Emphasis

Minimum GPA for Admission: 2.5, Career
Minimum GPA for Graduation: 2.5, major courses; 2.5 USU;
2.5, Career
Minimum Grade Accepted: C in major courses; C+ in JCOM 1130, 1500, and 2010

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3893.

Freshman Year (30 credits)
Fall Semester (15 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .......... 3
JCOM 1500 (BSS) Introduction to Mass Communication ............. 3
Quantitative Literacy (QL) course ........................................ 3
University Studies Breadth course ....................................... 3
Elective course(s) ................................................................. 3

University Studies Breadth course ....................................... 3

Sample Four-year Plan for Journalism Major, Print Journalism Emphasis

Minimum GPA for Admission: 2.5, Career
Minimum GPA for Graduation: 2.5, major courses; 2.0 USU;
2.0, Career
Minimum Grade Accepted: C in major courses; C+ in JCOM 1130, 1500, and 2010

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

JCOM 1500 (BSS) Introduction to Mass Communication .................. 3
Quantitative Literacy (QL) course .................................................. 3
University Studies Breadth course .............................................. 3
Elective course(s) ........................................................................ 3

Spring Semester (15 credits)
ENGL 1020 (CL2) Introduction to Writing: Research Writing in a
Persuasive Mode ........................................................................ 3
JCOM 2160 (CI) Introduction to Online Journalism ....................... 2
JCOM 2170 (CI) Reporting Public Affairs .................................. 3
Minor or Cognate course .......................................................... 3
University Studies Breadth courses ........................................... 3
Elective course(s) ........................................................................ 3

Sophomore Year (29 credits)

Fall Semester (15 credits)
JCOM 1130 Beginning Newswriting for the Mass Media ............... 3
JCOM 2160 (CI) Introduction to Online Journalism ............... 2
JCOM 2170 (CI) Reporting Public Affairs .......................... 3
Minor or Cognate course ....................................................... 3
University Studies Breadth courses ........................................... 3
Elective course(s) ........................................................................ 3

Spring Semester (14 credits)
JCOM 2160 (CI) Introduction to Online Journalism ............... 2
JCOM 2170 (CI) Reporting Public Affairs .......................... 3
Minor or Cognate course ....................................................... 3
University Studies Breadth courses ........................................... 3
Elective course(s) ........................................................................ 3

Junior Year (31 Credits)

Fall Semester (15 credits)
JCOM 2160 (CI) Introduction to Online Journalism ............... 2
JCOM 2170 (CI) Reporting Public Affairs .......................... 3
Minor or Cognate course ....................................................... 3
University Studies Breadth courses ........................................... 3
Elective course(s) ........................................................................ 3

Senior Year (30 credits)

Fall Semester (15 credits)
JCOM 4030 Mass Media Law ............................................ 3
JCOM 4040 Senior Seminar in Mass Communication ............... 1
JCOM elective course ......................................................... 3
Upper-division elective courses ............................................ 4
Elective course(s) ........................................................................ 3

Spring Semester (15 credits)
JCOM 4000 Senior Seminar in Mass Communication ............... 1
JCOM elective course ......................................................... 3
Upper-division elective courses ............................................ 4
Elective course(s) ........................................................................ 3

Summer Semester (3 credits)
JCOM 4510 Communication Internship .................................. 3

Students completing this emphasis have the option of taking both JCOM 4210 (CI) Newscast I (4 cr) and JCOM 4220 (CI) Newscast II (4 cr) or substituting both JCOM 4230 Corporate Video (3 cr) and JCOM 5210 Website Design and Production (3 cr). Students choosing the second option must make up the credit difference with a 3-credit JCOM upper-division elective course to accumulate a minimum of 120 credits, as required for graduation. In addition, students completing the second option must complete two Communications Intensive (CI) courses.

To make an appointment with a professional advisor, call (435) 797-3883.

#### Journalism Minor

Students may earn a minor in Journalism by completing a minimum of 15 JCOM credits. The minimum GPA requirements for Journalism minors are the same as those required for Journalism majors.

These credits must include:
- JCOM 1130 Beginning Newswriting for the Mass Media (F,Sp,Su) (3 cr) or JCOM 2010 (BSS) Media Smarts: Making Sense of the Information Age (F,Sp) (3 cr) ............................................
- JCOM 1500 (BSS) Introduction to Mass Communication (F,S) ...................................

For the remaining 12 JCOM credits, students must select one of the following options:

(a) JCOM 2170 (CI) Reporting Public Affairs (F,Sp) ................................................
    JCOM faculty advisor-approved upper-division JCOM credits ...........................

(b) JCOM 2220 Introduction to Video Media (F,Sp) .................................................
    JCOM 2230 Writing for Electronic Media (F,Sp) ..............................................
    JCOM faculty advisor-approved upper-division JCOM credits ..........................

(c) JCOM 2300 Introduction to Public Relations (F,Sp) ............................................
    JCOM faculty advisor-approved upper-division JCOM credits ..........................

#### Financial Support

In addition to general scholarships and other financial support opportunities available through the University and the College of Humanities, Arts and Social Sciences, the Department of Journalism
Department of Journalism and Communication

and Communication awards various scholarships to juniors, seniors, and graduate students. For a listing of scholarships, deadlines, and application requirements, contact the Department of Journalism and Communication. In addition, many professional paid and unpaid internships are available through the department.

Careers in Journalism and Communication

Journalism majors often begin their careers in various media professions, such as newspapers, radio and TV broadcasting, and public relations, many serving as interns while still attending school. Upon graduation, they land jobs in a variety of capacities for both journalism businesses and other industries requiring workers with excellent communication and problem-solving skills. In recent years, USU journalism students have routinely won state, regional, and national awards in print and video journalism, multimedia and new technologies, and, increasingly, public relations.

This success translates into an excellent reputation for USU students among businesses hiring USU students as interns and hiring USU graduates for professional positions. Jobs held by recent graduates include newspaper and magazine reporter, photographer, graphic artist, and editor; radio and television reporter, anchor, and producer; public relations director and account executive; multimedia software designer for HTML, web pages, CD-ROMs, etc.; and public information officer for politicians, legislative and lobbying groups, sports teams, and colleges, as well as for environmental organizations and other groups in the business and public sectors. Training and expertise in communication, including writing and reporting, visual literacy, publication layout and design, computer graphics, and online applications, prove to be valuable add-on skills for graduates entering a variety of occupations or going on to graduate school and law school.

In addition to these kinds of opportunities enjoyed by undergraduates, master’s degree graduates often return to communication careers in new capacities, or teach at the community college level in journalism and communication departments.

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu; or contact the Journalism and Communication departmental advisor, Penny Byrne, at penny.byrne@usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information

For further information about publications, curriculum, scholarships, faculty, and other program offerings, including USU’s TV studio facilities; weekly newscasts and TV programs; the award-winning student news website, the Hard News Café; and the Media and Society Lecture Series; check out the Journalism and Communication Department’s website: http://www.usu.edu/journalism

For detailed information about requirements for the Journalism major and minor, see the major requirement sheet, which can be obtained from the department, or accessed online at: http://www.usu.edu/majorsheets/

Graduate Programs

The Master of Science (MS) and the Master of Arts (MA) degrees in Communication combine professional practice and theoretical training, and are designed to fit individual student needs. Students may specialize in print, photo, or broadcast journalism. Application to the graduate program is made through the USU School of Graduate Studies.

Objectives

The master’s program in Communication at Utah State University offers a three-track approach to graduate study, designed for the maximum individual flexibility in pursuit of the student’s goals.

The Plan A, also known as the “Thesis Option” or “Media Research,” is a course of study designed for students considering or planning to go on to a doctoral program. The Plan A option requires more coursework in theory and methodology, as well as in research tools, in order to provide grounding for advanced study at the PhD level, whether in communication or another discipline. This option also requires completion of a master’s thesis, consisting of original research.

The Plan B, also known as the “Professional Option” or “Media Practice,” is designed for students seeking the master’s degree as a terminal degree, and planning to go from USU into the mass media professions, or into a teaching position at the junior college level. Typically, Plan B students are mid-career media professionals seeking retooling, refreshers, or credentials for community college teaching. The Plan B option requires a professional project, approved by a major professor, in place of the research thesis.

The Plan C, another “Professional Option,” is the same as the Plan B except, instead of a professional project, the student enrolls in additional coursework.

All three options—A, B, and C—require the student to pass comprehensive exit exams.

Graduate students in Communication work closely with advisors throughout their programs to design coursework and a research or professional activity agenda, along with appropriate study in a cognate area outside of Communication, that will permit them to achieve their individual goals, within the core framework of Communication coursework, whether they include professional training or additional doctoral work.
Admission Requirements

For admission to the graduate program in Communication, all students must complete the department’s English Language Proficiency Examination, and must complete or demonstrate competency in the following Communication foundation courses:

- JCOM 1130 Beginning Newswriting for the Mass Media (F,Sp,Su) ................................................................ 3
- JCOM 2010 (BSS) Media Smarts: Making Sense of the Information Age (F,Sp) .................................................. 3
- JCOM 3110 (CI) Beyond the Inverted Pyramid (F,Sp) ................................................................. 3
- JCOM 4030 (DSS) Mass Media Law (F,Sp) .................................................................................. 3

Competency may be demonstrated through previous coursework or experience, and one or more of these requirements may be waived with permission of the graduate program coordinator. These credits do not count toward the graduate degree. In addition, other undergraduate courses may be required.

Degree Requirements

Students may enroll in the Plan A (thesis), Plan B (Professional Option, with professional project), or Plan C (Professional Option with additional coursework in lieu of project) as outlined below. Plans A and B require 30 semester credits, while Plan C requires 33 semester credits. Plan A is intended for students planning to continue graduate study, teach, or enter professions requiring research skills. Plans B and C are intended for students seeking a terminal professional degree.

Selection of the A, B or C option must be made in consultation with the student’s advisor and filed with the graduate coordinator by the end of the first semester of study.

All students must complete core requirements. Students must, in consultation with their advisor, select an appropriate research tools class in research methods; the course need not be taught by the Journalism and Communication Department. To remain in good standing, all students must fulfill Graduate School requirements.

Plan A: Media Research

Core Requirements (21 credits). All students must complete the following courses: JCOM 6000 (3 cr.), 6020 (3 cr.), 6040 (3 cr.), 6400 (3 cr.), and 6970 (6 cr.). In addition, students must select an appropriate 3-credit Research Tools course (from any department), providing methodological training most appropriate for the student, in consultation with the advisor.

Cognate/Electives (9 credits). With advisor permission, students may include additional Journalism and Communication electives.

Plan B: Professional Option (Project)

Core Requirements (18 credits). All students must complete the following courses: JCOM 6000 (3 cr.), 6020 (3 cr.), 6040 (3 cr.), 6400 (3 cr.), and 6970 (3 cr.). In addition, students must select an appropriate 3-credit Research Tools course (from any department), providing methodological training most appropriate for the student, in consultation with the advisor.

Cognate/Electives (12 credits). With advisor permission, students may include additional Journalism and Communication electives.

Plan C: Professional Option (Additional Coursework)

Core Requirements (15 credits). All students must complete the following courses: JCOM 6000 (3 cr.), 6020 (3 cr.), 6040 (3 cr.), and 6400 (3 cr.). In addition, students must select a 3-credit Research Tools course (from any department), in consultation with the advisor.

Cognate/Electives (18 credits). With advisor permission, students may include additional Journalism and Communication electives.

Additional Information

For more information about graduate studies in the Department of Journalism and Communication, contact the School of Graduate Studies or the Department of Journalism and Communication. Also, check out the departmental website at: http://www.usu.edu/journalism

Journalism and Communication Faculty

Professors
Edward C. Pease, journalism, media criticism
Michael S. Sweeney, print journalism, media history

Professor Emeritus
Nelson B. Wadsworth, print journalism

Associate Professors
Penny M. Byrne, broadcasting, media law
Brenda Cooper, media criticism, gender and mass communication

Associate Professors Emeritus
Scott A. Chisholm, media management, literary journalism
James O. Derry, international mass communication development

Assistant Professors
Cathy Ferrand Bullock, mass communication theory and research methods
Les A. Roka, public relations
Nancy M. Williams, print journalism, Internet

Video Lab Supervisor
S. Dean Byrne, broadcast and electronic media

Lecturer
R. Troy Oldham, public relations, corporate communications

Adjunct Instructors
Cami Boehme, Internet
Tim Vitale, public relations
Jay C. Wamsley, print journalism

Course Descriptions

Journalism and Communication (JCOM), pages 653-655
Department of Landscape Architecture and Environmental Planning

Department Head: Elizabeth A. Brabec
Location: Fine Arts Visual 230
Phone: (435) 797-0500
FAX: (435) 797-0503
E-mail: laepinfo@usu.edu
WWW: http://www.usu.edu/laep/

Undergraduate Program Director:
Michael L. Timmons, Fine Arts Visual 260, (435) 797-1510, michael.timmons@usu.edu

Graduate Program Questions:
Kathy Allen, Fine Arts Visual 230, (435) 797-0500, laepinfo@usu.edu

Degrees offered: Bachelor of Landscape Architecture (BLA) and Master of Landscape Architecture (MLA); Master of Science (MS) in Bioregional Planning. BLA and first professional MLA programs are fully accredited by the American Society of Landscape Architects.

Department Objectives
The objectives of the department are to (1) provide an educational and technical program responsive to current societal needs related to environmental planning, landscape architecture, and urban design; (2) give students the opportunity to participate in collaborative learning experiences with other disciplines on campus; (3) prepare students for professional careers in the private or public sector; and (4) conduct original research to advance the body of knowledge in landscape architecture, environmental planning, and design.

Undergraduate Programs
Admission and Graduation Requirements
The Bachelor of Landscape Architecture (BLA) degree program is an intensive four-year studio-based course of study, fully accredited by the American Society of Landscape Architects. Accreditation standards require the department to maintain a reasonable faculty/student ratio. Space in the program is restricted by facility availability and faculty size. Admission to the upper division is competitive, and is limited to students who are determined by the faculty to have the best potential for academic success. Matriculation into the upper division will normally be limited to 25 students, although additional students may be matriculated in special circumstances at the discretion of the LAEP faculty.

Any student admitted to USU is eligible for enrollment in lower-division LAEP courses. Declared LAEP majors will be advised of their relative class standing at the mid-point of their sophomore year, to assist in their personal academic career planning. At the end of the sophomore year, a selection process will determine which students will matriculate into the upper division of the program.

Students applying for matriculation must have a minimum USU GPA of 2.5. Eligibility for matriculation requires the completion of the following prerequisite courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAEP 1200</td>
<td>Basic Graphics in Landscape Architecture (F)</td>
<td>4</td>

<td>LAEP 2720</td>
<td>Site Planning and Design (Sp)</td>
<td>5</td>
</tr>
</tbody>
</table>

Selection of students to be matriculated to the upper division is based on a letter of intent; a portfolio demonstrating creative potential, problem solving skills, and graphic fluency; and cumulative GPA earned in the eight LAEP prefix courses listed above. Portfolios and letters of intent are to be submitted by the last Monday in March. Detailed information regarding the letter of intent and portfolio requirements may be obtained from the LAEP Department website: [http://www.usu.edu/laep/](http://www.usu.edu/laep/). The final selection of students to matriculate to the upper division is a decision of the LAEP faculty. The review of students for matriculation will take place during the week following spring semester final exams, and students will be notified as soon as possible thereafter.

Students who have had LAEP courses waived or covered by articulation from another institution will have their GPA calculated only on the basis of LAEP grades actually earned at USU.

Transfer students from other programs of landscape architecture who have completed the equivalent of the lower-division USU LAEP coursework may apply for admission to the upper division of the program through submission of a portfolio, letter of intent, transcript of grades, and description of landscape architecture courses taken. Students who have previously been enrolled and matriculated into the upper division at USU, and must interrupt their education for up to three academic years, may resume their studies at the same level of the program which they departed upon returning to USU. Students who have stopped-out longer than three years must reapply, following the guidelines specified for transfer students. The decision on applications from transfer students and for readmission rests with the LAEP faculty and will be considered on a case-by-case basis.

Computer Requirement
Computer competency is essential in the contemporary professional environment. Appropriate computer skills are required for most entry-level opportunities in landscape architecture and environmental planning.

Course content increasingly relies on computer skills and personal access to computers with the appropriate software.

All students in the BLA program (beginning with LAEP 1300) must purchase, lease, or otherwise obtain continuing and uninterrupted access to a personal computer which meets the configuration requirements specified by the LAEP Department. Contact the department for current specifications.

Recommended High School Courses
High school students planning to major in landscape architecture may enhance their preparation with courses in art, natural sciences, social sciences, computer applications, and math through college algebra.
Department of Landscape Architecture and Environmental Planning

BLA Degree
The Bachelor of Landscape Architecture (BLA) degree is a four-year program consisting of courses relating to theory, design, history, and the various technical areas of the profession. The degree provides a substantial basis for a professional career, as well as an excellent foundation for advanced graduate studies. In addition to the courses required for upper-division status, the following LAEP courses are required for graduation:

LAEP 3100 Recreation/Open Space (F) ............................................. 5
LAEP 3120 Residential Planning and Design (Sp) ........................... 5
LAEP 3500 Planting Design (F) ....................................................... 4
LAEP 3610 Landscape Construction II (Sp) .................................... 4
LAEP 4100 Urban Theory, Systems, and Design (F) ......................... 5
LAEP 4110 Construction Document Preparation (F) ....................... 4
LAEP 4120 Emerging Areas in Landscape Architecture I (F,Sp,Su) .... 2
LAEP 4130 Emerging Areas in Landscape Architecture II (F,Sp,Su) .... 2
LAEP 4910 Professional Practice I (Sp) ........................................... 1
LAEP 4920 (CI) Professional Practice II (Sp) ................................... 1

Non-LAEP Courses Required for BLA majors:
The following courses taught outside the LAEP Department are required for all BLA majors. Note that several of these courses will also assist in fulfillment of University Studies Requirements.

ASTE 3050 (CI) Technical and Professional Communication Principles in Agriculture (F,Sp) (3 cr) or ENGL 3080 (CI) Introduction to Technical Communication (F,Sp) (3 cr) .................................................. 3
GEO 3100 (DSC) Natural Disasters (Sp) .......................................... 3
MATH 1010 Intermediate Algebra (F,Sp,Su) ................................... 3
SOC 3610 (DSS) Rural Sociology (F) (3 cr) or SOC 4620 (DSS) Sociology of the Environment and Natural Resources (Sp) (3 cr) ................................................... 3
PLSC 2620 Woody Plant Materials: Trees and Shrubs for the Landscape (F) ................................................................. 3
WATS 1200 (BLS) Biodiversity: Its Conservation and Future (F,Sp) (3 cr) or WILD 2200 (BLS) Ecology of Our Changing World (F,Sp) (3 cr) ......................................................... 3

All required courses with an LAEP prefix must be passed with a grade of C- or better. Students must also complete the University Studies requirements. For more detailed information, see major requirement sheet available from the department, or online at:
http://www.usu.edu/majorsheets/

Required Courses—Four-year Sequence

Minimum GPA for Admission: 2.5, USU
Additional Matriculation Requirements: completion of prerequisite courses, portfolio review, and submission of letter of intent (usually at end of the sophomore year)
Minimum GPA for Graduation: 2.0, USU
Minimum Grade Accepted: C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (32 credits)

Fall Semester (16 credits)
LAEP 1200 Basic Graphics in Landscape Architecture ...................... 4
LAEP 2300 History of Landscape Architecture ................................ 3
PLSC 2620 Woody Plant Materials: Trees and Shrubs for the Landscape ................................................................................................. 3
Breadth Physical Sciences (BPS) course ........................................... 3
Elective course(s).............................................................................. 3

Spring Semester (16 credits)
LAEP 1300 Computer Applications in Landscape Architecture ......... 3
LAEP 1350 Theory of Design .......................................................... 4
WATS 1200 (BLS) Biodiversity: Its Conservation and Future (3 cr) or WILD 2200 (BLS) Ecology of Our Changing World (3 cr) ......................................................... 3
University Studies1 and elective courses ........................................... 6

Complete the CIL exams by the end of the Freshman Year.

Sophomore Year (30 credits)

Fall Semester (15 credits)
LAEP 2600 (QI) Landscape Construction I ...................................... 4
LAEP 2700 (CI) Site Analysis: Social, Behavioral, and Biophysical Dimensions ................................................................. 5
University Studies2 or elective course(s) .......................................... 6

Spring Semester (15 credits)
GEO 3100 (DSC) Natural Disasters .................................................. 3
LAEP 2650 Architecture and the Built Environment ......................... 4
LAEP 2720 Site Planning and Design ................................................. 5
University Studies or elective course ............................................... 3

Junior Year (28 credits)

Fall Semester (15 credits)
LAEP 3100 Recreation/Open Space ................................................. 5
LAEP 3500 Planting Design .............................................................. 4
University Studies or elective course(s) .......................................... 6

Spring Semester (13 credits)
LAEP 3120 Residential Planning and Design .................................... 5
LAEP 3610 Landscape Construction II ............................................. 4
LAEP 4910 Professional Practice I ................................................... 1
ASTE 3050 (CI) Technical and Professional Communication Principles in Agriculture (3 cr) or ENGL 3080 Introduction to Technical Communication (3 cr) ......................................................... 3

Senior Year (30 credits)

Fall Semester (15 credits)
LAEP 4100 Urban Theory, Systems, and Design ................................ 5
LAEP 4110 Construction Document Preparation ......................... 4
SOC 3610 (DSS) Rural Sociology (3 cr) or SOC 4620 (DSS) Sociology of the Environment and Natural Resources (3 cr) ......................................................... 3
Breadth American Institutions (BAI) course ................................... 3

Spring Semester (15 credits)
LAEP 4120 Emerging Areas in Landscape Architecture I ............... 2
LAEP 4130 Emerging Areas in Landscape Architecture II ................ 2
LAEP 4350 Travel Course ............................................................. 1
LAEP 4920 (CI) Professional Practice II ......................................... 1
University Studies and elective courses ........................................... 9

1Recommended: MATH 1010, Intermediate Algebra, or a Quantitative Literacy (QL) course; and ENGL 1010 (CL1), Introduction to Writing: Academic Prose.
2Recommended: ENGL 2010 (CL2), Intermediate Writing: Research Writing in a Persuasive Mode.
Department of Landscape Architecture and Environmental Planning

Undergraduate Travel Requirement
The undergraduate curriculum includes a requirement for a minimum of 1 credit of travel and study outside of the bioregion. This travel requirement can be satisfied by one or more of the following courses, depending upon the specific content of the course at the time of offering. (Check with the department for specific information.)

- LAEP 4120 Emerging Areas in Landscape Architecture I (F,Sp,Su)........ 2
- LAEP 4130 Emerging Areas in Landscape Architecture II (F,Sp,Su)..... 2
- LAEP 4350 Travel Course (F,Sp,Su) .............................................. 3
- LAEP 4900 Special Problems (F,Sp,Su) ........................................ 1-5

Study Abroad
The department currently has cooperative agreements with the University of Ljubljana, Slovenia, and the Czech Agricultural University in Prague, Czech Republic, where students can study for a semester. Approved courses of study in design and planning programs offered by other institutions may count toward the travel requirement; however, course substitutions are subject to faculty approval.

Faculty-Sponsored Field Study Travel
The department already has a long tradition of a professionally oriented “Spring Break” trip, which is offered for undergraduate students under LAEP 4350. Recent trips have included San Francisco, Los Angeles, Portland, Seattle, Vancouver, Boston, and Washington DC.

The department also offers an international (2-week) field study experience, the destination of which changes from year to year. For example:

- May 2005 and 2007—The Italian Renaissance Villa and Town Planning: Looks at Greek (Paestum) and Roman (Pompeii, Roman Forum) antecedents, as well as Renaissance Villas from the region surrounding Rome to Florence and the Tuscan landscape.
- March 2006—Paris and Berlin: Looks at the development of the urban fabric with a concentration on contemporary urban development issues, as well as public places and architecture of historical significance.

Individual Travel
Undergraduate students desiring to count individual travel toward their degree will need to enroll for LAEP 4900 (Special Problems). Prior to enrollment, students must have a sponsoring faculty member and must submit a proposal for individual travel/study to the faculty for review. The content, objectives, and outcomes of the proposal will be evaluated for consistency with the educational objectives of the travel program.

Specialized Service Courses
The following courses are available for majors in other fields who may wish to gain an exposure to the different aspects of landscape architecture and environmental planning. A minor is not given in LAEP; however, these service courses are available, without prerequisites, for those requesting them.

- LAEP 1030 (BCA) Introduction to Landscape Architecture (F,Sp,Su)......................................................... 3
- LAEP 1200 Basic Graphics in Landscape Architecture (F)............. 3
- LAEP 2300 History of Landscape Architecture (F).......................... 3

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school.

The LAE Department offers a departmental honors program for BLA students. To qualify, students must be matriculated in the upper division of the LAEP program and must have a cumulative GPA of at least 3.50. The 15-credit honors course requirement for LAEP honors recognition is met by completion of the following: (1) a 3-credit honors thesis during the senior year, (2) two readings seminars (LAEP 6910 and 6930), and (3) an additional 10 credits of upper-division honors coursework.

Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information
For detailed information about requirements for the Bachelor of Landscape Architecture, see the major requirement sheet, which can be obtained from the department, or accessed online at: http://www.usu.edu/majorsheets/

Graduate Programs
The department offers three master’s degrees, including two in Landscape Architecture and one in BioRegional Planning.

MLA First Professional Degree in Landscape Architecture
The department offers a three-year, first professional degree for students with a bachelor’s degree in any area of study. This option allows students having a wide range of undergraduate experience to obtain an accredited degree in landscape architecture that fulfills the educational requirement for professional registration and allows entrance into the field of landscape architecture.

MLA Advanced Professional Degree
Students with a bachelor’s degree in Landscape Architecture can obtain a master’s degree within two years. This advanced professional degree affords landscape architects the opportunity to expand their knowledge in areas of special interest.

Master of Science in Bioregional Planning
This joint interdisciplinary program is offered by the department in conjunction with the Department of Environment and Society, College of Natural Resources.

For more information about required and recommended coursework, as well as other requirements for these degrees, visit the departmental website: http://www.usu.edu/laep/

Graduate Travel Requirement
All graduate students are required to complete a 1 or 2 credit travel course (LAEP 6550, Travel Course; or LAEP 6900, Special Problems) within the three years of their degree. The travel requirement may be fulfilled as part of the faculty-led international or national field trip experience (which changes venue from year to year), or it may be arranged through independent study outside of the bioregion with permission of the faculty.
Master of Landscape Architecture

The program for the Master of Landscape Architecture (MLA) emphasizes both traditional site planning and design, as well as broader areas of the profession, such as large-scale regional landscape analysis and planning, open space conservation, historic landscape preservation, and sustainable design. The MLA first professional degree is fully accredited by the Landscape Architectural Accreditation Board of the American Society of Landscape Architects.

The Master of Landscape Architecture program is designed to prepare the student for the landscape architect’s challenging role of providing a holistic approach to environmental planning and design. In order for landscape architects to contribute effectively to an interdisciplinary effort, they must be competent in the fundamentals of landscape architecture and also have an understanding of the subject matter of other professions. Landscape architects must master the communication skills necessary to achieve meaningful collaboration. In support of this philosophy, the following are the major objectives of the MLA program.

1. To provide a well-structured curriculum in fundamental professional knowledge and skills.
2. To research, analyze, and resolve land use and design issues related specifically to the Intermountain West. The scope of the program examines national, regional, and local issues; and their impact on the visual, physical, and cultural setting of the Intermountain West.
3. To integrate field experience and research into major graduate studio courses structured around real-world projects.
4. To provide opportunities for each student for exploration and development of an area of concentration as noted elsewhere.
5. To draw upon the regional, national, and international expertise of Utah State University to facilitate a program of academic and professional excellence which will allow the student to achieve eminence in practice, research, or education.

Areas of Faculty Expertise

The Master of Landscape Architecture program provides opportunities for each student to study and conduct research in areas which take advantage of the strengths of Utah State University and the landscape context of the Intermountain West centered around the expertise of the LAEP Department faculty, including: Land Rehabilitation/Revegetation—Ellsworth and Johnson; Regional Landscape Planning—Brabec, Kumble, Nicholson; Visual Resources Management—Ellsworth; Urban Wildlife/Refuge Planning—Johnson; Riparian Systems—Bell and Johnson; Community Planning—Bell, Lavoie, Nicholson, and Timmons; Public Lands/Recreation—Borecki, Kumble, Timmons; Urban Design/Theory and Representation—Lavoie; Historic Landscapes and Preservation—Borecki, Brabec, Lavoie, and Timmons; Land Use Law—Brabec; Open Space Conservation and Greenways Development—Brabec, Johnson, Kumble; Site Planning—Bell, Johnson, Lavoie, and Timmons.

These areas of faculty expertise include an assessment of the relevant environmental, design, social, economic, and public policy issues utilizing a wide range of computer-compatible techniques and models.

Admission Requirements

The application deadline for consideration in the first round of reviews is March 15. Applications received later than March 15 will be considered as space availability allows. February 1 is the application deadline for consideration for some scholarships, fellowships, and other financial aid. For general admissions requirements, see the appropriate sections of this catalog.

Computer Requirement

Computer competency is essential in the contemporary professional environment. Appropriate computer skills are required for most entry-level opportunities in landscape architecture and environmental planning. Therefore, course content increasingly relies on computer skills and personal access to computers with the appropriate software.

All students entering the MLA program must purchase, lease, or otherwise obtain continuing and uninterrupted access to a personal computer which meets the configuration requirements specified by the LAEP Department. Contact the department for current specifications.

Course of Study

The graduate program director oversees academic advising; however, all incoming students are assigned a faculty mentor until they have selected a thesis topic. A major professor whose interests are closely aligned to those of the student (see Areas of Faculty Expertise above) supervises thesis work. A minimum of 30 graduate-level credits, including thesis work, is required. Students supplement requirements with courses negotiated with the major professor and supervisory committee. An area of concentration may be pursued by selecting a relevant course of study, as outlined on pages 360-362.

First Year (37 credits)

During the first year, coursework concentrates on basic professional competency.

Fall Semester (20 credits)

LAEP 1200 Basic Graphics in Landscape Architecture ..................4
LAEP 2600 (QI) Landscape Construction I ..................................4
LAEP 2700 (QI) Site Analysis: Social, Behavioral, and Biophysical Dimensions .................................................................5
LAEP 6230 History of Landscape Architecture ..............................3
LAEP 6860 Faculty/Interdisciplinary Seminar I (taught both fall and spring semesters) .........................................................1
PLSC 2620 Woody Plant Materials: Trees and Shrubs for the Landscape .................................................................3

Spring Semester (17 credits)

LAEP 1300 Computer Applications in Landscape Architecture .... 3
LAEP 1350 Theory of Design ..........................................................4
LAEP 2720 Site Planning and Design ............................................5
LAEP 3610 Landscape Construction II ..........................................4
LAEP 6890 Seminar on Thesis Proposals and Procedures .............1

Second Year (27-29 credits)

During the second year, students can begin to specialize in one or more competencies.

Fall Semester (17-18 credits)

LAEP 6310 Recreation and Open Space Planning and Design (5 cr) or LAEP 6410 Redefining the Urban Landscape (5 cr) .............5
Or
LAEP 4120 Emerging Areas in Landscape Architecture I (2 cr) and LAEP 4130 Emerging Areas in Landscape Architecture II (2 cr)...........4
(With faculty approval, students may complete LAEP 4120 and 4130 instead of LAEP 6310 or 6410.)
LAEP 6350 Planting Design for Sustainability .........................4
LAEP 6740 Planning Theory and Implementation Issues ..............3
LAEP 6910 Reading Seminar I ...............................................1
BIOL 6960 Graduate General Ecology (elective) .....................5

Additional credits should be added as electives from the student’s chosen emphasis area.

Spring Semester (10-11 credits)
LAEP 6320 Residential Planning and Design ..........................5
Or
LAEP 4120 Emerging Areas in Landscape Architecture I (2 cr) and
LAEP 4130 Emerging Areas in Landscape Architecture II (2 cr) ....4
(With faculty approval, students may complete LAEP 4120 and 4130 instead of LAEP 6320.)
LAEP 6750 Implementation and Regulatory Techniques in Planning ...3
LAEP 6160 Professional Practice I ..........................1
LAEP 6170 Professional Practice II ...........................................1
LAEP 6930 Reading Seminar II ...............................................1

Additional credits should be added as electives from the student’s chosen emphasis area.

Third Year (14 credits)
Fall Semester (7 credits)
LAEP 6100 Regional Landscape Analysis and Planning (required) ....5
LAEP 6970 Thesis Research (Plan A, Thesis) (2 cr) or
LAEP 6960 Master’s Project (Plan B, Terminal Project) (2 cr) .......2

Additional credits should be added as electives from the student’s chosen emphasis area.

Spring Semester (7 credits)
LAEP 6110 Landscape Planning for Wildlife (not required) ...........3
LAEP 6970 Thesis Research (Plan A, Thesis) (4 cr) or
LAEP 6960 Master’s Project (Plan B, Terminal Project) (4 cr) .......4

Additional credits should be added as electives from the student’s chosen emphasis area.

Note: Recommended electives are listed on emphasis area sheets, which are available from the department. Selection of electives should be related to thesis or terminal project content and should be selected in consultation with the student’s mentor and/or thesis/project committee. Specific elective coursework may be required by the thesis/project committee in order to properly prepare the student for thesis or project work (Plan A or B).

Areas of Concentration
The program possesses an enviable reputation for graduating students with strong core professional skills. In addition to these skills, the department has the following four areas of concentration which reflect the strengths of the faculty, along with elective course offerings in other units of the University: (1) Open Space Conservation Planning and Green Space Design, (2) Cultural and Historic Landscapes, (3) Community Planning and Urban Design, and (4) Sustainable Landscapes. These four areas of concentration have recommended courses of study as outlined below, reflecting a depth of study in a particular area of landscape architectural theory and practice. Students may choose one of these areas, or they may create their own course of study to reflect their particular interests. Note that all students must complete the core MLA curriculum, in addition to courses noted in the various areas of concentration. For current requirements, contact the LAEP graduate program director. Since these areas of concentration are not approved as graduate specializations, they will not appear on student transcripts or diplomas.

Open Space Conservation Planning and Green Space Design
This area of concentration focuses on the conservation, planning, and design of open space. This focus will appeal to individuals who are interested in working for land trusts or for state and local governments in planning or land conservation roles, as well as to landscape architects in public or private practice who are interested in the design and planning of open space. With a strong basis in the Landscape Architecture program in the design and planning of open space (along with the theory, policy, and legal issues), supporting courses can be found in other units in the University. Elective courses can be found in Sociology, focusing on conflict management and the social implications of resource policy; Economics, focusing on valuation and impact analysis; and Natural Resources, focusing on ecology, spatial systems, collaborative problem-solving, and conservation biology.

Primary Courses
LAEP 6100 Regional Landscape Analysis and Planning (F) ...........5
LAEP 6110 Landscape Planning for Wildlife (Sp) .......................3
LAEP 6160 Professional Practice I (Sp) ......................................1
LAEP 6170 (Oi) Professional Practice II (Sp) .............................1
LAEP 6230 History of Landscape Architecture (F) ......................3
LAEP 6310 Recreation and Open Space Planning and Design (F) ....5
LAEP 6320 Residential Planning and Design (Sp) ......................5
LAEP 6750 Implementation and Regulatory Techniques in Planning (F,Sp) ..................................................3
LAEP 6900 Special Problems (F,Sp,Su) (1-6 cr) ...........................1-5
LAEP 6960 Master’s Project (F,Sp,Su) (1-6 cr) or
LAEP 6970 Thesis Research (F,Sp,Su) (1-6 cr) .........................1-6

Supporting Coursework
LAEP 2700 (Oi) Site Analysis: Social, Behavioral, and Biophysical Dimensions (F) ..................................................5
LAEP 2720 Site Planning and Design (Sp) .................................5
LAEP 6350 Planting Design for Sustainability (F) .......................4
LAEP 6740 Planning Theory and Implementation Issues (F) .........3

Electives
ECON 5560 Natural Resource and Environmental Economics (Sp) ....3
ECON 6710 Community Planning and Impact Analysis (F) ............3
ENVS 4000 (DSS) Human Dimensions of Natural Resource Management (F) ..................................................3
ENVS 5000 Collaborative Problem-Solving for Environment and Natural Resources (Sp) ...........................................3
NR 6510 Biophysical and Human Dimensions of Ecosystems (F,Sp,Su) ..................................................3
SOCI 6630 Natural Resources and Social Development (Sp) ............3
SOCI 6640 Conflict Management in Natural Resources (Sp) ..........3
WILD 4600 Conservation Biology (Sp) ......................................3
WILD 6510 Topics in Spatial Ecology (Sp) .................................1-3
WILD 7220 Community-based Conservation Partnerships (Sp) ........3

Cultural and Historic Landscapes
The graduate concentration in Cultural and Historic Landscapes prepares students for work in the research, documentation, analysis, understanding, planning, and management of human-influenced landscapes. Cultural landscapes have been defined by the World Heritage Convention of UNESCO as representing the “combined works of nature and of man. They are illustrative of the evolution of human society and settlement over time, under the influence of the physical constraints and/or opportunities presented by their natural environment and of successive social, economic, and cultural forces, both external and internal.” They are grouped into three broad categories, which include: (1) the historic designed landscape or site, (2) the organically evolved or vernacular landscape, and (3) the associative cultural
(ethnographic) landscape. (UNESCO. World Heritage Convention. Operational Guidelines for the Implementation of the World Heritage Convention. Paris: UNESCO, 1996.) The National Park Service notes that, “Historic landscapes vary in size from small gardens to several thousand-acre national parks. In character they range from designed to vernacular, rural to urban, and agricultural to industrial spaces. Vegetable patches, estate gardens, cemeteries, farms, quarries, nuclear test sites, suburbs, and abandoned settlements all may be considered historic landscapes.” (Historic American Landscapes Survey website: http://www.cr.nps.gov/habs/ha/ls/)

Ever-expanding populations are exerting increased development pressure on historic resources, leading to a growing domestic and international demand for landscape architects trained in this area of concentration. Career application of skills can range from topics as wide-ranging as preservation planning and heritage tourism to regional land-use planning and urban design, in both the public and private sectors.

Primary Courses
LAEP 6230 History of Landscape Architecture (F) ........................................3
LAEP 6250 Internship and Cooperative Education (F,Sp,Su) ..............................1-5
LAEP 6550 Travel Course (International Field Study) ........................................1-3
LAEP 6900 Special Problems (F,Sp,Su) .............................................................1-5
LAEP 6960 Master's Project (F,Sp,Su) (1-6 cr) or LAEP 6970 Thesis Research (F,Sp,Su) (1-6 cr) ..............................................................1-6

Supporting Coursework
LAEP 6100 Regional Landscape Analysis and Planning (F) ................................5
LAEP 6410 Redefining the Urban Landscape (F) .................................................5
LAEP 6740 Planning Theory and Implementation Issues (F) ................................3
LAEP 6750 Implementation and Regulatory Techniques in Planning (Sp) ..........3

Electives
ANTH 6110 Southwest Indian Cultures, Past and Present (F) .........................3
ANTH 6130 Ethnographic Field School (Su) ....................................................3-6
ANTH 6650 Developing Societies (F) ...............................................................3
HIST 6000 Historical Methods and Research (F) .............................................3
HIST 6030 Research Seminar .................................................................3
HIST 6460 Seminar in Environmental History ...............................................3
HIST 6610 Seminar on the American West (F) ..............................................3-4
HIST 6620 Seminar in Native American Studies (F) ......................................3-4
HIST 6760 Cultural and Historical Museums (Sp) .........................................3
HIST 6770 Seminar in Folklore and Folklife (F,Sp,Su) ....................................3
SOC 5640 Conflict Management in Natural Resources (Sp) ..........................3

Community Planning and Urban Design
This area of concentration focuses on both large and small communities, with particular application to the Western United States. This curriculum path will appeal to students who want to apply their landscape architecture skills to community focused projects, which could range in scale from an ethnic neighborhood in a city of two million to a downtown redevelopment project for a small town in the rural West. Opportunities upon graduation would include private firms offering planning and design services, as well as public agencies at the local, state or federal level.

Primary Courses
LAEP 6100 Regional Landscape Analysis and Planning (F) ............................5
LAEP 6370 City and Regional Planning (Sp) ...................................................3
LAEP 6410 Redefining the Urban Landscape (F) .............................................3
LAEP 6740 Planning Theory and Implementation Issues (F) ..........................3
LAEP 6750 Implementation and Regulatory Techniques in Planning (F,Sp) ........3
LAEP 6900 Special Problems (F,Sp,Su) ..........................................................1-5

Supporting Coursework
LAEP 2700 (CI) Site Analysis: Social, Behavioral, and Biophysical Dimensions (F) ..........................................................5
LAEP 2720 Site Planning and Design (Sp) .....................................................5
LAEP 6900 Special Problems: Geographic Information Systems (GIS) (F) ........2

Electives
ECON 5560 Natural Resource and Environmental Economics (Sp) .............3
ECON 5850 Regional and Community Economic Development (F) ..............3
GEOG 3610 Geography of Rural/Urban Planning (F) ...................................3
SOC 3600 Sociology of Urban Places (F) .....................................................3
SOC 3610 (DSS) Rural Sociology (F) .....................................................3
SOC 6200 Social Demography (F) ...............................................................3
SOC 6230 Techniques of Demographic Analysis (Sp) ..................................3
SOC 6700 Advanced Rural Sociology (Sp) ..................................................3

Sustainable Landscapes
Sustainability is a broad concept. It can be integrated into virtually every aspect of landscape architecture and environmental planning. The sustainable landscapes area of concentration in the LAEP department is focused on sustainability issues associated with the built landscape and the interface between built landscapes and open space. Coursework includes such subjects as low water use landscaping, planting design, planning for urban wildlife, storm water management, community economic development, and green business. In addition to coursework and thesis writing, students in the sustainable landscapes area of concentration organize and implement the department’s annual Sustainability Conference, which is now in its eighth year.

Primary Courses
LAEP 6100 Regional Landscape Analysis and Planning (F) ................................5
LAEP 6110 Landscape Planning for Wildlife (Sp) ............................................3
LAEP 6350 Planting Design for Sustainability (F) ..........................................4
LAEP 6400 Low Water Landscaping (F) ......................................................3
LAEP 6900 Special Problems (F,Sp,Su) ..........................................................1-5
LAEP 6960 Master’s Project (F,Sp,Su) (1-6 cr) or LAEP 6970 Thesis Research (F,Sp,Su) (1-6 cr) ..............................................................1-6

Supporting Coursework
BIOL 2220 General Ecology (F,Sp) ...............................................................3
LAEP 2600 (QI) Landscape Construction I (F) ..............................................4
LAEP 6310 Recreation and Open Space Planning and Design (F) ...................5
LAEP 3610 Landscape Construction II (Sp) ....................................................4
LAEP 6740 Planning Theory and Implementation Issues (F) ..........................3
LAEP 6750 Implementation and Regulatory Techniques in Planning (F,Sp) .......3

Electives
ENV 4000 (DSS) Human Dimensions of Natural Resource Management (F) ..........................................................3
GEO 3100 (DSC) Natural Disasters (Sp) ....................................................3
NR 6510 Biophysical and Human Dimensions of Ecosystems (F,Sp,Su) ........3
NR 6520 Structure and Function of Ecological and Social Systems (F,Sp,Su) ....3
NR 6530 Integrated Inventory, Analysis, and Assessment of Ecosystems (F,Sp,Su) ..........................................................3
NR 6540 Ecosystem Management Implementation (F,Sp,Su) ..........................3
SOC 6620 Environment, Technology, and Social Change (Sp) ......................3
SOC 6640 Conflict Management in Natural Resources (Sp) ..........................3
SOC 7640 Population and Environment (Sp) ..............................................3
SOIL 4000 Soil and Water Conservation (F) .................................................4
WATS 5490 Small Watershed Hydrology (F) .............................................4
WATS 6530 Water Quality and Pollution (Sp) ..............................................3
Graduate Travel Requirement

The graduate curriculum includes a requirement for a minimum of 1 credit of travel and study outside of the bioregion. This travel requirement can be satisfied by one or more of the following courses:

- LAEP 4120 Emerging Areas in Landscape Architecture I (2 cr) or LAEP 4130 Emerging Areas in Landscape Architecture II (2 cr) ..........................2
- LAEP 6550 Travel Course (F,Sp,Su) .............................................1-3
- LAEP 6900 Special Problems (F,Sp,Su) .............................................1-5

Study Abroad

The department currently has cooperative agreements with the University of Ljubljana, Slovenia, and the Czech Agricultural University in Prague, Czech Republic, where students can study for a semester and complete research projects as appropriate. Approved courses of study in design and planning programs offered by other institutions may count toward the travel requirement; however, course substitutions are subject to faculty approval.

Faculty-Sponsored Field Study Travel

The department already has a long tradition of a professionally oriented “Spring Break” trip, which is offered for graduate students under LAEP 6550. Recent trips have included San Francisco, Los Angeles, Portland, Seattle, Vancouver, Boston, and Washington D.C.

The department also offers the opportunity to join faculty on research trips under LAEP 4120 and 4130 on an international (2-week) field study experience, the destination of which changes from year to year. For example:

- **May 2005 and 2007**—The Italian Renaissance Villa and Town Planning: Looks at Greek (Paestum) and Roman (Pompeii, Roman Forum) antecedents, as well as Renaissance Villas from the region surrounding Rome to Florence and the Tuscan landscape.
- **March 2006**—Paris and Berlin: Looks at the development of the urban fabric with an concentration on contemporary urban development issues, as well as public places and architecture of historical significance.

Individual Travel

Graduate students desiring to count individual travel toward their degree will need to enroll for LAEP 6900 (Special Problems). Prior to enrollment, students must have a sponsoring faculty member and must submit a proposal for individual travel/study to the faculty for review. The content, objectives, and outcomes of the proposal will be evaluated for consistency with the educational objectives of the travel program.

Additional Information

For more detailed information about currently required and recommended coursework, as well as other requirements for this degree, visit the departmental website: [http://www.usu.edu/laep/](http://www.usu.edu/laep/)

Master of Science in Bioregional Planning (Joint degree with Environment and Society)

Good planning and management of natural resources and systems supersedes individual disciplines, requiring an interdisciplinary approach for the successful resolution of environmental issues. The intent of this program’s curriculum is to integrate the biophysical disciplines more closely while also addressing the social and political sciences. This degree program is offered jointly by the Department of Landscape Architecture and Environmental Planning in the College of Humanities, Arts and Social Sciences, and by the Department of Environment and Society in the College of Natural Resources.

This program consists of a two-year period of study with a required thesis or paper/project. To maintain a program focus, the student selects from three clusters of coursework (research methods/case studies, biophysical, and social/economic policy). A minimum of 36 graduate-level credits, including 3-6 credits of thesis or paper/project is required. A capstone course is required for all LAEP students. The program contains a total of nine elective credits from which the candidate and his or her committee can formulate an area of concentration.

Course of Study

This two-year MS program is comprised of an interdisciplinary core of courses and faculty for addressing complex issues in the areas of bioregional planning and management. Emphasis is placed on four problematic content areas: biophysical, social/demographic, economic, and public policy. The spatial focus is on the planning for large landscape areas with dispersed populations with a primary economic base in agriculture, energy development, tourism/recreation, retirement communities, and natural resources.

The program requires a minimum of 36 graduate-level credits, including 3-6 credits of work on a thesis or paper/project. Nine of the required credits may be in an area of concentration. These nine credits are to be negotiated with the candidate’s major professor and supervisory committee. Requirements for the MS in Bioregional Planning are as follows:

**Required**

Environment Systems Research Institute (ESRI) certification course or ENVS 6900 (Geographic Information Systems), LAEP 6740, and ENVS 6900 (Shipley Seminar/NEPA/EIS).

**Research Methods/Case Studies (3-4 credits)**

One of the following courses is required: SOC 6100, 6150, WILD 6500.

**Biophysical (3-4 credits)**

One of the following courses is required: WATS 6330, WILD 6710. For those students without a background in ecology, WILD 4600 is also required. Credits earned for WILD 4600 or equivalent do not apply to the graduate program.
Social/Economic Policy (3-4 credits)
One of the following courses is required: ENVS 6000, POLS 5180, or SOC 6630.

Capstone Course (5 credits)
LAEP 6100 is required for all LAEP students.

Area of Concentration (9 credits)
Nine credits should be available to the candidate for an area of concentration.

Thesis or Project (3 or 6 credits)
A thesis or Plan B paper/project option is required and is to be negotiated with the candidate, major professor, and supervisory committee.

Total Credits: 36-39

Environmental Field Service

Practical Education and Community Service
The department sponsors a program of planning and design services in which MS, MLA, and BLA students may participate. The Environmental Field Service program offers students the opportunity to interact with community leaders and citizens and to test concepts and skills acquired in the classroom while working on real projects.

Internships and Cooperative Education
Many students take advantage of the practical learning opportunities available through internships and cooperative education programs. The department, student, and government agency or private firm, make the necessary arrangements. Internships and cooperative education experiences are not required for degree completion. In some cases, these experiences may be used as the basis for waiver of selected courses, subject to approval in advance by the major professor, graduate program director, and department head. Students completing these experiences are required to make a summary presentation to department faculty and students.

Financial Assistance
The application deadlines for scholarships and financial assistance vary. For current application deadline information, contact the LAEP Department, the USU Financial Aid Office, and the School of Graduate Studies. Acceptance to pursue graduate study does not guarantee the student financial assistance.

Career Opportunities
The Department of Landscape Architecture and Environmental Planning provides education for careers in landscape architectural site planning, design, environmental planning, and management, with special consideration for conditions in the Intermountain West. Graduates are employed by local, state, and federal agencies, as well as by private sector professional firms. LAEP graduates also find employment in academia at both the undergraduate and graduate levels.

Landscape Architecture and Environmental Planning Faculty

Sumner Margetts Swaner Professor
Tamara F. Shapiro, regional landscape planning

Professors
Elizabeth A. Brabec, cultural landscapes, landscape and open space conservation and management, land use law and policy
John C. Ellsworth, visual resources management, computer applications, disturbed lands rehabilitation
Craig W. Johnson, planting design, land rehabilitation, wildlife habitat planning and design, site planning

Associate Professors
David L. Bell, residential design, landscape construction, community planning and design
Caroline Lavoie, urban design and cultural landscapes, design theory, landscape and planning theory
John K. Nicholson, urban and regional planning, computer applications, transportation
Michael L. Timmons, site planning and design, recreation and open space planning, landscape history, historic preservation

Associate Professor Emeritus
Vern J. Budge, landscape construction, recreation planning

Assistant Professors
Peter Kumble, regional landscape planning, professional practice, open space preservation
Margie Borecki, basic graphics, landscape construction, sustainability practices

Course Descriptions
Landscape Architecture and Environmental Planning (LAEP), pages 656-658
Department of Languages, Philosophy, and Speech Communication

Department Head: Bradford “J” Hall
Location: Main 204
Phone: (435) 797-1209
FAX: (435) 797-1329
E-mail: langphil@cc.usu.edu
WWW: http://lpsc.usu.edu

Associate Department Head: J. P. Spicer-Escalante
Location: Main 002K
Phone: (435) 797-0709
FAX: (435) 797-1329
E-mail: langphil@cc.usu.edu

Department Section Coordinators:
Asian Languages:
Atsuko O. Neely, Main 306, (435) 797-1365, akko@cc.usu.edu

French:
Sarah Gordon, Main 002L, (435) 797-8213, sgordon@cc.usu.edu

German:
Felix W. Tweraser, Barn 103, (435) 797-7439, twerfeli@cc.usu.edu

Master of Second Language Teaching (MSLT):
Co-Directors:
Karin de Jonge-Kannan, Main 002D, (435) 797-8318, karin.dejongekan@usu.edu
John E. Lackstrom, Main 211, (435) 797-1210, fat88@cc.usu.edu

Philosophy:
Richard Sherlock, Main 202E, (435) 797-1244, ruffie@cc.usu.edu

Russian:
Taira Koybaeva, Main 202F, (435) 797-3154, taira.koybaeva@usu.edu

Spanish and Portuguese:
Mark D. Larsen, Main 202C, (435) 797-1212, marcos@cc.usu.edu

Speech:
Jennifer A. Peeples, Barn 119, (435) 797-7440, jpeeples@cc.usu.edu

Degrees offered: Bachelor of Arts (BA) in French, German, and Spanish; BA and Bachelor of Science (BS) in Philosophy; BA and BS in Speech; Master of Second Language Teaching (MSLT)

Undergraduate Programs

Mission Statement
The Department of Languages, Philosophy, and Speech Communication offers programs in modern languages and literature, philosophy, and speech communication. While these programs differ widely in their curricula, they are bound together by two considerations: (1) an emphasis on humanistic content and method of inquiry; and (2) a recognition on the part of the departmental faculty that a critical part of becoming an educated person lies in achieving a greater understanding of one’s self and of others, an understanding opened up through insight into the spoken and written word.

Courses offered by the department provide majors and minors with opportunities to achieve this understanding by increasing their communicative, logical, interpretive, linguistic and research skills; their ability to function within an increasingly globalized society; and their awareness of ethical, aesthetic, and other values. Courses offered by the department also give students in the teaching emphasis and teaching minors the opportunity to serve the needs of the education professions.

Through its participation in the University Studies program, the department provides all students with an opportunity to gain knowledge of how people come to understand themselves through their cultural, literary, and philosophical achievements. The department also furthers the education of both traditional and nontraditional students through faculty participation in interdisciplinary programs such as Honors, Liberal Arts, Asian Studies, and Women and Gender Studies; and in cooperative education, distance learning, extension, and study-abroad programs.

Admission Requirements
Admission requirements for freshmen desiring entrance to major programs offered by the Department of Languages, Philosophy, and Speech Communication are the same as those for Utah State University (see pages 16-20). Transfer students from other institutions and from other majors within Utah State University must have an overall minimum GPA of 2.5 (2.75 for Spanish) to be admitted to the department’s major programs.

All students majoring in programs offered by this department must maintain a minimum GPA of 2.5 in their major (3.0 in Spanish) to be in good standing in the department and to obtain official approval for graduation.

Career Information
For career and graduate school information, students should contact undergraduate advisors in the department.

Scholarship Information
Four scholarships are offered through the Department of Languages, Philosophy, and Speech Communication. The Brett Blanch Memorial Scholarship is awarded to an outstanding philosophy major. The Carl T. Degener Memorial Scholarship is awarded to an outstanding language major at the junior level. Outstanding upper-division students in French (and under some circumstances Spanish) are eligible for the Jean Inness Scholarship. The Thain Scholarship is awarded to an outstanding high school senior enrolling in a language or philosophy course at USU. For more details, contact the department office.

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/
Course Requirements

Language Major Requirements

French Major and Minor Requirements

Minimum Departmental Requirements

Total Credits:

French Major ............................................................... 33
French Major, Teaching Emphasis .......................... 31 FREN & 31 SCED
French Minor ................................................................. 12
French Minor, Teaching Emphasis ......................... 15 FREN & 31 SCED
French Major, Teaching Emphasis without licensure ... 35
French Minor, Teaching Emphasis without licensure .... 19

Grade Point Average to Declare a Major or Minor .... 2.5 Career GPA
Grade Point Average to Graduate with Major or Minor ... 2.5 GPA within Major/Minor Classes

Notes:

Courses for French Majors and Minors require a minimum of C- or better.
Courses for French Majors and Minors may not be taken on a Pass/ Fail Basis (except for FREN 3030).

French Major (33 credits) (2.5 GPA)

A. Required Course (3 credits)

LING 4100 The Study of Language (F,Sp) ......................... 3

B. Elective Courses (30 credits minimum)

Students must complete at least 30 credits of upper-division coursework selected from the following list.

FREN 3030 Advanced French for Everyday Communication (graded pass/fail only) (Su) ........................................ 3
FREN 3060 (CI) French Conversation (F) .............................. 3
FREN 3070 Advanced French Language Study Abroad I (Su) ...... 4
FREN 3080 Advanced French Language Study Abroad II (Su) ...... 4
FREN 3090 (CI) French Intermediate Written Communication (F) ... 3
FREN 3500 (DHA) Topics in French Literature in Translation (repeatable for credit) (F,Sp,Su) .......................... 3
FREN 3510 (CI) Business French (F) ................................. 3
FREN 3550 (DHA) French Civilization (F) ............................ 3
FREN 3570 France Today (Sp) .......................................... 3
FREN 3600 Textual Analysis (F) .................................... 3
FREN 3620 Advanced Independent Study: Experiencing Paris (Su) 2
FREN 3680 Individual Readings (F,Sp,Su) ................................ 1-4
FREN 3900 Topics in French and Francophone Studies (F) ....... 3
FREN 4060 (CI) Advanced French Conversation (Sp) ............ 3
FREN 4090 (CI) Advanced Written Communication (F) ........... 3
FREN 4200 Applied French Linguistics and Phonetics (Sp) ........ 3
FREN 4520 Information Technologies in French (F) ............... 3
FREN 4610 (DHA) Period Studies in French Literature (Sp) ....... 3
FREN 4620 (DHA) Genre Studies in French Literature (F) ......... 3
FREN 4800 Individual Readings (F,Sp) ................................ 1-4
FREN 4900 Seminar in French and Francophone Studies (Sp) ...... 3
FREN 4920 French Language Tutoring (F,Sp,Su) ................. 1-2
LING 4900 Analysis of Cross-Cultural Difference (Sp) ............. 3

Students should note that no more than two upper-division French courses taught in English can be applied toward the French majors.
Sample Four-year Plan for French Major

Minimum GPA for Admission: 2.5, USU; 2.5, Career
Minimum GPA for Graduation: 2.5, major courses
Minimum Grade Accepted: C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (32 credits)
Fall Semester (16 credits)

Spring Semester (14 credits)
FREN upper-division courses ................................................6
Elective courses ......................................................................8

Complete the CIIL exams by the end of the Freshman Year.

French Major—Teaching Emphasis with Secondary School Licensure (62 credits) (2.5 GPA)

Note: The following requirements only specify courses offered by the Department of Languages, Philosophy, and Speech Communication. To be licensed to teach in the Utah public secondary school system, students with a teaching emphasis must also complete additional courses (approximately 31 credits) required by the Department of Secondary Education. For more information, please contact the Department of Secondary Education, Education Building 330, or review the supplementary section, entitled Secondary Teacher Education Program (STEP) Level Outline on page 374. Information is also provided on the Web at: http://secondaryeducation.usu.edu/cs_admission.php

I. French and Linguistics Courses (31 credits)

A. Required Courses (25 credits)
LING 4100 The Study of Language (F,Sp) .................................3
FREN 4200 Applied Linguistics and Phonetics (Sp) ...............3
FREN 3060 Applied French Language Study Abroad II (Su) ..........................3
FREN 4060 Advanced French Conversation (Sp) (3 cr) .......3
FREN 3090 French Intermediate Written Communication (F) (3 cr)
FREN 4090 Advanced Written Communication (F) (3 cr) .......3

French Minor (12 credits) (2.5 GPA)
To receive a French minor, students must complete 12 upper-division credits in French. Students should note that only one credit of FREN 4920 may count toward the French minor. In addition, courses taken for the French minor programs may not be taken on a pass/fail basis, with the exception of FREN 3030. Students should also note that no more than one upper-division French course taught in English can be applied toward the French minor.

French Minor—Teaching Emphasis with Secondary School Licensure (46 credits) (2.5 GPA)

Note: The following requirements only specify courses offered by the Department of Languages, Philosophy, and Speech Communication. To be licensed to teach in Utah public secondary school system, students with a teaching emphasis must also complete additional courses (approximately 31 credits) required by the Department of Secondary Education. For more information, please contact the Department of Secondary Education, Education Building 330, or review the supplementary section, entitled Secondary Teacher Education Program (STEP) Level Outline on page 374. Information is also provided on the Web at: http://secondaryeducation.usu.edu/cs_admission.php

Students should note that only one credit of FREN 4920 may count toward the French Minor—Teaching Emphasis. In addition, courses taken for the French minor programs may not be taken on a pass/fail basis, with the exception of FREN 3030.

I. French and Linguistics Courses (15 credits)
A. Required Courses (12 credits)
FREN 3900 (CI) Intermediate Written Communication (F) (3 cr) or FREN 4090 (CI) Advanced Written Communication (F) (3 cr) .... 3
FREN 3550 (DHA) French Civilization (F) (3 cr) or FREN 3570 France Today (Sp) (3 cr) .............................................. 3
FREN 3600(Textual Analysis (F) .................................................. 3
FREN 4200 Applied French Linguistics and Phonetics (Sp) .......... 3

B. Elective Courses (3 credits)
Students must complete an additional three credits in coursework selected from the following list:
FREN 4610 (DHA) Period Studies in French Literature (Sp) ........ 3
FREN 4620 (DHA) Genre Studies in French Literature (F) ........ 3
LING 4900 Analysis of Cross-Cultural Difference (Sp) .............. 3
FREN 3030 Advanced French for Everyday Communication (Su) ...... 3
FREN 3070 Advanced French Language Study Abroad I (Su) .... 4
FREN 3080 Advanced French Language Study Abroad II (Su) ...... 4
FREN 3500 (DHA) Topics in French Literature in Translation (repeatable for credit) (F,Sp,Su) .............................................. 3
FREN 3510 (CI) Business French (F) .......................................... 3
FREN 3820 Advanced Independent Study: Experiencing Paris (Su) .... 2

FREN 4900 Seminar in French and Francophone Studies (Sp) .... 3
FREN 4920 French Language Tutoring (F,Sp,Su) ....................... 1-2

II. Secondary Teacher Education Program (STEP) Courses (31 credits; 35 credits including courses for teaching emphasis)
For further information, review the Secondary Teacher Education Program (STEP) Level Outline on page 374.
Department of Languages, Philosophy, and Speech Communication

French Major and/or Minor—Teaching Emphasis without Secondary School Licensure (major 35 credits, minor 19 credits) (2.5 GPA)

It is possible to have a teaching emphasis within a major or minor in French without receiving Secondary School teaching licensure. However, unless the student is an elementary education major, he or she would not be able to teach in Utah public schools (nor at many private ones). Graduating without licensure may allow employment at some community colleges and universities.

In order to complete the French Major—Teaching Emphasis without Secondary School Licensure, students must fulfill all of the requirements listed under Section I (French and Linguistics Courses) of the French Major—Teaching Emphasis with Secondary School Licensure (31 credits), plus either LING 3300 (1 credit) or 4300 (3 credits), for a total of 35 credits.

Similarly, to complete a French Minor—Teaching Emphasis without Secondary School Licensure, students must fulfill all of the requirements listed under Section I (French and Linguistics Courses) of the French Minor—Teaching Emphasis with Secondary School Licensure (15 credits), plus either LING 3300 (1 credit) or 4300 (3 credits), for a total of 19 credits.

Minimum Departmental Requirements

Total Credits:

German Major .................................................. 33
German Major, Teaching Emphasis .................. 31 GERM & 31 SCED
German Minor ...................................................... 12
German Minor, Teaching Emphasis ................ 15 GERM & 31 SCED
German Major, Teaching Emphasis without licensure 35
German Minor, Teaching Emphasis without licensure 19

Grade Point Average to Declare a Major or Minor........ 2.5 Career GPA
Grade Point Average to Graduate
with Major or Minor ........................................... 2.5 GPA within Major/Minor Classes

Notes:
Courses for German Majors and Minors require a minimum of C- or better.
Courses for German Majors and Minors may not be taken on a Pass/ Fail Basis.

German Major (33 credits) (2.5 GPA)

A. Required Courses (9 credits)
GERM 3000 (DHA) Introduction to German Studies (F) .................. 3
GERM 3040 (CI) Advanced German Grammar and Composition (F) ........ 3
LING 4100 The Study of Language (F,Sp) ........................................ 3

B. Elective Courses (24 credits)

Students must complete at least 24 credits of upper-division coursework from the following list.

GERM 3050 (CI) Advanced German Grammar and Composition (Sp) ................. 3
GERM 3300 (DHA) Contemporary German Speaking Cultures (Sp) ............. 3
GERM 3510 (CI) Business German (Sp) .................................................... 3
GERM 3540 (CI) Techniques in Translating German Texts (F) .................. 3
GERM 3550 (DHA) Cultural History of German Speaking Peoples (F) ............. 3
GERM 3600 (DHA) Survey of German Literature I (F) .......................... 3
GERM 3610 (DHA) Survey of German Literature II (Sp) .......................... 3
GERM 3800 (DHA) Linguistics and Language (3 credits) ......................... 3
GERM 3880 (CI) Individual Readings (F,Sp) ....................................... 1-4
GERM 4200 Applied German Linguistics and Phonetics (Sp) .................. 3
GERM 4610 German Narratives (Sp) ...................................................... 3
GERM 4850 (DHA) Trends in Modern German Literature (F) ................... 3
GERM 4860 (CI) German IV Study Abroad (Su) ..................................... 1-4
GERM 4880 (CI) Individual Readings (F,Sp) ....................................... 1-4
GERM 4900 (CI) Special Topics (Sp) ...................................................... 3
GERM 4910 German for Special Purposes (Sp) .................................... 3
GERM 4920 (CI) German Language Tutoring (F,Sp,Su) .......................... 3
LING 4900 Analysis of Cross-Cultural Difference (Sp) ........................ 3

Note: Credits obtained in lower-division German courses cannot be applied toward the German major programs.

Sample Four-year Plan for German Major

Minimum GPA for Admission: 2.5, USU; 2.5, Career
Minimum GPA for Graduation: 2.5, major courses; 2.0, Career
Minimum Grade Accepted: C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. II. Secondary Teacher Education Program (STEP) Courses (31 credits; 35 credits including courses for teaching emphasis)

For further information, review the Secondary Teacher Education Program (STEP) Level Outline on page 374.

German Teaching Emphasis and/or Minor—Teaching Emphasis without Secondary School Licensure (major 35 credits) (minor 19 credits) (2.5 GPA)

It is possible to have a teaching emphasis within a major or minor in German without receiving Secondary School teaching licensure. However, unless the student is an elementary education major, he or she would not be able to teach in Utah public schools (nor at many private ones). Graduating without licensure may allow employment at some community colleges and universities.

In order to complete the German Major—Teaching Emphasis without Secondary School Licensure, students must fulfill all of the requirements listed under Section I (German and Linguistics Courses) of the German Major—Teaching Emphasis with Secondary School Licensure (31 credits), plus either LING 3300 or LING 4300 (1 credit) and LING 4400 (3 credits), for a total of 35 credits.

Similarly, to complete a German Minor—Teaching Emphasis without Secondary School Licensure, students must fulfill all of the requirements listed under Section I (German and Linguistics Courses) of the German Minor—Teaching Emphasis with Secondary School Licensure (15 credits), plus either LING 3300 or LING 4300 (1 credit) and LING 4400 (3 credits) for a total of 19 credits.

Spanish Major and Minor Requirements

Minimum Departmental Requirements

Total Credits: 19 Spanish Major ................................................. 34
Spanish Major, Teaching Emphasis ......................... 38 SPAN & 31 SCED Spanish Minor .................................................. 16
Spanish Minor, Teaching Emphasis ....................... 20 SPAN & 31 SCED Spanish Major, Teaching Emphasis without licensure ................. 38
Spanish Minor, Teaching Emphasis without licensure ...... 20
Grade Point Average to Declare a Major or Minor ...... 2.75 Career GPA
Grade Point Average to Graduate with Major or Minor ............................................ 3.00 GPA within Major/Minor Classes

Notes:
Courses for Spanish Majors and Minors require a minimum of 3- or better.
Courses for Spanish Majors and Minors may not be taken on a Pass/Fail Basis (except for courses designated as Pass/Fail, such as LING 3300, 4300, SPAN 3010, 3520, 4920).
At least half (50 percent) of the credits earned for these degrees must be completed in upper-division USU courses offered by the Department of Languages, Philosophy, and Speech Communication, and having prefixes of SPAN or LING. All other credits (including transfer and study abroad credits) must be approved by the Spanish faculty in order to be counted toward these degrees.

Students with prior language experience are required to take a placement test before admission to the Spanish Major.
**Department of Languages, Philosophy, and Speech Communication**

**Spanish Major (34 credits) (3.00 GPA)**

**Spanish Major—Teaching Emphasis (65 credits) (3.00 GPA)**

Note: The following requirements only specify courses offered by the Department of Languages, Philosophy, and Speech Communication. To be licensed to teach in the Utah public secondary school system, students with a teaching emphasis must also complete additional courses (approximately 31 credits) required by the Department of Secondary Education. For more information, please contact the Department of Secondary Education, Education Building 330, or review the supplementary section, entitled Secondary Teacher Education Program (STEP) Level Outline on page 374. Information is also provided on the Web at: [http://www.coe.usu.edu/Seced/](http://www.coe.usu.edu/Seced/)
## Department of Languages, Philosophy, and Speech Communication

### I. Spanish and Linguistics Courses (34 credits)

#### A. Required Courses (29 credits)

Teaching Emphasis for Spanish Major and Minor

Spanish Major and/or Minor—Teaching Emphasis with Secondary School Licensure
To receive secondary school licensure, students must complete the Secondary Teacher Education Program (STEP). For further information, review the Secondary Teacher Education Program (STEP) Level Outline on page 374.

Spanish Major and/or Minor—Teaching Emphasis without Secondary School Licensure
It is possible to have a teaching emphasis within a major or minor in Spanish without receiving Secondary School teaching licensure. However, unless the student is an elementary education major, he or she would not be able to teach in Utah public schools (nor at many private ones). Graduating without licensure may allow employment at some community college and universities.

In order to complete the Spanish Major—Teaching Emphasis without Secondary School Licensure, students must fulfill all of the requirements listed under Section I (Spanish and Linguistics Courses) of the Spanish Major—Teaching Emphasis (34 credits), plus either LING 3300 or LING 4300 (1 credit) and LING 4400 (3 credits), for a total of 38 credits.

Similarly, to complete a Spanish Minor—Teaching Emphasis without Secondary School Licensure, students must fulfill all of the requirements listed under the Spanish Minor—Teaching Emphasis (16 credits), plus either LING 3300 or LING 4300 (1 credit) and LING 4400 (3 credits) for a total of 20 credits.

18Students desiring to apply study abroad credits toward these degrees must obtain approval from the Spanish faculty prior to participating.
19This course may be repeated for additional credit.
20Enrollment in this course is by permission of instructor only.
21Only 3 credits maximum in practicum courses may count toward a Spanish major or minor.
22This course is required for a teaching emphasis in the Spanish major or minor.
23This course is only open to those who have first completed 45 credits in the program.
24This practicum is required for a teaching emphasis in the Spanish major.
25LING 3300 or 4300, and LING 4400 must be taken during the same semester, and should be the last courses taken for the major or minor.
26SPAN 4990 is the final requirement for all Spanish majors and minors, and should be completed during the last semester of major or minor classes.
Secondary Teacher Education Program (STEP)

**Level Outline**

(31 credits; 35 credits including courses for teaching emphasis/minor)

Most of the courses listed below count for both the teaching emphasis and the teaching minor.

**A. Level 1 (first semester in program)**

- SCED 3010 (F) Classroom Management (F,Sp) ........... 3
- SCED 3210 (CI/DSS) Educational and Multicultural Foundations (F,Sp) .............. 3
- LING 3300/4300 and Clinical Experience I and II (F,Sp) (P/F only) ........... 3
- LING 4400 and Teaching Modern Languages (F,Sp) .............. 3
- LING 3500 and Technology Tools for Secondary Teachers (F, Sp, Su) ........ 1

**B. Level 2**

- SPED 4000 Education of Exceptional Individuals
  (may be taken earlier) (F,Sp,Su) .............. 2
- SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) .............. 3
- SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) .............. 3

**C. Level 3**

Because student teaching requires a major commitment of time and energy, students should take only the courses listed below during this semester. Students are also urged to forgo outside employment, if possible, during the student teaching experience.

- LING 5500 Student Teaching Seminar (F,Sp) .............. 2
- LING 5630 Student Teaching in Secondary Schools (F,Sp) .............. 10

---

2\(^5\)The Clinical Experience II course is taught under course number 4300 in various departments. Course title varies among departments.

2\(^6\)The Special Methods II course is taught under course number 4400.

2\(^7\)LING 3300 or 4300 and LING 4400 must be taken during the same semester, and should be the last courses taken for the major or minor.

**Additional Language Minor Requirements**

**Minimum Departmental Requirements**

**Total Credits:**

- Chinese Minor ............................................................... 12
- Japanese Minor ............................................................... 12
- Portuguese Minor ............................................................. 12
- Russian Minor ............................................................... 12
- Linguistics Minor ............................................................ 12

Grade Point Average to Declare Minor ........ 2.5 Career GPA

Grade Point Average to Graduate with Minor ........ 2.0 Career GPA and 2.5 GPA within Minor Classes

**Notes:**

Courses for Minors may not be taken on a Pass/Fail basis.

Courses for Minors require a minimum grade of C- or better.

At least half (50) of credits for Minors must be completed through USU, and approved by the department head.

Any 4920 course is repeatable; however, only 1 credit may be applied toward the minor.

**Chinese Minor**

Select 12 upper-division credits in Chinese from the following courses:

- CHIN 3010 Chinese Third Year I (F) ........................................ 4
- CHIN 3020 Chinese Third Year II (Sp) ................................ 4
- CHIN 3100 (DHA) Readings in Contemporary Chinese Culture (Sp) .. 3
- CHIN 3510 Chinese Business Language (F) ......................... 3
- CHIN 3880 Individual Readings in Chinese (F,Sp) ................. 1-2
- CHIN 4920\(^2\) Chinese Language Tutoring (F,Sp,Su) .............. 1

---

**Japanese Minor**

Select 12 credits from the following courses:

- JAPN 3010 Japanese Third Year I (F) ......................................... 4
- JAPN 3020 Japanese Third Year II (Sp) .................................. 3
- JAPN 3050\(^2\) Japanese Calligraphy (Sp) ............................. 1
- JAPN 3100 Readings in Contemporary Japanese Culture (F) .... 3
- JAPN 3510 Japanese for the Business Environment (Sp) ........ 3
- JAPN 4920\(^2\) Japanese Language Tutoring (F,Sp) ................. 1

---

**Portuguese Minor**

- PORT 2020 Portuguese Second Year II (Sp) .......................... 4
- PORT 3040 (CI) Advanced Portuguese Grammar and Composition
  (must be completed at USU) (F,Sp) ................................. 3
- PORT 3570 Brazilian Culture and Civilization
  (must be completed at USU) (F) ......................................... 3
- PORT 3630 Survey of Brazilian Literature
  (must be completed at USU) (Sp) ........................................ 3

**Russian Minor**

Select 12 credits from the following courses:

- RUSS 3040 Advanced Russian Grammar and Composition (F) .... 3
- RUSS 3050 Advanced Russian Grammar and Composition (Sp) .... 3
- RUSS 3300 (DHA) Contemporary Russian Language and Culture (Sp 2007, F 2008) .................................... 3
- RUSS 3510 (CI) Business Russian (F 2007) ............................ 3
- RUSS 3540 Russian Translation for Science, Business, and Culture
  (Sp 2008) ........................................................................ 3
- RUSS 4900\(^2\) Individual Readings (F,Sp) ............................... 1-4
- RUSS 4920\(^2\) Russian Language Tutoring (F,Sp) ................. 1

---

2\(^8\)This course is repeatable for credit, and may be taken a maximum of three times.

**Linguistics Minor**

Select 3 credits from the following courses:

- LING 4100 The Study of Language (F,Sp) ................. 3
- ENGL 3020 (DHA) Perspectives in Linguistics (Sp) .............. 3
- ENGL 4200 Linguistic Structures (F,Sp,Su) ...................... 3

Select 9 credits from the following courses:

- LING 4400 Teaching Modern Languages (F,Sp) .............. 3
- LING 4520 Technology for Language Teaching (Su) ............. 3
- LING 4900 Analysis of Cross-Cultural Difference (Sp) ........ 3
- ENGL 4210 History of the English Language (Sp) .............. 3
- ENGL 4220 Ethnic Literacy (F,Sp) ...................................... 3
- ENGL 4230 Language and Society (F) ................................. 3
- ENGL 5210 Topics in Linguistics (F) ................................. 3

**Four-year Plan for Linguistics Minor**

It is suggested that students completing the Linguistics Minor take the courses listed above in the following sequence:

**Freshman Year**

- ENGL 3020 (DHA) or LING 4100 or ENGL 4200

**Sophomore Year**

- LING 4900 or ENGL 4230

**Junior Year**

- ENGL 4210 or ENGL 4230

**Senior Year**

- LING 4400 or LING 4520 or ENGL 5210

For additional information on language major and minor programs offered by the Department of Languages, Philosophy, and Speech Communication, contact the department office.
Proficiency Tests, Placement in Language Courses, and Obtaining Credit by Special Examination

Students who have completed one or more years of language study may take proficiency tests to determine their proper placement in language courses.

When basic skills in a department-taught language (other than French, German, and Spanish) have been acquired by means other than college courses, students can receive 4-20 lower-division credits with a letter grade by completing a course in that language at a higher level than the credits to be acquired. This course needs to be completed with a grade of B or better.

These credits will count as transfer credits. They will not count toward a certain semester or the USU GPA, but will be counted into the cumulative GPA. Please contact the department for further details.

Technology Assisted Language Center

The department operates a technology assisted language center, located in Main 004, for instructional use associated with language classes, and for students desiring additional language practice outside of the classroom. The center includes computer workstations capable of running multimedia applications, as well as audio equipment.

Exchange Programs, Semester Abroad Programs, and Summer Study Abroad Programs

The Department of Languages, Philosophy, and Speech Communication assists students with academic advising for study abroad exchange programs, semester abroad programs, and summer study abroad programs. Students must be in good standing at the University, and it is recommended that the students have some language preparation in order to participate in these programs.

Students desiring to count study abroad credits toward a major or minor in this department must obtain approval for these courses prior to their participation in the study abroad program. For information about Spanish study abroad programs, contact the department office at (435) 797-1209 or visit the Spanish website at: http://www.usu.edu/spanish/sois/index.html

For other study abroad program information, contact the USU Study Abroad Office, Taggart Student Center 313, or visit their website at: http://www.usu.edu/studyabroad

National Honor Societies

Lambda Pi Eta (LPH) is the National Communication Honor Society of the National Communication Association for undergraduate junior and senior communication students. Among the goals of LPH are to recognize, foster, and reward outstanding scholastic achievement; and to provide an opportunity for faculty and students to discuss and exchange ideas about their field of interest.

Sigma Delta Pi (SDP) is the National Collegiate Hispanic Honor Society of the American Association of Teachers of Spanish and Portuguese for students studying Spanish. Among the goals of SDP are to honor those who attain excellence in the study of the Spanish language and of the literature and culture of the Spanish-speaking peoples, and to encourage college and university students to acquire a greater interest in and a deeper understanding of Hispanic culture.

Phi Sigma Iota (PSI) is an international language honor society for juniors, seniors, and graduate students who excel in foreign language. PSI promotes international communication and understanding, as well as a sentiment of unity among nations. Phi Sigma Iota helps members further their training through scholarship and graduation honors. The society also promotes trips abroad.

Philosophy

Philosophy at USU reflects the ideals of the liberal arts in encouraging the respect for truth without promoting dogmatism, and in offering the opportunity for students to increase their self-understanding at the same time as they increase their knowledge of the world around them.

Philosophy faculty in the Department of Languages, Philosophy, and Speech Communication teach courses leading to an undergraduate major and a minor in philosophy. The mission of the Philosophy program at Utah State University is to provide a high-quality education leading to an understanding of the major areas of inquiry represented within the discipline of philosophy. Coursework emphasizes the areas of the history of philosophy, logic, ethical theory and applied ethics, and metaphysics and epistemology. The curriculum is designed to meet a wide variety of student interests in pursuing a major in philosophy. It provides a rigorous foundation for students intending to further their education in law school or graduate school in philosophy, and it also provides an exciting and challenging education for those students who enjoy thinking about ideas for their own sake. Coursework is also designed to enrich the education of students majoring in other subjects, by providing them with opportunities to gain an understanding of philosophical perspectives on and philosophical foundations of their chosen fields.

Grade Point Average to Declare a Major or Minor........2.5 Career GPA
Grade Point Average to Graduate with Major or Minor...2.5 Career GPA
and 2.5 GPA within Major/Minor Classes
Notes:
Courses for Philosophy Majors and Minors require a minimum grade of C- or better.
Bachelor of Arts (BA) degree additional requirements include two years of language, or same as University Requirement (see Bachelor of Arts section, page 60).
Bachelor of Science (BS) degree additional requirements include PHIL 2200 and 4310 and 12 credits of Math and/or Science.

Course Requirements

Bachelor of Arts in Philosophy
(30 credits) (2.5 GPA)

All philosophy majors must complete 30 credits of philosophy. Up to 6 pass/fail credits in philosophy courses may be applied toward the philosophy major. PHIL 3100, 3120, 4300, and 4400 may not be taken on a pass/fail basis for the philosophy major. The requirements are distributed as follows:

A. Required Courses (21 credits)

PHIL 1120 (BHU) Social Ethics (F) (3 cr) or
PHIL 2400 (BHU) Ethics (Sp) (3 cr) ............................................. 3
PHIL 1200 (BHU) Practical Logic (Sp) (3 cr) or
PHIL 2290 (CI) Deductive Logic (Sp) (3 cr) ............................................. 3
PHIL 3100 (CI) Ancient Philosophy (F) ............................................. 3
PHIL 3120 (CI) Early Modern Philosophy (F) ............................................. 3

Choose one course from the following:

PHIL 3500 Medical Ethics (F) ...................................................... 3
PHIL 3510 Environmental Ethics (F,Sp) ............................................. 3
PHIL 3520 Business Ethics (Sp) ...................................................... 3
PHIL 4500 Contemporary Ethical Theory (Sp) ............................................. 3
PHIL 4530 (DSC) Ethics and Biotechnology (Sp) ............................................. 3
PHIL 4540 (DHA) Human Values and Information Technology (Sp) ............................................. 3
PHIL 4610 (DHA) Social and Political Philosophy (Sp) ............................................. 3

Choose two of the following courses, at least one of which must be PHIL 4300 or 4400:

PHIL 4300 (DHA) Epistemology (F) ...................................................... 3
PHIL 4310 (DHA) Philosophy of Science (Sp) ............................................. 3
PHIL 4400 Metaphysics (F) ...................................................... 3
PHIL 4410 (DHA) Philosophy of Mind (F) ...................................................... 3
PHIL 4420 (DHA) Philosophy of Language (Sp) ...................................................... 3

B. Elective Courses (9 credits)

Choose three other upper-division philosophy courses from the following list of courses:

PHIL 3110 Medieval Philosophy (Sp) ...................................................... 3
PHIL 3150 Kant and His Successors (Sp) ...................................................... 3
PHIL 3160 (CI) Contemporary Philosophy (F) ...................................................... 3
PHIL 3180 (CI) Contemporary European Philosophy (F) ...................................................... 3
PHIL 3500 Medical Ethics (F) ...................................................... 3
PHIL 3510 (DHA) Environmental Ethics (F,Sp) ...................................................... 3
PHIL 3520 (DHA) Business Ethics (Sp) ...................................................... 3
PHIL 3700 Philosophy of Religion (F) ...................................................... 3
PHIL 3710 Philosophies of East Asia (F) ...................................................... 3
PHIL 3720 Philosophical Theology After Kant (F) ...................................................... 3
PHIL 3730 (CI) Philosophy of the New Testament (Sp) ...................................................... 3
PHIL 3750 Religion and Science in the Modern World (Sp) ...................................................... 3
PHIL 3800 (DHA) Philosophy in Literature (F) ...................................................... 3
PHIL 3810 (DHA) Aesthetics (Sp) ...................................................... 3
PHIL 4300 (DHA) Epistemology (F) ...................................................... 3
PHIL 4310 (DHA) Philosophy of Science (Sp) ...................................................... 3
PHIL 4320 (DHA) History of Scientific Thought (Sp) ...................................................... 3
PHIL 4400 Metaphysics (F) ...................................................... 3

PHIL 4410 (DHA) Philosophy of Mind (F) ...................................................... 3
PHIL 4420 Metaphysics of Language (Sp) ...................................................... 3
PHIL 4500 Contemporary Ethical Theory (Sp) ...................................................... 3
PHIL 4530 (DSC) Ethics and Biotechnology (Sp) ...................................................... 3
PHIL 4540 (DHA) Human Values and Information Technology (Sp) ...................................................... 3
PHIL 4610 (DHA) Social and Political Philosophy (Sp) ...................................................... 3
PHIL 4900 Special Topics (F,Sp) ...................................................... 3
PHIL 4910 Readings and Research (F,Sp) ...................................................... 1-4
PHIL 4920H Senior Honors Seminar (Sp) ...................................................... 1
PHIL 4930H Senior Honors Thesis (F,Sp,Su) ...................................................... 1-4
PHIL 4990 Philosophy Seminar (Sp) ...................................................... 3
PHIL 5200 Symbolic Logic (Sp) ...................................................... 3
PHIL 5310 Ethics and the Environment (F) ...................................................... 3
PHIL 5600 Legal Ethics (F) ...................................................... 3

In addition, other University Studies courses, as required by the University, must be completed. To receive a Bachelor of Arts (BA) degree, students must also complete the foreign language requirement.

Bachelor of Science in Philosophy
(30 credits) (2.5 GPA)

All philosophy majors must complete 30 credits of philosophy. Up to 6 pass/fail credits in philosophy courses may be applied toward the philosophy major. PHIL 3100, 3120, 4300, and 4400 may not be taken on a pass/fail basis for the philosophy major.

The requirements for the Bachelor of Science (BS) in Philosophy are the same as those for the Bachelor of Arts (BA), with these additional limitations: (1) no foreign language instruction is necessary, (2) PHIL 2200 and 4310 must be taken, and (3) 12 credits in Mathematics and/or Science courses beyond the University Studies requirements must be completed.

Sample Four-year Plan for Philosophy Major

Minimum GPA for Admission: 2.5, Career
Minimum GPA for Graduation: 2.5, major courses; 2.5, USU; 2.5, Career
Minimum Grade Accepted: C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (30 credits)

Fall Semester (15 credits)

ENGL 1010 (CL1) Introduction to Writing: Academic Prose ...................................................... 3
PHIL 1200 (BHU) Practical Logic ...................................................... 3
University Studies Breadth courses ...................................................... 6

Degree Requirement (BS or BA) course ...................................................... 3
Department of Languages, Philosophy, and Speech Communication

Spring Semester (15 credits)
- Quantitative Literacy (QL) course .......................................................... 3
- University Studies Breadth courses ..................................................... 6
- Degree Requirement (BS or BA) course ............................................ 3
- Elective course(s) ............................................................................. 3

Complete the CIL exams by the end of the Freshman Year.

Sophomore Year (30 credits)

Fall Semester (15 credits)
- ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode .......................................................... 3
- PHIL 1120 (BHU) Social Ethics (3 cr) or PHIL 2400 (BHU) Ethics (3 cr) .......................................................... 3
- PHIL 2200 (QI) Deductive Logic .......................................................... 3
- Degree Requirement (BS or BA) course ............................................ 3
- Elective course(s) ............................................................................. 3

Spring Semester (15 credits)
- PHIL upper-division courses 32 .......................................................... 6
- Degree Requirement (BS or BA) course ............................................ 3
- Depth Life and Physical Sciences (DSC) course ............................... 3
- Depth Social Sciences (DSS) course .................................................. 3

Junior Year (30 credits)

Fall Semester (15 credits)
- PHIL upper-division courses 32 .......................................................... 6
- Elective courses .............................................................................. 9

Spring Semester (15 credits)
- PHIL upper-division courses 32 .......................................................... 6
- Elective courses .............................................................................. 9

Senior Year (30 credits)

Fall Semester (15 credits)
- PHIL upper-division course 32 .......................................................... 3
- Upper-division elective courses .......................................................... 10
- Elective courses ............................................................................. 2

Spring Semester (15 credits)
- Upper-division elective course .......................................................... 3
- Elective courses ............................................................................. 12

32 These courses should be selected from the upper-division philosophy courses (numbered 3000 or higher) shown under A. Required Courses and B. Elective Courses on page 376.

Philosophy Minor (18 credits) (2.5 GPA)
A minor in philosophy may be obtained by completing six philosophy courses, at least four of which must be at the upper-division level. Up to 3 pass/fail credits in philosophy courses may be applied toward the philosophy minor.

Speech Communication

Speech Communication has been taught continuously at USU almost from the University’s founding in 1888. Speech Communication faculty in the Department of Languages, Philosophy, and Speech Communication teach courses leading to a Bachelor of Arts or Bachelor of Science degree in Speech, as well as in Organizational Communication and Speech Communication Teaching.

This major focuses on how people communicate to create meanings across a wide range of contexts, including interactions that occur in personal relationships and public interactions, with those from other cultures, and with those in business and other applied settings. Students learn to think critically about the messages they receive and to develop skills promoting the understanding and practice of effective and ethical communication behaviors.

Students majoring in speech are encouraged to earn a BA degree by completing two years of study in a foreign language. This broadens cultural and social awareness and can increase one’s understanding of the nature of language in general.

Admission to the speech major will be limited to 25 students each year. Admission decisions will be based on (1) academic record, (2) realistic career or professional study objective, (3) ability of this program to prepare the student for intended career, (4) satisfactory speaking and writing competencies, and (5) motivation and creativity demonstrated by class performance, work experience, volunteer activities, and other means offered by the student during the application process.

Students not admitted may apply the following year. If not admitted on the second application, the student will be permitted to complete a minor, but will not be considered again for the major.

To obtain guidelines for applying to the speech major, contact the Department of Languages, Philosophy, and Speech Communication.

The minor program in Organizational Communication is designed for students who seek communication and human relations competencies, an understanding of human communication behavior, and the critical thinking skills required for success in a variety of careers.

The course of study leading to a minor in Speech Communication Teaching is designed to develop the communication competencies and the understanding of communication processes and theory necessary for effective high school speech communication instruction. Prior to student teaching, the program features practicum experience in which students learn how to critique and coach speech communication students.

Minimum Departmental Requirements

Total Credits:
- Speech Major .......................................................... 30
- Organizational Communication Minor ...................................... 15
- Speech Communication Teaching Minor .................................. 19

Grade Point Average to Declare a Major or Minor .................. 2.5 Career GPA
Grade Point Average to Graduate with Major or Minor ... 2.0 Career GPA and 2.5 GPA within Major/Minor Classes
Department of Languages, Philosophy, and Speech Communication

Course Requirements

Speech Major (30 credits) (2.5 GPA in major classes)
As many as 15 credits completed at other colleges or universities may be used to partially satisfy these requirements. For more information, students should contact their advisor. Students must earn an overall GPA of at least 2.5 in all classes applied toward the major.

A. Communication Core (6 credits)
SPCH 1020 (CI) Public Speaking (F,Sp) .......................... 3
SPCH 2110 (CI) Interpersonal Communication (F,Sp) ......... 3

B. Senior Year Capstone Course (3 credits)
This course, which is offered spring semester only, must be taken during the student’s senior year.

SPCH 5100 (CI) Theories of Speech Communication (Sp) ......... 3

C. Organizational Communication Theory (9-12 credits)
SPCH 3250 (CI) Organizational Communication (F) ............. 3

Elective course(s) ....................................................... 2

See sections C. Organizational Communication Theory and D. Organizational Communication Application for approved courses (shown on this page).

Speech Communication Minor Programs

Organizational Communication Minor (15 credits) (2.5 GPA)
As many as 6 credits completed at other colleges or universities may be used to partially satisfy these requirements. For more information, students should contact their advisor. Students must earn an overall GPA of at least 2.5 in all classes applied toward the minor.
A. Required Courses (6 credits)
SPCH 1020 (CI) Public Speaking (F,Sp) (3 cr) or
SPCH 2110 (CI) Interpersonal Communication (F,Sp) (3 cr)..............3
SPCH 3250 (CI) Organizational Communication (F).......................3

B. Elective Courses (9 credits)
In consultation with a program advisor, select 9 credits from courses having the SPCH prefix. Of these 9 credits, at least 3 credits must be completed in a course offered at the 4000 or 5000 level.

Speech Communication Minor—Teaching Emphasis (19 credits) (2.5 GPA)

Note: The following requirements only specify courses offered by the Department of Languages, Philosophy, and Speech Communication. To be licensed to teach in the Utah public secondary school system, students with a teaching emphasis must also complete an approved teaching major and STEP courses required by the Department of Secondary Education. SPCH 3370 and either SPCH 3300 or 4300 are part of the STEP requirements. For more information, please contact the Department of Secondary Education, Education Building 330, or review the supplementary section, entitled Secondary Teacher Education Program (STEP) Level Outline on page 374. Information is also provided on the Web at:
http://secondaryeducation.usu.edu/cs_admission.php

Also Note: SPCH 1020, 2110, and 3000 should be completed prior to enrollment in the 4000- and 5000-level courses. A minimum grade of C- is required in each of these classes.

Speech Communication Courses (19 credits)
SPCH 1020 (CI) Public Speaking (F,Sp) ........................................3
SPCH 2110 (CI) Interpersonal Communication (F,Sp) .......................3
SPCH 2270 Argumentation and Debate (F) .................................3
SPCH 3000 Speech Communication Teaching Practicum (Sp) ..........1
SPCH 5100 (CI) Theories of Speech Communication (Sp) .............3
SPCH 5280 Communication Education Theory (Sp) ...........3
SPCH 3330 (DSS) Intercultural Communication (F) (3 cr) or
SPCH 5090 Small Group Theory (Sp) (3 cr) ..............................3

To fulfill the Secondary Teacher Education Program (STEP) requirements, students should complete SPCH 3300, 4300, and 5370.

Speech Communication Course Descriptions
Speech Communication (SPCH), pages 717-718

Languages, Philosophy, and Speech Communication Faculty

Professors
Bradford "J" Hall, speech communication
Charles W. Johnson, philosophy of mind, Wittgenstein, logic, philosophical methods
John E. Lackstrom, linguistics, Spanish applied linguistics, TESL
Mark D. Larsen, Latin American literature, computer applications in languages
Kent E. Robson, ethics, philosophy of language, history of philosophy, philosophy of science, philosophy of religion

John S. Seiter, interpersonal communication, intercultural relations, social influence
Richard Sherlock, medical and environmental ethics, ethical theory, ethical issues in genetics, political philosophy, philosophy of religion

Professors Emeritus
Lynn R. Eliason, 19th century Russian and German novels, Russian culture
Hans K. Mussler, German literature, Lessing, enlightenment, translation, teaching methodology
Alfred N. Smith, Jr., French, foreign language education, cross-cultural studies

Associate Professors
M. Isela Chiu, Spanish, Portuguese, Latin American literature
María-de Jesús Cordero, colonial Spanish-American literature
Charlie Huennemann, history of modern philosophy, Kant, metaphysics
Harold J. Kinzer, organizational communication
Taira Koybaeva, Russian, Linguistics, intercultural relationships in business and politics
Jennifer A. Peeples, environmental rhetoric
Renate Posthoven, German language and literature, contemporary culture and film
J. P. Spicer-Escalante, 19th century Latin American literature
Gordon Steinhoff, philosophy of science, logic, metaphysics
Felix W. Twersar, 20th century Austrian literature

Associate Professors Emeritus
Jerry L. Benbow, Peninsular Spanish literature and grammar
Lynne H. Goodhart, 20th century French poetry, women in literature
Ilona Jappinen, German language, literature and culture, Nietzsche expressionism
Gordon E. Porter, Spanish, Spanish literature, Portuguese
Norman R. Savole, contemporary French culture, contemporary French detective fiction
Janet C. Stock, French, business French, 20th century French literature, Proust

Assistant Professors
Javier Domínguez-Garcia, Spanish medieval and golden age
Susan J. Dudash, late medieval French literature
Sarah Gordon, medieval French
Cacilda Rego, Portuguese
Xenia Srebrianski Harwell, German and Russian literature
Maria Luisa Spicer-Escalante, Hispanic applied linguistics

Visiting Assistant Professor
Brian McInnis, German

Assistant Professor Emeritus
Valentine Suprunowicz, Russian literature

Principal Lecturer Emeritus
Viva L. Lynn, Spanish literature

Lecturers
Karín de Jonge-Kannan, second language acquisition
Annie Kim, Korean, second language acquisition, Asian culture
Kevin L. Krogh, Spanish
Atsuko O. Neely, Japanese, second language acquisition
Jilda Yap, second language teaching
Latin American Studies Minor

Coordination:

M. Isela Chiu-Olivares, Associate Professor of Spanish and Portuguese, Department of Languages, Philosophy, and Speech Communication, isela@cc.usu.edu
William L. Furlong, Professor, Department of Political Science, bill.furlong@usu.edu
Bonnie Glass-Coffin, Associate Professor, Department of Sociology, Social Work and Anthropology, glasscob@cc.usu.edu
James Sanders, Assistant Professor, History Department, jsanders@hass.usu.edu
J.P. Spicer-Escalante, Associate Professor of Spanish, Department of Languages, Philosophy, and Speech Communication, jpspicer@cc.usu.edu

The Latin American Studies minor, an interdepartmental program within the College of Humanities, Arts, and Social Sciences, provides students with an interdisciplinary and rigorous introduction to Latin America. The minor complements existing majors through the expansion and development of regional knowledge and expertise. After completing the minor, students will have demonstrated language competence and enhanced political, economic, cultural, and sociological understanding of the countries and peoples of Latin America.

Admission Requirements

1. USU students in good standing who are enrolled in any major or department and who have a 2.75 minimum GPA qualify for admission to this minor.

2. Transfer students from other institutions need a 2.75 minimum total GPA for admission to this minor.

Latin American Studies Minor Requirements

(18 credits, plus language competency)

A. Language Requirement
A minimum of two years (16 credits or four semesters) of Introductory Spanish (SPAN 1010, 1020, 2010, and 2020) or Introductory Portuguese (PORT 1010, 1020, 2010, and 2020), or the completion of an equivalent competency exam, is required.

B. Required Course (3 credits)
LATS 2200 Introduction to Latin America (F) .................. 3

C. Electives (15 credits)
Students must choose a minimum of five courses from the following list. The courses must be chosen from at least two different disciplines.

- ANTH 3130 (CI) Peoples of Latin America .................. 3
- ANTH/SOC 5130/8130 Ethnographic Field School (Su) .... 6
- GEOG 4200 (CI) Regional Geography: Latin America (Su) ... 3
- HIST 3620 History of Colonial Latin America ................. 3
- HIST 3630 History of Modern Latin America ................. 3
- HIST 3640 History of Social Movements in Latin America .. 3
- HIST 3650 Caribbean History ..................................... 3
- HIST 3660 History of Mexico ...................................... 3
- POLS 3270 (DSS) Latin American Government and Politics (F) ... 3
- POLS 4450 (CI) United States and Latin America (Sp) ...... 3
- PORT 3570 Brazilian Culture and Civilization (F) .......... 3
- PORT 3630 Survey of Brazilian Literature (Sp) ............ 3
- PORT 3800 Portuguese III Study Abroad (Su) ............. 3
- SPAN 3510 Business Spanish (F,Sp) .......................... 3
- SPAN 3570 (DHA) Latin American Culture and Civilization (Sp) ..... 3
- SPAN 3620 (DHA) Survey of Latin American Literature I (F,Sp) .... 3
- SPAN 3630 (DHA) Survey of Latin American Literature II (F,Sp) ... 3
- SPAN 3800 Spanish III Study Abroad (Su) .................. 1-4
- SPAN 4800 Hispanic Culture and Civilization—Study Abroad (Su) .. 1-4
- SPAN 4910 Topics of Latin American Literature (F,Sp) ...... 3

D. Restricted Electives (3 credits)
Students may choose one course from the following list to count toward their total elective credits.

- ENGL 3300 Period Studies in American Literature: The Mexican Revolution and its Aftermath in the United States (F,Sp) .... 3
- ENGL 5390 (CI) Literature and Gender: Chicana Literature (F,Sp) ... 3
- HIST 3670 Slavery in the Atlantic World ..................... 3
- HIST 4630 The History of Mexican Americans .............. 3
- SOC 4730 Women in International Development (Sp) ........ 3

1Requires a proficiency in Spanish or Portuguese at the 3000 level or above.
2Requires a proficiency in Spanish at the 2000 level or above.

Additional Information

For additional information about the Latin American Studies minor, see the minor requirement sheet, which can be accessed online at: http://www.usu.edu/majorsheets/

Course Description

Latin American Studies (LATS), page 659
Successful completion of the 1020 course level in one language

2. Demonstration of proficiency in foreign languages. Specifically, the BA requirement may be completed in one of the following ways:

1. Successful completion of the Intensive English Language Institute (IELI) program for international students.

Or

2. TOEFL, Michigan, or IELI placement scores high enough to meet the University admission criteria.

Focus of Study

The focus of study for the Liberal Arts major is to help students gain a basic understanding of the development of civilization, including historical and cultural traditions, political institutions and processes, an appreciation of arts and literature, and expanded capacities for critical thought. Four learning goals are identified, each requiring a minimum of 9 credits, for a total of 36 credits.

Students plan a multi-disciplinary academic program providing a focus for study, with emphasis in primarily social sciences, humanities, and arts.

Pre-professional and Elective Credits

Depending on a student's career objectives, a student may take courses leading to further study in medicine, law, business, or other graduate programs, or continue to study in a number of different disciplines.

Sample Four-year Plan for Liberal Arts Major

Minimum GPA for Admission: 2.3, Career
Minimum GPA for Graduation: 2.3, major courses; 2.0, USU
Minimum Grade Accepted: C in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their professional advisor to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (32 credits)

ENGL 1010 (CL1) Introduction to Writing: Academic Prose ........... 3
Foreign Language 1010-level course ........................................... 4
University Studies Breadth courses ......................................... 6
Elective course(s) ................................................................. 3

Spring Semester (16 credits)

Foreign Language 1020-level course ........................................... 4
University Studies Breadth courses ......................................... 6
Quantitative Literacy (QL) course ............................................ 3
Elective course(s) ................................................................. 3

Complete the CIL exams by the end of the Freshman Year.
## Liberal Arts Major

### Sophomore Year (32 credits)
#### Fall Semester (16 credits)
- Goal Three—Arts or Literature Course
- Foreign Language 2010-level course
- ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode
- University Studies Breadth course
- Upper-division elective course(s)

#### Spring Semester (16 credits)
- Goal One—Historical/Cultural Traditions course
- Goal Two—Social Sciences course
- Goal Four—Critical/Ethical Inquiry course
- Foreign Language 2020-level course
- Quantitative Intensive (QI) course

### Junior Year (30 credits)
#### Fall Semester (15 credits)
- University Studies Breadth course
- Goal Two—Social Sciences course
- Goal Four—Critical/Ethical Inquiry course
- Communications Intensive (CI) course
- Upper-division elective course

#### Spring Semester (15 credits)
- Goal One—Historical/Cultural Traditions course
- Goal Three—Arts or Literature course
- Goal Four—Critical/Ethical Inquiry course
- Upper-division elective course
- Liberal Arts "Methods" course

### Senior Year (26 credits)
#### Fall Semester (12 credits)
- Goal One—Historical/Cultural Traditions course
- Depth Social Sciences (DSS) course
- Communications Intensive (CI) course
- Upper-division elective course

#### Spring Semester (14 credits)
- Goal Two—Social Sciences course
- Goal Three—Arts or Literature course
- Depth Life and Physical Sciences (DSC) course
- Upper-division elective courses
- Elective course

---

1. Of the 36 credits required for the major, 18 credits must be completed in upper-division courses numbered 3000 or higher.

### Additional Information
Details of requirements for the Liberal Arts major, as well as a worksheet for students to record their progress, can be found on the major requirement sheet, available from the College of HASS Advising Center, or online at: [http://www.usu.edu/majorsheets/](http://www.usu.edu/majorsheets/)
Department of Management and Human Resources

Department Head: Gaylen N. Chandler
Location: Business 415
Phone: (435) 797-1789
FAX: (435) 797-1091
E-mail: mhr@usu.edu

Undergraduate Advisor:
Lindsey Thurgood, Business 309, (435) 797-2272,
lindsey.thurgood@usu.edu

Graduate Program Director:
Glenn M. McEvoy, Business 807, (435) 797-2375,
glenn.mcevoy@usu.edu

Graduate Program Advisor:
Katherine E. McConkie, Business 809, (435) 797-2360,
katherine.mcconkie@usu.edu

Degrees offered: Bachelor of Science (BS) and Bachelor of Arts (BA) in Entrepreneurship; BS and BA in Human Resource Management; Master of Science (MS) in Human Resources

The department also participates in the College of Business Master of Business Administration (MBA) Degree. A description of the MBA degree and program requirements can be found on pages 202-203. Graduate-level courses offered by the department are included in the plans of study of graduate students in a wide variety of disciplines. Students can specialize in Entrepreneurship or Human Resource Management in the on-campus MBA program.

Undergraduate Programs

Objectives

The programs in the Department of Management and Human Resources are designed to prepare students for administrative and leadership positions in business, government, and other institutions. Specialized training is provided in Entrepreneurship and Human Resource Management, as well as training directed at understanding the broader aspects of business as it functions within a national and international environment.

Entrepreneurship focuses on the development of entrepreneurial and leadership capabilities. These include recognizing viable business opportunities and developing business concepts that allow firms to take advantage of unique competencies and capabilities. In addition, there is substantial emphasis on the acquisition and allocation of resources, as well as on organizing, leading, and empowering people.

Human Resource Management deals with those processes which provide, develop, and maintain a productive workforce. Subject areas include recruiting employees, determining what tasks need to be performed, placing the right person in the right position, determining fair benefits and compensation, evaluating performance, determining current and future employment needs, training and development, labor-management relations, and following legal/ethical practices in employment.

Departmental Honors

See Honors in Business description in the College of Business section of this catalog (page 114).

Learning Objectives and Assessment

Assessment information for the Management and Human Resources Department can be found online at: http://www.usu.edu/cob/mhr/assessment/index.cfm

College of Business Admission Requirements

All students majoring in entrepreneurship or human resource management must satisfy the College of Business admission requirements, provided on pages 114-115. Academic advising about these requirements is available in the College of Business Career and Education Opportunities Center, Business 309.

All students enrolled at USU are required to satisfy the General Education requirements and the University Studies Depth Education requirements of the University, as described on pages 49-59 of this catalog.

Matriculation Requirement and Transfer Limitation

No more than 15 USU College of Business credits (ACCT, BA, BIS, BUS, MHR), numbered 2000 and above, earned as a nonbusiness major (before acceptance into the College of Business) can be applied to a College of Business degree. More than 15 business credits can be transferred from other accredited institutions. However, additional USU College of Business credits added to previously earned transfer business credits may not exceed a combined total of 15. Furthermore, to earn a bachelor’s degree in a College of Business major, at least 50 percent of the required College of Business credits must be earned from coursework taken from the Utah State University College of Business.

USU Credits and Business Credits

At least 30 of the last 60 semester credits must be taken from Utah State University, at least 20 of which must be completed in upper-division courses, of which at least 10 credits must be completed in courses required by the student’s major. At least 50 percent of the College of Business credits required for a College of Business degree must be taken from the Utah State University College of Business or its departments, which include: School of Accountancy, Business Administration, Economics, Management and Human Resources, and Management Information Systems.

College of Business Core

All majors in the Department of Management and Human Resources must complete the following prerequisite courses and business core courses, in addition to the specific courses listed for the major.

Business majors must take these courses as prerequisite to 3000-, 4000-, and 5000-level courses in the College of Business.

Pre-Business Course Requirements (13 credits)

ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp) ...........................................3
MATH 1100 (QL) Calculus Techniques (F,Sp,Su) ......................3
STAT 2300 (QL) Business Statistics (F,Sp,Su) .........................4
PSY 1010 (BSS) General Psychology (F,Sp,Su) (3 cr) or
SOC 1010 (BSS) Introductory Sociology (F,Sp) (3 cr) ............3
Department of Management and Human Resources

All 3000-, 4000-, and 5000-level courses in the College of Business are restricted to students admitted to the College of Business or another USU major with an overall GPA of at least 2.67 and completion of at least 40 credits.

**College of Business Core (37 credits)**

- ACCT 2010 Survey of Accounting I (F,Sp,Su) ........................................... 3
- ACCT 2020 Survey of Accounting II (F,Sp,Su) ....................................... 3
- BA 3400 (QI) Corporate Finance (F,Sp,Su) ........................................ 3
- BA 3500 Fundamentals of Marketing (F,Sp,Su) .................................... 3
- BA 3700 Operations Management (F,Sp,Su) ...................................... 3
- BIS 2100 Principles of Management Information Systems (F,Sp,Su) .... 3
- BIS 2220 (CI) Business Communication (F,Sp,Su) .............................. 3
- BUS 3250 Discussions With Business Leaders (F,Sp) ....................... 1
- ECON 2010 (BSS) International Economics for Business (F,Sp,Su) .... 3
- ECON 3400 (DSS) International Economics for Business (F,Sp,Su) .... 3
- MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su) ....... 3
- MHR 3110 Managing Organizations and People (F,Sp,Su) ................. 3
- MHR 4890 (CI) Business Strategy in a Global Context (F,Sp,Su) (3 cr) or MHR 4800 (CI) Business Strategy in an Entrepreneurial Context (F,Sp,Su) (3 cr) or
- MHR 4890 (CI) Business Strategy in a Global Context (F,Sp,Su) (3 cr) .................................................. 3

**Requirements for Majors**

**Entrepreneurship (15 credits)**

- MHR 3510 Fundamentals of Entrepreneurship (F) .............................. 3
- MHR 3520 Relationship and Organizational Competencies for Entrepreneurs (Sp) ................................................................. 3
- MHR 3710 Developing Team and Interpersonal Skills (F,Sp) .............. 3
- MHR 3820 International Management (F,Sp) ...................................... 3
- MHR 4510 Senior Seminar in Entrepreneurship (F) ............................ 3

Students completing the Entrepreneurship major requirements must take MHR 4880 as their senior capstone course in the Business Core requirements. Students should also note that MHR 3510 and 3520 must be taken prior to MHR 4510.

**Human Resource Management (15 credits)**

**Required Courses (9 credits)**

- MHR 3710 Developing Team and Interpersonal Skills (F,Sp) .............. 3
- MHR 3820 International Management (F,Sp) ...................................... 3
- MHR 4630 Human Resource Management (F,Sp) .............................. 3

**Elective Courses (select 6 credits)**

Students must complete at least two of the following:

- MHR 3810 (DSS) Employment Law and Policy Development (F,Sp) .................................................. 3
- BIS 4350 Introduction to Training and Development (Sp) (3 cr) or ECON 5660 Training and Organizational Development (Sp) (2 cr) .................................................................................. 2 or 3
- ECON 5680 Labor Economics (Sp) ...................................................... 3
- PUBH 3310 Occupational Health and Safety (F) .................................. 3
- ANTH 3200 (DSS/CI) Perspectives on Race (Sp) ............................... 3
- SOC 3500 Social Psychology (F,Sp) ..................................................... 3
- SPCH 3250 (CI) Organizational Communication (F) (3 cr) or SPCH 3330 (DSS) Intercultural Communication (F) (3 cr) or SPCH 3600 Communication and Conflict (F) (3 cr) ................. 3
- PHIL 3520 (DHA) Business Ethics (Sp) ............................................. 3

**Elective Course Requirements**

Because the University requires a minimum of 120 credits for a bachelor's degree, students will need to take some elective credits. These credits may be chosen from any course (1000-level or above) offered by the University. If a student wants to complete a minor or a dual major in another department, the use of elective credits should be planned carefully with an advisor in the other department.

If a College of Business student elects to take a minor, he or she is encouraged to select one from outside the College of Business.

**Four-Year Degree Plans (8 Semesters)**

Four-year degree plans for majors in the Management and Human Resources Department can be found on pages 385-386 and at:

http://www.usu.edu/cobssc/web/fouryeardegreqplans.htm

**Requirements for Minors**

A minor in Management and a minor in Human Resource Management are available, as outlined below. Any deviation from the programs as outlined must be submitted in writing, with justification for the changes, to the department head for approval. A 2.50 GPA in the minor courses is required.

**Minor in Management**

This minor is for students who expect to work in an organization where they will assume supervisory or management responsibilities. The Management minor consists of a minimum of 12 credits.

**Required:**

- MHR 3110 Managing Organizations and People (F,Sp,Su) ............... 3

**Select three courses from the following:**

- MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su) .... 3
- MHR 3510 Fundamentals of Entrepreneurship (F) .......................... 3
- MHR 3520 Relationship and Organizational Competencies for Entrepreneurs (Sp) ................................................................. 3
- MHR 3710 Developing Team and Interpersonal Skills (F,Sp) ........... 3
- MHR 3810 Employment Law and Policy Development (Prerequisite: MHR 2050) (F,Sp) ............................................................ 3
- MHR 3820 International Management (F,Sp) ................................... 3
- MHR 4510 Senior Seminar in Entrepreneurship (Prerequisites: MHR 3510 and 3520) (F) ............................................................ 3
- MHR 4630 Human Resource Management (F,Sp) .......................... 3
- PHIL 3520 (DHA) Business Ethics (Sp) ......................................... 3
- ECON 5660 Training and Organizational Development (Sp) (2 cr) .................................................................................. 2 or 3
- ECON 5680 Labor Economics (Sp) ...................................................... 3

**Minor in Human Resource Management**

This minor is for students who want to work in any of the human resource functions of an organization. The Human Resource Management minor consists of a minimum of 12 credits.

**Required:**

- MHR 3110 Managing Organizations and People (F,Sp,Su) ............... 3
- MHR 4630 Human Resource Management (F,Sp) .......................... 3

**Select two courses from the following:**

- MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su) .... 3
- MHR 3710 Developing Team and Interpersonal Skills (F,Sp) ........... 3
- MHR 3810 Employment Law and Policy Development (Prerequisite: MHR 2050) (F,Sp) ............................................................ 3
- PHIL 3520 (DHA) Business Ethics (Sp) ......................................... 3
- PHIL 3520 (DHA) Business Ethics (Sp) ......................................... 3
Department of Management and Human Resources

BIS 4350 Introduction to Training and Development (Sp) (3 cr) or
ECON 5660 Training and Organizational Development
(Sp) (2 cr) .............................................................................. 2 or 3
ECON 5680 Labor Economics (Sp) ........................................ 3
PUBH 3310 Occupational Health and Safety (F) .................... 3
ANTH 3200 (DSS/CI) Perspectives on Race (Sp) .................... 3
SOC 3500 Social Psychology (F,Sp) ........................................ 3
SPCH 3250 (CI) Organizational Communication (F) (3 cr) or
SPCH 3330 (DSS) Intercultural Communication (F) (3 cr) or
SPCH 3600 Communication and Conflict (F) (3 cr) .......... 3

Note: An overall GPA of 2.67 and admission into a degree-seeking major are required for enrollment in 3000- or 4000-level courses in the Department of Management and Human Resources.

Graduation Requirements

To be recommended by the department for graduation, majors in the Department of Management and Human Resources must have a grade point average of at least 2.50 in their upper-division College of Business core and major requirement courses, as well as an overall GPA of 2.50. This includes transfer credits. At least fifty percent of the business credits required for a business degree must be taken on the Utah State University campus or at a designated residence center.

Financial Assistance

The Department of Management and Human Resources and the College of Business award scholarships in addition to those available through the University Financial Aid Office. Information and application forms are available from the College of Business Career and Education Opportunities Center, Business 309.

Student Organizations

The department sponsors two student organizations. Membership in the organizations is open to all students, both undergraduate and graduate, who meet the membership requirements.

Collegiate Entrepreneurs’ Association (CEO) is the premier global entrepreneurship network serving more than 500 colleges and universities.

Society for Human Resource Management (SHRM) is the professional Human Resource Management organization co-sponsored by the Bridgepiner Chapter of SHRM.

Additional Information

A major requirement sheet, which includes further information about career opportunities and course requirements for the majors and minors in the Management and Human Resources Department, can be found online at: http://www.usu.edu/majorsheets/

Further information about undergraduate programs in the College of Business can be obtained from the Career and Education Opportunities Center, Business 309, or found on the Web at: http://www.usu.edu/cobceo

Four-Year Degree Plans (8 Semesters)

The following are suggested four-year plans for majors offered by the Department of Management and Human Resources.

Suggested Four-year Course of Study for Entrepreneurship Major

The following curriculum is required for the BS degree in entrepreneurship. Students enrolled in the entrepreneurship major should consult with their advisor to determine which breadth, depth, and elective courses they should complete. Each student should also consult with his or her advisor to develop an individualized plan of study that is applicable to his or her own interests.

Freshman Year (30 credits)

Fall Semester (15 credits)
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles .................................................. 3
MATH 1050 (QL) College Algebra ................................................. 4
USU 1010 University Connections .................................................. 2
OSS 1400 Microcomputer Applications (3 cr) or
Passing scores on Computer and Information Literacy (CIL) exams (0 cr) .......................................................... 0-3
(Note: Although OSS 1400 includes the CIL exams, the CIL requirement is met only by passing all six exams, not simply passing OSS 1400.)
Breath Creative Arts (BCA) course 1 ............................................. 3
Elective course(s) 2 ................................................................... 0-3

Spring Semester (15 credits)
ECON 2010 (BSS) Introduction to Microeconomics .............. 3
ENGL 1010 (CL) Introduction to Writing: Academic Prose ....... 3
MATH 1100 (QL) Calculus Techniques ........................................ 3
PSY 1010 (BSS) General Psychology (3 cr) or
SOC 1010 (BSS) Introductory Sociology (3 cr) ......................... 3
Breath Humanities (BHU) course 1 ............................................. 3

Sophomore Year (31 credits)

Fall Semester (16 credits)
ACCT 2010 Survey of Accounting I .......................................... 3
BIS 2100 Principles of Management Information Systems ....... 3
MHR 2050 Legal and Ethical Environment of Business ...... 3

- Elective courses .............................................................................. 6

Graduate Programs
Master of Science in Human Resources (MS HR)

Objectives
The MS in Human Resources degree prepares students for professional careers in the field of Human Resource Management. The instruction is designed to teach students to assume a strategic role in helping organizations gain competitive advantage by building employee commitment, competence, and effectiveness. Required subject areas include human resource planning, recruiting, performance management, selection, placement, compensation and benefits, career planning, training and organizational development, labor and employee relations, ethical/legal employment practices, statistical methods, and program evaluation.

Admission Requirements
See Admission Procedures on pages 101-102. Students are required to submit scores on the Graduate Management Admissions Test (GMAT) or the Graduate Record Examination (GRE). Prospective students may request information on the expected test performance standards for acceptance. Applicants are expected to have strong written and oral communication skills.

Students without sufficient relevant work experience are required to complete an approved internship. The executive in residence in the MHR Department and/or the MS in Human Resources
steering committee will serve as facilitators to help secure internship opportunities. The Human Resource Certification Institute (HRCI) exam will be included as part of coursework.

Students are expected to be admitted to the program as matriculated students before taking coursework leading to the degree.

**Degree Requirements**

Students are held responsible for meeting requirements as outlined below. It is the student’s responsibility to be aware of all requirements and initiate the resolution of apparent inconsistencies.

The typical degree option is Plan C, which includes coursework to meet the degree requirements.

The MS in Human Resources degree requires a minimum of 36 credits beyond the Business Core taken as part of an AACSB-International accredited undergraduate business degree. The total number of credits is typically 50 for students without an undergraduate business degree. See *Accelerated Business Core* (in Master of Business Administration section, page 202) for information about satisfying the Business Core requirements. Coursework beyond the Business Core includes MHR 6310, 6330; MHR 6510 or 6680; MHR 6550, 6620, 6630, 6650, 6670, 6690, 6760; BUS 6250; and one 3-credit elective approved by the steering committee. Students may substitute MHR 6900 for BUS 6250 (Graduate Internship) on approval of the MS in Human Resources steering committee. Students with an undergraduate degree from an AACSB-International accredited business school will not be required to take the business core. Students will take the HRCI (Human Resource Certification Institute) exam as part of coursework.

Additional information about the MS in Human Resources degree may be obtained by contacting the Department of Management and Human Resources.

**Financial Assistance and Assistantships**

A limited number of graduate assistantships, scholarships, and other departmental awards are provided to outstanding on-campus students on a competitive basis. Acceptance to the program does not guarantee financial assistance. Application forms are available online through the School of Graduate Studies. More information can be found at: [http://www.usu.edu/gradsch/financial/assistantships.cfm](http://www.usu.edu/gradsch/financial/assistantships.cfm)

The deadline for financial aid assistance is March 15.

**Master of Business Administration (MBA)**

The department also participates with other departments in the College of Business in offering the Master of Business Administration (MBA) Degree. A description of the MBA degree and program requirements can be found on pages 202-203 of this catalog.
Department of Management Information Systems

Department Head: John D. Johnson
Location: Business 711
Phone: (435) 797-2342
FAX: (435) 797-2351
E-mail: john.johnson@usu.edu
WWW: http://www.usu.edu/cob/mis/

Undergraduate Advisor:
Peggy Buttars, Business 309, (435) 797-2272, peggy.buttars@usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), and Master of Science (MS) in Management Information Systems; participates in the Interdepartmental Doctor of Philosophy (PhD) in Education and Doctor of Education (EdD) with a specialization in Management Information Systems

Undergraduate emphases: Management Information Systems BS, BA—Technical, Managerial, and Training and Development

Graduate specializations: Management Information Systems MS—Management Information Systems, Training and Development

Undergraduate Programs

Objectives
The Management Information Systems major is designed to prepare individuals for positions as managers in business information systems, including information managers, information supervisors, network managers, worldwide web designers, electronic commerce developers, systems analysts, applications programmers, and systems trainers. The training and development emphasis prepares students to become trainers within business and private industry.

Departmental Honors
See Honors in Business description in the College of Business section of this catalog (page 114).

Learning Objectives and Assessment
Assessment information for the Management Information Systems Department can be found online at:
http://www.usu.edu/cob/mis/assessment/index.cfm

Requirements

College of Business Requirements
All bachelor’s degree students majoring in Management Information Systems must satisfy the College of Business entrance requirements provided on pages 114-115. Academic advising about these requirements is provided by the College of Business Career and Education Opportunities Center, Business 309. Management Information Systems majors must also follow College of Business prebusiness course requirements for admission to a major, detailed on page 115.

Matriculation Requirement and Transfer Limitation
No more than 15 USU College of Business credits (ACCT, BA, BIS, BUS, MHR), numbered 2000 and above, earned as a nonbusiness major (before acceptance into the College of Business) can be applied to a College of Business degree. More than 15 business credits can be transferred from other accredited institutions. However, additional USU College of Business credits added to previously earned transfer business credits may not exceed a combined total of 15. Furthermore, to earn a bachelor’s degree in a College of Business major, at least 50 percent of the required College of Business credits must be earned from coursework taken from the Utah State University College of Business.

USU Credits and Business Credits
At least 30 of the last 60 semester credits must be taken from Utah State University, at least 20 of which must be completed in upper-division courses, of which at least 10 credits must be completed in courses required by the student’s major. At least 50 percent of the College of Business credits required for a College of Business degree must be taken from the Utah State University College of Business or its departments, which include: School of Accountancy, Business Administration, Economics, Management and Human Resources, and Management Information Systems.

Information Systems Programs
Programs in information systems are offered in both the departments of Management Information Systems and Computer Science. The curricula and objectives of the programs differ substantially. Each department’s program is described below.

The Management Information Systems major with a technical, managerial, or training and development emphasis is offered in the Management Information Systems Department, College of Business. The Bachelor of Science or Bachelor of Arts program is designed for students interested in business careers as information specialists, systems analysts, network managers, applications programmers, and information systems managers in business and industry. MIS majors take required courses in analysis and design, Internet management, telecommunications, decision support systems, spreadsheet and database applications, and information systems projects. All graduates are required to complete a common core of business subjects. The College of Business is accredited by AACSB International—The Association to Advance Collegiate Schools of Business. The department also offers a Master of Science in Management Information Systems with an area of emphasis in Management Information Systems.

The Computer Science major with an information systems emphasis is located in the College of Science and is designed for students interested in a career as a computer scientist with a background in information sciences and systems. Majors in this emphasis are trained in all phases of the analysis, design, and implementation of information systems. As part of this emphasis, students also receive training in the theory and application of information. Students select an application area such as Business, Accounting, or Economics. Other application areas can be developed by working closely with an advisor. This program of study leads to a Bachelor of Science, Bachelor of Arts, or Master of Science degree in Computer Science. See pages 229-231 and 233 for additional details.
Requirements for Bachelor's Degree in Management Information Systems

To earn a bachelor’s degree in Management Information Systems, a student must complete the USU requirements for a bachelor’s degree and the following categories of coursework in the College of Business: Pre-Business, College of Business Core, MIS Department Core, and one of three areas of emphasis: technical, managerial, or training and development.

Pre-Business Course Requirements (13 credits)
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp,Su) ................................................. 3
MATH 1100 (QL) Calculus Techniques (F,Sp,Su) ...................... 3
STAT 2300 (QL) Business Statistics (F,Sp,Su) ......................... 4
PSY 1010 (BSS) General Psychology (F,Sp,Su) (3 cr) or
SOC 1010 (BSS) Introductory Sociology (F,Sp) (3 cr) .............. 3

College of Business Core (37 credits)
ACCT 2010 Survey of Accounting I (F,Sp,Su) ......................... 3
ACCT 2020 Survey of Accounting II (F,Sp,Su) ....................... 3
BA 3400 (QI) Corporate Finance (F,Sp,Su) ......................... 3
BA 3500 Fundamentals of Marketing (F,Sp,Su) ..................... 3
BA 3700 Operations Management (F,Sp,Su) ......................... 3
BIS 2100 Principles of Management Information Systems (F,Sp,Su) ... 3
BIS 2200 (CI) Business Communication (F,Sp,Su) .................. 3
BUS 3250 Discussions With Business Leaders (F,Sp) ............... 1
ECON 3010 (BSS) Introduction to Microeconomics (F,Sp) ........ 3
ECON 3400 International Economics for Business (F,Sp,Su) ....... 3
MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su) ... 3
MHR 3110 Managing Organizations and People (F,Sp,Su) .......... 3
MHR 4880 (CI) Business Strategy in an Entrepreneurial Context (F,Sp) (3 cr) or
MHR 4890 (CI) Business Strategy in a Global Context (F,Sp,Su) (3 cr) ................................................................. 3

MIS Department Core Requirements (10 credits)
BIS 3330 Database Management (F,Sp) .................................. 3
BIS 5100 Systems Design and Implementation (F,Sp) .............. 3
BIS 5110 Systems Design Laboratory (must be taken concurrently with BIS 5100) (F,Sp) ......................................................... 1
BUS 4250 Advanced Internship (F,Sp,Su) ............................ 3

Students must select one of the following emphases.

Technical Emphasis (19 credits)
Required Courses (16 credits)
CS 1400 Introduction to Computer Science—CS1 (F,Sp,Su) .......... 3
CS 1405 Introduction to Computer Science—CS1 Lab (take with CS 1400) (F,Sp,Su) .......................................................... 1
CS 1410 (QI) Introduction to Computer Science—CS2 (F,Sp,Su) ... 3
BIS 4100 Information Technology and System Software (F,Sp) ....... 3
BIS 4330 Database Implementation (F,Sp) ............................. 3
BIS 5650 Advanced Website Development (F,Sp) ...................... 3

Elective Course (3 credits)
Choose one course from the following:
BIS 5300 Advanced Data Communications (F,Sp) .................... 3
BIS 5450 Designing Graphical User Interfaces for Electronic Commerce (F,Sp) .......................................................... 3
BIS 5700 Internet Management and Electronic Commerce (F,Sp) .... 3
BIS 5800 Security of Business Information Systems (F,Sp,Su) ........ 3
CS 2420 (QI) Algorithms and Data Structures—CS 3 (F,Sp,Su) .... 3

Managerial Emphasis (18 credits)
Required Courses (12 credits)
BIS 3500 Introduction to Business Applications Programming (F,Sp,Su) ... 3
BIS 5700 Internet Management and Electronic Commerce (F,Sp) ........ 3
BIS 5300 Advanced Data Communications (F,Sp) .................... 3
BIS 5800 Security of Business Information Systems (F) ............... 3

Elective Courses (6 credits)
Choose two courses from the following:
BIS 4100 Information Technology and System Software (F,Sp) ....... 3
BIS 4330 Database Implementation (F,Sp) ............................. 3
BIS 5450 Designing Graphical User Interfaces for Electronic Commerce (F,Sp) .......................................................... 3
BIS 5650 Advanced Website Development (F,Sp) ...................... 3

Training and Development Emphasis (18 credits)
Required Courses (9 credits)
Choose three courses from the following:
BIS 3500 Introduction to Business Applications Programming (F,Sp) ... 3
BIS 5700 Internet Management and Electronic Commerce (F,Sp) ........ 3
BIS 5800 Security of Business Information Systems (F) ............... 3
MHR 3710 Developing Team and Interpersonal Skills (F,Sp) .......... 3
Any 5000-level INST course .................................................. 3

Elective Courses (9 credits)
Choose three courses from the following:
BIS 3500 Introduction to Business Applications Programming (F,Sp) ... 3
BIS 5700 Internet Management and Electronic Commerce (F,Sp) ........ 3
BIS 5800 Security of Business Information Systems (F) ............... 3
MHR 3710 Developing Team and Interpersonal Skills (F,Sp) .......... 3
Any 5000-level INST course .................................................. 3

Four-Year Degree Plans (8 Semesters)
Four-year degree plans for each of the Management Information Systems major emphases can be found on pages 390-392 and at:
http://www.usu.edu/cobssc/web/fouryeardegreeplan.htm

Management Information Systems Minor
(21-22 credits)

A minimum 2.50 GPA is required in all courses counted toward the minor.

Required Courses (15 credits)
ACCT 2010 Survey of Accounting I (F,Sp,Su) ........................ 3
BIS 2100 Principles of Management Information Systems (F,Sp,Su) .......... 3
BIS 3330 Database Management (F,Sp) .................................. 3
BIS 3500 Introduction to Business Applications Programming (F,Sp) ... 3
BIS 4330 Database Implementation (F,Sp) ............................. 3
CS 1400 Introduction to Computer Science—CS 1 (F,Sp,Su) (3 cr) or
CS 3410 (CI/DSC) Algorithm Development: JAVA/Internet (F,Su) (3 cr) .......................................................... 3

Elective Courses (6-7 credits)
Choose two of the following courses:
BIS 4100 Information Technology and System Software (F,Sp) ....... 3
BIS 5700 Internet Management and Electronic Commerce (F,Sp) .... 3
BIS 5800 Security of Business Information Systems (F) ............... 3
CS 1400' Introduction to Computer Science—CS 1 (F,Sp,Su) (3 cr) or
Department of Management Information Systems

CS 3410 (CI/DSC) Algorithm Development:
JAVA/Internet (F,Su) (3 cr) or
CS 3510 (QI/DSC) Algorithm Development:
COBOL/Business (F) (3 cr) ................................................................. 3

1 CS 1400 or 3410 may be chosen as an elective if not taken as a required course for the section above.

Student Organizations

The Department of Management Information Systems sponsors or co-sponsors two student organizations. Each group provides unique experiences that can complement and enrich formal coursework. Leadership development and human relations skills are among the personal attributes enhanced by involvement in the various organization activities.

Association for Computing Machinery (ACM)
ACM, a professional society for the information systems industry, sponsors a student chapter at USU. The goals of ACM are to: (1) provide leadership experiences for undergraduate and graduate management information systems majors; (2) help student members plan their careers and find employment by introducing them to practicing systems professionals; and (3) foster a professional attitude among management information systems majors so that they will contribute to their field.

Society for Information Management (SIM)
SIM is an organization of senior-level IT managers in the industry. Since 1968 SIM has inspired the minds of the most prestigious IT leaders in the industry. Highly regarded as the premier network for IT leadership, SIM is a community of thought leaders who share experiences and rich intellectual capital and who explore future IT direction.

The USU student chapter of SIM is associated with the Utah chapter located in Salt Lake City. The goal of the chapter is to allow students in MIS to interface and network with leaders in the field. Student members become knowledgeable about the opportunities and career paths in the field of technology management.

Additional Information

For more information about requirements for the majors and minors within the Management Information Systems Department, see the major requirement sheets, available from the department, or online at:
http://www.usu.edu/majorsheets/

Four-year Degree Plans (8 semesters)

The following are suggested four-year plans for each emphasis of the Management Information Systems major.

Suggested Four-year Course of Study for Management Information Systems Major, Technical Emphasis
Students enrolled in the management information systems major should consult with their advisor to determine which breadth, depth, and elective courses they should complete. Each student should also consult with his or her advisor to develop an individualized plan of study that is applicable to his or her own interests.

Freshman Year (28 credits)
Fall Semester (13 credits)
OSS 1400 Microcomputer Applications ........................................... 3
MATH 1050 (QL) College Algebra .................................................. 4
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles .................................................. 3
PSY 1010 (BSS) General Psychology (3 cr) or
SOC 1010 (BSS) Introductory Sociology (3 cr) .................................. 3

Spring Semester (15 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .............. 3
ECON 2010 (BSS) Introduction to Microeconomics .......................... 3
MATH 1100 (QL) Calculus Techniques ............................................ 3
University Studies Breadth courses ................................................. 6

Sophomore Year (32 credits)
Fall Semester (16 credits)
ACCT 2020 Survey of Accounting I .................................................. 3
BIS 2100 Principles of Management Information Systems .............. 3
STAT 2300 (QL) Business Statistics .............................................. 3
MHR 2050 Legal and Ethical Environment of Business .................... 3
University Studies Breadth course .................................................... 3

Spring Semester (16 credits)
ACCT 2020 Survey of Accounting II ............................................... 3
BIS 2200 (CI) Business Communication ....................................... 3
ENGL 2010 (CL2) Intermediate Writing:
Research Writing in a Persuasive Mode ......................................... 3
ECON 3400 International Economics for Business ...................... 3
CS 1400 Introduction to Computer Science—CS 1 .......................... 3
CS 1405 Introduction to Computer Science—CS 1 Lab .................... 1

Junior Year (31 credits)
Fall Semester (15 credits)
BA 3400 (QI) Corporate Finance .................................................... 3
BA 3500 Fundamentals of Marketing ............................................ 3
CS 1410 (QI) Introduction to Computer Science—CS 2 ................. 3
University Studies Breadth course ................................................... 3
Elective course(s) ................................................................. 3

Spring Semester (16 credits)
BUS 3250 Discussions With Business Leaders ................................ 1
BIS 3330 Database Management .................................................. 3
BIS 4100 Information Technology Hardware and System Software .... 3
BA 3700 Operations Management ............................................... 3
BIS elective course ............................................................... 3
University Studies Depth course .................................................... 3

Senior Year (29 credits)
Fall Semester (15 credits)
BIS 4330 Database Implementation ................................................ 3
BIS 5650 Advanced Website Development .................................... 3
MHR 3110 Managing Organizations and People ............................. 3
BUS 4250 Advanced Internship .................................................... 3
University Studies Depth course .................................................... 3

Spring Semester (14 credits)
BIS 5100 Systems Design and Implementation .............................. 3
BIS 5110 Systems Design Laboratory .......................................... 1
MHR 4880 (CI) Business Strategy in an
Entrepreneurial Context (3 cr) or
MHR 4890 (CI) Business Strategy in a Global Context (3 cr) ........... 3
Elective courses ..................................................................... 7
Department of Management Information Systems

Note: Students must pass MATH 1050 with a grade of C- or better. Students who do not take OSS 1400 must take an additional 3 credits of electives. Students should apply for College of Business admission during their third semester.

Suggested Four-year Course of Study for Management Information Systems Major, Managerial Emphasis

Students enrolled in the Management Information Systems major should consult with their advisor to determine which breadth, depth, and elective courses they should complete. Each student should also consult with his or her advisor to develop an individualized plan of study that is applicable to his or her own interests.

Freshman Year (28 credits)

Fall Semester (13 credits)
OSS 1400 Microcomputer Applications ............................................. 3
MATH 1050 (QL) College Algebra .................................................... 4
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles ................................................................. 3
PSY 1010 (BSS) General Psychology (3 cr) or
SOC 1010 (BSS) Introductory Sociology (3 cr) ................................ 3

Spring Semester (15 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ............ 3
MATH 1100 (QL) Calculus Techniques ............................................. 4
University Studies Breadth course ..................................................... 3

Sophomore Year (31 credits)

Fall Semester (16 credits)
ACCT 2010 Survey of Accounting I ................................................ 3
STAT 2300 (QL) Business Statistics ............................................... 4
MHR 2050 Legal and Ethical Environment of Business .................. 3
University Studies Breadth course ..................................................... 3

Spring Semester (15 credits)
ACCT 2020 Survey of Accounting II ............................................. 3
BIS 2200 (CI) Business Communication ..................................... 3
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ......................................................... 3

Note: Students must pass MATH 1050 with a grade of C- or better. Students who do not take OSS 1400 must take an additional 3 credits of electives. Students should apply for College of Business admission during their third semester.

Graduate Programs

Master of Science

Students applying for admission to the Master of Science program in Management Information Systems must take the GMAT test. A score at the 40th percentile or better on the GMAT is required for admission. Undergraduate GPA should be 3.2 or above. Meeting minimum requirements does not guarantee admission.

The MS requires a minimum of 33 credits. A minimum of 24 credits of academic work must be in classes numbered 6000 and above. Twelve or more credits should be in the area of specialization. Students with bachelor’s degrees outside of business may be required to complete additional coursework.

Students in the master’s program pursue the Plan C option, where a research paper is completed in a special research class. Those who wish to pursue the Plan A thesis option must have permission from their committee to do so.

All MS degrees in the MIS Department require the following core: BIS 6440 and 6810.

The specialization in Management Information Systems (MIS) is for students who wish to work as systems analysts, application programmers, network managers, information managers, information center managers, and trainers in management information systems.

Students are expected to have a background in management information systems. Required courses are BIS 6120, 6200, 6330, and 6700, in addition to the departmental core. Students who choose the Plan A option must complete 6 credits of BIS 6970. Students may take credits in Management Information Systems, Computer Science, Instructional Technology, Business Administration, Accounting, Economics, or other approved electives to complete the 12 credits of electives required.

The specialization in Training and Development is designed for those who wish to work in training and development in business and industry. Required courses for the Training and Development specialization are BIS 6250, 6350, and 6450, in addition to the departmental core. Students must complete 15 credits of electives chosen from the following list: BIS 6120, 6200, 6330, 6510, 6700, 6800, or others with committee approval.

For a current checklist of requirements, students should contact the departmental graduate advisor.

The USU MS in Management Information Systems is the only master’s program in Management Information Systems in the State of Utah. Graduates are placed in the West and throughout the nation.

Doctor of Philosophy and Doctor of Education

Applicants for admission to the College of Education and Human Services PhD or EdD programs with a specialization in Management Information Systems must take the GRE. Scores on the verbal and quantitative test must be at or above the 40th percentile. No minimum score is required on the analytical section (required by the Educational Testing Service).

The Department of Management Information Systems cooperates with other departments in offering the interdepartmental Doctor of Philosophy (PhD) and Doctor of Education (EdD). The PhD is a research-based degree. The EdD degree is a practitioner’s degree. Both degrees require dissertations. Graduates secure positions teaching business subjects or teaching business-teacher education in colleges and universities. Positions may also be secured in business and industry. Former graduates are currently in various positions in higher education, including higher education administration, and in business and industry.

Additional Information

Specific details about each of the foregoing degree programs are outlined in policy and procedure documents available through the department. All requirements are subject to change; check with the department for current requirements.

Research

Faculty in the Department of Management Information Systems are active in research and scholarly endeavors. Current and published research topics include business communication, international communication, neural networks, genetic algorithms, data mining and management information systems as related to business and
industry, curriculum for business schools, business reengineering, electronic commerce, group decision support systems, microcomputer applications, use of microcomputers in various subjects including accounting and business communications, cooperative education, and other areas related to management information systems.

Financial Assistance and Assistantships
Funds for scholarships are provided through the School of Graduate Studies and administered in the department. Those interested in scholarships should contact the graduate director or the department head.

Each year several high-quality graduate teaching assistants are needed. Those who are interested in teaching assistantships must apply through the department head. They must have had teaching experience or be willing to take teaching methods classes, as well as the School of Graduate Studies-sponsored teaching assistant workshop, prior to receiving an assistantship.

Career Opportunities
Management Information Systems is one of the fastest-growing fields in business and industry. Follow-up studies show that information systems positions pay excellent salaries, and the placement rate of students is almost 100 percent.

Management Information Systems Faculty

Professors
John D. Johnson, management information systems, electronic commerce, neural networks, genetic algorithms communication, data management, computer security
David H. Olsen, management information systems
David J. Paper, management information systems

Professors Emeritus
Dennis J. LaBonty
H. Robert Stocker
William A. Stull
John F. Vinsonhaler

Associate Professors
Jeffrey J. Johnson, management information systems
Robert J. Mills, management information systems

Assistant Professors
Karina Hauser, lean manufacturing, artificial intelligence, and systems analysis and design
Yong Seog Kim, management information systems and data mining
Zsolt Ugray, management information systems, electrical commerce, and optimization

Principal Lecturers
Susan M. Jones, management information systems, business communication, and security management
Marianna P. Larsen, business communication and international business communication
Craig J. Peterson, management information systems, electronic commerce management, information technology, and web design
Dana H. Swensen, business communication

Senior Lecturer and Executive in Residence
Ralph B. "Bernie" Lantz, computer technology, network security, management information systems, computer literacy, software development, and programming languages

Lecturer
Janet Bringhurst, microcomputer applications and business communication

Course Descriptions
Business Information Systems (BIS), pages 581-583
Department of Mathematics and Statistics

Department Head: Russell C. Thompson  
Location: Lund Hall 211  
Phone: (435) 797-2809  
FAX: (435) 797-1822  
E-mail: mathstat@cc.usu.edu

Assistant Department Head:  
Daniel C. Coster, Lund Hall 310, (435) 797-2815,  
coster@math.usu.edu

Undergraduate Program Coordinator:  
Joseph V. Koebe, Lund Hall 301C, (435) 797-2825,  
joe.koebe@usu.edu

Graduate Program Coordinator:  
James Powell, Lund Hall 304, (435) 797-1953,  
jim.powell@usu.edu

Mathematics Education Program Director:  
James S. Cangelosi, Lund Hall 325C, (435) 797-1415,  
jim.cangelosi@usu.edu

Undergraduate Advisors:  
Mathematics:  
Daniel C. Coster, Lund Hall 310, (435) 797-2815,  
coster@math.usu.edu

Statistics:  
Christopher D. Corcoran, Lund Hall 204, (435) 797-4012,  
corcoran@math.usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), and Master of Science (MS) in Mathematics; BS and BA in Mathematics Education; BS in Composite Mathematics-Statistics Education; BS in Composite Mathematics/Statistics; Master of Mathematics (MMath); BS, BA, and MS in Statistics; MS in Industrial Mathematics; Doctor of Philosophy (PhD) in Mathematical Sciences

Graduate specializations: PhD in Mathematical Sciences—College Teaching, Interdisciplinary Studies, Pure and Applied Mathematics, and Statistics

Undergraduate Programs

Objectives

The Department of Mathematics and Statistics offers a variety of programs and courses designed to prepare students for careers in teaching and for positions as mathematicians and statisticians in industry and government. The department also provides service courses for students in many other disciplines and contributes to the University Studies program by providing Quantitative Literacy and Quantitative Intensive classes.

Placement of New Students

Current mathematics ACT/SAT scores, Math Placement Test scores, and Advanced Placement (AP) calculus and statistics scores are used for placement in 1000-level and 2000-level mathematics and statistics courses. A current score is defined as a score from an exam taken within the Math Prerequisite Acceptability Time Limit (MPATL), which is one calendar year or three successive semesters in length, including summer semester. In addition, prerequisite courses taken concurrently or courses that transfer from other institutions taken within the MPATL can be used for advisement and placement in 1000-level and 2000-level courses.

Prerequisites for MATH 1030, 1060, 1100, 1210, and 2020, must be met by the following dates, in order to fall within the MPATL for the listed semester: fall semester—August 15 of the previous year; spring semester—January 1 of the previous year; summer semester—June 1 of the previous year.

New students and students who are registering for a math class at USU for the first time who have a current math ACT score of at least 23 or a current math SAT score of less than 540 (whether current or not) are required to take the Math Placement Test administered by the Department of Mathematics and Statistics. The student’s score on the Math Placement Test will be used to place him or her in the appropriate mathematics or statistics course.

New students and students who are registering for a math class for the first time who have a current math ACT score of at least 23 or a current math SAT score of at least 540 do not need to take the Math Placement Test. However, for each of the courses listed below, one of the following prerequisites, achieved within the MPATL, is required for enrollment.

MATH 1010  
Math ACT test score of 23 or higher  
Math SAT test score of 540 or higher  
Grade of C- or better in MATH 0900  
Satisfactory score on Math Placement Exam

MATH 1030  
Math ACT test score of 23 or higher  
Math SAT test score of 540 or higher  
Grade of C- or better in MATH 1010  
Satisfactory score on Math Placement Exam

MATH 1050  
Math ACT test score of 23 or higher  
Math SAT test score of 540 or higher  
AP Calculus AB test score of 3 or higher  
Grade of C- or better in MATH 1010  
Satisfactory score on Math Placement Exam

MATH 1060  
Math ACT test score of 23 or higher  
Math SAT test score of 540 or higher  
AP Calculus AB test score of 3 or higher  
Grade of C- or better in MATH 1010 or 1050  
Satisfactory score on Math Placement Exam

MATH 1100  
Math ACT test score of 25 or higher  
Math SAT test score of 580 or higher  
Grade of C- or better in MATH 1010 or 1050  
Satisfactory score on Math Placement Exam

MATH 2020  
Math ACT test score of 25 or higher  
Math SAT test score of 580 or higher  
Grade of C- or better in MATH 1010 or 1050  
Satisfactory score on Math Placement Exam

MATH 1210  
Math ACT test score of 27 or higher  
Math SAT test score of 620 or higher  
AP Calculus AB test score of 3 or higher  
Grade of C- or better in MATH 1050 and 1060  
Satisfactory score on Math Placement Exam
Department of Mathematics and Statistics

STAT 1040  
Math ACT test score of 23 or higher  
Math SAT test score of 540 or higher  
Grade of C- or better in MATH 1010  
Satisfactory score on Math Placement Exam  

After a student has registered for MATH 1210 there are no time limits.  

Entering students with current passing scores on AP calculus or statistics exams will be awarded credits as shown below:

Students may opt to take the Math Placement Test through the Department of Mathematics and Statistics to determine if MATH 1100 (Calculus Techniques) or MATH 1210 (Calculus I) is an appropriate place to start.  

The calculus courses MATH 1210, 1220, and 2210 are designed for students in mathematics, the sciences, and engineering. MATH 1100 (Calculus Techniques) is designed primarily for students in business and a few other majors. All students in calculus classes need strong backgrounds in the material covered in MATH 1010 and MATH 1050. In addition, the MATH 1210, 1220, 2210 sequence requires trigonometry (MATH 1060) and a graphics calculator.  

Students with outstanding mathematics records in high school and transfer students with some experience in calculus may wish to consult with a departmental advisor prior to registration.  

Departmental Admission Requirements  

1. New freshmen admitted to USU in good standing qualify for admission to the major.  
2. Transfer students from other institutions need a 2.2 transfer GPA, and students transferring from other USU majors need a 2.0 total GPA for admission to this major in good standing.  
3. Students may be admitted to the Mathematics Education major by satisfying either of the above conditions. However, in order to be admitted to the Secondary Teacher Education Program (STEP), and to graduate from the Mathematics Education major (and minor), students must have a cumulative GPA of at least 3.0 in the equivalent of MATH 1210, 1220, and 2210, and an overall GPA of at least 2.75.  

University Requirements  

All students in the Department of Mathematics and Statistics must satisfy the requirements of USU’s University Studies program, described on pages 49-59 of this catalog.  

College of Science Requirements  

Every bachelor's degree candidate in the College of Science must complete the following coursework or its equivalent:  

1. One year of calculus:  
   MATH 1210 (QL) Calculus I (F,Sp,Su) (4 cr) and  
   MATH 1220 (QL) Calculus II (F,Sp,Su) (4 cr)  
   In some degrees or emphases within degrees, the second semester of calculus may be replaced by STAT 3000. The substitution will be for specific degree programs, not by student choice.  

2. One of the following year-long sequences. The chosen sequence must be outside the student’s major department:  
   BIOL 1610 Biology I (F) (4 cr) and  
   BIOL 1620 (BLS) Biology II (Sp) (4 cr)  
   Or  
   CHEM 1210 Principles of Chemistry I (F,Sp) (4 cr) and  
   CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) (4 cr)  
   Or  
   GEO 1110 (BPS) The Dynamic Earth: Physical Geology (F,Sp) (4 cr) and  
   GEO 3200 (DSC) The Earth Through Time (Sp) (4 cr)  
   Or  
   PHYS 2110 The Physics of Living Systems I (4 cr) and  
   PHYS 2120 (BPS) The Physics of Living Systems II (4 cr)  
   Or  
   PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr)  
   PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr)  

Bachelor of Arts (BA) Degree  

For this degree, students must complete the major requirements for the corresponding BS degree, plus the equivalent of two years of training in a foreign language. The Languages, Philosophy, and Speech Communication Department is responsible for approving the foreign language coursework for this degree.  

Major Requirements  

Major and minor requirements in the Department of Mathematics and Statistics vary from time to time. Students may obtain from the department information about the exact requirements in effect at any given time. All grades for MATH and STAT courses applied toward a departmental major or minor must be C- or better. Major and minor requirements in effect at the beginning of Fall Semester 2007 are given below.  

Mathematics Major (44 credits)  

A. Required Courses (29 credits)

Department of Mathematics and Statistics

B. Core Courses (6 credits)
Select at least two courses (6 credits) from the following:
MATH 5110 Differential Geometry (F).................................3
MATH 5220 Introduction to Analysis II (Sp).........................3
MATH 5270 Complex Variables (Sp) ..................................3
MATH 5310 Introduction to Modern Algebra (Sp) (3 cr) or
MATH 5340 Theory of Linear Algebra (Sp) (3 cr)..................3
MATH 5510 Introduction to Topology (F) ..........................3

C. Elective Courses (9 credits)
Select at least three courses (9 credits) in mathematics courses numbered above 5000, excluding MATH 5570 (Actuarial Math I) and 5580 (Actuarial Math II).

Note: MATH 2250 (Linear Algebra and Differential Equations) may substitute for both MATH 2270 (Linear Algebra) and MATH 2280 (Ordinary Differential Equations); however, MATH 2270 and 2280 are recommended. Several options in this major exist (e.g., Actuarial Science and Computational Mathematics). Contact the Mathematics and Statistics Department for details.

Suggested Four-year Course of Study
for Mathematics Major
The suggested schedule shown below should be used in conjunction with the major requirement sheet.

Freshman Year (28-34 credits)
Fall Semester (14-17 credits)
MATH 1210 (QL) Calculus I .............................................4
College of Science required course .....................................4
University Studies courses .................................................6-9

Spring Semester (14-17 credits)
MATH 1220 (QL) Calculus II .............................................4
College of Science required course .....................................4
University Studies courses .................................................6-9

Sophomore Year (30-32 credits)
Fall Semester (15-16 credits)
MATH 2210 (QL) Multivariable Calculus ..........................3
MATH 2250 (QI) Linear Algebra and Differential Equations (4 cr) or
MATH 2270 (QI) Linear Algebra (3 cr) .............................3 or 4
University Studies courses .................................................9

Spring Semester (15-16 credits)
MATH 2250 (QI) Linear Algebra and Differential Equations (4 cr) or
MATH 2280 (QI) Ordinary Differential Equations (3 cr) ........3 or 4
MATH 5710 Introduction to Probability ..............................3
University Studies or elective courses .................................3

Junior Year (30 credits)
Fall Semester (15 credits)
MATH 4200 (CI) Foundations of Analysis ..........................3
MATH 4310 (CI) Introduction to Algebraic Structures ..........3
MATH core or elective course not requiring MATH 4200 .....3
University Studies courses .................................................6

Spring Semester (15 credits)
MATH core or elective courses ..........................................6
University Studies courses .................................................6

Senior Year (24-30 credits)
Fall Semester (12-15 credits)
MATH 5210 Introduction to Analysis I ..............................3
MATH core or elective courses ..........................................3-6
University Studies Depth or elective courses .......................6

Spring Semester (12-15 credits)
MATH core or elective courses ..........................................3-6
University Studies or elective courses ..............................9

Mathematics Education Major (71 credits)
A. Mathematics and Statistics Courses (39 credits)
STAT 1040 (QL) Introduction to Statistics (F,Sp,Su) .........3
MATH 1210 (QL) Calculus I (F,Sp,Su) ...............................3
MATH 1220 (QL) Calculus II (F,Sp,Su) .............................4
MATH 2210 (QI) Multivariable Calculus (F,Sp,Su) ..........3
MATH 2250 (QI) Linear Algebra and Differential Equations (F,Sp,Su) ........4
MATH 3110 Modern Geometry (Sp) .................................3
MATH 4200 (CI) Foundations of Analysis (F,Sp) .............3
MATH 4310 (CI) Introduction to Algebraic Structures (F,Sp) ....3
MATH 4400 History of Mathematics and Number Theory (Sp) ....3
MATH 4620 Computer Aided Math for Secondary Math Teachers (F) ....3
MATH 5500 Capstone Mathematics and Statistics for Teachers (F) ....3
MATH 5710 Introduction to Probability (F,Sp) .................3

B. Secondary Teacher Education Program (STEP) (31 credits)
Level 1
SCED 3100 Motivation and Classroom Management (F,Sp) ....3
SCED 3210 (CI/DSS) Educational and Multicultural Foundations
(F,Sp) ........................................................................3
SCED 3210 (CI/DSS) Teaching Methods in Minor course'........3
Clinical Experience course' .............................................1

Level 2
SPED 4000 Education of Exceptional Individuals
(may be taken anytime) (F,Sp,Su) ...................................2
SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) ....3
SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) ....3
MATH 4300 School Laboratory for Mathematics Teachers Level II
(F,Sp) ........................................................................1

Level 3
SCED 4500 Methods of Secondary School Mathematics Teaching
(F,Sp) ........................................................................3

Suggested Four-year Course of Study
for Mathematics Education Major
The suggested schedule shown below should be used in conjunction with the major requirement sheet. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

Utah State University 2007-2009 General Catalog
### Department of Mathematics and Statistics

#### Freshman Year (28-34 credits)

**Fall Semester (14-17 credits)**
- STAT 1040 (QL) Introduction to Statistics ........................................ 3
- MATH 1210 (QL) Calculus I ............................................................. 4
- College of Science required course ............................................. 4
- University Studies course(s) ....................................................... 3-6

**Spring Semester (14-17 credits)**
- MATH 1220 (QL) Calculus II ....................................................... 4
- College of Science required course ............................................. 4
- University Studies courses ......................................................... 6-9

#### Sophomore Year (28-31 credits)

**Fall Semester (13-16 credits)**
- MATH 2210 (QI) Multivariable Calculus ....................................... 3
- MATH 2250 (QI) Linear Algebra and Differential Equations .......... 4
- University Studies and teaching minor courses ............................ 6-9

**Spring Semester (15 credits)**
- MATH 3110 Modern Geometry .................................................... 3
- MATH 4200 (CI) Foundations of Analysis ..................................... 3
- MATH 4310 (CI) Introduction to Algebraic Structures .................... 3
- MATH 5710 Introduction to Probability ....................................... 3
- University Studies or teaching minor course ............................... 3

#### Junior Year (31 credits)

**Fall Semester (15 credits)**
- MATH 4620 Computer Aided Math for Secondary Math Teachers .... 3
- MATH 5500 Capstone Mathematics and Statistics for Teachers ....... 3
- University Studies and teaching minor courses ........................... 9

**Spring Semester (16 credits)**
- SCED 3100 Motivation and Classroom Management .................... 3
- SCED 3210 (CI/DSS) Educational and Multicultural Foundations .... 3
- MATH 4400 History of Mathematics and Number Theory ............ 3
- Teaching Methods in Minor course 1
- Clinical Experience course 2
- University Studies or teaching minor course ............................... 3

#### Senior Year (29 credits)

**Fall Semester (17 credits)**
- SPED 4000 Education of Exceptional Individuals ...................... 2
- SCED 4200 (CI) Reading, Writing, and Technology ..................... 3
- SCED 4210 Cognition and Evaluation of Student Learning .......... 3
- MATH 4300 School Laboratory for Mathematics Teachers Level II .... 1
- MATH 4500 Methods of Secondary School Mathematics Teaching ...... 3
- University Studies or teaching minor courses ............................. 5

**Spring Semester (12 credits)**
- SCED 5500 Student Teaching Seminar ........................................ 2
- SCED 5630 Student Teaching in Secondary Schools ...................... 10

1Teaching Methods in Minor courses are taught in various departments and have various prefixes and course numbers.
2Clinical Experience courses are taught in various departments and have various prefixes. These courses generally have a course number of 3330.

### Composite Mathematics-Statistics Education Major (79-81 credits)

**A. Mathematics and Statistics Courses (45-47 credits)**
- MATH 1210 (QL) Calculus I (F,Sp,Su) ........................................ 4
- MATH 1220 (QL) Calculus II (F,Sp,Su) ....................................... 4
- STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) (3 cr) or STAT 2000 (QI) Statistical Methods (F,Sp) (3 cr) ...................... 3
- MATH 2210 (QI) Multivariable Calculus (F,Sp,Su) ....................... 3
- MATH 2250 (QI) Linear Algebra and Differential Equations (F,Sp,Su) or (QI) Ordinary Differential Equations (Sp) (3 cr) ........ 4
- OR (MATH 2220; or MATH 2270 and 2280)
- MATH 2270 (QI) Linear Algebra (F) (3 cr) and MATH 2280 (QI) Ordinary Differential Equations (Sp) (3 cr) .................. 6
- STAT 5100 (QI/CI) Linear Regression and Time Series (F) ........... 3
- MATH 3110 Modern Geometry (Sp) ............................................ 3
- MATH 4200 (CI) Foundations of Analysis (F,Sp) ........................... 3
- MATH 4310 (CI) Introduction to Algebraic Structures (F,Sp) ....... 3
- MATH 4400 History of Mathematics and Number Theory (Sp) .... 3
- MATH 4620 Computer Aided Math for Secondary Math Teachers (F) .... 3
- MATH 5500 Capstone Mathematics and Statistics for Teachers (F) ...... 3
- MATH 5710 Introduction to Probability (F,Sp) .............................. 3
- STAT 5200 Design of Experiments (Sp) ..................................... 3

#### B. Secondary Teacher Education Program (STEP) (34 credits)

**Level 1**
- SCED 3100 Motivation and Classroom Management (F,Sp) ........ 3
- SCED 3210 (CI/DSS) Educational and Multicultural Foundations (F,Sp) ............................................................ 3
- MATH 3300 School Laboratory for Mathematics Teachers Level I (F,Sp) ................................................................. 1
- SPED 4000 Education of Exceptional Individuals (may be taken anytime) (F,Sp,Su) .................................................. 2

**Level 2**
- SCED 4200 (CI) Reading, Writing, and Technology (F,Sp) .......... 3
- SCED 4210 Cognition and Evaluation of Student Learning (F,Sp) .... 3
- MATH 4300 School Laboratory for Mathematics Teachers Level II (F,Sp) ................................................................. 1
- MATH 4500 Methods of Secondary School Mathematics Teaching (F,Sp) ................................................................. 3
- STAT 4500 Methods of Teaching Statistics in Secondary and Middle School (F,Sp) .................................................. 3

**Level 3**
- SCED 5500 Student Teaching Seminar (F,Sp) ......................... 2
- SCED 5630 Student Teaching in Secondary Schools (F,Sp) .......... 10

**Note:** Admission to the STEP requires a GPA of at least 3.00 in the equivalent of MATH 1210 (Calculus I), MATH 1220 (Calculus II) and MATH 2210 (Multivariable Calculus); a cumulative GPA of at least 3.00 in STAT 2000 (Statistical Methods) or STAT 3000 (Statistics for Scientists); and an overall GPA of at least 2.75. No more than three repeats in all required courses may be used in GPA computations. The STEP is normally completed during the last three semesters of the degree program, and consequently nearly all the mathematics and statistics classes in the Mathematics-Statistics Education Major must be completed before beginning the STEP.

**Note:** Beginning in 2006, all USU teacher education candidates will be required to take and pass the content exam approved by the Utah State Office of Education in their major content area prior to student teaching.

### Suggested Four-year Course of Study for Composite Mathematics-Statistics Education Major

The suggested schedule shown below should be used in conjunction with the major requirement sheet. This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.
**Freshman Year (31-34 credits)**
Fall Semester (14-17 credits)
- MATH 1210 (QL) Calculus I .................................................. 4
- College of Science required course ....................................... 4
- University Studies course(s) ................................................. 6-9

Spring Semester (17 credits)
- STAT 2000 (QI) Statistical Methods (3 cr) or
- STAT 3000 (QI) Statistics for Scientists (3 cr) ....................... 3
- MATH 1220 (QL) Calculus II .................................................. 4
- College of Science required course ....................................... 4
- University Studies course(s) ................................................. 6

**Sophomore Year (31 credits)**
Fall Semester (16 credits)
- MATH 2210 (QL) Multivariable Calculus ................................. 3
- MATH 4225 (QL) Linear Algebra and Differential Equations .... 4
- STAT 5100 (CI/QI) Linear Regression and Time Series ......... 3
- University Studies course ..................................................... 6

Spring Semester (15 credits)
- MATH 3110 Modern Geometry .............................................. 3
- MATH 4200 (CI) Foundations of Analysis ............................... 3
- MATH 4400 History of Mathematics and Number Theory ....... 3
- STAT 5200 Design of Experiments ....................................... 3
- University Studies course or teaching minor course .......... 3

**Junior Year (30 credits)**
Fall Semester (15 credits)
- MATH 3300 School Laboratory for Mathematics Teachers Level I 1
- MATH 4310 (CI) Introduction to Algebraic Structures .......... 3
- MATH 4620 Computer Aided Math for Secondary Math Teachers 3
- MATH 5500 Capstone Mathematics and Statistics for Teachers .... 3
- MATH 5710 Introduction to Probability .................................. 3
- SPED 4000 Education of Exceptional Individuals ............. 2

Spring Semester (15 credits)
- SCED 3100 Motivation and Classroom Management ............ 3
- SCED 3210 (CI/DSS) Educational and Multicultural Foundations 3
- University Studies and teaching minor courses ............... 9

**Senior Year (28 credits)**
Fall Semester (16 credits)
- SCED 4200 (CI) Reading, Writing, and Technology ............. 3
- SCED 4210 Cognition and Evaluation of Student Learning ...... 3
- MATH 4300 (CI) School Laboratory for Mathematics Teachers Level II ................................................................. 1
- MATH 4500 Methods of Secondary School Mathematics Teaching ................................................................. 3
- STAT 4500 Methods of Teaching Statistics in Secondary and Middle School ............................................. 3
- University Studies or teaching minor course .................... 3

Spring Semester (12 credits)
- SCED 5500 Student Teaching Seminar ................................ 2
- SCED 5630 Student Teaching in Secondary Schools ............ 10

**Statistics Major (47 credits)**
A. Required Courses (35 credits)
- MATH 1210 (QL) Calculus I (F,Sp,Su) ................................ 4
- MATH 1220 (QL) Calculus II (F,Sp,Su) ............................... 4
- MATH 2210 (QL) Multivariable Calculus (F,Sp,Su) ................ 3
- MATH 2270 (QL) Linear Algebra (F) ................................ 3
- MATH 4200 (CI) Foundations of Analysis (F,Sp) .............. 3
- MATH 5710 Introduction to Probability (F,Sp) ...................... 3
- MATH 5720 Introduction to Mathematical Statistics (Sp) ....... 3

CS 1400 Introduction to Computer Science—CS 1 (F,Sp,Su) .......... 3
STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) (3 cr) ....... 3
STAT 2000 (QI) Statistical Methods (F,Sp,Su) (3 cr) ............. 3
STAT 5100 (QI/CI) Linear Regression and Time Series (F) ....... 3
STAT 5200 Design of Experiments (Sp) ............................... 3

B. Elective Courses (12 credits)
Select four courses (12 credits) in statistics numbered above 5000.
One of the three elective classes may be selected from:
- MATH 5570 Actuarial Math I (F) ........................................ 3
- MATH 5610 Computational Linear Algebra and Solution of Systems of Equations (F) .................... 3
- MATH 5600 Stochastic Processes (F) ................................. 3

Note: MATH 2250 (Linear Algebra and Differential Equations) may substitute for MATH 2270 (Linear Algebra).

**Suggested Four-year Course of Study for Statistics Major**
The suggested schedule shown below should be used in conjunction with the major requirement sheet.

**Freshman Year (28-34 credits)**
Fall Semester (14-17 credits)
- CS 1400 Introduction to Computer Science—CS 1 ............ 3
- MATH 1210 (QL) Calculus I .............................................. 4
- MATH 4200 (CI) Calculus II .............................................. 4
- College of Science required course ..................................... 4
- University Studies course(s) ............................................. 3-6

Spring Semester (14-17 credits)
- MATH 1220 (QL) Calculus II .............................................. 4
- STAT 2000 (QI) Statistical Methods (3 cr) or
- STAT 3000 (QI) Statistics for Scientists (3 cr) ................ 3
- STAT 2000 (QI) Statistical Methods (F) ............................ 3
- STAT 5100 (QI/CI) Linear Regression and Time Series (F) .... 3
- STAT 5100 (QI/CI) Linear Regression and Time Series (F) .... 3
- STAT 5200 Design of Experiments (Sp) ................. 3

**Sophomore Year (30 credits)**
Fall Semester (15 credits)
- MATH 2210 (QL) Multivariable Calculus ........................... 3
- MATH 2270 (QL) Linear Algebra ......................................... 3
- University Studies courses ................................................. 3

Spring Semester (15 credits)
- MATH 4200 (CI) Foundations of Analysis .......................... 3
- University Studies or elective courses .............................. 12

**Junior Year (30 credits)**
Fall Semester (15 credits)
- MATH 5710 Introduction to Probability ............................... 3
- STAT 5100 (CI/QI) Linear Regression and Time Series ....... 3
- Statistics elective course ................................................... 3
- University Studies courses ................................................ 6

Spring Semester (15 credits)
- MATH 5720 Introduction to Mathematical Statistics .......... 3
- Statistics elective course ................................................... 3
- University Studies courses ................................................ 9

**Senior Year (26-30 credits)**
Fall Semester (12-15 credits)
- Statistics elective course(s) .............................................. 3-6
- University Studies courses ................................................ 9

Spring Semester (12-15 credits)
- Statistics elective course(s) .............................................. 3-6
- University Studies courses ................................................ 9
Department of Mathematics and Statistics

Emphasis Requirements

Computational Mathematics Emphasis (60 credits)
The Computational Mathematics Emphasis is available in the Mathematics Major.

A. Required Mathematics Courses (35 credits)
MATH 1210 (QL) Calculus I (F,Sp,Su) ........................................ 4
MATH 1220 (QL) Calculus II (F,Sp,Su) ...................................... 4
MATH 2210 (QI) Multivariable Calculus (F,Sp,Su) ...................... 3
MATH 2270 (QI) Linear Algebra (F) ........................................ 3
MATH 2280 (QI) Ordinary Differential Equations (Sp) .......... 3
MATH 3310 Discrete Mathematics (F,Sp,Su) .......................... 3
MATH 4200 (CI) Foundations of Analysis (F,Sp,Su) .......... 3
MATH 5210 Introduction to Analysis I (F) .............................. 3
MATH 5610 Computational Linear Algebra and Solution of Systems of Equations (F) ......................................................... 3
MATH 5620 Numerical Solution of Differential Equations (Sp) .......... 3
MATH 5710 Introduction to Probability (F,Sp) ........................ 3

B. Required Computer Science Courses (13 credits)
CS 1400 Introduction to Computer Science—CS 1 (F,Sp,Su) .......... 3
CS 1405 Introduction to Computer Science—CS 1 Lab (F,Sp,Su) ..... 1
CS 1410 (QI) Introduction to Computer Science—CS 2 (F,Sp,Su) .......... 3
CS 2420 (QI) Algorithms and Data Structures—CS 3 (F,Sp,Su) .......... 3
CS 2450 (CI) Software Engineering (F,Sp) ............................ 3

C. Mathematics Elective Courses (6 credits)
Select two courses (6 credits) in mathematics numbered above 4620, excluding MATH 5570 (Actuarial Math I) and 5580 (Actuarial Math II).

D. Computer Science Elective Courses (6 credits)
Select at least two courses (6 credits) in computer science numbered above 4000.

Note: Mathematics majors are strongly urged to take MATH 2270 (Linear Algebra) and MATH 2280 (Ordinary Differential Equations) instead of MATH 2250 (Linear Algebra and Differential Equations).

Note: Students who complete the Computer Science coursework with a GPA of at least 2.5 automatically earn a minor in Computer Science.

Suggested Four-year Course of Study for Mathematics Major, Computational Mathematics Emphasis
The suggested schedule shown below should be used in conjunction with the major requirement sheet.

Freshman Year (35-41 credits)
Fall Semester (18-21 credits)
MATH 1210 (QL) Calculus I ....................................................... 4
CS 1400 Introduction to Computer Science—CS 1 .................. 3
CS 1405 Introduction to Computer Science—CS 1 Lab ............... 1
College of Science required course ........................................ 4
University Studies courses .................................................. 6-9

Spring Semester (17-20 credits)
MATH 1220 (QL) Calculus II ...................................................... 4
CS 1410 (QI) Introduction to Computer Science—CS 2 ......... 3
College of Science required course ........................................ 4
University Studies courses .................................................. 6-9

Sophomore Year (36-38 credits)
Fall Semester (18-19 credits)
MATH 2210 (QI) Multivariable Calculus .................................. 3
MATH 2250 (QI) Linear Algebra and Differential Equations (4 cr) or
MATH 2270 (QI) Linear Algebra (3 cr) ...................................... 3 or 4
CS 2420 (QI) Algorithms and Data Structures—CS 3 .......... 3
University Studies courses .................................................. 9

Spring Semester (18-19 credits)
MATH 2250 Linear Algebra and Differential Equations (4 cr) or
MATH 2280 (QI) Ordinary Differential Equations (3 cr) .......... 3 or 4
MATH 3310 Discrete Mathematics ........................................... 3
CS 2450 (CI) Software Engineering ........................................ 3
University Studies or elective courses ................................. 9

Junior Year (18-24 credits)
Fall Semester (9-12 credits)
MATH 4200 (CI) Foundations of Analysis .................................. 3
University Studies courses .................................................. 6-9

Spring Semester (9-12 credits)
Math elective course(s) .......................................................... 3-6
Computer Science elective course(s) ...................................... 3-6

Senior Year (33-39 credits)
Fall Semester (15-18 credits)
MATH 5210 Introduction to Analysis I ...................................... 3
MATH 5610 Computational Linear Algebra and Solution of Systems of Equations ......................................................... 3
Math/Computer Science elective course(s) .............................. 3-6
University Studies Depth or elective courses .......................... 6

Spring Semester (18-21 credits)
MATH 5620 Numerical Solution of Differential Equations .......... 3
MATH 5710 Introduction to Probability ..................................... 3
Math/Computer Science elective course(s) .............................. 3-6
University Studies or elective courses ................................. 9

Actuarial Science Emphasis (59 credits)
The Actuarial Science Emphasis is available in either the Mathematics Major or the Statistics Major.

A. Mathematics and Statistics Courses (for Mathematics Majors) (44 credits)
MATH 1210 (QL) Calculus I (F,Sp,Su) ...................................... 4
MATH 1220 (QL) Calculus II (F,Sp,Su) ...................................... 4
MATH 2210 (QI) Multivariable Calculus (F,Sp,Su) ...................... 3
MATH 2270 (QI) Linear Algebra (F) ........................................ 3
MATH 2280 (QI) Ordinary Differential Equations (Sp) .......... 3
MATH 4200 (CI) Foundations of Analysis (F,Sp) ....................... 3
MATH 4310 (CI) Introduction to Algebraic Structures (F,Sp) .......... 3
MATH 5210 Introduction to Analysis I (F) .............................. 3
MATH 5570 Actuarial Math I (F) ............................................ 3
MATH 5580 (CI) Actuarial Math II (Sp) .................................... 3
MATH 5710 Introduction to Probability (F,Sp) ......................... 3
MATH 5720 Introduction to Mathematical Statistics .................. 3
STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) (3 cr) or
STAT 2000 (QI) Statistical Methods (F,Sp) (3 cr) ..................... 3
STAT 5100 (QI/CI) Linear Regression and Time Series (F) .......... 3

B. Mathematics and Statistics Courses (for Statistics Majors) (44 credits)
Statistics Majors must complete all of the courses listed above in
Section A, except for the following two courses:
MATH 4310 (CI) Introduction to Algebraic Structures (F,Sp) .......... 3
MATH 5210 Introduction to Analysis I (F) .............................. 3
In addition, students must complete the following:

**STAT 5200** Design of Experiments (Sp).................................3

Elective STAT course numbered above 5000 ..........................3

### C. Required Accounting, Business Administration, Economics, and Management and Human Resources Courses (15 credits)

- **ACCT 2010** Survey of Accounting (F,Sp,Su).........................3
- **BA 3400 (QI)** Corporate Finance (F,Sp,Su)............................3
- **ECON 1500 (BAI)** Introduction to Economic Institutions, History, and Principles (F,Sp).....................................................3
- **ECON 2010 (BSS)** Introduction to Microeconomics (F,Sp)........3
- **MHR 2050** Legal and Ethical Environment of Business (F,Sp,Su)3

**Note:** Mathematics majors are strongly urged to take MATH 2270 (Linear Algebra) and MATH 2280 (Ordinary Differential Equations) instead of MATH 2250 (Linear Algebra and Differential Equations).

**Note:** Admission to the Actuarial Science Emphasis requires explicit departmental approval.

### Composite Major in Mathematics/Statistics (59 credits)

#### A. Required Courses (44 credits)

- **MATH 1210 QL** Calculus I (F,Sp,Su)........................................4
- **MATH 1220 QL** Calculus II (F,Sp,Su)........................................4
- **MATH 2210 QI** Multivariable Calculus (F,Sp,Su).......................3
- **MATH 2270 QI** Linear Algebra (F)............................................3
- **MATH 2280 QI** Ordinary Differential Equations (Sp)................3
- **MATH 4200 CI** Foundations of Analysis (F,Sp)........................3
- **MATH 4310 CI** Introduction to Algebraic Structures (F,Sp).........3
- **MATH 5210** Introduction to Analysis I (F)................................3
- **MATH 5710** Introduction to Probability (F,Sp).........................3
- **MATH 5720** Introduction to Mathematical Statistics (Sp)...........3
- **MATH 5760** Stochastic Processes (F) ....................................3

#### B. Elective Mathematics Courses (6 credits)

Select at least two courses (6 credits) in mathematics numbered above 5000.

#### C. Elective Statistics Courses (9 credits)

Select at least three courses (9 credits) in statistics numbered above 5000. Either MATH 5760 (Stochastic Processes) or MATH 5570 (Actuarial Math I) may substitute for one of the statistics elective courses.

**Note:** Mathematics majors are strongly urged to take MATH 2270 and 2280 instead of MATH 2250, but MATH 2250 may substitute for MATH 2270 and 2280.

### Minor Requirements

#### Mathematics Minor (23 credits)

**A. Required Courses (17 credits)**

- **MATH 1210 QL** Calculus I (F,Sp,Su).........................................4
- **MATH 1220 QL** Calculus II (F,Sp,Su).........................................4
- **MATH 2210 QI** Multivariable Calculus (F,Sp,Su).......................3
- **MATH 2270 QI** Linear Algebra (F)............................................3
- **MATH 2280 QI** Ordinary Differential Equations (Sp)................3

**B. Elective Courses (6 credits)**

Select at least two additional courses (6 credits) in mathematics numbered above 4000, excluding the following courses: MATH 4300, 4400, 4500, 4620, 5570, and 5580.

**Note:** Mathematics minors are strongly urged to take MATH 2270 and 2280 instead of MATH 2250, but MATH 2250 may substitute for MATH 2270 and 2280.

#### Statistics Minor (15 credits)

**A. Required Courses (9 credits)**

- **STAT 3000 QI** Statistics for Scientists (F,Sp,Su) (3 cr) or
- **STAT 2000 QI** Statistical Methods (F,Sp) (3 cr) .......................3
- **STAT 5100 QI/CI** Linear Regression and Time Series (F)...........3
- **STAT 5200** Design of Experiments (Sp).................................3

**B. Elective Courses (6 credits)**

Select two additional courses (6 credits) from statistics courses numbered above 5000, or from the following courses:

- **MATH 5710** Introduction to Probability (F,Sp).........................3
- **MATH 5720** Introduction to Mathematical Statistics (Sp)...........3
- **MATH 5760** Stochastic Processes (F) ....................................3

### Mathematics Education Minor (42 credits)

#### A. Required Courses (9 credits)

- **STAT 1040 QL** Introduction to Statistics (F,Sp,Su).....................3
- **MATH 1210 QL** Calculus I (F,Sp,Su).........................................4
- **MATH 1220 QL** Calculus II (F,Sp,Su).........................................4
- **MATH 2210 QI** Multivariable Calculus (F,Sp,Su).......................3
- **MATH 2250 QI** Linear Algebra and Differential Equations (F,Sp,Su)4
- **MATH 3110** Modern Geometry (Sp)........................................3
- **MATH 4200 CI** Foundations of Analysis (F,Sp)..........................3
- **MATH 4310 CI** Introduction to Algebraic Structures (F,Sp).........3
- **MATH 4400** History of Mathematics and Number Theory (Sp)....3
- **MATH 4500** Methods of Secondary School Mathematics Teaching (F,Sp).............................................................................3
- **MATH 4620** Computer Aided Math for Secondary Math Teachers (F)........................................................3
- **MATH 5500** Capstone Mathematics and Statistics for Teachers (F).....3
- **MATH 5710** Introduction to Probability (F,Sp)...........................3

Completion of the Secondary Teacher Education Program (STEP) for the student’s Secondary Education major is also required, as well as MATH 4500, and either MATH 3300 or 4300. Admission to the STEP requires a GPA of at least 3.00 in the equivalent of MATH 1210, 1220, and 2210, and an overall GPA of at least 2.75. Graduation from this minor also requires an overall GPA of at least 2.75. No more than three repeats in all required courses may be used in GPA computations. The STEP is normally completed during the last three semesters of study, and consequently nearly all the mathematics classes in the Mathematics Education Minor must be completed before beginning the STEP.

### Biomathematics Minor (36-40 credits)

**A. Required Courses (28 credits)**

- **BIOL 1610** Biology I (F).........................................................4
- **BIOL 1620 (BLS)** Biology II (Sp)..............................................4
- **MATH 1210 QL** Calculus I (F,Sp,Su)..........................................4
- **MATH 1220 QL** Calculus II (F,Sp,Su).........................................4
- **MATH 2210 QI** Linear Algebra (F).............................................3
- **MATH 2270 QI** Ordinary Differential Equations (Sp)................3
- **STAT 3000 QI** Statistics for Scientists (F,Sp,Su)....................3
- **MATH/BIOL 4230 QI** Applied Mathematics in Biology (Sp)........3

**Note:** MATH 2250 may substitute for both MATH 2270 and 2280.
Department of Mathematics and Statistics

B. Elective Courses (8-12 credits)
Biology majors must take one course from the biology electives (listed below), and two courses from the mathematics and statistics electives (listed below). Mathematics and Statistics majors must take two courses from the biology electives, and one course from the mathematics and statistics electives. All other majors must take two courses from each set of electives.

Biology Electives
BIOL 3220 (QI) Field Ecology (F) ................................. 2
BIOL 5020 (QI) Modeling Biological Systems (F) .......... 3
BIOL 5380 Evolutionary Genetics (F) ........................... 4
BIOL 5600 Comparative Animal Physiology (F) ......... 3
BIOL 5620 Medical Physiology (Sp) ............................ 3
FRWS 3810 Plant and Animal Populations (Sp) ............ 3
PUBH 5330 (QI) Industrial Hygiene Chemical Hazard Control (F) .... 3
BMET 5500 Land-Atmosphere Interactions (Sp) ............ 3

Mathematics and Statistics Electives
MATH 5410 Methods of Applied Mathematics (F) .......... 3
MATH 5420 Partial Differential Equations (Sp) ............... 3
MATH 5460 Introduction to the Theory and Application of Nonlinear Dynamical Systems (Sp) .......................... 3
MATH 5610 Computational Linear Algebra and Solution of Systems of Equations (F) .................. 3
MATH 5620 Numerical Solution of Differential Equations (Sp) ........ 3
MATH 5710 Introduction to Probability (F,Sp) ............... 3
STAT 5100 (CI/QI) Linear Regression and Time Series (F) .... 3
STAT 5120 Categorical Data Analysis (F) ........................ 3
STAT 5200 Design of Experiments (Sp) ........................ 3
STAT 5600 (CI) Applied Multivariable Statistics (Sp) .......... 3

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information
Students who enter the University with AP credit in Mathematics and/or Statistics, and about 30 additional AP or CLEP credits, may be able to complete both a BS and an MS degree within five years or less. Interested students should consult with a departmental undergraduate advisor.

For detailed information about requirements for majors and minors within the Mathematics and Statistics Department, see the major requirement sheet, which is available from the department, or online at: http://www.usu.edu/majorsheets/

Financial Support
The department offers several one-, two-, and four-year scholarships to qualified students who enroll as full-time Mathematics, Mathematics Education, or Statistics majors. The winner of the Hunsaker Scholarship receives a cash award each semester for two years. This award is given in addition to any four-year scholarship or tuition waiver for which the student is eligible. During the final two years, the recipient is expected to work as a grader for the department. The department also offers other scholarships (Eich, Ellis, van Vliet, and departmental). The amount of these scholarships varies from year to year. The Ellis Scholarship is awarded to a junior or senior Mathematics Education major, and the recipient is selected by the department. To apply for any of these scholarships (except for the Ellis Scholarship, for which there is no application) fill out the scholarship application form located at http://www.math.usu.edu/undergrad/application.html, send a statement of qualifications, including high school transcripts and SAT or ACT scores, and three letters of recommendation to:

Scholarship Committee
Department of Mathematics and Statistics
Utah State University
3900 Old Main Hill
Logan UT 84322-3900

Applications must be received by April 1.

Learning Objectives
All students having majors within the Department of Mathematics and Statistics are expected to achieve competency in: (1) pre-calculus algebra; (2) calculus of one and several variables; (3) ordinary differential equations; (4) linear algebra/matrices, eigenvalues/ eigenvectors, determinant, rank; and (5) analysis (introduction to formal proofs/analysis theory).

Students enrolled in specific departmental majors should also have competence in additional areas pertaining to their major. These areas are listed in the following paragraphs.

Mathematics Major
(1) algebraic structures; (2) analysis/advanced calculus; (3) complex variables; (4) topology; (5) algebraic theory; and (6) partial differential equations.

Statistics Major
(1) theory of probability and statistics; (2) linear regression/time series; (3) experiment design; and (4) one or more of sampling, categorical analysis, multivariate analysis, quality control.

Mathematics Education Major (including Composite Mathematics-Statistics Education)
(1) algebraic structures; (2) probability; (3) history of mathematics; (4) methods for secondary school teaching of mathematics and/or statistics; and (5) in-service teaching experiences.

Other Majors and Emphases (e.g., Computational Mathematics Emphasis, Actuarial Science Emphasis, etc.)
Replace general competencies in traditional areas (i.e., algebra, topology, analysis) with specific topics related to the specialized emphasis. For example, students in the Computational Mathematics Emphasis need the ability to write computer code to solve linear,
Department of Mathematics and Statistics

nonlinear, stochastic, and (partial and ordinary) differential equations; and students in the Actuarial Science Emphasis need two semesters of actuarial mathematics.

Assessment

Assessment of General Education Courses (MATH 1050 and STAT 1040)

Beginning with Spring Semester 2004, the department has conducted an annual assessment of student performance in primary General Education courses (including MATH 1050 and STAT 1040). The performance of approximately 100 randomly selected students from each of MATH 1050 and STAT 1040 was evaluated by topic area on the common finals of these courses. Summary results will be available soon. The process was repeated for Spring Semester 2005. Together, these two years of data provide a baseline against which future groups of students will be compared. Weaknesses in topic learning will then be identified, and the Undergraduate Committee and course supervisors will provide feedback to instructors in an effort to bring overall student performance to target levels.

Assessment of Core Courses (MATH 1210, 1220, 2210, 2250, and STAT 1040, 2000, 3000)

Core content of these courses changes infrequently and is primarily addressed through the selection of textbooks at three-year to five-year intervals. Primary assessment of these courses is through semester evaluations and final examination scores and course grade profiles. Competency in these areas is essential for any student majoring in mathematics or statistics.

Assessment of Upper-division Major Courses

These courses are re-evaluated by subcommittees of the Undergraduate Committee in terms of: level and appropriateness of content relative to learning objectives, textbook selection, final examinations, course grades, and student evaluations. At two-year to five-year intervals, courses are redesigned if the subject matter develops beyond traditional norms, or if market demand indicates that an under-utilized course should be replaced by a course having greater demand (e.g., development of a new cryptography course).

Undergraduate Research Opportunities

Students interested in undergraduate research opportunities in the Department of Mathematics and Statistics at Utah State University should begin by contacting the assistant department head and undergraduate research liaison, Daniel C. Coster, (435) 797-2815, coster@math.usu.edu.

Several departmental faculty members have engaged in successful undergraduate research projects. These faculty members, along with their research areas, include: James Powell (mathematical modeling of pine beetle infestations), Ian Anderson (differential geometry applications to theoretical and applied physics), and Richard Cutler (analysis of epidemiological and environmental data). In general, undergraduate research offers students an excellent opportunity to focus their own course selection on particular career paths and research areas (including graduate school), to co-author professional publications, and to actively make presentations at conferences or local seminars.

Graduate Programs

Admission Requirements

See the general admission requirements for graduate programs at Utah State University on pages 101-102 of this catalog. In general, students wishing to pursue graduate studies in mathematics or statistics should have a bachelor’s degree in mathematics, statistics, or a closely related field, with extensive coursework in one of the departmental disciplines.

Students entering the Master of Mathematics (MMath) program must either possess a valid secondary school teaching license or be concurrently enrolled in a secondary school teacher licensure program.

Degree Programs

Master of Science (MS) in Mathematics

This program prepares students to work as mathematicians in government, business, and industry. This degree may also be a “stepping stone” for students who ultimately wish to pursue a doctorate in mathematics or a closely related subject.

Master of Science (MS) in Statistics

This program is primarily designed to prepare students for careers in business, industry, and federal, state, and local government. Students pursuing graduate degrees in other disciplines, such as biology, natural resources, engineering, business, economics, epidemiology, and the social sciences, may elect to earn an MS in statistics concurrent with their other degree programs. For most students, the MS in statistics will prove sufficient for career preparation. However, some graduates may ultimately pursue a doctorate in statistics, biostatistics, or a closely related discipline.

Master of Science (MS) in Industrial Mathematics

The Industrial Mathematics master’s degree is designed to broaden the learning experiences and job opportunities for master’s students in mathematics. The program of study incorporates fundamental applied mathematics and interdisciplinary coursework in support of an industrial internship experience.

Master of Mathematics (MMath)

This program is designed specifically for secondary school teachers of mathematics. The purpose of this degree is to provide students with a broad background in mathematics.

Doctor of Philosophy (PhD) in Mathematical Sciences

This is a terminal degree for mathematics and statistics researchers in academe, government, and industry, and for prospective college teachers.

Specializations for PhD in Mathematical Sciences

The College Teaching Specialization is designed to prepare students to teach undergraduate mathematics in two- and four-year colleges and in universities. This program is less specialized than the other two options. Students in the College Teaching specialization receive broad training in pure and applied mathematics. The dissertation for this
specialization includes exposition of important mathematical theories and their historical relationships in an area of mathematics of the student's choosing.

The Interdisciplinary Studies Specialization offers students the opportunity to receive advanced training in mathematics and statistics in the context of another field of inquiry, such as biology, ecology, business, economics, engineering, or education. Students in this specialization will usually take about two thirds of their coursework in the Department of Mathematics and Statistics, and the remaining third in the other discipline. The student's dissertation committee will choose two members from outside the Department of Mathematics and Statistics. The dissertation itself will generally entail the development of advanced mathematical or statistical methods to solve problems in the other subject area.

The Pure and Applied Mathematics Specialization is a traditional doctoral program in mathematics, offering broad training in the foundations of modern mathematics together with specialized training in an area of mathematical research. The dissertation represents a significant contribution to mathematics research in the chosen area of specialization.

The Statistics Specialization offers broad training in theoretical and applied statistics for students seeking careers in academia, industry, or government. The dissertation represents a significant contribution to statistical research.

Course Requirements
Departmental requirements change from time to time. Check with the Department of Mathematics and Statistics for the list of requirements currently in effect. The requirements listed below are in effect for Fall Semester 2005.

Master of Science in Mathematics
This degree requires 30 credits of approved coursework at or above the 5000 level. At least 18 of these credits must be at the 6000 level or above, excluding MATH 6990 and 7990 (Continuing Graduate Advisement) and MATH 7910 (College Teaching Internship). Generally, most of the coursework will be in mathematics, but the student's supervisory committee may approve courses in statistics, physics, engineering, or any other discipline, if it seems such coursework is appropriate for the student's program of study.

The MS in mathematics has three options. The Plan A or the thesis option requires taking 6 credits of MATH 6970 (Thesis and Research) and working with a faculty member on a substantial research project. The research must be presented in a thesis, which must be approved by the student's supervisory committee and the dean of the School of Graduate Studies. An oral defense of the thesis must be arranged through the School of Graduate Studies.

The Plan B or project option requires taking 3 credits of MATH 6970 and working with a faculty member on a smaller research project. A written report of the research must be approved by the student's supervisory committee. An oral defense of the report must be scheduled through the School of Graduate Studies.

The third option of the MS in Mathematics requires only coursework, and is called the Plan C option.

All students in the MS program in Mathematics must pass a written qualifying examination covering the introductory analysis and advanced calculus material presented in MATH 4200, 5210, and 5220. Students may take this exam before beginning formal coursework in the MS program, and must take the exam at the end of the first full year of matriculation. The exam is typically given twice a year, in May and September. Matriculated students who fail on their first try must pass the exam at the next scheduled opportunity. A detailed exam syllabus is contained in the Graduate Handbook, available from the department.

Master of Science in Statistics
This degree requires 30 credits of approved coursework at or above the 5000 level. At least 18 credits must be at the 6000 level or above, excluding STAT 6990 and STAT 7990 (Continuing Graduate Advisement). All students must take STAT 6710 and 6720 (Mathematical Statistics I and II). Generally, most of the coursework will be in statistics, but the student's supervisory committee may approve courses in mathematics, biology, economics, or any other discipline if it deems such coursework to be appropriate for the student's program of study.

The Plan B option requires taking 3 credits of MATH 6970 (Thesis and Research) and working with a faculty member on a substantial research project. The research must be presented in a thesis, which must be approved by the student's supervisory committee. An oral defense of the thesis must be scheduled through the School of Graduate Studies. Students must attempt the exam by the end of the first full year of matriculation. The exam is usually given in May and September each year. Matriculated students who fail the exam on their first try must pass the exam at the next scheduled opportunity. A detailed exam syllabus is available in the Graduate Handbook, available from the department.

Master of Science in Industrial Mathematics
This degree requires 36 credits of coursework at or above the 5000 level. At least 15 of these credits must be completed in MATH courses at the 6000 level or above. Additionally, students must complete a total of 9 credits outside of Mathematics which complement their internship and final project. A maximum of 3 of these credits may be taken at the 5000-level (i.e., one 3-credit course in another department). See the departmental website or the Graduate Handbook for more detailed information about coursework requirements.

Students in the MS program in Industrial Mathematics are required to pass the Advanced Calculus examination (see the Master of Science in Mathematics examination requirements), or the Statistics qualifying examination (see the Master of Science in Statistics examination requirements), or an examination based on material presented in four core courses chosen by the student during the first year. The exam, which can be taken before or at the beginning of the student's second year in the program, is usually given in May or September. Students are also required to complete a final project based on work done during an internship, either with a company or possibly with another department on campus. The project will include a technical write-up suitable to the industry/field, and presentation to the involved faculty and students in the program. This follows the Plan B option listed for the Master of Science in Mathematics degree.
Department of Mathematics and Statistics

The Departmental Graduate Committee supervises all MS and MMath students until a supervisory committee for the student is established and approved. Prior to advancement to candidacy, students in Plan A and Plan B options for the MS degree in mathematics and statistics must pass an examination in English writing. This exam is administered by the Department of Mathematics and Statistics.

Master of Mathematics
This program requires at least 36 credits approved by the Graduate Committee within the Department of Mathematics and Statistics. At least 21 of these credits must come from mathematics classes numbered above 5000, and the remaining credits must be chosen from approved courses offered within the College of Education and Human Services. MATH 4620 or an approved substitute must also be included. The GPA for the 36 credits and for the 21 math credits must be at least 3.0.

PhD in Mathematical Sciences
All four specializations require a course of study of 60 credits beyond a master’s degree or 90 credits beyond a bachelor’s degree. In almost all cases, a student who applies to the PhD program who does not already have a master’s degree will first be directed to the MS programs in mathematics and statistics. Satisfactory performance in one of these programs can lead to admission to the PhD program in mathematical sciences.

The core requirements for the PhD degree in Mathematical Sciences that are common to all four specializations include the following:

1. Passing a standard written qualifying examination appropriate for the specialization.
2. Passing a comprehensive examination that is constructed specifically for the student by his or her supervisory committee. The form of the examination may be written or oral, or may include a combination of written and oral components. The length and content of the exam are determined by the student’s supervisory committee.
3. Successfully complete a test of technical English writing skills. Usually the student’s dissertation proposal will serve this purpose.
5. Successfully defend the dissertation in a final oral examination.

After completing items 1-3, a PhD student may be advanced to candidacy.

Requirements that are specific to the specialization of the PhD in Mathematical Sciences are listed below. In all cases, it is assumed that the student already has a master’s degree in mathematics or statistics.

The College Teaching Specialization requires at least 60 credits in mathematics courses numbered 6000 or higher, excluding MATH 7990 and MATH 6990, of which no more than 20 can be completed in MATH 7970 (Dissertation Research). At least 6 credits should be selected from classes and seminars at the 7000 level, and 6 credits of MATH 7910 (College Teaching Internship) are also required. Students in this specialization take a qualifying examination in Real Analysis. The student’s dissertation in this specialization may take several years to complete, and the student’s dissertation research is often presented in a series of seminars or colloquia. The dissertation constitutes a publishable, significant contribution to research in an area of mathematics.

The Pure and Applied Mathematics Specialization requires at least 60 credits in mathematics numbered 6000 or higher, excluding MATH 6990 and 7990. At least 6 credits must be selected from seminars or classes numbered 7000 or higher, and no more than 30 of the credits can be completed in MATH 7970 (Dissertation Research). The qualifying examination for this option is in Real Analysis. The dissertation constitutes a publishable, significant contribution to research in an area of mathematics.

The Statistics Specialization requires at least 60 credits in statistics at the 6000 and 7000 level, excluding STAT 6990 and 7990. With the permission of the student’s supervisory committee, some of these credits may be in mathematics or in another discipline. At least 6 credits must be selected from seminars and classes numbered 7000 and higher, and a maximum of 30 credits may be completed in STAT 7990 (Dissertation Research). Students in this specialization take a qualifying examination in Probability and Mathematical Statistics. The dissertation constitutes a publishable, significant contribution to research in statistics.

Research
Mathematics research opportunities within the department are many and varied, and students are urged to contact faculty about mutual interests at as early a stage as feasible. The interdisciplinary option permits and encourages study with a broad spectrum of outstanding nationally recognized University research programs.

Financial Assistance
Graduate students in the PhD program, the MMath program, and the Plan A and B options of the MS programs are eligible for teaching assistantships in the department. In most cases, a teaching assistant is responsible for teaching and grading a section of about 40 students in an introductory mathematics or statistics course during each semester. Stipends for teaching assistants are $13,000 for MS students, $14,000 for PhD students who have not been advanced to candidacy, and $16,000 for PhD students who have been advanced to candidacy. In rare situations, a graduate student may be offered a paper grading and tutoring assistantship that pays half of the teaching assistantship stipend. Graduate student stipends described here carry with them a waiver of all nonresident tuition. PhD students with stipends also receive a waiver of resident tuition. The department is also allocated a small number of resident tuition waivers for MS students each year. The department is able to support most PhD students and some MS students with summer teaching assignments that pay $3,000.

Mathematics and Statistics faculty members who have research grants may choose to partially or fully support students that they are advising.
Mathematics and Statistics
Faculty

Professors
Ian M. Anderson, differential geometry, global analysis
LeRoy B. Beasley, matrix theory, linear algebra, combinatorics
James S. Cangelosi, mathematics education, psychometrics
Lawrence O. Cannon, topology, mathematics education
Adele Cutler, statistical computing
D. Richard Cutler, environmental statistics, epidemiology
E. Robert Heal, analysis, statistics, mathematics education
Lance L. Littlejohn, differential equations, special functions
James Powell, applied mathematics, mathematical biology
David H. Sattinger, differential equations
Russell C. Thompson, differential equations
Zhi-Qiang Wang, nonlinear differential equations, nonlinear analysis
James S. Cangelosi, mathematics education, psychometrics

Professors Emeritus
Ronald V. Canfield, multivariate and industrial statistics
Chris S. Coray, numerical analysis
Duane Loveland, geometric topology, continuum theory
Jerry Ridenhour, differential equations
Donald V. Sisson, statistical methods, experimental design

Associate Professors
Daniel C. Coster, experimental design, linear models
Christopher D. Corcoran, computational biostatistics
Mark E. Fels, differential geometry
Joseph V. Koebbe, numerical analysis, applied mathematics
Piotr Kokoszka, probability and time series analysis

Associate Professors Emeritus
Wayne R. Rich, mathematics education
E. Eugene Underwood, matrix theory, linear algebra
James D. Watson, numerical analysis

Assistant Professors
David E. Brown, discrete mathematics, graph theory
Peg Howland, numerical linear algebra
Brynja R. Kohler, mathematics education, mathematical biology
John R. Stevens, bioinformatics, applied statistics, meta-analysis
M. K. Stephen Yeung, dynamical systems, gene network structures

Principal Lecturers
David D. Bregenzer, mathematics, statistics
Eric Rowley, mathematics, mathematics education

Lecturers
Bryan Bornholdt, mathematics, mathematics education
Claudia Mora, mathematics, mathematics education

Course Descriptions

Mathematics (MATH), pages 663-666
Statistics (STAT), pages 723-724
Department of Mechanical and Aerospace Engineering

Department Head: Byard D. Wood
Location: Engineering 419
Phone: (435) 797-2867
FAX: (435) 797-2417
Undergraduate/Graduate E-mail: bogden@engineering.usu.edu
WWW: http://www.mae.usu.edu/

Undergraduate Advising:
  Engineering Advising Center, Engineering 314A, (435) 797-2705,
  joan.smith@usu.edu

Degrees offered: Bachelor of Science (BS), Master of Engineering (ME), Master of Science (MS), and Doctor of Philosophy (PhD) in Mechanical Engineering

Undergraduate Emphases: Mechanical Engineering—Aerospace Engineering, Computational Engineering, Manufacturing Engineering

Graduate specializations: Aerospace Engineering, Manufacturing Engineering, Mechanical Engineering

Graduate Areas of Interest: Advanced Additive Manufacturing; Aeronautics; Astrodynamics and Orbital Mechanics; Bioengineering; Cluster Supercomputers; Composite Materials; Computational and Experimental Fluid Mechanics; Heat and Mass Transfer; Micromachining; Soil/Structure Interfaces; Spacecraft and Optical Systems Control; Solar Energy Systems; Spacecraft Guidance, Navigation, and Control Systems; Welding and Materials Joining

Undergraduate Programs

Mission
The Department of Mechanical and Aerospace Engineering provides graduates with a foundation of knowledge and experience upon which to build successful careers in mechanical, manufacturing, or aerospace engineering, or other fields where a strong engineering background is required or desirable. Undergraduate programs emphasize mechanical engineering fundamentals and computer-based problem solving, while teaching students to learn, synthesize, and communicate engineering information. Graduate programs emphasize fundamental and applied research, providing students with enhanced preparation for engineering practice, research, and education. Students, faculty, and staff are committed to excellence in learning, discovery, and engagement in an environment that fosters diversity and mutual respect.

Undergraduate Program Objectives (Mechanical Engineering)

1. Graduates will succeed in entry-level engineering positions with mechanical, manufacturing, or aerospace firms in regional, national, or international industries, as well as with government agencies.

2. Graduates will succeed in the pursuit of advanced degrees in engineering or other fields where a solid foundation in mathematics, science, and engineering fundamentals is required.

3. Graduates will be able to synthesize mathematics, science, engineering fundamentals, and laboratory and work-based experiences to formulate and solve engineering problems in both thermal and mechanical systems areas.

4. Graduates will have proficiency in computer-based engineering, including modern numerical methods, software design and development, and the use of computational tools.

5. Graduates will be prepared to communicate and work effectively on team-based engineering projects.

6. Graduates will recognize the importance of, and have the skills for, continued independent learning.

Undergraduate Program Outcomes (Mechanical Engineering)

Fundamentals
Students will identify, formulate, and solve basic engineering problems utilizing:

1. linear algebra
2. calculus-based statistics
3. multivariable calculus
4. differential equations
5. calculus-based physics
6. chemistry
7. material science
8. solid mechanics
9. fluid mechanics
10. thermal science
11. manufacturing science

Communication
Students will develop and demonstrate the ability to communicate engineering information, including geometry, technical concepts, and results, by:

1. participating in oral presentations.
2. writing proposals and reports.
3. developing engineering drawings and specifications.
4. participating in team-based engineering projects.

Laboratory Experiences
Students will participate in laboratory experiences, which:

1. include experimental design, data collection, and data analyses.
2. incorporate the use of modern laboratory and data acquisition equipment.
3. utilize statistical analysis and interpretation of data.
4. develop basic manufacturing skills.
5. may include work-based learning experiences, such as internships.
Assessment and Quality Improvement

The MAE faculty and staff are committed to excellence and to continuous quality improvement. A responsive assessment and feedback process involving major constituencies, including faculty, students, alumni, and industrial employers of students and graduates, is in place and ongoing.

Options for Undergraduate Study

The Mechanical Engineering BS degree provides the broadest background of any discipline in the field of engineering. Mechanical Engineering graduates are prepared to pursue careers in such widely diverse industries as aerospace, agricultural equipment, automotive, biotechnical, chemical processing, composite materials, computer equipment, defense, electrical utilities, food processing, industrial equipment, manufacturing, materials, marine, nuclear, petroleum, robotics, and solar energy. Most Mechanical Engineering graduates are prepared for graduate studies and enhanced career prospects in engineering or other areas, such as consulting, law, medicine, business management, or teaching. In addition, students who are preparing to apply for admission to medical school will find that Mechanical Engineering provides an excellent foundation for the increasingly technology-oriented field of medicine.

The Aerospace Engineering emphasis within the Mechanical Engineering BS degree serves to focus mechanical engineering fundamentals on the mechanics and dynamics of both flight within the atmosphere and space flight. Included within its scope are studies in aerodynamics, aircraft flight dynamics and control, aircraft design, spacecraft orbital mechanics, spacecraft attitude motion and control, and space systems design. Graduates who complete the aerospace engineering emphasis are prepared to pursue careers in aircraft design and development, aircraft flight testing, spacecraft and space systems design, and spacecraft trajectory design and analysis. As fully qualified Mechanical Engineers, graduates with the aerospace engineering emphasis are also well-prepared to pursue graduate studies or careers in the industries listed above under Mechanical Engineering.

The Manufacturing Engineering emphasis within the Mechanical Engineering BS degree prepares students to be proficient in the fundamentals of engineering, as well as in materials and manufacturing processes; process, assembly, and product engineering; manufacturing competitiveness; manufacturing systems design; lean manufacturing; and laboratory experience. Graduates will understand the behavior and properties of materials as they are altered and influenced by processing in manufacturing; the design of products and the equipment, tooling, and environment necessary for their manufacture; the creation of competitive advantage through manufacturing planning, strategy, and control; the analysis, synthesis, and control of manufacturing operations using statistical and calculus based methods; and how to measure manufacturing process variables and make technical inferences about the process. Graduates will have the necessary background to pass the Certified Manufacturing Technologist and Certified Manufacturing Engineer exams. Graduates who complete the Manufacturing Engineering emphasis are prepared to pursue graduate studies or careers in any industry that manufactures a product. For example, the aerospace, automotive, electronics, machine tool, petroleum, and electronics industries all employ manufacturing engineers as product designers, process designers and managers, maintenance engineers, and quality control engineers.

The Computational Engineering emphasis within the Mechanical Engineering BS degree prepares students to be proficient in the
Admission and Graduation Requirements

Freshman and transfer students must satisfy the admission policies and entrance requirements of both the University and the College of Engineering. Each new student will be assigned an advisor, who will help plan an educational program fulfilling the student’s professional goals. Placement of incoming students will depend on high school and/or prior college coursework. Those who complete a portion of the University Studies requirements by examination (CLEP) and/or by advanced placement (AP) credit may complete the requirements for a Bachelor of Science degree in less than four years.

Curriculum

At the beginning of each school year, each student should obtain a detailed, four-year requirement sheet. This sheet, which lists semester requirements for each of the four curricula (mechanical, computational, manufacturing, and aerospace), may be obtained from the departmental office. All students in the department follow the preprofessional engineering curriculum for the freshman and sophomore years. Prior to the junior year, the student must apply for admission to the professional program and, in consultation with the faculty mentor, select an area of emphasis. Students who are unable to take courses during the semester indicated on the curriculum requirement sheet may develop alternative schedules, consistent with prerequisites and the timing of course offerings.

GPA Requirement

A 2.3 GPA in all technical courses is the minimum standard which preprofessional students must attain in order to be considered for admission to any MAE professional program.

Course Requirements

The specific course requirements for the MAE preprofessional program and the MAE professional programs are quite extensive and may occasionally change. For these reasons, the complete requirements are not listed here. For more information, contact the department or send an Internet e-mail request to joan.smith@usu.edu.

A passing grade on the Fundamentals of Engineering Exam, the first step in becoming a licensed professional engineer, is required for graduation. Past experience has shown that the USU Mechanical and Aerospace Engineering students are well-prepared for this locally administered, national exam.

For additional information on academic requirements, see the College of Engineering (pages 122-123) and the Undergraduate Graduation Requirements (pages 60-63) sections of this catalog.

Pre-professional Program

The curriculum for the first two years is common for Aerospace, Computational, Mechanical, and Manufacturing students.

Required Coursework (126 credits)

Freshman Year (32 credits)

Fall Semester (15 credits)
MATH 1210 (QL) Calculus I ................................................. 4
CHEM 1215 Principles of Chemistry I .............................. 2
ENGR 2140 Thermodynamics I ......................................... 3
ENGR 2150 Fluid Mechanics ............................................. 3
MATH 1220 (QL) Calculus II .............................................. 4
CHEM 1210 Principles of Chemistry II ............................ 2
PHYS 2200 General Physics—Science and Engineering II .... 3

Spring Semester (17 credits)
MATH 1220 (QL) Calculus II .............................................. 4
PHYS 2210 General Physics—Science and Engineering III .... 3
ENGR 2160 Linear Algebra and Differential Equations ....... 3
ENGR 2170 Advanced Dynamics ....................................... 3
ENGR 2180 Mechanics of Solids ...................................... 3
ENGR 2190 Strength of Materials ..................................... 3
MAE 2300 Thermodynamics I ........................................... 3
MAE 2301 Mechanics of Solids ......................................... 3
MAE 2302 Advanced Dynamics ...................................... 3
MAE 2340 Thermodynamics II ......................................... 3
MAE 2341 Fluid Mechanics ............................................. 3
MATH 2210 (QL) Multivariable Calculus ......................... 3
MATH 2220 Intermediate Writing: Research Writing in a Persuasive Mode .................................................. 2
PHYS 2220 General Physics—Science and Engineering III .... 3

Sophomore Year (31 credits)

Fall Semester (16 credits)
MATH 2210 (QL) Multivariable Calculus ......................... 3
ENGR 2120 Engineering Mechanics Statics ...................... 2
ENGR 2130 Electrical Engineering for Nonmajors ............ 2
ENGR 2140 Thermodynamics I ......................................... 3
ENGR 2150 Fluid Mechanics ............................................. 3
MAE 2300 Thermodynamics I ........................................... 3
MAE 2301 Mechanics of Solids ......................................... 3
MAE 2302 Advanced Dynamics ...................................... 3

Professional Program in Mechanical Engineering

Junior Year (31 credits)

Fall Semester (17 credits)
MAE 2200 Engineering Numerical Methods I .................. 2
MAE 2300 Mechanics of Solids ......................................... 3
MAE 3320 Advanced Dynamics ...................................... 3
MAE 3340 Thermodynamics II ......................................... 3
MAE 3420 Fluid Mechanics ............................................. 3
MATH 4700 Engineering Mathematics and Statistics ......... 3

Utah State University 2007-2009 General Catalog
Spring Semester (14 credits)
MAE 2450 Engineering Numerical Methods II ................................3
MAE 3340 Instrumentation and Measurements ................................3
MAE 3440 (QI) Heat and Mass Transfer ........................................3
MAE 3800 Design I ........................................................................2
MAE 4300 Machine Design ..........................................................3

Senior Year (31-32 credits)
Fall Semester (16-17 credits)
MAE 4400 (CI) Fluids/Thermal Laboratory ....................................2
MAE 4800 (CI) Design II .............................................................3
MAE 5300 Vibration ....................................................................3
Technical Elective course1 ...........................................................3
University Studies Depth Humanities and Creative Arts (DHA) course.................................................................2-3
University Studies Breadth course ..............................................3

Spring Semester (15 credits)
Technical Elective courses1 .......................................................12
University Studies Depth Social Sciences (DSS) course .............3

Note: Elective courses, once selected and undertaken by a student, become part of the required program for that student.

The selection of elective courses needs to be given careful consideration. The preparation for a career in the broad field of mechanical and aerospace engineering and the selection of classes by real interest is more important than the maximization of the undergraduate grade point average.

MAE Technical Elective Courses
MAE 5020 Finite Element Methods in Solid Mechanics I (F) ..........3
MAE 5060 Mechanics of Composite Materials I (Sp) ....................3
MAE 5310 Dynamic Systems and Controls (F) ............................3
MAE 5410 Design and Optimization of Thermal Systems (F) .......3
MAE 5420 Compressible Fluid Flow (F) .....................................3
MAE 5440 Computational Fluid Dynamics (Sp) ..........................3
MAE 5500 Aerodynamics (F) ......................................................3
MAE 5510 Dynamics of Atmospheric Flight (Sp) ..........................3
MAE 5520 Elements of Space Flight (F) ......................................3
MAE 5530 Space System Design (Sp) ..........................................3
MAE 5540 Propulsion Systems (Sp) .............................................3
MAE 5580 Aircraft Design (F) .....................................................3
MAE 5600 Manufacturing Process Planning and Statistical Quality Control (F) .................................................................3
MAE 5610 Hydraulics and Pneumatics (Sp) .................................3
MAE 5620 Manufacturing Automation (F) ...................................3
MAE 5630 Machining Theory and Applications (Sp) ....................3
MAE 5640 Design for Manufacturability (F) ..............................3
MAE 5650 Nontraditional and Additive Manufacturing Processes (Sp) .................................................................3
MAE 5660 Transport Phenomena in Manufacturing Processes (Sp) .................................................................3
MAE 5680 Manufacturing Planning and Simulation (Sp) .............3
MAE 5900 Cooperative Practice (F,Sp,Su) .................................3
MAE 5930 ST: Kinematics (F) .....................................................1-3
ECE 3710 Microcomputer Hardware and Software (F,Sp,Su) .....4
ECE 4230 Spacecraft Systems Engineering (F) .........................3
ECE 5310 Control Systems (F) ...................................................3
ECE 5320 Mechatronics (Sp) .....................................................3
ENGR 5500 High Performance Computing for Engineers (F) ......3
MHR 5350 Contemporary Manufacturing Management (F) ........3

Students may choose one of their technical electives from the following courses:
MATH 5270 Complex Variables (Sp) .........................................3
MATH 5410 Methods of Applied Mathematics (F) ....................3
MATH 5420 Partial Differential Equations (Sp) ..........................3
MATH 5520 Numerical Solution of Differential Equations (Sp) ....3
MATH 5640 Optimization (Sp) ...................................................3
STAT 5200 Design of Experiments (Sp) ...................................3

Special Problems courses under MAE 5930 may be used as technical electives with prior approval.

Professional Program in Aerospace Engineering Emphasis
In addition to completing the pre-professional program, students who choose to graduate with the Aerospace Engineering emphasis must complete the following courses as their elective selection.

Junior Year (31 credits)
Fall Semester (17 credits)
MAE 2200 Engineering Numerical Methods I ...............................2
MAE 3040 Mechanics of Solids ..................................................3
MAE 3320 Advanced Dynamics ..................................................3
MAE 3400 Thermodynamics II ..................................................3
MAE 3420 Fluid Mechanics ..........................................................3
MATH 4700 Engineering Mathematics and Statistics ..................3

Spring Semester (14 credits)
MAE 2450 Engineering Numerical Methods II ............................3
MAE 3340 Instrumentation and Measurements ..........................3
MAE 3440 (QI) Heat and Mass Transfer ....................................3
MAE 3800 Design I ....................................................................2
MAE 4300 Machine Design ..........................................................3

Senior Year (31-32 credits)
Fall Semester (17 credits)
MAE 4400 (CI) Fluids/Thermal Laboratory ....................................2
MAE 5300 Vibrations .................................................................4
Aerospace Technical Course1 ......................................................4
Aerospace Technical Course1 ......................................................4
University Studies Breadth course ..............................................3

Spring Semester (14-15 credits)
MAE 4800 (CI) Design II .............................................................4
Aerospace Technical courses1 ......................................................6
University Studies Depth Humanities and Creative Arts (DHA) and Depth Social Sciences (DSS) courses .................................5-6

1During their senior year, Aerospace Engineering Emphasis students must take a minimum of 9 credits (3 courses) from Group 1 and a total of 15 credits (5 courses) from Group 1 or Group 2 combined. Group 1: Fundamental Aerospace Classes. Aircraft: MAE 5500, 5510, 5580; Space: MAE 5520, 5530, 5930 (Dynamics of Space Flight); Propulsion: MAE 5420, 5540. Group 2: Aerospace Support Classes. MAE 5020, 5060, 5310, 5440.
Department of Mechanical and Aerospace Engineering

Spring Semester (14 credits)
MAE 2450 Engineering Numerical Methods II ......................... 3
MAE 3340 Instrumentation and Measurements ................................. 3
MAE 3440 (QI) Heat and Mass Transfer ........................................ 3
MAE 3800 Design I ....................................................................... 2
MAE 4300 Machine Design ............................................................. 3

Senior Year (31-32 credits)
MAE 4400 (CI) Fluids/Thermal Laboratory (F) ................................. 2
MAE 4800 (CI) Design II (F, Sp) .................................................... 3
MAE 5300 Vibrations (F) ............................................................... 3
Manufacturing Technical Elective courses ........................................... 15
University Studies Breadth course ................................................. 3
University Studies Depth Humanities and Creative Arts (DHA)
and Depth Social Sciences (DSS) courses .................................... 5-6

Manufacturing Engineering Approved Technical Elective Courses
Students must choose five courses from the following list:
MAE 5020 Finite Element Methods in Solid Mechanics I (F) ............... 3
MAE 5310 Dynamic Systems and Controls (F) (3 cr) or
MAE 5620 Manufacturing Automation (F) (3 cr) ............................... 3
MAE 5600 Manufacturing Process Planning and Statistical Quality
Control (F) (3 cr) ........................................................................ 3
MAE 5630 Machining Theory and Applications (Sp) ......................... 3
MAE 5640 Design for Manufacturability (F) ...................................... 3
MAE 5650 Nontraditional and Additive Manufacturing Processes (Sp) 3
MAE 5660 Transport Phenomena in Manufacturing Processes (Sp) .... 3
MAE 5680 Manufacturing Planning and Simulation (Sp) ..................... 3
MHR 5350 Contemporary Manufacturing Management (F) ............... 3
STAT 5200 Design of Experiments (Sp) ......................................... 3

Computational Engineering Emphasis
In addition to completing the pre-professional program, students who
choose to graduate with the Computational Engineering emphasis
must complete the following courses as their elective selection.

Junior Year (31 credits)
Fall Semester (17 credits)
MAE 2200 Engineering Numerical Methods I ................................. 2
MAE 3040 Mechanics of Solids ....................................................... 3
MAE 3320 Advanced Dynamics ...................................................... 3
MAE 3400 Therodynamics II ........................................................... 3
MAE 3420 Fluid Mechanics ............................................................ 3
MATH 4700 Engineering Mathematics and Statistics ................... 3

Spring Semester (14 credits)
MAE 2450 Engineering Numerical Methods II ............................... 3
MAE 3340 Instrumentation and Measurements ............................... 3
MAE 3440 (QI) Heat and Mass Transfer ........................................ 3
MAE 4300 Machine Design ............................................................. 3

Senior Year (34-35 credits)
Fall Semester (17 credits)
MAE 4400 (CI) Fluids/Thermal Laboratory ................................. 2
MAE 5020 Finite Element Methods in Solid Mechanics I ............... 3
MAE 5300 Vibrations .................................................................. 3
ENGR 5500 High Performance Computing for Engineers ............... 3
University Studies Breadth course ................................................. 3
University Studies Depth Social Sciences (DSS) course .................... 3

Spring Semester (17-18 credits)
MAE 4800 (CI) Design II ................................................................. 3
MAE 5440 Computational Fluid Dynamics ..................................... 3
MATH 5620† Numerical Solutions of Differential Equations ............. 3
MAE Technical Elective course ....................................................... 3
University Studies Breadth course ................................................. 3
University Studies Depth Humanities and Creative Arts
(DHA) course ............................................................................. 2-3

†MATH 5620 fulfills the requirement for a Math Minor.

Financial Support
Scholarships, assistantships, grants-in-aid, and work-study programs
are available to undergraduate students through the University. In
addition, the MAE department employs undergraduates to assist in
ing engineering research and development. Aerodynamics, design of
instrumentation and payloads for the upper atmosphere and space,
blended structures, and manufacturing processes and controls are
some of the research programs that involve undergraduate students.

Concurrent BS/Master’s Program
The concurrent BS/Master’s program allows engineering students
to begin taking graduate-level classes during their senior year. This
permits them to complete requirements for both the BS degree and
the master’s degree concurrently during two years. Students in this
program have a greater selection of graduate courses, since many
graduate courses are taught during alternate years. In addition, the
student’s senior design project could be a start for a graduate design
project or thesis. After completing their BS degree, students in the
program can earn a master’s degree in only one additional year. Both
the BS and the master’s degree can generally be earned with 150 total
credits, although students should note that a Plan C MS requires 3
extra credits. In order to qualify for the concurrent program, students
must have a 3.4 GPA for the 60 credits completed most recently.
Finally, students with a master’s degree can expect a much higher
starting salary following graduation. (For more information, see College
of Engineering section of this catalog, pages 123-124.)

Departmental Honors
Students who would like to experience greater academic depth within
their major are encouraged to enroll in departmental honors. Through
original, independent work, Honors students enjoy the benefits of
close supervision and mentoring, as they work one-on-one with faculty
in select upper-division departmental courses. Honors students also
complete a senior project, which provides another opportunity to
collaborate with faculty on a problem that is significant, both personally
and in the student’s discipline. Participating in departmental honors
enhances students’ chances for obtaining fellowships and admission
to graduate school. Students may enter the Honors Program at
almost any stage in their academic career, including at the junior (and
sometimes senior) level. The campus-wide Honors Program, which is
open to all qualified students regardless of major, offers a rich array of
cultural and social activities, special classes, and the benefit of Honors
early registration. Interested students should contact the Honors
Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional
information can be found online at: http://www.usu.edu/honors/
Department of Mechanical and Aerospace Engineering

**Additional Information**

For more information about Bachelor of Science requirements and the sequence in which courses should be taken, see major requirement sheet, available from the Mechanical and Aerospace Engineering Department, or online at: [http://www.usu.edu/majorsheets/](http://www.usu.edu/majorsheets/)

**Graduate Programs**

**Admission Requirements**

All students intending to pursue graduate studies at Utah State University must complete and return an Application for Admission to the School of Graduate Studies. In addition to the general graduate admission requirements listed on pages 101-102, the department requires all graduate applicants to have a bachelor’s degree from an accredited institution in Mechanical Engineering, Aerospace Engineering, Manufacturing Engineering, or a closely related engineering discipline. A minimum GPA of 3.0 for MS applicants and 3.3 for PhD applicants is required for the last 60 semester or 90 quarter credits earned. All MAE graduate students are expected to be well-acquainted with either the FORTRAN or C programming language. Those students who do not have a BS degree in an appropriate engineering discipline may be admitted with nonmatriculated status and required to complete some remedial requirements. Applicants are also required to submit evidence of potential graduate-level success through GRE scores in the verbal and quantitative categories.

**Specializations**

The Department of Mechanical and Aerospace Engineering offers ME, MS, and PhD degrees in Mechanical Engineering, with specializations in Aerospace Engineering, Manufacturing Engineering, and Mechanical Engineering.

**Aerospace Engineering** addresses atmospheric and space flight. Included are such disciplines as computational fluid dynamics, experimental fluid mechanics, aerodynamics, aircraft flight dynamics, aircraft design, spacecraft orbital mechanics, spacecraft attitude motion and control, aircraft and spacecraft propulsion systems, space system design, thermal management of space deployed systems, and the space environment. Mechanical Engineering graduates choosing the aerospace engineering specialization may pursue careers in such areas as aircraft design and development, aircraft flight testing, spacecraft and space systems design, and spacecraft trajectory design and analysis, as well as the broader, traditional mechanical engineering fields.

**Manufacturing Engineering** concentrates on the theory of manufacturing systems, including manufacturing processes, the design of manufacturing systems, product design, productivity, quality, and life cycle analysis. Principal areas of emphasis include manufacturing automation, machining theory, mold flow analysis, and materials joining, as well as flexible manufacturing systems and computer-integrated manufacturing. Manufacturing engineers are prepared to pursue product and process design careers in virtually all manufacturing industries, including electronics, food processing, and petroleum industries.

**Mechanical Engineering** deals with the creation of the mechanical systems and machines that serve society. Areas of emphasis include solid mechanics, thermal/fluids, and dynamics and control. The solid mechanics emphasis is concerned with the mechanics of displacement and stress analysis combined with material science for selection of an optimum design. Students learn to use the finite element method as well as classical methods for the determination of stresses, strains, and displacements. Included are studies of elasticity, plasticity, and failure in traditional metals and high-tech composite materials. The thermal/fluids emphasis is concerned with the transport of mass, momentum, and energy in solids, liquids, and gasses. Included within its scope are the fundamental studies of thermodynamics, heat transfer, and fluid mechanics. The dynamics and control emphasis is concerned with describing and controlling the motion of mechanical systems. Included within its scope are the fundamental studies of dynamics, kinematics, vibrations, control theory, hydraulics and pneumatics, electromechanical systems, and machine design. Graduates who select the broad mechanical engineering specialization are prepared to pursue careers in such widely diverse disciplines as aerospace, automotive, building, chemical, defense, electronics, environmental engineering, food processing, heating and air conditioning, heavy equipment, machine tools, manufacturing, nuclear, petroleum, public utilities, and solar energy.

**Degree Programs**

The Plan A MS Degree requires 9 credits of graduate-level coursework in Mechanical Engineering fundamentals; 12 credits of 6000-level (or above) engineering coursework, exclusive of MAE 6930, 6950, 6970, and 6990; a minimum of 3 credits of 5000-level (or above) coursework in approved mathematics; and 10 credits selected from any one of five declared areas of emphasis. A minimum of 30 credits is required beyond the BS, including a 6-credit thesis (MAE 6970). The thesis must meet School of Graduate Studies requirements.

The Plan B MS Degree requires 9 credits of graduate-level coursework in Mechanical Engineering fundamentals; 12 credits of 6000-level (or above) engineering coursework, exclusive of MAE 6930, 6950, 6970, and 6990; a minimum of 3 credits of 5000-level (or above) coursework in approved mathematics; and either 12 credits selected from any one of five declared areas of emphasis or 15 credits selected from any two of the areas. A minimum of 30 credits is required beyond the BS, which includes a 3-credit report (MAE 6950) written to thesis standards.

The Plan C MS Degree requires 9 credits of graduate-level coursework in Mechanical Engineering fundamentals; 18 credits of 6000-level (or above) engineering coursework, exclusive of MAE 6930, 6950, 6970, and 6990; a minimum of 3 credits of 5000-level (or above) coursework in approved mathematics; and either 15 credits selected from any one of five declared areas of emphasis, or 18 credits selected from any two of the areas. A minimum of 33 credits is required beyond the BS, which may not include a thesis (MAE 6970), but may include up to 3 credits of Design Project (MAE 6950). MAE 6950 requires a report written to thesis standards. Students are not required to defend the report. However, the report must be approved by the major professor.

The Master of Engineering Degree requires 15 credits of 6000-level (or above) engineering coursework exclusive of MAE 6930, 6950, 6970, 6990, 7930, 7970, and 7990; a minimum of 3 credits of 5000-level (or above) coursework in approved mathematics; and either 15 credits selected from Group A or at least 9 credits from Group A and the remainder chosen from Group B. (Contact Bonnie Ogden at bogden@engineering.usu.edu for requirement details.) A minimum of 30 credits is required beyond the BS, which may not include a thesis (MAE 6970), but may include up to three credits of Design Project (MAE 6950). MAE 6950 requires a report written to thesis standards. Students are not required to defend the report. However, the report must be approved by the major professor.
The PhD Degree requires 24 credits of 6000-level (or above) engineering coursework, exclusive of MAE 6930, 6950, 6970, 6990, 7930, 7970, and 7990; a minimum of 6 credits of 5000-level (or above) coursework in approved mathematics; and 18 credits selected from any one of five declared areas of emphasis. A minimum of 90 credits is required beyond the BS, including a dissertation (MAE 7970). The dissertation must meet School of Graduate Studies requirements and be at least 24 credits, but no more than 39 credits. A Qualifying Exam is required and must be passed before completing 18 credits at the PhD level. A paper with the student as author or coauthor, submitted for publication in a refereed journal, is also required.

GPA Requirement
A 3.0 GPA is the minimum acceptable for an ME or MS degree from USU. A PhD degree from USU requires a minimum GPA of 3.3.

Course Requirements
The specific course requirements for the ME, MS, and PhD degrees offered through the department may occasionally change. For this reason, prospective students are advised to seek current details concerning graduate degree requirements and program coursework by contacting the department or sending an Internet e-mail request to: Bonnie Ogden at bogden@engineering.usu.edu.

Research
The Department of Mechanical and Aerospace Engineering is conducting research in all three of the areas of specialization listed above. Departmental research projects are funded by both government agencies and private industry. Current research topics include analytical and experimental structural dynamics, computational and experimental fluid dynamics, aerodynamics, plastics and composite materials, numerical modeling and design of composite structures, buried structures, thermodynamics, heat transfer, cryogenics, intelligent control systems, manufacturing automation, spacecraft control, design and analysis of space systems, orbital mechanics, remote sensing, robotics, design theory and methodology, and production modeling and simulation.

Financial Assistance
A number of teaching and research assistantships are available to graduate students through the department, and are awarded on a competitive basis each year. In addition, scholarships covering the nonresident portion of tuition are available each semester, on a competitive basis, to nonresident students who hold a graduate assistantship paying at least $350 per month. Students interested in working part time as teaching or research assistants should apply to the department by March 1 for the coming academic year.

Acceptance to pursue graduate studies in the Department of Mechanical and Aerospace Engineering does not imply a commitment to any type of financial aid. All awards for financial aid are made on a competitive basis after applicants are admitted to graduate school. All students who receive any type of financial support from the University or who are supplied University space for study or research must carry a minimum of 9 credits of approved coursework for an MS or ME degree and a minimum of 9 credits of approved coursework for a PhD degree each semester while receiving such support.

Mechanical and Aerospace Engineering Faculty

Professors
Christine E. Hailey, engineering education, thermal/fluid sciences
Alma P. Moser, engineering mechanics, piping systems
Warren F. Phillips, aerodynamics, flight mechanics
Robert E. Spall, thermal/fluids, CFD, computational
Byard D. Wood, solar energy for heating and cooling, heat and mass transfer

Adjunct Professor
Charles M. Swenson, space science and engineering

Trustee Professor Emeritus
J. Clair Batty, thermal science, cryogenics, space systems

Professors Emeritus
P. Thomas Blotter, structural dynamics
Ralph H. Haycock, mechanics, manufacturing
Russell M. Holdredge, heat transfer, fluid mechanics
Carol D. Spear, material science
Edward W. Vendell, Jr., cryogenics, heat transfer, thermal systems design

Associate Professors
Heng Ban, thermal/fluids, thermophysical properties, microfluidics, energy and environment
Steven L. Folkman, applied mechanics, structural dynamics, space structures, buried pipe systems
Thomas H. Fronk, mechanics of composites and materials
R. Rees Fullmer, manufacturing, controls, robotics, dynamics, spacecraft

Adjunct Associate Professor
Robert T. Pack, remote sensing, optoelectronics, lidar sensor systems

Assistant Professors
David K. Geller, spacecraft guidance and navigation
Thomas Hauser, computational fluid dynamics, thermal/fluids, numerical methods, high-performance computing
Leijun Li, manufacturing, materials joining
Barton L. Smith, thermal/fluids, experimental fluid mechanics
Brent E. Stucker, advanced manufacturing and materials
Stephen A. Whitmore, high-speed aerodynamics, astrodynamics

Adjunct Assistant Professors
Robert T. Pack, remote sensing, optoelectronics, lidar sensor systems

Assistant Professors
John Devity, solid modeling, computer graphics
Durga Janaki Ram Gabbita, advanced material processing, additive manufacturing
Scott M. Jensen, thermal management of space systems
Angela Minichelli, heat transfer, thermodynamics
Paul J. Mueller, thermal science, propulsion
Steven R. Wassom, spacecraft instrumentation design

Adjunct Research Assistant Professor
Adjunct Research Assistant Professor
Randy J. Jost, electromagnetic fields, solid state, microwaves

Principal Lecturer
Carl G. Wood, design, manufacturing

Undergraduate Programs

Objectives

Military Science (Army ROTC) focuses on leadership development. Students pursue the major of their choice while studying Military Science, and graduate with the ability to function effectively as leaders. Upon completion of Army ROTC and graduation from college, students become commissioned officers in the active Army, Army Reserve, or National Guard.

Instructors, textbooks, uniforms, and equipment are provided at no cost to the student or the University. All contracted students receive between $300-500 per month (up to 10 months per academic year). Army ROTC also covers the cost of tuition and fees for Army ROTC scholarship students and provides a $900-per-year book allowance.

The Margin of Difference

Army ROTC cadets learn to be leaders and receive hands-on experience in managing physical, financial, and human resources. They develop self-confidence and superior decision-making skills. Employers value these leadership qualities and recognize associated potential.

Four-Year Program

The traditional Army ROTC program covers four years consistent with normal undergraduate progression (freshman-senior). The four-year program is divided into two parts: the basic course and the advanced course. The basic course is usually taken during the first two years of college. It covers subjects such as mountaineering, land navigation, wilderness survival, leadership development, small unit tactics, weapons marksmanship, and military history. This program is designed for high-performing students who wish to try Military Science without obligation, while enhancing their leadership skills and self-confidence. Upon successful completion of the basic course, students are eligible to enter the advanced course.

Advanced course requirements are normally completed during the junior and senior years. The advanced course further develops and refines leadership competencies, and qualifies the student for a commission in the United States Army. Advanced course students receive a $450-500 per month tax-free subsistence allowance (up to 10 months per year), and attend a paid five-week leader development course between their junior and senior years.

Two-Year Program

This is a special program for junior and community college transfer students or for students who did not take Army ROTC during their first two years of college. To enter the two-year program, a student must have completed Basic Training in a military service or participate in five weeks of basic leadership instruction. This instruction usually takes place between the sophomore and junior year. Students are paid for attending this instruction, have the opportunity to compete for two-year scholarships, and may receive academic credit. Students who qualify for the two-year program are enrolled directly in the advanced course.

Course Requirements for Military Science Programs

Basic Course Requirements (8 credits)
- MS 1010 Introduction to Leadership ........................................ 2
- MS 1020 Leadership Skills .................................................... 2
- MS 2010 Leadership Development .......................................... 2
- MS 2020 Small Unit Leadership .............................................. 2

Advanced Course Requirements (15 credits)
- MS 3010 Organizational Leadership and Small Unit Tactics ........ 3
- MS 3020 Advanced Tactics and Operations .............................. 3
- MS 4010 Command and Staff Functions .................................. 3
- MS 4020 Officer Perspectives ................................................ 3
- MS 4610 Military History Seminar (3 cr) or
  HIST 4810 American Military History (3 cr) ............................ 3

Scholarships

Army ROTC provides numerous scholarship opportunities. High school seniors may qualify for the four-year Army ROTC scholarship. College students may qualify for three- or two-year scholarships. These scholarships pay the cost of tuition and fees, a flat rate for textbooks and classroom supplies, and a monthly cash stipend between $2,700-4,500 per year. The Green to Gold scholarship allows soldiers serving on active duty to leave the Army early and attend college/ROTC full time while receiving scholarship benefits. Other scholarship opportunities include: room and book grants and the Western Undergraduate Exchange (WUE) program. Call or visit the Department of Military Science for details.

Placement Credit For Veterans

Veterans may qualify for advanced course placement based on prior military experience. They can take full advantage of veteran’s benefits and receive stipend payments from Army ROTC concurrently.

Simultaneous Membership Program (SMP)

This program is available to advanced course cadets who wish to serve in the Army Reserve or National Guard while attending college and pursuing a commission through Army ROTC. SMP students are eligible to receive reserve drill pay, tuition assistance, other monetary incentives, and $450-500 per month tax-free subsistence allowance (up to 10 months per academic year) from Army ROTC. Call or visit the Department of Military Science for details.

Leave of Absence

If students (including scholarship recipients) wish to take a leave of absence to serve a mission for their church, they can do so conveniently between their freshman and sophomore years.

Commission Requirements

In order to qualify for a commission as a Second Lieutenant in the United States Army, each student must:
1. Complete all required Military Science instruction while attending college as a full-time student, and obtain a baccalaureate or higher degree prior to age 27 (age waiver can be granted for prior military service or other extenuating circumstances).

2. Meet medical and physical fitness standards.

4. Successfully complete the advanced summer camp.

5. Be recommended by the Professor of Military Science.

**Service Obligation**

There is no military service obligation for basic course students, unless they have received an Army ROTC scholarship. Advanced course (contracted) and scholarship students incur an obligation to serve in the active Army, Army Reserve, or National Guard.

**Minor in Military Science**

**Grade Requirements**

Students must obtain a grade of C or better in all courses used toward the minor, as well as maintain a cumulative GPA of 2.5 for these courses.

**Credit Requirements**

A minimum of 21 credits must be earned in Military Science and related courses, as follows:

**Course Requirements for Military Science Minor (21 credits)**

- **MS 3010** Organizational Leadership and Small Unit Tactics ..................3
- **MS 3020** Advanced Tactics and Operations ........................................3
- **MS 4010** Command and Staff Functions ............................................3
- **HIST 4810** American Military History (3 cr) or
  - **MS 4610** Military History Seminar (3 cr) ...........................................3

Electives (must be approved by department head) ...............................6

**Elective Course Offerings**

- **MS 2400** Physical Readiness .................................................................1
  (repeatable; take 1 credit per semester)
- **MS 2420** Ranger Preparation ................................................................2
- **MS 2430** Air Assault ..............................................................................2
- **MS 2440** Airborne Operations ............................................................2
- **MS 2510** ROTC Basic Camp .................................................................1-6
- **MS 3110** Staff Organization and Operations ...........................................1-6
- **MS 3210** Independent Study ...................................................................1-3
- **MS 4110** Advanced Staff Operations ....................................................1-3
- **MS 4400** Advanced Physical Readiness ................................................1
- **MS 4510** ROTC Advanced Camp ...........................................................1-10
- **MS 4520** Cadet Troop Leadership Training ...........................................2
- **MS 4610** Military History Seminar .......................................................1-3

**Additional Information**

For more detailed information about course requirements for Military Science programs, as well as information about career opportunities, see the major requirement sheet, which is available from the Military Science Department, or online at:

High Brass/Director of Education:
Thomas Rohrer, Fine Arts 104, (435) 797-3004, rohrer@hass.usu.edu

Low Brass:
Todd L. Fallis, Fine Arts 120, (435) 797-3005, tfallis@hass.usu.edu

Percussion:
Dennis D. Griffin, Fine Arts 114, (435) 797-3008, dgriffin@cc.usu.edu

Piano:
Gary Amano, Fine Arts 201, (435) 797-3028, gamano@hass.usu.edu
R. Dennis Hirst, Fine Arts 101, (435) 797-3257, dennis.hirst@usu.edu

Strings:
Sergio Bernal, Fine Arts 218B, (435) 797-0487, sergio.bernal@usu.edu

Violin:
William Fedkenheuer, Fine Arts 206, (435) 797-7130 willfed@cc.usu.edu
Rebecca J. McFaul, Fine Arts 104C, (435) 797-3597, rebecca@frystreetquartet.com

Viola:
Russell Fallstad, Fine Arts 208, (435) 797-3092, russell@frystreetquartet.com

Cello/String Bass:
Anne Francis, University Reserve 21, (435) 797-3086, anne@frystreetquartet.com

Clarinet/Oboe:
Nicholas E. Morrison, Fine Arts 103, (435) 797-3506, nicholas.morrison@usu.edu

Flute:
Leslie Timmons, Fine Arts 105, (435) 797-3699, leslie.timmons@usu.edu

Saxophone:
Jon Gudmundson, Fine Arts 212, (435) 797-3003, gudmundson@hass.usu.edu

Bassoon:
R. Dennis Hirst, Fine Arts 101, (435) 797-3257, dennis.hirst@usu.edu

Voice:
Cindy J. Dewey, Fine Arts 208B, (435) 797-3055, cdewey@hass.usu.edu

Opera:
Lynn Jemison-Keisker, Fine Arts Visual 129, (435) 797-3038, lkeisker@hass.usu.edu

Music (Undecided):
Bruce M. Saperston, Fine Arts 107, (435) 797-3000, bsaperston@hass.usu.edu

Degrees offered: Bachelor of Music (BM) in Music; Bachelor of Science (BS) in Music Therapy

Undergraduate emphases: BM degree in Music—Music Education (Band), Music Education (Orchestra), Music Education (Choral), Music Education (General); Piano Performance, String Performance, Vocal Performance, Wind/Brass/Percussion Performance, Guitar Performance; Piano Pedagogy

Undergraduate Programs

Objectives

The Department of Music provides instruction in music by: (1) offering service courses which contribute to the Liberal Arts major in the College of Humanities, Arts and Social Sciences and the College of Science, and to the University Studies Program of the University; (2) offering specific sequences of courses leading to professional preparation in music education, music therapy, and performance/pedagogy; and (3) providing public musical service to the University and the community.

The specific objectives of the programs in music for the music major are fourfold: (1) to prepare licensed music teachers to serve effectively in elementary and secondary schools; (2) to prepare musically talented students for careers as professional performers and/or studio teachers; (3) to prepare board-certified music therapists to serve in educational and therapeutic settings; and (4) to prepare music students for graduate study in their areas of specialization.
Requirements

Admission Requirements
Admission requirements for the Department of Music include those described for the University in this catalog (see pages 16-20). In addition, transfer students must have a minimum 3.00 GPA in music courses and a minimum 2.75 GPA overall. All students interested in majoring in Music or Music Therapy will be given pre-music major status until they have completed the required audition/interview process, as verified by their area advisor through the Change of Major Form. It is strongly recommended that prospective majors complete their audition/interview during the department’s scholarship auditions in February preceding matriculation at USU. To schedule an audition/interview, contact the department at (435) 797-3015.

Prospective majors in Music Therapy should complete the audition/interview prior to May 1 of the year of admission.

GPA Requirement
Students majoring in music, music education, or music therapy must maintain a minimum GPA of 3.00 in music courses and a minimum 2.75 GPA overall. All core curriculum classes must be completed with a C- or higher in order to progress to the next courses in sequence. A student receiving a grade lower than C- is placed on probation, and may repeat the course once to raise the grade to C- or higher. If the grade received on the repeat is lower than C-, the student is no longer a music, music education, or music therapy major.

Music Core Curriculum Requirements (32-37 credits)
All majors in the department must complete the music core curriculum. Although it is possible to complete the degree if these courses are begun after the first year of study, the department strongly recommends that students begin the core curriculum during the first year, completing the courses in the following recommended sequence.

Freshman Year
Fall Semester
MUSC 1110 Music Theory I .................................................. 3
MUSC 1130 Aural Skills I ..................................................... 1
MUSC 1170 Keyboard Harmony I .......................................... (1)

Spring Semester
MUSC 1120 Music Theory II ............................................... 3
MUSC 1140 Aural Skills II ................................................... 1
MUSC 1180 Keyboard Harmony II ....................................... (1)

Sophomore Year
Fall Semester
MUSC 2110 Music Theory III ............................................. 3
MUSC 2130 Aural Skills III .................................................. 1
MUSC 2170 Keyboard Harmony III ...................................... 1
MUSC 2180 Computer Applications in Music ....................... 2

Spring Semester
MUSC 2140A Aural Skills IV ............................................... (1)
MUSC 3110 Music History I: Origins through Baroque .......... 3
MUSC 3140 Musical Form and Analysis ............................... 3

Junior Year
Fall Semester
MUSC 2350 Conducting .................................................... 2
MUSC 3120 Music History II: Classical and Romantic Periods ... 3

Spring Semester
MUSC 2120 (CI) Music Theory IV ...................................... 3
MUSC 3180a Scoring and Arranging ................................... (2)
MUSC 3190 (CI) Music History III: Music of the Twentieth Century .. 3

Students should note that MUSC 2180, 2350, and 3180 may be taken during different semesters, if necessary. Also, since MUSC 2140 is not required for all music areas, students should contact their advisor to determine whether or not they should enroll in this course. Additional requirements for specific emphasis areas are available from the Music Department Student Services Office, Fine Arts 102.

Music majors must maintain a minimum GPA of 3.00 in Music courses. A grade of C- or better must be earned in all core and emphasis classes. A 2.75 cumulative GPA is required for graduation. Additional requirements, such as piano proficiency, concert attendance, etc., are stipulated in the Department of Music’s Student Handbook.

Emphasis Area
Students must select one area of emphasis and complete the required coursework for that emphasis. The student’s transcript will show the area of emphasis selected by the student from those listed below. Please note that all music majors are required to participate in major departmental ensemble organizations each semester. The student and advisor will determine the organizations in which the student will participate.

Bachelor of Music Degree Composite Major in Music Education
Music majors must maintain a minimum GPA of 3.0 in Music courses. A grade of C- or better must be earned in all core and emphasis classes. A 2.75 cumulative GPA is required for graduation. Additional requirements, such as piano proficiency, concert attendance, etc., are stipulated in the Department of Music’s Student Handbook.

Emphasis Area
Students must select one area of emphasis and complete the required coursework for that emphasis. The student’s transcript will show the area of emphasis selected by the student from those listed below. Please note that all music majors are required to participate in major departmental ensemble organizations each semester. The student and advisor will determine the organizations in which the student will participate.

Music Education (Band) (44-49 credits)

**Secondary Teacher Education Program (STEP) (26 credits)**

Admission to the STEP curriculum requires action by the Office of the Associate Dean for Teacher Education, Graduation, and Educator Licensing, as well as the department where the major work is being offered. Students are not generally permitted to enroll in the following STEP courses unless they have been admitted to the STEP.

**Level 1 Courses (7 credits)**

Sample Four-year Plan for Music Major, Music Education (Band) Emphasis

Minimum GPA for Admission: 2.75, USU; 2.75 Career
Minimum GPA for Graduation: 3.00, major courses; 2.00, USU; 2.75 Career
Minimum Grade Accepted: C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. In addition, students should refer to the Music Department's Student Handbook. To make an appointment with a professional advisor, call (435) 797-3883.

Bachelor of Music Degree
(Performance Emphases)
(2.75 cumulative GPA; 3.00 GPA in Music courses)
The Bachelor of Music Degree with one of the performance emphases requires completion of University Studies Requirements, Core Requirements, and Emphasis Area Requirements. A grade of C- or better must be earned in all core and emphasis classes.

Music Core Curriculum Requirements (35 credits)
All of the Music Core Curriculum courses (shown on page 416) are required, with the following exceptions:
MUSC 1170, 1180, and 2140 are not required for the Guitar Performance Emphasis.
MUSC 2140 is not required for the Wind/Brass/Percussion Performance Emphasis.
MUSC 3180 is not required for the Vocal Performance Emphasis.

Emphasis Area
Students must select one area of emphasis and complete the required coursework for that emphasis. The student’s transcript will show the area of emphasis selected by the student from those listed below. Please note that all music majors are required to participate in major departmental ensemble organizations each semester. The student and an advisor will determine the organizations in which the student will participate.

Piano Performance (63-66 credits)
MUSC 1420 Pedagogy Practicum (F,Sp) .................................. 9
MUSC 1430 Piano Pedagogy I (F) .......................................... 3

MUSC 1440 Piano Pedagogy II (Sp) ....................................... 3
MUSC 2420 Piano Literature I (F) ........................................ 3
MUSC 2430 Piano Literature II (Sp) .................................... 3
MUSC 2440 Piano Literature III (F) ........................................ 3
MUSC 2450 Piano Literature IV (Sp) .................................. 3
MUSC 3400 Individual Piano Instruction for Music Majors (F,Sp,Su) 12
MUSC 3410 Ensemble and Accompanying (Piano) (F,Sp,Su) .... 6
MUSC 3420 Keyboard Skills I (F) ....................................... 3
MUSC 3430 Keyboard Skills II (Sp) .................................... 3
MUSC 4210 Advanced Music Form and Analysis (F) ........... 3
MUSC 4410 Advanced Piano Pedagogy I (F) ......................... 3
MUSC 4420 Advanced Piano Pedagogy II (Sp) ..................... 3
MUSC 4920 Individual Recital (F,Sp,Su) ................................ 3

String Performance (49 credits)
MUSC 2490 Individual Piano Instruction (Second Instrument) for Music Majors (F,Sp,Su) .............................................. 2
MUSC 3500 Symphony Orchestra (F,Sp) .............................. 8
MUSC 4210 Advanced Music Form and Analysis (F) .......... 3
MUSC 4500 String Ensemble (F,Sp) ...................................... 8
MUSC 4920 Individual Recital (Sophomore) (F,Sp,Su) ........... 2
MUSC 4920 Individual Recital (Junior) (F,Sp,Su) ................. 2
MUSC 4920 Individual Recital (Senior) (F,Sp,Su) ................. 2
Music Electives................................................................. 6

Individual String Instruction* (16 credits)
Students must complete credits from one of the following:
MUSC 4510 Individual Violin Instr for Music Majors (F,Sp,Su) .... 2
MUSC 4520 Individual Viola Instr for Music Majors (F,Sp,Su) .... 2
MUSC 4530 Individual Cello Instr for Music Majors (F,Sp,Su) .... 2
MUSC 4540 Individual String Bass Instr for Music Majors (F,Sp,Su) .... 2

Vocal Performance (56-62 credits)
MUSC 1610 Introduction to Musical Theatre (Sp) (2 cr) or 
MUSC 1620 Introduction to Opera (F) (2 cr) ......................... 2
MUSC 2490 Individual Piano Instruction (Second Instrument) for Music Majors (F,Sp,Su) .............................................. 2
MUSC 2660 Italian Diction for Singers (Sp) ............................ 2
MUSC 2670 German Diction for Singers (F) ......................... 2
MUSC 2680 French Diction for Singers (Sp) ......................... 2
MUSC 3600 Opera Theatre Production (F,Sp) ...................... 6
MUSC 3610 Vocal Repertory I (F) ...................................... 2
MUSC 3620 (CI) Vocal Repertory II (Sp) .............................. 2
MUSC 3630 Vocal Pedagogy I (F) ...................................... 2
MUSC 3640 Vocal Pedagogy II (Sp) .................................... 2
MUSC 3670 Individual Vocal Instruction for Music Majors (F,Sp,Su) .... 16
MUSC 4920 Individual Recital (F,Sp,Su) ................................ 4
Major Performance Group (MUSC 4600, 4650, 2610, or 2600) .... 8
Italian or German or French (2 semesters) ......................... 6

All students selecting the Vocal Performance Emphasis must complete performance level 5 in piano or MUSC 2490 until level requirement is met.

Wind/Brass/Percussion Performance (48-56 credits)
Individual Instruction* (12 credits)
Students must complete 12 credits from one of the following three groups of courses in their area (Individual Woodwind Instruction or Individual Brass Instruction or Individual Percussion Instruction).

Individual Woodwind Instruction
MUSC 3710 Individual Flute Instr for Music Majors (F,Sp,Su) .... 1-2
MUSC 3720 Individual Oboe Instr for Music Majors (F,Sp,Su) .... 1-2
MUSC 3730 Individual Clarinet Instr for Music Majors (F,Sp,Su) .... 1-2

Utah State University 2007-2009 General Catalog 421
Department of Music

MUSC 3740 Individual Bassoon Instr for Music Majors (F,Sp,Su) ...............1-2
MUSC 3750 Individual Saxophone Instr for Music Majors (F,Sp,Su) ........1-2

Individual Brass Instruction
MUSC 3810 Individual Trumpet Instr for Music Majors (F,Sp) ...............1-2
MUSC 3820 Individual Trombone Instr for Music Majors (F,Sp) ...............1-2
MUSC 3830 Individual French Horn Instr for Music Majors (F,Sp) ..........1-2
MUSC 3840 Individual Tuba/Euphonium Instr for Music Majors (F,Sp) ......1-2

Individual Percussion Instruction
MUSC 3860 Individual Percussion Instr for Music Majors (F,Sp,Su) ....1-2

Large Ensembles (8 credits)
Select 8 credits from the following:
MUSC 3500 Symphony Orchestra (repeatable) (F,Sp) .........................1
MUSC 3790 Symphonic Band (repeatable) (F,Sp) ...............................1
MUSC 4700 Wind Orchestra (repeatable) (F,Sp) ...............................1

Small Ensembles (4 credits)
Select 4 credits from the following five courses:
MUSC 3700 Woodwind Ensemble (F,Sp) ........................................1-2
MUSC 3780 Flute Ensemble (F) ......................................................1
MUSC 3800 Trombone Ensemble (F,Sp) .........................................1
MUSC 3850 Brass Ensemble (F,Sp) .................................................1
MUSC 3870 Percussion Ensemble (F,Sp) .........................................1

Additional Courses (24-32 credits)
MUSC 1800 Percussion Techniques (F) .............................................1
MUSC 2700 Woodwind Techniques I: Flute, Clarinet (F) (2 cr) or (1 cr) or (Sp) (1 cr) or
MUSC 2710 Woodwind Techniques II: Saxophone, Oboe, Bassoon (Sp) (1 cr) or
MUSC 2740 Recorder Techniques (Sp) (1 cr) ....................................1
MUSC 2800 Brass Techniques I: Trumpet, French Horn (F) (1 cr) or
MUSC 2810 Brass Techniques II: Trombone, Tuba, Euphonium (Sp) (1 cr) .................................................................1
MUSC 3240 Instrumental Methods and Materials (Sp) (2 cr) or
MUSC 4930 Readings and Conference (Independent Study with major prof in instrumental pedagogy) (2 cr) (F,Sp,Su) ................2
MUSC 3900 Jazz Improvisation (F,Sp) ..............................................2
MUSC 4920 Individual Recital (Junior) (F,Sp,Su) .............................1-2
MUSC 4920 Individual Recital (Senior) (F,Sp,Su) .............................3-6
Secondary Instrument Coursea .....................................................2
Electives (at least 4 credits in Music)b ...........................................11-15

5A student in this program will study privately each semester of residency.
6A student in this program will participate in a large ensemble for each semester of residency.
7Choose 2 credits from: MUSC 2470, 2490, 2750, 2760, 2770, 2780, 2790, 2850, 2860, 2870, 2880, 2890.
8At least 3 credits must be in a course that is designated as Communications Intensive and at least 3 credits must be in a course that is designated as Quantitative Intensive, such as ECE 3200, Science of Sound.

Guitar Performance (54 credits)
MUSC 1150 Beginning Group Piano (Sp) (1 cr) or
MUSC 1160 Intermediate Group Piano (Sp) (1 cr) or
MUSC 2490 Individual Piano Instruction (Second Instrument) for Music Majors (F,Sp,Su) (1 cr, repeatable) ..................2
MUSC 2550 Guitar Styles (Blues/Bluegrass) (F) .................................2
MUSC 2560 Guitar Styles (Jazz/Classical) (Sp) .................................2
MUSC 2570 Fingerboard Theory I (F) ..............................................2
MUSC 2580 Fingerboard Theory II (Sp) ...........................................2
MUSC 3550 Individual Guitar Instruction for Music Majors (F,Sp,Su) .................................................................10
MUSC 3560 Guitar History and Literature (Sp) ..................................3
MUSC 3570 Guitar Pedagogy I (F) ....................................................2
MUSC 3580 Guitar Pedagogy II (Sp) .................................................2
MUSC 3590 Electric Guitar Ensemble (F,Sp) (1 cr, repeatable) or
MUSC 4550 Acoustic Guitar Ensemble (1 cr, repeatable) (F,Sp) .......8
MUSC 3900 Jazz Improvisation (F,Sp) .............................................2
MUSC 4920 Individual Recital (F,Sp,Su) ........................................6
MUSC 4930 Readings and Conference (F,Sp,Su) ..............................2
Music Electives .................................................................3
University Electives ..........................................................6

Sample Four-year Plan for Music Major,

Piano Performance Emphasis

Minimum GPA for Admission: 2.75, USU; 2.75 Career
Minimum GPA for Graduation: 3.00, major courses; 2.00, USU; 2.75 Career
Minimum Grade Accepted: C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. In addition, students should refer to the Music Department’s Student Handbook. To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (31 credits)

Fall Semester (15 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ...............3
MUSC 1110 Music Theory I .......................................................3
MUSC 1130 Aural Skills I .........................................................1
MUSC 1170 Keyboard Harmony I ...............................................1
MUSC 1430 Piano Pedagogy I ..................................................3
MUSC 2180 Computer Applications in Music ................................2
MUSC 3400 Individual Piano Instruction for Music Majors .............2

Spring Semester (16 credits)
MUSC 1120 Music Theory II .....................................................3
MUSC 1140 Aural Skills II ........................................................1
MUSC 1180 Keyboard Harmony II ............................................1
MUSC 1420 Pedagogy Practicum ...............................................3
MUSC 1440 Piano Pedagogy II ..................................................3
MUSC 3400 Individual Piano Instruction for Music Majors .............2
University Studies Quantitative Literacy (QL) course ....................3

Complete the CIL exams by the end of the Freshman Year.

Sophomore Year (36 credits)

Fall Semester (17 credits)
MUSC 1420 Pedagogy Practicum ...............................................3
MUSC 2110 Music Theory III ...................................................3
MUSC 2130 Aural Skills III ........................................................1
MUSC 2420 Piano Literature I ....................................................3
MUSC 3400 Individual Piano Instruction for Music Majors .............2
MUSC 3410 Ensemble and Accompanying ..................................1
MUSC 4410 Advanced Piano Pedagogy I ...................................1
University Studies Breadth course ............................................3

Spring Semester (19 credits)
MUSC 1420 Pedagogy Practicum ...............................................3
MUSC 2140 Aural Skills IV .........................................................1
MUSC 2430 Piano Literature II ..................................................3
MUSC 3110 Music History I: Origins through Baroque .................3
MUSC 3140 Musical Form and Analysis .....................................3
MUSC 3400 Individual Piano Instruction for Music Majors .............2
MUSC 4420 Advanced Piano Pedagogy II ..................................1
University Studies Breadth course ............................................3
## Sample Four-year Plan for Music Major

### String Performance Emphasis

**Minimum GPA for Admission:** 2.75, USU; 2.75 Career

**Minimum GPA for Graduation:** 3.00, major courses; 2.00, USU; 2.75 Career

**Minimum Grade Accepted:** C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. In addition, students should refer to the Music Department’s Student Handbook. To make an appointment with a professional advisor, call (435) 797-3883.

### Freshman Year (31 credits)

**Fall Semester (16 credits)**

- **ENGL 1010 (CL1)** Introduction to Writing: Academic Prose ... 3
- **MUSC 1110** Music Theory I ... 3

**Spring Semester (15 credits)**

- **MUSC 2120 (CI) Music Theory IV** ... 3
- **MUSC 4910** Advanced Piano Pedagogy I ... 1
- **MUSC 4410 Advanced Piano Pedagogy I** ... 3

### Sophomore Year (30 credits)

**Fall Semester (15 credits)**

- **MUSC 2350 Conducting** ... 2
- **MUSC 3010 (CI) Music History III: Music of the Twentieth Century** ... 3
- **MUSC 3400** Individual Piano Instruction for Music Majors ... 2
- **MUSC 4410 Advanced Piano Pedagogy I** ... 1
- **MUSC 4500** Music Composition I ... 3
- **MUSC 4920 Individual Recital** ... 1

**Spring Semester (15 credits)**

- **MUSC 2120 (CI) Music Theory IV** ... 3
- **MUSC 4910** Advanced Piano Pedagogy I ... 1
- **MUSC 4410 Advanced Piano Pedagogy I** ... 3
- **MUSC 4910** Music Composition (2 cr) or Advanced Music Form and Analysis (3 cr) ... 2 or 3
- **MUSC 4920 Individual Recital** ... 1

### Junior Year (31 credits)

**Fall Semester (15 credits)**

- **MUSC 2100 Computer Applications in Music** ... 2
- **MUSC 3120 Music History II: Classical and Romantic Periods** ... 3
- **MUSC 3500 Symphony Orchestra** ... 1
- **MUSC 4500 String Ensemble** ... 1
- **MUSC 4500** String Ensemble ... 1
- **MUSC 4920 Individual Recital** ... 2
- **MUSC 4920 Individual Recital** ... 1

**Spring Semester (16 credits)**

- **MUSC 2120 (CI) Music Theory IV** ... 3
- **MUSC 3120 Music History II: Classical and Romantic Periods** ... 3
- **MUSC 4500 Symphony Orchestra** ... 1
- **MUSC 4500 String Ensemble** ... 1
- **MUSC 4920 Individual Recital** ... 2
- **MUSC 4920 Individual Recital** ... 1

- **MUSC 1170 Keyboard Harmony I** ... 1
- **MUSC 1800 Percussion Techniques** ... 1
- **MUSC 2490 Individual Piano Instruction (Second Instrument) for Music Majors** ... 1
- **MUSC 3500 Symphony Orchestra** ... 1
- **MUSC 4500 String Ensemble** ... 1
- **MUSC 4500** String Ensemble ... 1
- **MUSC 4920 Individual Recital** ... 2

**Complete the CIL exams by the end of the Freshman Year.**

**Sample Four-year Plan for Music Major, Guitar Performance Emphasis**

**Minimum GPA for Admission:** 2.75, USU; 2.75 Career  
**Minimum GPA for Graduation:** 3.00, major courses; 2.00, USU; 2.75 Career  
**Minimum Grade Accepted:** C- in major courses

Utah State University 2007-2009 General Catalog
Department of Music

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. In addition, students should refer to the Music Department’s Student Handbook. To make an appointment with a professional advisor, call (435) 797-3883.

Bachelor of Music Degree

(Piano Pedagogy Emphasis)

(2.75 cumulative GPA; 3.00 GPA in Music courses)

The Bachelor of Music Degree with an emphasis in Piano Pedagogy requires completion of University Studies Requirements, Core Requirements, Pedagogy Emphasis, and Electives. Music majors must maintain a minimum GPA of 3.00 in Music courses. A grade of C- or better must be earned in all core and emphasis classes. A 2.75 cumulative GPA is required for graduation. Additional requirements, such as piano proficiency, concert attendance, etc., are stipulated in the Department of Music's Student Handbook.

Music Core Curriculum Requirements (35 credits)

Students in the Piano Pedagogy emphasis must complete the 35-credit music core curriculum as listed on page 416.

Pedagogy Emphasis Requirements (59-60 credits)

MUSC 1420 Pedagogy Practicum (F,Sp) ................................................................ 9  
MUSC 1430 Piano Pedagogy I (F) ..................................................................... 3

Bachelor of Music Degree
(Individualized Program)
(2.75 cumulative GPA; 3.00 GPA
in Music courses)

The Individualized Bachelor of Music Degree is intended for persons
whose musical goals are not met by USU’s other bachelor of music
programs in music education, performance/pedagogy, or music
therapy. The individualized program is also appropriate for those who
wish to combine music with another discipline, such as business,
electrical engineering, computer science, etc. A grade of C- or better
must be earned in all classes applied toward the degree.

All individualized curricula must meet criteria established by the
National Association of Schools of Music. Students in the individualized
program are expected to complete at least the minimum jury
performance level required for their major instrument or voice, and to
complete a senior recital appropriate to their emphasis. All proposed
Department of Music

individualized curricula must be approved by an appropriate advisor, the Individualized Bachelor of Music Degree Committee, and the Head of the Department of Music.

University Studies Requirements

Music Core Curriculum (35 credits) (see page 416)

Music Performance (16 credits)

Individual Instruction (8 credits)
Individual Instruction should be taken in either the major instrument or voice.

Large and Small Ensembles (8 credits)
As part of the 8 required credits, a minimum of 4 credits must be taken in a large ensemble.

Emphasis Area (37 credits)
The curriculum for the emphasis area must be developed in consultation with an appropriate advisor and approved by the Individualized Bachelor of Music Degree Program Committee and by the Head of the Department of Music. It must form a coherent plan leading to the fulfillment of specific objectives. Student transcripts will show Individualized Program, not the emphasis area approved by the committee.

If the plan involves relating music to other fields, it must meet appropriate criteria as outlined in the Handbook of the National Association of Schools of Music for the degree of Bachelor of Music in Combinations with an Outside Field. Such a plan must also be developed and approved in consultation with an advisor in the other field, in addition to the appropriate advisor in the Department of Music.

Music Therapy Requirements
Students must complete an application process through the Music Department in order to be accepted for the Music Therapy major. Music Therapy majors must maintain a minimum GPA of 3.00 in required classes. A grade of C- or better must be earned in all required classes. A 2.75 total GPA is required for graduation. Additional requirements, such as piano proficiency, concert attendance, etc., are stipulated in the Department of Music's Student Handbook and Music Therapy Addendum to the Handbook.

Core Course Requirements (34-35 credits)

MUSC 1110 Music Theory I (F) .................................................. 3
MUSC 1120 Music Theory II (Sp) .............................................. 3
MUSC 1130 Aural Skills I (F) .................................................. 1
MUSC 1140 Aural Skills II (Sp) ................................................ 1
MUSC 1170 Keyboard Harmony I (F) ...................................... 1
MUSC 1180 Keyboard Harmony II (Sp) ................................. 1
MUSC 2110 Music Theory III (F) .............................................. 3
MUSC 2120 (CI) Music Theory IV (Sp) ................................. 3
MUSC 2130 Aural Skills III (F) ................................................ 1
MUSC 2140 Aural Skills IV (Sp) (1 cr) or MUSC 3900 Jazz Improvisation (F,Sp) (2 cr) ...................... 1 or 2
MUSC 2180 Computer Applications in Music (F,Sp) .............. 2
MUSC 2350 Conducting (F,Sp) ............................................. 2
MUSC 3110 Music History I: Origins Through Baroque (Sp) .... 3
MUSC 3120 Music History II: Classical and Romantic Periods (F) ..... 3
MUSC 3140 Musical Form and Analysis (Sp) ......................... 3
MUSC 3190 (CI) Music History III: Music of the Twentieth Century (Sp) ................................................. 3

Additional Music Coursework (2 credits)

MUSC 3260 Elementary School Music (F,Sp,Su) ...................... 2

Ensemble Performance (2 credits)
Select 2 credits from the following:
MUSC 1320 Music Therapy Ensemble (F,Sp) ......................... 1
MUSC 3500 Symphony Orchestra (F,Sp) ............................. 1
MUSC 3700 Woodwind Ensemble (F,Sp) ............................. 1
MUSC 3780 Flute Ensemble (F,Sp) ...................................... 1
MUSC 3790 Symphonic Band (F,Sp) .................................... 1
MUSC 3800 Trombone Ensemble (F,Sp) ............................. 1
MUSC 3850 Brass Ensemble (F,Sp) ..................................... 1

---

10Offered during spring semester only. These courses must be taken concurrently.

11It is recommended that students complete MUSC 1010 prior to enrolling in MUSC 3010 and 3020.

12Students must have completed a minimum of 50 credits prior to enrolling in MUSC 3260. It is recommended that students complete MUSC 1010, 1110, 1130, and 1170 prior to enrolling in MUSC 3260.

13Offered spring semester only. Level I Orff Schulwerk (taught summer semester only) may also fulfill this requirement. MUSC 1110 and 3260 are prerequisites for MUSC 3270. It is recommended that students complete MUSC 1600 or 1630 prior to enrolling in MUSC 3270.

### Recital and Concert Attendance

Recital and concert attendance is required and will be monitored. Students should turn in programs after attending concerts and recitals. A summary of attendance will be kept in the student’s file. To graduate, students are required to attend a minimum of 10 concerts and 10 recitals each year.

### Individual Performance and Jury Requirements

Music majors enroll in individual instruction each semester and practice regularly outside of lessons. Jury exams are held at the end of each semester to assess individual progress. To determine specific jury requirements for their area, students should contact their advisor.

### Recital Participation

Each music education, performance, and pedagogy major is encouraged to appear in a departmental recital each semester. Four such appearances are required for graduation. Since junior and senior recital requirements vary, students should consult program advisors and degree requirement sheets for specific information.

### Piano Proficiency Requirements

Music, Music Education, and Music Therapy majors must meet a minimum standard of piano proficiency before graduation. The specific requirements are detailed in the department’s Student Handbook.

### Music Theory Proficiency

Music, Music Education, and Music Therapy majors must meet a minimum standard of theory proficiency before entering third-year core music courses. This theory exam is administered upon completion of the theory sequence and is also required for all transfer students. It serves as a placement exam for those who have not completed the theory sequence at their previous schools. For details, contact the Music Department Student Services Office, (435) 797-3015, Fine Arts 102.

### Assessment

Information about the ongoing assessment of the Music Department can be found at: [http://www.usu.edu/music/assessment/index.html](http://www.usu.edu/music/assessment/index.html)

### Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within
the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information and Updates

Degree requirements are listed on the Music Major Requirement Sheet and the Music Therapy Major Requirement Sheet, which can be obtained from the department, or online at:
http://www.usu.edu/majorsheets/

Additional requirements, including appropriate sequencing of courses, are listed in the Department of Music Student Handbook. For the most recent information regarding degree requirements and course sequencing, contact advisors over specific programs. Further information can also be obtained by contacting the Music Department Office, Fine Arts 102, or by visiting the department’s website.

Financial Support

Scholarships, grants, and work-study programs are available through the University. Information about these programs can be obtained by calling the Admissions Office, (435) 797-1129 or 1-800-488-8108. In addition, the Department of Music offers talent-based scholarships to undergraduate students and employs students as part-time workers. For scholarship information or to arrange an audition, contact the department at (435) 797-3015 or visit the department’s website.

Music Faculty

Professors
Gary Amano, piano
Michael L. Ballam, opera
Michael K. Christiansen, guitar program
Todd L. Fallis, instrumental music education, student advising, low brass
Dennis D. Griffin, percussion, electronic music, composition
F. Dean Madsen, music theory, twentieth century music, composition
Nicholas E. Morrison, clarinet, associate director of bands

Professors Emeritus
Warren L. Burton, introduction to music
Max F. Dalby, bands, woodwind, conducting
Glen A. Fifield, elementary music, cornet and trumpet
Larry G. Smith, jazz program, musicianship program, staff arranger, saxophone, jazz piano
Alvin Wardle, music education, low brass

Associate Professors
Cindy J. Dewey, voice, opera, pedagogy
Mark A. Emile, string performance and pedagogy, violin/viola
Lynn Jemison-Keisker, opera, voice
Thomas Rohrer, director of bands
Bruce M. Saperston, music therapy
Leslie Timmons, elementary music education, flute

Associate Professor Emeritus
Mildred Johnson, music history and literature, musicianship program, viola

Assistant Professors
Sergio Bernal, orchestra conductor, string program
R. Cory Evans, choral music
Jon Gudmundson, jazz, saxophone
R. Dennis Hirst, piano, Youth Conservatory
Eric Smigel, music history, world music

Assistant Professor Emeritus
Betty Beecher, piano

Lecturers (Fry Street Quartet)
Russell Fallstad, viola
William Fedkenheuer, violin
Anne Francis, cello
Rebecca McFaul, violin

Certificate Program in National Environmental Policy Act (NEPA)

Director: Joanna Endter-Wada, Department of Environment and Society
Location: Natural Resources 355B
Phone: (435) 797-0922
FAX: (435) 797-3526
E-mail: joanna.endter-wada@usu.edu
WWW: http://www.cnr.usu.edu/policy/
Program Administrator: Judith A. Kurtzman, Natural Resources 322, (435) 797-0922

Graduate Program Description

The Department of Environment and Society at Utah State University and the Shipley Group, Inc. have formed a partnership to provide a graduate-level certificate program that offers training related to the National Environmental Policy Act (NEPA). NEPA is an important environmental law that requires analysis of impacts, alternatives, and mitigation measures for all major federal actions affecting the environment, both within the territorial boundaries of the U.S. and at foreign military installations. Government agencies, private businesses, public interest organizations, and other groups involved in the NEPA process need individuals who have been trained in decision-making, analysis, and documentation aspects of NEPA, as well as in the accompanying Council on Environmental Quality (CEQ) regulations and various agencies’ NEPA implementing procedures.

The NEPA Certificate Program was designed to prepare natural resource and environmental professionals to meet the challenges of complying with the act and working effectively on NEPA documents. Participants who successfully complete the program should have a solid understanding of both the spirit and the letter of the law, and will be more effective members of interdisciplinary teams responsible for developing NEPA documents.

Certificate

Students who complete the program will receive a graduate-level certificate in the National Environmental Policy Act. Their Utah State University transcript will list the courses they attended to complete the program.

Admission Requirements

To apply and gain acceptance into the program, a person must complete and submit a NEPA Certificate Program application form to the Department of Environment and Society at USU, as well as provide a transcript documenting the completion of a bachelor’s degree. Students pursuing the NEPA Certificate are not required to be enrolled in a graduate degree program. However, credits obtained from the program may be applied toward a graduate degree.

Course Requirements

To receive the certificate, a participant must complete the following set of requirements:

1. apply and be accepted into the NEPA Certificate Program;
2. register for and successfully complete seven graduate-level courses taken for grades (four required courses and three elective courses);
3. undertake an individual capstone experience for graduate credit that involves a negotiated project;
4. maintain a minimum 3.0 GPA for program courses (grades below C will not be accepted);
5. abide by the Code of Policies and Procedures for Students at Utah State University.

NEPA Certificate Program Courses

Courses for the program will be offered at USU and at other locations around the country. Courses will be offered on a short-course basis through Continuing Education. A two-credit course requires a minimum of three full days in class; a one-credit course requires two full days in class. To receive graduate credit that can be applied toward completion of the certificate, all NEPA courses must be taken for a letter grade, which requires completion of a written examination in addition to class attendance. All courses offered as part of the NEPA Certificate Program may be taken for University graduate credit, whether or not a participant in the course is enrolled in the NEPA Certificate Program.

Curriculum

Students must complete four core courses (2 credits each), three elective courses (1 credit each), and a capstone experience (1 credit) in order to fulfill the requirements for the NEPA Certificate.

Core Courses

Participants are required to take four of the following courses. The first three listed are required. However, participants may choose between the last two courses to fulfill the core course requirements.

NEPA 6200 How to Manage the NEPA Process and Write Effective NEPA Documents ......................................................... 2
NEPA 6210 Clear Writing for NEPA Specialists ......................... 2
NEPA 6220 Reviewing NEPA Documents .................................. 2
NEPA 6230 Risk Communication for NEPA Specialists: Strategies and Implementation .............................................. 2
NEPA 6260 Cultural and Natural Resource Management ............ 2

Elective Courses

Participants are required to take three courses of their choosing from the following list.

NEPA 6270 Environmental Compliance Overview .................... 1
NEPA 6280 Interdisciplinary Team Building ............................... 1
NEPA 6300 Effective Environmental Contracting ......................... 1
NEPA 6310 NEPA Writing for Technical Specialists .................... 1
NEPA 6320 NEPA: Cumulative Impacts .................................... 1
NEPA 6330 Conflict Management in the NEPA Process ............. 1
NEPA 6350 Socio-economic Impact Analysis for NEPA Specialists ... 1
NEPA 6360 Overview of the Endangered Species Act ................ 1
Certificate Program in National Environmental Policy Act (NEPA)

Capstone Experience

After completing the coursework, participants are required to complete a NEPA Capstone Experience (NEPA 6370) before being awarded the NEPA Certificate. This experience will be individualized for each participant, will consist of a project that has been negotiated between the participant and the program faculty, and may be subject to oversight from the NEPA Certificate Program Advisory Board.

Course Descriptions

National Environmental Policy Act (NEPA), page 677
Natural Resources and Environmental Education Graduate Certificate

Graduate Program Description

The Natural Resources and Environmental Education (NREE) Program offers an Interdisciplinary Graduate Certificate Program to provide graduate students with a comprehensive educational foundation for understanding and communicating natural resources and environmental information, and for developing the analytical skills needed to effectively implement appropriate environmental education and communication techniques for varying audiences. The NREE Certificate Program is administered by the Department of Environment and Society, College of Natural Resources. The certificate program consists of three components, for a total of 15-17 credits: (1) the NREE Core that includes two foundation courses, a NREE graduate seminar, and an "integrating" capstone experience; (2) one Human Dimensions of Natural Resources/Environment course; and (3) one Natural Resources/Environmental Management course.

The purpose of the certificate is to meet an identified need expressed by graduate students with interests in working professionally in the field of natural resources and environmental education and interpretation. The certificate program provides an interdisciplinary perspective on environmental education, and provides graduate students with the ability to teach people how to think critically and creatively in understanding, interpreting, and dealing with environmental issues and challenges. This approach enables students to focus on a broad spectrum of issues and content related to natural resources and the environment.

The structure of the certificate program emphasizes: (1) processes and skills necessary to present and integrate information across a broad spectrum of delivery systems; (2) interdisciplinary information and technical content across many areas, including natural resources, ecology, human resources, history, education, sociology, etc.; and (3) development of an interest area of personal/professional inquiry. The program provides a mechanism to support graduate student project development and research, emphasizing scholarship, discovery, and application of findings in applied settings in order to contribute to the professional field of natural resources and environmental education and interpretation.

Completion of the certificate program will provide graduate students with a working knowledge of the depth and breadth of the professional field of environmental education and interpretation. Moreover, it will prepare them for a job market demanding innovative and creative approaches for incorporating environmental education and interpretation in natural resource management agencies, in both formal (K-12 school-based) and nonformal (youth, community, and outdoor) education programs, in nonprofit organizations, and in the for-profit commercial sector. Although professionals working in natural resources and environmental education may work in a wide range of settings, they share one objective: to help people appreciate and understand the relationship between humans and the natural world around them. Thus, the value of the NREE Certificate Program goes far beyond more traditional approaches associated with education-oriented certificate programs.

Certificate

Students who complete the program receive a certificate in Natural Resources and Environmental Education. Notification of this certificate appears on the student's transcript.

Admission Requirements

To apply for admittance into the NREE Interdisciplinary Graduate Certificate Program, a graduate student must: (1) be accepted by the School of Graduate Studies at Utah State University for graduate study (current or provisional), (2) complete an NREE Interdisciplinary Graduate Certificate Program Application, and (3) submit a resume with references, along with a narrative describing personal interest in completing the NREE Certificate Program with respect to his or her professional goals. The NREE Program Director reviews the application and makes a recommendation for admittance into the certificate program, if appropriate, to the NREE Certificate Advisory Committee.

Student Advisement

An NREE Certificate Advisory Committee, comprised of the NREE Program Director, NREE Program Associate, and two NREE-affiliated faculty from participating departments and colleges, will assist in reviewing graduate student applications for admission into the certificate program, identifying major advisors, identifying funding opportunities, recommending courses to meet the NREE Certificate requirements, and advising graduate students. Graduate students accepted into the NREE Certificate Program will work with their major faculty advisor, as well as with the NREE Certificate Advisory Committee, to support them in understanding and meeting the requirements of the NREE Graduate Certificate Program.

Course Requirements

The NREE Interdisciplinary Graduate Certificate Program consists of three curriculum components, for a total of 15-17 credits: (1) the NREE Core, (2) one Human Dimensions of Natural Resources/Environment course, and (3) one Natural Resources/Environmental Management course. Many of the identified courses in the latter two categories will also satisfy the requirements for a specific degree program in different departments. Therefore, students can select courses in these two categories to complete their specific degree requirements, while at the same time satisfying the requirements of the NREE Certificate Program.

I. Natural Resources and Environmental Education Core Courses (10 credits)

For the NREE Interdisciplinary Graduate Certificate Program, students are required to take the following two foundation courses, participate in the Graduate Seminar, and complete an "integrating" capstone experience, for a total of 10 credits, to fulfill the requirements of the NREE Graduate Certificate Program Core.

NREE Graduate Core:
Foundation Courses
ENVS 5110 Environmental Education (Sp) ...........................................3
ENVS 6600 Advanced Natural Resource Interpretation (F) ...............3

The Environmental Education course and the Advanced Natural Resource Interpretation course serve as Foundation Courses. Environmental Education covers teaching about the environment,
Natural Resources and Environmental Education Graduate Certificate

as well as using the environment and natural world to teach other subjects, with a strong emphasis on participation and on practicing techniques. Advanced Natural Resource Interpretation examines the planning processes, techniques, and evaluation procedures for using information and education to influence human behavior and increase benefits to visitors in natural settings, and also focuses on the leadership of teams involved in producing interpretive plans and materials.

Graduate Seminar
ENVS 6800 Environment and Society Departmental
Seminar (F or Sp) ................................................................. 1

The Graduate Seminar requires student attendance at a number of different speaker seminars, occurring during the fall or spring semester, that are related to NREE, along with occasional meetings with NREE affiliated faculty to discuss connections and relevance of the seminars to NREE.

Capstone Experience
Students must complete 3 credits in a capstone experience, developed in consultation with a faculty advisor. Credits may be completed in the following types of courses:

Graduate Internship/Co-op
Graduate Special Topics
Graduate Directed Study
Thesis Research
Dissertation Research

The Capstone Experience requirement may be fulfilled in a number of ways, based on each student’s interest, through an internship/co-op/special field experience, an investigation of a special topic and/or development of a project, directed readings/study, or a research project. In meeting this requirement, it will be important for students to be able to demonstrate they are getting an "integrating" capstone experience in natural resources and environmental education.

II. Human Dimensions of Natural Resources/Environment Courses (2-3 credits)

For the NREE Interdisciplinary Graduate Certificate Program, students are required to take one of the following courses in order to gain a management perspective toward natural resources and the environment.

ENV 5000 Collaborative Problem-Solving for Environment and Natural Resources ................................................. 3
PLSC 5550/6550 Weed Biology and Control ...................... 4
TOOL 5350/6350 Wildland Soils ....................................... 3
WATS 5150/6150 Fluvial Geomorphology ........................ 3
WATS 5330/6330 Large River Management ..................... 3
WATS 5640/7640 Riparian Ecology and Management ......... 3
WATS 5660 Watershed and Stream Restoration ............... 2
WATS 6330 Water Quality and Pollution .......................... 3
WATS 6530 Principles in fishery Management .................. 3
WILD 5000 Predator Ecology and Management ............... 3
WILD 5070/6070 Range Wildlife Relations ...................... 3
WILD 5300/7300 Wildlife Damage Management Principles ... 3
WILD 7000 Theory and Applications of Rangeland Ecosystem Management ......................................................... 3

There may be another course that can satisfy this requirement, but the course will need to be approved by the student’s graduate advisor and the NREE Advisory Committee.

IV. Personal/Professional Inquiry

Although not formally required, a number of courses exist that can support students' interest in natural resources and environmental education, and support student efforts in completing individual degree requirements. These courses include the following:

ASTE 6110 Applied Technology Education Program Planning and Evaluation ................................................................. 3
ASTE 6170 Supervision and Administration of International Extension Programs ...................................................... 3
ASTE 6240 Strategies for Teaching Adults .......................... 3
BIOL 5550 Freshwater Invertebrates ................................ 3
BIOL 5560 Ornithology ..................................................... 3
BIOL 5570 Herpetology ..................................................... 3
BIOL 5580 Mammalogy .................................................... 3
BIOL 6510 Insect-Plant Interactions .................................. 2
ELED 6400 Multiple Talent Approach to Teaching ............. 2
ELED 6700 Improvement of Science Instruction ................. 3
ENG/L/HST 6610 Seminar on the American West ............... 3
ENG/L/HST 6620 Seminar in Native American Studies ....... 3
ENG/L/HST 6700 Folklore Theory and Method .................. 3
ENG/L/HST 6720 Folklore Fieldwork .................................. 3
ENG/L/HST 6730 Public Folklore ....................................... 3
ENG/L/HST 6740 Folk Narrative ......................................... 3

POLS 5180 Natural Resource Policy .................................. 3
POLS 5200 Global Environment ....................................... 3
SOC 6620 Environment, Technology, and Social Change ...... 3
SOC 6630 Natural Resources and Social Development ....... 3

There may be another course that can satisfy this requirement, but the course will need to be approved by the student’s graduate advisor and the NREE Advisory Committee.

Graduate Program Description

The Natural Resource and Environmental Policy Graduate Certificate is an interdisciplinary program designed for students seeking graduate degrees in fields related to environmental and natural resource policy analysis. The program introduces students to complementary scientific and social scientific perspectives on environmental and natural resource policy, linking the scientific dimensions of policy to its social context and to the operation of political and economic institutions. Courses that satisfy program requirements are currently offered by the departments of Agricultural Systems Technology and Education; Business Administration; Economics; Environment and Society; Wildland Resources; History; Landscape Architecture and Environmental Planning; Political Science; and Sociology, Social Work and Anthropology. The program helps to prepare students for careers in public or private sector policy analysis, environmental planning, environmental program assessment, natural resource policy administration, environmental and natural resource consulting, and environmental and natural resource policy advocacy.

Certificate

Students who complete the Policy Program receive a certificate in Natural Resource and Environmental Policy. Notification of this certificate appears on the student’s transcript.

Admission Requirements

Admission to the Certificate Program is open to students accepted into a master’s degree program or a doctoral degree program at Utah State University, provided their degree program requirements include development of a written research paper or project defended before the student’s graduate committee. In all cases, the thesis, research report, or dissertation must contain a significant component addressing natural resource or environmental policy.

Prerequisites

Prior to admission into the Natural Resource and Environmental Policy Graduate Certificate Program, a student must complete at least one upper-division or graduate course in ecology, biological systems, earth processes, or ecosystem management. In addition, each student must also complete at least one upper-division or graduate course in economics, political science, history, or sociology. With the approval of the program coordinator, appropriate professional experience can serve as a substitute for either one of these prerequisites.

Graduate Committee

The student’s graduate committee must include one faculty member affiliated with the Policy Program to advise the student on meeting the program requirements and in selecting core courses.

Course Requirements (14 credits)

Courses taken to satisfy requirements in a student’s major or minor area of study can also be used to satisfy Natural Resource and Environmental Policy Graduate Certificate requirements.

Required Courses (5-6 credits)

<table>
<thead>
<tr>
<th>Course</th>
</tr>
</thead>
<tbody>
<tr>
<td>NR 6430 Natural Resource and Environmental Policy</td>
</tr>
<tr>
<td>POLS 5180 Natural Resource Policy (3 cr) or</td>

<tr>
<td>ENVS 5300 Natural Resources Law and Policy (2 cr) or</td>
</tr>
<tr>
<td>ENVS 5320 Water Law and Policy in the United States (3 cr)</td>
</tr>
</tbody>
</table>

Elective Courses (8-9 credits)

Because of ongoing changes in the curricular offerings of the participating departments, the list of Natural Resource and Environmental Policy Graduate Certificate elective courses is updated annually. Students entering the program should immediately obtain a current list of electives from the program coordinator or staff assistant. Students may petition the program coordinator to use as electives courses not included on the current list; however, to gain approval as an elective, a course must have significant environmental or natural resource policy content.

Approved elective courses include the following:

<table>
<thead>
<tr>
<th>Course</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTE 6260 Environmental Impacts of Agricultural Systems</td>
</tr>
<tr>
<td>ECON 6500 Introduction to Natural Resource Economics</td>

Master of Natural Resources (MNR)

Degree Coordinator: Nancy O. Mesner
Location: Natural Resources 108
Phone: (435) 797-7541
FAX: (435) 797-2443
E-mail: nancym@ext.usu.edu
WWW: http://www.cnr.usu.edu

Degree offered: Master of Natural Resources (MNR)

Objectives
The Master of Natural Resources (MNR) is a professional degree designed to prepare students to work in the interdisciplinary context of twenty-first century natural resources management and decision making. It is a nonthesis, management-oriented program.

Admission Requirements
All MNR students are admitted through the degree coordinator following the School of Graduate Studies standard procedures and policies (see pages 101-102).

The MNR degree assumes the entering student will have some prior knowledge of the fundamentals of natural resources science and management, including chemistry, physics, biology, algebra, statistics, and economics. Students without undergraduate degrees in natural resources or similar majors may be required to make up deficiencies in undergraduate preparation prior to beginning MNR degree coursework.

Course Requirements
Because this is a professional degree, the College of Natural Resources recognizes that individuals wishing to seek this degree may have time constraints or constraints on their ability to relocate. Therefore, the MNR is offered in several formats.

Short-Course Format
The short-course format provides students with an MNR degree focusing on Ecosystem Management. It is designed to give students an understanding of how human dimensions, ecology, and economics function and interact, and help students apply this understanding to ecosystem and landscape management. In addition, students will become familiar with the requirements of the National Environmental Policy Act (NEPA), as well as with strategies for writing effective environmental documents.

This degree program is designed with the working professional in mind. All required courses are offered in short-course format. The length of courses varies from two days to two weeks. Elective courses are also offered in short-course format or as web-based courses. For descriptions of the individual short courses, see the NEPA course listings in the Course Descriptions section of this catalog (page 677).

Residential Format
The residential MNR is offered as a set of classes that can be completed during one calendar year on the USU campus. The course offerings are broad-based and interdisciplinary, and are designed to provide students with advanced training in quantitative and analytical tools, policy and economics, the human dimensions of natural resources, and biological and physical sciences. A capstone experience during the summer is tailored to individual student needs.

Distance Education Format
A distance education option is currently being created. For updates on the program as they become available, visit the CNR website at http://www.cnr.usu.edu
Cooperative Nursing Program

Utah State University
Pre-Nursing Major

Initially, many students are admitted into Utah State University to take their general education and supporting science courses, in order to become competitive applicants for the Weber State RN program on the Logan campus. Students must attain a minimum GPA of 3.0 in order to be accepted into the USU pre-nursing major.

USU Pre-Nursing Advisor: Liz Heffernan, (435) 797 2577, heffernanliz@biology.usu.edu

Curriculum for Associate Degree Program

The curriculum for the associate degree is planned over a six-semester period, using two academic years plus two summer semesters. It is planned to include a broad University Studies program concurrently with courses in Nursing. A grade of B or higher is required for all lower-division nursing courses, and a grade of C or higher is required for all support classes.

Graduation Requirements

Associate of Science Degree in Nursing
(Weber State University)
(3.0 overall GPA minimum)

Students must complete all prerequisite courses listed before beginning fall nursing classes. A grade of C or better must be achieved in each of these courses in order for the student to remain in the Nursing Program.

First Year

Summer Semester (or prior college credit)
BIOL 2320 Human Anatomy .................................................. 4
BIOL 2420 Human Physiology ................................................. 4
CHEM 1110 (BPS) General Chemistry I (Prereq: MATH 1050) .... 4
Quantitative Literacy (QL) course ............................................. 3
Breadth Humanities (BHU) elective course .............................. 3

Mathematics Requirement. For information about the mathematics requirement, students should refer to their admission packet.

Fall Semester

BIOL 1110 Elementary Microbiology (4 cr) or
BIOL 1100 Introduction to Microbiology (Home Study only) (3 cr) .3 or 4
NFS 1020 (BLS) Science and Application of Human Nutrition ........ 3
NURS 1030 Foundations of Nursing Practice ............................. 3
NURS 1031 Foundations of Nursing Practice Clinical ................. 3
NURS 1050 Treatment Modalities .......................................... 3

Spring Semester

PSY 1010 (BSS) General Psychology ....................................... 3
HS 2230 Introductory Pathophysiology .................................... 3
NURS 1040 Women’s Health and the Childbearing Family ............ 2
NURS 1041 Women’s Health and the Childbearing Family Clinical... 1
NURS 1045 Nursing Care of Adults and Children ....................... 3
NURS 1046 Nursing Care of Adults and Children Clinical ........... 2

Undergraduate Programs

Associate Degree Program Objectives

Weber State University and Utah State University jointly offer an Associate of Science degree or an Associate of Applied Science degree in Nursing at Logan.

All nursing theory, University Studies, and laboratory practice classes are offered on the Utah State University campus and in health service agencies in Northern Utah.

Weber State University admits the prospective student and grants the Associate of Science degree or the Associate of Applied Science degree upon the student’s completion of the course. The student participates in graduation ceremonies held on the Weber State University campus.

A graduate of this program is eligible to write the State Board licensing examination to become a registered nurse. The program is accredited by the Utah State Board of Nursing and the National League of Nursing Accrediting Commission.

Students admitted to the program have the prerogative of taking the licensing examination for Practical Nursing upon an equivalency basis with the completion of the first year’s course of studies.

Departmental Admission Requirements for Associate Degree Program

Admission into the Cooperative Nursing Program is selective. To ensure quality clinical placement, a limited number of students are accepted into the program each year. Applications are accepted once a year and are available online or in-person after October 1. Students must complete the application process by February 1.

Applications are reviewed by the Nursing Program admissions and advancement committee. A point system is used to facilitate candidate selection. Applications received by January 15 will earn extra points. Support courses will be evaluated, but points will not be awarded for courses already in-progress during the semester in which an application is received. Students will be notified of acceptance into the program by April 15.

Undergraduate Advisor:
Marlene Israelsen, Nutrition and Food Sciences 222, (435) 797-2131

Degrees offered: Bachelor of Science (BS), Master of Science (MS), and Doctor of Philosophy (PhD) in Nutrition and Food Sciences; Master of Food Microbiology and Safety (MFMS); Master of Dietetics Administration (MDA)

Undergraduate emphases: BS—Food Science, Food Technology Management, Nutrition Science, Biotechnology, and Dietetics

Graduate specializations: MS, PhD—Dietetics, Food Biotechnology, Food Chemistry, Food Engineering, Food Microbiology, Food Processing, Human Nutrition, and Nutrient Metabolism

Undergraduate Programs

Objectives
The Department of Nutrition and Food Sciences has the following three objectives:

1. To provide students with the scientific/academic background necessary to function well in further academic pursuits or future work environments.
2. To provide students with the critical thinking and problem solving skills necessary to enhance further academic pursuits or future work environments.
3. To provide students with practical application and work experience credentials to provide personal and employment satisfaction.

Program Emphases and Career Opportunities

Food Science
Students receive an excellent background in chemistry, engineering, food processing, statistics, sensory evaluation, and microbiology. The Food Science program is approved by the Institute of Food Technologists. Graduates are in demand by industry for positions in research, quality control/assurance, product development, and processing. Government laboratories and regulatory agencies also hire food science graduates. With a food science degree, students can also qualify to enter graduate school.

Food Technology Management
The Food Technology Management program gives students a broad background in basic food science and in business administration to be applied to the business-oriented aspects of the food industry. Students also qualify for an Operations Management Minor in the Department of Business Administration. Graduates are sought by private food industry and public institutions in management positions.

Nutrition Science
The Nutrition Science emphasis is for students who are interested in studying the molecular and cellular bases of human health and disease. This is a multi-disciplinary program in which students learn to apply techniques from the fields of molecular and cellular biology, physiology, genetics, and biochemistry to issues in nutrition. Students will gain experience in laboratory, clinical, and epidemiological methods, and may have the opportunity to gain laboratory research experience in nutrition studies being conducted by faculty members. The undergraduate Bachelor of Science degree qualifies a student with the Nutrition Science emphasis to find employment in industry or academic laboratories, as well as in government agencies. It can also be used as preparation for medical or graduate school.

Biotechnology
The Biotechnology emphasis gives students a specialized background in biotechnology with depth training in either Food Science or Nutrition Science. Graduates of the program will be well-qualified to pursue biotechnology-related positions related to their depth area of choice.

Dietetics
This emphasis is a Bachelor of Science program that prepares students to become registered dietitians with professional skills in clinical nutrition, community/public health nutrition, and food service management. Students should complete prerequisites and apply by March 15 of their sophomore year. Within this program, USU offers two options: the Coordinated Program in Dietetics (CPD) and the Didactic Program in Dietetics (DPD), which are both accredited by the Commission on Accreditation for Dietetics Education of The American Dietetic Association, 20 South Riverside Plaza Suite 2000, Chicago IL 60606-6995, (312) 899-0040. Each of these programs is described below:

1. Coordinated Program in Dietetics (CPD). In addition to coursework, students complete 1,000 internship hours during their junior and senior years. Students should complete prerequisites and apply by mid-March of their sophomore year. Ten to twelve students are accepted annually, and seniors must relocate to Salt Lake City during fall semester. Graduates are eligible to take the national registration exam upon completion of the BS degree.

2. Didactic Program in Dietetics (DPD). After completing prerequisites, students should apply by mid-March of their sophomore year. Upon completion of coursework required for the BS degree, students apply for internships (located throughout the U.S., including the Utah-based USU Extension Dietetic Internship Program). Graduates are eligible to take the national registration exam upon completion of their internship.

Completion of courses required for the Food Science Emphasis, Nutrition Science emphasis, or Dietetics emphasis may be suitable preparation for students planning to apply to medical school.

Bachelor of Science Requirements

Departmental Admission Requirements
Admission requirements for the Department of Nutrition and Food Sciences are the same as those described for the University on pages 16-20. Students in good standing may apply for admission to the department. Students planning to major in Nutrition and Food Sciences should take algebra, chemistry, and biology in high school.

Graduation Requirements
All graduates from the department must have completed one of the six emphasis areas in the department and must meet the following minimum requirements:
# Department of Nutrition and Food Sciences

1. Grade point average (GPA) must be 2.5 or higher in all courses required for the major.

2. A grade of C or better must be received in every required course offered through the department (i.e., courses having an NFS prefix).

3. Courses required for the major may be repeated only once to improve a grade.

4. Courses required for the major may not be taken as Pass-D-Fail credits.

## Minor in Food Sciences

Students with majors outside of the Nutrition and Food Sciences Department may graduate with a minor in Food Sciences by completing NFS 1020, 3110, 4070, 5020 (or 5030), and 5560 with a minimum cumulative GPA of 2.5 for these courses.

## Major and Emphasis Requirements

Specific requirements for each emphasis are listed below. Requirements change periodically, and sequence of courses is important.

### Food Science Emphasis

Courses followed by an asterisk (*) are suggested for fulfilling University Studies Requirements.

#### Freshman Year

**Fall Semester**
- NFS 1000 World of Food and Nutrition ................................................. 1
- CHEM 1210 Principles of Chemistry I .................................................. 4
- CHEM 1215 Chemical Principles Laboratory I ................................. 1
- NFS 1020 (BLS) Science and Application of Human Nutrition ........ 3
- MATH 1050 (QL) College Algebra ......................................................... 4
- MATH 1060 Trigonometry ....................................................................... 2

**Spring Semester**
- NFS 1250 Sanitation and Safety ............................................................. 3
- CHEM 1220 (BPS) Principles of Chemistry II ....................................... 4
- CHEM 1225 Chemical Principles Laboratory II ................................. 1
- ECON 1500 (BAI)* Introduction to Economic Institutions, History, and Principles .......................................................... 3
- MATH 1210 (QL) Calculus I .................................................................. 4

#### Sophomore Year

**Fall Semester**
- NFS 3110 Food, Technology, and Health ............................................. 3
- BIOL 1610 Biology I ............................................................................ 4
- CHEM 2300 Principles of Organic Chemistry ...................................... 3
- CHEM 2315 Organic Chemistry Laboratory I ....................................... 1
- ENGL 1010 (CL1) Introduction to Writing: Academic Prose ............. 3
- USU 1320 (BHU)* Civilization: Humanities ........................................ 3

**Spring Semester**
- NFS 3070 Science of Food Preparation ................................................ 4
- ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................................................. 3
- CHEM 3700 Introductory Biochemistry ............................................... 3
- CHEM 3710 Introductory Biochemistry Laboratory ........................... 1
- STAT 3000 (QI) Statistics for Scientists .............................................. 3

#### Junior Year

**Fall Semester**
- NFS 5020 Meat Technology and Processing ........................................ 4
- NFS 5560 Food Chemistry .................................................................... 4
- BIOL 3300 General Microbiology ....................................................... 4
- PHYS 2110 The Physics of Living Systems I ........................................ 4

**Spring Semester**
- NFS 3100 (QI) Sensory Evaluation of Food ........................................ 3
- NFS 5110 (CI) Food Microbiology ....................................................... 4
- NFS 5500 (QI) Food Analysis ................................................................. 4
- PLSC 4600 (QI) Cereal Science (may be taken senior year) .............. 3

#### Summer Semester

- NFS 5250 Occupational Experiences in Nutrition and Food Sciences . 2

#### Senior Year

**Fall Semester**
- NFS 4440 (QI) Fundamentals of Food Engineering ............................ 4
- NFS 5030 Dairy Technology and Processing ....................................... 4
- NFS 5920 (CI) Food Product Development .......................................... 3
- SPCH 3330 (DSS)* Intercultural Communication ................................ 3

**Spring Semester**
- NFS 4990 Nutrition and Food Sciences Seminar ................................ 1
- NFS 5510 Food Laws and Regulations (may be taken junior year) .... 2
- PHIL 4310 (DHA)* Philosophy of Science ........................................... 3
- STAT 5200 Design of Experiments (3 cr) or
- STAT 5300 (QI) Statistical Process Control (3 cr) ............................ 3
- USU 1330 (BCA)* Civilization: Creative Arts ....................................... 3
- USU 1340 (BSS)* Social Systems and Issues ........................................ 3

### Food Technology Management Emphasis

Courses followed by an asterisk (*) are suggested for fulfilling University Studies Requirements.

#### Freshman Year

**Fall Semester**
- CHEM 1110 (BPS) General Chemistry I .............................................. 4
- NFS 1000 World of Food and Nutrition .............................................. 1
- NFS 1020 (BLS) Science and Application of Human Nutrition .......... 3
- NFS 1240 Culinary Basics ................................................................. 3
- MATH 1050 (QL) College Algebra ......................................................... 4

**Spring Semester**
- CHEM 1115 General Chemistry Laboratory ........................................ 1
- CHEM 1120 (BPS) General Chemistry II ............................................ 4
- USU 1320 (BHU)* Civilization: Humanities ........................................ 3
- NFS 1250 Sanitation and Safety ............................................................. 3
- ENGL 1010 (CL1) Introduction to Writing: Academic Prose ............. 3

#### Sophomore Year

**Fall Semester**
- MATH 1100 (QL) Calculus Techniques .............................................. 3
- MHR 3110 (DSS) Managing Organizations and People ..................... 3
- NFS 3110 Food, Technology, and Health ............................................ 3
- BIOL 1110 Elementary Microbiology .................................................. 4
- USU 1330 (BCA)* Civilization: Creative Arts ....................................... 3

**Spring Semester**
- NFS 3070 Science of Food Preparation ................................................ 4
- BA 3500 Fundamentals of Marketing ................................................. 3
- ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................................................. 3
- STAT 3000 (QI) Statistics for Scientists .............................................. 3

Financial Support
The Department of Nutrition and Food Sciences and the College of Agriculture award scholarships in addition to those available through the University Financial Aid Office. Information and application forms may be obtained from the department office. Students may also contact the department for assistance in finding employment that will enhance their academic studies. Many students are employed by the department and by private firms near the University.

Assessment of Instruction
Information about assessment within each of the departmental programs can be found at:

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty
in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

**Additional Information**

For more information about Bachelor of Science requirements and the sequence in which courses should be taken, see major requirement sheet, available from the Nutrition and Food Sciences Department, or online at: http://www.usu.edu/majorsheets/

**Graduate Programs**

**MS and PhD Programs**

**Admission Requirements**

Candidates for graduate study in the Department of Nutrition and Food Sciences need a background in chemistry, biochemistry, physics, mathematics, statistics, bacteriology, and physiology. Prior coursework in food science or nutrition is desirable. Students may be accepted into the NFS graduate program with deficiencies in these areas; however, their supervisory committee will require that competence equivalent to a BS degree in Nutrition and Food Sciences be obtained as part of the Program of Study.

Students must meet some departmental requirements, in addition to requirements of the School of Graduate Studies, as shown at: http://www.usu.edu/gradsch/admission/

Departmental requirements include the following:

1. Students must attain Graduate Record Examination (GRE) scores at the 40th percentile minimum on the Verbal, Quantitative, and Analytical Writing tests.

2. Before acceptance into a PhD program, a student must have obtained an MS degree or have a manuscript reporting original research accepted for publication in a refereed journal.

3. Before acceptance into the Department of Nutrition and Food Sciences, potential MS and PhD graduate students must be accepted by a faculty member who is willing to add them to his or her research team.

**Registration Requirements**

Once admitted, students are required to maintain enrollment as follows:

1. Enrollment in at least 3 credits per semester in order to use University facilities and receive direction (including thesis or dissertation direction) from their major professor.

2. Enrollment in at least 9 credits per semester if receiving an assistantship or fellowship from Utah State University.

3. Enrollment in no more than 6 credits per semester if employed full time by Utah State University.

**Selecting a Major Professor**

Initially, students are accepted into the department when at least one faculty member has expressed a willingness to add the student to his or her research team. By doing so, the faculty member guarantees at the time of acceptance that the student may work in his or her research program. However, offers of financial aid must be discussed directly with the faculty member. Students may choose as their major professor any faculty member who can and is willing to accommodate them.

**Establishing a Supervisory Committee**

A supervisory committee must be selected by the student in conjunction with his or her major professor during the student’s first semester as an NFS graduate student. The major professor serves as the chair of the supervisory committee. A minimum of three members (at least two from the department) including the major professor are required for the MS program, and at least five (three or more from the department and one or more from outside the department) for a PhD program must be suggested.

The **Supervisory Committee Assignment Form** needs to be submitted to the department head by the 8th week of the first semester for MS students and the 15th week of the first semester for PhD students. The department head must approve the student’s committee and may add members. It is the student’s responsibility to meet with the proposed committee members to make certain they are able and willing to serve. The **Supervisory Committee Assignment Form** is then forwarded to the dean of the School of Graduate Studies for final approval. (Note: The Supervisory Committee Assignment Form may be found on the School of Graduate Studies website, http://www.usu.edu/gradsch/forms/, or may be obtained at the Nutrition and Food Sciences departmental office.)

**Defining a Program of Study**

Students should register for their first semester based on advise from their major professor. Students should then prepare a Program of Study in conjunction with their major professor. The Program of Study should ensure fulfillment of the minimum requirements for all NFS graduate students (shown below) and also include other courses providing the background necessary to conduct their research.

Students need to schedule a meeting with their supervisory committee to discuss the proposed Program of Study by the end of the first semester for MS students and by the end of the second semester for PhD students. A copy of the proposed Program of Study should be given to each committee member several days prior to the committee meeting.

The purpose of the committee meeting is to secure the supervisory committee’s approval of the Program of Study. The committee will determine any deficiencies in core BS competencies or academic background. Students in the NFS graduate program should have already taken undergraduate general chemistry, organic chemistry, biochemistry, algebra, and statistics. Although these courses may be taken as part of the graduate program, they will not be counted as graduate credit in the Program of Study.

The supervisory committee is responsible for ensuring NFS graduate students have (or obtain during their program of study) the expected core competencies of NFS bachelor’s degree graduates. This can be...
based upon transcripts of courses from prior studies, passing courses listed in the program of study (with a minimum grade of B), or by administering a written or oral examination.

The committee will also determine that the courses included in the Program of Study meet the minimum requirements for obtaining an MS or PhD in Nutrition and Food Sciences (as shown below). All members of the committee, as well as the department head, must sign the Program of Study Form before it is sent to the School of Graduate Studies. Registration for all subsequent semesters should be based on the approved Program of Study. Changes to the Program of Study require a letter written by the major professor to the School of Graduate Studies (with copies to all members of the committee and the department head) justifying the change.

The student may register for courses not listed on the Program of Study with approval of his or her major professor (especially if the student is receiving a research assistantship). However, the student will be responsible for paying any additional in-state and out-of-state tuition and fees required for these additional classes. Tuition waivers (and tuition remission for PhD students) are based upon the approved Program of Study.

**Minimum Course Requirements for MS/PhD Students in Nutrition and Food Sciences**

**BS Core Competency Classes by Graduate Specialization**

**Food Science.** The following courses are required for students specializing in a food science related area: NFS 3110 (Food Technology and Health), NFS 5020 (Meat Technology and Processing) or NFS 5030 (Dairy Technology and Processing), NFS 5110 (Food Microbiology), NFS 5500 (Food Analysis), NFS 5560 (Food Chemistry), and STAT 3000 (Statistics for Scientists).

**Nutrition.** The following courses are required for students specializing in a nutrition related area: NFS 4020 (Advanced Nutrition) and STAT 3000 (Statistics for Scientists).

**Program of Study for MS and PhD Degrees**

The following courses are required. For further information, see pages 106-108 of the School of Graduate Studies section of this catalog.

1. **NFS Graduate courses.** NFS graduate courses (other than BS core competency courses): 5 credits for MS, 10 credits for PhD.

2. **Biochemistry and Statistics.** Biochemistry (CHEM 5700, 5710): 3 credits for MS, 6 credits for PhD; Statistics (STAT 5100, 5120, 5200, 5600): 3 credits for MS, 6 credits for PhD.

3. **NFS Graduate Seminar (NFS 7800).** Students must enroll in NFS 7800 during each fall and spring semester: 2 credits for MS, 6 credits for PhD.

4. **Teaching.** INST 7920: 1 credit required for PhD; NFS 6910 (Teaching Experience) or NFS 5250 (Occupational Experience): 2 credits required for PhD. (Credits in this area are not required for MS.)

5. **Other Graduate Courses.** BS core competency courses taken at the 6000 level, or other USU courses approved for graduate studies, may be included. For MS, 5-11 credits are required; for PhD, 15-25 credits are required.

6. **Research.** For MS, 6-12 credits of NFS 6970 are required. For PhD, 34-45 credits of NFS 7970 are required. If students desire to do research beyond the Program of Study requirements, they should register for Continuing Graduate Advisement.

**Total Credits Required**

For the MS degree, 30 total credits are required. For the PhD degree, 90 total credits are required (including the 30 credits taken for the MS).

**Research Proposal**

In consultation with the major professor, the student must choose a research area suitable for the MS thesis or PhD dissertation, and then prepare a research proposal. Research proposals should be written and approved by the end of the second semester for students completing the MS degree and by the end of the third semester for PhD students.

The content and duration of the proposed research should be appropriate for the degree. It is expected that MS research and coursework (including writing and defense of the thesis) should be completed within 2 years (24 months). The length of research being proposed for the PhD dissertation is dependent on the discovery by the student of a substantial level of new information that can be added to their field of specialization.

The proposal should include the following:

1. Title
2. Description of the problem, based on the most current literature
3. Statement of the purpose of the intended research
4. Research Plan
5. List of references cited, presented in a form acceptable for publication in a scientific journal in the student’s field

The student prepares the research proposal under the guidance of the major professor. Once the research proposal is completed, it is the student’s responsibility to schedule a meeting with his or her supervisory committee, and to provide each committee member with a copy of the research proposal at least two weeks prior to the meeting.

During the committee meeting, the student is expected to provide an oral presentation of the proposed research, and discuss any regulated aspects of the research, such as hazardous materials, experimental animals, or human subjects. After all members of the supervisory committee have approved the research proposal, a copy of the proposal will be sent to the graduate school.

**Departmental Seminar**

The NFS graduate seminar (NFS 7800) is held in the Nutrition and Food Sciences Building, room 202 from 3:30 to 5:00 p.m. each Wednesday during fall and spring semesters. All NFS MS and PhD students are expected to register for and attend this seminar during each semester for which they are enrolled as full-time graduate students.

This seminar will include presentations by NFS faculty members, faculty members from other USU departments, invited speakers, and graduate students. In addition to the presentations, NFS 7800 will also include assignments on topics such as critical thinking, scientific writing, poster preparation, and grant proposal writing. The theme of the seminar will be chosen by the NFS faculty member who is assigned as the course instructor.

During the semester in which they defend their thesis or dissertation, all MS and PhD students are required to give a presentation (a 30 to 45 minute seminar) on the results of their research. This presentation
Department of Nutrition and Food Sciences

will be given to the NFS faculty members and students as part of the NFS 7800 seminar series. The student must invite all members of the supervisory committee to attend this seminar presentation. At the beginning of the semester in which they plan to defend their thesis or dissertation, students need to schedule a date for their presentation with the NFS 7800 instructor.

**Comprehensive Examination (PhD students only)**

Before a student can become a candidate for the PhD degree, he or she must take a comprehensive examination, as required by the School of Graduate Studies. After completion of the courses listed in the *Program of Study*, the student should schedule a meeting of their committee for the comprehensive examination. This is usually an oral examination (although committee members have the option of providing a written exam), and the student should bring the *Application for Candidacy for Doctoral Degree Form* to the examination.

Typically students will be asked questions related to their area of specialization and their field of research. However, the comprehensive exam can also be used to test students’ overall knowledge of food science or nutrition, and committee members can ask any questions that will test the student’s knowledge and ability to synthesize nutrition and food science information, as well as answer questions. The form should be completed at this time. On the *Application for Candidacy for Doctoral Degree Form*, the committee members will list the field in which they examined the student, and then sign the form accordingly.

**Thesis or Dissertation Final Examination**

Students write the thesis or dissertation under the guidance of their major professor. To schedule a tentative date for the final examination (or defense) of the thesis or dissertation, students should also contact their supervisory committee members. Students need to plan well in advance, so that there will be sufficient time allowed for the student to complete their writing and for the committee members to read the thesis or dissertation. When the thesis or dissertation is ready to be defended, and at least four weeks prior to the tentative defense (or final) examination date and time, the student submits a copy to each committee member.

After the committee members have read the thesis or dissertation and have determined that it is indeed ready to be defended, the student prepares the *Appointment for Examination Form*. Each of the supervisory committee members is required to sign this form, indicating that they have read and tentatively approve the content and format of the thesis or dissertation, and that they can be in attendance at the defense.

The *Appointment for Examination Form* needs to be submitted to the School of Graduate Studies a minimum of 10 working days prior to the defense. The School of Graduate Studies will appoint one of the supervisory committee members (other than the major professor) to chair the defense examination.

**Completing the Thesis or Dissertation**

After a successful defense of the thesis or dissertation, the student is required to make any changes to the thesis or dissertation that are required as a consequence of the final examination. At this time, the student can schedule with the School of Graduate Studies a date by which he or she expects to have the thesis or dissertation available for review. If the thesis or dissertation is not submitted to the School of Graduate Studies prior to this date, it will be reviewed at the next available date.

When the thesis or dissertation has been revised to the satisfaction of the committee member(s) assigned the responsibility of ensuring such changes are completed to the satisfaction of the supervisory committee (usually the major professor), the front page of the thesis or dissertation can be signed. The student then completes the *Thesis/Dissertation Format and Style Form* and obtains the major professor’s signature (in the NFS Department the major professor also acts as the departmental format/style reviewer) and submits the thesis or dissertation to the School of Graduate Studies.

Following review by the School of Graduate Studies, the thesis or dissertation is collected by the NFS Department and returned to the major professor, along with a list of corrections. The major professor then has the responsibility of ensuring that the thesis or dissertation is revised (if necessary), and of signing a release indicating that the thesis or dissertation is ready for binding. The student may then make the needed copies of the thesis or dissertation and submit them for binding. It is also the student’s responsibility to ensure that all other forms and fees related to the thesis or dissertation and to the completion of his or degree are finalized.

**Other Graduate Programs**

**Master of Food Microbiology and Safety (MFMS)**

The MFMS degree is a professional degree designed to provide students with depth training in food safety assurance and the use of management systems such as HACCP. The degree is primarily intended for individuals planning careers in food quality assurance or other food safety-related positions in the food industry.

**MFMS Admission Requirements**

Students seeking entry into the MFMS program must satisfy the minimum admission requirements of the USU School of Graduate Studies and the NFS Department, and must also achieve a score of 3 (equivalent to the 40th percentile) or higher on the newly administered GRE Written Examination. Applications will be reviewed by the MFMS Advisory Committee, which is responsible for accepting students into the MFMS program and assigning them an advisor. The advisor will then consult with the student to select two additional graduate committee members.

**MFMS Program of Study**

The MFMS program of study has been tailored for students with undergraduate training in (1) food science or (2) microbiology or biology. Students who lack prerequisite competencies in food science, microbiology, or biology will be required to address those deficiencies during the MFMS program of study. Course requirements to meet specific deficiencies will be designated by the student’s advisory committee and, in accordance with School of Graduate Studies policy, may or may not count toward course requirements for the MFMS program of study.

The MFMS program of study, outlined below, requires a minimum of 32 semester credits, including (1) 10 semester credits of core coursework in food safety assurance, microbiology, and epidemiology; (2) at least 19 semester credits of coursework based on the student’s career goals and undergraduate competencies; and (3) the written preparation and oral presentation of a substantive literature review on a food safety topic.

**MFMS Program Requirements (32 credits minimum)**

Students must complete all of the following courses (12 credits): NFS 6170, 6200, 6900 (2 credits), 7800 (2 credits); BIOL 5850/6850;
and PUBH 4030. During NFS 6900 (Special Problems), students will prepare a substantive written literature review of a food safety topic. NFS 7800 (Seminar) must be taken during two semesters; during the final seminar, students must make an oral presentation on the food safety topic used for their literature review.

Students with a BS degree in Food Sciences must demonstrate competency equivalent to a USU BS degree in Nutrition and Food Sciences with a Food Science emphasis. These students must also select a minimum of 10 credits from the following: ADVS 6400; BIOL 5150 (offered biennially), 5300, 5330. The remaining credits should generally be selected from the following, although additional course substitutions may be made with approval of the student’s advisory committee: NFS 6020, 6030, 6120, 6210, 6500, 6510, 6610; NFS 6270, 6670, 6680, 6690 (the preceding four courses are offered biennially); ASTE 6260; CHEM 6730.

Minimum program prerequisites for students with a BS in biology, microbiology, or an equivalent degree include the following (the USU equivalent course is listed in parentheses): biochemistry (CHEM 3700), general microbiology (BIOL 3300), microbial physiology (BIOL 5300), and statistics (STAT 3000). In addition, these students must complete both NFS 6110 and 6500, and must take at least one of NFS 6020 and 6030. The remaining credits should generally be selected from the following, although additional course substitutions may be made with approval of the student’s advisory committee: NFS 6120, 6210, 6510, 6610; NFS 6270, 6670, 6680, 6690, BIOL 5150 (the preceding five courses are offered biennially); ADVS 6400; ASTE 6260; CHEM 6730.

**Master of Dietetics Administration (MDA)**

The MDA degree is a professional degree designed to provide dietitians with in-depth training in management and leadership in food and nutrition program administration. Nationwide, there is a need for professionally trained managers at local, district, state, and federal levels in food and nutrition programs, including school, university, and hospital food services; public health programs; and clinical management. This program provides in-depth training in financial management, human resource management, marketing, and dietetics-specific management.

**MDA Admission Requirements**

Candidates for the MDA program must qualify for one of the following categories: **Option 1**: Must have completed the USU Extension Dietetics Internship; or **Option 2**: Must be currently registered as a dietitian with at least two years of work experience. Students seeking entry must also satisfy: (1) admission requirements of the USU School of Graduate Studies; (2) admission requirements of the NFS Department; and (3) admission requirements of the MDA program, including a letter of application and an approved Program of Study. For further details, see: http://www.nfs.usu.edu/dietetics/programs/mda/mda.html

The MDA Advisory Committee is responsible for reviewing applications, accepting students into the MDA program, and assigning students to an advisor.

**MDA Program of Study**

**Option 1** is tailored for applicants who have completed the USU Extension Dietetics Internship. Students must complete a minimum of 41 credits and a Plan B thesis. The completed USU Extension Dietetics Internship provides 26 of the 41 credits. Following the internship, 15 additional credits are required including: NFS 6780, 6900 (3 credits), 6970 (2 credits), 7800 (1 credit), and two courses to be determined by the MDA candidate and the Advisory Committee.

**Option 2** is tailored to the registered dietitian with at least two years of work experience. A minimum of 30 credits is required for this Plan B option. Students must complete 18 credits from the NFS Department and a minimum of 6 credits each in two of the three related disciplines. These disciplines include overall management, financial management, and human resource management. Coursework will be based on the student’s career goals and competencies. The following courses are required: NFS 4750, 5200, 5210, 5510, 6750, 6780, 6900 (3 credits), 6970 (2 credits), and 7800 (1 credit). The remaining courses must be selected from the following: BA 3400, 6350, 6440, 6520; INST 6490; MHR 6350, 6370, 6410, 6500, 6510, 6550, 6630, 6760.

**Registration Requirements for Graduate Students**

Once admitted, students are required to maintain enrollment as follows: at least 3 credits to use University facilities and receive direction (including thesis or dissertation direction) from their major professor; at least 6 credits if on a Graduate Teaching or Research Assistantship (9 credits if employed less than 15 hours per week); at least 9 credits if on a Research Fellowship or unsupported; at least 6 credits if receiving tuition waivers, student loans, or other University-administered financial aid; and no more than 6 credits if employed full time by the University.

**Financial Assistance**

Some teaching assistantships and research fellowships and many research assistantships are available to graduate students in the Department of Nutrition and Food Sciences. Teaching assistantships are used to cover the teaching needs of the department. Research fellowships and research assistantships are available through individual faculty members. Most research assistantships are tied to specific research projects.

The Gandhi Scholarship is available, on a competitive basis, to support outstanding students during their graduate education in food science. Each incoming student may select any advisor who fits his or her area of interest in food science. Awards are available for entering master’s degree students, as well as for PhD candidates. Applications are due February 1. To obtain an application, visit the Department of Nutrition and Food Sciences website or contact the departmental staff.

**Career Opportunities**

There is a continuing shortage of MS and PhD graduates in nutrition and food sciences. Many MS graduates go on to obtain a PhD, but all graduates have a wide choice of career opportunities.

**Additional Information**

Additional information and updates may be obtained by writing or telephoning the Department of Nutrition and Food Sciences directly or by checking out the departmental website at: http://www.nfs.usu.edu/
Nutrition and Food Sciences Faculty

Professors
Jeffery R. Broadbent, food science, microbial genetics
Charles E. Carpenter, food science, muscle biochemistry and physiology, meat processing
Nedra K. Christensen, nutrition, dietetics
Daren P. Cornforth, food science, meat and muscle chemistry
Conly L. Hansen, food science, food engineering
Donald J. McMahon, food science, dairy chemistry and technology
Ilka Nemere, nutrition, molecular nutrition
Bart C. Weimer, food science, microbial physiology

Clinical Professors
Janet B. Anderson, dietetics, food science management, food safety
Noreen B. Schvaneveldt, dietetics, clinical nutrition

Adjunct Professors
Gary M. Chan, pediatrics
Timothy A. Gilbertson, biology
Craig J. Oberg, microbiology

Professors Emeritus
Deloy G. Hendricks
Georgia C. Lauritzen
Von T. Mendenhall
Gary H. Richardson
Ann W. Sorenson
Bonita W. Wyse

Associate Professor
Marie K. Walsh, food science, dairy chemistry

Adjunct Associate Professors
Barbara Chaffield, pediatric pulmonology
Wayne G. Geilman, dairy processing and technology
Paul A. Savello, dairy processing and food science, food laws and regulations, milk ultra high temperature and whitening

Adjunct Clinical Associate Professor
Heidi Reese LeBlanc, dietetics

Adjunct Research Associate Professor
Laurie J. Moyer-Mileur, pediatric nutrition

Associate Professor Emeritus
Charlotte P. Brennand

Assistant Professors
Korry Hintze, nutrition, nutrient-gene interaction, iron metabolism, selenium metabolism
Silvana Martini, characterization of lipids, sensory evaluation of foods, product development

Brian A. Nummer, biosecurity, food service, food safety, food process development
Robert E. Ward, bioactive nutrients, food and lipid analysis
Heidi J. Wengreen, nutrition, clinical dietetics, epidemiology
Siew Sun Wong, nutrition, nutrition education program, epidemiology

Research Assistant Professors
Dong Chen, molecular structure and biochemistry
Carl S. Hansen, agricultural education, waste management
Catherine McDonald, pediatric nutrition, clinical dietetics

Clinical Assistant Professor
Tamara S. Vitale, dietetics, community nutrition

Adjunct Clinical Assistant Professor
Ann M. Mildenhall, dietetics, director of dietetic internship program

Assistant Professor Emeritus
Frances G. Taylor

Adjunct Assistant Professor
Theodore Liou, nutrition, internal medicine, pulmonology

Adjunct Clinical Assistant Professors
W. Daniel Jackson, pediatrics
Julianne Steiner, dietetics, diabetes

Clinical Instructors
Marine Israelsen, dietetics, nutrition
Janette Smith, dietetics, nutrition
Megan Bunch Smith, dietetics

Adjunct Assistants
Sarah Gunnell, dietetics
Emily W. Hoffman, dietetics, nutrition, food safety
Kim McMahon, dietetics/food service management
Jennie Oler, Assistant Director of Dietetic Internship Program; dietetics
Pauline Williams, dietetics

Lecturers
Karin Allen, food science
Randall T. Bagley, dairy processing
Virginia C. Bragg, nutrition
Erik T. Burtie, culinary arts/food service management, chef
Grace B. Harvell, culinary arts
Dick R. Whittier, meat processing

Adjunct Clinical Lecturer
Rebecca S. Cole, dietetics/food service management

Course Descriptions
Nutrition and Food Sciences (NFS), pages 677-681
Office Systems Support AAS Degree

Program Director/Advisor: Dennis Garner
Location: Uintah Basin Regional Campus (Roosevelt)
Phone: (435) 722-1713
FAX: (435) 722-4889
E-mail: dennissj@ext.usu.edu
WWW: http://www.usu.edu/cob/oss

Objectives

This 2+2 program, offered only through Continuing Education, leads to an Associate of Applied Science (AAS) degree in Office Systems Support (OSS). This degree is offered through the Center for Independent and Distance Learning (CIDL) at Continuing Education Centers located in Logan, Brigham City, Tooele, and the Uintah Basin. The OSS curriculum reflects the IS 2002 Model Curriculum for undergraduate programs developed by information systems professionals and educators. This degree is designed to prepare students for office positions using the latest office skills and the applications of computer technology for transmitting business information. Although the degree is a two-year program, students who take articulated classes, concurrent enrollment classes, or challenge tests can complete the degree in less than two years.

Admission Requirements

1. New freshmen admitted to USU in good standing qualify for admission to this major.
2. Transfer students from other institutions and from other USU majors need a 2.20 total GPA for admission to this major in good standing.

Degree Requirements

The OSS degree program is a blend of Office Systems Support courses and courses from other departments. Students begin by taking English, communications, mathematics, and microcomputer courses that provide knowledge and skills useful in everyday office work. In addition, they select a number of courses from those approved for University Studies. Classes in English; Sociology; Psychology; Family, Consumer, and Human Development; and Business Administration are recommended. Next, students learn advanced word processing and business correspondence skills needed in today’s offices. Students also learn about computers, accounting, and economics. After completing the prerequisite knowledge and skill courses, students are placed in internship positions for on-the-job training.

In completing the minimum 65 credits required in the program, students will complete courses related to their major, such as accounting and information systems. They will also select courses of their own choice. The requirements for this program, including University Studies requirements, are summarized below. Students are urged to visit with their advisor on a regular basis about progress toward the completion of the program.

Career Opportunities

Recent graduates have been employed in various occupations, including Medicare specialist, senior administrative assistant, computer analyst, and as administrative assistants in legal, marketing, and accounting offices.

Academic Advisement

All students should contact their academic advisor for assistance with course selection, program planning, and meeting graduation requirements. If they do not know who their advisor is, students should contact the Continuing Education center through which they are completing their degree.

Graduation Requirements
(65 credits)

All courses completed as part of this program may also be applied toward the requirements for a bachelor’s degree. Some classes may have prerequisites. For further information, review this catalog.

University Studies Requirements
(18-19 credits)

Communications Literacy (6 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ...........3
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a
Persuasive Mode ........................................................................ 3

Quantitative Literacy (3-4 credits)
MATH 1050 (QL) Quantitative Literacy (3-4 credits) ..........................3 or 4

Computer and Information Literacy (CIL)
No specific course is required, but students must pass competency exams in computer and information literacy. See the General Education Requirements section (page 49) for more information. OSS 1400 is designed to prepare students for these competency exams.

Breadth Requirements (9 credits)
Two of the following three classes must have a USU prefix.
Breadth Humanities (BHU) course (USU 1320 recommended) .........3
Breadth Life Sciences (BLS) course (USU 1350 recommended) ........3
Breadth Physical Sciences (BPS) course (USU 1360 recommended) .3

Elective Requirements (4-5 credits)

Major Area Requirements (33 credits)
(2.5 GPA)

ACCT 2010 Survey of Accounting I........................................ 3
BIS 2100 Principles of Management Information Systems ..........3
BIS 2200 (CI) Business Communication ..................................3
BUS 2250 Introductory Internship (pre-approval required) .........3
OSS 1400 Microcomputer Applications (3 cr) or
OSS 1410 Special Topics: Basic Computer Concepts .................3
OSS 1420 Word Processing Applications .................................3
OSS 1550 (CI) Business Correspondence ...............................3
OSS 2300 Data Communications and Networking .....................3
OSS 2400 Web Design Applications ........................................3
OSS 2520 Integrating Office Technology .................................3
OSS 2600 Office Procedures ..................................................3
Related Area Requirements (9 credits)

Students must also take 9 or more credits from the following recommended courses. Students must choose from at least two areas.

**Accounting**
- ACCT 1550 Accounting Software for Small Business Applications .............................................3
- ACCT 2020 Survey of Accounting II .......................................................................................3
- BUS 3010 Intermediate Accounting I ......................................................................................3

**Business Information Systems**
- BUS 3330 Essentials of Database Systems ..................................................................................3

**Office Systems Support**
- OSS 1410 Special Topics ...........................................................................................................1-3
- OSS 2450 Spreadsheets and Databases ......................................................................................3
- OSS 2500 Visual Basic Applications ..........................................................................................3

**General Business**
- ACCT 1050 Accounting Essentials .............................................................................................3
- BA 1350 Introduction to Business ...............................................................................................3
- ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles .....................3
- ECON 2010 (BSS) Introduction to Microeconomics ..................................................................3
- MHR 2050 Legal and Ethical Environment of Business .............................................................3
- BUS 3110 (DSS) Management Fundamentals .........................................................................3
- BUS 3710 Interpersonal and Team Skills ....................................................................................3
- PSY 1010 (BSS) General Psychology .......................................................................................3

Department of Physics

Department Head: Jan J. Sojka
Location: Science Engineering Research 250A
Phone: (435) 797-2848
FAX: (435) 797-2492
E-mail: physics@cc.usu.edu
WWW: http://www.physics.usu.edu/

Assistant Department Head:
Charles G. Torre, Science Engineering Research 232, (435) 797-3426, charles.torre@usu.edu

Academic Advisor:
Karalee Ransom, Science Engineering Research 250D, (435) 797-4021, karalee.ransom@usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), and Doctor of Philosophy (PhD) in Physics; BS in Physics Teaching; BS in Composite Teaching—Physical Science (Physics)

Undergraduate emphases: BS—Professional Emphasis or Applied Emphasis

Graduate specializations: Electromagnetic Theory, Industrial Physics (MS only), Space Science, Surface Physics, Theoretical Physics, Upper Atmospheric Physics (MS only)

Undergraduate Programs

Objectives

The Physics Department embraces undergraduate students from all quarters of the University—in introductory courses required for majors by various departments, in courses for more general audiences that are part of the University Studies Program, and in upper-level courses designed primarily to fulfill bachelor’s degree requirements in Physics. These courses, and the degree programs offered, are strongly impacted by the department’s central goals:

1. to communicate the beauty and utility of the fundamental principles of the physical universe and the power of describing nature in quantitative terms,
2. to create new knowledge,
3. to foster critical and creative thinking,
4. to enhance the ability of citizens to participate in a technological democracy,
5. to assist in the preparation of elementary and secondary school teachers,
6. to provide opportunities for students to sharpen their communication and interpersonal skills, and
7. to develop new tools and texts to improve physics pedagogy.

The degree programs of the department are constructed to be rigorous, yet flexible, and are intended to help students prepare for careers in academia, government and industrial laboratories, medicine, law, teaching, and business. Required course and laboratory work in these programs carefully balances theory and experiment. Because the department believes one must participate in discovery to understand science, undergraduates are encouraged to engage in departmental research early in their studies, and a formal research experience is integral to most departmental programs. The department’s Microgravity Research Team (MRT) activities provide excellent opportunities for students of all backgrounds to participate in space-related research.

Requirements

Departmental Admission and Graduation Requirements

New freshmen admitted to USU in good standing qualify for admission to the degree programs in Physics. Admission in good standing for students transferring from another institution requires a minimum transfer GPA of 2.2, while students transferring from another USU major are required to have a minimum total GPA of 2.0. Students wishing to complete the Teaching Major in Physics must apply for admission to the Secondary Education program as well. Requirements for admission to the Secondary Teacher Education Program (STEP) include a minimum GPA of 2.75 in either PHYS 2110 and 2120, or PHYS 2210 and 2220; and at least 60 total credits completed with a minimum GPA of 2.75. A Composite Teaching Major in Physical Science is available through either the Physics or the Chemistry and Biochemistry departments. Students applying for admission to the STEP with the Composite major must satisfy the latter requirements, plus a minimum GPA of 2.75 in CHEM 1210, 1215, 1220, and 1225.

Students may use no more than one course with the P-D-F option to satisfy a major or minor requirement in Physics. All other courses used to satisfy major or minor requirements must be completed with at least a C- grade, and the total GPA in all required Physics courses must be at least 2.3. The Teaching Major and Teaching Minor in Physics and the Composite Teaching Major in Physical Science require a 2.75 minimum GPA in Physics courses and a minimum 2.75 overall GPA for graduation.

College of Science Requirements

The College of Science requires a year of mathematics (8 credits) and a year sequence in science (6-8 credits) for all of its majors. For Physics majors, the College of Science requirements are:

MATH 1210 (QL) Calculus I, (F,Sp,Su) ................................................ 4
MATH 1220 (QL) Calculus II (F,Sp,Su) ............................................... 4

Choose one of the following pairs of courses:

BIOL 1610 Biology I (F) (4 cr) and
BIOL 1620 (BLS) Biology II (Sp) (4 cr) ............................................. 8
Or
CHEM 1210 Principles of Chemistry I (F,Sp) (4 cr) and
CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) (4 cr) .......... 8
Or
GEO 1110 (BPS) The Dynamic Earth: Physical Geology (F,Sp) (4 cr) and
GEO 3200 (DSC) The Earth Through Time (Sp) (4 cr) ................. 8

Bachelor’s Degrees and Core Requirements

The Physics Department awards the following degrees: BS in Physics, BA in Physics, BS in Physics with a Professional Emphasis, BS in Physics with an Applied Emphasis, BS in Mathematics and Physics Dual Major Option, BS in Physics Teaching, and BS in Composite Teaching—Physical Science.

454
Department of Physics

Except for the two Teaching Majors, all degrees require a common core (42 credits):

A. College of Science Requirements (16 credits)

B. Required Physics Courses (23 credits)

PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) and
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr)

On completion of these courses, students are required to have received an AP score of at least 3 on the Calculus BC exam.

C. Required Mathematics Course (3 credits)

MATH 2250 (QI) Linear Algebra and Differential Equations

Courses in other technical departments at the 3000 level or above (not to include courses designated as University Studies depth courses). Selected courses must have a coherent theme and must be approved by the Physics Department.

5. Mathematics and Physics Dual Major Option

By fulfilling all degree requirements for any two separate majors, it is possible for a student to receive a diploma having two majors listed. Because most physics majors are required to complete a minimum of 14 credits in mathematics courses, many students elect to complete the requirements for a BS degree in mathematics, as well as the requirements for their physics degree.

Suggested Four-year Course of Study for Bachelor of Science Degree in Physics

The suggested schedule shown below should be used in conjunction with the major requirement sheet. Students should consult with their advisor to develop an individualized plan of study which is applicable to their interests and degree track.

Prior to enrolling in MATH 1220 (Calculus II), students must have completed MATH 1210 (Calculus I) with a grade of C- or better, or must have received an AP score of at least 4 on the Calculus AB exam or at least 3 on the Calculus BC exam.

Freshman Year (30 credits)

Fall Semester (15 credits)

PHYS 2210 (QI) General Physics—Science and Engineering I ..........................4
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II ...............4

C. Required Mathematics Course (3 credits)

MATH 2250 (QI) Linear Algebra and Differential Equations

Courses in other technical departments at the 3000 level or above (not to include courses designated as University Studies depth courses). Selected courses must have a coherent theme and must be approved by the Physics Department.

5. Mathematics and Physics Dual Major Option

By fulfilling all degree requirements for any two separate majors, it is possible for a student to receive a diploma having two majors listed. Suggested Four-year Course of Study for Bachelor of Arts Degree in Physics

The suggested schedule shown below should be used in conjunction with the major requirement sheet. Students should consult with their advisor to develop an individualized plan of study that is applicable to their interests and degree track.

Prior to enrolling in MATH 1210 (Calculus II), students must have completed MATH 1210 (Calculus I) with a grade of C- or better, or must have received an AP score of at least 4 on the Calculus AB exam or at least 3 on the Calculus BC exam.

Freshman Year (30 credits)
Fall Semester (15 credits)
PHYS 2210 (QI) General Physics—Science and Engineering I ............... 4
MATH 1210 (QI) Calculus II ......................................................................... 4
College of Science sequence requirement.................................................. 4
University Studies Breadth course .......................................................... 3

Spring Semester (15 credits)
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II .......... 4
MATH 2210 (QI) Multivariable Calculus .................................................. 3
College of Science sequence requirement.................................................. 4
University Studies Breadth course .......................................................... 3
Elective course ............................................................................................................... 1

Sophomore Year (30 credits)
Fall Semester (15 credits)
PHYS 2500 Introduction to Computer Methods in Physics ....................... 2
PHYS 2710 Introductory Modern Physics .................................................. 3
MATH 2250 (QI) Linear Algebra and Differential Equations .................. 4
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .................. 3
University Studies Breadth course .......................................................... 3

Spring Semester (15 credits)
PHIL 4310 (DHA) Philosophy of Science .................................................. 3
University Studies Breadth courses .......................................................... 6
Elective courses ............................................................................................................... 6

Junior Year (30 credits)
Fall Semester (15 credits)
PHYS 3550 Intermediate Classical Mechanics ............................................. 3
PHYS 3870 (CI) Intermediate Laboratory I ................................................. 2
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................................. 3
University Studies Breadth course .......................................................... 3
Required language courses ................................................................................. 4

Spring Semester (15 credits)
PHYS 3600 Intermediate Electromagnetism ................................................ 3
PHYS 3710 Intermediate Modern Physics (3 cr) or
Elective course at 3500-level or higher (3 cr) ............................................. 3
University Studies Depth Social Sciences (DSS) course ......................... 3
Required language courses ................................................................................. 4
Elective course(s) ...................................................................................................... 2

Senior Year (30 credits)
Fall Semester (15 credits)
PHYS elective course at 3500-level or higher ............................................. 3
Required language courses ................................................................................. 4
Elective courses .......................................................................................................... 8

Minor in Physics
Majors in other departments may obtain a minor in physics by successfully completing the following courses:
PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) and
PHYS 2220 (BPS/QL) General Physics—Science and Engineering II (4 cr) .................................................. 8

Or
PHYS 2110 The Physics of Living Systems I (4 cr) and
PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) .................................................. 8

To obtain a physics minor, students must also select 10 additional credits from PHYS courses at the 2500 level and above (not to include PHYS courses designated as USU Depth courses). Note that MATH 1100 or 1210 is a prerequisite for PHYS 2110, MATH 1210 is a prerequisite for PHYS 2210, and MATH 1220 is a prerequisite for PHYS 2710.

Bachelor of Science in Physics Teaching
In addition to the College of Science requirements, courses required for the Bachelor of Science in Physics Teaching include the following:
Department of Physics

MATH 1210 (QL) Calculus I (F,S,S) .............................................. 4
MATH 1220 (QL) Calculus II (F,S,S) ............................................ 4
MATH 2250 (QI) Linear Algebra and Differential Equations (F,S,S) .............................................. 4
STAT 3000 (QI) Statistics for Scientists (F,S,S) .............................................. 3

PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) and
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr) .............................................. 8
Or (PHYS 2210, 2220 preferred; or PHYS 2110, 2120)
PHYS 2110 The Physics of Living Systems I (4 cr) and
PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) .............................................. 8

PHYS 1040 (BPS) Introductory Astronomy .............................................. 3
PHYS 2500 Introduction to Computer Methods in Physics .............................................. 2

PHYS 2710 Introductory Modern Physics .............................................. 3
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .............................................. 3
STAT 3000 (QI) Statistics for Scientists (F,S,S) .............................................. 3
University Studies Breadth course .............................................. 3

Spring Semester (16 credits)
PHYS 3710 Intermediate Modern Physics .............................................. 3
General Science requirement .............................................. 4
University Studies Breadth courses .............................................. 6
University Studies Depth course .............................................. 3
Apply for STEP (Secondary Teacher Education Program)

Junior Year (31 credits)

Fall Semester (15 credits)
PHYS 3870 (CI) Intermediate Laboratory I .............................................. 2
PHYS elective course at 3000-level or higher .............................................. 3
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode .............................................. 3
General Science requirement .............................................. 4
University Studies Breadth course .............................................. 3

Spring Semester (16 credits)
PHYS elective course at 3000-level or higher .............................................. 2
University Studies Breadth course .............................................. 3
STEP Level 1 courses .............................................. 11

Senior Year (29 credits)

Fall Semester (17 credits)
SCI 4300 Science in Society .............................................. 2
University Studies Depth course .............................................. 3
STEP Level 2 courses .............................................. 12

Spring Semester (12 credits)
STEP Level 3 Student Teaching .............................................. 12

Bachelor of Science Degree in Composite Teaching—Physical Science (91-92 credits)

Courses required for the Bachelor of Science in Composite Teaching—Physical Science include the following:
MATH 1210 (QL) Calculus I (F,S,S) .............................................. 4
MATH 1220 (QL) Calculus II (F,S,S) .............................................. 4
STAT 3000 (QI) Statistics for Scientists (F,S,S) .............................................. 3

PHYS 2210 (QI) General Physics—Science and Engineering I (4 cr) and
PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr) .............................................. 8
Or
PHYS 2110 The Physics of Living Systems I (4 cr) and
PHYS 2120 (BPS) The Physics of Living Systems II (4 cr) .............................................. 8
(PHYS 2210 and 2220 are preferred.)

PHYS 1040 (BPS) Introductory Astronomy .............................................. 3
PHYS 1080 (BPS) Intelligent Life in the Universe (sometimes listed as USU 1360, ST: Intelligent Life in the Universe) (3 cr) or
PHYS 3030 (QI) The Universe (3 cr) .............................................. 3
Courses in Physics from PHYS courses at the 2500 level and above (including USU Depth courses) .............................................. 5
CHEM 1210 Principles of Chemistry I (F,S) .............................................. 4
CHEM 1215 Chemical Principles Laboratory I (F,S) .............................................. 1
CHEM 1220 (BPS) Principles of Chemistry II (F,S,S) .............................................. 4
CHEM 1225 Chemical Principles Laboratory II (F,S) .............................................. 1
CHEM 2300 Principles of Organic Chemistry (F) (3 cr) or
CHEM 2310 Organic Chemistry I (F) (4 cr) .............................................. 3 or 4
CHEM 2315 Organic Chemistry Laboratory I (F) .............................................. 1
Department of Physics

BIOL 1010 (BLS)  Biology and the Citizen (F,Sp,Su).................................3
GEO 1110 (BPS)  The Dynamic Earth: Physical Geology (F,Sp)...........4
BMET 2000 (BPS)  The Atmosphere and Weather (F,Sp)....................3
SCI 4300 Science in Society (F,Sp)......................................................2

Students seeking this degree must complete the requirements for the Secondary Teacher Education Program (STEP). Admission to the STEP with this major requires a minimum GPA of 2.75 in either PHYS 2110 and 2120 or PHYS 2210 and 2220, in addition to Department of Secondary Education requirements.

Students who may wish to teach Integrated Science at the middle or junior high school level should talk to their advisor about completing the courses necessary for an Integrated Science endorsement.

Note: Beginning in 2006, all USU teacher education candidates will be required to take and pass the content exam approved by the Utah State Office of Education in their major content area prior to student teaching.

Suggested Four-year Course of Study for Bachelor of Science Degree in Composite Teaching—

Physical Science

The suggested schedule shown below should be used in conjunction with the major requirement sheet. Students should consult with their advisor to develop an individualized plan of study that is applicable to their interests and degree track.

Prior to enrolling in MATH 1220 (Calculus II), students must have completed MATH 1210 (Calculus I) with a grade of C- or better, or must have received an AP score of at least 4 on the Calculus AB exam or at least 3 on the Calculus BC exam.

Freshman Year (31 credits)
Fall Semester (15 credits)
PHYS 2210 (QI) General Physics—Science and Engineering I............4
PHYS 1080/USU 1360 (BPS)  Intelligent Life in the Universe.............3
University Studies Breadth course ......................................................3
Elective course ..................................................................................1

Spring Semester (16 credits)

Teaching Minor in Physics

Students who complete the Secondary Teacher Education Program (STEP) are eligible to obtain a Teaching Minor in Physics by successfully completing the following courses:

PHYS 1000 (BPS)  Introductory Astronomy .......................................3
PHYS 2210 (QI)  General Physics—Science and Engineering I (4 cr) and
PHYS 2220 (BPS/QI)  General Physics—Science and Engineering II (4 cr)........8

Or
PHYS 2110  The Physics of Living Systems I (4 cr) and
PHYS 2120  The Physics of Living Systems II (4 cr) ........................8
(PHYS 2210 and 2220 are preferred.)

Courses in Physics chosen from PHYS 2500 and/or courses above the 3000 level (including USU Depth courses) .....................................................6

SCI 4300  Science in Society (F,Sp) (2 cr) or
Science course (not including Physics) not required by the major, if SCI 4300 is required by the student’s major .........................2

Note: MATH 1100 or 1210 is a prerequisite for PHYS 2110, MATH 1210 is a prerequisite for PHYS 2210, and MATH 1220 is a prerequisite for PHYS 2710.

In addition, the Teaching Minor in Physics requires completion of the Secondary Teacher Education Program (STEP). Admission to the STEP with this major requires a minimum GPA of 2.75 in either PHYS 2110 and 2120, or PHYS 2210 and 2220, in addition to Department of Secondary Education requirements.

Secondary Teacher Education Program (STEP) (35 credits)
Level 1 (11 credits)
SCED 3100  Motivation and Classroom Management (F,Sp) .............3
SCED 3210 (CI/DSS)  Educational and Multicultural Foundations (F,Sp)........3
SCED 3300  Clinical Experience I (40 hours minimum) (F,Sp) ..........1
SCED 3400  Teaching Science I (F,Sp) .............................................3
INST 3500  Technology Tools for Secondary Teachers (F,Sp,Su) ......1

Utah State University 2007-2009 General Catalog 459
The Physics Department at Utah State University has a long record of successfully involving its undergraduate students in research and extracurricular scholarly activities. Learning what science is requires more than just doing homework and taking exams; it requires getting involved in the pursuit of knowledge that is not yet in any textbook. Undergraduates can take PHYS 4900 (Research in Physics) for academic credit. However, many students participate in research activities without credit, because they enjoy being immersed in the act of discovery. Having a meaningful research experience and working closely with faculty are useful for applying for employment, admission to graduate schools, and applying for competitive scholarships. For more information, contact David Peak at david.peak@usu.edu, or visit the following website:
http://www.physics.usu.edu/research/undergrad.html

**Departmental Honors**

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

**Learning Objectives**

The Physics Department has the following learning objectives. While many of these objectives are applicable to all six departmental programs, some apply only to specific programs. To see which program(s) includes each learning objective, see the footnotes which follow.

1. Capable communication, written and oral[1,2,3,4,5,6]
2. Skepticism[1,2,3,4,5,6]
3. Ability in critical thinking and problem solving[1,2,3,4,5,6]
4. Knowledge of physics subjects to an advanced undergraduate level[1,2,3,4,5,6]
5. Wide knowledge of physics subjects to an advanced undergraduate level[2,3]
6. Knowledge of focused applied areas of study to the undergraduate level[4]
7. Experience in experimental physics[1,2,3,4,5,6]
8. Experience in physics research[1,2,3,4,5,6]
9. Knowledge of computer methods in physics[1,2,3,4,5,6]
10. Knowledge of broadening subjects[1,2,3,4,5,6]
11. Knowledge of mathematics to undergraduate calculus level[2,3,4,5,6]
12. Knowledge of mathematics to undergraduate differential equations level[1,2,3,4,5]
15. Knowledge of a foreign language to the undergraduate level[1]

**Programs:**

The footnotes following each of the preceding learning objectives indicate which program(s) include that objective. The six undergraduate programs are as follows:

1. BA degree in physics
2. BS degree in physics
3. BS degree in physics with professional emphasis
4. BS degree in physics with applied emphasis
5. BS degree in physics teaching
6. BS degree in composite teaching

**Assessment**

The Physics Department supports an ongoing program of assessment based upon input from students, alumni, colleagues, professional organizations, etc. For details, see: http://www.physics.usu.edu/assessment/assessment.htm

**Financial Support**

The Physics Department has several small scholarship funds available for physics majors with excellent academic records. In addition, there are a number of Microgravity Research Team (MRT) scholarships for students interested in designing and constructing experiments to be flown in space and in participating in other MRT activities. Inquiries should be made with the Physics advisor in SER 250.
PhD program. If not, a student already having an MS in physics from USU will be asked to leave. A student without an MS in physics from USU will be invited to finish his or her MS degree. Upon completion, the student can reapply to the PhD program, but acceptance will be contingent on the evaluation of the student’s graduate work to that point.

Degree Programs

Master of Science
In addition to the above general requirements, students completing a Plan A MS degree must complete four of the nine required PhD courses listed below (see Doctor of Philosophy). Plan B MS students must complete five of the nine courses, and Plan C MS students must complete six of the nine courses. Each student is required to pass PHYS 5800 (Physics Colloquium) for four consecutive semesters, beginning with the first semester after matriculation. The student must also submit and orally defend either a thesis (Plan A) or a research report (Plan B) at the discretion of the student’s supervisory committee. Plan A and Plan B MS candidates must present a colloquium to the department on the research topic during the time the thesis or research report is being written. The department accepts Plan A, which has no research component. For Plan B, the student must complete 33 credits of graduate-level coursework, the composition of which shall include the required courses listed above. In addition, the student must present a seminar and a paper to his or her supervisory committee on a topic related to educational or managerial aspects of physics graduate education, which is chosen by his or her supervisory committee.

Master of Science (Upper Atmospheric Physics Specialization)
The department offers a specialization in Upper Atmospheric Physics for MS students. This degree is a Plan A MS. In consultation with his or her advisor, the student selects a minimum of 18 credits of classwork from the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 4600 Advanced Electromagnetism</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 6240 Space Environment and Engine</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 6310 Solar-terrestrial Physics I</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 6320 Solar-terrestrial Physics II</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 6330 Plasma Physics I</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 6340 Plasma Physics II</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 7210 Spacecraft Instrumentation</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 7500 Advanced Topics in Physics</td>
<td>3</td>
</tr>
</tbody>
</table>

Three to six additional credits may be chosen from courses in electrical engineering, computer science, mathematics, and biometeorology. The student may gain from 6 to 12 credits by research, to be written up as a thesis that must be defended orally. In addition, the student must present a colloquium on the topic of his or her research.

Doctor of Philosophy
In addition to the general requirements, a total of nine courses (27 credits) are required for all PhD students. The required courses are:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 5340 Methods of Theoretical Physics I</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 5350 Methods of Theoretical Physics II</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 6010 Classical Mechanics I</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 6110 Electrodynamics I</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 6210 Quantum Mechanics I</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 6410 Statistical Mechanics I</td>
<td>3</td>
</tr>
</tbody>
</table>

One State of Matter course .....................3
Two courses in Advanced Topics ...............6
The State of Matter requirement can be fulfilled by taking any one of PHYS 6330 (Plasma Physics I), 6530 (Solid State Physics I), or 6930 (Quantum Field Theory I). These courses must be completed no more than one year after PhD qualification. Each student is required to pass PHYS 5800 (Physics Colloquium) for four consecutive semesters, beginning with the first semester after matriculation. The student must also take an oral candidacy examination, consisting of a presentation made by the student, then followed by questions from departmental faculty. The presentation and questions will be based upon a research topic set by the student’s supervisory committee. The candidacy oral examination will normally occur no later than the fifth semester after the student begins graduate coursework. The student will have at least two months to prepare for the examination.

The student must also complete a research dissertation and give an oral defense of the dissertation. Furthermore, the PhD candidate is expected to give two colloquia to the department. The first of these will normally be given at the time of submission of the research proposal, with the other given at the time the dissertation is completed.

Research

Space Science
The Physics Department is active in the field of atmospheric and space science, in close association with the interdisciplinary Center for Atmospheric and Space Sciences and the Space Dynamics Laboratory. Atmospheric and space science involves many areas of physics, in addition to such disciplines as engineering, chemistry, and meteorology. At USU, these groups enjoy a strong cooperative relationship and, as a result, the atmospheric and space science program has flourished for many years. Once the departmental requirements have been met, students may select courses from the offerings of the associated departments suited for their particular interests and needs while they gain research experience on challenging problems in atmospheric and space science. Opportunities are available for students in both experimental and theoretical projects. These include participation in instrument development and data analysis related to rocket, satellite, and space shuttle projects and projects in experimental design and data analysis related to incoherent-scatter and coherent radars, ground-based magnetometer, and ground-based optical instruments including a LIDAR system. Opportunities also exist in theoretical modeling of physical processes occurring in both the neutral atmosphere and in the plasma in the solar-terrestrial environment.

Plasma Theory and Confinement
Research in the field of magnetic confinement fusion at Utah State University includes the theoretical development and experimental realization of minimum-energy confinement configurations possessing substantial electric fields. These configurations hold promise as neutron and energy sources and are being developed as a collaborative effort between Dr. Farrell Edwards and Dr. Eric Held. In addition, Dr. Held is involved in developing improved hybrid fluid/kinetic models for terrestrial and astrophysical plasmas. This work provides theoretical support for next-step fusion experiments such as the International Thermonuclear Experimental Reactor (ITER).

Surface Physics
The surface physics group has an active experimental research program studying the structure, growth, dynamics, electronic properties, and optical properties of surfaces, interfaces, and adsorbed layers. The group has expertise in the interactions of electrons, ions, and photons with materials. Experimental techniques used within the group include atomic force microscopy (AFM), Auger electron spectroscopy (AES), infrared spectroscopy, ion scattering spectroscopy, ion implantation, low-energy electron diffraction (LEED), photoemission spectroscopy, scanning electron microscopy (SEM), scanning tunneling microscopy (STM), secondary ion mass spectroscopy (SIMS), thermal deflection spectroscopy, ultrafast femtosecond laser spectroscopy, vapor pressure adsorption isotherms, and x-ray diffraction. This interdisciplinary research brings together the fields of solid-state physics, surface physics and chemistry, optics, physical chemistry, and electrochemistry through active collaborations between Physics, Chemistry and Biochemistry, Mechanical and Aerospace Engineering, and other departments. It includes both basic and applied research.

Physics of Quantum Devices
The rapid advance of technology has made quantum physics an indispensable foundation of the nanoscale devices. The Physics Department is positioned to explore this new field with two complementary research themes. The first theme is to study the growth of novel electronic/photonic materials involving group III-V elements using a commercial, state-of-the-art molecular beam epitaxy machine. Also, novel semiconductor quantum nanostructures are studied using an in-situ scanning tunneling microscope directly attached to the machine. The second theme is to use the most advanced surface science techniques to fabricate nanoscale structures on semiconductor surfaces. The interdisciplinary nature of this field provides a stimulating research environment for faculty and students with backgrounds in physics, electrical engineering, material sciences, and chemistry.

Theoretical Physics
The department maintains an active research program in theoretical physics via its Field Theory Group. The principal focus of this group is on unified field theories, gravitational theory, classical and quantum field theory, and geometric methods in mathematical physics. Current research projects include: conformal and scale invariant gravity theories and unified field theories, Weyl-geometric quantization, exact solutions in Gauss-Bonnet extended gravity, classical and quantum dynamics of the gravitational field, symmetries and conservation laws in relativistic field theories, Lagrangian and Hamiltonian formulation of field theory, and application of geometrical methods in physics.

Physics Education
The USU Physics Department is engaged in the study of how to improve the teaching and learning of physics. The program currently emphasizes introductory and general education courses and involves development of hands-on, inquiry-based curricula for lecture and laboratory, development of associated laboratory and multimedia equipment and modules, preparation of new texts and workbooks, sponsorship of undergraduate research, and outreach to the pre-college community.

Complex Materials and Dynamics
Current work at USU in the interdisciplinary area of complex systems includes theoretical and experimental studies of the physical properties of granular materials, liquid flow in fractured media, and development of new data analysis techniques for uncovering evidence for determinism and computation in biological systems.

Financial Assistance
Financial assistance in the form of teaching assistantships and fellowships is awarded by the department. Research assistantships are available from research groups or individuals. Some support for teaching laboratory sections or grading papers is available. To be eligible for a teaching assistantship (TA), a student must successfully...
complete a graduate TA workshop. Nonnative English-speaking students must pass a test of spoken English (or submit a satisfactory TSE score) administered by the Intensive English Language Institute before being admitted to the TA workshop. The MS specialization in Upper Atmospheric Physics is a Western Regional Graduate Program (see page 100).

Career Opportunities

Master’s degree holders in physics are generally employed by industrial or government laboratories as either physicists or engineers. Some are hired as teachers by high schools and by two-year colleges. Holders of the PhD in physics will generally be hired as research and development physicists by industrial or government laboratories and as professors in universities (though this may require additional postdoctoral research experience).

Additional Information

Regularly updated information about Physics Department activities and programs may be obtained via the Web at:
http://www.physics.usu.edu/

Physics Faculty

Professors
J. R. Dennison, surface physics
W. Farrell Edwards, electromagnetic and plasma theory
Bela G. Fejer, space plasma physics
David Peak, nonlinear dynamics, complex materials
Robert W. Schunk, space plasma physics
Jan J. Sojka, atmospheric and space physics
Michael J. Taylor, atmospheric and space physics
Charles G. Torre, mathematical and gravitational physics
Vincent B. Wickwar, atmospheric and space physics

Research Professors
F. Tom Berkey, atmospheric and space physics
Kent L. Miller, atmospheric physics
Thomas D. Wilkerson, atmospheric and space physics

Adjunct Professors
Stephen E. Blakowski, nonlinear optics and laser spectroscopy
Yeaton H. Clifton, mathematical physics
Raymond DeVito, medical physics
Leonard F. Hall, structure forming systems
Allen Q. Howard, electromagnetic theory
R. Gilbert Moore, space physics
David Rees, atmospheric physics

Ray W. Russell, astronomy
Neal D. Shinn, surface interface physics
John R. Tucker, device physics and superconductivity

Professors Emeritus
Wilford N. Hansen, reflection spectroscopy, surface physics
Eastman N. Hatch, nuclear physics
Don L. Lind, space physics
V. Gordon Lind, medium energy nuclear physics
William R. Pendleton, Jr., atomic and molecular physics
W. John Raitt, space plasma physics
John K. Wood, spectroscopy

Associate Professors
Eric D. Held, plasma physics
D. Mark Riffe, surface physics
Tsung-Cheng Shen, surface physics, nanotechnology
James T. Wheeler, mathematical physics, field theory

Research Associate Professors
Abdallah R. Barakat, space plasma physics
Howard G. Demars, space physics
Timothy E. Doyle, random and disordered systems
J. Steven Hansen, image processing
Ajay Singh, plasma physics
Lie Zhu, space physics

Adjunct Associate Professors
K. S. Balasubramanian, solar physics
I. Lee Davis, condensed matter physics
Hugo deGaris, artificial intelligence
James S. Dyer, space contamination and outgassing
Jill A. Marshall, physics education
David J. Vieira, nuclear physics
Vladimir Zavyalov, condensed matter physics

Associate Professor Emeritus
Robert E. McAdams, nuclear physics

Assistant Professor
Haeyeon Yang, surface physics, nanotechnology

Adjunct Assistant Professor
Jeremy R. King, astrophysics

Lecturer
Tonya B. Triplett, physics education

Course Descriptions

Physics (PHYS), pages 691-694
Department of Plants, Soils, and Biometeorology

Department Head: Larry A. Rupp
Location: Agricultural Science 322C
Phone: (435) 797-2233
FAX: (435) 797-3376
E-mail: larry.rupp@usu.edu
WWW: http://www.psb.usu.edu

Undergraduate Advisor:
M. Cathryn Myers-Roche, Agricultural Science 322, (435) 797-5560,
cmyers@mendel.usu.edu

Undergraduate Off-Campus Advisor:
Donna B. Minch, Farmington, (801) 451-4604,
donnam@ext.usu.edu

Graduate Program Coordinator:
Paul G. Johnson, Agricultural Science 306, (435) 797-7039,
paul.johnson@usu.edu

Degrees Offered: Bachelor of Science (BS) and Bachelor of Arts (BA) in Crop Science, Horticulture, Environmental Soil/Water Science; Master of Science (MS), and Doctor of Philosophy (PhD) in Biometeorology, Plant Science, Soil Science, and Ecology; Master of Professional Studies in Horticulture (MPSH)

Undergraduate emphases: Crop Science BS, BA—Agronomy, Research/Biotechnology; Horticulture BS, BA—Ornamental Horticulture, Landscape Maintenance and Construction, Turfgrass Management, Business, Science; Environmental Soil/Water Science BS, BA—Soil, Water, Plant

Certificate and Associate Degree Program: Ornamental Horticulture

Undergraduate Programs

Objectives

The departmental curricula emphasize understanding the physical, chemical, and biological mechanisms that operate in the continuum of the soil, plants, and the atmosphere; and how they impact management of a wide range of agricultural and natural systems.

The undergraduate teaching program facilitates the acquisition and application of knowledge, understanding, and skills by students within their chosen field of study. The program also prepares students to develop lifelong learning skills, understand and appreciate diversity, be productive citizens of the world, and be professionals in their vocations.

The department also provides training of undergraduates for graduate school and maintains a strong graduate program in biometeorology, plant science, and soil science. The research that underlies the graduate program is conducted in biometeorology (micro- and meso-scale), crop biotechnology, crop ecology, crop physiology, crop science, horticulture (general and ornamental), plant breeding, soil microbiology, pedology, soil chemistry, soil physics, soil fertility, environmental soil and water science, and arid landscaping.

A major effort is directed at extending research and teaching programs to all citizens of the State of Utah.

Departmental Facilities

To support these objectives, departmental facilities include well-equipped laboratories and greenhouses on campus. The University has significant acreage for field research at strategic locations throughout the State. In addition, the University is developing a botanical garden, which will offer opportunities to a broad spectra of clientele. The department maintains state-of-the-art analytical equipment for the measurement of critical soil, plant, and climatic variables.

Requirements

Departmental Admission Requirements

Persons meeting the admission requirements for the University (see pages 16-20) are admitted to the Department of Plants, Soils, and Biometeorology by listing the department major code on the University admission application form. A change of major form is used when students in good standing wish to transfer from another department to the Department of Plants, Soils, and Biometeorology.

ARCPACS Certification

Students who meet specific requirements are eligible, after five years of work experience, for professional certification as an Agronomist, Crop Scientist, Crop Specialist, Horticulturist, Soil Scientist, Soil Specialist, or Soil Classifier through the American Registry of Certified Professionals in Agronomy, Crops, and Soils (ARCPACS). General information about ARCPACS certifications can be found at http://www.agronomy.org/certification. Students interested in becoming certified should inform their advisor of their intent. This certification is granted in addition to the bachelor’s degree.

Applied Ornamental Horticulture Certificates and AAS Degree

This program provides practical training in greenhouse and nursery management, turf production, and landscape management. Coursework encompasses pest control, plant identification, construction of landscapes, small business management, and the operation and maintenance of equipment, including small engines. As an integral part of their training, students are required to complete an internship in the industry. Students may work toward a one-year certificate or an Associate of Applied Science Degree.

Bachelor of Science Degree

The department offers the Bachelor of Science Degree in three areas: (1) Crop Science, which deals with agronomic (commonly called field) crops, such as forages, grains, corn, pasture, etc.; (2) Horticulture, which deals with tree fruits, berries, vine fruits, vegetables, and ornamental plants (ornamental includes all aspects of floriculture and landscape plant production and use); and (3) Environmental Soil/Water Science, which deals with soil and water in relation to plant growth and environmental quality. In all three majors, there are science-oriented emphases intended to prepare students for research or professional studies, and degree emphases that emphasize a practical, applied approach to application of information. All courses used to fill major requirements must be taken on an A-B-C-D-F basis. A minimum 2.5 GPA is required for courses used for the major. Transfer students are required to take at least 18 credits of major subject
**Department of Plants, Soils, and Biometeorology**

courses in residence at USU. A minor may be earned in Agronomy, Crop Biotechnology, Horticulture, Ornamental Horticulture, and Soil Science. A minimum of 16 approved credits are required (see lists below). All courses must be taken on an A-B-C-D-F basis and passed with a grade of C- or better. For information about receiving a Bachelor of Arts degree, consult the department undergraduate advisor.

The course requirements for the Crop Science Major are designed to prepare students for a career related to the production of agronomic crops. These courses allow students to function well in a rapidly changing technological environment and to acquire new skills and understanding as their career evolves. Each of the emphases within this major has been designed to allow students the flexibility to add courses or a minor to meet their own goals. The Agronomy Emphasis is designed for students interested in learning more about the applied aspects of crop production. Some courses emphasize production techniques and systems, while others provide the student with an understanding of the principles underlying crop production. The Research/Biotechnology Emphasis is designed for students who wish to participate in the development of plant-oriented technologies at any level of employment, and for those who intend to pursue a career in private or public research requiring graduate degrees. Courses provide the fundamental tools for a twenty-first century career in agriculture.

The Horticulture Major prepares students for production of fruits, vegetables, turf, or ornamentals and for landscape construction and maintenance. Course topics include biology, chemistry, and control of insects, diseases, and weeds. The Ornamental Horticulture Emphasis adds courses in production management techniques, such as pruning, spraying, and landscaping (materials, design, and maintenance); and greenhouse management. In the Landscape Maintenance and Construction Emphasis, students learn design, construction, and maintenance through a joint program with the Landscape Architecture and Environmental Planning Department. In the Turfgrass Management Emphasis, students complete courses in turfgrass management to prepare them for careers in golf course, park, athletic field, and landscaping management. The Science Emphasis prepares students for graduate study and for employment in technical occupations. The Business Emphasis joins courses necessary for a minor in Business with those necessary for obtaining expertise in horticulture.

The Environmental Soil/Water Science Major is intended to provide each student with a fundamental understanding of the basic sciences and mathematics, as well as a strong background in both soil and water sciences. Preparatory requirements include chemistry, physics, mathematics, biology, geology, and statistics. The core courses for Environmental Soil/Water Science emphasis the interactive soil/water processes in the soil’s plant-rooting zone—from the microscopic to the landscape perspective. From this base, each student can design his or her own program of specialization in one of the many aspects of soil science, water science, or the integration of both soil and water sciences. Students may choose complementary classes in the Soil Emphasis, Water Emphasis, or Plant Emphasis in preparation for a variety of career opportunities. The Environmental Soil/Water Science Major is complementary to existing undergraduate programs at Utah State University in Geology, Environmental Studies, Watershed and Earth Systems, and Environmental Engineering.

### Course Requirements

#### Crop Science Major

**Crop Science Major Core Courses (30 credits)**

#### Agronomy Emphasis (56 credits)

- Students must complete all of the following courses for the Agronomy Emphasis (9 credits).
- CHEM 1110 (BPS) General Chemistry I (F,Sp) ............... 4
- CHEM 1115 General Chemistry Laboratory (Sp) ............... 1
- CHEM 1120 (BPS) General Chemistry II (Sp) ............... 4

#### Additional Crop-related Courses:

- Students must complete at least 36 credits chosen from the following crop-related courses, including all courses identified with an asterisk (*):
  - BIOL 3060 (QI) Principles of Genetics (F,Sp,Su) ............... 4
  - BIOL 4410 Plant Structure (Sp) ................................. 3
  - BIOL 4500* Applied Entomology (Sp) ......................... 3
  - BIOL 5410* Introduction to Plant Pathology (Sp) ........... 4
  - PLSC 2650 Identification and Selection of Plants in Production Agriculture (F) ........................................ 1
  - PLSC 3500 The Structure and Function of Economic Crop Plants (Sp) .................................................. 3
  - PLSC 3700 Plant Propagation (F) ................................. 3
  - PLSC 3800 Turfgrass Management (F) ............................. 3
  - PLSC 4280 Field Crops (F, odd years) ......................... 3
  - PLSC 4320 Forage Production and Pasture Ecology (F) .......... 3
  - PLSC 4600 (QI) Cereal Science (Sp, even years) ............. 3
  - PLSC 5200 Crop Physiology (Sp) .................................... 2
  - PLSC 5210 Crop Physiology Laboratory (Sp) ........................ 1
  - PLSC 5550* Weed Biology and Control (F) ...................... 4
  - PLSC 5700 Principles of Plant Breeding (Sp, odd years) .......... 3
  - PLSC 5750 Crop Biotechnology (Sp) .................................. 2
  - PSB 4250 Internship in Plants, Soils, and/or Biometeorology (F,Sp,Su) .................................................... 1-4
  - PSB 5200 Site-Specific Agriculture and Landscape/Horticultural Management (Sp, half semester) ..................... 3

#### Additional Soils-related Courses:

- Students must complete at least 11 credits chosen from the following soils-related courses:
  - SOIL 4000 Soil and Water Conservation (F) .................. 4
  - SOIL 4700 Irrigated Soils (Sp, half semester) ................. 3
  - SOIL 5050 Principles of Environmental Soil Chemistry (Sp odd) .................................................. 3
  - SOIL 5130 Soil Genesis, Morphology, and Classification (F even) .................. 4
  - SOIL 5310 Soil Microbiology (F, even years) .................. 3
  - SOIL 5320 Soil Microbiology Laboratory (F, even years) ........ 2
  - SOIL 5550 (QI) Soils and Plant Nutrient Bioavailability (Sp) ............................................... 3
  - SOIL 5560 Analytical Techniques for the Soil Environment (Sp) .................................................. 2
  - SOIL 5650 Environmental Soil Physics (F) .................... 3

#### B. Research/Biotechnology Emphasis (58 credits)

- Students must complete all of the following courses for the Research/Biotechnology Emphasis (38 credits).
- BIOL 3060 (QI) Principles of Genetics (F,Sp,Su) ............... 4
- CHEM 1210 Principles of Chemistry I (F,Sp) ..................... 4
- CHEM 1215 Chemical Principles Laboratory I (F,Sp) ............ 1
- CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) ........... 4

Utah State University 2007-2009 General Catalog 465
### Department of Plants, Soils, and Biometeorology

**CHEM 1225** Chemical Principles Laboratory II (F,Sp) .......................... 1  
**CHEM 2310** Organic Chemistry I (F) ................................................ 4  
**CHEM 2315** Organic Chemistry Laboratory I (F,Sp) .......................... 1  
**CHEM 2320** Organic Chemistry II (Sp) .............................................. 1  
**CHEM 2325** Organic Chemistry Laboratory II (Sp, blocks 1 & 2) ....... 1  
**CHEM 3710** Introductory Biochemistry Laboratory (Sp) ................... 1  
**MATH 1060** Trigonometry (F,Sp,Su) .................................................. 2  
**PLSC 5200** Crop Physiology (Sp) ...................................................... 2  
**PLSC 5210** Crop Physiology Laboratory (Sp) ...................................... 1  
**PLSC 5750** Crop Biotechnology (Sp) ................................................ 2  
**SOIL 5550** (QI) Soils and Plant Nutrient Bioavailability (Sp) ............ 3

**Additional Crop-related Courses:**

Students must complete at least 18 credits chosen from the following crop-related courses:

- **PLSC 2650** Identification and Selection of Plants in Production (Agriculture (F)) .................................................. 1  
- **PLSC 5700** Crop Propagation (F) ..................................................... 4  
- **PLSC 4280** Field Crops (F odd) ....................................................... 3  
- **PLSC 4300** World Food Crops and Cropping Systems:  
  - The Plants That Feed Us (F even) .................................................. 3  
- **PLSC 4320** Forage Production and Pasture Ecology (F) ................. 3  
- **PLSC 4600** (QI) Cereal Science (Sp, even years) ......................... 3  
- **PLSC 5430** Plant Nutrition (F, odd) ............................................... 2  
- **PLSC 5440** Plant Molecular, Cellular, and Developmental Biology I (Sp) ........................................................... 3  
- **PLSC 5450** Plant Molecular, Cellular, and Developmental Biology II (Sp) ........................................................... 3  
- **PLSC 5550** Weed Biology and Control (F) ..................................... 4  
- **PLSC 5600** Plant Water Relations (F) ............................................. 2  
- **PLSC 5700** Principles of Plant Breeding (Sp, odd years) ............... 3  
- **PSB 5160** Methods in Biotechnology: Cell Culture (Sp) ............... 3  
- **PSB 5240** Methods in Biotechnology: Protein Purification Techniques (Sp) ........................................................... 3  
- **PSB 5260** Methods in Biotechnology: Molecular Cloning (F) ....... 3  
- **STAT 2000** (QI) Statistical Methods (F,Sp,Su) (3 cr) or  
  **STAT 3000** (QI) Statistics for Scientists (F,Sp,Su) (3 cr) ................. 3

The following courses are also recommended:

- **BIOL 4410** Plant Structure (Sp) ..................................................... 3  
- **BIOL 4500** Applied Entomology (Sp) ............................................. 3  
- **BIOL 5210** Cell Biology (F) ............................................................ 3  
- **BIOL 5230** Developmental Biology (Sp) ........................................ 3  
- **BIOL 5410** Introduction to Plant Pathology (Sp) ............................ 4  
- **MATH 1210** Trigonometry (F,Sp,Su) ............................................... 2  
- **MATH 1100** (BPS) General Chemistry I ......................................... 4  
- **PSB 1050** (QI) College Algebra .................................................... 4  
- **PSB 1050** Plants, Soils, and Biometeorology Orientation .............. 1  
- **Chemistry 1120** Organic Chemistry Laboratory I (F,Sp) ............... 3

**Spring Semester (17 credits)**

- **BIOL 5230** Developmental Biology .......................... 3
- **PLSC 5200** Crop Physiology .................................... 2
- **PLSC 5210** Crop Physiology Laboratory ........................ 1
- **PLSC 5750** Crop Biotechnology .................................. 2
- **SOIL 5550 (QI)** Soils and Plant Nutrient Bioavailability .......... 3
- Elective course(s)** ........................................... 5

---

1. This course is required as part of the Crop Science Major Core.
2. This course is required for the Agronomy Emphasis.
3. This course is included in the Additional Crop-related Courses for the Agronomy Emphasis.
4. This course is included in the Additional Soils-related Courses for the Agronomy Emphasis.
5. This course is a restricted elective. Other courses may be used to satisfy this requirement.
6. This course is an unrestricted elective.
7. Students must complete at least 9 credits selected from these Agronomy Emphasis courses.
8. This course is required for the Research/Biotechnology Emphasis.
9. This course is included in the Additional Crop-related Courses for the Research/Biotechnology Emphasis.
10. This course is a recommended elective for the Research/Biotechnology Emphasis.
11. This course is an unrestricted elective. Some suggested courses are indicated.

### ARCPACS Certification

For more information, students should refer to the American Society of Agronomy website at: [http://www.agronomy.org](http://www.agronomy.org) or [http://www.agronomy.org/certification](http://www.agronomy.org/certification)

### ARCPACS Requirements

**Certified Professional Agronomist (84 credits)**

**Certified Professional Crop Scientist (84 credits)**

Students wishing to obtain ARCPACS certification must satisfy the requirements for the Bachelor of Science degree, as well as complete any additional courses.

For Certified Agronomist or Certified Weed Scientist, take 9 credits chosen from the following courses. For Certified Crop Scientist, take 15 credits chosen from the following courses:

- **PLSC 3800** Turfgrass Management (F) ....................... 3
- **PLSC 4280** Field Crops (F) ..................................... 3
- **PLSC 4320** Forage Production and Pasture Ecology (F) ....... 3
- **PLSC 4600 (QI)** Cereal Science (Sp, even years) .......... 3
- **PLSC 5200** Crop Physiology (Sp) ............................... 2
- **PLSC 5210** Crop Physiology Laboratory (Sp) .................. 1
- **PLSC 5700** Principles of Plant Breeding (Sp, odd years) .... 3

All ARCPACS categories (Agronomy, Crop Science, and Weed Science) require the following course:

- **SOIL 5550 (QI)** Soils and Plant Nutrient Bioavailability (Sp) ........ 3

For Certified Agronomist, take at least 6 credits from the following list:

- **SOIL 4000** Soil and Water Conservation (F) ................. 4
- **SOIL 4700** Irrigated Soils (Sp, half semester) ................. 3
- **SOIL 5050** Principles of Environmental Soil Chemistry (Sp) ... 3
- **SOIL 5130** Soil Genesis, Morphology, and Classification (F) .... 4

For Certified Agronomist or Certified Crop Scientist, take at least two of the following three courses:

- **BIOL 4500** Applied Entomology (Sp) .......................... 3
- **BIOL 5410** Introduction to Plant Pathology (Sp) ............... 4
- **PLSC 5550** Weed Biology and Control (F) ...................... 4

For Certified Agronomist or Certified Crop Scientist, take all of these courses:

- **ASTE 3050 (CI)** Technical and Professional Communication Principles in Agriculture (F,Sp) .......................... 3
- **SPCH 1020 (CI)** Public Speaking (F,Sp) .......................... 3
- **CS 1030 (BPS)** Foundations of Computer Science, and the Application of Computer Science to the Investigation of Physical Systems and Phenomena (F,Sp,Su) .......................... 3
- **ECON 2010 (BSS)** Introduction to Microeconomics (F,Sp) .... 3

Utah State University 2007-2009 General Catalog 467
Department of Plants, Soils, and Biometeorology

STAT 1040 (QL) Introduction to Statistics (F,Sp,Su) ............................ 3
CHEM 3650 Environmental Chemistry (Sp) ............................................ 3

For Certified Weed Scientist, choose 9 credits from the above list. In addition, take at least 19 credits from the following, including the four courses identified with an asterisk (*):

BIOL 4410* Plant Structure (Sp) ....................................................... 3
BIOL 4420* Plant Taxonomy (Sp) .......................................................... 3
BIOL 4500 Applied Entomology (Sp) ..................................................... 3
BIOL 5410 Introduction to Plant Pathology (Sp) ..................................... 4
PLSC 2200* Pest Management Principles and Practices (Sp) ............. 3
PLSC 5550* Weed Biology and Control (F) ........................................ 4

Horticulture Major

Students must complete the core courses and courses for one of the four emphases to fulfill the requirements for a Horticulture Degree.

Core Courses (23-26 credits)

CHEM 1110 (BPS) General Chemistry I (F,Sp) (4 cr) or
CHEM 1210 Principles of Chemistry I (F,Sp) (4 cr) .......................... 4
MATH 1050 (QL) College Algebra (F,Sp,Su) ........................................ 4
OSS 1400 Microcomputer Applications (F,Sp,Su) ................................ 4
PLSC 2200* Occupational Experience in Agronomy and Horticulture
(F,Sp,Su) (1-4 cr) or
PSB 4250 Internship in Plants, Soils, and/or Biometeorology (F,Sp,Su) (1-4 cr) ............................................................. 1-4
PLSC 2650 Identification and Selection of Plants in Production
Agriculture (F) ..................................................................................... 3
PSB 1050 Plants, Soils, and Biometeorology Orientation (F) ................. 1
PSB 4890 (CI) Senior Seminar (take one credit per semester) (F,Sp,Su) 2
SOIL 3000 Fundamentals of Soil Science (F,Sp,Su) ............................. 4
WILD 2200 (BLS) Ecology of Our Changing World (F,Sp,Su) ............ 3

A. Ornamental Horticulture Emphasis
(49 credits minimum)

In addition to the Core Courses, select 40 credits from the following courses. Those marked with an asterisk (*) are required.

ASTE 3080 Compact Power Units for Agricultural and Turfgrass
Applications (Sp) .................................................................................. 3
BIOL 1620 (BLS)* Biology I (F) .......................................................... 4
BIOL 3060 (QL)* Principles of Genetics (F,Sp,Su) ................................. 4
PLSC 2100 (BLS) Introduction to Horticulture (F) ............................... 3
PLSC 2620* Woody Plant Materials: Trees and Shrubs for the
Landscape (F) ....................................................................................... 3
PLSC 3050 Greenhouse Management and Crop Production (Sp) ......... 4
PLSC 3300 Residential Landscapes (Sp) .............................................. 3
PLSC 3400 Landscape Management Principles and Practices (F) ....... 3
PLSC 3700 Plant Propagation (F) .......................................................... 4
PLSC 3800 Turfgrass Management (F) ................................................. 3
PLSC 4400* Modern Vegetable Production (F) .................................. 3
PLSC 4500* Fruit Production (Sp) ......................................................... 4
PLSC 4800 Professional Turfgrass Management (Sp, even years) ....... 2
PSB 2800 Fundamentals of Organic Agriculture (Sp) ......................... 3
SOIL 5550 (QL)* Soils and Plant Nutrient Bioavailability (Sp) .......... 3

Select two of the following courses:

BIOL 4500 Applied Entomology (Sp) .................................................... 3
BIOL 5410 Introduction to Plant Pathology (Sp) .................................... 4
PLSC 5550 Weed Biology and Control (F) ......................................... 4

Select two of the following courses:

BIOL 4400 (QL) Plant Physiology (F) .................................................. 4
BIOL 4410 Plant Structure (Sp) ............................................................ 3
CHEM 1120 (BPS) General Chemistry II (Sp) ................................. 3

PLSC 3500 The Structure and Function of Economic Crop Plants
(Sp) ..................................................................................................... 3
PLSC 5200 Crop Physiology (Sp, half semester) ................................. 2
PLSC 5210 Crop Physiology Laboratory (Sp) ...................................... 1

B. Landscape Maintenance and Construction Emphasis
(47.5-48.5 credits)

In addition to the Core Courses, students must complete the following courses for the Landscape Maintenance and Construction Emphasis. All courses are required.

BIOL 1610 Biology I (F) ........................................................................ 4
LAEP 1200 Basic Graphics in Landscape Architecture (F) .................. 4
LAEP 2600 (QI) Landscape Construction I (F) .................................. 4
LAEP 3500 Planting Design (F) ............................................................. 2
LAEP 3610 Landscape Construction II (Sp) .......................................... 4
PLSC 2200 Pest Management Principles and Practices (Sp) .............. 3
PLSC 2610 Annual and Perennial Plant Materials (F) ......................... 1.5
PLSC 2620 Woody Plant Materials: Trees and Shrubs for the
Landscape (F) ..................................................................................... 3
PLSC 3300 Residential Landscapes (Sp) ............................................. 3
PLSC 3400 Landscape Management Principles and Practices (F) ....... 3
PLSC 3500 The Structure and Function of Economic Crop Plants
(Sc) ..................................................................................................... 3
PLSC 3800 Turfgrass Management (F) ................................................. 3
PLSC 4400 Modern Vegetable Production (F) (3 cr) or
PLSC 4500 Fruit Production (Sp) (4 cr) ............................................. 3 or 4
PLSC 5550 Weed Biology and Control (F) ......................................... 4
SOIL 4700 Irrigated Soils (Sp, half semester) ....................................... 3

The following courses are suggested as electives:

ASTE 3200 Irrigation Principles and Practices (Sp) ............................ 3
PLSC 2100 (BLS) Introduction to Horticulture (F) ............................. 3
PLSC 2610 Indoor Plants and Interiorscaping (F) ............................... 1.5
PLSC 3700 Plant Propagation (F) .......................................................... 4
PLSC 4800 Professional Turfgrass Management (Sp, even years) ....... 2
PSB 5200 Site-Specific Agriculture and Landscape Horticultural
Management (Sp, half semester) ...................................................... 3
SOIL 5550 (QL) Soils and Plant Nutrient Bioavailability (Sp) ............ 3

C. Turfgrass Management Emphasis (48-53 credits)

In addition to the Core Courses, students must complete the following courses for the Turfgrass Management Emphasis.

BIOL 1610 Biology I (F) ........................................................................ 4
BIOL 1620 (BLS) Biology II (Sp) .......................................................... 4
BIOL 3060 (QL) Principles of Genetics (F,Sp,Su) ................................. 4
PLSC 2620 Woody Plant Materials: Trees and Shrubs for the
Landscape (F) ..................................................................................... 3
PLSC 3400 Landscape Management Principles and Practices (F) ....... 3
PLSC 3700 Plant Propagation (F) .......................................................... 4
PLSC 4400 Modern Vegetable Production (F) (3 cr) or
PLSC 4500 Fruit Production (Sp) (4 cr) ............................................. 3 or 4
PLSC 4800 Professional Turfgrass Management (Sp, even years) ....... 2

The following courses are suggested as electives. Select a minimum of two courses from each category:

Horticulture

ASTE 3080 Compact Power Units for Agricultural and Turfgrass
Applications (Sp) .................................................................................. 3
ASTE 3200 Irrigation Principles and Practices (Sp) ............................ 3
PLSC 2200 Pest Management Principles and Practices (Sp) .............. 3
PLSC 3300 Residential Landscapes (Sp) ............................................. 3
PLSC 5100 Landscape Irrigation Management (Sp) ............................. 4
PLSC 5550 Weed Biology and Control (F) ......................................... 4
SOIL 4700 Irrigated Soils (Sp, half semester) ....................................... 4
WILD 5300 Wildlife Damage Management Principles (Sp) ............. 3
Department of Plants, Soils, and Biometeorology

Science
BIOL 2220 General Ecology (F,Sp)..........................3
BIOL 3040 Plants and Civilization (F)..................3
BIOL 4400 (QI) Plant Physiology (F)..................3
BIOL 4410 Plant Structure (Sp)..........................3
BIOL 4420 Plant Taxonomy (Sp)........................2
BIOL 4500 Applied Entomology (Sp)....................3
BIOL 5410 Introduction to Plant Pathology (Sp)........4
CHEM 1120 (BPS) General Chemistry II (Sp)..........4
CHEM 1215 General Chemistry Laboratory (F,Sp)....1
PLSC 3500 The Structure and Function of Economic Crop Plants (Sp)..........................3
PLSC 5200 Crop Physiology (Sp)..........................2
PLSC 5210 Crop Physiology Laboratory (Sp)..........1
PLSC 5430 Plant Nutrition (F,odd).....................2
SOIL 4000 Soil and Water Conservation (F)............4
SOIL 5550 (QI) Soils and Plant Nutrient Bioavailability (Sp)..........................3
STAT 2000 (QI) Statistical Methods (F,Sp).............3

Business
ACCT 2010 Survey of Accounting I (F,Sp,Su)........3
ASTE 3050 (QI) Technical and Professional Communication Principles in Agriculture (F,Sp)..........................3
BA 3500 Fundamentals of Marketing (F,Sp,Su)........3
ECON 1500 (BAI) Introduction to Economic Institutions, History, and Principles (F,Sp)..........................3
MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su)..........................3
MHR 3110 (DSS) Managing Organizations and People (F,Sp,Su)..........................3
MHR 3710 Developing Team and Interpersonal Skills (F,Sp,Su)..........................3

D. Business Emphasis (48 credits)
In addition to the Core Courses, select 30 credits from the following courses. Those marked with an asterisk (*) are required.
BIOL 1610* Biology I (F).................................4
PLSC 2100 (BLS) Introduction to Horticulture (F)........3
PLSC 2200* Pest Management Principles and Practices (Sp)..........................3
PLSC 2600 Annual and Perennial Plant Materials (F)..........................1.5
PLSC 2620 Woody Plant Materials: Trees and Shrubs for the Landscape (F)....................3
PLSC 3050 Greenhouse Management and Crop Production (Sp)..........................4
PLSC 3300 Residential Landscapes (Sp)..................4
PLSC 3400* Landscape Management Principles and Practices (F)..........................3
PLSC 3500* The Structure and Function of Economic Crop Plants (Sp)..........................3
PLSC 3700 Plant Propagation (F)..........................4
PLSC 3800 Turfgrass Management (F)....................3
PLSC 4400* Modern Vegetable Production (F)........3
PLSC 4500* Fruit Production (Sp)........................4
PLSC 5200 Crop Physiology (Sp)..........................2
PLSC 5210 Crop Physiology Laboratory (Sp)............1
PLSC 5550* Weed Biology and Control (F).............4
PSB 2800 Fundamentals of Organic Agriculture (Sp)..........................3
SOIL 4700 Irrigated Soils (Sp, half semester).........4
SOIL 5550 (QI)* Soils and Plant Nutrient Bioavailability (Sp)..........................3

The following courses are required for a Business Minor and the Business Emphasis:
ACCT 2010 Survey of Accounting I (F,Sp,Su)........3
BA 3460 Fundamentals of Personal Investing...........3
BA 3500 Fundamentals of Marketing (F,Sp,Su)........3
MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su)..........................3
BUS 3100 (DSS) Survey of Management Information Systems (F,Sp,Su) (3 cr) or
MHR 3110 (DSS) Managing Organizations and People (F,Sp,Su)..........................3

E. Science Emphasis (48 credits minimum)
In addition to the Core Courses, students must select 44 credits from the following courses. Those marked with an asterisk (*) are required.
BIOL 1610* Biology I (F).................................4
BIOL 1620 (BLS)* Biology II (Sp)........................4
BIOL 3060 (QI)* Principles of Genetics (F,Sp,Su)......4
BIOL 4400 (QI)* Plant Physiology (F)....................4
BIOL 4410 Plant Structure (Sp)............................3
CHEM 1120 (BPS) General Chemistry II (Sp,Su)........4
CHEM 1215 Chemical Principles Laboratory I (F,Sp)....1
CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su)..........................4
CHEM 1225 Chemical Principles Laboratory II (F,Sp)......1
CHEM 2310 Organic Chemistry I (F).....................4
CHEM 2320 Organic Chemistry II (Sp)....................4
CHEM 3700 Introductory Biochemistry (Sp).............3
CHEM 3710 Introductory Biochemistry Laboratory (Sp)........1
MATH 1060 Trigonometry (F,Sp,Su).....................2
MTH 3100 (QL)* Calculus Techniques (F,Sp,Su)........3
PHYS 1200 (BPS) Introduction to Physics by Hands-on Exploration..........................4
PLSC 3700 Plant Propagation (F)..........................4
PLSC 4400* Modern Vegetable Production (F)........3
PLSC 4500* Fruit Production (Sp)........................4
PLSC 5200* Crop Physiology (Sp)........................2
PLSC 5210 Crop Physiology Laboratory (Sp)............1
PLSC 5430 Plant Nutrition (F,odd)......................2
PLSC 5440 Plant Molecular, Cellular, and Developmental Biology I (Sp)..................3
PLSC 5540 Plant Molecular, Cellular, and Developmental Biology II (Sp)..................3
PLSC 5600 Plant Water Relations (F)....................2
PLSC 5760 Crop Ecology (Sp).............................2
PSB 2800 Fundamentals of Organic Agriculture (Sp)..........................3
SOIL 3200 (DSC) Microbes in Environmental Action (Sp)..........................3
SOIL 5550 (QI)* Soils and Plant Nutrient Bioavailability (Sp)..........................3
STAT 3000 (QI) Statistics for Scientists (F,Sp,Su)......3
Select any Ornamental Horticulture class*..........................3

Sample Curriculum for Horticulture Major—Ornamental Horticulture Emphasis
The sample curriculum shows most lower-division courses selected freshman and sophomore years, and most upper-division courses selected junior and senior years.

Freshman Year (29 credits)
Fall Semester (15 credits)
BIOL 1610* Biology I (F).................................4
ENGL 1010 (CL1) Introduction to Writing: Academic Prose..........................3
PLSC 2620* Woody Plant Materials: Trees and Shrubs for the Landscape..................3

Freshman Year (27 credits)
Fall Semester (13 credits)
BIOL 161010 Introduction to Biology ............................................................... 4
ENGL 1010 (CL1) Introduction to Writing: Academic Prose .......................... 3
PLSC 265010 Identification and Selection of Plants in Production Agriculture ............................................................... 1
PSB 105010 Plants, Soils, and Biometeorology Orientation ............................ 1
Any USU elective course(s)14 ....................................................................... 4
Department of Plants, Soils, and Biometeorology

Spring Semester (14 credits)
- BIOL 1620 (BLS) Biology II ............................................. 4
- MATH 1050 (QL) College Algebra .................................... 4
- OSS 1450 Microcomputer Applications .......................... 3
- WILD 2200 (BLS) Ecology of Our Changing World .......... 3

Sophomore Year (31 credits)
- Fall Semester (14 credits)
  - BIOL 4400 (QI) Plant Physiology .................................. 4
  - CHEM 1110 (BPS) General Chemistry I .......................... 4
  - ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode .................................................. 3
  - Any Breadth American Institutions (BAI)/USU course, as required ...... 3
- Spring Semester (17 credits)
  - SOIL 3000 Fundamentals of Soil Science ......................... 4
  - Any Breadth Social Sciences (BSS)/USU course, as required .... 3
  - Any emphasis elective courses, as advised .......................... 6
  - Any USU elective course(s)............................................... 4

Senior Year (32 credits)
- Fall Semester (16 credits)
  - PLSC 4400 Modern Vegetable Production ...................... 4
  - SOIL 5550 (QI) Soils and Plant Nutrient Bioavailability .......... 3
  - Any USU elective course(s)............................................... 3
  - Any emphasis elective courses, as advised .......................... 6
- Spring Semester (16 credits)
  - PLSC 4500 Fruit Production ........................................... 4
  - SOIL 5130 Principles of Genetics .................................... 4
  - Any USU elective course(s)............................................... 4
  - Any emphasis elective courses, as advised .......................... 7

Environmental Soil/Water Science Major
Preparatory Core Courses (43-49 credits)
- Required Courses (18 credits)
  - BIOL 1610 Biology I (F) ............................................... 4
  - BIOL 1620 (BLS) Biology II (Sp) .................................... 4
  - GEO 1100 (BPS) The Dynamic Earth: Physical Geology (F,Sp) .... 4
  - STAT 2000 (QI) Statistical Methods (F,Sp) (3 cr) or STAT 3000 (QI) Statistics for Scientists (F,Sp,Sp,Sp) (3 cr) .......... 3

WILD 2200 (BLS) Ecology of Our Changing World (F) ............................................. 3
- BIOL 2220 General Ecology (F,Sp) (3 cr) ........................... 3

Chemistry Courses (9 or 13 credits)
Complete one of the two following blocks of Chemistry courses:
Block 1 (9 credits)
- CHEM 1110 General Chemistry I (F,Sp) .......................... 4
- CHEM 1115 General Chemistry Laboratory (Sp) ............... 1
- CHEM 1120 (BPS) General Chemistry II (Sp) .................... 4

Block 2 (13 credits)
- CHEM 1120 Principles of Chemistry I (F,Sp) .................... 4
- CHEM 1215 Chemical Principles Laboratory I (F,Sp) .......... 1
- CHEM 1220 (BPS) Principles of Chemistry II (F,Sp) .......... 4
- CHEM 1225 Chemical Principles Laboratory II (F,Sp) ........ 1
- CHEM 2300 Principles of Organic Chemistry (F) ............... 3

Mathematics Courses (10 or 8 credits)
Complete one of the two following blocks of Mathematics courses:
Block 1 (10 credits)
- MATH 1050 (QL) College Algebra (F,Sp,Sp) ...................... 4
- MATH 1060 Trigonometry (F,Sp,Sp) .................................. 2
- MATH 1210 (QL) Calculus I (F,Sp,Sp) ............................... 4

Block 2 (8 credits)
- MATH 1210 (QL) Calculus I (F,Sp,Sp) ............................... 4
- MATH 1220 (QL) Calculus II (F,Sp,Sp) ............................... 4

Physics Courses (8 credits)
Complete one of the two following blocks of Physics courses:
Block 1 (8 credits)
- PHYS 2110 The Physics of Living Systems I ...................... 4
- PHYS 2120 (BPS) The Physics of Living Systems II ............ 4

Block 2 (8 credits)
- PHYS 2210 (QI) General Physics—Science and Engineering I .... 4
- PHYS 2220 (BPS/QI) General Physics—Science and Engineering II 4

Professional Core Courses (26 credits)
- SOIL 3000 Fundamentals of Soil Science (F,Sp) ................. 4
- SOIL 5050 Principles of Environmental Soil Chemistry (Sp) .... 3
- SOIL 5130 Soil Genesis, Morphology, and Classification (F) .... 4
- SOIL 5310 Soil Microbiology (F, even years) (3 cr) or SOIL 5550 (QI) Soils and Plant Nutrient Bioavailability (Sp) (3 cr) ........ 3
- SOIL 5560 Analytical Techniques for the Soil Environment (Sp) .... 2
- SOIL 5600 Surface Hydrologic Field Methods (Sp) ............. 3
- SOIL 5670 Environmental Soil Physics (F) ........................ 4
- SOIL 5750 Environmental Quality: Soil and Water (Sp) ........ 2
- PSB 4890 (CI) Senior Seminar (F,Sp) (take 1 credit per semester) .... 2

1*Students in the Water Emphasis should take the Block 2 courses in Chemistry, Mathematics, and Physics.
2**Students in the Plant Emphasis must select SOIL 5550.

Emphasis
Students must select 12 credits from one or a combination of the following three emphases.

Soil Emphasis
- BMET 5250 Remote Sensing of Land Surfaces (Sp) .......... 4
- CEE 5190 Geographic Information Systems for Civil Engineers (Sp) ... 3
- CHEM 3000 (QI) Quantitative Analysis (F) ....................... 3
- GEO 3500 Mineralogy and Crystallography (F) ................. 4
- GEO 3600 Geomorphology (F) ...................................... 4
- GEO 5410I* Introduction to Clay Mineralogy (Sp) ............ 2
- GEO 5600 Geochemistry (F) ..................................... 3
- GEO 5630 Photogeology ........................................... 2
Department of Plants, Soils, and Biometeorology

PSB 5200 Site-Specific Agriculture and Landscape/Horticultural Management (Sp, half semester)................................. 3

SOIL 3100 Soils and Civilization (Sp).................................................. 3

SOIL 3200 (DSC) Microbes in Environmental Action (Sp).................. 3

SOIL 4000 Soil and Water Conservation (F)....................................... 4

SOIL 5310 Soil Microbiology (F).......................................................... 3

SOIL 5320 Soil Microbiology Laboratory (F, even years)...................... 2

Sample Curriculum for Environmental Soil/Water Science Major

The sample curriculum shows most lower-division courses selected freshman and sophomore years, and most upper-division courses selected junior and senior years.

Freshman Year (31 credits)

Fall Semester (14 credits)

BIOL 1610 Biology I .............................................................................. 4

ENGL 1010 (CL1) Introduction to Writing: Academic Prose................ 3

GEOL 1110 (BPS) The Dynamic Earth: Physical Geology................... 4

Any Breadth Creative Arts (BCA)/USU course, as required................. 3

Spring Semester (17 credits)

BIOL 1620 (BLS) Biology II .................................................................. 4

MATH 1050 (QL) College Algebra.......................................................... 4

OSS 1400 Microcomputer Applications.................................................. 3

WILD 2200 (BLS) Ecology of Our Changing World............................. 3

Any emphasis elective course, as advised............................................ 3

Sophomore Year (31 credits)

Fall Semester (16 credits)

CHEM 1110 (BPS) General Chemistry I ............................................... 4

ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode............................................................. 3

Any Breadth Humanities (BHU)/USU course, as required.................. 3

Any Breadth Social Sciences (BSS)/USU course, as required............ 3

Any emphasis elective course, as advised............................................ 3

Spring Semester (15 credits)

CHEM 1115 General Chemistry Laboratory (1 cr) or
CHEM 1215R Chemical Principles Laboratory I (1 cr)........................ 1

CHEM 1120 (BPS) General Chemistry II (4 cr) or
CHEM 1220 (BPS)R Principles of Chemistry II (4 cr)......................... 4

SOIL 3000 Fundamentals of Soil Science................................................ 4

Any Depth Humanities and Creative Arts (DHA)/USU course, as required...........

Any emphasis elective course, as advised............................................ 3

Junior Year (31 credits)

Fall Semester (15 credits)

SOIL 5130 Soil Genesis, Morphology, and Classification....................... 2

STAT 2000 (QI) Statistical Methods (3 cr) or
STAT 3000 (QI) Statistics for Scientists (3 cr)..................................... 3

Any Depth Social Sciences (DSS) course............................................. 3

Any Communications Intensive (CI) course........................................ 3

Spring Semester (16 credits)

MATH 1210 (QL) Calculus I .................................................................. 4

PHYS 2110 The Physics of Living Systems I ......................................... 4

SOIL 5050 Principles of Environmental Soil Chemistry....................... 4

SOIL 5560 Analytical Techniques for the Soil Environment ................. 2

Any emphasis elective course, as advised............................................ 3

Senior Year (31 credits)

Fall Semester (16 credits)

PHYS 2120 (BPS) The Physics of Living Systems II.............................. 4

SOIL 5650 Environmental Soil Physics................................................ 3

Any USU elective courses.................................................................. 3

Any breadth American Institutions (BAI)/USU course, as required.... 3

Any USU elective courses.................................................................. 6
Ornamental Horticulture Program

One-year Certificate (27 credits)

The 27 credits are distributed as follows:
- PLSC 2600 Annual and Perennial Plant Materials (F) .................. 1.5
- PLSC 2620 Woody Plant Materials: Trees and Shrubs for the Landscape (F) ................................................................. 3
- Additional PLSC courses selected from Associate of Applied Science Core Classes** .................................................. 18.5-20
- Courses selected from Approved Electives ............................... 3-5

**Students should choose courses that emphasize either Floriculture or Landscape Horticulture.

Ornamental Horticulture Program Associate of Applied Science Degree (60 credits)

The 60 credits are distributed as follows. Some courses require biology prerequisite courses.

University Studies Requirements (15 credits)
- ENGL 1010 (CL1) Introduction to Writing: Academic Prose (F,Sp,Su) 3
- ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode (F,Sp,Su) .................................................... 3
- Social Sciences/Humanities Breadth Courses ........................... 6
- Life Sciences/Physical Sciences Breadth Course ......................... 3

Professional Requirement
- All of the Core Courses .......................................................... 34-37
- Courses selected from Approved Electives ............................... 7-10

Core Courses (34-37 credits)
- OSS 1400 Microcomputer Applications (F,Sp,Su) ..................... 3
- PSB 1050 Plants, Soils, and Biometeorology Orientation (F) ....... 1
- PLSC 2100 (BLS) Introduction to Horticulture (F) ................. 3
- PLSC 2200 Pest Management Principles and Practices (Sp) .... 3
- PLSC 2250 Occupational Experience in Agronomy and Horticulture (F,Sp,Su) ......................................................... 1-4
- PLSC 2600 Annual and Perennial Plant Materials (F) .............. 1.5
- PLSC 2620 Woody Plant Materials: Trees and Shrubs for the Landscape (F) ................................................................. 3
- PLSC 2650 Identification and Selection of Plants in Production Agriculture (F) ................................................................. 1
- PLSC 3500 Greenhouse Management and Crop Production (Sp) 4
- PLSC 3300 Residential Landscapes (Sp) ................................ 3
- PLSC 3400 Landscape Management Principles and Practices (F) 3
- PLSC 3700 Plant Propagation (F) ............................................. 4
- PLSC 3800 Turfgrass Management (F) ...................................... 4

Approved Electives (11-15 credits)
- Choose electives from the following courses or choose from any courses that are part of a BS Degree in Horticulture.
  - BIOL 1610 Biology I (F) ....................................................... 4
  - CHEM 1110 (BPS) General Chemistry I (F,Sp) ...................... 4
  - PLSC 2900 Special Problems in Plant Science (F,Sp,Su) ....... 1-4

Minors

Crop Biotechnology Minor (16 credits required)

The following courses are required. PLSC 3700, 5750. Select the balance of credits from the following courses. At least one of the production courses, marked with an asterisk (*), is required. PLSC 3500, 4280*, 4320*, 4400*, 4500*, 5200, 5550, 5700; PSB 5160, 5240, 5260.

Agronomy Minor (16 credits required)

A minimum of 6 credits of Soil Science courses must be taken, including SOIL 3000. A minimum of 6 credits of Plant Science courses must be taken, including the following courses: PLSC 4280 and 4320. Select the balance of credits from the following courses: SOIL 4000, 4700, 5130, 5310, 5560, 5620, 5700, PLSC 2200, 3800, 4400, 5200, 5550, 5650, 5700.

Soil Science Minor (16 credits required)

The following course is required: SOIL 3000. Select 12 credits from the following courses: SOIL 4000, 4700, 5050, 5130, 5310, 5350, 5550, 5560, 5650, 5700.

Ornamental Horticulture Minor (16 credits required)

The following courses are required. PLSC 3700, 5750. Select the balance of credits from the following courses: SOIL 3000, 4000, 4700, 5050, 5130, 5310, 5350, 5550, 5560, 5650, 5700.

Crop Biotechnology Minor

The following courses are required. PLSC 3700, 5750. Select the balance of credits from the following courses. At least one of the production courses, marked with an asterisk (*), is required. PLSC 3500, 4280*, 4320*, 4400*, 4500*, 5200, 5550, 5700; PSB 5160, 5240, 5260.

Agronomy Minor (16 credits required)

A minimum of 6 credits of Soil Science courses must be taken, including SOIL 3000. A minimum of 6 credits of Plant Science courses must be taken, including the following courses: PLSC 4280 and 4320. Select the balance of credits from the following courses: SOIL 4000, 4700, 5130, 5310, 5560, 5650, PLSC 2200, 3800, 4400, 5200, 5550, 5700.

Soil Science Minor (16 credits required)

The following course is required: SOIL 3000. Select 12 credits from the following courses: SOIL 4000, 4700, 5050, 5130, 5310, 5350, 5550, 5560, 5650, 5700.

Ornamental Horticulture Minor (16 credits required)

The following courses are required. PLSC 3700, 5750. Select the balance of credits from the following courses: SOIL 3000, 4000, 4700, 5050, 5130, 5310, 5350, 5550, 5560, 5650, 5700.

Horticulture Minor (16 credits required)

SOIL 2000 or 3000 is required. Select 6 credits from the following courses: PLSC 2100, 2200, 2620, 3800, 4400, 4500, one ornamental horticulture course. Select the remaining credits from the following: PLSC 2650, 3050, 3300, 3800, PSB 2800, SOIL 3000.

Undergraduate Research Opportunities

The Plants, Soils, and Biometeorology Department is dedicated to providing undergraduate students with opportunities to participate with faculty members in research and creative activities. Examples of recent research include seed germination requirements, plant growth regulators, salt cedar control, pasture growth dynamics, soilless media characteristics, gene sequencing, and essential oils from native plants. In addition to faculty mentorship of such activities, students may obtain grants of up to $1,000 for support of their projects. For further information, students may contact any departmental faculty member, or view the undergraduate research website at: http://www.usu.edu/research/undergrad/

Departmental Assessment

Review and assessment of departmental programs is a commitment of the Plants, Soils, and Biometeorology Department. In 2002, the department completed a USDA-Cooperative State Research, Education, and Extension Service review. On an ongoing basis, the
Department of Plants, Soils, and Biometeorology

Degree Programs and Specializations

The Master of Science and Doctor of Philosophy degrees are offered as follows: (1) **Plant Science** with specializations in crop physiology, crop production and management, molecular biology, plant breeding and cytology, plant biotechnology and tissue culture, plant nutrition, space biology, and weed science; (2) **Soil Science** with specializations in molecular biology (interdepartmental program), soil and water chemistry, soil biochemistry and ecology, soil conservation systems, soil fertility and plant nutrition, soil physics, soil-plant-water relations, soil taxonomy and genesis, and soils and irrigation; (3) **Biometeorology** with specializations in agricultural meteorology, climatology, micrometeorology, remote sensing, and turbulence in plant canopies; and (4) **Ecology**. A **Master of Professional Studies in Horticulture (MPSH)** is also offered. This program is available to out-of-state students at in-state tuition rates through WICHE-WRGP.

Course Requirements

Course requirements leading to MS or PhD degrees are developed jointly by the student and the student's advisory committee. Course selections reflect areas of specialization. There are, however, specific departmental requirements regarding physical sciences, biological sciences, and mathematics courses, which differ depending on the area of specialization.

Research

Research projects vary over time, depending on funding and other factors. Students are encouraged to visit the home page websites of the graduate faculty to determine research interests and lists of recent publications. Some of the research interests in the department include (1) the control of diseases, nematodes, weeds, and other hazards to fruit, vegetable, ornamental, and field crops; (2) physiological and genetic improvement of fruit, vegetable, ornamental, and field crops (breeding and biotechnology); (3) the evolution, genetic regulation, and utilization of apomixis and other developmental phenomena of higher plants; (4) management of agronomic and horticultural production systems; (5) horticultural landscape water management; (6) soil formation and landscape evolution; (7) soil, plant, water, and nutrient relationships; (8) management of saline and sodic soils; (9) alternative land uses; (10) improved management of animal wastes and biosolids; (11) management of soil microbial processes; (12) drainage and irrigation systems; (13) adaptations to weather and weather modification; (14) analyses and modification of large-scale surface evaporation from atmospheric boundary layer measurements; (15) spatial and temporal properties of sun flecks in plant canopies; and (16) spatial variation in surface fluxes of heat and water vapor in semiarid regions.

Financial Assistance and Assistantships

The financial awards provided by the School of Graduate Studies are listed on pages 100-101 of this catalog. The Department of Plants, Soils, and Biometeorology does not have a formal application form for financial assistance. Most monies used to assist students in the department come from research grants controlled by individual faculty members. Negotiations for financial assistance (research assistantships or part-time employment) are made between faculty members and students. The department provides a few part-time teaching assistantships (a semester at a time). Graduate teaching assistants are responsible to their major professor and to the instructor.
Career Opportunities

A broad range of career opportunities exists for students completing the MS or PhD degree from the Department of Plants, Soils, and Biometeorology. Graduate students specializing in the plant sciences may expect to find employment as consulting scientists, or in the private sector as plant breeders, weed scientists, etc. Graduate students specializing in the soil sciences may expect to find employment as soil scientists with government agencies or in the private sector, where they may pursue careers in environmental consulting, fertilizer retail, irrigation system design, waste management, mineland reclamation, or related environmental or agricultural pursuits. Graduate students specializing in biometeorology may expect to find employment with government agencies, as consulting scientists, or with the private sector. Graduate students specializing in ecology may expect to find employment as research scientists, as consulting ecologists, or with environmental agencies. Graduate students completing the PhD may also find career opportunities in academia.

Additional Information and Updates

Additional information and updates concerning graduate faculty and graduate student opportunities can be obtained from the web at:

http://www.psb.usu.edu

Plants, Soils, and Biometeorology Faculty

Professors
Bruce G. Bugbee, crop physiology
John G. Carman, plant reproduction and development
Steven A. Dewey, weed science
Daniel T. Drost, vegetable production
Lawrence E. Hips, biometeorology
David J. Hole, cereal breeding
Roger K. Kjelgren, urban horticulture
H. Paul Rasmussen, horticulture
V. Philip Rasmussen, sustainable agriculture
Larry A. Rupp, ornamental horticulture
Ralph E. Whitesides, weed science

Research Professor
Stanford A. Young, seed production

Adjunct Professors
Michael C. Amacher, soil chemistry
Gail E. Bingham, micrometeorology
N. Jerry Chatterton, forage/range physiology/biochemistry
Lynn M. Dudley, soil physical chemistry
Wilford R. Gardner, soil physics
Henry F. Mayland, soil science
Charles W. Robbins, soil science
Edward J. Souza, plant breeding and genetics
John M. Stark, microbial ecology and biogeochemistry
Dale R. Westermann, soil science
Raymond M. Wheeler, plant physiology
James L. Wright, soil science

Professors Emeritus
Rulon S. Albrechtsen, plant breeding
Keith R. Allred, forage physiology
J. LaMar Anderson, pomology
Gaylen L. Ashcroft, biometeorology
William F. Campbell, crop stress physiology
Wade G. Dewey, plant breeding
John O. Evans, weed science
Alvin R. Hamson, horticulture
R. John Hanks, soil physics
Anthony H. Hatch, horticulture
Donald T. Jensen, climatology
Jerome J. Jurinak, soil chemistry
R. Paul Larsen, horticulture
DeVer McAllister, plant breeding
Frank B. Salisbury, plant physiology
Schuyler D. Seeley, pomology
R. L. Smith, soil science
Alvin R. Southard, soil classification
James H. Thomas, international agronomy
H. Grant Vast, Jr., vegetable breeding
David R. Walker, pomology

Associate Professors
Janis L. Boettiger, soil genesis, classification and mineralogy
Brent L. Black, pomology
Grant E. Cardon, soil science
Robert R. Gillies, biometeorology
Paul R. Grossl, biogeochemist
Paul G. Johnson, turfgrass science
Jennifer W. MacAdam, forage production and physiology
Jeanette M. Norton, soil microbiology

Research Associate Professor
Esmaiel Malek, biometeorology

Adjunct Associate Professors
Ari M. Ferro, phytoremediation
Kevin B. Jensen, forage breeding
Thomas A. Jones, plant genetics
Helga Van Miegroet, forest soils

Assistant Professors
Thomas C. Greggs, agronomy
Scott B. Jones, soil physics
Kelly L. Kopp, water conservation/turfgrass science
Heidi A. Kratsch, ornamental horticulture
Corey V. Ransom, weed science
Dominique J. P. Roche, small grains, breeding/genetics
Yujun Wu, plant stress physiology, cell wall proteins

Research Assistant Professor
Raymond L. Cartee, soils and irrigation

Adjunct Assistant Professors
Jayne Belnap, biological soil crusts
Nathanial Brunsell, biometeorology
Shaun Bushman, plant genetics, molecular biology
David G. Chandler, surface hydrology
Richard T. Lamar, environmental microbiology
Steven R. Larson, research geneticist
Susan Meyer, seed biology
Michael Peel, plant breeding
Joseph Robins, plant genetics
Blair L. Waldron, research geneticist
Department of Plants, Soils, and Biometeorology

Senior Lecturer
D. Craig Aston, ornamental horticulture

Lecturer
M. Cathryn Myers-Roche, academic advisor

Research Associates
Shyrl M. Clawson, plant breeding
Robert L. Newhall, soil conservation and sustainable agriculture

Director, Utah Botanical Gardens
William A. Varga, ornamental horticulture

Director, Soil Testing Lab
Janice Kotuby-Amacher, soil chemistry

Course Descriptions

Plant Science (PLSC), pages 694-696

Assistant Department Head: Michael S. Lyons, Main 330D, (435) 797-1312, mike.lyons@usu.edu

Graduate Program Director: Patria D. Julnes, Main 324D, (435) 797-3889, patria.julnes@usu.edu

Undergraduate Advisors:  
Political Science:  
Roberta Q. Herzberg, Main 320A, (435) 797-1307, bobbi.herzberg@usu.edu

Law and Constitutional Studies:  
Anthony A. Peacock, Main 330B, (435) 797-1314, anthony.peacock@usu.edu

International Studies:  
Veronica Ward, Main 324E, (435) 797-1319, veronica.ward@usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), and Master of Arts (MA) in Political Science; BS and BA in Law and Constitutional Studies; Administers BA in International Studies

Undergraduate Programs

Objectives

The Department of Political Science offers a flexible program to accomplish the following objectives:

1. to provide students with theoretical and factual understanding of government, politics, and political philosophy, nationally and internationally;
2. to develop students’ analytic ability, communication skills, and facility with political research methods;
3. to prepare students for effective participation in civic affairs, careers in government and the teaching of government, and graduate study in political science, law, and other fields related to the public sector; and
4. to further the liberal arts education mission of the University and to enrich the educational experiences of students in all programs of study.

Admission and Prerequisite Requirements

Departmental Admission Requirements

Admission requirements for the Department of Political Science include a minimum 2.5 GPA for Political Science majors and a minimum 3.0 GPA for Law and Constitutional Studies majors. Students in good standing may apply for admission to the department.

Prerequisites

It is assumed that students registered for upper-division political science courses have acquired the basic knowledge and information taught in the lower-division courses required for the major. Anyone who wishes to take an upper-division course, but has not had the appropriate prerequisites, should consult with the instructor before registering. Faculty members reserve the right to drop from upper-division courses students who do not meet these requirements.

Graduation Requirements

Political Science Major

A. Total credits in Political Science Courses: 36

B. Overall GPA: 2.00

C. Average GPA in Political Science Courses: 2.50

D. Required Courses (15 credits)

POLS 1100 (BAI) U.S. Government and Politics (F,Sp) ...............3
POLS 2100 Introduction to International Politics (F,Sp) (3 cr) or
POLS 2200 (BSS) Comparative Politics (F,Sp) (3 cr) ...........3
POLS 3300 Introduction to Political Theory (F,Sp) .................3
POLS 3000 (QI) Introduction to Political Research (F,Sp) ...........3
POLS 4990 (CI) Senior Research Seminar (F,Sp) ..................3

E. Area Requirements (15 credits minimum)

Select two of the following four areas: U.S. Government and Policy, International Relations, Comparative Politics, and Political Theory. Complete nine upper-division credits in one of the selected areas and six upper-division credits in the other. Even though a course may be listed under more than one area, it can be applied to only one area. Prior to taking the upper-division courses in a particular area, students must take the introductory course corresponding to that specific area.

1. U.S. Government and Policy
POLS 1100, U.S. Government and Politics, must be taken prior to taking any of the upper-division coursework listed below.

POLS 3110 Parties and Elections (Sp) ......................................3
POLS 3120 Law and Politics (F) .............................................3
POLS 3130 United States Legislative Politics (Sp) .................3
POLS 3140 The Presidency (F) ................................................3
POLS 3150 State and Local Government (Sp) .........................3
POLS 3170 Law and Economics (F) .........................................3
POLS 3810 Introduction to Public Policy (F) .........................3
POLS 4120 American Constitutional Law (F) .......................3
POLS 4140 Political Organizations ........................................3
POLS 4810 Politics and Public Policy (F) .............................3
POLS 4820 Natural Resources and Environmental Policy (Sp) ............3
POLS 48902 Special Topics (F,Sp) ........................................3
POLS 5110 Social Policy (F) ..................................................3
POLS 5130 Law and Policy (Sp) ............................................3
POLS 5140 Law, Politics, and War (F) .................................3
POLS 5180 Natural Resource Policy (Sp) ............................3

2. International Relations
POLS 2100, Introduction to International Politics, or POLS 2200, Comparative Politics, must be taken prior to taking any of the upper-division coursework listed below.

POLS 3100 Global Issues (F) ...............................................3
POLS 3400 United States Foreign Policy (F,Sp) .....................3
POLS 4210 European Union Politics (Sp) ............................3
POLS 4280 Politics and War (Sp) ........................................3
POLS 4410 Global Negotiations (Sp) ...................................3
Department of Political Science

POLS 4450 (CI) United States and Latin America (Sp) ........................................ 3
POLS 4460 National Security Policy (Sp) ....................................................... 3
POLS 4470 Foreign Policy in the Pacific (Sp) .................................................. 3
POLS 4890 Special Topics (F,Sp) ................................................................ 3
POLS 5200 Global Environment (F) ............................................................... 3
POLS 5210 Comparative Political Change/Development (F) ....................... 3
POLS 5270 Latin American Politics and Development (Sp) ......................... 3
POLS 5290 Development in Europe (Sp) ....................................................... 3
POLS 5480 International Trade Policy (Sp) .................................................... 3

3. Comparative Politics

POLS 2200, Comparative Politics, or POLS 2100, Introduction to International Politics, must be taken prior to any of the upper-division coursework listed below.

POLS 3190 Gender, Power, and Politics (F) ................................................. 3
POLS 3210 Western European Government and Politics (F) ......................... 3
POLS 3220 Russian and East European Government and Politics (F) ............ 3
POLS 3230 Middle Eastern Government and Politics (F) ............................ 3
POLS 3250 Chinese Government and Politics (F) ........................................ 3
POLS 3270 Latin American Government and Politics (F) ............................ 3
POLS 3430 Political Geography (Sp) ............................................................ 3
POLS 4210 European Union Politics (Sp) ..................................................... 3
POLS 4220 (CI) Ethnic Conflict and Cooperation (Sp) ............................... 3
POLS 4230 Issues in Middle East Politics (Sp) ............................................. 3
POLS 4260 Southeast Asian Government and Politics (Sp) ......................... 3
POLS 4410 Global Negotiations (Sp) ............................................................ 3
POLS 4450 (CI) United States and Latin America (Sp) .................................. 3
POLS 4890 Special Topics (F,Sp) ................................................................. 3
POLS 5120 Economics of Russia and Eastern Europe, 9th Century to 21st Century (F) ................................................................. 3
POLS 5140 Law, Politics, and War (F) .......................................................... 3
POLS 5210 Comparative Political Change/Development (F) ....................... 3
POLS 5230 Development in the Middle East (Sp) ........................................ 3
POLS 5270 Latin American Politics and Development (Sp) ......................... 3
POLS 5290 Development in Europe (Sp) ..................................................... 3
POLS 5350 Evolution, Conflict, and Cooperation (Sp) ............................... 3
POLS 5440 Gender and World Politics (Sp) .................................................. 3

4. Political Theory

POLS 2300, Introduction to Political Theory, must be taken prior to taking any of the upper-division coursework listed below.

POLS 3310 American Political Thought (F) .................................................. 3
POLS 3320 The Foundations of American Constitutionality ....................... 3
POLS 4130 Constitutional Theory (Sp) .......................................................... 3
POLS 4310 (CI) History of Political Thought I (Sp) ..................................... 3
POLS 4320 History of Political Thought II (Sp) ........................................... 3
POLS 4890 Special Topics (F,Sp) ................................................................. 3

F. Electives (6 credits)

In addition to the 15 credits of required prerequisite courses and the 15 credits of area courses, students must complete six upper-division elective credits. Any upper-division Political Science courses may be used to fulfill this requirement, with two exceptions:

1. Not more than three credits in Directed Readings courses (POLS 4910) can be applied to this requirement.

2. Not more than three credits in the following courses can be applied to this requirement:

POLS 5910 Campaign Internship (F,Sp,Su) ................................................. 1-12
POLS 5920 Washington Internship (F,Sp,Su) .............................................. 1-12
POLS 5930 State Government Internship (F,Sp,Su) .................................... 1-12
POLS 5940 Administrative Internship (F,Sp,Su) .......................................... 1-12

3. Prerequisite: STAT 1040 or MATH 1030.

4. POLS 3000 must be taken before POLS 4990.

5. The subject matter of POLS 4890 determines the area to which it applies.
Spring Semester (15 credits)
POLS upper-division course ............................................ 3
Upper-division elective courses ................................... 6
Elective courses .............................................................. 6

Law and Constitutional Studies Major
This is a rigorous program designed for students interested in leadership roles in business, public communications, government, education, or the study or practice of law.

A. Total Credits in Political Science Courses: 36
Please note that none of the courses can be taken Pass/Fail; all Political Science courses must be taken for a letter grade. Also, all courses must be attended in their entirety. One must not take these courses during an internship.

B. Career Total and USU Cumulative GPAs: 3.00

C. Average GPA in Political Science Courses: 3.00

D. Required Courses (21 credits)
POLS 1100 (BAI) U.S. Government and Politics (F,Sp) ............. 3
POLS 2300 Introduction to Political Theory (F,Sp) .................. 3
POLS 3120 Law and Politics (F) .......................................... 3
POLS 3170 Law and Economics (F) ..................................... 3
POLS 4120 American Constitutional Law (F) .......................... 3
POLS 5130 Law and Policy (Sp) (3 cr) or
POLS 5140 Law, Politics, and War (F) (3 cr) ......................... 3
POLS 3320 The Foundations of American Constitutionalism (3 cr) or
POLS 4130 Constitutional Theory (Sp) (3 cr) or
POLS 4140 Political Organizations (3 cr) ............................. 3

E. Course Sequencing
Law and Constitutional Studies majors are required to complete POLS 1100 (U.S. Government and Politics) as a prerequisite to all 3000- and 4000-level Political Science courses. It is advised that Law and Constitutional Studies majors take POLS 3120 (Law and Politics) prior to POLS 4120 (American Constitutional Law), 4130 (Constitutional Theory), 5130 (Law and Policy), or 5140 (Law, Politics, and War).

F. Area Requirements (6 credits minimum)
Students must take a minimum of six upper-division credits in U.S. Government and Policy in addition to courses required for this major.

G. Electives (9 credits)
Any Political Science upper-division courses can be used to complete the major and fulfill this requirement, with two exceptions:

1. Not more than three credits in Directed Readings courses (POLS 4910) can apply to this requirement.

2. Not more than three credits in the following courses can apply to this requirement:
POLS 5910 Campaign Internship (F,Sp,Su) .......................... 1-12
POLS 5920 Washington Internship (F,Sp,Su) ...................... 1-12
POLS 5930 State Government Internship (F,Sp,Su) .............. 1-12
POLS 5940 Administrative Internship (F,Sp,Su) .................... 1-12

Sample Four-year Plan for Law and Constitutional Studies Major

Minimum GPA for Admission: 3.0, USU; 3.0, Career
Minimum GPA for Graduation: 3.0, major courses; 3.0, USU;
3.0, Career
Minimum Grade Accepted: C in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (30 credits)
Fall Semester (15 credits)
POLS 1100 (BAI) United States Government and Politics ........ 3
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ........ 3
University Studies Breadth courses .................................. 6
Elective course(s) ......................................................... 3

Spring Semester (15 credits)
POLS 2300 Introduction to Political Theory .......................... 3
University Studies Breadth courses .................................. 6
Elective course(s) ......................................................... 3

Complete the CIL exams by the end of the Freshman Year.

Sophomore Year (30 credits)
Fall Semester (15 credits)
POLS 3120 Law and Politics .............................................. 3
POLS 3170 Law and Economics ......................................... 3
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ........................................ 3
University Studies Breadth course ..................................... 3
Elective course(s) ......................................................... 3

Spring Semester (15 credits)
POLS upper-division elective (U.S. Government and Politics) courses .......................................................... 6
Communications Intensive (CI) course .............................. 3
Elective courses ......................................................... 6

Junior Year (30 credits)
Fall Semester (15 credits)
POLS 4120 American Constitutional Law ............................ 3
POLS upper-division elective course .................................. 3
Quantitative Intensive (QI) course ................................... 3
Depth Humanities and Creative Arts (DHA) course .......... 3
Elective course(s) ......................................................... 3

Spring Semester (15 credits)
POLS 3320 The Foundations of American Constitutionalism (3 cr) or
POLS 4130 Constitutional Theory (3 cr) or
POLS 4140 Political Organizations (3 cr) .......................... 3
POLS upper-division elective course .................................. 3
Depth Life and Physical Sciences (DSC) course ............ 3
Elective courses ......................................................... 6

Senior Year (30 credits)
Fall Semester (15 credits)
POLS 5140 Law, Politics, and War .................................... 3
POLS upper-division elective course .................................. 3
Communications Intensive (CI) course ........................... 3
Elective courses ......................................................... 6

Spring Semester (15 credits)
Upper-division elective courses ...................................... 6
Elective courses ......................................................... 9
Political Science Minor
Students can obtain a minor in political science by completing a total of 18 credits in the field. The following courses must be included:
- POLS 1100 (BAI) U.S. Government and Politics (F,Sp) ......................... 3
- POLS 2100 Introduction to International Politics (F,Sp) (3 cr) or
- POLS 2200 (BSS) Comparative Politics (F,Sp) (3 cr) ........................... 3
- POLS 2300 Introduction to Political Theory (F,Sp) .............................. 3

The remaining credits must be from upper-division courses.

Political Science Teaching Minor
This minor is designed specifically for students seeking careers in secondary education. Students must have at least 18 credits in political science courses chosen from a list available from the department and in the Guide to the Undergraduate Program in Secondary Education at USU, available at the USU Bookstore.

International Studies Major
Problems of security, development, ethnic conflict, and human rights, as well as problems relating to the environment and natural resources, are increasingly confronted at a global rather than a national level. With its theoretical models and real-world application, the study of international studies is an exciting and highly relevant interdisciplinary major. This program cultivates the development of language and intercultural skills, develops understanding of global problems and circumstances, and expands the students' capacity to make informed judgments regarding complex international and global issues. For information about requirements for this major, see pages 347-349.

Internships
The department places approximately 40-45 students in government or related internships each year. Most of these internships work with a member of the Utah delegation to the U.S. Congress in Washington, D.C., a member of the Utah Legislature in Salt Lake City, a political campaign, a state or local administrative agency, or a lobbying group. Students in any major, of at least junior class standing, and having a minimum GPA of 3.0 are eligible to apply.

Pi Sigma Alpha
Pi Sigma Alpha is the national honorary political science society. A member must have earned at least 15 credits in political science courses with a minimum 3.0 GPA and a minimum 3.0 GPA overall.

Financial Support
The Political Science Department offers a number of scholarships yearly to students. Contact the Political Science departmental office for applications (usually available around the first week of January and due back the first week of February) at (435) 797-1306 or visit the office in Main 320.

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information
For detailed information about requirements for the majors and minors within the Political Science Department, see the major requirement sheets, which can be obtained from the department, or online at: http://www.usu.edu/majorsheets/

Graduate Programs

Departmental Admission Requirements

Applicants must have a BS or BA degree. An undergraduate GPA of 3.0 or better, or a GPA of 3.5 or better over the last 90 semester credits of undergraduate coursework is required. Students must have quantitative, verbal, and analytical GRE scores at or above the 50th percentile. Applicants with very high GPAs and other exceptional supporting materials may petition for admission with deficient GRE scores. The graduate admissions committee will review petitions individually.

International students must receive a score of 550 or better on the TOEFL exam.

Due to limited space, acceptance into Political Science graduate programs is not guaranteed, even for students who meet admission requirements. Moreover, all students are expected to perform at high levels throughout their program. Any student receiving a C grade or lower for any course at any level or a grade point average below 3.0 for a given semester will be placed on academic probation. Receipt of two grades of C or lower or a grade point average below 3.0 for two semesters will result in termination from the program. In addition, students must meet the requirements of the School of Graduate Studies. Applicants not meeting minimum requirements may be allowed to correct deficiencies concurrently with graduate coursework.

Applications will be considered throughout the year. However, students who wish to be considered for financial aid outside of the department must submit applications by March 31 for the coming academic year.

No application will be considered until all required information arrives in the office of the School of Graduate Studies.

Assistantships
The department appoints a number of teaching assistants, each with a $7,000 annual stipend. Appointments are for one year, and may be renewable for a second year. Research assistantships and government internships are sometimes available as well. Applications are available from the Political Science Department and are due on May 15.
Department of Political Science

Course Requirements
Effective Fall 2006, the master’s degree in Political Science will consist of three area tracks, with each student choosing one of the three. Details of requirements and courses follow. Completion of the degree requires a total of 30 credits, along with a thesis.

Public Policy Track

Required Courses (6 credits)
POLS 6010 Research Design (F) ........................................ 3
POLS 6020 Public Policy Analysis (Sp) .................................. 3

Elective Courses (12 credits)
Students must complete 12 credits, chosen from the following list:
BA 6420 Financial Problems (F) ........................................ 3
POLS 5110 Social Policy (F) .............................................. 3
POLS 5130 Law and Policy (Sp) ........................................... 3
POLS 5480 International Trade Policy (Sp) .......................... 3
POLS 6100 Introduction to Public Administration .................. 3
POLS 6400 United States Foreign Policy ............................ 3
Political Theory and Democracy (course being developed)

Note: Students in the Public Policy Track may also select courses from the Democratic Theory and Practice Track.

Democratic Theory and Practice Track

Required Courses (6 credits)
POLS 6010 Research Design (F) ........................................ 3
POLS 6240 Democratic Theories and Practice (F) ................. 3

Elective Courses (12 credits)
Students must complete 12 credits, chosen from the following list:
ECON 5150 Comparative Economic Systems (Sp) ............... 3
POLS 5130 Law and Policy (Sp) ........................................... 3
POLS 5230 Development in the Middle East (Sp) .................. 3
POLS 5270 Latin American Politics and Development (Sp) .... 3
POLS 6100 Introduction to Public Administration .................. 3
POLS 6240 Democratic Theories and Practice (F) ................. 3
POLS 6250 Theories of War and Peace (F,Sp,Su) ................. 3
POLS 6400 United States Foreign Policy ............................ 3
SOC 5650 Developing Societies (F) .................................. 3

Comparative Politics: Asia (course being developed)
Political Theory and Democracy (course being developed)

Note: Students in the Conflict and Security Track may also select courses from the Democratic Theory and Practice Track.

Other Requirements (12 credits)
The remaining 12 credits needed for the degree may be chosen from the following:
POLS 6910 Graduate Tutorial (F,Sp,Su) .............................. 1-3
(may count up to 6 credits toward the degree, subject to approval)
POLS 6920 Internship (F,Sp,Su) ......................................... 1-15
(may count up to 3 credits toward the degree, subject to approval)
POLS 6970 Thesis Research (F,Sp,Su) ................................. 1-9
(may count up to 3 credits toward the degree)
Approved graduate courses taught outside of Political Science ........ 1-3

Political Science Faculty

Professors
William L. Furlong, Latin America, Central America, democratization, development, U.S. foreign policy
Peter F. Galdris, parties, elections, interest groups, research methods, statistics
Carolyn Rhodes, international relations, comparative politics, European union, trade
Randy T. Simmons, environmental politics and policy, public choice

Adjunct Professors
Larry Booth, national security policy
Brian Theodore “Ted” Stewart, constitutional law
James L. Waite, European policy, comparative European government, methodology, public opinion

Professor Emeritus
Stanford Cazier, U.S. government, public law

Associate Professors
David B. Goetz, human cooperation and conflict, ethnic conflict, evolutionary theory
Roberta Q. Herberg, public choice, health policy, public policy, U.S. government
Patricia D. Julnes, public administration, organization theory, information technology management, quantitative and statistical methods
Michael S. Lyons, U.S. government, Congress, public policy, elections
Peter McNamara, political theory
Anthony A. Peacock, public law
Veronica Ward, international relations, social choice, global environmental issues, conflict and cooperation

Adjunct Associate Professor
Charles E. Kay, environmental policy ecology

Assistant Professors
Huiyun Feng, Chinese politics, East Asian politics, comparative politics, international relations
V. James Strickler, public law
Department of Political Science

Senior Lecturer
Carol L. McNamara, political theory, presidency

Lecturers
Jeannie L. Johnson, international relations, comparative cultures
Shannon Peterson, international relations, U.S. foreign policy, comparative politics, foreign policy decision making

Course Descriptions
Political Science (POLS), pages 696-698
Latin American Studies (LATS), page 659
Psychologists utilize research methods to understand the causes of behavioral, emotional, and thought processes. Psychologists specialize in diverse areas. Some psychologists seek to better understand the interactions among genetic, biological, social, and psychological determinants of behavior. Other psychologists are concerned with how the body and brain create emotions, memories, and sensory experiences, and how these are perceived and interpreted. Still others are concerned with how we learn observable responses and how we process, store, and retrieve information. Additionally, psychologists focus their careers on the causes, assessment, and/or treatment of emotional and behavioral disorders. Psychologists utilize research methods to understand the causes of behavior, emotion, and thought processes.
Department of Psychology

applied projects, and/or research projects. These objectives and goals form the basis for a contract to be fulfilled by the end of semester. In collaboration with the faculty or the appointed field supervisor, student progress and the final grade are assessed based on the students’ successful and productive efforts toward mastering the objectives and meeting their goals. Students are expected to demonstrate mastery of the requirements of the American Psychological Association Style Manual (5th edition) in their required courses and selected coursework from the primary electives. Effective Fall 2006, students entering the psychology major must take PSY 2950 and 4950 instead of PSY 5950 and 5960.

PSY 2950, 4950, and 4960 additionally provide students with the presentation and documentation skills needed to achieve objectives 5 and 6 (e.g., to prepare and successfully complete applications for employment, employment interviews, graduate school admission materials, letters of intent, candidate interviews, a resume, and a curriculum vita). Because PSY 2950 provides specific information that students need to demonstrate the competency and achievement of learning objectives 5 and 6, the department strongly advises students to enroll in PSY 2950 very early in their undergraduate careers.

Students should take this course as soon as they know they wish to major in psychology. PSY 2950 should be taken no later than the semester immediately following admission to the major. Students are also strongly advised to affiliate themselves with a faculty mentor early in their careers and to participate actively in the teaching and research experiences that will help them document continued achievements and mastery of objectives 5 and 6. Students should thus also enroll early in the independent research study or applied courses (PSY 4910, 5900, 5910, and 5930).

Departmental-level Competency Assessments

Students are required to complete a pre-test, as well as two post-tests, and to submit written documentation of their progress and program accomplishments. Students should make arrangements with the Psychology Advising Office to complete the pre-test and the two post-tests, and they should submit all written documentation to this office.

Student completion of the departmental competency pre-test in psychology is a formal requirement for admission to the psychology major. The pre-test is a web-based, multiple-choice assessment of students’ incoming knowledge and mastery of required and elective coursework, and is correlated with the programmatic learning objectives 1-4. The Psychology Advising Office will not initiate the graduation application process until students have additionally completed two formal post-test assessments of their progress through the program, which are correlated with learning objectives 1-4.

Specifically, students must take the departmental competency post-test in psychology, which is similar but not identical to the pre-test, as well as a departmentally prepared and administered analogue of the Graduate Record Examination subject test in psychology. Students’ performance in each content area of the three tests is recorded and maintained in a confidential, password-protected file accompanied by students’ pre-test and post-test scores from assessments administered in each USU-affiliated course in psychology. Graduation is not currently contingent upon the level of performance on these tests. Test performance is used, however, as a formative assessment of programmatic achievement.

Final approval of each student’s application for graduation is additionally contingent upon the student’s submission of three documents to the advising office. The student must submit a professionally prepared curriculum vita in APA style, in both hard copy and electronic (PDF) format. The vita must reflect the culmination of the student’s research, applied, and service-learning experiences and accomplishments in, or related to, the field of psychology. The vita must be current, must reflect all of the student’s work (up to two weeks prior to graduation), and may include his or her scores on standardized national tests (e.g., the GRE, MCAT, LSAT, and/or MAT, where applicable). It should also include a current e-mail address and phone number that will allow the student to be contacted after graduation to volunteer information regarding his or her post-graduation successes. Along with the vita, each student must submit an accompanying approval form that has been signed by his or her faculty mentor, or USU-affiliated and approved sponsor. The student must additionally complete a departmental exit survey that compiles information regarding the student’s perception of the program and his or her success in securing employment or admission to graduate programs. The vita and survey documents are used to assess program objectives 5 and 6.

The courses in Psychology and the electives available in related departments allow students to tailor their education to meet specific career goals. Some students who major in psychology may qualify for admission to unique specialty tracks: (1) the (secondary education) Teaching Major; (2) Behavior Analysis Skill Track; (3) Interpersonal Relationships Skill Track; and (4) Graduate School Preparation Track. A human services/caseworker training option may also be available to majors.

Students can complete the major or minor in psychology either on-campus (Logan), or through the USU Distance Education system (all required courses and selected electives are offered every 1-2 years) available throughout the State of Utah. Some classes are available by WebCT. Students should check with the Psychology Advising Office at the time of registration for availability. The specific requirements for the skill tracks, the Apprenticeship, the on- and off-campus (distance education) options, and for how psychology electives can be used to advance students’ career goals can be obtained from the Psychology Advisement Office, Eccles-Jones Education Building, Room 475, (435) 797-1456.

Requirements

Pre-psychology Admission Requirements

Students are admitted to the Department of Psychology as Pre-psychology majors by meeting the Utah State University admission requirements (see pages 16-20). To be a Psychology major, a student must make written application to the department, after meeting the following prerequisites: (1) completion of at least 40 semester credits with a cumulative GPA of 2.75 or higher; (2) completion of at least 18 credits of the University Studies requirement with a GPA of 2.75 or higher; and (3) completion of PSY 1010, 1100, 1400, 1410, 2800, and 2920, with a GPA of 3.0 or higher. Application to the department should be made during the semester in which these prerequisites will be completed.

A student who wishes to be officially recognized as a psychology major or psychology teaching major must submit a formal application to the Department of Psychology Undergraduate Advising Office at Utah State University. The formal application will be reviewed and approved by the USU Psychology Department advisory staff only. This contingency applies to all students, including those in the on-campus programs and in any of the USU Distance Education, Continuing Education, or Extension programs. Applications that have been reviewed by a USU Psychology Department advisor and meet all requirements will be processed in a timely fashion.

Students who wish to fulfill the major requirements via any of the USU Distance Education, Continuing Education, or Extension programs or sites must contact the Psychology Department Advising Office on the
Department of Psychology

Logan campus to be informed of the contingencies regarding timely progression through the program. Students need to carefully review their program of study with the Psychology Department Advising Office. Students should be aware that their program of study will be delayed when either (1) they fail to contact advisors at the Logan campus or (2) Continuing Education deviates from the published schedule of courses.

**General Undergraduate Psychology Major:**

**Required Courses (24 credits), plus**

**Primary Electives (16 credits),**

**Secondary Electives (3 credits), and**

**Apprenticeship (3 credits)**

Requirements for a psychology major consist of a broad preparation of 24 credits of specified coursework, plus a minimum of 19 credits of approved Psychology elective courses, and 3 credits of an apprenticeship, which allows for integration of coursework knowledge (theory) through application, for a total of 46 credits. At least 20 Psychology credits must be upper-division, 12 of which must be taken at USU.

**A. Required Courses (24 credits)**

**D. Required Apprenticeship Course (2 credits)**

**PSY 2950** Orientation to Psychology as a Career and Profession (F,Sp,Su) ........................................ 2

A minor in another area is required. A minimum overall USU GPA of 2.75 is required for graduation, with a minimum GPA of 3.0 in Psychology. Students must receive a grade of C- or better in all psychology courses (USU and transfer) in order to have them counted toward major requirements. (Students desiring licensure for teaching in secondary schools must also meet the requirements of the Secondary Education Department.)

Students must meet the above minimum requirements in order to graduate with a major in psychology. These requirements include completing all of the required assessments and providing the supporting documentation (see Assessment of Learning Objectives on pages 484-485).

Meeting these minimum requirements alone is insufficient to prepare for competitive employment opportunities or to secure admission to graduate school. Students who are planning to secure optimal employment or graduate admissions need to first affiliate with a faculty mentor, as well as become involved in research or applied experiences with the faculty member, as soon as they know they will pursue a major in psychology. These students should enroll in one of PSY 5900, 5910, or 5930 as soon as they have identified a mentor and have met Utah State University’s admission requirements for the Department of Psychology Pre-psychology Major designation. They should pursue their own creative research opportunity experience with the faculty member and enroll in PSY 4910 during the second semester of their junior year and absolutely no later than the first semester of their senior year. They should plan to enroll in an additional section of PSY 5900, 5910, or 5930 during their senior year.

**Suggested Sample Four-year Plan for Psychology Major**

Students should check with the Psychology Undergraduate Office regarding availability of courses each semester.

**Freshman Year (30 credits)**

**Fall Semester (15 credits)**

Department of Psychology

Undergraduate Psychology Minor:
Required Courses (10 credits), plus
Elective Courses (8 credits minimum)

A. Required Courses (10 credits)
PSY 1010 (BSS) General Psychology (F,Sp,Su) .................. 3
PSY 1100 Developmental Psychology: Infancy and Childhood (F,Sp), 3
PSY 1400 Analysis of Behavior: Basic Principles (F,Sp,Su), 3
PSY 1410 Analysis of Behavior: Basic Principles Lab (F,Sp,Su), 1

B. Electives (8 credits)
Choose course(s) from required or primary elective courses listed for the Psychology Major to total 18 credits.

The student’s grade point average for all psychology courses, USU or transfer, must average 3.0 or above to qualify for credit toward the minor. At least 12 credits of the 18 required credits must be completed at USU. Students must receive a grade of C- or higher in all psychology courses (USU and transfer) in order to have them counted toward minor requirements.

Psychology Teaching Major:
Required Psychology Courses (27 credits), plus
Elective Psychology Courses (16 credits)

Requirements for a Teaching Major in Psychology broadly consist of 27 credits of specified psychology coursework and 16 credits of elective psychology coursework, for a total of 43 credits in psychology. Only 16 of these 43 psychology credits may be taken in lower-division courses. The remaining 27 credits must be received in 3000- or 4000-level psychology courses. At least 12 of the upper-division credits must have been earned in courses completed at USU. A minor in another field of study is also required. Prospective teachers must complete 35 credits of the Secondary Teacher Education Program (STEP) in the Department of Secondary Education. Required GPA for psychology courses is 3.0. Students must receive a grade of C- or better in all psychology courses (USU and transfer) in order to have them counted toward major requirements.

A. Required Courses (27 credits)
PSY 1010 (BSS) General Psychology (F,Sp,Su) .................. 3
PSY 1100 Developmental Psychology: Infancy and Childhood (F,Sp), 3
PSY 1400 Analysis of Behavior: Basic Principles (F,Sp,Su), 3
PSY 1410 Analysis of Behavior: Basic Principles Lab (F,Sp,Su), 1
PSY 2100 Developmental Psychology: Adolescence (Sp) ......... 3
PSY 2800 (QI) Psychological Statistics (F,Sp) ..................... 3
PSY 3100 History and Systems of Psychology ................... 3
PSY 3660 Educational Psychology for Teachers (F,Sp) .......... 3
PSY 4420 Cognitive Psychology (Sp) (3 cr) and
PSY 4430 Cognitive Psychology Laboratory (Sp) (1 cr) ......... 4

B. Elective Courses (16 credits)

Group 1. Select 3 credits from the following:
PSY 3510 Social Psychology (F,Sp) ................................. 3
PSY 4170 Personality Theory (Sp) .................................. 3

Group 2. Select 3 credits from the following:
PSY 3400 Perception and Psychophysics (F) ..................... 3
PSY 3460 Physiological Psychology (Sp) ......................... 3

Group 3. Select 4 credits from the following:
PSY 3400 Analysis of Behavior: Advanced (F,Sp) ............. 4
PSY 4420 Cognitive Psychology (Sp) (3 cr) and
PSY 4430 Cognitive Psychology Laboratory (Sp) (1 cr) ........ 4

Note: in order to graduate, students must complete at least 120 credits with a minimum USU GPA of 2.75. Of these 120 credits, 40 credits must be completed in upper-division courses (numbered at the 3000-level and above). For psychology courses used to complete the major, a minimum GPA of at least 3.0 is required, with no grades below C-.
**Department of Psychology**

**Group 4. Select 6 credits from the following:**
- PSY 3110 Health Psychology (Sp) ......................................................... 3
- PSY 3120 Abuse, Neglect, and the Psychological Dimensions of Intimate Violence (F,Su) ............................................................... 3
- PSY 3210 Abnormal Psychology (F,Sp,Su) ........................................... 3
- PSY 3660 Drugs and Behavior course (number and approval pending) ................................................................. 3

**C. Secondary Teacher Education Program (STEP)**

*(35 credits)*

Admission to Secondary Education must be completed approximately one semester before the following courses may be taken.

**Level 1 (15-week courses) (11 credits)**

**Level 1 (15-week courses) (11 credits)**

Students at Level 1 must complete the following courses:

**Level 1 (15-week courses) (11 credits)**

Students at Level 1 must complete the following courses:

- INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su) ............. 2
- SCED 3210 (CI) Educational and Multicultural Foundations (F,Sp,Su) ....... 3
- SCED 4200 (CI) Reading, Writing, and Technology (F,Sp,Su) .................. 3
- SCED 4210 Cognition and Evaluation of Student Learning (F,Sp,Su) ....... 3
- Special Methods Course (major or minor) ............................................ 3
- Clinical Experience I Course (major or minor) ..................................... 1

**Level 2 (15-week courses) (12 credits)**

**Level 2 (15-week courses) (12 credits)**

Students at Level 2 must complete the following courses:

**Level 2 (15-week courses) (12 credits)**

Students at Level 2 must complete the following courses:

- SCED 4950 Technology Tools for Teachers (F,Sp,Su) ......................... 3
- SCED 5050 Technology Tools for Teachers (F,Sp,Su) ......................... 3
- SCED 5630 Technology Tools for Teachers (F,Sp,Su) ......................... 3
- SCED 5670 Technology Tools for Teachers (F,Sp,Su) ......................... 3
- SCED 5720 Technology Tools for Teachers (F,Sp,Su) ......................... 3
- SCED 6500 Technology Tools for Teachers (F,Sp,Su) ......................... 3

**Undergraduate Psychology Teaching Minor: Required Psychology Courses (15 credits), plus Elective Psychology Courses (3 credits)**

At least 12 credits of the 18 required credits must be completed at USU. In addition, they must select at least one 3-credit class from the list of courses required for or serving as primary electives for the psychology major. Required GPA for psychology courses is 3.0. Students must receive a grade of C- or better in all psychology courses (USU and transfer) in order to have them counted toward minor requirements. Finally, they need to fulfill the 35-credit requirement for the Secondary Teacher Education Program (STEP) in the Department of Secondary Education.

**A. Required Courses (15 credits)**

- PSY 1010 (BSS) General Psychology (F,Sp,Su) ................................... 3
- PSY 1100 Developmental Psychology: Infancy and Childhood (F,Sp,Su) .... 3
- PSY 1400 Analysis of Behavior: Basic Principles (F,Sp,Su) ..................... 3
- PSY 1410 Analysis of Behavior: Basic Principles Lab (F,Sp,Su) ............. 1
- PSY 2100 Developmental Psychology: Adolescence (Sp) .................... 3
- PSY 3660 Educational Psychology for Teachers (F,Sp,Su) .................. 2

**B. Electives (3 credits minimum)**

Choose course(s) from required or primary elective courses listed for the Psychology Major to total 18 credits.

**Note:** The Psychology Teaching Minor also requires the completion of the Secondary Teacher Education Program (STEP) (35 credits). See section C under Psychology Teaching Major.

**Skill Tracks for Undergraduate Majors in Psychology**

The following skill tracks can be completed as part of a student’s major in Psychology. A skill track represents a cluster of courses that help provide more comprehensive knowledge and practical skill in particular areas. After admission as a major in Psychology, students may apply for admission to a skill track. Completing a skill track requires careful planning, so that skill track courses and all other required and elective courses for the major are fulfilled. Enrollment in a skill track is entirely optional for majors.

**Behavior Analysis Skill Track**

The following cluster of courses will provide psychology majors with a basic foundation in experimental and applied behavior analysis: PSY 1400, 1410, 3400, 4910, 5720; MHR 3710; and PHIL 4320 or 4900.

**Interpersonal Relationships Skill Track**

The following cluster of courses will assist psychology majors in systematically developing a broad range of interpersonal relationship skills, such as listening, assertiveness, negotiation, conflict resolution, anger management, etc.: PSY 1210, 3210, 3510, 4210, 4510, 5200; MHR 3710.

**Graduate School Preparation Track**

The major in Psychology has been designed so that students take classes that will help them compete in applying for graduate school. Students completing the graduate school track need to become actively involved with faculty research, form an association with Psi Chi, and enroll in independent research and readings courses. Students should also take a course covering use of statistical software (e.g., SPSS), offered through FCHD or Sociology. Furthermore, it is recommended that students take at least one upper-division course in statistics from Psychology, FCHD, or Sociology.

Students who pursue the skills tracks in Psychology are encouraged to become involved with the faculty in independent research or applied experiences. Involvement in these experiences is associated with greater chances of successful graduate school admission and/or competitive post-baccalaureate employment, especially for students who pursue this involvement early in their undergraduate careers.

The faculty who teach courses satisfying the skills track requirements are committed to working closely with students to hone their experiences and accomplishments in research methodology and applied fields of psychology.

These faculty have a solid track record in mentoring students. Their students have achieved remarkable success in procuring funding to support student-initiated research projects via Utah State University’s competitive University Research Cooperative Opportunity (URCO) mechanism and the national honor society of psychology (Psi Chi).
The Department of Psychology and Utah State University actively support students' efforts by awarding matching funding to support the attendance of conferences at which they can present their accepted conference presentations.

Psychology Courses Fulfilling University Studies Requirements

The following Psychology courses may be used to fulfill University Studies requirements, in the areas indicated:

**Breadth Social Sciences (BSS):** PSY 1010.

**Depth Social Sciences (DSS):** PSY 3120, 3210, 3400, 3500, 3510, 4210, 4230, 4240, 4420.

**Communications Intensive (CI):** PSY 3500, 4510, 4950, 4960, 5200.

**Quantitative Intensive (QI):** PSY 2800.

Although these courses may be applied toward fulfilling the University Studies breadth, depth, communications intensive, and quantitative intensive requirements, students must be prepared to complete additional writing or library assignments, as required for University Studies.

Important Contingencies for Psychology Courses

Prerequisites for Psychology courses are strictly enforced. The prerequisites are indicated, at the end of course descriptions, within the Psychology course listings (see pages 701-706).

A student must be admitted as a psychology major or must complete at least 45 semester credits with a GPA of 3.0 or higher prior to taking psychology courses numbered 3000 or above. However, students who have been admitted to the Teacher Education program may take PSY 3660, provided they have met the prerequisites. A student must be admitted as a psychology major or must complete at least 60 semester credits with a GPA of 3.0 or higher prior to taking psychology courses numbered 4000 or above.

Students desiring to receive credit for courses taken previously at other institutions will need to assure the Undergraduate Advising Office that the substitute class contained the requisite laboratory experience (where applicable).

Students who can complete a baccalaureate degree within seven years of enrollment at USU can qualify for graduation by meeting (1) the General Education/University Studies requirements in effect when they initially enrolled and (2) the major requirements in effect when they officially declared their major, even though there may have been changes in General Education/University Studies and major requirements since that time. Students who have not completed the baccalaureate requirements within seven years of their initial enrollment at USU must have their General Education/University Studies and major requirements evaluated and approved by their department head and dean. However, exceptions to this seven-year policy may be necessary for mandated changes in degree requirements.

Undergraduate psychology coursework (USU or transfer) that is more than eight years old may not be used toward meeting the specific psychology coursework requirements for a psychology major or psychology minor. However, the Psychology Department Undergraduate Committee may allow revalidation through testing. Testing arrangements may be made by contacting Karen Ranson at karen.ranson@usu.edu.

**Departmental Honors**

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school.

In the Psychology Department, students may complete an Honors in University Studies with Department Honors or a Department Honors only program. The requirements for departmental honors are as follows:

**Honors Coursework**

Honors students must complete 12 credits in courses designated as Honors courses. These courses are selected by students, and are approved by the Department Honors Coordinator and individual faculty members. Any upper-division (3000-level or higher) course may be taken as Honors. Additional courses which will meet the criteria for an Honors designation are determined, in conjunction with the student, by the faculty members teaching the courses.

**GPA Requirements**

To qualify for departmental honors, students must maintain a cumulative GPA of 3.3 and a GPA of 3.5 within upper-division major requirements and Honors coursework.

**Senior Thesis**

In order to obtain departmental honors, students are required to design, conduct, and present a senior thesis/project under the supervision of a faculty mentor. The senior thesis/project can be built from the research component of PSY 4950 and 4960.

Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: [http://www.usu.edu/honors/](http://www.usu.edu/honors/)
Department of Psychology

Additional Information

For detailed information about course requirements for majors and minors within the Psychology Department, see the major requirement sheet, which is available from the department, or which can be accessed online at: http://www.usu.edu/majorsheets/

Graduate Programs

Admission Requirements

Admissions requirements vary somewhat across Psychology graduate programs. However, applications submitted to the School of Graduate Studies must include the following: (1) transcript showing completion of undergraduate course prerequisites, plus any recommended coursework; (2) report of (GRE) test scores from ETS; (3) GPA of at least 3.2, covering the last 60 semester credits; (4) three letters of recommendation; and (5) a statement of professional goals and intent. The department requires a minimum GRE combined (Verbal and Quantitative) score of at least 1,100 for all programs.

The deadline for submitting applications for the Combined Clinical/Counseling/School Psychology PhD program is January 15. Applications for the Research and Evaluation Methodology PhD program are reviewed throughout the year. The application deadline for the MS School Psychology program is March 1. Applications for the MS program in School Counseling must be submitted by May 1. With the exception of the PhD program in Combined Clinical/Counseling/School, applications for programs may be accepted after these dates if openings still exist.

Students are admitted to Psychology master’s degree programs, including School Psychology and School Counseling, following completion of a bachelor’s degree. Prospective PhD program students can compete for admission to the Combined Clinical/Counseling/School program or the Research and Evaluation Methodology program if they possess either a bachelor’s or a master’s degree.

Prerequisites for Admission to Graduate Programs

Applicants to the Master of Science (MS) and Doctor of Philosophy (PhD) program are advised that they should possess a broad base of knowledge at the undergraduate level in a substantive subgroup of the following: general psychology, human development, learning theory, cognition, personality theory research, psychometrics, elementary statistics, history and systems, physiological, sensation and perception, and social psychology. The absolute prerequisites for each graduate program are outlined below, along with a listing of graduate program course requirements for each program.

Psychology Master of Science Programs

School Psychology, NASP-accredited

USU’s nationally accredited program in school psychology emphasizes child development issues, assessment and treatment of emotional and behavioral disorders, and traditional psychoeducational assessment and consultation activities appropriate to school settings. The program is approved by the Utah State Office of Education for licensure of school psychologists. Students are required to complete either a research thesis (Graduate School Plan A option), or a major literature review/synthesis paper (Plan B).

Absolute undergraduate course prerequisites for admission to the MS in School Psychology are as follows: (1) Elementary Statistics; (2) Theories/Research in Learning or Applied Behavior Analysis; (3) Abnormal Psychology; and (4) Theories/Research in Personality. The MS in School Psychology requires a minimum of 60 semester credits.

The following courses are required:

- PSY 6150 Empirically Supported Treatments for Psychological Disorders of Children and Adolescents (Sp) .......................................................... 3
- PSY 6220 Group Counseling (F) ................................................................. 3
- PSY 6270 Child Psychopathology (F) ......................................................... 3
- PSY 6290 Diversity Issues in Treatment and Assessment (Sp) ................. 3
- PSY 6310 Intellectual Assessment (F) .......................................................... 3
- PSY 6330 Psychometrics (F) (3 cr) or (Sp) .................................................. 3
- PSY 6600 Research Design and Analysis I (F,Sp,Su) (3 cr) ............... 3
- PSY 6340 Psychological and Educational Consultation (F) .................. 3
- PSY 6350 Introduction to Theory and Practicum in Counseling (F) ........ 3
- PSY 6360 Practicum in Counseling and Psychotherapy (Sp,Su) ............. 3
- PSY 6380 Practicum in School Psychology (F,Sp,Su) ............................... 3
- PSY 6410 Psychoeducational Assessment (Sp) ......................................... 3
- PSY 6450 Introduction to School Psychology (F) .................................... 3
- PSY 6460 Professional Issues in School Counseling and School Psychology (Sp) .......................................................... 3
- PSY 6530 Developmental Psychology (F) ............................................... 3
- PSY 6570 Introduction to Educational and Psychological Research (F,Sp,Su) .......................................................... 3
- PSY 6600 Cognition and Instruction (Sp) .................................................. 3
- PSY 6880 Transcultural Assessment Lab (Sp) ......................................... 3
- PSY 6950 Internship in School Psychology (Sp,Su) ................................... 3
- PSY 6970 Thesis (F,Sp,Su) ................................................................. 2-6

School Counselor Education (NCATE-accredited)

Completion of this program qualifies graduates for professional licensure in School Guidance Counseling. Coursework is formulated to train students in a broad range of skills, including individual and group counseling for diverse populations; behavior and educational assessment and intervention; research and methodological foundations; and ethical, legal, and professional standards. Experiential learning in the form of practicum and internship placements is a critical component of the program. The program is approved by the Utah State Office of Education and most other states. It is offered on campus and via a live, satellite distance education system (EDNET) to sites within Utah’s boundaries. The program is accredited by the National Council for Accreditation of Teacher Education.

Absolute undergraduate course prerequisites for admission to the MS in School Counseling are as follows: (1) Theories of Personality, (2) Abnormal Psychology, and (3) Psychological Statistics (or equivalent).

The MS in School Counseling requires a minimum of 48 semester credits. The following courses are required:

- PSY 6010 Introduction to Program Evaluation: Evaluation Models and Practical Guidelines (F,Su) .......................................................... 3
- PSY 6150 Empirically Supported Treatments for Psychological Disorders of Children and Adolescents (Sp) .......................................................... 3
- PSY 6220 Group Counseling (F) ................................................................. 3
- PSY 6240 Introduction to School Counseling and Guidance (F) ............. 3
- PSY 6250 Internship in School Counseling and Guidance (F,Sp,Su) .......... 3

### PhD Programs

**Combined and Integrated (C-I) Clinical/Counseling/School Psychology, (APA-accredited)**

This program integrates the theory and practice of psychology common to the disciplines traditionally denoted as clinical, counseling, and school psychology. It subscribes to the scientist-practitioner model, and students completing the program will enter professional practice in a variety of settings, including VA hospitals, mental health centers, hospitals, clinics, schools, and academic settings. The program provides an excellent balance of research and practitioner skill training. Entering BS students can opt to earn an MS degree in either counseling psychology or school psychology prior to the PhD.

A research thesis and dissertation are required of all students. The combined program provides generalized training, along with three areas of specialization. The emphasis areas are designed for students to begin systematically developing a specialty area in line with their future career goals. The three areas of specialization, which mirror faculty interest and expertise, are health psychology/neuropsychology, child clinical (with or without a school psychology emphasis), and rural and minority psychology. The program is also affiliated with the American Indian Support Project, one of the nation’s most successful programs for training and mentoring American Indian PhD psychologists.

Complete information on accreditation guidelines and principles is available through the Committee on Accreditation (CoA) at Education Directorate, American Psychological Association, 750 First Street NE, Washington DC 20002-4242, (202) 336-5979, or on the web at: http://www.apa.org/ed/accreditation/

**Absolute undergraduate prerequisites** for admission to the PhD program in Combined Clinical/Counseling/School are as follows: (1) **Elementary Statistics; (2) Theories/Research in Learning; (3) Abnormal Psychology; and (4) Theories/Research in Personality.**

The Combined Clinical/Counseling/School Psychology PhD requires 107 total semester credits, including the following:

### A. MS Counseling Psychology Degree Curriculum

**PSY 6290** Diversity Issues in Treatment and Assessment (Sp) ..........
**PSY 6310** Intellectual Assessment (F) ..................................................
**PSY 6330** Objective Assessment of Personality and Affect (Sp) ...........
**PSY 6350** Introduction to Theory and Practicum in Counseling (F) .......
**PSY 6360** Practicum in Counseling and Psychotherapy (Sp,Su) ..........
**PSY 6370** Practicum in School Counseling (F,Sp,Su) .......................
**PSY 6430** Theories of Learning: The Behavioral Perspective (F) ........
**PSY 6530** Developmental Psychology (F) ...........................................
**PSY 6570** Group Counseling (F) .........................................................
**PSY 6610** Seminar (Grant Writing) (Su) .............................................
**PSY 6620** Social Psychology (Sp) .......................................................}

**PSY 6600** Research Design and Analysis I (F,Sp,Su) .........................
**PSY 6650** Introduction to the Combined Doctoral Program (F) ..........
**PSY 6670** Thesis (F,Sp,Su) .................................................................

### B. PhD Program Courses

**PSY 6220** Group Counseling (F) ......................................................
**PSY 6510** Social Psychology (Sp) ........................................................
**PSY 6750** Empirically Supported Treatments for Adult Psychological Disorders (Sp) .........................................................
**PSY 6880** Transcultural Assessment Lab (Sp) ....................................
**PSY 7100** Biological Basis of Behavior (Sp) .......................................
**PSY 7250** Professional Ethics and Standards (F) ...............................
**PSY 7270** Psychopathology (F) ...........................................................
**PSY 7350** Practicum in School Psychology (F,Sp,Su) .........................
**PSY 7360** Practicum in Counseling Psychology (F,Sp,Su) ...............
**PSY 7370** Practicum in Clinical Psychology (F,Sp,Su) .......................
**PSY 7610** Research Design and Analysis II (Sp,Su) .........................
**PSY 7670** Literature Reviews in Education and Psychology (F,Sp) ......
**PSY 7910** Independent Research (F,Sp,Su) .......................................
**PSY 7950** Internship in Professional Psychology (F,Sp,Su) .............
**PSY 7970** Dissertation (F,Sp,Su) .......................................................

Electives .............................................................................................

Note: The MS counseling psychology degree is available only to students matriculated into the PhD Clinical/Counseling/School program.

**Research and Evaluation Methodology (REM)**

The department offers a PhD program in research and evaluation methodology. The program is designed to produce researchers capable of contributing to the knowledge base in psychology and education utilizing experimental and evaluation methods. While satisfying the department’s general requirements, students may design their programs to become specialists in a variety of areas, such as program evaluation, experimental health psychology, analysis of behavior, statistics, or similar areas. A research thesis and/or dissertation are required of all students.

**Absolute undergraduate prerequisites** for admission to the PhD program in Research and Evaluation Methodology are as follows: (1) **Elementary Statistics, (2) Psychometrics, and (3) History and Systems of Psychology.**

The Research and Evaluation Methodology PhD requires a minimum of 63 total credits past the MS degree (total of 40 credits):

### A. MS Degree Curriculum

**PSY 6010** Introduction to Program Evaluation: Evaluation Models and Practical Guidelines (F,Su) ................................................
**PSY 6570** Introduction to Educational and Psychological Research (F,Sp,Su) .............................................................................
**PSY 6600** Research Design and Analysis I (F,Sp,Su) .........................

**Content Requirements (12 credits):**

Students must complete four of the following five courses:
**PSY 6510** Social Psychology (Sp) ....................................................
**PSY 6530** Developmental Psychology (F) ......................................
**PSY 6650** Theories of Learning: The Behavioral Perspective (F) ....
**PSY 6660** Cognition and Instruction (Sp) ...........................................
**PSY 7100** Biological Basis of Behavior (Sp) ....................................

Utah State University 2007-2009 General Catalog 491
Department of Psychology

Other Requirements (4 credits):
INST 7920 College Teaching Seminar (online course offered through USU School of Graduate Studies) ........................................... 1
PSY 6910 Independent Research: Demonstration of Computer Analysis, Instrument Critique, and Study Design Critique Competencies (F,Sp,Su) ................................................................. 1
PSY 7250 Professional Ethics and Standards (F) ........................................... 2

B. PhD Degree Curriculum
PSY 7090 Research and Evaluation Methodology Program Seminar (F,Sp) ......................................................................................... 1
PSY 7670 Literature Reviews in Education and Psychology (F,Sp) ........ 2
PSY 7700 Grant Writing (Sp) .................................................................. 2
PSY 7780 Multivariate Methods in Psychology and Education (F) ........ 3

Specialty Area Electives (21 credits):
Students should consult with their supervisory committee to determine which Specialty Area Electives they should complete.

Additional Requirements for Psychology PhD Programs
All PhD candidates must meet the following general core requirements, regardless of specialty emphasis: (1) submission of an article for publication in a recognized journal; (2) presentation of research findings at a regional or national convention or professional meeting; (3) completion of the doctoral dissertation; (4) a comprehensive literature review; (5) completion of the research core; and (6) completion of an apprenticeship or internship. Students in the combined PhD program must also complete a formal case presentation, and compete nationally for admission to an APA-approved, 2,000-hour predoctoral internship. The Research and Evaluation Methodology program has an additional requirement of a grant proposal.

Research Opportunities for Students
Departmental faculty are heavily involved in basic and/or applied research. A sampling of the diverse research interests of tenured and tenure-track faculty available to students includes: Ascione—prosocial, moral development, domestic violence, relation between cruelty to animals and psychopathology; Bates—adolescent problem behavior prevention; community-level prevention, higher education teaching and learning; Cheney—behavioral pharmacology, basic operant learning; Crowley—anxiety, depression, supervision and training; DeBerard—health psychology, behavioral medicine, spinal surgery outcome and technique efficacy; Domenech Rodriguez—Latino family dynamics, parent training programs; Fargo—statistical methods, quantitative neuropsychology, seizure disorders, classification statistics; Ferguson—bullying, victimization, emotional well-being, religious thinking; Field—adolescent behavior disorders, rural mental health issues, school psychology; Franco—student services, minority health issues, multicultural psychology; Gallaher—social and dating relationship processes and dynamics in adolescence and rural mental health service delivery; Gilbertson—early intervention and prevention of behavior problems; school psychology; Gimpel Peacock—ADHD, behavioral disorders of children; Julnes—evaluation theory, human service delivery, family; Lehman—Web/Internet learning variables and efficacy, educational psychology; Odum—experimental analysis of behavior, behavior pharmacology; Roberts—early intervention with families of young children, community-based systems of services; Schroeder—sexual risk behavior models of health behavior, stress and coping; Shahan—experimental analysis of behavior, drug self-administration, behavior momentum, conditioned reinforcement, behavior economics; Sinex—processing of central auditory system, neuropsychology of sound discrimination; Stein—addictive behaviors and models, drug and alcohol prevention/treatment; J. Tschanz—neuropsychology of Alzheimer's disease and other dementias; White—educational research, hearing loss detection in infancy, and program evaluation.

Graduate Student Financial Assistance
Financial support for students enrolled in terminal MS programs is limited. MS students should meet with their academic advisor for information about possible assistantship opportunities.

PhD students are guaranteed an assistantship for at least their first year. However, for at least the last 15 years, 100 percent of PhD students have continued to enjoy assistantship support beyond their first year, if they desired it. The department also has available a number of teaching assistantships. Though these are generally awarded to students matriculated in psychology PhD programs, they are occasionally given to exceptional MS students. Also, faculty in the department and college regularly offer research assistantships to graduate students, as does the Counseling Center and a variety of on- and off-campus facilities (e.g., Center for Persons with Disabilities, Bear River Mental Health Center, Head Start, and Early Head Start).

Additionally, first-year psychology PhD students typically compete extremely well for several University Fellowships, which were established to attract top student scholars to USU. Furthermore, the department has some scholarship support specifically available to psychology graduate students (e.g., Walter Borg and Elwin Nielsen scholarships). Finally, in accordance with current School of Graduate Studies policy, PhD students may qualify for full tuition remission for up to 70 credits of their program.

Psychology Faculty

Professors
Frank R. Ascione, developmental
Carl D. Cheney, physiological
Susan L. Crowley, counseling
Tamara J. Ferguson, social and developmental psychology
Richard N. Roberts, developmental psychology
Charles L. Salzberg, applied behavior analysis
Donal G. Sinex, auditory neurophysiology
David M. Stein, clinical psychology
Karl R. White, research and evaluation methodology

Research Professors
Byron R. Burnham, qualitative evaluation methods
Russell Snyder, auditory neurophysiology

Professors Emeritus
Marvin G. Fifield, school and counseling
J. Grayson Osborne, behavior therapy, child
Blaine R. Worthen, research and evaluation methodology

Associate Professors
M. Scott DeBerard, health psychology
George Julnes, research and evaluation methodology
Amy L. Odum, behavior analysis
Gretchen Gimpel Peacock, school
Melanie M. Domenech Rodriguez, counseling, child clinical
JoAnn T. Tschanz, neuropsychology, abnormal psychology, physiological psychology
Department of Psychology

Research Associate Professor
Mark S. Innocenti, school psychology

Assistant Professors
Scott C. Bates, social and community psychology
Jamison Fargo, statistical methods, neuropsychology
Clint Field, school psychology
Renee V. Galliher, clinical psychology
Donna M. Gilbertson, school psychology
Timothy Shahan, behavior analysis
Kerstin E. E. Schroder, health psychology

Research Assistant Professor
Susan G. Friedman, research methods

Adjunct and Clinical Faculty
Ann M. Berghout Austin, infancy through childhood
Carolyn G. Barcus, counseling
David W. Bush, clinical/counseling
Robert S. Cook, rural and family interventions
Gwenaelle C. Couillard, training
Mary E. Doty, clinical
Monique Frazier, child clinical

Eric J. Gee, research and evaluation
Richard D. Gordin, Jr., sport and exercise psychology
Margaret R. "Peg" Hennon, career guidance and assessment
Randall M. Jones, family research management
Joan A. Kleinke, counseling and personnel services
Steve Lehman, educational psychology
J. Russell Mason, sensory evaluation, ethology
Kent E. Nabers, gero-psychology
Mark A. Nafziger, counseling psychology
Maria C. Norton, research and evaluation methodology
D. Kim Openshaw, marriage and family therapy
Lori A. Roggman, developmental
Carol Rosenthal, instructional design and technology
Thomas R. Schenkenberg, neuropsychology
Patricia L. Truhn, neuropsychology, crisis intervention
Brian Tschanz, social psychology
Beth Walden, research and evaluation methodology
Leland J. Winger, Jr., clinical
Jean Wollam, educational psychology

Religious Studies Major and Minor

Program Director: Norman L. Jones
Location: Main 323
Phone: (435) 797-1290
FAX: (435) 797-3899
TTY: (435) 797-1290
E-mail: diane.buist@usu.edu
WWW: http://www.usu.edu/history

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA)

Program Description

The Religious Studies BS or BA degree requires a total of 36 credits for the major, as well as 15 credits in a complementary minor.

Students begin their course of study by completing two lower-division courses. One is a survey of religions, and the other is a methodology course.

Students must take 27 credits of upper-division coursework, distributed over the following three areas: Cultural Inquiry (humanistic approaches), Scientific Inquiry (social scientific approaches), and Doctrinal Inquiry (philosophical and theological approaches).

At the end of the program, students completing either the BA or the BS degree must take a capstone seminar.

The minor in religious studies requires the same two lower-division courses as the major, and at least one upper-division course chosen from each of the three areas of approach.

Purpose and Outcomes

Students completing the BA or BS degree in Religious Studies should be able to demonstrate the ability to:

1. understand the influence of religion upon culture, and the influence of culture upon religion;
2. analyze the influence of religious value systems on individuals;
3. apply appropriate methods of research and argumentation to questions concerning religion and culture;
4. communicate their findings in clear, well-reasoned writing; and
5. express cultural literacy concerning the major religions of the world.

Requirements

New students accepted in good standing by the University may apply for admission to the Religious Studies Program. Students transferring from another institution or another major will be admitted if they have an overall minimum GPA of 2.5.

Candidates must earn a grade of C or better in all courses used to meet the requirements of the Religious Studies major or minor.

Degree Options

Students in the program may work toward one of the following two degrees:

Bachelor of Arts (BA) Degree

Students enrolled in the BA degree focus their work on cultural questions within religious studies. Since sufficient coursework in a foreign language is required, students should consider completing courses offered by USU in Latin, Greek, Chinese, or other appropriate languages. The BA degree requires a minimum proficiency in a foreign language. This proficiency may be established in one of the following ways:

1. Sixteen credits in a single language
2. Documentation of a proficiency level of “intermediate low” or better through an examination administered by the USU Department of Languages, Philosophy, and Speech Communication
3. Completion of any upper-division foreign language course constituting a third-year course of study with a grade of C or better

Bachelor of Science (BS) Degree

Students enrolled in the BS degree focus their work on quantitative or clinical questions within religious studies. Students should consider completing upper-division courses in social science methods or statistics. Students must complete 15 credits of math and science beyond the University Studies requirements.

Religious Studies Major

Students must complete at least 36 credits in interdisciplinary coursework. A grade of C or better must be earned in all classes used for the major.

Required Courses (9 credits)

REL 1010 Introduction to Religious Studies ........................................3
REL 2010 Introduction to Religious Studies Methodology ..................3

Pre-major course helping students to understand the discipline of religious studies. Explores the questions asked by religious studies, as well as the methods used to answer these questions. Helps students gain an understanding of the various approaches to the study of religion and the history of attempts to understand religion in cultural contexts.

REL 4990 Religious Studies Capstone.............................................3

Students write a substantial research paper dealing with a religious studies topic and demonstrating their command of the research methods, documentation, and style of professional communication used in the discipline.

Elective Courses (27 credits)

Complete at least 6 credits of coursework in each of the following three divisions. The total credits for coursework completed in this section must be at least 27 credits.
Religious Studies Major and Minor

Cultural Inquiry
Courses in this section use the methods of the arts and humanities to explore religious expression and the ways in which religion and behavior interact over time.

Select at least two of the following courses:

ENGL 3070 (DHA) Perspectives in Folklore (F,Su) .................................................. 3
In-depth study of folklore for nonmajors. Topics vary according to faculty expertise. Also taught as HIST 3070.

ENGL 3700 (CI) Regional Folklore (F,Sp) .................................................. 3
Study of folklore and folk life as they relate to regional cultures. Also taught as HIST 3700.

HIST 3110 (DHA/CI) Ancient Near East .................................................. 3
Survey of history and civilization of ancient Mesopotamia, Egypt, and Israel, from prehistory to 500 B.C. Writing intensive. Prerequisite: ENGL 2010 or equivalent. Also taught as ART 3110.

HIST 3150 (CI) Roman History .................................................. 3
History of Rome from Neolithic era to "fall" of the Western Empire. Special emphasis on politics, art, literature, and civilization. Writing intensive. Prerequisite: ENGL 2010.

HIST 3220 (DHA/CI) Medieval European Civilization, 500-1500 ............ 3
Provides students with overview of major themes in medieval European history from 500 to 1500 A.D. Also introduces major historiographical problems related to this period. Writing intensive and document based. Prerequisite: ENGL 2010 or equivalent.

HIST 3230 Early Modern Europe .................................................. 3
Explores major themes of early modern European history, such as secularization, the rise of the nation state, the Reformation, and the birth of capitalism. Introduces major historiographical issues of the period. Reading and writing intensive. Prerequisite: ENGL 2010 or equivalent.

HIST 3250 (DHA/CI) Renaissance Europe 1300 to 1520 (F,Sp) ............ 3
Emphasizing writing and primary sources, covers significant changes in Europe in government, society, and intellectual life caused by the Black Death, the humanist revolution in arts and literature, and the centralizing efforts of popes and monarchs.

HIST 3410 The Modern Middle East .................................................. 3
Examines history of the Middle East (Arabian peninsula, Fertile Crescent, Egypt, Iran, and Turkey), with special emphasis on social and political currents which have shaped the area’s history.

HIST 3460 Comparative Asian History .................................................. 3
Surveys history of Asian continent, analyzing common patterns in the cultures of West, South, Southeast, and East Asia.

HIST 3850 (DHA/CI) History of Utah (Sp) .................................................. 3
Prehistory to the present. Examines environment and peoples of Utah, emphasizing use of primary documents to view and interpret Utah’s past. Reading and writing intensive. Requires use of USU Special Collections and Archives. Prerequisite: ENGL 2010.

HIST 4210 Celtic Europe (F,Sp) .................................................. 3
History of Celtic peoples in British Isles, Scandinavia, and continental Europe, from Neolithic times to the Norman Conquest in 1066. Computer intensive.

HIST 4230 (DHA/CI) The History of Christianity in the West ............... 3
Introduces students to history of Christian spirituality, asking how Christianity has been lived and how it has shaped lives over two thousand years. Uses original sources to introduce both the history and the historiographical problems surrounding the Christian religion. Writing intensive.

HIST 4250 The Reformation in Britain: 1450-1688 ............................. 3
Focuses on major research questions in the field of early modern studies. Explores causes and consequences of English Reformation and British Civil War. Writing and research intensive.

HIST 4790 American Religious History .................................................. 3
Varieties of American religious experience from settlement to the present.

RELS 3010 Introduction to Buddhism .................................................. 3
General survey of historical development, basic doctrine, and practice of Hinayana and Mahayana Buddhism.

RELS 3020 Introduction to Hinduism .................................................. 3
Surveys history, doctrinal developments, and sociological concerns of Hinduism from the Ved period through the modern period. Focuses primarily on Hindu religious thought as applied to Hindu life through various modes of religious action.

RELS 4010 Buddhism in the West .................................................. 3
One-semester introduction to Buddhism in the Western world for nonspecialists in Buddhism. Focuses on development of Buddhism as a Western religious phenomenon. Presents interpretive, historical introduction to Buddhism in the West.

Note: RELS 3010, 3020, and 4010 are taught alternating years. Check with the Religious Studies Program for information about when these courses will be taught.

Scientific Inquiry
Courses in this section use the methods of the social sciences to explore religious values and behavior on an individual and a societal level.

Select at least two of the following courses:

ANTH 3160 (DSS) Anthropology of Religion (F) .................................. 3

ANTH 4110 (d6110) (DSS) Southwest Indian Cultures, Past and Present (F) .................................................. 3
Reviews past and present Indian cultures of greater southwest region. Examines the prehistoric Anasazi, the Pueblos, the canyon and desert peoples, the Utes, and the Navajos. Interprets these cultures in ecological, historic, and political contexts.

ANTH 4130 (DSS) Medical Anthropology: Matter, Culture, Spirit, and Health (Sp) .................................................. 3
Examines the bio-ecological (matter) and socio-cultural aspects of disease/illness in human populations and examines “spiritual” dimensions of health in cross-cultural context. Includes methods component for anthropology majors and serves as a Liberal Arts cluster capstone course.

PHIL 3750 Religion and Science in the Modern World (Sp) ............... 3
Study of problems addressing the relation of religion to science in the modern world (e.g., evolution, Big Bang, origin of life).
Religious Studies Major and Minor

PSY 3500 (DSS) Scientific Thinking and Methods
in Psychology (F,Sp) ...................................................... 3
Social science research is commonly reported by the media, and by
political and governmental interests. Students learn how to legitimately
interpret such research through a study of accepted research methods
and analysis procedures, and through critical study of the common
interpretive mistakes made by media writers. Prerequisite: PSY 1010.

PSY 3510 (DSS) Social Psychology (F,Su) ....................... 3
Study of the individual in society; problems, theories, and methods of
social psychology; will relate reading assignments to current social
issues. Prerequisite: PSY 1010.

PSY 4420 (DSS) Cognitive Psychology (Sp) ...................... 3
In-depth study of basic concepts, methods, and theories involved in
perception, memory, and thinking. Lab required. Prerequisite:
PSY 1010.

PSY 4430 Cognitive Psychology Laboratory (Sp) .............. 1
Required laboratory, designed to accompany PSY 4420. Focuses
on conducting cognitive experiments via computer simulations and
sampling data collection. Designed to increase skills in designing data
collection and interpreting experimental data.

SOC 3110 (CI) Methods of Social Research (F,Sp) .......... 3
Examines surveys, field techniques, and observational studies.
Prerequisite: Completion of 6 credits of Sociology coursework.

SOC 3500 Social Psychology (F,Sp) ............................... 3
Examines human behavior in terms of positions people occupy in the
social structure.

SOC 4330 Sociology of Religion (F) ............................... 3
Discussion of theories and research used by sociologists to understand
social dimensions of religion. Includes ways in which religion influences
and is influenced by other societal institutions, such as politics, the
economy, and the class system.

PHIL 3100 (CI) Ancient Philosophy (F) ......................... 3
Development of philosophical thought in the Ancient Greek world.
Readings from the pre-Socratics, Plato, Aristotle, the Stoics, and
Epicureans.

PHIL 3110 Medieval Philosophy (Sp) ............................ 3
Neo-Platonism with stress on Plotinus, St. Augustine, and early
Christian philosophy; early medieval thought; St. Thomas Aquinas
and the rise of scholasticism; and philosophical thought in the
Renaissance.

PHIL 3120 (CI) Early Modern Philosophy (F) ................. 3
Philosophers and philosophical disputes in Western Europe from 1400-
1750. Figures and topics may include: Bacon, Hobbes, Descartes,
Locke, Hume, nominalism, empiricism, rationalism, religion, politics,
and morals.

PHIL 3700 Philosophy of Religion (F) ......................... 3
Problems in defining “religion” and the existence of God; the problem
of evil; the immortality of the soul; religious experience; faith;
alternatives to theism; religious language.

PHIL 3710 Philosophies of East Asia (F) ......................... 3
Study of three Asian philosophies: Confucianism, Taoism, and
Buddhism. Focus on appreciating the merits of each system of thought.
Emphasis on class discussion and participation.

PHIL 3720 Philosophical Theology After Kant (F) .......... 3
Explores attempts to reconstruct the reasonable basis of religion in the
two centuries after the Enlightenment.

PHIL 3730 (CI) Philosophy of the New Testament (Sp) ......... 3
Historical and intellectual context of the development of the New
Testament, Character, ideas, and historical setting of the various
documents.

PHIL 4300 (DHA) Epistemology (F) ............................... 3
Study of foundations of knowledge and belief systems, and related
topics in epistemology, including perception, certainty, and
skepticism.

Minor in Religious Studies
The minor in Religious Studies requires 15 credits. Students must
earn a grade of C or better in all courses counted toward the minor.
Students must complete the following courses.

RELS 1010 Introduction to Religious Studies .................. 3
Historical and comparative survey of the principal beliefs and practices
of the world’s religions, as well as an exploration of their interplay
with the cultures in which they exist. Following general introduction to
the study of religion, course includes units on Hinduism, Buddhism,
Chinese and Japanese religions, Islam, Judaism, Christianity, and the
“new religions” in America.

RELS 2010 Introduction to Religious Studies Methodology ...... 3
Pre-major course helping students to understand the discipline of
religious studies. Explores the questions asked by religious studies, as
well as the methods used to answer these questions. Helps students
gain an understanding of the various approaches to the study of
religion and the history of attempts to understand religion in cultural
contexts.

In addition to the two RELS courses listed above, students must also
complete at least one upper-division course chosen from each of the
following three areas of approach: Cultural Inquiry, Scientific Inquiry,
and Doctrinal Inquiry.

Sample Four-year Plan for
Religious Studies Major

Minimum GPA for Admission: 2.5, USU; 2.0, Career
Minimum GPA for Graduation: 2.5, major courses; 2.0, USU
Minimum Grade Accepted: C in all major requirements

This is a sample plan. It outlines University and major requirements in
very general terms. While there are requirements that are sequential,
many are flexible and do not need to be completed exactly in the order
listed. Students should always check with their faculty and professional
advisors to be sure they are meeting the requirements appropriately.
To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (30-34 credits)
Fall Semester (15-17 credits)
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ........ 3
RELS 1010 Introduction to Religious Studies ..................... 3
Science or Foreign Language course(s) (BS/BA requirement) ........ 3-5
University Studies Breadth courses .................................. 6
## Religious Studies Major and Minor

### Spring Semester (15-17 credits)
- Religious Studies upper-division course ...........................................3
- Science or Foreign Language course(s) (BS/BA requirement) ........3-5
- Quantitative Literacy (QL) course ..................................................3
- University Studies Breadth course ..................................................6

Complete the CIL exams by the end of the Freshman Year.

### Sophomore Year (30-34 credits)

#### Fall Semester (15-17 credits)
- ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode .................................................................3

Undergraduate Advisor:
Harold E. Heap, Education 330B, (435) 797-2224, harold.heap@usu.edu

Degrees Offered: Second Bachelor of Science (BS), Second Bachelor of Arts (BA), Master of Science (MS), Master of Arts (MA), Master of Education (MEd), and Educational Specialist (EdS) in Secondary Education; BS and BA in Composite Teaching—Social Studies. The department participates in the Interdepartmental Doctor of Education (EdD) and Doctor of Philosophy (PhD) programs, focusing on the Curriculum and Instruction specialization.

Graduate Specializations: Educational Leadership, English as a Second Language (MEd only), English Education, Gifted and Talented, Mathematics Education, Middle Level Education, Reading Education, Social Studies Education, Science Education

Undergraduate Programs

Objectives

The Department of Secondary Education coordinates state-approved programs for secondary teacher licensure across campus. The department offers the Secondary Teacher Education Program (STEP), a sequence of courses and field experiences designed to prepare students for teaching careers in secondary schools. The STEP program is fully accredited by the Utah State Board of Education and by the National Council for Accreditation of Teacher Education. Students who successfully complete the program are recommended for secondary licensure in the State of Utah, enabling them to teach in grades 6-12.

Requirements

Departmental Entrance Requirements

In addition to meeting the admission requirements for the University, students in good standing must have a minimum entrance GPA of 2.75 and maintain that GPA in order to student teach. Students must complete all requirements of the major prior to being admitted to the full major. All students must be admitted to the teacher education program. See details below.

Admission to Teacher Education

Prior to enrolling in STEP courses, students must be admitted to the teacher education program. Criteria for admission include completion of a minimum of 60 semester credits, and (1) minimum ACT scores, (2) University Studies requirements, (3) a speech and hearing test, (4) successful completion of the Teacher Education Writing Exam, (5) recommendations from advisors in major and minor fields, and (6) submission of a criminal background check (a legislative mandate). Application forms are available from advisors; from the Office of Teacher Education, Graduation, and Educator Licensing, Room 103, Emma Eccles Jones Education Building; and from the Department of Secondary Education, Room 330, Emma Eccles Jones Education Building.

Students must submit copies of University transcripts, including transfer coursework, verifying a minimum total GPA of 2.75. Criminal Background Check materials, required by the State of Utah, must also be submitted at this time. The fee for the Criminal Background Check is payable to the Utah State Office of Education. A money order must be provided as payment. Questions about the admission requirements may be directed to the Secondary Education advisor.

Bachelor’s Degree in Social Studies Composite Teaching

Students who are accepted in good standing by the University and who have a minimum total GPA of 2.75 may be admitted to the Social Studies Composite Teaching Major. In order to graduate with the Social Studies Composite Teaching degree, students must (1) maintain a minimum 2.75 total GPA, (2) earn a grade of C or better in all courses in the major, (3) complete the Secondary Teacher Education Program (STEP), and (4) meet all requirements for the Secondary Teacher Education Program (STEP), and 4) electives. Students must complete each course in the Social Studies Composite Teaching Major with a minimum grade of C. Upon completing all requirements for graduation, students are eligible for a secondary teaching license from the Utah State Office of Education (grades 6-12). Students with the Social Studies Composite Teaching Major graduate from the Department of Secondary Education. Courses in the Social Studies Composite Teaching Major are provided by various departments. Students should check regularly with these departments and the Secondary Education advisor for changes and substitutions.

Students must complete a total of 61 credits selected from various social science courses listed below. The number of credits and course choices are listed after the area in which they must be completed.

A. History (30 credits)
The History requirement is met by completing the History Teaching Minor, plus three additional upper-division courses approved by the student’s advisor. Requirements for the History Teaching Minor can be found on pages 334-335.

B. Geography (16-19 credits)

Senior Year (30 credits)
Fall Semester (15 credits)
Recommended courses in STEP Program (see advisor) ............. 15

Spring Semester (15 credits)
Recommended courses in STEP Program (see advisor) ............. 15

Certification Semester (12 credits)
STEP Student Teaching courses ..................................................... 12

Secondary Teaching License (grades 6-12)
To obtain a teaching license, undergraduate students must complete
(1) 30 credits of University Studies requirements, including written
communications, (2) an approved composite teaching major or
approved teaching major and teaching minor (see below), and (3)
the Secondary Teacher Education Program (STEP). The Secondary
Education advisor will assist returning students who already have an
undergraduate degree with program planning for licensure. These
students occupy “Second BS” or “Second BA” status while pursuing
licensure. They also may apply for a second bachelor’s degree in
conjunction with teacher licensure. Consult the Admissions Office for
details.

All students should note that secondary teacher licensure is not
automatic upon completion of the program. In order to receive Utah
licensure, students must apply for the Basic Teaching License.
Applications are available in the Office of Teacher Education,
Graduation, and Educator Licensing, Emma Eccles Jones Education
Building, Room 103.

Special Education Dual Licensure
Students can be licensed in both special education and a secondary
subject area through a dual licensure program offered jointly by two
departments. Early in their programs, students should consult with
undergraduate advisors in Secondary Education and the Department of
Special Education and Rehabilitation.

Optional Middle Level Endorsement
(grades 6-9)
The Department of Secondary Education has joined with the
Department of Elementary Education to offer a Middle Level
Endorsement for students seeking initial teacher licensure and for
persons who already have an elementary or secondary teaching
license. Students pursuing this endorsement must take additional
coursework that specifically focuses on middle level curriculum and
instruction. To be recommended for the Middle Level Endorsement,
students must student teach (SCED 5630) in the middle grades.
Information about this program is available from the Secondary
Education Advisor and the Department of Elementary Education.

ESL Teaching Minor or Endorsement
The USU Elementary Education Department and the Secondary
Education Department jointly offer a K-12 English as a Second
Language (ESL) endorsement. Undergraduate students seeking initial
teacher licensure can obtain an ESL Teaching Minor (24 credits) and
the ESL endorsement. Students pursuing the minor must complete
the following courses: LING 4100, 4400, 4900; SCED 3300 or 4300;
SCED 4710, 4770, 5630. (Note: Secondary Education majors should
complete SCED 3210 prior to taking SCED 4710.)

Composite Majors, Teaching Majors,
and Teaching Minors
Secondary Teacher Licensure requires that students complete a
composite teaching major or a combination of a single-subject teaching
major and teaching minor. Students are strongly encouraged to meet
as soon as possible with advisors in their declared teaching major and minor. The following composite teaching majors, single-subject teaching majors, and teaching minors are approved for Utah State University.

**Composite Teaching Majors (46 credits minimum)**

**Teaching Majors (30 credits minimum)**

**Teaching Minors (16 credits minimum)**

**Secondary Teacher Education Program (STEP)**

**Three-Level Program (35 credits)**
Secondary Education coordinates a state-approved program to complement the teaching majors and minors in 21 departments. The framework is organized into three sequential levels, each taken during a different semester. Students should plan to complete the STEP Program during their junior and senior years after most or all of the major and minor coursework has been completed. All three levels of the STEP are offered during fall and spring semesters, but not during summers. Levels of the STEP are taken as a package. All courses in the STEP Program must be completed with a minimum grade of C-.

As outlined below, Level 1 and Level 2 courses are offered by the Department of Secondary Education and other cooperating departments. Teaching Methods courses are offered by many departments across campus. Students should refer to the requirement sheets of their composite teaching major, or their teaching major and minor, to determine which methods courses they are required to complete on Levels 1 and 2 to prepare for student teaching at Level 3. Student teaching in a composite teaching major, or in at least one teaching major and one teaching minor, is required.

**A. Level 1 (15-week courses)**
- INST 3500 Technology Tools for Secondary Teachers (F,Sp,Su)...........1
- SCED 3100 Motivation and Classroom Management (F,Sp).............3
- SCED 3210 (CI/DSS) Educational and Multicultural Foundations (F,Sp)..................................................3
- SCED 3300 Clinical Experience I (30 hours minimum in field)...........1

**B. Level 2 (15-week courses)**
- SPED 4000 Education of Exceptional Individuals (F,Sp,Su) (may be taken anytime)..................................................2
- SCED 4200 (CI) Reading, Writing, and Technology (F,Sp).............3
- SCED 4210 Cognition and Evaluation of Student Learning (F,Sp)........3
- SCED 4300 Clinical Experience II (30 hours minimum in field).........1

**C. Level 3 (includes 13 weeks of student teaching and 10 weeks of Student Teaching Seminar)**
- Student Teaching Seminar (10 weeks)........................................2
- Student Teaching (13 weeks, full-time).........................................10

---

1. The Special Methods I course is taught by various departments under various course numbers. Course title varies among departments.
2. The Special Methods II course is taught by various departments under various course numbers. Course title varies among departments.
3. The Student Teaching Seminar course is taught under course number 5500 in various departments. Course title varies among departments.
4. The Student Teaching course is taught under course number 5630 in various departments. Course title varies among departments.

**Clinical Experience**
Students must enroll for either Clinical Experience I or Clinical Experience II concurrent with their methods courses. Methods instructors, in concert with the Office of Field Experiences, set up and monitor these field activities in middle and high school settings. The clinical experiences provide a classroom context for understanding STEP and methods courses. A clinical experience fee of $50 is assessed at each of the two levels. This fee provides a stipend to classroom teachers who work with clinical experience students in the public schools. Students should refer to the requirement sheet for their composite teaching major or their teaching minor to determine which methods courses they should take.

**Student Teaching**
Students must attend the Student Teaching Enrollment Meeting (STEM) one year in advance of their student teaching semester. Applications for student teaching and each semester’s deadlines will be discussed at the STEM. Information concerning the Praxis II and the content minor test, which must be taken before student teaching, will also be discussed. Students must complete 80 percent of their teaching major/minor (or composite major) requirements prior to student teaching.

Students should be financially prepared to stay off campus, if necessary, during the 13-week block of student teaching. Because student teaching requires a major commitment of time and energy, it should be planned with care. Students are urged to forego outside employment, if possible, during the student teaching experience.

Only the courses approved for the semester may be taken during student teaching.

**Assessment**
The Department of Secondary Education is committed to principles and practices of continual assessment of its programs and its students. Information about current assessment tools that are being used by the department can be found at:
http://secondaryeducation.usu.edu/a_home.php

**Departmental Honors**
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work. Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation.
in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information

For detailed information about requirements for teaching majors and minors, students should see the major requirement sheet(s) for the subject area(s) in which they plan to seek licensure or receive a teaching minor. These requirement sheets can be found online at: http://www.usu.edu/majorsheets/

Graduate Programs

Admission Requirements

The Department of Secondary Education assists in the preparation of graduate students seeking the MEd, MA, and MS degrees, as well as the EdD and PhD degrees. Students desiring information concerning the various graduate programs should contact the department head. The application for admission to a graduate program is made through the School of Graduate Studies. See Graduate Admission Procedures (pages 101-102).

Students applying to a master’s degree program may take either the Miller Analogy Test (MAT) or the Graduate Record Exam (GRE). Students applying to a doctoral program should take the GRE. Scores at the 40th percentile or above are required for admission. In addition, students must have at least one year of teaching experience (or comparable professional experience) and a valid secondary teaching license.

All students applying to the doctoral degree program (Curriculum and Instruction specialization) participate in oral interviews with the Curriculum and Instruction Management Committee. A sample of academic writing should be included as part of the doctoral-level admission folder.

Master’s applications are considered on a rolling basis. Students applying for doctoral programs should consult the director of the Interdepartmental Doctoral Program for information about application deadlines. Application folders will be not be considered until all required information is received by the School of Graduate Studies and sent to the department.

Master’s Degree Programs

Secondary Education master’s degree programs provide coursework and professional experiences for those preparing to become master teachers, teacher-leaders, supervisors, or curriculum specialists. Each program provides coursework in education, with associated work in a specialized subject matter, which is the teacher’s area of concentration. Typically, the area of concentration derives from the teacher’s ongoing work with middle school or high school students.

Areas of specialization in Secondary Education include the following: Educational Leadership, English as a Second Language (MEd only), English Education, Gifted and Talented, Mathematics Education, Middle Level Education, Reading Education, Social Studies Education, and Science Education. Two university departments—Art and Management Information Systems—also participate in master’s degree programs sponsored by Secondary Education. Admission to these fields of study requires approval of the cooperating department. In planning areas of specialization, students work with a faculty advisor and select graduate courses from the University-wide curriculum.

MEd Degree Plan B (36 credits)
The MEd Plan B offers a Portfolio Project Option or Creative Project Option which culminates in the presentation of the project in a final exam setting. Students take a common core of courses from college and department curricula, then courses in areas of concentration in relation to their teaching specialties. The research course for the MEd focuses on issues of application as well as action research. Creative projects are diverse and range from action research to curriculum development. The professional portfolio project provides the context for a personal knowledge base. Although portfolios share certain structural features, each student’s portfolio is unique.

MEd Degree Plan C (40 credits)
The MEd Plan C is a coursework-only program. Students take a common core of courses from college and department curricula, then courses in areas of concentration in relation to their teaching specialties; additional coursework is taken in the area of concentration. At the conclusion of the program, a culminating experience to meet the needs of the student is developed. Options for the experience can be an interview with the advisor, oral comprehensive examination under the supervision of the advisor, written comprehensive examination under the supervision of the advisor, or other culminating experience developed by the student and advisor and approved by the department head.

MS and MA Degrees Plan A (30 credits)
The MS/MA option culminates in a formal defense of a thesis. This option is for teachers whose long-term goals require a traditional, research-oriented degree. The MS thesis involves either an experimental or qualitative research study. The MA thesis involves development of a scholarly literature review. The MA degree also requires foreign language competency.

Educational Specialist Degree (EdS)
The EdS is a 36-42 credit post-masters degree designed to enable experienced educators to specialize and improve their professional competence in specific areas or fields. The EdS degree meets the advanced study needs of persons seeking leadership roles in public education, junior colleges, and small private and state colleges. The coursework requirements extend competencies for individuals serving in such positions as program developers, trainers, curriculum specialists, supervisors, instructional leaders, and college instructors. The EdS is also related to certification needs of some educational leaders. Areas of emphasis in the Department of Secondary Education are: Instructional Leadership; Supervision and Leadership; Schooling, Culture, and Society; Engineering and Technology Education; Teaching and Learning in Higher Education; and Reading and Writing. The EdS is especially appropriate for those individuals who wish preparation beyond the master’s degree level, but who are not interested in doctoral work with its greater emphasis on developing proficiencies in conducting independent research.
Department of Secondary Education

Doctoral Degree Programs

For students who have already completed a master's degree, Secondary Education participates in the interdepartmental doctoral program coordinated by the dean of the College of Education and Human Services. Both PhD and EdD degrees are offered in the Curriculum and Instruction specialization. For an overview of the program, including program requirements and admission procedures, see pages 251-252 of this catalog. As with any degree program, students interested in doctoral study are encouraged to contact the department head of Secondary Education.

Financial Assistance

Departmental support or grant support is available to doctoral-level and master’s level students pursuing full-time study on campus. Such financial support typically is through assistantships, which carry half-time teaching, research, or supervisory obligations. Typical assistantships carry forward up to four years. Awards are made on a competitive basis. Students who wish to be considered for financial aid should apply to the department no later than February 1 for the following academic year. Acceptance to graduate study does not guarantee financial assistance.

Secondary Education Faculty

Professor
Barry M. Franklin, curriculum policy, theory, and history

Professors Emeritus
Ross R. Allen, mathematics education, comparative education
Eldon M. Drake, journalism, general student teaching
Izar A. Martinez, administration, research methods, measurement/evaluation
Walter L. Saunders, science specialist
James P. Shaver, social studies, former School of Graduate Studies Dean
William J. Strong, content area reading, Utah Writing Project Director

Associate Professors
Kay Camperell, content area reading/writing, learning theory, literacy education
Janice L. Hall, qualitative research, professional development, supervisor of student teaching
Grace C. Huerta, educational foundations, multicultural education, ESL/Bilingual

Associate Professor Emeritus
Varnell A. Bench, extension, administration, supervision

Assistant Professors
George G. Hruby, literacy/reading
Sherry Marx, ESL/bilingual/multicultural
L. Ruth Struyk, classroom assessment, classroom management, measurement, instructional supervision, program evaluation

Continuing Education Assistant Professors
Todd Campbell, science
Peggie Lee Clelland, literacy, reading
Laurie Culbreth, English education
Steven Laing, educational leadership

Lecturer
Barbara Cangelosi, classroom management

Adjunct Clinical Instructor
Loo Leong Guan Eddie, instructional technology

Undergraduate Advisor
Harold E. Heap, classroom management, adolescent development

Academic Service-Learning Program and Certificate

Coordinator: Robert H. Schmidt
Location: Taggart Student Center 326
Phone: (435) 797-7947
FAX: (435) 797-2919
E-mail: servelearn@cc.usu.edu

Staff Assistant: To be appointed, Taggart Student Center 326, (435) 797-2912, servelearn@cc.usu.edu

Program Description

Utah State University has implemented an Academic Service-Learning Program that leads to a Certificate in Service-Learning. This program provides a much-needed and desired academic component complementing the extensive public service efforts of many USU students. It supports broader state and national movements promoting more civic engagement among college and university students. It also supports USU’s undergraduate educational mission, which is to prepare citizen scholars “...who participate and lead in local, regional, national, and global communities.”

Service-Learning is a well-researched and highly effective teaching pedagogy, which incorporates community service into the course curriculum. Academic Service-Learning is a credit-bearing educational experience where students: (1) gain a broader understanding of course content, (2) earn a deeper appreciation of the discipline, (3) help meet community needs, (4) reflect on service activities, and (5) develop an enhanced sense of civic responsibility. Many opportunities for service-learning are available for USU students. Course sections listed in the Schedule of Classes with the SL designation have been approved by the Service-Learning Steering Committee to meet the criteria listed above. For a current list of SL-designated courses, contact the Service-Learning Coordinator.

The program is housed organizationally within the Office of the Provost. The program’s faculty and staff work very closely with the ASUSU Service Vice President, the Val R. Christensen Service Center program directors, the Student Involvement and Leadership Center, and the Vice President for Student Services. The Service-Learning Coordinator is assisted by a steering committee consisting of faculty, students, and staff.

Certificate

Service-Learning Scholars are awarded a Service-Learning Certificate, which is recorded on a student’s official transcript, enabling employers and graduate programs to see evidence of a student’s determination to go the extra mile. As Service-Learning Scholars, students will also be recognized at graduation with a banquet in their honor, cords to wear during commencement, and their names in the graduation program.

Admission Requirements

Service-Learning Scholars at USU are an elite group of students dedicated to making a difference in their community. Each year, 25 students will be admitted to the program. Admission to the program is competitive and is limited to a maximum of 100 students at any one time. In order to gain admittance to the program, students must submit an application, have a 3.0 or higher grade point average, and submit a written essay detailing their interest in Service-Learning and their dedication to community engagement.

Certificate Requirements

To receive a Service-Learning Certificate, a student must:

1. Apply for and be accepted to the Service-Learning Scholars Program.
2. Earn a minimum of 9 SL designated credits (with a grade of B or better in each course).
3. Perform a minimum of 400 service hours.
4. Develop and complete an approved capstone project.
5. Maintain and present a reflective portfolio.

The 9 credits must come from an approved list of Service-Learning courses. Course adaptations will be considered by the Service-Learning Coordinator (for example, an instructor may work with one student in a non-SL course to complete the SL requirement). For answers to any questions, as well as an up-to-date list of approved SL courses and program applications, students should contact the Service-Learning Coordinator.
Interdepartmental Program in Social Sciences

Degree Coordinator:
Gary Kiger, Dean of College of Humanities, Arts, and Social Sciences
Location: Main 338
Phone: (435) 797-1195

Degree offered: Master of Social Sciences (MSS)

Primary Disciplines: History, Political Science, and Sociology
Secondary Disciplines: Anthropology; Business Administration; Instructional Technology; Environment and Society; Family, Consumer, and Human Development; History; Political Science; Psychology; Social Work; and Sociology

Graduate Program

Administration

The program is administered by a committee of the department heads (Management Committee) from the three primary disciplines or their designees. The committee is chaired by annual rotation by one of the members of the committee, and reports to the Degree Coordinator. The Management Committee reviews policy and develops recommendations which are submitted to the Degree Coordinator for approval.

Degree Description

The social sciences are disciplines that have as a common objective the understanding of human behavior and social relationships. The MSS offers multidisciplinary graduate training for candidates desiring in-depth applied understanding of human performance, human environments, and/or the structuring of social, political, and economic systems. Students in History and Sociology typically follow the Plan B option, which requires a minimum of 30 credits. A minimum of 15 credits are required in a primary discipline, plus a minimum of 15 credits from one of the following two tracks: Track A: a minimum of 15 credits from two approved primary disciplines, with at least two courses in each secondary discipline. Track B: a minimum of 15 credits from an approved secondary discipline and a cluster, with at least two courses in the secondary discipline and two courses in the cluster. Courses counted in a cluster must be outside the selected primary discipline and secondary discipline. Three of the 30 credits required for the Plan B option must be thesis credits, but no more than 3 credits of thesis can be counted toward a degree. Departments may impose more rigorous requirements. A maximum of 3 credits may be earned either from readings/conferences or from independent research.

The MSS degree is primarily intended to prepare degree recipients for employment or advancement in social science-related occupations. Students interested in pursuing doctoral work should consider a Plan A Master of Science program.

Admission Requirements

See general admission requirements, pages 101-102. In addition, the faculty of each discipline determines whether to recommend to the graduate dean the acceptance of applicants. For further information, contact the Graduate Coordinator in the department of the proposed primary discipline.

Degree Requirements

Student Supervision

For each student admitted, a supervisory committee is ordinarily appointed consisting of at least one faculty representative from the student’s primary discipline and (a) one from each of the secondary disciplines, or (b) one from a secondary discipline and one from a discipline associated with the cluster. Policies governing student supervision may vary from specialization to specialization.

Plan B Research Paper

Each Plan B student must submit a research paper for thesis credit in accordance with School of Graduate Studies and departmental requirements. Ordinarily, the Plan B paper is written in the primary discipline, but in some cases, with the approval of the student’s supervisory committee, it may be written in one of the secondary disciplines. Information specific to each primary discipline may be obtained by contacting the sponsoring department.

Further Information

Candidates interested in pursuing this degree program may obtain specific information by contacting the head of one of the participating departments, the School of Graduate Studies, or the dean of Humanities, Arts, and Social Sciences.
Department of Sociology, Social Work and Anthropology

Department Head: Richard S. Kranich
Location: Main 224
Phone: (435) 797-1230
FAX: (435) 797-1240
E-mail: ann.johns@usu.edu

Sociology Graduate Program Director:
Douglas B. Jackson-Smith, Main 216H, (435) 797-0582, douglasj@hass.usu.edu

Degrees offered: Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), Master of Arts (MA), and Doctor of Philosophy (PhD) in Sociology; participates in Master of Social Sciences (MSS); BS and BA in Social Work; BS and BA in Anthropology

Graduate Specializations: PhD—Demography, Environmental Sociology/Sociology of Natural Resources, Social Problems and Inequality, and Social Change and Development

Undergraduate Programs

Objectives
The department offers educational programs for students to prepare for positions in business, social welfare, teaching, research, personnel, government service, social services, law enforcement, and industry, as well as providing liberal and general education for all interested students. The department offers a wide range of courses for the study of social, cultural, and behavioral dynamics. The department also provides University Studies, Liberal Arts, and other service courses for students from all majors.

Requirements

Departmental Admission Requirements
New freshmen admitted to USU in good standing qualify for admission to the sociology and anthropology majors, as well as to the pre-social work major. Undeclared and transfer students from other USU majors or other institutions must have a minimum 2.5 overall GPA.

For admission to the sociology major, students must additionally have earned a grade of C or better in SOC 1010 (effective Fall Semester 2005). For admission to the social work major, transfer students must have earned a minimum 2.75 GPA in all social work classes. Applicants to the social work major must have completed the basic social work core curriculum, must have a minimum 2.5 overall GPA and a minimum 2.75 GPA in social work classes, must have completed SW 1010 with a grade of C+ or better, and must have completed an application form (available from the department).

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information
Major requirement sheets, which provide detailed information about requirements for majors and minors within the Sociology, Social Work and Anthropology Department, can be obtained from the department, or accessed online at: http://www.usu.edu/majorsheets/

Sociology

Undergraduate Program Director: Peggy Petrzelka
Program Office: Main 224, (435) 797-1230

The study of the human individual and human groups is central to sociology. Sociology offers a broad foundation for understanding human behavior on an individual and group basis, and encourages the development of skills necessary for establishing favorable societal conditions for human development.

Students learn to systematically describe and explain group behavior, including the effects of one group on another and of groups upon individual behavior. Required sociology classes deal with how people in different societies organize and control their societies; critical issues, such as race, class, and gender, as they have developed through history; and research and statistical methods for analyzing sociological data.

Upon completion of the prescribed program for a major in sociology, the student should be able to:

1. Demonstrate knowledge essential for understanding society from a sociological perspective;
2. Identify and critically evaluate the contributions of sociologists, social scientists, and scholars;
3. Identify and critically evaluate the forces and institutions that influence his or her life as a member of society;
4. Identify, comprehend, and critically evaluate the influences of race, class, gender, age, and disability on a member of society;
5. Pursue careers in sociological areas, business, government, and/or graduate study; and

6. Apply the methods and concepts of sociology to the analysis of social issues, problems, and conflicts in preparation for participation as agents of creative social change.

Students select courses from three different areas. Social Problems classes focus on crimino/law and deviance, retirement and other aspects of aging, the causes and prevention of juvenile delinquency, and the cultural characteristics of various social groups. Groups and Institutions courses look at collective behavior, the organization of communities, and the development of gender roles, as well as economic systems, educational systems, and social inequality. Population and Environment and Development courses deal with the effects of the environment and human behavior and the consequences of different patterns of population growth and settlement. A Law and Society Area Studies Certificate is available. A teaching minor in sociology is available for students wishing to teach in secondary schools.

Surveys of graduates indicate that sociology majors pursue a wide range of occupations. About one-third are employed in the professional sector, while close to one-fourth are in service occupations. In addition, 26 percent are involved in sales or management/administration. In terms of specific job titles, social service is a popular option, as are retail sales and teaching. Other frequent job titles include: vocational rehabilitation counselor, research analyst, data coordinator, management analyst, district sales manager, parole officer, juvenile probation officer, social services director, civil service test examiner, personnel director, insurance salesman, and correctional service officer. A variety of government and business positions are also expanding for sociology majors with the new emphasis on a liberal arts education. The growing awareness of the value of sociological perspectives for problem-solving continues to provide an increasing range of opportunities for employment in a variety of work settings.

### Departmental Graduation Requirements

Sociology majors must meet the following course requirements:

1. Complete the general requirements of the University. Majors are expected to take STAT 1040 (QL) Introduction to Statistics to fulfill the quantitative literacy requirement for University Studies.

2. Complete a minimum of 33 credits of sociology coursework. At least fifty percent of the sociology coursework must be completed in the USU Sociology program. Sociology majors must maintain a minimum GPA of 2.5 in sociology courses and earn a grade of C or better in SOC 1010 (BSS) Introductory Sociology (effective Fall Semester 2005) and a C- or better in all other courses to be counted toward the major.

3. A minor outside the program is encouraged but not required.

4. Complete the following required courses (15 credits):

   - **SOC 1010 (BSS) Introductory Sociology (F,Sp)** ........................................... 3
   - **SOC 3100 Race, Class, and Gender (F)** .................................................. 3
   - **SOC 3120 Social Statistics I (F,Sp)** ................................................ 3
   - **SOC 4010 Contemporary Sociological Theory (F)** ................................ 3

5. Choose a minimum of 18 credits from the following sociology elective courses. At least 3 credits must come from each of the three specialty areas listed below.

### Sample Four-year Plan for Sociology Major

#### Minimum GPA for Admission: 2.5, Overall; 2.5, USU

#### Additional Matriculation Requirement: Complete SOC 1010 with grade of C or better

#### Minimum GPA for Graduation: 2.5, major; 2.0, USU; 2.0, Overall

#### Minimum Grade Accepted: C in SOC 1010; C- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

#### Freshman Year (30 credits)

**Fall Semester (15 credits)**

- **SOC 1010 (BSS) Introductory Sociology** ........................................... 3
- **ENGL 1010 (CL1) Introduction to Writing: Academic Prose** .................. 3
- University Studies Breadth courses .................................................. 6
- Elective course(s) ............................................................................. 3

**Spring Semester (15 credits)**

- **SOC 3100 Race, Class, and Gender** ................................................. 3
- **STAT 1040 (QL) Introduction to Statistics** ....................................... 3
- Sociology elective course (chosen from Social Problems group) .......... 3
- University Studies Breadth courses .................................................. 6

Complete the CIL exams by the end of the Freshman Year.
Department of Sociology, Social Work and Anthropology

Sophomore Year (30 credits)
Fall Semester (15 credits)
SOC 3110 (CI) Methods of Social Research........................................3
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode .................................................3
Sociology elective course (chosen from Groups and Institutions group)........................3
University Studies Breadth course ......................................................3
Elective course(s)..............................................................................3

Spring Semester (15 credits)
SOC 3120 (QI) Social Statistics I ..........................................................3
Sociology upper-division course (chosen from Population, Environment, and Development group).........................3
Elective courses ..............................................................................9

Junior Year (30 credits)
Fall Semester (15 credits)
SOC 4010 Contemporary Sociological Theory.................................3
Sociology upper-division course ........................................................3
Depth Humanities and Creative Arts (DHA) course .........................3
Upper-division elective courses .........................................................6

Spring Semester (15 credits)
Sociology upper-division courses ......................................................6
Depth Life and Physical Sciences (DSC) course.................................3
Upper-division elective course(s) .......................................................4
Elective course(s) ............................................................................2

Senior Year (30 credits)
Fall Semester (15 credits)
Communications Intensive (CI) course ..............................................3
Elective courses ...............................................................................12

Spring Semester (15 credits)
Elective courses ...............................................................................15

Sociology and Social Work Dual Major
Sociology majors desiring additional preparation for employment in the social services may complete a dual major in sociology and social work. With the help of advisors, students who will seek positions in other special areas could include appropriately related courses.

Minor
Students minoring in sociology must complete a minimum of 12 credits in sociology courses. Sociology minors must maintain a minimum GPA of 2.5 in sociology courses. They must also earn a grade of C- or better in SOC 1010 (BSS) Introductory Sociology (effective Fall Semester 2005), and a grade of C- or better in all other courses to be counted toward the minor.

SOC 1010 (BSS) Introductory Sociology (F,Sp).................................3
SOC 1020 Social Problems (F,Sp)....................................................3
Additional credits with a SOC prefix..................................................6

Sociology Student Organization
Alpha Kappa Delta (AKD), the sociology honor society, provides sociology undergraduates with a sense of community and an opportunity to build strong friendships outside of the classroom. Students are encouraged to become involved with AKD. For further information, contact Peggy Petzelka, peggyp@hass.usu.edu.

Teaching License
Sociology is defined as an approved teaching major in Utah secondary schools by the State Board of Education. The sociology major must complete a minor in a subject that is required in Utah high schools. In addition to completing the courses required for the sociology major, the sociology teaching major must also complete the required teaching licensure courses in education. Students can also elect sociology as an approved teaching minor.

Law and Society Area Studies Certificate
The Department of Sociology, Social Work and Anthropology sponsors an interdisciplinary program emphasizing the study of the relationship between law and society. Students must complete a minimum of 24 credits, chosen from a selected list of courses, in at least three disciplines. A minimum 3.0 GPA must be maintained in these courses.

The selected courses are:
FCHD 3100 Abuse and Neglect in Family Context (F,Sp) (prereq: Sophomore standing, FCHD 1500, 2400) (3 cr) or
PSY 3120 Abuse, Neglect, and the Psychological Dimensions of Intimate Violence (F,Sp) (prereq: PSY 1100) (3 cr).................3
JCOM 4030 Mass Media Law (F,Sp)..................................................3
MHR 2050 Legal and Ethical Environment of Business (F,Sp,Su)....3
MHR 3810 Employment Law and Policy Development (F,Sp)........3
MHR 5640 Selected Topics: International Business Law (F)........3
PHIL 1120 (BHU) Social Ethics (F) ..................................................3
PHIL 4600 Philosophy of Law (F).....................................................3
PHIL 4610 (DHA) Social and Political Philosophy (Sp)................3
PHIL 5600 Legal Ethics (F) (prereq: PHIL 4600)...........................3
POLS 3120 Law and Politics (F) ......................................................3
POLS 3130 United States Legislative Politics (Sp)..........................3
POLS 3170 Law and Economics (F)...............................................3
POLS 3320 The Foundations of American Constitutionalism ....3
POLS 3810 Introduction to Public Policy (F).................................3
POLS 4120 American Constitutional Law (F).................................3
POLS 4130 Constitutional Theory (Sp)...........................................3
POLS 4810 Politics and Public Policy (F) ........................................3
POLS 5130 Law and Policy (Sp).......................................................3
SOC 1020 Social Problems (F,Sp)....................................................3
SOC 3410 Juvenile Delinquency (F,Sp)............................................3
SOC 3420 Criminology (F,Sp).........................................................3
SOC 3430 Social Deviance (F)........................................................3
SOC 4420 (CI) Criminal Law and Justice (Sp)...............................3
SPED 5070 Policies and Procedures in Special Education (F)........1-3
SW 5350 (CI) Social Welfare Policy (F)...........................................3

Only 12 credits may be selected from a single discipline. The Law and Society Area Studies certificate is pursued in conjunction with a major. Credits may be applied to the major, as well as to the area studies requirements. A student’s transcript will reflect the Law and Society Area Studies certificate upon completion of requirements for a degree.

For further information, contact Dr. Kelly Hardwick, (435) 797-8402, in the Department of Sociology, Social Work and Anthropology.

Gerontology Program
The Department of Sociology, Social Work and Anthropology is one of several departments sponsoring an interdisciplinary gerontology program, which prepares students for careers in the field of aging. Students may earn a certificate in gerontology by completing a selected list of course requirements, including supervised field practicum in a gerontological setting.

More information concerning the gerontology certification program may be obtained from the Department of Family, Consumer, and Human Development.
American Studies Major
The Department of Sociology, Social Work and Anthropology is one of several departments offering an area of concentration for the American Studies program. Students who wish to focus their work in American culture should refer to the American Studies program description (pages 285-287).

Social Work
Program Director: Terry L. Peak
Program Office:
Main 239, (435) 797-1286; or Main 224, (435) 797-1230

Utah State University’s Social Work Program offers a baccalaureate degree in social work. The program is accredited by the Council on Social Work Education (CSWE) and meets requirements established by the State of Utah for licensure of social service workers.

The Social Work Program provides a learning environment for those who seek to acquire the knowledge and skills needed to bring about meaningful social change in individuals, groups, communities, organizations, and society. The program provides grounding in the fundamental generalist skills, knowledge, and values of social work, such as critical thinking, clarification of personal values, awareness of diversity, professional use of self, and communication and interpersonal relationship skills.

Social Work at Utah State University recognizes the historic importance of social welfare in balancing the country’s economic and social structure. The program is committed to the resolution of contemporary human social problems, such as poverty, racism, discrimination, and economic injustice.

Program Goals
There are two fundamental goals that guide the Social Work Program:

1. To prepare students for employment as generalist social workers through education in a professional foundation curriculum and selected liberal arts education coursework.
2. To prepare students for advanced education.

The program is based on a generalist conception of social work and a problem-solving, empowerment, and strengths model of practice. The social work sequence stresses problem solving at the interface of person and environment, which requires that students develop a repertoire of generalist practice skills. The program is committed to building a student’s education on a solid base that includes a liberal arts perspective vital to the development of a social worker.

The program endeavors to prepare students for advanced standing in graduate professional programs and to provide a solid academic base for continuing education. To accomplish this, the program facilitates the development of the profession’s knowledge, values, and skills; provides a well-rounded liberal arts educational foundation; and teaches good study habits, written and oral communication skills, and the ability to think critically.

The program also endeavors to maintain a campus environment that will foster a sense of community and social responsibility. To accomplish this, the program provides opportunities for service learning, social development, and educational research forums through the state-affiliated National Association of Social Workers student organization and the Social Work Phi Alpha Honor Society.

Code of Conduct
During academic and field training, students are required to abide by the Code of Ethics and standards of conduct specified by the National Association of Social Workers (NASW) and the Utah State Board of Social Work Examiners. Failure to do so may result in dismissal from the Social Work Program. A more complete discussion of Social Work Program policies can be accessed at:
http://www.usu.edu/sswa/sw.htm

Licensure
In the State of Utah, graduates with a bachelor’s degree in Social Work are eligible to be licensed as social service workers upon graduation. Students may obtain further information on licensure from:
Department of Commerce
Division of Occupational and Professional Licensing
160 East 300 South
PO Box 146741
Salt Lake City UT 84114-6741
(801) 530-6628
http://www.dopl.utah.gov

Social Work Major
Liberal Arts Foundation
All students pursuing an undergraduate degree at Utah State University must meet requirements designed to assure a broad, liberal arts foundation. Cross-cultural and cross-disciplinary perspectives are vital to a student’s development as a social worker. The University Studies program, which is described in detail in this catalog (see pages 49-59), is required of all majors. Majors are expected to take STAT 1040 (QL), Introduction to Statistics, to fulfill the quantitative literacy requirement for University Studies. In addition to fulfilling University Studies requirements, majors will need to complete specific liberal arts courses, listed in the Social Work Program requirements, some of which fulfill both University Studies and Social Work Program requirements. Social Work majors must complete STAT 1040 (Introduction to Statistics) and SOC 3120 (Social Statistics I) to graduate.

Program Admission Requirements
The following regulations apply for admission to the Social Work Program: (1) New freshmen admitted to USU in good standing qualify for admission to the Social Work Major. (2) Transfer students from other institutions must obtain a minimum overall GPA of 2.5 and a minimum overall GPA of 2.75 in social work classes. (Refer to the USU Social Work Program Transfer of Credit Policy.) (3) Students transferring from other USU majors must complete the Social Work Major course of study and must obtain a minimum overall GPA of 2.5 and a minimum overall GPA of 2.75 in social work classes. (4) Students must apply for and meet criteria for advanced standing, in order to continue on in upper-division social work practice courses and field practicum courses. (5) Students are responsible for reviewing and knowing the requirements for the Social Work degree. (6) All courses required for the Social Work degree must be taken for a letter grade. (7) The Social Work Program does not grant social work course credit for life experience or work experience.
Department of Sociology, Social Work and Anthropology

Social Work Major
Students may declare Social Work as their major at any time. All course offerings in social work are open to all Social Work majors, with the exception of the practice courses (SW 3050 Practice I, SW 4150 Practice II, and SW 4160 Practice III) and the field practicum courses (SW 4870 Beginning Field Practicum and SW 5870 Advanced Field Practicum), which require admission to advanced standing. Social work students are expected to take courses in sequence, in order to have the professional foundation knowledge required for each class. Maintenance of a high grade point average is important as students progress through the major and continue on to graduate school. Requirements for the Social Work major are as follows:

First year:
SW 1010 Introduction to Social Welfare (F,Sp,Su) ..........................................................3
ANTH 1010 Cultural Anthropology (F,Sp,Su) ..........................................................3
BIOL 1010 (BLS) Biology and the Citizen (F,Sp,Su) ..................................................3
ENGL 1010 (CL1) Introduction to Writing: Academic Prose (F,Sp,Su) ..........................3
FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) .........................3
PSY 1010 (BSS) General Psychology (F,Sp,Su) ..........................................................3
SOC 1010 (BSS) Introductory Sociology (F,Sp) ..........................................................3
STAT 1040 (QL) Introduction to Statistics (F,Sp,Su) ..................................................3

2Students must take SW 1010 before taking SW 2100 and 2400.
3Students must complete STAT 1040 as a prerequisite to SOC 3120 and to fulfill Social Work major requirements.

Second year:
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode (F,Sp,Su) ..........................................................3
SW 2100 Human Behavior in the Social Environment (Sp) ........................................3
SW 2400 Social Work with Diverse Populations (Sp) .................................................3
One elective enrichment course ..................................................................................3
Students should apply for advanced standing during their second year.

4Since SW 2100 and 2400 are only offered during spring semester each year, students should plan accordingly.

Third year:
SW 3050 Practice I (F) .........................................................................................3
SW 4100 Social Work Research (F) ........................................................................3
SW 4150 Practice II (Sp) .........................................................................................3
SW 4160 Practice III (Sp) .........................................................................................3
SOC 3120 (QI) Social Statistics I (F,Sp) ..................................................................3
Two elective enrichment courses ............................................................................6
Students should apply for the practicum during their third year.

5Prior to taking SW 3050, students must apply for advanced standing, to qualify to enroll in practice courses.
6STAT 1040 (Introduction to Statistics), plus 6 credits in Social Work and/or Sociology courses, are prerequisites for this course. STAT 1040 and SOC 3120 must be completed in order to graduate with a social work degree.

Required Elective Enrichment Courses
Nine credits of electives are to be chosen during the second and third years, prior to the practicum year. At least two electives are to be taken in Social Work, and one upper-division elective can be taken outside of Social Work.

SW 3350 Child Welfare .........................................................................................3
SW 3360 Adolescents: Theories, Problems, and Issues ...........................................3
SW 3450 School Social Work ................................................................................3
SW 3550 Social Gerontology ..................................................................................3
SW 3650 Mental Health .........................................................................................3
SW 3750 Medical Social Services ........................................................................3
SW 3850 Spirituality and Social Work ................................................................3
SW 3950 Occupational and Environmental Health (offered infrequently; check with department) ..........................................................3
SW 4900 Topical Issue Seminar ............................................................................3

Optional Elective
SW 4950 Directed Readings (F,Sp) .................................................................1-5

Fourth year:
SW 4870 Beginning Field Practicum (F) ...............................................................6
SW 5350 (CL) Social Welfare Policy (F) .................................................................3
SW 5870 Advanced Field Practicum (Sp) ...............................................................6

7SW 4950 requires a plan of study, approved by a social work faculty member, at least one semester prior to registration. This course is not considered to be a required elective.
8Prior to enrolling in Beginning Field Practicum, students must apply for admission to the Field Practicum and must have advanced standing status.

Sample Four-year Plan for Social Work Major

Minimum GPA for Admission: 2.75, major; 2.5, USU; 2.5, Career
Additional Matriculation Requirements: Students must apply for Advanced Standing in the Social Work major. Application requirements include: satisfactory grades in all prerequisite Social Work courses and specific University Studies courses, an essay, and a satisfactory grade (70 percent or better) on the Advanced Placement Test (APT). After the junior year, the practicum requires a satisfactory grade (70 percent or better) on the Generalist Practice Test (GPT).

Minimum GPA for Graduation: 2.75, major; 2.5, USU; 2.5, Career
Minimum Grade Accepted: C+ in SW 1010; B- in SW 3050, 4150, and 4160; C in remaining major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

Freshman Year (30 credits)
Fall Semester (15 credits)
SW 1010 Introduction to Social Welfare .................................................................3
SOC 1010 (BSS) Introductory Sociology .................................................................3
ANTH 1010 (BSS) Cultural Anthropology ............................................................3
BIOL 1010 (BLS) Biology and the Citizen ..............................................................3

Elective course(s) .........................................................................................3

Spring Semester (15 credits)
FCHD 1500 (BSS) Human Development Across the Lifespan .............................3

Elective courses ........................................................................ 6

Spring Semester (15 credits)
SW 5870 Advanced Field Practicum ............................................. 6
Elective courses ........................................................................ 9

Procedures for Advanced Standing in the Social Work Major
In order to be considered for advanced standing, students must turn in a completed application form by March 1 of the academic year. Applications for admission can be obtained in the Social Work Office, Main 239. At the end of spring semester, when the criteria for advanced standing have been met, eligible students will be ranked according to their grade point average, personal statement, performance on the advanced placement test, and faculty evaluation. The highest ranking students will receive advanced standing, which will allow them to enroll in upper-division practice courses. Only those students who have completed first- and second-year requirements by the end of spring semester of the application year will be considered for advanced standing. The primary reasons for this evaluation are: (1) to maintain a high-quality educational experience for students in upper-division practice courses; and (2) to maintain the status of full accreditation by the Council on Social Work Education. Students will receive notification of acceptance in June of the application year. Those students who do not receive advanced standing, and are therefore not allowed to enroll in upper-division practice courses, may retake courses to improve their GPA and reapply for advanced standing during the following year.

To be considered for advanced standing, students must meet the following minimum criteria:

1. Completion of the following courses with a C or better:
   ANTH 1010 (BSS) Cultural Anthropology (F,Sp,Su) ..................... 3
   BIOL 1010 (BLS) Biology and the Citizen (F,Sp,Su) ....................... 3
   ENGL 1010 (CL1) Introduction to Writing: Academic Prose (F,Sp,Su) .......................................................... 3
   ENGL 1010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode (F,Sp,Su) ................................. 3
   FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) .......................................................... 3
   PSY 1010 (BSS) General Psychology (F,Sp,Su) ............................ 3
   SOC 1010 (BSS) Introductory Sociology (F,Sp) ............................ 3
   SW 2100 Human Behavior in the Social Environment (Sp) .......... 3
   SW 2400 Social Work with Diverse Populations (Sp) ................. 3

2. Completion of SW 1010 (Introduction to Social Welfare) with a grade of C+ or better.

3. Junior status (81-90 credits) upon application.

4. Maintenance of a minimum overall GPA of 2.5 and a minimum GPA of 2.75 in social work classes.

5. No Pass-D-Fail grades in courses required for the major.

6. A satisfactory grade (70 percent or better) on the Advanced Placement Test (APT).

Students should also be aware that if there are any personal data, such as that included on the application for state licensure, which indicate a potential threat to the public safety and welfare, a student may be denied advanced standing in the program. Students turned down for advanced standing will be assisted in finding a more suitable major or may reapply during the following year.

To maintain advanced standing and eligibility for graduation as a Social Work Major, a student: (1) must obtain a B- or better in SW 3050 (Practice I), SW 4150 (Practice II), and SW 4160 (Practice III); (2) must have completed SW 1010 (Introduction to Social Welfare) with a C+ or better; (3) must maintain a minimum overall GPA of 2.5 or better and a minimum 2.75 GPA in the Social Work Major; (4) must receive a grade of C or better in all other courses required for the major; (5) must not repeat more than once, to improve a grade, any course required for the major; and (6) must not receive a Pass-D-Fail grade for any course required for the major.

Procedures for Admission to Field Practicum
Students must complete 480 clock hours of supervised field practicum and integrative seminar coursework. The field practicum courses are SW 4870 (Beginning Field Practicum) and SW 5870 (Advanced Field Practicum). Students may register for SW 4870 only after making application with the practicum director. Application must be made during the spring semester of the academic year prior to enrollment in the practicum, and is due by February 20. Applications are available in Main 239. No applications for the practicum will be accepted from students who will not complete all required coursework by the end of spring semester.

The following are eligibility criteria for admission to the field practicum:

1. Senior status (92-120 credits completed) by the end of the spring semester in which the student applies. Only those students who are candidates for the baccalaureate degree in social work may be admitted to the field practicum.

2. Completion of University Studies program (including Depth Education requirements) and all social work courses, with the exception of SW 5350 (Social Welfare Policy).

3. A grade of B- or better in SW 3050 (Practice I), SW 4150 (Practice II), and SW 4160 (Practice III).

4. A grade of C or better in all courses required for the major and a grade of C+ or better in SW 1010 (Introduction to Social Welfare).

5. No Pass-D-Fail grades received in courses required for the major.

6. Demonstration of appropriate professional, moral, and ethical character, and must abide by the National Association of Social Work (NASW) code of ethics.
Department of Sociology, Social Work and Anthropology

7. Maintenance of an overall minimum GPA of 2.5 and a 2.75 minimum GPA in the Social Work Major.

8. A satisfactory grade (70 percent or better) on the Generalist Practice Test.

Students should also be aware that if there are any personal data, such as that included on the application for state licensure, which indicate a potential threat to the public safety and welfare, a student may be denied continuation in the program. If a student is denied admission to the practicum, the faculty will review his or her file upon request.

Students entering the practicum cannot ordinarily begin their placement earlier than the start of fall semester. If they do so, this practice falls outside of the Social Work Program's responsibility, and any accrued hours will not count toward the practicum.

Transfer of Credit Policy

Students who transfer to the USU Social Work Program are required to complete an application for transfer credit. Students may substitute certain social work classes taken at other Council of Social Work Education (CSWE) accredited programs for USU courses. Course approval must be sought from the student's advisor. When petitioning for a substitution, the student is responsible to meet with an advisor and fill out a transfer of credit form, available in Main 239. Social work courses taken ten or more years ago cannot ordinarily serve as substitutes. Courses taken in a department or program not accredited by the CSWE cannot ordinarily serve as substitutes for the USU Social Work courses unless they have been covered in an articulation agreement.

The following regulations apply to transfer students: (1) A transfer credit application, with official transcripts from all institutions previously attended, must be submitted. (2) The transcripts must reflect a cumulative grade point average of at least 2.5 (on a 4.0 scale) and a 2.75 GPA in all social work courses. (3) The credentials of students seeking transfer to the Utah State University Social Work Program will be evaluated on an individual basis. (4) University Studies Depth Education requirements must be completed by all students, including transfer students who have earned an associate degree.

The following courses, or their equivalents, will be considered for transfer credit:

- ANTH 1010 (BSS) Cultural Anthropology (F,Sp) .................................................. 3
- BIOL 1010 (BLS) Biology and the Citizen (F,Sp,Su) .............................................. 3
- ENGL 1010 (CL1) Introduction to Writing: Academic Prose (F,Sp,Su) .......... 3
- ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode (F,Sp,Su) .......................................................... 3
- FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) ....... 3
- PSY 1010 (BSS) General Psychology (F,Sp,Su) ....................................................... 3
- SOC 1010 (BSS) Introductory Sociology (F,Sp) .................................................... 3
- STAT 1040 (QL) Introduction to Statistics (F,Sp,Su) .......................................... 3
- SW 1010 Introduction to Social Welfare (F) ......................................................... 3
- SW 2100 Human Behavior in the Social Environment (Sp) ......................... 3
- SW 2400 Social Work with Diverse Populations (Sp) ........................................ 3

Students transferring from junior colleges will be required to apply for advanced standing and take upper-division social work courses at USU. Only those social work courses taken within the last ten years will be considered. Students transferring credits from CSWE accredited programs must apply for advanced standing, arrange to take the Advanced Placement Test (APT) during spring semester before they arrive on campus, and take the following courses with the USU Social Work Program:

- SW 3050 Practice I (F) ..................................................................................... 3
- SW 4150 Practice II (Sp) .............................................................................. 3
- SW 4160 Practice III (Sp) ........................................................................... 3
- SW 4870 Beginning Field Practicum (F) ......................................................... 6
- SW 5350 (CI) Social Welfare Policy (F) ......................................................... 3
- SW 5970 Advanced Field Practicum (Sp) ....................................................... 6

Social Work faculty members review applications for advanced standing to qualify students to enroll in upper-division practice classes. Advanced standing is based on the following criteria: (1) completion of FCHD 1500 (BSS); ENGL 1010 (CL1), 2010 (CL2); ANTH 1010 (BSS); BIOL 1010 (BLS); SOC 1010 (BSS); PSY 1010 (BSS); and SW 2100, 2400 with a grade of C or better; (2) completion of SW 1010 with a grade of C+ or better; (3) junior status (61-90 credits); (4) maintenance of a minimum overall GPA of 2.5 and a minimum GPA of 2.75 in social work classes; (5) a passing score on the Advanced Placement Test (APT), which is a score of 70 percent or higher; and (6) no Fail-D-Fail grades received in courses required for the major.

Students transferring to USU should obtain and complete a copy of the social work advanced standing application and send the application to the Social Work Program by March 1, prior to the fall semester in which they intend to transfer.

Social Work Student Organizations

The Social Work Program recognizes the importance of students having opportunities to learn and socialize outside of the classroom. Students are encouraged to become involved with the NASW student organization, as well as the USU Social Work Program's Gamma chapter of thePhi Alpha Honor Society. Information is available in Main 239.

Social Work Program Outcomes

Social Work Program outcomes are available for review at:

Anthropology

Program Director: Patricia M. Lambert
Program Office:
Main 245, (435) 797-0219; or Main 224, (435) 797-1230

Anthropology is the integrated study of humans in all their aspects. It offers a broad framework for understanding humans as individuals and as members of widely varying societies through courses dealing with the biological evolution of humans, prehistoric culture change, and present diversity of cultures and human populations. Two parallel goals of the discipline are to explore and develop an appreciation for human diversity and the shared legacy of our common humanity.

Anthropology includes the following subspecialties: cultural anthropology, biological anthropology, archaeology, and linguistics. Major requirements are designed to encourage broad exploration.
across anthropology, and students who major in anthropology examine a wide range of peoples and cultures, both past and present. They examine lifeways as different as the hunter-gatherers of Ice-Age Europe, tribal horticulturalists of lush interior Amazonia, and the diverse ethnic neighborhoods of modern U.S. cities. They explore both the biological and cultural basis of human behavior, and examine how it is manifested in individuals and groups. Anthropology courses use both scientific and humanistic approaches to the study of humankind, in all its complexity. Courses emphasize critical reasoning, oral and written communication skills, and the expansion of thinking beyond the familiar.

The contemporary social science student lives in a world of diminishing cultural and national barriers. In this setting, a major in anthropology can lead to a wide variety of careers. Anthropologists are on the staff of leading medical, business, law, public affairs, and other professional schools, and have played critical roles in international ventures, public health programs, community development activities, and minority and migrant community actions. Additionally, anthropology and applied interests in international development, archaeology and cultural resource management, cross-cultural health care, and osteology/forensics. With first-hand experience in every region of the country and around the world, anthropologists bring a unique understanding of specific social and ethnic groups and of the biological, ecological, and cultural factors that influence human behavior.

Special features of the anthropology program include smaller classes, individualized attention, opportunities for laboratory, museum, and field work, and the opportunity of working in teaching assistant positions. All these features give anthropology majors choices and experiences unavailable to undergraduates in most programs. The Anthropology Museum and Field Schools provide additional hands-on learning opportunities. Anthropology participates in the Department of Geology emphasis in Geoarchaeology, the American Studies Program, and the Folklore Program in the Department of English.

Anthropology leads to a variety of “real-world” jobs. Anthropology graduates are: lawyers, nurses, health care administrators, travel consultants, teachers of all kinds, cultural resource professionals, agency and program administrators, and technical writers. They work for museums, government land management, environmental and Foreign Service agencies, Indian tribes, and are common in both the governmental and private sectors of the environmental-cultural heritage protection industry. They can be found in public and private foundations, bureaus, and agencies for the arts, humanities, sciences, and tourism.

Graduate study in anthropology opens the world of practicing anthropology. Not limited to college teaching, anthropologists with graduate degrees can be found in a variety of private sector and government agency positions.

For students seeking a dual major, an Anthropology major can complement a major in American Studies, Biology, Geology, Geography, History, Languages, and Political Science. It also pairs well with majors in Natural Resources, because cultural resource and Native American issues are important to many positions in private firms and government agencies concerned with land management and the environment.

**Major Requirements**

A minimum of 39 credits is required for the anthropology major. All students must take four required courses, including a three-semester sequence in the basic areas of anthropology and a beginning upper-division level course in the history of anthropology. The anthropology major also requires exposure across the breadth of the discipline. To achieve this, students select courses from topical and area clusters at the upper-division levels and a final capstone course. Additional graduation requirements include:

**Methods component**

Majors must complete one “Methods” course in anthropology. The course chosen to meet this requirement may also count toward other anthropology major requirements.

A minimum of 16 credits of the anthropology course credits counting toward the major must be Utah State University courses. Credits from distance and residence center courses are subject to departmental approval for application toward the anthropology major.

Students majoring in anthropology must maintain a minimum 2.5 overall GPA in anthropology courses. A grade of C or better must be attained in all courses counted for the major, including foreign language courses and statistics courses. In addition, majors must complete the general requirements of the University in consultation with the student’s advisor, and complete the following major courses:

**Required Courses (12 credits)**

- ANTH 1010 (BSS) Cultural Anthropology (F,Sp)......................3
- ANTH 1020 (BLS) Biological Anthropology (F)..........................3
- ANTH 2030 (BSS/CI) World Archaeology (F,Sp).......................3
- ANTH 3990 History and Theories of Anthropology (F)..................3

**Cultural Anthropology (6 credits minimum)**

- ANTH 2010 (BSS) Peoples of the Contemporary World (F)..........3
- ANTH 3110 North American Indian Cultures (F).........................3
- ANTH 3130 (CI) Peoples of Latin America.................................3
- ANTH 3150 Applied Anthropology Survey: History, Uses, Methods, and Careers (Methods) (F,Sp) ..................................................3
- ANTH 3160 (DSS) Anthropology of Religion (F)...........................3
- ANTH 4110/6110 (DSS) Southwest Indian Cultures, Past and Present (F) .................................................................................3
- ANTH 4120 (CI/DSS) Ethnography of Childhood (Methods) (Sp) ..........................3
- ANTH 4130 (DSS) Medical Anthropology: Matter, Culture, Spirit, and Health (Sp) ..................................................3
- ANTH 4150 (QI) Problems in Cultural Anthropology (Methods) (F,Sp) ..................................................3
- ANTH 5100/6110 (DSS) Anthropology of Sex and Gender (Sp) ......3
- ANTH 5120/6120 Applied Rural Development (Sp) ..................................3
- ANTH 5130/6130 Ethnographic Field School (Methods) (Su) ........3-6
- ANTH 5160/6160 (DSS) Cities and Development (Sp) .................3

**Biological/Physical Anthropology (6 credits minimum)**

- ANTH 3200 (CI/DSS) Perspectives on Race (Sp)..........................3
- ANTH 3250 Osteology (Methods) (F) ........................................3
- ANTH 4250 (QI) Problems in Bioarchaeology (Methods) (Sp) ......3
- ANTH 5210 Physical Anthropology Lab (Methods)..........................1-3

**Archaeology (6 credits minimum)**

- ANTH 3300 (DSS) Archaeology in North America (Sp) ..............3
- ANTH 3320 (DSS) Ancient Humans and the Environment (F) .......3
- ANTH 3350 (DSS) Archaeology of Ancient Civilizations (Sp) ......3
- ANTH 4350 Archaeological Method/Theory and Cultural Resource Management (Sp) ..................................................3
- ANTH 4360 (DSS) Ancient Desert West (F) ..................................3
- ANTH 4380 Peopling of the New World (Sp) ...............................3
### Department of Sociology, Social Work and Anthropology

**Capstone Courses (3 credits minimum)**
- ANTH 4250 (QI) Problems in Bioarchaeology (Methods) (Sp) ........ 3
- ANTH 4350 Archaeological Method/Theory and Cultural Resource Management (Sp) .......................................................... 3
- ANTH 4890 Contemporary Issues in Anthropology (Sp) .......... 3
- ANTH 5650/6650 (DSS) Developing Societies (F) ............... 3

**Departmental Electives**  
(These do not count toward minor requirements.)

Note: Methods courses require permission of instructor.
- ANTH 2210 (BHU) Introduction to Folklore (F, Sp) .............. 3
- ANTH 2720 Survey of American Folklore (Sp) ............... 3
- ANTH 3310 (CI) Introduction to Museum Studies (Methods) (Sp) ................. 3
- ANTH 4100 The Study of Language (F, Sp) ................... 3
- ANTH 4370 Archaeology and Paleoenvironments Field Trip (F) .......... 2
- ANTH 4800 Topics in Anthropology .................................................. 1-3
- ANTH 5190 Applied Anthropology Practicum (Methods) ........ 1-5
- ANTH 5310 Archaeology Field School (Methods) (Su) .... 3-5
- ANTH 5310 Archaeology Lab (Methods) (F) .................. 1-3
- ANTH 5700 Folk Narrative (Sp) ................................................. 3
- ANTH 5800 Museum Development (Methods) (F, Sp, Su) .... 1-3
- ANTH 5900 Independent Studies ................................................. 1-3
- ANTH 5980 Senior Project ......................................................... 1
- ANTH 6900 Independent Studies ................................................. 1-3
- SOC 4730 Women in International Development (Sp) ...... 3

**Sample Four-year Plan for Anthropology Major**

Minimum GPA for Admission: 2.5, Career  
Minimum GPA for Graduation: 2.5, major requirements,  
including BS and BA required courses; 2.0, Career  
Minimum Grade Accepted: C in major requirements,  
including BS and BA required courses

Students planning to receive a BA degree must complete two years training or equivalent in a foreign language approved by the Languages, Philosophy, and Speech Communication Department or one year or equivalent in each of two foreign languages approved by the Languages, Philosophy, and Speech Communication Department.

Students planning to receive a BS degree must complete STAT 1040 (Introduction to Statistics), and two courses selected from a list of courses approved by the Anthropology Program.

Anthropology majors are encouraged to complete both the foreign language and statistics requirements.

**Freshman Year (30 credits)**

**Fall Semester (15 credits)**
- ANTH 1010 (BSS) Cultural Anthropology ............................................. 3
- ANTH 1020 (BLS) Biological Anthropology ........................................... 3
- ENGL 1010 (CL1) Introduction to Writing: Academic Prose ................. 3
- University Studies Breadth course .................................................. 3
- Elective course(s) ................................................................. 3

See the structure of the United States University 2007-2009 General Catalog for the schedule of classes for subsequent semesters.

**Spring Semester (15 credits)**
- ANTH 2030 (BSS/CI) World Archaeology ........................................... 3
- STAT 1040 (QL) Introduction to Statistics ............................................ 3
- University Studies Breadth courses .............................................. 6
- Elective course(s) ................................................................. 3

Complete the CIL exams by the end of the Freshman Year.

**Sophomore Year (30 credits)**

**Fall Semester (15 credits)**
- ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ........................................... 3
- University Studies Breadth course .............................................. 3
- Anthropology upper-division courses ....................................... 6
- Degree requirement (BS/BA) course ........................................... 3

**Spring Semester (15 credits)**
- Anthropology upper-division courses ....................................... 6
- Degree requirement (BS/BA) course ........................................... 3
- Elective courses ................................................................. 6

**Junior Year (30 credits)**

**Fall Semester (15 credits)**
- ANTH 3990 History and Theories of Anthropology ....................... 3
- ANTH 4150 (QI) Problems in Cultural Anthropology ................. 3
- Depth Humanities and Creative Arts (DHA) course ...................... 3
- Upper-division course(s) ....................................................... 4
- Elective course(s) ................................................................. 2

**Spring Semester (15 credits)**
- Anthropology upper-division courses ....................................... 6
- Depth Life and Physical Sciences (DSC) course ....................... 3
- Elective courses ................................................................. 6

**Senior Year (30 credits)**

**Fall Semester (15 credits)**
- Anthropology upper-division course (Methods) ......................... 3
- Communications Intensive (CI) course ....................................... 3
- Elective courses ................................................................. 9

**Spring Semester (15 credits)**
- Anthropology upper-division course (Capstone) ....................... 3
- Elective courses ................................................................. 12

**Minor Requirements**
A minimum of 18 credits is required for the anthropology minor. A minimum of 12 anthropology credits counting toward the minor must be Utah State University courses. Credits from distance and residence center courses are subject to departmental approval for application toward the anthropology minor. Students must maintain a minimum 2.5 overall GPA in anthropology courses. A grade of C or better must be attained in all courses counting toward the minor.

**Required Courses (9 credits)**
- ANTH 1010 (BSS) Cultural Anthropology (F, Sp) ............................................. 3
- ANTH 1020 (BLS) Biological Anthropology (F) ........................................... 3
- ANTH 2030 (BSS/CI) World Archaeology (F, Sp) ........................................... 3

**Breadth-in-Anthropology Structured Electives**  
(9 credits minimum)
In addition to the required courses, students must complete a minimum of 9 credits (ANTH 1010, 3000-5000 level courses) in anthropology from the **Structured Electives in Cultural Anthropology, Biological Anthropology, or Archaeology.**
Sociology Graduate Program

Graduate Program Director: Douglas B. Jackson-Smith
Program Office: Main 224, (435) 797-0582

The Department of Sociology, Social Work and Anthropology offers graduate work leading to the MS, MA, and PhD degrees in Sociology. The department also administers an interdisciplinary Master of Social Sciences (MSS) degree with emphasis in International Rural and Community Development.

The Graduate Program in Sociology provides a unique integrative and reinforcing combination of demographic, organizational, political-economic, and social psychological orientations to major domestic and global issues. At the graduate level, the department is particularly strong in four areas: Demography, Natural Resource and Environmental Sociology, Social Problems and Inequality, and Social Change and Development. Graduate students have the opportunity to merge basic foundation coursework in sociological theory and research methods with more specialized training in selected specialty areas and apprenticeship roles in both basic and applied research projects. Sustained personal interaction between faculty and students is a hallmark and strength of the program.

The Graduate Program in Sociology has developed a Graduate Program Handbook that provides more details about the application process, financial assistance decisions, and graduation requirements. An electronic copy of this handbook is available on the departmental website: [http://www.usu.edu/sswa/grad.htm](http://www.usu.edu/sswa/grad.htm)

The typical graduate application has five main components:

1. A formal application form, available from the School of Graduate Studies;
2. Transcripts from the applicant's undergraduate and graduate studies;
3. Test scores from the Graduate Record Examination (GRE) for all applicants, and the Test of English as a Foreign Language (TOEFL) and the Test of Spoken English (TSE) examinations for international students whose native language is not English;
4. Letters of reference from faculty or scholars who can attest to the applicant's abilities to succeed in graduate school; and
5. A letter of intent providing background about the applicant's training, interests, and experiences, as well as an overview of the applicant's career goals and specific reasons why graduate training in sociology is important to the applicant.

All application materials should be sent directly to the School of Graduate Studies, 0900 Old Main Hill, Utah State University, Logan UT 84322-0900.

The department offers financial assistance to most graduate students enrolled in departmental programs. These funds are distributed through a competitive process, based on student qualifications, performance, and interests. Graduate assistants typically earn enough to cover basic costs of tuition and living expenses. In order to be considered for financial assistance for the following academic year, complete applications must be received by USU no later than February 1. Decisions on graduate student funding are usually based on an overall evaluation of all five components of the application.

Students must have scores on the verbal and quantitative portions of the Graduate Record Examination (GRE) at or above the 40th percentile. TOEFL scores are required for international candidates, with a minimum score of 600 (paper test) or 250 (computer-based test) deemed acceptable. The Test of Spoken English (TSE) is also strongly recommended, with a minimum score of 50 deemed acceptable. International applicants who are admitted without having taken the TSE will be required to take a test of spoken English fluency administered by the Intensive English Language Institute (IELI) at Utah State University prior to beginning their first semester in the Sociology Graduate Program. Dependent upon the test results, the student may be required to complete a program of English language training during the first semester of residence in the graduate program. For consideration for admission to the MSS degree program, applicants may submit either GRE or Miller Analogies Test scores.

Applications are screened throughout the year by the Graduate Program Executive Committee. No applications will be considered until all required information arrives in the School of Graduate Studies or a formal petition to review a nearly-complete file is made and approved.

Students with or without an undergraduate degree in sociology may enter the master's degree program. However, before matriculating, basic competencies in sociology that have not been acquired through prior courses or experience must be satisfied. Students entering the doctoral program must complete master's level prerequisites in sociological theory and research methods and statistics.

PhD in Sociology

In addition to coursework in sociological theory and methods, doctoral students are expected to concentrate in and pass written comprehensive examinations in two of the following specialty areas. Specialty areas are distinct, but are also highly integrative. One line of integration involves the department's continuing emphasis on Rural Sociology, which links elements of all four specialty areas. The program is sufficiently flexible to permit students with a strong interest in an area other than the established specialty areas to elect that area as an emphasis area, rather than having a second specialization, with approval of the supervisory committee and the department head or his or her delegated representative. In this case, the student would select a series of courses in that area in consultation with his or her supervisory committee and the department head or his or her delegated representative.

Demography

The demography area of specialization is administered through the Population Research Laboratory. The orientation is twofold: (1) basic and policy-oriented research on sociological aspects of demographic structure and processes, including migration, marriage and fertility, morbidity, and mortality; and technical demographic topics such as population estimates and projections; and (2) the provision of demographic training to domestic and international students relevant to their respective settings. Research endeavors encompass a broad range of local, regional, national, and international projects in the areas of migration and population redistribution, family demography, life course and aging, health and disability, labor force, and population estimates and projections. Graduate coursework is provided in social demography, population theories and policy, and demographic methods, as well as through various special topic seminars.
Department of Sociology, Social Work and Anthropology

Environmental Sociology/Sociology of Natural Resources
The faculty in this area maintain an active research involvement in a wide variety of areas, such as natural resource development, land use changes, public participation in environmental planning, hazardous facility siting, recreation, risk assessment, population/environment relationships, public land management issues, and natural resource policy. Faculty have been engaged in cooperative research ventures with engineering, natural resource sciences, and other physical and social sciences faculty. Graduate curricula offerings are focused on the sociology of natural resources, environmental sociology, environmental problems and inequality, and social risk analysis.

Social Problems and Inequality
This specialization is organized around analyses of the social and cultural processes through which social problems come to be recognized, with particular emphasis on race, class, and gender inequality.

Graduate courses in this area include theoretical foundations, as well as topical courses in the areas of criminology, health, gender, environmental justice, and work and occupations. Faculty members in this area have recently conducted extensive research on health risks and behavior, family and work conflict, peer court intervention in juvenile delinquency, and the gendered impacts of labor market restructuring.

Since the sociology program has a joint relationship with social work and anthropology, sociology graduate students have many opportunities to draw from the experience and applied research of these faculty as well.

Social Change and Development
This specialization is designed to provide a broad foundation for students interested in examining the social, political, and economic dynamics and impacts of social change. Two major goals of this program are to: (1) give students the conceptual and analytical foundations enabling them to understand the dynamics and impacts of social change and development, and (2) convey specific skills required for effective performance in applied fields.

While some faculty and students have projects in urbanizing contexts, there is a strong focus on rural sociology. Faculty members have extensive domestic and international experience examining rural community development, demographic changes, labor market restructuring, agrarian transformations, political transitions and social movements, and land use changes.

Core Courses
The core courses for the PhD degree in Sociology include the following:
SOC 7010 Issues in Sociological Theory (Sp) ........................3
SOC 7100 Advanced Survey Techniques (Sp) .........................3
SOC 7110 Advanced Sociological Analysis (F) ........................3
SOC 7150 Advanced Qualitative Methods in Sociology (Sp) ..........3

MS and MA in Sociology
The main objective of this degree program is to provide a firm foundation in sociological theory and methods. Students also have the opportunity to take electives in any of the departmental specialty areas or outside the department. A minimum of 30 credits (including a research thesis) is required for the degree.

Core Courses
The core courses for the MS and MA degrees in Sociology include the following:
SOC 6010 Development of Sociological Theory (F) ..................3
SOC 6020 Modern Social Theory (F) .................................3
SOC 6100 Advanced Methods of Social Research (F) ..............3
SOC 6150 Social Statistics II (Sp) ......................................3

The ability to utilize a statistical package (or permission of instructor) is a prerequisite to SOC 6150 (Social Statistics II).

MSS Sociology Specialization
This specialization enables interdisciplinary training in three related disciplines. The program requires a minimum of 35 credits, including 17 credits in a major discipline (Sociology); and either (1) a minimum of 9 credits in each of two minors or (2) a minimum of 9 credits in a minor and a minimum of 9 credits in a cluster. Two credits for the Plan B paper are included in the minimum 17 credits in Sociology. A minimum overall GPA of 3.0 is required. This is an applied degree. Individual options and plans of study can be arranged in consultation with the student's supervisory committee. At present, the degree is available with an emphasis in International Rural and Community Development.

International Rural and Community Development
This emphasis is designed to prepare administrators, planners, and researchers for work in international settings. The emphasis is on social and community factors in development. The interdisciplinary curriculum in sociology of development, rural sociology, economic anthropology, political science, and the economics of development has been specifically designed to prepare practitioners and leaders for careers in applied social development. The coursework can be adapted to the individual career interest of each student. The program involves students both from abroad and from the United States.

Core Courses
Individualized programs of study are prepared with the cooperation of the student and supervisory committee.

Research
The graduate program’s research agenda is focused within the framework of the department’s specialty areas. Since the areas are integrative, research tends to involve collaborative participation by several faculty members. Several active research projects are supported by the Utah Agricultural Experiment Station. Research is conducted at various levels, including international, national, regional, and state. The department has two active research units: (1) the Institute for Social Science Research on Natural Resources and (2) the Population Research Laboratory. Departmental research is supported by grants from federal and state agencies, local governments, private foundations, and the Utah Agricultural Experiment Station. Faculty members participate in many cross-campus research efforts, including the Women and Gender Research Institute, the USU Water Initiative, the Utah Water Research Laboratory, the Mountain West Center for Regional Studies, and the Natural Resources and Environmental Policy Program.

Financial Assistance
Both departmental support and formal research grant support are available to graduate students and are awarded on a competitive
Department of Sociology, Social Work and Anthropology

basis. Some highly qualified departmental graduate students are also nominated to compete for University fellowships. Students who wish to be considered for financial aid must submit applications by February 1 for the coming academic year. Late applications are considered only if additional funds are still available.

Teaching assistantships are available through the department. Research assistantships are available through faculty members who have ongoing projects with the Utah Agricultural Experiment Station or who have research grants from the University, private companies, and federal or state agencies. University fellowships are available for exceptionally qualified students.

Career Opportunities

Traditionally, persons with advanced degrees in sociology have been employed in college and university settings. Recent evidence has shown a greater variety of career paths. A survey conducted by the American Sociological Association showed that 21 percent of sociologists holding the doctoral degree were employed in the private sector; 31 percent were working in the nonprofit sector; 46 percent were working in federal, state, or local government agencies; and 12 percent were self-employed. USU sociology graduates have followed this pattern of diversity. They have secured appointments in a variety of academic, governmental, and private settings, both domestic and abroad. A sizeable number have achieved key leadership positions and high visibility in the profession.

Sociology, Social Work and Anthropology Faculty

Professors
Stan L. Albrecht, President of Utah State University, environmental sociology, rural sociology, health studies
John C. Allen, rural development, natural resource sociology, survey research methods
E. Helen Berry, demography, ecology, methods, urban
Raymond T. Coward, Provost of Utah State University; social gerontology, health care delivery, rural sociology
Richley H. Crapo, religion, sex, and gender; sexuality and homosexuality
Steven E. Daniels, rural development, natural resource policy
Susan E. Dawson, occupational and environmental health
H. Reed Geertsen, community, sociological theory, medical
Bonnie Glass-Coffin, medical anthropology, shamanism, Latin America, applied anthropology, method and theory
Gary Kiger, Dean of College of Humanities, Arts, and Social Sciences; social psychology; gender, work, and family; research methods
Richard S. Kranich, environmental, community, and rural sociology; research methods
David F. Lancy, educational anthropology, ethnography
Jon R. Monis, applied anthropology, rural development, contemporary Africa
Steven R. Simms, archaeology, anthropological theory, behavioral ecology
Michael B. Toney, demography, ecology

Adjunct Professors
Gil-Sung Park, economic sociology
Douglas N. Sharon, cultural anthropology

Professors Emeritus
H. Bruce Bylund, social change, methods
Gordon N. Keller, comparative kinship, applied anthropology
Yun Kim, demography, development, quantitative methodology
Ronald L. Little, environmental sociology, rural, quantitative methodology
Gary E. Madsen, methods, environmental risk
Wesley T. Maughan, community organization, sociology of education
Bradley W. Parlin, comparative sociology of work
Pamela J. Riley, social psychology, international development, criminology, gender
David L. Rogers, complex organizations, political sociology, communities
William F. Stinner, social demography, life course, community

Associate Professors
M. Diane Calloway-Graham, women’s development, women’s clinical and societal issues, social work theory
Douglas B. Jackson-Smith, sociology of agriculture, natural resources and environment, research methods, economic sociology
Patricia M. Lambert, biological anthropology, bioarchaeology, paleopathology
Derek T. Mason, juvenile delinquency
Terry L. Peak, social policy, health care, gerontology

Adjunct Associate Professor
Joanna L. Endter-Wada, cultural anthropology and natural resource policy and sociology

Assistant Professors
Christy Glass, comparative sociology, work and labor markets, inequality
Kelly H. Hardwick, criminology, deviance, theory, methods
Maki Hatanaka, sociology of development, globalization, food and agriculture, social movements
Susan E. Mannor, social inequality, sociology of development, gender
Sandra T. Marquart-Pyatt, environmental sociology, political sociology, methods
Peggy Petrzela, environmental sociology, rural sociology, social change and development
Bonnie L. Pitblado, archaeology
Eric Reiter, demography, health

Adjunct Assistant Professors
Nazih T. Al-Rashid, sociology of work
Krista Lynn Minnette, family sociology, gender

Lecturers
Shannon T. Browne, social work
Jason Leiker, criminology and juvenile delinquency

Course Descriptions

Sociology (SOC), pages 712-715
Social Work (SW), pages 724-725
Anthropology (ANTH), pages 560-563
The undergraduate programs in the Department of Special Education and Rehabilitation offer educational and training opportunities for teachers and support personnel working with exceptional children and adults with disabilities. The programs prepare students to work with individuals with mild/moderate and severe disabilities and with early childhood special education. Students who are majoring in other teaching fields (i.e., elementary education, secondary education) are encouraged to pursue a second certification by taking those courses which lead to a special education license. Teacher education programs in the department are accredited by the State of Utah and nationally by NCATE.

Areas of Emphasis
The Department of Special Education and Rehabilitation offers training programs for individuals who want to work with children and adults with disabilities. A student fulfilling the undergraduate course requirements will qualify for a BS or BA degree in special education and be eligible for a license to teach students with mild/moderate disabilities, students with severe disabilities, or young children with disabilities. The severe and mild/moderate endorsements allow graduates to teach pupils with disabilities from kindergarten through 12th grades. The early childhood special education license allows teachers to teach children with disabilities from birth to five years old. In addition, the department offers composite teaching majors with the Department of Elementary Education and dual teaching majors with the Department of Secondary Education. Students completing the dual major requirements in secondary education will be eligible for teacher licensure in one of the special education endorsement areas and the secondary education content major. Students completing the composite major requirements in elementary education will be eligible for teacher licensure in one of the special education endorsement areas and elementary education. Students interested in teaching preschool children with disabilities may receive an early childhood special education license for ages 0-5, in addition to a K-12 special education endorsement in severe or mild/moderate disabilities. A Birth to Age 5 minor is available for Family, Consumer, and Human Development majors.

Requirements
Admission Requirements
Students are admitted to the Department of Special Education and Rehabilitation as Pre-Special Education majors by meeting the Utah State University minimum requirements (see pages 16-20). To become a Special Education major, a student must make written application to the department after meeting the following prerequisites: (1) completion of at least 40 attempted semester credits with a cumulative GPA of 2.75 or higher; (2) completion of admission requirements to the College of Education and Human Services Teacher Education Program (see page 118); (3) passing scores on all six Computer and Information Literacy (CIL) exams; and (4) passing score on Special Education Math exam. Students who are majoring in other teaching fields (i.e., elementary education, secondary education) are encouraged to pursue a second certification by taking those courses which lead to a special education license. Teacher education programs in the department are accredited by the State of Utah and nationally by NCATE.

Areas of Emphasis
The Department of Special Education and Rehabilitation offers training programs for individuals who want to work with children and adults with disabilities. A student fulfilling the undergraduate course requirements will qualify for a BS or BA degree in special education and be eligible for a license to teach students with mild/moderate disabilities, students with severe disabilities, or young children with disabilities. The severe and mild/moderate endorsements allow graduates to teach pupils with disabilities from kindergarten through 12th grades. The early childhood special education license allows teachers to teach children with disabilities from birth to five years old. In addition, the department offers composite teaching majors with the Department of Elementary Education and dual teaching majors with the Department of Secondary Education. Students completing the dual major requirements in secondary education will be eligible for teacher licensure in one of the special education endorsement areas and the secondary education content major. Students completing the composite major requirements in elementary education will be eligible for teacher licensure in one of the special education endorsement areas and elementary education. Students interested in teaching preschool children with disabilities may receive an early childhood special education license for ages 0-5, in addition to a K-12 special education endorsement in severe or mild/moderate disabilities. A Birth to Age 5 minor is available for Family, Consumer, and Human Development majors.

Requirements
Admission Requirements
Students are admitted to the Department of Special Education and Rehabilitation as Pre-Special Education majors by meeting the Utah State University minimum requirements (see pages 16-20). To become a Special Education major, a student must make written application to the department after meeting the following prerequisites: (1) completion of at least 40 attempted semester credits with a cumulative GPA of 2.75 or higher; (2) completion of admission requirements to the College of Education and Human Services Teacher Education Program (see page 118); (3) passing scores on all six Computer and Information Literacy (CIL) exams; and (4) passing score on Special Education Math exam. Students should apply to the department during the fall semester of their sophomore year (October deadline). Admission to the department is competitive based on several factors. These include: (1) the student’s current GPA; (2) the number of credit hours completed by the end of fall semester; (3) completion of premajor classes (such as STAT 1040 and FCHD 1500); and (4) the student’s career goals and experiences.

GPA Requirement
A minimum GPA of 2.75 is required to apply for admission, to remain in good standing, and to graduate from the program. All required special education classes must be completed with a grade of C or better.
Bachelor's Degree in Special Education
Undergraduate study leads to the Bachelor of Science or Bachelor of Arts degree in Special Education with licensure to teach students with mild/moderate disabilities, severe disabilities, or early childhood special education. The degree requires a total of 120 credits. The requirements are as follows:

A. University Studies Requirements
Competency Requirements (9-13 credits), Breadth Requirements (18 credits), and Depth Education Requirements (5 courses). For more information, see pages 49-59.

B. Professional Education Requirements (20-24 credits)
FCHD 1500 (BSS) Human Development Across the Lifespan (F,Sp) (3 cr) or
PSY 1100 Developmental Psychology: Infancy and Childhood (F,Sp) (3 cr) or
SPED 4000 Education of Exceptional Individuals (F,Sp,Su) (3 cr)
SPED 5530 Technology for Teaching Exceptional Learners (Sp) (3 cr)
PSY 5660 Educational Psychology for Teachers (Sp) (3 cr)
ELED 3000 (CI) Foundation Studies and Practicum in Teaching and Classroom Management Level II (Sp) (3 cr) or
FCHD 2250 Seminar and Practicum in Early Childhood Education (required only for students completing the Birth to Age 5 Certificate) (Sp) (3 cr)
FCHD 2600 Seminar in Early Childhood Education (F,Sp) (3 cr)
FCHD 2630 Practicum in Early Childhood Education (F,Sp) (3 cr)
SPED 4810 Foundations of Effective Assessment and Instructional Practices (F) (3 cr)
SPED 5200 (CI) Student Teaching in Special Education (F or Sp) (15 cr)

C. Special Education Major (42-60 credits)
Coursework includes: human growth and development; applied behavior analysis; introduction to systematic instruction (task analysis, curriculum-based measurement, behavioral objectives, contingent reinforcement); designing curriculum; Individualized Educational Programs (IEP); educational assessment, analysis, and adaptation of instructional materials; intervention strategies for academic and social behaviors; and parent involvement. Additionally, each endorsement area includes practicum work with exceptional children or youth. Finally, all students must complete student teaching with students with disabilities.

D. Teaching Support (15 credits)
The support area is designed to enhance the Special Education major’s background. Areas recommended include communicative disorders, psychology, sociology, family and human development, recreation, and physical education.

E. Electives (7-20 credits)

Endorsement Areas
Students are required to complete the Mild/Moderate Disabilities Endorsement, the Severe Disabilities Endorsement, or the Birth to Age 5 Certificate.1

The following courses are required for the special education training programs. A minimum grade point average of 2.75 is required for admission to the endorsement courses. Most of the courses should be taken during the junior year. Students enrolled in the endorsement programs are required to maintain a GPA of at least 2.75.

Mild/Moderate Disabilities Endorsement (48 credits)
SPED 5010 (QI) Applied Behavioral Analysis 1: Principles, Assessment, and Analysis (F) (3 cr)
SPED 5040 Foundations of Effective Assessment and Instructional Practices (F) (3 cr)
SPED 5050 Applied Behavioral Analysis 2: Applications (Sp) (3 cr)
SPED 5060 Consulting with Parents and Teachers (Sp) (3 cr)
SPED 5070 Policies and Procedures in Special Education (F) (3 cr)
SPED 5200 (CI) Student Teaching in Special Education (F or Sp) (15 cr)
SPED 5310 Teaching Reading and Language Arts to Students with Mild/Moderate Disabilities (F) (3 cr)
SPED 5320 Teaching Content Areas and Transition to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5330 Eligibility Assessment for Students with Mild/Moderate Disabilities (F) (3 cr)
SPED 5340 Teaching Math to Students with Mild/Moderate Disabilities (Sp) (3 cr)
SPED 5410 Practicum: Direct Instruction Reading and Language Arts for Students with Mild/Moderate Disabilities (F) (3 cr)
SPED 5420 Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities (Sp) (3 cr)

Severe Disabilities Endorsement (45 credits)
SPED 5010 (QI) Applied Behavioral Analysis 1: Principles, Assessment, and Analysis (F) (3 cr)
SPED 5040 Foundations of Effective Assessment and Instructional Practices (F) (3 cr)
SPED 5050 Applied Behavioral Analysis 2: Applications (Sp) (3 cr)
SPED 5060 Consulting with Parents and Teachers (Sp) (3 cr)
SPED 5070 Policies and Procedures in Special Education (F) (3 cr)
SPED 5200 (CI) Student Teaching in Special Education (F or Sp) (15 cr)
SPED 5510 Curriculum for Students with Severe Disabilities (F) (4 cr)
SPED 5520 Curriculum for Secondary-Level Students with Severe Disabilities (Sp) (3 cr)
SPED 5540 Assessment of Persons with Severe Disabilities (Sp) (3 cr)
SPED 5600 Practicum: Introduction to Instruction of Students with Severe Disabilities (F) (3 cr)
SPED 5610 Practicum: Advanced Systematic Instruction of Students with Severe Disabilities (Sp) (3 cr)

Birth to Age 5 Certificate (46 credits)
Students who are completing this certificate in addition to the Mild/Moderate Disabilities Endorsement or the Severe Disabilities Endorsement will need to complete only those courses which they have not already taken under their endorsement.2

SPED 5010 (QI) Applied Behavioral Analysis 1: Principles, Assessment, and Analysis (F) (3 cr)
SPED 5040 Foundations of Effective Assessment and Instructional Practices (F) (3 cr)
SPED 5050 Applied Behavioral Analysis 2: Applications (Sp) (3 cr)
SPED 5060 Consulting with Parents and Teachers (Sp) (3 cr)
SPED 5070 Policies and Procedures in Special Education (F) (3 cr)
SPED 5200 (CI) Student Teaching in Special Education (F or Sp) (15 cr)
SPED 5710 Young Children with Disabilities: Characteristics and Services (Sp) (3 cr)
SPED 5730 Intervention Strategies for Young Children with Disabilities (F) (3 cr)
SPED 5810 Seminar and Field Experiences with Infants and Families (Sp) (4 cr)
SPED 5820 Preschool Practicum with Young Children with Disabilities in Community Environments (F) (3 cr)
SPED 5840 Seminar: Preschool Practicum with Young Children with Disabilities (F) (2 cr)

1After acceptance to the Special Education major and before beginning the Special Education practica, students are required to complete a background check for conviction of violating any law (except traffic violations).
2SPED 5200 should be taken during the senior year.
3Students working toward the Birth to Age 5 Certificate are encouraged to complete either the mild/moderate disabilities endorsement or the severe disabilities endorsement, as well as courses included in the Birth to Age 5 Certificate. For additional information, see the special education advisor.
Department of Special Education and Rehabilitation

Suggested Four-year Course of Study for Special Education Major, Mild/Moderate Disabilities Emphasis
This is a model of the requirements and possible sequence of courses. However, students may progress through the program or have more flexibility if they have high ACT scores, CLEP credit, concurrent enrollment credit, AP credit, and/or transfer credit; or if they attend during summer semesters.

Additional Semester
During this additional semester, students should finish their Secondary Content Major courses.

*At least two of the six breadth courses must have a USU prefix.
*The MATH 1050 requirement (or its equivalent) must be completed prior to application to the Teacher Education Program.

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information

For more information concerning Bachelor of Science or Bachelor of Arts requirements and the sequence in which courses should be taken, see major requirement sheets available from the Department of Special Education and Rehabilitation (Education 313) or the Special Education Advising Office (Education 107). Requirement sheets can also be accessed online at: http://www.usu.edu/majorsheets/

Financial Support

Scholarships, assistantships, grants-in-aid, and work-study programs are available through the University. In addition, there are some endowed scholarships available through the department and, sometimes, there are stipends available from federal grants.

Graduate Programs

Admission Requirements

Admission decisions are made by the department’s Graduate Program Committee. Admission requirements are based upon those of the School of Graduate Studies (see pages 101-102). In addition, the committee considers experience, academic record and curriculum, formal recommendations, and test scores. Master’s and doctoral program admission requires GRE scores. Students applying for admission to special education graduate programs, who do not have an undergraduate special education background, may be required to complete selected undergraduate courses prior to admission as fully-matriculated graduate students.

Applicants for the Rehabilitation Counseling program are screened throughout the year by the Graduate Program Committee. Deadlines for application to the Special Education Master’s program are March 15, June 15, and October 15. The deadline for application to the Disabilities Disciplines Doctoral program is February 1. Only complete files will be reviewed. Applications received after these dates will be considered, but opportunities for financial assistance may be limited. No applications will be considered until all required information arrives at the School of Graduate Studies office.

Assessment and Accreditation

Information about assessment within the Department of Special Education and Rehabilitation, as well as information about NCATE and CORE accreditation, can be found at: http://sped.usu.edu/accreditation/index.html
Teaching Licenses

The department prepares students for licensure as teachers of students with mild/moderate disabilities, students with severe disabilities, and preschool-age students with disabilities. Licensure may also be obtained in visual and/or hearing impairments through a multi-university consortium program. Licensure may be obtained as part of the graduate degree program or without a graduate degree.

Degree Programs

Master of Science in Special Education (MS)
The Master of Science degree program is designed for persons who desire a graduate program that will help them improve their competencies as educators. This includes school personnel, as well as individuals who are involved in education-related activities across a variety of community, work, and clinical settings. The MS degree focuses on refining school practices in terms of instruction and management practices, legal requirements, and professional collaboration. All candidates must complete a creative project. A minimum of 36 credits, including a thesis, is required for the MS degree.

Master of Education in Special Education (MEd)
The Master of Education degree program is designed for persons who desire a graduate program that will help them improve their competencies as educators. This includes school personnel, as well as individuals who are involved in education-related activities across a variety of community, work, and clinical settings. The MEd degree focuses on refining school practices in terms of instruction and management practices, legal requirements, and professional collaboration. All candidates must complete a creative project. A minimum of 36 credits, including a creative project, is required for the MEd degree.

Master of Rehabilitation Counseling (MRC)
The Master of Rehabilitation Counseling prepares persons with the basic competencies to provide rehabilitation counseling to individuals with a broad range of disabilities in a variety of settings, such as state rehabilitation agencies, independent living centers, rehabilitation hospitals, private rehabilitation facilities and agencies, employment assistance programs, and private industry. The degree is a 48-credit program consistent with the requirements of the Council on Rehabilitation Education (CORE). The Rehabilitation Counseling Program has a limited number of scholarships funded through the U.S. Department of Education, Rehabilitation Services Administration. These scholarships require a postgraduate commitment to work for a not-for-profit agency serving the needs of individuals with disabilities for two years for every year of scholarship received.

Educational Specialist Program (EdS)
The educational specialist degree is designed for advanced graduate students seeking instruction beyond a master’s degree. Programs are individually planned to address specific student needs. Completion of the EdS program is based on completion of required coursework, submission of a research proposal to a supervisory committee, and satisfactory defense of the research project.

Doctor of Philosophy in Disability Disciplines (PhD)
The PhD program prepares leadership personnel for positions in research and personnel preparation in the areas of special education, rehabilitation, applied behavior analysis, and disabilities studies. The PhD program is designed to develop students’ competence in (1) mastery of the theoretical and applied content underlying provision of appropriate educational and other services for persons with disabilities; (2) ability to conduct independent research; and (3) ability to conduct effective personnel preparation, including teaching audiences with varying levels of sophistication and expertise, and supervising the delivery of special education and rehabilitation services.

Doctorate of Education (EdD)
The department participates in the College of Education and Human Services Interdepartmental Doctorate of Education (EdD) degree program. The general purpose of the special education emphasis area of the EdD program is to prepare leadership personnel for positions in administration, supervision, curriculum development, and teacher training. For information about areas of specialization, emphases of study, research sponsored, admission requirements, procedures to follow, and other information, see pages 251-252 of this catalog.

Financial Assistance

Scholarships, teaching assistantships, and research assistantships are available for qualified doctoral students. Scholarships are also available to qualified students in the Master of Rehabilitation Counseling program.

Additional Information

Graduate handbooks outlining the graduate programs, policies, and procedures in the Department of Special Education and Rehabilitation may be obtained from the department office in room 315 of the Education Building.

For more information about graduate requirements and the sequence in which courses should be taken, see major requirement sheets, available from the department.

Graduation requirements described in this catalog are subject to change. Students should check with the department concerning possible changes.

Because the Special Education and Rehabilitation graduate programs occasionally undergo fine-tuning and updating, prospective students are advised to check the departmental website at: http://sped.usu.edu

Special Education and Rehabilitation Faculty

Professors
Benjamin Lignugaris/Kraft, personnel preparation, secondary special education, social/vocational skill training, behavioral analysis, instructional design and program development
Robert L. Morgan, behavior analysis/transition
Sarah Rule, early intervention, developmental disabilities, technology and teacher education
Charles L. Salzberg, applied behavioral analysis, single-subject research design, research on teacher training, employment preparation for persons with disabilities, video assisted training programs, paraeducator training, and students with disabilities in higher education
Department of Special Education and Rehabilitation

Julie F. Smart, rehabilitation counseling, disability studies, Hispanics with disabilities, Spanish translation of rehabilitation instruments, multicultural rehabilitation
Richard P. West, behavior analysis in education, computer-based decision making, parent training, school organization and administration
Karl R. White, research and evaluation, early intervention

Adjunct Professor
Martell Menlove, special education administration

Professors Emeritus
Garth M. Eldredge, rehabilitation counseling
Marvin G. Fifield, evaluation of persons with emotional disturbances
Alan M. Hofmeister, technology, school reform, reading and math instruction

Associate Professors
Judith M. Holt, early childhood and visually impaired
Pamela J. Hudson, adolescents with mild disabilities, mathematics
Ronda Menlove, special education, educational leadership, special education law, distance education
Timothy A. Slocum, reading, mild/moderate disabilities, behavior analysis, research methods

Research Associate Professor
Marilyn Likins, paraeducators, mild and moderate disabilities, alternative teacher preparation

Adjunct Associate Professor
Daniel P. Morgan, behavior disorders, social skills, legal issues in special education, personnel development in special education

Associate Professors Emeritus
Hyrum S. Henderson, teacher training
Devoe C. Rickert, vocational training

Assistant Professors
David E. Forbush, mild/moderate disabilities, reading, behavior analysis in schools, assessment, educational systems change, educational leadership
Nancy K. Glomb, mild/moderate disabilities, distance education
Thomas S. Higbee, early childhood, severe disabilities, autism
Jared Schultz, rehabilitation counseling

Research Assistant Professors
Michael J. Millington, rehabilitation counseling
Cynthia J. Rowland, distance education, speech and language development, naturalistic instructional methods, early literacy, assistive technology

Adjunct Assistant Professors
Catherine E. Chambliss, disability policy, supported employment
Julie Landeen, legal issues in special education, special education administration
Randyl Schellibe, mild and moderate disabilities

Clinical Instructors
Janice Neibaur Day, educational issues for children with visual impairments
including early literacy, family issues and needs, and assistive technology
Marlene Deer, preschool special education, naturalistic instruction
Barbara J. Fiechtli, preschool and infant service delivery
Lowell K. Oswald, professional staff development, progress evaluation, school district administration, implementation of research-based programs in classrooms
Tami W. Pyfer, severe and preschool special education, development
Kimberly H. Snow, curriculum development
Tim Tansey, rehabilitation of persons with severe mental illness, assessment issues with persons with disabilities, and professional development of rehabilitation counselors/psychologists

Adjunct Clinical Instructors
Melina Alexander, mild moderate special education, math education, distance education
Kirk Allen, emotionally disturbed, special education administration
Deb Bowen, vocational rehabilitation and transition
Alma Brown, classroom/behavior management and emotional behavior disorders, effective classroom instruction
Jerry Christensen, personnel development, special education leadership
Norman Corson, job placement of persons with disabilities
Marilyn Hammond, violence, sexual assault, disabilities, curriculum, and assistive technology
AnnaLee Hansen, mild and moderate disabilities
Karen T. Kowalski, special education law, behavior, issues in social justice
Lois Naegle, American Sign language, deaf culture, rehabilitation counseling
Bruce Schroeder, collaboration, special education administration, special education personnel development
Patricia B. Willis, learning disabilities, early literacy

Adjunct Lecturers
Gayle Baker, severe disabilities
Glenn Dyke, behavior disorders, mild and moderate disabilities
Cindy Myers, moderate and severe disabilities, alternative teacher preparation
Jeri Rigby, mild/moderate disabilities

Clinical Instructor Emeritus
Joan F. Forsgren-White

Graduate Program Coordinator:
Shawn W. Fisher, Fine Arts Center 139D, (435) 797-2120, sfisher@hass.usu.edu

Degrees offered: Bachelor of Arts (BA), Bachelor of Fine Arts (BFA), Master of Arts (MA), and Master of Fine Arts (MFA) in Theatre Arts

Undergraduate programs: BA—General Theatre Arts Studies (History and Dramatic Literature); BFA—Acting; Theatre Design and Technology (costume design, lighting design, scenic design, stage management, theatre technology); and Theatre Education

Graduate specializations: MFA—Advanced Technical Practice, Design (scenery, costume, lighting)

Undergraduate Programs

Objectives

The primary mission of the Department of Theatre Arts is to offer a flexible program with the following objectives:

1. To prepare students for professional work in performance, various types of theatre design, and technical practice with producing theatre organizations;
2. To teach appreciation and service courses contributing to the University Studies Program;
3. To prepare students for careers as theatre instructors in secondary schools and to provide service courses in support of the language arts curriculum of the State of Utah for elementary education majors;
4. To prepare students for advanced study and training;
5. To sponsor public performances in which students can practice the art and craft of theatre and interpretive/narrative performance. These productions will enhance the cultural life of the University community and region.

Production Groups and Theatres

The Theatre Arts Department sponsors the following production groups and divisions: Utah State Theatre, Old Lyric Repertory Company (summer), Studio/Conservatory Stage Series, and Utah State Children’s Theatre. Facilities used for performances by these groups include the 660-seat thrust stage Morgan Theatre in the Chase Fine Arts Center, the 380-seat proscenium Caine Lyric Theatre in downtown Logan, and a flexible 80-seat Studio Stage. Facilities also include a costume shop, scenery shop, sound studio, design studio, dance and movement laboratory, and storage areas.

Requirements

Departmental Admission and Scholarship Requirements
Admission requirements are the same as those described for the University on pages 16-20. Students in good standing may apply for admission or transfer to the program. Students transferring into the department must have a minimum 2.75 GPA (on a scale of 4.0) regardless of credit amount transferred. Students are encouraged to declare a theatre arts major early and consult an advisor as soon as they arrive on campus, as the professional BFA degree requires a minimum of three full years to complete. Admission to specialized BFA programs by audition, interview, or portfolio review, subsequent to admission to the department, is explained below. Students must maintain an average 2.75 minimum GPA in all theatre classes required for graduation. No grade of less than a C- is accepted in any theatre class, and no required classes, regardless of department, may be taken on a pass-fail basis.

Required Core Courses (15 credits)
All Theatre Arts majors are required to complete the following core courses:
THEA 1033 Beginning Acting (F,Sp) .................................................... 3
THEA 1513 Stage and Costume Crafts (F,Sp) ................................. 3
THEA 1713 Introduction to Playscript Analysis (F,Sp) .................... 3
THEA 2410 Directing (F,Sp) .......................................................... 3
THEA 3230 Survey of Western Theatre (F) ........................................ 3
THEA 2440 Movement: Stage Combat (F,Sp) .................................. 3
THEA 2430 Movement for Actors II (F,Sp) .................................... 3
THEA 1513 Stage and Costume Crafts ........................................... 3
THEA 1033 Beginning Acting ....................................................... 3
THEA 2490 Intermediate Acting: Shakespeare (F,Sp) .................... 3
THEA 2470 Movement: Stage Combat (F,Sp) ................................. 3
THEA 2480 Intermediate Voice for Theatre (Sp) ............................ 3

In addition, all students must complete a minimum of 6 credits of production practicum work:

**Required Practicum Courses (6 credits)**

Theatre Arts majors and minors should expect to work on Utah State Theatre and studio productions as a crew member nearly every semester. All Theatre Arts majors, except for the BFA with the Theatre Education emphasis, are required to complete the following production work requirements (6 credits). Only 1 credit of THEA 2555 or 2556 may be taken per assignment in a given semester (45 clock hours per credit or until assignment is completed).

THEA 2555/4750 Production Practicum: Scenery (F,Sp,Su) .............. 1
THEA 2555/4750 Production Practicum: Lighting (F,Sp,Su) .............. 1
THEA 2555/4750 Production Practicum: Properties (F,Sp,Su) ............ 1
THEA 2555/4750 Production Practicum: Costumes (F,Sp,Su) .......... 1
THEA 2555/4750 Production Practicum: Publicity (F,Sp,Su) .......... 1
THEA 2556/4750 Production Run Crew (F,Sp,Su) .......................... 1

Transfer students’ transcripts will be evaluated and a prorated production work requirement will be set at the time of admission to the program. Additional production work is required under some degree plans.

**Bachelor of Arts Degree**

A Bachelor of Arts degree in the General Theatre Arts Studies Program requires 60 credits. Requirements are as follows: core courses and production work (21 credits); performance courses (9 credits); design/technical courses (3 credits); dramatic literature/history courses (15 credits); and a university minor. To obtain a Bachelor of Arts degree, a student must fulfill the language requirement (see page 60). All students declaring a Theatre Arts major are enrolled in the BA program until they audition or interview for one of the BFA tracks. The BA degree is recommended for students interested in pursuing careers in stage directing, especially in a graduate program. In lieu of a senior project, students in this program must select a minor in consultation with their advisor, and fulfill all requirements for the minor selected.

**General Theatre Arts Studies Program (THEA)**

**BA Degree in Theatre Arts (48 credits) (2.75 GPA)**

**Language Requirement (see University graduation requirements)**

**Required Theatre Arts Department Core Courses (15 credits)**

**Required Practicum Courses (6 credits)**

**Required Performance Courses (select 9 credits minimum)**

THEA 1113 Beginning Voice (F) .................................................. 3
THEA 1430 Movement for Actors I (F,Sp) ...................................... 3
THEA 2420 Intermediate Acting: Scene Study (F,Sp) ....................... 3

THEA 2666 Performance Practicum I (F,Sp) (1cr, repeatable) or
THEA 2667 Performance Practicum II (F,Sp) (1cr, repeatable) or
THEA 4740 Advanced Performance Practicum I (F,Sp) (1-2 cr, repeatable)
or
THEA 4840 Advanced Performance Practicum II (F,Sp) (1-2 cr, repeatable)

THEA 3400 (DHA) Mask Building and Performance (F,Sp) .............. 3
THEA 3410 Dance for Theatre: Tap (F,Sp) ...................................... 3
THEA 3420 Dance for Theatre: Jazz (F,Sp) .................................... 3
THEA 3440 Dance for Theatre: Ballet (F,Sp) ................................. 3
THEA 5410 Advanced Directing (F,Sp) .......................................... 3

**Required Design Courses (select 3 credits minimum)**

THEA 2540 Lighting Design (F,Sp) ................................................ 3
THEA 3050 (DHA) Period Styles/Historic Interiors (F,Sp) ................. 3
THEA 3510 Scene Design (F,Sp) .................................................... 3
THEA 3520 Stage Costume Design (F,Sp) ....................................... 3
THEA 3570 (DHA) Historic Clothing (F,Sp) ................................... 3

**Required Dramatic Literature/History Courses (9 credits)**

ENGL 2300 (BHU) Introduction to Shakespeare (F) ....................... 3
THEA 5240 (DHA/CI) Contemporary Theatre (F,Sp) ..................... 3
THEA 5290 Special Topics in Theatre History and Literature (F,Sp) ... 3

**Elective Dramatic Literature/History Courses (select 6 credits minimum)**

ENGL 4300 Shakespeare (F,Sp) .................................................... 3
THEA 5250 Playwriting Company Workshop (F) ............................. 3
THEA 5270 Performance Theory and Criticism (Sp) ......................... 3
THEA 5290 Special Topics in Theatre History and Literature (a different topic than taken for required credit) (F,Sp) .......................... 3

**Required Minor (12 credits minimum)**

Since the study of theatre requires an understanding of many different fields of human endeavor, students majoring in Theatre Arts must select a minor in consultation with their advisor. Students are encouraged to select a minor that will broaden their knowledge of the world, as well as strengthen their practice of theatre.

**Sample Four-year Plan for Theatre Arts Major,**

**General Theatre Arts Studies Program (BA Degree)**

Minimum GPA for Admission: 2.75, USU; 2.75, Career
Minimum GPA for Graduation: 2.75, major courses; 2.0, USU;
2.75, Career
Minimum Grade Accepted: B- in performance and design courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately.

To make an appointment with a professional advisor, call (435) 797-3883.

**Freshman Year (30 credits)**

**Fall Semester (16 credits)**

ENGL 1010 (CL1) Introduction to Writing: Academic Prose ................ 3
THEA 1033 Beginning Acting ...................................................... 3
THEA 1513 Stage and Costume Crafts .......................................... 3
Foreign Language 1010-level course ......................................... 4
University Studies Breadth course ........................................... 3
Senior Year (30 credits)

Fall Semester (14 credits)
THEA 2555 Production Practicum (1 cr) or
THEA 2556 Production Run Crew (1 cr) ............................................... 1

Spring Semester (14 credits)
THEA 5910 Senior Project .............................................................. 2

General Theatre Studies Minor (18 credits) (2.75 GPA)

Note: Transcripts will list this minor as Theatre Arts Minor.

The General Theatre Studies Minor is available to all students. Students enrolled in this minor must submit a resume and/or production history of their theatre work to date. Progress will be reviewed on an annual basis.

Required Theatre Arts Courses (15 credits)
THEA 1033 Beginning Acting (F,Sp) .................................................. 3
THEA 1513 Stage and Costume Crafts (F,Sp) ................................. 3
THEA 1713 Introduction to Playwriting (F,Sp) ............................... 3
THEA 2410 Directing (F,Sp,Su) ....................................................... 3
THEA 3230 Survey of Western Theatre (F) .................................... 3

Elective Production Courses (3 credits)
Complete three performance or production practicum courses, to be determined in consultation with Theatre Arts advisor.
THEA 2666/4740 Performance Practicum I (F,Sp) (1-2 cr, repeatable) or
THEA 2667/4840 Performance Practicum I (F,Sp) (1-2 cr, repeatable) or
THEA 2555/4750 Production Practicum II (F,Sp, Su) (1-3 cr, repeatable) or
THEA 2556/4751 Production Run Crew (F,Sp, Su) (1 cr) or
THEA 4850 Advanced Production Projects (F,Sp, Su) (1-3 cr, repeatable) .................................. 3

Bachelor of Fine Arts Degree

Program Entrance Requirements
Students seeking the BFA degree who choose the Acting Emphasis or the Theatre Design and Technology Emphasis will be admitted by audition or an interview and portfolio review. Periodic audition and review will be undertaken to determine good standing in these programs.

This degree is highly recommended for those students desiring more intensive preprofessional training in their selected discipline. Students in these programs also complete a capstone recital or project during their senior year.

Acting Emphasis (AE) (78 Credits) (2.75 GPA)

BFA Degree in Theatre Arts
Candidates are accepted into this performance program through an audition and interview conducted by a BFA committee. Progress and retention in this emphasis is monitored through periodic recitals/auditions before the same body, and students must maintain B or better grades in all performance courses. All students in the Acting Emphasis must perform a recital during their senior year. Transfer students are subject to the same acceptance process and progress review. Inquiries about specific requirements and expectations should be directed to the Theatre Arts Office.

Students seeking the BFA degree must work closely with advisors. Most University Studies courses and the core curriculum should be completed before the end of the sophomore year, as training is conducted in a manner adapted from conservatory practice. Individual needs, interests, and goals of the student are taken into consideration for selection of elective courses.
Department of Theatre Arts

Required Theatre Arts Department Core Courses (15 credits)

Required Practicum Courses (6 credits)

Required Performance Courses (23 credits)
THEA 1113 Beginning Voice (F) .................................................. 3

THEA 5420 Advanced Acting: Absurdists (F,Sp) ......................... 3
THEA 5430 Advanced Acting: Acting for the Camera (F,Sp) .......... 3

Required Design/Technical Course (2 credits)
THEA 1223 Stage Makeup (F,Sp) ............................................. 2

Elective Theatre History/Literature (select 12 credits minimum)
THEA 4250 Playwriting (Sp) .................................................. 3
THEA 5240 (DHA/CI) Contemporary Theatre (F,Sp) .................. 3
THEA 5250 Playwriting Company Workshop (F) ..................... 3
THEA 5270 Performance Theory and Criticism (Sp) ................... 3
THEA 5290 Special Topics in Theatre History and Literature 
(repeatable for credit, if different topics) (F,Sp) ....................... 3
ENGL 2300 (BHU) Introduction to Shakespeare (F) ................. 3

BFA Acting Recital/Capstone (2 credits)
All BFA Acting Emphasis majors must perform a recital during their senior year. Recital material is to be selected and approved during the spring semester of the junior year, including submission of a written proposal. Students must be enrolled in THEA 5910 for 2 credits during the semester in which the recital is to be presented.

Recitals should be 45-60 minutes in duration and may be individual or combined efforts on the part of not more than two candidates (combined efforts must be approved by the BFA committee). Upon approval of the advisor, an individual performer may recruit no more than two additional performers. All BFA candidates are required to attend recitals.

Required Acting Recital
THEA 5910 Senior Project (BFA Performance Recital) (F,Sp) ........ 2

Theatre Performance Minor (18 credits) (2.75 GPA)
Note: Transcripts will list this minor as Theatre Arts Minor.

The Theatre Performance Minor is available to all students. Students must interview with a member of the BFA Performance Committee and submit a resume and/or production history of their theatre work to date. Progress will be reviewed on an annual basis.

Required Theatre Arts Courses (9 credits)
THEA 1033 Beginning Acting (F,Sp) ........................................ 3
THEA 1713 Introduction to Playscript Analysis (F,Sp) ................. 3
THEA 2666/4740 Performance Practicum I (F,Sp) (1-2 cr, repeatable) or
THEA 2667/4840 Performance Practicum II (F,Sp) (1-2 cr, repeatable) .......................................................... 3

Elective Performance Courses (9 credits)
Complete three or more classes from the BFA Acting Emphasis (AE) course of study, to be determined in consultation with Theatre Arts advisor.

Theatre Design and Technology Emphasis (TDE) (74-78 credits) (2.75 GPA)
BFA Degree in Theatre Arts
Candidates are accepted into the design and technology emphasis by interview and review of a portfolio by a BFA committee. Progress and retention in this emphasis is monitored by an annual review/interview with the BFA Design Committee. Students must maintain B or better grades in all design/technical courses. All students in the Design/Technical Emphasis must complete a final project during their senior year.

Required Theatre Arts Department Core Courses (15 credits)

Required Practicum Courses (6 credits)

Required Design/Technical Courses (17 credits)
THEA 1223 Stage Makeup (F,Sp) .................................................. 2
THEA 2540 Lighting Design (F,Sp) ........................................... 3
THEA 3050 (DHA) Period Styes/Historic Interiors (Sp,Su) ............ 3

Required upper-division Performance or Design courses ........9

Theatre Production Minor (18 credits) (2.75 GPA)

Note: Transcripts will list this minor as Theatre Arts Minor.

The Theatre Production Minor is available to all students. Students must interview with a member of the BFA Design Committee and submit a resume and/or production history of their theatre work to date. Progress will be reviewed on an annual basis.

Required Theatre Arts Courses (9 credits)
THEA 1713 Introduction to Playscript Analysis (F,Sp) ..........3
THEA 2410 Directing (F,Sp) .....................................................3
THEA 2555/4750 Production Practicum (F,Sp,Su)
(1-3 cr, repeatable) ....................................................... 3
Or
THEA 2556 Production Run Crew (F,Sp,Su) (1 cr) and
THEA 4850 Advanced Production Projects (F,Sp,Su)
(1-3 cr, repeatable) ....................................................... 3

Elective Production Courses (9 credits)
Complete three or more classes from the BFA Theatre Design and Technology Emphasis (TDE) course of study, to be determined in consultation with Theatre Arts advisor.

Theatre Education Emphasis (79 credits)
Candidates are accepted into the theatre education emphasis by interview and a review of a portfolio by the theatre education committee. Students earning a secondary education license must complete 35 additional credits in the Secondary Teacher Education Program (STEP), as well as an academic teaching minor approved by the College of Education and Human Services. All majors desiring a teaching license must apply for admission to teacher education. Progress and retention in this emphasis requires a minimum 2.75 GPA for admission to the STEP. All students in the Theatre Education Emphasis must complete a senior project.

Required Theatre Arts Department Core Courses (15 credits)

Theatre Education Courses (6 credits)
THEA 5340 Theatre Production Methods for Educators (Sp) ...3
THEA 5380 Drama in the Secondary Education Classroom:
Grades 7-12 (Sp) .............................................................. 3

Theatre History Courses (select 3 credits)
THEA 4250 Playwriting (Sp) ..................................................3
THEA 5240 (DHA/CI) Contemporary Theatre (F,Sp) .........3
THEA 5270 Performance Theory and Criticism (Sp) ..........3
THEA 5290 Special Topics in Theatre History and Literature (F,Sp) ..........3
ENGL 2300 (BHU) Introduction to Shakespeare (F) ..........3
ENGL 4300 Shakespeare (F,Sp) ............................................3
### Department of Theatre Arts

#### Theatre Performance Courses (select 6 credits minimum)
- **THEA 1030 (BHU)** Exploring Performance Through Aesthetic Texts (F,Sp,Su) ........................................... 3
- **THEA 1430** Movement for Actors I (F,Sp) .......................................................... 3
- **THEA 2420** Intermediate Acting: Scene Study (F,Sp) ........................................... 3
- **THEA 2430** Movement for Actors II (F,Sp) .......................................................... 3
- **THEA 2440** Introduction to Dance for Theatre: Jazz, Ballet, and Tap (F) .................... 3
- **THEA 2490** Intermediate Acting: Shakespeare (F,Sp) ........................................ 3
- **THEA 3410** Dance for Theatre: Tap (F,Sp) .......................................................... 3
- **THEA 3420** Dance for Theatre: Jazz (F,Sp) .......................................................... 3
- **THEA 3440** Dance for Theatre: Ballet (F,Sp) ....................................................... 3
- **THEA 4030** Storytelling (F,Sp,Su) ............................................................... 3
- **THEA 4480** Company Workshop (F,Sp,Su) ..................................................... 3
- **THEA 5410** Advanced Directing (F,Sp) .............................................................. 3
- **THEA 5470** Advanced Acting: Modern Methods (F,Sp) ..................................... 3

**Theatre Performance Practicum Courses (select 2 credits)**
- **THEA 4740** Advanced Performance Practicum I (F,Sp) (1-2 cr, repeatable) or
- **THEA 4840** Advanced Performance Practicum II (F,Sp) (1-2 cr, repeatable) ........ 1-2
- **THEA 5310** Theatre Mentorship and Service (F,Sp,Su) (1-3 cr, repeatable) .......... 1-3

**Theatre Design/Technical Courses (select 6 credits minimum)**
- **THEA 1223** Stage Makeup (F,Sp) ........................................................................ 2
- **THEA 2540** Lighting Design (Required) (F,Sp) ..................................................... 3
- **THEA 2550** Stage Management (F,Sp) .................................................................. 3
- **THEA 3510** Scene Design (F,Sp) ....................................................................... 3
- **THEA 3520** Stage Costume Design (F,Sp) ........................................................... 3
- **THEA 4480** Theatre Leadership and Management (Sp) ....................................... 3

**Theatre Production Practicum Courses (select 6 credits minimum; 3 credits must be upper division)**
- **THEA 2555** Production Practicum (F,Sp,Su) (1 cr, repeatable) or
- **THEA 2556** Production Run Crew (F,Sp,Su) (1 cr) ............................................. 1-2
- **THEA 4750/4850** Advanced Production Practicum (F,Sp,Su) (1-3 cr, repeatable) ... 1-3

**BFA Theatre Education Senior Project/ Capstone Requirements**
During their senior year, students in the Theatre Education emphasis must complete a project chosen from among the following options, as approved by their advisor and one additional faculty member. The project may be developed in conjunction with student teaching to be assessed through THEA 5390, Student Teaching Seminar; or must be selected from one of the following options: (1) a BFA design or technical Senior Project, subject to the same guidelines; (2) a BFA Performance Recital, subject to the same guidelines; or (3) directing a studio one-act play or independent production. Project material must be selected and approved during the spring semester of the junior year, including submission of a written proposal. If the project is not part of student teaching, students must be enrolled in THEA 5910 for 2 credits during the semester in which the recital is to be presented. These credits will be in addition to the 44 credits required for the Theatre Education emphasis.

**Required Senior Courses**
- **THEA 5390** Student Teaching Seminar (taken in conjunction with STEP Program) (F,Sp) .................................................. 2
- **THEA 5910** Senior Project (F,Sp) ........................................................................ 2

**Secondary Teacher Education Program (STEP) (35 credits) (2.75 GPA)**
- The Secondary Teacher Education Program (STEP) prepares and licenses students to teach in public secondary schools. The program consists of three successive semesters of education courses, including THEA 3300 or 4300, THEA 5370, and THEA 5390, culminating in supervised student teaching in both the major and minor subject areas.

The STEP requires admission to the Secondary Education Department, College of Education and Human Services. Information about the program, including admission requirements, approved minor subject areas, and the three-semester course sequence, can be found at the Secondary Education website: [http://www.coe.usu.edu/seced](http://www.coe.usu.edu/seced)

**Minor Teaching Subject Area (Required)**
(approximately 20-30 credits, depending on subject)
Students must complete a University-approved teaching minor.

**Sample Four-year Plan for Theatre Arts Major, Theatre Education Emphasis**

**Minimum GPA for Admission:** 2.75, USU; 2.75, Career

**Minimum GPA for Graduation:** 2.75, major courses; 2.75, USU; 2.75, Career

**Minimum Grade Accepted:** B- in major courses

This is a sample plan. It outlines University and major requirements in very general terms. While there are requirements that are sequential, many are flexible and do not need to be completed exactly in the order listed. Students should always check with their faculty and professional advisors to be sure they are meeting the requirements appropriately. To make an appointment with a professional advisor, call (435) 797-3883.

**Freshman Year (31 credits)**

**Fall Semester (15 credits)**
- **ENGL 1010 (CL1)** Introduction to Writing: Academic Prose ........................................... 3
- **THEA 1033** Beginning Acting ............................................................................. 3

**Spring Semester (16 credits)**
- **THEA 2522** Beginning Acting (Sp) ..................................................................... 3
- **THEA 2555** Production Practicum (1 cr) ............................................................ 3
- **THEA 2556** Production Run Crew (1 cr) ............................................................ 3
- **THEA 1713** Survey of Western Theatre ............................................................. 3

Begin crafting and assembling portfolio for Theatre Education.

**Sophomore Year (32 credits)**

**Fall Semester (16 credits)**
- **THEA 2410** Directing .................................................................................... 3
- **THEA 2555** Production Practicum (1 cr) ............................................................ 3
- **THEA 2556** Production Run Crew (1 cr) ............................................................ 3
- **THEA 3230** Survey of Western Theatre ............................................................. 3
- **THEA 3300 or 4300** ................................................................. 3
- **THEA 5370** ................................................................. 3
- **THEA 5390** ................................................................. 3

**Required Senior Courses**
- **THEA 5390** Student Teaching Seminar (taken in conjunction with STEP Program) (F,Sp) .................................................. 2
- **THEA 5910** Senior Project (F,Sp) ........................................................................ 2

Review portfolio with faculty advisor.
Department of Theatre Arts

Spring Semester (16 credits)
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................................. 3
THEA 2555 Production Practicum (1 cr) or
THEA 2556 Production Run Crew (1 cr) .............................................. 1
Theatre Minor course ........................................................................ 3
Required Technical course ................................................................. 3
Teaching Minor course ..................................................................... 3
Quantitative Intensive (QI) course ...................................................... 3

Complete Teacher Education Writing Exam.

Junior Year (32 credits)
Fall Semester (16 credits)
THEA 4740/4840 Advanced Production Practicum (1 cr) ......................... 1
Theatre Minor course ........................................................................ 3
Depth Life and Physical Sciences (DSC) course ................................... 3
THEA 5240 (CI) Contemporary Theatre ........................................... 3
THEA 5360 Drama in the Secondary Education Classroom: Grades 7-12 ....................................................... 3
Teaching Minor courses ................................................................... 6
University Studies Breadth course .................................................... 3

Senior Project (if not doing Senior Project in Senior Year) 3 credits

Spring Semester (16 credits)
THEA 4750 Advanced Production Practicum (1 cr) or
THEA 4850 Advanced Production Projects (1 cr) .................................. 1
THEA 5240 (CI) Contemporary Theatre ........................................... 3
THEA 5360 Drama in the Secondary Education Classroom: Grades 7-12 ....................................................... 3
Teaching Minor courses ................................................................... 6
Senior Project .................................................................................. 2

Theatre Arts Teaching Minor (29 credits) (2.75 GPA)
The Theatre Arts Teaching Minor is an approved teaching minor for Secondary Education students majoring in other subject areas. Students enrolled in this minor must interview with the Theatre Arts Department and submit a portfolio that includes their diverse theatre experiences to date. This portfolio is used for advising purposes, as well as for scholarship consideration. The portfolio is required for entrance into the STEP Program, and USOE currently requires a portfolio in lieu of a praxis exam, in order for the student to be considered “highly qualified,” according to the “No Child Left Behind” regulations.

Required Theatre Arts Department Core Courses (15 credits)
Theatre Education Courses (select 3 credits minimum)
THEA 5340 Theatre Production Methods for Educators (Sp) ............... 3
THEA 5360 Drama in the Secondary Education Classroom: Grades 7-12 (Sp) ....................................................... 3

Theatre Performance Practicum Courses (select 2 credits)
THEA 4740/4840 Advanced Performance Practicum (F,Sp) (1-2 cr, repeatable) ....................................................... 1-2
THEA 5310 Theatre Mentorship and Service (F,Sp,Su) (1-3 cr, repeatable) ....................................................... 1-3

Theatre Production Practicum Courses (select 6 credits minimum; 3 credits must be upper division)
THEA 2555 Production Practicum (F,Sp,Su) (1 cr, repeatable) or
THEA 2556 Production Run Crew (F,Sp,Su) (1 cr) .............................................. 1-2
THEA 4750 Advanced Production Practicum (F,Sp,Su) (1-3 cr, repeatable) ....................................................... 1-3

Production Responsibilities
Because the production programs of the department are some of the most important training tools of the discipline, all majors and teaching minors are required to participate in them. A permanent theatre participation record is maintained for each student, and successful completion of crew and performance assignments is a requirement for graduation.

As a capstone experience to their university careers, all majors in their senior year are required to complete a project or recital appropriate to their area of emphasis, except those in the General Theatre Arts Studies BA program.

Financial Support
Scholarships, grants-in-aid, and work-study opportunities are available through the University. In addition, the department offers talent awards and tuition scholarships to its own majors. These are generally for one semester of in-state tuition and may be applied for each semester by continuing students. Several auditions and interviews are scheduled during the year, both on-campus and at regional theatre conferences and festivals. The department offers special work grants through its production program for qualified, skilled students. There are a number of named scholarships awarded to students qualifying under specific conditions. Contact the Theatre Arts Department for more information.
Department of Theatre Arts

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. Minimum GPA requirements for participation in departmental honors vary by department, but usually fall within the range of 3.30-3.50. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level. The campus-wide Honors Program, which is open to all qualified students regardless of major, offers a rich array of cultural and social activities, special classes, and the benefit of Honors early registration. Interested students should contact the Honors Program, Main 15, (435) 797-2715, honors@cc.usu.edu. Additional information can be found online at: http://www.usu.edu/honors/

Additional Information

Major requirement sheets, which provide detailed information about requirements for undergraduate programs within the Theatre Arts Department, can be obtained from the department, or accessed online at: http://www.usu.edu/majorsheets/

Graduate Programs

Admission Requirements

All students making application to the MFA program who cannot audition or interview with a member of the theatre arts faculty must submit a resume and a portfolio with renderings, designs, photographs appropriate to the specialization, and any special letters of reference not included with the formal application to the School of Graduate Studies.

The Miller Analogies Test (MAT) may be substituted for the more standard GRE, although the department does not recommend the MAT for international students.

Students who have received their undergraduate training at other institutions or in a discipline other than theatre will be expected to meet a proficiency equivalent to that of USU Theatre Arts graduates. This may require the student to complete the following minimum 20-credit program, which will not count toward the graduate degree:

THEA 1033 Beginning Acting (F,Sp) ..............................................3
THEA 1513 Stage and Costume Crafts (F,Sp) ........................3
THEA 2410 Directing (F,Sp) .....................................................3
THEA 3230 Survey of Western Theatre (F) .................................3
THEA 4750 Advanced Production Practicum (F,Sp,Su) .................3
Elective Theatre Arts courses in one program area ........................6

The student will be given credit for any equivalent courses taken within seven years prior to the date of admission.

Students accepted into the program must begin during the fall semester. The nature of the discipline and the program require that students maintain a continuous residence at the campus during the first two years of study.

Master of Arts

The candidate for the 30 (minimum) credit MA degree will normally complete a thesis, but may, with the approval of the supervisory committee, present a thesis alternative Plan B (36 credits minimum required).

Required Courses (30 credits)

Requirements are as follows:

THEA 6010 Introduction to Graduate Study in Theatre (F) ...............3
THEA 6240 Contemporary Theatre (F,Sp) ......................................3
THEA 6790 Seminar in Drama (Sp) .............................................3
THEA 6800 Graduate Studies in Theatre: Dramaturgy Project ..........2

Two advanced theatre history or dramatic literature courses selected from the Theatre Arts, English, or Languages, Philosophy, and Speech Communication departments are also required (6 credits).

Students must also complete two 5000- or 6000-level THEA courses, two of which must be in a single area.

Generally, students complete up to 8 thesis credits in THEA 6970. However, under special circumstances, a Plan B option in this program is available, requiring 12 credits of special project work and no more than 3 thesis credits in THEA 6970, for a total of 36 credits minimum.

In addition, the standard language competency of 15 credits in one language is required for the MA degree (see pages 106-107).

Master of Fine Arts

(60 credits minimum)

The candidate for the 60 (minimum) credit MFA must complete the Plan B program, and will undertake from three to four creative projects in the appropriate specialization. Under this plan, the required project reports customarily take the form of production books, journals, or a design or technical portfolio.

The student may specialize in one of the following areas. It is recommended that both a primary and a secondary emphasis be elected.

Scenery Design
Costume Design
Lighting Design
Advanced Technical Practice

The minimum residency is four semesters, including one or two summers in an established repertory or stock company, or equivalent experience. Participation in the department’s summer Old Lyric Repertory Company will satisfy this requirement. A minimum total of 60 semester credits is required. The nature of the discipline, as well as the resources of the department, discourage credit by extension, large amounts of transfer credit (i.e., in excess of 12 credits), or numerous off-campus projects.

Students who have already earned an MA degree in theatre from an accredited institution will generally be given approximately one academic year of credit toward the MFA degree. To finish the MFA degree, they will then be required to complete a specialized program of approximately 40 credits.
Required Courses
The program is completed in three phases, and while there may be considerable overlap between them, students undergo formal reviews before advancing to the next phase. The number of semesters given is approximate.

I. Entry Phase (approximately two semesters) (19 credits)
A. Required Course (3 credits)
THEA 6010 Introduction to Graduate Study in Theatre (F) ............... 3

B. Advanced Literature Component (select two courses) (6 credits)
THEA 6030 Storytelling (F,Sp,Su) ............................................. 3
THEA 6240 Contemporary Theatre (F,Sp) .................................. 3
THEA 6250 Playwriting (Sp) .................................................... 3
THEA 6270 Performance Theory and Criticism (Sp) .................. 3
THEA 6290 Special Topics in Theatre History and Literature (F,Sp) .... 3

C. Advanced Design Coursework (in areas of specialization) (select 6 credits)
THEA 5510 Computer-Aided Design for Theatre (F) .................. 3
THEA 5950 Rendering and Painting for the Theatre (F,Sp) ............ 3
THEA 6480 Theatre Leadership and Management (Sp) ............... 3
THEA 6510 Advanced Scene Design (F,Sp) ............................. 3
THEA 6520 Advanced Costume Design (F,Sp) .......................... 3
THEA 6540 Advanced Lighting Design (Sp) ............................. 3
THEA 6790 Seminar in Drama (Topics include: Drafting for Theatre, Tailoring, Pattern Drafting, Structural Design for the Stage, Costume Crafts) (F,Sp) ......................................................... 1-4
THEA 6900 Research Studies (F,Sp,Su) ..................................... 1-4

D. Design Studies (complete 2 credits each semester) (4 credits)
THEA 5590 Design Studies for Theatre (F,Sp) ................................ 4
THEA 5950 Rendering and Painting for the Theatre (F,Sp) ............ 3

During (or upon completion of) the first semester of this phase, the student will:
1. Submit a petition to advance to the next phase.
2. Nominate an MFA Supervisory Committee of at least three members and submit the list of members to the department head.
3. Identify three projects for the next phase, after consultation with the graduate committee and department head of Utah State Theatre regarding program scheduling for the following season.
4. Develop a study list with the help of the committee, outlining the course of study for the project and culminating phases.

II. Project Phase (approximately three semesters) (35 credits)
A. Design Studies (complete 2 credits each semester) (6 credits)
THEA 5590 Design Studies for Theatre (F,Sp) ................................ 6

B. Cognate Skill Coursework (6 credits)
A minimum of two courses is required to develop skills or increase knowledge in a field related to the area of specialization. Courses are subject to approval by the Graduate Study Committee. Students in any of the Design or Advanced Technical Practice specializations will take courses in: art, engineering and technology education, welding, furniture construction or cabinetry, or landscape architecture. Students may petition to take coursework in other disciplines, upon justification of relevance to the course of study.

C. Advanced Design Coursework (in areas of specialization) (9 credits)
THEA 5510 Computer-Aided Design for Theatre (F) .................. 3
THEA 5950 Rendering and Painting for the Theatre (F,Sp) ............ 3
THEA 6480 Theatre Leadership and Management (Sp) ............... 3
THEA 6510 Advanced Scene Design (F,Sp) ............................. 3
THEA 6520 Advanced Costume Design (F,Sp) .......................... 3
THEA 6540 Advanced Lighting Design (Sp) ............................. 3
THEA 6790 Seminar in Drama (Topics include: Drafting for Theatre, Tailoring, Pattern Drafting, Structural Design for the Stage, Costume Crafts) (F,Sp) ......................................................... 1-4
THEA 6900 Research Studies (F,Sp,Su) ..................................... 1-4

D. Graduate Projects in Theatre (9 credits)
THEA 6920 Project in Theatre A .............................................. 3
THEA 6920 Project in Theatre B .............................................. 3
THEA 6920 Project in Theatre C .............................................. 3

E. Repertory Theatre Performance or Production (4-8 credits)
THEA 6740 or 6750 Old Lyric Repertory Company or its equivalent in a recognized stock or repertory program; a letter of satisfactory performance from the company director should be submitted to the department (repeatable) ......................................................... 4-8

Notes:
1. Students may also begin projects while they are still in the Entry Phase, but credit given for projects should include time for assembling and writing up the report, which is due the following semester; the supervising instructor will notify the major professor or advisor when this is completed.
2. Planning of the major projects should begin as early as possible in this phase.
3. Qualified major and minor projects should be identified by the faculty each spring, based upon the plays selected for the following season. Graduate students will meet with the faculty or department head to discuss directing, design, or technical assignments; or request a list of such projects by mid-April each year.
4. During (or upon completion of) this phase, the student will:
   a. Submit a petition to advance to the final phase. The date of this petition will depend upon individual progress.
   b. Submit proof that projects A, B, and C, as well as the written reports for them, have been completed.
   c. Submit a proposal and/or preliminary work for the major culminating project: renderings, preliminary working drawings, etc.

Culminating Phase (one semester minimum)
Required Courses (7 credits)
THEA 6180 Theatre Production Portfolio (Sp) ............................ 3
THEA 6970 Thesis (F,Sp) ....................................................... 4
(Assemble Plan B reports and complete major report in thesis format.)
Note:
The option to cancel a student project, or to allow work to proceed but disqualify it as an MFA project based upon insufficient preparation or validity, rests with the department’s Graduate Study Committee, the student’s Supervisory Committee chairperson (advisor), and the Executive Producer of Utah State Theatre. This rule is designed to protect the priorities of the department and the integrity of its productions.

During (or upon completion of) this phase, the student will:

1. Assemble the Supervisory Committee for a final review (defense) of the student’s graduate work.

2. File a complete copy of all Plan B reports with the department, in accordance with procedures of the School of Graduate Studies. Copyrighted material, such as published scripts, will be filed separately in the Theatre Arts Office.

3. Be awarded the appropriate degree.

Financial Assistance
Teaching and general assistantships are awarded by the department. Assistantships are generally in the area of production, depending on theatre needs and the skills of applying students, and are renewable for up to three years. Application should be made directly to the department by February 1. Graduate students are not guaranteed financial assistance during their initial year of residence. Several other grants and forms of support are available on a competitive basis. Fellowships may supplement assistantships when funding is available.

Career Opportunities
The MA degree is a general, nonterminal degree designed to train students for further doctoral work in the discipline and to serve as a career upgrade for secondary school teachers. Students interested in teaching dramatic literature and theatre history and criticism at the postsecondary level should plan to use the MA as a step toward further PhD studies. Some two-year colleges employ MA graduates in teaching positions; however, almost no four-year colleges do so.

The MFA is designed for students pursuing careers in educational, professional, and regional theatres, or, in some cases, further doctoral-level work. It is regarded by most university and college administrations as a terminal degree for individuals with academic appointments as acting instructors, designers, and technicians. The department makes no guarantee that its training will qualify its graduates to pass examinations administered by the theatrical trade unions or otherwise meet requirements for guild membership. MFA graduates are qualified to seek employment with regional and professional theatres, regardless of the guild or trade union status of these organizations.

Additional Information
Specific details about each of the foregoing programs are outlined in documents available through the department. Requirements are subject to change. Internet e-mail requests should be sent to: luannh@hass.usu.edu.

Theatre Arts Faculty
Professors
Mark L. Damen, playwriting, history; (part time)
Kevin Doyle, acting, directing
Colin B. Johnson, theatre history and criticism, film

Professor Emeritus
Sidney G. Perkes, scene and costume design

Associate Professors
Bruce L. Duerden, technical theatre, lighting
Dennis Hassan, scene design
Nancy E. Hills, costume design
Lynda Linford, acting
Adrienne Moore, voice, acting, directing

Associate Professor Emeritus
Arthur Y. Smith, interpretation, theatre education

Assistant Professors
Shawn W. Fisher, design, technical generalist
Artemis Preeshl, movement, dance, acting

Lecturer
Robbin C. Black, theatre appreciation, theatre education

Theatre Arts (THEA), pages 725-729
Interdepartmental Program in Toxicology

Director: Roger A. Coulombe, Jr.
Location: Animal Science 213
Phone: (435) 797-1600
FAX: (435) 797-1601
E-mail: rogerc@cc.usu.edu
WWW: http://toxicology.usu.edu

Degrees offered: Master of Science (MS) and Doctor of Philosophy (PhD) in Toxicology

Graduate Programs

Established in 1962, USU’s Interdepartmental Graduate Program in Toxicology is one of the first degree-granting graduate toxicology programs in the country. More than 140 students have received MS and PhD degrees through this research-intensive interdisciplinary program. Students affiliate with the program through one of several departments: Animal, Dairy and Veterinary Sciences (ADVS); Biology; Chemistry and Biochemistry; Civil and Environmental Engineering (CEE); or Plants, Soils, and Biometeorology (PSB). The USDA Poisonous Plants Laboratory also provides facilities and research projects for study.

Admission Requirements

Students with a degree in life sciences, physical science, medical science, or engineering and with adequate preparation in chemistry, biology, physics, and/or mathematics are encouraged to apply. Admission to the program requires compliance with the general admission requirements of the School of Graduate Studies, a faculty sponsor, and acceptance into the sponsoring professor’s home department. Applicants should have a minimum GPA of 3.0 from completed degree programs. International students must receive a minimum TOEFL score of 250 (computer-based) or 600 (paper-based).

Major Research Areas

Molecular and Biochemical Toxicology

Modern molecular biological techniques are used to determine the mechanisms of toxicity and carcinogenesis by examining how various natural and synthetic compounds interact with the cellular genome. Resultant mutations in oncogenes and tumor suppressor genes are being investigated. The mechanisms of free-radical toxicity, specifically by iron and other transition elements, are also important research topics. Other ongoing studies examine the mechanisms of cancer chemoprevention, chemical metabolism, effects of toxicants on macromolecular syntheses, and metabolic intermediates. The toxicity of poisonous plants is another program emphasis.

Environmental Toxicology

Utah State University has a comprehensive research program in several aspects of environmental toxicology. Specifically, Utah State University faculty pioneered the use of white-rot fungi for the biodegradation of environmental contaminants. Models are developed and tested for dealing with the migration of chemicals in the environment, especially those with potential routes for human exposure. Basic biological, chemical, and physical methods are explored for hazardous waste management programs.

Course Requirements

Students in the MS program are required to complete the following core courses: ADVS 6350, 6400, 6600 (taught alternate fall semesters), 6810; CHEM 5700, 5710; STAT 5200.

Students in the PhD program are required to complete the following core courses: ADVS 6350, 6400, 6600 (taught alternate fall semesters), 6810; BIOL 5600 or 5620; CHEM 5700, 5710; STAT 5200.

Additional coursework may be required, at the discretion of the student’s advisory committee.

Financial Assistance

Graduate students are eligible for competitive fellowships, teaching assistantships, and research assistantships. Out-of-state fees are waived, and in many cases, in-state fees are also waived. Hourly employment, which often permits waiver of out-of-state fees, is also available.

The Toxicology Graduate Program participates in the WICHE Western Regional Graduate Degree Program (WRGP). Residents of participating states may enroll in this program without paying nonresident tuition. To facilitate this process, applicants should inform the Toxicology Program of their WRGP status upon application.

Toxicology Program Faculty

Professors
Anne J. Anderson, plant toxicology (Biology)
Steven D. Aust, biochemical toxicology and bioremediation (Chemistry and Biochemistry)
Roger A. Coulombe, Jr., molecular toxicology, cancer chemoprevention, natural product toxicology (ADVS)
Howard M. Deer, pesticides and occupational health (ADVS)
William J. Doucette, fate of environmental chemicals, phytoremediation (CEE)
R. Ryan Dupont, biological waste treatment (CEE)
William J. Popendorf, occupational toxicology and industrial hygiene (Biology)
Ronald C. Sims, environmental engineering (CEE)

Research Professor
Darwin L. Sorensen, aquatic toxicology (CEE)

Associate Professors
Paul R. Grossl, soil chemistry and phytoremediation (PSB)
Jeffery O. Hall, veterinary toxicology (ADVS)

Collaborators at USDA Poisonous Plants Laboratory
Dale R. Gardner, natural product chemistry
Kip E. Panter, poisonous plants
James A. Pfister, behavioral toxicology
Bryan L. Stegelmeier, veterinary pathology
Kevin Welch, molecular toxicology
Department of Watershed Sciences

Department Head: Chris Luecke
Location: Natural Resources 210
Phone: (435) 797-2459
FAX: (435) 797-1871
E-mail: watershed@cc.usu.edu
WWW: http://www.cnw.usu.edu/departments/wats

Undergraduate Advisor: Maureen A. Wagner, Natural Resources 120, (435) 797-2448, maureen@cc.usu.edu

Degrees offered: Bachelor of Science (BS) in Fisheries and Aquatic Sciences; BS in Watershed and Earth Systems; Master of Science (MS) and Doctor of Philosophy (PhD) in Watershed Science; MS and PhD in Ecology; MS and PhD in Fisheries Biology

Graduate specializations: MS, PhD in Ecology—Aquatic Ecology; MS, PhD in Fisheries Biology—Aquatic Ecology, Conservation Biology, Fisheries Management

Undergraduate Programs

Objectives

Watershed science is the study of the physical, chemical, and biological processes associated with the movement of water across the landscape. Clean and adequate water supplies are essential elements of human societies. Understanding the interaction among water, earth materials, plants, and animals is essential to the management of wildland, agricultural, and urban ecosystems. The Department of Watershed Sciences offers comprehensive educational opportunities for undergraduate and graduate students interested in fisheries science, aquatic ecology, and the understanding of watershed ecosystems. Departmental faculty provide expertise in fish biology, the management and conservation of aquatic ecosystems, and the analysis of the water cycle. Degree programs within the Watershed Sciences Department help students learn how water links the physical, biological, and geographic aspects of watersheds. Knowledge of this linkage process is necessary for understanding and managing water supply, water quality, and ecosystem health.

Career Opportunities

Watershed scientists work throughout the United States, as well as in the developed and developing world, performing the tasks of understanding, managing, and restoring water supplies, water quality, and ecosystem health. Graduates of programs within the Watershed Sciences Department become scientists and managers for natural resources agencies, professionals with consulting and non-profit environmental firms, and teachers and researchers at major universities. Degree holders often work as environmental scientists, hydrologists, fisheries biologists, or specialists in geographic information analysis and remote sensing. With experience and/or advanced degrees, graduates of programs within the Watershed Sciences Department may do natural resource assessment, management planning, and resource impact analysis.

Federal agencies, such as the Forest Service, Fish and Wildlife Service, Geological Survey, Bureau of Land Management, Environmental Protection Agency, National Park Service, Bureau of Reclamation, and National Marine Fisheries Service, hire graduates of Department of Watershed Sciences academic programs. Graduates also find employment with state natural resource agencies, nongovernmental conservation organizations, and private consulting firms.

Requirements

Departmental Admission Requirements

Admission requirements for the department are the same as those described for the College of Natural Resources (see pages 128-129).

Academic Advisement

First-year students are assigned to the department head for initial advising. After students have completed 20 credits in the program, they are assigned a faculty advisor. Students are encouraged to meet with their advisor each semester prior to enrolling for courses. If they do not know who their advisor is, students should contact the Department of Watershed Sciences (NR 210) or the College of Natural Resources Academic Service Center (NR 120).

Graduation Requirements

All courses listed as major subject courses must be taken on an A-B-C-D-F basis. A grade of C- or better is required for all WATS courses used to meet the requirements for a major or minor in the department. The grade point average for all courses taught by the College of Natural Resources must be 2.5 or higher.

For information about changes in requirements, course sequence, and scheduling, students should confer with a departmental advisor. The undergraduate program can be readily tailored to individual student needs with the help of a faculty advisor.

In addition to completing the University Studies course requirements, all students earning an undergraduate degree in the Department of Watershed Sciences must complete the Common Departmental Core, as listed below. Some of these courses may be used toward the University Studies requirements, as indicated by the University Studies designations listed in parentheses following the course numbers.

Common Departmental Core (19 credits)

- ENVS 4000 (DSSS) Human Dimensions of Natural Resource Management (F) .................................................. 3
- WATS 1020 Watershed Sciences Professional Orientation (F) ............... 1
- WATS 3700 (CI) Fundamentals of Watershed Science (Sp) .................... 3
- WATS 4490 Small Watershed Hydrology (F) ........................................ 4
- WATS 4500 Limnology: Ecology of Inland Waters (Sp) ......................... 3
- WATS 4930 Geographic Information Systems (F) .......................... 4
- WATS 4980 Watershed Sciences Department Seminar (F,Sp) ........... 1

Bachelor of Science in Fisheries and Aquatic Sciences

Students in the Fisheries and Aquatic Sciences major must meet the course requirements for University Studies, as well as complete the Common Departmental Core listed above. They must also complete the requirements listed below in sections A through E.

A. Scientific Foundation (35 credits)

- BIOL 1610 Biology I (F) .......................................................................... 4
- BIOL 1620 (BLS) Biology II (Sp) .......................................................... 4
- CHEM 1210 Principles of Chemistry I (F,Sp) ...................................... 4
- CHEM 1215 Chemical Principles Laboratory I (F,Sp) ....................... 1
- CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) ................. 4
- CHEM 1225 Chemical Principles Laboratory II (F,Sp) .................. 1
- MATH 1050 (QL) College Algebra (F,Sp,Su) .................................. 4
- MATH 1100 (QL) Calculus Techniques (F,Sp,Su) ....................... 4
- NR 2220 General Ecology (F,Sp) ..................................................... 3
- PHYS 2110 The Physics of Living Systems I (F) .............................. 4
- STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) ....................... 3
Department of Watershed Sciences

B. Fisheries Courses (13 credits)

WATS 3100 (CI) Fish Diversity and Conservation (F) ...................... 3
WATS 3110 Fish Diversity Laboratory (F) ........................................ 1
WATS 4050 Principles in Fishery Management (Sp) ....................... 3
WATS 5200 Fish Habitat Relationships in Managed Forests (F) ........ 3
WATS 5550 Freshwater Invertebrates (Sp) ...................................... 2

C. Capstone Courses (6 credits minimum)

WATS 4510 Aquatic Ecology Practicum (F) ..................................... 3
WATS 4530 Water Quality and Pollution (F) .................................... 3
WATS 5330 Large River Management (F) ........................................ 3
WATS 6200 Watershed Analysis (Sp) ................................................ 2
Or
Approved Natural Resources Capstone Experience ............................ 3

D. Directed Elective Courses (23 credits)

Students must choose a minimum of 23 elective credits to complete the Fisheries and Aquatic Sciences degree requirements. The majority of these elective credits must come from courses directly related to the degree program. All elective courses must be approved by the student's faculty advisor before enrollment. The following is a list of recommended courses that could be used to satisfy this requirement. Courses listed in Section C that were not used to meet the Capstone Course requirement may be taken as part of the suggested electives.

ENVS 5320 Water Law and Policy in the United States (Sp) ............... 3
HIST 3950 (DHA/CI) Environmental History ................................... 3
PHIL 3510 (DHA) Environmental Ethics (F,Sp) .............................. 3
POLIS 4820 (DSS) Natural Resources and Environmental Policy:
Political Economy of Environmental Quality (Sp) ......................... 3
WATS 3000 Oceangraphy (Sp) ..................................................... 3
WATS 3820 (QI) Climate Change (Sp) .......................................... 3
WATS 5150 Fluvial Geomorphology (F) ......................................... 3
WATS 5640 Riparian Ecology and Management (Sp) ...................... 3
WILD 3810 Plant and Animal Populations (Sp) ............................... 3
WILD 4880 Genetics in Conservation and Management (F) .......... 3

Note: Students wanting to pursue federal employment should check the following U.S. Office of Personnel Management website for a listing of required coursework:

E. General Electives

Students may take the remainder of the 120 credits from any department. The guidelines described under General Education Requirements and University Studies Depth Education Requirements (see pages 49-59) should be consulted to ensure meeting University Studies Requirements.

Fisheries and Aquatic Sciences Major

Recommended Four-Year Plan of Study

Students should meet regularly with their faculty advisor and carefully plan their academic program, keeping in mind that many upper-division courses have prerequisites and must be taken in sequence.

The first two years of study include courses designed to give the student a sound scientific background, an introduction to the field of natural resources management, and an introduction to aquatic and earth resources.

Students following the recommended schedule listed below should be able to complete degree requirements in four years (eight semesters).

Freshman Year (29 credits)

Fall Semester (15 credits)

BIOL 1610 Biology I ................................................................. 4
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ............ 3
MATH 1050 (QL) College Algebra .......................................... 4
WATS 1020 Watershed Sciences Professional Orientation ............ 1

Spring Semester (14 credits)

BIOL 1620 (BLS) Biology II .................................................... 4
MATH 1100 (QL) Calculus Techniques ...................................... 3
WATS 4980 Watershed Sciences Departmental Seminar .............. 1

Sophomore Year (29 credits)

Fall Semester (15 credits)

CHEM 1210 Principles of Chemistry I ......................................... 4
CHEM 1215 Chemical Principles Laboratory I ............................ 1
STAT 3000 (QI) Statistics for Scientists .................................... 3
WATS 3100 (CI) Fish Diversity and Conservation ....................... 3
WATS 3110 Fish Diversity Laboratory ....................................... 1

Breadth Social Sciences (BSS) course ....................................... 3

Spring Semester (14 credits)

CHEM 1220 (BPS) Principles of Chemistry II ............................. 4
CHEM 1225 Chemical Principles Laboratory II .......................... 1
ENGL 2100 (CL2) Intermediate Writing: Research Writing in a
Persuasive Mode .................................................................. 3

Junior Year (30 credits)

Fall Semester (15 credits)

PHYS 2110 The Physics of Living Systems I ............................... 4
WATS 4490 Small Watershed Hydrology .................................. 4
WATS 4930 Geographic Information Systems ............................. 4

Directed Elective or General Elective course ............................... 3

Spring Semester (15 credits)

WATS 4500 Limnology: Ecology of Inland Waters ...................... 3
WATS 5550 Freshwater Invertebrates ....................................... 3

Directed Elective or General Elective courses ............................ 6

Senior Year (32 credits)

Fall Semester (15 credits)

ENVS 4000 (DSS) Human Dimensions of Natural Resource
Management ............................................................................ 3
WATS 5200 Fish Habitat Relationships in Managed Forests .......... 3
Capstone Courses (WATS 4510 and 4530 recommended) ............ 6

Directed Elective or General Elective course(s) ........................... 3

Spring Semester (17 credits)

WATS 4650 Principles in Fishery Management ............................. 3

Directed Elective or General Elective courses ............................ 14

Fisheries Science Minor Requirements (18 credits)

All courses required for the Fisheries Science minor must be taken on
an A-B-C-D-F basis. A grade of C- or better is required for all WATS
courses used to meet requirements for this minor.
**Department of Watershed Sciences**

### A. Fisheries Science Core Courses (9 credits)
- NR 2220 General Ecology (F,Sp) ................................. 3
- WATS 3100 (CI) Fish Diversity and Conservation (F) ................................. 3
- WATS 3700 (CI) Fundamentals of Watershed Science (Sp) ................................. 3

### B. Electives (9 credits)
Select three courses from the following:
- WATS 4500 Limnology: Ecology of Inland Waters (Sp) ................................. 3
- WATS 4650 Principles in Fishery Management (Sp) ................................. 3
- WATS 5200 Fish Habitat Relationships in Managed Forests (F) ................................. 3
- WATS 5550 Freshwater Invertebrates (Sp) ................................. 3
- WILD 3810 Plant and Animal Populations (Sp) ................................. 3

### Bachelor of Science in Watershed and Earth Systems

Students in the Watershed and Earth Systems major must meet the course requirements for University Studies, as well as complete the Common Departmental Core listed on page 540. They must also complete the requirements listed below in sections A through E.

#### A. Science Foundation (19 credits)
- CHEM 1210 Principles of Chemistry I (F,Sp) ................................. 4
- GEO 1110 (BPS) The Dynamic Earth: Physical Geology (F,Sp) ................................. 4
- MATH 1210 (QL) Calculus I (F,Sp,Su) ................................. 4
- STAT 3000 (QI) Statistics for Scientists (F,Sp,Su) ................................. 3
- PHYS 2210 (QI) General Physics—Science and Engineering I ................................. 4

#### B. Watershed and Earth Systems Courses (15 credits)
- SOIL 3000 Fundamentals of Soil Science (F,Sp) ................................. 4
- WATS 3820 (QI) Climate Change (Sp) ................................. 3
- WATS 5150 Fluvial Geomorphology (F) ................................. 3
- WATS 5170 Fluvial Geomorphology Lab (F) ................................. 2
- WILD 3750 Applied Remote Sensing (F) ................................. 3

#### C. Capstone Courses (6 credits minimum)
- WATS 4510 Aquatic Ecology Practicum (F) ................................. 3
- WATS 4530 Water Quality and Pollution (F) ................................. 3
- WATS 5330 Large River Management (F) ................................. 3
- WATS 6200 Watershed Analysis (Sp) ................................. 2
- Or
- Approved Natural Resources Capstone Experience ................................. 3

#### D. Directed Elective Courses (31 credits)
Students must choose a minimum of 31 elective credits to complete the Watershed and Earth Systems degree requirements. The majority of these elective credits must come from courses directly related to the degree program. All elective courses must be approved by the student's faculty advisor before enrollment. The following is a list of recommended courses that can be used to satisfy this requirement. Courses listed in Section C that were not used to meet the Capstone Course requirement may be taken as part of the suggested electives.
- CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) ................................. 4
- ENV S 5320 Water Law and Policy in the United States (Sp) ................................. 3
- MATH 1220 (QL) Calculus II (F,Sp,Su) ................................. 4
- PHYS 2220 (BPS/QI) General Physics—Science and Engineering II ................................. 4
- STAT 6810 Topics in Statistics (Spatial Statistics) (F) ................................. 3
- WATS 5200 Fish Habitat Relationships in Managed Forests (F) ................................. 3
- WATS 5250 Remote Sensing of Land Surfaces (Sp) ................................. 4
- WATS 5640 Riparian Ecology and Management (Sp) ................................. 3
- WATS 5760 Remote Sensing: Modeling and Analysis (Sp) ................................. 3

#### E. General Electives
Students may take the remainder of the 120 credits from any department. The guidelines described under General Education Requirements and University Studies Depth Education Requirements (see pages 49-59) should be consulted to ensure meeting University Studies Requirements.

Note: Students wanting to pursue federal employment should check the following U.S. Office of Personnel Management website for a listing of required coursework:
http://www.opm.gov/qualifications/SEC-IV/B/GS1300/1315.HTM

**Watershed and Earth Systems Major Recommended Four-Year Plan of Study**

Students should meet regularly with their faculty advisor and carefully plan their academic program, keeping in mind that many upper-division courses have prerequisites and must be taken in sequence. Students following the recommended schedule listed below should be able to complete degree requirements in four years (eight semesters).

**Freshman Year (31-32 credits)**

- Fall Semester (15 credits)
  - CHEM 1210 Principles of Chemistry I ................................. 4
  - ENGL 1010 (CL1) Introduction to Writing: Academic Prose ................................. 3
  - WATS 1020 Watershed Sciences Professional Orientation ................................. 1
- Spring Semester (16 credits)
  - CHEM 1220 (BPS) Principles of Chemistry II (4 cr) ................................. 4
  - Other approved elective course (3-4 cr) ................................. 3 or 4
  - MATH 1210 (QL) Calculus I ................................. 4
  - Other approved elective course (3-4 cr) ................................. 3 or 4

**Sophomore Year (29-31 credits)**

- Fall Semester (16-17 credits)
  - CHEM 1220 (QL) Calculus II (4 cr) ................................. 4
  - Other approved elective course (3-4 cr) ................................. 3 or 4
  - PHYS 2210 (QI) General Physics—Science and Engineering I ................................. 4
  - STAT 3000 (QI) Statistics for Scientists ................................. 3
  - Breadth American Institutions (BA) course ................................. 3
  - Breadth Life Sciences (BLS) course ................................. 3
- Spring Semester (13-14 credits)
  - ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode ................................. 3
  - PHYS 2220 (BPS/QI) General Physics—Science and Engineering II (4 cr) ................................. 3
  - Other approved elective course (3-4 cr) ................................. 3 or 4
  - SOIL 3000 Fundamentals of Soil Science ................................. 4
  - WATS 3820 (QI) Climate Change ................................. 3

**Junior Year (30 credits)**

- Fall Semester (17 credits)
  - ENV S 4000 (DSS) Human Dimensions of Natural Resource Management (F) ................................. 3
  - WATS 4490 Small Watershed Hydrology ................................. 4

Capstone course (WATS 4530 recommended) 3

Spring Semester (15 credits)
Capstone Course (WATS 5330 recommended) 3
Directed Elective or General Elective courses 12

Geographic Information Science Minor Requirements (17-19 credits)
All courses required for the Geographic Information Science minor must be taken on an A-B-C-D-F basis. A grade of C- or better is required for all WATS courses used to meet requirements for this minor.

A. Watershed and Earth Resources Core Courses (8 credits)
CS 1400 Introduction to Computer Science—CS 1 (F, Sp, Su) 3
CS 1405 Introduction to Computer Science—CS 1 Lab (F, Sp, Su) 1
WATS 4930 Geographic Information Systems (F) 4

B. Electives (9-11 credits)
Select three courses from the following:
CEE 6440 Geographic Information Systems in Water Resources (F) 3
WATS 4750 Fundamentals of Remote Sensing Science (F) 3
WATS 5250 Remote Sensing of Land Surfaces (Sp) 4
WATS 5760 Remote Sensing: Modeling and Analysis (Sp) 3
WILD 5750 Applied Remote Sensing (F) 3

Watershed Science Minor Requirements (16 credits)
All courses required for the Watershed Science minor must be taken on an A-B-C-D-F basis. A grade of C- or better is required for all WATS courses used to meet requirements for this minor.

A. Required Courses (10 credits)
WATS 3700 (CI) Fundamentals of Watershed Science (Sp) 3
WATS 4490 Small Watershed Hydrology (F) 4
WATS 4530 Water Quality and Pollution (F) 3

B. Electives (6 credits)
Select two courses from the following:
WATS 3820 (DSC/QL) Climate Change (Sp) 3
WATS 4500 Limnology: Ecology of Inland Waters (Sp) 3
WATS 5150 Fluvial Geomorphology (F) 3
WATS 5640 Riparian Ecology and Management (Sp) 3

Financial Assistance
The main sources of undergraduate financial assistance include University scholarships, grants-in-aid, work-study, and loans. In addition, more than 65 scholarships are offered for eligible students in the College of Natural Resources.

Scholarships are awarded for scholastic and professional achievements at the department, College of Natural Resources, and University level. For more information, contact College of Natural Resources academic advisors. Grants-in-aid and work-study are available from the Financial Aid Office. In addition, departmental faculty often employ undergraduate students to assist in research, extension, and outreach projects. These projects often involve field and laboratory data collection, data management and analysis, and report preparation.

Departmental Honors
Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. The minimum GPA requirement for admission into departmental honors in any department within the College of Natural Resources is 3.30. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level.

For information about the campus-wide Honors Program, see page 338.

Additional Information
For additional information about the Bachelor of Science requirements, course sequencing, and departmental specialization options and their related coursework, as well as updated information describing current programs and courses offered by the Department of Watershed Sciences, visit the Watershed Sciences main office, Natural Resources 210, or visit http://www.cnr.usu.edu/departments/wats. Major requirement sheets may be obtained at the departmental office, or online at: http://www.usu.edu/majorsheets/

Graduate Programs
Admission Requirements
General admission requirements apply, in addition to the requirements which follow. Although admission to the graduate program is treated on an application-by-application basis, the following are usually required: (1) a bachelor’s degree from an accredited college or university; (2) a GPA of 3.2 or better (out of 4.0) for the most recent 60 credits of academic coursework; (3) combined verbal and quantitative GRE scores above the 40th percentile; and (4) a letter of “interest and purpose” detailing the applicant’s reasons for seeking an advanced degree. Foreign students should have a TOEFL score of at least 550. The written statement of interest helps match applicants with faculty advisors. A faculty member must agree to serve as the major professor in order for an applicant to be accepted. Prospective students are encouraged to contact faculty members early in the application process to investigate mutual interests, projects, and prospects for financial support.
Previous training in the field is not a prerequisite for admission, although a sound background in the physical and biological sciences is recommended. Successful applicants without the necessary background will be expected to obtain it in the course of their studies for the advanced degree.

**Degree Programs**

A Master of Science degree in Fisheries Biology, Ecology, or Watershed Science, with emphasis on the management of fisheries or watershed resources directed toward decision-making roles in natural resource agencies, is offered for the applicant with previous agency experience and for the student motivated toward an administrative career. A Doctor of Philosophy degree in Fisheries Biology, Ecology, or Watershed Science is provided for students interested in pursuing a research or academic career.

A thesis or dissertation based on original research performed by the student is required. Written comprehensive examinations are required of all students pursuing the PhD degree. At the discretion of the student’s graduate supervisory committee, an additional oral examination may be required.

The minimum requirement for an MS degree is 30 credits, including at least 24 credits in residency and 6 credits of thesis research. The minimum requirement for a PhD degree is 60 approved graduate credits in addition to an MS degree, or 90 approved graduate credits with no MS degree. At least one year (a minimum of 32 credits), including a minimum of two consecutive semesters, of full-time registration must be in residence at USU.

With committee approval, graduate credit may be transferred from accredited graduate schools, provided the minimum residency requirement (including thesis and dissertation credit) at USU is met. Transfer credit, which must not have been used for any other degree, will be shown on official USU transcripts at completion of the degree.

**Specializations**

The MS and PhD degrees in Fisheries Biology allow students to specialize in Aquatic Ecology, Conservation Biology, or Fisheries Management. The MS and PhD degrees in Ecology allow students to specialize in Aquatic Ecology.

**Master of Natural Resources**

The department also participates in the College of Natural Resources Master of Natural Resources (MNR) degree program. For more information, see page 438.

**Financial Assistance**

General aspects of financial support for graduate students at Utah State University are listed on pages 100-101 in the Graduate Financial Assistance section. This includes important information on the University-wide policies and terms of reference for research and teaching assistantships, graduate tuition obligations and benefits, Western Regional Graduate Programs, and competitive University-wide fellowships and scholarships.

---

**Assistantships**

Research assistantships are available through individual faculty members who hold research grants or contracts. Occasionally, teaching assistantships are available through the department. Recipients of teaching assistantships are usually selected from among PhD students.

**Western Regional Graduate Programs**

The MS and PhD in Watershed Science are Western Regional Graduate Programs. For more information, see page 100.

**Watershed Sciences Faculty**

**Professors**

- Todd A. Crowl, aquatic ecology, conservation biology, tropical biology
- Charles P. Hawkins, aquatic ecology, stream and riparian ecosystems
- Chris Luecke, aquatic ecology, fisheries management
- John C. Schmidt, fluvial geomorphology and water policy
- Wayne A. Wurtsbaugh, limnology, fish ecology, and watershed biogeochemistry

**Adjunct Professors**

- Jeffrey L. Kershner, stream ecology and fish-habitat relationships
- Christopher Neale, remote sensing
- David G. Tarboton, geomorphology, hydrology
- Peter R. Wilcock, sediment transport and geomorphology

**Professors Emeritus**

- John A. Kadlec, wetland ecology and biogeochemistry
- John M. Neuhold, fisheries biology

**Associate Professors**

- Nancy O. Mesner, water quality, water policy, and modeling
- Helga Van Miegroet, wildland soils and biogeochemistry
- Michael A. White, global change ecology

**Adjunct Associate Professors**

- Michelle A. Baker, ecology, hydrology
- Joanna L. Endter-Wada, cultural anthropology, natural resource policy and sociology
- Robert R. Gillies, remote sensing and meteorology
- Joel L. Pederson, geomorphology, paleoclimatology, and sedimentology
- Bruce E. Rieman, fisheries management

**Assistant Professors**

- Matthew E. Baker, riparian ecology, watershed hydrology, GIS, and spatial analysis
- Phaedra E. Budy, assistant leader, fisheries, Utah Cooperative Fisheries and Wildlife Research Unit, fisheries management and conservation
- Tamao Kasahara, riparian hydrology, biogeochemistry

**Research Assistant Professor**

- Mark R. Vinson, aquatic invertebrate ecology and biomonitoring
Adjunct Assistant Professors
Nicolaas W. Bouwes, Jr., fisheries management, aquatic ecology
Jayne Brim-Box, population genetics and conservation biology
Robert E. Gresswell, aquatic ecology and fish biology
Simon J. McKirdy, plant biosecurity
David Naftz, geochemist
Michael J. Paul, bioassessment and stream ecosystem function
Brett Roper, USDA Forest Service Aquatic Monitoring Center Program Leader, aquatic ecologist

Michael L. Scott, riparian plant ecology
John Van Sickle, environmental statistics
J. Christopher Wilson, director, State of Utah Division of Wildlife Resources Fisheries Experiment Station, fish pathologist/nutritionist

WWW: http://www.cnr.usu.edu/departments/wild

Undergraduate Advisor:
Maureen A. Wagner, Natural Resources 120, (435) 797-2448, maureen@cc.usu.edu

Degrees offered: Bachelor of Science (BS) in Conservation and Restoration Ecology; BS, Master of Science (MS), and Doctor of Philosophy (PhD) in Forestry; BS in Rangeland Resources; BS in Wildlife Science; MS and PhD in Ecology; MS and PhD in Range Science; and MS and PhD in Wildlife Biology

Graduate specializations: MS, PhD in Ecology—Conservation Biology, Wildlife Ecology; MS, PhD in Wildlife Biology—Conservation Biology, Problem Wildlife Management, Wildlife Management

Undergraduate Programs

Objectives
The Department of Wildland Resources offers four undergraduate degrees: Conservation and Restoration Ecology, Forestry, Rangeland Resources, and Wildlife Science. These degree programs offer broad educational opportunities for students interested in the analysis and management of forest and rangeland ecosystems and their associated wildlife populations. The department's philosophy of education is to promote a broad interdisciplinary approach to natural resources analysis, management, and science.

The first two years of study in the Department of Wildland Resources are designed to provide students with a sound background in the natural sciences, an introduction to the field of natural resources management, and an introduction to their respective major. The last two years are designed to provide an advanced understanding of natural resource management and science, depth concentration in the major, and experience with the integration of scientific and management concepts across a diversity of disciplines and management scenarios. To maintain correct course sequencing and to stay on track for graduation, students are encouraged to enroll for 15 or more credits of coursework per semester.

Career Opportunities
Graduates in Wildland Resources programs qualify for a broad range of career opportunities with state and federal land management agencies, environmental consulting firms, private industries with environmental divisions, private land owners, and nonprofit environmental organizations. The Bachelor of Science degrees in Forestry, Rangeland Resources, and Wildlife Science are designed to meet the U.S. Office of Personnel Management (OPM) requirements for professional, permanent, full-time jobs with the Forest Service, Fish and Wildlife Service, Bureau of Land Management, National Park Service, or other federal natural resources agencies. The Bachelor of Science in Conservation and Restoration Ecology is designed to meet OPM requirements for Ecologist, but is flexible and intended to meet the needs of nongovernmental careers, as well as state and county restoration and management agencies. Graduates in all degree programs receive a solid background in biological and quantitative sciences, as well as the communication skills needed to succeed in many career paths.

Requirements

Admission Requirements
Admission requirements for the Department of Wildland Resources are the same as those described for the College of Natural Resources on pages 128-129.

Graduation Requirements
General Science Foundation Courses, Departmental Common Courses, and all courses listed as major subject courses must be taken on an A-B-C-D-F basis. A grade of C- or better is required for all WILD courses used to meet the requirements for a major or minor in the department. The grade point average for all courses taught by the College of Natural Resources must be 2.5 or higher.

In addition to completing the University Studies course requirements (see pages 49-59), all students earning an undergraduate degree in the Department of Wildland Resources must complete the General Science Foundation Courses and the Departmental Common Courses, as listed below. Some of these courses may be used toward the University Studies requirements, as indicated by the University Studies designations listed in parentheses following the course numbers.

A. General Science Foundation Courses (34 credits)
BIOL 1610 Biology I (F) .................................................................4
BIOL 1620 (BLS) Biology II (Sp) ..................................................4
MATH 1050 (QL) College Algebra (F,Sp,Su) .................................4
MATH 1100 (QL) Calculus Techniques (F,Sp,Su) ..........................3
SOIL 3000 Fundamentals of Soil Science (F,Sp) ............................4
STAT 2000 (QI) Statistical Methods (F,Sp) (3 cr) or STAT 3000 (QI) Statistics for Scientists (F,Sp) (3 cr) .............................3
NR 2220 General Ecology (F,Sp) ..................................................3

Select one of the following chemistry series (9 credits):
CHEM 1110 (BPS) General Chemistry I (F,Sp) .............................4
CHEM 1115 General Chemistry Laboratory (Sp) ..........................1
CHEM 1120 (BPS) General Chemistry II (Sp) ..............................4
OR
CHEM 1210 Principles of Chemistry I (F,Sp) ...............................4
CHEM 1215 Chemical Principles Laboratory I (F,Sp) .....................1
CHEM 1220 (BPS) Principles of Chemistry II (F,Sp,Su) ................4

B. Departmental Common Courses (27 credits)
WILD 2000 Introduction to Forest, Range, and Wildlife Sciences (F,Sp) .................................................................1
WILD 3600 Wildland Plant Ecology and Identification (F) ..............4
WILD 3610 Wildland Animal Ecology and Identification (F) ...........4
WILD 3700 (CI) Inventory and Assessment in Natural Resource and Environmental Management (F) .................................3
WILD 3710 Monitoring and Assessment in Natural Resource and Environmental Management (Sp) .................................3
WILD 3800 Wildland Ecosystems (Sp) .........................................3
WILD 3810 Plant and Animal Populations (Sp) ..............................3
WILD 3900 Vegetation and Habitat Management (F) .....................3
WILD 3900 Managing Dynamic Ecological Systems (Sp) .............3

Bachelor of Science in Conservation and Restoration Ecology

Students in the Conservation and Restoration Ecology major must meet the course requirements for University Studies, as well as complete the General Science Foundation Courses and the Departmental Common Courses listed above. They must also complete 13 credits of Degree Program Courses, as follows:
Department of Wildland Resources

A. Degree Program Courses (13 credits)
ENVS 3000 Natural Resources Policy and Economics (F) ....................4
ENVS 4000 (DSS) Human Dimensions of Natural Resource Management (F) .................................................................3
WILD 4600 Conservation Biology (Sp) ..................................................3
WILD 4700 Ecological Foundations of Restoration (Sp) ..........................3

B. Degree Program Electives (21 credits)
Students in the Conservation and Restoration Ecology major must meet with their advisor and plan a program of study for their 21 credits of degree program electives. Students must identify an organizing theme or comprehensive plan to guide the selection of their degree program electives, and all courses counted toward this requirement must be approved in advance by the student’s advisor and department head. Courses taken to complete a dual major with another major within the College of Natural Resources may not be counted toward fulfillment of this requirement.

C. Free Elective Credits
Students may take the remainder of the 120 credits from any department. Courses which meet General Education “Breadth Requirements” and University Studies “Depth Education Requirements” should be included to ensure meeting General Education and University Studies Requirements.

Note: Students wanting to pursue federal employment should check the following U.S. Office of Personnel Management website for a listing of required coursework:

Conservation and Restoration Ecology Major
Recommended Four-Year Plan of Study
Students should meet regularly with their faculty advisor and carefully plan their academic program, keeping in mind that many upper-division courses have prerequisites and must be taken in sequence. Students following the recommended schedule listed below should be able to complete degree requirements in four years (eight semesters).

A. First Year (28 credits)
Fall Semester (14 credits)
BIO 1610 Biology I ...........................................................................4
ENGL 1010 (CL1) Introduction to Writing: Academic Prose ..............3
USU 1300 (BA) U.S. Institutions (or other approved Breadth American Institutions course) .........................................................3
USU 1330 (BCA) Civilization: Creative Arts (or other approved Breadth Creative Arts course) .........................................................3
WILD 2000 Introduction to Forest, Range, and Wildlife Sciences ......1

Spring Semester (14 credits)
BIO 1620 (BLS) Biology II .................................................................4
ENVS 2340 (BSS) Natural Resources and Society (recommended)...3
MATH 1050 (QL) College Algebra ....................................................4
USU 1320 (BHU) Civilization: Humanities (or other approved Breadth Humanities course) .........................................................3

B. Second Year (31 credits)
Fall Semester (16 credits)
CHEM 1110 (BPS) General Chemistry I (4 cr) or
CHEM 1210 Principles of Chemistry I (4 cr) .....................................4
MATH 1100 (QL) Calculus Techniques ..............................................4
NR 2220 General Ecology .................................................................3
Approved Depth Humanities and Creative Arts (DHA) course ......3
Elective course(s) .................................................................3

Spring Semester (15 credits)
CHEM 115 General Chemistry Laboratory (1 cr) or
CHEM 1215 Chemical Principles Laboratory I (1 cr) .........................1
CHEM 1120 (BPS) General Chemistry II (4 cr) or
CHEM 1220 (BPS) Principles of Chemistry II (4 cr) .........................4
ENGL 2010 (CL2) Intermediate Writing: Research Writing in a Persuasive Mode .............................................................3
SOIL 3000 Fundamentals of Soil Science ....................................4
STAT 2000 (QI) Statistical Methods (3 cr) or
STAT 3000 (QI) Statistics for Scientists (3 cr) ..........................3

C. Third Year (29 credits)
Fall Semester (14 credits)
Note: These courses have multiple prerequisites and are designed to be taken as a block during fall semester of the junior year. Extended lab sessions and a multi-day field trip make it difficult to schedule additional courses during this semester.

WILD 3600 Wildland Plant Ecology and Identification ......................4
WILD 3610 Wildland Animal Ecology and Identification ..................4
WILD 3700 (CI) Inventory and Assessment in Natural Resource and Environmental Management .............................................3
WILD 3850 Vegetation and Habitat Management ............................3

Spring Semester (15 credits)
WILD 3710 Monitoring and Assessment in Natural Resource and Environmental Management .............................................3
WILD 3800 Wildland Ecosystems ....................................................3
WILD 3810 Plant and Animal Populations .....................................3
WILD 3900 Managing Dynamic Ecological Systems ....................3
Elective course(s) ...........................................................................3

D. Fourth Year (32 credits)
Fall Semester (16 credits)
ENVS 3000 Natural Resources Policy and Economics ......................4
ENVS 4000 (DSS) Human Dimensions of Natural Resource Management .............................................................3
Elective courses ...........................................................................9

Spring Semester (16 credits)
WILD 4600 Conservation Biology ...................................................3
WILD 4700 Ecological Foundations of Restoration ..........................3
Elective courses ...........................................................................10

Bachelor of Science in Forestry
Students in the Forestry major must meet the course requirements for University Studies, as well as complete the General Science Foundation Courses and the Departmental Common Courses listed above. They must also complete 32 credits of Professional Coursework, including the following:

A. Professional Coursework (32 credits)
ENVS 3300 Fundamentals of Recreation Resources Management (F) .............................................................3
ENVS 4000 (DSS) Human Dimensions of Natural Resource Management (F) .............................................................3
ENVS 4400 Economic Applications in Natural Resource Management (Sp) .............................................................4
WATS 3700 (CI) Fundamentals of Watershed Science (Sp) ..............3
WATS 4930 Geographic Information Systems (F) ..........................4
WILD 5350 Wildland Soils (Sp) .......................................................3
WILD 5420 (CI) Forest and Shade Tree Pathology (Sp) .................3
WILD 5700 Forest Assessment and Management (Sp) .................3
WILD 5710 Wildland Disturbance: Ecology and Management (F) ..3
WILD 5750 Applied Remote Sensing (F) ........................................3
Department of Wildland Resources

B. Electives
Students may take the remainder of the 120 credits from any department. Courses which meet General Education “Breadth Requirements” and University Studies “Depth Education Requirements” should be included to ensure meeting University Studies Requirements.

Note: Students wanting to pursue federal employment should check the following U.S. Office of Personnel Management website for a listing of required coursework:

Forestry Major Recommended Four-Year Plan of Study

Financial Assistance

The main opportunities for undergraduates to find financial support through grants, work-study, and loans are listed on pages 23-28 in the Financial Aid and Scholarship Information section. In addition, more than 30 scholarships are available for eligible students in the College of Natural Resources. Some students may be able to find paid internships with private or governmental organizations, or work for a faculty member on a research project. Interested persons should contact the college’s Academic Service Center for more information on financial assistance for undergraduate students.

Departmental Honors

Students who would like to experience greater academic depth within their major are encouraged to enroll in departmental honors. Through original, independent work, Honors students enjoy the benefits of close supervision and mentoring, as they work one-on-one with faculty in select upper-division departmental courses. Honors students also complete a senior project, which provides another opportunity to collaborate with faculty on a problem that is significant, both personally and in the student’s discipline. Participating in departmental honors enhances students’ chances for obtaining fellowships and admission to graduate school. The minimum GPA requirement for admission into departmental honors in any department within the College of Natural Resources is 3.30. Students may enter the Honors Program at almost any stage in their academic career, including at the junior (and sometimes senior) level.

For information about the campus-wide Honors Program, see page 338.

Additional Information

The undergraduate program may be tailored to individual student needs with the help of a faculty advisor. For additional information about the degree requirements, course sequencing, and departmental specialization options and their related coursework, as well as updated information describing current programs and courses offered by the Department of Wildland Resources, visit the Wildland Resources main office, Natural Resources 206, or visit: http://www.cnr.usu.edu/departments/wild

Major requirement sheets, which outline career opportunities and required courses for departmental majors, can be obtained from the department, or online at: http://www.usu.edu/majorsheets/

Graduate Programs

Admission Requirements

The Department of Wildland Resources offers opportunities for graduate study through MS and PhD degree programs in Ecology, Forestry, Range Science, and Wildlife Biology. The department also offers opportunities to participate in a college-wide Master of Natural Resources (MNR) degree program administered through the College of Natural Resources. The MNR is described more fully on page 438.
The programs of instruction and research leading to graduate degrees in the department are available only to students meeting high scholastic standards who are accepted for study by the departmental faculty. Students desiring entrance to these graduate programs should contact the department head for information concerning eligibility.

USU School of Graduate Studies general admission requirements are described on pages 101-102. Applicants for graduate study in the department should have a bachelor’s degree from an accredited college or university, a cumulative GPA of at least 3.0 (out of 4.0), and GRE scores (quantitative and verbal) above the 40th percentile. Foreign students should submit a TOEFL score of at least 550. Exceptions to these standards will be considered on a case-by-case basis. Written statements of interest help match applicants with faculty advisors. A faculty member must agree to serve as the major professor in order for an applicant to be accepted for study. Prospective students are encouraged to contact faculty members early in the application process to investigate mutual interests, projects, and prospects for financial support.

A natural resources baccalaureate degree is not required for admission to the department, although a sound background in the natural sciences is strongly recommended. Students lacking the requisite background will work with their supervisory committee to address deficiencies.

**Degree Programs**

The MS degree is offered for students motivated toward a management or administrative career in natural resources. The MS may be obtained through either a Plan A (research thesis) or Plan B (nonthesis) program, as described on page 106. The Plan A option requires a thesis based on original research conducted by the student. The Plan B option is recommended for professional forestry, rangeland, or wildlife managers who do not desire research training. The PhD degree is intended for students seeking a natural resources research or academic career. Comprehensive exams (both oral and written) are required in the doctoral program.

The minimum requirement for an MS degree is 30 credits, including at least 24 credits in residency and 6 credits of thesis research. The minimum requirement for a PhD degree is 60 approved graduate credits in addition to an MS degree, or 90 approved graduate credits with no MS degree. At least one year (a minimum of 32 credits), including a minimum of two consecutive semesters, of full-time registration must be in residence at USU.

With committee approval, graduate credit may be transferred from accredited graduate schools, provided the minimum residency requirement (including thesis and dissertation credit) at USU is met. Transfer credit, which must not have been used for any other degree, will be shown on official USU transcripts at completion of the degree.

**Research**

Cooperation with other departments and research centers of the University, as well as with government collaborators, permits strong graduate programs in all aspects of forest, range, and wildlife-related sciences. Particular mention should be made of the USU Ecology Center, in which the Wildland Resources Department is very active; the Utah Agricultural Experiment Station, which has a full program in both applied and basic research; the Utah Cooperative Fisheries and Wildlife Research Unit; the Predator Ecology and Behavior Field Station; the Jack H. Berryman Institute; the U.S. Forest Service Rocky Mountain Forest and Range Experiment Station; and the USDA Agricultural Research Service.

**Financial Assistance**

General aspects of financial support for graduate students at Utah State University are listed on pages 100-101 in the Graduate Financial Assistance section. This includes important information on the University-wide policies and terms of reference for research and teaching assistantships, graduate tuition obligations and benefits, Western Regional Graduate Programs, and competitive University-wide fellowships and scholarships. The College of Natural Resources also offers a limited number of Quinney Doctoral Fellowships for incoming doctoral students.

Graduate research assistantships may be available on a competitive basis to both MS and PhD students through major professors having contracts, grants, or other awards from the University, private sector, or government agencies. These assistantships vary in the amount of support offered, but they commonly offer a stipend to help cover living expenses and operating funds to carry out the research. Other benefits may include assistance with tuition and student health insurance, as well as opportunities to travel.

The department also has a few graduate teaching assistantships for students who help with teaching, grading, or recitation in large courses. These typically pay only a modest supplement on a semester basis, however, and are not sufficient to cover living expenses. Domestic PhD students on a research assistantship in some departmental degree programs are required to hold at least one teaching assistantship during their program, to obtain experience in classroom (mainly undergraduate) instruction. MS students may also hold teaching assistantships, contingent upon availability of funds. Acceptance to pursue graduate study does not guarantee the student financial assistance.

**Additional Information**

For more information about graduate programs and departmental faculty and their research emphasis areas, as well as updated information describing current programs and courses offered by the Department of Wildland Resources, visit the Wildland Resources main office, Natural Resources 206, or visit: http://www.cnr.usu.edu/departments/wild

**Wildland Resources Faculty**

**Professors**

John A. Bissonette, Leader, Utah Cooperative Fish and Wildlife Research Unit, landscape ecology, terrestrial vertebrate ecology

F. E. “Fee” Busby, effects of livestock grazing

Martyn M. Caldwell, plant physiological ecology

Michael R. Conover, Berryman Institute, animal behavior, wildlife damage management

Raymond D. Dueser, conservation ecology

Johan du Toit, ecology and conservation of large mammals in terrestrial ecosystems

Thomas C. Edwards, Jr., Utah Cooperative Fish and Wildlife Research Unit, spatial ecology, habitat modeling, biostatistics

Michael M. Jaeger, National Wildlife Research Center, behavioral ecology

Frederick F. Knowlton, National Wildlife Research Center, predator ecology, behavior and management

Michael R. Kuhns, forestry extension specialist, urban forestry, tree physiology

James N. Long, forest ecology, silviculture

John C. Malechek, rangeland management
Department of Wildland Resources

Terry A. Messmer, fisheries and wildlife extension specialist, wild ungulate and waterfowl management, wetlands ecology, private land management, conservation communication
Frederick D. Provenza, range animal production
Michael L. Wolfe, wildlife ecology and management

Adjunct Professors
Cheryl S. Asa, endocrinology, reproductive physiology
James E. Bowns, range ecology
Mark W. Brunson, social and psychological aspects of forest and rangeland management
John W. Connelly, game bird ecology and management, avian ecology
Noel H. Holmgren, vascular plants
Patricia K. Holmgren, vascular plants
Douglas A. Johnson, plant ecophysiology
Karel Klinka, forest ecology
Jesse A. Logan, forest insect ecology, disturbance ecology, dynamical systems analysis
E. Durrant McArthur, cytogenetics of sagebrush
Bret Olson, range ecology
G. Allen Rasmussen, rangeland fire ecology and prescribed burning, rangeland management
David W. Roberts, forest ecology, forest modeling, vegetation ecology
Frederick Smith, silviculture, forest ecology

Professors Emeritus
Thadis W. Box, range management
John A. Kadlec, wetlands ecology, wildlife management
Ronald M. Lanner, forest genetics, dendrology
Frederic H. Wagner, wildlife ecology, natural resources policy
Neil E. West, rangeland desertification/condition/trend
John P. Workman, range economics

Research Professor Emeritus
Leila McReynolds Shultz, plant taxonomy and geography

Associate Professors
Frederick A. Baker, forest pathology, computer applications
Roger E. Banner, range extension specialist
Christopher A. Call, vegetation manipulation/management
Eric M. Giese, National Wildlife Research Center, predator behavior and ecology
Michael J. Jenkins, disturbance ecology and management, insects, fire, snow avalanches
R. Douglas Ramsey, remote sensing, geographic information systems, landscape ecology, spatial analysis
Eugene W. Schupp, plant population ecology and restoration ecology
John A. Shiviak, National Wildlife Research Center, predator ecology
Helga Van Miegroet, forest soils and biogeochemistry

Adjunct Associate Professors
Derek Bailey, large herbivore animal behavior
Dale L. Barros, forest ecology, aspen conservation
Barbara J. Bentz, forest entomology
D. Layne Copcock, animal production systems/technology transfer and international pastoral development
John L. Crane Jr., environmental resource management
Ellen S. Dierenfeld, zoo and wildlife nutrition, conservation biology
Richard C. Etchberger, wildlife-habitat interactions, natural resource education

Thomas A. Jones, native grass breeding
William J. McShea, ungulate ecology, conservation of Asian mammals, small mammal ecology
Patricia D. Moeihman, behavioral ecology of large mammals
Niki S. Nicholas, biogeochemistry
Kenneth C. Olson, grazing livestock nutrition
James A. Pfister, poisonous range plants
Howard B. Quigley, carnivore conservation biology
Michael H. Ralphs, poisonous plants/grazing management
Roger Rosentreter, lichenology
Robert H. Schmidt, wildlife policy, wildlife damage management

Associate Professors Emeritus
Brien E. (Ben) Norton, grazing ecology, international range management
Gar W. Workman, wildlife ecology and management

Assistant Professors
Peter B. Adler, plant community ecology
Karen H. Beard, community ecology, ecosystem ecology, conservation biology
Frank P. Howe, avian ecology and management, riparian and shrubsteppe ecology
Karen E. Mock, conservation genetics and applied molecular ecology
Ronald J. Ryel, plant physiological ecology

Research Assistant Professors
Mary M. Conner, wildlife population ecology
Shandra Nicole Frey, Berrmyan Institute, resolution of human-wildlife conflict
Juan A. Villalta, foraging behavior

Adjunct Assistant Professors
Larry M. Conner, wildlife ecologist, wildlife damage management, mammalogist
Jeanne M. Fair, epidemiology, avian biology
Jennifer A. Gervais, ecotoxicology, population dynamics
Tim B. Graham, entomology, ecology
Jeannette K. Howard, stream ecology, biogeography, fluvial geomorphology
Kyran E. Kunkel, carnivores, predator/prey ecology, mammal restoration ecology
Tamsin C. McCormick, desert ecology
Nico L. McCoy, natural resource economics
Greitchen G. Moisen, forest management and ecology
Thomas A. Monaco, research ecologist
Nancy D. Moncrief, systematics, genetics
William C. Pitt, predator ecology and behavior
Daniel K. Rosenberg, population, conservation, and landscape ecology
John D. Shaw, forest inventory, quantitative silviculture
John Squires, lynx and snowshoe hare ecology
Ben C. West, wildlife damage management

Assistant Professor Emeritus
Barrie K. Gilbert, wildlife ethology, behavioral ecology

Women and Gender Studies

**Director:** Brenda Cooper  
**Location:** Animal Science 319C  
**Phone:** (435) 797-3253  
**E-mail:** bcooper@cc.usu.edu

**Interim Director (January-December 2007):** Frances B. Titchener,  
Main 321, (435) 797-1298, f.b.titchener@usu.edu

**WWW:** http://www.usu.edu/womenstud/  

Women and Gender Studies (WGS) at Utah State University is a multidisciplinary program focusing on the role of gender in the everyday experiences of women and men. Students are provided with opportunities to examine the diverse experiences, perspectives, and contributions of women in the past, present, and future, both nationally and internationally. Specific courses examine the processes of gender role socialization and the resulting cultural beliefs and stereotyped images of women. As a result, students gain appreciation for the role of gender and its practical implications in their basic life experiences, thus preparing them to understand current and future changes in the social construction of gender.

Each semester, WGS courses are taught by faculty members from a variety of disciplines, including Anthropology, Biology, Journalism, and Communication, English, Fine Arts, Health and Physical Education, History, Languages, Political Science, Psychology, Special Education, and Sociology. Throughout the year, several special topics courses are offered, and new courses are continually being developed. Two WGS scholarships are awarded to undergraduates.

Students may enroll in individual courses or apply coursework toward either a minor in WGS or an Area Studies certificate. At least 50 percent of the WGS coursework must be taken at USU.

**Area Studies Certificate in Women and Gender Studies (3.0 GPA)**

Students desiring to explore WGS in depth may want an area studies certificate. To receive the certificate, students must complete 24 credits of courses from the list below or from the course list published each semester and earn a minimum grade point average of 3.0 in these courses. With preapproval of the WGS director, as well as a signed contract with a WGS faculty member, other courses may be applied toward the certificate if at least 50 percent of the class material is directly related to gender issues or if students complete a gender-related project in order to earn 50 percent of their grade in that course. Courses must be taken from at least three different academic areas; no more than 12 credits can be counted from a single discipline. Courses may come from major, minor, or University Studies programs. Area studies certificates may be earned by undergraduate and graduate students. Forms for the area studies certificate may be obtained in Taggart Student Center 302 or at the Center for Gender Programs, Taggart Student Center 315.

**Women and Gender Studies Minor (2.5 GPA)**

To complete the minor, students must select 18 credits from the list below or from the course list published each semester and must earn a minimum grade point average of 2.5 in these courses.

**Required Course (3 credits)**

WGS 1010 Introduction to Women and Gender Studies (Sp)...................3

**Electives**

(Minor, 15 credits; Area Studies, 21 credits)  
For the minor, select 15 credits from the following list. For the area studies certificate, select 21 credits.

**Area Studies Certificate in Women and Gender Studies (3.0 GPA)**

**Courses for the Area Studies Certificate and Minor in Women and Gender Studies:** (Area Studies, 24 credits; Minor, 18 credits)

**Required Course (3 credits)**

WGS 1010 Introduction to Women and Gender Studies (Sp)...................3

**Electives**

(Minor, 15 credits; Area Studies, 21 credits)  
For the minor, select 15 credits from the following list. For the area studies certificate, select 21 credits.

**Course Descriptions**

---

**Courses**

- **Anthropology of Sex and Gender** (ANTH 5100 DSS/6100)
- **Art History Seminar: Gender Issues in Art** (ART 4790)
- **Women in Science** (BIOL 4750/6750 ST)
- **Perspectives in Literature: Gender Focus** (ENGL 3030 DHA)
- **Period Studies in American Literature: Gender Focus** (ENGL 3300)
- **Young Adult Literature: Reading and Writing Gender** (ENGL 3510)
- **Multicultural American Literature: Gender Focus** (ENGL 3520)
- **Native American Studies: Contemporary Native American Literature: Gender Focus** (ENGL 3620)
- **Folklore Colloquium: Folklore of the American Family and/or Folklore and Gender** (ENGL 3710 CI)
- **British Writers: Gender Focus** (ENGL 4320)
- **Studies in Poetry: Women Poets 1950 to the Present** (ENGL 4350)
- **Studies in Film: Gender and Gender in Hollywood** (ENGL 4360)
- **Studies in Nonfiction Prose: Gender Focus** (ENGL 4370)
- **Western American Literature: Utah Women Writers** (ENGL 4610)
- **Gender and the Mass Media** (FCHD 3110)
- **Economic Issues: Gender, Family, and Work Roles** (FCHD 3280)
- **ST: Women Writers in the Spanish World** (HIST/WGS 4550 DHA/CI)
- **History of Black America** (HIST 4730 CI)
- **Perspectives in Literature: Film as Cultural Communication: Women, Gender, Text, and Context** (HIST 5300 CI)
- **Race, Class, and Gender** (HIST 4730 CI)
- **Gender and Social Inequality** (JCOM 3410 DSS)
- **Gender and the Mass Media** (JCOM 4410/6410)
- **Gender, Power, and Politics** (POLS 3190 DSS)
- **Gender and World Politics** (POLS 5440 DSS)
- **Sociology of Gender and Social Inequality** (SOC 3010)
- **Sociology of Gender and Social Inequality** (SOC 4730)
- **Women in International Development** (SOC 6620)
- **Gender and International Development** (SOC 6730)
- **Women Writers in the Spanish World** (SPAN 4400 ST)
- **Latin American Women Writers and/or Latin American Women Playwrights** (SPAN 4910 ST)
- **Women and Leadership** (WGS 2100)
- **Directed Study: Women and Gender Studies** (WGS 4900)

---

For additional course offerings, please consult the Women and Gender Studies website: [http://www.usu.edu/womenstud/](http://www.usu.edu/womenstud/)

Further information may be obtained from the director or from the College of HASS Advising Center (Taggart Student Center 302) or at the Center for Gender Programs (Taggart Student Center 315).

### Course Descriptions

- **ACCT 1050 Accounting Essentials**: Overview of accounting concepts, with special emphasis on practical applications. Taught only as a special extension course as requested.
- **ACCT 1550 Accounting Software for Small Business Applications**: Instruction in the use of small business accounting software. Prerequisite: ACCT 1050 or equivalent.
- **ACCT 2010 Survey of Accounting I**: Survey of uses of accounting information by investors and creditors for decision making. Emphasis on basic accounting principles used to prepare, analyze, and interpret financial statements. Prerequisites: STAT 1040 or MATH 1030 or 1050 (MATH 1050 or equivalent is required for College of Business majors); and GPA of 2.5 or higher. (F,Sp,Su)
- **ACCT 2020 Survey of Accounting II**: Survey of uses of accounting information by managers for decision making, including planning, budgeting, and controlling operations. Emphasizes accumulation, analysis, and control of product and service costs. Prerequisite: ACCT 2010. (F,Sp,Su)
- **ACCT 3110 Intermediate Financial Accounting and Reporting I**: Study of accounting principles, theory, and practice relating to financial reporting of assets. Prerequisites: Cumulative GPA of 3.0 or higher; grade of B or better in ACCT 2010; Admittance to a USU major; and completion of at least 40 credits. (F,Sp,Su)
- **ACCT 3120 Intermediate Financial Accounting and Reporting II**: Study of accounting principles, theory, and practice relating to liabilities, equities, and other contemporary issues. Prerequisite: ACCT 3110; Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp,Su)
- **ACCT 3310 Strategic Cost Management**: Contemporary theory and applications in the accumulation, analysis, and interpretation of accounting information for internal decision-making and control. Prerequisites: Cumulative GPA of 3.0 or higher; grade of B or better in ACCT 2010; ACCT 2020; Admittance to a USU major; and completion of at least 40 credits. (F,Sp,Su)
- **ACCT 3410 Income Taxation I**: Emphasis on Federal income taxation of individuals. Introduction to tax research methods and taxation of corporations and partnerships. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp,Su)
- **ACCT 4200 Advanced Accounting**: Study of accounting principles and theory relating to business combinations, nonprofit organizations, and governmental accounting. Prerequisites: ACCT 3120; Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp,Su)
- **ACCT 4410 Income Taxation II**: Federal income taxation of partnerships, corporations, S-corporations, estates and trusts, and gifts. Prerequisites: ACCT 3410; Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp,Su)
- **ACCT 4500 Accounting Information Systems**: Theoretical concepts underlining the accounting system's computerized support of business processes. Topics include accounting systems development, controls, security, and audit. Prerequisites: ACCT 3110; Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp,Su)
- **ACCT 4510 Auditing Principles and Techniques**: Fundamental principles and techniques of auditing and reporting of audits presented in the context of the audit logic sequence. Integrative applications emphasizing audits of organizational resources, processes, and systems. Also addresses ethics, legal environment, auditing standards, and fraud. Prerequisites: ACCT 3110; Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp,Su)
- **ACCT 4900 Independent Research and Readings**: Selected reading and research individually assigned, handled, and directed. Problems of mutual interest to students and the instructor are investigated and reported. Prerequisite: Departmental permission. (F,Sp,Su)
- **ACCT 4950H Senior Honors Thesis/Project**: Creative project that will then be written up, and presented, as a Senior Thesis as required for an Honors Plan. (Sp)
- **ACCT 6010 Financial and Managerial Accounting**: Introduction to financial and managerial accounting at the graduate level. Prerequisite: Admission to a College of Business graduate program. (Su)
- **ACCT 6200 Advanced Topics in Financial Reporting**: Study of accounting principles and theory related to advanced consolidations, multinational accounting, segment reporting, SEC reporting, partnerships, and financial distress. Prerequisites: ACCT 3120, 4200. (F,Su)
- **ACCT 6310 Advanced Issues in Management Control Systems**: Examination of appropriate internal financial and nonfinancial performance measures for efficient management decision making and control. Cases and problems relating to cost management and control systems. Prerequisite: ACCT 3130. (Sp)
- **ACCT 6350 Accounting Strategies for Achieving Profit Goals**: Action-oriented case studies to demonstrate management accounting techniques to achieve profit goals and business strategies in a variety of organizations. International accounting and ethical issues are addressed. Prerequisites: ACCT 2010 and 2020, or ACCT 6010. (F)
- **ACCT 6410 Tax Research and Procedures**: Methods of researching tax problems, case studies in tax administration, civil procedures and penalties, professional responsibility, and tax ethics for the tax practitioner. Prerequisites: ACCT 3410 and 4410. (F,Su)
- **ACCT 6420 Taxation of Corporations and Shareholders**: Concepts and principles governing the taxation of corporations and shareholders. Effect of taxes on corporation formation, capital structure, distributions, liquidations, and reorganizations. Prerequisites: ACCT 3410 and 4410. (Su)
- **ACCT 6440 Taxation of Partnerships, Estates, and Trusts**: Concepts and principles governing the taxation of partnerships and partners and estates, trusts, and beneficiaries. Uses of partnerships and trusts in tax planning. Prerequisites: ACCT 3410 and 4410. (F)
- **ACCT 6460 Tax Topics**: Topics of current interest to tax professionals. Prerequisites: ACCT 3410 and 4410. (Su)
- **ACCT 6500 Advanced Accounting Information Systems**: Study of contemporary issues in accounting information systems, including emerging information technologies for supporting enterprise decision making. Prerequisite: ACCT 4500. (Sp)
- **ACCT 6510 Financial Auditing**: Application of generally accepted auditing standards to accounting systems. Some study of auditing theory and current issues, and an introduction to statistical auditing. Prerequisite: ACCT 4510. (F,Sp)
- **ACCT 6540 Forensic Accounting**: Study of forensic accounting. Topics covered include types of fraud, recognition of red flags, and fraud investigation techniques. Also includes practice with computer-aided fraud detection, interrogation techniques, and case studies. (F)
## Course Descriptions

### ACCT 6600  Information Systems Auditing and Control 3
Study of information systems auditing methodologies, including risk assessment, systems controls, and the use of computer-assisted audit techniques. (F)

### ACCT 6610  Accounting Theory and Research 3
Analytical approach to understanding the financial reporting environment. Integration of accounting theory and practical research methodology in the resolution of financial reporting problems. Prerequisite: ACCT 3120 (may be taken concurrently). (Sp,Su)

### ACCT 6800  Accounting Communications and Professional Conduct 3
Study of written and oral communication skills appropriate for the accounting profession. Covers interpersonal skills and professional conduct, including ethical conduct, in various business settings. (Sp)

### ACCT 6900  Independent Reading and Research 1-3*
Independent work in accounting areas: theory, auditing, taxation, and other related areas. Prerequisite: Departmental permission. (F,Sp,Su)

### ACCT 6960  Professional Paper 1-3
A paper of professional quality prepared by the student. Designed to demonstrate the ability of the student to apply knowledge and skills gained. (F,Sp,Su)

### ACCT 6990  Continuing Graduate Advisement 1-3*
Continuing enrollment at the University after completing coursework. Graded Pass/Fail only. Prerequisite: Departmental permission. (F,Sp,Su)

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

This course is also offered by online correspondence and/or CD through Independent and Distance Education.

## Animal, Dairy and Veterinary Sciences (ADVS)

See Department of Animal, Dairy and Veterinary Sciences, pages 149-160

### ADVS 1010  Artificial Insemination and Reproduction 2
Principles of reproduction, artificial insemination, and handling of semen. Anatomy and physiology of the bovine reproductive tract and reproductive management of the dairy farm. (F)

### ADVS 1020  Dairy Cattle Nutrition and Feeding 3
Applied approach to nutrients, feeds, digestion, and nutrient utilization by dairy cattle. Dietary requirements and feeding practices. (F)

### ADVS 1030  Lactation and Milking Systems 3
The mammary gland, udder health, and mastitis and its control. Milk quality and marketing. Principles involved in the function, design, and maintenance of dairy equipment. (Sp)

### ADVS 1040  Records and Financial Aspects of Dairy Herd Operations 3
Record keeping systems, tax records, estate planning, DHIA records, and computer record systems. Principles of credit and finance. Accessing loan sources. (Sp)

### ADVS 1050  Dairy Genetics 3
Principles of dairy genetics, mating, pedigrees, and breeding. Purebreds and type traits and classification. (F)

### ADVS 1060  Applied Feeding and Management of Dairy Calves and Basic Construction of Facilities 3
Practical experience in feeding and management of dairy calves from birth to weaning. Students participate in actual calf-raising programs. Development of basic skills required for planning and building agricultural structures. (Sp)

### ADVS 1100  Small Scale Animal Production 3
Fundamentals of raising domestic farm animals in a semi-rural, noncommercial setting. Considerations of feeding, breeding, housing, marketing, sanitation, general health care, and community zoning factors. For nonmajors. (Su)

### ADVS 1110  Introduction to Animal Science 4
Influence and contributions of animal production and its commodities to society. Introductory scientific principles of animal science, livestock production systems, and contemporary issues. Introduction to professions and careers in animal agriculture and veterinary sciences. (F,Sp)

### ADVS 1250  QI  Applied Agricultural Computations 2
Development of understanding and proficiency in the application of basic mathematical skills, including algebra and geometry, to practical computational situations encountered in the agricultural sciences. (F,Sp)

### ADVS 1600  Riding Fundamentals I 2
Lectures explore the theory necessary to be a successful rider. Includes information on use of natural and artificial aids with hunt seat and western-style riding. In riding labs, students develop their riding skills and understanding of riding theory. (F,Sp)

### ADVS 1720  Dairy Cattle Evaluation and Judging 1
Evaluation of cattle based on exterior anatomical traits functional for improving longevity and milk production. Explanation of classification systems used by breed associations and the artificial insemination industry. Development of basic skills for preparing dairy cattle for show. (Sp)

### ADVS 1910  Orientation to Animal and Dairy Science 0.5
Introduction to the Animal Science and Dairy Science programs, and to the opportunities in animal agriculture and related fields. (F)

### ADVS 1920  Orientation to Bioveterinary Science 1
Introduction to the profession of veterinary medicine and related fields, and to the preparation required for veterinary medical careers. (F)

### ADVS 2004  Introduction to Biotechnology 1
Introduces students to the emerging field of biotechnology and the impact this technology has on society. Also taught as BIOL 2040, NFS 2040, and PSB 2040. (Sp)

### ADVS 2080  Beef Production Practices 2
Production practices in the handling, selection, and care of beef cattle. Demonstrations of equipment, facilities, and skills relevant to beef cattle production. Prerequisite: ADVS 1110 (may be taken concurrently) or permission of instructor. (Sp)

### ADVS 2090  Sheep Production Practices 2
Production practices in the handling, selection, and care of sheep. Demonstrations of equipment, facilities, and skills relevant to sheep and wool production. Prerequisite: ADVS 1110 (may be taken concurrently) or permission of instructor. (Sp)

### ADVS 2120  Swine Production Practices 2
Production practices in the selection, handling, and care of swine. Demonstrations of equipment, facilities, and skills relevant to swine industry. Prerequisite: ADVS 1110 (may be taken concurrently) or permission of instructor. (Su)

### ADVS 2130  Dairy Production Practices 3
Basic husbandry skills needed to carry out day-to-day operations on a dairy farm. Principles of dairy herd health, disease prevention, and treatment. Prerequisite: ADVS 1020 or 1110 (may be taken concurrently) or permission of instructor. (F)

### ADVS 2190  Horse Production Practices 2
Production practices in the selection, care, and evaluation of horses. Survey of breeds of horses, their characteristics, and their uses, as well as equine behavior, health care, nutrition, reproduction, anatomy, and physiology. Prerequisite: ADVS 1110 (may be taken concurrently) or permission of instructor. (F)

### ADVS 2200  Anatomy and Physiology of Animals 4
Normal structure and function studied systematically. Comparative livestock, poultry, pleasure and companion animals, laboratory animals, and humans. (F)

### ADVS 2250  Cooperative Work Experience 1-12*
For students who require animal industry experience to prepare them for advanced curriculum in Animal, Dairy, or Bioveterinary Science. (F,Sp,Su)

<tr>
<td>ADVS 3020</td>
<td>Biotechnology in Agriculture</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Broad view of biotechnology in agriculture. Contributions of advances in recombinant DNA technology, molecular genetics, and genetic engineering toward animal breeding and development of new medicines. Prerequisites: BIOL 1620, CHEM 2310. (F)</td>
<td></td>
</tr>
<tr>
<td>ADVS 3100</td>
<td>Equine Evaluation I**</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Study of equine conformation, using multiple breeds. Development of skills in evaluating balance, leg structure, and muscling. Students organize and present oral reasons. (F)</td>
<td></td>
</tr>
<tr>
<td>ADVS 3150</td>
<td>Equine Evaluation II**</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Study of equine performance horses, including western pleasure, hunter under saddle, reining, western riding, and jumping. Discussion of multiple breeds. Presentation of oral reasons. Prerequisite: ADVS 3100. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ADVS 3200</td>
<td>DSC Ethical Issues in Genetic Engineering and Biotechnology</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Critical evaluation of ethical issues of genetic engineering in biotechnology, including biological engineering and cloning of plants, animals, and humans. Presents basic science of genetic engineering and biotechnology. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ADVS 3500</td>
<td>Principles of Animal Nutrition</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Biochemical characterization and chemical analysis of feedstuffs for farm animals, with regard to carbohydrates, proteins, lipids, minerals, and vitamins. Catabolic/anabolic pathways associated with utilization of these nutrients with respect to production, general health, and nutritional disorders. Prerequisites: ADVS 2200; CHEM 1120, 1220, or 2320. (F)</td>
<td></td>
</tr>
<tr>
<td>ADVS 3510</td>
<td>QI Applied Animal Nutrition</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Categorization of farm animal feeds into energy feeds, protein feeds, dry forages, silages and haylages, pasture and range plants, and vitamin-mineral supplements. Emphasis placed on practical diet formulation, including computerization and aspects of feed delivery and nutritional management. Prerequisite: ADVS 3500 or CHEM 3700. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ADVS 3600</td>
<td>Equine Behavior and Training I</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Students work with a young horse on ground manners and training. These skills include: haltering, leading, tying, round penning, sacking out, trailer loading, and introduction to saddling. Prerequisite: ADVS 2600. (F)</td>
<td></td>
</tr>
<tr>
<td>ADVS 3650</td>
<td>Live Animal and Carcass Evaluation</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Judging, grading, and pricing of market animals and carcasses, with emphasis on comparative evaluation of live animals and carcasses. (F)</td>
<td></td>
</tr>
<tr>
<td>ADVS 3690</td>
<td>Equine Behavior and Training II</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Students work with a young horse on ground manners and under saddle. Includes work on suppleness at the walk, jog (trot), lope (canter), and backing. Students learn to use soft cues in teaching the horse all aspects. Prerequisite: ADVS 3600. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ADVS 3710</td>
<td>Advanced Livestock Judging</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Advanced methods of selection and identification of superior animals for breeding stock. Emphasis on performance records, judging, grading, and oral reasons. (F, Sp)</td>
<td></td>
</tr>
<tr>
<td>ADVS 3900</td>
<td>Special Problems and Readings</td>
<td>1-3*</td>
</tr>
<tr>
<td></td>
<td>Students conduct short-term studies and/or literature review with critical analysis of individualized subject matter. Formal written reports required. Prerequisite: Permission of instructor. (F, Sp, Su)</td>
<td></td>
</tr>
<tr>
<td>ADVS 3910</td>
<td>Special Topics</td>
<td>1-5*</td>
</tr>
<tr>
<td></td>
<td>Topics of special interest to those who have needs not satisfied by courses currently offered. (F, Sp, Su)</td>
<td></td>
</tr>
<tr>
<td>ADVS 3920</td>
<td>Internship in Veterinary Medicine</td>
<td>1-3*</td>
</tr>
<tr>
<td></td>
<td>A directed and evaluated work experience with a veterinarian. For each credit, student must document at least 54 hours of work time. Graded Pass/Fail only. Prerequisite: Permission of instructor. (F, Sp, Su)</td>
<td></td>
</tr>
<tr>
<td>ADVS 4200</td>
<td>CI Physiology of Reproduction and Lactation</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Introduction to principles of physiology as they relate to the reproductive and lactation processes in domestic mammals. Factors affecting reproductive and lactation performance and their applications in animal management. Prerequisites: ADVS 2200; CHEM 1120, 1220, or 2310. (Sp)</td>
<td></td>
</tr>
<tr>
<td>ADVS 4250</td>
<td>Internship in Animal Industry</td>
<td>1-12*</td>
</tr>
<tr>
<td></td>
<td>Directed and evaluated educational work experience with an animal production unit, related business, or government facility in cooperation with the Livestock Education Foundation. Prerequisite: Permission of instructor. (F, Sp, Su)</td>
<td></td>
</tr>
<tr>
<td>ADVS 4260</td>
<td>Internship in Animal Biotechnology Industry</td>
<td>2-12*</td>
</tr>
<tr>
<td></td>
<td>Directed and evaluated educational work experience with an animal biotechnology unit, or with a related business or government facility. Prerequisite: ADVS 5160 or 5240 or 5260 and permission of instructor. (F, Sp, Su)</td>
<td></td>
</tr>
<tr>
<td>ADVS 4270</td>
<td>Internship in Equine Industry</td>
<td>3</td>

## Course Descriptions

### ADVS 4900  Senior Thesis/Project  1-3
All Honors students are required to submit a senior thesis/project for graduation with an Honors degree. Thesis/project may be in any area of student's choice, prepared in cooperation with an advisor drawn from the faculty at large. (F,Sp,Su)

### ADVS 4910  Preprofessional Orientation  0.5
Survey of the professional opportunities in the animal industries to enable graduating students to make the transition to careers and/or postgraduate study. Prerequisite: Junior standing. (F)

### ADVS 4920 CI  Undergraduate Seminar  2
Current developments in agricultural field selected by student. Each student is responsible for the research and oral presentation of a topic in the animal industries. Group investigations, preparations, and deliberations on issues in animal agriculture. Prerequisite: Senior standing. (F)

### ADVS 5030  Sustainable Agricultural Production Systems with Animals  3
Study of various domestic animal production systems in relation to sustainable agriculture and integrated ranch and farm management strategies. Consideration of environmental factors and overall profitability. Prerequisite: ADVS 1110. (F)

### ADVS 5080  Beef Cattle Management  3  (dual listing 6080)
Managing the beef enterprise to yield optimum returns through integrating resource use and applying breeding, nutrition, reproduction, and animal health practices. Prerequisites: ADVS 2080; ADVS 3510, 4200, 4560 (may be taken concurrently). (Sp)

### ADVS 5090  Sheep Management and Wool Technology  4  (dual listing 6090)
Detailed study of the managerial considerations for range and farm flock operations. Examinations of wool, and review of wool clip handling and merchandising. Prerequisites: ADVS 2090, ADVS 3510, 4200, 4560 (may be taken concurrently). (Sp)

### ADVS 5120  Swine Management  3  (dual listing 6120)
Management decisions based on nutrition, breeding programs, herd health practices, herd records, and marketing opportunities. Prerequisites: ADVS 2120; ADVS 3510, 4200, 4560 (may be taken concurrently). (F)

### ADVS 5130  Dairy Cattle Management  3  (dual listing 6130)
Capstone course drawing together concepts and applying them to a total dairy farm management program. Prerequisites: ADVS 2130; ADVS 3510, 4200, 4560 (may be taken concurrently). (Sp)

### ADVS 5160  Methods in Biotechnology: Cell Culture  3
Techniques and fundamental knowledge for culturing mammalian and insect cells. Students will learn maintenance, growing, genetic engineering of cells, cytotoxicity, hybridoma creation, cloning, etc. Extensive laboratory experience is provided. Also taught as BIOL 5160, NFS 5160, and PSB 5160. (Sp)

### ADVS 5190  Horse Management  3  (dual listing 6190)
Management decisions in horse enterprises emphasizing business procedures, including merchandising, records, selection, uses, housing, facilities, nutrition, feeding, health care, and breeding. Emphasizes total management of horse enterprise, rather than husbandry. Prerequisites: ADVS 2190, ADVS 3510, 4200, 4560 (may be taken concurrently). (Sp)

### ADVS 5220  Endocrine Aspects of Nutrition  2  (dual listing 6220)
Provides physiological background into hormones involved in nutrient regulation, as well as mechanisms of hormone action at the cellular and molecular levels. Includes action of steroids in the nucleus and membrane-based signal transduction pathways. Course includes lectures and literature reviews/presentations. Prerequisite: CHEM 3700 or permission of instructor. Also taught as BIOL 5220/6220 and NFS 5220/6220. (Sp)

### ADVS 5240  Methods in Biotechnology: Protein Purification Techniques  3
Reviews basic methods of protein purification, including scaled-up use of 100L fermenter, large-scale centrifugation, diafiltration, chromatography, and use of BiocAD. Prerequisite: CHEM 3700. Also taught as BIOL 5240, NFS 5240, and PSB 5240. (Sp)

### ADVS 5260  Methods in Biotechnology: Molecular Cloning  3
Laboratory-oriented course designed to teach molecular biology techniques such as DNA cloning, genetic probes, polymerase chain reaction, and DNA sequencing. Prerequisite: CHEM 3700 or 5710; or BIOL 3060; or permission of instructor. Also taught as BIOL 5260, NFS 5260, and PSB 5260. (F)

### ADVS 5280  Animal Molecular Biology  3  (dual listing 6280)
Laboratory-based course designed to present the theory and provide an in-depth laboratory experience in RNA detection, differential gene expression analysis, real-time RT-PCR, protein detection and purification, 2-D gel electrophoresis, and microarrays. Prerequisite: ADVS 5260 or permission of instructor. (Sp)

### ADVS 5300  Introductory Pharmacology and Pharmacokinetics  3  (dual listing 6350)
Basic principles of pharmacology and pharmacokinetics providing basis for extrapolation of biological kinetics of foreign compounds to a wide variety of xenobiotics encountered in toxicology, biology, and research. Prerequisites: BIOL 5600, CHEM 3700. (Sp)

### ADVS 5370  Molecular Methods in Nutrition Science  2  (dual listing 6370)
Theory of modern techniques used to study macromolecules and ions. Prerequisite: CHEM 3700. Also taught as BIOL/NFS/PSB 5370/6370. (F)

### ADVS 5400  Environmental Toxicology  3  (dual listing 6400)
Presents in-depth survey of toxic chemicals present in the environment, environmental factors impacting fate of chemicals, potential biological effects associated with chemical exposures, and methods of reducing associated risks. (Sp)

### ADVS 5500  Animal Nutrition Research Techniques  2  (dual listing 6500)
Laboratory intensive course in routine feedstuff evaluation and research techniques to evaluate nutritional and metabolic responses under in vivo, in situ, and in vitro conditions using feed, digesta, feces, urine, tissue, metabolites, and products. Students enrolled in ADVS 6500 will be required to conduct an animal study. Prerequisite: ADVS 3510. (F)

### ADVS 5550  Grazing Livestock Nutrition and Management**  2  (dual listing 6520)
Principles of livestock nutrition and production applied to the grazing environment and the relationships of livestock and range management for optimizing values from both. Prerequisites: ADVS 3510; WILD 4000 (recommended). (Sp)

### ADVS 5570  Nutritional Management of Farm Animals*  3  (dual listing 6530)
Nutritional management, problem solving, and feeding strategies as they influence performance of farm animals. Optimization of nutrition for various species and classes of domestic livestock. Prerequisite: ADVS 3510. (Sp)

### ADVS 5690  Animal Histology  3  (dual listing 6690)
Microscopic anatomy and physiology of normal domestic animal’s cells, tissues, organs, and system. Prerequisite: ADVS 2200 or permission of instructor. (F)

### ADVS 5700 CI  General Animal Pathobiology  3  (dual listing 6700)
Introduction to the principles of gross, microscopic, and physiological changes associated with diseases of domestic animals. Prerequisite: ADVS 5690/6690 or permission of instructor. (Sp)

### ADVS 5750  Parasitology  4
Introduction to biology of parasitism. Discussion of representative examples of parasites. Emphasizes classification, life cycles, and clinical significance of medically important parasites. Laboratories concentrate on taxonomy and morphology of parasites. Prerequisite: BIOL 1620. This course is not currently being offered. For information about when it may be offered, contact the department.

ANTH 1099 Resources in Anthropology at USU
Familiarizes incoming freshmen, new majors, and transfer students with the academic resources available to Anthropology students at USU. Covers program, department, library, college, campus, intercampus, and internet resources. (F)

ANTH 2010 BSS Peoples of the Contemporary World
(Formerly ANTH 2100 BSS)
Introduces different ways of life, rural and urban, from the world's major culture areas. Focuses on how contemporary societies have evolved in ecological, historical, and political context. Introduces problems arising from third world social change. (Sp)

ANTH 2030 BSS/CI World Archaeology
(Formerly ANTH 1030 BSS/CI)
Surveys archaeology and the means by which inferences about the past are made. Examines major processes shaping humans, including world colonization, our foraging legacy, origins of agriculture and civilization, and implications of our past for the present and future. (F,Sp)

ANTH 2210 BUH Introduction to Folklore
(Formerly ANTH 1710 BUH)
Introduction to major genres of folklore (folk narrative, custom, folk music and song, vernacular architecture and arts), folk groups (regional, ethnic, occupational, familial), and basic folklore research method (collecting and archiving). Also taught as ENGL 2210 and HIST 2210. (F,Sp)

ANTH 2720 Survey of American Folklore
Principal ethnic, regional, and occupational folk groups in America. Relations between folklore and American history, literature, and society. Key genres in American folklore (narrative, art, song, etc.) and their role in American culture. Also taught as ENGL 2720 and HIST 2720. (Sp)

ANTH 3110 North American Indian Cultures
Introduces ethnography of native cultures found within the USA and Canada, documenting their pre-contact adaptations and their interactions with changing national policies leading to today's resurgence of native peoples. (F)

ANTH 3130 CI Peoples of Latin America
Survey of Latin American cultures, past and present. Emphasis on culture as a dynamic, adaptive system and on contemporary issues in rural and urban Andean South America, Amazonia, and Mesoamerica. Appropriate for both majors and nonmajors.

ANTH 3150 Applied Anthropology Survey: History, Uses, Methods, and Careers
Surveys the field of applied anthropology, including discussions of emergence, application, and usefulness. Introduces students to methods and skills used by practitioners, as well as to those used to prepare for careers in applied anthropology. (F,Sp)

ANTH 3160 DSS Anthropology of Religion
Cross-cultural description and theoretical analysis of religion and its functional relationships to human psychology, society, and the natural environment. (F)

ANTH 3200 DSS/CI Perspectives on Race
Study of the processes of racial differentiation, the basis of biological differences found among existing human groups, the influence of biology and culture on human variation, and the influence of social context on perceptions of race. (Sp)

ANTH 3250 Osteology
Detailed hands-on study of human skeleton, including component of comparative vertebrate skeletal anatomy. Applications to fields of archaeology, forensic science, paleopathology, and zoology. Includes methods component. (F)

ANTH 3300 DSS Archaeology in North America
Prehistoric and historic archaeology of the North American continent. Explores initial colonization and Native American origins; variability among foraging adaptations; spread of farming; cultural complexity in Midwest, Southwest, and West Coast; Indian-environment relationships; European contact; depopulation; and historic archaeology of Euro-Americans. (F,Sp)

ANTH 3310 CI Introduction to Museum Studies
Explores all aspects of museum work, from the acquisition and storage of collections to fundraising and educational programs. As part of course requirements, students tour area museums and get first-hand perspectives on the challenges and rewards of museum work from professionals in the field. (Sp)

ANTH 3320 DSS Ancient Humans and the Environment
Explores human-environment relationships during the past 40,000-plus years, from small-scale societies to ancient civilizations. In this problem-oriented, topical course, emphasis placed on small group projects, discussion, writing, and oral presentation. (F)

ANTH 3350 DSS Archaeology of Ancient Civilizations
Surveys primary states in antiquity, including Mesopotamia, China, Egypt, South America, and Mesoamerica. In-depth study of the process of their formation and theories of their origins. Emphasis is anthropological and scientific to complement the classical and humanistic. (Sp)

ANTH 3550 DHA Culture of East Asia
Helps students explore and appreciate the culture of three East Asian countries: China, Japan, and Korea. Students gain sincere view and understanding of these East Asian cultures through readings, hands-on cultural activities, viewing video materials, writing, and discussions. Topics include: major historical and social events, customs and traditions, thoughts and beliefs, people, food, contemporary issues, art, literature, and film. Also taught as HIST 3550 and LANG 3550.

ANTH 3990 History and Theories of Anthropology
Traces history of anthropology, main currents of theoretical thought shaping claimed anthropological knowledge, and major figures associated with the discipline. Conceptualizes anthropology among the social sciences, life sciences, and humanities. Prerequisite: ANTH 1010. (F)

ANTH 4100 The Study of Language
Investigates ways in which human languages are structured, how they change, how they reflect the cultures in which they are used, and how they are learned. Also taught as LNG 4100. (F,Sp)

ANTH 4110 DSS Southwest Indian Cultures, (Dual Listing 6110) Past and Present
Reviews past and present Indian cultures of greater southwest region. Examines the prehistoric Anasazi, the Pueblos, the canyon and desert peoples, the Utes, and the Navajos. Interprets these cultures in ecological, historic, and political contexts. (F)

ANTH 4120 CI/DSS Anthropology of Childhood
Focuses on the anthropological study of childhood. Students design and carry out an ethnology (using library and archival sources) on an issue in the study of children. Readings of ethnographic studies of childhood from the U.S. and abroad. Includes methods component. (Sp)

ANTH 4130 DSS Medical Anthropology: Matter, Culture, Spirit, and Health
Examines the bio-ecological (matter) and socio-cultural aspects of disease/illness in human populations and examines “spiritual” dimensions of health in cross-cultural context. Includes methods component for anthropology majors and serves as a Liberal Arts cluster capstone course. (Sp)

ANTH 4150 QI Problems in Cultural Anthropology
Introduction to the wide range of information obtainable through the study of cross-cultural data. Methods and techniques of scientific inquiry in cultural anthropology explored through critical evaluation of quantitative, cross-cultural research literature and analysis of cultural data using SPSS. Prerequisites: ANTH 1010 and STAT 1040. (F)

ANTH 4250 QI Problems in Bioarchaeology
Examines various approaches to the study of human biocultural adaptation through the analysis of human remains from archaeological sites. Includes methods component. Prerequisite: STAT 1040 or ANTH 3250 or permission of instructor. (Sp)

ANTH 4350 Archaeological Method/Theory and Cultural Resource Management
Examines contemporary theories, as well as methods used by archaeologists to address questions arising from theory. Also considers contributions of cultural
Course Descriptions

resource management to meeting anthropological and public concerns. Includes methods component. Prerequisite: ANTH 2030; and one of the following courses: ANTH 3300, 3350, 4360, or 4380. (Sp)\(^2,3\)

**ANTH 4360 DSS Ancient Desert West** 3-4
Prehistoric to historic human ecology and paleoenvironments of the Great Basin, Southwest, and southern California deserts. Emphasizes perspective of human evolutionary ecology and detailed examination of the archaeological record in conjunction with paleoenvironmental data. For classroom work only, 3 credits are granted. For 4 credits, one or more weekend field trips are required. Prerequisite: ANTH 2030 or permission of instructor. (F)\(^2,3\)

**ANTH 4370 Archaeology and Paleoenvironments Field Trip** 2
Two-hour class session and assigned readings prepare students for a three-day field trip to explore the archaeology and paleoenvironments of the northern Bonneville Basin. Post-field writing assignment integrates the field experience with readings and discussion. Prerequisite: Instructor permission. (F)

**ANTH 4380 Peopling of the New World** 3
Explores how, when, and why humans first populated the Americas. Through emphasis on critical thinking and hypothesis testing, students scientifically evaluate evidence for initial colonization drawn from the fields of archaeology, biological anthropology, genetics, and linguistics. (Sp)\(^3\)

**ANTH 4800 Topics in Anthropology** 1-3\(^8\)
Focuses on special topics in anthropology. Topics and course format vary.

**ANTH 4990 Contemporary Issues in Anthropology** 3
Capstone course in anthropological theory and method, required for all majors. Prerequisite: ANTH 1010. Recommended Prerequisite: ANTH 3990. (Sp)\(^1,3\)

**ANTH 5100 DSS Anthropology of Sex and Gender (dual listing 6100)** 3
Increases awareness of sexuality and gender, and of feminist perspectives about social problems related to gender and sexuality that cross-cut cultural boundaries. Emphasizes gender-related social problems in contemporary world societies. (F,Sp)\(^2\)

**ANTH 5120 Applied Rural Development (dual listing 6120)** 3
Reviews development anthropology for practitioners. Examines human dimensions of planned policy, program, and project interventions. Examines how rural development occurs and how it is analyzed and managed in selected real-world cases. Includes methods component. (Sp)\(^4\)

**ANTH 5130 Ethnographic Field School (dual listing 6130)** 3-6
Provides practical training in use of ethnographic field methods, qualitative data analysis, and ethnographic report-writing. Combines classroom instruction with supervised off-campus field research, while living in a cross-cultural setting. Fulfills program methods requirement. Application and additional fee required. Also taught as SOC 5130/6130. (Su)

**ANTH 5160 DSS Cities and Development (dual listing 6160)** 3
Examines role of emergent urban areas in national development. Employs ethnographic case studies of selected cities, coupled with a policy perspective on problems of hyperurbanization in both poor and more advanced societies. Includes methods component. (F,Sp)\(^6\)

**ANTH 5190 Applied Anthropology Practicum** 1-5\(^8\)
Supervised projects in applied anthropology for advanced students. Integrates academic knowledge and field technique. Minimum contact hours, requirements, and credits available vary. Includes methods component. Prerequisite: Application and instructor approval.\(^2,3\)

**ANTH 5210 Physical Anthropology Lab** 1-3
Laboratory experience enabling participation in analysis/reporting stages of physical anthropology projects. Includes methods component. Prerequisite: Permission of instructor.\(^2,3\)

**ANTH 5300 Archaeology Field School** 1-5\(^8\)
Internship on archaeological field project, including survey, excavation, recording, mapping, and scientific conduct of archaeological problem solving. Application process begins in March. Additional field support fee required. Prerequisites: ANTH 2030 and instructor’s permission. (Su)\(^2,3\)

**ANTH 5310 Archaeology Lab** 1-3\(^8\)
Laboratory experience enabling participation in analysis/reporting stages of archaeology projects. Includes methods component. Prerequisite: Permission of instructor.\(^2,3\)

**ANTH 5650 DSS Developing Societies (dual listing 6650)** 3
Reviews how sociology, cultural geography, and economic anthropology analyze processes of globalization in postcolonial societies. Examines changing livelihoods, patterns of spatial incorporation and societal evolution, and emergent policy problems associated with rapid socioeconomic change. Also taught as GEOG 5650/6650 and SOC 5650/6650. (F)\(^3\)

**ANTH 5700 Folk Narrative** 3
Forms and functions of folk narrative genres: myth, legend, folktale, memorate, and ballad. Also taught as ENGL 5700 and HIST 5700. (Sp)

**ANTH 5800 Museum Development** 1-3\(^8\)
Apprenticeship in the USU Museum of Anthropology to learn the operation of a small museum. Entails close ongoing consultation with museum director and other staff members. Possible projects include artifact curation, exhibit development, public outreach, and others. Prerequisite: Instructor’s permission. (F,Sp,Su)\(^2,3\)

**ANTH 5900 Independent Studies** 1-3\(^8\)
Customized study or readings for upper-division or graduate students on topics not covered in regular courses. Prerequisite: Approval, prior to registration, of proposal written by student in consultation with instructor.

**ANTH 5980 Senior Project** 1
Develops advanced research and writing skills in a specialty area, and results in a research project/report. Must register in combination with a 4000- or 5000-level anthropology course, in consultation with instructor and subject to approval.

**ANTH 6100 Anthropology of Sex and Gender (dual listing 5100)** 3
Increases awareness of sexuality and gender, and of feminist perspectives about social problems related to gender and sexuality that cross-cut cultural boundaries. Emphasizes gender-related social problems in contemporary world societies. (F,Sp)\(^1\)

**ANTH 6110 Southwest Indian Cultures, Past and Present (dual listing 4110)** 3
Reviews past and present Indian cultures of greater southwest region. Examines the prehistoric Anasazi, the Pueblos, the canyon and desert peoples, the Utes, and the Navajos. Interprets these cultures in ecological, historic, and political contexts. (F)\(^3\)

**ANTH 6120 Applied Rural Development (dual listing 5120)** 3
Reviews development anthropology for practitioners. Examines human dimensions of planned policy, program, and project interventions. Examines how rural development occurs and how it is analyzed and managed in selected real-world cases. Includes methods component. (Sp)\(^6\)

**ANTH 6130 Ethnographic Field School** 3-6
Provides practical training in use of ethnographic field methods, qualitative data analysis, and ethnographic report-writing. Combines classroom instruction with supervised off-campus field research, while living in a cross-cultural setting. Fulfills program methods requirement. Application and additional fee required. Also taught as SOC 6130/5130. (Su)

**ANTH 6160 Cities and Development (dual listing 5160)** 3
Examines role of emergent urban areas in national development. Employs ethnographic case studies of selected cities, coupled with a policy perspective on problems of hyperurbanization in both poor and more advanced societies. Includes methods component. (F,Sp)\(^6\)
**Course Descriptions**

**Art (ART)**

*See Department of Art, pages 161-171*

**ART 1010 BCA Exploring Art**
(formerly ART 1100)
3°
Introduction to the visual arts, including the language, elements, and history of art. (F)

**ART 1020**
(formerly ART 1110)
3
Introduction to the visual language of drawing, the graphic elements, various drawing media, and the creative problems involved. (F,Sp)

**ART 1050**
Introduction to Photography
3
Overview of photography. Operation of camera and related equipment, exposure and development of black and white and color positive film materials, and enlarging and printing of black and white negatives, with a strong emphasis on composition and photographic aesthetics. (F)

**ART 1110 Drawing I (Art Majors Only)**
(formerly ART 1140)
3
Development of foundation drawing skills for art majors. Introduction to fundamental drawing principles and various drawing media through creative applications. Required for art majors. Enrollment limited to art majors having freshman standing (30 or less earned credits) only. (F,Sp)

**ART 1120 Two-dimensional Design**
3
Study and problem solving of form, space, texture, value, and color theory. (F,Sp)

**ART 1130 Three-dimensional Design**
3
Fosters development of basic understanding of three-dimensional form and space relationships. Includes three-dimensional problem solving, as well as use of a range of materials. (F,Sp)

**ART 1150 Two-dimensional Design (Art Majors Only)**
3
Foundation design course for art majors. Exploration of the elements and principles of two-dimensional design. Extensive use of a variety of media in creative problem solving. Required for art majors. Enrollment limited to art majors having freshman standing (30 or less earned credits) only. (F,Sp)

**ART 1160 Three-dimensional Design (Art Majors Only)**
3
Foundation design course for art majors. Exploration into the principles and vocabulary of visual organization in three dimensions. Through the manipulation of a variety of materials, students gain understanding of form and space. Required for art majors. Enrollment limited to art majors having freshman standing (30 or less earned credits) only. (F,Sp)

**ART 2110 Drawing II (formerly ART 2140)**
3
Continuation of ART 1020 or 1110, with an emphasis on more complex problems and techniques. Prerequisite: ART 1020 or 1110 or permission of instructor. Enrollment limited to art majors having freshman standing (30 or less earned credits) only. (F,Sp)

**ART 2200 Painting I**
3
Introduction to visual language of painting. Focuses on organization of visual ideas and basic oil painting techniques. Provides experience in both direct and indirect painting methods, as well as introducing applied color concepts. Prerequisites: ART 1020 or 1110; and ART 1120 or 1150. (F)

**ART 2220 Watercolor Painting**
3
Exploration of formal, technical, and conceptual problems in water media, for students with basic painting experience. Emphasis on gaining proficiency in both transparent and opaque watercolor techniques. Prerequisite: ART 2200. (F,Sp)

**ART 2230 Basic Printmaking**
3
Introductory course to acquaint students with the broader aspects of relief, intaglio, and planographic processes. Prerequisites: ART 1020 or 1110; and ART 1120 or 1150. (F)

**ART 2400 Computers and Art**
3
Basic course dealing with the study and use of the personal computer as a creative medium. Emphasizes hands-on software training directed toward the art of visual design and artistic expression. Several projects created using the computer and related peripherals. Discusses various forms of digital output and communications. Critical reviews of art projects focus on the elements and principles of visual design, as well as basic graphic design concepts. Enrollment limited to Art majors only. (F)

**ART 2600 Basic Sculpture**
3
Introduction to additive and subtractive processes in the realization of sculptural ideas. Student involvement in carving, clay modeling, and construction projects. Prerequisite: ART 1130 or 1160. (F,Sp)

**ART 2650 Introduction to Ceramics**
3
Introduction to basic processes of ceramics and the operation of the USU ceramics lab. Includes handbuilding, throwing, and firing. (F,Sp,Su)

**ART 2810 Photography I**
3
Black and white photography, including camera operation, exposure and development, and enlarging and printing of black and white negatives, with a concern for advancing technical controls, aesthetics, and darkroom experimentation. Introduction to electronic imaging. (F,Sp)

**ART 2900 Introductory Internship/Coop**
3°
Introductory level educational work experience in an internship/cooperative education position approved by the Department of Art. (F,Sp)

**ART 3000 Secondary Art Methods I**
3°
Focuses on developing art curricula by formulating objectives for teaching art history, art appreciation, and the making of art in the secondary schools. Required for art education majors. (F,Sp)

**ART 3050 Japanese Calligraphy**
1°
Study of Japanese writing system through practicing the art of calligraphy. No prerequisites. Also taught as JPN 3050. (Sp)

**ART 3110 DHA/CI Ancient Near East**
3
Survey of history and civilization of ancient Mesopotamia, Egypt, and Israel, from prehistory to 500 B.C. Writing intensive. Prerequisite: Fulfillment of Communications Literacy CL2 requirement. Also taught as HIST 3110. (F,Sp)

**ART 3200 Painting II**
3
Continuation of concepts and techniques covered in ART 2200, emphasizing more complex formal and conceptual problems. Prerequisite: ART 2200. (Sp)

**ART 3210 Classical Mythology**
3
Introduces major myths of the Classical world. Explores how these myths serve as keys to understanding the documents and arts of Classical civilization. Also taught as CLAS 3210. (Sp)

---

*Course Descriptions*

**ART 6650 Developing Societies**
3
(dual listing 5650)
Reviews how sociology, cultural geography, and economic anthropology analyze processes of globalization in postcolonial societies. Examines changing livelihoods, patterns of spatial incorporation and societal evolution, and emergent policy problems associated with rapid socioeconomic change. Also taught as GEOG 6650/5650 and SOC 6650/5650. (F)

**ART 6900 Independent Studies**
1-3°
Customized study or readings for graduate students on topics not covered in regular courses. Prerequisite: Approval of proposal written by student in consultation with instructor.

1°This course is taught alternating years. Check with department for information about when course will be taught.

2°This course may be used to satisfy the methods component requirement for the anthropology major.

3°This course has one or more prerequisites. Check with the department for details.

4°This course is offered infrequently. Check with department for information about when course will be taught.

5°Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

©This course is also offered by online correspondence and/or CD through Independent and Distance Education.
## Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 3220</td>
<td>Screen Printing</td>
<td>3</td>
<td>Investigation of the basic processes employed in screen printing. Includes surface preparation, image preparation, drawing techniques, registration, and printing of the screen. Prerequisite: ART 2230. (Sp)</td>
</tr>
<tr>
<td>ART 3230</td>
<td>Lithography</td>
<td>3</td>
<td>Investigation of the basic processes employed in lithography, including surface preparation, basic drawing techniques, registration, processing, and printing of the stone or plate, as well as photo, transfer, and color methods. Prerequisite: ART 2230. (F)</td>
</tr>
<tr>
<td>ART 3240</td>
<td>Intaglio</td>
<td>3</td>
<td>Investigation of the basic processes employed in intaglio, including acid (line etch, aquatint, lift grounds, soft ground) and nonacid (dry point, mezzotint, engraving) techniques, as well as transfer and color methods. Prerequisite: ART 2230. (Sp)</td>
</tr>
<tr>
<td>ART 3250</td>
<td>Relief Prints</td>
<td>3*</td>
<td>Introduction to relief printing, including woodcut, linoleum cut, and wood engraving. Prerequisite: ART 2230. (F)</td>
</tr>
<tr>
<td>ART 3260</td>
<td>Anatomy for Artists</td>
<td>3</td>
<td>Study of principles of anatomical structure of the figure as it applies to two-dimensional and three-dimensional art media. Prerequisites: ART 1020 or 1110; and ART 2110. This course is not currently being offered. For information about when it may be offered, contact the department.</td>
</tr>
<tr>
<td>ART 3270</td>
<td>Color: Theory and Practice</td>
<td>3</td>
<td>Explores both the theory and application of color in the visual arts. Special emphasis placed on the development of applied color skills. (Su)</td>
</tr>
<tr>
<td>ART 3300</td>
<td>Clinical Experience I</td>
<td>1</td>
<td>First clinical practicum (30 hours minimum) in middle and secondary schools, arranged by special methods instructors in department. Required at level I. Graded Pass/Fail only. (Sp)</td>
</tr>
<tr>
<td>ART 3350</td>
<td>Drawing for Illustration</td>
<td>3</td>
<td>Encourages drawing with a variety of media. Students will draw from the model in class. Homework consists of filling two 100-page sketchbooks with drawings from life, memory, or photographs.</td>
</tr>
<tr>
<td>ART 3370</td>
<td>Illustration Concepts*</td>
<td>3</td>
<td>Students learn to develop visual ideas for illustrations and carry an idea through the stage of roughs to a comprehensive and finished image, using both digital and traditional media. Prerequisites: ART 1020 or 1110; ART 1120 or 1150; and ART 2400. (F)</td>
</tr>
<tr>
<td>ART 3400</td>
<td>Typography</td>
<td>3</td>
<td>Introductory graphic design course, dealing with concepts and principles related to the exploration of typography as an art and design element. Series of exercises designed to give students professional and philosophical look at aesthetic and functional use of type and related visual elements. Prerequisites: ART 1120 or 1150; and ART 2400. (Sp)</td>
</tr>
<tr>
<td>ART 3420</td>
<td>Communication Arts Seminar</td>
<td>1</td>
<td>Lecture seminars by professional guest artists in illustration and graphic design. (F,Sp)</td>
</tr>
<tr>
<td>ART 3610</td>
<td>Intermediate Sculpture</td>
<td>3</td>
<td>Further development in the materials, techniques, and traditions of sculpture. Expands on specific explorations such as modeling, construction, and carving. Emphasizes strong relationship between concept and the technical execution of a sculptural form. Prerequisite: ART 2600. (F)</td>
</tr>
<tr>
<td>ART 3650</td>
<td>Intermediate Ceramics: Handbuilding</td>
<td>3</td>
<td>Application of traditional ceramic construction techniques to vessel and sculptural subjects. Prerequisite: ART 2650. (F)</td>
</tr>
<tr>
<td>ART 3660</td>
<td>Intermediate Ceramics: Throwing on the Potter's Wheel</td>
<td>3</td>
<td>Focuses on throwing and trimming techniques using the potter's wheel. Emphasizes production of multiples. Prerequisite: ART 2650. (Sp)</td>
</tr>
<tr>
<td>ART 3700</td>
<td>Elementary Art Methods</td>
<td>3*</td>
<td>Focuses on developing art curricula by formulating objectives for teaching art processes, art history, and art appreciation in the elementary schools. Required preparation for a grade school teacher. (F,Sp)</td>
</tr>
<tr>
<td>ART 3710</td>
<td>Fine Art Seminar</td>
<td>1*</td>
<td>Lecture seminars given by professionals as part of the Art Department visiting artist program. (F,Sp)</td>
</tr>
<tr>
<td>ART 3810</td>
<td>Photography II</td>
<td>3</td>
<td>Advanced black and white photography emphasizing technical controls, including the zone system and introduction to the 4x5 camera. Application of technical skills to enhance creative photographic expression. Continuation of digital imaging and use of computer for sensitometry graphing. Prerequisite: ART 2810 or equivalent experience. (Sp)</td>
</tr>
<tr>
<td>ART 3820</td>
<td>History of Early Photography*</td>
<td>3</td>
<td>Reviews early history of photography, beginning before the 1839 public announcement by Daguerre and continuing through the early twentieth century. Explores social change, invention, and the fulfillment of the artist's desire to represent reality. (Sp)</td>
</tr>
<tr>
<td>ART 3830</td>
<td>History of Contemporary Photography**</td>
<td>3</td>
<td>Reviews history of contemporary photography, beginning with the modernist movements of the 1920s and progressing through the aesthetic, technical, and communicative changes, up to today's contemporary uses of the medium. Examines photography's relationship to the historical changes in society, through its evolution as an art form, a commercial venue, and a visual record. (Sp)</td>
</tr>
<tr>
<td>ART 4000</td>
<td>Secondary Art Methods II</td>
<td>3</td>
<td>Focuses on developing methodologies for presenting art concepts and techniques in the secondary schools. Prerequisite: ART 3000. (F)</td>
</tr>
<tr>
<td>ART 4200</td>
<td>Advanced Drawing and Painting Studio</td>
<td>3-6</td>
<td>Advanced individual painting and drawing projects. Students may use a variety of painting and drawing methods to execute a series of closely related paintings and drawings that are intended to develop a focused and personal portfolio. Prerequisite: ART 2200. (F,Sp, Su)</td>
</tr>
<tr>
<td>ART 4210</td>
<td>Figure Painting</td>
<td>3</td>
<td>Painting from the model, with emphasis on solving problems of the planar structure of the human form. Prerequisite: ART 4260. (Sp)</td>
</tr>
<tr>
<td>ART 4250</td>
<td>Advanced Printmaking Studio</td>
<td>1-9</td>
<td>In-depth investigation of one printmaking process with emphasis placed on both technical and aesthetic considerations. Prerequisites: ART 2230 and consent of instructor. (F,Sp)</td>
</tr>
<tr>
<td>ART 4260</td>
<td>Life Drawing</td>
<td>3</td>
<td>Drawing from live models with emphasis on exploring interpretation, techniques, and compositional approach. Prerequisites: ART 1110 and 2110. (F)</td>
</tr>
<tr>
<td>ART 4300</td>
<td>Clinical Experience II</td>
<td>1</td>
<td>Second clinical practicum (30 hours minimum) in middle and secondary schools, arranged by special methods instructors in department. Required at level II. Graded Pass/Fail only. Prerequisite: ART 3300. (F)</td>
</tr>
<tr>
<td>ART 4370</td>
<td>Illustration Studio</td>
<td>3</td>
<td>Students build and enhance their portfolios through solving a series of advanced illustration problems. Emphasizes development of personal style through an examination of content, materials, and techniques. Explores both digital and traditional media. Prerequisite: ART 3370. (Sp)</td>
</tr>
<tr>
<td>ART 4410</td>
<td>Graphic Interface Design I</td>
<td>3</td>
<td>Concentrates on development of graphic design techniques and theories necessary to create successful graphic user interfaces. Students explore aesthetic and functional uses of motion, sound, interactivity, information architecture, branding, and typography as they relate to graphic interface design. Prerequisites: ART 4420, 4440. (F)</td>
</tr>
<tr>
<td>ART 4420</td>
<td>Brand Identity Design</td>
<td>3</td>
<td>Advanced studio course focusing on the visual expression of a brand. Students study the design and application of trademarks/logos, related brand strategies, positioning, and processes of research and analysis. Students complete a series of symbol design and application projects. Prerequisite: ART 3400. (F)</td>
</tr>
</tbody>
</table>
Course Descriptions

ART 4430  Graphic Interface Design II  3°
Advanced graphic design course exploring dynamic interactivity. Students take a professional and philosophical look at the use of multimedia as it relates to business and society. Emphasizes research and the exploration of innovative ideas using interactive interface as a vehicle for communicating information. Prerequisite: ART 4410. (Sp)

ART 4440  Type, Image, and Visual Continuity  3°
Examines the application of design theory and process to complex information organization systems. Focuses on relationships between typography, imagery, and visual continuity. Students design varied text-intensive publications and image-intensive poster projects. Prerequisites: ART 4410, 4420, 4440. (F)

ART 4450  Portfolio Preparation  1-9°
Builds students' job-seeking portfolios through lectures, critiques, and studio work. Existing projects are refined and gaps are filled in with new projects. All work must meet professional standards, with focus on quality and job-related subject matter. Prerequisites: ART 4410, 4420, 4440. (F)

ART 4460  Advanced Computer Graphics Studio  1-9°
Independent research and development of advanced projects in the field of digital graphics. Prerequisite: ART 4440. (F,Sp,Su)

ART 4470  Special Topics in Graphic Design and Illustration  1-9°
Focuses on various issues in the field of visual communications design. Allows students to pursue production of digital and traditional projects related to the topic of the course. Content of this studio course varies from semester to semester. Prerequisite: Permission of instructor. (F,Sp,Su)

ART 4601  Sculpture Projects  3°
Develops skills in a particular sculptural methodology. Investigates genres of public sculpture, installation, and advanced modeling, from traditional to contemporary. Stresses ideas based in a broader context of social and cultural issues. Prerequisite: ART 3610. (Sp)

ART 4620  Sculpture Seminar  3°
Designed to focus on and challenge current assumptions in regard to contemporary issues in sculpture. Prerequisite: ART 4660. (F)

ART 4640  Technology of Ceramic Art  3°
Selected topics in aesthetics and technology of ceramic art, including ceramic history, glaze chemistry and calculation, firing techniques, kiln design and construction, etc. Students enrolling for more than 3 credits arrange credit for directed studies in specific topics. Prerequisites: ART 3650, 3660. (F,Sp,Su)

ART 4650  Advanced Ceramic Studio  3-6°
Provides time, equipment, and facilities for advanced students to pursue directed studies leading to personal expression through ceramic media. To be repeated during at least four semesters by art majors with ceramics emphasis. Prerequisites: ART 3650, 3660. (F,Sp,Su)

ART 4660  Advanced Sculpture Studio  1-9°
Advanced directed study in specific technical, aesthetic, and/or conceptual issues in sculpture. Prerequisite: ART 4610. (Sp)

ART 4780  Sacred Art: Art of the World’s Major Religions  3°
Designed to give students understanding of the world’s seven major religions or “wisdom traditions” (Hinduism, Buddhism, Confucianism, Taoism, Judaism, Christianity, and Islam) through the history of their art. Prerequisites: Level 1 and Level 2 completion, and ART 1130 or 1160. (F,Sp,Su)

ART 4790  Art History Seminar and Special Problems  1-6°
Prerequisite: Permission of instructor. (F,Sp,Su)

ART 4810  Digital Photography**  3°
Continued exploration of digital photography, from computer to studio, with strong ties to traditional image making. Digital image processing and use of both software and hardware of digital photography. Study of ethical, artistic, and personal issues. Prerequisite: ART 3810. (F)

ART 4820  Nineteenth Century Photography Printing Processes*  3°
Introduction to hand-made photographic emulsions invented and used in the nineteenth century. Production of gum prints, cyanotypes, photogravures, carbon prints, and platinum prints. Explores unique visual characteristics of each process. Includes basic bookbinding. Prerequisite: ART 3810. (F)

ART 4830  Independent Projects in Photography  1-9°
Student-initiated, independent projects in photography. Provides opportunity for students to gain technical proficiency and aesthetic creativity. Major emphasis on critiques and group discussions. Prerequisite: ART 3810 or permission of instructor. (F,Sp,Su)

ART 4840  Color Photography I*  3°
Introduction to technical, conceptual, aesthetic, and digital explorations available with exposure and development of color positive and negative films. Investigation of color theory accompanied by production of correctly balanced color prints. Prerequisite: ART 3810. (F)

ART 4850  Color Photography II*  3°
Continuation of study with color materials including digital investigations. Explores alternative techniques and manipulative capabilities with color processes. Stresses individual pursuit of color print portfolio. Prerequisite: ART 4840. (Sp)

ART 4860  Photographic Studio**  3°
Exploration of the photographic studio. 4x5 view camera, the principles of applied lighting, and the communication of an idea through photography. Commercial, editorial, portrait, and digital photography directed toward professional portfolio preparation. All students required to have 4x5 camera. Enrollment limited to BFA students only. Prerequisite: ART 3810. (F)

ART 4870  Photographic Portfolio**  3°
Advanced photography class in preparation for life after graduation. Strong emphasis on work toward a personal professional portfolio (fine art and commercial) and written support documentation (resumes, cover letters, artist statement, etc.). Enrollment limited to BFA students only. Prerequisite: ART 4860. (Sp)

ART 4880  Imaging Services  3°
Internship situation at a commercial photographic studio and lab facility. Prerequisites: ART 4810, 4840. Enrollment limited to BFA candidates only. (F,Sp,Su)

ART 4900  Advanced Internship/Coop  1-9°
Internship/cooperative education work experience in art. For those students needing complexity and a more professional level of experience in the workplace. (F)

ART 4910  Senior BFA Exhibition  2°
Professional presentation and exhibition procedures. Enrollment limited to senior standing and BFA candidates only. Required for all BFA candidates. Prerequisite: Approval of advisor. (Sp)

ART 4920  Independent Projects  1-9°
Student-planned projects, executed through individual initiative and scheduled consultation with instructor. Prerequisites: ART 1020 or 1110; ART 1120 or 1150; and ART 1130 or 1160. (F,Sp,Su)

ART 4930  Student Teaching at University Level  3°
Teaching methods and procedures for university-level classes, working directly with faculty in lower-division classes. Prerequisite: Approval of instructor. (F,Sp,Su)

ART 5500  Student Teaching Seminar  2°
Capstone seminar focused upon student teaching issues, professional development, and principles of effective instruction, emphasizing a reflective methodology. Graded Pass/Fail only. Prerequisites: Level 1 and Level 2 completion, and student teaching placement. (F,Sp)

ART 5630  Student Teaching in Secondary Schools  10°
Thirteen-week culminating practicum in which students assume full-time teaching responsibilities under direction of cooperating teachers in major and minor fields. Graded Pass/Fail only. Prerequisites: Level 1 and Level 2 completion, and student teaching placement. (F,Sp)

<td>Individualized Projects in Agricultural Mechanics</td>
<td>1-3</td>
<td>Basic skill preparation for employment in agricultural industry. (F,Sp)</td>
</tr>
<tr>
<td>AS 3030</td>
<td>Metal Welding Processes and Technology in Agriculture</td>
<td>3</td>
<td>Selection of ferrous and nonferrous welding techniques in agricultural applications. Welding, cold- and hot-working metal in agricultural construction and maintenance. (F)</td>
</tr>
<tr>
<td>AS 3050</td>
<td>CI Technical and Professional Communication Principles in Agriculture</td>
<td>3</td>
<td>Technical communication principles and practices used in the agricultural industry. Emphasizes technical writing of reports and correspondence using electronic information retrieval and presentation. Prerequisite: Fulfillment of Communications Literacy CL2 requirement. (F,Sp)</td>
</tr>
<tr>
<td>AS 3080</td>
<td>Compact Power Units for Agricultural and Turfgrass Applications</td>
<td>3</td>
<td>Operation and application of agricultural and turfgrass equipment powered by internal combustion engines having less than 40 horsepower. (Sp)</td>
</tr>
<tr>
<td>AS 3090</td>
<td>Computer Applications in Agriculture</td>
<td>3</td>
<td>Overview of computer systems and software currently used in agriculture. Emphasizes spreadsheet development, file management, computer ethics, and design of materials for print, presentation, and web media. Prerequisite: Satisfactory completion of University computer and information literacy exam. (F)</td>
</tr>
<tr>
<td>AS 3100</td>
<td>Leadership Applications in Agricultural Science, Management, and Development</td>
<td>2</td>
<td>Study of leadership styles and their applications in development of agricultural programs for youth and adults. Emphasizes leadership and communication principles for effective community resource management in rural environments. Experiences provided in leadership styles, program planning, and meeting organization. (Sp)</td>

Each student serves as an apprentice to a professional agricultural educator. Students complete competencies leading to early preparation for student teaching. (F,Sp,Su)

Management principles for evaluation and selection of agricultural complements for performance, optimization, economics, environmental impact, and long-term sustainable agricultural practices. Prerequisite: MATH 1050 or STAT 1040. (Sp)

In-school clinical observation experience. Students involved in observing management and assisting in teaching. Designed to provide familiarity with agricultural education classroom. Graded Pass/Fail only. (Sp)

Throughout study of the dynamic interaction between science, technology, and society, explores responsibility of humans for directing the utilization of technology as a creative enterprise. Also taught as ETE 3440. (F,Sp)

Each student serves as an apprentice to a professional agricultural educator. Students complete competencies leading to early preparation for student teaching. (F,Sp,Su)

Introduction to basic concerns, understandings, and practices needed to effectively advise an FFA chapter. Students learn appropriate philosophies and skills for operation of a comprehensive supervised agricultural experience program. Prerequisite: Admission to Secondary Teacher Education Program. (Sp)

For agricultural education classroom. Graded Pass/Fail only. (Sp)

Through participation in discussions, activities, and assignments, students refine their abilities to develop programs, diagnose the learner, prepare the instruction, and guide student learning. Prerequisites: ASTE 2710, 3240. (F)

Supervised occupational experience for technical and professional preparation in teacher education and/or agricultural business. Graded Pass/Fail only. (F,Sp,Su)

Continued in-school observation of agricultural education teaching. Requires student participation in teaching, management, and program development in agricultural education. Graded Pass/Fail only. (F)

Principles and practices for advising applied technology student organizations in secondary education. Examination of leadership organizations supporting applied technology education. Emphasis on program planning, leadership development, and evaluation. This course is currently inactive. Contact department for information about when this course may be taught.

Returning student teachers work to strengthen their weaknesses in areas such as scaled drawing, cost estimating, machine shop practices, construction, and small engines. (Sp)

Principles and practices in assessing performance and development of applied technology students. Emphasizes testing and evaluation techniques used in applied technology education. (Sp,Su)

Investigation of relationship between agricultural practices and environmental quality, including control of agricultural nonpoint-source pollution. (F)

Students teach agriscience and technology courses in secondary and middle school settings under the guidance of clinical and Utah State University supervisors. Graded Pass/Fail only. (Sp)

Investigation and demonstration of methods and procedures for testing, troubleshooting, and diagnosis of tractors, power units, and all types of agricultural equipment. This course is currently inactive. Contact department for information about when this course may be taught.

Program planning for locally applied curriculum design to meet student interests and community needs for career and technical educators. (F,Sp,Su)

Operation and application of electrical motors, electrical and electronic controls, and circuit and overload protection utilized in agricultural and industrial installations. This course is currently inactive. Contact department for information about when this course may be taught.

Course Descriptions

inspections and maintenance, with laboratory applications of principles and components studied. Prerequisite: AV 2140 (must be taken concurrently). (Sp)

**AV 2170** Aircraft Systems 2
Theory and operation of aerospace environmental systems, communication, navigation and guidance systems, fuel and propellant systems, fire detection, and warning. (Sp)

**AV 2180** Aircraft Hydraulic and Pneumatic Systems 2
Theory and operation of aircraft hydraulic, landing gear, and brake systems. (F)

**AV 2190** Aircraft Systems Lab 1
Laboratory application of principles and components studied in AV 2170. Prerequisite: AV 2170 (must be taken concurrently). (Sp)

**AV 2200** Aircraft Hydraulics and Pneumatics Systems Lab 1
Laboratory application of principles and components studied in AV 2180. Prerequisite: AV 2180 (must be taken concurrently). (Sp)

**AV 2250** Internship 1-4* (F,Sp,Su)
Planned supervised work experience in industry. Must have departmental approval. (F,Sp,Su)

**AV 2330** Private Pilot Ground School 4
Students select and plan a senior project. Requires written proposal, including technical description of the project and management plans. (Sp)

**AV 2340** Aircraft Electrical Systems and Components 2
Aircraft electrical power generating systems. Theory of generation, alternators, regulation, and control systems with laboratory application of principles and components studied. Prerequisite: ETE 2300. (Sp)

**AV 2440** Aircraft Electrical Systems Laboratory 2
Laboratory application of principles and systems studied in AV 2430. Prerequisites: ETE 2300; AV 2430 (must be taken concurrently). (Sp)

**AV 2510** Intermediate Flight 1
FAA approved flight training program that fulfills the cross country requirements for commercial and instrument ratings. Prerequisite: AV 2350. (F,Sp;Su)

**AV 2520** Instrument Pilot Ground School 4
Ground school approved by FAA under Part 141 of the Federal Aviation Regulations. Designed to prepare students to pass the FAA oral and written examinations required for becoming instrument rated pilots. Prerequisite: AV 2350. (F,Sp)

**AV 2540** Instrument Pilot Certification I 1
FAA approved flight training program introducing requirements for issuance of the Instrument Pilot Airplane Rating. Prerequisites: AV 2350; AV 2520 (may be taken concurrently). (F,Sp;Su)

**AV 2550** Instrument Pilot Certification II 1
Continuation of AV 2540. Completes all requirements for issuance of the instrument pilot airplane rating. Prerequisite: AV 2540. (F,Sp;Su)

**AV 2620** Commercial Pilot Ground School 2
Commercial flight operations including performance, cross country planning, advanced systems operations, complex airplanes, and flight maneuvers. Prerequisites: AV 2350, 2520, and 2540. (F,Sp)

**AV 2660** Commercial Pilot Certification 1
Flight instruction to meet FAA requirements and completion of tests for certification. Prerequisites: AV 2540; AV 2620 (may be taken concurrently). (F,Sp;Su)

**AV 2720** CFII and CFII Ground School 3
Designed to prepare students to pass the FAA oral and written examinations required for becoming certified flight instructor. Prerequisites: AV 2720 and 2740 (may be taken concurrently). (F,Sp;Su)

**AV 2860** CFII Certification 1
FAA approved flight training program meeting all the requirements for, and in the issuance of, the Certified Flight Instructor Airplane Rating. Prerequisites: AV 2720 (may be taken concurrently). (F,Sp;Su)

**AV 2880** Multi-Engine Certification 1
FAA approved flight training program meeting all the requirements for, and in the issuance of, the Multi-Engine Airplane Rating. Prerequisites: AV 2660. (F,Sp;Su)

**AV 3010** National Airspace, Air Traffic Control, and Airport Administration 3
Study of air traffic control system, airspace usage, and facilities. Airport planning, development, and management and their importance to the achievement of a successful airport operation. Management of publicly owned and operated airports, ranging in size from general aviation to the large air carrier hubs. (F)

**AV 3120** Aviation Law 3
Law as it affects aviation industry. Rights and responsibilities of individual organizations and the aviation community. Regulation and liability pertaining to design, manufacturing, operation, and maintenance of aircraft. Prerequisite: AV 1100. (F)

**AV 3140** Advanced Avionics Systems and Flight Simulation 3
In-depth study of state-of-the-art aircraft instrumentation systems and advanced flight training utilizing a flight simulator. Prerequisite: AV 2540. (F,Sp;Su)

**AV 3280** Advanced Turbine Engines 2
Advanced study of turbo-jet propulsion. Comparative examination of jet, fan, turbo-prop, and turbo-shaft engines. Prerequisite: AV 2150. (F)

**AV 3410** FCC License 1
Prepares students to obtain the FCC General Radio Telephone Operator’s License. Covers electronic fundamentals through microwave radar and FCC rules and regulations. Prerequisite: ETE 3400. (Sp)

**AV 3610** AeroTechnology Design I 1
Students select and plan a senior project. Requires written proposal, including technical description of the project and management plans. (Sp)

**AV 4200** Composite Manufacturing Processes and Repair 3
Composite manufacturing processes, composite materials survey, tooling design and fabrication, autoclave processes, vacuum bag techniques, filament winding processes, equipment requirements, materials cutting and storage, and composite materials testing. (Sp)

**AV 4250** Internship 1-6* (F,Sp,Su)
Planned supervised work experience in industry. Prerequisite: Departmental approval. (F,Sp,Su)

**AV 4280** Airline Management 3
Study of airline operations and their organizational structure. Examines functions of airline dispatcher, operations specialists, managers, and cockpit flight crew. Discussion of advanced flight planning, aircraft performance and loading considerations, complex airplane operations, and impact of weather on flight operations and routing priorities. Prerequisite: AV 1100. (F)
Course Descriptions

AV 4300  Airline Marketing  3
Introduces marketing thought, basic marketing principles and their application to airline business and operations, strategic planning, and decision-making. No prerequisites; however, AV 4290 is highly recommended. (Sp)

AV 4480  Certified Flight Instructor Practicum  2
Under supervision of ground school instructor, students gain practical experience teaching ground school subjects. Prerequisite: AV 2740.

AV 4490  Human Factors in Aviation Safety  3
Examines major causative agent in aircraft accidents: the human being. Emphasizes psychological and physiological factors enhancing accident probability. Includes detailed analysis of ergonomics (human engineering) and its influence on safety. (Sp)

AV 4610  CI  AeroTechnology Design II  3
Execution and completion of a team or individual project. Requires design reviews and written reports. Prerequisite: AV 3610. (F)

AV 4620  CI  AeroTechnology Design III  3
Preparation and presentation of a team or individual project. Writing and speaking skills emphasized through technical reports and presentations. Prerequisite: AV 4610. (Sp)

AV 4660  CI  Flight Senior Project  3
Students select, plan, and execute an approved senior project. Writing and speaking skills emphasized through technical reports and presentations. (F,Sp)

AV 5400  Regional Jet Ground School I  4
Introduction to a typical commercial jet aircraft in use by Regional Airlines. Course includes the following: Aircraft Systems, Standard Operating Procedures, and Flight Planning and Performance. Introduction to Airline Flight Operations in preparation for entry-level pilot positions with a regional airline. Prerequisite: AV 2550. (Sp)

AV 5410  Regional Jet Ground School II  4
Continuation of AV 5400. Prerequisite: AV 5400. (F)

BA 1350  Introduction to Business  3
Investigation of the role of business in contemporary society, including an introduction to the general problems of business operation. (F)

BA 3080  QI  Operations Research  3
Quantitative methods for resource allocation: linear programming, queuing theory, simulation, project management, etc. Prerequisites: STAT 2300 or 3000; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp,Su)

BA 3400  QI  Corporate Finance  3
How corporations raise and manage capital. Study of modern financial principles, methods, policies, and institutions. Corporate organization, creation, and reorganization. Prerequisites: MATH 1050; ACCT 2010; choose one statistics course from: STAT 1040, 2300, 3000, or PSY 2800; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp,Su)

BA 3460  Fundamentals of Personal Investing  3
Examination of investment vehicles available to personal investor. Principal emphasis on corporate and government securities. Credit cannot be used toward requirements for finance major.

BA 3500  Fundamentals of Marketing  3
Overview of marketing function, emphasizing concepts and terminology. Includes basic marketing activities of product management, pricing, distribution, promotion, marketing research, and consumer behavior. Prerequisites: Admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp,Su)

BA 3700  Operations Management  3
Covers the concepts and tools related to managing a business operation. Topics include demand forecasting, operations strategy and resource planning, process layout, lean systems, inventory and quality, and project management.

BA 4050  International Retailing  3
(Issues related to retailing in international markets, such as motivations, cultural influence on consumer behavior, and entry strategies. Prerequisites: Grade of B- (2.67) or better in BA 3500; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (Prerequisites do not apply to students taking BA 6050.)

BA 4070  CI  Retail Management  3
(dual listing 6070)
Basic issues related to retail management, such as merchandising, location, promotion, store management, and retail image. Prerequisites: Grade of B- (2.67) or better in BA 3500; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (Prerequisites do not apply to students taking BA 6070.)

BA 4240  Merchandise Planning and Control  3
Issues related to pricing, budgeting, open-to-buy, and planning inventory. Prerequisites: Grade of B- (2.67) or better in BA 3500; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)

BA 4300  International Finance  3
Overview of international financial management, including international financial markets, exchange rate behavior, and financing international trade. Prerequisites: Grade of B- (2.67) or better in BA 3400; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)

BA 4410  Financial Institutions  3
Role of domestic and international financial institutions in supplying services to consumers, businessmen, and government. Prerequisites: Grade of B- (2.67) or better in BA 3400; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)

BA 4420  Insurance  3
Studied from the standpoint of insurance services consumers, course explores types of life, property, and casualty insurance contracts; nature and uses of life and property insurance; and the organization, management, and government supervision of insurance companies. Prerequisites: Grade of B- (2.67) or better in BA 3400; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F)

BA 4430  Real Estate Finance  3
Covers theory, principles, and techniques of real estate investment, emphasizing present value and cash-flow approaches to real estate investment decisions. Prerequisites: Grade of B- (2.67) or better in BA 3400; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (Sp)

BA 4450  Financial Policy  3
Analyses working capital management, capital budgeting, capital management, and other short-term and long-term financial decisions. Prerequisites: Grade of B- (2.67) or better in BA 3500; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)

BA 4460  Investments  3
Provides an understanding of security analysis and portfolio management. Market operations; risk and return; stock, bond, and option analysis; and portfolio theory and creation. Prerequisites: Grade of B- (2.67) or better in BA 3400; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)

BA 4510  Buyer Behavior  3
Marketing analysis of the decision processes of individuals, households, businesses, and not-for-profit institutions. Builds on concepts from psychology, sociology, anthropology, and economics. Prerequisites: Grade of B- (2.67) or better in BA 3500; choose one of the following statistics courses: STAT 1040, 2300, 3000, or PSY 2800; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)

BA 4530  Marketing Research  3
Management of marketing research function. Basic vs. decisional research, survey research, cost vs. value of information, research design, experimentation, and analysis techniques. Prerequisites: Grade of B- (2.67) or better BA 3500; choose one of the following statistics courses: STAT 1040, 2300, 3000, or PSY 2800; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)

**BA 4540 Marketing Institutions**
Examination of strategic decision-making by institutions involved in the marketing channel. Primary emphasis on retail institutions. Explores types of marketing intermediaries, vertical integration, channel member power and conflict, and international channel management issues. Prerequisites: Grade of B- (2.67) or better in BA 3500; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)

**BA 4550 Promotion Management**
Examines role of promotion concepts in development of a communication strategy. Based on an introduction to the nature of communications, course covers advertising, personal selling, and sales promotion, emphasizing the competitive and strategic value of communications in both the marketplace and society. Prerequisites: Grade of B- (2.67) or better in BA 3500; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)

**BA 4590 Global Marketing Strategy**
Analytical approach to strategic marketing problems facing the firm competing in global markets. Emphasizes key analytical and decision-making frameworks concerning the global marketing environment and the marketing mix and their impact on the firm's performance. Prerequisites: Grade of B- (2.67) or better in BA 3500; BA 4540, 4550; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)

**BA 4720 Production Planning and Control**
Examines concepts and tools used in the planning and control of production activity and material flow. Topics include production scheduling, capacity analysis, and push versus pull production. Prerequisites: Grade of B- (2.67) or better in BA 3700; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F,Sp)

**BA 4750 Production Simulation**
Computer simulation of production environment, including scheduling, routing, labor capacity, inventory, and delivery. Emphasizes just-in-time concepts. Prerequisites: Grade of B- (2.67) or better in BA 3700; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F)

**BA 4790 Supply Chain Management**
Analysis of the concept of supply chains and how managing them supports operations strategy and organizational competitiveness. Topics include supply management, supply chain alliances, distribution planning, and logistics systems design. Prerequisites: Grade of B- (2.67) or better in BA 3700; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (Sp)

**BA 4800 Independent Research and Reading**
1-3

**BA 4950H Senior Honors Thesis/Project**
Creative project that will then be written up, and presented, as a Senior Thesis as required for an Honors Plan. (Sp)

**BA 5730 Process Analysis and Improvement**
Application of quality management concepts to business processes. Students learn a variety of methods for documenting, analyzing, and improving a process. Topics include the DMAIC Cycle, process mapping, capacity analysis, root cause analysis, mistake proofing, and creative problem solving. Prerequisites: Grade of B- (2.67) or better in BA 3700; STAT 2300 or 3000; admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits. (F)

**BA 6050 International Retailing**
Issues related to retailing in international markets, such as motivations, cultural influence on consumer behavior, and entry strategies.

**BA 6070 Retail Management**
Basic issues related to retail management, such as merchandising, location, promotion, store management, and retail image.

**BA 6180 Intrasession MBA Workshop**
Intensive workshops designed to enhance the MBA experience.

**BA 6350 Managerial Economics**
Application of concepts and theories, based on managerial economics, to business problems. Addresses cost theory, pricing, market structures, and forecasting. (Sp)

**BA 6410 Corporate Finance Essentials**
Introduction of corporate finance principles for students entering a master’s degree program in the College of Business. Graded Pass/Fail only. Prerequisite: Acceptance into a College of Business master’s degree program. (Su)

**BA 6420 Financial Problems**
Corporate finance case course, dealing with problems in working capital management, capital budgeting, cost of capital problems, and corporate restructuring. (F)

**BA 6440 Financial Decision Making**
Presentation of financial modelling techniques impacting firm decisions. (Sp)

**BA 6510 Marketing Techniques**
Introduction of marketing principles for students entering a master’s degree program in the College of Business. Graded Pass/Fail only. Prerequisite: Acceptance into a College of Business master’s degree program. (Su)

**BA 6520 Marketing Strategy**
Advanced case approach to current marketing management problems. Emphasizes concepts, research, techniques, decision making, and marketing strategy development. (Sp)

**BA 6540 Special Topics in Marketing**
Selected topics in marketing pursued in depth. Topics and instructors vary from semester to semester. Current topics include: Marketing Communications and Supplemental Aspects of Electronic Commerce, The Changing Environment of Marketing Institutions, and Buyer Behavior. Prerequisite: BA 6520. (Sp)

**BA 6560 Market Analysis and Decision Making**
Develops skills necessary to plan and implement an effective marketing strategy. Focuses on role of marketing information in managerial decision making. Uses marketing cases and/or simulation games throughout the course. (F,Sp)

**BA 6710 Essentials of Operations Management**
Introduction of operations management principles for students entering a master’s degree program in the College of Business. Graded Pass/Fail only. Prerequisite: Acceptance into a College of Business master’s degree program. (Su)

**BA 6720 Operations Management**
Study of basic process functions in managing a production or service organization, such as inventory control, production control, procurement, quality control, production planning, forecasting, etc. (F)

**BA 6740 Decision Making in Operations Management**
Selected topics in operations management pursued in depth. Topics and instructors vary from semester to semester. Prerequisite: BA 6720. (Sp)

**BA 6860 Business Research Methods**
Explores the fundamentals of qualitative and quantitative data collection and analysis. Students design and implement small, integrated research activities, then use the results to make business strategy recommendations. (Sp)

**BA 6900 Independent Research and Reading**
1-3

**BA 6940 Professional Paper**
A paper of professional quality prepared by each student. Designed to demonstrate the ability to complete a major business-related project and to effectively present the results. (F,Sp,Su)

**BA 6970 Thesis**
Graded Pass/Fail only. (F,Sp,Su)

**BA 6990 Continuing Graduate Advisement**
Graded Pass/Fail only. (F,Sp,Su)

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

*This course is also offered by online correspondence and/or CD through Independent and Distance Education.

Utah State University 2007-2009 General Catalog 573
Course Descriptions

Biological and Irrigation Engineering (BIE)

See Department of Biological and Irrigation Engineering, pages 174-179

BIE 1880  Engineering Quantification of Biological Processes 3
Introduction to engineering practice of biological modeling and quantification of biological processes. Introduction to transport of heat and mass; bioenergetics, thermodynamics, and enzyme kinetics; metabolism; mechanical work processes; and modeling of biological systems. Recommended that students take BIE 1880 after taking calculus and biology. (Sp)

BIE 2330  Engineering Properties of Biological Materials 3
Relationships between composition, structure, and properties of biological materials. Definition, measurement, and use of mechanical, thermal, electromagnetic, chemical, and biological properties in computation and design. Prerequisites: BIOL 1610, BIE 1880, CHEM 1210, 1215. (F)

BIE 2400  Biological and Environmental Thermodynamics 3
Introductory thermodynamics for biological and environmental engineering. First and second laws of thermodynamics. Entropy, thermodynamics of processes, and equations of state. Phase equilibria, Gibbs free energy, and Raoult's law. Prerequisite: MATH 1220. (Sp)

BIE 3000  Instrumentation for Biological Systems 2
Fundamentals of measurement systems used in bioprocess, biomedical, agricultural, biological, and environmental applications. Selection and use of sensors, data acquisition systems, and elementary controls. Prerequisite: ETE 2210 or 2300. (Sp)

BIE 3200  Introduction to Unit Operations in Biological Engineering 3
Introduction to the fundamental unit operations required to process biological materials in bioprocessing, biomedical, and food engineering applications. Integration of biology and chemistry into biological engineering using basic concepts in heat, mass, and energy conservation and transport. Prerequisites: BIE 2330, CHEM 2300. (F)

BIE 3670  Transport Phenomena in Bio-Environmental Systems 3
Core course in both biological and environmental engineering. Students develop a detailed understanding of the principles, concepts, modes, and methods of calculating heat and mass transfer. Emphasis given to contaminant and nutrient flux, along with their state transformations, in order for the biological or environmental engineer to evaluate options for production, clean-up, and control of bio-environmental systems. Prerequisites: CEE 3500 and MAE 2300. Also taught as CEE 3670. (Sp)

BIE 3870  Biological Engineering Design I 1
Students select and plan a senior design project. A project proposal, including a technical description of the project and management plans, is required. (F,Sp,Su)

BIE 4250  Cooperative Practice 3
Planned work experience in industry or government. Detailed program must be approved prior to registration. Written report required. (F,Sp,Su)

BIE 4880  CI  Biological Engineering Design II 3
Execution and completion of a comprehensive senior design project. Design reviews and written reports are required. Prerequisite: BIE 3870. (F,Sp,Su)

BIE 4890  CI  Biological Engineering Design III 3
Preparation and presentation of the senior design project. The presentation will involve a professional standard report and an evaluation and critique by Biological Engineering students and faculty. Prerequisite: BIE 4880. (F,Sp,Su)

BIE 4930  Special Studies 1-4
Independent or group study of biological and irrigation engineering subjects not covered in regular course offerings. (F,Sp,Su)

BIE 5010  Principles of Irrigation Engineering 3
(dual listing 6010)
Soil-water-plant relationships; evapotranspiration and water requirements; effective water use; irrigation scheduling; infiltration; irrigation systems planning. Prerequisites: CEE 3430, 3500, ENGR 2200. (F, Sp online, Su)

BIE 5110  Sprinkle and Trickle Irrigation 4
(dual listing 6110)
Sprinkle and trickle irrigation system demand, system selection and configuration, emitter and sprinkler characteristics and sizing, uniformity and efficiency, pipe network layout and sizing, and system operation, management, and maintenance. Prerequisite: BIE 5010/6010. (F)

BIE 5150  Surface Irrigation Design 3
(dual listing 6150)
Design and evaluation of surface irrigation systems. Field measurements for evaluating and improving uniformity and efficiency. Simulation of surface systems. Land leveling computation and equipment. Prerequisite: BIE 5010/6010. (F, Sp online, Su)

BIE 5250  Remote Sensing of Land Surfaces 4
(dual listing 6250)
Principles of radiation and remote sensing. Techniques for ground-based measurements of reflected and emitted radiation, as well as ancillary data collection to support airborne and satellite remote sensing studies in agriculture, geography, and hydrology. Prerequisites: MATH 1100 or 1210; and PHYS 2110 or 2210. Also taught as METE 5250/6250 and WATS 5250/6250. (Sp)

BIE 5300  Irrigation Conveyance and Control Systems 3
(dual listing 6300)
Design, evaluation, and operation of irrigation distribution systems. Measurement and monitoring of flows and water levels, and canal and pipeline automation. Simulation of system hydraulics. (F)

BIE 5350  Drainage and Water Quality Engineering 3
(dual listing 6350)
Introduction to principles and practices of drainage. Engineering investigation and design of drains. Formation and function of wetlands caused by irrigation and drainage systems. Prerequisite: BIE 5010/6010. (Sp)

BIE 5450  Field Evaluation of Agricultural Irrigation Systems 2
(dual listing 6450)
Field measurements in pressurized and surface irrigation systems for performance evaluation and determination of water application uniformity and efficiency. (Su)

BIE 5520  Irrigation Project Operation and Maintenance 3
(dual listing 6520)
Organizing, administering, and financing irrigation and drainage projects. Operation and maintenance of irrigation distribution systems. Simulation of command area water demands. Prerequisite: BIE 5010/6010. (Sp)

BIE 5550  Groundwater Systems Engineering I 3
(dual listing 6550)
Groundwater exploration; well drilling and testing; pumping plant design, operation, and testing; aquifer evaluations; sifting of multiple well systems. Development of pumping strategies for water supply and environmental control systems. Introduction to conjunctive use. Prerequisite: BIE 5010/6010. (F)

BIE 5610  Food and Bioprocess Engineering 3
(dual listing 6610)
Standardization and compounding of biomaterials and food products; preservation processing using heat, refrigeration, concentration, and dehydration. Basic unit operations in the bioprocessing industry. Prerequisite: BIE 3200. Also taught as NFS 5610/6610. (F)

BIE 5668  Biological Systems Modeling and Controls 3
Development of mathematical models to describe biological systems. Emphasizes use of analogic techniques for development and numerical methods for solution. Systems to be considered include biotransport, population biology, and cellular engineering. Prerequisite: MATH 2250. (F)

</table>
**Course Descriptions**

**BIE 6810 Biochemical Engineering (dual listing 5810)** 3
Fundamentals of bioreactor design and bioengineering to produce biological commodities. Emphasizes mathematical models of microbial and enzymatic processes in environmental and industrial biotechnology. Prerequisites: BIE 3200 and BIE/CEE 3670; or BIE/CEE 3670, CEE/PUBH 3610, and CEE 3640. Also taught as CEE 6810/5810. (F)

**BIE 6830 Management and Utilization of Biological Solids and Wastewater (dual listing 5830)** 3
Focuses on production, management, and disposal of biosolids and wastewater generated in food processing and wastewater treatment. Emphasizes beneficial use of biosolids and wastewater for agricultural production, forest enhancement, and land reclamation. Prerequisites: BIE 3200, BIE/CEE 3670, CEE/PUBH 3610, CEE 3640. Also taught as CEE 6830/5830. (F)

**BIE 6840 Introduction to Biophotonics (dual listing 5840)** 3
Engineering aspects of interactions of light with living systems. Design, testing, construction, and simulation for medical, bioprocess communication, data storage, and instrumentation applications. To receive graduate-level credit, students must complete a 10-page extra paper project addressing state-of-the-art research being conducted on a new biophotonics instrument, component, or device. Engineering aspects of the research development must be addressed (i.e., design; cost, including capital and O&M; reliability; and performance). Use and referencing of the current research literature is required. (F)

**BIE 6850 Biomaterials Engineering (dual listing 5850)** 3
Explores identification and modification of properties of natural and artificial biomaterials. Design of applications for by-product recovery and recycling, environmental, food processing, and biomedical industries. Commercialization of biomaterial feed stocks, biotechnology output, and bioprocessing by-products into traditional and alternative products. Prerequisite: BIE 2330. (F)

**BIE 6860 Research Orientation (dual listing 7860)** 1
Promotes familiarization with departmental and graduate school rules, procedures, and research. (F)

**BIE 6870 Research Planning (dual listing 7870)** 1
Tools and techniques for writing research proposals and giving presentations. (Sp)

**BIE 6890 Tissue Engineering (dual listing 5890)** 3
Introduction to fundamentals of tissue engineering. Investigation of engineering design strategies for artificial organs, as well as treatments for disease disorders of nerves, blood vessels, bones, cartilage, skin, and liver. Exploration of the use of stem cell gene therapy in tissue engineering. Prerequisite: BIE 2330 or permission of instructor. (Sp)

**BIE 6910 Introduction to Biosensors (dual listing 5910)** 3
Principles of biologically based sensing elements and interfacing techniques. Design and analysis methods of biosensing and transducing components in bio-interface. Applications of biosensors and bioelectronics in biomedical, bioprocessing, and biomechanical engineering. Prerequisite: BIE 2330 or permission of instructor. (F)

**BIE 6930 Special Problems (dual listing 5930)** 1-4
Independent study of problems in biological and agricultural engineering. (F,Sp,Su)

**BIE 6970 Thesis Research (dual listing 5970)** 1-8
Credit for MS research and report requirements. Graded Pass/Fail only. (F,Sp,Su)

**BIE 6990 Continuing Graduate Advisement for MS and PhD Students (dual listing 5990)** 1-9
Graded Pass/Fail only. (F,Sp,Su)

**BIE 7350 Groundwater Systems Engineering II** 4
System analysis techniques applied to aquifer and stream/aquifer management.

**BIE 7600 Advanced Research Topics (dual listing 6860)** 3
Study of advanced biological and engineering topics. Analysis of project scale water management issues, software development, crop modeling, advanced drainage systems, remote sensing, groundwater systems, and other topics taken from the research interests of the faculty. Prerequisite: PhD enrollment. (Sp)

**BIE 7680 Research Orientation 1-9**
Promotes familiarization with departmental and graduate school rules, procedures, and research. (F)

**BIE 7780 Research Planning 1**
Tools and techniques for writing research proposals and giving presentations. (Sp)

**BIE 7970 Dissertation Research 1-10**
Graded Pass/Fail only. (F,Sp,Su)

**BIE 7990 Continuing Graduate Advisement for PhD Students 1**
Graded Pass/Fail only. (F,Sp,Su)

**BIE 7990-99 Continuing Graduate Advisement 1**
Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

**Biology (BIOL)**

See Department of Biology, pages 180-193

**BIOL 1010 BLS Biology and the Citizen** 3
Principles and methods of biology and how they impact the daily life and environment of the individual. (F,Sp,Su)

**BIOL 1020 Biological Discovery: A Lab Course** 1
Field and laboratory investigative exercises. Emphasizes observation, hypothesis formulation and testing, data analysis, and writing. (F,Sp)

**BIOL 1030 Medical College Admissions Test (MCAT) Preparation** 1
Classroom instruction, tutorials, and readings to review material expected to be covered on the MCAT. Several Saturday practice exams are scheduled. Graded Pass/Fail only. (Sp)

**BIOL 1040 Dental Admissions Test (DAT) Preparation** 1
Classroom instruction, tutorials, and readings to review material expected to be covered on the DAT. Several Saturday practice exams are scheduled. Graded Pass/Fail only. (Sp)

**BIOL 1100 Introduction to Microbiology** 3
Biology and the role of microorganisms in the world around us, with emphasis on their contributions to human disease. Offered only through Independent Study. No laboratory component. Students who require a laboratory must take BIOL 2060. (F,Sp,Su)

**BIOL 1300 BLS Of Maggots, Mites, and Men** 3
Examines the natural history, evolution, and behavior of insects and spiders, as well as their impact on human individuals and societies. (F)

**BIOL 1610 Biology I** 4
Principles of cell biology, energetics, and genetics; plant structure, function, and development. Three lectures and one lab. To receive University Studies Breadth Life Sciences (BLS) credit, students must complete both BIOL 1610 and either BIOL 1620 or 3300. (F)
Course Descriptions

BIOL 1620  BLS  Biology II  4
(formerly BIOL 1220 BLS)
Animal structure, function, and development; principles of evolution, ecology, and behavior. Three lectures and one lab. Prerequisite: BIOL 1610. (Sp)

BIOL 1750  Topics in Biology (Topic)  1-3
(F,Sp)

BIOL 1800  Herbarium Studies  1-2
Provides classroom and practical experience in developing and maintaining a herbarium and extending its reach to the community. Students taking this course for one credit will complete classroom and laboratory work, while those earning two credits will in addition complete an herbarium research or service project. (F)

BIOL 2040  Introduction to Biotechnology  1
Introduces freshmen to the emerging field of biotechnology and the impact this technology has on society. Also taught as ADVS 2040, NFS 2040, and PSB 2040. (Sp)

BIOL 2060  Elementary Microbiology  4
Biological role of microorganisms in the world around us, with emphasis on their contributions to human disease. Not intended for biology majors. (F)

BIOL 2220  General Ecology  3
Study of the interrelationships among organisms and their environments, addressing where and how organisms live. Adaptation, population growth, species interactions, biodiversity, and ecosystem function are explored for a wide variety of organisms and ecosystems. Prerequisites: BIOL 1610 and 1620. Also taught as NR 2220. (F,Sp)

BIOL 2300  Mushroom Identification  1
Lecture course covering taxonomy, ecology, and importance of macro and micro fungi. Also taught as WILD 2300. (F)

BIOL 2310  Mushroom Identification Lab  1-2
Lab course acquainting students with basic fungal taxonomic groups. Students collect, preserve, and identify fungi they collect. Edible fungi prepared and eaten. Also taught as WILD 2310. (F)

BIOL 2320  Human Anatomy  4
(formerly BIOL 2010)
Study of the human body, with emphasis on the structure of each of the body’s essential organ systems. Three lectures, one lab. (Sp,Su)

BIOL 2410  Plants and Fungi in the Field  2
Introduction to identification of green plants and macrofungi. Quantitative methods for field studies. Prerequisite: BIOL 1610. (Su)

BIOL 2420  Human Physiology  4
(formerly BIOL 2000)
Functioning of the human body, with emphasis upon major organ systems. Medical and athletic examples used to illustrate important concepts. (F,Sp,Su)

BIOL 2520  Pathophysiology  3
Promotes an understanding of disease and dysfunctional variations of normal health across the body. Prerequisites: BIOL 2320 and 2420, each with a minimum grade of C. Course offered only at select branch campuses, not at the Logan campus. (F,Sp)

BIOL 2700  Predental Orientation and Observation  3
Introduces predental students to the dental curriculum and characteristics of the dental profession. Each student assigned to a practicing dentist for part of the course. Prerequisite: Permission of advisor. (Sp)

BIOL 3000  DSC  Discovering Utah's Biodiversity  3
Lecture and field course designed to identify and study local organisms and their role in ecosystems. Topics include ecology, local geology, adaptations to the local environment, and human impacts. Major components include writing, as well as the collection and presentation of data. Prerequisite: Completion of a University Studies Breadth Life Sciences (BLS) course. (F,Sp)

BIOL 3010  DSC/CI  Evolution  3
Origins and evidence for the theory of biological evolution, and its significance for society and science. Prerequisite: University Studies Breadth Life Sciences (BLS) course. (Sp)

BIOL 3030  DSC  Genetics and Society  3
Course for nonscience majors. Addresses ethical, political, and social implications of advances in genetics and basic genetic principles, as well as contemporary issues in human genetics. Prerequisite: University Studies Breadth Life Sciences (BLS) course. Not open to biology majors or to those with credit in BIOL 3060. (Sp)

BIOL 3040  DSC  Plants and Civilization  3
Examines the importance of plants as food, shelter, clothing, medicine, and drugs. Social and historical role of plants in aesthetics, religion, energy, biotechnology, human exploration, and migration. Prerequisite: University Studies Breadth Life Sciences (BLS) course. (F)

BIOL 3060  QI  Principles of Genetics  4
(formerly BIOL 3200 QI)
Introduction to transmission, population, and molecular aspects of modern genetics. Prerequisites: BIOL 1610, CHEM 1110 or 1210. (F,Sp,Su)

BIOL 3065  Genetics Laboratory**  2
(formerly BIOL 4100)
Experimental approach to genetics using bacteria, fungi, plants, insects, and humans. Students will be introduced to several computer and laboratory techniques, and will design many of the experiments. Prerequisite: BIOL 3060 (may be taken concurrently). (F)

BIOL 3100  CI  Bioethics  3
Discussion of current controversial ethical issues in medicine, animal rights, and environmental conservation. (Sp)

BIOL 3220  QI  Field Ecology  2
Field trips and exercises to study ecological patterns and processes in terrestrial and aquatic habitats. Emphasis on hypothesis testing and collection and analysis of data from the field. Prerequisite: BIOL 2220 (may be taken concurrently); MATH 1100 or 1210. Recommended: Course in statistics. (F)

BIOL 3300  General Microbiology  4
Biology, ecology, and diversity of microorganisms. Emphasis placed on bacteria, viruses, fungi, and protists, and their role in the environment. Two lectures, two labs. Prerequisites: BIOL 1610 (with a grade of C- or better); CHEM 1120 or 2300 or 2310 (may be taken concurrently). To receive University Studies Breadth Life Sciences (BLS) credit, students must complete both BIOL 1610 and 3300. (F,Sp)

BIOL 3500  DSC  Plagues, Pests, and People  3
Examines the biology and diversity of medically important insects and their associated diseases. Emphasizes the basic principles and concepts in medical, veterinary, and forensic entomology, as well as the historical impact of insect-borne diseases. Prerequisite: University Studies Breadth Life Sciences (BLS) course. (Sp)

BIOL 3760  Independent Study  1-3
Directed individual or group study. Prerequisite: BIOL 1620. Not counted as Biology degree elective or toward the Biology, Biomath, or Public Health minors. (F,Sp,Su)

BIOL 4000  Human Dissection  1
Exposure and dissection of the human body, with an emphasis on bones, joints, muscles, and internal organs. One evening lab per week. Prerequisite: BIOL 3230. (F)

BIOL 4060  CI  Exploring Animal Behavior  3
In-depth investigation into current topics. Students will generate hypotheses; design and complete experiments in field and lab; and prepare a written lab report, book review, and poster for public presentation. Two lectures, one lab. Prerequisite: BIOL 1620, 2220. (Sp)

BIOL 4230  QI  Applied Mathematics in Biology**  3
Formulation, analysis, and experimental tests of mathematical models in biology. Combines mathematics, computing, experimental design, and statistical analysis while applying the scientific method to biological systems. Lectures, recitations, and a laboratory. Prerequisites: C- or better in BIOL 1620 and MATH 2250; or permission of instructor. Programming recommended. Also taught as MATH 4230. (Sp)

BIOL 4250  Internship/Co-op  1-2
Internship/cooperative work experience in biology or prehealth biology to allow
Course Descriptions

student to gain a professional level of experience. Advisor’s signature required.

(F,Sp,Su)

Biol 4400 QI Plant Physiology 4
Introduction to plant metabolism, water relations, and growth. Prerequisites: Biol 1620; Math 1050 or higher. (F)

Biol 4410 Plant Structure 3
Morphology, anatomy, and development of seed plants, with an emphasis on angiosperms. Two lectures and one lab. Prerequisite: Biol 1610. (Sp)

Biol 4420 Plant Taxonomy 3
Identification of vascular plant species and recognition of families common in northern Utah. Introduction to principles and practices of plant taxonomy. Prerequisite: Biol 1610. (Sp)

Biol 4430 Introduction to Plant Pathology 4
Combined lecture-lab course emphasizing concepts in plant pathology. Symptoms and disease-causing organisms are described. Methods of control, the nature of epidemics, and disease prediction. Prerequisite: Biol 1610. (Sp)

Biol 4500 Applied Entomology 3
Fundamentals of insect biology, emphasizing species of economic importance. Principles and tactics of pest management. Laboratory surveys of beneficial and harmful insects affecting humans and agriculture. Prerequisites: Biol 1610 and 1620. (Sp)

Biol 4710 Teaching Internship 1*
Advanced undergraduates function as teaching interns under supervision of faculty member. Only 1 credit may be counted toward Biology degree electives. Prerequisite: Consent of instructor. (F,Sp,Su)

Biol 4750 Topics in Biology (Topic) 1-3*
(F,Sp,Su)

Biol 5010 Biogeography 3
(dual listing 6010)
Distributions of plants and animals, including invertebrates, from terrestrial, freshwater, and marine systems, discussed from historical and ecological perspectives. Explores ecological patterns of body size, color, species density, home range, etc., as well as their causes. Prerequisite: Biol 1620. (Sp)

Biol 5020 QI Modeling Biological Systems* 3
(dual listing 6020)
Basic techniques of mathematical and computer simulation applied to a wide variety of biological systems: ecology, physiology, agroecosystems, and cell biology. Model formulation, validation, sensitivity and stability analysis, stochastic systems. Prerequisites: Math 1220, Stat 3000, programming experience. (F)

Biol 5030 Individual-Based Models in (dual listing 6030) Ecology and Evolution* 3
Examines the nature, application, and student development of computer simulation models that follow the demographic fates and spatial movement of individual organisms in the context of ecological and evolutionary questions. Recommended prior to enrollment: Programming experience (preferably in C), upper-division courses in statistics and ecology or evolution, and Biol 5020/6020. (Sp)

Biol 5100 Neurobiology** 3
(dual listing 6100)
Physiology, organization, and development of nervous systems. Examples taken from vertebrate and invertebrate systems. Special emphasis placed on cellular and molecular substrates of electrical excitability. Prerequisites: Biol 5600 or 5620; Chem 1220; and Phys 2120 or 2220. (F)

Biol 5150 Immunology 3
Immune response in health and disease. Experimental approach to investigating immune function and abnormalities. Prerequisites: Chem 1220; Biol 3060; and Biol 3300 or 5210. (Sp)

Biol 5160 Methods in Biotechnology: Cell Culture 3
Techniques and fundamental knowledge for culturing mammalian and insect cells. Students will learn maintenance, growing, genetic engineering of cells, cytotoxicity, hybridoma creation, cloning, etc. Extensive laboratory experience is provided. Also taught as AdvS 5160, Nfs 5160, and Psb 5160. (Sp)

Biol 5190 Molecular Genetics (dual listing 6190) 3
Molecular aspects of genetics, including DNA replication, structure, rearrangement, translocation, recombination, repair, genetic engineering, and gene expression. For 6000-level (graduate) credit, additional reading, recitation, and/or writing is required. Prerequisites: Biol 3060; and Chem 3700 or 5700. (Sp)

Biol 5210 Cell Biology 3
Examines the mechanisms of cell structure and function at the molecular level. Prerequisites: Biol 1620, 3060; Chem 2300 or 2320; Chem 3700 or 5700. (F)

Biol 5220 Endocrine Aspects of Nutrition (dual listing 6220) 2
Provides physiological background into hormones involved in nutrient regulation, as well as mechanisms of hormone action at the cellular and molecular levels. Includes action of steroids in the nucleus and membrane-based signal transduction pathways. Course includes lectures and literature reviews/presentations. Prerequisite: Chem 3700 or permission of instructor. Also taught as AdvS 5220/6220 and Nfs 5220/6220. (Sp)

Biol 5230 Developmental Biology 3
Examines the mechanisms of developmental biology using classical embryological and modern molecular and cellular approaches. Prerequisites: Biol 3060 and 5210; Chem 3700 and 5700 strongly recommended. (Sp)

Biol 5240 Methods in Biotechnology: Protein Purification Techniques 3
Reviews basic methods of protein purification, including scaled-up use of 100L fermenter, large-scale centrifugation, diafiltration, chromatography, and use of BioCAD. Prerequisite: Chem 3700. Also taught as AdvS 5240, Nfs 5240, and Psb 5240. (Sp)

Biol 5250 CI Evolutionary Biology 3
Current topics in organic evolution from molecular to macroevolutionary scales. Prerequisite: Biol 3060 or Wild 4880 or permission of instructor; Biol/Nr 2220 recommended. (F,sp)

Biol 5260 Methods in Biotechnology: Molecular Cloning 3
Laboratory-oriented course designed to teach molecular biology techniques such as DNA cloning, genetic probes, polymerase chain reaction, and DNA sequencing. Prerequisite: Chem 3700 or 5710; or Biol 3060; or permission of instructor. Also taught as AdvS 5260, Nfs 5260, and Psb 5260. (F)

Biol 5300 QI Microbial Physiology 4
Lectures, discussions, and laboratory investigations concerning the physiology, structure, and metabolism of prokaryotic and eukaryotic microbes. Prerequisites: Biol 3300, Math 1210. (Sp)

Biol 5310 Soil Microbiology* 3
Ecology and diversity of microorganisms in soils. Emphasis on factors controlling microbial activity and the role of microorganisms in organic matter decomposition and nutrient cycling. Prerequisites: Biol 1610, 1620; Chem 2300 or 2310; Soil 3000. Also taught as Soil 5310. (F)

Biol 5320 Soil Microbiology Laboratory* 2
Techniques for measuring microbial activity and diversity in soils. Includes use of molecular and isotope methods. Prerequisite: Concurrent or prior enrollment in Biol/Soil 5310. Also taught as Soil 5320. (F)

Biol 5330 Virology 3
Structure, replication, genetics, and molecular biology of viruses. Virus-host interactions. Viral diseases and antiviral agents. Prerequisites: Biol 3060 and 3300. (Sp)

Biol 5370 Molecular Methods in Nutrition Science (dual listing 6370) 2
Theory of modern techniques used to study macromolecules and ions. Prerequisite: Chem 3700. Also taught as AdvS/Nfs/Psb 5370/6370. (F)

Biol 5380 Evolutionary Genetics (dual listing 6380) 4
Examines theoretical and applied aspects of genes in natural and artificial populations. Topics include molecular evolution, population, and quantitative
Course Descriptions

genetics, with emphasis on the intersection of genetics with evolution, ecology, and conservation biology. Prerequisite: BIOL 3060 or permission of instructor. (F)

BIOL 5420 CI Forest and Shade Tree Pathology 3
Nature, cause, and management of forest diseases. Also taught as PLSC 5420 and WILD 5420. (Sp)

BIOL 5440 Plant Molecular, Cellular, and Developmental Biology I*** 3
Examines background and recent advances. Students analyze and discuss structure, genome, molecular, development, and photosynthesis topics from a research perspective. Prerequisites: BIOL 3060, 5210; CHEM 3700 or 5710. Also taught as PLSC 5440/6440. (Sp)

BIOL 5450 Plant Molecular, Cellular, and Developmental Biology II*** 3
Examines background and recent advances. Students analyze and discuss cell wall, growth regulator, and environmental response topics from a research perspective. Prerequisites: BIOL 3060, 5210; CHEM 3700 or 5710. Also taught as PLSC 5450/6450. (Sp)

BIOL 5530 Insect Systematics and Evolution 3
Evolution, biology, and classification of insects, including basic external morphology. Emphasizes role of phylogeny in systematics and importance of systematics in comparative biology. Prerequisite: BIOL 1620. (F)

BIOL 5550 Freshwater Invertebrates 3
Ecology, collection, and systematics of freshwater aquatic invertebrates. Focuses on insects, but also covers crustaceans, molluscs, and annelids. Several weekend field trips and a collection are required. Prerequisite: One year of general biology or zoology, or permission of instructor. Also taught as WATS 5550. (Sp)

BIOL 5560 Ornithology 3
Surveys evolution, systematics, physiology, anatomy, ecology, behavior, and identification of birds. Includes lectures, laboratory and field exercises, field trips, and an independent project. Attendance required at one Saturday and one Friday-Sunday field trip. Prerequisites: BIOL 1620; MATH 1500 or higher. (Sp)

BIOL 5570 Herpetology 3
Evolution, adaptations, distribution, natural history, behavior, and identification of amphibians and reptiles of the world, with special emphasis on North American species. Two lectures and one lab. Prerequisite: BIOL 1620. (Sp)

BIOL 5580 Mammalogy 3
Evolution, adaptations, distribution, natural history, behavior, and identification of mammals of the world, with special emphasis on North American species. Two lectures and one lab. Prerequisite: BIOL 1620. (F)

BIOL 5590 Animal Community Ecology** 4
Concepts and controversies in modern community ecology emphasizing aquatic and terrestrial animals. Covers the community concept, diversity and stability, null models, relative importance of competition and predation, food webs, disturbance, metapopulations, biogeography, and new directions. Prerequisites: BIOL 2220, STAT 3000. (Sp)

BIOL 5600 Comparative Animal Physiology 3
Principles and mechanisms of physiology in vertebrate and invertebrate animals. For graduate (6000-level) credit, additional reading, recitation, and/or writing will be required. Prerequisites: BIOL 1620 and one of CHEM 1110, 1120, and 2220; or permission of instructor. (Sp)

BIOL 5610 QI Animal Physiology Laboratory 2
Laboratory exercises designed to explore principles of animal physiology, using computer simulations, tissue models, and animal preparations. Emphasis placed on hypothesis design and data interpretation. Prerequisite: BIOL 5600 or 5620 (either may be taken concurrently). (F,Sp)

BIOL 5620 Medical Physiology* 3
Cardiovascular, respiratory, endocrine, gastrointestinal, excretory, and nervous system function in the mammalian body. Emphasis on molecular mechanisms. Examples from mammalian diseases used to illustrate key concepts. Prerequisites: BIOL 1620, BIOL 2420 or 5600, CHEM 1120 or 3700 (may be taken concurrently) or 5710. (F)

BIOL 5730 Genomic Technologies 4
Provides theoretical background in genomics/proteomics technologies and laboratory training in advanced techniques. Topics include: whole genome sequencing, transcriptome and proteome characterization, DNA and expressed gene libraries, and operation of modern genomics laboratory equipment. Prerequisites: BIOL 1620, 3060; CHEM 3700 or 5710; CS 2200; STAT 3000. Also taught as CHEM 5730. (Sp)

BIOL 5800 Undergraduate Research 1-3*
Faculty-directed research in biology. Prerequisites: BIOL 1620 and consent of instructor. Maximum of 3 credits of BIOL 5800 are acceptable toward Biology degree elective requirements. (F,Sp,Su)

BIOL 5810 Bachelor's Thesis 3
Preparation of a written thesis, based upon individual investigation, under the supervision of faculty. Prerequisites: 3 credits of BIOL 5800 (or concurrent enrollment) and consent of instructor. (F,Sp,Su)

BIOL 5850 Microbiology Seminar (dual listing 6850) 1*
Graded Pass/Fail only. (F,Sp,Su)

BIOL 6010 Biogeography (dual listing 5010) 3
Distributions of plants and animals, including invertebrates, from terrestrial, freshwater, and marine systems, discussed from historical and ecological perspectives. Explores ecological patterns of body size, color, species density, home range, etc., as well as their causes. Prerequisite: BIOL 1620. (Sp)

BIOL 6020 QI Modeling Biological Systems* (dual listing 5020) 3
Basic techniques of mathematical and computer simulation applied to a wide variety of biological systems: ecology, physiology, agroecosystems, and cell biology. Model formulation, validation, sensitivity and stability analysis, stochastic systems. Prerequisites: MATH 1220, STAT 3000, programming experience. (F)

BIOL 6030 Individual-Based Models in Ecology and Evolution* 3
Examines the nature, application, and student development of computer simulation models that follow the demographic fates and spatial movement of individual organisms in the context of ecological and evolutionary questions. Recommended prior to enrollment: Programming experience (preferably in C), upper-division courses in statistics and ecology or evolution, and BIOL 6020/5020. (Sp)

BIOL 6100 Neurobiology** 3
Physiology, organization, and development of nervous systems. Examples taken from vertebrate and invertebrate systems. Special emphasis placed on cellular and molecular substrates of electrical excitability. For graduate (6000-level) credit, additional reading, recitation, and/or writing will be required. Prerequisites: BIOL 5600 or 5620; CHEM 1220; and PHYS 2120 or 2220. (F)

BIOL 6190 Molecular Genetics (dual listing 5190) 3
Molecular aspects of genetics, including DNA replication, structure, rearrangement, transposition, recombination, repair, genetic engineering, and gene expression. For 6000-level (graduate) credit, additional reading, recitation, and/or writing is required. Prerequisites: BIOL 3060; and CHEM 3700 or 5700. (Sp)

BIOL 6200 Biogeochemistry of Terrestrial Ecosystems** 3
Inputs, outputs, and cycling patterns of major nutrients. Emphasizes mechanisms for transformations, factors influencing process rates, and the impacts of management and global change on nutrient cycles and air and water quality. Prerequisites: BIOL 1620, SOIL 3000, CHEM 2300 or 2310, or permission of instructor. Also taught as SOIL 6200 and WILD 6200. (F)

BIOL 6210 Advanced Cell Biology** 3
Presents most recent advances in cell biology research. Prerequisites: BIOL 3060 and 5210. (Sp)
Course Descriptions

BIOL 6220  Endocrine Aspects of Nutrition  2
(dual listing 5220)
Provides physiological background into hormones involved in nutrient regulation, as well as mechanisms of hormone action at the cellular and molecular levels. Includes action of steroids in the nucleus and membrane-based signal transduction pathways. Course includes lectures and literature reviews/presentations. Prerequisite: CHEM 3700 or permission of instructor. Also taught as ADVS 6220/5220 and NFS 6220/5220. (Sp)

BIOL 6250  Graduate Internship 1-6
Work experience, for which the student is paid, tied to academics in a graduate student's field of study. Graded Pass/Fail only. Prerequisite: Permission of department head prior to enrollment. (F,Sp,Su)

BIOL 6260  Behavioral Ecology*** 3
Focuses on current topics, emphasizing critical reading and thinking skills. Includes lectures, student presentations, and discussions of primary literature. (Sp)

BIOL 6370  Molecular Methods in Nutrition Science  2
(dual listing 5370)
Theory of modern techniques used to study macromolecules and ions. Prerequisite: CHEM 3700. Also taught as ADVS/NFS/PSB 6370/5370. (F)

BIOL 6380  Evolutionary Genetics  4
(dual listing 5380)
Examines theoretical and applied aspects of genes in natural and artificial populations. Topics include molecular evolution, population, and quantitative genetics, with emphasis on the intersection of genetics with evolution, ecology, and conservation biology. Prerequisite: BIOL 3060 or permission of instructor. (F)

BIOL 6440  Plant Molecular, Cellular, and Developmental Biology I***  3
Examines background and recent advances. Students analyze and discuss structure, genome, molecular, development, and photosynthesis topics from a research perspective. For graduate (6000-level) credit, additional reading, recitation, and/or writing will be required. Prerequisites: BIOL 3060, 5210; CHEM 3700 or 5710. Also taught as PLSC 6440/5440. (Sp)

BIOL 6450  Plant Molecular, Cellular, and Developmental Biology II*** 3
Examines background and recent advances. Students analyze and discuss cell wall, growth regulator, and environmental response topics from research perspective. For graduate (6000-level) credit, additional reading, recitation, and/or writing will be required. Prerequisites: BIOL 3060, 5210; CHEM 3700 or 5710. Also taught as PLSC 6450/5450. (Sp)

BIOL 6510  Insect-Plant Interactions** 2
Ecology, evolution, and physiology of the interactions between insects and plants, including herbivory, defenses/compensations of plants to insect attack, pollination, and other mutualisms. (F)

BIOL 6520  Ecological Vertebrate Physiology*** 3
Physiological responses and adaptations of vertebrates to physical, chemical, and biological environments. Bioenergetics at the species level. Three lectures. Prerequisites: One course in physiology and one course in ecology. (F)

BIOL 6590  Animal Community Ecology**  4
(dual listing 5590)
Concepts and controversies in modern community ecology emphasizing aquatic and terrestrial animals. Covers the community concept, diversity and stability, null models, relative importance of competition and predation, food webs, disturbance, metapopulations, biogeography, and new directions. For graduate (6000-level) credit, additional reading, recitation, and/or writing will be required. Prerequisites: BIOL 2220, STAT 3000. (Sp)

BIOL 6600  Comparative Animal Physiology 3
(dual listing 5600)
Principles and mechanisms of physiology in vertebrate and invertebrate animals. For graduate (6000-level) credit, additional reading, recitation, and/or writing will be required. Prerequisites: BIOL 1620 and one of CHEM 1110, 1120, and 1220; or permission of instructor. (Sp)

BIOL 6740  Cellular Communication by Small Molecules and Proteins** 3
Using post-translational modifications, small molecules, and protein motifs in cellular communication. Variances in the communication systems related to disease state and/or cell stress and therapeutic strategies to manipulate the communication systems. Prerequisite: CHEM 5700 or equivalent. Also taught as CHEM 6740. (Sp)

BIOL 6750  Topics in Biology (Topic) 1-3*
Format for general graduate-level seminar topics. Graded Pass/Fail only. (F,Sp)

BIOL 6800  Biology Seminar  1
Graded Pass/Fail only. (F,Sp,Su)

BIOL 6820  Plant Biology/Pathology Seminar  1
Graded Pass/Fail only. (F,Sp)

BIOL 6830  Entomology Seminar  1
Graded Pass/Fail only. (F,Sp)

BIOL 6840  Zoology Seminar  1
Graded Pass/Fail only. (F,Sp)

BIOL 6850  Microbiology Seminar  1
Graded Pass/Fail only. (F,Sp,Su)

BIOL 6870  Ecology Seminar  1
The Ecology Center schedules regular seminars throughout the school year with ecological scientists from other institutions participating. Ecology majors are required to attend a minimum of 10 such lectures. Graded Pass/Fail only. Students should register for fall semester, but attend through spring semester. Also taught as ENVS 6870, WATS 6870, and WILD 6870. (F)

BIOL 6910  Special Problems  1-3*
Individual or group study under faculty guidance. Graded Pass/Fail only. Prerequisite: Permission of instructor. (F,Sp,Su)

BIOL 6960  Graduate General Ecology  5
General concepts, history, and issues in all major areas of the science of ecology including: environmental biophysics; and physiological, behavioral, evolutionary, community, ecosystem, and applied ecology in both terrestrial and aquatic environments. Also taught as ENVS 6960, WATS 6960, and WILD 6960. (F)

BIOL 6970  Thesis Research  1-12*
Graded Pass/Fail only. (F,Sp)

BIOL 6990  Continuing Graduate Advisement  1-9*
Graded Pass/Fail only. (F,Sp,Su)

BIOL 7750  Topics in Biology  1-3
(F,Sp,Su)

BIOL 7970  Dissertation Research  1-12*
Graded Pass/Fail only. (F,Sp,Su)

BIOL 7990  Continuing Graduate Advisement  1-9*
Graded Pass/Fail only. (F,Sp,Su)

---

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

**This course is also offered by online correspondence and/or CD through Independent and Distance Education.

***This course is taught alternating years. Check with department for information about when course will be taught.
Course Descriptions

Business Information Systems (BIS)

See Department of Management Information Systems, pages 388-393

Note: Effective Spring Semester 2008, courses listed with the BIS prefix will use the Management Information Systems (MIS) prefix.

BIS 2100 Principles of Management Information Systems 3
Covers principles of management information systems including how to use and manage information technology to improve business processes, improve decision making, and gain competitive advantage. Includes MIS concepts and vocabulary, as well as information technology. Prerequisites: Cumulative GPA of 2.5 or higher; Computer Information Literacy (CIL) Exam or equivalent or OSS 1400, and STAT 1040 or MATH 1030 or MATH 1050 (MATH 1050 or equivalent is required for College of Business majors). (F,Sp,Su)

BIS 2200 Business Communication 3
(formerly BIS 2550 CI)
Development and application of effective oral and written business communication skills. Language/mechanics, grammar, and document formatting. Prerequisites: Fulfillment of Communications Literacy CI1 requirement through coursework or examination, STAT 1040 or MATH 1030 or 1050 or 1100 (MATH 1050 or 1100 is required for College of Business majors), GPA of 2.5 or higher, and passing score on College of Business English Usage Exam or ACT English Section score of at least 29. (F,Sp,Su)

BIS 3000 Principles of Business and Marketing Education 1
Covers principles of business and marketing education, including professionalism, historical overview of the field, student organizations, advisory committees, applied technology education, and school-to-careers program. Prerequisites: Admittance to a USU major, cumulative GPA of 2.67 or higher; and completion of at least 40 credits.

BIS 3300 Clinical Experience I 1
First business/marketing clinical practicum (40 hours minimum) in middle and secondary schools, must be taken concurrently with BIS 3400 methods class. Required at Level I. Graded Pass/Fail only. Prerequisites: Program admission; cumulative GPA of 2.67 or higher, and completion of at least 40 credits.

BIS 3330 Database Management 3
Theory and application of designing, developing, and maintaining database systems. Principles of management of data resources to support effective information systems in organizations. Prerequisites: Admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits, and BIS 2100 or OSS 2450. (F,Sp)

BIS 3400 Methods of Teaching Keyboarding and Microcomputing 3
Psychological principles and methodology for teaching keyboarding, word processing, microcomputing, and accounting. Includes equipment and laboratory needs, classroom management, and lesson planning. Prerequisites: OSS 1420, admittance to a USU major, cumulative GPA of 2.67 or higher, and completion of at least 40 credits.

BIS 3500 Introduction to Business Applications Programming 3
Creation of applications to solve business problems or support business functions related to financial, personnel, sales, and Information systems management. Students create working systems using widely used Windows software and standard programming principles. Prerequisites: Admittance to a USU major, cumulative GPA of 2.67 or higher, and completion of at least 40 credits. (F,Sp)

BIS 4100 Information Technology Hardware and System Software 3
Principles and application of computer hardware and software. Includes topics related to theoretical underpinnings, setup, installation, configuration, and management of computer hardware and system software. Prerequisites: BIS 2100; admittance to a USU major, cumulative GPA of 2.67 or higher, and completion of at least 40 credits. (F,Sp)

BIS 4300 Clinical Experience II 1
Second business/marketing clinical practicum (40 hours minimum) in middle and secondary schools; must be taken concurrently with BIS 4400 methods class. Required at Level 2. Graded Pass/Fail only. Prerequisites: Program admission and completion of Level 1, cumulative GPA of 2.67 or higher, and completion of at least 40 credits.

BIS 4330 Database Implementation (dual listing 6330) 3
Application of advanced database concepts using enterprise-wide database products. Includes advanced structured query language (SQL) development, database programming development, database administration basics, integration of database tools within a project context, introduction of data mining and data warehousing, reporting tools, and database and XML integration. Prerequisites: BIS 3330 or equivalent, admittance to a USU major, cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)

BIS 4350 Introduction to Training and Development 3
Introductory course in training and development. Examines various roles of the human resource manager in the training domain. Students learn systems approach to developing and implementing training programs in business. Prerequisites: Admittance to a USU major, cumulative GPA of 2.67 or higher, and completion of at least 40 credits. (Sp)

BIS 4400 Business Education and Marketing Education Methods 3
Instructional methods for conceptual business and marketing classes. Includes methods for advising student organizations, school-to-careers programs, and relationships between general and applied technology education. Prerequisites: Econ 1500, MHR 2050, and ACCT 2010; admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits.

BIS 4550 CI Principles of International Business Communications 3
Culture-general and culture-specific study of business communication in the diverse world of international business from both theoretical and applied perspectives. Prerequisites: Admittance to a USU major, cumulative GPA of 2.67 or higher, and completion of at least 40 credits. (Sp)

BIS 4950H Senior Honors Thesis/Project 3
Creative project that will then be written up and presented as a Senior Thesis as required for an Honors Plan. (Sp)

BIS 5050 Advanced Web-Based Management Information Systems Development (dual listing 6050) 3
Students learn how to design, develop, and implement an Internet commerce website. Includes instruction in modeling and building an advanced management website system. Prerequisites: BIS 3330 and 3500; admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits.

BIS 5100 Systems Design and Implementation 3
Management, evaluation, documentation, maintenance, and reengineering of business information systems projects. Prerequisites: Admittance to a USU major, cumulative GPA of 2.67 or higher, completion of at least 40 credits, BIS 3330, and BIS 3500 or 5450. (F,Sp)

BIS 5110 Systems Design Laboratory 1
Required laboratory for BIS 5100, allowing students to complete assigned team projects. Prerequisites: Admittance to a USU major, cumulative GPA of 2.67 or higher, and completion of at least 40 credits. (F,Sp)

BIS 5300 Advanced Data Communications 3
Principles of data communications, local and wide-area networks, hardware, software, media standards, management, and business applications. Management and strategic use of local-area networks (LANs) and wide-area networks (WANs) to solve business problems. Prerequisites: Admittance to a USU major, cumulative GPA of 2.67 or higher; completion of at least 40 credits, and BIS 2100 or OSS 2450. (F,Sp)

BIS 5450 Designing Graphical User Interfaces for Electronic Commerce (dual listing 6450) 3
Integration of specialized web-design software, current multimedia technology (e.g., video/audio streaming, computerized slide shows, graphic animations, digital graphics), and web-design principles to create graphical user interfaces for e-commerce sites. Prerequisites: Admittance to a USU major, cumulative GPA
Course Descriptions

of 2.67 or higher, completion of at least 40 credits, and BIS 2100 or OSS 2450. (F,Sp)

BIS 5500 Business/Marketing Teaching Seminar 2
Capstone seminar focused on student business teaching issues, professional development, and principles of effective instruction emphasizing reflective teaching. Must be taken concurrently with BIS 5600. Graded Pass/Fail only. Prerequisites: Level 1 and Level 2 completion, student teaching placement, cumulative GPA of 2.67 or higher, and completion of at least 40 credits.

BIS 5630 Business/Marketing Student Teaching 10
A 13-week culminating student teaching experience in which students assume full-time teaching responsibilities under the direction of cooperating teachers in major and minor fields. Must be taken concurrently with BIS 5500. Graded Pass/Fail only. Prerequisites: Level 1 and Level 2 completion, student teaching placement, cumulative GPA of 2.67 or higher, and completion of at least 40 credits.

BIS 5650 Advanced Website Development 3
(dual listing 6650)
Creating e-commerce websites using a combination of the following technologies: XHTML, PHP, JSON, and DBMSs such as Oracle, MySQL, SQL server 2005, etc. This technical course maintains a business focus as a transaction-oriented commercial site. Prerequisites: BIS 3330 and 3500, admittance to a USU major, cumulative GPA of 2.67 or higher, and completion of at least 40 credits. Some programming experience is helpful. (F,Sp)

BIS 5700 DSS Internet Management and Electronic Commerce 3
Familiarizes students with concepts and technologies relating to business and the Internet. Focuses on the new business environment that has evolved through the Internet, as well as associated technologies and strategies. Prerequisites: OSS 1400 or Computer and Information Literacy (CIL) Exam, admittance to a USU major, cumulative GPA of 2.67 or higher, and completion of at least 40 credits. Some programming experience is helpful. (F,Sp)

BIS 5800 Security of Business Information Systems 3
(dual listing 6800)
In-depth exploration of security issues in business information systems. Includes workstation, work-groups, intranet, and wide-area network security. Covers development of security policies and procedures. Prerequisites: Admittance to a USU major, cumulative GPA of 2.67 or higher, and completion of at least 40 credits, and BIS 2100 or OSS 2450. (F,Sp)

BIS 5950 Independent Readings 1-5
Designed for individual student projects as approved by the department. (F,Sp,Su)

BIS 6050 Advanced Web-Based Management Information Systems Development 3
(dual listing 5050)
Students learn how to design, develop, and implement an Internet commerce website. Includes instruction in modeling and building an advanced management website system. Prerequisites: BIS 3330 and 3500.

BIS 6110 Workshop 1-3
Intensive workshops. (F,Sp,Su)

BIS 6120 Business Information Systems Development 3
Business information systems development, including analysis, design, and implementation. Students develop a working prototype to solve a real-world information systems problem. (Sp)

BIS 6150 Communication for Business 3
In-depth study of the process for preparing written business communications and related oral presentations. Preparation of reports relevant to student's major. Prerequisite: BIS 2200 or equivalent.

BIS 6180 Intrasession MBA Workshop 0.5-1
Intensive workshops designed to enhance the MBA experience.

BIS 6200 Business Data Communication Systems 3
Introduction to business data communications, including concepts, network architecture, data communication software and hardware, distributed information systems, and business communication system services. (F)

BIS 6250 Graduate Internship 1-6
Graduate-level internship in business, industry, or government position approved by department. Requires written learning objectives, performance evaluation, and a final internship written report. Requires 75 hours internship per 1 semester credit. (F,Sp,Su)

BIS 6330 Database Implementation 3
(dual listing 4330)
Application of advanced database concepts using enterprise-wide database products. Includes advanced structured query language (SQL) development, database programming development, database administration basics, integration of database tools within a project context, introduction of data mining and data warehousing, reporting tools, and database and XML integration. Prerequisite: BIS 3330 or equivalent. (F,Sp)

BIS 6350 Managing Business Training Programs 3
Examines various management topics in the training and development field, including program development, implementation, and evaluation. Discusses the various roles of training program managers. (F)

BIS 6400 Local Area Network Management for Business 3
Application of networking concepts related to the management of local area networks. Includes topics related to setup, management, and maintenance of local area networks and installation of electronic mail-handling systems. (F,Sp)

BIS 6410 Human-Computer Interface Design 3
Integrates aspects of industrial psychology, work physiology, human environments, job analysis, and hardware/software engineering in the study of designing effective, efficient input/output interfaces for business information systems.

BIS 6440 Information and Decision Making 3
Case-based approach to learning role of information technology when making quantitative and qualitative analyses, including statistical techniques to solve business problems through the use of information technology. Prerequisite: At least one graduate or undergraduate class in statistics. (Sp)

BIS 6450 Designing Graphical User Interfaces for Electronic Commerce 3
Integration of specialized web-design software, current multimedia technology (e.g., video/audio streaming, computerized slide shows, graphic animations, digital graphics), and web-design principles to create graphical user interfaces for e-commerce sites. (F,Sp)

BIS 6500 Developing Business Information Systems with Advanced Software Concepts 3
Creation of custom applications to solve typical business problems or support common functions using Visual Basic programming and OLE Automation with MS Office software. Prerequisite: Knowledge of database and spreadsheet software.

BIS 6510 Information Systems for Business 3
Introduction to information systems at general management level. Includes strategic look at needs of an organization and how the function of information systems can help the organization become more effective. (Su)

BIS 6550 International Business Communication 3
Culture-general and culture-specific study of business communication in the diverse world of international business from both theoretical and applied perspectives.

BIS 6600 Business Teaching Internship 1-3
Graduate-level business teaching experience at approved corporate, secondary, or post-secondary sites.

BIS 6640 E-Commerce Data Interchange Using XML 3
Designed to build e-commerce applications using XML (Extensible Markup Language) as the underlying technology. Students will also learn to parse XML documents, use Extensible Style Sheet language, and use XSQL (an Oracle technology) to tie XML with its database. Prerequisites: BIS 3100, 3330, and 3500.
Course Descriptions

BIS 6650  Advanced Website Development  3
(dual listing 5650)
Creating e-commerce websites using a combination of the following technologies: XHTML, PHP, JavaScript, and DBMSs such as Oracle, MySQL, SQL server 2005, etc. This technical course maintains a business focus as a transaction-oriented commercial site. Prerequisites: BIS 3330 and 3500. (F,Sp)

BIS 6660  The Adult Business Learner  3
Focuses on the adult business learner, the concept of the “learning organization,” and the different types of postsecondary institutions that provide adult training and education in business.

BIS 6700  Information Systems Strategies for Electronic Commerce  3
A management-oriented treatment of general information systems principles and topics relating to information systems strategies for electronic commerce, such as business models, mass customization, market research, security and assurance, entrepreneurship, intelligent agents, virtual corporations, electronic payments, and customer service. (F)

BIS 6720  Instruction and Training in Business and Marketing Education  3
Designed for experienced training and educational personnel. Focuses on ways to improve instructional techniques and approaches. Compares traditional teacher-trainer-style teaching to student-centered teaching and training. (Su)

BIS 6730  Teaching Methods in Business Education, Marketing Education, and Information Systems  3
Advanced methodology for teaching business, marketing, and information system subjects, including techniques for teaching word processing, keyboarding, Internet, basic business, accounting, marketing, economics, and other business subjects in cognitive, psychomotor, and affective instructional domains.

BIS 6750  Business Process Reengineering Using Information Technology  3
Examines methodologies and state-of-the-art thinking in the area of business process reengineering. Designed to help students understand how organizations manage change in contemporary global business environments by utilizing the latest information systems and technology techniques.

BIS 6760  The Administration and Organization of School-to-Careers Programs in Business  3
Covers the philosophy of the school-to-careers movement in the U.S., as well as how to organize and administer a program. Includes discussion of the school-based, linking, and work-based components of such a program.

BIS 6770  Competency-based Instruction  3
Business teachers learn how to develop competency-based instruction by completing a CBI project.

BIS 6800  Security of Business Information Systems  3
(dual listing 5800)
In-depth exploration of security issues in business information systems. Includes workstation, workgroups, intranet, and wide-area network security. Covers development of security policies and procedures. Includes information necessary to pass Certified Information Systems Security Professionals exam. Prerequisite: BIS 3500 or graduate admission. (F)

BIS 6810  Introduction to the Research Process  3
Essential scientific research concepts of theory development and data collection and the technology of research, including writing and funding proposals, experimental and study design, and project management. Includes a hands-on research project conducted by the student. (Sp)

BIS 6950  Independent Readings  1-3
Specialized projects for graduate students. (F,Sp,Su)

BIS 6970  Master's Paper  1-6
Master’s-level thesis or Plan B research credit. Graded Pass/Fail only. (F,Sp,Su)

BIS 6990  Continuing Graduate Advisement  1-3
Graded Pass/Fail only. (F,Sp,Su)

BIS 7250  Graduate Research Internship  1-3
For doctoral students desiring to improve their research capability. Prior approval required. Repeatable to a maximum of six credits. (F,Sp,Su)

BIS 7330  School-Based Internship  3-9
Internship for doctoral candidates preparing to be school supervisors. Repeatable to a maximum of 9 credits. (F,Sp,Su)

BIS 7600  Historical Foundations of Information Systems  3
Provides in-depth analysis and review of foundation literature, important topics, latest results, and emerging areas of information systems research. (F)

BIS 7610  Critical Analysis of Issues  3
Examines critical analysis/thinking techniques, creative problem solving, and the identification of issues and trends in the field.

BIS 7950  Independent Readings  1-3
Independent readings for graduate students. Repeatable to a maximum of 6 credits. (F,Sp,Su)

BIS 7970  Doctoral Dissertation  1-12
Doctoral-level dissertation research credit. Graded Pass/Fail only. (F,Sp,Su)

BIS 7990  Continuing Graduate Advisement  1-9
Doctoral-level dissertation research credit. Repeatable to a maximum of 9 credits. (F,Sp,Su)

BIS 7995  Doctoral Internship  1-3
Internship for doctoral candidates preparing to be school supervisors. Repeatable to a maximum of 9 credits. (F,Sp,Su)

BIS 7996  Doctoral Internship  1-3
Internship for doctoral candidates preparing to be school supervisors. Repeatable to a maximum of 9 credits. (F,Sp,Su)

BMET 3250  Aviation Weather  3
Discussion, observation, and analysis of weather important for pilots and those associated with air travel. (Sp)

BMET 3820  DSC/QI Climate Change  3
Emphasizes physical basis of climate (climate dynamics), as well as the mechanisms and processes for its fluctuations on sub-seasonal to interannual time scales (climate variations) and on regional to hemispheric/global time scales. Prerequisites: BMET 2000 or GEOG 1130. Also taught as WATS 3820. (Sp)

BMET 5250  Remote Sensing of Land Surfaces  4
Basic principles of radiation and remote sensing. Techniques for ground-based measurements of reflected and emitted radiation, as well as ancillary data collection to support airborne and satellite remote sensing studies in agriculture, geography, and hydrology. Prerequisites: MATH 1100 or 1210; and PHYS 2110 or 2210. Also taught as BIE 5250/6250 and WATS 5250/6250. (Sp)

BMET 5400  Introduction to Meteorology  3
Designed for senior and graduate students in different fields who desire some basic introduction to meteorology. Bridges a large gap between courses describing meteorological phenomena in broad and simple terms and other courses treating the atmosphere more theoretically. (F)

BMET 5500  Land-Atmosphere Interactions  3
Examination of interactions between the surface and atmosphere. Consideration of flows of mass and energy in soil-vegetation-atmosphere continuum, and their

Utah State University 2007-2009 General Catalog 583
Course Descriptions

BMET 5680  Paleoclimatology*  3
(dual listing 6680)
Covers climate through the past four billion years of geologic time. Explores driving forces behind climate changes. Examines data and methods used in paleoclimatic research. Includes discussion of literature and stresses local paleoclimatic records. Three lectures per week, along with field trips. Prerequisite: GEOL/WATS 3600 or permission of instructor. Also taught as GEOL 5680/6680 and WATS 5680/6680.

BMET 5700  Environmental Measurements  3
(dual listing 6700)
Examination of critical instrumentation and principles involved in measuring key properties of terrestrial environment. Consideration of measurements in soils, plants, and atmosphere. Not currently being taught. Contact department for further information.

BMET 6250  Remote Sensing of Land Surfaces  4
(dual listing 5250)
Basic principles of radiation and remote sensing. Techniques for ground-based measurements of reflected and emitted radiation, as well as ancillary data collection to support airborne and satellite remote sensing activities in agriculture, geography, and hydrology. Prerequisites: MATH 1100 or 1210; and PHYS 2110 or 2210. Also taught as BIE 6250/5250 and WATS 6250/5250. (Sp)

BMET 6400  Introduction to Meteorology  3
(dual listing 5400)
Designed for senior and graduate students in different fields who desire some basic introduction to meteorology. Bridges a large gap between courses describing meteorological phenomena in broad and simple terms and other courses treating the atmosphere more theoretically. (F)

BMET 6500  Land-Atmosphere Interactions  3
(dual listing 5500)
Examination of interactions between the surface and atmosphere. Consideration of flows of mass and energy in soil-vegetation-atmosphere continuum, and their linkage to local and regional climates. Detailed study of feedbacks between vegetation and atmosphere. (Sp odd)

BMET 6680  Paleoclimatology*  3
(dual listing 5680)
Covers climate through the past four billion years of geologic time. Explores driving forces behind climate changes. Examines data and methods used in paleoclimatic research. Includes discussion of literature and stresses local paleoclimatic records. Three lectures per week, along with field trips. Prerequisite: GEOL/WATS 3600 or permission of instructor. Also taught as GEOL 5680/6680 and WATS 5680/6680.

BMET 6700  Environmental Measurements  3
(dual listing 5700)
Examination of critical instrumentation and principles involved in measuring key properties of terrestrial environment. Consideration of measurements in soils, plants, and atmosphere. Not currently being taught. Contact department for further information.

BMET 6800  Environmental Biophysics  2
Explores processes governing exchanges of mass and energy between surface and atmosphere, as well as connections to climate. Examines role of the biota at local to global scales. (Sp)

BMET 6910  Special Problems in Climatology  3
Study of physical causes and effects of various climate upon the Earth. Study of the basis and mechanisms of all types of physically-based climate models. Assists students in comprehending relative complexities and applicabilities of the whole range of climate models. (Sp)

Business (BUS)

BUS 1000  Business Orientation  0.5
Orients freshmen and transfer students to College of Business programs, academic and student services, professional organizations, and career possibilities. This course is not currently being offered. For information about when it may be offered, contact the College of Business.

BUS 2250  Introductory Internship  1-9
Introductory-level experience in a career-related position approved by the Cooperative Education Office. One credit for every 75 hours of internship experience, with a maximum of 9 credits. A maximum of 12 credits of 2250 and 4250 combined can be counted toward the minimum degree requirements for the College of Business. Prerequisite: Permission of instructor. (F,Sp,Su)

BUS 3010  Intermediate Accounting I  3
Study at the intermediate level in accounting theory and practice relating to financial reporting of assets. Prerequisites: Cumulative GPA of 2.5 or higher; grade of B- or better in ACCT 2010.

BUS 3020  Intermediate Accounting II  3
Study at the intermediate level in accounting theory and practice relating to financial reporting of liabilities and equities. Prerequisites: Cumulative GPA of 2.5 or higher; BUS 3010.

BUS 3100  DSS Survey of Management Information Systems  3
Survey of business uses of information technology, emphasizing vocabulary, concepts, career emphases, and systems components. Includes general systems theory and business functional information subsystems (e.g., accounting, management, finance, and marketing). Prerequisites: Cumulative GPA of 2.5 or higher; and Computer and Information Literacy (CIL) Exam, OSS 1400, or equivalent. (F,Sp,Su)

BUS 3110  DSS Management Fundamentals  3
Study of the role of management, leadership theory, defining goals, organizing work, and managing performance. Prerequisite: Cumulative GPA of 2.5 or higher.

BUS 3250  Discussions With Business Leaders  1
Introduces current business trends, issues, and problems. This is accomplished through readings and discussions, as well as by required attendance at Dean’s Convocation, Partner’s in Business, and other appropriate business seminars. Graded Pass/Fail only. (F,Sp)

BUS 3310  Managerial Cost Accounting  3
Intermediate level of accounting and interpretation of accounting information for internal decision-making and control. Prerequisites: Cumulative GPA of 2.5 or higher; ACCT 2020.

BUS 3330  Essentials of Database Systems  3
Includes essential theory of database systems in areas such as E/R design, relational design, the SQL language, and distributed databases. Prerequisites: BIS 2100, completion of at least 40 credits, and cumulative GPA of 2.5 or higher.

BUS 3400  QI Finance Fundamentals  3
Study of basic financial management principles, methods, and policies for business. Prerequisites: Cumulative GPA of 2.5 or higher; ACCT 2010; MATH 1050; choose one statistics course from STAT 1040, 2300, 3000, or PSY 2800.

BUS 3410  Federal Income Tax I  3
Study of tax law and procedures for individuals, with an introduction to corporations and other entities. Prerequisite: Cumulative GPA of 2.5 or higher.

BUS 3500  Marketing Principles  3
Study of basic marketing principles, functions, concepts, and terminology. Prerequisite: Cumulative GPA of 2.5 or higher.

BUS 3510  Business Programming  3
Includes basics of business systems development using programming languages supporting the Windows environment. Prerequisites: BIS 2100, completion of at least 40 credits, and cumulative GPA of 2.5 or higher.
Course Descriptions

BUS 3610  **Introduction to Entrepreneurship**  3
Introduction to entrepreneurship and the initial developmental processes of new ventures. Helps students become familiar with entrepreneurship, its role in the economy, and its viability as a career path. Focuses on identifying and analyzing potential business opportunities. Prerequisites: Cumulative GPA of 2.5 or higher and completion of at least 40 credits.

BUS 3620  **Developing Entrepreneurial Competencies**  3
Focuses on the development of persuasion, delegation, organizational, leadership, and other practical competencies for individuals who launch businesses and/or play a significant role in their growth. Prerequisites: Cumulative GPA of 2.5 or higher and completion of at least 40 credits.

BUS 3700  **Operations Management Fundamentals**  3
Study of basic concepts and tools relating to managing the operations of a business. Prerequisites: Cumulative GPA of 2.5 or higher; MATH 1100 or 1210; STAT 2300 or 3000.

BUS 3710  **Interpersonal and Team Skills**  3
Focuses on the role of teams and interpersonal relationships in emerging organizations. Designed to help individuals and teams learn the skills needed for organizational effectiveness. Uses examples and exercises relevant to emerging organizations.

BUS 3820  **International Ventures**  3
Explores international culture and content of entrepreneurship, the impact of globalization on emerging businesses, and the pressures and complexities of operating in global markets, including the processes of managing multicultural resources. Prerequisites: Cumulative GPA of 2.5 or higher and completion of at least 40 credits.

BUS 4010  **Selected Topics in Finance**  3
Selected topics in finance pursued in depth. Topics may vary. Prerequisites: Cumulative GPA of 2.5 or higher; BUS 3400.

BUS 4020  **Selected Topics in Marketing**  3
Selected topics in marketing pursued in depth. Topics may vary. Prerequisites: Cumulative GPA of 2.5 or higher; BUS 3500.

BUS 4030  **Selected Topics in Management**  3
Selected topics in management pursued in depth. Topics may vary. Prerequisites: Cumulative GPA of 2.5 or higher and completion of at least 40 credits.

BUS 4040  **Selected Topics in Human Resources**  3
Selected topics in human resources pursued in depth. Topics may vary. Prerequisites: Cumulative GPA of 2.5 or higher and completion of at least 40 credits.

BUS 4050  **Selected Topics in Information Systems**  3
Selected topics in information systems pursued in depth. Topics may vary. Prerequisites: BUS 3330, completion of at least 40 credits, and cumulative GPA of 2.5 or higher.

BUS 4250  **Advanced Internship**  1-9
Advanced or middle-level internship experience in a career-related position approved by the Cooperative Education Office. One credit for every 75 hours of internship experience, with a maximum of 9 credits. Prerequisite: Permission of instructor. (F,Sp,Su)

BUS 4610  **Advanced Entrepreneurship**  3
Theoretical and practical aspects of starting or buying a business. Includes development of a business plan, conducting due diligence for buying a business, valuation, and related topics. Prerequisites: Cumulative GPA of 2.5 or higher and completion of at least 40 credits.

BUS 4710  **Entrepreneurship Project**  3
Students plan and complete advanced entrepreneurship projects that may include developing their own business, a significant consulting project with a start-up or growth business, or other approved project. Prerequisites: Cumulative GPA of 2.5 or higher and completion of at least 40 credits.

BUS 4880  **Business Strategy**  3
Capstone course dealing with the processes of operating a business venture. Emphasizes market entry, finance, operations, managing growth, business ethics, and social responsibility. Addresses entrepreneurial issues and global strategies. Prerequisites: Cumulative GPA of 2.5 or higher; BUS 3110, 3400, 3500, 3700.

BUS 5100  **Systems Analysis and Design and Project Management**  3
Requires students to build an information system using state-of-the-art analysis and design principles, as well as project management essentials. The project must be completed for an external organization using state-of-the-art software. Prerequisites: BUS 3330, 3510, completion of at least 40 credits, and cumulative GPA of 2.5 or higher.

BUS 6250  **Graduate Internship**  1-6
Graduate-level internship in a career-related position for graduate students wishing to develop or expand their occupational experience. Maximum of 6 credits. Prerequisite: Permission of instructor. (F,Sp,Su)

BUS 6310  **MBA Career Development**  0.5
Provides background in theory and practice of career development, including student assessment, organizational entry, and career planning and mentoring. (F,Sp,Su)

BUS 6660  **Applied Business Research**  3
Provides students with the capability to design and conduct applied business research projects in all areas of business. Introduces students to the philosophy of science, research design, measurement and scaling, reliability and validity, communication of research results, and other topics. (Sp)

Repeatability: Check with major department for limitations on number of credits that can be counted for graduation.

**Civil and Environmental Engineering (CEE)**

See Department of Civil and Environmental Engineering, pages 211-218

CEE 1880  **Civil and Environmental Engineering Orientation and Computer Applications**  1
Orients students to programs of the Department of Civil and Environmental Engineering, professional and academic advising, student services, professional societies, and engineering careers. Laboratory activities emphasize problem solving using computer applications, such as spreadsheets and the HP48 Scientific Calculator. (F,Sp)

CEE 2240  **Engineering Surveying**  3
Experience with a wide variety of common surveying equipment, including use and operation of levels, theodolites, total station equipment, and GPS. Prior to graduation, computer applications and field exercises prepare students for civil engineering employment early in their careers. Prerequisites: ACT Math score of 27 or higher or credit for MATH 1050 and 1060. Enrollment limited to students having majors within the College of Engineering. (F,Su)

CEE 2870  **Sophomore Seminar**  1
Supervised discussion and review of problems encountered by professional engineers. (Sp)

CEE 2890  **Environmental Engineering Sophomore Seminar**  1
Introduces students to the field of environmental engineering, emphasizing design, ethics, and leadership in the environmental engineering profession. Emphasizes creative thinking, organizational skills, team work, professional ethics, and social responsibility. Prerequisite: Sophomore standing in environmental engineering. (Sp)

CEE 3010  **Mechanics of Materials**  2
Includes principal stresses; combined loading and stresses; deflection of beams by direction integration, moment-area, and superposition; and deflection of beams and frames by energy methods and columns. Includes laboratories to demonstrate the mechanical behavior of materials. Prerequisites: ENGR 2010 and 2140. (F)

CEE 3020  **Structural Analysis**  2
Classification of structural types and development of loads. Analysis of both statically determinate and indeterminate structures. Analysis of trusses, beams,
frames, cables, and arches. Utilization of approximate methods of analysis focusing on structural behavior. Prerequisite: CEE 3010. (Sp)

CEE 3030 Uncertainty in Engineering Analysis 2
Principles of probability and statistics applied specifically to problems in civil and environmental engineering, including transportation, water quality, waste treatment, hydrology, and materials. (F,Sp)

CEE 3080 Design of Reinforced Concrete Structures 3
Design of reinforced concrete structural elements, simple and continuous reinforced beams, columns, joints, and one-way slabs. Includes concrete materials laboratory. Prerequisite: CEE 3010. Prerequisite or corequisite: CEE 3020. (Sp)

CEE 3210 Introduction to Transportation Engineering 3
Introduction to basic concepts of roadway geometric design, and intersection and highway capacity analysis. Other topics include: traffic flow characteristics, traffic studies, signal design, and transportation project evaluation. Prerequisite: CEE 3030. (Sp)

CEE 3430 Engineering Hydrology 3
Provides a basic understanding of engineering hydrology through the hydrologic cycle, watershed characteristics, atmospheric water, rainfall-runoff processes, infiltration and evaporation, stream flow analysis, groundwater flow, and related designs. Prerequisite: CEE 3500. (Sp)

CEE 3500 Civil and Environmental Engineering Fluid Mechanics 3
Explores fluid properties, hydrostatics, fluid dynamics similarity, energy and momentum principles, closed conduit flow, open channel flow, and flow measurement. Prerequisites: MATH 1220; MATH 2210 or 2250; ENGR 2010, 2030. (F,Sp)

CEE 3510 Civil and Environmental Engineering Hydraulics 3
Steady flow in open channel and closed circuits, nonuniform flow in open channels, combined energy losses in pipelines, and distribution in pipe networks. Includes laboratory and computer exercises in data collection, pipe networks, and unsteady and nonuniform flow. Prerequisite: CEE 3500. (F,Sp)

CEE 3610 Environmental Management 3
Introduction to environmental health, emphasizing relationships among environmental quality, public health, environmental and occupational health regulations, human health risk assessment, institutions, and engineered systems in environmental health management. Prerequisites: CHEM 1210; BIOL 1610 or Breadth Life Sciences course; MATH 1210. Corequisite: CEE/PUBH 3870. Also taught as PUBH 3610. (F)

CEE 3640 Water and Wastewater Engineering 4
Engineering analysis and design of processes for treatment of water and wastewater. Major topics include water quality evaluation; physical, chemical, and biological treatment systems; design of facilities for production of drinking water and for treatment and reclamation of municipal and industrial wastewater; and management of residuals from water and wastewater treatment facilities. Prerequisite: CEE/PUBH 3610. (Sp)

CEE 3670 Transport Phenomena in Bio-Environmental Systems 3
Core course in both biological and environmental engineering. Students develop a detailed understanding of the principles, concepts, models, and methods of calculating heat and mass transfer. Emphasis given to contaminant and nutrient flux, along with their state transformations, in order for the biological or environmental engineer to evaluate options for production, clean-up, and control of bio-environmental systems. Prerequisites: CEE 3500 and MAE 2300. Also taught as BIE 3670. (Sp)

CEE 3780 Solid and Hazardous Waste Management 3
Introduction to integrated management of municipal and industrial solid waste; household, commercial, and industrial hazardous waste; and resource recovery and recycling principles. Three lectures augmented by computer modeling and field trip experiences related to modern solid and hazardous waste management principles. Prerequisite: Acceptance into professional program in engineering. (F)

CEE 3870 CI Professional/Technical Writing in Civil and Environmental Engineering 2
Gives CEE students intensive practice with oral and written communication in business and technical CEE writing. Requires concurrent enrollment in CEE/PUBH 3610. Also taught as PUBH 3610. (F)

CEE 3880 Civil Engineering Design I 1
Introduction to senior engineering students’ integrated design experience. Design project is identified and proposal for its completion during the senior year is produced. Emphasizes project scheduling, and completion of design proposal. Prerequisite: CEE 3870. (Sp)

CEE 3890 Environmental Engineering Design I 1
Introduction to senior environmental engineering students’ integrated design experience. Design project identified and proposal for its completion during the senior year is produced, under mentoring of course instructor. Emphasizes project identification, project scoping, manpower and materials budgeting, project scheduling, and completion of design proposal. Prerequisites: CEE/PUBH 3610, CEE 3640, CEE/BIE 3670. (Sp)

CEE 4200 Engineering Economics 2
Applications of the mathematics of finance to engineering decision making. Should be taken during the junior year of the engineering curriculum. (F)

CEE 4300 Engineering Soil Mechanics 4
Physical and mechanical properties of soils. Topics include: classification, permeability, soil stresses and settlement analysis, soil strength, slope stability, lateral earth pressures, introduction to foundations, numerical solutions, and computer applications. Prerequisite: ENGR 2140. Prerequisite or corequisite: CEE 3500. (F)

CEE 4790 CI Environmental Engineering Design II 2
Provides senior environmental engineering students with integrated design experience in two-semester sequence. Design projects proposed in CEE 3890 completed under mentoring of course instructor. Emphasizes team work, scheduling, design calculations, and completion of design report. Prerequisites: CEE 3890 and concurrent enrollment in environmental engineering technical elective course during fall semester. (F)

CEE 4870 CI Civil Engineering Design II 2
Provides senior engineering students with integrated design experience in two-semester sequence. Design projects proposed in Junior Design Proposal placed on team work, scheduling, design calculations, and completion of design report. Prerequisite: CEE 3880; senior design technical elective should be taken concurrently. (F)

CEE 4880 CI Civil Engineering Design III 2
Provides senior engineering students with integrated design experience in two-semester sequence. Design projects proposed in Junior Design Proposal placed on team work, scheduling, design calculations, and completion of design report. Prerequisite: CEE 3880; senior design technical elective should be taken concurrently. (F)

CEE 4890 CI Environmental Engineering Design III 2
Provides senior environmental engineering students with integrated design experience in two-semester sequence. Completion of design projects begun in CEE 4790, with presentation, report, and defense. Prerequisite: CEE 4790. (Sp)

CEE 4930 Independent Study 1-3
Laboratory design or research project on problem selected by student. Requires review of literature, preparation of proposal describing project, completion of design or research project, and preparation of report. (F,Sp,Su)

CEE 5010 Matrix Analysis/Finite Element 3
Analysis of structures using matrix methods. Application of software based on the stiffness method to practical analysis problems. Introduction of Finite Element method based on stiffness approach and mathematical derivation of simple finite elements, along with application to practical problems. Prerequisite: CEE 3020. (F)

CEE 5020 Finite Element Methods in Solid Mechanics I 3
Introduction to finite element methods and their application to the analysis and design of mechanical engineering systems. Prerequisite: MAE 3040. Also taught as MAE 5020. (F)
## Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CEE 5050</td>
<td>Design of Wood and Masonry Structures</td>
<td>3</td>
<td>Design of beams, columns, joints, walls, and diaphragms in both wood and masonry materials. Current design codes will be utilized. Prerequisite: CEE 3080. (Sp)</td>
</tr>
<tr>
<td>CEE 5060</td>
<td>Mechanics of Composite Materials I</td>
<td>3</td>
<td>Stress-strain relations for nonisotropic composites, such as fiber-reinforced plastic laminates, properties and their uses, strength and life determination, and methods for design using composite materials. Prerequisite: MAE 3040 or CEE 3010. Also taught as MAE 5060. (F)</td>
</tr>
<tr>
<td>CEE 5070</td>
<td>Structural Steel Design</td>
<td>3</td>
<td>Structural steel design using load and resistance factor design (LRFD) method. Focuses on design of structural beams, columns, and connections utilizing steel design codes. Prerequisites: CEE 3020, 3080. (F)</td>
</tr>
<tr>
<td>CEE 5080</td>
<td>Numerical Methods in Elasticity</td>
<td>3</td>
<td>Classical solutions of flex and strain problems. Energy methods. Introduction to finite difference, finite element, and boundary element methods. Computer applications. Prerequisite: CEE 3020. (F)</td>
</tr>
<tr>
<td>CEE 5100</td>
<td>Infrastructure Evaluation and Renewal</td>
<td>3</td>
<td>Evaluation of existing structural systems and techniques to improve their performance. Focuses on structures which are geometrically deficient. Prerequisites: CEE 3080, 5070. (F)</td>
</tr>
<tr>
<td>CEE 5190</td>
<td>Geographic Information Systems for Civil Engineers</td>
<td>3</td>
<td>Introduction to GIS concepts addressing data structures, spatial entities, and queries. Topics include location referencing methods, data collection techniques, current applications, and institutional and organizational issues. (Sp)</td>
</tr>
<tr>
<td>CEE 5220</td>
<td>Traffic Engineering</td>
<td>3</td>
<td>Topics covered include characteristics, measurements, and analysis of volume, speed, density, and travel time; capacity and level of service analysis; signalization and traffic control devices. (Sp)</td>
</tr>
<tr>
<td>CEE 5230</td>
<td>Geometric Design of Highways</td>
<td>3</td>
<td>Principles of highway location and planning, with full consideration of economic, environmental, and other impacts. Capacity analysis of intersections and highways, passing-lane design, and risk-cost based horizontal and vertical alignment design. Introduction to design software through coursework and term projects. Prerequisite: CEE 3210. (Sp)</td>
</tr>
<tr>
<td>CEE 5240</td>
<td>Urban and Regional Transportation Planning</td>
<td>3</td>
<td>Examination of travel demand forecasting, data collection, and survey data analysis techniques. Focuses on transportation-land use interactions and impact of market-based policies on travel demand. Theories and applications of traditional and advanced trip distribution, mode choice, and route assignment models. (F)</td>
</tr>
<tr>
<td>CEE 5250</td>
<td>Environmental Engineering Cooperative Practice</td>
<td>2</td>
<td>Applied environmental engineering with primary focus of work experience related to one of the environmental engineering specialty areas. Prerequisites: Senior status and permission of instructor. (F,Sp,Su)</td>
</tr>
<tr>
<td>CEE 5350</td>
<td>Foundation Analysis and Design</td>
<td>3</td>
<td>Applications of theories studied in soil mechanics. Design considerations for various foundation types, including shallow foundations, driven piles, drilled shafts, walls, soil anchorages, and mechanistically-stabilized earth support systems. Field investigation techniques and computer applications. Prerequisite: CEE 4300. (F)</td>
</tr>
<tr>
<td>CEE 5380</td>
<td>Earthquake Engineering</td>
<td>3</td>
<td>Covers wide variety of earthquake engineering topics, including seismology and earthquake source characterization, strong ground motion, seismic hazard analysis, wave propagation, soil dynamics, ground response, local site effects, liquefaction, seismic slope stability, soil improvement, vibrational analyses, and structural seismic design. Prerequisite: CEE 4300. (Sp)</td>
</tr>
<tr>
<td>CEE 5430</td>
<td>Groundwater Engineering</td>
<td>3</td>
<td>Explores fundamentals of groundwater hydrology by focusing on theory related to aquifer systems and flow analysis, regional groundwater balance, well hydraulics, aquifer testing, capture zone analysis, unsaturated flow, saltwater intrusion, and basics of flow modeling. Prerequisite: CEE 3430 or a similar hydrology course. (F)</td>
</tr>
<tr>
<td>CEE 5450</td>
<td>Hydrologic Modeling</td>
<td>3</td>
<td>Case studies of hydrologic modeling and decision methods: (1) Real-time flood warning; (2) extended streamflow prediction; (3) probabilistic water resource management; and (4) physical modeling of ungaged basins. Prerequisite: CEE 3430. (Sp)</td>
</tr>
<tr>
<td>CEE 5460</td>
<td>Water Resources Engineering</td>
<td>3</td>
<td>Engineering design course covering a wide range of topics, including: surface and groundwater hydrology, statistical analysis, water law, hydroelectric power, water supply, irrigation, flood control, wastewater, drainage, dams and reservoirs, pipelines, open channels, and planning. (F)</td>
</tr>
<tr>
<td>CEE 5470</td>
<td>Sedimentation Engineering</td>
<td>3</td>
<td>Explores river response, sediment transport, sediment and watershed yield, flow resistance, scour and erosion, and floodplain management. Prerequisite: CEE 3500. (Sp)</td>
</tr>
<tr>
<td>CEE 5500</td>
<td>Open Channel Hydraulics with an Emphasis on Gradually Varied Flow</td>
<td>3</td>
<td>Theory and applications of steady uniform and gradually varied flow under both subcritical and supercritical flow conditions. Solutions to multiple-network canal systems by solving systems of combined ordinary differential and algebraic equations. Method for defining natural channel systems and solving steady-state flows in them. Prerequisites: CEE 3500, 3510. (F)</td>
</tr>
<tr>
<td>CEE 5540</td>
<td>Hydraulic Structures Design</td>
<td>3</td>
<td>Design of a variety of hydraulic structures is explored, both in the classroom and laboratory. Integrates student-developed, original computer programs; commercially available software; field trips; and hands-on laboratory design projects to further students' understanding of hydraulic structures. Prerequisites: CEE 3500 and 3510. (F)</td>
</tr>
<tr>
<td>CEE 5550</td>
<td>Hydraulics of Closed Conduits</td>
<td>3</td>
<td>Includes design and operation of piping systems: economics; feasibility and impact of pipelines; pipe, pump, and valve selection; transient and cavitation analysis; and pipeline operation and filling. Prerequisites: CEE 3500 and 3510. (Sp)</td>
</tr>
<tr>
<td>CEE 5610</td>
<td>Environmental Quality Analysis</td>
<td>3</td>
<td>Familiarizes students with various methods used for analysis of chemical parameters in environmental samples (water, soil, and air). Provides students with skills enabling them to make proper selection/evaluation of analytical procedure and evaluate data generated. Prerequisite: CHEM 1210. (F)</td>
</tr>
<tr>
<td>CEE 5620</td>
<td>Aquatic Chemistry</td>
<td>3</td>
<td>Provides students with understanding of principles of aquatic chemistry, emphasizing chemical equilibria, acid-base reactions, complex formation, oxidation-reduction reactions, complex formation, and dissolution chemistry. Prerequisite: CHEM 1210 or equivalent. Also taught as SOIL 5620. (F)</td>
</tr>
<tr>
<td>CEE 5670</td>
<td>Hazardous Chemicals Handling and Safety</td>
<td>2</td>
<td>Provides students with necessary skills and knowledge for working safely in areas associated with hazardous chemicals. Topics covered include: regulations, exposure routes, toxicology, chemical and physical hazards, personal protective equipment, sampling, monitoring, decontamination, and emergency response procedures. Prerequisite: CHEM 1210. Also taught as PUBH 5670. (Sp)</td>
</tr>
</tbody>
</table>
### Course Descriptions

**CEE 5680**  
**Soil-based Waste Management**  
(3, dual listing 6680)  
Engineering management of wastes present in the vadose zone, including extraction, containment, and biological, chemical, and physical destruction technologies for sustainable agriculture and environmental quality. Aspects include engineering characterization, problem definition, treatment, and monitoring. Analysis and design emphasized through problems, examinations, and report writing. Prerequisites: PUBH 3640, 3870, CEE/BIE 3670. Also taught as BIE 5680/6680. (Sp)

**CEE 5690**  
**Natural Systems Engineering**  
(3, dual listing 6690)  
Application of modeling tools commonly utilized in water resources systems for assessment of environmental impacts associated with engineered systems. Topics include: water resources modeling; physical, chemical, and biological process effects; assessment methods; data integration techniques; and impact assessment. Prerequisites: CEE/PUBH 3610, CEE 3500, 3510, 3640. (F)

**CEE 5700**  
**Field Sampling Techniques for Natural Systems Engineering**  
(2, dual listing 6700)  
Provides students with hands-on approach to utilizing several of the most commonly applied spatial and temporal sampling techniques for data acquisition in support of natural systems modeling. Explores standard and advanced surveying techniques for water quality, stream geomorphology, and hydraulics, utilizing levels, total stations, laser levels, GPS, and hydroacoustic technologies. Integrative sampling strategies across spatial and temporal scales emphasized for multi-disciplinary studies. Prerequisite: CEE 5690/6690. (F)

**CEE 5710**  
**Pollution Prevention and Industrial Ecology**  
(2)  
Explores pollution prevention and waste minimization concepts, focusing on implementation of these concepts in design of production processes and products. Discussion of pollution prevention/waste minimization concepts, energy and materials conservation, Life Cycle Analysis, materials and process audits, industrial process design for waste minimization and energy conservation, packaging, and ISO 14000. Prerequisites: CEE/BIE 3670, CEE 3780, MAE 2400. (Sp)

**CEE 5720**  
**Natural Systems Modeling**  
(3, dual listing 6720)  
Provides hands-on approach to utilizing several of the most commonly applied modeling tools employed to estimate physical, chemical, and biological impacts of existing and proposed water resource systems. Focuses on utility and culmination of specific modeling approaches, while also stressing integrative multi-disciplinary nature of impact assessment frameworks. Prerequisite: CEE 5690/6690. (Sp)

**CEE 5730**  
**Analysis and Fate of Environmental Contaminants**  
(3, dual listing 6730)  
Provides students with understanding of methods used in analysis of environmental samples for organic contaminants. Examines various properties and processes determining the fate of organic contaminants in the environment. Taught first half of fall semester. Prerequisites: CHEM 1210, 2300. Also taught as PUBH 5730/6730. (F)

**CEE 5750**  
**Air Quality Measurements**  
(2)  
Laboratory-based course designed to familiarize participants with federally-approved reference measurement techniques for ambient and source air pollutants. Also provides understanding of temporal and spatial pollutant behavior. (Sp)

**CEE 5760**  
**Hydraulic Structures Field Course**  
(1)  
Week-long course, with one day of in-class lectures and four days of field trips. Introduces students to field applications of hydraulic structures design. Field trips may involve backpacking to remote areas. (F,Su)

**CEE 5780**  
**Accident and Emergency Management**  
(3, dual listing 6780)  
Introduction to fundamentals of accident, hazard, and emergency management. Topics include legislation; chemical safety fundamentals; fire, explosion, and spill fundamentals; contaminant air transport fundamentals; hazard and risk assessment; dispersion applications; and hazard and risk management applications. Prerequisite: CHEM 1220. Also taught as PUBH 5780. (Sp)

**CEE 5810**  
**Biochemical Engineering**  
(3, dual listing 6810)  
Fundamentals of bioreactor design and bioengineering to produce biological commodities. Emphasizes mathematical models of microbial and enzymatic processes in environmental and industrial biotechnology. Prerequisites: BIE 3200 and BIE/CIE 3670; or BIE/CIE 3670, CEE/PUBH 3610, and CEE 3640. Also taught as BIE 5810/6810. (F)

**CEE 5830**  
**Management and Utilization of Biological Solids and Wastewater**  
(3)  
Focuses on production, management, and disposal of biosolids and wastewater generated in food processing and wastewater treatment. Emphasizes beneficial use of biosolids and wastewater for agricultural production, forest enhancement, and land reclamation. Prerequisite: BIE/CIE 3670. Also taught as BIE 5830/6830. (F)

**CEE 5870**  
**Hazardous Waste Incineration**  
(2)  
Provides introduction to hazardous waste incineration principles. Topics include: thermodynamics, stoichiometry, thermochemistry, chemical kinetics, energy recovery, pollution control systems, and incinerator design principles. Prerequisites: CEE/BIE 3670, CEE 3780, MAE 2300; CEE 5860 (may be taken concurrently). (Sp)

**CEE 5880**  
**Remediation Engineering**  
(3)  
Physical, chemical, and biological principles associated with remediation of hazardous waste contaminated soil, water, sediments, and air. Includes: source removal and source control, product recovery, chemical treatment methods, biological remediation concepts, in situ processes, ex situ processes, and integrated process design. Prerequisites: CEE 3430, 3640, 3780, CEE/PUBH 3610. (F)

**CEE 5900**  
**Cooperative Practice**  
(3)  
A planned work experience in industry. Detailed program must have prior approval. Written report required. (F,Sp,Su)

**CEE 6020**  
**Structural Stability**  
(3)  
Elastic and inelastic buckling of columns; analysis of beam columns, thin-walled beams of open cross-section. Stability analysis of frame and plate structures. Large deflection theory. Historical notes on stability of structures. Computer applications. Prerequisite: CEE 3010. (F)

**CEE 6030**  
**Structural Optimization**  
(3)  
Introduction to optimization techniques for linear and nonlinear, univariable, and multivariable functions with or without constraints. Computer applications, and applications to structural design. Prerequisite: CEE 3010 or instructor’s consent. (Sp)

**CEE 6040**  
**Structural Reliability**  
(3)  
Elements of probability theory and its application to structural engineering and mechanics. Statistical distribution of loads. Uncertainties in material parameters and their effects in design. Reliability-based safety analysis and computer applications. Prerequisite: Instructor’s consent. (F)

**CEE 6050**  
**Experimental Methods in Structural Engineering**  
(3)  
Experimental techniques used in research and design in structural engineering and mechanics. Structural models. Theory and practical applications. Development of principles used to design research projects. Prerequisite: Instructor’s consent. Also taught as MAE 6050. (Sp)

**CEE 6070**  
**Mechanics of Composite Materials II**  
(3)  
Second course in composite materials. Stress-strain states of laminated composite structures, including interlaminar stresses, failure criteria, and hygrothermal stresses. Prerequisite: MAE 5060. Also taught as MAE 6070. (F)

**CEE 6080**  
**Numerical Methods in Elasticity**  
(3, dual listing 5080)  
Elasticity theory, stress and strain analysis, and yield criteria. Governing equilibrium, kinematic, and compatibility equations. Generalized Hooke’s law.
Course Descriptions

CEE 6090  **Theory of Plates and Shells**  3
Introduction to plate and shell theories. Development of bending and buckling of plates and shells through classical theory. Prerequisite: CEE 3020. (F)

CEE 6110  **Probabilistic and Statistical Methods in Engineering**  3
Explores principles related to probability and statistical methods commonly used in engineering practice, as well as applying these principles to the solution of engineering problems. Prerequisites: Undergraduate-equivalent knowledge in statistical methods or CEE 3030, plus 3000-level calculus and numerical methods. (F)

CEE 6130  **Structural Dynamics and Seismic Design**  3
Development and solutions for equations of motion for single- and multi-degree of freedom systems. Dynamic analysis by Modal Superposition and Response Spectra. Design of structures for seismically active areas. Also taught as MAE 6130. (Sp)

CEE 6180  **Dynamics and Vibrations**  3
Fundamentals of two-dimensional and three-dimensional rigid body dynamics, including Newtonian, Lagrangian, and Leavitt Energy Methods. Equations of motion, mode shapes, and natural frequencies for continuous media and multi degree-of-freedom systems. Prerequisite: MAE 5300 or CEE 6130. Also taught as MAE 6180. (Sp)

CEE 6190  **Geographic Information Systems (dual listing 5190)**  for Civil Engineers  3
Introduction to GIS concepts addressing data structures, spatial entities, and queries. Topics include location referencing methods, data collection techniques, current applications, and institutional and organizational issues. (Sp)

CEE 6200  **Pavement Design**  3
Analysis and design of flexible and rigid pavements for highways and runways, including the design of overlays. Equal emphasis on current practice and advanced concepts of pavement management. Prerequisite: CEE 3010. (F)

CEE 6210  **Transportation Systems Analysis**  3
Introduces systems approach to analysis of transportation services and infrastructure. Focuses on basic and advanced concepts, including operations research techniques, simulation, and artificial intelligence. Topics include facility sizing and location, financial and economic analysis of investment projects, and privatization. Prerequisite: CEE 3030 or equivalent. (F)

CEE 6220  **Traffic Engineering (dual listing 5220)**  3
Topics covered include characteristics, measurements, and analysis of volume, speed, density, and travel time; capacity and level of service analysis; signalization and traffic control devices. (Sp)

CEE 6230  **Geometric Design of Highways (dual listing 5230)**  3
Principles of highway location and planning, with full consideration of economic, environmental, and other impacts. Capacity analysis of intersections and highways, passing-lane design, and risk-cost based horizontal and vertical alignment design. Introduction to design software through coursework and term projects. Prerequisite: CEE 3210. (Sp)

CEE 6240  **Urban and Regional Transportation (dual listing 5240)**  Planning  3
Examination of travel demand forecasting, data collection, and survey data analysis techniques. Focuses on transportation-land use interactions and impact of market-based policies on travel demand. Theories and applications of traditional and advanced trip distribution, mode choice, and route assignment models. (F)

CEE 6250  **Transportation Data/Safety Analysis**  3
Statistical analysis of transportation data, including safety and risk assessment. Regression and multivariate analysis, such as discriminant analysis, canonical correlation, and factor analysis. In-depth study of selected methodologies for analyzing transportation safety and designing counter measures. Prerequisite: CEE 3210 or equivalent. (F)

CEE 6260  **Public Transportation**  3
Principles of planning, design, and operation of transit systems in urban and rural areas. Determination of optimal route alignments, schedules, and station/stop spacings. Exploration of innovations in financing and pricing, including cost-cutting techniques. (Sp)

CEE 6270  **Traffic Operations Analysis**  3
Traffic flow fundamentals, macroscopic and microscopic models of traffic flow, shock wave analysis, car following principles, queuing systems, and simulation. (Sp)

CEE 6290  **Transportation Network Analysis**  3
Analytical approaches and algorithms to the formulation and solution of the equilibrium assignment problem for transportation networks. Emphasis on user equilibrium, comparison with system optimal stochastic user equilibrium, origin-destination matrix estimation, and network design problems. (Sp)

CEE 6300  **Earth Structures**  3
Design and construction of earth and rockfill dams, embankments, excavations, and retaining structures. Prerequisites: CEE 4300, 5350/6350. (Sp)

CEE 6310  **Environmental Geotechniques**  3
Geotechnical aspects of environmental systems, with concentration on waste containment facilities. Prerequisite: CEE 4300. (F)

CEE 6320  **Deep Foundations**  3
Analysis, design, and construction of deep foundations with emphasis on driven piles and drilled shafts. Prerequisites: CEE 4300, 5350/6350. (Sp)

CEE 6330  **Ground Reinforcement, Improvement, and Treatment**  3
Theory, design, and construction methods for ground reinforcement, improvement, and treatment applications. Prerequisites: CEE 4300, 5350/6350. (F)

CEE 6340  **Laboratory and Field Methods in Geotechnical Engineering**  3
Subsurface investigation, field testing and instrumentation, and laboratory testing. Prerequisites: CEE 4300, 5350/6350. (F)

CEE 6350  **Foundation Analysis and Design (dual listing 5350)**  3
Applications of theories studied in soil mechanics. Design considerations for various foundation types, including shallow foundations, driven piles, drilled shafts, walls, soil anchorages, and mechanically-stabilized earth support systems. Field investigation techniques and computer applications. Prerequisite: CEE 4300. (F)

CEE 6360  **Geotechnical Principles**  3
Theoretical soil behavior. Hydraulic conductivity, compression, and shear properties. Prerequisites: CEE 4300, 5350/6350. (F)

CEE 6370  **Buried Structures**  3
Analysis of structural performance of buried structures (pipes, tanks, silos, etc.) using principles of mechanics of materials and finite element methods. Prerequisite: CEE 4300. (Sp)

CEE 6380  **Earthquake Engineering (dual listing 5380)**  3
Covers wide variety of earthquake engineering topics, including seismology and earthquake source characterization, strong ground motion, seismic hazard analysis, wave propagation, soil dynamics, ground response, local site effects, liquefaction, seismic slope stability, soil improvement, vibrational analyses, and structural seismic design. Prerequisite: CEE 4300. (Sp)

CEE 6400  **Physical Hydrology**  3
Fundamentals of hydrologic cycle and hydrologic processes. Precipitation, infiltration, runoff generation, evaporation and transpiration, and snowmelt. Representation of hydrologic processes in hydrologic models. Prerequisite: CEE 3430. (F)

CEE 6410  **Water Resource Systems Analysis**  3
Systems formulation of decision problems. Solution by simulation and optimization, constrained and unconstrained optimization algorithms, case studies and applications to water supply, and quality and ecosystems management. (Sp)
Course Descriptions

CEE 6420 Engineering Risk Assessment and Risk Management 3
Comprises both quantitative risk assessment techniques and a range of issues in risk management. Examples drawn from various civil engineering subdisciplines such as: environmental engineering, geotechnical engineering, hydraulics and hydrology, structural engineering, transportation engineering, and water resource management. (Sp)

CEE 6430 Groundwater Engineering (dual listing 5430) 3
Explores fundamentals of groundwater hydrology by focusing on theory related to aquifer systems and flow analysis, regional groundwater balance, well hydraulics, aquifer testing, capture zone analysis, unsaturated flow, saltwater intrusion, and basics of flow modeling. Prerequisite: CEE 3430 or a similar hydrology course. (F)

CEE 6440 Geographic Information Systems in Water Resources 3
Principles and operation of geographic information systems. Spatial hydrologic modeling done by developing a digital representation of the environment in the GIS, then adding functions simulating hydrologic processes. Includes term project on use of GIS in water resources. (F)

CEE 6450 Hydrologic Modeling (dual listing 5450) 3
Case studies of hydrologic modeling and decision methods: (1) Real-time flood warning; (2) extended streamflow prediction; (3) probabilistic water resource management; and (4) physical modeling of ungauged basins. Prerequisite: CEE 3430. (Sp)

CEE 6460 Water Resources Engineering (dual listing 5460) 3
Engineering design course covering a wide range of topics, including: surface and groundwater hydrology, statistical analysis, water law, hydroelectric power, water supply, irrigation control, wastewater drainage, dams and reservoirs, pipelines, open channels, and planning. (F)

CEE 6470 Sedimentation Engineering (dual listing 5470) 3
Explores river response, sediment transport, sediment and watershed yield, flow resistance, scour and erosion, and floodplain management. Prerequisite: CEE 3500. (Sp)

CEE 6480 Groundwater Contamination: Modeling, Monitoring, and Management 3
In-depth exploration of physical, chemical, and biological processes related to fate and transport of contaminants in the subsurface, mathematical modeling, remediation technologies, and mitigation of contaminated sites using risk-based decision-making. Prerequisite: CEE 5430/6430 or equivalent. (F)

CEE 6490 Integrated River Basin/Watershed Planning and Management 3
Reviews fundamental building blocks of water resource institutions, emphasizing creation of institutions which are sensitive to a particular culture, economic, and political environment. Addresses institutional mission and regulatory roles, public participation, property and water rights, and elements of production. (Sp)

CEE 6500 Open Channel Hydraulics with an Emphasis on Gradually Varied Flow (dual listing 5500) 3
Theory and applications of steady uniform and gradually varied flow under both subcritical and supercritical flow conditions. Solutions to multiple-network canal systems by solving systems of combined ordinary differential and algebraic equations. Method for defining natural channel systems and solving steady-state flows in them. Prerequisites: CEE 3500, 3510. (F)

CEE 6510 Numerical Methods for Civil Engineers 3
Engineering applications of approximation and interpolation, solution methods for ordinary differential equations, numerical solution of partial differential equations, nonparametric and parametric probability and regression estimation, and Monte Carlo and uncertainty analysis. (F)

CEE 6520 Applied Hydraulics 3
Basic fluid mechanics applied to wildland watershed systems and directed at nonengineering students. Explores nature of fluid state, fluid motion, and steady uniform and varied flow in open channels, under both subcritical and supercritical conditions. Surveys concepts of boundary layers, turbulence, convection, dispersal, and wave formation in unsteady flows. Emphasizes problem formulation and solving. Prerequisites: WATS 5490/4490; MATH 2280 (recommended). Also taught as WATS 6520. (F)

CEE 6530 Unsteady Flows in Open Channels and Numerical Solutions of St. Venant Equations 3
Derivation and physical meaning of the St. Venant equations, types of water waves, solutions to unsteady free surface flows based on the characteristics, and direct and iterative implicit methods of solution. Emphasizes solving unsteady flow problems in channel systems. Prerequisite: CEE 6500. (Sp)

CEE 6540 Hydraulic Structures Design (dual listing 5540) 3
Explores design of a variety of hydraulic structures, both in the classroom and laboratory. Integrates student-developed, original computer programs; commercially available software; field trips; and hands-on laboratory design projects to further students’ understanding of hydraulic structures. Prerequisites: CEE 3500 and 3510. (F)

CEE 6550 Hydraulics of Closed Conduits (dual listing 5550) 3
Includes design and operation of piping systems; economics; feasibility and impact of pipelines; pipe, pump, and valve selection; transient and cavitation analysis; and pipeline operation and fitting. Prerequisites: CEE 3500 and 3510. (Sp)

CEE 6580 Intermediate Fluid Mechanics 3
Survey of mathematical methods used in fluid mechanics, including: potential flow solutions (complex variables), laminar flow and turbulent flow solutions, boundary layer theory, and introduction to dispersion in fluid. (F)

CEE 6590 Evaluation of Hydrologic Modeling Systems 3
Focuses on different techniques for evaluating the performance, diagnosing the model structure, and assessing the uncertainty of hydrologic modeling systems. Examines mathematical and systems theory methods for examining the interrelation between model inputs and outputs. Prerequisite: CEE 6400. (Sp)

CEE 6600 Environmental Chemistry of Inorganic Contaminants 2
Inorganics of environmental concern discussed in terms of processes affecting their behavior in soil and water systems. Explores remediation of environmental systems contaminated with inorganic pollutants. Taught second half of spring semester. Prerequisite: CEE/SOIL 5620. (Sp)

CEE 6610 Environmental Quality Analysis (dual listing 5610) 3
Familiarizes students with various methods used for analysis of chemical parameters in environmental samples (water, soil, and air). Provides students with skills enabling them to make proper selection/evaluation of analytical procedure and evaluate data generated. Prerequisite: CHEM 1210. (F)

CEE 6620 Field Sampling and Analysis of Environmental Systems 3
Explores applied field sampling, as well as field and laboratory techniques used in the monitoring of environmental media. Includes theory and practice of field site monitoring and measurement of physical, chemical, and biological processes in the environment. Prerequisite: Consent of Instructor. (F)

CEE 6630 Process Dynamics in Environmental Engineering Systems 2
Fundamental principles used in analysis and simulation of environmental systems. Emphasizes reaction kinetics, mass transfer, reactor analysis and design, and development and solution of mathematical models to describe natural and engineered environmental systems. Prerequisites: CEE 3500, 3510. (F)

CEE 6640 Physical and Chemical Environmental Process Engineering 3
Principles of physical and chemical environmental engineering processes, including sedimentation, filtration, gas transfer, aeration, absorption, ion exchange, membrane processes, coagulation, flocculation, precipitation, oxidation, reduction, and disinfection. Process modeling and analysis
Course Descriptions

CEE 6650  Biological Processes in Environmental Engineering  2
Theory and design of biological processes used in environmental engineering. Stoichiometric, energetic, and kinetic analysis of biological treatment processes; modeling and design of suspended growth and fixed-film processes for treatment of municipal, industrial, and hazardous wastes; nutrient removal; and bioremediation. Prerequisites: CEE 6630, 6640, 6670. (Sp)

CEE 6660  Environmental Data Analysis and Experimentation  2
Data analysis and experimental design for environmental science and engineering. Graphical data analysis, parametric and nonparametric statistics, frequency distributions, hypothesis testing, propagation of variance, censored data, correlation and causation, parameter estimation, factorial experimental design and response surfaces, environmental monitoring and uncertainty. (F)

CEE 6670  Environmental Process Laboratory  2
Laboratory testing to demonstrate physical, chemical, and biological principles utilized in environmental engineering processes. Corequisites: CEE 6660, 6650. (Sp)

CEE 6680  Soil-based Waste Management  2 (dual listing 5680)
Engineering management of wastes present in the vadose zone, including extraction, containment, and biological, chemical, and physical destruction technologies for sustainable agriculture and environmental quality. Aspects include engineering characterization, problem definition, treatment, and monitoring. Analysis and design emphasized through problem solving, examinations, and report writing. Prerequisites: CEE/PUBH 3610, CEE 3640, 3870, CEE/BIE 3670. Also taught as BIE 6680/5680. (Sp)

CEE 6690  Natural Systems Engineering  3 (dual listing 5690)
Application of modeling tools commonly utilized in water resources systems for assessment of environmental impacts associated with engineered systems. Topics include: water resources modeling; physical, chemical, and biological process effects; assessment methods; data integration techniques; and impact assessment. Prerequisites: CEE/PUBH 3610, CEE 3500, 3510, 3640. (F)

CEE 6700  Field Sampling Techniques for Natural Systems Engineering  2 (dual listing 5700)
Provides students with hands-on approach to utilizing several of the most commonly applied spatial and temporal sampling techniques for data acquisition in support of natural systems modeling. Explores standard and advanced surveying techniques for water quality, stream geomorphology, and hydraulics, utilizing levels, total stations, laser levels, GPS, and hydroacoustic technologies. Integrative sampling strategies across spatial and temporal scales emphasized for multi-disciplinary studies. Taught first half of fall semester. Prerequisite: CEE 6690/5690. (F)

CEE 6710  Environmental Engineering Microbial Ecology  2
Principles of microbial ecology applied to engineered and natural systems. Prerequisites: BIOL 3300, CEE/PUBH 3610. (F)

CEE 6720  Natural Systems Modeling  3 (dual listing 5720)
Provides hands-on approach to utilizing several of the most commonly applied modeling tools employed to estimate physical, chemical, and biological impacts of existing and proposed water resource systems. Focuses on utility and limitation of specific modeling approaches, while also stressing integrative multi-disciplinary nature of impact assessment frameworks. Prerequisite: CEE 6690/5690. (Sp)

CEE 6730  Analysis and Fate of Environmental Contaminants  3 (dual listing 5730)
Provides students with understanding of methods used in analysis of environmental samples for organic contaminants. Examines various properties and processes determining the fate of organic contaminants in the environment. Taught first half of fall semester. Prerequisites: CHEM 1210, 2300. Also taught as PUBH 6730/5730. (F)

CEE 6740  Environmental Quality Modeling  3
Development and application of mathematical models for conventional and toxic pollutants in environmental systems. Description of advection, dispersion, sediment transport, partitioning, interphase transfer, and transformation kinetics applied to organic and inorganic pollutants. Equilibrium, steady state, and nonsteady systems. Prerequisite: CEE 6630. (Sp)

CEE 6750  Eco-Hydraulics for Natural Systems Engineering  4
Provides students with advanced multi-disciplinary modeling course in the application of hydraulics and water resource modeling in light of impact assessment frameworks for natural systems modeling. Focuses on application on one-dimensional and two-dimensional hydraulic modeling as basis for examining quantitative impacts on stream and riparian ecosystems under altered flow, as well as channel conditions with particular emphasis on fish and aquatic macro-invertebrates. Prerequisite: CEE 6690/5690. (F)

CEE 6800  Division of Environmental Engineering Seminar  1
Environmental engineering graduate seminar for faculty, student, and guest lecturer research presentations. (F,Sp)

CEE 6810  Biochemical Engineering  3 (dual listing 5810)
Fundamentals of bioreactor design and bioengineering to produce biological commodities. Emphasizes mathematical models of microbial and enzymatic processes in environmental and industrial biotechnology. Prerequisites: BIE 3200 and BIE/CEE 3670; or BIE/CEE 3670, CEE/PUBH 3610, and CEE 3640. Also taught as BIE 6810/5810. (F)

CEE 6830  Management and Utilization of Biological Solids and Wastewater  3 (dual listing 5830)
Focuses on production, management, and disposal of biosolids and wastewater generated in food processing and wastewater treatment. Emphasizes beneficial use of biosolids and wastewater for agricultural production, forest enhancement, and land reclamation. Prerequisite: BIE/CEE 3670. Also taught as BIE 6830/5830. (F)

CEE 6840  Application of Technology Transfer for Teachers  2
Focuses on application of modern instructional strategies to the transfer of technology and science to the public education setting. Part of a series of six courses. Prerequisite: Participation in an In*Step Science Program in the public schools. (F,Sp,Su)

CEE 6850  Atmospheric and Air Pollution Chemistry  3
Provides students with training in the fundamentals of natural and anthropogenically impacted atmospheric chemistry, primarily focusing on tropospheric meteorology, kinetics, and photochemistry, including gas-phase, aqueous-phase, and aerosol-forming reactions. Prerequisite: CEE 5680/6680 or upper-level chemistry or consent of instructor. (Sp)

CEE 6900  Directed Reading  1-3
Prerequisite: Instructor’s consent. (F,Sp,Su)

CEE 6930  Special Problems  1-4
Independent or group study of engineering problems not covered in regular course offerings. Prerequisite: Instructor’s consent. (F,Sp,Su)

CEE 6940  Snow Hydrology  3
Focuses on snow science, including atmospheric formation, precipitation, distribution on the landscape, metamorphism prior to melt, and snow pack melt dynamics. Also covers related issues, such as snow melt modeling, remote sensing, water supply, and biogeochemical cycling. Prerequisites: WATS 3700 or 4600 or SOIL 4600 or CEE 3430, or permission of instructor. Also taught as WATS 6940. (Sp)

CEE 6950  Practical Training  3
Intended for graduate students who are interested in practical training before graduation. Graded Pass/Fail only. (F,Sp,Su)

CEE 6970  Thesis Research  1-6
Graded Pass/Fail only. Prerequisite: Instructor’s consent. (F,Sp,Su)

<tr>
<td>CEE 7310</td>
<td>Fundamentals of Soil Behavior**</td>
<td>3</td>
<td>The influence of clay mineralogy, clay chemistry, and soil origin on the engineering properties of soil. Prerequisite: CEE 6360. (F)</td>
</tr>
<tr>
<td>CEE 7320</td>
<td>Advanced Soil Dynamics**</td>
<td>3</td>
<td>Advanced studies in the response of soil structures and foundations to dynamic loads. Prerequisite: CEE 6360. (F)</td>
</tr>
<tr>
<td>CEE 7430</td>
<td>Stochastic Hydrology**</td>
<td>3</td>
<td>Stochastic description of hydrologic variability in time, space, and space-time. Markov processes, time series synthesis and forecasting, spectral analysis, spatial interpolation and random field simulation, data imputation, and parameter estimation for physical models. Lattice and Markov chain Monte Carlo methods, simulated annealing, and Gibbs processes. Applications to rainfall, streamflow, groundwater quality and quantity, and subsurface characterization. (Sp)</td>
</tr>
<tr>
<td>CEE 7460</td>
<td>Advanced Topics in Hydrology</td>
<td>3</td>
<td>Topics of prominent current interest for advanced MS and PhD students. Can be repeated for credit with consent of instructor. (Sp)</td>
</tr>
<tr>
<td>CEE 7470</td>
<td>Continuous and Macro-Scale Hydrologic Modeling</td>
<td>3</td>
<td>Presents existing different approaches to the modeling of continuous hydrologic systems and long-term forecasting. Reviews and analyzes lumped and distributed catchment and macroscale hydrologic models, as well as state-of-the-art computer codes. Prerequisite: CEE 6440. (F)</td>
</tr>
<tr>
<td>CEE 7520</td>
<td>Mathematical Methods for Civil and Environmental Engineers</td>
<td>3</td>
<td>Applications of advanced mathematical methods to analyze civil and environmental engineering problems, including analysis of dynamical systems, solutions to nonlinear and stochastic differential equations, Fourier analysis, and neural networks. (Sp)</td>
</tr>
<tr>
<td>CEE 7580</td>
<td>Advanced Finite Element Analysis in Fluid Mechanics</td>
<td>3</td>
<td>Application of the finite element method of analysis to problems in fluid mechanics. Use of higher order element to two- and three-dimensional flows. Prerequisites: CEE 3510, CEE/MAE 6570; or MAE 3420, 5020. Also taught as MAE 7580. (Sp)</td>

<tbody>
<tr>
<td>CHEM 5720</td>
<td>General Biochemistry Laboratory</td>
<td>2</td>
<td>Prerequisite: CHEM 5710 (may be taken concurrently). (Sp)</td>
</tr>
<tr>
<td>CHEM 5730</td>
<td>Genomic Technologies</td>
<td>4</td>
<td>Provides theoretical background in genomics/proteomics technologies and laboratory training in advanced techniques. Topics include: whole genome sequencing, transcriptome and proteome characterization, DNA and expressed gene libraries, and operation of modern genomics laboratory equipment. Prerequisites: BIOL 1220, 3200; CHEM 3700 or 5710; CS 2200; STAT 3000. Also taught as BIOL 5730. (Sp)</td>
</tr>
<tr>
<td>CHEM 6010</td>
<td>Quantum Chemistry***</td>
<td>3</td>
<td>Quantum mechanics applied to chemical problems. Theory of atoms and molecules. Prerequisites: CHEM 3070, MATH 2250. (F)</td>
</tr>
<tr>
<td>CHEM 6020</td>
<td>Molecular Spectroscopy***</td>
<td>3</td>
<td>Spectroscopy of atoms and molecules. Prerequisite: CHEM 6010. (Sp)</td>
</tr>
<tr>
<td>CHEM 6250</td>
<td>Curricular Practical Training 1-6</td>
<td>1-6</td>
<td>Work experience tied to academics, in the graduate student’s major field of study, either chemistry or biochemistry, for which the student is paid. Prerequisite: Permission of department head prior to enrollment. (F,Sp,Su)</td>
</tr>
<tr>
<td>CHEM 6300</td>
<td>Advanced Modern Organic Chemistry***</td>
<td>3</td>
<td>Covers topics in molecular structure, reaction mechanisms of organic molecules, and physical organic chemistry. Prerequisites: CHEM 2320, 3070. (F)</td>
</tr>
<tr>
<td>CHEM 6500</td>
<td>Reactivity and Mechanisms in Inorganic Chemistry***</td>
<td>3</td>
<td>Inorganic reactions and mechanisms relevant to areas of main group, transition metals, and bioinorganic and organometallic chemistry. Prerequisite: CHEM 5520. (Sp)</td>
</tr>
<tr>
<td>CHEM 6510</td>
<td>Chemical Applications of Group Theory</td>
<td>1</td>
<td>Introduction to symmetry point groups and theorems of group theory for application to structure, bonding, and spectroscopy. Some familiarity with linear algebra is recommended. Prerequisite: CHEM 3070. (F)</td>
</tr>
<tr>
<td>CHEM 6600</td>
<td>Modern Chemical Analysis***</td>
<td>3</td>
<td>Methodology and statistical treatment of chemical data, experimental design, quality control, and chemical separations. Prerequisite: CHEM 5640. (Sp)</td>
</tr>
<tr>
<td>CHEM 6700</td>
<td>Advanced Biochemistry I</td>
<td>3</td>
<td>Advanced-level biochemistry course intended for biochemistry MS and PhD students. Covers proteins, enzyme mechanism, nucleic acid structure and function, and catalytic metabolism at a level appropriate for students preparing for the qualifying examination. This course (which is co-instructed with CHEM 5700, with additional projects for CHEM 6700) cannot be taken for credit by students who have previously taken CHEM 5700 for credit. (F)</td>
</tr>
<tr>
<td>CHEM 6710</td>
<td>Advanced Biochemistry II</td>
<td>3</td>
<td>Advanced-level biochemistry course intended for biochemistry MS and PhD students. Covers proteins, enzyme mechanism, nucleic acid structure and function, and catalytic metabolism at a level appropriate for students preparing for the qualifying examination. This course (which is co-instructed with CHEM 5710, with additional projects for CHEM 6710) cannot be taken for credit by students who have previously taken CHEM 5710 for credit. (Sp)</td>
</tr>
<tr>
<td>CHEM 6720</td>
<td>Advanced Biochemistry Laboratory</td>
<td>2</td>
<td>To obtain advanced laboratory skills, students complete specific laboratory experiments in research laboratories of departmental faculty members. (F,Sp)</td>
</tr>
<tr>
<td>CHEM 6730</td>
<td>Principles of Enzymology*</td>
<td>3</td>
<td>Mechanisms of enzyme action, emphasizing recent advances in enzymology, including theory and modern experimental approaches to elucidation of mechanism. Prerequisite: CHEM 5700 or equivalent. (Sp)</td>
</tr>
<tr>
<td>CHEM 6740</td>
<td>Cellular Communication by Small Molecules and Proteins**</td>
<td>3</td>
<td>Using post-translational modifications, small molecules, and protein motifs in cellular communication. Variances in the communication systems related to disease state and/or cell stress and therapeutic strategies to manipulate the communication systems. Prerequisite: CHEM 5700 or equivalent. Also taught as BIOL 6740. (Sp)</td>
</tr>
<tr>
<td>CHEM 6750</td>
<td>Principles of Structural Biology</td>
<td>3</td>
<td>General principles of protein and nucleic acid structure. Approaches to understanding biological function through structural analysis. Prerequisite: CHEM 5700 or 6790 or instructor approval. (F)</td>
</tr>
<tr>
<td>CHEM 6760</td>
<td>Principles of Bioenergetics***</td>
<td>3</td>
<td>Global biological energy cycles including carbon, nitrogen, and sulfur cycles; respiration; electron transfer; and energy transduction. Prerequisite: CHEM 5700 or equivalent. (F)</td>
</tr>
<tr>
<td>CHEM 6910</td>
<td>Special Problems in Chemistry and Biochemistry</td>
<td>1-4</td>
<td>Selected problems in chemistry and biochemistry. Registration permitted only with written permission from department head. (F,Sp,Su)</td>
</tr>
<tr>
<td>CHEM 6970</td>
<td>Thesis Research</td>
<td>1-10</td>
<td>Research for MS degree. Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>
<tr>
<td>CHEM 6990</td>
<td>Continuing Graduate Advisement</td>
<td>1-9</td>
<td>Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>
<tr>
<td>CHEM 7020</td>
<td>Statistical Mechanics***</td>
<td>3</td>
<td>Statistical mechanics with applications to research problems of current interest. Prerequisite: CHEM 6010.</td>
</tr>
<tr>
<td>CHEM 7030</td>
<td>Special Topics in Physical Chemistry (Topic)**</td>
<td>3</td>
<td>Covers special areas of current interest and activity in physical chemistry. (F,Sp)</td>
</tr>
<tr>
<td>CHEM 7300</td>
<td>Reactions and Synthesis in Modern Organic Chemistry**</td>
<td>3</td>
<td>Reactions of modern organic chemistry and their application to organic synthesis. Prerequisite: CHEM 6300. (Sp)</td>
</tr>
<tr>
<td>CHEM 7310</td>
<td>Molecular Structure/Spectroscopy of Organic Compounds*</td>
<td>3</td>
<td>Modern methods of predicting and determining molecular structure of organic compounds using advanced computational and spectroscopic tools. Prerequisite: CHEM 6300. (F)</td>
</tr>
<tr>
<td>CHEM 7330</td>
<td>Special Topics in Organic Chemistry (Topic)**</td>
<td>3</td>
<td>Covers special areas of current interest and activity in organic chemistry. Prerequisite: CHEM 6300. (F,Sp)</td>
</tr>
<tr>
<td>CHEM 7500</td>
<td>Coordination Chemistry**</td>
<td>3</td>
<td>Theory and spectroscopy of transition metal coordination complexes. Prerequisites: CHEM 3070, 6500, 6510. (Sp)</td>
</tr>
<tr>
<td>CHEM 7510</td>
<td>Bioinorganic Chemistry***</td>
<td>1-3</td>
<td>Advanced systematic study of metallobiochemical structure and function. Prerequisite: CHEM 6500. (F)</td>
</tr>
<tr>
<td>CHEM 7530</td>
<td>Special Topics in Inorganic Chemistry (Topic)**</td>
<td>3</td>
<td>Topics of current interest in inorganic chemistry. Prerequisite: CHEM 6500. (Sp)</td>
</tr>
<tr>
<td>CHEM 7600</td>
<td>Analytical Spectroscopy**</td>
<td>3</td>
<td>Practical description of spectroscopy-based analysis, emphasizing instrumentation and methods. Prerequisites: CHEM 5640, graduate standing, or instructor’s permission. (Sp)</td>
</tr>
<tr>
<td>CHEM 7610</td>
<td>Chemical Separations*</td>
<td>3</td>
<td>Survey of theory and practice of modern chemical separations, including extractions, chromatography, distillation, and phase separations. Prerequisite: CHEM 5640 or instructor’s permission. (F)</td>
</tr>
<tr>
<td>CHEM 7620</td>
<td>Electrochemistry***</td>
<td>3</td>
<td>Survey of electrochemistry with emphasis on electrochemical analysis. Prerequisite: CHEM 5640. (F)</td>
</tr>
<tr>

Course Descriptions

Chinese (CHIN)

See Department of Languages, Philosophy, and Speech Communication, pages 364-379

CHIN 1010 Chinese First Year I 5
Communicative competencies in the four language skills: speaking, listening, reading, and writing with exposure to cultures and customs. Native speaker instructor. (F)

CHIN 1020 Chinese First Year II 5
Communicative competencies in the four language skills: speaking, listening, reading, and writing with exposure to cultures and customs. Native speaker instructor. Prerequisite: CHIN 1010 or equivalent. (Sp)

CHIN 2010 Chinese Second Year I 5
Second-year overview of speaking, listening, reading, and writing with exposure to cultures and customs. Native speaker instructor. Prerequisite: CHIN 1020 or equivalent. (F)

CHIN 2020 Chinese Second Year II 5
Second-year overview of speaking, listening, reading, and writing with exposure to cultures and customs. Native speaker instructor. Prerequisite: CHIN 1010 or equivalent. (Sp)

CHIN 3010 Chinese Third Year I 4
First segment of the third-year overview of speaking, listening, reading, and writing, with additional exposure to cultures and customs. Readings include excerpts from televised drama. Prerequisite: CHIN 2020 or equivalent. (F)

CHIN 3020 Chinese Third Year II 4
Second segment of the third-year overview of speaking, listening, reading, and writing, with additional exposure to cultures and customs. Readings include short essays, Chinese proverbs and folktales, and other literary selections. Prerequisite: CHIN 3010 or equivalent. (Sp)

CHIN 3100 DHA Readings in Contemporary Chinese Culture 3
Introduction to contemporary Chinese culture through readings from newspapers and other source materials. Prerequisite: CHIN 2020 or equivalent. (Sp)

CHIN 3510 Chinese Business Language 3
Designed to develop students' business Chinese language skills in speaking, listening, and writing, as well as cultural competence. Classwork focuses on Chinese business terms, business conversation, and basic business practices, as well as the Chinese cultural environment. Prerequisite: CHIN 2020 or equivalent. (F)

CHIN 3880 Individual Readings in Chinese 1-2
Individual study of selected readings in Chinese. Designed to broaden student's reading comprehension beyond the level addressed in CHIN 3020. Prerequisite: Instructor's permission. (F,Sp)

CHIN 4920 Chinese Language Tutoring 1
Allows students to develop tutoring skills by assisting professors in lower-division courses or fulfilling instructional duties for a comparable amount of time in the language laboratory, public schools, or similar activities with departmental approval. May be repeated to a maximum of 3 credits. Prerequisite: Permission of instructor. (F,Sp)

Classics (CLAS)

See Classics Minor, page 219
Also see Department of History, pages 332-337

CLAS 1100 The Latin and Greek Element in English* 3
Survey of classical word roots in English, with a view to enhancing students' comprehension of English vocabulary and its Indo-European heritage. (F,Sp)

CLAS 3210 Classical Mythology* 3
Introduces major myths of the Classical world. Explores how these myths serve as keys to understanding the documents and arts of Classical civilization. (F,Sp)

Climate (CLIM)

See Department of Plants, Soils, and Biometeorology, pages 464-477

The CLIM course prefix will not be used until Spring Semester 2008. For Summer Semester 2007 and Fall Semester 2007, these courses will continue to use the Biometeorology (BMET) prefix. For BMET course descriptions, see pages 583-584.

Communicative Disorders and Deaf Education (COMD)

See Department of Communicative Disorders and Deaf Education, pages 220-227

COMD 2400 Orientation and Observation 1
Introduces students to the professional responsibilities required of communicative disorders and deaf education specialists in a variety of employment settings. Observation of normal/abnormal communication abilities. Language, hearing, and speech disorders. Graded Pass/Fail only. (F,Sp)

COMD 2500 Language, Speech, and Hearing Development 3

COMD 2910 CI Sign Language I 4
Introduction to American Sign Language and Deaf Culture. Basic study of grammatical structure of ASL, as well as the history and folklore associated with the culture. Students have ample opportunities for laboratory practice of ASL. Course taught in a no voice, total immersion atmosphere. (F,Sp,Su)

COMD 3050 Practicum and Methods in Teaching Children who are Deaf and Hard of Hearing 1-3
Students investigate various aspects of teaching methods through field experiences in the classroom, curriculum and effective teaching assessment, observation and reflections, and guest speakers focusing on areas of mathematics and science in the primary grades. (F,Sp)

COMD 3080 American Sign Language Practicum 1
Provides opportunities for practice and continued improvement of receptive and expressive skills in American Sign Language. (F,Sp)
## Course Descriptions

**COMD 3100**  
*Fundamentals of Anatomy for Speech and Language*  
Basic study of the structures and functions associated with the subprocesses of speech and hearing, including respiration, phonation, articulation, audition, and hearing. Prerequisite: BIOL 2000 or 2010. (F)

**COMD 3120**  
*Disorders of Articulation and Phonology*  
Introduction to articulation and phonological disorders and related problems. Emphasis directed at evaluation, management, and measures of success. Principles of programming are presented. Prerequisites: COMD 2500 and 3500. (Sp)

**COMD 3400**  
*Acoustics and Anatomy of the Ear*  
Principles of physical acoustics as applied to Communicative Disorders. Course includes anatomy, physiology, and metabolism of the human auditory system. (Sp)

**COMD 3500**  
*Phonetics/Developmental Phonology*  
Study of the development of the phonological subsystem in English and the acoustic and physiological characteristics of speech sounds. (F)

**COMD 3650 CI**  
*Clinical Processes and Behavior*  
A consideration of clinical management as an interactive process. Interpersonal sensitivity, technical knowledge and skills, professional infection-control measures, and behavior modification are core considerations. Prerequisites: COMD 2500 and PSY 1010. (Sp)

**COMD 3700**  
*Basic Audiology*  
Study of pure tone audiometry, including clinical masking, speech audiometry, and clinical immittance measures. Laboratory exercises are required. Prerequisite: COMD 3400. (F)

**COMD 3910**  
*Sign Language II*  
Provides a more in-depth study of American Sign Language, deaf folklore and literature, and the grammatical structure of ASL. Focuses on unique number systems, idioms, lexicalized fingerspelling, and ASL poetry. Course taught with a full immersion approach, with ample opportunities for practice with fluent users of ASL in the lab. Prerequisite: COMD 2910 or instructor approval. (F,Sp,Su)

**COMD 4100 CI**  
*Clinical Practicum in Speech-Language Pathology*  
Supervised diagnostic and treatment practicum with individuals who have communication disorders. Prerequisites: COMD 2500, 3120, 3650, and permission of instructor. (F,Sp,Su)

**COMD 4400 CI**  
*Clinical Practicum in Audiology*  
Supervised diagnostic and treatment practicum with individuals with hearing loss. Prerequisites: COMD 3400, 3650, 3700, and consent of instructor. (F,Sp,Su)

**COMD 4600**  
*Senior Thesis*  
Student-initiated research project under faculty supervision. Prerequisites: Satisfactory grade point average, instructor recommendation, and approval of Honors Committee. (F,Sp,Su)

**COMD 4630 (dual listing 6630)**  
*Teaching Speech to Deaf and Hard of Hearing Children*  
Emphasizes development and presentation of lesson plans for different grade levels. Focuses on developing students' abilities in moving from and linking Language 1 (American Sign Language) and Language 2 (the written form of English). Prerequisites: COMD 2910, 3910, and 4910. (Sp)

**COMD 4750 (dual listing 6750)**  
*Teaching the English Language to Individuals who are Deaf and Hard of Hearing*  
Evaluation and teaching of the English language to individuals who are deaf and hard of hearing. (Sp)

**COMD 4760**  
*Early Intervention for Children who are Deaf and Hard of Hearing*  
Family-centered early intervention for infants and young children who are deaf and hard of hearing. Identification, testing, hearing aids, communication, auditory, language, and emerging literacy programming, parent and family programs, mentoring. (F)

**COMD 4770 (dual listing 6770)**  
*Audiology and Teachers of Children who are Deaf and Hard of Hearing*  
Focuses on the fields of hearing science and audiology and how information from these disciplines relates to education of deaf and hard of hearing children. (F)

**COMD 4780 (dual listing 6780)**  
*Socio-Cultural Aspects of Deafness*  
Leads students to understand how society, political institutions, and education have impacted the Deaf culture. (F)

**COMD 4790 (dual listing 6790)**  
*Psychological Principles and Individuals who are Deaf and Hard of Hearing*  
Psychological theories and research used to describe the deaf and hard of hearing. Exploration of principles that can be used in helping these individuals achieve emotional well-being. Also taught as PSY 4790/6790. (Sp)

**COMD 4910 CI**  
*Sign Language III (dual listing 6910)*  
Students receive individual, detailed feedback concerning their expressive ASL skills. Students present material in American Sign Language, with a focus on improving identified areas of weakness. Cooperative learning is encouraged. Experiences with fluent users of ASL and interpreter mentors via the lab provide students with basic interpreting skills. Prerequisites: COMD 2910 and 3910; or instructor approval. (F,Sp)

**COMD 4920 (dual listing 6920)**  
*Sign Language IV*  
Basic concepts of linguistics are explored, as well as an in-depth analysis of ASL history, grammatical structure, and ASL poetry. Students apply linguistic principles to the analysis of American Sign Language, with ample opportunities to interact with fluent users of ASL via the lab experience. Prerequisites: COMD 2910 and 3910; or permission of instructor. (Sp)

**COMD 5000**  
*Institute in Communicative Disorders and Deaf Education 0.5-3*  
Special colloquial offerings in communicative disorders and deaf education. (F,Sp,Su)

**COMD 5070**  
*Speech Science*  
Explores contemporary theory, research findings, clinical applications, and measurement and analysis of normal speech and voice production and perception. Speech production subsystems of respiration, phonation, articulation, and resonance are examined in detail through the collection and analysis of physiologic data. (F)

**COMD 5100**  
*Language Science*  
Study of clinical analysis of syntactic and morphological properties of speech. (Sp)

**COMD 5200**  
*Language Assessment and Intervention for Preschool Children*  
Preschool assessment and intervention, including language sampling and analysis procedures, test administration and interpretation, informal language assessment, intervention goals and objectives, planning clinical management, language facilitation strategies, teaching approaches, classroom-based language intervention, and enhancing emergent literacy. Prerequisite: COMD 2500 or equivalent. (Sp)

**COMD 5330**  
*Aural Rehabilitation*  
Ramiications of hearing loss among children and adults and rehabilitative audiological techniques and programs. (Sp)

**COMD 5600**  
*Classroom Teaching Using American Sign Language*  
Emphasizes development and presentation of lesson plans for different grade levels. Focuses on developing students' abilities in moving from and linking Language 1 (American Sign Language) and Language 2 (the written form of English). Prerequisites: COMD 2910, 3910, and 4910. (Sp)

**COMD 5610**  
*Introduction to Education of the Deaf and Hard of Hearing*  
Overview of the history of educating children who are deaf and hard of hearing. Presents an overview of techniques, anatomy of the ear, and different philosophical views for teaching people who are deaf and hard of hearing. (F)

Course Descriptions

COMD 7300  Intermediate Clinical Practicum  2
Supervised diagnostic practicum for second-year students in the Audiology Program. Prerequisite: Admission to the Audiology Program. (F,Sp,Su)

COMD 7310  Psychoacoustics and Instrumentation  3
Covers psychoacoustic aspects of human audition, with emphasis on application in the clinical setting. Explores basic electronics and audio systems. Prerequisite: Admission to the Audiology Program. (F)

COMD 7320  Amplification I  1-4
Hearing aid types and uses, hearing aid components and characteristics, electroacoustic performance, hearing aid candidacy and hearing aid evaluation, and hearing aid fitting and orientation. Prerequisite: Admission to the Audiology Program. (Sp)

COMD 7330  Supervision Internship  1-7
Provides extensive supervisory experience for advanced students. Internship is for a period of time to be specified by the department and cooperating agency. Prerequisite: Permission of instructor. (F,Sp,Su)

COMD 7340  Pediatric Audiology  3
Provides students with understanding of normal auditory development and theoretical, clinical, and practical issues involved in screening, assessment, and management of children with hearing loss. Prerequisite: Admission to the Audiology Program. (F)

COMD 7380  Advanced Audiology  2
Special auditory testing for site of lesion in the conductive, sensory, neural, and central auditory systems. Emphasizes immittance Battery and Otoacoustic Emissions Battery. Tests for assessment of functional hearing loss are also included. Sensitivity and specificity of auditory tests are treated. Test results related to auditory disease process. Prerequisite: Admission to the Audiology Program. (F)

COMD 7400  Advanced Clinical Practicum  2-4
Supervised clinical practicum for third-year students in the Audiology Program. Prerequisite: Admission to the Audiology Program. (F,Sp,Su)

COMD 7410  Noise and Hearing Conservation  2
Principles of noise hazard evaluation, effects of noise on the auditory mechanism, and development and maintenance of an effective hearing conservation program. Prerequisite: Admission to the Audiology Program. (F)

COMD 7420  Amplification II  1-4
Applications of advanced hearing aid circuitry, especially digital and digitally programmable hearing aids. Presentation of various aspects of measuring hearing aid satisfaction. Tinnitus management and cochlear implants area also treated. Hearing aid trouble shooting, modifications, and repairs are included. Prerequisite: Admission to the Audiology Program. (F)

COMD 7430  Electrophysiology  3
Provides students with extensive working knowledge of early, middle, and late evoked potentials. Upon completion of this class, students should be capable of providing comprehensive services requiring evoked potentials. Prerequisite: Admission to the Audiology Program. (F)

COMD 7460  Adult Aural Rehabilitation  3
Focuses on traditional aural rehabilitation models, amplification, counseling, speech reading, and assistive listening devices. Upon course completion, students should be able to effectively use these elements to assist adults in compensating for hearing impairment. Prerequisite: Admission to the Audiology Program. (Sp)

COMD 7470  Educational Audiological Management  3
Plans for assessing children who are deaf and hard of hearing in schools. Management plans for audiological services, as well as appropriate intervention strategies for children. Students develop plans and present methods for bringing change to schools. Prerequisite: COMD 6370. (F)

COMD 7490  Medical Aspects of Audiology  3
Study of the etiology, symptomatology, audiological manifestations, and medical treatment of various pathological conditions of the auditory system. Prerequisite: Admission to the Audiology Program. (Sp)

COMD 7510  Supervision in Communicative Disorders  2
Principles and practices of supervision in Communicative Disorders and Deaf Education. Emphasizes clinical and educational supervision as these styles relate to individuals who are deaf and hard of hearing or who have communicative disorders. (Su)

COMD 7530  Balance Evaluation and Management  3
Explores techniques and technology for vestibular and balance assessment, including electronystagmography, videonystagmography, rotational testing, and posturography. Prerequisite: Admission to the Audiology Program. (Sp)

COMD 7800  Clinical Externship in Audiology  6
Twelve-month full-time clinical practicum experience in one or more off-campus clinical sites. Prerequisite: Admission to the Audiology Program. (F,Sp,Su)

COMD 7810  Research Seminar in Educational Audiology  1-3
Identification of research problem, consideration of research strategies and methods, application of research and statistical concepts in departmental focus, interaction with faculty. (F,Sp,Su)

COMD 7820  Research Seminar in Audiology  1
Facilitates development of student audiology projects. Further enables students to become competent clinician-researchers in the field of audiology. Prerequisite: Admission to the Audiology Program. (F)

COMD 7850  Externship Seminar  3
Internet-based seminar in current clinical-related topics for fourth-year students in the Doctorate of Audiology Program. Prerequisite: Admission to Doctorate of Audiology Program. (F,Sp,Su)

COMD 7860  Practice Management in Audiology  3
Audiology business and practice management. Discussion of business set-up, the business plan, managerial accounting and financial analysis, marketing, pricing, reimbursement, record keeping, and forensics. Prerequisite: Admission to the Audiology Program. (Sp)

COMD 7870  Audiology Capstone Project  1-6
Under the direction of his or her advisory committee, student develops a clinically-related project. This project is a creative work at a doctoral level and worthy of publication or presentation. Prerequisite: Admission to the Audiology Program. (F,Sp,Su)

COMD 7900  Independent Study  1-2
Advanced students, under direction of a faculty member, will study independently; however, departmental permission is necessary. (F,Sp,Su)

COMD 7910  Independent Research  1-2
Advanced students, under direction of a faculty member, will do research in an area of interest to themselves. (F,Sp,Su)

COMD 7970  Dissertation  1-9
Variable credit for dissertation project in connection with the doctoral program emphasis in educational audiology. Graded Pass/Fail only. (F,Sp,Su)

COMD 7990  Continuing Graduate Advisement  1-9
Graded Pass/Fail only. (F,Sp,Su)

©Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 1020</td>
<td>Campus Computing and Beyond</td>
<td>1</td>
<td>Hands-on laboratory for CS 1030. Introduces the campus network and the Internet. Emphasizes general problem-solving strategies and skills associated with computer and application software use. (F,Sp,Su)</td>
</tr>
<tr>
<td>CS 1030</td>
<td>Foundations of Computer Science</td>
<td>3</td>
<td>Investigation of computers and computing in today's society, including the basic scientific and mathematical concepts that underlie computer science, computing, and computer systems. No prerequisites. (F)</td>
</tr>
<tr>
<td>CS 1050</td>
<td>Problem Solving with Computers</td>
<td>3</td>
<td>Investigates problem-solving using methodologies of computer science. Emphasizes techniques used by computer scientists to solve problems, as well as the scientific method. Develops problem-solving methodology for both new and traditional computer applications. (F,Sp,Su)</td>
</tr>
<tr>
<td>CS 1060</td>
<td>Cyber Security: Threats, Analysis, and Defense</td>
<td>3</td>
<td>Investigation of cyber-security threats through an analysis of computer systems and communication methods. Develops skills for identifying potential attacks, analyzing problems, and implementing solutions. Students learn to minimize vulnerabilities and defend against attacks in the cyber world. (Sp)</td>
</tr>
<tr>
<td>CS 1400</td>
<td>Introduction to Computer Science—CS 1</td>
<td>3</td>
<td>Introduction to computer science, program development, algorithm analysis, and data structures. Students will learn to develop correct software in a current programming language environment. Computer science majors must enroll in CS 1400 concurrently with CS 1400. Prerequisite: Grade of C- or better in MATH 1050 or Math ACT score of at least 25. (F,Sp,Su)</td>
</tr>
<tr>
<td>CS 1405</td>
<td>Introduction to Computer</td>
<td>3</td>
<td>One-hour lab taught in conjunction with CS 1400. Students learn to develop correct software in a hands-on structured environment. Computer science majors are required to pass both the laboratory and the lecture, and are required to enroll in CS 1400 concurrently with CS 1405. For students not majoring in computer science, this laboratory is advised, but not required, for CS 1400. Prerequisite: Grade of C- or better in MATH 1050 or Math ACT score of at least 25. (F,Sp,Su)</td>
</tr>
<tr>
<td>CS 1410</td>
<td>Introduction to Computer Science—CS 2</td>
<td>3</td>
<td>Introduction to science of problem solving, programming, program development, algorithm analysis, and data structures. Students will learn to develop correct software in a current programming language environment. Prerequisite: Grade of C- or better in CS 1400. (F,Sp,Su)</td>
</tr>
<tr>
<td>CS 2250</td>
<td>Cooperative Work Experience</td>
<td>1-9*</td>
<td>Provides credit for students working at a participating firm under faculty supervision. Prerequisites: 2.5 GPA; permission of instructor. (F,Sp,Su)</td>
</tr>
<tr>
<td>CS 2420</td>
<td>Algorithms and Data Structures—CS 3</td>
<td>3</td>
<td>Introduction to science of problem solving, program development, algorithm analysis, and data structures. Students will learn to develop correct software in a current programming language environment. Prerequisites: 2.5 GPA; grade of C- or better in CS 1410. (F,Sp,Su)</td>
</tr>
<tr>
<td>CS 2450</td>
<td>Software Engineering</td>
<td>3</td>
<td>Science of small and large software project development, taught in team and project management format. Students complete a well-documented functional product, working in teams of four to five students. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. (F,Sp)</td>
</tr>
<tr>
<td>CS 2550</td>
<td>Computer Organization</td>
<td>3</td>
<td>Fundamental building blocks of digital computers, and the underlying theories upon which these building blocks are assembled. Introduction to information representation, number systems, combinational logic circuits, sequential logic circuits, and instruction sets. Programming such systems at the assembly level. Prerequisites: 2.5 GPA; grade of C- or better in both CS 1400 and MATH 1050 and Math ACT score of at least 23. (F,Sp)</td>
</tr>
<tr>
<td>CS 2810</td>
<td>Computer Organization (formerly CS 3550) and Architecture</td>
<td>3</td>
<td>Architecture of a computer system, as viewed by the programmer. Topics such as memory management, RISC vs. CISC, pipelining, parallelism, interrupts, and networking discussed in detail. Includes several homework assignments, at least one of which deals with interrupts and interrupt-driven applications. Prerequisites: 2.5 GPA; grade of C- or better in CS 2550. Not available to pre-Computer Science majors. (F,Sp)</td>
</tr>
<tr>
<td>CS 3000</td>
<td>Undergraduate Seminar</td>
<td>1</td>
<td>Serves as a capstone course for the pre-computer science curriculum, as well as an introduction to the advanced standing curriculum. Also includes discussion of computer science as a career and discussion of the advanced standing test. Graded Pass/Fail only. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420, or concurrent enrollment in CS 2420. (F,Sp)</td>
</tr>
<tr>
<td>CS 3010</td>
<td>DSC/CI Information Acquisition, QI Analysis, and Presentation</td>
<td>3</td>
<td>Introduces students to use of scientific method and computer technology in analysis of multi-faceted problem, and presentation of that analysis. Each semester, built around single topic such as global warming. Prerequisites: Completion of University Studies Computer and Information Literacy (CI) and Quantitative Literacy (QL) requirements. (F,Sp,Su)</td>
</tr>
<tr>
<td>CS 3100</td>
<td>Operating Systems and Concurrency</td>
<td>3</td>
<td>Design and implementation of operating systems. UNIX will be used as an example, but all categories of operating systems will be discussed. Presentation of the concept of concurrency as it applies to operating system design and application. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (F,Sp)</td>
</tr>
<tr>
<td>CS 3410</td>
<td>DSC/CI Computational Science: JAVA/Internet</td>
<td>3</td>
<td>Introduces computational science for algorithm development in JAVA-based applications. Examines information representation, storage, retrieval, and transmission in quantitative Internet-based environments. Prerequisites: CS 1400 and completion of University Studies Quantitative Literacy (QL) requirement. (F,Sp)</td>
</tr>
<tr>
<td>CS 3420</td>
<td>QI Computational Science: C# and .NET</td>
<td>3</td>
<td>Introduces algorithm development for C#.NET applications. Examines digital representation, storage, retrieval, and transmission of information, and quantitative applications such as distributed network problems, along with the algorithms for such applications. Prerequisites: CS 1400 and completion of University Studies Quantitative Literacy (QL) requirement. (F,Sp)</td>
</tr>
<tr>
<td>CS 3430</td>
<td>Computational Science: Python and Perl Programming</td>
<td>3</td>
<td>Introduces students to algorithm development and programming in computational science for Python and Perl applications on a Linux platform. Examines computer-based representation, storage, retrieval, and transmission of information, along with the algorithms used to perform such operations. Prerequisites: CS 1410 and completion of University Studies Quantitative Literacy (QL) requirement. (Sp,Su)</td>
</tr>
<tr>
<td>CS 4250</td>
<td>Cooperative Work Experience</td>
<td>1-9*</td>
<td>Provides credit for students working at a participating firm under faculty supervision. Prerequisites: 2.5 GPA; permission of instructor. (F,Sp,Su)</td>
</tr>
<tr>
<td>CS 4700</td>
<td>Programming Languages</td>
<td>3</td>
<td>Theories of programming design and implementation. Introduction to variety of programming languages, showing how they represent trade-offs with respect to these theories. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (F,Sp)</td>
</tr>
<tr>
<td>CS 4720</td>
<td>Computer Networking I</td>
<td>3</td>
<td>Focuses on client/server model, which is the dominant architectural model for today's computer systems. Explores the network underlying this model, specifically examining the topology, protocol(s), user interface(s), and hardware. Emphasizes the general theory and functionalities underlying the client/server</td>
</tr>

Course Descriptions

model and computer networks in general. Prerequisites: 2.5 GPA; grade of C- or better in CS 2550. Not available to pre-Computer Science majors. (F,Sp,Su)

**CS 4730**  
Computer Networking II  
Focuses on client/server model, which is the dominant architectural model for today’s computer systems. Emphasizes the specifics of the products of today’s dominant network companies, which are currently Novell and Microsoft. Completion of this course prepares students for certification under such products. Prerequisites: 2.5 GPA; grade of C- or better in CS 4720. Not available to pre-Computer Science majors. (Sp)

**CS 4890**  
Topics in Computer Science (Topic)  
Current topics in computer science as determined by advances in the field. Prerequisites: GPA of 2.5 or higher; grade of C- or better in CS 2420 or permission of instructor. Not available to pre-Computer Science majors. (F,Sp,Su)

**CS 4950**  
Undergraduate Research  
Participation in research projects, under supervision of a computer science faculty member. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420 and permission of instructor. Not available to pre-Computer Science majors. (F,Sp,Su)

**CS 5000**  
Theory of Computation  
Theory of computation, including presentation of computability, decidability, and complexity. Includes formal grammars, finite and pushdown automata, and turing machines. Prerequisites: 2.5 GPA; grade of C- or better in both CS 2420, MATH 3310. Not available to pre-Computer Science majors. (Sp)

**CS 5050**  
Advanced Algorithms  
Study of algorithms and their analysis, including: design by induction, algorithms involving sequences and sets, graph algorithms, geometric algorithms, algebraic algorithms, reductions, NP-completeness, and parallel algorithms. Prerequisites: 2.5 GPA; grade of C- or better in both CS 2420, MATH 3310. Not available to pre-Computer Science majors. (F,Sp)

**CS 5070**  
Computer Science Capstone  
Students develop a project that includes the use of a significant portion of the computer science topics presented in the core curriculum. Completion of the project requires an oral presentation and a detailed written report. Graded Pass/Fail only. Prerequisites: 2.5 GPA; instructor permission. Not available to pre-Computer Science majors. (F,Sp,Su)

**CS 5100**  
Graphical User Interfaces and Windows Programming  
Design principles of GUls and philosophy, structure, and programming in Windows environments. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (Sp)

**CS 5200**  
Distributed and Network Programming  
Introduction to programming concepts and techniques for distributed and networked environments. Explores concurrency, process synchronization, network protocols, connectionless and connection-oriented communications, network architectures and topology, load balancing, and transmission media. Prerequisites: 2.5 GPA; grade of C- or better in CS 3100. Not available to pre-Computer Science majors. (F)

**CS 5300**  
Compiler Construction  
Review of programming language structures, translation, loading, execution, and storage allocation. Compilation of declarations, expressions, statements, and procedures/functions. Organization and design of a compiler. Prerequisites: 2.5 GPA; grade of C- or better in CS 2810 and 4700. Not available to pre-Computer Science majors. (F)

**CS 5370**  
Advanced Software Engineering  
Advanced software engineering concepts, including the improvement process, requirements acquisition, development process models, object-oriented design, and software testing. Student cannot receive credit for both CS 5370 and CS 6370. Prerequisites: 2.5 GPA; grade of C- or better in CS 2450. Not available to pre-Computer Science majors. (Sp)

**CS 5400**  
Computer Graphics I  
Introduction to concepts of graphical techniques. Digital and pictorial representation of information. Prerequisites: 2.5 GPA; grade of C- or better in all of the following: CS 2420; MATH 1220; MATH 2250 or 2270. Not available to pre-Computer Science majors. (Sp)

**CS 5450**  
Multimedia Systems*  
Introduction to concepts and techniques underlying multimedia-based systems. Deals with both the hardware aspects of multimedia systems (e.g., transfer rates, capacities, resolution, etc.) and the software requirements of such systems. Each student required to develop a multimedia-based system. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (Sp)

**CS 5460**  
Computer Security I  
Introduction of computer security principles, data protection models, and application techniques. Develops basic skills necessary for protecting systems and communication from a variety of computer security threats. Topics include encryption, policies, access control, network security, OS security, and software security. Prerequisite: CS 2420. (F)

**CS 5500**  
Parallel Algorithms  
Examines basic techniques for designing parallel algorithms, such as balanced trees, pointer jumping, partitioning, pipelining, accelerated cascading, list ranking, and tree contraction. Consideration of classic parallel algorithms in graphs, merging, sorting, planar geometry, string matching, and randomized techniques. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (Sp)

**CS 5560**  
AI: Problem Solving and Expert Systems  
Introduction to practical artificial intelligence methods for building problem solving and expert systems. Covers search, knowledge representation, and reasoning. Students will develop projects in LISP and expert system shells. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (F)

**CS 5650**  
CVPRIP I: Computer Vision, Pattern Recognition, and Image Processing  
Introduction to theories and techniques of machine intelligence, with emphasis on pattern recognition, computer vision, fuzzy logic, and neural networks. Prerequisites: 2.5 GPA; grade of C- or better in all of the following: CS 2420, MATH 2270, STAT 2000 or 3000. Not available to pre-Computer Science majors. (F)

**CS 5660**  
Bioinformatics I  
Introduction to tools and techniques used in the study of bioinformatics, genomics, and computational biology. Explores usage of these tools and techniques for storage, retrieval (mining), processing, visualization, and analysis of biological information. Prerequisite: Permission of instructor. (F)

**CS 5670**  
Bioinformatics II  
Builds on material presented in CS 5660, presenting more advanced topics in bioinformatics, such as data mining, machine learning, and evolutionary algorithms. Students cannot receive credit for both CS 5670 and 6870. Prerequisites: 2.5 GPA; grade of C- or better in CS 5660. Not available to pre-Computer Science majors. (Sp)

**CS 5700**  
Object-Oriented Software Development  
Study of fundamental object-oriented principles, e.g., abstraction, encapsulation, classification, and inheritance. Application of these principles in all phases of software development, with emphasis on analysis, design, and testing. Introduction to software design patterns. Prerequisites: 2.5 GPA; grade of C- or better in CS 2450. Not available to pre-Computer Science majors. (F)

**CS 5800**  
Introduction to Database Systems  
Comparison of various database systems. Normal forms, protection, concurrency, security and integrity, and distributed and object-oriented systems. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420. Not available to pre-Computer Science majors. (F)

**CS 5850**  
Systems Analysis  
Theory and practice of analysis, design, and implementation of information systems. Students will construct an information system. Prerequisites: 2.5 GPA; grade of C- or better in CS 5800. Not available to pre-Computer Science majors. (Sp)

**CS 5890**  
Topics in Computer Science (Topic)  
Current topics in computer science as determined by advances in the field. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420 and permission of instructor. Not available to pre-Computer Science majors. (F,Sp,Su)
Course Descriptions

**CS 5950 Independent Study** 3
Provides for independent study of selected topics. Prerequisites: 2.5 GPA; grade of C- or better in CS 2420 and permission of instructor. Not available to pre-Computer Science majors. (F,Sp,Su)

**CS 6050 Computational Geometry: Algorithms and Applications** 3
Computational geometry is the study of computation involving geometric objects, such as lines, polygons, and circles. It has application in bioinformatics, graphics, robotics, CAD/CAM, etc. This course presents the algorithms, data structures, and techniques of computational geometry. Prerequisite: Permission of instructor. (Sp)

**CS 6100 MultiAgent Systems** 3
MultiAgent systems are composed of multiple interacting computing elements, known as agents. Agents are software systems with two important capabilities: first, autonomous actions; and second, interacting with other agents by engaging in cooperation, coordination, and negotiation. Prerequisites: 3.0 GPA and enrollment in Computer Science master’s or PhD program. (F)

**CS 6200 Distributed System Design** 3
Examines advanced design concepts related to development of distributed software systems. Students learn how to model and evaluate communication protocols and study techniques for time coordination, distributed process synchronization, object replication and migration, and distributed transaction processing. Students also learn about Common Object Request Broker Architecture (CORBA). Prerequisites: 3.0 GPA; grade of B- or better in CS 5200 and enrollment in Computer Science master’s or PhD program. (Sp)

**CS 6220 Concurrent Systems** 3
Explores concurrency in its various forms, emphasizing debugging techniques, development techniques that guarantee correctness, and performance evaluation and tuning. Prerequisite: CS 5200. (F)

**CS 6250 Cooperative Work Experience, Graduate** 1-9
Provides credit for students working at a participating firm under faculty supervision. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)

**CS 6300 Supercompilers for Sequential and Parallel Computers** 3
Analysis and optimization for sequential and parallel computers, including loop restructuring, concurrency analysis, vector analysis, and optimizations for shared and distributed memory computers. Prerequisites: 3.0 GPA; grade of B- or better in CS 5300 and enrollment in Computer Science master’s or PhD program. (Sp)

**CS 6370 Software Engineering with a Project** 3
Advanced software engineering concepts, including the improvement process, requirements acquisition, development process models, object-oriented design, and software testing. Students will work in teams, developing significant software products. Student cannot receive credit for both CS 5370 and CS 6370. Prerequisites: 3.0 GPA, grade of B- or better in CS 2450 and enrollment in Computer Science master’s or PhD program. (Sp)

**CS 6400 Computer Graphics II** 3
Study of computer rendering of three-dimensional objects. Object representation, hidden surface removal, and shading. Ray tracing of synthetic scenes using mathematically defined surfaces. Prerequisites: 3.0 GPA; grade of B- or better in CS 5400 and enrollment in Computer Science master’s or PhD program. (F)

**CS 6460 Computer Security II** 3
Maintaining the integrity and security of computer systems is critical. Course explores aspects of system vulnerabilities and protection, attack categories and methodologies, the development of secure computer systems, etc. Prerequisite: CS 5460 or permission of instructor. (Sp)

**CS 6500 Advances in Parallel Systems** 3
Survey of current advances in parallel processing and concurrent systems. Review of current scientific literature to understand current issues, problems, and progress in advanced topics of parallel processing. Students read, summarize, report, and discuss up-to-date scientific papers in the field. Prerequisites: 3.0 GPA; grade of B- or better in CS 5500 and enrollment in Computer Science master’s or PhD program. (F)

**CS 6550 Parallel Computing Systems** 3
Design of large-scale parallel systems. Explores machine organizations SIMD and/or MIMD modes of parallelism, emphasizing interconnection patterns among processors. Discussion of low-level parallel processing algorithms. Presents case studies of existing and proposed systems. Prerequisites: 3.0 GPA; grade of B- or better in CS 5500 and enrollment in Computer Science master’s or PhD program. (F)

**CS 6600 AI: Advanced Intelligent Systems** 3
Investigation of advanced techniques for creating intelligent systems. Covers machine learning, reasoning under uncertainty, decision making, natural language understanding, and advanced knowledge representation. Students develop projects in LISP and expert system shells. Prerequisites: 3.0 GPA; grade of B- or better in CS 5600 and enrollment in Computer Science master’s or PhD program. (Sp)

**CS 6630 Fuzzy Logic and its Application** 3
Introduces students to machine learning and problem solving techniques based on fuzzy logic. Prerequisites: 3.0 GPA; grade of B- or better in CS 2420 and advanced standing, or instructor’s permission; and enrollment in Computer Science master’s or PhD program. (F)

**CS 6650 Neural Networks** 3
Advanced course in theories and techniques of machine intelligence, using neural networks. Emphasizes various neural network paradigms and the types of problems they are best suited to solve. Prerequisite: CS 2420 or permission of instructor. (Sp)

**CS 6655 Evolutionary Computation** 3
In-depth analysis of the foundations of optimization techniques founded on evolutionary computation. Includes evolutionary algorithms, genetic algorithms, genetic programming, etc. Prerequisite: CS 2420 or permission of instructor. (Sp)

**CS 6660 Evolutionary Algorithms** 3
Analyzes the major algorithms associated with evolutionary computation. Emphasizes use of such algorithms for the solution of optimization problems. Presents genetic, swarm, and genetic programming algorithms. Prerequisite: CS 2420 or permission of instructor. (Sp)

**CS 6670 Advanced Bioinformatics** 3
Focuses on the various advanced algorithms and models used in bioinformatics applications. Opportunities and needs for improvement of such algorithms discussed in the context of current and future problems in bioinformatics. Prerequisite: CS 5670. (F)

**CS 6690 AI: Advanced Topics in Artificial Intelligence (Topic)** 3
Advanced course in selected theories and techniques of artificial intelligence. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (Sp)

**CS 6700 Object-Oriented Models, Tools, and Techniques** 3
Study of object-oriented concepts, principles, techniques, development processes, and tools across all areas of software engineering, with special emphasis on current research topics. Prerequisites: 3.0 GPA; grade of B- or better in CS 5700 and enrollment in Computer Science master’s or PhD program. (F)

**CS 6800 Theory of Relational Databases** 3
Graduate-level relational database course covering constraints and normal forms, mathematical models and provable properties, minimality, graphs, and synthesis. Prerequisites: 3.0 GPA; grade of B- or better in CS 5800 and enrollment in Computer Science master’s or PhD program. (Sp)

**CS 6890 Topics in Computer Science (Topic)** 1-4
Current topics in computer science as determined by advances in the field. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)

**CS 6900 Seminar** 1
Series of one-hour seminars on current research topics presented by computer science faculty. Graded Pass/Fail only. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F)

</table>

**Course Descriptions**

- **CS 6950 Directed Readings in Computer Science**: Directed reading on advanced topics in computer science. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)
- **CS 6970 Thesis and Research**: Graduate research in computer science. Graded Pass/Fail only. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)
- **CS 6990 Continuing Graduate Advisement**: Graded Pass/Fail only. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)
- **CS 7100 Advanced MultiAgent Systems**: Advanced topics in multiAgent systems, including algorithms for finding solutions, social welfare with preferences and utilities, multiAgent learning, and distributed search problems. Prerequisites: 3.0 GPA; grade of B- or better in CS 6100 (or permission of instructor) and enrollment in Computer Science master’s or PhD program. (Sp)
- **CS 7350 Patterns in Computer Software Systems**: Investigates patterns in computer software systems and how they can be better cataloged, understood, and reused to improve development productivity and quality. Includes readings of current literature, writing research papers, and participation in group discussions. Prerequisites: 3.0 GPA; grade of B- or better in CS 5700 and enrollment in Computer Science master’s or PhD program. (Sp)
- **CS 7380 Software Testing**: Explores current issues, including testing object-oriented software, test data generation and efficiency, domain-based testing, functional testing, and code-based testing. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F)
- **CS 7460 Advances in Computer Security Research**: Covers recent research directions in computer security. Reviews current state of the field, and explores possible research directions for further work. Prerequisite: CS 6460 or permission of instructor. (F)
- **CS 7500 Fault-Tolerant Systems**: Advanced study of design and implementation of operating systems for fault-tolerant parallel and distributed systems. Topics chosen will provide students with knowledge of current research issues, practices, and techniques for the design and development of such systems. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (Sp)
- **CS 7550 Interconnection Networks for Parallel Computer Systems**: Explores the design of large-scale parallel processing systems generally suited for multi-processor implementation. Emphasizes interconnection patterns among the processing elements in parallel processors. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F)
- **CS 7650 Advanced CVPRP: Computer Vision, Pattern Recognition, and Image Processing**: Investigates new developments in representation and processing of gray-level and color images, including thresholding, segmentation, curve detection, etc. Also examines visual perception, as well as statistical and syntactical pattern classification. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (Sp)
- **CS 7660 Robotics and Autonomous Systems**: Surveys current advances in robotic and autonomous systems. Reviews current scientific literature in the field, with emphasis on understanding the problems solved and the approaches used. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F)
- **CS 7670 Data Mining and Machine Learning**: Covers cutting-edge research in machine learning, data mining, and intelligent information retrieval. Focuses on how these topics relate to data mining. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (Sp)
- **CS 7680 Advanced Computer Vision**: Emphasizes current topics and research in the general area of computer vision. Focuses on detection, recognition, tracking, and analysis of human activity by using computer vision. Prerequisites: 3.0 GPA; grade of B- or better in CS 5650 and enrollment in Computer Science master’s or PhD program. (Sp)
- **CS 7900 Seminar**: Series of lectures and presentations on current topics in computer science. Students participate by giving presentations. As part of the course, students are expected to prepare their dissertation proposal. Graded Pass/Fail only. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (Sp)
- **CS 7910 Special Topics in Intelligent Systems (Topic)**: Discussion of current topics in intelligent systems, such as parallelism and software systems. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. Taught on demand. (F,Sp,Su)
- **CS 7920 Special Topics in Parallelism (Topic)**: Topics of current interest in the area of parallelism. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)
- **CS 7930 Special Topics in Software Systems (Topic)**: Topics of current interest in the area of software systems. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)
- **CS 7935 Topics in Mobile Systems**: Mobile computing devices are now ubiquitous. Computations and communications on such devices require a new computing paradigm and raise issues such as power-awareness, location-awareness, security, reliability, etc. This course explores mobile systems and issues pertaining to reliable operation. Prerequisites: CS 3100, 4700, and 5200; or permission of instructor. (F)
- **CS 7950 Reading and Reports**: Directed reading on cutting-edge topics in computer science. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)
- **CS 7960 Topics in Bioinformatics (Topic)**: Topics of current interest in bioinformatics. Prerequisite: Permission of instructor. (F,Sp,Su)
- **CS 7970 Dissertation Research**: Ph.D. dissertation research. Graded Pass/Fail only. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)
- **CS 7990 Continuing Graduate Advisement**: Continuing Ph.D-level advisement. Graded Pass/Fail only. Prerequisites: 3.0 GPA; permission of instructor and enrollment in Computer Science master’s or PhD program. (F,Sp,Su)

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

This course is taught alternating years. Check with department for information about when course will be taught.

Utah State University 2007-2009 General Catalog 603
Course Descriptions

Dance West Summer, Dance Education (DE)

See Department of Health, Physical Education and Recreation, pages 321-331

DE 1700W Jazz 1
Provides training and experience in the styles of jazz, one of the popular forms of American dance. (Su)

DE 1800W Dance West Performance 1-3
Students will learn dances to be performed in “The West: America’s Odyssey.” Prerequisite: Audition. (Su)

DE 1840W Beginning Classical Ballet 2
A discipline in recognized classic form. Includes barre exercises, port de bras, and center practice in balance, jumping, and turns. (Su)

DE 1870W Beginning Classical Modern Dance 2
Designed to develop coordination, ease, and poise in handling the body. Focuses on dance as an art using the body as a medium of expression. (Su)

DE 2850W Intermediate Classical Ballet 2
Barre exercises, port de bras, and center practice in balance, jumps, beats, and turns with more emphasis on exactness and precision of line. Prerequisite: One year of ballet or permission of instructor. (Su)

DE 2880W Intermediate Classical Modern Dance 2
Stresses alignment of the skeletal structure, freedom and movement of the torso, and technical work enabling the dancer to secure the natural axis of balance. Prerequisite: One year modern dance or permission of instructor. (Su)

DE 3800W Advanced Ballet 3
Pointe and Pas de Deux. Intensified center floor work concentrating on longer adagio and allegro combinations. Prerequisite: Five years of ballet or permission of instructor. (Su)

DE 4500W American Character Ballet 3
History through movement from seventeenth century European dance through contemporary styles. (Su)

© Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Electrical and Computer Engineering (ECE)

See Department of Electrical and Computer Engineering, pages 253-259

ECE 1000 Introduction to Electrical and Computer Engineering 2
Basic concepts and techniques for electrical and computer engineering majors. Introduction to analog and digital electronics with fundamental laboratory skills. One lecture and one lab. Prerequisites: MATH 1050 and 1060, or AP Calculus score of at least 3 on the AB test; or Math ACT score of at least 27. Enrollment limited to electrical engineering and computer engineering majors only. (F)

ECE 2250 Electrical Circuits 4
(Formerly ECE 2410)
Introduction to electrical circuits and basic circuit elements. Circuit theory, analysis techniques, and introduction to design. DC analysis. First-order inductive and capacitive circuits. Operational amplifiers. AC steady-state analysis. Introduction to computer-aided design and analysis. Three lectures, one lab. Corequisite or prerequisite: MATH 2250. (F,Sp)

ECE 2700 Digital Circuits 4
(Formerly ECE 2530)
Design of combinational and sequential logic circuits with discrete and programmable logic devices. Simulations and timing analysis. Use of CAD tools. Design of digital systems. Three lectures, one lab. (F,Sp)

ECE 3260 DSC/QI Science of Sound 3
Applications of principles of acoustics (study of sound) to everyday life. Explores physical acoustics, psychoacoustics, musical acoustics, and architectural acoustics. Uses algebra and reasoning to solve problems in acoustics. (F)

ECE 3410 Microelectronics I 4
Fundamentals of transistors, operational amplifiers, and other integrated circuits, along with their utilization in amplifiers, switches, and other applications. Laboratory work required. Prerequisite: ECE 2250. Prerequisite or corequisite: ECE 3620. (Sp)

ECE 3620 Circuits and Signals 3
Continuation of basic circuit concepts. Second-order response, time-domain analysis of higher-order systems. Impulse response and convolution. Transform domain analysis of circuits and other systems. Some lab and computational work required. Prerequisites: MATH 2250, ECE 2250, CS 1410. Corequisite or prerequisite: PHYS 2220. (F)

ECE 3640 Signals and Systems 3
Systems realizations. Time and transform domain analysis of discrete-time systems. Vector-space concepts and Fourier series. Fourier transforms in continuous and discrete time. Some lab and computational work required. Prerequisite: ECE 3620. (Sp)

ECE 3710 Microcomputer Hardware and Software 4
Synthesis of microcomputer systems, including interfacing, component analysis, strategies, debugging, and programming. Covers architecture basics, including instruction sets, assembly language programming, loading, timing, and interrupts. Includes hands-on implementation. Three lectures, one lab. Prerequisites: ECE 2250, 2700, CS 1410. (F,Sp)

ECE 3720 Microcomputer Systems Programming 3
Advanced assembly language and systems programming concerned with performance and I/O. Study of modern computer architecture issues, such as caching, pipelining, concurrent instruction execution, memory access time, and role and structure of device drivers. Prerequisite: ECE 3710. (Sp)

ECE 3820 CI Design I 2
Students work on an engineering project as part of a multidisciplinary team. Emphasizes engineering design, project management, technical writing, technical presentations, and project documentation. Prerequisite: Professional standing. (Sp)

ECE 3860 Transmission Lines 1
Covers transmission line analysis and high frequency effects, including reflections, standing waves and interference, VSWR, crosstalk, and coupling. Intended to be taken by computer engineers. Meets simultaneously with ECE 3870 during the first five weeks of the semester. Prerequisites: ECE 2250, PHYS 2220, MATH 2290. This course is not currently being offered. For information about when it may be offered, contact the department.

ECE 3870 Electromagnetics I 3
Discussion of Maxwell’s equations, electromagnetic waves, power and energy, reflection and refraction processes, transmission lines, waveguides, and antennas. Explores electrostatic and magnetostatic fields produced by charge and current distributions, as well as electromagnetic forces and materials. Prerequisites: ECE 2250, MATH 2210, 2250, PHYS 2220. (Sp)

ECE 4250 Internship/Co-op 3©
Planned, career-related work experience in industry. Students must register with USU Co-op Office and have program approved by the ECE co-op advisor. Written report required. Prerequisite: Professional standing. (F,Sp,Su)

ECE 4650 Optics I (dual listing 6650) 3
Topics include mathematics of wave motion, electromagnetic theory of light, light propagation, geometrical optics, and superposition of waves. For graduate (6000-level) credit, additional reading, recitation, use of optical-design software, and/or writing will be required. Also taught as PHYS 4650/6650. Prerequisite: ECE 3870. (F)

ECE 4680 Optics II (dual listing 6680) 3
Topics include polarization, interference, diffraction, Fourier optics, coherence theory, and the quantum nature of light. For graduate (6000-level) credit,
Course Descriptions

additional reading, recitation, use of optical-design software, and/or writing will be required. Prerequisite: PHYS/ECE 4650 or PHYS/ECE 6650. Also taught as PHYS 4880/6880. (Sp)

ECE 4740 Computer and Data Communications 3
Systems approach to computer and data communications. Includes transmission lines, hardware controllers, computer interfaces, and protocols relating to local and wide area networks. Prerequisite: ECE 3720. (F)

ECE 4840 CI Design II 3
Individual or team engineering project, including design, development, and testing. Interdisciplinary projects strongly encouraged. Design reviews and written progress reports required. Prerequisite: ECE 3820. (F,Sp,Su)

ECE 4850/CI Design III 2
Individual or team engineering project, including design, development, and testing. Interdisciplinary projects strongly encouraged. Written and oral reports required, describing technical details of design project. Prerequisite or corequisite: ECE 4840. (F,Sp,Su)

ECE 4930 Special Studies for Undergraduates 1-3
Independent or group study of engineering problems not covered in regular course offerings. (F,Sp,Su)

ECE 5230 Spacecraft Systems Engineering 3
Spacecraft communications, telemetry systems, and command and data handling, introduction to astrodynamics and orbit design. Electrical power generation and storage. Spacecraft subsystems (e.g., guidance, navigation, and control). Prerequisite: MATH 2250. (F)

ECE 5240 Space System Design 3
Students in teams perform a space system design involving all aspects, including technical, cost, and schedule. Class is linked to national design competitions and/or current USU spacecraft design projects. Prerequisite: ECE 5230 or MAE 5520. Also taught as MAE 5530. (Sp)

ECE 5310 Control Systems 3
Study of analog and computer controlled systems, classical and modern control system design methods, s-domain and z-domain transfer function models, state space, dynamics of linear systems, and frequency domain analysis and design techniques. Introduction to controllability and observability, and full-state pole placement controller design. Laboratory work required. Prerequisite: ECE 3640. (F)

ECE 5320 Mechatronics 4
Principles, modeling, interfacing, and signal conditioning of motion sensors and actuators. Hardware-in-the-loop simulation and rapid prototyping of real-time closed-loop computer control of electromechanical systems. Modeling, analysis, and identification of discrete-time or sampled-data dynamic systems. Commonly used digital controller design methods. Introduction to nonlinear effects and their compensation in mechatronic systems. Laboratory work and a design project required. Three lectures and one lab. Prerequisite: ECE 5310. (Sp)

ECE 5340 Mobile Robots 4
Hardware, including embedded processors, sensors, DC motors, interface electronics, wheeled platforms, and battery power. Software, including low-level device drivers and mobile rocket simulation. Algorithms, including reactive and planning approaches. Advanced sensors. Mobile robot kinematics, dynamics, and control. A project is required. (F)

ECE 5420 Microelectronics II 3
Design of electronic circuits for applications in instrumentation, communication, control, and power systems. Prerequisite: ECE 3410. (F)

ECE 5430 Applied CMOS Electronics 3
(dual listing 6430)
Analysis, design, and application of digital and analog MOS integrated circuit systems. Includes device-level VLSI, fabrication technology, and semiconductor device physics. Prerequisites: ECE 3410 and 5530. (Sp)

ECE 5460 Digital VLSI System Design I 3
(dual listing 6460)
Team-oriented design of large digital systems using hardware description languages. Schematic capture and standard-cell libraries. Behavioral system modeling and simulation. Preparation of behavioral models for floor-planning, testability, and design synthesis. Extensive use of CAD tools. Design project. Prerequisite: ECE 5530. (Sp)

ECE 5470 Digital VLSI System Design II (dual listing 6470) 3
Continuation of ECE 5460/6460. Logic synthesis, timing analysis, and structural simulation and back annotation. Design refinement to the point of final mask artwork production. Design validation through LVS, DRC, and gate-level or device-level simulation. Formal methods of circuit verification. Extensive use of CAD tools. Design project. Prerequisite: ECE 5460/6460. (F)

ECE 5480 Electromagnetic Compatibility* 3
Introduces concepts and techniques of electromagnetic compatibility to students who will be designing and working with high-speed electronic systems. Prerequisites: ECE 3640, 3870. (Sp)

ECE 5530 Digital System Design 3
Presents modern top-down, bottom-up approach to design of digital systems, emphasizing programmable devices. Extensive use of CAD tools. Designing with ABEL, and introduction to designing with Verilog HDL. Laboratory work required. Prerequisite: ECE 2700. (F,Sp)

ECE 5560 Introduction to Digital Signal Processing 3
Theory and principles of digital signal processing, including discrete-time signals and systems, Z-Transforms, Fourier analysis, FIR and IIR digital filter design, discrete Fourier transforms, and multi-rate processing. Laboratory work required. Prerequisite: ECE 3640. (F)

ECE 5640 Real-Time Processors* 4
Real-time processor architectures and methods used for digital signal processing. Includes C and assembly language programming, modern DSP architectures, tools for real-time system development, and finite word-length effects. Laboratory includes implementation of hardware-based real-time systems. Three lectures, one lab. Prerequisites: ECE 3640 and 3710. (Sp)

ECE 5660 Communication Systems I 3
Explores fundamentals of analog and digital communication systems. Focuses on modulation, demodulation, detection, and synchronization. Prerequisites: ECE 3640 and MATH 5710; or graduate standing. (Sp)

ECE 5740 Concurrent Programming 3
Analysis of problems associated with the use of multiple threads and processes (e.g., deadlock, livelock, and starvation) and methods for avoiding them. Proper usage of synchronization operations (mutual exclusion, critical sections, semaphores, and monitors) and communication operations (message passing, remote procedure calls, remote method invocation, and rendezvous). Extensive programming exercises in C and JAVA. (F)

ECE 5750 High-Performance Microprocessor Architecture 3
Modern architecture fundamentals, instruction set analysis and design, pipelined and superscalar architectures, software-hardware interaction, memory hierarchy, and virtual memory stresses processor-specific low-level code optimization. Prerequisite: ECE 3710 or equivalent. (Sp)

ECE 5770 Microcomputer Interfacing 4
Design of hardware and software interfaces to microcomputers for instrumentation and control applications. Three lectures, one lab. Prerequisite: ECE 3710. (Sp)

ECE 5780 Real-Time Systems 4
Real-time system design and implementation of basic concepts, including interrupts and controllers, context switch, concurrent processes, semaphores, message passing, rate monotonic and deadline scheduling, hardware system design and test issues, and typical engineering practice. Includes hands-on implementation. Three lectures, one lab. (F)

ECE 5800 Electromagnetics II 3
General plane wave solution of Maxwell’s equations, potential functions, radiation, 2-D solution to Laplace’s equation, and fundamental electromagnetic theory. Prerequisite: ECE 3870. (F)

ECE 5810 Microwaves I 3
Impedance matching, microwave network analysis, waveguides, nonlinear elements, analysis and design of power dividers, filters, and ferromagnetic circuits. Laboratory work required. Prerequisite: ECE 5660. (Sp)

*This course is taught alternating years. Check with department for information about when course will be taught.

---

**Design and implementation of UNIX and Windows device drivers. Includes hardware/software design tradeoffs in light of modern operating systems. Students implement working device drivers. Prerequisite: ECE 5780.**

**Weekly seminars or colloquia. Students are normally required to enroll for two semesters. Graded Pass/Fail only.**

**Microwave amplifier design for noise, gain, and power match; microwave semiconductor and vacuum-tube devices, microwave oscillators, and microwave system performance characterization. Laboratory work required. Prerequisite: ECE 5810 or equivalent.**

**Independent or group study in electrical engineering topics, such as automated systems, optics and laser engineering, electro-acoustics, solid-state materials, devices, and intelligent systems engineering. (F,Sp,Su)**

**Graded Pass/Fail only. (F,Sp,Su)**

**Continuing Graduate Advisement. Graded Pass/Fail only. Prerequisite: Permission of Electrical and Computer Engineering Department. (F,Sp,Su)**

**Foundations of detection theory, including Neyman-Pearson, Bayes, and Minimax Bayes detection. Maximum likelihood and Bayes estimation theory. Recursive estimation and Kalman filtering and smoothing. Expectation maximization and hidden Markov models. Prerequisites: ECE 6010, 6030. (Sp)**

**Theory, engineering, and data reduction techniques of spacecraft instrumentation for space science and spacecraft systems. Prerequisite: ECE/PHYS 6240. Also taught as PHYS 7210. (Sp)**

**Methods of nonlinear and adaptive control system design and analysis. Includes qualitative and quantitative theories, graphical methods, frequency domain methods, sliding surface design, linear parameter estimation methods, and direct and indirect adaptive control techniques. Prerequisite: ECE/MAE 6320. Also taught as MAE 7330. (Sp)**

**Intelligent control strategies, including neural network, fuzzy logic, associated memory networks, and rule-based control systems. Prerequisite: ECE/MAE 6320 or instructor approval. Also taught as MAE 7360. (Sp)**

**Advanced methods of control system analysis and design. Operator approaches to optimal control, including LQR, LQG, and L1 optimization techniques. Robust control theory, including QFT, H-infinity, and interval polynomial approaches. Prerequisite: ECE/MAE 6320 or instructor approval. Also taught as MAE 7360. (F)**

**Topics selected from advanced control theory. Taught on demand.**

**Advanced TCP/IP protocols, routing strategies, major applications. Details of Unix systems for advanced use of BSD sockets and TLI/Streams. Prerequisite: ECE 6600. (Sp)**

**Advanced digital processing theory and techniques. Topics include image restoration, image reconstruction from projections (computed tomography), and data compression. Prerequisite: ECE 6620. (F)**

**Advanced digital signal processing theory and methods. Topics include optimal filter design (Wiener and Kalman filters), adaptive filtering, spectral estimation, and beamforming. Prerequisites: ECE 5630, 6010. (F)**

**Topics in advanced signal or image processing. Taught on demand.**

**Examination of codes employed in digital communications, including discussion of error correction codes over finite fields. Reed-Solomon, convolutional, and trellis coding. Advanced coding techniques. Prerequisite: ECE 6010 or 6030. Prerequisite or corequisite: ECE 5860. (Sp)**

**Topics selected from advanced communication theory. Taught on demand.**

**Advanced work on the development of reliable and correct concurrent systems, including those with time constraints. Substantial experience with CASE tools and application development. Prerequisite: ECE 6750. (F)**

**Design and implementation issues concerning distributed control systems. Real-time processing, distributed stability methods, network techniques and standards, system development and management, smart sensors, and control actuators. Survey of current literature. Prerequisite: ECE/MAE 6320. Also taught as MAE 7750. (Sp)**

**Advanced topics in parallel and distributed computing, emphasizing small-scale real-time and embedded systems. Prerequisite: ECE 6750. Taught on demand.**

**Topics in real-time systems, such as scheduling analysis, adaptive scheduling, multiprocessor systems, fault tolerance, etc. Also design and implementation of real-time operating systems. Prerequisite: ECE 6750. Taught on demand.**

**Topics include: apertures, reflectors and lens, finite and infinite arrays, broadband antennas, Fresnel Fraunhofer regions, and Huygens' principle. Concepts for synthetic aperture radar and radar cross section. Prerequisites: ECE 5800 and 5850. (Sp)**

**Topics selected from advanced numerical methods including: finite element, finite difference, and mement method for solving differential and integral equations of electromagnetic radiation and scattering problems. Programming in C/C++ or MatLab required. Prerequisite: ECE 5800. (Sp)**

**Topics selected from advanced electromagnetics, microwave, and radar fields. Taught on demand.**

**Independent or group study in electrical engineering topics, such as automated systems, laser engineering, electroacoustics, solid-state materials, devices, and intelligent systems engineering. (F,Sp,Su)**

**Permission of Electrical and Computer Engineering Department. Graded Pass/Fail only. (F,Sp,Su)**

**Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.**
Course Descriptions

Economics (ECON)

See Department of Economics, pages 240-250

ECON 1500 BAI Introduction to Economic Institutions, History, and Principles 3
Designed to build an understanding of economic institutions, history, and principles. Relationship between private and public sectors of U.S. economy. Analysis of major economic institutions, such as property rights, markets, business organizations, labor unions, money and banking, trade, and taxation. No prerequisites. (F,Sp)

ECON 2010 BSS Introduction to Microeconomics 3
Designed to build an understanding of the economics of the marketplace from the perspectives of individual consumer and producer or business. Development and application of microeconomic principles to demonstrate the role and limitations of competitive markets in motivating socially efficient consumer, business, and public sector choices. Prerequisite: ECON 1500. (F,Sp,Su)

ECON 3030 DSS Introduction to Agribusiness Marketing 3
Principles and practices used by agribusiness firms to market products. Topics covered include the use of futures markets, international trade, marketing orders, and commodity marketing problems. Prerequisite: ECON 1500. (F)

ECON 3050 DSS Introduction to Agribusiness Management 3
Application of principles and practices used by managers of agribusiness firms. Prerequisites: ECON 1500, ACCT 2010. (F,Sp,Su)

ECON 3170 Law and Economics 3
Explains legal and political rules, the organization of government, and other institutional processes. Uses standard microeconomic tools and concepts, such as scarcity, choice, preferences, incentives, and supply and demand. Prerequisite: POLS 1100. Also taught as POLS 3170. (F)

ECON 3400 DSS International Economics for Business 3
Primary issues in international economics as applied to contemporary business problems. Topics include trade patterns and policies, capital markets, and technology transfer. Prerequisite: ECON 2010. (F,Sp,Su)

ECON 3900 Independent Reading and Research 1-3 (F,Sp,Su)

ECON 4010 DSS Managerial Economics 3
Microeconomic principles applied to economic decision-making and policy formulation, with emphasis at the level of business firm and the individual consumer. Designed for undergraduate business and accounting majors. Credit will not be given for both ECON 4010 and 5010. Prerequisites: ECON 1500 or 2010, MATH 1100; STAT 2300. (F,Sp)

ECON 4020 Macroeconomics for Managers 3
Macroeconomic analysis applied to forecasting and understanding fluctuations in the levels of income, employment, and production. Designed for undergraduate business and accounting majors. Credit will not be given for both ECON 4020 and 5000. Prerequisite: ECON 1500. (F,Sp)

ECON 4030 CI Agribusiness Finance 3
Financial considerations in organizing and operating farms, ranches, and agribusiness firms. Prerequisites: ECON 2010, or ECON 3030 and 3050; ACCT 2010. (F)

ECON 4310 QI Mathematical Methods for Economics (dual listing 5310) 3
Review of single-variable calculus (differentiation and integration); multivariable calculus (including the chain rule and implicit differentiation); optimization (unconstrained and constrained); linear algebra and applications (including linear programming). Economic applications. Prerequisites: ECON 2010; MATH 1100 or its equivalent. (F)

ECON 4950H Senior Honors Thesis/Project 3
Creative project that will then be written up, and presented, as a Senior Thesis as required for an Honors Plan. (Sp)

ECON 4990 Senior Seminar 1-3
Introduces students to current research and special topics in economics. (F,Sp)

ECON 5000 Macroeconomics 3
Analysis of underlying causes of unemployment, economic instability, inflation, and economic growth. Credit will not be given for both ECON 4020 and 5000. Prerequisites: ECON 1500, MATH 1100, and STAT 2300. (F)

ECON 5010 Microeconomics 3
Analysis of behavior of consumers and business firms. Application of theory to the solution of real world problems. Credit will not be given for both ECON 4010 and 5010. Prerequisites: ECON 2010, MATH 1100, and STAT 2300. (Sp)

ECON 5020 CI Economics and Public Policy 3
A study of selected federal policies and their impacts on product and factor markets, with major focus on an economic analysis of public policy actions. Prerequisites: ECON 4020 or 5000, ECON 4010 or 5010. (Sp)

ECON 5030 Agricultural Marketing and Price Analysis 3
Agribusiness market strategies and price analysis. Designed for upper-division students. Prerequisite: ECON 4010 or 5010. (F)

ECON 5050 Farm and Ranch Planning and Analysis 3
Economic principles and tools in operation of farm and ranch enterprises. Designed for upper-division students. Prerequisites: ECON 4010 or 5010; and ECON 4030. (Sp)

ECON 5100 History of Economic Thought 3
Origin and development of economic theories of leading thinkers in western civilization. Prerequisite: ECON 2010. (Sp)

ECON 5110 DSS Economic History of the United States 3
Development of the economics of Russia and Eastern Europe from earliest times to the present, emphasizing the interaction between economic forces and policies of the state. Prerequisite: ECON 2010. Also taught as POLS 5120. (F)

ECON 5120 Economics of Russia and Eastern Europe, 9th Century to 21st Century 3
Development of the economics of Russia and Eastern Europe from earliest times to the present, emphasizing the interaction between economic forces and policies of the state. Prerequisite: ECON 2010. Also taught as POLS 5120. (F)

ECON 5150 DSS Comparative Economic Systems 3
History, economic theories, and comparative policies of communist, socialist, and capitalistic economies. Problems facing transition economies. Prerequisite: ECON 2010. (Sp)

ECON 5300 Industrial Organization—Game Theory 3
Emphasizes market structure, firm conduct, and economic efficiency. Topics include competition, game theory, monopoly, oligopoly, monopolistic competition, firm strategies, and anti-trust policy in the United States. Prerequisites: ECON 4020 or 5000, ECON 4010 or 5010. (F)

ECON 5310 QI Mathematical Methods for Economics (dual listing 4310) 3
Review of single-variable calculus (differentiation and integration); multivariable calculus (including the chain rule and implicit differentiation); optimization (unconstrained and constrained); linear algebra and applications (including linear programming). Economic applications. Prerequisites: ECON 2010; MATH 1100 or its equivalent. (F)

ECON 5330 QI Applied Econometrics 3
Introduction to basic statistics, simple linear regression, multiple regression, and simultaneous equation models for economics. Prerequisites: STAT 2000 or 2300 or 3000. (Sp)

ECON 5350 CI Agribusiness, Cooperatives, and Management 3
Applications of economic and management principles to farm marketing and supply firms. Includes independent work on a set of case studies designed to enhance understanding of current issues in agribusiness and provide practice in solving everyday management problems. Prerequisites: ECON 3050, ECON 4010 or 5010, ECON 4020 or 5000. (Sp)

ECON 5400 International and Development Economics 3
Intermediate-level issues in international trade, international finance, and economic development. Topics include competitive and noncompetitive trade models, trade policy, balance of payments accounting, exchange rates, international lending and investment, economic growth, and poverty alleviation. Prerequisites: ECON 4020 or 5000; ECON 4010 or 5010. (F)
Course Descriptions

ECON 5500  Public Finance  3
Government fiscal institutions-expenditure programs, budget procedures, tax systems, debt issues, levels of government, and the issues surrounding their operations. Prerequisites: ECON 4020 or 5000, ECON 4010 or 5010. (F)

ECON 5560  Natural Resource and Environmental Economics  3
Economics of developing, managing, and conserving natural resources and the environment. Topics include resource use and conservation, environmental quality, public and private resource management, and valuation of nonmarket goods. Prerequisite: ECON 1550 or 2010. (Sp)

ECON 5600  Financial Economics  3
Introduction to development of our present system of money, banking, and financial institutions. Analysis of central bank policy, capital markets, speculative markets, and portfolio theory. Prerequisites: ECON 4020 or 5000, ECON 4010 or 5010. (Sp)

ECON 5660  Training and Organizational Development  2
Theoretical basis for training and development in organizations. Practical experience in the design and development of training and other educational programs in an organizational setting. Prerequisite: ECON 2010. (Sp)

ECON 5680  Labor Economics  3
Labor force development and behavior, occupational choice and mobility, human capital formation, labor market information and institutions, and manpower policies. Prerequisite: ECON 2010. (Sp)

ECON 5850  Economic Development*  3
Building on microeconomic theory, models for regional and urban structure and change are explored. Policy decision models are also developed. Prerequisites: ECON 4020 or 5000, ECON 4010 or 5010. (F)

ECON 5950 CI  Senior Project  3
A current economic problem is identified and analyzed, bringing together other agricultural economics and economics course concepts and methods. (Sp)

ECON 6000  Macroeconomic Theory I (dual listing 7230)  3
Lays a foundation of advanced macroeconomic analysis, integrating theory, data, and computational methods. Special attention given to real-world issues, with an emphasis on how economists use macro models and data to improve business and public policy decisions. Topics covered include neoclassical and endogenous growth theories, real business cycle and new Keynesian theories of economic fluctuations, monetary theory, macroeconomic policy, and open-economy macroeconomics. (F)

ECON 6030  Agricultural Marketing  3
Covers a variety of topics relating to price analysis for agricultural commodities. Explores econometric and time series modeling and forecasting of agricultural prices. Includes a section on futures and options on futures contracts, focusing on fundamental and technical analysis. Prerequisite: ECON 6330. (F)

ECON 6040  Agricultural Production/Policy  3
Includes analysis of marketing margins and a section on food demand and nutrition. Also explores food safety issues. Prerequisite: ECON 6030. (F)

ECON 6050  Fundamentals of Economics  3
Introduction of economic principles for students entering a master's degree in the College of Business. Graded Pass/Fail only. Prerequisite: Acceptance into a College of Business master’s degree program. (Su)

ECON 6060  Research Methods  2
(dual listing 7060)
Provides introduction to application of scientific methods in economics, with an emphasis on proposal writing. (Sp)

ECON 6100  Microeconomic Theory I  3
Provides a rigorous introduction to graduate-level microeconomic theory. While the specific focus is on the theoretical construct of graduate-level microeconomic models, the broad objective of the class is to lay the foundation for empirical applications in microeconomics. To meet this broad objective, the course covers theory of the firm, consumer theory, market structure, theory of public goods and externalities, and welfare economics. (F)

ECON 6250  Graduate Internship  1-3
Prerequisites: ECON 6000, 6100, 6330. (F,Sp,Su)

ECON 6300  Quantitative Analysis for Business and Policy Decisions  3
Provides an introduction to applied mathematical programming, operations research, simulation, risk analysis, adaptive management, and other decision theoretic tools used by government policy makers and managers of firms. (Sp)

ECON 6330  Applied Econometrics  3
Provides graduate-level introduction to applied regression tools, including: simple and multiple regression analysis; linear, nonlinear, and qualitative dependent variable models; distributed lags; seemingly unrelated regression; and model specification and validation tests. Prerequisite: Background in statistics and calculus. (F)

ECON 6500  Introduction to Natural Resource Economics  3
Introduction to the legal and regulatory foundations of natural resource policy, with specific attention to water, minerals, rangelands, forests, fish, and off-site impacts of agricultural and industrial production. Topics include externalities, property rights, public goods, public choice, and public trust. Prerequisite: ECON 4010 or 5010 or 5560. (Sp)

ECON 6510  Introduction to Environmental Economics  3
Introduction to the foundations of environmental economics. Adaptation of market mechanisms to ameliorate pollution problems and provide amenity services. Methods for determining the value of nonmarketed goods and services. Topics include economic principles regarding social choice and market exchange, as well as current and historical issues involving pollution, environmental regulation, and the effects of environmental regulation on the profitability of private and public entities. Prerequisite: ECON 4010 or 5010 or 5560 or 6500. (F)

ECON 6520  Practicum in Environmental and Natural Resource Economics  3
Introduction to the application of regional economic models, cost-benefit analysis, and the valuation of amenity and other nonpecuniary resource services for Regulatory Impact Reviews, Environmental Impact Statements, etc. Prerequisite: ECON 5560 or 6500 or 6510. (F)

ECON 6700  Regional and Community Economic Development  3
Extension of microeconomic foundations of regional and urban economics to recent advances in economic growth and development, economic structure, land-use, public finance, housing, social welfare, environmental quality, and transportation. Prerequisite: ECON 6100. (Sp)

ECON 6710  Community Planning and Impact Analysis  3
Focuses on tools used by local and regional economic development specialists as they relate to planning and impact assessment. Specific topics will include I/O models, IMPLAN models, and computable CGE modeling approaches as they are used in a planning environment. Prerequisite: ECON 6700. (F)

ECON 6900  Readings and Conference  1-3
Directed readings. Credits from this course toward any economics graduate degree require approval of the student’s advisory committee, the department graduate committee, and the department head. Prerequisites: ECON 5000 and 5010. (F,Sp,Su)

ECON 6910  Independent Research  1-3
Directed readings. Credits from this course toward any economics graduate degree require approval of the student’s advisory committee, the department graduate committee, and the department head. Prerequisites: ECON 5000 and 5010. (F,Sp,Su)

ECON 6970  Thesis Research  1-9
Master’s level research. Graded Pass/Fail only. (F,Sp,Su)

ECON 6990  Continuing Graduate Advisement  1-9
Master’s level advisement. Graded Pass/Fail only. (F,Sp,Su)

ECON 7060  Research Methods  2
(dual listing 6060)
Provides introduction to application of scientific methods in economics, with an emphasis on proposal writing. (Sp)
## Course Descriptions

**ECON 7130** Microeconomic Theory I  
Provides a rigorous introduction to graduate-level microeconomic theory. While the specific focus is on the theoretical construct of graduate-level microeconomic models, the broad objective of the class is to lay the foundation for empirical applications in microeconomics. To meet this broad objective, the course covers theory of the firm, consumer theory, market structure, theory of public goods and externalities, and welfare economics. (F)

**ECON 7140** Microeconomic Theory II  
Extends the theoretical foundations of microeconomics with an emphasis on model building in economics. Topics include static games of complete and incomplete information, dynamic games of complete and incomplete information, imperfectly competitive markets, risk and uncertainty, public goods, general equilibrium, and information economics. Prerequisites: ECON 7130, 7360. (Sp)

**ECON 7150** Microeconomic Theory III  
Explores the uses of microeconomic theory in fields such as Game Theory, Industrial Organization, and Labor Economics. Study of topics such as multi-stage and repeated games, bargaining, principal-agent models of economic behavior, auctions and bidding, labor market discrimination, price discrimination and two-part tariffs, and the labor-leisure choice. Course is based on both classic and contemporary papers in each of these fields. Prerequisite: ECON 7140. (F)

**ECON 7230** Macroeconomic Theory I (dual listing 6000)  
Lays a foundation for advanced macroeconomic analysis, integrating theory, data, and computational methods. Special attention given to real-world issues, with an emphasis on how economists use macro models and data to improve business and public policy decisions. Topics covered include classical and endogenous growth theories, the business cycle and business cycle models, Keynesian theories of economic fluctuations, monetary theory, macroeconomic policy, and open-economy macroeconomics. (F)

**ECON 7240** Macroeconomic Theory II  
 Extends the foundations of ECON 7230 with a more in-depth look at the theory and computational aspects of various models of economic growth and business cycles. Prerequisites: ECON 7230, 7360. (Sp)

**ECON 7250** Macroeconomic Theory III  
Focuses on emerging topics in macroeconomics, relying heavily on skills acquired in ECON 7230 and 7240. Topics to be covered include, but are not limited to, endogenous growth, real and monetary business cycle, capital theory, fiscal and monetary policy, and economic transition. Prerequisite: ECON 7240. (F)

**ECON 7310** Econometrics I  
 Begins with a review of probability and statistics. Remainder of course is spent discussing the Classical linear regression model, least squares and maximum likelihood estimation, finite and asymptotic sample properties, inference, prediction, and nonlinear optimization. Prerequisite: ECON 7360. (Sp)

**ECON 7320** Econometrics II  
 Extends ECON 7310, covering topics such as nonparametric disturbances, panel data, simultaneous equations, time series and distributed lag models, and limited and qualitative dependent variable models. Prerequisite: ECON 7310. (F)

**ECON 7330** Econometrics III  
 Provides in-depth coverage of current topics/techniques in applied econometric time series analysis, with an emphasis on econometric model development, estimation, and interpretation. Topics include difference equations, lag operators, stationary ARMA processes, modeling economic time series including trends and volatility, testing for trends and unit roots, vector autoregressions, the Kalman filter including the state space representation of a dynamic system, cointegration, and error-correction models. Prerequisite: ECON 7320. (Sp)

**ECON 7350** Mathematical Economics I  
 Includes linear equations, matrix algebra, multivariate calculus, static optimization, comparative static analysis, constrained optimization, and Kuhn-Tucker conditions. (F)

**ECON 7360** Mathematical Economics II  
 Extends the presentation of ECON 7350 by covering applications of constrained optimization, the envelope theorem and applications, differential equations, dynamic economics, and optimal control. Prerequisite: ECON 7350. (F)

**ECON 7400** International Trade Theory and Policy I  
 Focuses on recent developments in the theory of trade and trade policy, including: (1) the incorporation of imperfect competition into the theory of international trade, (2) international factor movements, (3) the empirical investigation of trade flows, and (4) strategic trade policies. Prerequisites: ECON 7140, 7240. (Sp)

**ECON 7410** International Trade Theory and Policy II  
 Focuses on the international monetary system and currency markets, with an emphasis on balance of payment adjustment and exchange rate determination. Different exchange rate regimes are introduced, and issues regarding exchange rate overshooting and currency substitution are addressed. Topics covered also include the international banking system, international investment decisions on funding and capital structure, foreign exchange risk hedging and management, and foreign exchange instruments and techniques. Prerequisites: ECON 7130, 7230, 7360. (F)

**ECON 7500** Resource Economics  
 Focuses on formal economic models associated with optimal exploitation of renewable and nonrenewable resources. Applications to minerals, groundwater, energy resources, soil, forests, fisheries, rangelands, watersheds, wildlife, etc. Prerequisites: ECON 7140, 7240. (F)

**ECON 7510** Environmental Economics  
 Covers the theory of environmental policy. Topics include, but are not limited to, externalities, uncertainty and the choice of policy instruments, market imperfections and the number of participants, nonconvexities in the production set, the charges and standards approach, marketable emission permits, the environment and development, international environmental issues, and ecological economics. Prerequisite: ECON 7500. (Sp)

**ECON 7600** Development Economics  
 Focuses on a broad introduction to formalized economic models associated with developing regions/countries and theories of growth. Examines the interconnection between development and economic inequality, poverty and undernutrition, population growth, rural-urban migration, and agricultural development theories. Prerequisites: ECON 7140, 7240. (F)

**ECON 7900** Continuing Graduate Advisement  
 PhD-level advisement. Graded Pass/Fail only. (F,Sp,Su)

**ECON 7990** Continuing Graduate Advisement  
 PhD-level advisement. Graded Pass/Fail only. (F,Sp,Su)

**EDUC 6010** Introduction to Program Evaluation: Evaluation Models and Practical Guidelines  
 Alternative approaches and practical guidelines for conducting evaluation studies. Through case studies and simulations, addresses impact of social, political, and ethical issues on evaluation. Also taught as PSY 6010. (F,Sp)

---

**Education and Human Services (EDUC)**

_See College of Education and Human Services, pages 116-119_

**EDUC 5000H** Senior Honors Seminar  
 For students in the College of Education and Human Services to explore an honors interdisciplinary theme selected by the Honors Committee as a culmination of an honors experience. (Sp)

**EDUC 5560** Special Topics  
 May be graded Pass/Fail, as determined by instructor or section. (F,Sp,Su)

**EDUC 6010** Introduction to Program Evaluation: Evaluation Models and Practical Guidelines  
 Alternative approaches and practical guidelines for conducting evaluation studies. Through case studies and simulations, addresses impact of social, political, and ethical issues on evaluation. Also taught as PSY 6010. (F,Sp)

**Eden, Utah State University 2007-2009 General Catalog**
### Course Descriptions

**EDUC 7310**  Teaching-Learning Foundations in Education  
Seminar in which learning theories and teaching models/skills are demonstrated, critically examined, and integrated. Prerequisite: Graduate course in educational psychology or equivalent. (Sp)

**EDUC 7320**  Instructional Leadership*  
Emphasizes application of theory, research, and effective practice to instructional and curricular improvement. Examines educational change.

**EDUC 7610**  Research Design and Analysis II  
Advanced treatment of research design and statistical concepts and issues in educational, human services, and psychological research. Prerequisite: EDUC/PSY 6600. Also taught as PSY 7610. (F,Sp,Su)

**EDUC 7650**  Longitudinal Research Design and Analysis*  
Applied longitudinal study design and analysis for research in behavioral and educational sciences. Explores case-control, cohort, cross-over, complex sample, and randomized controlled trial designs. Examines analytical methods for observed outcomes of various distributions (e.g., Gaussian, Binomial, Poisson). Prerequisite: EDUC/PSY 7610. Also taught as PSY 7650. (Sp)

**EDUC 7670**  Literature Reviews in Education and Psychology  
Advanced concepts in designing, writing, and critiquing literature reviews. Prerequisites: EDUC/PSY 6600 or consent of instructor. Also taught as PSY 7670. (Sp, Su)

**EDUC 7700**  Single-Subject Research (dual listing 6700) Methods and Designs  
Examines single-subject research methodology for applied research in schools, including measurement, design, and analysis issues. Also taught as SPED 7700/6700. (F)

**EDUC 7780**  Qualitative Methods II (dual listing 6780)  
Builds on and applies concepts covered in EDUC 6770, emphasizing analysis of data, critique of qualitative research, and design and implementation of qualitative research. Students registered for 6780 conduct a qualitative research project. Prerequisite: EDUC 6770. (Sp)

**EDUC 7970**  Dissertation Research  
Dissertation research for students in the Research and Evaluation specialization. Graded Pass/Fail only. (F,Sp,Su)

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

This course is taught during alternate years. For information about when it will be taught, contact the College of Education and Human Services.

### Elementary Education (ELED)

See Department of Elementary Education, pages 260-272

**ELED 1010**  Orientation to Elementary Education  
(formally ELED 1000)  
Level I. Students assess themselves as prospective teachers. Students will also have an opportunity to do observations in the public schools (grades K-8) and complete volunteer service in other community educational settings. (F,Sp,Su)

**ELED 3000 CI**  Foundation Studies and Practicum in Teaching and Classroom Management Level II  
Introduction to historical, philosophical, and social factors shaping contemporary educational practice in kindergarten, elementary, and middle school. Through these factors, students investigate various aspects of teaching and classroom management. Extensive practicum included. (F,Sp)

**ELED 3005**  Beginning Classroom Management  
Explores essential principles of classroom motivation and management. Focuses on understanding a learning environment where children work well independently and collaboratively. Prerequisite: Admission to Level II of the SODIA teacher education program. (F,Sp)

**ELED 3010**  Practicum Remediation Level II  
2-4  
Students work to develop defensible teaching ideas and to translate these ideas into practical experiences in elementary classroom settings. Specific arrangements for scheduling, placement with a cooperating teacher, and course requirements are handled by professors from the program level recommending remediation and the Elementary Education Advising Office. Graded Pass/Fail only. (F,Sp)

**ELED 3100**  Classroom Reading Instruction  
3  
Introduction to classroom reading instruction. Initial topics include the components of reading and organizing for reading instruction. Foci on how to teach the core components of phonemic awareness, phonics, fluency, vocabulary, and comprehension as identified in the Utah Language Arts Core Curriculum (2003) and the National Reading Panel (2000). Students will teach these components in hands-on practicum experiences. Prerequisite: Admission to teacher education. (F,Sp,Su)

**ELED 4000**  Teaching Science and Practicum Level III  
3  
Investigation and practical application of science programs, materials, and techniques of instruction for the teaching of science. Prerequisites: Admission to teacher education; completion of Level II and BIOL 1010 with a lab, or USU 1350; PHYX 1200 and GEOL 1100 or their equivalents. (F,Sp, Su)

**ELED 4005**  Intermediate Classroom Management  
1  
Explores essential principles of classroom motivation and management. Focuses on facilitating a learning environment where children work well independently and collaboratively, are self-governing, and make socially appropriate decisions. Prerequisite: Admission to Level III of the SODIA teacher education program. (F,Sp, Su)

**ELED 4010**  Practicum Remediation Level III  
2-4  
Students work to develop defensible teaching ideas and to translate these ideas into practical experiences in elementary classroom settings. Specific arrangements for scheduling, placement with a cooperating teacher, and course requirements are handled by professors from the program level recommending remediation and the Elementary Education Advising Office. Graded Pass/Fail only. (F,Sp)

**ELED 4030 CI**  Teaching Language Arts and Practicum Level III  
3  
Study of language development in children and its implications and application in a practicum setting. Content development, instructional methods, and assessment in the areas of writing and spelling. Prerequisite: Admission to teacher education. (F,Sp, Su)

**ELED 4040 CI**  Assessment and Instruction for Struggling Readers  
3  
Prepares undergraduate students to use data from a variety of reading assessments to identify elementary students’ reading strengths and weaknesses and plan instruction. Special attention given to providing explicit differentiated reading instruction to meet the needs of students who struggle with learning to read. Prerequisite: Admission to teacher education, ELED 3100. (F,Sp, Su)

**ELED 4050**  Teaching Social Studies and Practicum Level III  
3  
Students develop necessary knowledge and skills to plan and implement an appropriate social studies program consistent with the nature of the child and our democratic society. Includes practicum work. Prerequisite: Admission to teacher education. (F, Sp, Su)

**ELED 4060**  Teaching Mathematics and Practicum Level III  
3  
Relevant mathematics instruction in the elementary and middle-level curriculum; methods of instruction, evaluation, remediation, and enrichment. Prerequisite: Admission to teacher education. (F, Sp, Su)

**ELED 4250**  Advanced Cooperative Work Experience  
1-8  
Advanced or middle level career-related experience designed to integrate classroom study with practical work experience. Students must work a minimum of 50 hours per credit hour. Graded Pass/Fail only. (F,Sp, Su)

**ELED 4410**  Gifted Education in the Regular Classroom  
3  
Introduction to characteristics of gifted learners. Exploration of strategies for challenging gifted learners in regular classroom settings. (F)

Explores one model for the teaching of creative and critical thinking embedded in regular curricula. Includes practical application requirements. Also taught as SCED 4420. (Su)

Study of early childhood (K-3) curriculum, methodology, and learning environments. (F,Sp)

Focuses on characteristics of young adolescents and how middle level schools can be organized to meet those characteristics through interdisciplinary learning, advisory programs, and exploratory mini-courses. Taught fall of odd-numbered years. Also taught as SCED 4600/6600. (F)

Integrates current approaches to curriculum design with instructional models and assessment of learning appropriate for grades 5-9. Taught spring of even-numbered years. Also taught as SCED 4610/6610. (Sp)

Examines literature related to service learning for the middle grades and application of service learning in curriculum. Also taught as ELED 4620/6620. (Su)

Teaching methods course for elementary teachers seeking a middle-level (Level II) mathematics endorsement. Prerequisites: Satisfactory completion of MATH 1210 and ELED 4600 or an equivalent elementary mathematics methods course. (F)

Provides educators with background and techniques for more effectively addressing the needs of students in a culturally and linguistically diverse society. Diversity topics also include religion, socioeconomic class, ability differences, gender, and sexual orientation. Prerequisite: Admission into a teacher education program. Also taught as SCED 4710. (Sp,Su)

Examines theoretical foundations, functions, and characteristics of first language acquisition and language variation in the Pre-K-12 classroom context. Also emphasizes social context of language in K-12 classroom interaction, instruction, and curriculum. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as SCED 4730/6730. (F)

Explores the processes of second language acquisition, including the influences of linguistic, cognitive, and sociocultural factors, as well as the relationship to first language acquisition. Emphasizes implications for teaching in the K-12 classroom environment. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as SCED 4740/6740. (Sp)

Includes strategies for promoting oral language, reading, and writing for K-12 English language learners. Methods for integration for second language learners into the larger school community. Discussion of parental involvement. Prerequisite: Admission into a teacher education program. Also taught as SCED 4760/6760. (F,Sp)

Focuses on methods which help English language learners in content-area classrooms to increase academic learning and integration into the larger school community. Prerequisite: Admission into a teacher education program. Also taught as SCED 4770/6770. (F,Sp,Su)

Explores principles and techniques for developing, analyzing, and interpreting assessment measures for English language learners, including oral, written, reading, and content-area assessment, as well as assessments used in public schools. Prerequisite: Admission into a teacher education program. Also taught as SCED 4780/6780. (F,Su)

All honors students are required to submit a senior project for graduation from the Honors Program. Students work with a departmental advisor on a topic of their choice. (F,Sp)

An in-depth paper or project culminating in a formal presentation. Required of all students for graduation from the Honors Program in Elementary Education. (F,Sp)

Open topics course focusing upon effective teaching methods, teaching performance, curriculum decision-making, and characteristics of learners. Graded Pass/Fail only. Also taught as SCED 5000/6000. (F,Sp,Su)

Constitutes 6 semester credit hours of student teaching in a kindergarten classroom. Student teachers need to demonstrate competency and professionalism in teaching. An understanding of developmentally appropriate curriculum is necessary. Graded Pass/Fail only. (F,Sp)

Constitutes 6 semester credit hours of student teaching in a primary grade (1-3). Student teachers will demonstrate competency in designing and implementing a developmentally appropriate learning environment. Graded Pass/Fail only. (F,Sp)

Constitutes 6 semester credit hours of student teaching at the upper elementary grade level. Student teachers need to demonstrate competency and professionalism in teaching. Students begin their transition from university student to professional teacher. Graded Pass/Fail only. (F,Sp)

Constitutes 6 semester credits of student teaching at the middle school level. Student teachers need to demonstrate competency and professionalism in teaching. Students begin their transition from university student to professional teacher. Graded Pass/Fail only. (F,Sp)

Designed to provide student teachers/interns with teaching skills and strategies that will assist them in the classroom. Accompanies one of ELED 5050, 5100, 5150, or 5200. Course content is implemented into the student teaching experience. Graded Pass/Fail only. (F,Sp)

Designed to allow students who have completed student teaching to extend their teaching time in a classroom. In order to better prepare for their own classroom, students continue to develop individual teaching skills and competencies. Graded Pass/Fail only. (F,Sp)

Designed to provide student teachers/interns with teaching skills and strategies that will assist them in the classroom. Graded Pass/Fail only. (F,Sp)

Designed to provide student teachers/interns with teaching skills and strategies that will assist them in the classroom. Graded Pass/Fail only. (F,Sp,Su)

## Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ELED 6040</td>
<td>Designing and Interpreting Measurements for Assessing Student Learning</td>
<td>3</td>
<td>Teachers and instructional supervisors develop their talents for (a) designing and interpreting measurements for monitoring students’ learning and (b) interpreting scores from standardized and government-mandated tests. Also taught as SCED 6040. (F,Su)</td>
</tr>
<tr>
<td>ELED 6100</td>
<td>Motivation and Management in Inclusive Settings</td>
<td>3</td>
<td>Leads in-service teachers to develop classroom management strategies for gaining and maintaining students’ cooperation. Also taught as SCED 6100. (Sp,Su)</td>
</tr>
<tr>
<td>ELED 6150</td>
<td>Foundations of Curriculum</td>
<td>3</td>
<td>Examination of theories, principles, and foundations of curriculum, emphasizing program planning and current curriculum trends. Also taught as SCED 6150. (F,Su)</td>
</tr>
<tr>
<td>ELED 6190</td>
<td>Theories of Learning and Models of Teaching</td>
<td>3</td>
<td>Review of epistemological, psychological, and educational theory on learning and the various teaching practices they justify. Also taught as SCED 6190. (F,Su)</td>
</tr>
<tr>
<td>ELED 6200</td>
<td>Curriculum and Issues in Early Childhood Education</td>
<td>2</td>
<td>Examination of current issues and research topics in early childhood education important to the improvement of K-3 programs. (F)</td>
</tr>
<tr>
<td>ELED 6220</td>
<td>Workshop in Early Childhood Education</td>
<td>1-6</td>
<td>Exploration of current topics important in teaching young children. (Su)</td>
</tr>
<tr>
<td>ELED 6230</td>
<td>Literacy Learning in Early Childhood</td>
<td>3</td>
<td>Investigation of early literacy development and effective classroom practices in kindergarten and the primary grades. Relevant research is examined. (F,Su)</td>
</tr>
<tr>
<td>ELED 6240</td>
<td>Workshop in Science Education</td>
<td>1-6</td>
<td>Exploration of current topics in science education. (Su)</td>
</tr>
<tr>
<td>ELED 6250</td>
<td>Graduate Cooperative Work Experience</td>
<td>1-10</td>
<td>Cooperative education work experience at a professional level. Prior approval required. Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>
<tr>
<td>ELED 6260</td>
<td>Supervised Practicum in Early Childhood Education</td>
<td>2</td>
<td>Encompasses approximately 125 hours of supervised practicum in a kindergarten classroom and observations in prekindergarten settings. Participants demonstrate their ability to integrate and apply early childhood theory and research in kindergarten. Graded Pass/Fail only.</td>
</tr>
<tr>
<td>ELED 6300</td>
<td>Workshop in Mathematics Education</td>
<td>1-6</td>
<td>Exploration of current topics and methods in mathematics education. In the past, topics have included: relevant mathematics in rural settings, integration of mathematics and children’s literature, and ethnomathematics. (Su)</td>
</tr>
<tr>
<td>ELED 6310</td>
<td>Content Area Reading and Writing</td>
<td>3</td>
<td>Practical approaches for teaching reading/writing and learning skills to elementary, middle, and high school students in all content areas. Also taught as SCED 6310. (F,Su)</td>
</tr>
<tr>
<td>ELED 6320</td>
<td>Literacy and Cognition</td>
<td>3</td>
<td>Examination of cognitive and sociocultural research related to K-12 students’ acquisition and use of reading, writing, and learning strategies. Explores implications for school policies and classroom instruction. Also taught as SCED 6320/7320. (Sp)</td>
</tr>
<tr>
<td>ELED 6330</td>
<td>Utah Writing Project</td>
<td>1-6</td>
<td>Workshop, seminar, and institute experiences in the Utah Writing Project, focusing on writing process, principles, and research-based strategies for improving writing instruction in grades K-12. Also taught as SCED 6330. (Su)</td>
</tr>
<tr>
<td>ELED 6340</td>
<td>Issues and Trends in Literacy</td>
<td>2</td>
<td>Exploration of current issues and instructional trends in the teaching of reading and writing. Emphasis on reading widely and critically in the professional literature. Prerequisites: ELED 3100, 4040; or teaching experience in elementary or middle school. Also taught as SCED 6340. (F,Su)</td>
</tr>
<tr>
<td>ELED 6350</td>
<td>Reading Assessment and Intervention</td>
<td>3</td>
<td>Covers the correlates and diagnosis of reading problems, as well as methods and materials for remedial reading instruction. Prerequisites: ELED 3100, 4040; or teaching experience in elementary, middle, or secondary school. Also taught as SCED 6350. (Sp)</td>
</tr>
<tr>
<td>ELED 6360</td>
<td>Research in Reading</td>
<td>3</td>
<td>Covers classical, historical, and contemporary research studies in reading, with an emphasis upon understanding and translating findings into classroom practices. Prerequisites: ELED 3100, 4040; or teaching experience in elementary or middle school. Also taught as SCED 6360. (Su)</td>
</tr>
<tr>
<td>ELED 6370</td>
<td>Supervised Internship in Reading and Writing</td>
<td>1-3</td>
<td>Individual practicum experience designed to allow graduate students to implement and focus on one or more aspects of reading and writing instruction in a classroom or clinical setting. Prerequisite: Consent of instructor. Also taught as SCED 6370.</td>
</tr>
<tr>
<td>ELED 6380</td>
<td>Improvement of Language Arts Instruction</td>
<td>3</td>
<td>Exploration of current topics and instructional practices in elementary language arts. Taught spring during one year, and then taught summer during the next year. (Sp,Su)</td>
</tr>
<tr>
<td>ELED 6390</td>
<td>Teaching with Tradebooks in the Elementary and Middle Level Classroom</td>
<td>3</td>
<td>Explores the use of trade books in the elementary and middle level classroom. Focuses on how teachers can use various genres to invite children to read and write. Prerequisites: ELED/SCED 6310 or 6360. Also taught as SCED 6390. (Su)</td>
</tr>
<tr>
<td>ELED 6400</td>
<td>Multiple Talent Approach to Teaching</td>
<td>2</td>
<td>Explores one model for embedding the teaching of creative and critical thinking in regular curricula. Includes practical application requirements. Also taught as SCED 6400. (Su)</td>
</tr>
<tr>
<td>ELED 6420</td>
<td>Education of Gifted and Talented Learners</td>
<td>2</td>
<td>Provides multiple cultural and historical perspectives on giftedness and talent. Explores characteristics of gifted individuals, with emphasis on identifying needs. Provides general overview of possible services for gifted learners. Must be taken concurrently with ELED/SCED 6430. Also taught as SCED 6420. (F)</td>
</tr>
<tr>
<td>ELED 6430</td>
<td>Practicum: Individual Case Study</td>
<td>1</td>
<td>Practicum experience in association with ELED/SCED 6420. Requires intensive supervised study of gifts and talents of individual child of student’s choice. Graded Pass/Fail only. Must be taken concurrently with ELED/SCED 6420. Also taught as SCED 6430. (F)</td>
</tr>
<tr>
<td>ELED 6440</td>
<td>Creativity in Education</td>
<td>2</td>
<td>Exploration of theories, research, and strategies concerning creativity, and their application to personal creativity and to improvement of classroom practice. Also taught as SCED 6440. (Su)</td>
</tr>
<tr>
<td>ELED 6460</td>
<td>Identification and Evaluation in Gifted Education</td>
<td>2</td>
<td>Provides educators with theory and models for identifying students as gifted, creative, and talented. Presents models for evaluation of programs for gifted learners. Explores instruments for use in identification and evaluation. Must be taken concurrently with ELED/SCED 6470. Also taught as SCED 6460. (Sp)</td>
</tr>
<tr>
<td>ELED 6470</td>
<td>Practicum: Team Consultation</td>
<td>1</td>
<td>Practicum experience in association with ELED/SCED 6460. Requires participation, as part of a consultative team, to improve practice in an approved setting for a specific child, classroom, school, school district, or other educational entity. Graded Pass/Fail only. Must be taken concurrently with ELED/SCED 6460. Also taught as SCED 6470. (Sp)</td>
</tr>
<tr>
<td>ELED 6480</td>
<td>Methods and Materials in Gifted Education</td>
<td>2</td>
<td>Explores programming and curriculum models in gifted education, with special attention to the development of instructional materials for use with students. Must be taken concurrently with ELED/SCED 6490. Also taught as SCED 6480. (F)</td>
</tr>
</tbody>
</table>
**ELED 6490** Practicum: Classroom Applications 1
Practicum experience in association with ELED/SCED 6480. Requires application of at least three curriculum, cognitive, or affective models in the student’s current teaching assignment. Graded Pass/Fail only. Must be taken concurrently with ELED/SCED 6480. Also taught as SCED 6490. (F)

**ELED 6500** Interdisciplinary Workshop 1-2°
(F,Sp,Su)

**ELED 6550** Practicum in the Evaluation of Instruction 1-4°
Field-based research study contributing toward graduate degrees. Supervisory licensure related to assessment of ongoing or newly proposed program of instruction. (F, Sp, Su)

**ELED 6560** Practicum in Improvement of Instruction 1-4°
Field-based program focusing upon characteristics of effective teaching methodologies, teaching performance, curriculum decision making, value guidelines, and the characteristics of the learner. (F, Sp, Su)

**ELED 6570** Advanced Comprehension 3
Designed to enhance teachers’ understanding of research and practice related to teaching vocabulary and reading comprehension and fostering motivation for reading. Prerequisite: ELED/SCED 6310 or 6360. Also taught as SCED 6570. (All years)

**ELED 6580** Character and Values Education 2
Overview of research, theory, and practical approaches to values education, emphasizing processes of moral development and socialization. Also taught as SCED 6580. (Su)

**ELED 6590** Supervising School Reading Program 2
Examines strategies for improving school reading programs. Emphasizes simulations, guided practice, and small group discussions. Prerequisites: ELED/SCED 6350 and 6360. Also taught as SCED 6590. (Sp)

**ELED 6600** Philosophy and Organization of the Middle Level School 3
Focuses on characteristics of young adolescents and how middle level schools can be organized to meet those characteristics through interdisciplinary teaming, advisory programs, and exploratory mini-courses. Graduate students have additional course requirements for design and implementation of a project. Taught fall of odd-numbered years. Also taught as SCED 6600/6600. (F)

**ELED 6610** Curriculum, Methods, and Assessment for the Middle Grades 3
Integrates current approaches to curriculum design with instructional models and assessment of learning appropriate for grades 5-9. To receive credit for 6610, graduate students design and implement an action research project related to curricular or pedagogical interests, then share their findings in class. Project will include review of literature related to student’s interest. Prerequisite: ELED/SCED 6600. Taught spring of even-numbered years. Also taught as SCED 6610/6610. (Sp)

**ELED 6620** Service Learning Applications for the Middle Grades 3
Examines literature related to service learning for the middle grades and application of service learning in curriculum. Also taught as SCED 6620/6620. (Su)

**ELED 6630** Methods for Teaching Middle-Level Mathematics 3
Teaching methods course for elementary teachers seeking a middle-level (Level II) mathematics endorsement. Prerequisites: Satisfactory completion of MATH 1210 and ELED 4060 or an equivalent elementary mathematics methods course.

**ELED 6700** Improvement of Science Instruction 3
For practicing elementary and middle-school teachers or those seeking alternative licensure in science education. Survey of current research in science education and strategies for implementing best practice in classroom settings. Considers a Science/Technology/Society approach to teaching science, as well as the use of action research to improve practice. (F)

**ELED 6720** Practicum in Science Instruction 1
Optional practicum to be taken semester following enrollment in ELED 6700. (Sp)

**ELED 6730** Educational Linguistics (dual listing 4730) 3
Examines theoretical foundations, functions, and characteristics of first language acquisition and language variation in the Pre-K-12 classroom context. Also emphasizes social context of language in K-12 classroom interaction, instruction, and curriculum. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as SCED 6730/4730. (F, Su)

**ELED 6740** Second Language Acquisition (dual listing 4740) in the Classroom 3
Explores the processes of second language acquisition, including the influences of linguistic, cognitive, and sociocultural factors, as well as the relationship to first language acquisition. Emphasizes implications for teaching in the K-12 classroom environment. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as SCED 6740/4740. (Sp)

**ELED 6750** Improvement of Mathematics Instruction 2
Examines advanced concepts in curriculum theory and methods of teaching mathematics in the elementary and middle school. Prerequisite: ELED 4060 or teaching experience in elementary or middle school. (Sp)

**ELED 6760** ESOL Instructional Strategies (dual listing 4760) 3
Includes strategies for promoting oral language, reading, and writing for K-12 English language learners. Methods for integration for second language learners into the larger school community. Discussion of parental involvement. Prerequisite: Admission into a teacher education program. Also taught as SCED 6760/6760. (F, Sp, Su)

**ELED 6770** ESOL Instructional Strategies in the Content Areas 3
Focuses on methods which help English language learners in content-area classrooms to increase academic learning and integration into the larger school community. Prerequisite: Admission into a teacher education program. Also taught as SCED 6770/4770. (F, Sp, Su)

**ELED 6780** Assessment for Language Learners (dual listing 4780) 3
Explores principles and techniques for developing, analyzing, and interpreting assessment measures for English language learners, including oral, written, reading, and content-area assessment, as well as assessments used in public schools. Prerequisite: Admission into a teacher education program. Also taught as SCED 6780/4780. (F, Su)

**ELED 6800** Improvement of Social Studies Instruction 3
Emphasizes study of newer concepts in curriculum and methods of instruction for elementary social studies programs. Designed for experienced teachers. Prerequisite: ELED 4050 or teaching experience in elementary or middle school.

**ELED 6840** Workshop: Intermountain Conference on Education of the Gifted and Talented 1-2°
Provides instruction by leading national authorities on gifted and talented education, as well as networking with educators of the gifted from throughout the Intermountain West. Graded Pass/Fail only. Also taught as SCED 6840. (Su)

**ELED 6900** Independent Study 0.5-3°
(F, Sp, Su)

**ELED 6910** Independent Research 0.5-3°
(F, Sp, Su)

**ELED 6940** Supervision and Administration Internship 3
Provides experience in supervision and administration in school systems. (F, Sp, Su)

**ELED 6960** Master’s Creative Project 3°
Provides students with opportunity to design and carry out a creative project closely related to area of teaching specialty. Requires written report. (F, Sp, Su)

### English (ENGL)

See Department of English, pages 278-292

**ENGL 0010** Writing Tutorial 3
Provides additional instruction for students whose score on the ACT is 16 or less, or who are advised into the course on the basis of writing diagnosis given the first day of class in ENGL 1010. Graded Pass/Fail only. Remedial class not carrying USU or transfer credit. (F,Sp,Su)

**ENGL 1010 CL1** Introduction to Writing: Academic Prose 3
Students learn skills and strategies for becoming successful academic readers, writers, and speakers: how to read and write critically, generate and develop ideas, work through multiple drafts, collaborate with peers, present ideas orally, and use computers as writing tools. (F,Sp,Su)

**ENGL 1020** Individualized Writing Instruction 1-3°
For students in Distance Education international programs who need further practice in specific areas of writing. (F,Sp,Su)

**ENGL 1110** English Orientation 1
Introduction to English as a profession. Reviews career opportunities for English majors. (F,Sp)

**ENGL 1120** Elements of Grammar 3°
Introduction to the study of the English sentence. Discussion of punctuation and usage to facilitate editing, as well as clarity and precision in writing. (F,Sp)

**ENGL 1600** American Cultures in Film 3
Introduction to major ethnic groups in America and their treatment in recent feature films. Also taught as HIST 1600. (F)

**ENGL 2010 CL2** Intermediate Writing: Research Writing in a Persuasive Mode 3
Writing of reasoned academic argument supported with appropriately documented sources. Focuses on library and Internet research, evaluating and citing sources, oral presentations based on research, and collaboration. Prerequisites: Completion of 30 credits and fulfillment of Communications Literacy CL1 requirement through coursework or examination. (F,Sp,Su)

**ENGL 2140** British Literary History: Anglo-Saxon to 18th Century 3°
Survey of British literature from the Anglo-Saxon period through the 18th century. (F,Sp)

**ENGL 2150** British Literary History: Romanticism to Present 3
Survey of British literature from Romanticism to the present. (F,Sp)

**ENGL 2160** American Literary History: Colonialism to 1865 3
Survey of American literature from the colonial period to 1865. (F,Sp)

**ENGL 2170** American Literary History: 1865 to Present 3
Survey of American literary history from 1865 to the present. (F,Sp)

**ENGL 2200 BUH** Understanding Literature (formerly ENGL 1030 BUH) 3
Introduction to fiction, drama, and poetry of different periods and cultures. (F,Sp)

**ENGL 2210 BUH** Introduction to Folklore (formerly ENGL 1710 BUH) 3
Introduction to major genres of folklore (folk narrative, custom, folk music and song, vernacular architecture and arts), folk groups (regional, ethnic, occupational, familial), and basic folklore research methods (collecting and archiving). Also taught as ANTH 2210 and HIST 2210. (F,Sp)

**ENGL 2300 BUH** Introduction to Shakespeare (formerly ENGL 2030 BUH) 3
Introduction to comedies, histories, tragedies, and nondramatic poetry for nonmajors. (F)
Course Descriptions

ENGL 2600  Literary Analysis  
(Formerly ENGL 2100)  
Writing-intensive course in literary analysis and research. Introduces English majors to techniques and problems of critical interpretation. (F,Sp)  

ENGL 2630  BHU  Survey of American Culture  
Introduces students to American Studies methodology through a broad selection of American literary, historical, artistic, and cultural works, allowing them to examine the roots of American culture. Focuses on interdisciplinary research. (F,Sp)  

ENGL 2720  Survey of American Folklore*  
Principal ethnic, regional, and occupational folk groups in America. Relations between folklore and American history, literature, and society. Key genres in American folklore (narrative, art, song, etc.) and their role in American culture. Also taught as ANTH 2720 and HIST 2720. (F,Sp)  

ENGL 3020  DHA  Perspectives in Linguistics*  
In-depth study of linguistics for nonmajors. Topics vary according to faculty expertise. (Sp)  

ENGL 3030  DHA  Perspectives in Literature  
In-depth study of literature for nonmajors. Topics vary according to faculty expertise. (F,Sp,Su)  

ENGL 3040  DHA  Perspectives in Writing and Rhetoric**  
In-depth study of rhetoric and writing for nonmajors. Topics vary according to faculty expertise. (F,Sp)  

ENGL 3050  DHA  Masterpieces of World Literature  
In-depth study of masterpieces of world literature from the earliest times to the present. For nonmajors. (F,Sp)  

ENGL 3060  DHA  British and Commonwealth Cultures  
In-depth study of literatures and cultures from the British Isles and the Commonwealth nations. Topics vary according to faculty expertise. Taught alternate years.  

ENGL 3070  DHA  Perspectives in Folklore**  
In-depth study of folklore for nonmajors. Topics vary according to faculty expertise. Also taught as HIST 3070. (F,Su)  

ENGL 3080  CI  Introduction to Technical Communication  
Introduces students to a variety of technical documents and improves their written and oral communication skills. Available to nonmajors as a technical communication service course. Prerequisite: Fulfillment of Communications Literacy CL2 requirement. (F,Sp)  

ENGL 3300  Period Studies in American Literature  
Exploration of single period or movement in literary history of the United States, or a comparative study of a topic during various periods. Periods and topics will vary. (F,Sp)  

ENGL 3310  Period Studies in British Literature  
Exploration of single period or movement in British literary history, or a comparative study of a topic during various periods. Periods and topics will vary. (F,Sp)  

ENGL 3320  Period Studies in World Literature  
Exploration of single period or movement in literary history outside the United States and Great Britain, or a comparative study of a topic during various periods. Periods and topics will vary. (F,Sp)  

ENGL 3330  Literary Theory**  
Covers a range of different critical approaches to literature, helping students to analyze literature from a variety of theoretical perspectives and preparing them for upper-division English major coursework. Prerequisite: ENGL 2600. (F,Sp)  

ENGL 3400  CI  Professional Writing  
Introduces students to workplace writing as a profession, emphasizing transition from writing for academic audiences to writing for readers of workplace documents. Students learn to design and write professional documents for science, industry, business, and/or government. Enrollment limited to English majors only. (F,Sp)  

ENGL 3410  Professional Writing Technology  
Examines technologies of professional writing. Students examine digital environments (computers, LANs, WANs, and the Internet), as well as the software studied while progressing through the Professional and Technical Writing emphasis curriculum. Enrollment limited to English majors only. (F,Sp)  

ENGL 3420  Fiction Writing  
Covers basic elements of writing fiction: form, structure, plot, theme, characterization, dialogue, point of view, and imagery. (F,Sp)  

ENGL 3430  Poetry Writing  
Covers basic elements of writing poetry: language, detail, voice, tone, literal and figurative imagery, rhythm, open and closed form, structure, and theme. (F,Sp)  

ENGL 3440  Creative Nonfiction Writing  
Focuses on the essay as creative nonfiction, emphasizing persona, audience, purpose, tone, and style. Students study difference between fiction and nonfiction. Goal is to write publishable nonfiction. (F,Sp)  

ENGL 3450  Reading Theory for Writers  
Provides thorough understanding of reading from the perspective of writers. Students learn how readers process written texts, how reading assists writing, how readability is measured, and how online texts affect reading. (F,Sp)  

ENGL 3460  Modern Rhetorical Theory  
Teaches students to analyze rhetoric (the art of using language to influence other people) as it operates in a variety of texts. Students learn to define and understand rhetorical situations and to evaluate rhetorical strategies chosen by other writers. (F,Sp)  

ENGL 3510  Young Adult Literature  
Study of a variety of genres written specifically for adolescent audience. Intended for those interested in teaching secondary school English. (F,Sp)  

ENGL 3520  Multicultural American Literature  
Introduction to study of diverse literatures of the United States, including Native American, Asian American, Hispanic/Latino, and African American. (F,Sp)  

ENGL 3530  Children's Literature*  
Study of aesthetic merit of poetry and prose available for children, ages 1-12. Intended for those interested in teaching or writing for children. (Sp)  

ENGL 3540  Native American Studies*  
Multidisciplinary introduction to study of Native Americans, emphasizing folklore, history, anthropology, literature, traditions, and contemporary issues such as the environment. (F,Sp)  

ENGL 3700  CI  Regional Folklore*  
Study of folklore and folklife as they relate to regional cultures. Also taught as HIST 3700. (F,Sp)  

ENGL 3710  CI  Folklore Colloquium  
Issues, problems, and methodologies in folklore study. Focus and instructor variable. Also taught as HIST 3710. (Sp)  

ENGL 4200  Linguistic Structures  
Introduction to linguistic science: phonetics, phonology, morphology, and syntax, especially as relating to English. Exposure to other aspects of linguistic analysis, including language origins and linguistic diversity. (F,Sp,Su)  

ENGL 4210  History of the English Language  
Introduction to linguistic history of English, beginning with its Indo-European roots and continuing through Old English and Middle English to Modern English. Covers sociolinguistic aspects of English use, as well as strict grammatical history. (Sp)  

ENGL 4220  Ethnic Literacy  
Examines the diversity of literacy skills in American ethnic groups and explores appropriate teaching methods. Topics include effects of socio-economic status, child-rearing practices, first and second language acquisition, American dialects, etc. (F,Sp)  

ENGL 4230  Language and Society**  
Covers sciences of sociolinguistics and anthropological linguistics. Introduces concepts dealing with relationship of language to society and culture, and interaction of language with society and culture. (F)

<td>CI Professional Editing</td>
<td>3</td>
<td>Editing of technical and scientific documents, working with deadlines, different levels of editing, editing marks, working with groups of editors and clients, and total document design, including graphics. Prerequisites: Admission to program and completion of ENGL 3400 and 3410 with grades of B- or better. (F)</td>
</tr>
<tr>
<td>ENGL 4410</td>
<td>Document Design and Graphics</td>
<td>3</td>
<td>Explores elements of page layout, graphic design, type fonts, and design of documents to suit client’s needs. Prerequisites: Admission to program and completion of ENGL 3400 and 3410 with grades of B- or better. (F,Sp)</td>
</tr>
<tr>
<td>ENGL 4420</td>
<td>Advanced Fiction Writing</td>
<td>3®</td>
<td>Offers advanced study in art and skill of writing publishable fiction. Relies on workshop method. Prerequisite: ENGL 3420 or equivalent. (Sp)</td>
</tr>
<tr>
<td>ENGL 4430</td>
<td>Advanced Poetry Writing</td>
<td>3®</td>
<td>Provides course for undergraduate students desiring to write publishable poetry. Relies on workshop method. Prerequisite: ENGL 3430 or equivalent. (Sp)</td>
</tr>
<tr>
<td>ENGL 4440</td>
<td>Advanced Nonfiction Writing</td>
<td>3®</td>
<td>Offers advanced study in the art and skill of writing publishable literary or creative nonfiction. Prerequisite: ENGL 3440. (F,Sp)</td>
</tr>
<tr>
<td>ENGL 4500</td>
<td>CI Teaching Writing</td>
<td>3</td>
<td>Prepares students to teach writing at secondary level. Teaches appropriate pedagogical techniques for teaching writing for a variety of purposes and contexts to diverse students. Techniques taught include designing effective writing assignments, responding constructively to student writing, assessing student writing, and incorporating technology into writing courses. (F,Sp)</td>
</tr>
<tr>
<td>ENGL 4510</td>
<td>CI Teaching Literature</td>
<td>3</td>
<td>Prepares students to teach literature through a variety of texts. Explores multiple pedagogical strategies for teaching diverse literary traditions to students of various backgrounds and developmental levels. (F,Sp)</td>
</tr>
<tr>
<td>ENGL 4610</td>
<td>Western American Literature**</td>
<td>3</td>
<td>Examines major themes and important writers (both “popular” and “literary”) in western regional writing. Investigation of significance of environment, history, gender, and ethnicity in a variety of genres. Appropriate for American Studies majors and minors. (F,Sp)</td>
</tr>
<tr>
<td>ENGL 4620</td>
<td>CI Advanced Seminar in American Studies</td>
<td>3</td>
<td>Practical introduction to theories and methods of American Studies, utilizing interdisciplinary research around a central theme, subject, or text(s). Strongly recommended for American Studies majors and American Studies minors. Open to students who have taken three courses in literature and/or history. Also taught as HIST 4620. (F,Sp)</td>
</tr>
<tr>
<td>ENGL 4630</td>
<td>American Nature Writers*</td>
<td>3</td>
<td>Interdisciplinary study of historical, social, literary, and environmental contexts of nature writing. Examines key authors, major theories, enduring concerns (e.g., conservation, preservation, and management), and current issues (including gender and ethnicity). Appropriate for American Studies majors and minors. (F,Sp)</td>
</tr>
<tr>
<td>ENGL 4640</td>
<td>CI Studies in the American West</td>
<td>3</td>
<td>Interdisciplinary course in American Studies, exploring the region of the West through the analysis of literary texts, historical sources, and socio-cultural materials. Also taught as HIST 4640. (F,Sp)</td>
</tr>
<tr>
<td>ENGL 4700</td>
<td>Folk Material Culture**</td>
<td>3</td>
<td>Study of folk objects and their connections with culture and history. Also taught as HIST 4700. (Sp)</td>
</tr>
<tr>
<td>ENGL 4750</td>
<td>Advanced Folklore Workshop: Fife Conference</td>
<td>3®</td>
<td>Focuses on a theme or topic in folklore, and offers lectures from nationally prominent scholars in the area. Taught during one week, every day and all day. Also taught as HIST 4750. (Su)</td>
</tr>
<tr>
<td>ENGL 4900</td>
<td>Internship/Cooperative Work Experience</td>
<td>1-15®</td>
<td>Offers credit for professional experience obtained outside the classroom, prior to graduation. Requires statement of professional goals and summary report following the experience. Graded Pass/Fail only. Prerequisite: Departmental approval. (F,Sp, Su)</td>
</tr>
<tr>
<td>ENGL 4910</td>
<td>Tutoring Practicum</td>
<td>1®</td>
<td>Inservice training class for first-semester Writing Center staff members. Repeatable for up to 2 credits. (F,Sp)</td>
</tr>
<tr>
<td>ENGL 5210</td>
<td>Topics in Linguistics*</td>
<td>3®</td>
<td>Provides students with opportunity to study topics which are not regularly taught, but which are designed to enrich understanding of linguistics. Typical topics include Old English, roots of English in Germanic, discourse analysis, and English as a world language. (F)</td>
</tr>
<tr>
<td>ENGL 5300</td>
<td>CI Literature and Gender</td>
<td>3®</td>
<td>Exploration of cultural relations between literature and gender. Topics vary. (F,Sp)</td>
</tr>
<tr>
<td>ENGL 5320</td>
<td>CI Literature and Cultural Difference</td>
<td>3®</td>
<td>Exploration of relations between literature and cultural difference. Topics vary. (Sp)</td>
</tr>
<tr>
<td>ENGL 5340</td>
<td>CI Studies in Literary and Cultural Theory</td>
<td>3®</td>
<td>Applications in literary and cultural studies. Topics vary. (F)</td>
</tr>
<tr>
<td>ENGL 5350</td>
<td>CI Literary Studies Capstone</td>
<td>3®</td>
<td>Communicative intensive capstone course in which students synthesize and assess their knowledge of the discipline. Should be taken during the senior year. Enrollment limited to English majors only. (Sp)</td>
</tr>
<tr>
<td>ENGL 5400</td>
<td>Specialized Documents</td>
<td>3®</td>
<td>Students in the Professional and Technical Writing emphasis prepare documents frequently encountered in business and government, including proposals, environmental impact statements, brochures, and newsletters. Prerequisites: Admission to program and completion of ENGL 3400 and 3410 with grades of B- or better. (F,Sp)</td>
</tr>
</tbody>
</table>
ENGL 5410  Interactive Media  3
Students in the Professional and Technical Writing emphasis examine process of publishing online documents, studying multimedia, hypermedia, and hypertext environments. Topics vary and include building complex CD-ROM environments, help file authoring, and designing websites. Prerequisites: Admittance to program and completion of ENGL 3400 and 3410 with grades of B- or better. (F,Sp)

ENGL 5420  Publications Production  3
Students in the Professional and Technical Writing emphasis examine process of publishing printed documents, beginning with idea and ending with hard copy, printed and bound. Prerequisites: Admittance to program and completion of ENGL 3400 and 3410 with grades of B- or better. (Sp)

ENGL 5430  CI  Professional Writing Capstone  3
Capstone course for students in Professional and Technical Writing emphasis, in which students develop a professional portfolio of their own writing. Should be taken during the senior year. Prerequisites: Admittance to program and completion of ENGL 3400 and 3410 with grades of B- or better. (Sp)

ENGL 5450  Creative Writing Capstone  3
Students synthesize and assess their knowledge of literary writing, compose a portfolio of creative work in their chosen genre, and consider and assess their experience in the creative writing process. (Sp)

ENGL 5490  Usability Studies: Theory and Practice  3
Study of current approaches to improving user experiences with technologies and their related texts through research-based changes to product design and documentation. Prerequisite: ENGL 3450 or 3460. (F,Sp)

ENGL 5550  English Teaching Capstone  3
Students synthesize and assess their knowledge of the field and their teaching, reading, and writing strengths; and evaluate the program through formal reflection on their own professional growth. Enrollment limited to English majors only. (Sp)

ENGL 5690  CI  American Studies Capstone Seminar  3
Required for students majoring in American Studies. Enables students to synthesize American Studies theory and methods with interdisciplinary cognate courses. Supports senior thesis design and writing, allowing topics to reflect individual programs of study. Also taught as HIST 5690. (Sp)

ENGL 5700  Folk Narrative  3
Forms and functions of folk narrative genres: myth, legend, folktale, memorate, and ballad. Also taught as ANTH 5700 and HIST 5700. (Sp)

ENGL 5900  Senior Honors Seminar  1-3
Capstone course for students enrolled in English Honors Program. Prerequisite: Enrollment in English Honors Program. (F,Sp,Su)

ENGL 5910  CI  Senior Honors Thesis  1-6
Students work in conjunction with English faculty member to write a thesis. Prerequisite: Enrollment in English Honors Program. (F,Sp,Su)

ENGL 5920  Directed Study  1-3
Provides students with opportunity to work individually with faculty member. Contract for work to be completed must be signed by faculty member and student, then filed with English Department. (F,Sp,Su)

ENGL 6320  Literary Theory  3
Introduces students to advanced literary theories and provides training in sophisticated critical methods. (F,Sp)

ENGL 6330  Topics in Literary Studies  3
Allows in-depth study of specific literary topics and theoretical questions. (F,Sp)

ENGL 6340  British Literature and Culture  3
Explores British literature and provides training in literary and cultural criticism. Promotes research and writing skills. (F,Sp)

ENGL 6350  American Literature and Culture  3
Explores American literature and provides training in literary and cultural criticism. Promotes research and writing skills. (F,Sp)

ENGL 6360  World Literature and Culture  3
Explores world literature and provides training in literary and cultural criticism. Promotes research and writing skills. (F,Sp)

ENGL 6400  Advanced Editing  (dual listing 7400)  3
Examines complex roles editors assume in creating technical and nontechnical documents. Principal components include working with substance of documents, mediating the writer-reader relationship, and exemplifying the application of rhetorical theory in editing. (F,Sp)

ENGL 6410  Theory and Research in Professional Communication  3
Introduction to contemporary theories of written discourse. Emphasizes the implications of these theories for research in professional communication. (F,Sp)

ENGL 6420  Usability Studies and Human Factors in Professional Communication  3
Examines concepts and practices of usability studies and human factors in the design and production of print and online documents. Emphasizes developing objectives, criteria, and measures for conducting tests in the lab and field. (F,Sp)

ENGL 6430  Publications Management  3
covers processes for developing and producing publications, including information development cycles, supervision, and budgets. (F,Sp)

ENGL 6440  Studies in Culture and Professional Communication  3
Examines and research on topics in the American West. Interdisciplinary focus suitable for graduate students in History and American Studies. Also taught as HIST 6610. (F)

ENGL 6450  Reading Theory and Document Design  3
Examines how reading theory interacts with rhetoric of graphics, layout, and type to influence the way documents are designed for maximum information and readability. (F,Sp)

ENGL 6460  Studies in Digital Media  3
Focuses on the production of advanced digital media documents. Examination of theories underlying such publications, plus the related hardware and software. Topics vary. (F,Sp)

ENGL 6470  Studies in Specialized Documents  3
Focuses on writing and design of specific genres in professional communication. Genres include environmental impact statements, software documentation, proposals, manuals, annual reports, newsletters, and fact sheets. Topics vary. (F,Sp)

ENGL 6480  Studies in Technology and Writing  3
Study of theoretical aspects of technologies affecting writing in professional contexts. Course topics may include an examination of the history of computing, rhetorics of hypertext, or theories of communication in virtual space. Topics vary. (F,Sp)

ENGL 6490  Portfolio  3
Design and preparation of a portfolio containing at least five documents, each accompanied by a justification and discussion.

ENGL 6600  American Studies Theory and Method  3
Provides students with theory and method of graduate-level research in American Studies. Also taught as HIST 6600. (F)

ENGL 6610  Seminar on the American West  3-4
Readings and research on topics in the American West. Interdisciplinary focus suitable for graduate students in History and American Studies. Also taught as HIST 6610. (F)

ENGL 6620  Seminar in Native American Studies  3-4
Readings and research on topics in Native American history and culture. Interdisciplinary focus suitable for graduate students in History and American Studies. Also taught as HIST 6620. (F)

ENGL 6630  Studies in Film and Popular Culture  3
Offered annually on a rotating basis by professors in folklore and English (Cultural Studies, Literature, British and Commonwealth). Topics and theoretical
## Course Descriptions

**ENGL 6700 Folklore Theory and Method** 3
Serves as orientation for new graduate students in folklore. Introduces students to comparative annotation, folklore indices, oral-formulaic theory, performance theory, contextual analysis, and other approaches. Also taught as HIST 6700. (F)

**ENGL 6710 Regional Folklore** 3
Study of folklore and folklife as a regionalizing process. Regions examined through their folk culture range. Also taught as HIST 6710. (Sp)

**ENGL 6720 Folklore Fieldwork** 3
Basic methodology class for folklorists and oral historians. Students learn interviewing techniques and other methods for observing and recording the performance of tradition and traditional history. Also taught as HIST 6720. (Sp)

**ENGL 6730 Public Folklore** 3
Provides history and analysis of governmental involvement in protecting, promoting, and otherwise manipulating and utilizing cultural heritage. Also taught as HIST 6730. (F)

**ENGL 6740 Folk Narrative** 3
Covers principal narrative genres in folk tradition (myth, tale, legend, ballad) and the basic theories for their analysis and discussion. Also taught as HIST 6740. (Sp)

**ENGL 6750 Advanced Folklore Workshop (the Fife Conference)** 3
Intensive workshop focusing on a topic in folklore. Brings in nationally known experts as lecturers and discussants. Taught during one week, every day and all day. Also taught as HIST 6750. (Su)

**ENGL 6760 Cultural and Historical Museums** 3
Examines outdoor cultural and historical museums, examining their function in modern multi-cultural societies. Also taught as HIST 6760. (Sp)

**ENGL 6770 Seminar in Folklore and Folklife** 3
Conducts close, professional-level study of major areas of folklore and folklife research. Also taught as HIST 6770. (F)

**ENGL 6800 Theory and Practice of Online Education in Writing** 3
Examination of principles and their implementation in online writing instruction. Emphasis placed on writing instruction within English departments. (Sp)

**ENGL 6810 Introduction to Composition Studies** 3
Introduces students to scholarship in the field of composition studies. Students become acquainted with scholars, forums, themes, and methods of the field. (F,Sp)

**ENGL 6820 Practicum in Teaching English** 3
Introduction to teaching writing, designed specifically for graduate instructors teaching in the English Department writing program. Focuses on theory and practice of teaching writing, specifically ENGL 1010, but also prepares graduate instructors for further teaching responsibilities. Not offered online. (F,Sp)

**ENGL 6830 Rhetorical Theory** 3
Covers intellectual traditions of rhetoric from classical times to the present. As students study major theories, theoreticians, and controversies in the field, they come to understand rhetoric as the study of relations between discourse, knowledge, and power. (F,Sp)

**ENGL 6850 Advanced Studies in the Teaching of English** 3
Provides a critical approach to English pedagogy. Prepares students to teach English classes such as literature, composition, and creative writing. (F,Sp)

**ENGL 6860 Teaching Technical Writing** 3
Prepares students to teach general purpose technical writing courses at the undergraduate level. Students read and discuss articles on technical writing and practice writing a series of technical documents. (F,Sp)

**ENGL 6880 Topics in Creative Writing** 3
Course changes topics as follows: poetry, fiction, and nonfiction. In each topic, students learn to write at an advanced level and learn to evaluate creative writing using workshop and peer group methods. Prerequisite: Permission of instructor. Enrollment limited to graduate students only.

**ENGL 6890 Studies in Writing and Rhetoric** 3
(dual listing 7890)
Allows in-depth study of specific rhetorical topics and theoretical questions. (F,Sp)

**ENGL 6900 Graduate Internship** 1-15
Format and credit limit vary for different programs in the department. See program advisor for details and approval to enroll in this course. (F,Sp,Su)

**ENGL 6920 Directed Study** 1-6
(F,Sp,Su)

**ENGL 6970 Thesis** 1-6
Taught Pass/Fail only. (F,Sp,Su)

**ENGL 6990 Continuing Graduate Registration** 1-6
Taught Pass/Fail only. (F,Sp,Su)

**ENGL 7000 Advanced Research Methods in Professional Communication** 3
Survey of major research methods (qualitative and quantitative) for conducting professional communication research in academic and nonacademic settings. Coursework will culminate in a formal proposal to conduct a discipline-appropriate study in the workplace. (Sp)

**ENGL 7400 Advanced Editing** 3
(dual listing 6400)
Examines complex roles editors assume in creating technical and nontechnical documents. Principal components include working with substance of documents, mediating the writer-reader relationship, and exemplifying the application of rhetorical theory in editing. (F,Sp)

**ENGL 7410 Theory and Research in Professional Communication** 3
(dual listing 6410)
Introduction to contemporary theories of written discourse. Emphasizes the implications of these theories for research in professional communication. (F,Sp)

**ENGL 7420 Usability Studies and Human Factors in Professional Communication** 3
(dual listing 6420)
Examines concepts and practices of usability studies and human factors in the design and production of print and online documents. Emphasizes developing objectives, criteria, and measures for conducting tests in the lab and field. (F,Sp)

**ENGL 7430 Publications Management** 3
(dual listing 6430)
Covers processes for developing and producing publications, including information development cycles, supervision, and budgets. (F,Sp)

**ENGL 7440 Studies in Culture and Professional Communication** 3
(dual listing 6440)
Examines topics in rhetorical, critical, and cultural theory, emphasizing their application to contemporary practices in professional communication. (F,Sp)

**ENGL 7450 Reading Theory and Document Design** 3
(dual listing 6450)
Examines how reading theory interacts with rhetoric of graphics, layout, and type to influence the way documents are designed for maximum information and readability. (F,Sp)

**ENGL 7460 Studies in Digital Media** 3
(dual listing 6460)
Focuses on the production of advanced digital media documents. Examination of theories underlying such publications, plus the related hardware and software. Topics vary. (F,Sp)

**ENGL 7470 Studies in Specialized Documents** 3
(dual listing 6470)
Focuses on writing and design of specific genres in professional communication. Genres include environmental impact statements, software documentation,
proposals, manuals, annual reports, newsletters, and fact sheets. Topics vary. (F,Sp)

ENGL 7480 Studies in Technology and Writing (dual listing 6480) 3
Study of theoretical aspects of technologies affecting writing in professional contexts. Course topics may include an examination of the history of computing, rhetorics of hypertext, or theories of communication in virtual space. Topics vary. (F,Sp)

ENGR 2010 Engineering Mechanics Statics 2
Stress, strain, and deflection due to axial loads; moment and torsion; shear and moment diagrams; and equations of equilibrium and compatibility. Prerequisite: ENGR 2040. (F,Sp,Su)

ENGR 2140 Strength of Materials (formerly ENGR 2040) 2
Force and position vectors; equilibrium of particles; rigid bodies; equivalent system of forces; equilibrium; free body diagrams; static analysis of trusses, frames, and machines; centroids and centers of gravity; friction; and moments of inertia. Prerequisites: MATH 1210, 1220. (F,Sp)

ENGR 2200 Engineering Numerical Methods I 3
Introduction to use of digital computers and elementary numerical analysis, with emphasis on practical applications and software development. Prerequisite: MATH 1220. Prerequisite or corequisite: MATH 2250. (F)

ENGR 2210 Engineering Numerical Methods II 2
Numerical solution techniques for solving ordinary and partial differential equations, emphasizing practical applications and software development. Prerequisite: ENGR 2200. (Sp)

ENGR 2300 Fundamentals of Engineering 3
Introduction to engineering design, problem solving, and computer application skills. Orients students to college programs, academic advising, student services, professional societies, ethics, and engineering careers. A background in trigonometry is strongly recommended. (F)

ENGR 2340 BSS Natural Resources and Society 3
Examines human values, uses, and management of natural settings at the individual, community, and societal levels. Topics include: psychological responses to nature, history of U.S. park and natural resource management, environmental sociology and politics, and nature in non-Western cultures. (F,Sp)

ENVS 2250 Introductory Internship/Co-op 1-3
Introductory-level educational experience in internship/cooperative education position approved by department. Prerequisite: Permission of department. (F,Sp,Su)

ENVS 2340 BSS Natural Resources Policy and Economics 4
Introduction to natural resource policy and economics. Policy components include models, processes, participants, laws, and tools for decision-making and policy implementation. Economics components include theory, interest calculations, financial analysis, nonmarket valuation, and regional impact analysis. (F)

ENVS 3000 Natural Resources and Society 3
Emphasizes how human actions modify the physical environment and how physical systems affect human systems and the changes occurring in the meaning, use, and importance of resources at a global and regional scale. (Sp)
Course Descriptions

ENVS 3500 QI Quantitative Assessment of Environmental and Natural Resource Problems 3
Overview of analytical and sampling methods used for collecting, organizing, and interpreting numeric data to evaluate problems and monitor conditions relating to relationships between environment and society. Prerequisites: STAT 2000 or 3000; MATH 1050; and passing score on the Computer and Information Literacy (CIL) Exam. (F)

ENVS 3600 DSC Living With Wildlife 3
Reviews history and development of wildlife management programs in the United States. Explores diversity of attitudes toward wildlife, which affect development and evolution of wildlife management programs. Development and analysis of case histories of contemporary and controversial wildlife management decisions. (Sp)

ENVS 4000 DSS Human Dimensions of Natural Resource Management 3
Focuses on balancing science and social values in ecosystem management and decision-making. Topics include environmental justice, communication and behavior change strategies, landscape perception and attitudes, resource-dependent communities, public involvement, and conflict management. (F)

ENVS 4110 Fisheries and Wildlife Policy (dual listing 6110) and Administration* 3
Examination of policy issues and administrative approaches in fish and wildlife management, with particular emphasis on nonbiological issues facing wildlife managers and administrators. (F)

ENVS 4130 Recreation Policy and Planning 3
Examines the historical, legal, and political context of outdoor recreation policy; public lands; government agency culture, regulation, and partnering; relationship of outdoor recreation to tourism; and theory and application of principal planning tools for outdoor recreation settings. (Sp)

ENVS 4250 Advanced Internship/Co-op 1-9*
Directed and evaluated cooperative education or work experience for undergraduates in public and private organizations. Prerequisite: Permission of department. (F,Sp,Su)

ENVS 4400 Economic Applications in Natural Resource Management 4
Applied economics course exposing students to tools used in natural resource decision-making. Includes principles and techniques of nonmarket valuation, linear programming, budgeting, benefit-cost analysis, and regional economic analysis as encountered by natural resource managers. Prerequisites: ENVS 3000, MATH 1050 or higher, and passing score on Computer and Information Literacy (CIL) exam. (Sp)

ENVS 4440 Stegner Center Annual Symposium 1*
Offered through the University of Utah College of Law. Topics vary each year, but always focus on natural resource-policy related issues. (Sp)

ENVS 4500 CI Wildland Recreation Behavior 3
Social, psychological, and geographic influences on human behaviors in wildland recreation settings. Emphasis on critical problems affecting public land recreation management. (F)

ENVS 4600 Natural Resource Interpretation 3
Planning processes and techniques for providing interpretive programs developed for wildland recreation areas and visitor centers. Evaluation and planning of visitor information efforts. (F)

ENVS 4920 Special Projects in Recreation Management 1-3*
Participation in special projects to assist public recreation agencies or nonprofit organizations, while gaining hands-on experience in recreation management, planning, and monitoring. Many experiences entail intensive, short-duration efforts away from campus. Prerequisite: Permission of department. (F,Sp,Su)

ENVS 4950 Special Topics 1-3*
Individual study and research upon selected environmental and societal problems. Prerequisite: Permission of department. (F,Sp,Su)

ENVS 4960 Directed Readings 1-3*
Individual reading research on selected environmental and societal readings. Prerequisite: Permission of department. (F,Sp,Su)

ENVS 4970 Undergraduate Research 1-3*
Individual or team research. Prerequisite: Permission of department. (F,Sp,Su)

ENVS 4980 Undergraduate Seminar 1
Intended to bring upperclassmen up-to-date on environmental and societal topics. Graded Pass/Fail only. (Sp)

ENVS 4990 Environmental and Natural Resource Professionalism Seminar 2
Introduces concepts of professionalism in natural resources, including ethical issues in science and management, organizational culture, and workplace expectations. Analyzes current issues with practicing professionals. Reinforces leadership and team-building skills. Prerequisites: ENVS 1990, 3000. (F)

ENVS 5000 Collaborative Problem-Solving for Environment and Natural Resources 3
Project-based capstone course for environmental studies majors. Students work in teams to develop plans and alternative solutions relevant to actual issues or land areas, integrating knowledge from a range of environmental and natural resource disciplines. Prerequisites: Senior standing; ENVS 3000, 4000. (Sp)

ENVS 5110 Environmental Education 3
Covers teaching about the environment, and using the environment and the natural world to teach other subjects, with a strong emphasis on participation and on practicing teaching techniques. (Sp)

ENVS 5300 Natural Resources Law and Policy* 2
Legal and administrative regulation of forests and associated resources (water, air, fish, wildlife, and scenery). Emphasis on agency organizational culture, federal legislation, court cases, administrative procedures, and federal natural resources agencies' interactions with tribal, state, and local governments. (Sp)

ENVS 5320 Water Law and Policy in the United States 3
Introduction to policies, laws, institutions, and practices guiding western water allocation, emphasizing how to efficiently and equitably allocate increasingly scarce supplies. Explores reserved water rights, water markets, stream adjudication, public trust doctrine, basinwide management, and riparian management. (F)

ENVS 5550 Sustainable Development* 3
(dual listing 6550)
Examines the challenges and opportunities humanity faces in sustainably managing human resources. Provides a global perspective on the status of both renewable and nonrenewable resources, as well as the impact of globalization and policies designed to meet long-term human needs. (Sp)

ENVS 5570 Sustainable Living 3
Theories and techniques for decision-making about environmental impacts of consumer decision-making, and about alternatives for a sustainable future. Incorporates meanings of sustainable living, relationships between lifestyle choices and the environment, and feasible steps toward ecological sustainability. (Sp)

ENVS 5640 Conflict Management in Natural Resources 3
Introduction to conflict management techniques for those involved in natural resource management. Also taught as SOC 5640/6640. (Sp)

ENVS 5800 Field Studies in Collaborative Natural Resource Stewardship 3
Two-week field course introduces students to methods and philosophical approaches incorporated in Tehabi, a summer-long internship program focusing on collaborative stewardship of natural resources. Enrollment limited to students accepted into the Tehabi program. (Su)

ENVS 5810 Internship in Collaborative Natural Resource Stewardship 3
Mentored internship involving participation in the Tehabi program, which teaches collaborative stewardship of natural resources within a federal, state, or nonprofit agency. Enrollment limited to students accepted into the Tehabi program. (Su)
### Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENVS 6000</td>
<td>Theoretical Foundations in Human Dimensions of Ecosystem</td>
<td>3</td>
<td>Overview of interdisciplinary theories and frameworks concerning how human societies affect, and are affected by, ecosystem processes at local, regional, and global scales. Focuses on systems theory, social and environmental sustainability, and scientific integration for ecosystem planning, policy, and management. (F)</td>
</tr>
<tr>
<td>ENVS 6110</td>
<td>Fisheries and Wildlife Policy and Administration*</td>
<td>3</td>
<td>Examination of policy issues and administrative approaches in fish and wildlife management, with particular emphasis on nonbiological issues facing wildlife managers and administrators. (F)</td>
</tr>
<tr>
<td>ENVS 6130</td>
<td>Policy Aspects of Wildland Recreation</td>
<td>3</td>
<td>Political, legal, and economic bases for wildland recreation management. Relationship between outdoor recreation and tourism. Lectures concurrent with ENVS 4130. Also includes weekly discussion session focusing on relevant scientific research and policy analyses. (Sp)</td>
</tr>
<tr>
<td>ENVS 6200</td>
<td>Bioregional Analysis and Planning</td>
<td>5</td>
<td>Compilation and analysis of data for assessing biophysical and socio-economic features of landscapes, and for evaluating impacts of land-use policies across both landscapes and time. Provides real-world learning experience in working with stakeholders and agency decision-makers. (F)</td>
</tr>
<tr>
<td>ENVS 6210</td>
<td>Bioregional Management and Policy</td>
<td>5</td>
<td>Continuation of ENVS 6200. Assessment of land-use policies across landscapes and time, with an emphasis on evaluating consequences of community growth via the generation and analysis of future development and management alternatives. Prerequisite: ENVS 6200. (Sp)</td>
</tr>
<tr>
<td>ENVS 6240</td>
<td>Graduate Internship/Co-op</td>
<td>1-9*</td>
<td>Graduate-level educational experience in internship/cooperative education position approved by department. (F,Sp,Su)</td>
</tr>
<tr>
<td>ENVS 6300</td>
<td>Social and Environmental Psychology of Natural Resources**</td>
<td>3</td>
<td>Examines how people respond as individuals to nature and environmental phenomena, drawing on theory and research from social psychology, environmental psychology, and behavior analysis. Emphasizes applications to knowledge, attitude, and behavior change strategies for improving environmental sustainability. (Sp)</td>
</tr>
<tr>
<td>ENVS 6400</td>
<td>Ecological Aspects of Wildland Recreation*</td>
<td>3</td>
<td>Assessment of current knowledge and knowledge gaps concerning impacts of wildland recreation on wildlife, plants, soil and water resources, and processes. Strategies for coexistence of recreation visitors and nonhuman ecosystem elements. (Sp)</td>
</tr>
<tr>
<td>ENVS 6440</td>
<td>Stegner Center Annual Symposium (dual listing 4440)</td>
<td>1*</td>
<td>Offered through the University of Utah College of Law. Topics vary each year, but always focus on natural resource policy-related issues. (Sp)</td>
</tr>
<tr>
<td>ENVS 6500</td>
<td>Behavioral Aspects of Wildland Recreation</td>
<td>3</td>
<td>Social and psychological analysis of visitor behavior in outdoor recreation settings. Sources of recreation management problems and practical and theoretical basis for management practices. Lectures concurrent with ENVS 4500. Separate discussion sessions focus on research concerning recreation behavior. (F)</td>
</tr>
<tr>
<td>ENVS 6530</td>
<td>Natural Resources Administration*</td>
<td>2</td>
<td>Organizational structures and processes common in natural resources administration on federal and state levels, and how they impact career development and land management. (Sp)</td>
</tr>
<tr>
<td>ENVS 6550</td>
<td>Sustainable Development*</td>
<td>3</td>
<td>Examines the challenges and opportunities humanity faces in sustainably managing human resources. Provides a global perspective on the status of both renewable and nonrenewable resources, as well as the impact of globalization and policies designed to meet long-term human needs. (Sp)</td>
</tr>
<tr>
<td>ENVS 6600</td>
<td>Advanced Natural Resource Interpretation</td>
<td>3</td>
<td>Planning processes, techniques, and evaluation procedures for using information and education to influence human behavior and increase benefits to visitors in natural settings. Leadership of teams involved in producing interpretive plans and materials. (F)</td>
</tr>
<tr>
<td>ENVS 6640</td>
<td>Conflict Management in Natural Resources</td>
<td>3</td>
<td>Introduction to conflict management techniques for those involved in natural resource management. Also taught as SOC 6640/5640. (Sp)</td>
</tr>
<tr>
<td>ENVS 6700</td>
<td>Research Approaches in Human Dimensions of Ecosystem Science and Management</td>
<td>3</td>
<td>Experience conceptualizing and prioritizing research problems involving human societies and ecosystems. Reviews approaches for creating and testing interdisciplinary hypotheses pertaining to human-ecosystem interactions. Explores methods for integrating social and biophysical data. (Sp)</td>
</tr>
<tr>
<td>ENVS 6800</td>
<td>Environment and Society Departmental Seminar</td>
<td>1*</td>
<td>Each faculty member meets with first-year graduate students in a seminar format to review and discuss in depth the faculty member’s area of academic specialization. Graded Pass/Fail only. (F)</td>
</tr>
<tr>
<td>ENVS 6870</td>
<td>Ecology Seminar</td>
<td>1*</td>
<td>The Ecology Center schedules regular seminars throughout the school year with ecological scientists from other institutions participating. Ecology majors are required to attend a minimum of 10 such lectures. Students should register for fall semester, but attend through spring semester. Also taught as BIOL 6870, WATS 6870, and WILD 6870. (F)</td>
</tr>
<tr>
<td>ENVS 6900</td>
<td>Graduate Special Topics</td>
<td>1-6*</td>
<td>Offers credit for special assignments, reading, and seminars beyond regularly scheduled courses. (F,Sp,Su)</td>
</tr>
<tr>
<td>ENVS 6910</td>
<td>Directed Study</td>
<td>1-6*</td>
<td>(F,Sp,Su)</td>
</tr>
<tr>
<td>ENVS 6960</td>
<td>Graduate General Ecology</td>
<td>5</td>
<td>General concepts, history, and issues in all major areas of the science of ecology including: environmental biophysics; and physiological, behavioral, evolutionary, community, ecosystem, and applied ecology in both terrestrial and aquatic environments. Also taught as BIOL 6960, WATS 6960, and WILD 6960. (F)</td>
</tr>
<tr>
<td>ENVS 6970</td>
<td>Thesis Research</td>
<td>1-12*</td>
<td>Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>
<tr>
<td>ENVS 6990</td>
<td>Continuing Graduate Advisement</td>
<td>1-9*</td>
<td>Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>
<tr>
<td>ENVS 7000</td>
<td>Theoretical Foundations in Human Dimensions of Ecosystem Science and Management</td>
<td>3</td>
<td>Overview of interdisciplinary theories and frameworks concerning how human societies affect, and are affected by, ecosystem processes at local, regional, and global scales. Focuses on systems theory, social and environmental sustainability, and scientific integration for ecosystem planning, policy, and management. (F)</td>
</tr>
<tr>
<td>ENVS 7300</td>
<td>Social and Environmental Psychology of Natural Resources**</td>
<td>3</td>
<td>Examines how people respond as individuals to nature and environmental phenomena, drawing on theory and research from social psychology,</td>

Course Descriptions

environmental psychology, and behavior analysis. Emphasizes applications to knowledge, attitude, and behavior change strategies for improving environmental sustainability. (Sp)

**ENVS 7700 Research Approaches in Human Dimensions of Ecosystem Science and Management** 3 Experience conceptualizing and prioritizing research problems involving human societies and ecosystems. Reviews approaches for creating and testing interdisciplinary hypotheses pertaining to human-ecosystem interactions. Explores methods for integrating social and biophysical data. (Sp)

**ENVS 7800 Environment and Society (dual listing 6800)** 3 Departmental Seminar 1º Graded Pass/Fail only. (F,Sp)

**ENVS 7810 Research Techniques in Human Dimensions of Ecosystem Science and Management** 3 Experience using various quantitative and qualitative techniques and tools to collect and analyze data in research projects focused on human-ecosystem interactions. Topics range from survey sampling to use of simulation models and spatial statistics involving Geographic Information Systems (GIS). (F)

**ENVS 7840 Graduate Introductory Seminar (dual listing 6840)** 1 for Environment and Society Each faculty member meets with first-year graduate students in a seminar format to review and discuss in depth the faculty member’s area of academic specialization. Graded Pass/Fail only. (F)

**ENVS 7900 Graduate Special Topics** 1-6º Offers credit for special assignments, reading, and seminars beyond regularly scheduled courses. (F,Sp,Su)

**ENVS 7910 Directed Study** 1-6º Offers credit for special assignments, reading, and seminars beyond regularly scheduled courses. (F,Sp,Su)

**ENVS 7970 Dissertation Research** 1-12º Graded Pass/Fail only. (F,Sp,Su)

**ENVS 7990 Continuing Graduate Advisement** 1-9º Graded Pass/Fail only. (F,Sp,Su)

ºRepeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

**Engineering and Technology Education (ETE)**

See Department of Engineering and Technology Education, pages 273-277

**ETE 1000 Orientation to Engineering and Technology Education** 1 Introduction to the technology education teaching profession, including programs, facilities, goals, and opportunities. (F)

**ETE 1010 Communications Technology** 3 Introduction to tools, materials, equipment, and processes used to transmit and receive messages. Major emphasis on hardware, software, communications, and the digital age. (F)

**ETE 1020 Energy, Power, Transportation Systems Control Technology** 3 Exploration of the concepts and processes relating to the control and automation (both hard and programmable) of technical systems in the areas of energy and power, transportation, and agricultural and related biotechnologies. (Sp)

**ETE 1030 Material Processing Systems** 3 Introduction to properties of industrial materials (metallurgical, polymeric, ceramic, and composite), processes used to produce standard stock and finished products, and the use of precision measuring instruments in manufacturing. (F,Sp)

**ETE 1040 Construction and Estimating** 3 Overview of construction industry and its practices. Reviews four major parts of construction industry, including: (1) Inputs: materials; (2) Process: design and building of structures; (3) Outputs: sites, buildings, etc.; and (4) Feedback: effects of building systems. Provides prospective technology education teachers with opportunity to study and perform activities related to the field of construction and estimating. At completion of course, students should be able to demonstrate knowledge and skills required to implement a construction technology program. (Sp)

**ETE 1200 Computer-Aided Drafting and Design** 3 Provides students with ability to accurately produce basic engineering, 2-D, and pictorial drawings using traditional and computer-aided drafting techniques. Introduction to drafting fundamentals and equipment associated with the drafting industry, including drawings, reproductions, and computer-aided techniques. (F,Sp)

**ETE 1640 Introduction to Welding** 3 Theory of Oxy-Acetylene Welding, Shielded-Metal Arc Welding, and Gas Metal Arc Welding. (F)

**ETE 2030 Wood-Based Manufacturing Systems** 3 Focuses on the instructional strategy of establishing a manufacturing enterprise utilizing woodworking equipment and techniques. Topics include management, finance and marketing strategies; and the design of product, tooling, and production systems. Prerequisite: ETE 1030. (F)

**ETE 2210 Electrical Engineering for Nonmajors** 4 Study and application of DC and AC concepts. Includes circuit fundamentals, theorems, laws, analysis, components, equipment, and measuring devices. Laboratory will include circuit design, construction and analysis of AC/DC circuits, and the use of measuring instruments, power supplies, and signal generators. Not available to students majoring in Electrical Engineering or Computer Engineering. Prerequisites: MATH 1210 and 1220. (F,Sp,Su)

**ETE 2220 Analog Devices and Circuits** 3 Study of differential amplifiers, operational amplifiers, regulators, and generator instrumentation amplifier, multiplier, and active filters. Prerequisites: ETE 2130; ETE 2400 (must be taken concurrently). (F)

**ETE 2270 Computer Engineering Drafting** 2 Provides students with ability to accurately produce computer-aided drafting software. Since there are no drafting prerequisites for this course, drafting fundamentals are also introduced. Enrollment limited to only students having majors within the College of Engineering. (F,Sp,Su)

**ETE 2300 QI Electronic Fundamentals** 4 Study and application of DC and AC concepts, semiconductors, digital electronics, and microcomputers. Prerequisite: MATH 1050. (Sp)

**ETE 2310 AC/DC Circuits** 2 Study of AC/DC principles beyond those taught in ETE 2300. Includes network theorems, capacitance, inductance, impedance, reactance, resonance, and transformers. Prerequisite: ETE 2300. (Sp)

**ETE 2320 Electronic Drafting** 2 Study of electronic drafting practices. Students exposed to various areas of electronic drafting and fabrication. Prerequisite: ETE 2300. (F)

**ETE 2360 Digital Circuits** 3 Logic circuits, combinational and repeated circuits, counters, shifts registers, state tables, PLD’s, and digital computer simulations. Prerequisite: ETE 2300 or equivalent. (Sp)

**ETE 2370 Computer and Microprocessor Programming** 3 Introduction to microprocessors and computers. Study of machine language programming, assembles and cross assembles, emulators, and input and output devices. Prerequisite: ETE 2300. (Sp)

**ETE 2400 Active Devices and Circuits** 3 Study of diodes; transistor principles, including semiconductor theory; bipolar, and field effect device characteristics; and modern thyristor devices. Prerequisite: ETE 2310. (F)
Course Descriptions

ETE 2850 Statics and Strength of Materials 3
Engineering technology course covering resultants and equilibrium of force systems; moments of inertia; method of work; stress, strain, and deflection due to tension, compression, and torsion; and Mohr’s circle for stress and strain. Prerequisites: MATH 1050, 1060. (F)

ETE 3030 Computer-Integrated Manufacturing Systems 3
Introduction to principles, operations, and applications of computer-controlled manufacturing systems, including: CNC, CAD/CAM, robotics, programmable logic controllers, bar code readers, etc. Prerequisite: ETE 1030. (Sp)

ETE 3040 Engineering Systems 3
Prepares students to teach engineering at the secondary level. Includes basic overview of math concepts needed to successfully teach engineering, problem solving, teamwork, design, technical communication, and engineering fundamentals. Through use of open-ended problem solving methodologies, students receive hands-on experience while teaching concepts of statics, dynamics, thermodynamics, electrical circuits, and engineering economics. (F,Sp)

ETE 3050 Computer Systems and Networking 3
Introduction to modern graphic and electronic communication systems. Emphasizes design, development, production, and dissemination of both electronic and graphic messages. Covers major concepts, including desktop publishing, and audio and video production techniques. (Sp)

ETE 3070 K-8 Engineering and Technology Education 3
Introduction to technology education and to science, technology, and society (STS) curricula for elementary schools, emphasizing teaching, developing, and managing technology-based activities. (F)

ETE 3200 Methods of Teaching Engineering and Technology Education I 3
Classroom laboratory practicum for design, practice, and performance of technology education demonstrations and lab activities. Prerequisites: ETE 1000; ETE 3300 (must be taken concurrently). (F)

ETE 3220 Architecture and Construction Systems 3
Basics of architectural computer-aided drafting. Includes introduction to principles of construction. Explores residential and commercial systems, emphasizing construction codes. Prerequisites: ETE 1200, MATH 1010. (F)

ETE 3230 Machine and Production Drafting 3
Teaches students to accurately produce both design drawings and working drawings. Explores techniques, symbols, and conventions used to represent gears, cams, jigs, and fixtures. Also includes advanced techniques of production drafting, emphasizing Geometric Dimensioning and Tolerancing. Prerequisites: ETE 1200, MATH 1050, or equivalent. (F)

ETE 3240 Technical Illustration 3
In-depth study of technical illustration. Includes preparation of pictorial drawings with rendering added. Explores industrial and architectural environments. Introduces rendering and animation software, emphasizing three-dimensional modeling. Prerequisite: ETE 1200. (Sp)

ETE 3270 Advanced Computer-Aided Drafting 3
Designed to enhance CADD productivity, encourage customization, and introduce students to advanced CADD techniques, including programming and introduction to parametric design. Prerequisite: ETE 1200. (Sp)

ETE 3300 Clinical Experience I 1
Field-based experiences in secondary schools. Students complete 30 hours of tutoring students and assist teachers with managerial, clerical, and other professional tasks. Graded Pass/Fail only. Prerequisites: ETE 1000; ETE 3200 (must be taken concurrently). (F)

ETE 3380 Microprocessor and Computer Interfacing 3
Microcomputer interface applications, including digital system interface, serial and parallel interfacing, and D/A and A/D converters. Prerequisites: ETE 2240, 2370. (Sp)

ETE 3390 Microcontrollers 3
Study of microcontrollers and applications. Includes programming and building circuits. Prerequisite: ETE 3380. (F)

ETE 3400 Communication Circuits 3
Introduction to radio frequency communication circuits. Includes oscillators, modulation, transmitters, receivers, transmission lines, antennas, RF propagation, digital signal processing, GPS, and spread spectrum. Prerequisites: ETE 2300 and 2400. (Sp)

ETE 3440 DSC Science, Technology, and Modern Society 3
Designed to challenge students from all academic majors to develop an understanding of the dynamic interaction between science, technology, and society. Explores responsibility of humans for directing the utilization of technology as a creative enterprise. Also taught as ASTE 3440. (F,Sp)

ETE 3510 Introduction to Networking 3
Study of hardware and software required to build, install, maintain, and support a local area network. Emphasizes laboratory applications. Prerequisite: BIS 5400 (may be taken concurrently). (F)

ETE 3660 Principles of Engineering Education 3
Prepares students to teach pre-engineering in the high school environment. Topics include the engineering design process and reliability, engineering systems, statics and dynamics, and materials. Prerequisites: MATH 1060 (or equivalent), ETE 1200 (or equivalent). (Sp)

ETE 3710 Electronics/Computer Design I 1
Students select and plan a senior project. Requires written proposal, including technical description of the project and management plans. Prerequisite: ETE 2320 (may be taken concurrently). (F)

ETE 3740 Facility and Equipment Maintenance 3
Systems approach to facility, equipment, and tool maintenance, including principles of woodwork, machine construction, adjustment, and sharpening.

ETE 3900 Principles and Objectives of Career and Technical Education 3
Comprehensive study of philosophy and purposes of career and technical education programs and their place in the total program of modern education.

ETE 3930 Evaluation of Career and Technical Education 2
Factors for evaluation of attitudes, skills, work habits, technical information, and instrument construction.

ETE 4300 Clinical Experience II 1
Field-based experience, in which students complete 30 hours of teaching-related experiences in the classroom. Graded Pass/Fail only. Prerequisites: ETE 3200, 3300; ETE 4400 (must be taken concurrently). (Sp)

ETE 4310 Corrosion and Corrosion Control 2
Analysis of corrosion mechanisms for ferrous metals, nonferrous metals, and nonmetallic materials, as well as the control of corrosion. Prerequisites: CHEM 1110 and MATH 1060. (Sp)

ETE 4400 Methods of Teaching Engineering and Technology Education II 3
Techniques of teaching as applied to individual and group instruction. Students apply various methods in presenting lessons. Prerequisites: ETE 3200, 3300; ETE 4300 (must be taken concurrently). (Sp)

ETE 4440 Technology and Society 3
Challenges students to develop an understanding of the dynamic interaction between science, technology, and society. Explores the responsibility of humans to direct the utilization of technology as a creative enterprise. Students critically investigate technological innovations, issues, and impacts on society from a global perspective. (F,Sp)

ETE 4700 Student Teaching in Postsecondary Schools 4
Planning, presenting, and evaluating instruction for students in postsecondary industrial and technical programs under the supervision of an experienced teacher. Enrollment by permission only.

ETE 4710 CI Electronics/Computer Design II 3
Execution and completion of a team or individual project. Requires design reviews and written reports. Prerequisite: ETE 3710. (Sp)
Course Descriptions

ETE 4930 Independent Study 1-4
Upon application, students may propose and complete work above and beyond regular coursework to support or supplement their major. (F,Sp,Su)

ETE 4940 Related Industrial Experience 1-12
Provision for enrollment in industry schools conducted on university level. Approved by department upon application for trade competency examination and work experience in industry. (F,Sp,Su)

ETE 5040 Manufacturing Enterprise 3
Focuses on management technology used to establish a manufacturing enterprise, engineer a product and production system, finance the operation, and market the product. Prerequisite: ETE 1030.

ETE 5220 CI Program and Course Development 3
Review of basic principles and practices of curriculum and course development used in applied technology and technology education. Emphasizes components needed to develop a curriculum guide. Prerequisites: ETE 3200, 3300. (Sp)

ETE 5230 Technical Training Innovative Program 1-4
Prepares prospective and incumbent teachers to implement and conduct contemporary programs. Includes skill development and the philosophy needed for curriculum innovation.

ETE 5240 Principles of Technology 2-3
Introduction to applied technology principles forming the basis for today’s society.

ETE 5500 Student Teaching Seminar 2
Focuses on observations and problems arising during student teaching. Includes review of teaching plans, procedures, adaptive classroom practices, and evaluation. Graded Pass/Fail only. Prerequisite: ETE 5630 (must be taken concurrently). (F)

ETE 5630 Student Teaching in Secondary Schools 10
Candidates assigned to cooperating teachers in public secondary schools within their major and minor subjects. Students have professional responsibilities with teaching. Graded Pass/Fail only. Prerequisite: ETE 5500 (must be taken concurrently). (F)

ETE 5800 Seminar—Technology Education 1-3
Provides opportunity for students to participate in variety of enriching experiences, such as guest speakers, field trips, demonstrations, and conferences.

ETE 5900 Workshop in Engineering and Technology Education 1-4
Special workshops for education or industry. May be repeated providing content varies.

ETE 5910 Special Problems in Engineering and Technology Education 1-4

ETE 5920 Related Technical Training 1-12

ETE 6090 Program Design 3
Study of contemporary program design and development in technology and industrial education. Reviews complete curriculum developmental process. (F,Sp,Su)

ETE 6100 Contemporary Issues 3
Study of present and future foundational professional developments in technology and industrial education. Students identify and investigate contemporary trends and issues affecting and facing technology and industrial education. (F,Sp,Su)

ETE 6150 Evaluation and Assessment 3
Study of various methods used to measure and evaluate student achievement, including cognitive, affective, and psychomathic. Reviews principles of learning and teaching, and of evaluation of instruction. (F,Sp,Su)

ETE 6200 Composite Manufacturing Processes and Repair 3
Composite manufacturing processes, composite materials survey, tooling design and fabrication, autoclave processes, vacuum bag techniques, filament winding processes, equipment requirements, materials cutting and storage, and composite materials testing. (Sp)

ETE 6250 Internship 1-6
Advanced instruction through supervised work experience in teaching, supervising, or administering educational or industrial program. (F,Sp,Su)

ETE 6310 Corrosion and Corrosion Control 2
(dual listing 4310)
Analysis of corrosion mechanisms for ferrous metals, nonferrous metals, and nonmetallic materials, as well as the control of corrosion. Prerequisites: CHEM 1110 and MATH 1060. (Sp)

ETE 6440 Technology and Society 3
Challenges students to develop an understanding of the dynamic interaction between science, technology, and society. Explores the responsibility of humans to direct the utilization of technology as a creative enterprise. Students critically investigate technological innovations, issues, and impacts on society from a global perspective. (F,Sp)

ETE 6450 Administration and Organization 3
Administrative and supervisory techniques for successful operation of technology education and applied technology education programs. (F,Sp,Su)

ETE 6520 Explorations of Industry 3
Study of contemporary industry, business, and service through a series of site visits. Includes various management and finance methods and techniques. (F,Sp,Su)

ETE 6750 Research Methods and Design 3
Introduction to practical research planning and design. Guides students from proposal selection to completed proposal to final research report. (F,Sp,Su)

ETE 6800 Seminar 1-2
(F,Sp,Su)

ETE 6900 Readings and Conference 1-3
Advanced individualized study on selected topics in technology and industrial education. Scheduled consultation with faculty member. (F,Sp,Su)

ETE 6910 Experimental Laboratory 3
Introduction to elements of a research report through selection and development of experimental study utilizing tools, equipment, materials, and processes for improving programs and teaching techniques. (F,Sp,Su)

ETE 6930 Independent Study 1-6
Advanced educational experience through individual investigation. (F,Sp,Su)

ETE 6960 Master's Project 3-6
Development of creative project emphasizing a thoroughly developed plan of action. Includes proposal, project paper, and final presentation. (F,Sp,Su)

ETE 6970 Thesis Research 1-9
Graded Pass/Fail only. (F,Sp,Su)

ETE 6990 Continuing Graduate Advisement 1-3
Graded Pass/Fail only. (F,Sp,Su)

ETE 7010 The Role of Cognition in Engineering and Technology Education 3
Study of cognitive science and research relating to engineering and technology education. (F)

ETE 7020 Design Thinking in Engineering and Technology 3
Engineering design as applied to technology education. (Sp)

ETE 7030 Engineering Design and Analysis for Technology Education 3
Engineering design methodology for technology education teacher educators. Focuses on science principles and predictive mathematics comprising the engineering sciences needed to solve problems in a design framework that is analytical, predictive, and repeatable. (F)

Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FCHD 3310</td>
<td>Consumer Policy</td>
<td>3</td>
<td>Examines different tools for policy analysis. Provides conceptual and analytical framework for understanding the role of consumer sciences professionals as political actors and the potential to influence the shaping of public policy, particularly consumer and government policies. (Sp)</td>
</tr>
<tr>
<td>FCHD 3340</td>
<td>Housing: Societal and Environmental Issues</td>
<td>3</td>
<td>Studies housing in the contemporary U.S., including affordability, access, expectations, aesthetic considerations, and effects of public and private policies on housing choices. (F)</td>
</tr>
<tr>
<td>FCHD 3350</td>
<td>Family Finance</td>
<td>3</td>
<td>Achieving personal and family financial goals, including financial planning and record keeping, different types of insurance, taxes, use of credit, investments, retirement, and estate planning. (F,Sp,F)</td>
</tr>
<tr>
<td>FCHD 3450</td>
<td>Consumer Credit Problems</td>
<td>3</td>
<td>Consumer credit problems, debt reduction strategies, credit collection policies and practices, bankruptcy, and government assistance programs. Prerequisite: FCHD 3350. (F)</td>
</tr>
<tr>
<td>FCHD 3510</td>
<td>Infancy and Early Childhood</td>
<td>3</td>
<td>Development and growth of the child from conception to five years. Physical, social, and emotional growth; and parenting skills. Prerequisites: Junior standing and FCHD 1500, 2610. (F,Sp,F)</td>
</tr>
<tr>
<td>FCHD 3520</td>
<td>Children in the Middle Years</td>
<td>3</td>
<td>Growth and development of normal children. Guidance principles related to behavior of children at these age levels. Prerequisites: Junior standing and FCHD 1500, 2610. (F,Sp,F)</td>
</tr>
<tr>
<td>FCHD 3530</td>
<td>Adolescence</td>
<td>3</td>
<td>Social, psychological, and physical aspects of adolescence in modern societies. Social and cultural expectations and influences on adolescents stemming from the family, peers, school, and the community. Prerequisites: Junior standing and FCHD 1500. (F,Sp,F)</td>
</tr>
<tr>
<td>FCHD 3540</td>
<td>Adult Development and Aging</td>
<td>3</td>
<td>Interdisciplinary perspective on developmental issues in adulthood and old age. Biosocial, cognitive, and psychosocial changes in older adults in family, community, cultural, and socio-political contexts. Prerequisites: Junior standing and FCHD 1500. (F,Sp,F)</td>
</tr>
<tr>
<td>FCHD 3550</td>
<td>Infant Lab</td>
<td>1</td>
<td>Practical experience in laboratory setting with children birth through two years of age. Lab supplements/complements course content of FCHD 3510. Prerequisites: Junior standing, FCHD 1500, 2610. Corequisite: FCHD 3510. (F,Sp,F)</td>
</tr>
<tr>
<td>FCHD 3560</td>
<td>Middle Childhood Lab</td>
<td>1</td>
<td>Practical experience in laboratory setting with children in the middle years. Lab supplements/complements course content of FCHD 3520. Prerequisites: Junior standing, FCHD 1500, 2610. Corequisite: FCHD 3520. (F,Sp,F)</td>
</tr>
<tr>
<td>FCHD 4220</td>
<td>Family Crises and Interventions</td>
<td>3</td>
<td>Normative and nonnormative stressors provoking individual and family crises. Principles and techniques for family interventions. Prerequisites: Junior standing, FCHD 2400. (F,Sp,F)</td>
</tr>
<tr>
<td>FCHD 4230</td>
<td>Families and Social Policy</td>
<td>3</td>
<td>Local, state, and federal policies with implications for individuals and families across the lifespan. Prerequisites: Junior standing and FCHD 2400. (F,Sp,F)</td>
</tr>
<tr>
<td>FCHD 4240</td>
<td>Social and Family Gerontology</td>
<td>3</td>
<td>Social, cultural, and family contexts of aging. Intergenerational family relations in later life. Social policies and services affecting older adults and their families. Prerequisites: Junior standing and FCHD 2400, 3540. (F,Sp,F)</td>
</tr>
<tr>
<td>FCHD 4330</td>
<td>Family Finance Career Seminar</td>
<td>1</td>
<td>Exploration of career options through readings, guest lecturers, interviews of practitioners, and development of an internship and career plan. Prerequisite: FCHD 3350. (F)</td>
</tr>
<tr>
<td>FCHD 4350</td>
<td>Advanced Family Finance</td>
<td>3</td>
<td>Managing personal and family financial resources to achieve goals relating to investments, retirement, and estate planning. Prerequisite: FCHD 3350. (Sp)</td>
</tr>
<tr>
<td>FCHD 4460</td>
<td>Financial Counseling</td>
<td>3</td>
<td>Development and application of financial counseling and presentation skills. Analysis of various financial problems and development of appropriate solutions and resources. Prerequisites: FCHD 3350, 3450. Enrollment limited to FCHD majors with a Family Finance Emphasis. (Sp)</td>
</tr>
<tr>
<td>FCHD 4550</td>
<td>Preschool Methods and Curriculum</td>
<td>3</td>
<td>Use of materials, equipment, and activities in planning and implementing curricula for preschool children. Prerequisites: Junior standing and FCHD 1500. (F,Sp,F)</td>
</tr>
<tr>
<td>FCHD 4800</td>
<td>Senior Honors Thesis/Project</td>
<td>3</td>
<td>Thesis/project in area of student’s choice, selected and prepared in consultation with an advisor drawn from the FCHD faculty. Includes oral presentation and discussion of senior thesis/project. Prerequisite: Senior standing. (F,Sp,F,Su)</td>
</tr>
<tr>
<td>FCHD 4940</td>
<td>Gerontology Integration</td>
<td>1</td>
<td>Integration of gerontology coursework and practicum. Written paper requires approval by FCHD Gerontology Coordinator. (F,Sp,F,Su)</td>
</tr>
<tr>
<td>FCHD 4950</td>
<td>Practicum: Consumer Science</td>
<td>1-12</td>
<td>Placement experience in applying skills and knowledge in community agencies. Prerequisites: Junior standing, completion of 24 credits in major. Enrollment limited to Family and Consumer Sciences majors who have at least junior standing, or to FCHD majors with a Family Finance Emphasis, who have completed at least 30 credits in the major. The application deadlines are: February 15 for fall semester, June 15 for spring semester, and October 15 for summer semester. (F,Sp,F,Su)</td>
</tr>
<tr>
<td>FCHD 4960</td>
<td>Practice Teaching in Child Development Laboratories</td>
<td>3 or 6</td>
<td>Intensive teaching practicum in the Child Development Lab program. Students must sign up at least three full semesters in advance in FL 205. Prerequisites: Junior standing, FCHD 4550, and departmental permission. (F,Sp,F,Su)</td>
</tr>
<tr>
<td>FCHD 4970</td>
<td>Gerontology Practicum</td>
<td>1-3</td>
<td>Placement experience in gerontology settings. Practical opportunities to apply theory, knowledge, and skills. Prerequisites: Senior standing and FCHD 3540, 4240. Apply one semester in advance. The application deadlines are: February 15 for fall semester, June 15 for spring semester, and October 15 for summer semester. (F,Sp,F,Su)</td>
</tr>
<tr>
<td>FCHD 4990</td>
<td>Readings and Conference</td>
<td>1-6</td>
<td>Directed independent study of topics preselected by faculty and student. Instructor permission required before registration. (F,Sp,F,Su)</td>
</tr>
<tr>
<td>FCHD 5340</td>
<td>Housing Finance and Regulations</td>
<td>3</td>
<td>Exploration of mortgage loan industry, with in-depth examination of various lending products and procedures. Study of regulations affecting housing, including Fair Housing, predatory lending, and mortgage default. Prerequisites: FCHD 3340, 3350. Enrollment limited to students in the Family Finance emphasis and FCS majors. (Sp)</td>
</tr>
<tr>
<td>FCHD 5540</td>
<td>Family Life Education Methods</td>
<td>3</td>
<td>Introductory course focused on theory, principles, and skills necessary to prepare, present, and evaluate family life education programs and workshops. Prerequisites: Junior standing, FCHD 1500 and 2400. Enrollment limited to FCHD majors only. (F,Sp,F)</td>
</tr>

<tbody>
<tr>
<td>FCSE 1140</td>
<td>Introductory Sewing</td>
<td>2</td>
<td>Introductory-level sewing techniques geared toward beginning sewing students.</td>
</tr>
<tr>
<td>FCSE 2040</td>
<td>Clothing Production Principles</td>
<td>3</td>
<td>Intermediate-level clothing construction techniques, pattern alteration and fitting, and the use of sewing machines. No previous sewing experience needed. Graded Pass/Fail only. (F,Sp)</td>
</tr>
<tr>
<td>FCSE 2510</td>
<td>Orientation to Family and Consumer Sciences</td>
<td>3</td>
<td>Overview of the integrated Family and Consumer Sciences Education system. Students learn how family and human development, nutrition, finance, clothing production, and consumerism is planned, implemented, and evaluated through FCSE programs in the public schools. Enrollment limited to FCSE majors only. (F,Sp)</td>
</tr>
<tr>
<td>FCSE 3030</td>
<td>Textile Science</td>
<td>4</td>
<td>Study of fibers, yarns, fabric constructions, and finishes as related to appreciation, selection, use, and care of current textiles. Evaluation of physical, economic, and aesthetic properties of textile products to determine suitability for desired end use. (Sp)</td>
</tr>
<tr>
<td>FCSE 3040</td>
<td>Advanced Clothing Production Principles</td>
<td>3</td>
<td>Develops skills in flat pattern design and tailoring techniques. Graded Pass/Fail only. (F)</td>
</tr>
<tr>
<td>FCSE 3060</td>
<td>Human Behavior Related to Dress</td>
<td>3</td>
<td>Analyzes economic, historic, psychological, social, and cultural contexts shaping individual and group dress and appearance. Prerequisite: Completion of a course having University Studies Breadth Social Sciences (BSS) designation. (F)</td>
</tr>
<tr>
<td>FCSE 3080</td>
<td>Dress and Humanity</td>
<td>3</td>
<td>Explores relationship of dress and humanity. Collaborative group assignments, discussions of history related to dress, cultures as related to dress, and the influence dress has in today’s society. (F,Sp)</td>
</tr>
<tr>
<td>FCSE 3300</td>
<td>Family and Consumer Sciences Education I</td>
<td>1</td>
<td>Provides on-site experience for students to model a secondary family and consumer sciences education teacher. Students are expected to learn teaching and classroom management principles. Graded Pass/Fail only. Must be taken concurrently with FCSE 3400. Prerequisite: Admission to Secondary Education Professional Education Component. (Sp)</td>
</tr>
<tr>
<td>FCSE 3400</td>
<td>Family and Consumer Sciences Education Methods I</td>
<td>3</td>
<td>Methods of successfully planning and maintaining family and consumer sciences work education programs in secondary schools. History and philosophy of applied technology education. Prerequisite: Admission to Secondary Education. FCSE 3400 and 3300 must be taken concurrently. (Sp)</td>
</tr>
<tr>
<td>FCSE 3790</td>
<td>Housing and Interior Design Teaching Methods</td>
<td>3</td>
<td>Online course mirroring Utah’s state standards for housing and interior design. Students review housing and interior design content, and then generate teaching strategies appropriate for teaching that content at the high school level. Prerequisites: ID 1790, FCSE 3400. Enrollment limited to FCSE majors only. (F,Sp,Su)</td>
</tr>
<tr>
<td>FCSE 4250</td>
<td>Internship in Family and Consumer Sciences</td>
<td>1-12</td>
<td>Midmanagement-level experience in a position approved by the department. One credit earned for each 60 hours of experience. Graded Pass/Fail only. Prerequisite: Junior standing. (F,Sp,Su)</td>
</tr>
<tr>
<td>FCSE 4300</td>
<td>Family and Consumer Sciences Education Clinical Experience II</td>
<td>1</td>
<td>Provides on-site experience for students to model a secondary family and consumer sciences education teacher. Students expected to learn teaching and classroom management principles. Graded Pass/Fail only. Prerequisites: FCSE 3300, 3400. (F)</td>
</tr>
<tr>

<td>-------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>FCSE 4400</td>
<td>Family and Consumer Sciences Education Methods II</td>
<td>3</td>
<td>Development of competency in curriculum planning, and skill and sensitivity in the use of various teaching-learning strategies and resources. Includes assessment for vocational education. Prequisites: FCSE 3300, 3400. (F)</td>
</tr>
<tr>
<td>FCSE 4900</td>
<td>Independent Study in Family and Consumer Sciences Education 1-5</td>
<td></td>
<td>Prior to registration, students must identify a project of interest and discuss the project with instructor. Prerequisite: Junior standing and approval of faculty. (F,Sp,Su)</td>
</tr>
<tr>
<td>FCSE 5500</td>
<td>Student Teaching Seminar</td>
<td>2</td>
<td>Taken during student teaching in secondary schools to complement school experience. Focuses upon problems arising during student teaching. Includes teaching plans, procedures, adaptive classroom practices, and evaluation. Graded Pass/Fail only. Prerequisites: FCSE 4300, 4400. Must be taken concurrently with FCSE 5600. (Sp)</td>
</tr>
<tr>
<td>FCSE 5550</td>
<td>Workshop Topics in Family and Consumer Sciences Education 0.5-3</td>
<td></td>
<td>Concentrated offerings to increase knowledge, skills, or creative expression in current Family and Consumer Sciences Education topics or curriculum areas. (F,Sp,Su)</td>
</tr>
<tr>
<td>FCSE 5630</td>
<td>Student Teaching in Secondary Schools 10</td>
<td></td>
<td>After assignment to a cooperating family and consumer sciences educator, students are given professional responsibilities associated with teaching. Graded Pass/Fail only. Prerequisites: FCSE 4300, 4400. Must be taken concurrently with FCSE 5500. (Sp)</td>
</tr>
<tr>
<td>FCSE 6210</td>
<td>Using and Interpreting SPSS to Analyze Social Research Data</td>
<td>3</td>
<td>Explores the use of SPSS for descriptive statistics, contingency tables, ANOVA models, and multiple regression. Discussion of syntax, procedure options, and interpretation of output. (Sp)</td>
</tr>
<tr>
<td>FCSE 6240</td>
<td>Graduate Topics in Family and Consumer Sciences Education 1-3</td>
<td></td>
<td>Surveys selected topics in family and consumer sciences education. Topics will be unique each time course is offered. (Sp,F,Sp,Su)</td>
</tr>
<tr>
<td>FCSE 6250</td>
<td>Graduate Internship in Family and Consumer Sciences Education 1-6</td>
<td></td>
<td>Designed for graduate students who wish to acquire or upgrade their experience in an occupational field related to their area of study. One credit earned for each 60 hours of experience. Repeatable for up to 6 credits. Prerequisite: Instructor approval prior to enrollment. (F,Sp,Su)</td>
</tr>
<tr>
<td>FCSE 6280</td>
<td>Research Methods in Family and Consumer Sciences Education</td>
<td>2</td>
<td>Explores techniques and tactics for designing and analyzing social science human behavior research. Emphasizes designs and instrumentation. Prospectus required. This course is currently inactive. Contact department for information about when this course may be taught.</td>
</tr>
<tr>
<td>FCSE 6290</td>
<td>Current Issues in Family and Consumer Sciences Education^</td>
<td>3</td>
<td>Investigation and reporting of current issues related to family and consumer sciences education research. (F)</td>
</tr>
<tr>
<td>FCSE 6520</td>
<td>Administration and Supervision in Education and Extension</td>
<td>3</td>
<td>Application of research and theory of administration and supervision to define and clarify the role of leadership in formal education and extension situations. (F)</td>
</tr>
<tr>
<td>FCSE 6530</td>
<td>Classroom Management, Student Motivation, and Guidance</td>
<td>3</td>
<td>Multiple-strategy approach for increasing teachers' effectiveness and satisfaction in family and consumer sciences classroom management and discipline. (Sp)</td>
</tr>
<tr>
<td>FCSE 6540</td>
<td>Program Development, Testing, and Evaluation in Career and Technical Education*</td>
<td>3</td>
<td>Examines current trends in curriculum and program development related to specific educational outcomes. Includes curriculum development process. (F)</td>
</tr>
<tr>
<td>FCSE 6550</td>
<td>Family and Consumer Sciences Education Topics*</td>
<td>3</td>
<td>Explores advanced application of teaching strategies and theory, as well as the creation of innovative classroom materials. (F)</td>
</tr>
<tr>
<td>FCSE 6560</td>
<td>Mentoring New Professionals*</td>
<td>3</td>
<td>Explores the role of mentoring in the success of new teaching professionals. Reviews four components of professional practice. Examines techniques for observation and conferencing. Students reflect upon their own teaching/mentoring experiences and the impact upon professional practice. (Sp)</td>
</tr>
<tr>
<td>FCSE 6570</td>
<td>Adult Education and Volunteer Programs</td>
<td>3</td>
<td>Explores current program formats and instructional materials developed for adult education. Emphasizes program and course development and teaching strategies suitable for adults. This course is currently inactive. Contact department for information about when this course may be taught.</td>
</tr>
<tr>
<td>FCSE 6590</td>
<td>Graduate Independent Study in Family and Consumer Sciences Education 1-4</td>
<td></td>
<td>Independent study in the areas of family and consumer sciences education, including clothing and merchandising, consumer sciences, and interior design. For approval of project and allowable credits, students should check with committee. (F,Sp,Su)</td>
</tr>
<tr>
<td>FCSE 6790</td>
<td>Master's Thesis Research in Family and Consumer Sciences Education 1-6</td>
<td></td>
<td>Graded Pass/Fail only. Repeatable for up to 6 credits. (F,Sp,Su)</td>
</tr>
<tr>
<td>FCSE 6970</td>
<td>Continuing Advanced Graduate Advisement in Family and Consumer Sciences Education 1-3</td>
<td></td>
<td>Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>

</thead>
<tbody>
<tr>
<td>FREN 3030</td>
<td>Advanced French for Everyday Communication</td>
<td>3</td>
<td>Development of advanced conversational skills, communication strategies, and cultural knowledge through immersion in a French-speaking environment. Offered only through USU’s study abroad program in France. Cannot be applied to requirements for the major or minor in French. Graded Pass/Fail only. (Su)</td>
</tr>
<tr>
<td>FREN 3060</td>
<td>CI French Conversation</td>
<td>3</td>
<td>Designed to develop effective communication skills, to increase vocabulary, and to teach students to express and justify facts, opinions, ideas, and emotions in French. Not open to students with foreign experience. Designed for students who have not had extended residence in a francophone country or extended exposure to a francophone environment.</td>
</tr>
<tr>
<td>FREN 3070</td>
<td>Advanced French Language Study Abroad I</td>
<td>4</td>
<td>Intensive upper-division language course combining grammar review, phonetics, advanced conversation and composition, and the study of culture, with an emphasis on current affairs. Offered only through USU’s summer study abroad program in France. (Su)</td>
</tr>
<tr>
<td>FREN 3080</td>
<td>Advanced French Language Study Abroad II</td>
<td>4</td>
<td>Intensive upper-division language course combining grammar review, phonetics, advanced conversation and composition, and the study of culture, with an emphasis on current affairs. Offered only through USU’s summer study abroad program in France. (Su)</td>
</tr>
<tr>
<td>FREN 3090</td>
<td>CI French Intermediate Written Communication</td>
<td>3</td>
<td>Provides students with intensive practice in various types of writing (e.g., summary, description, narration, letter-writing, etc.) based on a process approach. Involves discussion, writing, and revising. Stresses grammar review.</td>
</tr>
<tr>
<td>FREN 3500</td>
<td>DHA Topics in French Literature in Translation</td>
<td>3</td>
<td>Reading, analysis, and discussion of important French literature in English translation. Topics and texts may vary. Course may be repeated for credit with different content.</td>
</tr>
<tr>
<td>FREN 3510</td>
<td>CI Business French*</td>
<td>3</td>
<td>Study of vocabulary, idioms, and expressions used in French business communications and an introduction to French business practices. (F)</td>
</tr>
<tr>
<td>FREN 3550</td>
<td>DHA French Civilization**</td>
<td>3</td>
<td>Study of historical, social, political, economic, and cultural conditions and institutions of France from early to modern times.</td>
</tr>
<tr>
<td>FREN 3570</td>
<td>France Today</td>
<td>3</td>
<td>Study of contemporary life in France, the French people, their daily habits, and their surroundings. What makes the French French. Extensive use of videos, films, and slides. Prerequisite: FREN 2020 or equivalent.</td>
</tr>
<tr>
<td>FREN 3600</td>
<td>Textual Analysis</td>
<td>3</td>
<td>Introduction to the methods, terminology, and practice of textual analysis. Development of critical thinking and writing skills through the analysis of selected literary and nonliterary texts from different periods and genres, ranging from poetry, novels, and plays to film, painting, music, and art. Course may be repeated once for credit with different content.</td>
</tr>
<tr>
<td>FREN 3820</td>
<td>Advanced Independent Study: Experiencing Paris</td>
<td>2</td>
<td>Advanced-level independent study project focusing on the city of Paris, its history, culture, and patterns of life. Offered only through USU’s summer study abroad program in France. (Su)</td>
</tr>
<tr>
<td>FREN 3880</td>
<td>Individual Readings</td>
<td>1-4</td>
<td>Individual study of selected readings in French. Instructor’s permission required. (F,Su)</td>
</tr>
<tr>
<td>FREN 3900</td>
<td>Topics in French and Francophone Studies**</td>
<td>3</td>
<td>Studies through literature, media, and film on specific topics or themes. Discussion, analysis, and interpretation of selected literary and/or nonliterary works. Occasionally taught in English.</td>
</tr>
<tr>
<td>FREN 4060</td>
<td>CI Advanced French Conversation</td>
<td>3</td>
<td>Designed for students who have already reached advanced proficiency in speaking through foreign experience, but need to continue the development of their conversational skills. Prerequisite: FREN 3060 or permission of instructor.</td>
</tr>
<tr>
<td>FREN 4090</td>
<td>CI Advanced Written Communication</td>
<td>3</td>
<td>Continued development of French written communication skills based on a process approach. Includes the more advanced concepts of French grammar and extensive writing practice in variety of genres. Prerequisite: FREN 3090 or permission of instructor.</td>
</tr>

#### FREN 4200

Applied French Linguistics and Phonetics*

- First part analyzes phonological and phonetic patterns of French. Second part deals with selected morphological and syntactic features of French.

#### FREN 4520

Information Technologies in French

- Practices, theoretical issues, and policy concerns of information technologies resulting from computers, networking, and videodisk. Use of computer with French programs. Taught in French. This course is not currently being taught. For information about when it may be taught, contact the department.

#### FREN 4610 DHA

Period Studies in French Literature*

- Examination of a particular period or century. Involves close reading, discussion, analysis, and interpretation of selected literary and nonliterary texts. Sample topics include: The Medieval Period, The Renaissance, Classicism, Baroque, Romanticism, Naturalism, and Contemporary French Literature. Prerequisite: FREN 3600 or instructor’s permission.

#### FREN 4620 DHA

Genre Studies in French Literature**

- Examination of a particular genre or body of works from a variety of periods and authors (e.g., novel, play, poetry, short story, film). Involves close reading, discussion, analysis, and interpretation of selected literary and nonliterary texts. Sample topics include: Romance Novels from the Middle Ages to the Present, From Classical to Contemporary French Theatre, French poetry from Baudelaire to Ponge, The Nouveau Roman, New Wave French Cinema, and The Négritude Movement. Prerequisite: FREN 3600 or instructor’s permission.

#### FREN 4880

Individual Readings 1.0-4.0

- Readings in scientific, technical, or literary French. Prerequisite: Permission of instructor. (F,Sp)

#### FREN 4900

Seminar in French and Francophone Studies**

- In-depth exploration of issues central to understanding language, literature, and culture. Critical reading and viewing of written and nonwritten texts with emphasis on student presentations, independent research, and the completion of extended projects. Seminar topics may focus on authors, literary periods, important historical events and social movements, and aspects of francophone cultures. Used periodically for literature in translation.

#### FREN 4920

French Language Tutoring 1.0

- Allows students to develop tutoring skills by assisting professors in lower-division courses or fulfilling instructional duties for a comparable amount of time in the language laboratory, public schools, or similar activities with departmental approval. May be repeated to a maximum of 3 credits. Prerequisite: Permission of instructor. (F,Sp)

#### FREN 6200

French Linguistics and Phonetics 3.0

- Analysis of selected phonological, morphological, syntactic, and semantic features of contemporary French, including a study of colloquial French, comparing pronunciation, vocabulary, and grammar with standard forms. Prerequisite: FREN 2020, another 3000-level or higher FREN course, or demonstrated proficiency through testing.

---

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

**Taught 2008-2009.

---

### Notes

- GEO 1060 BPS Introduction to Environmental Geoscience 3.0
  - (formerly GEOL 1200 BPS)
  - Explores the earth’s internal and external processes. Interprets the roles these processes play in human habitation of the planet. Evaluates the interplay occurring between humans and the earth, as in the distribution of resources and the development of civilization. (Sp)

- GEO 1110 BPS The Dynamic Earth: Physical Geology 4.0
  - (formerly GEOL 1150 BPS)
  - Physical processes, both internal and external, shaping the Earth. Igneous, metamorphic, and sedimentary environments and products. Emphasizes geology as an apied science, relying on other basic sciences as tools for interpretation and understanding. Three lectures and one two-hour lab per week. (F,Sp)

- GEO 1120 DSC Geology of National Parks Field Trip 1.0
  - (formerly GEOL 1110)
  - One weekend field trip to a western national park, allowing students to observe geologic features and processes, and to gain hands-on practice in rock identification. Limited to 30 participants. Requires some strenuous hiking. Prerequisite or corequisite: GEO 1010. (F,Su)

- GEO 2250 Introductory Internship/Co-op 1.0-4.0
  - Introductory educational work experience. (F,Sp,Su)

- GEO 2500 Geology Field Excursions 1.0
  - Geologic features and processes observed in the field. Graded Pass/Fail only. Prerequisite: GEO 1010 or 1110. (F,Sp)

- GEO 3100 DSC Natural Disasters 3.0
  - Hazardous geologic processes affecting humans. Cause, prediction, avoidance, and frequency of natural disasters, including earthquakes, volcanic eruptions, tsunamis, landslides, floods, subsidence, meteorite impacts, and global changes. Topics discussed in the context of earth systems and cycles. Three lectures per week. Prerequisite: One Breadth Physical Sciences (BPS) course. (Sp)

- GEO 3200 DSC The Earth Through Time 4.0
  - Investigates dynamic nature of Earth’s physical and biological processes, and how these processes have shaped Earth’s 4.5 billion-year history. Emphasizes on interpretation of the story of the geologic record (rocks and landforms) and Earth’s sequential physical and biological changes. Three lectures and one two-hour lab per week. Prerequisite: GEO 1010 or 1110. (Sp)

- GEO 3300 DSC Geology of the World’s Oceans 3.0
  - Geologic evidence for the development of ocean basins and continental margins through plate tectonic processes. Also, the interaction of the geo- and biospheres and their effect on the evolution of the oceans and atmosphere. Discussion of shoreline and marine environments, the organisms inhabiting them, and the physical and chemical processes in operation therein. Three lectures per week. Prerequisite: One University Studies Breadth Physical Sciences (BPS) course. (Sp)

- GEO 3500 CI Mineralogy and Crystallography 4.0
  - Introduction to crystallography, crystal chemistry, and descriptive mineralogy. Three lectures and one three-hour lab per week. Prerequisites: CHEM 1210 and GEO 1110. (F)

- GEO 3520 Optical Mineralogy and Petrography 2.0
  - Introduction to the theory of optical crystallography. Determination of minerals using the petrographic microscope. One lecture and one lab per week. Prerequisite: GEO 3500. (Sp)

- GEO 3550 CI Sedimentation and Stratigraphy 4.0
  - Classification and analysis of sedimentary rocks and structures, with an emphasis on the interpretation of ancient sedimentary environments. Controls on sedimentary processes over time. Principles of stratigraphic correlation. Three lectures and one lab per week. Prerequisite: GEO 3200. (F)

- GEO 3600 Geomorphology 4.0
  - Geomorphic processes, origin of landforms and surficial deposits. Emphasizes fluvial and hillslope landscape elements, and surficial geologic mapping. Three one-hour lectures and one three-hour lab per week. Prerequisite: GEO 1010 or 1110 or GEOG 1000. Also taught as WATS 3600. (F)
Course Descriptions

GEO 3700  Structural Geology  4
Geometries, mechanisms, and mechanics of rock deformation. Stress and strain relationships, fault and fold classification and description. Lab presents applications and techniques for representing deformed rocks in map, cross section, and three-dimensional views; interpretation of deformed rocks. Three lectures and one lab per week. Prerequisite: GEO 1110. (Sp)

GEO 4250  Advanced Internship/Co-op  1-4°
Advanced educational work experience. (F,Sp,Su)

GEO 4500  Igneous and Metamorphic Petrology*  4
Origin, processes of formation, classification, and identification of igneous and metamorphic rocks. Study of igneous and metamorphic rocks in hand specimens and thin sections. Three lectures and one three-hour lab per week. Prerequisite: GEO 3500; corequisite: GEO 3520. (Sp)

GEO 4700 CI Geologic Field Methods*  3
Collection, recording, and interpretation of geologic deposits and processes in the field. Written reports with geologic maps, cross-sections, and graphs are required. Two extended lab periods per week, weekend day trips, and one lecture per week. Fieldwork will end early. Prerequisite: GEO 3700. (F)

GEO 4900  Special Problems  1-4°
Directed study of selected topics. Written report required. Prerequisite: Permission of instructor. (F,Sp)

GEO 5150  Fluvial Geomorphology  3
Focuses on physical processes in streams that control their shape, plan form, slope, bed material, and distribution of channel bars. Emphasizes field analysis of these topics, and application of geomorphology to aquatic ecology and environmental restoration. Prerequisite: GEO/WATS 3600. Also taught as WATS 5150/6150. (F)

GEO 5170 Fluvial Geomorphology Lab  2
Field analysis focuses on physical processes in streams which control their shape, plan form, slope, bed material, and distribution of channel bars. Application of geomorphology to aquatic ecology and environmental restoration. Prerequisite: GEO/WATS 3600. Also taught as WATS 5170/6170. (F)

GEO 5200  Geology Field Camp*  5
Integrative approach to examining geologic relationships in the field, deciphering geologic evolution of map regions, and interpreting the structure and distribution of rocks. Results presented in reports, maps, cross-sections, and graphical formats. Requires 40-45 hours of lab per week for 3.5-4.0 weeks. Prerequisites: GEO 3500, 3550, 3600, 3700, 4700. (Su)

GEO 5410 Introduction to Clay Mineralogy*  2
(dual listing 6410)
Introduction to and application of techniques, such as X-ray diffraction, differential thermal analysis, and chemical analysis, to study of clay minerals. Examination of the effects of clay mineral structures on physical and chemical properties. Three lectures and one lab per week, half semester. Prerequisite: GEO 3500. (Sp)

GEO 5420 Metallic Mineral Deposits*  4
(dual listing 6420)
Origin and occurrence of metallic mineral deposits, study of representative ore suites, and field trips to active mines. Three lectures and one lab per week. Prerequisite: GEO 4500. (Sp)

GEO 5430  Paleontology*  2
Survey of prominent microfossil and invertebrate taxa, including their diagnostic morphologic features, stratigraphic ranges, and environmental tolerances. Equips students with the necessary information and techniques to enable them to recognize and utilize fossils in stratigraphic and paleoenvironmental interpretation. Three lectures and one lab per week. Half semester; may be paired with GEO 5440. Prerequisite: GEO 3200. (F)

GEO 5440 CI Paleocology*  2
(dual listing 6440)
Interrelationships between various organisms and between organisms and their environment. Provides field, laboratory, and quantitative techniques for the interpretation of ancient environments and the analysis of past biotic interrelationships. Three lectures and one lab per week. Half semester; may be paired with GEO 5430. Prerequisite: GEO 5430. (F)

GEO 5460 Advanced Physical Sedimentology*  3
(dual listing 6460)
Detailed interpretation of sedimentary rocks, based on petrography and sedimentary characteristics. Source terranes, tectonic settings, depositional environments, and diagenetic changes during burial. Three lectures and two labs per week. Half semester. Prerequisites: GEO 3500 and 3550. (F)

GEO 5470 Chemical Sedimentary Rocks*  2
(dual listing 6470)
Application of field observations, hand-sample, thin-section, and X-ray diffraction analyses to the interpretation of chemical sedimentary rocks. Emphasizes determination of depositional environment and evaluation of diagenetic changes. Three lectures and one lab per week. Half semester. Prerequisites: GEO 3500 and 3550. (Sp)

GEO 5480 Sedimentary Basin Analysis  3
(dual listing 6480)
Detailed coverage of techniques of sedimentary basin analysis, including depositional systems, provenance, basin modeling, and fluid and heat flow history. Survey of types of sedimentary basins worldwide. Prerequisites: GEO 3500 and 3550. (F)

GEO 5500 Advanced Igneous Petrology*  4
(dual listing 6500)
Advanced concepts in the origin and evolution of magmatic systems, effects of different tectono thermal regimes on magma genesis, magma dynamics, and phase equilibria in magmatic systems. Concepts illustrated by rock suites from classic locations. Three lectures and three laboratory hours each week. Prerequisite: GEO 4500 or equivalent. (F)

GEO 5510 QI Groundwater Geology  3
Provides graduate students and senior undergraduates with understanding of fundamental principles of groundwater geology and hydrology, and helps prepare them for careers in hydrogeology or environmental geology. Three lectures per week. Prerequisites: GEO 1110 and MATH 1210 or permission of instructor; GEO/WATS 3600 recommended. (F)

GEO 5520 CI Techniques of Groundwater Investigations  3
(dual listing 6520)
Survey of techniques used in groundwater investigations for collecting physical and chemical data. Includes well drilling and construction; water level, flow rate, and discharge measurements; hydraulic and tracer tests; and groundwater sampling. Prerequisite: GEO 5510 or permission of instructor. (Sp)

GEO 5530 QI Petroleum Systems: Principles of Exploration and Development*  3
Analysis of the petroleum system from source to trap. Examines processes of generation, migration, and accumulation of oil and gas. Overview of petroleum economics and technology. Prerequisites: GEO 3550 and 3700; or permission of instructor. (Sp)

GEO 5540 QI Quantitative Methods in Geology*  3
(dual listing 6540)
Application of various quantitative methodologies to geologic problems. Two lectures and one lab per week. (F)

GEO 5550 Geochemical Application of Electron Microprobe and X-Ray Fluorescence Analysis*  4
Theory and application of X-ray fluorescence spectrometry and the electron microprobe to problems in geochemistry and materials analysis. Two hours lecture and six hours laboratory per week. Prerequisite: CHEM 1210 or equivalent, or permission of instructor. (Sp)

GEO 5560 Subsurface Analyses: Principles and Techniques*  1
Survey of techniques used to characterize subsurface geologic environments. Includes map and three-dimensional depictions, well-log analyses, reflection seismology, and volumetric and risk analysis. Prerequisites: GEO 3550, 3700, or permission of instructor. (Sp)
Course Descriptions

GEO 5600  Geochemistry  3
Application of thermodynamics, solution chemistry, phase diagrams, and both radioactive and stable isotopes to the understanding of earth processes. Three lectures per week. Prerequisite: GEO 3500. (F)

GEO 5610  Tectonic Evolution of North America*  3
(dual listing 6610)
Survey of tectonic styles and processes along plate margins, using the tectonic evolution of western North America as the prime example. Two lectures and one lab per week. Prerequisite: GEO 3700.

GEO 5620 QI  Global Geophysics*  3
(dual listing 6620)
Application of physics to understanding geologic processes, the earth's interior, and the theory of plate tectonics. Two lectures and one two-hour lab per week. Prerequisites: GEO 3700 and PHYS 2220.

GEO 5630  Photogeology*  3
Interpretation of geologic features on aerial photographs. Three two-hour labs per week. Half semester; may be paired with GEO 4700. Prerequisites: GEO 3600, 3700. (Sp)

GEO 5650  Senior Thesis  1-4
Prerequisite: Permission of instructor. (F,Sp)

GEO 5680 Paleoclimatology*  3
(dual listing 6680)
Covers climate through the past four billion years of geologic time. Explores driving forces behind climate changes. Examines data and methods used in paleoclimate research. Includes discussion of literature and stresses local paleoclimate records. Three lectures per week, along with field trips. Prerequisite: GEO/WATS 3600 or permission of instructor. Also taught as WATS 5680/6680. (Sp)

GEO 5900  Topics for Teachers  1-4
Special topics in geology for elementary and secondary science teachers to provide an understanding of the geology of Utah and the Western United States. Emphasis on field and lab activities. Prerequisite: Introductory geology course or permission of instructor.

GEO 6050  Graduate Seminar in Tectonics (Topic)  1-3
(dual listing 7050)
Advanced topics of current interest in tectonics and orogenesis. (F,Sp)

GEO 6100  Graduate Seminar in Geomorphology (Topic)  1-3
(dual listing 7100)
Advanced topics of current interest in geomorphology and landscape evolution. (F,Sp)

GEO 6120  Advanced Geomorphology*  3
(dual listing 7120)
Process geomorphology seminar focusing on hillslope, tectonic, and climatic geomorphology research. (Sp)

GEO 6150  Fluvial Geomorphology  3
(dual listing 5150)
Focuses on physical processes in streams that control their shape, plan form, slope, bed material, and distribution of channel bars. Emphasizes field analysis of these topics, and application of geomorphology to aquatic ecology and environmental restoration. Prerequisite: GEO/WATS 3600. Also taught as WATS 6150/5150. (F)

GEO 6160  Hillslope and Landscape Geomorphology*  3
(dual listing 5160)
Includes basics of hillslope weathering, transport, and hydrologic processes. Surveys classic and recent literature on hillslope-scale and landscape-scale geomorphic research. Three lectures and several Saturday field trips. Prerequisite: GEO/WATS 3600. Also taught as WATS 6160. (Sp)

GEO 6170  Fluvial Geomorphology Lab  2
(dual listing 5170)
Field analysis focuses on physical processes in streams which control their shape, plan form, slope, bed material, and distribution of channel bars. Application of geomorphology to aquatic ecology and environmental restoration. Prerequisite: GEO/WATS 3600. Also taught as WATS 6170/5170. (F)

GEO 6200  Graduate Seminar in Geochemistry (Topic)  1-3
Advanced topics of current interest in geochemistry. (F,Sp)

GEO 6240  Structural Analysis of Deformed Geological Materials*  3
Explores how rocks, sediments, ice, and soils deform. By examining the geometry, kinematics, mechanics, and mechanisms of deformation, students learn how to interpret deformed materials in the field and laboratory.

GEO 6250  Mechanics and Processes in Earth Sciences*  3
(dual listing 7250)
Fundamentals of solid and fluid mechanics with applications to the earth sciences. Applications to rock deformation, fluid flow, glacier movement, and slope stability. Designed for graduate students in earth sciences and engineering. Two lectures, one lab per week. Prerequisites: MATH 1210, PHYS 2210, and graduate standing. (Sp)

GEO 6300  Graduate Seminar in Petrology (Topic)  1-3
Advanced topics of current interest in petrology of igneous, metamorphic, or sedimentary rocks. (F,Sp)

GEO 6350 Graduate Seminar in Paleontology and Paleocology (Topic)  1-3
Advanced topics in paleontology, paleoecology, and the evolution of ancient life. (F,Sp)

GEO 6400  Graduate Seminar in Sedimentary Geology (Topic)  1-3
Advanced topics of current interest in sedimentary geology, depositional systems, and basin evolution. (F,Sp)

GEO 6410 Introduction to Clay Mineralogy*  2
(dual listing 5410)
Introduction to and application of techniques, such as X-ray diffraction, differential thermal analysis, and chemical analysis, to study of clay minerals. Examination of the effects of clay mineral structures on physical and chemical properties. Three lectures and one lab per week; half semester. Prerequisite: GEO 3500. (Sp)

GEO 6440 Paleocology*  2
(dual listing 5440)
Interrelationships between various organisms and between organisms and their environment. Provides field, laboratory, and quantitative techniques for the interpretation of ancient environments and the analysis of past biotic interrelationships. Three lectures and one lab per week. Half semester; may be paired with GEO 5430. Prerequisite: GEO 5430. (F,Sp)

GEO 6460 Advanced Physical Sedimentology*  3
(dual listing 5460)
Detailed interpretation of sedimentary rocks, based on petrography and sedimentary characteristics. Source terranes, tectonic settings, depositional environments, and diagenetic changes during burial. Three lectures and two labs per week. Half semester. Prerequisites: GEO 3500 and 3550. (F)

GEO 6470 Chemical Sedimentary Rocks*  2
(dual listing 5470)
Application of field observations, hand-sample, thin-section, and X-ray diffraction analyses to the interpretation of chemical sedimentary rocks. Emphasizes determination of depositional environment and evaluation of diagenetic changes. Three lectures and one lab per week. Half semester. Prerequisites: GEO 3500 and 3550. (Sp)

GEO 6480 Sedimentary Basin Analysis  3
(dual listing 5480)
Detailed coverage of techniques of sedimentary basin analysis, including depositional systems, provenance, basin modeling, and fluid and heat flow history. Survey of types of sedimentary basins worldwide. Prerequisites: GEO 3500 and 3550. (F)
Course Descriptions

GEO 6500  Advanced Igneous Petrology* 4
(dual listing 5500)
Advanced concepts in the origin and evolution of magmatic systems, effects of different tectonic thermal regimes on magma genesis, magma dynamics, and phase equilibria in magmatic systems. Concepts illustrated by rock suites from classic locations. Three lectures and three laboratory hours each week. Prerequisite: GEO 4500 or equivalent. (F)

GEO 6510  Graduate Seminar in Hydrology (Topic) 1-3*
(dual listing 7510)
Advanced topics of current interest in hydrology. (F,Sp)

GEO 6520  Techniques of Groundwater Investigations 3
(dual listing 5520)
Survey of techniques used in groundwater investigations for collecting physical and chemical data. Includes well drilling and construction; water level, flow rate, and discharge measurements; hydraulic and tracer tests; and groundwater sampling. Prerequisite: GEO 5510 or permission of instructor. (Sp)

GEO 6540  Quantitative Methods in Geology* 3
(dual listing 5540)
Application of various quantitative methodologies to geologic problems. Two lectures and one lab per week.

GEO 6550  Geochemical Application of Electron Microprobe and X-Ray Fluorescence Analysis* 4
Theory and application of X-ray fluorescence spectrometry and the electron microprobe to problems in geochemistry and materials analysis. Two hours lecture and six hours laboratory per week. Prerequisite: CHEM 1210 or equivalent, or permission of instructor. (Sp)

GEO 6600  Graduate Seminar in Geophysics (Topic) 1-3*
(dual listing 7600)
Advanced topics of current interest in geophysics. (F,Sp)

GEO 6610  Tectonic Evolution of North America* 3
(dual listing 5610)
Survey of tectonic styles and processes along plate margins, using the tectonic evolution of western North America as the prime example. Two lectures and one lab per week. Prerequisite: GEO 3700.

GEO 6620  Global Geophysics* 3
(dual listing 5620)
Application of physics to understanding geologic processes, the earth’s interior, and the theory of plate tectonics. Two lectures and one two-hour lab per week. Prerequisites: GEO 3700 and PHYS 2220.

GEO 6680  Paleoclimatology* 3
(dual listing 5680)
Covers climate through the past four billion years of geologic time. Explores driving forces behind climate changes. Examines data and methods used in paleoclimate research. Includes discussion of literature and stresses local paleoclimate records. Three lectures per week, along with field trips. Prerequisites: GEO/WATS 3600 or permission of instructor. Also taught as WATS 6680/5680. (Sp)

GEO 6700  Graduate Seminar in Structural Geology (Topic) 1-3*
(dual listing 7700)
Advanced topics of current interest in structural geology. (F,Sp)

GEO 6800  Seminar 1-4*
Graduate educational work experience. Prerequisite: Approval of contract between student and department prior to enrollment. (F,Sp)

GEO 6900  Graduate Internship/Co-op Experience 1-6
Graduate educational work experience. Prerequisite: Approval of contract between student and department prior to enrollment. (F,Sp, Su)

GEO 6970  Thesis 1-9*
Graded Pass/Fail only. (F,Sp, Su)

GEO 6990  Continuing Graduate Advisement 1-3*
Graded Pass/Fail only. (F,Sp, Su)

GEO 7050  Graduate Seminar in Tectonics (Topic) 1-3*
(dual listing 6050)
Advanced topics of current interest in tectonics and orogenesis. (F,Sp)

GEO 7100  Graduate Seminar in Geomorphology (Topic) 1-3*
(dual listing 6100)
Advanced topics of current interest in geomorphology and landscape evolution. (F,Sp)

GEO 7120  Advanced Geomorphology* 3
(dual listing 6120)
Process geomorphology seminar focusing on hillslope, tectonic, and climatic geomorphology research. (Sp)

GEO 7200  Graduate Seminar in Geochemistry (Topic) 1-3*
(dual listing 6200)
Advanced topics of current interest in geochemistry. (F,Sp)

GEO 7250  Mechanics and Processes (dual listing 6250) in Earth Sciences* 3
Fundamentals of solid and fluid mechanics with applications to the earth sciences. Applications to rock deformation, fluid flow, glacier movement, and slope stability. Designed for graduate students in earth sciences and engineering. Two lectures, one lab per week. Prerequisites: MATH 1210, PHYS 2210, and graduate standing. (Sp)

GEO 7300  Graduate Seminar in Petroleum (Topic) 1-3*
Advanced topics of current interest in petrology of igneous, metamorphic, or sedimentary rocks. (F,Sp)

GEO 7350  Graduate Seminar in Paleontology (dual listing 6350) and Paleoclimatology (dual listing 6350) in Earth Sciences* 3
Advanced topics in paleontology, paleoclimatology, and the evolution of ancient life. (F,Sp)

GEO 7400  Graduate Seminar in Sedimentary Geology (Topic) 1-3*
(dual listing 6400)
Advanced topics of current interest in sedimentary geology, depositional systems, and basin evolution. (F,Sp)

GEO 7510  Graduate Seminar in Hydrology (Topic) 1-3*
(dual listing 6510)
Advanced topics of current interest in hydrology. (F,Sp)

GEO 7600  Graduate Seminar in Geophysics (Topic) 1-3*
(dual listing 6600)
Advanced topics of current interest in geophysics. (F,Sp)

GEO 7700  Graduate Seminar in Structural Geology (Topic) 1-3*
(dual listing 6700)
Advanced topics of current interest in structural geology. (F,Sp)

GEO 7800  Graduate Seminar Series 1*
Graded Pass/Fail only. (F,Sp, Su)

GEO 7970  Dissertation Research 1-12*
Graded Pass/Fail only. (F,Sp, Su)

GEO 7990  Continuing Graduate Advisement 1-9*
Graded Pass/Fail only. (F,Sp, Su)

*This course is taught alternating years. Check with department for information about when course will be taught.
1Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.
2This course is also offered by online correspondence and/or CD through Independent and Distance Education.

**GEOG 5130**  
Geography Education Field Practicum (dual listing 6130)  
Specifically designed for undergraduate students and graduate students (teachers) who need specific classroom teaching experience in order to improve their quality of teaching and/or to carry out special classroom curriculum research as part of their geography education degrees. (F,Sp,Su)

**GEOG 5650**  
Developing Societies (dual listing 6650)  
Reviews how sociology, cultural geography, and economic anthropology analyze processes of globalization in postcolonial societies. Examines changing living patterns, patterns of spatial incorporation and sociocultural evolution, and emergent policy problems associated with rapid socioeconomic change. Also taught as ANTH 5650/6650 and SOC 5650/6650. (F)

**GEOG 5810**  
Geography Education Inservice Workshop (dual listing 6810)  
Assists classroom teachers in broadening their perspective of Geography Education through increased knowledge, improving their geographic techniques, methods, and teaching resources for their classrooms. (F,Sp,Su)

**GEOG 5900**  
Graduate Special Topics (dual listing 6900)  
Designed for geography students involved in field research and/or internships. Provides opportunity for students to gain practical applied experience in their specialized academic emphasis in geography. (F,Sp,Su)

**GEOG 5970**  
Classroom Technology in Geography Education  
Design, development, and application of contemporary technologies and multimedia classroom teaching resources for preservice and inservice geography education teachers. (F,Su)

**GEOG 6130**  
Geography Education Field Practicum (dual listing 5130)  
Specifically designed for undergraduate students and graduate students (teachers) who need specific classroom teaching experience in order to improve their quality of teaching and/or to carry out special classroom curriculum research as part of their geography education degrees. (F,Sp,Su)

**GEOG 6200**  
Advanced Regional Geography  
Critical analysis of world’s regions, focusing on analysis and synthesis of a region’s economic, political, population, and cultural themes in the context of physical environment and global processes. Repeatable for different regions. (F,Sp,Su)

**GEOG 6300**  
Geography Education (dual listing 4300) Classroom Practicum  
Allows geography education students to participate in actual geography classroom teaching with experienced geography teachers. Students observe, work with individuals and groups of students, team-teach lesson(s) with the teacher, and self-teach individual lesson(s). (F,Sp,Su)

**GEOG 6650**  
Developing Societies (dual listing 5650)  
Reviews how sociology, cultural geography, and economic anthropology analyze processes of globalization in postcolonial societies. Examines changing livelihoods, patterns of spatial incorporation and sociocultural evolution, and emergent policy problems associated with rapid socioeconomic change. Also taught as ANTH 6650/5650 and SOC 6650/5650. (F)

**GEOG 6800**  
Teaching Geography (dual listing 4800)  
Designed specifically for geography education/social studies education students preparing to teach grades K-12. Exploration of national and state standards and core curriculum, as well as state-of-the-art geography education technology and teaching resources. Students develop teaching lessons, and gain classroom teaching experience with local geography teachers. (F)

**GEOG 6810**  
Geography Education Inservice Workshop (dual listing 5810)  
Assists classroom teachers in broadening their perspective of Geography Education through increased knowledge, improving their geographic techniques, methods, and teaching resources for their classrooms. (F,Sp,Su)

<tbody>
<tr>
<td>GEOG 6900</td>
<td>Graduate Special Topics</td>
<td>1-4</td>
<td>Designed for geography students involved in field research and/or internships. Provides opportunity for students to gain practical applied experience in their specialized academic emphasis in geography. (F,Sp,Su)</td>
</tr>
<tr>
<td>GERM 1010</td>
<td>German First Year I</td>
<td></td>
<td>Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Not open to those with more than one year high school German or equivalent. (F,Sp)</td>
</tr>
<tr>
<td>GERM 1020</td>
<td>German First Year II</td>
<td></td>
<td>Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Prerequisite: GERM 1010 or at least one (but not more than two) years of German in high school or equivalent. (F,Sp)</td>
</tr>
<tr>
<td>GERM 1800</td>
<td>German I Study Abroad</td>
<td>1-4</td>
<td>Intensive study in a German-speaking country, advancing proficiency in the four language skills and multicultural knowledge at the beginning level. No prerequisites. (Su)</td>
</tr>
<tr>
<td>GERM 2010</td>
<td>German Second Year I</td>
<td></td>
<td>Further development of first-year competencies with emphasis on language structure, vocabulary expansion, reading, writing, and conversation in the context of cross-cultural analysis. Prerequisite: GERM 1020 or equivalent. (F,Sp)</td>
</tr>
<tr>
<td>GERM 2020</td>
<td>German Second Year II</td>
<td></td>
<td>Further development of first-year competencies with emphasis on language structure, vocabulary expansion, reading, writing, and conversation in the context of cross-cultural analysis. Prerequisite: GERM 1020 or equivalent. (F,Sp)</td>
</tr>
<tr>
<td>GERM 2550</td>
<td>German Civilization*</td>
<td></td>
<td>Covers the most important developments in German-speaking countries from the High Middle Ages to the present. Deals with political, social, literary, historical, and artistic expressions of an emerging culture. Taught in English. (F)</td>
</tr>
<tr>
<td>GERM 2570</td>
<td>Contemporary Germany**</td>
<td></td>
<td>Covers the most important elements of contemporary German culture in its literary, social, and artistic manifestations, and the political and historical dimensions of agents of change. Taught in English. (Sp)</td>
</tr>
<tr>
<td>GERM 2800</td>
<td>German II Study Abroad</td>
<td>1-4</td>
<td>Intensive study in a German-speaking country, advancing proficiency in the four language skills and multicultural knowledge at the second-year level. (Su)</td>
</tr>
<tr>
<td>GERM 2880</td>
<td>Individual Readings</td>
<td>1-4</td>
<td>Individual study of selected readings in German. Prerequisite: Instructor’s permission. (F,Sp)</td>
</tr>
<tr>
<td>GERM 3000</td>
<td>DHA Introduction to German Studies</td>
<td></td>
<td>Introduction to the discipline of German Studies (history, literature, the arts, philosophy, science, economics, politics, etc.), addressing information resources, research methods, student career goals, and practice. Advances oral and written language proficiency. (F)</td>
</tr>
<tr>
<td>GERM 3040 CI</td>
<td>Advanced German Grammar and Composition</td>
<td>3</td>
<td>Thorough review of German grammar and style. Application of rules of writing to compositions. Oral presentations of contemporary topics with graded difficulty. (F) (Sp)</td>
</tr>
<tr>
<td>GERM 3050 CI</td>
<td>Advanced German Grammar and Composition</td>
<td>3</td>
<td>Multidisciplinary examination of current trends in contemporary cultures. Written, oral, visual, and electronic texts from the post-World War II period will be analyzed and placed in sociopolitical, economic, historical, and literary contexts. Emphasis on Germany as a multicultural society, and on related popular and minority culture discourse. Interactive format. (Sp)</td>
</tr>
<tr>
<td>GERM 3300 DHA</td>
<td>Contemporary German Speaking Cultures</td>
<td>3</td>
<td>Overview and critical analysis of cultural, historical, and intellectual developments that have shaped the civilizations of German-speaking peoples from 800 A.D. to the end of World War II. Examination of written, oral, visual, and electronic texts integrated in the context of Western philosophy and humanist thought. Interactive format. (F)</td>
</tr>
<tr>
<td>GERM 3500 CI</td>
<td>Business German**</td>
<td>3</td>
<td>Study of current German business and commercial practices, terminology, and business-related communications skills in a multi-disciplinary and global world context. Advances the four language skills. (Sp)</td>
</tr>
<tr>
<td>GERM 3540 CI</td>
<td>Techniques in Translating German Texts*</td>
<td>3</td>
<td>Approaches to translation. Specialized vocabulary, reference materials, and aids. Translation theory. Practical exercises. (F)</td>
</tr>
<tr>
<td>GERM 3550 DHA</td>
<td>Cultural History of German Speaking Peoples**</td>
<td>3</td>
<td>Overview and critical analysis of cultural, historical, and intellectual developments that have shaped the civilizations of German-speaking peoples from 800 A.D. to the end of World War II. Examination of written, oral, visual, and electronic texts integrated in the context of Western philosophy and humanist thought. Interactive format. (F)</td>
</tr>
<tr>
<td>GERM 3600 DHA</td>
<td>Survey of German Literature I**</td>
<td>3</td>
<td>Overview, with selected readings, of the major literary trends in German-speaking cultures from the medieval period to the early nineteenth century, including the study of genres, epochs, styles, and theories in the context of evolving cultures. (F)</td>
</tr>
<tr>
<td>GERM 3610 DHA</td>
<td>Survey of German Literature II**</td>
<td>3</td>
<td>Overview, with selected readings, of the major literary trends in German-speaking cultures from the medieval period to the early nineteenth century, including the study of genres, epochs, styles, and theories in the context of evolving cultures. (Sp)</td>
</tr>
<tr>
<td>GERM 3800</td>
<td>German III Study Abroad</td>
<td>1-4</td>
<td>Intensive study in a German-speaking country, advancing proficiency in the four language skills and multicultural knowledge at the third-year level. (Su)</td>
</tr>
<tr>
<td>GERM 3880</td>
<td>Individual Readings</td>
<td>1-4</td>
<td>Individual study of selected readings in German. Prerequisite: Instructor’s permission. (F,Sp)</td>
</tr>
<tr>
<td>GERM 4200</td>
<td>Applied German Linguistics and Phonetics**</td>
<td>3</td>
<td>Discussion of syntactical and morphological problems of German, principles of language learning, and analysis of phonological and phonetic patterns. (Sp)</td>
</tr>
<tr>
<td>GERM 4600</td>
<td>Faust’s Legacy**</td>
<td>3</td>
<td>Examination of the legend of Faust through historical and contemporary perspectives. Analysis of the Faust theme and character as presented in literature, films, stage productions, and musicals. Taught in English. (F)</td>
</tr>
<tr>
<td>GERM 4610</td>
<td>German Narratives**</td>
<td>3</td>
<td>Readings from a wide range of narrative texts representing various historical periods. Focus on literary traditions within historical contexts. Examination of styles, motifs, and the theory of the novel. (Sp)</td>
</tr>
<tr>
<td>GERM 4650 DHA</td>
<td>Trends in Modern German Literature*</td>
<td>3</td>
<td>Study of literary movements, topics, and styles of modern (twentieth century) German literature. Concentration on texts representing a variety of aesthetic expressions, central to experiences of twentieth-century life. (F)</td>
</tr>
</tbody>
</table>

---

**Upper Division**

Upper-division German courses (3000 level and above) are available only to students who have completed GERM 2020 or who can demonstrate equivalent proficiency through testing. All upper-division courses are taught in German, unless otherwise indicated.

**GERM 3000 DHA Introduction to German Studies**

Introduction to the discipline of German Studies (history, literature, the arts, philosophy, science, economics, politics, etc.), addressing information resources, research methods, student career goals, and practice. Advances oral and written language proficiency. (F)

**HEP 5950 Independent Research**
Prerequisite: Consent of instructor. (F,Sp,Su)

**HEP 4700H Honors Senior Thesis**
Requirements for the honors thesis include: (1) a detailed review of scholarly literature on the health topic of interest to the student, and (2) the collection of primary data on the topic of interest (e.g., through interviews, surveys, focus groups, etc.), which must include references. The student must meet regularly with the faculty mentor, who will help with the development of the honors thesis. (F,Sp,Su)

**HEP 5000 CI Race, Culture, Class, and Gender Issues in Health**
Focuses on how multicultural issues affect health status and health choices. Special emphasis on how race, ethnicity, culture, socioeconomic status, and gender impact health status and access to health care. Prerequisite: Junior standing. (Sp)

**HEP 5100 CI Cultural and Complementary Medicine**
Provides in-depth view into health beliefs, traditions, and practices of various cultures and of the major minority groups in the U.S. Emphasizes ancient, eastern, and native health practices collectively known as complementary medicine and healing modalities. (Arr)

**HEP 5200 International Health**
Explores meaning of “health” through the lens of different cultures. Provides an international comparison of health status, including morbidity and mortality data. Evaluates different programs, policies, and strategies for addressing international health problems. Prerequisite: Junior standing. (Arr)

**HEP 5300 Grant Proposal Writing**
Teaches practical skills needed to plan and write proposals for federal, state, local, and private funding. Students develop proposals in area in which they have developed expertise, and coordinate with a local agency for funding. Prerequisites: HEP 2500, fulfillment of Communications Literacy CL2 requirement, and passing score on Computer and Information Literacy (CIL) Exam. (Sp)

**HEP 5500 Student Teaching Seminar**
Weekly seminar dealing with the professional practice of school health education. Graded Pass/Fail only. Prerequisite: HEP 4400. (F,Sp)

**HEP 5630 Student Teaching**
Practical experience teaching health in the public school system. Graded Pass/Fail only. Prerequisite: HEP 4400. (F,Sp)

**HEP 5700 Special Topics in Health**
1-6 Credit
In-depth review and discussion of special topics in health. May be graded Pass/ Fail, as determined by instructor or section. (Arr)

**HEP 5900 Independent Study**
Prerequisite: Consent of instructor. (F,Sp,Su)

**HEP 5950 Independent Research**
Prerequisite: Consent of instructor. (F,Sp,Su)

**HEP 6000 Evaluating Health-Promotion Programs**
Students learn to develop and carry out a health-promotion program evaluation, interpret the results of an evaluation, and identify implications for future program planning. (Sp)

**HEP 6100 Current Trends in Health Promotion**
Focuses on trends and issues in the promotion of health behaviors in a variety of settings. Analyzes and challenges prevailing assumptions and philosophies in relation to health promotion. (F)

**HEP 6250 Graduate Cooperative Work Experience**
Professional level of education work experience in a cooperative education position for graduate students. Prerequisite: Consent of instructor. (F,Sp,Su)

</tr>
<tr>
<td>HIST 3410</td>
<td>The Modern Middle East</td>
<td>3</td>
<td>Examines history of the Middle East (Arabian peninsula, Fertile Crescent, Egypt, Iran, and Turkey), with special emphasis on social and political currents which have shaped the area’s history.</td>
</tr>
<tr>
<td>HIST 3460</td>
<td>Comparative Asian History</td>
<td>3</td>
<td>Surveys history of Asian continent, analyzing common patterns in the cultures of West, South, Southeast, and East Asia.</td>
</tr>
<tr>
<td>HIST 3480</td>
<td>History of China</td>
<td>3</td>
<td>Development of traditional Chinese culture and effect on that culture of the growth of Western influence. Writing and computer intensive.</td>
</tr>
<tr>
<td>HIST 3490</td>
<td>Survey of Japanese History</td>
<td>3</td>
<td>Surveys history of Japan from its beginnings to the present. Explores early Japan’s cultural, social, and economical evolution. Covers feudal Japan and its transition toward joining the fraternity of nations. Studies World War II and its effects on Japan. Discusses contemporary conditions of Japan. (F)</td>
</tr>
<tr>
<td>HIST 3510</td>
<td>Africa and the World</td>
<td>3</td>
<td>Explores foundation of Africa’s contemporary problems. Surveys Africa’s history of interactions with Asia and Europe. In addition to writing several short essays covering readings and films, students investigate an aspect of cultural, political, or economic interaction and prepare a short research paper.</td>
</tr>
<tr>
<td>HIST 3530</td>
<td>African Environmental History</td>
<td>3</td>
<td>Surveys changing historical relationship between Africans and their physical environment. Readings cover ecological change in arid, savanna, rain forest, and montane environments. Students also perform survey and evaluate the methods and sources used by environmental historians to explain environmental stress, degradation, and rehabilitation.</td>
</tr>
<tr>
<td>HIST 3550</td>
<td>DHA Culture of East Asia</td>
<td>3</td>
<td>Helps students explore and appreciate the culture of three East Asian countries: China, Japan and Korea. Students gain sincere view and understanding of these East Asian cultures through readings, hands-on cultural activities, viewing video materials, writing, and discussions. Topics include: major historical and social events, customs and traditions, thoughts and beliefs, people, food, contemporary issues, art, literature, and film. Also taught as ANTH 3550 and LANG 3550.</td>
</tr>
<tr>
<td>HIST 3620</td>
<td>History of Colonial Latin America</td>
<td>3</td>
<td>Surveys art, culture, religion, and social organization of the Aztecs, Incas, and Mayas, and of the European dominated post-conquest. Introduces students to major historiographical problems in the field. Prerequisite: Fulfillment of Communications Literacy CL2 requirement.</td>
</tr>
<tr>
<td>HIST 3630</td>
<td>History of Modern Latin America</td>
<td>3</td>
<td>Introduces history and historiography of Latin America from the wars of independence to the contemporary era. Writing intensive.</td>
</tr>
<tr>
<td>HIST 3640</td>
<td>History of Social Movements in Latin America</td>
<td>3</td>
<td>Examines the changing nature of social movements in Latin America from the nineteenth century to the present. Topics include social movements concerning citizenship, religion, unions, feminism, torture, poverty, indigenous rights, and environmentalism. Prerequisite: Fulfillment of Communications Literacy CL2 requirement.</td>
</tr>
<tr>
<td>HIST 3650</td>
<td>Caribbean History</td>
<td>3</td>
<td>Surveys the Caribbean from pre-Columbian cultures to the present, with special emphasis on slavery, colonialism, piracy, immigration, independence and revolutionary movements, nation-building, artistic creation, and tourism. Prerequisite: Fulfillment of Communications Literacy CL2 requirement.</td>
</tr>
<tr>
<td>HIST 3660</td>
<td>History of Mexico</td>
<td>3</td>
<td>Surveys Mexico from the rise of indigenous states to the present, with special emphasis on indigenous culture, colonialism, independence, the U.S.-Mexican War, the French Intervention, the Mexican Revolution, political reform, everyday life, globalization, and border issues. Prerequisite: Fulfillment of Communications Literacy CL2 requirement.</td>
</tr>
<tr>
<td>HIST 3670</td>
<td>Slavery in the Atlantic World</td>
<td>3</td>
<td>Examines slavery in the Americas from the Atlantic perspective (including Africa and Europe) from the Fifteenth Century until abolition, with special emphasis on the slave trade, the plantation system, daily life, slavery and race, resistance, the Haitian Revolution, and abolition in the Americas. Prerequisite: Fulfillment of Communications Literacy CL2 requirement.</td>
</tr>
<tr>

<td>3</td>
<td>Study of folklore and folklife as they relate to regional cultures. Also taught as ENGL 3700. (F,Sp)</td>
</tr>
<tr>
<td>HIST 3710</td>
<td>CI Folklore Colloquium</td>
<td>3</td>
<td>Issues, problems, and methodologies in folklore study. Focus and instructor variable. Also taught as ENGL 3710. (Sp)</td>
</tr>
<tr>
<td>HIST 3720</td>
<td>Colonial America</td>
<td>3</td>
<td>Advanced survey of North American Colonies, emphasizing British experience, from their founding to 1763. Addresses major issues of interpreting America’s beginnings. (F)</td>
</tr>
<tr>
<td>HIST 3730</td>
<td>The New American Nation</td>
<td>3</td>
<td>Advanced survey of American history from 1763 to 1800, with special emphasis on historiography of the Revolution, creation of a Republic, and efforts to define the New Nation. (Sp)</td>
</tr>
<tr>
<td>HIST 3740</td>
<td>United States in the Age of Jefferson and Jackson</td>
<td>3</td>
<td>Examines history of United States from 1800 to 1846, from election of Jefferson to outbreak of war with Mexico. Prerequisite: Fulfillment of Communications Literacy CL2 requirement. (F)</td>
</tr>
<tr>
<td>HIST 3750</td>
<td>Civil War and Reconstruction</td>
<td>3</td>
<td>Analysis of most trying period in U.S. history, with special emphasis on the course and results of the war. Prerequisite: Fulfillment of Communications Literacy CL2 requirement. (Sp)</td>
</tr>
</tbody>
</table>
HIST 3760 DHA/CI The United States, 1900-1945  3
Analyzes scholars' approaches to U.S. history in the early twentieth century, with attention to socio-economic change, political reform, and transforming impact of American involvement in two world wars. Writing intensive. Prerequisite: Fulfillment of Communications Literacy CL2 requirement. (Sp)

HIST 3770 Contemporary America, 1945-Present  3<sup>o</sup>
Domestic and foreign policy since World War II. Emphasizes Cold War, Civil Rights, and the political and social developments of contemporary United States. Contains intensive writing component. (F)

HIST 3840 Twentieth Century American West  3
Considers emerging scholarly literature about the American West in the twentieth century, with attention to economic, environmental, and demographic questions. (Sp)

HIST 3850 DHA/CI History of Utah  3<sup>o</sup>
Prehistory to the present. Examines environment and peoples of Utah, emphasizing use of primary documents to view and interpret Utah's past. Reading and writing intensive. Requires use of USU Special Collections and Archives. Prerequisite: Fulfillment of Communications Literacy CL2 requirement. (Sp)

HIST 3900 DSC Science and Technology in World History  3
Explores the nature of scientific and technological change. Employs historical approach as the means for exploring the relationships between science, technology, and human values. Investigates how science and technology have shaped economic, political, military, societal, environmental, and cultural life. Prerequisites: Passing scores on all Computer and Information Literacy (CIL) exams, fulfillment of Communications Literacy CL2 requirement. (F)

HIST 3950 DHA/CI Environmental History  3
Surveys writings from a relatively new genre of historical scholarship that attempts to explain the relationship between human society and the natural world. Readings focus on North America, but students also have opportunity to survey materials from the non-Western world. Course is reading and writing intensive, and requires students to conduct a research project in which they construct the history of a particular landscape.

HIST 4010 Buddhism in the West**  3
One-semester introduction to Buddhism in the Western world for nonspecialists in Buddhism. Focuses on development of Buddhism as a Western religious phenomenon. Presents interpretive, historical introduction to Buddhism in the West. Also taught as RELS 4010.

HIST 4210 Celtic Europe  3
History of Celtic peoples in British Isles, Scandinavia, and continental Europe, from Neolithic times to the Norman Conquest in 1066. Computer intensive. (F,Sp)

HIST 4230 DHA/CI The History of Christianity in the West  3
Introduces students to history of Christian spirituality, asking how Christianity has been lived and how it has shaped lives over two thousand years. Uses original sources to introduce both the history and the historiographical problems surrounding the Christian religion. Writing intensive.

HIST 4250 The Reformation in Britain: 1450-1688  3
Focuses on major research questions in the field of early modern studies. Explores causes and consequences of English Reformation and British Civil War. Writing and research intensive.

HIST 4290 Europe and the French Revolution, 1700-1815  3
Examines causes and consequences of the French Revolution, introducing students to major themes in its interpretation.

HIST 4310 History of Nationalism  3
Examines development of nationalism. Addresses different theories of nationalism, and then tests these theories with various case studies. Emphasizes research and writing.

HIST 4320 DHA History of Scientific Thought  3
Examination of key episodes in the history of science and associated ideas about the nature of scientific knowledge and how it may be acquired. Also taught as PHIL 4320. (Sp)

HIST 4330 Modern Germany with Special Emphasis on the Twentieth Century  3
Historical survey of Germany beginning with Frederick the Great of Prussia, and considering the parallel history of the Habsburg empire and the Germany of the Kleinstaaterei. Considers wars and economic and political developments beginning in 1871, which produced the Nazi period. Prerequisite: HIST 1110.

HIST 4390 British Imperialism from 1688 to the Present  3
Topical survey of British Imperialism from 1688 to the present. Topics include the interaction of British imperialism with foreign policy; social, economic, and political institutions; the life of the mind and senses; and non-European cultures. Prerequisite: HIST 1110.

HIST 4400 DHA History of Aviation and Aeronautics  3
Traces aeronautics from its origins to the present day. Examines selected topics concerning flight within the earth's atmosphere from an international perspective, with particular emphasis on the United States of America.

HIST 4510 The History of Urban America  3
Examines the history of communities, cities, and suburbs in American history, from the Colonial era to the present. Explores how forces, including immigration, economic growth, and technological change, shaped American cities. Also examines subjects connected to urban history, including architectural history, as well as the history of landscape architecture and urban planning.

HIST 4550 DHA/CI Women and Gender in America  3
Writing intensive course drawing on film, primary documents, and readings to trace the history of women, emphasizing race, class, and gender influences of each era. Also taught as WGS 4550. (F)

HIST 4600 DHA/CI The History of the American West  3
Traces major themes in nineteenth century history of the land between the Mississippi River and the Pacific Coast. In a writing intensive course, students use primary documents and secondary materials to discover the race, class, and gender issues that shaped the American West.

HIST 4610 Themes and Methods in Economic History  3
Themes and methods in economic history, drawing on various societies and time periods. Designed to prepare future historians to work in their field. Prerequisite: MATH 1030 or STAT 1040.

HIST 4620 CI Advanced Seminar in American Studies  3
Practical introduction to theories and methods of American Studies, utilizing interdisciplinary research around a central theme, subject, or text(s). Strongly recommended for American Studies majors and American Studies minors. Open to students who have taken three courses in literature and/or history. Also taught as ENGL 4620. (F,Sp)

HIST 4630 The History of Mexican Americans  3
Reading-intensive and writing-intensive course, examining the historical experiences of Mexican Americans, from prior to the U.S. annexation of Northern Mexico in 1848 to the present. Special emphasis given to immigration and migration, labor, gender, race and ethnicity, and the social and cultural evolution of Mexican Americans within American society.

HIST 4640 CI Studies in the American West  3
Interdisciplinary course in American Studies, exploring the region of the West through the analysis of literary texts, historical sources, and socio-cultural materials. Also taught as ENGL 4640. (F,Sp)

HIST 4700 Folk Material Culture**  3
Study of folk objects and their connections with culture and history. Also taught as ENGL 4700. (Sp)

HIST 4710 American Indian History  3
Prehistory to the present. Emphasizes ethnohistory and the Western U.S., focusing on intercultural contacts, subsistence and environmental change, and contemporary political and economic issues, while analyzing primary documents and secondary readings. (F)

HIST 4720 CI/DHA The Civil Rights Movement  3
Traces struggle of black Americans for equality since emancipation, with emphasis on the post-World War II period. Focuses on the individuals and
Course Descriptions

social trends that laid the groundwork for change by the mid-Twentieth Century. Prerequisite: Fulfillment of Communications Literacy CL2 requirement. (F,Sp)

**HIST 4730 CI** History of Black America 3 Study of African-American experience from slavery to freedom, as well as the difficult quest for democracy and equality in contemporary America. Includes both creative and research writing components. (Sp)

**HIST 4740** American Immigration History 3 Examines history of immigration to the United States from Europe, Africa, Latin America, and Asia. Requires library research, especially in government documents, and use of oral history techniques. (F)

**HIST 4750** Advanced Folklore Workshop: Fife Conference 3 Focuses on one theme or topic in folklore, and offers lectures from nationally prominent scholars in the area. Taught during one week, every day and all day. Also taught as ENGL 4750. (Su)

**HIST 4780 DHA** American Financial History 3 Explores American financial history from the nineteenth century to the present. Covers historical development of the U.S. banking system, the stock market, coins and currency, the Federal Reserve system, accounting practices, credit, monetary policy, taxation, and personal finance. (Sp)

**HIST 4790** American Religious History** 3 Varieties of American religious experience from settlement to the present.

**HIST 4800** The Supreme Court and American Constitutional History 3 Examines many of the major arguments made about the Constitution, which were presented before the Supreme Court of the United States. Also taught as POLS 4800.

**HIST 4810** American Military History 3 Covers evolution of the military in American history and society from 1775 to the present.

**HIST 4820** World War II in Europe 3 Focuses exclusively on World War II developments in the ETO. That is, the efforts of the Allied forces, mainly the United States, Britain, the Soviet Union, Free France, Canada, and resistance fighters and British Commonwealth soldiers against the expansion and occupation of most of Eurasia by Nazi Germany and/or Fascist Italy. Covers the chronology of 1939 to 1945. Included in the course’s scope is the Holocaust. (Sp)

**HIST 4821 DHA** World War II in Asia 3 Focuses on Japanese and Allied fighting in the Pacific and the Asian mainland from 1937 to 1945. British, French, and Dutch losses in Asia to Japan, as well as efforts to recover them. U.S.-Japanese conflict in the Pacific Theater. (Sp)

**HIST 4830 CI/DHA** Structure of Engineering Revolutions 3 Provides an integrated approach to the history of engineering practice. Students research the life cycle of a major engineering project from historical, political, and economic perspectives, while using original sources and conducting interviews. Prerequisites: Completion of CI/DHA exams; STAT 1040 or MATH 1050; fulfillment of Communications Literacy CL2 requirement. (Sp)

**HIST 4850** Interpreting the Past for Teachers 3 Focuses on informal educational experiences open to secondary school students outside of the classroom. Interpretive modes examined include historical film, documentaries, living history programs, history fairs and festivals, and historical novels and magazines. (F,Sp)

**HIST 4860** Teaching History 3 Designed to introduce history teaching majors to ethical and methodological issues arising in history classroom. (F)

**HIST 4870** Teaching World History: Themes, Approaches, and Materials 3 For history teaching majors and minors only. Introduces students to a number of approaches to the study and teaching of world history. Students survey theoretical and pedagogical literature, then assemble a course package, which is presented to their peers. (Sp)

**HIST 4880** History Workshop: Special Topics 1-3 Focuses on a theme or topic in history. (F,Sp,Su)

**HIST 4890 DHA** Cold War in Asia 3 Explores history of the Cold War conflicts in Korea and Vietnam, from Asian and American perspectives. Students ascertain the economic, political, military, environmental, diplomatic, psychological, and demographic implications of these conflicts for the U.S., as well as for the Asians involved. (F,Sp)

**HIST 4910** Special Studies in History 3 Examination of special areas and themes in history. (F,Sp,Su)

**HIST 4930** Directed Readings 1-3 Directed readings in any special historical field. For each credit granted, minimum of four books must be read. Prerequisite: Instructor’s approval.

**HIST 4940** Historical Internship 1-3 Directed internship involving participation in a historical research or cultural management project. (F,Sp,Su)

**HIST 4990 CI** Special Topics in History 3 Senior history seminar emphasizing historiographical literary, research, and writing skills in relation to a specific historical topic. Prerequisites: Lower- and upper-division courses in areas relating to topic in question. (F,Sp,Su)

**HIST 5690 CI** American Studies Capstone Seminar 3 Required for students majoring in American Studies. Enables students to synthesize American Studies theory and methods with interdisciplinary cognate courses. Supports senior thesis design and writing, allowing topics to reflect individual programs of study. Also taught as ENGL 5690. (Sp)

**HIST 5700** Folk Narrative 3 Forms and functions of folk narrative genres: myth, legend, folktale, memorate, and ballad. Also taught as ENGL 5700.

**HIST 6000** Historical Methods and Research 3 Introduction to the historical profession, emphasizing research and writing skills, as well as the critical assessment of scholarly works. Should be taken at beginning of student’s graduate program. Required for history master’s students. (F)

**HIST 6010** History and Theory 3 Examination of major works that have influenced the theory and practice of historical writing. History master’s students are required to complete HIST 6010, 6020, or another theory-enriched course.

**HIST 6020** Approaches to History 3 Uses readings in particular instructor’s field to underscore theories and methods different historians bring to their subject. History master’s students are required to complete HIST 6010, 6020, or another theory-enriched course.

**HIST 6030** Research Seminar 3 Research in primary sources for graduate students.

**HIST 6100** Special Topics: Ancient History 3 Intensive readings and group discussions of selected topics in ancient history.

**HIST 6130** Special Topics: Early Modern European History 3 Intensive readings and group discussions of selected topics in early modern European history.

**HIST 6160** Special Topics: Modern European History 3 Intensive readings and group discussions of selected topics in modern European history.

**HIST 6200** Special Topics: Comparative World History 3 Intensive readings and group discussions of selected topics in comparative world history.

**HIST 6230** Special Topics: Middle Eastern History 3 Intensive readings and group discussions of selected topics in middle eastern history.

Course Descriptions

Honors (HONR)

See Honors Program, page 338

Note: The following are general descriptions. For further details, see the Honors website at: http://www.usu.edu/honors

HONR 1300H BAI U.S. Institutions 3
Interdisciplinary course providing basic understanding of history, principles, form of government, and economic system of the United States. Open only to students enrolled in USU Honors Program. (F)

HONR 1320H BHU Civilization: Humanities 3
Interdisciplinary course providing basic understanding of broad range of themes cutting across human history and continuing to be important in contemporary society. Covers both Western and non-Western civilization. Open only to students enrolled in USU Honors Program. (F,Sp)

HONR 1330H BCA Civilization: Creative Arts 3
Interdisciplinary course exploring questions such as: “What is art, and how do you judge it?” and “How does artistic expression vary across cultures?” Covers several forms of art. Students attend concerts, visit galleries, and attend theatrical performances. Open only to students enrolled in USU Honors Program. (F,Sp)

HONR 1340H BSS Social Systems and Issues 3
Interdisciplinary course that considers how a society of self-interested individuals can live together in peace and harmony. Topic explored from perspectives of different disciplines. Open only to students enrolled in USU Honors Program. (F,Sp)

HONR 1350H BLS Integrated Life Science 3
Interdisciplinary course focusing on basic concepts of life science. Demonstrates role of modeling, prediction, and observation in the process of scientific discovery, which occurs within an historical and social context. Open only to students enrolled in USU Honors Program. (F)

HONR 1360H BPS Integrated Physical Science 3
Interdisciplinary course focusing on basic concepts of physical science, including structure of matter and magnitude and character of the forces of nature. Demonstrates role of modeling, prediction, and observation in the process of scientific discovery, which occurs within an historical and social context. Open only to students enrolled in USU Honors Program. (F)

HONR 2000H Scholars Forum 1
Includes orientation to the Honors Program and to undergraduate research. Taught online. (F)

HONR 2100H Honors Inquiry Seminar 1
Introduces students to the nature of inquiry. Assists students in planning their undergraduate education to enable them to graduate with Honors. Prerequisite: Admission to Honors Program. (Sp)

HONR 2200H Honors Enrichment 0.5
Provides opportunity for Honors students to enhance their academic experience by attending and reflecting on a series of colloquia, as well as cultural and arts events. During the semester, students attend activities chosen from a menu prepared by the Honors Program. Each event affords an opportunity to react in writing, as well as orally during the bimonthly seminars. Grading based on attendance, participation, and written work. Prerequisite: Admission to Honors Program. (F,Sp)

HONR 3010H DSC Special Topics: Life and Physical Sciences 3
Focuses on basic scientific concepts and methods of inquiry used by scientists. Considers science from a broad perspective, showing how various disciplines are related. Open only to students enrolled in USU Honors Program. (Sp)

HONR 3020H DHA Special Topics: Humanities/Creative Arts 3
Humanities section focuses on important historical and contemporary cultural themes, both Western and non-Western. Creative Arts section examines one or more arts across cultures. Covers several forms of art. Students attend concerts, visit galleries, and attend theatrical performances. Open only to students enrolled in USU Honors Program. (F)

HONR 3030H DSS Special Topics: Social Sciences 3
Examines one or more social institutions and asks how we live within these structures from the perspectives of different disciplines. Open only to students enrolled in USU Honors Program. (Sp)

HONR 3900H Independent Study 1-3
Independent research, library and/or laboratory work, or creative effort working in a one-to-one relationship with a faculty member. Limited to students actively pursuing an Honors degree. (F,Sp)

HONR 4000H Reading Seminar 1-3
Opportunity to read, discuss, and write about books and current events. Open only to students enrolled in USU Honors Program. (F,Sp)

HONR 4700H Honors Fellows 0.5
Junior or senior Honors students assist in leading Honors seminars and tutorials. (F,Sp)

HONR 4800H Thesis/Project Seminar 1
Oral presentation and discussion of Honors senior theses/projects. Guest presentations focus on essential contrasts and similarities in “ways of knowing” among various academic specialties. (F,Sp)

HONR 4900H Senior Thesis/Project 1-3
All Honors students are required to submit a senior thesis/project for graduation with an Honors degree. Thesis/project may be in any area of student’s choice, prepared in cooperation with an advisor drawn from the faculty at large. (F,Sp)

ID 1700 Interior Design Professional Seminar 1
Weekly seminars to provide an orientation to the professional aspects of interior design. Exploration of related careers and professional societies. Invited participation by outside speakers. Repeatable for up to eight credits. (F,Sp)

ID 1750 BCA Design in Everyday Living 3
Investigation of the basic elements and principles of design related to everyday living experiences and the practical application of relevant theory. (Su)

ID 1790 BCA Interior Design Theory 3
Explores basic philosophy of interior design. Analyzes design elements and principles when applied to interior spaces. Evaluation of contemporary design theories as factors influencing design trends. (Sp)

ID 2710 Architectural Graphics I 4
Competency development in use of drafting tools, symbols, and techniques used in interior design presentation. Includes communication skills related to techniques and approaches to graphic presentations of interior design solutions: floor plans, elevations, sections, axonometrics, details, and dimensioning. (F)

ID 2720 Architectural Graphics II 4
Introduction to three-dimensional drawing: isometric and perspective. Development of methods of rapid graphic communication techniques and approaches to complete professional presentations. Exploration of various types of media and presentation methods. Prerequisite: ID 2710. (Sp)

ID 2730 Interior Space Planning and Human Dimensions 4
Focuses on physical, psychological, and human factors influencing design of interior space. Includes research, programming, analysis, and design of residential and nonresidential spaces. Prerequisite: ID 2710. (Sp)

</table>

**Intensive English Language Institute (IELI)**

See Intensive English Language Institute, page 341

**IELI 1120 Writing I**
Develops writing skills. Focuses on description, narration, and canonical word order at sentence and paragraph levels. (F,Sp)

**IELI 1160 Reading I**
Builds reading skills. Students read texts individually and collaboratively. Focuses
Course Descriptions

on active reading (e.g., making use of background knowledge, predicting, and critically assessing reading passages). (F,Sp)

IELI 1220 Writing from Sources 4
Focuses on sentence and paragraph writing. Students gather information from various sources, transform and organize it, and present it in both verbal and written form. (F,Sp,Su)

IELI 1230 Cross-Cultural Talk 3®
Multilevel course designed to improve oral communication through small group work and one-on-one conversation with American undergraduate teaching fellows. Emphasizes interactive language fluency. Repeatable for credit for students who place at the basic level on the IELI placement exam. (F,Sp,Su)

IELI 1240 Integrated Skills 3®
Multilevel speaking and listening course designed to develop basic to intermediate language skills through content-based instruction. Repeatable for credit for students who place at the basic level on the IELI placement exam. (F,Sp,Su)

IELI 1260 Reading II 4
Builds low intermediate to intermediate level reading skills. Students distinguish main ideas from supporting ideas. Extensive vocabulary work. Focuses on active reading, summarizing, and vocabulary attack skills. (F,Sp,Su)

IELI 2310 Comprehending Academic Discourse 3
Introduction to listening strategies and note-taking, focusing on organization and information. Develops strategies for listening to authentic passages, such as news and documentaries. (F,Sp,Su)

IELI 2320 Writing Authentic Texts 4
Assists students in developing more sophisticated writing skills, from complex sentences to coherent paragraphs and various kinds of compositions. Students learn to use the library and the Internet to find resources for their writings. (F,Sp,Su)

IELI 2330 Spoken Discourse and Cultural Communication 3
Emphasizes interpersonal communication and academic tasks with American undergraduate teaching fellows. Focuses on the dynamics of assuming various roles in small group discussions and presentations. (F,Sp,Su)

IELI 2360 Reading Authentic Texts 4
Introduces strategies for reading several genres typical of university assignments, including excerpts from textbooks in several disciplines and popular magazine articles having academic value. Brief overview of scholarly journals. Introduction to strategies and exercises for vocabulary development. (F,Sp,Su)

IELI 2410 Comprehending Lecture Discourse 3
Develops techniques for understanding the planned and spontaneous academic discourse of university classrooms. Focuses on information processing. (F,Sp,Su)

IELI 2420 Writing from Academic Sources 4
Introduction to various academic writing demands. Students gather information from various sources, including interviews, surveys, and academic texts (textbooks, journals, etc.), analyze and summarize the information; and write documented essays and reports. (F,Sp,Su)

IELI 2440 Academic Discourse 3
Designed to assist students in developing oral competency, with emphasis on comprehensibility in individual and group academic presentations. (F,Sp,Su)

IELI 2450 Topics for ESL 4®
Introduction to contemporary topics in culture and language. Focuses on language development through content-based instruction. Repeatable for up to 12 credits. (F,Sp,Su)

IELI 2460 Reading from Academic Sources 4
Focuses on processes and strategies for a variety of academic and disciplinary genres; strategies for learning from lengthy and complex texts; and vocabulary, speed, and comprehension development. (F,Sp,Su)

IELI 2470 Cross-Cultural Perspectives of American Culture 4
Provides understanding of what culture is and how it influences behavior and beliefs. Provides cross-cultural perspectives on value systems and institutions. (F,Sp,Su)

IELI 7920 College Teaching Seminar 1-3®
Workshop designed for international students who will hold teaching assistantships at the University. To be accepted into the workshop, students must take a qualifying language test. Graded Pass/Fail only. (F,Sp)

® Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Instructional Technology (INST)

See Department of Instructional Technology, pages 339-340

INST 1000 Information Literacy 3
Designed to develop ability to locate, evaluate, and use information. Develops competencies needed for lifelong pursuits of information through the use of libraries and electronic resources. (F,Sp)

INST 3000 Principles and Practices of Technology for Secondary Teachers 2
Integrated experience for pre-service secondary teachers to apply instructional design principles in their instruction. Hands-on experience using a wide variety of technological tools in practical learning environments. Application of technology as both process and product. Prerequisite: Admittance to teacher education. This course is not currently being taught.

INST 3500 Technology Tools for Secondary Teachers 1
Integration of technology into the teaching/learning environment. Practical, hands-on experience for pre-service secondary teachers. Use of a variety of technological tools. Introduction to current standards for teachers. Application of technology as both process and product. Prerequisite: Admittance to teacher education. (F,Sp,Su)

INST 4010 Principles and Practices of Technology for Elementary Teachers 3
Integrated experience for pre-service elementary teachers to apply instructional design principles in their instruction. Hands-on experience using a wide variety of technological tools in practical learning environments. Application of technology as both process and product. Prerequisite: Admittance to teacher education. (F,Sp,Su)

INST 4210 Information Access and Literacy Skills 2
Information problem-solving skills basic to lifelong information access in today’s networked world. Used as part of the Engineering and Technology Education/Instructional Technology minor program. Taught off campus through special programs. (Sp)

INST 4230 Introduction to Adult Learning 3
Covers philosophical and theoretical foundations of adult education, as well as practical applications for incorporating them into current educational settings. Used as part of the Engineering and Technology Education/Instructional Technology minor program. Taught off campus through special programs. (Sp)

INST 4250 Instructional Design I 3
Guided experience in analysis, design, and development of instructional product development utilizing the ADDIE model. Used as the first project experience for the Engineering and Technology Education degree and the Instructional Technology undergraduate minor. Taught off campus through special programs. (Su)

INST 4260 Instructional Design II 3
Guided experience in development, implementation, and evaluation of instructional product development utilizing the ADDIE model. Used as the first project experience for the Engineering and Technology Education degree and the Instructional Technology undergraduate minor. Taught off campus through special programs. (Su)
Course Descriptions

INST 4290  Applying Instructional Design  3
Individual experience in instructional product development utilizing the ADDIE model. Used as the capstone experience for the Engineering and Technology Education degree and the Instructional Technology undergraduate minor. Taught off campus through special programs. (F)

INST 4300  Clinical Experience in School Library Media  1
School library media clinical observation experience. Students involved in observing management and assisting in middle and secondary library media centers, arranged by department. Minimum of 40 hours of observation experience required. (Sp)

INST 4500  Integration and Innovation of Technology in Education  1
Based on current educational standards, and using appropriate tools, students design and create an electronic/digital portfolio specific to content area(s) of their anticipated teaching license. Emphasizes integration of technology as both product and process. Prerequisite: Admission to teacher education. (F,Sp,Su)

INST 4910  Undergraduate Research and Creative Opportunity  1-3
Cooperative process of discovery, investigation, research, or creativity between faculty and one or more students. (F,Sp,Su)

INST 5000  Foundations of Library Media Programs  3 (dual listing 6060)
Introduction to historical and philosophical foundations of library media programs for teachers, administrators, and media specialists. Examines role of library media programs in schools and their contributions to the curriculum. Taught off campus through Utah Education Network. (F)

INST 5010  Information Organization and Management  3 (dual listing 6110)
Explores functions of information technology including circulation, cataloging, automation tools, and technical services within school library media programs. Also considers policies and techniques for facilitating access to information in a school library media center. Taught off campus through Utah Education Network. (F)

INST 5020  Collection Development  3 (dual listing 6020)
Focuses on building and maintaining collections for library media programs. Discusses policy development for selection, protecting intellectual freedom, and reviewing, evaluating, and maintaining materials in all formats. Evaluation of school library collections also investigated. Taught off campus through Utah Education Network. (Sp)

INST 5030  Information Access  3 (dual listing 6030)
Introduction to finding information and resources using print and electronic sources. Emphasizes reference services, knowledge of basic reference/information sources, and resource sharing; and teaching information retrieval strategies within a school library media program. Taught off campus through Utah Education Network. (Sp)

INST 5040  Library Media Center Administration  3 (dual listing 6040)
Includes study of organization, personnel, budgets, programs, and management of a library media center. Students define their role within a school setting and in relation to that of the principal and teachers. Prerequisite: INST 5000/6060 or approval of instructor. Taught off campus through Utah Education Network. (Su or Arr)

INST 5050  Library Media Programs  3 (dual listing 6050)
Presents a wide variety of activities which are integral to a school library media program, including reading guidance, instructional development, curriculum development, media skill instruction, and information literacy. Prerequisite: INST 5040/6040 or approval of instructor. Taught off campus through Utah Education Network. (Su or Arr)

INST 5100  Management and Maintenance of Information Technologies  1 (dual listing 6100)
Introductory course in basic operation of technology tools used in school setting. Includes operation of video equipment, video cameras, Internet sites, CD-ROM, satellite receiving equipment, computer scanners, computer networks, and computer presentation systems. Taught off campus through Utah Education Network. (Arr)

INST 5190  Library Media Practicum  1-6 (dual listing 6190)
Observation and guided field experience in a library media center under professional library media specialists and instructional technology professionals. Bridge of theory into practice for students seeking licensure. This course is required for those having limited or no school library media experience, as evaluated by their faculty advisor. Graded Pass/Fail only. Prerequisites: INST 5040/6040, 5050/6050; or approval of instructor. (F,Sp,Su)

INST 5200  Principles and Practices of Technology for Secondary Teachers  2
Integrated experience for pre-service secondary teachers to apply instructional design principles in their instruction. Hands-on experience using a wide variety of technological tools in practical learning environments. Application of technology as both process and product. Prerequisite: Admission to teacher education. (F,Sp)

INST 5210  Digital Audio-Video Production*  3
Fundamental theories and practice in camera and computer-based audio and video production, including recording, editing, and digitizing audio and video segments for education and training applications. (F,Sp)

INST 5230  Instructional Graphic Production*  3
Fundamental practices of using the computer to design and produce a wide variety of instructional graphics and animations. (F,Sp)

INST 5240  Producing Distance Education Resources**  3
Focuses on production of Internet-based instructional resources for use in distance, flexible, and open learning. (Sp,Su)

INST 5250  Computer-Based Instruction Authoring**  3
Fundamentals of programming computer-based instruction utilizing the Authorware authoring system. Prerequisite: Basic computer competencies. (Sp,Su)

INST 5260  Learning and Applying HTML  3
Asynchronous online course, teaching web publishing using HTML (Hyper-Text Markup Language). Explores current web technologies and includes design and evaluation. (F,Sp,Su)

INST 5270  Multimedia Special Topic Studio 1  3 (dual listing 6210)
Selected special topics related to the development of multimedia products for instruction and training. (F,Sp,Su)

INST 5280  Multimedia Special Topic Studio 2  3 (dual listing 6220)
Selected special topics related to the development of multimedia products for instruction and training. (F,Sp,Su)

INST 5300  Multimedia Production for Instruction and Training  3
Students use knowledge acquired in prerequisite courses to design, produce, and master a multimedia instructional product. Prerequisites: INST 5210, 5220, 5230, 5240. (Sp)

INST 5400  Computer Applications for Instruction and Training  3
Introduction to use of computer applications, with special emphasis on software used in instruction and training. (F,Sp,Su)

INST 5520  Learning and Teaching at a Distance  3
Focuses on issues and methods of teaching and learning in distance education. Students develop strategies for effectively integrating technologies and facilitating learning at a distance. (Sp)

INST 5550  Practicum in Distance Learning  3
Students demonstrate effective practice by applying instructional development principles for designing, implementing, and evaluating instruction for distant learners. Graded Pass/Fail only. Prerequisite: INST 5520. (Su)
## Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>INST 5600</td>
<td>Designing Instruction for Students At-Risk</td>
<td>1-4</td>
<td>Participants use information technologies for ongoing problem solving during and after the course. Competencies emphasized include the design, implementation, and evaluation of specific effective instructional practices appropriate for all students, and particularly for students at risk of academic failure. (F,Sp,Su)</td>
</tr>
<tr>
<td>INST 5750</td>
<td>Instructional Technology Workshop</td>
<td>1-4</td>
<td>Special training and experience in latest concepts and innovations in instructional technology. Content changes to reflect most recent topics and problems facing the profession. (Su)</td>
</tr>
<tr>
<td>INST 5900</td>
<td>Independent Study</td>
<td>1-4</td>
<td>Individually directed study and projects. Graded Pass/Fail only. Prerequisite: Departmental permission. (F,Sp,Su)</td>
</tr>
<tr>
<td>INST 6000</td>
<td>Foundations of Instructional Technology</td>
<td>3</td>
<td>Considers the present, past, and future of instructional technology, while helping individual student to develop personal understanding of and orientation to the field. Prerequisite: Matriculation into Instructional Technology master’s program. (F)</td>
</tr>
<tr>
<td>INST 6010</td>
<td>Technology and its Role in the Transformation of Education</td>
<td>1-3</td>
<td>Explores the critical role of educational technology as one tool in the transformation of education. Involves students in change-related projects in the local environment. Taught off-campus through EDNET. (F)</td>
</tr>
<tr>
<td>INST 6020</td>
<td>Collection Development</td>
<td>3</td>
<td>Focuses on building and maintaining collections for library media programs. Discusses policy development for selection, protecting intellectual freedom, and reviewing, evaluating, and maintaining materials in all formats. Evaluation of school library collections also investigated. Taught off campus through Utah Education Network. (Sp)</td>
</tr>
<tr>
<td>INST 6030</td>
<td>Information Access</td>
<td>3</td>
<td>Introduction to finding information and resources using print and electronic sources. Emphasizes reference services, knowledge of basic reference/information sources, and resource sharing; and teaching information retrieval strategies within a school library media program. Taught off campus through Utah Education Network. (Sp)</td>
</tr>
<tr>
<td>INST 6040</td>
<td>Library Media Center Administration</td>
<td>3</td>
<td>Includes study of organization, personnel, budgets, programs, and management of a library media center. Students define their role within a school setting and in relation to that of the principal and teachers. Prerequisite: INST 6660/5000 or approval of instructor. Taught off campus through Utah Education Network. (Su or Arr)</td>
</tr>
<tr>
<td>INST 6050</td>
<td>Library Media Programs</td>
<td>3</td>
<td>Presents a wide variety of activities which are integral to a school library media program, including reading guidance, instructional development, curriculum development, media skill instruction, and information literacy. Prerequisite: INST 6620/5040 or approval of instructor. Taught off campus through Utah Education Network. (Su or Arr)</td>
</tr>
<tr>
<td>INST 6060</td>
<td>Foundations of Library Media Programs</td>
<td>3</td>
<td>Introduction to historical and philosophical foundations of library media programs for teachers, administrators, and media specialists. Examines role of library media programs in schools and their contributions to the curriculum. Taught off campus through Utah Education Network. (F)</td>
</tr>
<tr>
<td>INST 6100</td>
<td>Management and Maintenance of Information Technologies</td>
<td>1</td>
<td>Introductory course in basic operation of technology tools used in school setting. Includes operation of video equipment, video cameras, Internet sites, CD-ROM, satellite receiving equipment, computer scanners, computer networks, and computer presentation systems. Taught off campus through Utah Education Network. (Arr)</td>
</tr>
<tr>
<td>INST 6100</td>
<td>Information Organization (dual listing 5010) and Management</td>
<td>3</td>
<td>Explores functions of information technology including circulation, cataloging, automation tools, and technical services within school library media program. Also considers policies and techniques for facilitating access to information in a school library media center. Taught off campus through Utah Education Network. (F)</td>
</tr>
<tr>
<td>INST 6150</td>
<td>Communication, Instruction, and the Learning Process</td>
<td>3</td>
<td>Examination of learning theory and communication theory, and their implications for instruction. Taught off-campus through EDNET. (Sp)</td>
</tr>
<tr>
<td>INST 6190</td>
<td>Library Media Practicum</td>
<td>1-6</td>
<td>Observation and guided field experience in a library media center under professional library media specialists and instructional technology professionals. Bridge of theory into practice for students seeking certification. This course is required for those having limited or no school library media experience, as evaluated by their faculty advisor. Graded Pass/Fail only. Prerequisites: INST 6640/5040, 6650/5050; or approval of instructor. (F,Sp,Su)</td>
</tr>
<tr>
<td>INST 6210</td>
<td>Digital Video Disc Design and Production**</td>
<td>3</td>
<td>Fundamental theories and practice in the design and development of Digital Video Disc (DVD) based instructional resources. (F,Su)</td>
</tr>
<tr>
<td>INST 6240</td>
<td>Instructional Analysis</td>
<td>2</td>
<td>Introduces front-end analysis state of instructional design and development. Examines processes for conducting instructional needs assessment, audience analysis, learning environment analysis, and instructional task analysis. Prerequisite: Matriculation into Instructional Technology master’s program. (F)</td>
</tr>
<tr>
<td>INST 6250</td>
<td>Instructional Design</td>
<td>2</td>
<td>Examines theory and practice of designing instruction. Emphasizes practical applications of design principles and techniques for creating instructional materials. Prerequisite: Matriculation into Instructional Technology master’s program. (F)</td>
</tr>
<tr>
<td>INST 6260</td>
<td>Learning Theory</td>
<td>3</td>
<td>Detailed study of communication and learning theories as applied to the instructional design process. Examines principles and research upon which instructional design and instructional technology are based. Prerequisite: Matriculation into Instructional Technology master’s program. (F)</td>
</tr>
<tr>
<td>INST 6270</td>
<td>Implementation and Management of Instruction</td>
<td>2</td>
<td>Focuses on techniques and methods for putting well-designed instruction and training into use in both traditional and nontraditional settings. Prerequisite: Matriculation into Instructional Technology master’s program. (Sp)</td>
</tr>
<tr>
<td>INST 6280</td>
<td>Instructional Evaluation</td>
<td>2</td>
<td>Examines theories and implementation of both formative and summative evaluation of instruction. Includes expert and learner feedback, rapid prototyping, and cost analysis. Prerequisite: Matriculation into Instructional Technology master’s program. (Sp)</td>
</tr>
<tr>
<td>INST 6300</td>
<td>Professional Development Seminar</td>
<td>1</td>
<td>Geared toward assisting master’s students in completing their degrees. Provides continuity from the first semester and encourages continued professional development in the discipline. (F,Sp,Su)</td>
</tr>
<tr>
<td>INST 6350</td>
<td>Instructional Design Process</td>
<td>3</td>
<td>Examines key techniques in design of instruction. Applies principles to specific design problems. Introduces techniques for developing instructional products according to completed designs. Taught off-campus through EDNET. (F)</td>
</tr>
<tr>
<td>INST 6360</td>
<td>Computers in Education for In-service Teachers</td>
<td>3</td>
<td>Introduction to microcomputer applications in education for in-service teachers. Includes hands-on experiences with range of software tools for design, production, and administration. Taught off-campus through EDNET. (Sp)</td>
</tr>
</tbody>
</table>

Utah State University 2007-2009 General Catalog
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>INST 6370</td>
<td>Design and Development of Computer-Based Instruction</td>
<td>3</td>
<td>Overview of computer-based design issues, including interface/screen design, instructional strategy and interaction, and computer program logic. Includes hands-on experience with authoring systems. Taught off-campus through EDNET. (F)</td>
</tr>
<tr>
<td>INST 6380</td>
<td>Distance Learning—K-12</td>
<td>3</td>
<td>Designed for classroom teachers. Discusses technologies and applications of distance education to elementary and secondary school settings. Focuses on instructional strategies for effective teaching and learning at a distance. Taught off-campus through EDNET. (Sp)</td>
</tr>
<tr>
<td>INST 6390</td>
<td>Planning and Implementation for Technology</td>
<td>3</td>
<td>Principles and practice of implementing innovations into real-world settings and evaluating their effectiveness. Taught off-campus through EDNET. (Sp)</td>
</tr>
<tr>
<td>INST 6400</td>
<td>Resources for Technology</td>
<td>3</td>
<td>Acquisition and management of resources for technological innovation: proposal writing, financing of technological change, management of technology resources, and conduct of resource-related projects. Taught off-campus through EDNET. (Sp)</td>
</tr>
<tr>
<td>INST 6450</td>
<td>Instructional Development</td>
<td>2</td>
<td>Application of theory, principles, and practice of instructional technology to the design of instructional products. Prerequisite: Matriculation into Instructional Technology master’s program. (F)</td>
</tr>
<tr>
<td>INST 6460</td>
<td>Distance Education</td>
<td>3</td>
<td>Application of theory, principles, and practice, providing instruction to learners separated from the instructor by distance and/or time. Addresses characteristics, technologies, and current issues of distance education. (Sp)</td>
</tr>
<tr>
<td>INST 6470</td>
<td>Performance Systems</td>
<td>3</td>
<td>Application of theory, principles, and practice of organizational systems and human competence in designing performance support systems, job aids, and just-in-time instruction. (F)</td>
</tr>
<tr>
<td>INST 6480</td>
<td>Instructional Simulations</td>
<td>3</td>
<td>Application of theory, principles, and practice of instructional simulations for use within organizational systems and improvement of human performance. (F)</td>
</tr>
<tr>
<td>INST 6490</td>
<td>Instructional Technology in Adult Education</td>
<td>3</td>
<td>Application of theory, principles, and practice of instructional technology in providing instruction to adult learners. (Sp)</td>
</tr>
<tr>
<td>INST 6500</td>
<td>Instructional Development Tools</td>
<td>3</td>
<td>Detailed study of processes, tools, and techniques for guiding and aiding the instructional design process. Emphasizes tools for project management, analysis, and design. (Sp)</td>
</tr>
<tr>
<td>INST 6510</td>
<td>Research and Evaluation in Instructional Technology</td>
<td>3</td>
<td>Detailed study of methodologies for needs assessment, product evaluation, validation, and research. Includes methodological models, data collection, and data interpretation for both formative and summative evaluation. Prerequisite: Permission of instructor. (Sp)</td>
</tr>
<tr>
<td>INST 6750</td>
<td>Instructional Technology Workshop</td>
<td>1-4</td>
<td>Special training and experience in the latest concepts and innovations in instructional technology. Content changes reflecting the most recent topics and problems facing the profession. (Su)</td>
</tr>
<tr>
<td>INST 6760</td>
<td>Practicum in the Improvement of Instruction</td>
<td>1-4</td>
<td>A field-based program focused upon characteristics of effective teaching methodologies, teaching performance, curriculum decision making, value guidelines, and the characteristics of the learner. Graded Pass/Fail only. Taught on demand.</td>
</tr>
<tr>
<td>INST 6780</td>
<td>Instructional Technology Programs</td>
<td>1-3</td>
<td>Designed primarily as an in-service experience for teachers, trainers, administrators, and instructional technology personnel to improve local programs and services. Taught on demand.</td>
</tr>
<tr>
<td>INST 6790</td>
<td>Instructional Technology in Education and Training</td>
<td>1-3</td>
<td>Offered on request to instructional designers, teachers, administrators, and media personnel who have special needs related to instructional technology and seek assistance in improving their local programs. Taught on demand.</td>
</tr>
<tr>
<td>INST 6800</td>
<td>Instructional Design I</td>
<td>3</td>
<td>Introduction to the process of Instructional Systems Design (ISD) using Analysis, Design, Development, Implementation, and Evaluation (ADDDIE). Includes introductory combination of theory and application to create an instructional product using the ISD process. Prerequisite: INST 6250 and matriculation into Instructional Technology master’s program. (F)</td>
</tr>
<tr>
<td>INST 6810</td>
<td>Research Seminar</td>
<td>1</td>
<td>Provides opportunity for exchange of ideas by Instructional Technology master’s students pursuing a Plan A option. Includes discussion of publications and products. (F,Sp,Su)</td>
</tr>
<tr>
<td>INST 6820</td>
<td>Instructional Design II</td>
<td>3</td>
<td>Focuses on the utilization and critique of not only finished instruction, but also Instructional Design Theory, as well as a reverse-engineered look at Instructional Systems Design (ISD). Prerequisite: INST 6800. (Sp)</td>
</tr>
<tr>
<td>INST 6870</td>
<td>Current Issues Seminar</td>
<td>1-3</td>
<td>Allows exploration of new cutting-edge topics in the field. Topics vary and are announced the semester prior to registration. Topics may be theory or practice based. (Arr)</td>
</tr>
<tr>
<td>INST 6900</td>
<td>Independent Study</td>
<td>1-6</td>
<td>Individually directed study and projects. Graded Pass/Fail only. Prerequisite: Departmental permission. (F,Sp,Su)</td>
</tr>
<tr>
<td>INST 6910</td>
<td>Independent Research</td>
<td>1-6</td>
<td>Individually directed research. Graded Pass/Fail only. Prerequisite: Departmental permission. (F,Sp,Su)</td>
</tr>
<tr>
<td>INST 6940</td>
<td>Internship</td>
<td>1-6</td>
<td>An on-site experience in which the student applies knowledge and skills in a work environment. Used as culminating experience for the MS, Plan C. Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>
<tr>
<td>INST 6960</td>
<td>Creative Project</td>
<td>1-6</td>
<td>Individual experience in instructional product development. May be used as the culminating experience for the MEd and MS Plan C. Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>
<tr>
<td>INST 6970</td>
<td>Thesis</td>
<td>1-6</td>
<td>Individual work in MS thesis and Plan B report writing with guidance and criticism. Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>
<tr>
<td>INST 6990</td>
<td>Continuing Graduate Advisement</td>
<td>1-8</td>
<td>Allows students access to faculty and facilities to complete graduate thesis, project, and papers. Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>
<tr>
<td>INST 7000</td>
<td>Pro-seminar I in Instructional Technology</td>
<td>3</td>
<td>Lectures and discussions on advanced topics in instructional technology and related disciplines. Required for Instructional Technology EdS and PhD students. (F)</td>
</tr>
<tr>
<td>INST 7010</td>
<td>Pro-seminar II in Instructional Technology</td>
<td>3</td>
<td>Continuation of INST 7000. Lectures and discussions on advanced topics in instructional technology and related disciplines. Required for Instructional Technology EdS and PhD students. Prerequisite: INST 7000. (Sp)</td>
</tr>
<tr>
<td>INST 7150</td>
<td>Advanced Seminar in Instructional Technology</td>
<td>3</td>
<td>In-depth study of various topics including learning theory, instructional design, instructional theory, instructional development tools, production techniques, and instructional applications in different cultures. Specific topics for each semester will be announced. (F,Sp,Su)</td>
</tr>
<tr>
<td>INST 7200</td>
<td>Quantitative and Design Research in Instructional Technology</td>
<td>3</td>
<td>Examines current trends, applications, methods, and research questions that are appropriate to the use of quantitative and design research within the field of instructional technology. (F)</td>
</tr>
</tbody>
</table>
Course Descriptions

ITAL 1010  Italian First Year I  4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Native speaker instructor. Self-study with tutorial assistance. (F)

ITAL 1020  Italian First Year II  4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Native speaker instructor. Self-study with tutorial assistance. Prerequisite: ITAL 1010 or equivalent. (Sp)

ITAL 2010  Italian Second Year I  4
Second-year overview of speaking, listening, reading, and writing, with exposure to cultures and customs. Native speaker instructor. Self-study with tutorial assistance. Prerequisite: ITAL 1020 or equivalent. (F)

ITAL 2020  Italian Second Year II  4
Second-year overview of speaking, listening, reading, and writing, with exposure to cultures and customs. Native speaker instructor. Self-study with tutorial assistance. Prerequisite: ITAL 2010 or equivalent. (Sp)

Japanese (JAPN)
See Department of Languages, Philosophy, and Speech Communication, pages 364-379

JAPN 1010  Japanese First Year I  5
First course in beginning Japanese. Proficiency in the recognition of the basic Japanese sound system by learning Hiragana and Katakana. Communicative mastery of sentences having polite and plain forms of verbs, adjectives, and copula. Exposure to Japanese culture and customs. (F)

JAPN 1020  Japanese First Year II  5
Second course in beginning Japanese. Introduction to the basic 100 Kanji. Mastery of more complicated sentences, including conditional temporal, volitional, and potential expressions. Exposure to Japanese culture and customs. Prerequisite: JAPN 1010 or equivalent. (Sp)

JAPN 2010  Japanese Second Year I  5
First course in intermediate Japanese. Proficiency in reading and writing 150 additional Kanji. Mastery of the last basic grammar topics, such as passive, causative, passive causative, and giving/receiving expressions. Introduction to honorific/humble expression. Exposure to Japanese culture and customs. Prerequisite: JAPN 1020 or equivalent. (F)

JAPN 2020  Japanese Second Year II  5
Second course in intermediate Japanese. Proficiency in reading and writing 200 additional Kanji. Mastery of frequently used idioms and expressions. Exposure to more authentic reading materials. Competency in writing short essays. Exposure to Japanese culture and customs. Prerequisite: JAPN 2010 or equivalent. (Sp)

JAPN 3010  Japanese Third Year I  4
First segment of the third-year Japanese reading/writing course. Proficiency in reading and writing an additional 500 Kanji. Prerequisite: JAPN 2020 or equivalent. (F)

JAPN 3020  Japanese Third Year II  4
Second segment of the third-year Japanese reading/writing course. Proficiency in reading and writing an additional 500 Kanji. Prerequisite: JAPN 3010 or equivalent. (Sp)

JAPN 3050  Japanese Calligraphy  1
Study of Japanese writing system through practicing the art of calligraphy. No prerequisites. Also taught as ART 3050. (Sp)

JAPN 3100  Readings in Contemporary Japanese Culture  3
Introduction to contemporary Japanese culture through readings from newspapers and other source materials. Prerequisites: JAPN 3010 and 3020. (F)
### Course Descriptions

**JAPN 3510 Japanese for the Business Environment**
3
Mastery of technical terms related to Japanese business and its environment. Communicative competency in contemporary Japanese society. Prerequisite: JAPN 3020. (Sp)

**JAPN 3560 Studies in Japanese Film**
3
Offers an introduction to the historical and theoretical study of Japanese cinema. Course screenings include some of the films made by well-known directors during the 1960s and 1970s, as well as the cutting-edge of contemporary films. (Sp)

**JAPN 4250 Internship/Coop**
3-9
Cooperative education through internship programs provided by companies in Japan. Intended for students participating in the U.S.-Japan internship program. Prerequisites: JAPN 3010, 3020, and 3510. (Su)

**JAPN 4920 Japanese Language Tutoring**
1
Allows students to develop tutoring skills by assisting professors in lower-division courses or fulfilling instructional duties for a comparable amount of time in the language laboratory, public schools, or similar activities with departmental approval. May be repeated to a maximum of 3 credits. Prerequisite: Permission of instructor. (F,Sp)

---

### Journalism and Communication (JCOM)

See Department of Journalism and Communication, pages 350-355

**JCOM 1130 Beginning Newswriting for the Mass Media**
3
(formerly JCOM 1110)
Techniques of writing news for various media. News values, philosophy, and practice. Elementary news-gathering and interviewing skills. Practice in various newswriting forms. Structures of the news industries and work place. Prerequisites: Fulfillment of Communications Literacy CL1 requirement through coursework or examination; and English Proficiency Test offered through the Journalism and Communication Department. (F,Sp, Su)

**JCOM 1500 BSS Introduction to Mass Communication**
3
(formerly JCOM 1000 BSS)
History, philosophy, structures, and functions of the mass media (newspapers, magazines, TV and radio, advertising, and public relations) and their intersection with other social institutions. Media economics and the impacts of new technologies on media institutions and society. (F,Sp)

**JCOM 2010 BSS Media Smarts: Making Sense of the Information Age**
3
(formerly JCOM 2000 BSS)
Critical analysis of the roles and performance of mass media content and messages, and their influence on society. Emphasizes critical reading of news, entertainment, and advertising content regarding women, minorities, children, and other groups. Basic mass media ethics and law. Prerequisite: Fulfillment of Communications Literacy CL1 requirement through coursework or examination. (F,Sp)

**JCOM 2160 CI Introduction to Online Journalism**
2
(formerly JCOM 2110 CI)
Use of interactive computer networks, databases, and other electronic resources for news reporting and writing. Practice in research and information evaluation for news stories and features in news and public relations contexts. Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010. (F,Sp)

**JCOM 2170 CI Reporting Public Affairs**
3
(formerly JCOM 2120 CI)
Theory and practice of reporting public affairs, community news, and features. Emphasizes advanced news gathering techniques, understanding local political structures, news and feature writing skills, interviewing, media law, ethics, and cultural sensitivity. Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010. (F,Sp)

**JCOM 2180 Beginning Photojournalism**
3
(formerly JCOM 2150)
Theory and practice of photojournalism. Roles and functions of electronic photographic images in the news media. Practice in use of cameras and in software techniques. Students furnish cameras and some materials. (F,Sp)

**JCOM 2220 Introduction to Video Media**
3
(formerly JCOM 2200)
Introduction to the theories and practice of video production and functions in broadcasting and the electronic mass media, including concepts, techniques, and impacts of various video approaches. Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010. (F,Sp)

**JCOM 2230 Writing for Electronic Media**
3
(formerly JCOM 2210)
Theory and practice of reporting public affairs for broadcast and electronic media. Emphasizes news gathering, understanding local political structures, news and feature writing, interviewing, media law, ethics, and cultural sensitivity. Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010. (F)

**JCOM 2300 Introduction to Public Relations**
3
Survey of theories and practice of public relations in a variety of business, corporate, governmental, and nonprofit organizational settings. Elements of promoting organizational messages and communicating with various publics. Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010. (F,Sp)

**JCOM 2310 CI Writing for Public Relations**
3
Theory and practice of information-gathering for public relations, including basic news releases, features, speeches, annual reports, newsletters and brochures, broadcasting, and other forms. Emphasizes advanced news gathering techniques, interviewing, media law, ethics, and cultural sensitivity. Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010. (F,Sp)

**JCOM 3010 Communication Research Methods**
3
Analysis of communication theories and their application in research settings. Basics of communication research methods and analysis of research results in mass media and public relations contexts. This course is not currently being offered. For information about when it may be offered, contact the department.

**JCOM 3110 CI Beyond the Inverted Pyramid**
3
Theory and practice of longer literary forms for newspapers and magazines. Feature writing, investigative and interpretive journalism, emphasizing advanced information-gathering and writing skills. Prerequisite: Minimum grade of C in JCOM 2170 or permission of instructor. (F,Sp)

**JCOM 3120 CI Copy Editing and Publication Design**
3
Editing and preparation of news stories and artwork for publication. Principles and practice of publication layout and design. Prerequisites: Minimum grades of C in JCOM 2170, 2230, or 2310; or permission of instructor. (F,Sp)

**JCOM 3140 DSS Opinion Writing**
3
Study and practice of persuasive editorial and opinion writing for the mass media. (F,Sp)

**JCOM 3300 DSS Strategic Research Methods in Public Relations**
3
Quantitative and qualitative research methods standard to real-life applications in public relations problems and campaigns, including survey methods, focus groups, case analysis, and strategic assessments. Prerequisite: Minimum grade of C in JCOM 2310 or permission of instructor. (F,Sp)

**JCOM 3410 DSS Film as Cultural Communication**
3
Analysis of the economic, ideological, political, and cultural constraints influencing film content. (F,Sp)

**JCOM 4000 Senior Seminar in Mass Communication**
1
Capstone seminar required of all majors. Includes small discussion groups to pull together and synthesize experiences of students in all emphases. Examination of fundamental mass communication issues. Preparation for mass media careers. Prerequisite: Senior standing. (F,Sp)

**JCOM 4010 DSS Mass Communication Ethics**
3
(formerly JCOM 6440)
Study of ethical systems and philosophies and their applications to the practice of mass communication. Prerequisite: Junior standing. (Sp)

**JCOM 4020 DSS Mass Media and Society**
3
Study of theories and practice of the impact of mass media in conjunction with other social institutions: political, social, cultural, ideological, economic, and religious. Prerequisite: Junior standing.
Course Descriptions

JCOM 4030 DSS Mass Media Law 3
(dual listing 6430)
Principles and theories of constitutional and case law governing the mass media, including libel and privacy, copyright, press freedom, broadcast regulation, and press responsibility. Prerequisite: Junior standing or permission of instructor. (F,Sp)

JCOM 4100 Hard News Café 3
Advanced reporting and writing for student news website. Includes advanced reporting techniques, photojournalism, and posting of news reports and materials to interactive website. Prerequisite: Minimum grade of C in JCOM 3110 or permission of instructor. (F,Sp,Su)®

JCOM 4110 CI Computer-Assisted Reporting 3
Advanced computer-based investigative and in-depth information-gathering and newswriting, including intensive use of computer databases to collect and analyze data. Prerequisites: Minimum grades of C in JCOM 2170 or 2230 or 2310, or permission of instructor. (F,Sp)

JCOM 4120 CI Sports Writing 3
Information-gathering and writing of news and feature stories about sports for print and electronic mass media. Prerequisites: Minimum grades of C in JCOM 2170 or 2230 or 2310, or permission of instructor. (Sp)

JCOM 4150 Advanced Digital Photojournalism 3
Advanced lab work in the use of cameras and photographic production techniques, photo imaging, and manipulation. Concludes with student exhibition of work. Prerequisite: Minimum grade of C in JCOM 2180 or permission of instructor. (F,Sp)

JCOM 4210 CI Newscast I 4
Basics of electronic newsgathering and writing for electronic news media. Use of electronic video equipment for creation of on-air newscast and other visual news materials. Prerequisite: Minimum grade of C in JCOM 2220. (F,Sp)

JCOM 4220 CI Newscast II 4
Newsroom organization and practice in electronic and video news production, including directing and producing, writing for video news, use of studio equipment, use of video production equipment, staff management, and control room operations. Prerequisites: Minimum grades of C in JCOM 2230 and 4210. (F,Sp)

JCOM 4230 Corporate Video 3
Project-based lab work in studio video productions for real-world clients. Use of video field equipment and production facilities. Completion of video packages. Prerequisites: Minimum grades of C+ in JCOM 1130, 1500, and 2010, or permission of instructor. (F,Sp)

JCOM 4300 Integrated Marketing Communication 3
Teaches the integrated marketing functions necessary to effectively position, brand, and market a company. Provides students with opportunity to help bridge the gaps existing among management, strategic, and creative players in the design field. Prepares students to better function as effective account managers or campaign leaders in a public relations, marketing, branding, or advertising culture. (F,Sp)

JCOM 4400 Mass Media Criticism 3
(dual listing 6400)
Critical analysis of mass media content, emphasizing the media's social, cultural, and political impacts. Use of advanced research techniques. Senior standing required for enrollment in JCOM 4400; permission of instructor required for enrollment in JCOM 6400. (Sp)

JCOM 4410 Gender and the Mass Media 3
(dual listing 6410)
Examines the nature of gender-based images in a variety of mass media, from advertising to magazines, television, and film. Analysis of genre stereotypes and portrayals in news and entertainment media, along with resulting social impacts. Senior standing required for enrollment in JCOM 4410; permission of instructor required for enrollment in JCOM 6410. (F)

JCOM 4500 Projects in Communication 1-5®
Individualized directed study in communication topics, based upon student proposal to instructor. Prerequisite: Permission of instructor. Repeatable for up to 6 credits. (F,Sp,Su)

JCOM 4510 Communication Internship 1-3®
Supervised, real-world training and practice in communication work places, including news and business environments. Prerequisite: Permission of instructor. Maximum of 6 credits may count toward the student's major. (F,Sp,Su)

JCOM 4520H Senior Thesis 1-3
Planning and execution of an in-depth research paper or project, as approved by the instructor, culminating in a formal public presentation. Required of all journalism and communication students for graduation in Honors Program. Students must also complete HONR 4800H. (F,Sp)

JCOM 4530 Special Topics in Communication 3®
Advanced study in specialized communication topic areas. A maximum of 5 credits may be applied toward the major. (F,Sp,Su)

JCOM 5010 Mass Media Historiography 3
Survey of the history and development of the mass media, and their influence on other social institutions. Theory and practice of historical research, with heavy emphasis on use of databases, archival, and other primary sources to conduct original historical research. (F,Sp)

JCOM 5020 Mass Communication Theory 3
Advanced study of major mass communication theories and issues, and their evidence in case studies. Application of theory to significant societal problems. (F)

JCOM 5030 International Communications Problems 3
(dual listing 6030)
Study of mass communication influences and effects within and between nations. Systems and techniques of mass communication as functions of national identity and development. (F,Sp)

JCOM 5110 CI Literary Journalism 3
(dual listing 6110)
In-depth analysis and practice of literary and stylistic elements of long-form journalistic and other nonfiction writers. (F)

JCOM 5210 Website Design and Production 3
(dual listing 6210)
Principles and practice of planning, designing, and programming professional Web pages, including Internet communication analysis and planning, graphic design, and development using industry-standard programming languages and design applications. Prerequisite: Permission of instructor. (F,Sp)

JCOM 5220 Advanced Video Production 3
(dual listing 6220)
Training and practice in advanced techniques of video production, including computer graphics generation, nonlinear video editing, and other specialized professional techniques for electronic video materials. Prerequisite: Minimum grade of C in JCOM 4220 or 4230; or permission of instructor. (F)

JCOM 5230 Advanced Video Documentary Production 3®
(dual listing 6230)
Advanced production of long-form video productions and packages, including writing scripts, directing and production, control room applications, and advanced video production techniques. Prerequisite: Minimum grade of C in JCOM 4220 or 4230; or permission of instructor. (Sp)

JCOM 5300 CI Case Studies in Public Relations 3
(dual listing 6300)
Advanced study and practice in public relations cases, processes, techniques, campaigns, and marketing communications strategies. Analysis of approaches to corporate reputation issues, organizational positioning, and use of mass media strategies. Prerequisite: Minimum grade of C in JCOM 3300. (F,Sp)

JCOM 5310 Mass Media Management 3
(dual listing 6310)
Examines theories, methods, and practice of management of mass media businesses, including personnel, marketing, and market positioning. Prerequisite: Permission of instructor. (F,Sp)

JCOM 5320 Public Relations Agency 3®
(dual listing 6320)
Advanced hands-on experience in real-world workings of professional public relations agency, including client communications needs analysis, communications planning, strategies, market positioning, publicity, and campaign execution. Prerequisite: Permission of instructor. (F,Sp)

### JCOM 5420: The Mass Media and Politics
Examination of the role of the mass media in the political process, including both campaigns and governance. Examination of political advertising, news coverage, polling, opinion formation strategies, and politicians' use of new media technologies. (F)

### JCOM 6000: Introduction to Graduate Study in Mass Communication
Overview of mass communication theories and research methodologies designed to prepare the student for the graduate course of study and to assist in planning research agenda. (F)

### JCOM 6010: Mass Media Historiography
Survey of the history and development of the mass media, and their influence on other social institutions. Theory and practice of historical research, with heavy emphasis on use of databases, archival, and other primary sources to conduct original historical research. (F)

### JCOM 6020: Mass Communication Theory
Advanced study of major mass communication theories and issues, and their evidence in case studies. Application of theory to significant societal problems. (F)

### JCOM 6030: International Communications Problems
Study of mass communication influences and effects within and between nations. Systems and techniques of mass communication as functions of national identity and development. (F,Sp)

### JCOM 6040: Seminar in Mass Media Research Methods
Introduction to the major theoretical perspectives and methodologies in mass communication research. Repeatable for credit with departmental permission. (Sp)

### JCOM 6050: Seminar in Mass Media Issues and Problems
Variable topic seminar concerning research of issues and problems in mass media principles and practice. Repeatable for credit with departmental permission. (F,Sp)

### JCOM 6110: Literary Journalism
In-depth analysis and practice of literary and stylistic elements of long-form journalistic and other nonfiction writers. (F)

### JCOM 6210: Website Design and Production
Principles and practice of planning, designing, and programming professional Web pages, including Internet communication analysis and planning, graphic design, and development using industry-standard programming languages and design applications. Prerequisite: Permission of instructor. (F,Sp)

### JCOM 6220: Advanced Video Production
Training and practice in advanced techniques of video production, including computer graphics generation, nonlinear video editing, and other specialized professional techniques for electronic video materials. Prerequisite: Minimum grade of C in JCOM 4220 or 4230; or permission of instructor. (F)

### JCOM 6230: Advanced Video Documentary Production
Advanced production of long-form video productions and packages, including writing scripts, directing and production, control room applications, and advanced video production techniques. Prerequisite: Minimum grade of C in JCOM 4220 or 4230; or permission of instructor. (Sp)

### JCOM 6300: Case Studies in Public Relations
Advanced study and practice in public relations cases, processes, techniques, campaigns, and marketing communications strategies. Analysis of approaches to corporate reputation issues, organizational positioning, and use of mass media strategies. Prerequisite: Minimum grade of C in JCOM 3300. (F,Sp)

### JCOM 6310: Mass Media Management
Examines theories, methods, and practice of management of mass media businesses, including personnel, marketing, and market positioning. Prerequisite: Permission of instructor. (F,Sp)

### JCOM 6320: Public Relations Agency
Advanced hands-on experience in real-world workings of professional public relations agency, including client communications needs analysis, communications planning, strategies, market positioning, publicity, and campaign execution. Prerequisite: Permission of instructor. (F,Sp)

### JCOM 6400: Mass Media Criticism
Critical analysis of mass media content, emphasizing the media's social, cultural, and political impacts. Use of advanced research techniques. Permission of instructor required for enrollment in JCOM 6400; senior standing required for enrollment in JCOM 4400. (Sp)

### JCOM 6410: Gender and the Mass Media
Examines the nature of gender-based images in a variety of mass media, from advertising to magazines, television, and film. Analysis of gender stereotypes and portrayals in news and entertainment media, along with resulting social impacts. Permission of instructor required for enrollment in JCOM 6410; senior standing required for enrollment in JCOM 4410. (F)

### JCOM 6420: The Mass Media and Politics
Examination of the role of the mass media in the political process, including both campaigns and governance. Examination of political advertising, news coverage, polling, opinion formation strategies, and politicians' use of new media technologies. (F)

### JCOM 6430: Mass Media Law
Principles and theories of constitutional and case law governing the mass media, including libel and privacy, copyright, press freedom, broadcast regulation, and press responsibility. (F,Sp)

### JCOM 6440: Mass Communication Ethics
Study of ethical systems and philosophies and their applications to the practice of mass communication. (Sp)

### JCOM 6450: Special Projects in Mass Communication Research and Practice
Directed study into specified research or real-world problems in the mass media and mass communication industries. Prerequisite: Departmental permission. Repeatable for credit with departmental permission. (F,Sp,Su)

### JCOM 6510: Directed Readings
Directed readings, tutorial or experiential learning/project in mass communication. Prerequisite: Instructor and department head approval. (F,Sp,Su)

### JCOM 6600: Internship
Supervised training in selected communication work places. Prerequisite: Permission of graduate supervisory committee. (F,Sp,Su)

### JCOM 6700: Thesis Research
Prerequisite: Departmental permission. Graded Pass/Fail only. Repeatable for credit with departmental permission. (F,Sp,Su)

### JCOM 6990: Continuing Graduate Advisement
Prerequisite: Departmental permission. Graded Pass/Fail only. Repeatable for credit with departmental permission. (F,Sp,Su)

---

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.*
Course Descriptions

Korean (KOR)

See Department of Languages, Philosophy, and Speech Communication, pages 364-379

KOR 1010  Korean First Year I  5
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. (F)

KOR 2010  Korean Second Year I  5
Development of grammatical knowledge and writing skills. Prerequisite: KOR 1020 or equivalent. (F)

KOR 2020  Korean Second Year II  5
Development of advanced reading comprehension skill through discussions and summaries of a variety of texts. Prerequisite: KOR 2020 or equivalent. (Sp)

KOR 3010  Korean Third Year I  4
Development of advanced reading, writing, and conversational skills. Prerequisite: KOR 3020 or equivalent. (F)

KOR 3020  Korean Third Year II  4
Continuous development of advanced reading, writing, and conversational skills. Prerequisite: KOR 3010 or equivalent. (Sp)

KOR 3510  Business Korean  3
Designed to help students acquire a broad knowledge of business Korean and relevant Korean culture. Develops language skills and cultural knowledge useful for performing basic functions within the Korean business environment. Focuses on important business terms, phrases, and business etiquette. Prerequisite: KOR 2010 or equivalent language proficiency. (F)

KOR 4920  Korean Language Tutoring  1
Allows students to develop tutoring skills by assisting professors in lower-division courses or fulfilling instructional duties for a comparable amount of time in the language laboratory, public schools, or similar activities with departmental approval. May be repeated to a maximum of 3 credits. Prerequisite: Permission of instructor. (F,Sp,Su)

LAEP 1350  Theory of Design  4
Basic elements of design with emphasis upon their relationship to landscape architecture. Form and spatial relationships are stressed through student development of two- and three-dimensional design models. Design theory applied to materials of landform, vegetation, water, and architecture. Two three-hour studios per week. Prerequisite: LAEP 1200. (Sp)

LAEP 2250  Internship and Cooperative Education  1-5
Course credit for professional experience outside the classroom prior to graduation. A statement of professional goals and a summary report following the experience are required.

LAEP 2300  History of Landscape Architecture  3
An examination of landscape change in the context of its history from ancient to present times, with a primary emphasis on the visual qualities of designed landscapes. Three one-hour lectures per week. (F)

LAEP 2600 QI  Landscape Construction I  4
Introduction to site engineering, grading, cut and fill calculation, stormwater drainage, and erosion control. Two one-hour lectures and two two-hour studios per week. Prerequisite: LAEP 1200 (may be taken concurrently). (F)

LAEP 2650  Architecture and the Built Environment  4
Exploration of architectural form and structure in exterior environments. Emphasis placed on space created by architectural forms and their relationship to the surrounding landscape. Energy and water conservation measures with respect to the built environment. Prerequisite: LAEP 1200. (Sp)

LAEP 2700 CI  Site Analysis: Social, Behavioral, and Biophysical Dimensions  5
Site survey, analysis, and design synthesis. Focuses on human behavior and natural resources as design considerations for future land use planning. Introduces foundational site analysis methods and tools; and integrates Geospatial Information Systems (GIS) training for data interpretation. (F)

LAEP 2720  Site Planning and Design  5
Serves as a lower-division capstone course, synthesizing lower-division landscape architecture coursework and applying that knowledge to site scale design projects. Includes units on design methodology, site planning and circulation, and creative problem solving. Three three-hour studios per week. Prerequisite: LAEP 2700 or 6370. (Sp)

LAEP 3100  Recreation/Open Space  5
Focuses on regional and urban open space planning and design including project scale recreation design. Includes design seminars, field trips, and guest lecturers. Three three-hour studios per week. Prerequisites: Matriculation in Bachelor of Landscape Architecture (BLA) degree; LAEP 2720 or permission of instructor. (F)

LAEP 3120  Residential Planning and Design  5
Focuses on residential projects, planned unit developments, transit-oriented development, and community facilities. Introduction to theory and methods of community and neighborhood design and planning. Three three-hour studios per week. Prerequisite: LAEP 3100. (Sp)

LAEP 3500  Planting Design  2-4
Emphasizes plant and environment relationships and plant community dynamics as they relate to planting design. In addition, basic planting design principles will be introduced. Involves application of planting design principles to a variety of project types. One segment will focus on land reclamation planting in nonirrigated landscapes. Two three-hour studios per week. Enrollment limited to students matriculated into the LAEP major. Prerequisites: LAEP 1200, 1300, 1530, PLSC 2620. (F)

LAEP 3610  Landscape Construction II  4
Introduction to construction materials, wood construction, and free-standing and retaining walls. Introduction to layout and dimensioning, basic theory and technical aspects of roadway alignment, and theory and design of sprinkler irrigation. Two three-hour studios per week. Enrollment limited to students matriculated into the LAEP major. Prerequisites: LAEP 2600, MATH 1010. (Sp)

LAEP 3700  City and Regional Planning  3
Introduction to historic and current theory and methods of city and regional planning. Includes legislative, administrative, and implementation practices of the general comprehensive plan. Three lectures per week. This course is not currently being taught. For information about when it may be taught, contact the department.
LAEP 4100  Urban Theory, Systems, and Design  5
Focuses on urban environment for design expression and processes associated with the creation of cities. Explores different aspects of urban theories and design approaches (conceptual, perceptual, and analytical) as applied to large urban areas and site-specific spaces. Prerequisite: LAEP 3120. (F)

LAEP 4110  Construction Document Preparation  4
Methods and procedures necessary for transforming a design idea into a set of construction drawings that are accurate, precise, and clearly understood. Two three-hour studios per week. Prerequisites: LAEP 3120 and 3610. (F)

LAEP 4120  Emerging Areas in Landscape Architecture I  2
Exploration of new and emerging areas in the profession of landscape architecture. National and international issues in regional landscape planning, landscape restoration/bioengineering, and visual resource management are among several issues which may be examined. Three three-hour studios per week. Prerequisite: LAEP 3120. (F,Sp,Su)

LAEP 4130  Emerging Areas in Landscape Architecture II  2
Exploration of new and emerging areas in the profession of landscape architecture. National and international issues in regional landscape planning, landscape restoration/bioengineering, and visual resource management are among several issues which may be examined. Three three-hour studios per week. Prerequisite: LAEP 3120. (F,Sp,Su)

LAEP 4250  Internship and Cooperative Education  1-5
Course credit for professional experience outside the classroom prior to graduation. Statement of professional goals and a summary report following the experience are required. (F,Sp,Su)

LAEP 4350  Travel Course  1-3
Major field trip to examine a variety of projects in planning and design. (F,Sp,Su)

LAEP 4810  Tutorial  1
Directed readings and discussions of landscape issues. Prerequisite: Instructor’s permission. (F,Sp,Su)

LAEP 4900  Special Problems  1-5
Selected problems to meet individual needs for students’ completion of professional education. Hours arranged. Prerequisite: Instructor’s permission. (F,Sp,Su)

LAEP 4910  Professional Practice I  1
Introduction to different modes of professional practice, portfolio development, and preparation for entry into a professional office. Graduate students required to develop a corporate structure and marketing plan for the mock company they established in LAEP 6100. (Sp)

LAEP 4920  GI Professional Practice II  1
Introduction to different modes of professional practice, portfolio development, and preparation for entry into a professional office. Graduate students required to develop a corporate structure and marketing plan for the mock company they established in LAEP 6100. (Sp)

LAEP 4950  Seminar  1
Directed readings and reports on current and emerging areas of the profession. One recitation hour per week. (F,Sp,Su)

LAEP 5400  Low Water Landscaping  3
Examines arid ecosystems, emphasizing the Intermountain West, and recreating such ecosystems in a range of amenity landscapes. Also covers procurement, propagation, establishment, and maintenance of plants appropriate for low water landscapes. Also taught as PLSC 5400/6400. (F)

LAEP 6100  Regional Landscape Analysis and Planning  5
Focuses on the challenges and opportunities inherent in conducting landscape planning and analysis on a broad scale. Students integrate a variety of landscape planning project scales through literature review, selected case studies, and a major applied studio project. Prerequisites: LAEP 6740, 6750. (F)

LAEP 6110  Landscape Planning for Wildlife  3
Applications of principles of landscape ecology, conservation biology, and wildlife management to planning in the urban, suburban, and exurban landscapes. Discussion of restoration of disturbed habitats in these environments. Includes real-world projects and field trips. Addresses issues of landscape restoration and bioengineering. (Sp)

LAEP 6120  Regional Landscape Policy and Implementation  2
Case studies and/or implementation strategies for planning alternatives developed in LAEP 6100. Prerequisites: LAEP 6740, 6750. (Sp)

LAEP 6160  Professional Practice I  1
Introduction to different modes of professional practice, portfolio development, and preparation for entry into a professional office. Graduate students required to develop a corporate structure and marketing plan for the mock company they established in LAEP 6100. (Sp)

LAEP 6170  Professional Practice II  1
Exposure to legal and corporate aspects of professional practice, business ethics, and business planning. Graduate students required to develop a corporate structure and marketing plan for the mock company they established in LAEP 6100. (Sp)

LAEP 6230  History of Landscape Architecture  3
Examination of historic landscape change from ancient to present times, with a primary emphasis on the visual qualities of designed landscapes. Three one-hour lectures and a one-hour seminar per week. (F)

LAEP 6250  Internship and Cooperative Education Program  1-5
Course credit given for professional experience outside the classroom prior to graduation. Statement of professional goals and summary report following the experience are required. Prerequisite: LAEP 6100. (F,Sp,Su)

LAEP 6270  Site Analysis: Social, Behavioral, and Biophysical Dimensions  5
Site survey, analysis, and design synthesis. Focuses on human behavior and natural resources as design considerations for future land use planning. Introduces foundational site analysis methods and tools; and integrates Geospatial Information Systems (GIS) training for data interpretation. Graduate students evaluate, adapt, and apply methods for specific project analysis, as well as use GIS to analyze and create new data sets. (F)

LAEP 6310  Recreation and Open Space Planning and Design  5
Focuses on planning and design of open space and recreational areas, as well as facilities of various types and scales. Students develop skills in analysis, research, planning strategy, and design technique to create functional spaces based on client needs and site limitations. Prerequisite: LAEP 2720 or permission of instructor. (F)

LAEP 6320  Residential Planning and Design  5
Studio course introducing methods for the planning and design of residential projects of various types and scales. Students develop skills in critical analysis, design technique, and planning strategy to create functional spaces based on client needs and site requirements. Prerequisite: LAEP 6310. (Sp)

LAEP 6350  Planting Design for Sustainability  4
Emphasizes plant/environmental relationships, as well as plant community dynamics, aesthetics, function, and sustainability. Includes lectures, readings, projects, and papers. (F)

LAEP 6370  City and Regional Planning  3
Introduction to historic and current theory and methods of city and regional planning. Includes legislative, administrative, and implementation practices within the planning process. Emphasizes public transportation and mobility issues. This course is not currently being taught. For information about when it may be taught, contact the department.
Course Descriptions

LAEP 6400  Low Water Landscaping  3
(dual listing 5400)
Examines and ecosystems, emphasizing the Intermountain West, and recreating
such ecosystems in a range of amenity landscapes. Also covers procurement,
propagation, establishment, and maintenance of plants appropriate for low water
landscapes. Also taught as PLSC 6400/5400. (F)

LAEP 6410  Redefining the Urban Landscape  5
Focuses on urban environment for design expression and processes associated
with the creation of cities. Explores different aspects of urban design theories and
design approaches (conceptual, perceptual, and analytical), as applied to large
urban areas and site-specific spaces. (F)

LAEP 6550  Travel Course  1-3
Major field trip to examine a variety of projects in planning and design. (F,Sp,Su)

LAEP 6740  Planning Theory and
Implementation Issues  3
Explores theoretical underpinnings of planning and landscape theory, from the
rational model to contemporary alternatives. Leads to discussions of issues of
sprawl, sustainability, and transportation, including their effects on the built
environment, agricultural lands, and open-space systems. (F)

LAEP 6750  Implementation and Regulatory
Techniques in Planning  3
Review and analysis of the legal basis and techniques for land use and resource
planning, including historic and visual resources at the federal, state, and
local levels. Relies on readings in case law and specific case studies, as well
as research focused on the evaluation of planning processes and strategies.
Prerequisite: Graduate standing. (F,Sp)

LAEP 6860  Faculty/Interdisciplinary Seminar I  1
Landscape architecture and environmental planning program options and
research potential presented by departmental faculty. Also introduces students
to other interdisciplinary programs and faculty within the University. Prerequisite:
Graduate standing. (F,Sp)

LAEP 6862  Faculty/Interdisciplinary Seminar II  1
Landscape architecture and environmental planning program options and
research potential presented by departmental faculty. Also introduces students
to other interdisciplinary programs and faculty within the University. Second seminar
in a two-seminar series. Graded Pass/Fail only. Prerequisite: Graduate standing.
(Sp)

LAEP 6890  Seminar on Thesis Proposals
and Procedures  1
Explores preparation of thesis proposals and abstracts. Discussion of graduate
degree completion requirements and procedures. Prerequisite: Graduate
standing. (Sp)

LAEP 6900  Special Problems  1-5
Selected problems to meet individual student interests and areas of
concentration. Registration by permission of departmental faculty. Prerequisite:
Graduate standing. (F,Sp,Su)

LAEP 6910  Reading Seminar I  1
Selected readings directed by department faculty. Prerequisite: Graduate
standing. (F)

LAEP 6930  Reading Seminar II  1
Selected readings directed by department faculty. Prerequisite: Graduate
standing. (Sp)

LAEP 6960  Master's Project  1-6
Requires research, analysis, and production of a given subject area, including
its final planning, design, and documentation. Prerequisite: Graduate standing.
(F,Sp,Su)

LAEP 6970  Thesis Research  1-6
Graded Pass/Fail only. Prerequisite: Graduate standing. (F,Sp,Su)

LAEP 6990  Continuing Graduate Advisement  1-3
Graded Pass/Fail only. Prerequisite: Graduate standing. (F,Sp,Su)

Language (LANG)

See Department of Languages, Philosophy, and Speech Communication,
pages 364-379

LANG 3550  DHA  Culture of East Asia  3
Helps students explore and appreciate the culture of three East Asian countries:
China, Japan and Korea. Students gain sincere view and understanding of these
East Asian cultures through readings, hands-on cultural activities, viewing video
materials, writing, and discussions. Topics include: major historical and social
events, customs and traditions, thoughts and beliefs, people, food, contemporary
issues, art, literature, and film. Also taught as ANTH 3550 and HIST 3550.

LANG 3990  Special Topics  1-5
Additional readings or research done beyond the material covered in other
language courses. May be repeated for credit if different topic is covered.
Prerequisite: Instructor's permission.

LANG 4200H  Senior Honors Seminar  1
Credit for completing and presenting a senior honors thesis project. Requirement
may be fulfilled by publishing the thesis in an academic journal, defending
the thesis before a faculty committee, presenting the thesis at an academic
conference, or presenting the thesis in the languages session during Scholar’s
Day.

LANG 4210H  Senior Honors Thesis  1-4
Independent study research credits for preparation of a senior honors thesis
to fulfill requirements for a degree in languages with departmental honors.
Prerequisite: Permission of instructor prior to enrollment.

Latin (LATN)

See Department of History, pages 332-337
Also see Classics Minor, page 219

LATN 1010  Beginning Latin I  5
Basics of Latin grammar and vocabulary. Beginning readings. (F)

LATN 1020  Beginning Latin II  5
Prerequisite: Grade of B or better in LATN 1010. (Sp)

LATN 3100  Intermediate Latin Prose  3
Readings in Latin prose. Prerequisite: Minimum grade of C or higher in LATN
1020.

LATN 3130  Intermediate Latin Poetry  3
Readings in Latin poetry. Prerequisite: Minimum grade of C or higher in LATN
1020.

LATN 4100  Advanced Latin Readings  3
Readings in Latin poetry and/or prose. Prerequisite: Minimum grade of C or
higher in LATN 3100 and 3130. (F,Sp)

LATN 4930  Directed Readings in Latin
Poetry and Prose Authors  1-3
Directed readings in advanced Latin poetry and prose authors. Prerequisite:
Successful completion of at least three semesters of Latin. (F,Sp,Su)

Repeatable for credit. Check with major department for limitations on number of credits that
can be counted for graduation.
### Course Descriptions

**Taught 2007-2008.**
Course Descriptions

Mechanical and Aerospace Engineering (MAE)

See Department of Mechanical and Aerospace Engineering, pages 406-412

MAE 1200 Engineering Graphics 2
Introduction to technical sketching, solid modeling, and engineering graphics. Concurrent engineering design process applied to a project. Students start with hand sketches, then move through variational geometry solid models, with tolerance analysis and control, until they have produced a complete set of manufacturing drawings conforming to the ASME standard. Prerequisite: MATH 1060. (F,Sp)

MAE 2160 Material Science (formerly MAE 2060) 3
Study of atomic and microscopic structures of metals, polymers, ceramics, and composite materials, and how these structures affect material properties. Prerequisites: CHEM 1210 and ENGR 2140 (both may be taken concurrently). (F,Sp)

MAE 2200 Engineering Numerical Methods I 2
Introduction to computational methods, emphasizing software development using FORTRAN 95. Prerequisite: MATH 1220. (F)

MAE 2250 Cooperative Practice 3
Planned work experience in industry. Detailed program must have prior approval. Written report required. (F,Sp,Su)

MAE 2300 Thermodynamics I (formerly MAE 2400) 3
First and second laws of thermodynamics; analysis of open and closed systems; equations of state; power and refrigeration cycles; and problem solving methodology. Prerequisites: MATH 1220; MATH 2210 (may be taken concurrently). (Sp,Su)

MAE 2450 Engineering Numerical Methods II (formerly MAE 2210) 3
Explores basic tools of numerical analysis, solution to ordinary and partial differential equations, software development using FORTRAN 95, and applications using computer algebra packages. Prerequisites: MAE 2200; MATH 2210, 2220 (may be taken concurrently). (Sp)

MAE 2650 Manufacturing Processes (formerly MAE 2600) 3
Introduction to manufacturing processes and CAD/CAM. Material forming, machining, finishing, and joining. Integration of manufacturing and CAD, plus the fundamentals and application of statistical process control. (Sp)

MAE 3040 Mechanics of Solids 3
Stress, strain, and deflection due to flexure and shear. Combined stresses, instability, nonsymmetric bending, torsion, and energy methods. Prerequisite: ENGR 2140. (F)

MAE 3320 Advanced Dynamics 3
Particle and rigid body dynamics. Work and kinetic energy, conservation of energy, impulse-momentum, conservation of linear and angular momentum. Kinematics and kinetics in 2-D and 3-D. Newtonian and Lagrangian Mechanics. Prerequisites: ENGR 2030; MAE 2200 (may be taken concurrently). (F)

MAE 3340 Instrumentation and Measurements 3
Principles and application of mechanical instrumentation and experimentation. Sensing elements, signal conditioning, data acquisition, statistical analysis of data, and instrumentation system design. Prerequisites: ENGR 2140, ETE 2210, MAE 3400, 3420. (Sp)

MAE 3400 Thermodynamics II 3
Second law analysis, power and refrigeration cycles, property relations, gas mixtures, psychrometrics, chemical reactions, chemical equilibrium, introduction to heat transfer, steady state and transient conduction. Prerequisites: MAE 2300; MAE 2200 (may be taken concurrently). (F)

MAE 3420 Fluid Mechanics 3
Application of fluid dynamic theory to inviscid and viscous, incompressible and compressible, and external and internal fluid flows, with emphasis on laminar and turbulent boundary layers. Prerequisites: ENGR 2030, MAE 2200, 2300 (MAE 2200 may be taken concurrently). (F)

MAE 3440 QI Heat and Mass Transfer 3
Introduction to convection, external flow, internal flow, free convection, boiling and condensation, heat exchangers, radiation and diffusion mass transfer. Includes design project. Prerequisites: MAE 3400, 3420; MAE 2450 (may be taken concurrently). (Sp)

MAE 3800 Design I 2
First course in senior design sequence. Design process, teaming skills, engineering economics, project selection and management, proposal writing, technical writing, and technical presentations. Prerequisite: ENGR 2140. (Sp)

MAE 4300 Machine Design 3
Computer-aided design and synthesis of mechanisms, mechanical linkages, cams, fasteners, welds, gears, bearings, power transmission components, and lubrication. Component failure analysis based on metal fatigue related to dynamic loading. Prerequisite: MAE 3040. (Sp)

MAE 4400 CI Fluids/Thermal Laboratory 2
Laboratory experiences in observation and measurement of fundamental fluid and thermal phenomena. Prerequisites: MAE 3340, 3440. (F)

MAE 4800 CI Design II 3
Senior design project, including a technical presentation and a critical design review. Prerequisites: MAE 3440, 3800, 4300. (F,Sp)

MAE 5020 Finite Element Methods in Solid Mechanics I 3
Introduction to finite element methods and their application to the analysis and design of mechanical engineering systems. Prerequisite: MAE 3040. Also taught as CEE 5020. (F)

MAE 5060 Mechanics of Composite Materials I 3
Stress-strain relations for nonisotropic composites, such as fiber-reinforced plastic laminates, properties and their uses, strength and life determination, and methods for design using composite materials. Prerequisite: MAE 3040 or CEE 3010. Also taught as CEE 5060. (Sp)

MAE 5300 Vibrations 3
Vibration of single and multiple degree of freedom, and discrete mass systems. Natural frequencies and mode shapes for free, damped, and undamped systems. Forcing functions and transient responses. Matrix methods, numerical solution, and random vibrations. Applications and design. Prerequisites: ENGR 2030, 2140. (F)

MAE 5310 Dynamic Systems and Controls 3
Study of continuous-time systems, classical and modern systems design methods, transfer function models, state space, dynamics of linear systems, and frequency domain analysis and design techniques. Introduction to controllability and observability, and full-state pole placement controller design. Laboratory work required. Prerequisite: MAE 3340. (F)

MAE 5410 Design and Optimization of Thermal Systems 3
Discussion of the basic considerations that occur in the design of thermal systems, including problem formulation, appropriate modeling and solution methodologies, optimization techniques, and economic analysis. Prerequisite: MAE 3440. (F)

MAE 5420 Compressible Fluid Flow 3
Application of conservation of mass, momentum, and energy to the design and analysis of compressible fluid systems. Prerequisites: MAE 3400, 3420. (F)

MAE 5440 Computational Fluid Dynamics 3
Introduction to computational fluid dynamics and heat transfer using the finite-volume method. Extensive code development. Application of a commercial CFD solver to a problem of interest. Prerequisites: MAE 3420 and 3440. (Sp)
MAE 5470 Internal Combustion Engines 3
Thermodynamics of internal combustion engines; idealized cycles, fuels, fuel metering, engine characteristics, pressure measurement, and engine testing. This course is not currently being offered. For information about when it may be offered, contact the department.

MAE 5500 Aerodynamics 3
Fundamentals of incompressible, inviscid flow; aerodynamic forces and moments; airfoil characteristics; incompressible flow around two-dimensional airfoils and finite wings; three-dimensional incompressible flow; and introduction to aircraft performance. Prerequisite: MAE 3420. (F)

MAE 5510 Dynamics of Atmospheric Flight 3
Aircraft equations of motion; aerodynamic forces and moments; aircraft stability and control in roll, pitch, and yaw; aircraft motion with six degrees of freedom; aircraft performance and design; and design project. Prerequisite: MAE 5500. (Sp)

MAE 5520 Elements of Space Flight 3
Introduction to astrodynamics and orbital design. Spacecraft systems engineering including spacecraft subsystems (e.g., attitude control, communications, power, structures). Introduction to propulsion and launch vehicles. Prerequisites: MAE 3320 or PHYS 3550; or both ECE 2270 and 2700. (F)

MAE 5530 Space System Design 3
Students in teams perform a space system design involving all aspects, including technical, cost, and schedule. Class is linked to national design competitions and/or current USU spacecraft design projects. Prerequisite: ECE 5230 or MAE 5520. Also taught as ECE 5240. (Sp)

MAE 5540 Propulsion Systems 3
Fundamentals of rocket and air breathing propulsion, including space flight dynamics, nozzle theory, combustion processes, and flight performance. Rocket propulsion systems, including solid, liquid, hybrid, and combined cycles. Air breathing propulsion systems, including ramjet, scramjet, turbojet, and turbofan engine concepts. Prerequisite: MAE 5420 or consent of instructor. (Sp)

MAE 5560 Dynamics of Space Flight 3
Fundamentals of spacecraft dynamics, including Keplerian orbits, orbital position as a function of time, three-dimensional orbits, orbital determination, orbital maneuvers, satellite altitude dynamics, and rocket vehicle dynamics. Prerequisite: MAE 3320 or permission of instructor. (F)

MAE 5580 Aircraft Design 3
Design and optimization of aircraft systems. Students work in teams to design and optimize an aircraft to satisfy a specific set of mission requirements, including mission effectiveness, cost, and scheduling. Class is linked to national design competitions and/or current USU aircraft design projects. Prerequisite: Permission of instructor. (F)

MAE 5600 Manufacturing Process Planning and Statistical Quality Control 3
Explores how to produce products in today’s manufacturing environment. Topics include forecasting, planning, facility layout, job design, planning, scheduling, total quality management, and statistical process control as they relate to manufacturing firms. Prerequisite: MAE 2650. (F)

MAE 5610 Hydraulics and Pneumatics 3
Hydraulic and pneumatic circuit theory, components, and systems analysis and design. Efficiency and performance evaluation, based on steady and transient flow principles and force and energy transfer concepts. Introduction to electrohydraulic control systems. Prerequisite: MAE 3420. This course is not currently being offered. Contact department for information about when it may be offered.

MAE 5620 Manufacturing Automation 3
Principles of automation technology as applied to manufacturing systems. Topics include motion control, PLC, robotics, CNC, and system integration. Prerequisite: MAE 2650. (F)

MAE 5630 Machining Theory and Applications 3
Introduces fundamental metal cutting theory (such as chip formation, cutting forces and temperatures, and tool wear) and its applications, including high-speed machining of aerospace and other difficult-to-machine alloys. Prerequisites: MAE 2650 and 3040. (Sp)

MAE 5640 Design for Manufacturability 3
Product design for economic production. Manufacturing processes (especially primary processes), associated tooling cost and design, and resultant product design requirements. Prerequisites: MAE 2650 and 3690. (F)

MAE 5650 Nontraditional and Additive Manufacturing Processes 3
Introduction to nontraditional and additive manufacturing processes, including rapid prototyping, laser processing, and electrical discharge machining. Prerequisites: MAE 2160, 2650, and 3440. MAE 3440 may be taken concurrently. (Sp)

MAE 5660 Transport Phenomena in Manufacturing Processes 3
Analysis of manufacturing processes through the development of physically-based mathematical models. Heat and mass transfer principles used for a quantitative treatment of transport phenomena for process simulation and control. Prerequisites: MAE 2160, 3440. (Sp)

MAE 5680 Manufacturing Planning and Simulation 3
Explores planning and simulation methods for process design issues in electronics manufacturing (EM) and discrete parts manufacturing. Students learn planning, modeling, and simulation methods at the process and system level. Prerequisite: MAE 5600. This course is not currently being offered. Contact department for information about when it may be offered.

MAE 5900 Cooperative Practice 3
Planned work experience in industry. Detailed program must have prior approval. Written report required. Student must be in professional program. (F,Sp,Su)

MAE 5930 Special Problems 1-3
Formulation and solution of practical or theoretical problems. Prerequisite: Permission of department head. (F,Sp,Su)

MAE 6010 Finite Element Methods in Solid Mechanics II*** 3
Advanced theory and applications of finite element methods to both static and dynamic solid mechanics problems. Prerequisite: MAE 6020. (Sp)

MAE 6040 Continuum Mechanics and Elasticity 3
Mechanics of continuous media; tensors, stress, strain, deformation, rate equations, and constitutive equations. Plane stress, plane strain, torsion, and bending theories, as well as problem solutions, investigated for linear elastic materials. Prerequisite: MAE 3040 or CEE 3010. (F)

MAE 6050 Experimental Methods in Structural Engineering 3
Experimental techniques used in research and design in structural engineering and mechanics. Structural models. Theory and practical applications. Development of principles used to design research projects. Prerequisite: Instructor’s consent. Also taught as CEE 6050. (Sp)

MAE 6070 Mechanics of Composite Materials II*** 3
Second course in composite materials. Stress-strain states of laminated composite structures, including interlaminar stresses, failure criteria, and hygrothermal stresses. Prerequisite: MAE 5060. Also taught as CEE 6070. (F)

MAE 6080 Boundary Element Method 3
Presents introduction to boundary element method to solve fluid and solid mechanics problems. Prerequisites: FORTRAN programming skills, MAE 3040, 5020. (Sp)

MAE 6090 Theory of Plates and Shells 3
Introduction to plate and shell theories. Development of bending and buckling of plates and shells through classical theory. Prerequisite: MAE 3040 or CEE 3010. Also taught as CEE 6090. (F)

MAE 6130 Structural Dynamics and Seismic Design 3
Development and solutions for equations of motion for single- and multi-degree of freedom systems. Dynamic analysis by Modal Superposition and Response Spectra. Design of structures for seismically active areas. Also taught as CEE 6130. (Sp)

Course Descriptions

Mathematics (MATH)

See Department of Mathematics and Statistics, pages 394-405

MATH 0900 Elements of Algebra 3
Review of elementary algebra in preparation for MATH 1010. Remedial class not carrying USU or transfer credit. Remedial fee required. Graded Pass/Fail only. (F,Sp,Su)

MATH 1010 Intermediate Algebra 4
Linear equations and inequalities, polynomials and exponents, rational expressions, roots and radicals, quadratic equations, liner and systems of linear equations. Prerequisite: C- or better in MATH 0900 or Math ACT score of at least 23 (Math SAT score of at least 540) within the Math prerequisite acceptability time limit; or satisfactory score on Math Placement Test. Course fee required. (F,Sp,Su)

MATH 1030 QL Quantitative Reasoning 3
Exploration of contemporary mathematical thinking, motivated by its application to problems in modern society. Emphasizes development of skill in analytical reasoning. Prerequisite: C- or better in MATH 1010 or Math ACT score of at least 23 (Math SAT score of at least 540) within the Math prerequisite acceptability time limit; or satisfactory score on Math Placement Test. (F,Sp)

MATH 1050 QL College Algebra 4
Real and complex number systems, graphs, inverse functions, polynomial and rational functions, exponential and logarithmic functions, systems of equations, elementary matrix algebra, induction, binomial theorem, permutations and combinations. Graphing calculator required. Prerequisite: C- or better in MATH 1010, or Math ACT score of at least 23 (Math SAT score of at least 540), or AP calculus score of at least 3 on the AB exam within the Math prerequisite acceptability time limit; or satisfactory score on Math Placement Test. May be taken concurrently with MATH 1050. (F,Sp,Su)

MATH 1060 Trigonometry 2
Trigonometric functions, equations, identities, and applications. Graphing calculator required. Prerequisite: C- or better in MATH 1050 or Math ACT score of at least 25 (Math SAT score of at least 560) within the Math prerequisite acceptability time limit; or satisfactory score on Math Placement Test. (F,Sp,Su)

MATH 1100 QL Calculus Techniques 3
Techniques of elementary calculus, differentiation, integration, elementary optimization, and introduction to partial derivatives. Applications in business, social science, and natural resources. Graphing calculator required. Prerequisite: C- or better in MATH 1050 or Math ACT score of at least 25 (Math SAT score of at least 560) within the Math prerequisite acceptability time limit; or satisfactory score on Math Placement Test. (F,Sp,Su)

MATH 1210 QL Calculus I 4
Analytic geometry, differential and integral calculus, transcendental functions, and applications. Graphing calculator required. Prerequisite: C- or better in MATH 1050 and 1060, or Math ACT score of at least 27 (Math SAT score of at least 620), or AP calculus score of at least 3 on the AB exam within the Math prerequisite acceptability time limit; or satisfactory score on Math Placement Test. (F,Sp,Su)

MATH 1220 QL Calculus II 4
Integration, infinite series, introduction to vectors, and applications. Graphing calculator required. Prerequisite: C- or better in MATH 1210, or AP score of at least 4 on Calculus AB exam or at least 3 on Calculus BC exam. (F,Sp,Su)

MATH 2020 QL Introduction to Logic and Geometry 3
Logic; introduction to algebraic geometry and Euclidean geometry. MATH 2020 is a mathematics content course, not a methods course. Prerequisite: C- or better in MATH 1050 or Math ACT score of at least 25 (Math SAT score of at least 580) within the Math prerequisite acceptability time limit; or satisfactory score on Math Placement Test. Course fee required. (F,Sp,Su)

MATH 2210 QL Multivariable Calculus 3
Vector calculus, multiple integration, partial derivatives, line and surface integrals. The theorems of Green, Gauss, and Stokes. Prerequisite: C- or better in MATH 1220 or AP Calculus score of 5 on BC exam. (F,Sp,Su)

**Course Descriptions**

**MATH 2250 QI Linear Algebra and Differential Equations**
Linear systems, abstract vector spaces, matrices through eigenvalues and eigenvectors, solution of ode's, Laplace transforms, first order systems. Prerequisite: C- or better in MATH 1220 or AP Calculus score of 5 on BC exam. (F,Sp,Su)

**MATH 2260 Internship and Cooperative Studies**
Lower-division internship/cooperative work experience. (F,Sp,Su)

**MATH 2270 QI Linear Algebra**
Topics from linear algebra, including matrices, abstract vector spaces, linear independence, bases, eigenvalues, eigenvectors, orthogonality, least squares approximation, and linear transformations. Recommended for Math and Math Education majors. Prerequisite: C- or better in MATH 1220 or AP Calculus score of 5 on BC exam. (F)

**MATH 2280 QI Ordinary Differential Equations**
First-order differential equations: solution techniques, numerical methods and applications, Higher-order scalar equations; linear systems, phase plane analysis. Additional topics selected from: series solution techniques, boundary value problems, Sturm-Liouville theory, bifurcation analysis. Prerequisites: C- or better in MATH 2210 and 2270. (Sp)

**MATH 2910 Directed Reading and Conference**
Prerequisite: Prior arrangement with specific instructor. (F,Sp,Su)

**MATH 3110 Modern Geometry**
Euclidean and non-Euclidean geometry, with emphasis on historical significance of parallel postulate. Axiomatic development of geometry and theorems. Prerequisite: C- or better in MATH 1220. (Sp)

**MATH 3300 School Laboratory for Mathematics Teachers Level I**
Provides preservice mathematics teachers with supervised experiences working with teachers and students in middle and secondary schools. Activities coordinated with other Level I professional education courses. Graded Pass/Fail only. (F,Sp)

**MATH 3310 Discrete Mathematics**
Logic and axiomatics, sets, functions, counting methods, recurrence relations, graph theory, Boolean algebras, combinatorial circuits, automata, grammars, and languages. Prerequisite: C- or better in MATH 1220. (F,Sp,Su)

**MATH 4200 CI Foundations of Analysis**
Fundamental concepts of analysis studied from a rigorous point of view. Rigorous development of the real number system and calculus. Emphasis on learning how to construct proofs. Prerequisites: C- or better in MATH 2210, 2250; or C- or better in MATH 2210, 2270, or 2250. (F,Sp)

**MATH 4230 QI Applied Mathematics in Biology***
Formulation, analysis, and experimental tests of mathematical models in biology. Combines mathematics, computing, experimental design, and statistical analysis while applying the scientific method to biological systems. Lectures, recitations, and a laboratory. Prerequisites: C- or better in BIOL 1620 and MATH 2250; or permission of instructor. Programming experience recommended. Also taught as BIOL 4230. (Sp)

**MATH 4250 Advanced Internship/Co-op**
An internship/cooperative work experience which has been determined by the department to be at the 4000-level. (F,Sp,Su)

**MATH 4300 School Laboratory for Mathematics Teachers Level II**
Provides preservice mathematics teachers with supervised experiences working with teachers and students in middle and secondary schools. Activities coordinated with other Level II professional education courses. Graded Pass/Fail only. (F,Sp)

**MATH 4310 CI Introduction to Algebraic Structures**
First course in theory of algebraic structures. Topics include elementary group and ring theory. Prerequisites: C- or better in MATH 2210, 2270, 2280; or C- or better in MATH 2210, 2250. (F,Sp)

**MATH 4400 History of Mathematics and Number Theory**
Chronological parallel of math history with civilization, evolution of mathematical thought, historical foundations of numbers, computation, geometry, algebra, trigonometry, and calculus. Introduction to number theory. Prerequisites: At least one of MATH 4200 and 4310 with a C- or better, and concurrent enrollment in the other. (Sp)

**MATH 4500 Methods of Secondary School Mathematics Teaching**
A teaching methods course required of all prospective secondary school mathematics teachers. Prerequisites: C- or better in MATH 3110; and one of MATH 4200 or 4310 with a C- or better. (F,Sp)

**MATH 4620 Computer Aided Math for Secondary Math Teachers**
Problem solving using symbolic manipulation software on computers. Topics include material introduced in MATH 1210, 1220, 2210, 2250, 2270, and 2280. Includes instruction in the use of modern computerized devices in the classroom. Prerequisites: C- or better in MATH 2210, 2250; or C- or better in MATH 2210, 2270, 2280. (F)

**MATH 4700 Engineering Mathematics and Statistics**
Advanced engineering mathematics and statistics including: random variables; distributions; central limit theory; hypothesis testing; Anova; quality control; Fourier series, introductory analytic and numerical methods for elliptic, parabolic, and hyperbolic PDEs; and modern software packages. Prerequisites: C- or better in MATH 2210, C- or better in MATH 2250 or 2280. (F,Sp)

**MATH 4910 Directed Reading and Conference**
Prerequisite: Prior arrangement with specific instructor. Registration requires prior arrangement with specific instructor. (F,Sp,Su)

**MATH 5110 Differential Geometry**
Introduction to geometry of curves and surfaces in three dimensions, using graphic and symbolic software. Prerequisites: C- or better in MATH 2210, 2250; or C- or better in MATH 2210, 2270, 2280. (F)

**MATH 5210 Introduction to Analysis I**
One and several variable calculus from an advanced point of view. Proofs of all main theorems in calculus. Prerequisite: C- or better in MATH 4200 or 5510. (F)

**MATH 5220 Introduction to Analysis II**
Continuation of MATH 5210. Rigorous development of multivariable advanced calculus. Prerequisite: C- or better in MATH 5210. (Sp)

**MATH 5270 Complex Variables**
Basic theory and applications of complex variables for mathematics, physics, and engineering students. Topics include analytic functions, contour integration, and residue theorem conformal mappings. Prerequisites: C- or better in MATH 2210, 2250; or C- or better in MATH 2210, 2270, 2280. (Sp)

**MATH 5310 Introduction to Modern Algebra**
Continuation of MATH 4310. Topics include: Sylow theory for finite groups, factorization theory for commutative rings, and Galois theory. Prerequisite: C- or better in MATH 4310. (Sp)

**MATH 5340 Theory of Linear Algebra**
Vector space theory, linear transformations and matrices, eigenvalues and eigenvectors, inner product spaces, orthogonality, canonical forms, and Hermitian matrices. Prerequisite: C- or better in MATH 2250 or 2270; or consent of instructor. (Sp)

**MATH 5410 Methods of Applied Mathematics**
Basic modeling and qualitative understanding, including dimensional analysis (Buckingham Pi theorem). Asymptotic solutions, perturbation approaches, boundary layers in differential equations, variational calculus, Hamilton's principle, and conservation of energy. Emphasizes practical approaches to science and engineering problems. Prerequisites: C- or better in MATH 2210, 2250; or C- or better in MATH 2210, 2270, 2280. (F)

**MATH 5420 Partial Differential Equations**
Modeling with partial differential equations, diffusion, and wave equations. Classical solution techniques including: maximum principles, separation of variables (eigenfunctions), method of characteristics, Fourier and Laplace transforms, and singularity methods (Green's Functions). Emphasizes
understanding and solving physical equations. Prerequisite: C- or better in MATH 2250 or 2280. (Sp)

**MATH 5460 Introduction to the Theory and Application of Nonlinear Dynamical Systems**

Qualitative behavior of nonlinear maps and ordinary differential equations. Stability of solutions, bifurcation theory, chaos, and applications. Prerequisite: C- or better in MATH 2250 or 2280. (Sp)

**MATH 5500 Capstone Mathematics and Statistics for Teachers**

Builds on competencies attained in mathematics and statistics, enabling students to connect with and relate mathematics and statistics to real-world problem solving, while enhancing their capacity to explain conceptual mathematics. Prerequisites: C- or better in MATH 4200, 4310, and 4400. (F)

**MATH 5510 Introduction to Topology**

Elementary point-set topology, topological spaces, separation axioms, metric spaces, compactness, connectedness, order topology, countability axioms, continuity, and homeomorphisms. Prerequisite: C- or better in MATH 4200. (F)

**MATH 5570 Actuarial Math I***

Introduction to theory of risk and its application to construction and analysis of models for insurance systems. Prerequisites: C- or better in MATH 5710, STAT 3000, and permission of instructor. (F)

**MATH 5580 CI Actuarial Math II***

Continuation of MATH 5570. Prerequisite: C- or better in MATH 5570. (Sp)

**MATH 5610 Computational Linear Algebra and Solution of Systems of Equations**

Numerical solutions of systems of linear and nonlinear equations, methods for eigensystems, least squares problems, finding roots of functions and nonlinear systems, constrained and unconstrained optimization. Prerequisites: C- or better in MATH 2210, C- or better in MATH 2250 or 2270, and a high-level programming language. (F)

**MATH 5620 Numerical Solution of Differential Equations**

Numerical solution of differential equations, initial and boundary value problems, finite difference, finite element, and spectral methods (FFT) applied to ODEs and PDEs. Prerequisites: C- or better in MATH 2210; C- or better in MATH 2250 or 2270; C- or better in MATH 2280; and a high-level programming language. (Sp)

**MATH 5640 Optimization***

One-semester introductory survey of optimization, including both continuous and combinatorial problems. Topics include: linear programming, constrained and unconstrained optimization, network models, dynamic programming, and integer programming. Prerequisites: C- or better in MATH 2210; C- or better in MATH 2250 or 2270; and a high-level programming language. (Sp)

**MATH 5710 Introduction to Probability**

Discrete and continuous probability, random variables, distribution and density function, joint distributions, conditional probabilities and expectations, Bayes' theorem, moments, moment generating functions, inequalities, convergence in probability and distribution, and central limit theorem. Prerequisites: C- or better in MATH 2210; C- or better in MATH 2250 or 2270. (F,Sp)

**MATH 5720 Introduction to Mathematical Statistics**

Basic theory of point and interval estimation and hypothesis testing. Topics include: sufficiency and completeness; method-of-moments, best unbiased, maximum likelihood, Bayes', and empirical Bayes' estimators; Neyman-Pearson lemma; and likelihood ratio tests. Prerequisite: C- or better in MATH 5710. (Sp)

**MATH 5760 Stochastic Processes**

Application of stochastic processes to engineering and science. Topics include Markov chains, Poisson processes, renewal theory, and Brownian motion. Prerequisite: C- or better in MATH 5710. (F)

**MATH 5810 Topics in Mathematics 1-3**

**MATH 5820 Topics in Mathematics 1-3**

Prerequisite: Permission of instructor. (F,Sp,Su)

**MATH 5910 Directed Reading and Conference 1-3**

Prerequisite: Prior arrangement with a specific instructor. (F,Sp,Su)
Course Descriptions

MATH 6620  Numerical Analysis*  3
Numerical solution of ordinary and partial differential equations. Prerequisite: C- or better in MATH 6610 or consent of instructor. (Sp)

MATH 6640  Optimization*  3
Unconstrained problems, smooth function methods, linearly constrained problems, linear and quadratic programming, nonlinearly constrained methods, and practicalities. Prerequisite: C- or better in MATH 5220 or consent of instructor. (Sp)

MATH 6750  Probability Theory*  3
Prerequisite: Consent of instructor. (F) (Sp)

MATH 6760  Probability Theory*  3
Probability spaces, random variables, distribution functions, expectations, independence, modes of convergence, limit theorems, and applications. Prerequisite: C- or better in MATH 5210. MATH 6750 must be completed prior to 6760. (F) (Sp)

MATH 6810  Topics in Mathematics (Topic)*  3
Prerequisite: Prior arrangement with specific instructor. (F,Sp,Su)

MATH 6820  Topics in Mathematics (Topic)*  3
Graded Pass/Fail only. (F,Sp,Su)

MATH 6910  Directed Reading and Conference*  1-3
Repeatable for credit. Check with major department for limitations on number of credits that may count toward degree. (F,Sp,Su)

MATH 6970  Thesis 1-9
Prerequisite: Approval of course coordinator. (F,Sp,Su)

MATH 6990  Continuing Graduate Advisement 1-9
Graded Pass/Fail only. (F,Sp,Su)

MATH 7110  Geometry (Topic)*  3
Prerequisite: Prior arrangement with specific instructor. (F,Sp,Su)

MATH 7120  Geometry (Topic)*  3
MATH 7210  Analysis (Topic)*  3
MATH 7220  Analysis (Topic)*  3
MATH 7310  Algebra (Topic)*  3
MATH 7320  Algebra (Topic)*  3
MATH 7410  Differential Equations (Topic)*  3
MATH 7420  Differential Equations (Topic)*  3
MATH 7510  Topology (Topic)*  3
MATH 7520  Topology (Topic)*  3
MATH 7610  Numerical Analysis (Topic)*  3
MATH 7620  Numerical Analysis (Topic)*  3
MATH 7750  Probability (Topic)*  3
MATH 7760  Probability (Topic)*  3
MATH 7810  Topics in Mathematics (Topic)*  3
MATH 7820  Topics in Mathematics (Topic)*  3
MATH 7910  College Teaching Internship 3
MATH 7970  Dissertation Research 1-15
Graded Pass/Fail only. (F,Sp,Su)

MATH 7990  Continuing Graduate Advisement 1-9
Graded Pass/Fail only. (F,Sp,Su)

Management and Human Resources (MHR)

See Department of Management and Human Resources, pages 383-387

MHR 1160  Developing Self-Management Skills  1
A practical course designed to provide basic self-management skills contributing to personal effectiveness. For freshmen and sophomores only. (F,Sp,Su)

MHR 2050  Legal and Ethical Environment of Business  3
(formerly MHR 2990)
Surveys the legal and ethical environment of business. Introduces elementary legal research and writing and critical thinking techniques. Lecture and laboratory. Prerequisites: STAT 1040 or MATH 1030 or 1050 (MATH 1050 or equivalent is required for College of Business majors); and GPA of 2.5 or higher. (F,Sp,Su)

MHR 2160  Student Applied Leadership Training 1-3
Available to students involved in structured leadership training provided as part of their role and responsibility at the University. For details, contact the Office of University Advising (TSC 304). Prerequisite: Approval of course coordinator. (F,Sp,Su)

MHR 2350  Small Business Management  3
Introduces students to entrepreneurial activities and the processes of small businesses. The course includes topics such as business planning, managing human performance, and developing and implementing public policy. Prerequisites: MATH 2050; GPA of 2.0 or higher; and completion of at least 60 credits. (F,Sp,Su)

MHR 3110  DSS Managing Organizations and People  3
Overview of the role of management, and an introduction to leadership theory and practice. Includes defining of mission and goals, organizing work, and managing human performance. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp,Su)

MHR 3510  Fundamentals of Entrepreneurship  3
Introduction to entrepreneurship and the processes of new ventures. The objective is to help students become familiar with entrepreneurship and ascertain the degree to which it represents a viable career path. Focuses on identifying, analyzing, and developing business opportunities. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp,Su)

MHR 3520  Relationship and Organizational Competencies for Entrepreneurs  3
Development of the relationship and organizational competencies for entrepreneurs. Focuses on the development of persuasion, delegation, and organizational skills for individuals who launch businesses and/or play a key role in their growth. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)

MHR 3710  Developing Team and Interpersonal Skills  3
Experientially-driven course focusing on the role of teams in organizations and on developing skills which individuals and teams need to be effective. Topics include self-awareness, supportive communication, problem solving, and conflict management. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)

MHR 3720  DSS Leading Organization Change  3
Explores the topic of organizational change and transformation, with special emphasis on the role of leadership, vision, and organization culture in change programs. Extensive use of case studies and experiential exercises. Also covers the history of organization development, change facilitation, and dealing with resistance to change. Prerequisites: MHR 3110; admissibility to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)

MHR 3810  DSS Employment Law and Policy Development  3
Examines laws related to employment, labor relations, civil rights, compensation, safety, health, and retirement. Provides hands-on experience in drafting and reviewing human resource policies in a business setting. Addresses implementing and influencing public policy. Prerequisites: MHR 2050; admissibility to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)
Course Descriptions

MHR 3820 DSS International Management 3
Exploration of international culture and context of management, the impact of globalization on businesses today, and the pressures and complexities of operating in global markets, including the processes of managing multi-cultural human resources. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)

MHR 4510 Senior Seminar in Entrepreneurship 3
Theoretical and practical aspects of starting or buying a business. Includes development of a business plan, as well as conducting due diligence for buying a business or extensive consulting with a start-up or growth business. Prerequisites: MHR 3510, 3520; admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F)

MHR 4630 Human Resource Management 3
Introduces the process of managing human resources, including human resource planning, recruitment, selection, training, performance evaluation, compensation, career management, and labor relations. Also discusses diversity, human resource strategy, and related ethical issues. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F,Sp)

MHR 4710 Senior Leadership Project 3
Students plan and complete advanced leadership projects, present results, and document accomplishments. Students gain practical experience and demonstrate ability to manage complex projects, contributing to organizational goals and their own career objectives. Prerequisite: Permission of instructor.1

MHR 4730 Business and Society 3
Examines the relationship of business enterprises with their external environment and helps students to develop an analytical framework for addressing the business and society relationship over one’s career in business or government. Helps students recognize, formulate, and analyze moral issues, as well as trace decisions forward to personal, cultural, and societal consequences. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits.1

MHR 4800 Independent Research and Readings 1-3®
Provides opportunity for student to pursue special interests under tutorship of faculty. Prerequisite: Approval of faculty member and department head. (F,Sp,Su)

MHR 4880 CI Business Strategy in an Entrepreneurial Context 3
Integrative capstone course dealing with processes, methods, and steps involved in starting and growing small to mid-size business ventures. Emphasizes cross-functional challenges of market entry, finance, operations, managing business growth, and entrepreneurs’ responsibilities to society. Prerequisites: Senior standing; MHR 3110, BA 3400, 3500, 3700; admittance to a USU major; cumulative GPA of 2.67 or higher. (F,Sp,Su)

MHR 4890 CI Business Strategy in a Global Context 3
Integrative capstone course dealing with challenges and strategies associated with international business. Students develop global business judgment and perspective through addressing problems related to global market entry and growth, finance, operations, strategic alliances, social responsibility, and business-government relationships. Prerequisites: Senior standing; MHR 3110, BA 3400, 3500, 3700; admittance to a USU major; cumulative GPA of 2.67 or higher. (F,Sp,Su)

MHR 4950H Senior Honors Thesis/Project 3
Creative project that will then be written up, and presented, as a Senior Thesis as required for an Honors Plan. (Sp)

MHR 5350 Contemporary Manufacturing (dual listing 6350) Management 3
Examines contemporary principles, techniques, and research findings of high-performance manufacturing. Analysis of leading models of management and continuous improvement, based upon best company practices, particularly lean, just-in-time manufacturing. Prerequisites: Admittance to a USU major; cumulative GPA of 2.67 or higher; and completion of at least 40 credits. (F)

MHR 5640 Selected Topics in Management (dual listing 6640) and Human Resources 1-3®
Selected topics in management and/or human resources are pursued in depth. Topics and instructor may vary.1

MHR 6010 Advanced Business Law 3
Detailed investigation of business law, including law of contracts, torts, property, secured transactions, commercial paper, and business organizations. Prerequisite: MHR 2550.1

MHR 6050 Management Principles 1.5
Introduction of management principles for students entering a master’s degree program in the College of Business. Graded Pass/Fail only. Prerequisite: Acceptance into a College of Business master’s degree program. (Su)

MHR 6070 Fundamentals of Business Law 1.5
Introduction of business law principles for students entering a master’s degree program in the College of Business. Graded Pass/Fail only. Prerequisite: Acceptance into a College of Business master’s degree program. (Su)

MHR 6310 Career and Professional Development 1-3®
Explores theory and literature of careers, including orientation, as well as early-, mid-, and late-career issues. Students evaluate interests and capabilities, implement a personal development plan, get feedback on career development, and receive an objective outsider assessment of career readiness. (F,Sp,Su)

MHR 6330 Applied Human Resources Research 3
Provides applied research for selected human resource topics. (F)

MHR 6350 Contemporary Manufacturing (dual listing 6350) Management 3
Examines contemporary principles, techniques, and research findings of high-performance manufacturing. Analysis of leading models of management and continuous improvement, based upon best company practices, particularly lean, just-in-time manufacturing. (F)

MHR 6370 Project Management 3
Teaches concepts of project management, while intensively involving students in production and operations related projects. Requires integrative organizational and industry research and a professional report.1

MHR 6410 New Venture Creation 3
Focuses on development of new ventures, including entrepreneurial competencies, venture teams, recognizing business opportunities, gathering resources, new venture finance, entry strategies, legal structure, licensing and regulatory requirements, patents, copyrights, and product liability.1

MHR 6430 New Venture Growth and Expansion 3
Analyzes the growth phase of business development. Topics include organizational competencies and systems, growth strategies, growth finance and staging, cash-flow, franchising, estate and family business issues, harvest strategies including buyouts and public offerings, and employment law for small employers.1

MHR 6470 Entrepreneurship Project 3
Teaches concepts of project management, while intensively involving students in entrepreneurship-related projects such as initiating a start-up or consulting with management of an emerging business. Requires integrative organizational and industry research and a professional report.1

MHR 6500 Managing Individuals and Groups 3
Focuses on development of interpersonal and team skills. Includes development of organizational systems supporting effective use of human resources, including performance management, motivation, selection, training, rewards, and career development. (F)

MHR 6510 Performance Management 1-3
Introduces Human Resource Management, and then undertakes an in-depth analysis of performance management process, including job analysis, choice of raters, performance feedback, employee motivation and discipline, and training for improvement of individual performance. (F)

MHR 6550 Human Resource Planning and Staffing 3
Focuses upon creation of competitive advantage through strategic human resources planning and staffing. Topics include job analysis, preparing candidate specifications, recruitment, assessment, and placement. Also covers pertinent laws/regulations and applicable descriptive/differential statistics. (F)

MHR 6620 Training and Organizational Development 3
Provides advanced treatment of employee, management, and organizational development. Specific topics include: historical background, needs assessment,
### Course Descriptions

program design and implementation, outcomes evaluation, and how individuals and organizations change.  (Sp)

**MHR 6630 Compensation and Benefits**  3  
Strategic analysis of compensation and benefits policies and programs. Includes job evaluation systems, job pricing, wage and salary surveys, statistical methods used in compensation, group and individual pay for performance, executive compensation, and employee benefits.  (Sp)

**MHR 6640 Selected Topics in Management (dual listing 5640) and Human Resources**  1-3  
Selected topics in management and human resources are pursued in depth. Topics and instructor may vary.  

**MHR 6650 Team and Interpersonal Effectiveness**  3  
Experiential course designed to develop team effectiveness, and specific managerial and leadership skills contributing to interpersonal competence and effectiveness in work groups and organizations.  (F)

**MHR 6670 Employee Relations and the Labor Movement**  3  
Comprehensive survey of union-management relationships, including labor markets and the labor movement, labor history and law, union organization and government, and contract negotiation and administration. Includes exercises and cases in negotiations and grievance processes.  (Sp)

**MHR 6680 Human Capital Management**  3  
Introduction to human capital management practices. Specific objectives include developing a working understanding of the links between HRM and firm outcomes, gaining a working knowledge of HR database technologies, and achieving an ability to develop and use fundamental HR costing techniques.  

**MHR 6690 Human Resource Strategy**  3  
Capstone course in Human Resource Management, designed to integrate concepts learned in specialized courses to the management of a total Human Resource function, with integration from both strategic and tactical perspectives. Covers domestic and international issues, as well as organizational change and development.  (F)

**MHR 6700 Employment Law**  3  
Examines laws related to employment, labor relations, civil rights, compensation, safety, health, and retirement. Provides experience in dispute resolution techniques in a nonunion employment setting, including negotiation, mediation, and arbitration.  (F)

**MHR 6770 Ethics for the Business Professional**  1.5  
Taking a stakeholder perspective on business, this course introduces students to several moral and ethical frameworks. Current case analyses and experiential activities allow students to confront ethical dilemmas and work through acceptable alternatives.  (F)

**MHR 6780 The Role of Business in Society**  1.5  
Considers relationship between business and its societal context, including a discussion of how business enterprises maintain their legitimacy and mandate. Helps students develop an analytical framework for addressing issues at the intersection of business and society, including the personal, cultural, and societal consequences of business decisions.  (F,Sp,Su)

**MHR 6890 Global Business Strategy**  3  
Integrative capstone course, taking a CEO’s perspective, addressing global competitiveness, strategic assessment, policy development, and strategy execution. Must be taken at end of advanced MBA program.  (Su)

**MHR 6900 Independent Research and Readings**  1-3  
Provides opportunity for students to pursue special interests under tutelage of the faculty. Prerequisite: Approval of faculty member and department head.  (F,Sp,Su)

**MHR 6960 Professional Paper**  3  
Preparation of paper of professional quality, designed to demonstrate ability to complete a major project and effectively present the results.  (F,Sp,Su)

**MHR 6970 Thesis**  1-4  
Designed for students preparing a master's degree thesis. Graded Pass/Fail only.  (F,Sp,Su)

**MHR 6990 Continuing Graduate Advisement**  1-3  
Graded Pass/Fail only.  (F,Sp,Su)

1This course will be taught as needed. For information about availability, check with Management and Human Resources Department.

2Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

3This course is also offered by online correspondence and/or CD through Independent and Distance Education.

### Management Information Systems (MIS)

*See Department of Management Information Systems, pages 388-393*

The MIS course prefix will not be used until Spring Semester 2008. For Summer Semester 2007 and Fall Semester 2007, these courses will continue to use the Business Information Systems (BIS) prefix. For BIS course descriptions, see pages 581-583.

### Military Science (MS)

*See Department of Military Science, pages 413-414*

**Note:** Effective Spring Semester 2008, courses listed with the MS prefix will use the Military Science Leadership (MSL) prefix.

### Basic Course

**MS 1010 Introduction to Leadership**  2  
Establishes a foundation for self and team development through participation in adventure training and team-building activities. Among the subjects presented are: land navigation, leader behavior and unit effectiveness, and effective time management. A two-hour weekly leadership lab is required, as well as one weekend field training exercise.  (F,Sp,Su)

**MS 1020 Leadership Skills**  2  
Emphasizes self and team development through participation in classroom and leadership lab. Subject matter includes small unit operations, branches of the Army, troop leading procedures, communications skills, and the organization of company-sized Army units. A two-hour weekly leadership lab is required, as well as one weekend field training exercise.  (F,Sp,Su)

**MS 2010 Leadership Development**  2  
Builds on previous leadership instruction, enhancing student skills in land navigation, small unit tactics, written and oral communication, event planning, group coordination and effectiveness, and first aid. During this course, students develop basic skills for leading others in a tactical environment. A two-hour weekly leadership lab is required, as well as one weekend field training exercise.  (F,Sp,Su)

**MS 2020 Small Unit Leadership**  2  
Focuses on leader effectiveness. Analyzes selected historical leaders and battles, using the principles of war and other tenets. Student-led discussions highlight lessons learned relative to leadership and organizational success. Oral communication skills are central to this course. A two-hour weekly leadership lab is required, as well as one weekend field training exercise.  (F,Sp,Su)

**MS 2400 Physical Readiness**  1  
Physical conditioning course employing U.S. Army principles of fitness. Subjects include: body composition, nutrition, cardiorespiratory fitness, muscle endurance and strength, circuit training, and drills.  (F,Sp,Su)

**MS 2420 Ranger Preparation**  2  
Participation in Army ROTC Ranger Challenge program. Advanced military training with practical application of skills taught in MS 1010 and 4020.  (F,Sp)

**MS 2430 Air Assault**  2  
Two-week course conducted at an Army installation in the continental U.S. Provides students with training in helicopter operations, including sling loading and rappelling. Prerequisite: Instructor's approval.  (F,Sp)
Course Descriptions

MS 2440  Airborne Operations  2
Three-week course conducted at Fort Benning, Georgia. Provides students with training in military skydiving techniques with practical applications. Prerequisite: Instructor’s approval. (F,Su)

MS 2510  ROTC Basic Camp  1-6
Five-week leadership camp conducted at Fort Knox, Kentucky. Designed to introduce students to basic military skills and leadership without incurring a military obligation. Training includes rappelling, marksmanship, small unit tactics, physical fitness, and leadership. Open only to students who have not completed MS 1010, 1020, 2010, and 2020. Graduates are qualified for Advanced Course entry into ROTC. Prerequisites: Must pass physical exam and must obtain instructor’s approval. (F,Su)

Advanced Course

MS 3010  Organizational Leadership and Small Unit Tactics  3
Develops leadership skills within the framework of the U.S. Army. Focuses on theory and application of decision making, planning, organizing, management control, and communications. Also emphasizes small unit tactics and advanced land navigation skills. A two-hour weekly leadership lab is required, as well as one weekend field training exercise. (F,Sp,Su)

MS 3020  Advanced Tactics and Operations  3
Focuses on theory and application of small unit tactics, leadership, and land warfare. Subjects include preparing and issuing combat orders, organizing for combat, unit and individual movement techniques, communications, and security. A two-hour weekly leadership lab is required, as well as one weekend field training exercise. (F,Sp,Su)

MS 3110  Staff Organization and Operations  1-3
Special project staff work for joint Army/Air Force campus ceremonies, leadership labs, field training exercises, and training camps. (F,Sp,Su)

MS 3210  Independent Study  1-3
Students select advanced topics of interest and arrange credit under program advisor supervision in areas related to military science. (F,Sp,Su)

MS 4010  Command and Staff Functions  3
Addresses functions/roles of the commander/leader and the staff. Explores organizational planning and problem solving, written and oral communications, training management, and evaluation systems. A two-hour weekly leadership lab is required, as well as three one-hour physical fitness sessions per week and one weekend field training exercise. (F,Sp,Su)

MS 4020  Officer Perspectives  3
Conference course addressing roles and responsibilities of junior Army officers. Examines environmental stewardship, threats to U.S. security, Army modernization initiatives, the military justice system, and the law of war. A two-hour weekly leadership lab is required, as well as three one-hour physical fitness sessions per week and one weekend field training exercise. (F,Sp,Su)

MS 4110  Advanced Staff Operations  1-3
Special project staff work for joint Army/Air Force campus ceremonies, leadership labs, field training exercises, and training camps. Students in this course provide mentoring and guidance to students in MS 3110. Prerequisite: Instructor’s permission. (F,Sp,Su)

MS 4400  Advanced Physical Readiness  1
Provides advanced instruction in physical fitness employing Army techniques and procedures. Students assist Military Science faculty in the planning/conduct of physical fitness training activities performed by lower-division students. Prerequisite: Instructor’s permission. (F,Sp)

MS 4510  ROTC Advanced Camp  1-10
Five-week leadership camp conducted at Fort Lewis, Washington. Stresses small-unit leadership under varying and challenging conditions. Prerequisites: Successful completion of basic course requirements and instructor’s approval. (F,Sp,Su)

MS 4520  Cadet Troop Leadership Training  2
Two-week course conducted at an Army installation in the continental U.S. or overseas. Provides firsthand experience in an Army unit. Students learn about military life and the duties of a lieutenant. Prerequisites: MS 3010, 3020, 4510, and instructor’s approval. (F,Sp,Su)

MS 4610  DHA Military History Seminar  1-3
One-week course in which students travel to, research, and report on significant Civil War sites in the Eastern United States. Available to all students. Requires purchase of airfare and some meals. (F,Sp,Su)

Music (MUSC)

See Department of Music, pages 415-431

MUSC 1010 BCA  Introduction to Music  3
Nontechnical course to develop understanding and enjoyment of music. Through study of musical elements, as well as historical, cultural, and social influences, an awareness of the relationship between techniques and aesthetic values in world music can be developed. (F,Sp,Su)

MUSC 1100 BCA  Fundamentals of Music  3
(formerly MUSC 1020 BCA)
In-depth look at the basic elements of music. Notes, rhythm, scales, intervals, key signatures, chords, cadences, and chord progressions. Includes basic ear training. (F,Sp)

MUSC 1110  Music Theory I  3
Fundamentals of music. Traditional diatonic harmony in four parts, using triads in root position, first inversion, and second inversion. Prerequisite: Knowledge of music notation. (F)

MUSC 1120  Music Theory II  3
Traditional harmony in four parts, using nonchord tones, seventh chords, and secondary dominant functions. Prerequisite: MUSC 1110. (Sp)

MUSC 1130  Aural Skills I  1
First in a four-semester sequence of aural skills (ear training) courses which develop the skills of sight singing, dictation, and the composite skill of critical listening. (F)

MUSC 1140  Aural Skills II  1
Second in a four-semester sequence of aural skills (ear training) courses which develop the skills of sight singing, dictation, and the composite skill of critical listening. Prerequisite: MUSC 1130. (Sp)

MUSC 1150  Beginning Group Piano  1
(formerly MUSC 1400)
Group piano instruction for nonmusic majors. (Sp)

MUSC 1160  Intermediate Group Piano  1
(formerly MUSC 1410)
Group piano instruction for nonmusic majors. (Sp)

MUSC 1170  Keyboard Harmony I  1
(formerly MUSC 1150)
Development of keyboard skills, in conjunction with MUSC 1110, for music majors and minors. (F)
## Course Descriptions

<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSC 1180</td>
<td>Keyboard Harmony II (formerly MUSC 1160)</td>
<td>1</td>
<td>Development of keyboard skills, in conjunction with MUSC 1120, for music majors and minors. Prerequisite: Completion of MUSC 1170 with a C- or better, or faculty authorization. (Sp)</td>
</tr>
<tr>
<td>MUSC 1200</td>
<td>Teaching Piano I</td>
<td>3</td>
<td>Shows pianist how to set up an independent studio, acquire and set up equipment, schedule students, set fees, bill parents, and keep the books. Students learn how to write a studio policy and how to audition and interview prospective students. Survey of different methods and piano series affords opportunity for students to evaluate teaching materials. Includes teaching of basic music concepts to beginning piano students. (F,Sp)</td>
</tr>
<tr>
<td>MUSC 1310</td>
<td>Introduction to Music Therapy</td>
<td>2</td>
<td>Introduces students to the field of music therapy through lectures, readings, and experiential work. For music therapy majors only. (F)</td>
</tr>
<tr>
<td>MUSC 1320</td>
<td>Music Therapy Ensemble</td>
<td>1</td>
<td>Designed for music therapy majors. Designed to help students increase their performance skills in the areas of accompanying, improvisation, and popular music styles. (F,Sp)</td>
</tr>
<tr>
<td>MUSC 1420</td>
<td>Pedagogy Practicum</td>
<td>3</td>
<td>Provides piano students with actual teaching situations for the practical application of principles studied in piano pedagogy. Supervised planning, presentation, and evaluation of lessons. (F,Sp)</td>
</tr>
<tr>
<td>MUSC 1430</td>
<td>Piano Pedagogy I</td>
<td>3</td>
<td>Designed to prepare qualified pianists to teach piano effectively and to acquaint them with new materials and techniques from the beginning to intermediate levels. (F)</td>
</tr>
<tr>
<td>MUSC 1440</td>
<td>Piano Pedagogy II</td>
<td>3</td>
<td>Designed to prepare qualified pianists to teach piano effectively and to acquaint them with new materials and techniques from the intermediate to early advanced levels. (Sp)</td>
</tr>
<tr>
<td>MUSC 1450</td>
<td>Group Organ</td>
<td>1</td>
<td>Acquaints students with basic techniques of organ playing. Concentrates on hymn playing, and music for preludes and postludes. (F,Sp)</td>
</tr>
<tr>
<td>MUSC 1460</td>
<td>CI Organ Literature I**</td>
<td>3</td>
<td>Examines the history of the organ, as well as composers and literature from the Romantic Period through the end of the Twentieth Century. (F)</td>
</tr>
<tr>
<td>MUSC 1470</td>
<td>CI Organ Literature I**</td>
<td>3</td>
<td>Examines the history of the organ, as well as composers and literature from the Middle Ages through the Baroque Period. (Sp)</td>
</tr>
<tr>
<td>MUSC 1480</td>
<td>Individual Piano Instruction for Nonmusic Majors</td>
<td>1-2</td>
<td>Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private piano instruction at any and all stages of advancement. (F,Sp, Su)</td>
</tr>
<tr>
<td>MUSC 1490</td>
<td>Individual Organ Instruction for Nonmusic Majors</td>
<td>1-2</td>
<td>Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private organ instruction at any and all stages of advancement. (F,Sp, Su)</td>
</tr>
<tr>
<td>MUSC 1500</td>
<td>String Techniques I</td>
<td>1</td>
<td>Designed to give prospective music teachers a basic playing experience and theoretical understanding of the string instruments. (F,Sp)</td>
</tr>
<tr>
<td>MUSC 1520</td>
<td>Individual Viola Instruction for Nonmusic Majors</td>
<td>1-2</td>
<td>Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private viola instruction at any and all stages of advancement. (F,Sp, Su)</td>
</tr>
<tr>
<td>MUSC 1530</td>
<td>Individual Violin Instruction for Nonmusic Majors</td>
<td>1-2</td>
<td>Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private violin instruction at any and all stages of advancement. (F,Sp, Su)</td>
</tr>
<tr>
<td>MUSC 1540</td>
<td>Individual String Bass Instruction for Nonmusic Majors</td>
<td>1-2</td>
<td>Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private string bass instruction at any and all stages of advancement. (F,Sp, Su)</td>
</tr>
<tr>
<td>MUSC 1550</td>
<td>Beginning Group Guitar</td>
<td>1</td>
<td>Fundamentals of guitar; basic chords, note reading, tablature reading, and accompaniment styles, including strumming and fingerpicking. (F,Sp)</td>
</tr>
<tr>
<td>MUSC 1560</td>
<td>Intermediate Group Guitar</td>
<td>1</td>
<td>Intermediate-level strumming and fingerpicking techniques, barre chords, and solos written in standard notation and tablature will be presented. (F,Sp)</td>
</tr>
<tr>
<td>MUSC 1580</td>
<td>Individual Guitar Instruction for Nonmusic Majors</td>
<td>1-2</td>
<td>Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private guitar instruction at any and all stages of advancement. (F,Sp, Su)</td>
</tr>
<tr>
<td>MUSC 1600</td>
<td>Voice Techniques</td>
<td>1</td>
<td>Acquaints the nonvocal major with the vocal instrument; its mechanism, terminology, and techniques. (F,Sp)</td>
</tr>
<tr>
<td>MUSC 1610</td>
<td>Introduction to Musical Theatre</td>
<td>2</td>
<td>Survey course dealing with history, evolution, influence, practice, and production of the American Musical Theatre. (Sp)</td>
</tr>
<tr>
<td>MUSC 1620</td>
<td>Introduction to Opera</td>
<td>2</td>
<td>Survey course tracing history and style of opera from Peri and Caccini’s “Euridice” of 1594 to contemporary works of John Eaton and Phillip Glass. (F)</td>
</tr>
<tr>
<td>MUSC 1630</td>
<td>Individual Vocal Instruction for Nonmusic Majors</td>
<td>1-2</td>
<td>Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private vocal instruction at any and all stages of advancement. (F,Sp, Su)</td>
</tr>
<tr>
<td>MUSC 1700</td>
<td>Individual Flute Instruction for Nonmusic Majors</td>
<td>1-2</td>
<td>Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private flute instruction at any and all stages of advancement. (F,Sp, Su)</td>
</tr>
<tr>
<td>MUSC 1710</td>
<td>Individual Oboe Instruction for Nonmusic Majors</td>
<td>1-2</td>
<td>Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private oboe instruction at any and all stages of advancement. (F,Sp, Su)</td>
</tr>
<tr>
<td>MUSC 1720</td>
<td>Individual Clarinet Instruction for Nonmusic Majors</td>
<td>1-2</td>
<td>Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private clarinet instruction at any and all stages of advancement. (F,Sp, Su)</td>
</tr>
<tr>
<td>MUSC 1730</td>
<td>Individual Bassoon Instruction for Nonmusic Majors</td>
<td>1-2</td>
<td>Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private bassoon instruction at any and all stages of advancement. (F,Sp, Su)</td>
</tr>
<tr>
<td>MUSC 1740</td>
<td>Individual Saxophone Instruction for Nonmusic Majors</td>
<td>1-2</td>
<td>Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private saxophone instruction at any and all stages of advancement. (F,Sp, Su)</td>
</tr>

</table>
Course Descriptions

MUSC 1800  Percussion Techniques  1  Provides basic playing experience and theoretical understanding of percussion instruments. Designed for music majors. (F)

MUSC 1810  Individual Trumpet Instruction for Nonmusic Majors  1-2  Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private trumpet instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1820  Individual Trombone Instruction for Nonmusic Majors  1-2  Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private trombone instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1830  Individual French Horn Instruction for Nonmusic Majors  1-2  Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private French horn instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 1840  Individual Tuba/Euphonium Instruction for Nonmusic Majors  1-2  Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private tuba/euphonium instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 2110  Music Theory III  3  (formerly MUSC 2130)  Traditional chromatic harmony in four parts, using modulation, mode mixture, and neapolitan and augmented sixth chords. Prerequisites: MUSC 1110 and 1120. (F)

MUSC 2120 CI Music Theory IV  3  (formerly MUSC 3130)  Study of Twentieth Century tonal, atonal, and avant garde harmonies and compositional techniques. Prerequisites: MUSC 3110 and 3120. (Sp)

MUSC 2130  Aural Skills III  1  (formerly MUSC 2150)  Third in a four-semester sequence of aural skills (ear training) courses which develop the skills of sight singing, dictation, and the composite skill of critical listening. Prerequisites: MUSC 1130 and 1140. (F)

MUSC 2140  Aural Skills IV  1  (formerly MUSC 2160)  Fourth in a four-semester sequence of aural skills (ear training) courses which develop the skills of sight singing, dictation, and the composite skill of critical listening. Prerequisites: MUSC 1130, 1140, and 2130. (Sp)

MUSC 2170  Keyboard Harmony III  1  Development of keyboard skills, in conjunction with MUSC 2110, for music majors. Prerequisite: Completion of MUSC 1180 with a C- or better, or faculty authorization. (F)

MUSC 2180  Computer Applications in Music  2  Presents operational knowledge of computer hardware and music software. Students use M101 work station to learn music notation, sequencing, and other select applications. Enrollment limited to Music majors only. (F,Sp)

MUSC 2210  Instrumental Conducting Ensemble  1  Lab group for MUSC 4240. Music and nonmusic majors play major and secondary instruments in two concerts per semester. (F)

MUSC 2300  Introduction to Observational and Behavioral Methods in Music Therapy  2  Basic behavioral terminology and methods, including systematic observations and recording methods for use in music therapy. Students conduct observations in clinical settings in the community. (F)

MUSC 2320  Music Therapy Methods and Materials  2  Music interventions and techniques appropriate for a wide range of patient populations, including hospitalized children, older adults, and individuals with orthopedic handicaps. Prerequisites: MUSC 1310 and 2310. (Sp)

MUSC 2350  Conducting  2  (formerly MUSC 3170)  Designed to provide students with basic conducting techniques. Prerequisites: MUSC 2110 and must be a premusic or music major. (F)

MUSC 2410  Individual Organ Instruction (Second Instrument) for Music Majors  1  Designed to give music majors private organ instruction at any and all stages of advancement. One credit given for 30-minute lessons. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 2420  Piano Literature I**  3  Acquaints pianists with the standard piano composers and keyboard literature from the 14th Century to the Classical Period. (F)

MUSC 2430  Piano Literature II**  3  Acquaints pianists with the standard piano composers and keyboard literature from the Romantic Period to Impressionism. (F)

MUSC 2440  Piano Literature III*  3  Acquaints pianists with the standard piano composers and keyboard literature from the Romantic Period to the Classical Period. (Sp)

MUSC 2450  Piano Literature IV*  3  Acquaints pianists with the standard piano composers and keyboard literature from the Impressionist Period to the present day. (Sp)

MUSC 2460  Individual Jazz Piano Instruction for Nonmusic Majors  1-2  Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private jazz piano instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 2470  Individual Jazz Piano Instruction (Second Instrument) for Music Majors  1  Designed to give music majors private jazz piano instruction at any and all stages of advancement. One credit given for 30-minute lessons. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 2490  Individual Piano Instruction (Second Instrument) for Music Majors  1  Designed to give music majors private piano instruction at any and all stages of advancement. One credit given for 30-minute lessons. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 2500  Individual String Bass Instruction (Second Instrument) for Music Majors  1  Designed to give music majors private string bass instruction at any and all stages of advancement. One credit given for 30-minute lessons. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 2510  Individual Cello Instruction for Nonmusic Majors  1-2  Variable credit offered, depending upon lesson time (1 credit equals 30 minutes). Designed to give nonmusic majors private cello instruction at any and all stages of advancement. (F,Sp,Su)

MUSC 2520  Individual Cello Instruction (Second Instrument) for Music Majors  1  Designed to give music majors private cello instruction at any and all stages of advancement. One credit given for 30-minute lessons. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 2530  Individual Viola Instruction (Second Instrument) for Music Majors  1  Designed to give music majors private viola instruction at any and all stages of advancement. One credit given for 30-minute lessons. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

Course Descriptions

MUSC 3110 Music Therapy and the Exceptional Child 3
Effects of music on physical, social, cognitive, and communication skills of children with disabilities. (F)

MUSC 3320 Psychology of Music I** 2
Psychological foundations of musical behavior, including psychoacoustics, rhythmic, melodic, and harmonic foundations; affective behaviors and music; musical preferences; functional music; musical ability; and music learning. (Sp)

MUSC 3330 Music Therapy Practicum 1-3®
Supervised practicum experience in a community setting with disabled adults, children, or individuals in a medical setting. Prerequisite: MUSC 2320. (F,Sp)

MUSC 3360 MIDI Studio Techniques 2
Elements of synthesizer sound production and basic studio techniques. (Sp)

MUSC 3370 Sound Recording and Reinforcement Techniques 2®
Explores techniques of studio recording, including microphones, mixing, and signal processing. (Sp)

MUSC 3400 Individual Piano Instruction for Music Majors 1-2®
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private piano instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 3410 Ensemble and Accompanying 1-2®
Accompanying vocal and instrumental works. Ensemble music for two pianos and four hands. Sight reading and repertoire development. Admission by audition only, with 16 students per section. (F,Sp)

MUSC 3420 Keyboard Skills I 3
Study of sightreading, transposing, improvising, figured bass, scales, chords, and score rendering. (F)

MUSC 3430 Keyboard Skills II 3
Continuation of MUSC 3420, with further study of sightreading, transposing, improvising, figured bass, scales, chords, and score reading. (Sp)

MUSC 3440 Individual Jazz Piano Instruction for Music Majors 1-2®
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private jazz piano instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 3460 Church Music for Organists I* 3
Teaches students to read open scores, transpose hymns, and read scores using alto and tenor clefs. Explores history of hymnody, as well as history of church worship services. (F)

MUSC 3470 Church Music for Organists II* 3
Teaches students to read open scores, transpose hymns, and read scores using alto and tenor clefs. Explores history of hymnody, as well as history of church worship services. (Sp)

MUSC 3480 Individual Organ Instruction for Music Majors 1-2®
Provides 60-minute lessons, for either 1 or 2 credits. Number of credits granted depends upon practice time and extent of literature required. Flexible course of study leading to enhanced musical and technical skills on the instrument. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 3500 DHA Symphony Orchestra 1®
Provides experience in performing standard orchestral literature. Admission by audition only. (F,Sp)

MUSC 3510 Orchestra Literature 2
Survey of materials, methods, and literature appropriate for elementary school, junior high/middle school, or high school level orchestra programs. (Sp)
### Course Descriptions

**MUSC 3520**  
String Pedagogy and Solo Literature**  
For qualified string players whose interest is primarily in teaching stringed instruments. Materials and teaching techniques via actual teaching experience.  
Prerequisite: Permission of instructor. (F,Sp)  

**MUSC 3530**  
Cache Chamber Orchestra  
Provides experience for nonmusic majors in performing standard orchestral literature. (F,Sp)  

**MUSC 3550**  
Individual Guitar Instruction for Music Majors  
1-2  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private guitar instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)  

**MUSC 3560**  
Guitar History and Literature**  
2  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Must be a pre-music major, music major, music education major, or music therapy major. (Sp)  

**MUSC 3570**  
Guitar Pedagogy I**  
1  
Prepares qualified guitarists to teach beginning and intermediate level students. Familiarizes participants with “business” aspects of teaching, how to set up a private studio, available materials, and teaching techniques. (F)  

**MUSC 3580**  
Guitar Pedagogy II**  
2  
Instruction in teaching various guitar styles. Experience in teaching class guitar and in private instruction. Review of available methods and materials. (Sp)  

**MUSC 3590**  
Electric Guitar Ensemble  
1  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)  

**MUSC 3600**  
Opera Theatre Production  
1-3  
Techniques of musical theater, including participation as cast or crew in musical or operatic stage productions or excerpts. (F,Sp)  

**MUSC 3610**  
Vocal Repertory I**  
2  
Survey of German Lieder and French Melodie, including styles, history, and performance practice. (F)  

**MUSC 3620 CI**  
Vocal Repertory II**  
2  
Survey of Italian, American, and British song, including styles, history, and performance practice. (Sp)  

**MUSC 3630**  
Vocal Pedagogy I**  
2  
Theoretical course studying anatomy and function of the voice, methods for teaching techniques, respiration, phonation, articulation, and support and health of the voice. (F)  

**MUSC 3640**  
Vocal Pedagogy II**  
2  
Application of vocal theory to teaching of young, post-pubescent, and mature male and female voices, including challenges of teaching each particular type. Includes practicum in which students teach individual vocal lessons under instructor’s supervision. (Sp)  

**MUSC 3670**  
Individual Vocal Instruction for Music Majors  
1-2  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private vocal instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)  

**MUSC 3700**  
Woodwind Ensemble  
1-2  
Helps students gain knowledge and understanding of literature for woodwind ensemble, to gain knowledge of rehearsal techniques for perfecting chamber music, and to demonstrate mastery of these skills through performance. Prerequisite: Permission of instructor. (F,Sp)  

**MUSC 3710**  
Individual Flute Instruction for Music Majors  
1-2  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private flute instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)  

**MUSC 3720**  
Individual Oboe Instruction for Music Majors  
1-2  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private oboe instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)  

**MUSC 3730**  
Individual Clarinet Instruction for Music Majors  
1-2  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private clarinet instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)  

**MUSC 3740**  
Individual Bassoon Instruction for Music Majors  
1-2  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private bassoon instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)  

**MUSC 3750**  
Individual Saxophone Instruction for Music Majors  
1-2  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private saxophone instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)  

**MUSC 3760**  
Jazz Ensemble  
1  
Select ensemble performing big band jazz music. Admission by audition only. (F,Sp)  

**MUSC 3770**  
Jazz Orchestra  
1  
Preparation and performance of big band jazz music. Admission by audition only. (F,Sp)  

**MUSC 3780**  
Flute Ensemble  
1  
Helps students gain knowledge and understanding of flute ensemble, to gain knowledge of rehearsal techniques for perfecting chamber music, and to demonstrate mastery of these skills through performance. Enrollment limited to music majors and music therapy majors only. (F)  

**MUSC 3790 DHA**  
Symphonic Band  
1  
Performance of significant works from symphonic band repertoire. Admission by audition or consent of instructor. (F,Sp)  

**MUSC 3800**  
Trombone Ensemble  
1  
Intended for trombone majors and nonmajors interested in performing music specifically written and/or arranged for four to twelve trombones. (F,Sp)  

**MUSC 3810**  
Individual Trumpet Instruction for Music Majors  
1-2  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private trumpet instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp)  

**MUSC 3820**  
Individual Trombone Instruction for Music Majors  
1-2  
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private trombone instruction at any
and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp)

MUSC 3830 Individual French Horn Instruction for Music Majors 1-2§
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private French horn instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp)

MUSC 3840 Individual Tuba/Euphonium Instruction for Music Majors 1-2§
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private percussion instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp)

MUSC 3850 Brass Ensemble 1§
Helps students gain knowledge and understanding of brass ensemble, gain knowledge of rehearsal techniques for performing chamber music, and demonstrate mastery of these skills through performance. Prerequisite: Permission of instructor. (F,Sp)

MUSC 3860 Individual Percussion Instruction for Music Majors 1-2§
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private percussion instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 3870 Percussion Ensemble 1§
Provides opportunity for percussionists to perform select percussion literature in a chamber music setting. (F,Sp)

MUSC 3900 Jazz Improvisation 2
Study of techniques of jazz improvisation applicable to all instruments. Prerequisites: MUSC 2110 and 2130; or permission of instructor. (F,Sp)

MUSC 3910 Individual Composition Instruction 1-12§
Individual study of techniques and procedures of music composition, emphasizing assistance in completing individual compositional projects, building composition portfolio, and preparing for composition recitals. Prerequisite: Permission of instructor. (F,Sp)

MUSC 3920 Marching Band Techniques 2
Reviews methods and materials necessary for directing high school marching bands, including administration, music selection, drill design, and computer-assisted instruction. Prerequisite: Instructor’s permission. (F)

MUSC 3930 Band Literature 2
Study of literature appropriate for beginning, intermediate, and advanced level band programs. Prerequisite: Instructor’s permission. (F)

MUSC 3950 Jazz Choir 1§
Emphasizes vocal ability, harmonic ear training, and rhythmic understanding. Ability to vocally improvise is helpful, though not a necessary prerequisite. Auditions held during the first week of fall semester. (F,Sp)

MUSC 4210 Advanced Music Form and Analysis 3
Expands the contents and helps further develop the skills acquired in MUSC 3140, Musical Form and Analysis. Large and small sectional forms and contrapuntal procedures are further explored in works from the Classical, Romantic, and Modern eras. (F)

MUSC 4240 Advanced Conducting 2
Covers techniques, procedures, materials, and philosophies appropriate to the motor skill of conducting and the pedagogy of rehearsal techniques with a band/choir/string ensemble. Students will be able to demonstrate techniques in music selection, score analysis, conducting gesture, and pedagogy. (F—Instrumental) (Sp—Choral)

MUSC 4310 Music Therapy with Adult Populations 3
Music therapy methods for adults with major mental illness. Overview of DSM-IV criteria. Psychotherapy models, including cognitive-behavioral and person-centered approaches to treatment. (F)

MUSC 4320 CI Psychology of Music II 2
Research and laboratory course, emphasizing design, methods, and statistical procedures appropriate to research in music education and music therapy. Prerequisites: STAT 1040 and permission of instructor. (Sp)

MUSC 4330 Clinical and Professional Issues in Music Therapy 3
Ethical considerations and issues related to private practice, marketing, and reimbursement, as well as continued exploration of psychotherapeutic models and MT methods with adults, specifically anxiety disorders and personality disorders. Prerequisite: MUSC 4310 and 4320. (Sp)

MUSC 4340 Internship in Music Therapy 2
Six-month resident internship in affiliated, approved clinical setting. Graded Pass/Fail only. Prerequisite: Successful completion of senior year in music therapy. (F,Sp,Su)

MUSC 4410 Advanced Piano Pedagogy I 1-2§
Continuation of MUSC 1430 and 1440, with analysis, performance, and teaching of basic repertoire at intermediate to advanced levels. Prerequisites: MUSC 1430, 1440. (F)

MUSC 4420 Advanced Piano Pedagogy II 1-2§
Continuation of MUSC 4410, with analysis, performance, and teaching of basic repertoire at intermediate to advanced levels. Prerequisite: MUSC 4410. (Sp)

MUSC 4500 String Ensemble 1§
Offers opportunity for capable string players to study and perform music written for variety of small ensemble combinations. (F,Sp)

MUSC 4510 Individual Violin Instruction for Music Majors 1-2§
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private violin instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 4520 Individual Viola Instruction for Music Majors 1-2§
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private viola instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 4530 Individual Cello Instruction for Music Majors 1-2§
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private cello instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 4540 Individual String Bass Instruction for Music Majors 1-2§
Provides 60-minute lessons, for either 1 or 2 credits, for music majors only. Number of credits granted depends upon practice time and extent of literature required. Designed to give music majors private string bass instruction at any and all stages of advancement. Must be a pre-music major, music major, music education major, or music therapy major. (F,Sp,Su)

MUSC 4550 Acoustic Guitar Ensemble 1§
Offers opportunity for guitarists to rehearse and perform intermediate and advanced music written for acoustic guitar. (F,Sp)

MUSC 4600 DHA University Chorale 1§
Select mixed choir performing a wide range of choral literature. Admission by audition only. (F,Sp)

<td>DHA Chamber Singers</td>
<td>1®</td>
<td>Select small ensemble performing a wide range of choral literature. Admission by audition only. (F,Sp)</td>
</tr>
<tr>
<td>MUSC 4700</td>
<td>DHA Wind Orchestra</td>
<td>1®</td>
<td>Highly-selective group, performing important traditional and contemporary works from the wind band repertoire. Entrance by audition only. (F,Sp)</td>
</tr>
<tr>
<td>MUSC 4710</td>
<td>Jazz Combo</td>
<td>1-2®</td>
<td>Study and performance of the finest literature for the small jazz ensemble. Prerequisites: Audition and permission of instructor. (F,Sp)</td>
</tr>
<tr>
<td>MUSC 4720</td>
<td>Saxophone Quart</td>
<td>1-2®</td>
<td>Study and performance of the finest classical, jazz, and popular music for the saxophone quartet. Prerequisites: Audition and permission of instructor. (F,Sp)</td>
</tr>
<tr>
<td>MUSC 4730</td>
<td>CI Directed Project in Instrumental Pedagogy</td>
<td>2®</td>
<td>Acquaints students with curricular and business issues of private music teaching. Through written assignments, reviews of literature, and interviews with professionals, students develop strategies for setting up, marketing, and maintaining a private studio. (F,Sp,Su)</td>
</tr>
<tr>
<td>MUSC 4900</td>
<td>Baroque Counterpoint</td>
<td>2</td>
<td>Writing and analysis of tonal counterpoint in two, three, and four parts. Prerequisites: MUSC 1110, 1120, 2110, 3140. (F)</td>
</tr>
<tr>
<td>MUSC 4910</td>
<td>Music Composition</td>
<td>2®</td>
<td>Instruction in principles of music composition, and guidance in completing individual composition projects. Also, analysis of selected Twentieth Century masterworks. Prerequisites: MUSC 1110, 1120, 2110, 3140. (Sp)</td>
</tr>
<tr>
<td>MUSC 4920</td>
<td>Individual Recital</td>
<td>1-6®</td>
<td>Performance of pieces selected by the student and approved by the instructor, for performance in accordance with specific music area requirements. (F,Sp,Su)</td>
</tr>
<tr>
<td>MUSC 4930</td>
<td>Readings and Conference</td>
<td>1-6®</td>
<td>Undergraduate course designed to provide special interest study. (F,Sp,Su)</td>
</tr>
<tr>
<td>MUSC 4940H</td>
<td>Senior Thesis</td>
<td>1-6®</td>
<td>As partial fulfillment of Honors Program requirements, students design and complete a major paper/project. Examples of projects include performance, composition, and musical analysis. (F,Sp,Su)</td>
</tr>
<tr>
<td>MUSC 6100</td>
<td>Graduate Performance Ensemble</td>
<td>1-2®</td>
<td>Designed to give students opportunity for a high-level music experience in choral and instrumental performance ensembles. (F,Sp)</td>
</tr>
<tr>
<td>MUSC 6110</td>
<td>Advanced Conducting</td>
<td>2</td>
<td>Students master manual technique of conducting and improve score study procedures, resulting in analysis and communication of musical ideas. (F,Su)</td>

</tr>
</thead>
<tbody>
<tr>
<td>NAV 3040</td>
<td>Navajo Literacy and Grammar for Native Speakers</td>
<td>3</td>
<td>Designed to develop advanced skills in the grammar, comprehension, reading, and writing of Navajo. Integrates Diné holistic teaching concepts in accordance with the “Hózhóhógo líná” four-direction Diné philosophy of learning paradigm. Prerequisite: Permission of instructor. (Sp)</td>
</tr>
<tr>
<td>NAV 3050</td>
<td>Navajo Descriptive and Narrative Writing</td>
<td>3</td>
<td>Presents reading and writing in the genres of Navajo narration and description. Prepares students to take the Navajo Language Proficiency Exam, and integrates holistic teachings in accordance with the “Hózhóhógo líná” four-direction Diné philosophy of learning paradigm. Prerequisite: Permission of instructor. (Sp)</td>
</tr>
<tr>
<td>NAV 4400</td>
<td>Teaching Navajo as a Second Language</td>
<td>3</td>
<td>Addresses major issues in the teaching/learning of second languages, with emphasis on Navajo as taught in the public schools. Integrates Diné holistic teaching concepts in accordance with the “Hózhóhógo líná” four-direction Diné philosophy of learning paradigm. Prerequisite: Permission of instructor. (Sp)</td>
</tr>
<tr>
<td>NAV 4410</td>
<td>Teaching Navajo to Native Speakers</td>
<td>3</td>
<td>Addresses major issues and methods in teaching Navajo literacy and Navajo language arts to native speakers of Navajo. Integrates Diné holistic teaching concepts in accordance with the “Hózhóhógo líná” four-direction Diné philosophy of learning paradigm. Prerequisite: Permission of instructor. (F)</td>

## National Environmental Policy Act (NEPA)

See Certificate Program in National Environmental Policy Act (NEPA), pages 432-433

**NEPA 6200**  
How to Manage the NEPA Process and Write Effective NEPA Documents  
2  
Introduction to National Environmental Policy Act (NEPA) and the Council on Environmental Quality regulations. Explores various levels of NEPA documentation and the skills necessary to identify the actions needed for a thorough environmental analysis.

**NEPA 6210**  
Clear Writing for NEPA Specialists  
2  
Teaches how to identify the writing and editing requirements unique to NEPA documents, including making graphics, writing chapters, and reviewing documents for accuracy.

**NEPA 6220**  
Reviewing NEPA Documents  
2  
Focuses on how to review the full range of NEPA documents, including Environmental Impact Statements (EISs), Environmental Assessments (EAs), Findings of No Significant Impacts (FONs), and Records of Decisions (RODs).

**NEPA 6230**  
Risk Communication for NEPA Specialists: Strategies and Implementation  
2  
Explains meaning and application of risk communication. Explores full range of response communication, including development of a communication plan and strategy, standing before an audience, and responding to comments in writing.

**NEPA 6260**  
Cultural and Natural Resource Management  
2  
Teaches how to manage cultural and natural resources on public lands. Addresses pertinent laws and associated executive orders and regulations pertaining to the preservation of these resources and budget issues.

**NEPA 6270**  
Environmental Compliance Overview  
1  
Explores why environmental compliance is not only desirable and necessary, but is also a personal responsibility. Identifies key laws and regulations, with associated penalties affecting environmental compliance.

**NEPA 6280**  
Interdisciplinary Team Building  
1  
Teaches general principles of interdisciplinary team building. Explores how information flows and how this can impact the success of a team. Students work as a team to apply the principles learned to scenarios of day-to-day actions.

**NEPA 6300**  
Effective Environmental Contracting  
1  
Presents a systematic approach to the writing and reviewing of environmental Statements of Works (SOWs). Provides hands-on experience, course includes case studies and examples applying to actual environmental projects.

**NEPA 6310**  
NEPA Writing for Technical Specialists  
1  
Designed to teach students how to use a “document management process” to become more efficient writers of NEPA documents.

**NEPA 6320**  
NEPA: Cumulative Impacts  
1  
Explores scoping and public involvement strategies leading to sound cumulative impact analysis. Students assess various impact methodologies and learn to record cumulative impact information in ways that support clear, legally sufficient EAs/EISs.

**NEPA 6330**  
Conflict Management in the NEPA Process  
1  
Trains students in NEPA conflict negotiation and management. Includes introduction to the nature of public conflict and management styles, along with environmental negotiation techniques.

**NEPA 6340**  
Content Analysis and Public Response Management  
1  
NEPA regulations require public participation on environmental documents. In this course, students learn how to establish a comprehensive database of respondents and a systematic method of sending and receiving documents. They also learn how to establish a coding structure reflecting demographic categories and subcategories. Since this course is not currently required for the Certificate Program in National Environmental Policy Act (NEPA), it may not be offered in the foreseeable future. For further information, contact the director of the NEPA Certificate Program.

**NEPA 6350**  
Socio-economic Impact Analysis for NEPA Specialists  
1  
Provides students with necessary tools (templates, checklists, and materials) and knowledge (including data analysis) for conducting an effective socio-economic impact analysis, as required by NEPA and CEQ regulations.

**NEPA 6360**  
Overview of the Endangered Species Act  
1  

**NEPA 6370**  
NEPA Capstone Experience  
1  
Consists of a project, internship, or comprehensive examination to be negotiated by the student, based upon opportunities available at the time and preferences of the student. Helps USU to certify that students receiving the certificate have basic mastery of the material presented in the program coursework.

**NEPA 6380**  
NEPA Process Management  
1  
Focuses on teaching students to be effective team leaders by understanding how to control the process of project and plan development. Introduces students to various models on time management, project management, team management, and decision-making methods. Students also learn how to frame problems in such a way that they can more clearly identify alternative solutions and develop cause-and-effect models showing how their actions impact resources. (F,Sp,Su)

## Nutrition and Food Sciences (NFS)

See Department of Nutrition and Food Sciences, pages 441-451

**NFS 1000**  
World of Food and Nutrition  
1  
Weekly seminars present and discuss current issues in food, diet, and health. Presentations about topics and research in food and nutrition, with orientation to programs in the Department of Nutrition and Food Sciences. (F)

**NFS 1020**  
BLS Science and Application of Human Nutrition  
3  
Role of dietary choices in providing nutrients and their relationship to the social, mental, and physical well-being of people. How to evaluate nutritional status with personal data using computer diet analysis program. (F,Sp,Su)

**NFS 1050**  
Food Safety Manager Certification  
0.5  
Covers food safety information required by the Utah Food Safety Manager Certification Act. Includes role of food handlers in controlling food-borne disease, time-temperature, employee hygiene, sanitation methods, preventing contamination from time of purchase to time of serving, food service facilities/equipment, and HACCP. Graded Pass/Fail only. (F,Sp,Su)

**NFS 1240**  
Culinary Basics  
3  
Develops fundamental skills specific to culinary arts. Investigates principles of ingredients and preparation methods. Practice provided in knife skills and cooking methods. Explores the effects of cooking on food quality: Enrollment limited to Nutrition and Food Sciences majors, Family and Consumer Sciences majors, and Family and Consumer Sciences Education majors only. (F,Sp)

**NFS 1250**  
Sanitation and Safety  
3  
Principles of sanitation and safety applied to food operations. Emphasizes personal hygiene habits and food handling practices that protect the health and safety of employees and consumers. (Sp)

**NFS 2020**  
Nutrition Throughout the Life Cycle  
3  
Application of nutrition principles to the human life cycle: nutrient functions, needs, sources, and alterations during pregnancy, lactation, growth, development, maturation, and aging. Prerequisite: NFS 1020. (Sp)

**NFS 2040**  
Introduction to Biotechnology  
1  
Introduces freshmen to the emerging field of biotechnology and the impact this technology has on society. Also taught as ADVS 2040, BIOL 2040, and PSB 2040. (Sp)
Course Descriptions

NFS 3000  
Beginning Baking  
Introduction to food preparation and basic baking. Prerequisites: NFS 1240, 2030, 2050. Will not be offered after Fall 2007. (F)

NFS 3020  
Nutrition and Physical Performance  
Includes information on macro/micronutrient metabolism during exercise, specific problems experienced by athletes or highly active persons, myths, ergogenic aids, and current interests. Prerequisite: NFS 1020. (F)

NFS 3030  
Advanced Baking  
Focuses on pastries, advanced dessert preparation and presentation, and related topics. Prerequisite: NFS 3000. Will not be offered after Spring 2009. (Sp)

NFS 3060  
Garde-Manger  
Emphasizes cold food preparation, presentation techniques, food displays, and meat fabrication. Prerequisite: NFS 2050. Will not be offered after Fall 2007. (F)

NFS 3070  
Science of Food Preparation  
Science principles underlying modern food theory and practice. Relation of physical and chemical properties of foods components and their systems to food preparation. Prerequisite: CHEM 1120 or 2300 or 2310. (Sp)

NFS 3100 QI  
Sensory Evaluation of Food  
Design and implementation of sensory testing of foods. Emphasizes physiology of senses, testing methods, statistical analysis, and taste panel experience. Prerequisite: STAT 3000. (Sp)

NFS 3110 DSC  
Food, Technology, and Health  
Impact of food technology on food spoilage, food preservation, food quality, and foodborne diseases. Basic processing operations and regulations ensuring a safe food supply. Prerequisite: University Studies Breadth Life Sciences (BLS) course. (F)

NFS 3500  
Beverage Management  
Studies in selection and service of beverages for the food service industry. Issues addressed include equipping, staffing, operating, marketing, and purchasing beverages. Addresses issues of responsible alcohol service. Will not be offered after Fall 2008. (F)

NFS 3600  
Medical Terminology for Health Care Professionals  
Internet-based course teaches medical terminology by focusing on medical word- and suffixes, and whole-body terminology related to human body systems. Also includes coverage of anatomy, pathological conditions, and diagnostic treatments and procedures. (F,Sp,Su)

NFS 4020  
Advanced Nutrition  
Structures, properties, and metabolism of protein, lipids, carbohydrates, vitamins, and minerals. Includes digestion, absorption, hormonal control, cellular biochemistry, metabolic interrelationships, excretion, etc. Prerequisites: NFS 1020, CHEM 3700, BIOL 2420. (F)

NFS 4040  
Dairy Foods  
Explores manufacture of various dairy foods, including pasteurized milk, UHT milk, cream, cheddar cheese, cottage cheese, process cheese, yogurt, butter, and milk and whey powders. Three lectures and one lab. Prerequisite: Enrollment in a major within the Animal, Dairy and Veterinary Sciences Department. (F)

NFS 4050 CI  
Education and Counseling Methods in Dietetics I  
Principles of education, counseling, and communication as applied to the field of nutrition education and clinical dietetics practice. Prerequisite: Junior level in Coordinated or Didactic Program in Dietetics. Corequisite: NFS 4550. (F)

NFS 4060 CI  
Education and Counseling Methods in Dietetics II  
Continuation of NFS 4050. Prerequisite: NFS 4050. Corequisite: NFS 4560. (Sp)

NFS 4250  
Culinary Skills and Management Rotation  
Internship experience in various food service settings. Specific locations and durations to be arranged by instructor. Prerequisite: Junior standing. Will not be offered after Summer 2009. (F,Sp, Su)

NFS 4420 QI  
Nutrition Research Methodology  
Development of experimental design, data collection, statistical analysis, interpretation, and presentation of results. Clinical, community, and management data analysis. Interpretation and presentation, including bench marking, cost/ benefit analysis, and continuous quality improvement projects. Enrollment limited to seniors within the Coordinated Program in Dietetics (CPD) or Didactic Program in Dietetics (DPD). Prerequisites: STAT 1040, MATH 1050. (Sp)

NFS 4440 QI  
Fundamentals of Food Engineering  
Engineering concepts taught in a fundamental sense and applied to food processing. Concepts include: general problem solving techniques, material and energy balances, fluid dynamics, heat transfer, refrigeration, and kinetics of common biological processes used in food preparation. Prerequisite: PHYS 2110. (F)

NFS 4480  
Community Nutrition  
Introduction to public health nutrition, food programs, and national nutrition monitoring. Prerequisite: NFS 1020. (F)

NFS 4550  
Nutrition Assessment/Clinical Nutrition I  
Introduction to the profession of dietetics, assessment of nutrition status, and nutrition care planning. Pathophysiology of disease states and applied medical nutrition therapy. Prerequisite: CHEM 3700. Enrollment restricted to Nutrition and Food Sciences majors only. (F)

NFS 4560 CI  
Clinical Nutrition II  
Continuation of NFS 4550. Prerequisite: NFS 4550. (Sp)

NFS 4570  
Clinical Nutrition Experience I  
Practical experience in health care facilities. Integration and application of material learned in NFS 4550. Corequisite: NFS 4550. Prerequisite: Acceptance into Coordinated Program in Dietetics. (F)

NFS 4580  
Clinical Nutrition Experience II  
Continuation of NFS 4570. Corequisite: NFS 4560. Prerequisite: NFS 4570. (Sp)

NFS 4660 CI  
Medical Dietetics  
In-depth study of nutrition relationships in disease development and treatment with clinical experience in medical facilities in Salt Lake City. Prerequisites: NFS 4550, 4560, 4570, 4580. (F)

NFS 4710  
Quantity Food Preparation  
Principles of food preparation applied to large quantity production, menu planning, food selection, storage, and equipment. Prerequisite: NFS 4070 or consent of instructor. (F)

NFS 4720 QI  
Food Service Organization and Management  
Principles of organization, management theory, financial controls, human and labor relations, employee training, layout, and sanitation. Prerequisite: NFS 4710. (Sp)

NFS 4730  
Quantity Food Preparation Lab  
Practical experience in quantity food preparation. Integration and application of NFS 4710. Corequisite: NFS 4710. Prerequisites: NFS 1240 and acceptance into Coordinated Program in Dietetics. (F)

NFS 4740  
Food Service Organization and Management Lab  
Practical experience in food service management. Integration and application of NFS 4720. Prerequisite: NFS 4730. Corequisite: NFS 4720. (Sp)

NFS 4750  
Management of Dietetics  
Principles of management in dietetics and current practice issues. Prerequisite: Must be enrolled in final year in Coordinated Program in Dietetics (CPD) or Didactic Program in Dietetics (DPD). (Sp)

NFS 4780 CI  
Maternal and Child Nutrition  
Normal and clinical nutritional requirements in pregnancy, lactation, and pediatrics. To be taken in Salt Lake City in conjunction with NFS 4660 or by Didactic Program in Dietetics (DPD) students in their final year. (F)

On-the-job training. (F,Sp,Su)

Prerequisites: NFS 3030 and 3060. Will be offered Spring 2007 and Spring 2008. Will not be offered after Spring 2009. (Sp)

Reviews basic methods of protein purification, including scaled-up use of 100L fermenter, large-scale centrifugation, diafiltration, chromatography, and use of BioCAD. Prerequisite: CHEM 3700. Also taught as ADVS 5240, BIOL 5240, and PSB 5240. (Sp)

Laboratory-oriented course designed to teach molecular biology techniques such as DNA cloning, genetic probes, polymerase chain reaction, and DNA sequencing. Prerequisite: CHEM 3700 or 5710; or BIOL 3060; or permission of instructor. Also taught as ADVS 5260, BIOL 5260, and PSB 5260. (F)

Explores the function, interaction, and practical significance of micronutrients in human metabolism and the ability of the diet to meet these needs. Relates nutrient biochemical functions to specific deficiency symptoms. Prerequisite: NFS 4020. (Sp)

Theory of modern techniques used to study macromolecules and ions. Prerequisite: CHEM 3700. Also taught as ADVS/BIOL/PSB 5370/6370. (F)

Application and theory of physical, chemical, and instrumental techniques for determination of composition and quality of food. Prerequisite: NFS 5560/6560. (Sp)

Provides background of federal/state laws and regulations and case law history affecting food production, processing, packaging, marketing, and distribution of food products. (Sp)

Practical experience in food service settings, integrating and applying material learned in lectures and laboratories. (F,Sp)

Explores principles and roles of macronutrients in causing malnutrition influencing health, survival, and developmental capacity of populations, especially in developing societies. Discussion of approaches implemented at household, community, national, and international levels to improve nutritional status. (Sp)

Capstone course that incorporates and unifies the principles of food chemistry, microbiology, engineering, processing, nutrition, sensory analysis, and statistics. Prerequisite: Senior standing. (F)

Emphasizes understanding the conversion of muscle to meat, fabrication of carcasses into primal and retail cuts, and principles underlying manufacture of processed meats. (F)
## Course Descriptions

### NFS 6030  Dairy Technology and Processing  (dual listing 5030)
4
Covers biochemistry, microbiology, and technology of milk processing. Includes heat processing, fat separation, homogenization, concentration, drying, fermentation, freezing, and manufacture of dairy foods such as pasteurized milk, UHT milks, ice cream, cheeses, and yogurt. Prerequisites: NFS 6110/5110, 6560/5560. (F)

### NFS 6050  Community Public Health Internship I  3
Supervised school nutrition education internship in elementary and secondary public schools developing child nutrition programs. Prerequisite: Acceptance into USU Extension Dietetic Internship Program. (F,Sp,Su)

### NFS 6060  Community Public Health Internship II  3
Supervised public health nutrition internship with state and district supplemental food program for women, infants, and children. Prerequisite: Acceptance into USU Extension Dietetic Internship Program. (F,Sp,Su)

### NFS 6100  Sensory Evaluation of Foods  3
Methods and practice in the sensory evaluation of foods. Testing facilities/ environment, statistical design, testing method selection, and data interpretation. Prerequisite: STAT 3000 or permission of instructor. (Sp)

### NFS 6110  Food Microbiology  (dual listing 5110)  4
Microorganisms in food spoilage, poisoning, preservation, and sanitation. Prerequisite: BIOL 3300. (Sp)

### NFS 6170  Principles of Food Safety Assurance*  2
Explores prerequisite programs for HACCP, HACCP implementation, and food safety considerations in new product development. Prerequisite: BIOL 3300 or equivalent. (F)

### NFS 6200  Nutritional Epidemiology  (dual listing 5200)  2
Introduction to epidemiologic methods and their application to the study of nutrition, human health, and disease. Useful for students with career interests in nutrition, food sciences, dietetics, human health sciences, veterinary sciences, biology, public health, anthropology, social work, and public policy. Prerequisites: STAT 1040, NFS 1020. (F)

### NFS 6210  Advanced Public Health Nutrition  (dual listing 5210)  2
Effects of diet on development and prevention of disease. Conditions of public health significance, including birth defects, coronary heart disease, hypertension, stroke, Alzheimer’s disease and other causes of dementia, cancer, osteoporosis, diabetes, and international health problems. Discussion of health concerns of minority populations, cross-cultural studies, government policy, and establishment of dietary recommendations. Prerequisites: STAT 1040 or higher, CHEM 3700 or higher. (Sp)

### NFS 6220  Endocrine Aspects of Nutrition  (dual listing 5220)  2
Provides physiological background into hormones involved in nutrient regulation, as well as mechanisms of hormone action at the cellular and molecular levels. Includes action of steroids in the nucleus and membrane-based signal transduction pathways. Course includes lectures and literature reviews/ presentations. Prerequisite: CHEM 3700 or permission of instructor. Also taught as ADVS 6220/5220 and BIOL 6220/5220. (Sp)

### NFS 6250  Clinical Nutrition Internship I  4
Supervised clinical nutrition experience including medical, geriatric, long-term care, and oncology. Prerequisite: Acceptance into USU Extension Dietetic Internship Program. (F,Sp,Su)

### NFS 6260  Clinical Nutrition Internship II  4
Supervised clinical nutrition experience including nutrition support, renal, pediatrics, intensive care units, outpatient care, and clinical staff experience. Prerequisite: Acceptance into USU Extension Dietetic Internship Program. (F,Sp,Su)

### NFS 6300  Advanced Micronutrient Nutrition  (dual listing 5300)  3
Explores the function, interaction, and practical significance of micronutrients in human metabolism and the ability of the diet to meet these needs. Relates nutrient biochemical functions to specific deficiency symptoms. Prerequisite: NFS 4020. (Sp)

### NFS 6350  Food Service Systems Management Internship I  6
Supervised school food service internship. Includes purchasing, inventory control, food service, and food production. Prerequisite: Acceptance into USU Extension Dietetic Internship Program. (F,Sp,Su)

### NFS 6360  Food Service Systems Management Internship II  6
Supervised school food service internship. Includes administration and food service staff supervision experience. Prerequisite: Acceptance into USU Extension Dietetic Internship Program. (F,Sp,Su)

### NFS 6370  Molecular Methods in Nutrition Science  (dual listing 5370)  2
Theory of modern techniques used to study macromolecules and ions. Prerequisite: CHEM 3700. Also taught as ADVS/BIOL/PSB 6370/5370. (F)

### NFS 6500  Food Analysis  (dual listing 5500)  4
Application and theory of physical, chemical, and instrumental techniques for determination of composition and quality of food. Prerequisite: NFS 6560/5560. (Sp)

### NFS 6510  Food Laws and Regulations  (dual listing 5510)  2
Provides background of federal/state laws and regulations and case law history affecting food production, processing, packaging, marketing, and distribution of food products. (Sp)

### NFS 6560  Food Chemistry  (dual listing 5560)  4
Chemical structure, properties, and reactions and interactions of the important chemical constituents of food. Prerequisites: CHEM 3700 and 3710. (F)

### NFS 6610  Food and Bioprocess Engineering  (dual listing 5610)  3
Standardization and compounding of biomaterials and food products; preservation processing using heat, refrigeration, concentration, and dehydration. Basic unit operations in the bioprocessing industry. Prerequisite: BIE 3200. Also taught as BIE 6610/5610. (F)

### NFS 6620  Microbiology of Fermented Dairy Foods**  1
Explores the microbiology and physiology of dairy starter and nonstarter bacteria. Particular emphasis placed on important metabolic functions and biochemical pathways used by these microorganisms in food fermentations and their influence on product attributes. (Sp)

### NFS 6640  Food Proteins**  1
Covers topics in protein structure, folding, functional properties, allergens, and purification. (F)

### NFS 6650  Meat Science*  2
Structure of muscle tissue, chemistry of contraction and relaxation, factors affecting meat tenderness, and postmortem changes and their effect on meat quality. Prerequisite: CHEM 3700. (Su)

### NFS 6660  Cheese Science**  2
Studies application of chemistry and microbiology to the manufacture of cheese. (Su)

### NFS 6670  Food Biosecurity and Crisis Management*  1
Food biosecurity addresses the intentional contamination of a food product. Crisis management focuses on how a food company deals with a crisis situation; including product recalls, dealing with the media, and damage control. (F)

### NFS 6680  Food Enzymes**  2
Covers topics in food enzymes, including enzyme classification and nomenclature, reaction kinetics, food applications, and immobilization technology. (F)
Course Descriptions

NFS 6690  Genetics of Lactic Acid Bacteria**  1
Describes structural and functional characteristics of four major genetic elements described in lactic acid bacteria: plasmid DNA, transposable elements, bacteriophages, and the chromosome. (Sp)

NFS 6700  Dairy Chemistry*  1
Students gain an understanding of the chemical structure, properties, biosynthesis, and reactions of the main constituents in milk. Students apply this knowledge to the development and processing of dairy foods. (Sp)

NFS 6720  Metabolomics*  1
Metabolomics is the study of all metabolites within a biological sample. The "metabolome" results from genetics and environment, and is the best descriptor of phenotype. The promise of metabolomics is a molecular understanding of the effect of diet on health. (F)

NFS 6730  Understanding Crystallization in Food Systems*  1
Introduces basic concepts of crystallization mechanisms, including theories governing the crystallization process and their applications in food systems. Emphasizes the importance of controlling crystallization and its influence on final product quality and stability. (Sp)

NFS 6740  Waste and Energy Management*  1
Explores energy and waste management, including waste treatment methods and ways to reduce energy, or substitute with less-costly energy, in the food processing industry. Students learn through lectures, cooperative learning, site visits, and example problems. (F)

NFS 6750  Advanced Dietetics Practicum  1-6 (dual listing 5750)
Advanced dietetics practicum in clinical nutrition, community nutrition, food service management, or research. Prerequisite: Must be enrolled in final year in Coordinated Program in Dietetics (CPD) or Didactic Program in Dietetics (DPG). (F,Sp,Su)

NFS 6760  Special Topics in Nutrition and Food Science  1-3
Selected topics in nutrition and food science, based on individual faculty interests. (F,Sp,Su)

NFS 6780  Advanced Institutional Food Service Management  3
Principles of management applied to institutional food services and advanced professional certification curriculum. To enroll, student must be an MS candidate in dietetics or be eligible to take the national SFNS (School Food and Nutrition Service) exam. (Sp)

NFS 6800  Molecular and Cellular Nutrition**  1
Seminar course focusing on literature covering bioactive food components and nutrient action in transcriptional regulation. (F)

NFS 6810  Nutrigenomics*  1
Examination and discussion of how our unique genetic makeup affects the way we respond to our nutritional environment and how that impacts health and risk of disease. Also includes discussion of ethical and social issues related to nutritional genomics research. (Sp)

NFS 6820  Biomedical Aspects of Nutrition/ Human Diseases Interaction**  1
Study of the role nutrition plays in human disease development, prevention, and treatment. Highlights common and challenging nutrition issues in human diseases through understanding of human nutrition and pathophysiology of diseases. (Sp)

NFS 6830  International Nutrition: Macronutrients*  2 (dual listing 5830)
Explores principles and roles of macronutrients in causing malnutrition influencing health, survival, and developmental capacity of populations, especially in developing societies. Discussion of approaches implemented at household, community, national, and international levels to improve nutritional status. (Sp)

NFS 6900  Special Problems  1-4* (F,Sp,Su)
Individual problems and research problems for upper-division students in Nutrition and Food Sciences. (F,Sp,Su)

NFS 6910  Teaching Experiences in Nutrition and Food Sciences  1-2* (F,Sp,Su)
Students work with faculty in the Nutrition and Food Sciences department to gain experience in teaching. (F,Sp,Su)

NFS 6970  Thesis Research  1-12* (F,Sp,Su)
For students working on MS research. Graded Pass/Fail only. (F,Sp,Su)

NFS 6990  Continuing Graduate Advisement  1-12* (F,Sp,Su)
Graded Pass/Fail only. (F,Sp,Su)

NFS 7800  Seminar  1
Reports and discussion on research and current literature. (F,Sp)

NFS 7970  Dissertation Research  1-12* (F,Sp,Su)
For students working on PhD research. Graded Pass/Fail only. (F,Sp,Su)

NFS 7990  Continuing Graduate Advisement  1-12* Graded Pass/Fail only. (F,Sp,Su)
*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

NR 2220  General Ecology  3
Study of the interrelationships among organisms, humans, and their environments, addressing where and how organisms live. Adaptation, population growth, species interactions, biodiversity, and ecosystem function are explored for a wide variety of organisms and ecosystems. Prerequisites: BIOL 1610 and 1620. Also taught as BIOL 2220. (F,Sp)

NR 4440  Natural Resource and Environmental Policy Seminar  1*
Year-long invited speaker seminar series on natural resource and environmental policy issues. Students register for only one semester, but attend the seminars until a required number has been met. Students also complete an assignment. Since this course is not required under current program requirements for the Natural Resource and Environmental Policy Certificate Program, it may not be offered in the foreseeable future. For availability, check with the College of Natural Resources Dean’s Office.

NR 6430  Natural Resource and Environmental Policy Cornerstone Seminar  3
Interdisciplinary, team-taught cornerstone course for the Natural Resource and Environmental Policy Graduate Certificate Program. Introduces different disciplinary perspectives for analyzing natural resource and environmental policies and decision-making processes. Helps students understand the role of science in policy-making and how to integrate information from contentious perspectives. (Sp)

NR 6440  Natural Resource and Environmental Policy Seminar  1*
Year-long invited speaker seminar series on natural resource and environmental policy issues. Students are required to attend a minimum number of the seminars. Students also complete an assignment. Since this course is not

Natural Resources (NR)

See College of Natural Resources, pages 128-130

NR 1010  BSS Humans and the Changing Global Environment  3
Introduction to historical nature and extent of human environmental transformation at global and regional levels. Examination of how socio-economic, political, and scientific factors influence past and current perceptions, use and conservation of natural environments in Western and other cultures, and future options available. For availability, check with the College of Natural Resources Dean’s Office.

NR 6440  Natural Resource and Environmental Policy Seminar  1*
Year-long invited speaker seminar series on natural resource and environmental policy issues. Students register for only one semester, but attend the seminars until a required number has been met. Students also complete an assignment. Since this course is not required under current program requirements for the Natural Resource and Environmental Policy Certificate Program, it may not be offered in the foreseeable future. For availability, check with the College of Natural Resources Dean’s Office.

NR 6430  Natural Resource and Environmental Policy Cornerstone Seminar  3
Interdisciplinary, team-taught cornerstone course for the Natural Resource and Environmental Policy Graduate Certificate Program. Introduces different disciplinary perspectives for analyzing natural resource and environmental policies and decision-making processes. Helps students understand the role of science in policy-making and how to integrate information from contentious perspectives. (Sp)

Course Descriptions

required under current program requirements for the Natural Resource and Environmental Policy Certificate Program, it may not be offered in the foreseeable future. For availability, check with the College of Natural Resources Dean’s Office.

NR 6450 Natural Resource and Environmental Policy Presentation 1
In their last year of graduate school, certificate candidates make a presentation on policy dimensions of thesis or dissertation, as part of this student seminar series. Students receive one semester credit for this presentation. For availability, check with the College of Natural Resources Dean’s Office.

NR 6510 Biophysical and Human Dimensions of Ecosystems 4
Intensive two-week course introducing key biophysical and socio-economic concepts through exploration of important concepts central to ecosystem management. Examines how ecosystem management differs from traditional approaches to the management of natural resources. Prerequisite: Instructor’s permission. (F,Sp,Su)

NR 6520 Structure and Function of Ecological and Social Systems 4
Two-week course examining specific processes of landscape development. Establishes the relationship of landscape structure to vegetation and watersheds. Scale and pattern of ecosystems and classification studied at several scales. Prerequisite: Instructor’s permission. (F,Sp,Su)

NR 6530 Integrated Inventory, Analysis, and Assessment of Ecosystems 4
Course participants develop techniques and skills for assessing the biophysical and socio-political environment. Participants gain an understanding of measurement, predicting future conditions, and decision-making techniques in ecosystem management. Prerequisite: Instructor’s permission. (F,Sp,Su)

NR 6540 Ecosystem Management Implementation 4
Participants develop an integrated ecosystem assessment of a landscape unit in a capstone exercise. Assessment conducted with an interdisciplinary team during a two-week period in the field. Prerequisite: Instructor’s permission. (F,Sp,Su)

NR 6550 Intensive Silviculture 3
Topics for this two-week comprehensive course in silviculture include: stand development and density management; growth and yield; silvicultural systems and reproduction methods; economic evaluation of systems; and relationships between practices and forest health, harvest systems, and forest soils. (F,Sp,Su)

NR 6560 Fire and Fuels Management 4
Two-week course evaluating fire and fuels management programs, which incorporate realistically projected changes in vegetation, fuels, and fire behavior over time. Participants inventory fuels and vegetation, predict fire behavior, and predict change in vegetation structure. (F,Sp,Su)

NR 6600 Natural Resources Integrative Experience 3
Under the direction of the student's supervisory committee, student completes an integrative capstone experience in his or her specialty. (F,Sp,Su)

Nursing (NURS)

See Weber State University/Utah State University Nursing Program, pages 439-440

NURS 1030 Foundations of Nursing Practice 3
Nursing concepts introduced which are built upon throughout the nursing curriculum as students care for clients. (F)

NURS 1031 Foundations of Nursing Practice Clinical 3
Companion course taught in concert with NURS 1030. Clinical experience running concurrently with NURS 1030. (F)

NURS 1040 Women's Health and the Childbearing Family 2
Theory focuses on meeting basic human needs of the family and newborn throughout the childbearing cycle. (Sp)

NURS 1041 Women's Health and the Childbearing Family Clinical 1
Companion course taught in concert with NURS 1040. (Sp)

NURS 1045 Nursing Care of Adults and Children 3
Focused theory with emphasis on physiological and psychosocial needs of clients across the lifespan. (Sp)

NURS 1046 Nursing Care of Adults and Children Clinical 2
Companion course taught in concert with NURS 1045. (Sp)

NURS 1050 Treatment Modalities 3
Basic treatments and pharmaceutical agents used by nurses to promote health across the lifespan. (F)

NURS 2050 Treatment Modalities 2
Advanced treatments and pharmaceutical agents used by nurses to promote health across the lifespan. (F)

NURS 2060 Psychiatric/Mental Health Nursing 2
Students explore caring strategies for promoting mental health and preventing illness across the lifespan. (Sp)

NURS 2061 Psychiatric/Mental Health Nursing Clinical 1
Companion course taught in concert with NURS 2060. Clinical application of psychiatric/mental health nursing taught in NURS 2060. (Sp)

NURS 2070 Nursing Care of Adults and Children II 3
Theory with emphasis on more complex physiological and psychosocial needs of clients across the lifespan. (F)

NURS 2071 Nursing Care of Adults and Children II Clinical 4
Companion course taught in concert with NURS 2070. Clinical application of medical-surgical concepts learned in NURS 2070. (F)

NURS 2080 Patient Care Management 2
Theory focuses on the synthesis of nursing knowledge and skills necessary for entrance into registered nursing practice. (Sp)

NURS 2081 Patient Care Management Clinical 3
Companion course taught in concert with NURS 2080. Clinical synthesis of nursing knowledge and skills necessary for entrance into registered nursing practice. (Sp)

NURS 2283 Directed Readings and Projects 1-3
Prerequisite: Instructor’s approval. (F,Sp)

Office Systems Support (OSS)

See Office Systems Support AAS Degree, pages 452-453

OSS 1110 Keyboarding 2
(for formerly BIS 1110)
For students with no previous keyboarding experience. Designed so student can touch type and learn basic concepts related to word processing and document formatting.

OSS 1400 Microcomputer Applications 3
(for formerly BIS 1400)
Introduction to operating systems, word processing, Internet, graphics, database, and spreadsheet applications. Includes preparation for University Studies Computer and Information Literacy (CIL) examination. Prerequisite: Ability to keyboard at a minimum of 25 wpm.

OSS 1410 Special Topics 1-3
(for formerly BIS 1410)
Selected topics related to using computers.

OSS 1420 Word Processing Applications 3
(for formerly BIS 1420)
Word processing software instruction designed for office applications. Emphasizes creating business documents and improving keyboarding skills. Assumes ability to keyboard by touch at a minimum of 50 wpm.
Course Descriptions

OSS 1550  CI  Business Correspondence  3
(formerly BIS 1550 CI)
Development and application of effective business writing skills, emphasizing business correspondence. Includes thorough review of grammar, spelling, and punctuation related to business correspondence.

OSS 2300  Data Communications and Networking  3
(formerly BIS 2300)
Emphasizes data communications in a LAN and WAN networking environment. Includes network protocols, cable technology, telecommunications standards, security issues, and general telecommunications management issues. Prerequisite: OSS 1400 or Computer and Information Literacy (CIL) Exam.

OSS 2400  Web Design Applications  3
(formerly BIS 2400)
Design, development, and evaluation of documents for electronic media utilizing the worldwide web. Prerequisite: OSS 1400 or Computer and Information Literacy (CIL) Exam. (formerly PE 1230)

OSS 2450  Spreadsheets and Databases  3
(formerly BIS 2450)
Use of spreadsheets and databases to accomplish application development. Prerequisite: OSS 1400 or Computer and Information Literacy (CIL) Exam.

OSS 2500  Visual Basic Applications  3
(formerly BIS 3450)
Designed to teach nontechnical students to develop application solutions using Visual Basic. Features of Microsoft Access requiring knowledge of Visual Basic are introduced. Prerequisite: OSS 2450.

OSS 2520  Integrating Office Technology  3
(formerly BIS 2520)
Advanced applications of office technology for production of business documents, emphasizing efficient use of word processing, graphics, and desktop publishing. Prerequisite: OSS 1400 or passing scores on University Studies Computer and Information Literacy (CIL) exams.

OSS 2600  Office Procedures  3
(formerly BIS 2600)
Finishing course which integrates office knowledge and skills. Applies administrative activities which are part of the office process. Prerequisites: OSS 2520; OSS 1500 or BIS 2200.

OSS 2800  Principles of Selling  2
(formerly BIS 3550)
Focuses on the sales process, including prospecting, qualifying customers, planning and delivering the sales presentation, overcoming objections, closing the sale, and satisfying the customer’s needs.

Physical Education Activity (PE)

See Department of Health, Physical Education and Recreation, pages 321-331

PE 1010  Aerobics  1
(formerly PE 1330)
Fitness program, primarily designed to improve cardiovascular fitness, muscular endurance, and flexibility. Graded Pass/Fail only. (F,Sp)

PE 1016  Spinning  1
(formerly PE 1340)
Intense cardiovascular conditioning class performed on stationary bikes. Graded Pass/Fail only. (F,Sp)

PE 1030  Aerobic Kickboxing  1
Designed as a fitness program to improve cardiovascular fitness, muscular endurance, and flexibility through a combination of aerobic exercise and kickboxing. Emphasis placed on safety, fitness, and enjoyment. Graded Pass/Fail only. (F,Sp)

PE 1046  Jog/Walk  1
(formerly PE 1300)
Provides students with opportunity to achieve and maintain personal fitness through jogging and/or walking. Graded Pass/Fail only. (F,Sp,Su)

PE 1055  Pilates  1
Provides a mind-body exercise program designed to strengthen core stability, increase flexibility, and increase muscle tone. Graded Pass/Fail only. (F,Sp)

PE 1057  Yoga  1
(formerly PE 1360)
Provides a simultaneous path to and discovery of ineffability, utilizing physical and mental techniques derived from and inspired by the Ati tradition of Tibet, as well as from other sources. Graded Pass/Fail only. (F,Sp,Su)

PE 1063  Conditioning  1
(formerly PE 1310)
Designed to improve overall flexibility, strength, and endurance capacity of the body. Graded Pass/Fail only. (F,Sp)

PE 1085  Weight Training  1
(formerly PE 1320)
Demonstration of proper weight training techniques. Helps students understand basic concepts related to weight training, in order to gain strength, improve muscle tone, and start or continue a healthy lifestyle. Graded Pass/Fail only. (F,Sp,Su)

PE 1100  Tennis I Beginning  1
(formerly PE 1250)
Designed for students desiring a basic understanding of tennis. Improvement of skills and strategies through active participation in drills and games. Graded Pass/Fail only. (F,Sp,Su)

PE 1101  Tennis II Intermediate  1
Designed for students with a basic knowledge of tennis who desire to learn intermediate skills. Improvement of skills and strategies through active participation in drills and games. Graded Pass/Fail only. (F,Sp,Su)

PE 1103  Table Tennis  1
Designed for students desiring a basic understanding of table tennis. Improvement of skills and strategies through active participation in drills and games. Graded Pass/Fail only. (F,Sp)

PE 1105  Badminton  1
(formerly PE 1200)
Through active participation, students learn basic skills, rules, and strategies of singles and doubles badminton. Graded Pass/Fail only. (F,Sp)

PE 1110  Racquetball I Beginning  1
(formerly PE 1240)
Designed to help students understand the general rules and strategies of racquetball, improve competitive skills, and play safely and effectively. Graded Pass/Fail only. (F,Sp)

PE 1111  Racquetball II Intermediate  1
Designed for students with a basic knowledge of racquetball who desire to learn intermediate skills. Improvement of skills and strategies through active participation in drills and games. Graded Pass/Fail only. (F,Sp)

PE 1112  Racquetball III Advanced  1
Designed for students with proficient skills and knowledge of racquetball who desire to learn advanced skills. Improvement of skills and strategies through active participation in drills and games. Graded Pass/Fail only. (F,Sp)

PE 1120  Handball  1
(formerly PE 1290)
Provides skills and knowledge in the fundamentals of handball. Graded Pass/Fail only. (F,Sp,Su)

PE 1130  Golf Beginning  1
(formerly PE 1220)
Designed for the beginning and novice golfer. Basics of individual grip, set-up, posture, and swing. Includes putting, chipping, weight transfer, and balance. Graded Pass/Fail only. (F,Sp,Su)
Course Descriptions

PE 1131 Golf Intermediate 1®
Designed for students with basic golf skills who desire to learn more about golf and improve their golf skills. Improvement of strategies and skills through active participation. Graded Pass/Fail only. (F,Sp,Su)

PE 1145 Bowling 1®
(formerly PE 1270)
Provides students with the knowledge, skills, and strategies for successful participation and enjoyment. Graded Pass/Fail only. (F,Sp,Su)

PE 1146 Bowling Intermediate 1®
Designed for students with basic bowling skills who desire to learn intermediate skills. Improvement of strategies and skills through active participation and games. Graded Pass/Fail only. (F,Sp,Su)

PE 1150 Billiards Beginning 1®
(formerly PE 1260)
Designed to help students develop and understand the skills and strategies of games. Graded Pass/Fail only. (F,Sp,Su)

PE 1151 Billiards Intermediate 1®
Designed for students with basic billiards skills who desire to learn intermediate skills. Improvement of strategies and skills through active participation and games. Graded Pass/Fail only. (F,Sp,Su)

PE 1152 Billiards Advanced 1®
Designed for students with proficient skills and knowledge of billiards who desire to learn and improve their skills. Improvement of strategies and skills through active participation and games. Graded Pass/Fail only. (F,Sp,Su)

PE 1155 Fencing 1®
(formerly PE 1510)
Introduction to basic techniques of fencing. Graded Pass/Fail only.

PE 1170 Gymnastics 1®
(formerly PE 1230)
Designed to enhance current abilities and teach skills according to the individual student's abilities. Skills taught through drill work and lecture. Graded Pass/Fail only. (F,Sp,Su)

PE 1200 Basketball 1®
(formerly PE 1100)
Designed to help the recreational player become more familiar with the basic skills involved in the game of basketball. During the course, games and/or a "mini" tournament will be played. Graded Pass/Fail only. (Sp)

PE 1210 Volleyball Beginning 1®
(formerly PE 1150)
Designed to help students understand the general rules and strategies and enjoyment of the game through active participation. Graded Pass/Fail only. (F,Sp)

PE 1211 Volleyball Intermediate 1®
Designed for students with basic knowledge of volleyball who desire to learn intermediate skills. Improvement of skills and strategies through active participation in drills and games. Graded Pass/Fail only. (F,Sp)

PE 1212 Volleyball Advanced 1®
Designed for students with proficient skills and knowledge of volleyball who desire to learn new skills and improve their skills. Improvement of skills and strategies through active participation in drills and games. Graded Pass/Fail only. (F,Sp)

PE 1225 Softball 1®
(formerly PE 1130)
Designed to help students develop and understand the skills and strategies of recreational softball through active participation. Graded Pass/Fail only. (Sp)

PE 1230 Soccer 1®
(formerly PE 1120)
Designed to help students develop and understand the skills and strategies of soccer through active participation in drills and games. Graded Pass/Fail only. (F,Sp)

PE 1235 Flag Football 1®
(formerly PE 1110)
Designed to help students develop and understand the skills and strategies of recreational flag football through active participation. Graded Pass/Fail only. (F)

PE 1245 Ultimate Frisbee 1®
(formerly PE 1140)
Designed to enhance each student's skills and abilities in ultimate frisbee. Emphasizes cardiovascular and muscular fitness. Course is progressive, with increase in intensity as the individual improves abilities. Graded Pass/Fail only. (F,Sp)

PE 1246 Ultimate Frisbee Intermediate 1®
Designed to enhance the skills and abilities of students desiring to learn intermediate skills in ultimate frisbee. Emphasizes cardiovascular and muscular fitness. Improvement of skills and strategies through active participation in drills and games. Graded Pass/Fail only. (F,Sp)

PE 1260 Ice Hockey Beginning 1®
Designed for students desiring a basic understanding of ice hockey. Conditioning and skill development achieved through active participation in drills and games. Graded Pass/Fail only. (F,Sp)

PE 1261 Ice Hockey Intermediate 1®
Designed for students with a basic understanding of ice hockey who would like to learn intermediate skills and techniques. Conditioning and skill development achieved through active participation in drills and games. Graded Pass/Fail only. (F,Sp)

PE 1300 Swimming Beginning 1®
(formerly PE 1400)
Designed for swimmers and nonswimmers desiring to improve swimming skills and enhance cardiovascular and muscular fitness. Emphasizes swimming safety and enjoyment in a variety of water activities. Beginning and intermediate swim sections offered. Graded Pass/Fail only. (F,Sp,Su)

PE 1301 Lap Swimming 1®
Designed for swimmers desiring to improve swimming skills and enhance cardiovascular and muscular fitness. Graded Pass/Fail only. (F,Sp,Su)

PE 1315 Water Aerobics 1®
(formerly PE 1350)
Provides students with opportunity to maintain personal fitness, with an emphasis on non-weight-bearing cardiovascular activity in water. Graded Pass/Fail only. (F,Sp)

PE 1400 Self-Defense 1®
(formerly PE 1500)
Covers skill development in terms of defensive capability, environment assessment, situation management, and the legal ramifications of the use of force. Graded Pass/Fail only. (F,Sp,Su)

PE 1407 Rape Aggression Defense 1®
Designed to develop and enhance the options of self-defense, so they may become viable considerations to the woman who is attacked. Students learn how to use personal weapons against abduction. Graded Pass/Fail only. (F,Sp)

PE 1410 Tai Chi Chuan 1®
Designed to give participants entry-level experience in the art of Tai Chi Chuan. Participants explore the physical, meditational, yogic, metaphysical, and martial foundations of the art. Graded Pass/Fail only. (F,Sp)

PE 1430 Karate 1®
Designed to develop and enhance the options of self-defense for students with little or no background in martial arts (Eastern or Western) with the rudimentary skills of self-defense. Graded Pass/Fail only. (F,Sp)

PE 1440 Aikido 1®
Students learn Aikido self-defense techniques through blending with the energy of an attacker, physical exercises for mind-body coordination, and forms of breathing to improve concentration and relaxation. Graded Pass/Fail only. (F,Sp)

<tr>
<td></td>
<td>Provides opportunity for students of all skill levels and experience to develop their telemark skiing skills. Emphasizes versatility and efficiency in varied snow and terrain conditions. Graded Pass/Fail only. (Sp)</td>
<td></td>
</tr>
<tr>
<td>PE 1655</td>
<td>Snowshoeing</td>
<td>1®</td>
</tr>
<tr>
<td>(formerly PE 1820)</td>
<td>Provides skills and knowledge of snowshoeing, with an emphasis on leave no trace techniques and development of safe winter activity skills. Graded Pass/Fail only. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>PE 1670</td>
<td>Figure Skating Beginning</td>
<td>1®</td>
</tr>
<tr>
<td>(formerly PE 1840)</td>
<td>Designed for students desiring to learn basic figure skating skills. Conditioning and skill development achieved through active participation. Graded Pass/Fail only. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>PE 1671</td>
<td>Figure Skating Intermediate</td>
<td>1®</td>
</tr>
<tr>
<td></td>
<td>Designed for students with basic figure skating skills who are interested in becoming more proficient skaters and learning new techniques and skills. Conditioning and skill development achieved through active participation. Graded Pass/Fail only. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>PE 1680</td>
<td>Curling</td>
<td>1®</td>
</tr>
<tr>
<td></td>
<td>Designed for students desiring to learn the rules, skills, strategies, and etiquette of curling. Graded Pass/Fail only. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>PE 1700</td>
<td>Dance</td>
<td>1®</td>
</tr>
<tr>
<td>(formerly PE 1900)</td>
<td>Designed to help students enhance their basic skills and enjoyment of dance through the following forms: jazz, modern, ballet, ballroom, social, Latin, western swing, etc. Graded Pass/Fail only. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>PE 1701</td>
<td>Introduction to Modern Dance</td>
<td>1®</td>
</tr>
<tr>
<td></td>
<td>Designed for individuals to gain basic dance experience through a wide variety of modern and post-modern dance techniques and choreographic exercises. Graded Pass/Fail only. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>PE 1702</td>
<td>Modern Dance Intermediate</td>
<td>1®</td>
</tr>

### Physical Education Professional (PEP)

See Department of Health, Physical Education and Recreation, pages 321-331

**PEP 2000** Introduction and History of Physical Education

This course introduces the concepts and history of physical education, including its evolution, key figures, and influence on society. Required for all P.E. majors. (F,Sp)

**PEP 2020** Introduction to Physical Therapy

This course provides an introduction to physical therapy, including its scope of practice, roles, and responsibilities. (F,Sp)
Course Descriptions

PEP 2050  Sport Rules and Regulations of the Utah High School Athletic Association  1
Knowledge of the rules and mechanics of officiating all Utah high school sports. (Sp)

PEP 2100  Skills 1 (Swimming, Volleyball, Football)  1
Provides physical education majors and minors with the knowledge, skills, practice, and understanding of swimming, volleyball, and football needed for successful participation. Exposes students to a variety of teaching methods for these three sports. (F,Sp)

PEP 2200  Skills 2 (Lifetime Activities)  1
Provides physical education majors and minors with the knowledge, skills, practice, and understanding of lifetime activities needed for successful participation. Exposes students to a variety of teaching methods for these activities. (F,Sp, Su)

PEP 2300  Skills 3 (Softball, Basketball, Soccer)  1
Provides physical education majors and minors with the knowledge, skills, practice, and understanding of softball, basketball, and soccer needed for successful participation. Exposes students to a variety of teaching methods for these three sports. (F,Sp)

PEP 2400  Skills 4 (Tennis, Badminton, Track and Field)  1
Provides physical education majors and minors with the knowledge, skills, practice, and understanding of tennis, badminton, and track and field needed for successful participation. Exposes students to a variety of teaching methods for these three sports. (F,Sp)

PEP 2500  Rhythms and Movement  1
Focuses on fundamental motor skills, mixers, aerobic, line, folk, ballroom, and square dance. Provides opportunities to practice rhythms and movement, as well as opportunities to practice teaching. Designed for physical education majors and minors. (F,Sp)

PEP 3050  Physical Education in the Elementary School  3
Prepares students to teach elementary physical education. Focuses on developmentally appropriate activities, locomotor and manipulative skills, fitness, games, rhythms, motor learning, and lesson planning. Students will teach physical education lessons in the elementary school. Prerequisite: Completion of 45 credits prior to registration. (F, Sp, Su)

PEP 3100  Athletic Injuries  3
Care and prevention of common athletic injuries and standard taping techniques. Emphasizes recognition, first aid, and referral for these injuries. Taping techniques taught in a lab setting. (F, Sp)

PEP 3200  CI Motor Learning and Skill Analysis  3
Exploration of materials, methods, and mechanisms of learning and performing motor skills. A variety of sport skills taught in lab, using cues, demonstrations, feedback, and game-like drills. Performance of skill analysis for variety of sport skills. (F, Sp, Su)

PEP 3250  Anatomical Kinesiology  3
Study of the anatomical bases of human movement. Laboratory provides application of principles. (Sp)

PEP 3300  Clinical Experience I  1
Public school clinical experience in physical education. Prerequisite: Admission into Teacher Education program. Graded Pass/Fail only. (F, Sp)

PEP 3350  Methods of Individual and Dual Sports  1
Prepares students by providing strategies and materials for implementing a quality physical education program in individual and dual sports. Discussion of lesson and unit planning, as well as student evaluation. Prerequisites: PEP 2200, 2400. (Arr)

PEP 3400  Methods of Team Sports  1
Prepares students by providing strategies and materials for implementing quality physical education program in team sports. Discussion of lesson and unit planning, as well as student evaluation. Prerequisites: PEP 2100, 2300. (Arr)

PEP 3500  Methods of Fitness Education  1
Emphasizes classroom components for teaching lecture/activity fitness course. Students peer teach in a lecture environment. Discussion of strategies and materials for planning and implementing a quality physical education academic fitness course. Includes lecture planning, presentation, unit preparation, and evaluation. Prerequisites: PE 3000, PEP 3350, 3400. (Arr)

PEP 3550  Strategies and Methods of Teaching Team, Individual, and Dual Sports and Fitness  3
Designed to provide future physical education teachers with sound strategies and methods for teaching lifetime activities including fitness, as well as team, individual, and dual sports. (F, Sp)

PEP 3600  Elementary Physical Education Practicum  3
Prepares teachers to teach elementary physical education as a support minor. Prerequisite: PEP 3050. (Arr)

PEP 3650  Movement Exploration for Elementary Teachers  2
Covers creative movement and international folk dance. Experiences range from classroom management and curriculum development to large open-space activities and performance. Includes art and sound activities. (F)

PEP 4000  Mental Aspects of Sports Performance  3
Provides current knowledge of sport psychology. Applies this knowledge to teaching sports and coaching in public schools. Also taught as PSY 4000. (F, Sp, Su)

PEP 4100  Exercise Physiology and Principles of Conditioning  4
Designed to expose students to theory and application of exercise physiology and principles of training and conditioning. Laboratory experience provides hands-on practicum for concepts taught in the classroom. Prerequisites: BIOL 2320, 2420; MATH 1050 or equivalent. (F, Sp)

PEP 4150  Advanced Care and Prevention of Athletic Injuries  3
Final preparation and competency demonstration of knowledge and skills prior to taking the national certification exam for the Athletic Training credential. Prerequisites: PEP 3100, instructor approval, and NATA/BOC certification eligibility.

PEP 4200  QI Biomechanics  4
Understanding and application of human anatomical kinesiology and biomechanical principles fundamental to efficient human movement. In required concurrent one-hour lab, students obtain hands-on application of principles of anatomical kinesiology and biomechanics. Prerequisites: BIOL 2320, 2420; MATH 1050 or equivalent. (F, Sp)

PEP 4250  Advanced Cooperative Work Experience  1-10
Cooperative education work experience offers student opportunity to work in related field work of the major. Graded Pass/Fail only. Prerequisite: Instructor approval. (F, Sp, Su)

PEP 4300  Clinical Experience II  1
Public school clinical experience in physical education. Graded Pass/Fail only. Prerequisite: Admission into Teacher Education program. (F, Sp)

PEP 4350  Administration of Physical Education  2
Designed to help students understand objectives of physical education and sport, and incorporate them into a philosophy to assist in developing quality programs at the secondary level. Covers all aspects of physical education and sport administration including, but not limited to, budget, personnel, facilities management, programs, and activities. (F, Sp)

PEP 4400  QI Evaluation in Physical Education  3
Focuses on the nature and use of a variety of tests in physical education. Practical application, interpretation, and use of test results are stressed. (F, Sp)

PEP 4500  Methods of Coaching  3
Addresses issues associated with secondary coaching, including fund-raising, discipline, parents, booster clubs, equipment, team selection, etc. Students also get hands-on individual sports methods time with local teams. (F, Sp)

### PEP 4600 Methods of Coaching Football and Soccer
Outlines the methods, strategies, and techniques for coaching scholastic football and soccer. Emphasizes young player skill development and high school coaches' administration of these sports. Prerequisite: PEP 4500 (may be taken concurrently). (Arr)

### PEP 4700 Methods of Coaching Volleyball, Track and Field
Outlines the methods, strategies, and techniques for coaching scholastic volleyball, as well as track and field. Emphasizes young player skill development and high school coaches' administration of these sports. Prerequisite: PEP 4500 (may be taken concurrently). (Arr)

### PEP 4800 Methods of Coaching Basketball, Baseball, and Softball
Outlines methods, strategies, and techniques of coaching scholastic basketball, baseball, and softball. Emphasizes young player skill development and high school coaches' administration of these sports. Prerequisite: PEP 4500 (may be taken concurrently). (Arr)

### PEP 4850 Methods of Teaching and Coaching Women's Gymnastics
Instructs students in required coaching methods for women's gymnastics from the beginning to advanced levels. Also includes section on judging. (Arr)

### PEP 4900 CI Methods of Physical Education
Designed to prepare physical education majors and minors to teach physical education in the schools. Emphasizes planning, teaching, strategies, and methods. Admission to the Teacher Education program is required. Must be taken concurrently with either PEP 3300 or 4300. Prerequisites: Two courses selected from PEP 3350, 3400, and 3500. (F,Sp)

### PEP 4950H Honors Senior Thesis
Culminating experience within the department for honors students. Student works closely with faculty mentor in an extensive project in the student's area of interest. (F,Sp)

### PEP 5050 Psychological Aspects of Sports Performance
Psychological theory and principles applied to sports. Includes motivational techniques, psychological evaluation, stress and anxiety in sports, and personality and sports performance. Also taught as PSY 5050/6050. (Arr)

### PEP 5070 Sport Sociology
Develops understanding of the social significance of sport. Applies the sociological perspective to a variety of contemporary issues, enabling students to better understand how sport affects and reflects American culture. (Sp)

### PEP 5100 Fitness Assessment and Exercise Programs
Application of physiologic principles, assessment techniques, and exercise prescription for developing quality fitness programs that impact health. Students gain experience in a personal fitness program and in the use and interpretation of fitness tests. Prerequisite: PEP 4100. (F)

### PEP 5430 CI The History and Philosophy of Physical Education
Designed to familiarize physical education majors (or nonmajors) with history of physical education and sport, as well as philosophical influences which have contributed to development of contemporary physical education and sport. Considers historical development of yesterday's pastimes into today's complex, institutionalized forms of sport and physical education. (F)

### PEP 5500 Student Teaching Seminar
Capstone seminar focused upon student teaching issues, professional development, and principles of effective instruction. Prerequisites: PEP 4900, completion of Level I and II field experiences. (F,Sp)

### PEP 5560 Practicum in Improving School System Programs
In-service seminar for experienced teachers, emphasizing improvement in instruction. (F,Sp,Su)

### PEP 5630 Student Teaching in Secondary Schools
A 13-week culminating experience in which students assume full-time teaching responsibilities under the direction of cooperating teachers in physical education. Graded Pass/Fail only. Prerequisites: PEP 4900, completion of Level I and Level II field experiences. (F,Sp)

### PEP 5700 Special Topics in Physical Education
In-depth review and discussion of special topics in physical education. (F,Sp,Su)

### PEP 5900 Independent Study
Provides opportunity for undergraduate or graduate students to participate in independent inquiry under guidance of a professor. (F,Sp,Su)

### PEP 5910 Independent Research
Allows undergraduate students to pursue personal research interest by formalizing an independent project under the guidance of a professor. (F,Sp,Su)

### PEP 6000 Administration of Athletics
Prepares students to organize and administer interscholastic and intercollegiate sports at the public school or university level. Consideration is given to both the challenges and standards associated with such programs. (Arr)

### PEP 6010 Leadership in Health, Physical Education, and Recreation
Group approach to improvement and innovation in leadership and supervisory skills. (Sp)

### PEP 6050 Psychological Aspects of Sports Performance
Psychological theory and principles applied to sports. Includes motivational techniques, psychological evaluation, stress and anxiety in sports, and personality and sports performance. Also taught as PSY 6050/5050. (Arr)

### PEP 6070 Sport in Society
Introduces students to complex role and social significance of sport in contemporary society. Familiarizes students with aims, scope, and potential contributions of sport in society. (Sp)

### PEP 6250 Graduate Cooperative Work Experience
Professional level of educational work experience in a cooperative education position for graduate students. (F,Sp,Su)

### PEP 6290 Corporate Wellness Marketing
Reviews history of corporate fitness in America, as well as common organizational and management practices. Emphasizes marketing practices promoting individual and business involvement. (Sp)

### PEP 6400 Exercise in Health, Fitness, and Sport
Emphasizes physiological and health benefits of exercise. Discusses role of exercise in disease prevention, along with medications given to treat illness and disease. (F)

### PEP 6420 Curriculum in Physical Education
Curriculum development studied in terms of student needs in relation to present-day society. Includes current practices and trends in the area of curriculum. (Arr)

### PEP 6430 History and Philosophy of Physical Education and Sport
History of physical education; philosophical influences which have contributed to contemporary physical education; and methods of educational instruction using the primary philosophical positions. (F)

### PEP 6450 Fitness Assessment and Exercise Testing
Exposure to fitness assessment in clinical cardiac settings, as well as in corporate wellness settings. Exercise testing and interpretations, using different testing protocols in emphasized variant electrocardiograms, studied as part of the disease process. Prerequisite: PEP 6400. (Sp)

### PEP 6500 Practicum in Corporate Wellness
Experiences designed for the practical implementation of coursework. Involves random population rehabilitation, as well as executive and industry, senior citizen centers, and rest homes. (F,Sp,Su)
Course Descriptions

PEP 6540  Wellness Programming  3
Emphasizes exercise prescription writing and exercise prescription implementation. Students test prescriptions in laboratory setting. Prerequisites: PEP 6400, 6450. (Sp)

PEP 6550  Athletic Training Clinical Orthopedics I  3
Provides graduate student athletic trainers with opportunity to learn sports medicine from a sports medicine physician’s perspective. Concepts provide real-life examples. (F)

PEP 6560  Athletic Training Clinical Orthopedics II  3
Provides graduate student athletic trainers with opportunity to learn sports medicine from a sports medicine physician’s perspective. Concepts provide real-life examples. (Sp)

PEP 6690  Analysis of Teaching Physical Education  3
Designed to provide graduate students with practicum experiences in the analysis of physical education, via micro teaching and observation of physical education classes. (Arr)

PEP 6700  Special Topics in Physical Education 1-6
(dual listing 5700)
In-depth review and discussion of special topics in physical education. (F,Sp,Su)

PEP 6730  Worksite Guidance and Counseling  3
Provides cardiac rehabilitation/corporate wellness graduate students with basic understanding of exercise and health psychology. (Arr)

PEP 6800  Biomechanics and Ergonomics of Health, Industry, and Sport  3
Understanding and application of biomechanical and ergonomic principles fundamental to efficient human movement in health, industry, and sport. Prerequisite: PEP 4200. (Sp)

PEP 6810  Research Methods in Health Sciences  3
Explores basic to advanced concepts contained in research and statistical design, as applicable to health sciences. (F)

PEP 6820  Wellness Certification and Technology  2
Provides instruction and experience in wellness technology and wellness certification. Students learn use of current technology in the fitness industry and obtain certain wellness certifications. (Arr)

PEP 6830  Motor Learning  3
Comprehensive review and analysis of research in the area of motor skills which bears upon the teaching of physical education activities. (Arr)

PEP 6900  Independent Study 1-3
Student conducts independent projects under direction of one or more professors. Provides student with opportunity for individualized study. (F,Sp,Su)

PEP 6910  Independent Research 1-3
Allows graduate students to pursue personal research interests by formalizing an independent project under the guidance of a graduate professor. (F,Sp,Su)

PEP 6920  Master’s Project  3
Allows students opportunity to develop creative and applicable educational project. (F,Sp,Su)

PEP 6970  Thesis 1-9
Graded Pass/Fail only. (F,Sp,Su)

PEP 6990  Continuing Graduate Advise ment  1-9
Graded Pass/Fail only. (F,Sp,Su)

PEP 7550  Practicum in the Evaluation of Instruction 1-6
Field-based experience involving supervision of student teachers in Department of Health, Physical Education and Recreation. (F,Sp,Su)

---

Personal Financial Planning (PFP)

See School of Accountancy, pages 133-137

PFP 1050  Introduction to Personal Financial Planning 1-3
Introduction to concepts of financial planning for individuals. Taught only as a special extension course as requested.

PFP 5060  Personal Financial Planning and Advising 3
(dual listing 6060)
Fundamental concepts and principles of personal financial planning for individuals. (F)

PFP 5070  Retirement Planning 3
(dual listing 6070)
Concepts and principles of retirement planning, including retirement and benefit plans, deferred compensation, and investments. (Sp)

PFP 5080  Estate Planning 3
(dual listing 6080)
Concepts and principles of estate planning for individuals, including goal identification, data gathering, forms of property ownership, documents, probate, and transfer taxes. (Sp)

PFP 5090  Personal Financial Plans 3
(dual listing 6090)
Capstone course in personal financial planning. Knowledge from other financial planning courses used to prepare comprehensive personal financial plans. Prerequisites (may be taken concurrently): ACCT 3410; BA 3460 or 4460; PFP 5060/6060, 5070/6070, 5080/6080.

PFP 6060  Personal Financial Planning and Advising 3
(dual listing 5060)
Fundamental concepts and principles of personal financial planning for individuals. (F)

PFP 6070  Retirement Planning 3
(dual listing 5070)
Concepts and principles of retirement planning, including retirement and benefit plans, deferred compensation, and investments. (Sp)

PFP 6080  Estate Planning 3
(dual listing 5080)
Concepts and principles of estate planning for individuals, including goal identification, data gathering, forms of property ownership, documents, probate, and transfer taxes. (Sp)

PFP 6090  Personal Financial Plans 3
(dual listing 5090)
Capstone course in personal financial planning. Knowledge from other financial planning courses used to prepare comprehensive personal financial plans. Prerequisites (may be taken concurrently): ACCT 3410; BA 3460 or 4460; PFP 5060/6060, 5070/6070, 5080/6080.

PFP 6560  Business Law and Professional Responsibilities 3
Examines the ethical and legal responsibilities of business professionals. Includes the application of law to business organizations, contracts, government regulation of business, and the uniform commercial code. (F,Sp)
## Philosophy (PHIL)

See Department of Languages, Philosophy, and Speech Communication, pages 364-379

### PHIL 1000 BHU Introduction to Philosophy
(formerly PHIL 1010 BHU)
3
Introduction to philosophical questions regarding truth, knowledge, reality, mind, God, morality, and meaning. Examination of various philosophical responses to these questions. (F,Sp)

### PHIL 1120 BHU Social Ethics
(formerly PHIL 2500 BHU)
3
Examination of principles and arguments underlying current debate in American law and politics. Topics may include abortion, euthanasia, capital punishment, discrimination and affirmative action, sexual harassment, freedom of expression, welfare, and duties to help the poor in other nations. (F)

### PHIL 1200 BHU Practical Logic*
3
Recognition of arguments and diagramming their logical structure. Study of valid arguments and fallacies as well as formal and informal fallacies. Evaluating categorical syllogisms using rules and Venn diagrams. Basic propositional logic. (Sp)

### PHIL 2200 QI Deductive Logic
3
Study of deductive arguments and techniques for evaluating their validity, including construction of proofs. Recognizing formal fallacies in reasoning. Symbolizing English sentences and arguments to make their meanings precise. Propositional logic: Study of quantifiers and relations. Prerequisite: MATH 1030 or STAT 1040. (F,Sp)

### PHIL 2400 BHU Ethics
3
Study of judgments concerning what is good or bad, right or wrong. How judgments are justified and related to action. Relativism, subjectivism, absolutism, freedom, and responsibility. (Sp)

### PHIL 3100 CI Ancient Philosophy**
3
Development of philosophical thought in the Ancient Greek world. Readings from the pre-Socratics, Plato, Aristotle, the Stoics, and Epicureans.

### PHIL 3110 Medieval Philosophy**
3
Neo-Platonism with stress on Plotinus, St. Augustine, and early Christian philosophy; early medieval thought; St. Thomas Aquinas and the rise of scholasticism; and philosophical thought in the Renaissance.

### PHIL 3120 CI Early Modern Philosophy
3
Philosophers and philosophical disputes in Western Europe from 1400-1750. Figures and topics may include: Bacon, Hobbes, Descartes, Locke, Hume, nominalism, empiricism, rationalism, religion, politics, and morals.

### PHIL 3150 CI Kant and His Successors
3
Philosophers and philosophical disputes in Western Europe from 1750-1900. Study of Kant, Hegel, Bentham, Mill, Marx, Schopenhauer, and Nietzsche. Examination of critical idealism, philosophy of history, utilitarianism, communism, and origins of existentialism.

### PHIL 3160 CI Contemporary Philosophy**
3
Twentieth century philosophical thought, including existentialism, logical positivism, analytic philosophy, and postmodernism, as expressed in the works of Heidegger; Husserl, Wittgenstein, Carnap, Russell, Quine, Sartre, Derrida, and others.

### PHIL 3180 DHA/CI Contemporary European Philosophy*
3
Study of twentieth-century philosophical movements originating and developing on the European continent. Movements to be considered may include: existentialism, phenomenology, hermeneutics, and post-metaphysical philosophy.

### PHIL 3500 Medical Ethics
3
Key issues in medicine, including: consent, competency, confidentiality, euthanasia, abortion, and the justification of health care. (F)

### PHIL 3510 DHA Environmental Ethics
3
Key issues in the treatment of nature, such as: the value of wilderness, animal rights, comparative views of nature, and moral issues in economic approaches to the wilderness. (Sp)

### PHIL 3520 DHA Business Ethics
3
Key issues in business, including: foreign bribery, corporate responsibility, corporate culture, ethical theories, justice, and preferential treatment.

### PHIL 3700 Philosophy of Religion
3
Problems in defining "religion" and the existence of God; the problem of evil; the immortality of the soul; religious experience; faith; alternatives to theism; religious language. (F)

### PHIL 3710 Philosophies of East Asia*
3
Study of Confucianism, Buddhism, Zen Buddhism, and Taoism. Focus on appreciating the merits of each system of thought. Emphasis on class discussion. Includes much assigned reading every week. (F)

### PHIL 3720 Philosophical Theology After Kant*
3
Explores attempts to reconstruct the reasonable basis of religion in the two centuries after the Enlightenment. (F)

### PHIL 3730 CI Philosophy of the New Testament
3
Historical and intellectual context of the development of the New Testament. Character, ideas, and historical setting of the various documents.

### PHIL 3750 Religion and Science in the Modern World*
3
Study of problems addressing the relation of religion to science in the modern world (e.g., evolution, Big Bang, origin of life). (F)

### PHIL 3800 DHA Philosophy in Literature
3
Study of philosophical concepts, problems, and issues as they have been presented and dramatized in works of literature and cinema. Discussion of issues concerning ethics, epistemology, ontology, and logic. Students read or view works from a variety of media, including novels, short stories, and films.

### PHIL 3810 DHA Aesthetics
3
Analysis of traditional theories of aesthetics and art criticism. Theories are applied to illustrative examples, including music, painting, photography, sculpture, dance, literature and cinema. (Sp)

### PHIL 4300 DHA Epistemology
3
Study of foundations of knowledge and belief systems, and related topics in epistemology, including perception, certainty, and skepticism.

### PHIL 4310 DHA Philosophy of Science
3
Study of different views of the nature of science: the classical traditions of Hempel and Popper, Kuhn's subjectivism, and Feyerabend's anarchism. Topics include confirmation, induction, scientific realism, reductionism, and the growth of scientific knowledge. (Sp)

### PHIL 4320 DHA History of Scientific Thought
3
Examination of key episodes in the history of science and associated ideas about the nature of scientific knowledge and how this knowledge may be acquired. Also taught as HIST 4320.

### PHIL 4400 Metaphysics
3
Study of fundamental problems of existence. Topics include: mind and its relation to the body, determinism and human freedom, fatalism, idealism and realism, truth, and our knowledge of the world. (F)

### PHIL 4410 DHA Philosophy of Mind
3
Beginning with the context of Cartesian mind/body dualism, a thorough examination of Cartesian privacy, privileged access, and the problem of other minds is conducted. Ancillary topics may include the mind/machine controversy and animal intelligence.

### PHIL 4420 Philosophy of Language
3
Nature and uses of language, concepts of meaning, reference, truth, syntax, semantics, pragmatics, metaphors, ambiguity, vagueness, and definition. Application in linguistics, psychology, anthropology, and literary criticism.

### PHIL 4500 Contemporary Ethical Theory
3
Careful examination of one or more topics playing a central role in current moral philosophy. Focus on work produced in philosophical literature within last twenty years.

**PHYS 2120** - Introduction to electromagnetism, optics, and quantum phenomena—including the microscopic structure of matter, with applications in biology and biotechnology. Required recitation and lab. Prerequisite: MATH 1100 or 1210, PHYS 2110.

**PHYS 2200** - Elements of Mechanics. Kinematics, Newton’s laws of motion, momentum, work and energy, and angular momentum. Required recitation and lab. Prerequisite: MATH 1210.

**PHYS 2210 QI** - General Physics—Science and Engineering I. Calculus-based introduction to Newton’s Laws of motion, momentum and energy conservation, rotations, oscillations, and thermodynamics, with applications in the physical sciences and technology. Required recitation and lab. Prerequisite: MATH 1210.

**PHYS 2400** - Introductory Topics in Physics (Topic). Explores issues in contemporary physics at an introductory level. Approval of instructor.

**PHYS 2500** - Introduction to Computer Methods in Physics. Topics include: (1) use of numerical, graphical, and symbolic manipulation software to solve physics problems; and (2) interfacing computers to instrumentation for control and data acquisition. Prerequisite: PHYS 2110 or 2210 or 2220.

**PHYS 2710** - Introductory Modern Physics. Overview of the origins, principles, and practical applications of quantum mechanics. Atomic structure and periodic table, molecular bonding, solids, electronic properties of metals and semiconductors, and superconductivity. Prerequisites: MATH 1220, PHYS 2120 or 2220.

**PHYS 3010 DSC/QI** - Space Exploration from Earth to the Solar System. Comparative introduction to the Earth and other planets in our solar system, including geological structure and atmosphere. Emphasis on space exploration methods, including spacecraft and detection instrumentation. Examines latest results of Mars missions, Jupiter and Saturn exploration, etc. Prerequisites: Completion of University Studies Quantitative Literacy (QL) and Breadth Physical Sciences (BPS) requirements.

**PHYS 3020 DSC** - Great Scientists. Lives and work of men and women responsible for scientific revolution: Maxwell (loved children), Einstein (despised authority), Curie (suffered discrimination against women), Schrodinger (fled from Hitler), Watson and Crick (the DNA story), Feynman (lock picker), Rubin (as a young girl built her own telescope), and others. Prerequisite: Fulfillment of University Studies Breadth Physical Sciences (BPS) or Breadth Life Sciences (BLS) requirement.

**PHYS 3030 DSC/QI** - The Universe. Study of properties and origin of the universe, based on Einstein’s theory of gravity. Topics include curved space-time; black holes, white holes, and worm holes; the big bang; multiple universes; and the births of stars, galaxies, heavy atoms, and planets. Prerequisite: Completion of University Studies Quantitative Literacy (QL) requirement and PHYS 1040.

**PHYS 3040 QI** - Space Weather—Dangers to the High-Tech World. Space weather can be as destructive to high technology as ordinary weather to property and crops. Examines increasing vulnerability of society to events in space resulting from changes on the Sun and from human activity. Explores how we learn about space weather with satellites, radars, lidars, and numerical models. Prerequisites: Completion of University Studies Quantitative Literacy (QL) and Breadth Physical Sciences (BPS) requirements.

**PHYS 3500** - Topics in Physics (Topic). Introduces and explores issues in contemporary physics at an intermediate undergraduate level. Focuses on phenomena and experimental methods. Prerequisite: PHYS 2710 and approval of instructor.

**PHYS 3550** - Intermediate Classical Mechanics. Newton’s laws of motion, work and energy, systems of particles, Lagrange’s and Hamilton’s equations, accelerated reference frames, central force problem, harmonic oscillations, and rigid body rotations. Prerequisites: PHYS 2110, PHYS 2210, MATH 2210, MATH 2250 (may be taken concurrently).

**PHYS 3600** - Intermediate Electromagnetism. Electrostatics, electric potential, current, magnetostatics, induction, AC circuits, Maxwell’s equations, and electromagnetic waves. Prerequisites: PHYS 2110, MATH 2210, MATH 2250 (may be taken concurrently).

**PHYS 3710** - Intermediate Modern Physics. Introduction to the principles and applications of special and general relativity. Space-time, relativistic kinematics and dynamics, gravity and geometry, black holes, Big Bang, nuclei, radioactivity, and nuclear reactions. Interconnections between modern cosmology and elementary particle physics. Prerequisites: MATH 1220, PHYS 2120 or 2220.

**PHYS 3750** - Foundations of Wave Phenomena. Survey of wave phenomena in physics, with emphasis on application of mathematical techniques to the wave equation, Schrodinger equation, and Maxwell equations. Prerequisites: PHYS 2710, MATH 2210; MATH 2250 (may be taken concurrently).

**PHYS 3870 CI** - Intermediate Laboratory I. Modern experimental techniques, data and error analysis, experimental design, and communication skills. Exercises complement upper-level theory courses, and include some experiments of historical importance. Prerequisite: PHYS 2500.

**PHYS 3880 CI** - Intermediate Laboratory II. Continuation of PHYS 3870. Prerequisite: PHYS 3870.

**PHYS 3900** - Projects in Physics. Individual study pursued under direction of staff member. Prerequisite: Approval of instructor.

**PHYS 4010 DSC/QI** - Chaos Under Control. Introduction to principles and applications of new sciences of fractals, chaos, and complexity. Importance of describing physical, geological, biological, and natural resource structures with fractals. Practical benefits of understanding and controlling erratic behavior in physical and living systems. Technological consequences of self-organized, adaptive behavior. Prerequisites: Completion of University Studies Quantitative Literacy (QL) and Breadth Physical Sciences (BPS) requirements.

**PHYS 4020 DSC/QI** - Science, Art, and Music. Explores how science constrains production and appreciation of visual and auditory art. Relevance to art of: physics of sound and light, perspective and observer in relativity and quantum mechanics, symmetry, fractals, chaos, complex adaptive behavior, and self-organization. Prerequisites: Completion of University Studies Computer and Information Literacy (CIL) examination, Quantitative Literacy (QL), and Physical or Life Sciences breadth (BPS or BLS) requirements.

**PHYS 4250 CI** - Cooperative Work Experience. Planned work experience in industry or national laboratories. A detailed plan and the purpose of the experience must have prior approval. A written report is required. Prerequisite: PHYS 2710.

**PHYS 4550** - Advanced Classical Mechanics. Lagrange’s equations, Liouville’s theorem, continu, Euler’s equations, small vibrations, and special relativity. Prerequisites: PHYS 3550, 3750.
PHYS 4600  Advanced Electromagnetism  3
Potential formulations of electrodynamics, energy and momentum, waves and boundary conditions, waves in dielectrics and conductors, guided waves, dipole radiation, and relativistic electrodynamics. Prerequisites: PHYS 3600 or ECE 3870; PHYS 3550, 3750.

PHYS 4650  Optics I (dual listing 6650)  3
Topics include mathematics of wave motion, electromagnetic theory of light, light propagation, geometrical optics, and superposition of waves. For graduate (6000-level) credit, additional reading, recitation, use of optical-design software, and/or writing will be required. Also taught as ECE 4650/6650. Prerequisite: ECE 3870.

PHYS 4680  Optics II (dual listing 6680)  3
Topics include polarization, interference, diffraction, Fourier optics, coherence theory, and the quantum nature of light. For graduate (6000-level) credit, additional reading, recitation, use of optical-design software, and/or writing will be required. Prerequisite: PHYS/ECE 4650 or PHYS/ECE 6650. Also taught as ECE 4680/6680.

PHYS 4700  Quantum Mechanics I  3
Principles of quantum mechanics, operators in Hilbert space, matrix mechanics, angular momentum, spin, perturbation theory, and applications. Prerequisites: PHYS 3550, 3600, 3750.

PHYS 4710  Quantum Mechanics II  3
Continuation of PHYS 4700. Prerequisite: PHYS 4700.

PHYS 4900 CI Research in Physics 1-3®
Research experience pursued with faculty mentor. Prior to registration, student must make arrangements with the Physics Department’s undergraduate research advisor. Prerequisite: PHYS 2710.

PHYS 5340  Methods of Theoretical Physics I  3
Physics applications of vector calculus and differential geometry, group theory, infinite series, complex analysis, differential equations, Sturm-Liouville theory, orthogonal functions, integral equations, and the calculus of variations.

PHYS 5350  Methods of Theoretical Physics II  3
Continuation of PHYS 5340. Prerequisite: PHYS 5340.

PHYS 5500 CI Intermediate Topics in Physics (Topic) 1-3®
Explores issues in contemporary physics at the advanced undergraduate and beginning graduate level.

PHYS 5800  Physics Colloquium 1®
A series of invited lectures on specialized topics in physics and related subjects. Graded Pass/Fail only.

PHYS 5870 CI Advanced Laboratory  3
Experimental experience with modern techniques such as scanning tunneling microscopy, LEED, Auger spectroscopy, and Fourier transform infrared spectroscopy. Prerequisite: PHYS 2710.

PHYS 6010  Classical Mechanics I  3
Lagrange’s equations, Hamilton’s principle, Hamilton’s equations, canonical transformations, Hamilton-Jacobi theory, central forces, noninertial reference frames, rigid body motion, small oscillations, relativistic mechanics, canonical perturbation theory, continuum mechanics. Prerequisite: PHYS 4550 or equivalent.

PHYS 6020  Classical Mechanics II  3
Continuation of PHYS 6010. Prerequisite: PHYS 6010.

PHYS 6100  Electrodynamics I  3
Fundamental laws of electrostatics and magnetostatics; dielectric media, Maxwell’s equations, time varying fields, and electromagnetic waves. Waveguides and radiation by moving charges. Prerequisite: PHYS 4600 or equivalent.

PHYS 6120  Electrodynamics II  3
Continuation of PHYS 6110. Prerequisite: PHYS 6110.

PHYS 6120  Quantum Mechanics I  3
Advanced quantum mechanics stressing the formalism of states and operators in the study of quantum dynamics, angular momentum, symmetry and group theory, perturbation theory and scattering. Prerequisite: PHYS 4710 or equivalent.

PHYS 6220  Quantum Mechanics II  3
Continuation of PHYS 6210. Prerequisite: PHYS 6210.

PHYS 6240  Space Environment and Engineering  3
Study of space environment and models used for engineering analysis. Topics include considerations for engineering in the space environment such as plasma interactions, debris, chemical reactions, radiation effects, and thermal issues. Prerequisite: MATH 2250, Corequisite: ECE 5230. Also taught as ECE 6240.

PHYS 6250  Cooperative Work Experience 1-6®
Allows students to register for credit when working in a physics-related position. Prerequisite: Permission of department head prior to enrollment.

PHYS 6310  Solar-terrestrial Physics I  3
Study of solar-terrestrial physics, including planetary magnetic fields, the interaction of the sun with planetary properties (magnetic fields and atmospheres), and an overview of ionospheric measurement techniques. Study of the upper atmosphere and the physics occurring in each of the layers and zones, including the equatorial and polar ionosphere. Prerequisite: PHYS 4600 or equivalent.

PHYS 6320  Solar-terrestrial Physics II  3
Continuation of PHYS 6310. Prerequisite: PHYS 6310.

PHYS 6330  Plasma Physics I  3
Characteristics of the plasma state and plasma generation; velocity distribution functions, collisions and Boltzmann’s equation; wave modes in a plasma; transport theory; plasma devices. Prerequisite: PHYS 4600 or equivalent.

PHYS 6340  Plasma Physics II  3
Continuation of PHYS 6330. Prerequisite: PHYS 6330.

PHYS 6410  Statistical Mechanics I  3

PHYS 6420  Statistical Mechanics II  3
Continuation of PHYS 6410. Prerequisite: PHYS 6410.

PHYS 6530  Solid State Physics I  3
Development of the modern theory of the solid state. Emphasis placed on understanding the bulk properties of the solids, including crystal structure, cohesive properties, electronic structure, and lattice dynamics. Explores response to added stimuli, such as electric, magnetic, and optical fields. Prerequisites: PHYS 4600 and 4710; PHYS 6410 (can be taken concurrently).

PHYS 6540  Solid State Physics II  3
Continuation of PHYS 6530. Prerequisite: PHYS 6530.

PHYS 6550  Physics of Materials I  3
Application of microscopic (quantum) and macroscopic (classical) physics to study materials properties (e.g., bonding, structure, atomic dynamics, electrical, magnetic, thermal, optical), characterization methods, and a survey of materials. Prerequisites: PHYS 3700, 4710.

PHYS 6560  Physics of Materials II  3
Continuation of PHYS 6550. Prerequisite: PHYS 6550.

PHYS 6600  Optics I (dual listing 4650)  3
Topics include mathematics of wave motion, electromagnetic theory of light, light propagation, geometrical optics, and superposition of waves. For graduate (6000-level) credit, additional reading, recitation, use of optical-design software, and/or writing will be required. Also taught as ECE 6650/4650. Prerequisite: ECE 3870.

PHYS 6680  Optics II (dual listing 4680)  3
Topics include polarization, interference, diffraction, Fourier optics, coherence...
Course Descriptions

theory, and the quantum nature of light. For graduate (6000-level) credit, additional reading, recitation, use of optical-design software, and/or writing will be required. Prerequisite: PHYS/ECE 4650 or PHYS/ECE 6650. Also taught as ECE 6690/6800.

**PHYS 6910** Relativity I 3
Foundations of spacetime physics. Survey of the basics of special and general relativity, including kinematics, mechanics, and electrodynamics in flat spacetime, the description of curved spacetime, and the Einstein equations. Exact solutions, applications, tests, and the mathematical techniques of general relativity. Prerequisites: PHYS 6020, 6120.

**PHYS 6920** Relativity II 3
Continuation of PHYS 6910. Prerequisite: PHYS 6910.

**PHYS 6930** Quantum Field Theory I 3
Detailed study of the relativistic quantum description of scalar, spinor, and vector fields in spacetime. Topics include gauge theories, canonical and path integral quantization, and interactions.

**PHYS 6940** Quantum Field Theory II 3
Continuation of PHYS 6930. Prerequisite: PHYS 6930.

**PHYS 6970** Thesis Research 1-10
Advanced research under guidance of one or more faculty members. Graded Pass/Fail only.

**PHYS 6990** Continuing Graduate Advisement 1-9
Graded Pass/Fail only.

**PHYS 7210** Spacecraft Instrumentation 3
Theory, engineering, and data reduction techniques of spacecraft instrumentation for space science and spacecraft systems. Prerequisite: PHYS/ECE 6240. Also taught as ECE 7210.

**PHYS 7500** Advanced Topics in Physics (Topic) 3
Explores issues in contemporary physics at the advanced graduate level.

**PHYS 7510** Seminar 1-3
Graded Pass/Fail only.

**PHYS 7970** Dissertation Research 1-15
Graded Pass/Fail only.

**PHYS 7990** Continuing Graduate Advisement 1-9
Graded Pass/Fail only.

Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

**Plant Science (PLSC)**

See Department of Plants, Soils, and Biometeorology, pages 464-477

**PLSC 2100** BLS Introduction to Horticulture 3
Introduction to production of nursery, greenhouse, fruit, and vegetable crops. Explores residential and commercial landscape construction and management. Students also learn about interior plants, arboriculture, turf science, landscape plant materials, and home gardening. (F)

**PLSC 2200** Pest Management Principles and Practices 3
Overview of pest control considerations, procedures, and principles. Topics include integrated pest management, organic and chemical pest control, environmental considerations, safety, life cycles of pests, and commercial pesticide licensing. (Sp)

**PLSC 2250** Occupational Experience in Agronomy and Horticulture 1-4
Provides credit for on-the-job training in jobs related to plants or soils. (F,Sp,Su)

**PLSC 2600** Annual and Perennial Plant Materials 1.5
Identification, culture, and utilization of herbaceous ornamental plants in the landscape, including annual and perennial flowering plants, herbaceous ground covers, ornamental grasses, and herbs. Taught during first half of semester. (F)

**PLSC 2610** Indoor Plants and Interiorscaping 1.5
Identification, culture, use, and maintenance of indoor foliage and flowering plants used in the interior plantscaping industry. Taught during second half of semester. (F)

**PLSC 2620** Woody Plant Materials: Trees and Shrubs for the Landscape 3
Identification, culture, and utilization of woody ornamental plants in the landscape, including shade trees, flowering trees and shrubs, hedge plants, and vines. Review of native plants commonly used in the landscape. (F)

**PLSC 2650** Identification and Selection of Plants in Production Agriculture 1
Identification of plants important in horticulture/agronomy and the morphological features making them useful for various agricultural purposes. (F)

**PLSC 2900** Special Problems in Plant Science 1-4
Student-selected practical problems in horticulture and/or agronomy. (F,Sp,Su)

**PLSC 3010** Basic Flower Arranging 2
Principles of basic flower design using fresh, dried, and artificial flowers. Proper care of cut flowers and foliage. Basic plant physiology behind such principles. Lab fee required. Offered through Distance Education only. (F)

**PLSC 3020** Floral Crops Judging and Contemporary Design 2
Judging of potted ornamental plants and cut flowers for quality. Contemporary floral design and floral art. Prerequisite: PLSC 3010 or professional design experience. Lab fee required. Offered through Distance Education only. (Sp)

**PLSC 3050** Greenhouse Management and Crop Production 4
Design and management of commercial greenhouse facilities. Production requirements of primary greenhouse crops. (Sp)

**PLSC 3200** DSC Horticultural Science 3
Methods, technology, and scientific basis of landscape, fruit, and vegetable gardening in the arid west. Interaction of gardening with the urban environment. Not currently being taught. Contact department for further information.

**PLSC 3300** Residential Landscapes 3
Funcional and aesthetic relationships of plants and structures in the landscape in connection with installation considerations. Prerequisite: PLSC 2620. Recommended: PLSC 2620. (Sp)

**PLSC 3400** Landscape Management Principles and Practices 3
Principles and practices of landscape management, including plant site analysis, pruning, soil and irrigation management, pest management, equipment considerations, cost estimating, and sustainability. Prerequisites: PLSC 2600, 2620. (F)

**PLSC 3500** The Structure and Function of Economic Crop Plants 3
Environmental effects on plant structure and function. Control of plant development for enhanced production of marketable goods. Introduction to principles using examples from horticulture and agronomy. Applications in these fields emphasized. Prerequisites: Integrated Science or comparable breadth course, BIOL 1010 or 1610. (Sp)

**PLSC 3700** Plant Propagation 4
Propagation of plants by sexual and asexual means. Covers fundamental physiology of propagation, as well as cultural practices and techniques used in crop production. Recommended: BIOL 1610. (F)

**PLSC 3800** Turfgrass Management 3
Fundamentals of turfgrass science; species adaptation, identification, and cultural requirements; turfgrass growth and development; establishment; primary cultural practices (fertilization, irrigation, mowing); secondary cultural practices; pest management; integrated management planning for turfgrass systems. Prerequisite: BIOL 1010 or 1610. (F)

<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PLSC 4100</td>
<td>Landscape Water Conservation</td>
<td>2</td>
<td>Explains why water conservation is important, and how water can be conserved through precision irrigation and conversion to low-water-use landscapes. Not currently being taught. Contact department for further information.</td>
</tr>
<tr>
<td>PLSC 4280</td>
<td>Field Crops</td>
<td>3</td>
<td>Economic importance, use, distribution, origin, history, classification, identification, botanical nomenclature, marketing, phytosanitary, education, grading, diseases, insects, commercial production, and improvement of cereal, root, and oilseed crops. Two lectures, one lab per week. (F odd)</td>
</tr>
<tr>
<td>PLSC 4300</td>
<td>World Food Crops and Cropping Systems: The Plants That Feed Us</td>
<td>3</td>
<td>Climatic, geographic, and management requirements of the world’s plants that provide food for humans, including botanical relationships. Systems used to produce these crops and processes for turning them into food. Prerequisite: Integrated Science or comparable breadth course. (F even)</td>
</tr>
<tr>
<td>PLSC 4320</td>
<td>Forage Production and Pasture Ecology</td>
<td>3</td>
<td>Cultivation and management of legumes and grasses used throughout the world for grazing, stored seed, soil improvement, and conservation. Forage plant growth and development, nutrient and water utilization, and responses to environmental stress. Prerequisite: Integrated Science or comparable breadth course. (F)</td>
</tr>
<tr>
<td>PLSC 4400</td>
<td>Modern Vegetable Production</td>
<td>3</td>
<td>Principles and practices underlying scientific vegetable culture. Discussion of production of important vegetables, focusing on the physiological processes influencing their culture. Explores crop performance in research and commercial applications. Prerequisite: BIOL 1010 or 1610. (F)</td>
</tr>
<tr>
<td>PLSC 4500</td>
<td>Fruit Production</td>
<td>4</td>
<td>Cultivars, physiology, anatomy, propagation, sites, soils, climate, culture, irrigation, fertilizers, insects, diseases, integrated management, plant and fruit growth and development, harvesting, storage, pruning, orchard architecture, environmental protection, and economics for both tree and small fruits. Prerequisite: BIOL 1010 or 1610. (Sp even)</td>
</tr>
<tr>
<td>PLSC 4600</td>
<td>DSC/QI Cereal Science</td>
<td>3</td>
<td>Introduction to principles involved in cereal chemistry and processing. Covers starch chemistry, dry milling, wet milling, decortication, malting, and extrusion. Processing of all major cereals also covered. Prerequisite: MATH 1030 or STAT 1040 or completion of University Studies Quantitative Literacy (QL) requirement. (Sp even)</td>
</tr>
<tr>
<td>PLSC 4800</td>
<td>Professional Turfgrass Management</td>
<td>2</td>
<td>Fertilization, irrigation, and cultivation practices for managed landscapes. Construction issues, including compaction, soil modification, and specialized construction practices for golf courses and sports turf. Prerequisites: SOIL 3000, PLSC 3800. (Sp)</td>
</tr>
<tr>
<td>PLSC 5100</td>
<td>Landscape Irrigation Management</td>
<td>3</td>
<td>Explores how principles of evapotranspiration, soil and plant properties, and urban landscape irrigation systems can be applied for proper irrigation scheduling. Evaluating and analyzing landscape water demand. (Sp)</td>
</tr>
<tr>
<td>PLSC 5200</td>
<td>Crop Physiology</td>
<td>2</td>
<td>Quantitatively analyzes the relationship between physiological processes and growth of whole plants. Energy balance and water use efficiency. Light interception and canopy geometry. Canopy photosynthesis and respiration. Carbon partitioning and source/sink relationships. Prerequisites: BIOL 4400, MATH 1050, or consent of instructor. (Sp)</td>
</tr>
<tr>
<td>PLSC 5210</td>
<td>Crop Physiology Laboratory</td>
<td>1</td>
<td>Measurement and analysis of physiological processes that result in whole plant growth. Includes an individual lab project. Take concurrently with PLSC 5200 or 6200. (Sp)</td>
</tr>
<tr>
<td>PLSC 5300</td>
<td>Principles of Cytogenetics</td>
<td>3</td>
<td>Examination and analysis of variation in chromosome structure, behavior, and number. Includes discussions of developmental and evolutionary effects of this variation, and practical applications in plant and animal genetics. Prerequisite: BIOL 3060. (Sp odd)</td>
</tr>
<tr>
<td>PLSC 5400</td>
<td>Low Water Landscaping</td>
<td>3</td>
<td>Examines and ecosystems, emphasizing the Intermountain West, and recreating such ecosystems in a range of amenity landscapes. Also covers procurement, propagation, establishment, and maintenance of plants appropriate for low water landscapes. Also taught as LAEP 5400/6400. (F)</td>
</tr>
<tr>
<td>PLSC 5420</td>
<td>CI Forest and Shade Tree Pathology</td>
<td>3</td>
<td>Nature, cause, and management of forest diseases. Also taught as BIOL 5420 and WILD 5420. (Sp)</td>
</tr>
<tr>
<td>PLSC 5430</td>
<td>Plant Nutrition</td>
<td>2</td>
<td>Mechanisms of nutrient acquisition, rhizosphere interactions, root morphology and distribution, short- and long-distance transport, nitrogen fixation, and biochemical function of essential and beneficial elements. (F odd)</td>
</tr>
<tr>
<td>PLSC 5440</td>
<td>Plant Molecular, Cellular, and Developmental Biology I</td>
<td>3</td>
<td>Examines background and recent advances. Students analyze and discuss structure, genome, molecular development, and photosynthesis topics from a research perspective. Prerequisites: BIOL 3060, 5210; CHEM 3700 or 5710. Also taught as BIOL 5440/6440. (Sp even)</td>
</tr>

<td>Plant Molecular, Cellular, and Developmental Biology II</td>
<td>3</td>
<td>Examines background and recent advances. Students analyze and discuss cell wall, growth regulator, and environmental response topics from a research perspective. Prerequisites: BIOL 3060, 5210, CHEM 3700 or 5710. Also taught as BIOL 5450/6450. (Sp odd)</td>
</tr>
<tr>
<td>PLSC 5550</td>
<td>Weed Biology and Control</td>
<td>4</td>
<td>Management strategies for undesirable plant species in native and agroecosystems. Interference and allelopathy, undesirable plant invasion and spread, noxious weed eradication principles and practices, integrated plant management strategies, herbicide interactions with weeds and crops, and economics of management emphases. (F)</td>
</tr>
<tr>
<td>PLSC 5600</td>
<td>Plant Water Relations</td>
<td>2</td>
<td>Explores basic concepts such as the soil-plant-atmosphere continuum. Explains how water affects the physiological processes that control the quantity and quality of growth. Includes discussion of crop physiology and plant physiology. (F)</td>
</tr>
<tr>
<td>PLSC 5650</td>
<td>Urban/Community Forestry</td>
<td>3</td>
<td>Social, biological, and administrative aspects of managing urban/community forests, including field and classroom exercises and a management planning project. Also taught as WILD 5650. (Sp)</td>
</tr>
<tr>
<td>PLSC 5700</td>
<td>Principles of Plant Breeding</td>
<td>3</td>
<td>Principles of plant breeding. Breeding techniques for self-pollinated, cross- pollinated, and asexually reproducing crops. Real-life breeding problems solved, showing that resource identification and allocation are the critical points in developing a successful program. Prerequisite: BIOL 3060. (Sp odd)</td>
</tr>
<tr>
<td>PLSC 5750</td>
<td>Crop Biotechnology</td>
<td>2</td>
<td>Genetic and cellular approaches to crop improvement. Emphasizes cell culture, transformation, markers, marker-assisted selection, mapping simple and quantitatively inherited traits, fine mapping, gene cloning, mutagenesis, expression profiling, and bioinformatics. Prerequisite: BIOL 3060. (Sp odd)</td>
</tr>
<tr>
<td>PLSC 5760</td>
<td>Crop Ecology</td>
<td>2</td>
<td>Features of agroecosystems compared with natural ecosystems; input of energy and materials to manipulate agroecosystems and produce maximum, sustained quality and yield of agricultural products. Prerequisites: BIOL 4400, PLSC 5200/6200, or instructor’s consent. Will not be taught Spring 2006. Contact department for further information. (Sp)</td>
</tr>
<tr>
<td>PLSC 6100</td>
<td>Landscape Irrigation Management</td>
<td>3</td>
<td>Explores how principles of evapotranspiration, soil and plant properties, and urban landscape sprinkler irrigation systems can be combined for proper irrigation scheduling. Evaluating and analyzing landscape water demand. (Sp)</td>
</tr>
</tbody>
</table>
Course Descriptions

PLSC 6200  Crop Physiology
(dual listing 5200) 2
The relationship between physiological processes and growth of whole plants. Energy balance and water use efficiency. Light interception and canopy geometry. Canopy photosynthesis and respiration. Carbon partitioning and source/sink relationships. Prerequisites: BIOL 4400, MATH 1050, or consent of instructor. (Sp)

PLSC 6210  Crop Physiology Laboratory
(dual listing 5210) 1
Measurement and analysis of physiological processes that result in whole plant growth. Includes an individual lab project. Take concurrently with PLSC 6200 or 5200. (Sp)

PLSC 6220  Professional Experience in Water Efficient Landscaping
6
Internship component of water efficient landscaping master’s program. Summer employment with water purveyors, consulting firms, and businesses involved in landscape irrigation. (Su)

PLSC 6230  Readings in Water Conservation
1
Background topics in water development and policy in the West. Current topics on various aspects of water conservation in urban landscapes. (Sp even)

PLSC 6240  Water Efficient Landscaping Seminar
2
Students develop skills in public speaking by presenting their summer internship experience to the Plants, Soils, and Biometeorology faculty. Students also work on a culminating academic endeavor for the program. (F)

PLSC 6400  Low Water Landscaping
(dual listing 5400) 3
Examines arid ecosystems, emphasizing the Intermountain West, and recreating such ecosystems in a range of amenity landscapes. Also covers procurement, propagation, establishment, and maintenance of plants appropriate for low water landscapes. Also taught as LAEP 6400/5400. (F)

PLSC 6430  Plant Nutrition
(dual listing 5430) 2
Mechanisms of nutrient acquisition, rhizosphere interactions, root morphology and distribution, short- and long-distance transport, nitrogen fixation, and biochemical function of essential and beneficial elements. (F odd)

PLSC 6440  Plant Molecular, Cellular, and Developmental Biology I
(dual listing 5440) 3
Examines background and recent advances. Students analyze and discuss structure, genome, molecular development, and photosynthesis topics from a research perspective. Prerequisites: BIOL 3060, 5210; CHEM 3700 or 5710. Also taught as BIOL 6440/5440. (Sp even)

PLSC 6450  Plant Molecular, Cellular, and Developmental Biology II
(dual listing 5450) 3
Examines background and recent advances. Students analyze and discuss cell wall, growth regulator, and environmental response topics from research perspective. Prerequisites: BIOL 3060, 5210, CHEM 3700 or 5710. Also taught as BIOL 6450/5450. (Sp odd)

PLSC 6550  Weed Biology and Control
(dual listing 5550) 4
Management strategies for undesirable plant species in native and agroecosystems. Interference and allelopathy, undesirable plant invasion and spread, noxious weed eradication principles and practices, integrated management strategies, herbicide interactions with weeds and crops, and economics of management emphases. (F)

PLSC 6570  Herbicide Physiology and Mode of Action
3
Entrance, movement, and metabolism of major herbicides; and a critical study of the physiological processes affected by them. Prerequisites: BIOL 4400, PLSC 6550/5550 or instructor’s consent. (Sp odd)

PLSC 6600  Plant Water Relations
(dual listing 5600) 2
Explores basic concepts such as the soil-plant-atmosphere continuum. Explains how water affects the physiological processes that control the quantity and quality of growth. Includes discussion of crop physiology and plant physiology. (F)

---

Political Science (POLS)

See Department of Political Science, pages 478-483

POLS 1100  BAI United States Government and Politics 3
U.S. Constitution, political parties and elections, interest groups, Congress, president, bureaucracy, courts, and civil rights and liberties. This course meets the Americanization requirement. (F,Sp)

POLS 2100  Introduction to International Politics 3
Analysis of the nation-state system as well as interdependence of the global community. (F,Sp)

POLS 2200  BSS Comparative Politics 3
Comparisons of differences in political culture, institutions, and processes, including authoritarian and democratic systems, violence and corruption, political development, and public policy. (F,Sp)

POLS 2300  Introduction to Political Theory 3
A survey course covering ancient and modern political theory. (F,Sp)

POLS 3000  QI Introduction to Political Research 3
Methodology, methods, and approaches used to study and analyze political events and relationships, including the use of library resources. Prerequisite: STAT 1040 or MATH 1030. (F,Sp)

POLS 3100  Global Issues* 3
The origins and consequences of conflict and cooperation in an interdependent global community are examined in order to analyze how transnational, as well as competing national, interests and institutions affect economic, political, and environmental choices and outcomes. (F)

POLS 3110  DSS Parties and Elections** 3
Political parties, campaigns, and elections. (Sp)

POLS 3120  DSS Law and Politics 3
Examines history, processes, and theories underlying American law and politics. Makes selective comparison of the American legal system with other legal systems. (F)

POLS 3130  DSS United States Legislative Politics 3
Legislative process. (Sp)

POLS 3140  DSS The Presidency* 3
Examines the origins, purposes, and scope of the executive power in the American constitutional system. (F)

POLS 3150  State and Local Government 3
Includes state and local politics, in addition to metro-urban politics. (Sp)

POLS 3160  Practicing American National Government 3
Includes survey of legislative, executive, and judicial governing. Offers academic basis for Washington, DC experience. (F,Sp,Su)

POLS 3170  Law and Economics 3
Explains legal and political rules, the organization of government, and other institutional processes. Uses standard microeconomic tools and concepts, such as scarcity, choice, preferences, incentives, and supply and demand. Prerequisite: POLS 1100. Also taught as ECON 3170. (F)

POLS 3180  Introduction to Public Administration 3
Overviews management of United States governmental affairs. Helps students understand how the government is structured to accomplish the execution and implementation of public policy. Prerequisite: POLS 1100. (F)

POLS 3190  DSS Gender, Power, and Politics* 3
Examines the question of gender inequality in politics, focusing on contemporary political issues cross-culturally and in different political systems. (F)

POLS 3210  DSS Western European Government and Politics** 3
Britain, France, Germany, Scandinavia, and the European Union. (F)

POLS 3220  DSS Russian and East European Government and Politics 3
(F)

</thead>
<tbody>
<tr>
<td>POLS 3230</td>
<td>Middle Eastern Government and Politics**</td>
<td>3</td>
<td>General overview of political cultures and political developments in the Middle East. (F)</td>
</tr>
<tr>
<td>POLS 3250</td>
<td>DSS Chinese Government and Politics</td>
<td>3</td>
<td>(F)</td>
</tr>
<tr>
<td>POLS 3270</td>
<td>DSS Latin American Government and Politics</td>
<td>3</td>
<td>Survey of most of the governments and politics of Latin America, emphasizing events, policies, and governmental actions of the past decade. (F)</td>
</tr>
<tr>
<td>POLS 3310</td>
<td>DSS American Political Thought</td>
<td>3</td>
<td>Survey of American political thought from colonial times to the present. (F)</td>
</tr>
<tr>
<td>POLS 3320</td>
<td>The Foundations of American Constitutionalism</td>
<td>3</td>
<td>Introduces students to debate over constitutions, constitutionalism, and constitution-making which occurred during the period (roughly) from the Revolution to the election of 1800.</td>
</tr>
<tr>
<td>POLS 3400</td>
<td>DSS United States Foreign Policy</td>
<td>3</td>
<td>Formulation, execution, and impact of United States foreign policy, (F,Sp)³</td>
</tr>
<tr>
<td>POLS 3430</td>
<td>Political Geography</td>
<td>3</td>
<td>The relationship between earth and state. World political phenomena studied from a geographic point of view, including international boundaries, territorial seas, and landlocked states. Also taught as GEOG 3430. (Sp)</td>
</tr>
<tr>
<td>POLS 3810</td>
<td>DSS Introduction to Public Policy</td>
<td>3</td>
<td>Examines different approaches to the study of public policy and different value dimensions in the design of policies. (F)</td>
</tr>
<tr>
<td>POLS 4000</td>
<td>Political Analysis</td>
<td>3</td>
<td>Political data, quantitative and analytical techniques. Prerequisite for majors: POLS 3000. (F)¹</td>
</tr>
<tr>
<td>POLS 4120</td>
<td>American Constitutional Law</td>
<td>3</td>
<td>Analyzes the separation of powers, checks and balances, federalism, the Bill of Rights, and other constitutional amendments. (F,Sp)</td>
</tr>
<tr>
<td>POLS 4130</td>
<td>Constitutional Theory</td>
<td>3</td>
<td>Introduces students to constitutional theory, with particular emphasis on American constitutional theory. Prerequisite: POLS 1100. (Sp)</td>
</tr>
<tr>
<td>POLS 4140</td>
<td>Political Organizations</td>
<td>3</td>
<td>Focuses on formal and informal constitutional rules, examining how different sets of rule structures impact the collective decisions of individuals in society and how individuals can influence or shape the rules structuring their lives. Prerequisite: POLS 1100.</td>
</tr>
<tr>
<td>POLS 4210</td>
<td>European Union Politics**</td>
<td>3</td>
<td>Explores creation and ongoing development of the European Union. Examines governing institutions, and internal and external politics of the European Union across a number of issues areas. (Sp)</td>
</tr>
<tr>
<td>POLS 4220</td>
<td>CI Ethnic Conflict and Cooperation</td>
<td>3</td>
<td>Examines origins of ethnic groups and the causes of ethnic conflicts, as well as different strategies for preventing or resolving such conflict. Explores conditions facilitating interethnic cooperation, the more common form of ethnic group interaction. (Sp)³</td>
</tr>
<tr>
<td>POLS 4230</td>
<td>Issues in Middle East Politics**</td>
<td>3</td>
<td>Contemporary Middle Eastern political movements, regional conflicts, and state-level political change. (Sp)</td>
</tr>
<tr>
<td>POLS 4260</td>
<td>Southeast Asian Government and Politics*</td>
<td>3</td>
<td>(Sp)</td>
</tr>
<tr>
<td>POLS 4280</td>
<td>Politics and War*</td>
<td>3</td>
<td>Examines causes and implications of war. Study of wars from general to limited, including case studies such as the Vietnam War. (Sp)</td>
</tr>
<tr>
<td>POLS 4310</td>
<td>CI History of Political Thought I</td>
<td>3</td>
<td>Issues and thinkers in ancient and medieval political thought. (Sp)</td>
</tr>
<tr>
<td>POLS 4320</td>
<td>DSS History of Political Thought II*</td>
<td>3</td>
<td>Issues and thinkers in modern and contemporary political thought. (Sp)</td>
</tr>
<tr>
<td>POLS 4330</td>
<td>Political Theory and Literature</td>
<td>3</td>
<td>Utilizes works from the field of literature, partly in order to discuss issues in politics and political philosophy, and partly as examples of political thought at its best. (F,Sp)</td>
</tr>
<tr>
<td>POLS 4410</td>
<td>Global Negotiations*</td>
<td>3</td>
<td>Creates an awareness of international issues and other cultures. Utilizes a computer simulation program in which negotiating teams of students from around the world are linked in a negotiation simulation. (Sp)</td>
</tr>
<tr>
<td>POLS 4450</td>
<td>CI United States and Latin America</td>
<td>3</td>
<td>Study and analysis of foreign relations of Latin American nations among themselves and with the rest of the world. (Sp)</td>
</tr>
<tr>
<td>POLS 4460</td>
<td>National Security Policy*</td>
<td>3</td>
<td>How intelligence systems function, fit within the policymaking systems of free societies, and are managed and controlled. (Sp)</td>
</tr>
<tr>
<td>POLS 4470</td>
<td>Foreign Policy in the Pacific*</td>
<td>3</td>
<td>Analysis of contemporary foreign policies of major countries surrounding the North Pacific. (Sp)</td>
</tr>
<tr>
<td>POLS 4800</td>
<td>The Supreme Court and American Constitutional History</td>
<td>3</td>
<td>Examines many of the major arguments made about the Constitution, which were presented before the Supreme Court of the United States. Also taught as HIST 4800.</td>
</tr>
<tr>
<td>POLS 4810</td>
<td>Politics and Public Policy</td>
<td>3</td>
<td>Explains public policies as rational expressions of political self-interest and explores the relationship between self-interest and values such as “equity” and “efficiency” in policy. (F)</td>
</tr>
<tr>
<td>POLS 4820</td>
<td>DSS Natural Resources and Environmental Policy: Environmental Quality**</td>
<td>3</td>
<td>Causes of environmental and natural resources problems and evaluation of political and private responses to them. Study of economics and politics applied to the environment. Production, protection, and allocation of scarce resources by markets and political systems. (Sp)</td>
</tr>
<tr>
<td>POLS 4830</td>
<td>Environmental Quality*</td>
<td>3</td>
<td>(F)</td>
</tr>
<tr>
<td>POLS 4840</td>
<td>Special Topics</td>
<td>1-5</td>
<td>Credit arranged. Instructor’s permission required. (F,Sp)</td>
</tr>
<tr>
<td>POLS 4910</td>
<td>Readings and Conference</td>
<td>1-5</td>
<td>Individually directed study in subjects of special interest to students. Credit arranged. Instructor permission required. (F,Sp,Su)</td>
</tr>
<tr>
<td>POLS 4990</td>
<td>CI Senior Research Seminar</td>
<td>3</td>
<td>Introduces students to the research process by having them complete a major research project in the topic area of the particular professor. (F,Sp)</td>
</tr>
<tr>
<td>POLS 5110</td>
<td>Social Policy**</td>
<td>3</td>
<td>Examines health, education, and welfare policies in U.S. contexts and in comparative context. (F)</td>
</tr>
<tr>
<td>POLS 5120</td>
<td>Economics of Russia and Eastern Europe, 9th Century to 21st Century</td>
<td>3</td>
<td>Development of the economics of Russia and Eastern Europe from earliest times to the present, emphasizing the interaction between economic forces and policies of the state. Prerequisite: ECON 2010. Also taught as ECON 5120. (F)</td>
</tr>
<tr>
<td>POLS 5130</td>
<td>Law and Policy</td>
<td>3</td>
<td>Analyzes the relationship between law and the formation and implementation of policy. (Sp)</td>
</tr>
<tr>
<td>POLS 5140</td>
<td>Law, Politics, and War</td>
<td>3</td>
<td>Examines relationship between law, politics, and war, with particular emphasis on the American experience since 1787. (F)</td>
</tr>
<tr>
<td>POLS 5180</td>
<td>Natural Resource Policy**</td>
<td>3</td>
<td>Political and economic theory applied to the analysis of natural resource allocation conflicts and U.S. policies enacted to resolve such conflicts. (Sp)</td>
</tr>
<tr>
<td>POLS 5200</td>
<td>Global Environment</td>
<td>3</td>
<td>Examines different strategies for resolving global resource and environmental problems. This course is not currently being offered. For information about when it may be offered, contact the department.</td>
</tr>

</table>
## Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLS 5210</td>
<td>Comparative Political Change/Development*</td>
<td>3</td>
<td>Emphasis on approaches and theories in the field of comparative politics, with a focus on political change/development. (F)</td>
</tr>
<tr>
<td>POLS 5230</td>
<td>Development in the Middle East*</td>
<td>3</td>
<td>Study of Middle Eastern regimes, political cultures, and political developments. (Sp)</td>
</tr>
<tr>
<td>POLS 5270</td>
<td>Latin American Politics and Development</td>
<td>3</td>
<td>Focuses on special contemporary issues of selected Latin American nations, such as democratization, the role of the military, and elections. (Sp)**</td>
</tr>
<tr>
<td>POLS 5290</td>
<td>Development in Europe</td>
<td>3</td>
<td>Emphasizes political and economic development in Europe. (Sp)**</td>
</tr>
<tr>
<td>POLS 5350</td>
<td>DSS Evolution, Conflict, and Cooperation*</td>
<td>3</td>
<td>Intensively examines human cooperation as a fundamental problem of development and human conflict as the major obstacle to development. (Sp)</td>
</tr>
<tr>
<td>POLS 5440</td>
<td>DSS Gender and World Politics**</td>
<td>3</td>
<td>Examines the role gender inequality plays in the construction of international relations, using a variety of feminist approaches. Central theme of gendered critique is global security, defined in terms of economic, ecological, political, and military dimensions. (Sp)</td>
</tr>
<tr>
<td>POLS 5480</td>
<td>International Trade Policy**</td>
<td>3</td>
<td>Examines governance and politics of international trade relations, focusing in particular on cooperation, conflict, and dispute resolution in the GATT/WTO, European community, NAFTA, and Asian cooperative regimes. (Sp)</td>
</tr>
<tr>
<td>POLS 5910</td>
<td>Campaign Internship</td>
<td>1-12</td>
<td>A semester campaign internship. Instructor approval required. (F,Sp,Su)</td>
</tr>
<tr>
<td>POLS 5920</td>
<td>Washington Internship</td>
<td>1-12</td>
<td>A semester congressional, administrative, or legal internship in Washington, D.C. Graded Pass/Fail only. Instructor approval required. (F,Sp,Su)</td>
</tr>
<tr>
<td>POLS 5930</td>
<td>State Government Internship</td>
<td>1-12</td>
<td>A semester legislative, lobbying, or administrative internship in the state government of Utah or those of any other state government. Graded Pass/Fail only. Instructor approval required. (F,Sp,Su)</td>
</tr>
<tr>
<td>POLS 5940</td>
<td>Administrative Internship</td>
<td>1-12</td>
<td>A semester administrative internship at the local or state level. Graded Pass/Fail only. Instructor approval required. (F,Sp,Su)</td>
</tr>
<tr>
<td>POLS 6010</td>
<td>Research Design</td>
<td>3</td>
<td>A graduate survey of the philosophy and methods of political analysis. Topics ranging from the methodology of inquiry to elementary statistical methods will be covered. (F)</td>
</tr>
<tr>
<td>POLS 6020</td>
<td>Public Policy Analysis</td>
<td>3</td>
<td>Examines and reviews leading theories of policy analysis and the policy-making process at an advanced level. (Sp)</td>
</tr>
<tr>
<td>POLS 6030</td>
<td>Political Theory, Political Economy, and Capitalism</td>
<td>3</td>
<td>Provides an introduction to the study of political economy by considering the connections among political theory, political economy, and capitalism. This course is not currently being offered. For information about when it may be offered, contact the department.</td>
</tr>
<tr>
<td>POLS 6040</td>
<td>Public Choice</td>
<td>3</td>
<td>Introduction to applying the microeconomic theory of markets to political processes. This course is not currently being offered. For information about when it may be offered, contact the department.</td>
</tr>
<tr>
<td>POLS 6100</td>
<td>Introduction to Public Administration</td>
<td>3</td>
<td>Introduction to issues of public and nonprofit management. Provides overview of macro and micro forces influencing public and nonprofit management.</td>
</tr>
<tr>
<td>POLS 6110</td>
<td>Budgeting and Finance</td>
<td>3</td>
<td>Surveys all major activities concerning allocation, investment, and control of public funds, as well as budgeting and revenues in context of fiscal policy making. (Alt Sp)</td>
</tr>
<tr>
<td>POLS 6120</td>
<td>Program Assessment and Evaluation</td>
<td>3</td>
<td>Practical guidelines for conducting evaluation studies. Discussion of performance measurement, social indicators, quantitative and qualitative methods, and experimental and quasi-experimental designs as used in applied policy and program research. (Alt F)</td>
</tr>
<tr>
<td>POLS 6130</td>
<td>Law and Administration</td>
<td>3</td>
<td>Exploration and analysis of constitutional and legal basis in which American Public Administration is set, including separation of powers, checks and balances, delegation of discretionary authority, and common law and equity. (Alt Su)</td>
</tr>
<tr>
<td>POLS 6140</td>
<td>Leadership in Public Organizations</td>
<td>3</td>
<td>Analysis of leadership behavior and managerial activities. Examination of major theories of leadership and motivation, including leadership vs. management, leadership qualities and characteristics, and leadership skills. (Alt Su)</td>
</tr>
<tr>
<td>POLS 6210</td>
<td>Conflict and Security</td>
<td>3</td>
<td>Explores the many causes of conflict at different levels. Identifies the means by which resolution can be achieved, as well as the challenges and barriers associated with such efforts. (Sp)</td>
</tr>
<tr>
<td>POLS 6220</td>
<td>International Relations Theory</td>
<td>3</td>
<td>Reading seminar on theory and method in the interplay of politics and economics in international relations. This course is not currently being offered. For information about when it may be offered, contact the department.</td>
</tr>
<tr>
<td>POLS 6230</td>
<td>Terrorism and Counter-Terrorism**</td>
<td>3</td>
<td>Explores the history, causes, and consequences of terrorism, as well as its impact on the global arena. Teaches students why understanding of terrorism is crucial, in order to allow effective, intelligent responses. (Sp)</td>
</tr>
<tr>
<td>POLS 6240</td>
<td>Democratic Theories and Practice</td>
<td>3</td>
<td>Explores the many different perspectives and theories on the concept of democracy, ranging from the 18th Century to writings of the 21st Century. (F)</td>
</tr>
<tr>
<td>POLS 6250</td>
<td>Theories of War and Peace</td>
<td>3</td>
<td>Examines the “classic” alternative understanding, in the history of political thought, regarding the reasons people go to war. Explores consequent proposals to erase the sources or alleviate the results of armed conflicts. (F,Sp)</td>
</tr>
<tr>
<td>POLS 6400</td>
<td>United States Foreign Policy</td>
<td>3</td>
<td>Explores contemporary U.S. foreign policy in the context of international relations theory and global realities. Utilizing theoretical perspectives as analytical models, course examines how policy makers formulate and attempt to achieve U.S. foreign policy goals in the global arena. Taught during alternate years.</td>
</tr>
<tr>
<td>POLS 6810</td>
<td>Graduate Seminar</td>
<td>1-4*</td>
<td>American politics; comparative politics; political theory; international politics; public law; public administration. (F,Sp,Su)</td>
</tr>
<tr>
<td>POLS 6910</td>
<td>Graduate Tutorial</td>
<td>1-3*</td>
<td>Prerequisite: instructor’s consent. (F,Sp,Su)</td>

<tr>
<td>POLS 6920</td>
<td>Internship</td>
<td>1-15*</td>
<td>Internship in a public administration agency. Instructor approval required. (F,Sp,Su)</td>
</tr>
<tr>
<td>POLS 6970</td>
<td>Thesis Research</td>
<td>1-9*</td>
<td>Graded Pass/Fail only. Prerequisite: admission to candidacy. (F,Sp,Su)</td>
</tr>
<tr>
<td>POLS 6990</td>
<td>Continuing Graduate Advisement</td>
<td>1-3*</td>
<td>Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>
</tbody>
</table>

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

1 Taught 2007-2008.
3 Taught Fall 2007 and Spring 2009.
Course Descriptions

Portuguese (PORT)

See Department of Languages, Philosophy, and Speech Communication, pages 364-379

PORT 1010 Portuguese First Year I 4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. (F)

PORT 1020 Portuguese First Year II 4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Prerequisite: PORT 1010 or equivalent. (F,Sp)

PORT 1050 Intensive Portuguese for Spanish Speakers 4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Intensive course for Spanish speakers. (Sp)

PORT 2010 Portuguese Second Year I 4
Continued development of communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Prerequisite: PORT 1020 or equivalent. (F)

PORT 2020 Portuguese Second Year II 4
Continued development of communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Prerequisite: PORT 2010 or equivalent. (Sp)

PORT 2880 Individual Readings 1-4*
Individual study of selected readings in Portuguese. Instructor’s permission required. (F,Sp)

PORT 3040 CI Advanced Portuguese Grammar and Composition 3
Review of the more complex Portuguese grammatical points and development of writing skills through composition. Prerequisite: PORT 2020 or equivalent. (F,Sp)

PORT 3570 Brazilian Culture and Civilization 3
Historical, social, political, economic, and cultural conditions and institutions of Brazil. (F)

PORT 3630 Survey of Brazilian Literature 3
Selected readings and discussions of major works and authors in Brazilian literature. Prerequisites: PORT 3040 and 3570. (Sp)

PORT 3800 Portuguese III Study Abroad 1-4
Intense review of selected problematic areas of Portuguese grammar for students with advanced language skills. Prerequisite: PORT 2020 or equivalent. Taught only in USU’s overseas Portuguese program. (Su)

PORT 4880 Individual Readings 1-4*
Readings in Brazilian and/or Portuguese literature. Prerequisite: Instructor’s permission. (F,Sp)

PORT 4920 Portuguese Language Tutoring 1*
Allows students to develop tutoring skills by assisting professors in lower-division courses or fulfilling instructional duties for a comparable amount of time in the language laboratory, public schools, or similar activities with departmental approval. May be repeated to a maximum of 3 credits. Prerequisite: Permission of instructor. (F,Sp,Su)

PORT 4950 Portuguese Language Tutoring* 1*
Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Parks and Recreation Professional (PRP)

See Department of Health, Physical Education and Recreation, pages 321-331

PRP 1000 Introduction to Parks and Recreation 3
Introductory course examining the conceptual foundations of play, recreation, and leisure. Examines the history and development of the profession, as well as current trends. Provides insight into the careers in the leisure service industry. (F,Sp)

PRP 1500 Social Recreation Leadership 3
Information and practical experience in the organization and management of social recreation activities. Planning, programming, and evaluation techniques given for a variety of age groups. (Sp)

PRP 2100 Leisure and Aging 2
Examines relevance of leisure as a means of enhancing the quality of life throughout the lifespan. Addresses the quality of life throughout the lifespan, as well as the physical, psychological, social, and developmental aspects of aging relating to leisure and recreational programming. (F)

PRP 2250 Introductory Cooperative Work Experience 1-6*
An introductory-level educational work experience in a cooperative education or business position as approved by the department. Graded Pass/Fail only. Repeatable for up to 6 credits. (F,Sp,Su)

PRP 2500 Outdoor Recreation Management 3
Explores philosophy, meaning, and value of outdoor recreation in society. Gives management agency overview. Emphasizes organizing and leading outdoor recreation pursuits. (F)

PRP 3000 Recreation Programming 3
Studies recreation programming, including methods, models, and classification. Also includes analysis of activities, organizational structures, and evaluation techniques. (Sp)

PRP 3200 Recreation Event Planning and Management 3
Explores principles of special event and festival planning, emphasizing development and integration of operational strategies. Concentrates on conceptualization, analysis, economic impacts, marketing, and evaluation of small-scale to large-scale community events. Prerequisite: PRP 3000. (F,Sp)

PRP 3500 CI Community Recreation Administration 3
Examines community recreation organization with emphasis on administrative skills and functions, including budgeting, personnel management, and grantmanship. Prerequisites: PRP 1000 and 3000. (F)

PRP 3750 Commercial Recreation and Tourism 3
Examines history, organization, and management of commercial recreation and tourism enterprises. Studies entrepreneurship, feasibility, marketing, and management of projects. (Sp)

PRP 3900 Introduction of Therapeutic Recreation for Diverse Populations 3
Examines characteristics, behaviors, and programming techniques used to meet recreational needs of varied population groups and all degrees of disabilities. (F)

PRP 4000 Therapeutic Recreation 3
Examines special population groups served by recreation, including institutional procedures, clinical application, and activity programming. Prerequisite: PRP 3900.

PRP 4200 Advanced Therapeutic Recreation* 3
Examines current trends and issues in therapeutic recreation and how they affect the therapeutic recreation profession. Instruction in licensing requirements for eligibility for TRT and TRS licensure and certification. Prerequisite: PRP 4000.

Utah State University 2007-2009 General Catalog 699
Course Descriptions

PRP 4250 Advanced Cooperative Work Experience 1-12
Cooperative education work experience with increased levels of complexity, wherein students gain a more professional level of experience as they advance toward completion of the program. Graded Pass/Fail only. (F,Sp,Su)

PRP 4300 Legal Aspects of Recreation and Leisure 3
Focuses on legal aspects of recreation and park programs, management, and administration. Provides basic knowledge and understanding of risk management process, legal terms, and their application. Prerequisites: PRP 1000 and 3000. (Sp)

PRP 4400 Recreation Facility Design and Management 3
Studies recreation park facility design and management issues including: feasibility studies, master plans, features, trends and issues in equipment design, maintenance, accessibility, and safety. Prerequisite: PRP 3000. (F)

PRP 4700 Internship Seminar 1
In preparation for PRP 4750, students identify internships and prepare written materials and objectives for internship assignment. Graded Pass/Fail only. (Sp)

PRP 4750 Recreation Internship 6
Practical, off-campus management experience with cooperating parks and recreation agency. Prerequisites: PRP 1000, 3000, 4300, 4700; and 200 hours of documented work experience. (F,Sp,Su)

PRP 4970H Honors Thesis 1-6
Culminating experience within the department for honors students. Student works closely with faculty mentor in an extensive project in the student’s area of interest. (F,Sp,Su)

PRP 5000 CI Seminar in Recreation 3
Student analysis, papers, and presentations of current issues and problems in recreation. Includes discussions with professionals and development of resume. Prerequisites: PRP 1000, 2500, 3500, 3750, 3900, 4000, 4400. (F,Sp)

PRP 5900 Independent Study 1-3
Students work on special projects and research out of the classroom, with approval and guidance of instructor. (F,Sp,Su)

PRP 5910 Independent Research 1-3
(F,Sp,Su)

PSB 4250 Internship in Plants, Soils, and/or Biometeorology 1-4
Professional internship in crop science, horticulture, environmental soil/water science, and/or biometeorology. (F,Sp,Su)

PSB 4800 Teaching Practicum for Undergraduate Students 1-3
Offers undergraduate students an opportunity for guided teaching and methods for student evaluation in a variety of Plants, Soils, and Biometeorology courses. Taught infrequently. Contact department for further information. (F,Sp)

PSB 4890 CI Senior Seminar 1
Student preparation for careers. Familiarization with placement processes. Discussion of role in society and career opportunities for graduates. Experiences in team building. Opportunities for oral presentations of solutions to current issues and scientific information. Must take during both fall and spring semesters. (F,Sp)

PSB 4900 Special Problems 1-4
Special topics and problems in crop science, horticulture, environmental soil/water science, and/or biometeorology. Subject, time, and credit arranged individually as needed. Department approval required. (F,Sp,Su)

PSB 5000 Environmental Instrumentation 2
Discusses physics of signal transduction underlying all sensors. Basic electronics necessary to link sensors with data loggers. Programming data loggers to maximize measurement accuracy and to summarize data. (F)

PSB 5160 Methods in Biotechnology: Cell Culture 3
Techniques and fundamental knowledge for culturing mammalian and insect cells. Students will learn maintenance, growing, genetic engineering of cells, cytotoxicity, hybridoma creation, cloning, etc. Extensive laboratory experience is provided. Also taught as ADVS 5160, BIOL 5160, and NFS 5160. (Sp)

PSB 5200 Site-Specific Agriculture and Landscape/Horticultural Management 3
Integration of site-specific management technology, such as computers, GPS, yield monitors, variable rate controllers, mechanized samplers, and postharvest processing controllers with planning, tillage, planting, chemical applications, and harvesting to optimize off-site inputs and environmental/economical sustainability in crop or landscape management. Taught during second half of semester. (Sp)

PSB 5240 Methods in Biotechnology: Protein Purification Techniques 3
Reviews basic methods of protein purification, including scaled-up use of 100L fermenter, large-scale centrifugation, diafiltration, chromatography, and use of BioCAD. Prerequisite: CHEM 3700. Also taught as ADVS 5240, BIOL 5240, and NFS 5240. (Sp)

PSB 5260 Methods in Biotechnology: Molecular Cloning 3
Laboratory-oriented course designed to teach molecular biology techniques such as DNA cloning, genetic probes, polymerase chain reaction, and DNA sequencing. Prerequisite: CHEM 3700 or 5710; or BIOL 3060; or permission of instructor. Also taught as ADVS 5260, BIOL 5260, and NFS 5260. (F)

PSB 5370 Molecular Methods in Nutrition Science (dual listing 6370) 2
Theory of modern techniques used to study macromolecules and ions. Prerequisite: CHEM 3700. Also taught as ADVS/Biol/NFS 5370/6370. (F)

PSB 6000 Environmental Instrumentation 2
Discusses physics of signal transduction underlying all sensors. Basic electronics necessary to link sensors with data loggers. Programming data loggers to maximize measurement accuracy and to summarize data. (F)

PSB 6370 Molecular Methods in Nutrition Science (dual listing 5370) 2
Theory of modern techniques used to study macromolecules and ions. Prerequisite: CHEM 3700. Also taught as ADVS/Biol/NFS 6370/5370. (F)

Plants, Soils, and Biometeorology (PSB)

See Department of Plants, Soils, and Biometeorology, pages 464-477

Note: Effective Spring Semester 2008, courses listed with the PSB prefix will use the Plants, Soils, and Climate (PSc) prefix.

PSB 1050 Plants, Soils, and Biometeorology Orientation 1-2
Orientation to the teaching, research, and extension programs of the department, and to career opportunities. Optional orientation to a specific major: Horticulture, Crop Science, or Environmental Soil/Water Science. (F)

PSB 2040 Introduction to Biotechnology 1
Introduces freshmen to the emerging field of biotechnology and the impact this technology has on society. Also taught as ADVS 2040, BIOL 2040, and NFS 2040. (Sp)

PSB 2800 Fundamentals of Organic Agriculture 3
Organic agriculture uses a holistic systems approach for maintaining plant, animal, and soil health. In this course, animal and crop production approaches and disease, as well as insect and weed management strategies, are scientifically assessed, critically compared, and used in decision making and problem solving exercises. (Sp)
Course Descriptions

PSB 6700  Integrative Topics in Plants, Soils, and Biometeorology  1-3®
Team-taught special topics course encouraging interdisciplinary analysis of a research or policy area from the current literature, encompassing the three departmental subdisciplines. Emphasis on written and oral student presentations. Not currently being taught. Contact department for further information.

PSB 6800  Graduate Student Teaching Practicum  1-3
Offers graduate students an opportunity for guided teaching and methods for student evaluation in a variety of Plants, Soils, and Biometeorology courses. (F,Sp)

PSB 6890  Plants, Soils, and Biometeorology Graduate Seminar  1®
Review and critique of presentations. Communication practice in extemporaneous, extension, research, poster, and lecture presentations. Graded Pass/Fail only. PSB graduate students must enroll during both fall and spring semesters. (F,Sp)

PSB 6900  Special Problems in Plants, Soils, and/or Biometeorology  1-8®
(F,Sp,Su)

PSB 6970  Research and Thesis  1-18®
Graded Pass/Fail only. (F,Sp,Su)

PSB 6990  Continuing Graduate Advisement  1-12®
Graded Pass/Fail only. (F,Sp,Su)

PSB 7800  Graduate Student Teaching Practicum  1-3
Offers graduate students an opportunity for guided teaching and methods for student evaluation in a variety of Plants, Soils, and Biometeorology courses. (F,Sp)

PSB 7890  Plants, Soils, and Biometeorology Graduate Seminar  1®
Review and critique of presentations. Communication practice in extemporaneous, extension, research, poster, and lecture presentations. Graded Pass/Fail only. PSB graduate students must enroll during both fall and spring semesters. (F,Sp)

PSB 7900  Special Problems in Plants, Soils, and/or Biometeorology  1-8®
(F,Sp,Su)

PSB 7970  Research and Thesis  1-18®
Graded Pass/Fail only. (F,Sp,Su)

PSB 7990  Continuing Graduate Advisement  1-12®
Graded Pass/Fail only. (F,Sp,Su)

Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Plants, Soils, and Climate (PSC)
See Department of Plants, Soils, and Biometeorology, pages 464-477

The PSC course prefix will not be used until Spring Semester 2008. For Summer Semester 2007 and Fall Semester 2007, these courses will continue to use the Plants, Soils, and Biometeorology (PSB) prefix. For PSB course descriptions, see pages 700-701.

Psychology (PSY)
See Department of Psychology, pages 484-493

Note: Prerequisites for Psychology courses are strictly enforced. In the course listings below, prerequisites are indicated at the end of course descriptions. A student must be admitted as a psychology major or must complete at least 45 semester credits with a GPA of 3.0 or higher prior to taking psychology courses numbered 3000 or above. However, students who have been admitted to the Teacher Education program may take PSY 3660, provided they have met the prerequisites. A student must be admitted as a psychology major or must complete at least 60 semester credits with a GPA of 3.0 or higher prior to taking psychology courses numbered 4000 or above.

PSY 1010  BSS General Psychology  3®
Explores basic areas of psychology, and how each explains human thought and behavior at the individual, familial, and cultural levels. (F,Sp,Su)

PSY 1100  Developmental Psychology: Infancy and Childhood  3®
Introduction to psychological development with emphasis on perceptual, language, cognitive, and social development in children. Prerequisite: PSY 1010. (F,Sp)

PSY 1210  Psychology of Human Adjustment  3®
Examination of life situations affecting human adjustment to everyday living, with emphasis on practical applications. Prerequisite: PSY 1010. (F,Sp)

PSY 1220  Career and Life Planning  3®
Students assess and clarify their interests, values, skills, and temperaments. Emphasizes discovering relationships between these personal characteristics and the realities of educational and employment opportunities. Explores setting goals, creating action plans, and coping with change. (F,Sp)

PSY 1400  Analysis of Behavior: Basic Principles  3®
A laboratory course about the scientific methods used in the study of animal and human behavior. Prerequisite: PSY 1010. (F,Sp,Su)

PSY 1410  Analysis of Behavior: Basic Principles Lab  1®
Laboratory experience accompanying PSY 1400. Prerequisite: PSY 1010. (F,Sp,Su)

PSY 1730  Strategies for Academic Success  1-3®
Orientation to the systems, tools, and resources unique to higher education that are needed to maximize academic success (e.g., library, computer lab use, etc.). Also helps students develop critical thinking, study, and learning strategies necessary for college success. (F,Sp)

PSY 1740  Academic Literacy and College Reading Skills  3®
Helps students understand and adapt reading skills to fit their learning needs. Philosophy of the class is for students to discover new reading strategies and test them by practicing and applying them to college reading material. Also emphasizes reading comprehension and understanding a variety of texts. (F,Sp,Su)

PSY 1750  Comprehension Strategies for College Reading  1®
Practical course emphasizing application of strategies and development of critical thinking skills needed to comprehend and distill meaning from college-level texts. (F,Sp)

PSY 2100  Developmental Psychology: Adolescence**  3®
Characteristics of adolescents and their psychological, educational, and adjustment problems are discussed in detail. Prerequisite: PSY 1010. (Sp)

PSY 2250  Introductory Cooperative Work Experience  1-6®
Educators and employers cooperate to provide opportunities for students to apply classroom theory and principles in job environments, thereby gaining practical experience in their field. Prerequisite: Approval of Psychology Department coop education counselor. (F,Sp,Su)

PSY 2800  QI Psychological Statistics  3®
Elementary study of statistical procedures in handling test scores and other data, and of the concepts needed for each current type of educational and psychological literature. Prerequisite: STAT 1040. (F,Sp)

PSY 2950  Orientation to Psychology as a Career and Profession  2®
Overview of the field and major. Students clarify career goals, identify steps necessary to achieve goals, prepare a vita, and gain major-relevant skills (e.g., APA-style writing, ethics, and library usage). Prerequisites: PSY 1010 and consent of Psychology Advising Office. (F,Sp,Su)
Course Descriptions

PSY 3110  Health Psychology**  3
Introduction to "biopsychosocial model" of health and well-being. Focuses on reciprocal interactions among biological, psychological, and social factors in human functioning and disease. Explores cultural approaches to health, illness, and treatment. Prerequisite: PSY 1010. (Sp)

PSY 3120  DSS  Abuse, Neglect, and the Psychological Dimensions of Intimate Violence  3
Overview of child maltreatment, animal abuse, dating, courtship, domestic violence, and abuse of the elderly. Stresses the psychological factors related to the causes, consequences, and treatment of abuse and neglect. Presents multidisciplinary perspectives, including historical, legal, medical, psychiatric, and psychological approaches. Prerequisite: PSY 1010. (F,Su)

PSY 3210  DSS  Abnormal Psychology  3
Introduction to "abnormal" human behavior. Covers characteristics, etiology, and treatment of a variety of psychological disorders. Prerequisite: PSY 1010. (F,Sp)

PSY 3400  DSS  Analysis of Behavior: Advanced  4
In-depth examination of principles introduced in PSY 1400. Considers principles governing more complex human and animal behavior, as well as emotional and motivational factors in behavior. Lab included as part of credit. Prerequisites: PSY 1400 and 1410. (F,Sp)

PSY 3450  Perception and Psychophysics  3
Analysis of how sensory processes and principles help determine behavior. Introduction to methods used to measure sensory-determined behavior. Methods, results, and principles of sensory communication. Lab required as part of 3 credits. Prerequisite: PSY 1010. (F)

PSY 3460  Physiological Psychology  3
Introductory course examining relationship between central system anatomy and physiology, and behavior and emotional functioning. Also considers neural and biochemical substrates of behavior. Lab required as part of 3 credits. Prerequisite: PSY 1010. (Sp)

PSY 3500  CI/DSS  Scientific Thinking and Methods in Psychology  3
Provides introduction to research methods and scientific thinking. Teaches students to understand, analyze, and evaluate existing behavioral research. Includes defining and measuring variables; selecting research participants; experimental, quasi-experimental, and nonexperimental research designs; and conducting ethical research. Prerequisite: PSY 1010. (F,Sp)

PSY 3510  DSS  Social Psychology  3
Study of the individual in society; problems, theories, and methods of social psychology; will relate reading assignments to current social issues. Prerequisite: PSY 1010. (F,Sp)

PSY 3660  Educational Psychology for Teachers  2
Principles and practices for development of conditions for effective learning. Lab required. Prerequisite: PSY 1100 or 2100. (F,Sp)

PSY 3720  Behavior Modification  3
Approaches to behavior modification in a variety of settings. Students required to complete an individual project. Prerequisites: PSY 1010, 1400, 1410, 3400. (Sp)

PSY 4000  Mental Aspects of Sports Performance***  3
Provides an understanding of theory and applications in the specialty area of sports psychology, including enhancement of motivation and performance, stress, anxiety, aggression and time management, and the relation of these issues to physical development and coaching styles. Also taught as PEP 4000. (F,Sp,Su)

PSY 4210  DSS  Personality Theory  3
Explanatory study of various personality theories, their origin, and approaches to the understanding of human behavior. Prerequisites: PSY 1010 and 2800. (Sp)

PSY 4230  DSS  Psychology of Gender***  3
Critical analysis of evidence for sex differences, gender roles, the effect of gender on traditional psychology, and other topics, including parenthood, cultural influence, and sexual orientation. (Sp)

PSY 4240  DSS  Multicultural Psychology  3
Explores cultural influences on basic psychological processes, including perception, cognition, language, emotion, intelligence, attitudes, values, and intergroup relations. Prerequisite: PSY 1010. (F)

PSY 4250  Advanced Cooperative Work Experience  1-12
Cooperative education work experience position; increased level of complexity and a more professional level of experience as student advances toward completion of the program. Prerequisite: Approval of Psychology Department cooperative education coordinator. (F,Sp,Su)

PSY 4420  DSS  Cognitive Psychology  3
In-depth study of basic concepts, methods, and theories involved in perception, memory, and thinking. Lab required. Prerequisite: PSY 1010. (Sp)

PSY 4430  Cognitive Psychology Laboratory  1
Required laboratory, designed to accompany PSY 4420. Focuses on conducting cognitive experiments via computer simulations and sampling data collection. Designed to increase skills in designing data collection and interpreting experimental data. (Sp)

PSY 4510  CI  Effective Social Skills Interventions  3
Examination of theory and practice of social skills training with children, adolescents, and adults. Prerequisites: PSY 1010, 1100, and either PSY 3210 or 3510. (Sp)

PSY 4790  Psychological Principles and Individuals (dual listing 6790) who are Deaf and Hard of Hearing  3
Psychological theories and research used to describe the deaf and hard of hearing. Exploration of principles that can be used in helping these individuals achieve emotional well-being. Also taught as COMD 4790/6790. (Sp)

PSY 4910  Undergraduate Research Creative Opportunity  1-3
A cooperative process of discovery, investigation, research, or creativity between faculty and one or more students. Prerequisite: Approval of Psychology Department URCO coordinator. (F,Sp,Su)

PSY 4920  Practicum  1-3
Field work in applied psychological setting at BS level. (F,Sp,Su)

PSY 4950  CI  Undergraduate Apprenticeship  3
Students plan and execute their apprenticeship experience in a research setting (with faculty members) and an applied setting (e.g., community service agency or school). Students are encouraged to take this course three or more semesters prior to graduation. Prerequisite: PSY 2950. (F,Sp,Su)

PSY 4960  CI  Advanced Undergraduate Apprenticeship  3
Students continue their apprenticeship experiences from PSY 4950. Students complete a major written assignment that can take the form of a literature review or complete research report. Students are encouraged to take this course one or more semesters prior to graduation. Prerequisite: PSY 4950. (F)

PSY 5020  Multicultural Issues in Psychology (dual listing 6020)  3
Examines role of culture in human development, with emphasis on understanding relations between culture, ethnicity, and identity and how images of "cultural selves" and "cultural others" are produced and "naturalized." (F)

PSY 5050  Psychological Aspects of Sports Performance (dual listing 6050)  3
Psychological theory and principles applied to sports. Includes motivational techniques, psychological evaluation, stress and anxiety in sports, personality and sports performance. Also taught as PEP 5050/6050. (Sp)

PSY 5100  History and Systems of Psychology  3
Theoretical and historical developments in psychology with primary emphasis on nineteenth and twentieth century developments, although earlier precursors are also considered. Prerequisite: PSY 1010. (Sp)

<td>3</td>
</tr>
<tr>
<td></td>
<td>Focuses on issues relevant to the understanding of child emotional and behavioral disorders. Discussion of symptom characteristics, assessment, and treatment protocols, as well as research pertaining to the major mental health problems found in children and adolescents. Prerequisite: Admission to graduate program in psychology or permission of instructor. (F)</td>
<td></td>
</tr>
<tr>
<td>PSY 6290</td>
<td>Diversity Issues in Treatment and Assessment</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Introduction to diversity issues in counseling and psychological/educational assessment, including culture, gender, language, and related issues. Training in models for providing effective psychological services to clients, taking into account their unique background. Prerequisite: PSY 6350 or instructor’s consent. (Sp)</td>
<td></td>
</tr>
<tr>
<td>PSY 6310</td>
<td>Intellectual Assessment</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Training and supervised experience in administering and interpreting individual intellectual ability tests, such as the Wechsler and Stanford-Binet scales. Prerequisite: Matriculation into School Psychology program or Combined Psychology program. (F)</td>
<td></td>
</tr>
<tr>
<td>PSY 6320</td>
<td>Objective Assessment of Personality and Affect</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Research bases and clinical applications of objective psychological assessment instruments and techniques, designed to measure adolescent and adult personality, affect, and psychotherapy. Prerequisite: PSY 6310. (Sp)</td>
<td></td>
</tr>
<tr>
<td>PSY 6330</td>
<td>Psychometrics</td>
<td>3</td>
</tr>
<tr>
<td>(dual listing 5330)</td>
<td>Overview of measurement development principles and statistics. Evaluation, interpretation, and uses of standardized tests of aptitude, intelligence, achievement, personality, and adjustment. Prerequisites: PSY 1010, 2800. (F)</td>
<td></td>
</tr>
<tr>
<td>PSY 6340</td>
<td>Psychological and Educational Consultation</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Overview of theory and practice of consultation as provided by counselors, psychologists, and other mental health education professionals. Consultation with teachers, parents, medical professionals, and organizations, emphasizing applications in educational settings. (F)</td>
<td></td>
</tr>
<tr>
<td>PSY 6350</td>
<td>Introduction to Theory and Practicum in Counseling</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Introduction to basic theories and techniques of counseling, with applied practice in role-playing, interviewing, and actual counseling sessions with practice subjects. Prerequisite: Matriculation in School Counseling, School Psychology, or Combined Psychology program. (F)</td>
<td></td>
</tr>
<tr>
<td>PSY 6360</td>
<td>Practicum in Counseling and Psychotherapy</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Supervised practicum in counseling and psychotherapy conducted within Psychology Community Clinic. Closely supervised practicum in assessment, counseling, psychotherapy, and consultation with individuals, couples, and families. Prerequisite: PSY 6350. (Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>PSY 6370</td>
<td>Practicum in School Counseling</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Supervised practicum in public school setting, under direction of certified school counselor. Taken by students in School Counseling master’s program. (F,Su)</td>
<td></td>
</tr>
</tbody>
</table>
Course Descriptions

PSY 6380  Practicum in School Psychology  3
Supervised practicum in school psychology in public school or closely related
setting. Taken by second-year students in School Psychology master’s program.
(F,Sp,Su)

PSY 6410  Psychoeducational Assessment  3
Training and supervised experience in assessment of school-age and preschool-
age children. Administration and interpretation of cognitive, developmental,
and academic achievement measures, along with other psychoeducational
assessment instruments and methods. (Sp)

PSY 6450  Introduction to School Psychology  1
Introductory overview of field of school psychology. Role and function of
school psychologist, historical context of school psychology, and trends and
new developments in service provision. Prerequisite: Matriculation into School
Psychology master’s program or Combined Psychology doctoral program. (F)

PSY 6460  Professional Issues in School Counseling and School Psychology  3
Legal, ethical, and professional issues relevant to school counselors and school
psychologists. Issues and practices in providing counseling and psychological
services to “at-risk” students. Prerequisite: Graduate standing in psychology or
instructor’s consent. (Sp)

PSY 6470  Health Psychology  3
Explores psychological and behavioral principles relating to health and illness.
Focuses on development and maintenance of health behaviors. Emphasizes
integration of research findings with clinical intervention. Prerequisite: Graduate
standing in Psychology; or graduate standing in Health, Physical Education and
Recreation. (F)

PSY 6500  Interdisciplinary Workshop  1-2
Series of self-instructional modules and videos and a variety of elective training.
Module topics include developmental disabilities, legal aspects and issues,
assessment, intervention, assistive technology, transition, and prevention/
intervention for aggression and violence. (F,Sp,Su)

PSY 6510  Social Psychology***  3
Provides all graduate students with common knowledge base in social
psychology. Emphasizes overview of recent developments, while also discussing
social psychology principles as a guide in executing evaluation research
and helping clients. Understanding of both emphases ensures breadth as
psychologists. Prerequisite: PSY 3510. (Sp)

PSY 6530  Developmental Psychology  3
Advanced survey course in general developmental psychology. Theory and
research in human development across the lifespan, with particular emphasis on
child and adolescent development. (F)

PSY 6570  Introduction to Educational and Psychological Research  3
Provides introduction to research methods, including identification of research
problem, review and evaluation of research literature, and design and
implementation of research project. Prerequisite: PSY 2800. Also taught as
EDUC 6570. (F,Sp,Su)

PSY 6600  Research Design and Analysis I  3
Research design and statistical concepts for research in education, human
services, and psychology, with emphasis on the selection and interpretation of
statistical analyses. Prerequisites: EDUC/PSY 6570, passing score on 6800
Pretest via WebCT, and permission of instructor. Also taught as EDUC 6600.
(F,Sp,Su)

PSY 6650  Theories of Learning: The Behavioral Perspective***  3
In-depth examination of the major behavioral theories of learning, including
classical and operant conditioning. (F)

PSY 6660  Cognition and Instruction***  3
Survey of theory and principles in cognitive psychology, with special emphasis on
applying these principles in instructional settings. (Sp)

PSY 6750  Empirically Supported Treatments for Adult Psychological Disorders  3
Emphasizes development of knowledge regarding criteria for determining if a
treatment is empirically supported. Explains methods for indentifying specific
effectively supported treatments. Develops skills for applying these treatments
to psychological disorders and for understanding how to evaluate the efficacy of
treatments. (Sp)

PSY 6790  Psychological Principles and Individuals who are Deaf and Hard of Hearing  3
Prerequisite: Graduate standing in psychology. Emphasizes overview of the theoretical issues, research, and
models that underlie our understanding of behavioral syndromes commonly
referred to as “addictive behaviors.” Emphasizes chemical dependency
problems, as well as the well-studied pattern of “addiction.” (F)

PSY 6810  Seminar  1-3
Special topics designed to help students develop in-depth knowledge of
emerging research, theory, and practice in psychology. Taught in seminar format
by USU faculty or visiting scholars. (F,Sp,Su)

PSY 6820  Clinical Applications of Biofeedback***  3
Training in clinical applications of biofeedback for treating common health,
psychological, and stress-related problems. Practical experience provided in use
of different modalities of biofeedback (e.g., neurofeedback, skin temperature
training, and electrodermal training). Stresses importance of integrating
biofeedback into other appropriate treatments. Prerequisite: Graduate standing in
psychology or instructor’s consent. (F)

PSY 6850  Introduction to the Combined Doctoral Program  1
This seminar is designed to orient beginning PhD students to the combined
program and to the School of Graduate Studies. Opportunity provided for
students to meet and talk with all faculty members concerning their research.
Students also begin their own research and become acquainted with required
paperwork for their program. (F)

PSY 6880  Transcultural Assessment Lab  1
Psychoeducational assessment laboratory experience to be taken by students in the
School Psychology and Combined Psychology programs in conjunction with
PSY 6290. (Sp)

PSY 6890  Assessment of Child and Adolescent Psychopathology and Personality  3
Theoretical foundations and applied training in methods of assessing and
classifying behavioral, social, and emotional problems of children and
adolescents. Prerequisite: Matriculation into Combined Psychology doctoral
program or School Psychology master’s program. (Su)

PSY 6900  Independent Study  1-3
Individual discussion and intensive study of a particular problem or area.
Prerequisite: Instructor’s consent. (F,Sp,Su)

PSY 6910  Independent Research  1-3
Experiments and demonstration projects are conducted and reported.
Prerequisite: Instructor’s consent. (F,Sp,Su)

PSY 6930  University Teaching Apprenticeship  1-3
Prepares graduate students for college teaching. Students learn to prepare study
guides, examinations, and lectures, and learn to use audio-visual aids. Students
also examine various current methods of instruction and course evaluation
schemes. (F,Sp,Su)

PSY 6950  Internship in School Psychology  3
Internship in approved school system involving assessment, counseling,
consultation, and program development, under the supervision of a certified
school psychologist. Prerequisite: Permission of instructor. (F,Sp,Su)

PSY 6970  Thesis  1-6
Graded Pass/Fail only. (F,Sp,Su)

PSY 6990  Continuing Graduate Advisement  1-12
Graded Pass/Fail only. (F,Sp,Su)

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY 7020</td>
<td>Advanced Evaluation Methodology and Techniques*</td>
<td>3</td>
<td>Provides advanced theory and practice for group interviews, on-site evaluations, observation and anchor scales, multiple-site evaluation standards, and advanced reporting techniques. Prerequisite: PSY 6010. (Sp)</td>
</tr>
<tr>
<td>PSY 7030</td>
<td>Instrument Development***</td>
<td>3</td>
<td>In-depth study of factors and techniques critical for designing and developing evaluation and research instruments. (F)</td>
</tr>
<tr>
<td>PSY 7040</td>
<td>Practicum in Evaluation Planning and Contracting</td>
<td>3</td>
<td>Provides detailed information on methods for planning program evaluations, negotiating agreements with client/sponsor, and finalizing evaluation contract. Taught every third year. Prerequisite: EDUC/PSY 6010. (Sp)</td>
</tr>
<tr>
<td>PSY 7050</td>
<td>Internship in Program Evaluation</td>
<td>1-9*</td>
<td>Experience in practical aspects of program evaluation through planned, supervised evaluation project participation approved by student’s supervisory committee. Prerequisite: EDUC/PSY 6010. (F,Sp,Su)</td>
</tr>
<tr>
<td>PSY 7060</td>
<td>Internship in Research</td>
<td>1-9*</td>
<td>Research experience gained through conducting planned, supervised research project. Prerequisites: Approval by supervisory committee and EDUC/PSY 6570. (F,Sp,Su)</td>
</tr>
<tr>
<td>PSY 7070</td>
<td>Advanced Measurement Theories and Practice</td>
<td>3</td>
<td>Covers psychometric topics, including classical test theory, generalizability theory, item response theory, and issues concerning bias in psychological testing. Prerequisites: PSY 5330/6330, EDUC/PSY 6600. (Sp)</td>
</tr>
<tr>
<td>PSY 7090</td>
<td>Research and Evaluation Methodology Program Seminar</td>
<td>1*</td>
<td>Provides opportunity for all doctoral students in the Research and Evaluation Methodology Program to meet on a regular basis to read journal articles, explore student and faculty research projects, and discuss current issues in the field. (F,Sp)</td>
</tr>
<tr>
<td>PSY 7100</td>
<td>Biological Basis of Behavior***</td>
<td>3</td>
<td>Explores normal and abnormal behavior from a basic neuroanatomical/neurophysiological perspective. Discusses pharmacological/nonpharmacological applications. (Sp)</td>
</tr>
<tr>
<td>PSY 7110</td>
<td>Advanced Theories in Cognitive Psychology</td>
<td>3</td>
<td>In-depth study of theories, models, and current research in the field of cognitive psychology, including memory, perception, problem-solving, and decision making. Prerequisite: PSY 4420 or 6660. (F)</td>
</tr>
<tr>
<td>PSY 7230</td>
<td>Theory and Research in Personality***</td>
<td>3</td>
<td>Overview of theoretical approaches, research, and clinical applications regarding personality differences. (F)</td>
</tr>
<tr>
<td>PSY 7250</td>
<td>Professional Ethics and Standards***</td>
<td>1-3</td>
<td>Designed to train clinicians and researchers in the field of psychology to operate within the professional ethics and standards of the field. (F)</td>
</tr>
<tr>
<td>PSY 7270</td>
<td>Psychopathology***</td>
<td>3</td>
<td>Summarizes research on risk, epidemiologic factors, and etiological perspectives regarding emotional and behavioral disorders of adolescents and adults. Models of classification of disorders are outlined, emphasizing the DSM system. Focuses on anxiety, mood, somatiform, dissociative, personality, and psychosocial disorders, as well as schizophrenia, drug/alcohol dependence, violence, and psychological factors affecting physical illness. (F)</td>
</tr>
<tr>
<td>PSY 7320</td>
<td>Advanced Personality Assessment</td>
<td>2</td>
<td>Theory and clinical training in personality assessment, with additional techniques than those covered in PSY 6320. Focuses on the comprehensive scoring system of Rorschach. Prerequisite: PSY 6320 or instructor’s consent. (Su)</td>
</tr>
<tr>
<td>PSY 7350</td>
<td>Practicum in School Psychology</td>
<td>3*</td>
<td>Doctoral-level practicum in a school or closely related setting. Supervised experience in developmental, learning, and school-related problems. Appropriate assessment and consultation with teachers, administrators, parents, and other related individuals. Prerequisite: Permission of program chair. (F,Sp,Su)</td>
</tr>
</tbody>
</table>
Course Descriptions

**PSY 7950** Internship in Professional Psychology 1
One-year, supervised, full-time internship required of doctoral candidates in professional psychology (clinical, counseling, and/or school psychology). Prerequisite: All doctoral coursework completed, with the possible exception of the dissertation if approved by the student's committee, prior to initiating the internship. (F,Sp,Su)

**PSY 7970** Dissertation 1-18
Graded Pass/Fail only. (F,Sp,Su)

**PSY 7990** Continuing Graduate Advisement 1-12
Graded Pass/Fail only. (F,Sp,Su)

---

**Public Health (PUBH)**

See Department of Biology, pages 180-193

**PUBH 3120** Family and Community Health 3
Focuses on health aspects of various population groups within the community. Particular emphasis placed on guidelines for optimal family health. (Sp)

**PUBH 3310** Occupational Health and Safety 3
Covers the principles of occupational health and safety, including regulatory standards. Emphasizes on-the-job health and safety problems from the occupational health and safety professional and management view. Prerequisite: CHEM 1220. (F)

**PUBH 3610** Environmental Management 3
Introduction to environmental health, emphasizing relationships among environmental quality, public health, environmental and occupational health regulations, human health risk assessment, institutions, and engineered systems in environmental health management. Prerequisites: CHEM 1210; BIOL 1610 or University Studies Breadth Life Sciences (BLS) course; MATH 1210. Also taught as CEE 3610. (F)

**PUBH 3870 CI Professional/Technical Writing in Civil and Environmental Engineering 2**
Gives CEE students intensive practice with oral and written communication in business and technical CEE writing. Requires concurrent enrollment in PUBH/CEE 3610. Also taught as CEE 3870. (F)

**PUBH 4000** Public Health Field Experience 3-6
Field experience in the practice of public health, as appropriate to each student's area of public health emphasis: public health education, environmental health, or industrial hygiene. Prerequisite: Junior standing in public health. (F,Sp,Su)

**PUBH 4030** Communicable Disease Control 3
Comprehensive study of communicable diseases, including etiological agents, reservoirs of infection, and mechanisms of transmission, control, and prevention. Recommended prerequisite: A course in microbiology. (F)

**PUBH 4040** Fundamentals of Epidemiology 3
Introduction to the study of the distribution and causes of communicable and noncommunicable diseases of humans and other animals. Recommended prerequisite: A course in statistics. (Sp)

**PUBH 4300** Industrial Hygiene Seminar 1
Participant seminar on current developments in industrial hygiene. (F)

**PUBH 4310** Industrial Hygiene Recognition of Hazards 4
Through classroom and field experiences, provides an introduction to industrial hazards and familiarizes students with manufacturing and industrial processes in which industrial hygienists commonly work. Prerequisite: PUBH 3310 (may be taken concurrently). (F)

**PUBH 4320** Industrial Hygiene Chemical Hazard Evaluation 3
Survey of principles and methods used to evaluate industrial chemical health hazards. Practical application in a field sampling project. Prerequisite: PUBH 3310. (Sp)

**PUBH 4330** Industrial Hygiene Physical Hazards 3
Through lectures and labs, covers the potential health effects, methods of exposure evaluation, and principles of control of noise, vibration, heat and cold, and nonionizing and ionizing radiation hazards that can occur in the workplace. Prerequisite: PUBH 3310 or 4310. (Sp)

**PUBH 4380** Industrial Hygiene Internship 3-6
Field experience in the practice of industrial hygiene. Participation in an active program serving employees in either the private or public sector. Prerequisites: PUBH 4300, 4320, and 4330. (F,Sp,Su)

**PUBH 4410** Industrial Safety 3
Through lectures, demonstrations, and hands-on activities, covers recognition and control of industrial safety hazards (including power tools, fire, electricity, excavations, confined spaces, and falls), material handling, process safety, protective equipment, safety promotion and training, and standards and programs. (Sp)

**PUBH 4850** Special Topics in Public Health 1-3
Prerequisite: Junior standing in public health. (F,Sp,Su)

**PUBH 5000** Public Health Seminar 1
Participant seminar on current problems in public health. (Sp)

**PUBH 5330 QI Industrial Hygiene Chemical Hazard Control 3**
Covers methods to control chemical occupational health hazards, with an emphasis on the function, design, and management of local exhaust ventilation. Prerequisites: PUBH 4310, MATH 1210. (F)

**PUBH 5340** Industrial Hygiene and Safety Programs 2
Provides students with the foundation to administer and manage occupational health and safety programs commonly encountered in the workplace. Prerequisites: PUBH 4320 and 4330. (Sp)

**PUBH 5500 CI Public Health Management 2**
Presentation of basic organizational and financial management tools that students will utilize in written and oral reports on an educational, environmental, or occupational health problem of their choice. Prerequisite: PUBH 4000 or 4380 or permission of instructor. (F,Sp)

**PUBH 5670** Hazardous Chemicals Handling and Safety 2
Provides students with necessary skills and knowledge for working safely in areas associated with hazardous chemicals. Topics covered include: regulations, exposure routes, toxicology, chemical and physical hazards, personal protective equipment, sampling, monitoring, decontamination, and emergency response procedures. Prerequisite: CHEM 1210. Also taught as CEE 5670. (Sp)

**PUBH 5730** Analysis and Fate of Environmental Contaminants 3
Provides students with understanding of methods used in analysis of environmental samples for organic contaminants. Examines various properties and processes determining the fate of organic contaminants in the environment. Taught first half of fall semester. Prerequisites: CHEM 1210, 2300. Also taught as CEE 5730/6730. (F)

**PUBH 5790** Accident and Emergency Management 3
Introduction to fundamentals of accident, hazard, and emergency management. Topics include legislation; chemical safety fundamentals; fire, explosion, and spill fundamentals; contaminant air transport fundamentals; hazard and risk assessment; dispersion applications; and hazard and risk management applications. Prerequisite: CHEM 1220. Also taught as CEE 5790. (Sp)
## Course Descriptions

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PUBH 6730</td>
<td>Analysis and Fate of Environmental Contaminants</td>
<td>3</td>
<td>Provides students with understanding of methods used in analysis of environmental samples for organic contaminants. Examines various properties and processes determining the fate of organic contaminants in the environment. Taught first half of fall semester. Prerequisites: CHEM 1210, 2300. Also taught as CEE 6730/5730. (F)</td>
</tr>
<tr>
<td>REH 6100</td>
<td>Introduction to Rehabilitation Counseling</td>
<td>3</td>
<td>Overview of history, philosophy, and legal basis of rehabilitation programs, both public and private. Independent living programs. Roles of the rehabilitation counselor and the process of rehabilitation. Skill development including literature review, writing, and professional organizations. (F)</td>
</tr>
<tr>
<td>REH 6110</td>
<td>Medical Aspects of Disability</td>
<td>3</td>
<td>Overview of basic medical issues affecting employment and independent living for persons with disabilities. Explores basic anatomy and systems, as well as disorders and diseases of these systems. Covers medical terminology applicable to rehabilitation counseling. (F)</td>
</tr>
<tr>
<td>REH 6120</td>
<td>Psychosocial Aspects of Disability</td>
<td>3</td>
<td>Explores psychological and sociological aspects of disabilities, including adjustment factors in living with disabilities (i.e., individual, family, sexuality, other service providers, etc.). Examines societal attitudes, women’s issues, and deaf culture issues. Includes group counseling applications for persons with disabilities. (Su)</td>
</tr>
<tr>
<td>REH 6130</td>
<td>Rehabilitation Counseling Skill Development</td>
<td>2</td>
<td>Utilizes role playing of simulated interviews and rehabilitation counseling sessions to develop the basic skills necessary to function as a human service helper. Must be taken concurrently with REH 6140. Prerequisite: Permission of instructor. (Su)</td>
</tr>
<tr>
<td>REH 6140</td>
<td>Practicum in Rehabilitation</td>
<td>2</td>
<td>Under faculty supervision, students receive minimum of 100 hours of firsthand experience working with persons with disabilities in rehabilitation agency or facility. Must be taken the first time concurrently with REH 6130. With faculty approval, may be repeated for credit. Prerequisite: Permission of instructor. (F,Sp,Su)</td>
</tr>
<tr>
<td>REH 6150</td>
<td>Case Studies in Rehabilitation</td>
<td>3</td>
<td>Coordination of community resources, individual assessment information, ethical issues, eligibility determination, and development of individualized rehabilitation programs and independent living plans. Time, fiscal, and caseload management skills for rehabilitation professionals. Emphasizes client choice in rehabilitation planning. (Sp)</td>
</tr>
<tr>
<td>REH 6160</td>
<td>Job Analysis, Development, and Placement for Persons with Disabilities</td>
<td>3</td>
<td>Applies career development theories to job placement. Presents job placement factors resulting in employment for persons with disabilities, including job analysis, job development and retention, advocacy, assistive technology, ADA, occupational information systems, and labor market analysis. (Sp)</td>
</tr>
<tr>
<td>REH 6170</td>
<td>Internship in Rehabilitation</td>
<td>4-12</td>
<td>Direct supervised provision of rehabilitation services to persons with disabilities in a community facility or agency. Total of 360 hours of direct service required for each 6 semester credits. Repeatable for up to 12 credits. Prerequisite: Permission of instructor. (F,Sp,Su)</td>
</tr>
<tr>
<td>REH 6180</td>
<td>Rehabilitation of Persons with Severe Mental Illness</td>
<td>3</td>
<td>Overview of rehabilitation of persons with severe mental illness, including psychopathology, housing, case management, job placement, diagnosis (DSM-IV-TR), and social learning programs. Includes information on rehabilitation of persons experiencing substance abuse, dual diagnoses, and learning disorders. (Sp)</td>
</tr>
<tr>
<td>REH 6190</td>
<td>Vocational Assessment for Persons with Disabilities</td>
<td>3</td>
<td>Addresses vocational assessment for persons with disabilities. Includes overview of traditional vocational assessment, but focuses on contemporary methodology developed for individuals with severe disabilities. Discussion of functional assessment, including client choice and ecological assessment issues. (F)</td>
</tr>
<tr>
<td>REH 6200</td>
<td>Theories of Counseling Applied to Persons with Disabilities</td>
<td>3</td>
<td>Introduction to established counseling theories and their implications for providing services to persons with disabilities. Discussion of individual and group counseling paradigms. Emphasizes development of students’ individual counseling philosophies. (F)</td>
</tr>
<tr>
<td>REH 6210</td>
<td>Vocational Evaluation Principles and Systems</td>
<td>2</td>
<td>Introduction to vocational evaluation principles and their application in using commercially available vocational evaluation systems. Actual practice with the systems (including integrated report writing) in the rehabilitation services clinic. (Su)</td>
</tr>
<tr>
<td>REH 6220</td>
<td>Culturally Valid Rehabilitation Practices</td>
<td>2</td>
<td>Analysis of the effect of cultural/ethnic/racial/linguistic background in the rehabilitation counseling setting, including acceptance/perception of disability, and successful application, process, and rehabilitation outcome. Practice applications include provision of culturally sensitive counseling, vocational evaluation, and job placement. (Su)</td>
</tr>
<tr>
<td>REH 6230</td>
<td>Introduction to Rehabilitation Research</td>
<td>3</td>
<td>Provides introduction to research methods in rehabilitation and disability studies, including the various types of research designs and the use of statistical methods. Introduces students to empirical research journals in rehabilitation. (Sp)</td>
</tr>
<tr>
<td>REH 6560</td>
<td>Special Topics in Rehabilitation</td>
<td>1-4</td>
<td>Opportunity to provide specialized training in topics unique to rehabilitation. Topics cover many disability, employment, and independent-living issues. (F,Sp,Su)</td>
</tr>
<tr>
<td>REH 6900</td>
<td>Independent Study</td>
<td>1-3</td>
<td>Prerequisite: Permission of instructor. (F,Sp,Su)</td>
</tr>
<tr>
<td>REH 6910</td>
<td>Independent Research</td>
<td>1-3</td>
<td>Prerequisite: Permission of instructor. (F,Sp,Su)</td>
</tr>
<tr>
<td>REH 6970</td>
<td>Thesis</td>
<td>1-6</td>
<td>This course is not currently being offered. For information about when it may be offered, contact the department.</td>
</tr>
<tr>
<td>REH 6990</td>
<td>Continuing Graduate Advisement</td>
<td>1-3</td>
<td>Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>
<tr>
<td>REH 7060</td>
<td>Research Internship</td>
<td>1-3</td>
<td>Guided experience in conducting rehabilitation/disability research. Graded Pass/Fail only. Prerequisite: Permission of instructor. (F,Sp,Su)</td>
</tr>
<tr>
<td>REH 7330</td>
<td>Supervision Internship</td>
<td>1-3</td>
<td>Guided experience in supervising master’s students during practicum and internship, as well as during other clinical experiences. Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>
<tr>
<td>REH 7340</td>
<td>College Teaching Internship</td>
<td>1-3</td>
<td>Guided experience in teaching university courses. Graded Pass/Fail only. (F,Sp,Su)</td>
</tr>
<tr>
<td>REH 7730</td>
<td>Disability Law and Policy</td>
<td>3</td>
<td>Examines disability issues as addressed through legislative process. Analyzes key statutes and case law, reflecting historical and current landmarks in disability</td>
</tr>
</tbody>
</table>
Course Descriptions

policy, in the context of the disability rights movement, societal perceptions, and barriers to implementation. (Sp)

REH 7740 Sociopolitical Construction of Disability®  3
Examines disability experience from four different perspectives: biomedical, environmental, functional, and sociopolitical. Also explores society’s response to disability. Discusses history and perspective of the Disability Rights movement. (F)

REH 7820 Special Topics in Rehabilitation Counseling  1-3®
Critical analysis of a variety of rehabilitation counseling issues and trends. Empirical and theoretical information presented in a seminar format. (F,Sp,Su)

REH 7940 Journal Reading Group  1-2®
Seminar discussion of recent empirical and theoretical articles concerning rehabilitation counseling, disability policy, and related fields. (F,Sp,Su)

REH 7970 Dissertation  1-18®
Variable credit for dissertation project associated with doctoral program in disability disciplines. Graded Pass/Fail only. (F,Sp,Su)

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Religious Studies (RELS)

See Religious Studies Major and Minor, pages 494-497

RELS 1010 Introduction to Religious Studies®  3
Historical and comparative survey of the principal beliefs and practices of the world’s religions, as well as an exploration of their impact on the cultures in which they exist. Following general introduction to the study of religion, course includes units on Hinduism, Buddhism, Chinese and Japanese religions, Islam, Judaism, Christianity, and the “new religions” in America.

RELS 2010 Introduction to Religious Studies Methodology  3
Pre-major course helping students to understand the discipline of religious studies. Explores the questions asked by religious studies, as well as the methods used to answer these questions. Helps students gain an understanding of the various approaches to the study of religion and the history of attempts to understand religion in cultural contexts.

RELS 3010 Introduction to Buddhism®  3
General survey of historical development, basic doctrine, and practice of Hinayana and Mahayana Buddhism. Also taught as HIST 3010.

RELS 3020 Introduction to Hinduism®  3
Surveys history, doctrinal developments, and sociological concerns of Hinduism from the Vedic Period through the Modern Period. Focuses primarily on Hindu religious thought as applied to Hindu life through various modes of religious action. Also taught as HIST 3020.

RELS 4010 Buddhism in the West®  3
One-semester introduction to Buddhism in the Western world for nonspecialists in Buddhism. Focuses on development of Buddhism as a Western religious phenomenon. Presents interpretive, historical introduction to Buddhism in the West. Also taught as HIST 4010.

RELS 4990 Religious Studies Capstone  3
Students write a substantial research paper dealing with a religious studies topic and demonstrating their command of the research methods, documentation, and style of professional communications used in the discipline. (F,Sp)

This course is taught alternating years. Check with the Religious Studies Program for information about when course will be taught.

Russian (RUSS)

See Department of Languages, Philosophy, and Speech Communication, pages 364-379

RUSS 1010 Russian First Year I  4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Not open to those with more than one year high school Russian or equivalent. (F)

RUSS 1020 Russian First Year II  4
Communicative competencies in the four language skills: speaking, listening, reading, and writing, with exposure to cultures and customs. Prerequisite: RUSS 1010, or not more than three years of high school Russian. (Sp)

RUSS 2010 Russian Second Year I  4
Further development of first-year competencies with emphasis on language structure, vocabulary expansion, reading, writing, and conversation in the context of culture. Prerequisite: RUSS 2010 or two or more years of high school Russian. (F)

RUSS 2020 Russian Second Year II  4
Further development of first-year competencies with emphasis on language structure, vocabulary expansion, reading, writing, and conversation in the context of culture. Prerequisite: RUSS 2010 or three or more years of high school Russian. (Sp)

RUSS 2880 Individual Readings  1-4®
Individual study of selected readings in Russian. Prerequisite: Instructor’s permission. (F,Sp)

RUSS 3040 Advanced Russian Grammar and Composition  3
(F)

RUSS 3050 Advanced Russian Grammar and Composition  3
Detailed presentation of Russian grammar. Class discussions and work on oral and written assignments. Prerequisite: RUSS 2020 or equivalent. (Sp)

RUSS 3300 DHA Contemporary Russian Language and Culture  3
Discussion of contemporary Russia, including its geography, business, government, literature, art, etc. Prerequisite: RUSS 2020 or equivalent.

RUSS 3510 CI Business Russian  3
Study of current Russian business and commercial terminology and practices. Development of communication skills for international Russian business purposes. Prerequisite: RUSS 2020 or equivalent.

RUSS 3540 Russian Translation for Science, Business, and Culture  3
Familiarization with approaches to translation, special grammatical structures, specialized vocabulary, and reference materials and aids. Practical exercises. Prerequisite: RUSS 2020 or equivalent.

RUSS 4880 Individual Readings 1  1-4®
Readings in technical, scientific, or literary Russian. Prerequisite: Instructor’s permission. (F,Sp)

RUSS 4920 Russian Language Tutoring 1  1®
Allows students to develop tutoring skills by assisting professors in lower-division courses or fulfilling instructional duties for a comparable amount of time in the language laboratory, public schools, or similar activities with departmental approval. May be repeated to a maximum of 3 credits. Prerequisite: Permission of instructor. (F,Sp)

®Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

1This course is repeatable for credit and may be taken a maximum of three times.
**Secondary Education (SCED)**

**SCED 1000  Volunteer Experience**  
Optional course providing orientation to agencies coordinating volunteer experiences in the community; such experiences are part of standards for admission to secondary teacher education. (F,Sp,Su)

**SCED 3100  Motivation and Classroom Management**  
Designed to lead pre-service secondary school teachers to address two questions: (1) What diverse traits, talents, attitudes, and experiences do pre-adolescent and adolescent students bring to the middle school, junior high school, and high school environment? and (2) In light of these diverse traits, talents, attitudes, and experiences, how should teachers work with students to build cooperative classroom communities where students are motivated to engage in productive learning activities? (F,Sp)

**SCED 3210 DSS/CI Educational and Multicultural Foundations**  
Provides preservice teachers with the opportunity to critically examine the political, economic, and educational policies influencing students' access to equitable educational experiences. Examines historical and philosophical foundations influencing the nature of multicultural education in our democratic society, how personal biases can influence instructional practices, and development of multicultural curriculum relevant to specific content areas. (F,Sp)

**SCED 3300  Clinical Experience I**  
First clinical practicum (40 hours minimum) in middle and secondary schools, arranged by special methods instructors in department. Required at level 1. Graded Pass/Fail only. Prerequisite: Program admission. (F,Sp)

**SCED 3400  Teaching Science I**  
Laboratory practicum focused on design, practice, and performance of secondary science demonstrations and investigative lab activities. Must be taken at Level 1. Prerequisite: Program admission. (F,Sp)

**SCED 3500  Teaching Social Studies**  
Methods course focused on social studies curriculum and instruction for preservice secondary teachers with teaching majors or minors in history or any of the social sciences. Should be taken at Level 1. Prerequisite: Program admission. (F,Sp)

**SCED 3600  Teaching English**  
Methods course focused on English curriculum and instruction for preservice secondary teachers with teaching majors or minors in English. May be taken at either Level 1 or Level 2. Prerequisite: Program admission. (F,Sp)

**SCED 4200 CI  Reading, Writing, and Technology**  
Performance-based class focused on a wide range of academic skills related to reading, writing, and advanced technology access. Prerequisite: Program admission and completion of Level 1. (F,Sp)

**SCED 4210  Cognition and Evaluation of Student Learning**  
Designed to lead the preservice secondary school teacher to address two questions: (1) How do students construct concepts; discover relationships; and develop knowledge-level skills, comprehension and communication skills, and problem-solving abilities? (2) How do teachers monitor students’ progress, evaluate and communicate their achievement, and interpret the results of system-wide and standardized test results to students and their parents? (F,Sp)

**SCED 4300  Clinical Experience II**  
Second clinical practicum (40 hours minimum) in middle and secondary schools, arranged by special methods instructors in department. Required at level 2. Graded Pass/Fail only. Prerequisite: Program admission and completion of Level 1. (F,Sp)

**SCED 4400  Teaching Science II**  
Methods course focused on science curriculum and instruction for preservice secondary teachers with teaching majors in any of the science areas. Must be taken at Level 2. Prerequisite: Program admission, completion of Level 1, and SCED 3400. (F,Sp)

**SCED 4600  Philosophy and Organization of the Middle Level School**  
Focuses on characteristics of young adolescents and how middle level schools can be organized to meet those characteristics through interdisciplinary teaching, advisory programs, and exploratory mini-courses. Also taught as ELED 4600/6600. (F,Su)

**SCED 4610  Curriculum, Methods, and Assessment for the Middle Grades**  
Integrates current approaches to curriculum design with instructional models and assessment of learning appropriate for grades 5-9. Also taught as ELED 4610/6610. (Sp,Su)

**SCED 4620  Service Learning Applications for the Middle Grades**  
Examines literature related to service learning for the middle grades. Application of service learning in curriculum. Also taught as ELED 4620/6620. (Su)

**SCED 4710  Diversity in Education**  
Provides educators with background and techniques for more effectively addressing the needs of students in a culturally and linguistically diverse society. Diversity topics also include religion, socioeconomic class, ability differences, race, gender, and sexual orientation. Prerequisite: Admission into a teacher education program. Also taught as ELED 4710. (Sp,Su)

**SCED 4730  Educational Linguistics**  
Examines theoretical foundations, functions, and characteristics of first language acquisition and language variation in the Pre-K-12 classroom context. Also emphasizes social context of language in K-12 classroom interaction, instruction, and curriculum. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 4730/6730. (F)

**SCED 4740  Second Language Acquisition in the Classroom**  
Explores the processes of second language acquisition, including the influences of linguistic, cognitive, and sociocultural factors, as well as the relationship to first language acquisition. Emphasizes implications for teaching in the K-12 classroom environment. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 4740/6740. (Sp)

**SCED 4760  ESOL Instructional Strategies**  
Includes strategies for promoting oral language, reading, and writing for K-12 English language learners. Methods for integration for second language learners into the larger school community. Discussion of parental involvement. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 4760/6760. (F,Sp)

**SCED 4770  ESOL Instructional Strategies in the Content Areas**  
Focuses on methods which help English language learners in content-area classrooms to increase academic learning and integration into the larger school community. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 4770/6770. (F,Sp,Su)

**SCED 4780  Assessment for Language Learners**  
Explores principles and techniques for developing, analyzing, and interpreting assessment measures for English language learners, including oral, written, reading, and content-area assessment, as well as assessments used in public schools. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 4780/6780. (F,Su)

**SCED 4900H  Senior Thesis**  
Student-initiated research project under faculty supervision. Requires prior approval of department head, honors committee, and instructor. Prerequisite: Approval of department head. (F,Sp)
## Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SCED 5000</td>
<td>Practicum in Improvement of Instruction (dual listing 6000)</td>
<td>1-6°</td>
<td>Open topics course focusing upon effective teaching methods, teaching performance, curriculum decision-making, and characteristics of learners. Graded Pass/Fail only. Also taught as ELED 5000/6000. (F,Sp,Su)</td>
</tr>
<tr>
<td>SCED 5400</td>
<td>Laboratory Practicum</td>
<td>3</td>
<td>Laboratory practicum for inservice teachers, focused on design, practice, and performance of secondary science demonstrations and investigative lab activities. (F,Sp)</td>
</tr>
<tr>
<td>SCED 5500</td>
<td>Student Teaching Seminar</td>
<td>2</td>
<td>Ten-week capstone seminar focused upon student teaching issues, professional development, and principles of effective instruction, emphasizing reflective teaching. Graded Pass/Fail only. Prerequisites: Level 1 and Level 2 completion, and student teaching placement. (F,Sp)</td>
</tr>
<tr>
<td>SCED 5630</td>
<td>Student Teaching in Secondary Schools</td>
<td>10</td>
<td>Thirteen-week culminating practicum in which students assume full-time teaching responsibilities under direction of cooperating teachers in major and minor fields. Prerequisites: Level 1 and Level 2 completion, and student teaching placement. Graded Pass/Fail only. (F,Sp)</td>
</tr>
<tr>
<td>SCED 5700</td>
<td>Modified Student Teaching</td>
<td>2-4</td>
<td>Culminating practicum experience for students seeking dual licensure, earning half of their student teaching credit in a secondary school setting. Graded Pass/Fail only. Prerequisite: Program admission and completion of Level 1 and Level 2. (F,Sp)</td>
</tr>
<tr>
<td>SCED 5800</td>
<td>Secondary School Internship</td>
<td>2-6</td>
<td>Advanced practical teaching experience under combined public school and University supervision. Offered only by arrangement with Director of Field Experiences. Graded Pass/Fail only. Prerequisites: Level 1 and Level 2 completion, and special recommendation. (F,Sp)</td>
</tr>
<tr>
<td>SCED 5900</td>
<td>Independent Study</td>
<td>1-3°</td>
<td>Prerequisite: Instructor approval. (F,Sp)</td>
</tr>
<tr>
<td>SCED 6000</td>
<td>Practicum in Improvement of Instruction (dual listing 5000)</td>
<td>1-6°</td>
<td>Open topics course focusing upon effective teaching methods, teaching performance, curriculum decision-making, and characteristics of learners. Also taught as ELED 6000/5000. (F,Sp,Su)</td>
</tr>
<tr>
<td>SCED 6040</td>
<td>Designing and Interpreting Measurements for Assessing Student Learning</td>
<td>3</td>
<td>Teachers and instructional supervisors develop their talents for (a) designing and interpreting measurements for monitoring students’ learning and (b) interpreting scores from standardized and government-mandated tests. Also taught as ELED 6040. (F,Sp,Su)</td>
</tr>
<tr>
<td>SCED 6100</td>
<td>Motivation and Management in Inclusive Settings</td>
<td>3</td>
<td>Leads in-service teachers to develop classroom management strategies for gaining and maintaining students’ cooperation. Also taught as ELED 6100. (Sp,Su)</td>
</tr>
<tr>
<td>SCED 6150</td>
<td>Foundations of Curriculum</td>
<td>3</td>
<td>Examination of theories, principles, and foundations of curriculum, emphasizing program planning and current curriculum trends. Also taught as ELED 6150. (F,Sp,Su)</td>
</tr>
<tr>
<td>SCED 6190</td>
<td>Theories of Learning and Models of Teaching</td>
<td>3</td>
<td>Review of epistemological, psychological, and educational theories on learning and the various teaching practices they justify. Also taught as ELED 6190. (F,Sp,Su)</td>
</tr>
<tr>
<td>SCED 6250</td>
<td>Mathematics Curriculum and Instruction</td>
<td>2</td>
<td>Examination of current curriculum standards, trends, and effective methods of instruction for mathematics in middle and secondary schools. (Su)</td>
</tr>
<tr>
<td>SCED 6300</td>
<td>English Curriculum and Instruction</td>
<td>2</td>
<td>Examination of current curriculum standards, trends, and effective methods of instruction for English/language arts in middle and secondary schools. (Su)</td>
</tr>
<tr>
<td>SCED 6310</td>
<td>Content Area Reading and Writing</td>
<td>3</td>
<td>Practical approaches for teaching reading/writing and learning skills to elementary, middle, and high school students, in all content areas. Also taught as ELED 6310. (F,Su)</td>
</tr>
<tr>
<td>SCED 6320</td>
<td>Literacy and Cognition</td>
<td>3</td>
<td>Examination of cognitive and sociocultural research related to K-12 students’ acquisition and use of reading, writing, and learning strategies. Explores implications for school policies and classroom instruction. Also taught as ELED 6320/7320. (Sp)</td>
</tr>
<tr>
<td>SCED 6330</td>
<td>Utah Writing Project</td>
<td>1-6°</td>
<td>Workshop, seminar, and institute experiences in the Utah Writing Project, focusing on writing process, principles, and research-based strategies for improving writing instruction in grades K-12. Also taught as ELED 6330. (Su)</td>
</tr>
<tr>
<td>SCED 6340</td>
<td>Issues and Trends in Literacy</td>
<td>2°</td>
<td>Exploration of current issues and instructional trends in the teaching of reading and writing. Emphasis on reading widely and critically in the professional literature. Prerequisites: ELED 3100, 4040; or teaching experience in elementary or middle school. Also taught as ELED 6340.</td>
</tr>
<tr>
<td>SCED 6350</td>
<td>Reading Assessment and Intervention</td>
<td>3</td>
<td>Covers the correlates and diagnosis of reading problems, as well as methods and materials for remedial reading instruction. Prerequisites: ELED 3100, 4040; or teaching experience in elementary, middle, or secondary school. Also taught as ELED 6350. (Sp)</td>
</tr>
<tr>
<td>SCED 6360</td>
<td>Research in Reading</td>
<td>3</td>
<td>Covers classical, historical, and contemporary research studies in reading, with an emphasis upon understanding and translating findings into classroom practices. Prerequisites: ELED 3100, 4040; or teaching experience in elementary or middle school. Also taught as ELED 6360. (Su)</td>
</tr>
<tr>
<td>SCED 6370</td>
<td>Supervised Internship in Reading and Writing</td>
<td>1-3°</td>
<td>Individual practicum experience designed to allow graduate students to implement and focus on one or more aspects of reading and writing instruction in a classroom or clinic setting. Prerequisite: Consent of instructor. Also taught as ELED 6370. (F,Sp,Su)</td>
</tr>
<tr>
<td>SCED 6380</td>
<td>Understanding and Supporting Adolescent Literacy Development</td>
<td>3</td>
<td>Focuses on instructional practices, as well as research and theory related to fostering the literacy development of middle school and high school students (Sp,Su)</td>
</tr>
<tr>
<td>SCED 6390</td>
<td>Teaching with Tradebooks in the Elementary and Middle Level Classroom</td>
<td>3</td>
<td>Explores the use of trade books in the elementary and middle level classroom. Focuses on how teachers can use various genres to invite children to read and write. Prerequisites: SCED/ELED 6310 or 6360. Also taught as ELED 6390. (Su)</td>
</tr>
<tr>
<td>SCED 6400</td>
<td>Multiple Talent Approach to Teaching</td>
<td>2</td>
<td>Explores one model for embedding the teaching of creative and critical thinking in regular curricula. Includes practical application requirements. Also taught as ELED 6400. (Su)</td>
</tr>
<tr>
<td>SCED 6420</td>
<td>Education of Gifted and Talented Learners</td>
<td>2</td>
<td>Provides multiple cultural and historical perspectives on giftedness and talent. Explores characteristics of gifted individuals, with emphasis on identifying needs. Provides general overview of possible services for gifted learners. Must be taken concurrently with ELED/SCED 6430. Also taught as ELED 6420. (F)</td>
</tr>
<tr>
<td>SCED 6430</td>
<td>Practicum: Individual Case Study</td>
<td>1</td>
<td>Practicum experience in association with ELED/SCED 6420. Requires intensive supervised study of gifts and talents of individual child of student’s choice. Graded Pass/Fail only. Must be taken concurrently with ELED/SCED 6420. Also taught as ELED 6430. (F)</td>
</tr>
<tr>
<td>SCED 6440</td>
<td>Creativity in Education</td>
<td>2</td>
<td>Exploration of theories, research, and strategies concerning creativity, and their application to personal creativity and to improvement of classroom practice. Also taught as ELED 6440. (Su)</td>
</tr>
</tbody>
</table>
Course Descriptions

SCED 6460  Identification and Evaluation in Gifted Education  2
Provides educators with theory and models for identifying students as gifted, creative, and talented. Presents models for evaluation of programs for gifted learners. Explores instruments for use in identification and evaluation. Must be taken concurrently with ELED/SCED 6470. Also taught as ELED 6460. (Sp)

SCED 6470  Practicum: Team Consultation  1
Practicum experience in association with ELED/SCED 6460. Requires participation, as part of a consultative team, to improve practice in an approved setting for a specific child, classroom, school, school district, or other educational entity. Graded Pass/Fail only. Must be taken concurrently with ELED/SCED 6460. Also taught as ELED 6470. (Sp)

SCED 6480  Methods and Materials in Gifted Education  2
Explores programming and curriculum models in gifted education, with special attention to the development of instructional materials for use with students. Graded Pass/Fail only. Must be taken concurrently with ELED/SCED 6480. Also taught as ELED 6480. (F)

SCED 6480  Practicum: Classroom Applications  1
Practicum experience in association with ELED/SCED 6480. Requires application of at least three curriculum, cognitive, or affective models in the student’s current teaching assignment. Must be taken concurrently with ELED/SCED 6480. Also taught as ELED 6490. (F)

SCED 6500  Science Curriculum and Instruction  2
Examination of current curriculum standards, trends, and effective methods of instruction for science in middle and secondary schools. Emphasizes science program improvement through investigative lab activities. (Su)

SCED 6550  Social Studies Curriculum and Instruction  3
Examination of current curriculum standards, trends, and effective methods of instruction for social studies in middle and secondary schools. (Su)

SCED 6570  Advanced Comprehension  3
Designed to enhance teachers’ understanding of research and practice related to teaching vocabulary and reading comprehension and fostering motivation for reading. Prerequisite: ELED/SCED 6310 or 6360. Also taught as ELED 6570. (All years)

SCED 6580  Character and Values Education  2
Overview of research, theory, and practical approaches to values education, emphasizing processes of moral development and socialization. Also taught as ELED 6580. (Su)

SCED 6590  Supervising School Reading Program  2
Examines strategies for improving school reading programs. Emphasizes simulations, guided practice, and small group discussions. Prerequisites: ELED/SCED 6350 and 6360. Also taught as ELED 6590. (Sp)

SCED 6600  Philosophy and Organization of the Middle Level School  3
Focuses on characteristics of young adolescents and how middle level schools can be organized to meet those characteristics through interdisciplinary teaming, advisory programs, and exploratory mini-courses. Also taught as ELED 6600/4600. (F,Su)

SCED 6610  Curricular, Methods, and Assessment for the Middle Grades  3
Integrates current approaches to curriculum design with instructional models and assessment of learning appropriate for grades 5-9. To receive credit for 6610, graduate students design and implement an action research project related to curricular or pedagogical interests, then share their findings in class. Project will include review of literature related to student’s interest. Prerequisite: ELED/SCED 6600. Also taught as ELED 6610/4610. (Sp,Su)

SCED 6620  Service Learning Applications for the Middle Grades  3
Examines literature related to service learning for the middle grades. Application of service learning in curriculum. Also taught as ELED 6620/4620. (Su)

SCED 6730  Educational Linguistics  3
(dual listing 4730)
Examines theoretical foundations, functions, and characteristics of first language acquisition and language variation in the Pre-K-12 classroom context. Also emphasizes social context of language in K-12 classroom interaction, instruction, and curriculum. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 6730/4730. (F,Su)

SCED 6740  Second Language Acquisition in the Classroom  3
Examines the processes of second language acquisition, including the influences of linguistic, cognitive, and sociocultural factors, as well as the relationship to first language acquisition. Emphasizes implications for teaching in the K-12 classroom environment. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 6740/4740. (Sp)

SCED 6760  ESOL Instructional Strategies  3
(dual listing 4760)
Focuses on methods which help English language learners in content-area classrooms to increase academic learning and integration into the larger school community. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 6770/4770. (F,Sp,Su)

SCED 6770  Assessment for Language Learners  3
(dual listing 4780)
Explores principles and techniques for developing, analyzing, and interpreting assessment measures for English language learners, including oral, writing, reading, and content-area assessment, as well as assessments used in public schools. Additional requirements for graduate students. Prerequisite: Admission into a teacher education program. Also taught as ELED 6780/4780. (F,Su)

SCED 6840  Workshop: Intermountain Conference on Education of the Gifted and Talented  1-2*
Provides instruction by leading national authorities in gifted and talented education, as well as networking with educators of the gifted from throughout the Intermountain West. Also taught as ELED 6840. (Su)

SCED 6900  Independent Study  1-3*
Individually directed readings and conference. Departmental permission required before registration. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 6910  Independent Research  1-3*
Individually directed research projects. Departmental permission required before registration. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 6920  Supervision and Administration Internship  3
Individually directed internship experiences in secondary school settings for development of supervisory and administrative skills. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 6930  Creative Project  3
Individually directed creative project, with a focus closely related to coursework or area of teaching specialization. Only students pursuing the Plan B MEd option should enroll in this course. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 6970  Master’s Thesis  3-6
Individually directed work in thesis writing, with guidance from committee chair. Designed for use on MA and MS degrees only. Graded Pass/Fail only. Prerequisite: Instructor’s approval. (F,Sp,Su)

SCED 6980  Portfolio Project  3
Individually directed portfolio for students in the MEd Plan B degree, only to be taken at the end of student’s program of study. Designed for students to integrate and apply concepts learned in the master’s program. Prerequisite: Instructor’s approval. (F,Sp,Su)
Course Descriptions

SCED 6990 Continuing Graduate Advisement 1-9®
Graded Pass/Fail only. (F,Sp,Su)

SCED 7000 Student Teacher Supervision 1-3
Experiences in providing guidance for secondary student teachers in public schools. Analysis of roles and responsibilities of cooperating teachers and university supervisors. Graded Pass/Fail only. Prerequisite: Instructor's approval. (F,Sp)

SCED 7050 Internship in Program Evaluation 1-6
Experiences in practical aspects of program evaluation through planned and supervised evaluation project participation. Must be approved by student's graduate committee. Prerequisite: Instructor's approval. (F,Sp,Su)

SCED 7060 Internship in Research 1-6
Experiences in conducting research through planned and supervised research project participation. Must be approved by student's graduate committee. Prerequisite: Instructor's approval. (F,Sp,Su)

SCED 7320 Literacy and Cognition 3
(dual listing 6320)
Examination of cognitive and sociocultural research related to K-12 students' acquisition and use of reading, writing, and learning strategies. Explores implications for school policies and classroom instruction. Also taught as ELED 7320/6320. (Sp)

SCED 7330 Internship in Supervision 1-3
Directed experiences in supervision with selected public school personnel in approved settings. Experiences arranged by student's graduate committee. Prerequisite: Instructor's approval. (F,Sp,Su)

SCED 7350 Internship in Curriculum Development 1-3
Directed experiences in curriculum development with selected public school personnel in approved settings. Experiences arranged by student's graduate committee. Prerequisite: Instructor's approval. (F,Sp,Su)

SCED 7500 Interdisciplinary Workshop 1-3®
Prerequisite: Instructor's approval. (Su)

SCED 7810 Research Seminar 1-3®
Identification of research problems and critical issues, consideration of critical issues and research methods, and application of data analysis procedures under faculty direction. (F,Sp,Su)

SCED 7900 Independent Study 1-3®
Individually directed reading and conference. Departmental permission required before registration. Prerequisite: Instructor's approval. (F,Sp,Su)

SCED 7910 Independent Research 1-3®
Individually directed research projects. Departmental permission required before registration. Prerequisite: Instructor's approval. (F,Sp,Su)

SCED 7970 Dissertation 1-12®
Individual work on research problems in the PhD or EdD program. Graded Pass/Fail only. Prerequisite: Instructor's approval. (F,Sp,Su)

SCED 7990 Continuing Graduate Advisement 1-12®
Graded Pass/Fail only. Prerequisite: Approval of instructor. (F,Sp,Su)

®Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Science (SCI)

See College of Science, pages 131-132

SCI 4300 Science in Society 2
Investigation of interactions between current scientific topics and societal goals and concerns. Intended as a capstone course for science teaching majors. Prerequisite: Senior standing and consent of instructor. (F,Sp)

Sociology (SOC)

See Department of Sociology, Social Work and Anthropology, pages 505-516

SOC 1010 BSS Introductory Sociology 3®
Examination of social behavior of humans and social institutions. Theories and methods for studying society and social issues, along with insights from related disciplines. (F,Sp)

SOC 1020 Social Problems 3
Study of major U.S. and international social problems. Examination of how issues are defined as social problems and ways groups attempt to solve the problems. (F,Sp)

SOC 2370 Sociology of Gender
(formerly SOC 2500)
Examines impacts of social constructions of gender on individual and collective experience. Investigates how gender is shaped through social processes and through the effects of social institutions. Particular attention given to relation of gender to social stratification. (F)

SOC 3010 Race, Class, and Gender 3
Examines theories and research concerning how race, class, and gender intersect in the lives of societal members. (F,Sp)

SOC 3110 CI Methods of Social Research 3
Methods and techniques of analyzing social data. Examines surveys, field research, observational studies, and other social science techniques. Emphasizes analysis of data and published research. Prerequisite: Completion of 6 credits in departmental courses. (F,Sp)

SOC 3120 QI Social Statistics I 3
Examines use of statistics in social sciences. Particular focus on use of statistical analysis with surveys and census-type data. Includes parametric and nonparametric statistics utilized most in social analysis. Prerequisite: Completion of 6 credits in departmental courses and STAT 1040 or equivalent. (F,Sp)

SOC 3200 DSS Population and Society 3
Examination of interrelationships between population change and social structure in national and international context. Examines contributions of fertility, mortality, and migration to population characteristics, particularly sex, age, and ethnic composition. Stresses demographic data and analysis. (F,Sp)

SOC 3320 Sociology of Work and Organization 3
Stresses contribution of sociology to the understanding of industry as a social system. (Sp)

SOC 3330 Medical Sociology 3
In-depth analysis of major contributions of sociology to field of medicine. (F)

SOC 3410 Juvenile Delinquency 3®
Focuses on nature, extent, and causes of delinquent behavior. Examines workings of juvenile justice system and programs for delinquency prevention. (F,Sp)

SOC 3420 Criminology 3
Examines theoretical explanations for crime in the U.S. Describes characteristics of major forms of criminal behavior. (F,Sp)

SOC 3430 Social Deviance 3
Examination of sociological perspectives on deviance as they apply to lifestyles, commitment, and social control in American society. (F)

SOC 3500 Social Psychology 3
Explores interaction between the social system and the individual. Examines human behavior in terms of positions people occupy in the social structure. (F,Sp)

SOC 3600 Sociology of Urban Places 3
Provides historical and international perspective on social, cultural, and spatial characteristics of urban places. Examines changes associated with urbanization processes and the effect of urbanization on community, crime, neighborhoods, and urban space. (F)
Course Descriptions

SOC 3610 DSS Rural Sociology 3
Examine patterns and processes of social change in rural and nonmetropolitan sectors of the U.S. and other advanced industrial societies. Considers how rural social change is influenced by demographic, economic, political, and natural resource conditions at regional, national, and global scales. (F)

SOC 3750 Sociology of Aging 3
Examination of social context in which aging occurs, the social implications of aging, and attendant social policy issues. Considers both individual and societal aging, using an historical and global approach. (F)

SOC 4010 Contemporary Sociological Theory 3
Critical analysis of major theorists and schools of theory in sociology from the late nineteenth century through recent and current works. Emphasizes contemporary issues, insights, and uses of sociological theory. (F,Sp)

SOC 4330 Sociology of Religion 3
Discussion of theories and research used by sociologists to understand social dimensions of religion. Includes ways in which religion influences and is influenced by other societal institutions, such as politics, the economy, and the class system. (F)

SOC 4350 Political Sociology* 3
Examines prevalent theories and concepts related to global development, underdevelopment, and social change, while building an understanding of contemporary global social issues accompanying these processes. Particular emphasis placed on understanding global inequality and regional differences. (Sp)

SOC 4420 CI Criminal Law and Justice 3
Sociological analysis of relationship between law and social control and social change, especially regarding law enforcement, courts, and corrections. (Sp)

SOC 4620 DSS Sociology of the Environment and Natural Resources 3
Social aspects associated with the environment and natural resources. Topics include: environmental attitudes and perceptions, environmentalism as a social movement, resource scarcity and land use, and social change in resource-based communities. (Sp)

SOC 4710 Asian Societies 3
Explores history, social, economic, and political institutions; and peoples and cultures of Asian Societies. (Sp)

SOC 4720 Applied Community Development 3
Involves a service-learning placement with an organization engaging in community development. Overview of community development models and theories, as well as the service-learning activity. Includes reflective evaluation of theories based upon the service-learning experience. (Sp)

SOC 4730 Women in International Development 3
Examines status of women in developing countries, and the role they play in the development process. (Sp)

SOC 4800 Seminar in Sociology 1-3
Seminar in various areas of sociology: (a) theory, (b) methodology, (c) demography, (d) social organization, (e) social deviance, (f) social psychology, (g) human ecology, (h) gerontology. (F,Sp)

SOC 4900 Independent Readings in Sociology 1-5
Independent readings in various areas of sociology: (a) theory, (b) methodology, (c) demography, (d) social organization, (e) social deviance, (f) social psychology, (g) human ecology. Prerequisite: Permission of instructor. (F,Sp,Su)

SOC 5100 Interpreting Social Research 3
Examines research design issues (conceptualization and measurement, sampling), modes of observation (experiments, surveys, field research, evaluation research), and interpreting social research findings (basic understanding of statistical analysis), as well as focusing on the ethics and politics of social research. (F,Su)

SOC 5130 Ethnographic Field School 3-6
Provides practical training in use of ethnographic field methods, qualitative data analysis, and ethnographic report-writing. Combines classroom instruction with supervised off-campus field research, while living in a cross-cultural setting. Fulfills program methods requirement. Application and additional fee required. Also taught as ANTH 5130/6130. (Su)

SOC 5640 Conflict Management in Natural Resources 3
Introduction to conflict management techniques for those involved in natural resource management. Also taught as ENVG 5640/6640. (Sp)

SOC 5650 DSS Developing Societies (dual listing 5650) 3
Reviews how sociology, cultural geography, and economic anthropology analyze processes of globalization in postcolonial societies. Examines changing livelihoods, patterns of spatial incorporation and societal evolution, and emergent policy problems associated with rapid socioeconomic change. Also taught as ANTH 5650/6650 and GEOG 5650/6650. (F)

SOC 6010 Development of Sociological Theory 3
Examines development of social theory from early to premodern times. Special attention given to nineteenth century European influences on development of American sociological theory. (F)

SOC 6020 Modern Social Theory 3
Examines current analytical and empirical theories from sociology as science perspective. Also explores network, exchange, conflict, functional, and interactionist approaches to, and difficulties with, scientific theorizing. (F)

SOC 6100 Advanced Methods of Social Research 3
Examines philosophical bases, techniques, and political and ethical aspects of social research. (F)

SOC 6130 Ethnographic Field School 3-6
Provides practical training in use of ethnographic field methods, qualitative data analysis, and ethnographic report-writing. Combines classroom instruction with supervised off-campus field research, while living in a cross-cultural setting. Fulfills program methods requirement. Application and additional fee required. Also taught as ANTH 6130/5130. (Su)

SOC 6150 Social Statistics II 3
Statistical procedures for sociological analysis; nonparametric statistics; inferential statistics, cross-tabulation, and log-linear analysis; correlation; regression; ANOVA; and other multivariable social science statistical treatments. (Sp)

SOC 6200 Social Demography* 3
Focuses on relationships between demographic and sociological processes. Study of theoretical perspectives and empirical analyses of the determinants. Consequences of change in population size, composition, and distribution, as well as changes in demographic processes. (F)

SOC 6230 Techniques of Demographic Analysis* 3
Provides instruction in use of rates, ratios, life tables, and related measures to describe, analyze, and estimate population. Review of measures designed to examine the three demographic processes: fertility, mortality, and migration. Utilization of analytical tools to explore population composition. Special emphasis placed on use of U.S. Census data to create population profiles. (Sp)

SOC 6250 Sociology Internship/Co-op 1-6
Professional level of educational work experience in an internship/cooperative education position for graduate students. (F,Sp,Su)

SOC 6310 Sociology of Work and Occupations* 3
Uses an applied and comparative cross-cultural perspective to examine work in pre-industrial (agricultural/pastoral), industrializing, industrialized, and post-industrial societies. (Sp)

SOC 6420 Gender and Social Inequality* 3
Contemporary American gender stratification, including (1) What is the problem? (2) Why is it a problem? (3) How does it interact with other stratifiers? (4) What caused or is causing it? (5) How and why is it maintained? and (6) When does it vary and why? Comparison of different views on these issues. (Sp)
### Course Descriptions

</thead>
<tbody>
<tr>
<td>SOC 6450</td>
<td>Special Topics in Social Problems</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Seminars on various topics appropriate to sociological analysis of contemporary social problems. Subject matter will reflect current faculty research and interests. (F,Sp)</td>
<td></td>
</tr>
<tr>
<td>SOC 6460</td>
<td>Sociology of Health*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Examination of social and cultural factors influencing health. Analysis of health behaviors as consequences of variety of diverse personal and social processes. (F)</td>
<td></td>
</tr>
<tr>
<td>SOC 6620</td>
<td>Environment, Technology, and Social Change*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Focuses on human interactions with the physical environment and changes brought about by this interaction. Topics of major emphasis include: approaches to environmental sociology; environmental values and attitudes; social movements pertaining to environmental concern; and social change responses to technology and resource scarcity. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOC 6630</td>
<td>Natural Resources and Social Development*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Focuses on social dimensions of natural resources use, development, scarcity, and allocations. Examines ways in which changing resource conditions impact human social organization. Emphasis on topics including: social characteristics of resource-dependent communities and areas; social organizational responses to changes in availability of, or access to, natural resources; and social impacts of natural resource development activities. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOC 6640</td>
<td>Conflict Management in Natural Resources</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>(dual listing 5640) Introduction to conflict management techniques for those involved in natural resource management. Also taught as ENVS 6640/5640. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOC 6650</td>
<td>Developing Societies (dual listing 5650)</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Reviews how sociology, cultural geography, and economic anthropology analyze processes of globalization in postcolonial societies. Examines changing livelihoods, patterns of spatial incorporation and societal evolution, and emergent policy problems associated with rapid socioeconomic change. Also taught as ANTH 6650/5650 and GEOG 6650/5650. (F)</td>
<td></td>
</tr>
<tr>
<td>SOC 6700</td>
<td>Advanced Rural Sociology*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Analysis of major developments in the study of rural society and rural communities. Emphasis on rural social changes related to economic, demographic, organizational, and technological trends at societal and global levels. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOC 6730</td>
<td>Gender and International Development*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Examines gender issues in economic and social development. Focuses on theory and methodologies for gender analysis. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOC 6750</td>
<td>Social Change and Development*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Readings from both domestic and international scholarship are used to examine the important social, economic, and political forces that shape patterns of social change and development. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOC 6800</td>
<td>Seminar in Sociology 1-3*</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Seminars in various areas of sociology: (a) theory, (b) methodology, (c) demography, (d) social organization, (e) social deviance, (f) social psychology, (g) social problems, (h) international development, (i) domestic development, (j) rural sociology, (k) environmental sociology, (l) other. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>SOC 6900</td>
<td>Independent Readings in Sociology 1-3*</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Independent readings in various areas of sociology: (a) theory, (b) methodology, (c) demography, (d) environmental/natural resource sociology, (e) sociology of development, (f) social problems. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>SOC 6970</td>
<td>Thesis Research 1-12*</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Graded Pass/Fail only. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>SOC 6990</td>
<td>Continuing Graduate Advisement 1-3*</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Graded Pass/Fail only. (F,Sp,Su)</td>
<td></td>
</tr>
<tr>
<td>SOC 7010</td>
<td>Issues in Sociological Theory*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Explores current philosophical discussions on theoretical approaches to understanding society. Examines feminist, post-structuralist, and post-modernist conceptualizations of power, knowledge, and identity. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOC 7100</td>
<td>Advanced Survey Techniques*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Examines the empirical and methodological literature regarding techniques for designing and implementing mail, telephone, and internet surveys for sociological research. Focuses on practical lessons for sampling, data collection, and survey data organization. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOC 7110</td>
<td>Advanced Sociological Analysis*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Provides review of several quantitative approaches utilized in contemporary social research. Students undertake small-scale analytical exercises in topics including, but not limited to, log-linear and structural equation modeling, logistic regression, and event history analysis. (F)</td>
<td></td>
</tr>
<tr>
<td>SOC 7150</td>
<td>Advanced Qualitative Methods in Sociology*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Examines the empirical and methodological literature regarding techniques for designing and implementing qualitative data collection and analysis for sociological research. Emphasizes practical tools for graduate students seeking to use qualitative methods for their thesis or dissertation research. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOC 7210</td>
<td>Teaching Sociology</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Provides a learning opportunity for graduate students who will be graduate instructors or teaching assistants. Reviews teaching strategies (meeting a class for the first time, teaching a large lecture class) and course development (constructing a syllabus, developing tests and writing assignments). (F)</td>
<td></td>
</tr>
<tr>
<td>SOC 7250</td>
<td>Advanced Seminar in Social Demography*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Detailed comparative and multilevel examination of substantive and methodological issues in the study of nuptiality, fertility, morbidity and mortality, migration, and social mobility. Covers theories, data collection strategies, measurement issues, and analytical techniques. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOC 7400</td>
<td>Perspectives on Inequality and Social Problems*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Examines major theoretical and empirical approaches to the sociological analysis of inequality and social problems. (F)</td>
<td></td>
</tr>
<tr>
<td>SOC 7440</td>
<td>Crime and Society*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Explores the field of criminology, which is primarily concerned with describing and explaining patterns of deviance violating criminal laws. Reviews the epistemological foundations of criminology, and then addresses specific topics surrounding various legal definitions of criminal behavior. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOC 7620</td>
<td>Sociology of Environmental Hazards and Risks*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Focuses on how individuals and organizations respond to environmental hazards and risks resulting from either natural events or human technological and industrial processes. (F)</td>
<td></td>
</tr>
<tr>
<td>SOC 7640</td>
<td>Population and Environment*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>In-depth exploration of relationship between human populations and their environment. Heavy emphasis placed on developing an understanding of contemporary research in this area, especially with regard to the association between environmental factors and population organization, change, and growth. (Sp)</td>
<td></td>
</tr>
<tr>
<td>SOC 7660</td>
<td>The Environment and Social Inequality*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Explores the intersection of social inequality and the physical environment. Examines how social structures and individual actions both perpetuate and combat various forms of inequality, including class, race, ethnicity, gender, and &quot;expert knowledge.&quot; (F)</td>
<td></td>
</tr>
<tr>
<td>SOC 7720</td>
<td>Community Theory and Research*</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Explores theoretical and empirical sociological literature on the human community. Topics include: conceptualization and measurement of community well-being, dynamics and impacts of social and economic change on community life, and comparison of community research conducted in different settings. (Sp)</td>
<td></td>
</tr>

716  Utah State University 2007-2009 General Catalog
Course Descriptions

Upper Division

Upper-division Spanish courses (3000 level and above) are available only to students who have completed SPAN 2020 or who can demonstrate equivalent proficiency through testing.

SPAN 3010 Hispanic Outreach Practicum 1-4
Allows students of Spanish to improve their language skills and cultural awareness within a Hispanic community setting. Graded Pass/Fail only. Prerequisite: Permission of instructor. May be repeated to a maximum of 4 credits, only 3 of which can be applied toward the Spanish major or minor. (F,Sp,Su)

SPAN 3040 Advanced Spanish Grammar 3
Intense review of selected problematic areas of Spanish grammar for students with advanced language skills. Prerequisite: SPAN 2020 (or equivalent coursework) or placement in this specific class by examination. (F,Sp)

SPAN 3060 CI Advanced Spanish Conversation and Composition 3
Development of advanced conversation and writing skills through debate and composition on contemporary controversial topics. (F,Sp)

SPAN 3510 Business Spanish 3
Development of communication skills in Spanish for international Hispanic business purposes. (F,Sp)

SPAN 3520 Business Spanish Practicum 1-4
Allows students of Spanish to gain practical work experience in a Hispanic business context. Graded Pass/Fail only. Prerequisite: Permission of instructor. May be repeated to a maximum of 4 credits, only 3 of which can be applied toward the Spanish major or minor. (F,Sp,Su)

SPAN 3550 DHA Spanish Culture and Civilization 3
Historical, social, political, economic, and cultural conditions and institutions of Spain. (F,Sp,Su)

SPAN 3570 DHA Latin American Culture and Civilization 3
Historical, social, political, economic, and cultural conditions and institutions of Latin American countries. (F,Sp)

SPAN 3600 DHA Survey of Spanish Literature I 3
Selective readings and discussions of major works and authors in Spanish literature from El Cid through Calderon. Prerequisites: Fulfillment of Communications Literacy CL2 requirement; SPAN 3040; and either SPAN 3550 or 3570. (F,Sp)

SPAN 3610 DHA Survey of Spanish Literature II 3
Selective readings and discussions of major works and authors in Spanish literature from the eighteenth to twentieth centuries. Prerequisites: Fulfillment of Communications Literacy CL2 requirement; SPAN 3040; and either SPAN 3550 or 3570. (F,Sp)

SPAN 3620 DHA Survey of Latin American Literature I 3
Selective readings and discussions of major works and authors in Latin American literature from Pre-Columbian works through the beginnings of Modernism. Prerequisites: Fulfillment of Communications Literacy CL2 requirement; SPAN 3040; and either SPAN 3550 or 3570. (F,Sp)

SPAN 3630 DHA Survey of Latin American Literature II 3
Selective readings and discussions of major works and authors in Latin American literature from Modernism to the present. Prerequisites: Fulfillment of Communications Literacy CL2 requirement; SPAN 3040; and either SPAN 3550 or 3570. (F,Sp)

SPAN 3650 Spanish Literature—Study Abroad 1-4
Selective readings and discussions of major works and authors in Spanish literature. Taught only in Studies Overseas in Spanish program. Prerequisites: Fulfillment of Communications Literacy CL2 requirement; SPAN 3040; and either SPAN 3550 or 3570 (or equivalents). (Su)

SPAN 3660 Latin American Literature—Study Abroad 1-4
Selective readings and discussions of major works and authors in Latin American literature. Taught only in Studies Overseas in Spanish program. Prerequisites: Fulfillment of Communications Literacy CL2 requirement; SPAN 3040; and either SPAN 3550 or 3570 (or equivalents). (Su)

SPAN 3800 Spanish III Study Abroad 1-4
Intense review of selected problematic areas of Spanish grammar for students with advanced language skills. Taught only in Studies Overseas in Spanish Program. (Su)

SPAN 4200 Applied Spanish Linguistics and Phonetics 3
Analysis of selected phonological, morphological, syntactic, and semantic features of the Spanish language, including Spanish-English contrastive analysis. Prerequisite: SPAN 3040. (Sp)

SPAN 4800 Hispanic Culture and Civilization—Study Abroad 1-4
Historical, social, political, economic, and cultural conditions and institutions of Hispanic countries. Taught only in Studies Overseas in Spanish Program. (Su)

SPAN 4880 Individual Readings 1-4
Individual readings or projects in Spanish. Prerequisite: Instructor’s permission. (F,Sp)

SPAN 4900 Topics of Spanish Literature 3
Repeatable for additional credit when topics vary. Prerequisites: At least two of the following: SPAN 3600, 3610, 3620, and 3630. (F,Sp)

SPAN 4910 Topics of Latin American Literature 3
Repeatable for additional credit when topics vary. Prerequisites: At least two of the following: SPAN 3600, 3610, 3620, and 3630. (F,Sp)

SPAN 4920 Spanish Language Tutoring 1
Allows students to develop tutoring skills by assisting professors in lower-division courses or fulfilling instructional duties for a comparable amount of time in the language laboratory, public schools, or similar activities with departmental approval. May be repeated to a maximum of 3 credits. Graded Pass/Fail only. Prerequisite: Permission of instructor. (F,Sp)

SPAN 4990 Spanish Degree Assessment 1
Final requirement for all Spanish majors and minors, to be completed their last semester before graduation. Includes review of coursework and comprehensive exit examination, individualized according to the courses taken for the degree. Prerequisite: Permission of instructor. (F,Sp)

SPAN 6200 Spanish Linguistics and Phonetics 3
Analysis of phonology, morphology, and syntax of the Spanish language. Prerequisite: SPAN 2020, another 3000-level or higher SPAN course, or demonstrated proficiency through testing. (Sp)

SPAN 4200 Applied Spanish Linguistics and Phonetics 3
Analysis of selected phonological, morphological, syntactic, and semantic features of the Spanish language, including Spanish-English contrastive analysis. Prerequisite: SPAN 3040. (Sp)

SPAN 4800 Hispanic Culture and Civilization—Study Abroad 1-4
Historical, social, political, economic, and cultural conditions and institutions of Hispanic countries. Taught only in Studies Overseas in Spanish Program. (Su)

SPAN 4880 Individual Readings 1-4
Individual readings or projects in Spanish. Prerequisite: Instructor’s permission. (F,Sp)

SPAN 4900 Topics of Spanish Literature 3
Repeatable for additional credit when topics vary. Prerequisites: At least two of the following: SPAN 3600, 3610, 3620, and 3630. (F,Sp)

SPAN 4910 Topics of Latin American Literature 3
Repeatable for additional credit when topics vary. Prerequisites: At least two of the following: SPAN 3600, 3610, 3620, and 3630. (F,Sp)

SPAN 4920 Spanish Language Tutoring 1
Allows students to develop tutoring skills by assisting professors in lower-division courses or fulfilling instructional duties for a comparable amount of time in the language laboratory, public schools, or similar activities with departmental approval. May be repeated to a maximum of 3 credits. Graded Pass/Fail only. Prerequisite: Permission of instructor. (F,Sp)

SPAN 4990 Spanish Degree Assessment 1
Final requirement for all Spanish majors and minors, to be completed their last semester before graduation. Includes review of coursework and comprehensive exit examination, individualized according to the courses taken for the degree. Prerequisite: Permission of instructor. (F,Sp)

SPAN 6200 Spanish Linguistics and Phonetics 3
Analysis of phonology, morphology, and syntax of the Spanish language. Prerequisite: SPAN 2020, another 3000-level or higher SPAN course, or demonstrated proficiency through testing. (Sp)

Repeatability for credit: Check with major department for limitations on number of credits that can be counted for graduation.

Speech Communication (SPCH)

See Department of Languages, Philosophy, and Speech Communication, pages 364-379

SPCH 1020 CI Public Speaking 3
(formerly SPCH 1050 CI)
Speaking in formal public communication situations. Development of skills in speech preparation, audience adaptation, and delivery. (F,Sp)

SPCH 2110 CI Interpersonal Communication 3
(formerly SPCH 2600 CI)
Examination of theories, methods, and competencies relevant to studying, establishing, and maintaining interpersonal relationships in family, intercultural, professional, and other contexts. Classroom experiences with topics such as perception, language, nonverbal behavior, conflict resolution, and listening. (F,Sp)
### Course Descriptions

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Prerequisites/Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPCH 2250</td>
<td>Introductory Internship/Co-op</td>
<td>1-6</td>
<td>Introductory level educational work experience in an internship or cooperative education position approved by the department and advisor. (F,Sp,Su)</td>
</tr>
<tr>
<td>SPCH 2270</td>
<td>Argumentation and Debate</td>
<td>3</td>
<td>Techniques of analysis, investigation, evidence, reasoning, brief making, refutation, and construction and delivery of the argumentative speech and academic debate. (F)</td>
</tr>
<tr>
<td>SPCH 2280</td>
<td>Listening</td>
<td>2</td>
<td>Development of comprehension, critical, and relationship listening skills. Experience in developing listening training for kindergarten to adult education. (Sp)</td>
</tr>
<tr>
<td>SPCH 3000</td>
<td>Speech Communication Teaching Practicum</td>
<td>1</td>
<td>Intensive speech teaching workshop. Supervised on-campus teaching experience. Must be completed prior to student teaching experience. Repeatable to a maximum of 2 credits. (Sp)</td>
</tr>
<tr>
<td>SPCH 3050</td>
<td>DSS Technical and Professional Communication*</td>
<td>3</td>
<td>Skill development in oral technical reporting, interviewing, and interpersonal communication to meet the unique communication requirements of business, industry, and the professions.</td>
</tr>
<tr>
<td>SPCH 3250</td>
<td>CI Organizational Communication</td>
<td>3</td>
<td>Study of internal communication requirements of organizations. Analysis of communication problems associated with conflict, diversity, interpersonal influence, communication technology, and information flow. Development of effective communication practices. (F)</td>
</tr>
<tr>
<td>SPCH 3300</td>
<td>Clinical Experience I</td>
<td>1</td>
<td>First clinical practicum in middle and secondary schools. Arranged by special methods instructor. Required at Level I. Must be taken concurrently with SPCH 5370. Prerequisites are set by the Secondary Education Department. (F)</td>
</tr>
<tr>
<td>SPCH 3330</td>
<td>DSS Intercultural Communication</td>
<td>3</td>
<td>Study of how communication shapes culture and how culture, in turn, affects communication. Development of active intercultural communication in professional and personal contexts. (F)</td>
</tr>
<tr>
<td>SPCH 3400</td>
<td>CI Persuasion</td>
<td>3</td>
<td>Survey of theory and research investigating the process of social influence. Topics include: compliance-gaining strategies, enactment and detection of deception, verbal and nonverbal influence, attitude change, conformity, communicator characteristics, credibility, emotional appeals, and ethics. (F)</td>
</tr>
<tr>
<td>SPCH 3600</td>
<td>Communication and Conflict</td>
<td>3</td>
<td>Study of contemporary theories on conflict and communication. Analyses of the roles of culture, gender, and personal and/or organizational ethics in conflict and disputes. Discussion and application of negotiation, mediation, and facilitation skills. (F)</td>
</tr>
<tr>
<td>SPCH 4200</td>
<td>Language, Thought, and Action</td>
<td>3</td>
<td>Examines the influence of language on perception, interpretation, and evaluation in a wide variety of communication contexts, from organizational communication to mass media to interpersonal relations.</td>
</tr>
<tr>
<td>SPCH 4250</td>
<td>Advanced Internship/Co-op</td>
<td>1-6</td>
<td>Internship or cooperative education at a more professional level, with increased complexity, approved by the department and advisor. (F,Sp,Su)</td>
</tr>
<tr>
<td>SPCH 4300</td>
<td>Clinical Experience II</td>
<td>1</td>
<td>Second clinical practicum in middle and secondary schools. Arranged by special methods instructor. Required at Level II. Must be taken concurrently with SPCH 5370. Prerequisites are set by the Secondary Education Department. (F)</td>
</tr>
<tr>
<td>SPCH 4460</td>
<td>Communication Criticism</td>
<td>3</td>
<td>Introduction to analysis of public communication from a variety of critical perspectives. With an approach including theory and practice, teaches students how to critically analyze discursive messages. (Sp)</td>
</tr>
<tr>
<td>SPCH 5000</td>
<td>Studies in Speech Communication</td>
<td>1-5</td>
<td>Study of special topics in interpersonal, small group, organizational, or intercultural communication theory and research. Prerequisite: Permission of instructor. (F,Sp)</td>
</tr>
<tr>
<td>SPCH 5090</td>
<td>Small Group Theory*</td>
<td>3</td>
<td>Study of theories of group processes such as decision-making, leadership, power, conflict, deviance, and the development of group structures, functions, norms, and roles.</td>
</tr>
<tr>
<td>SPCH 5100</td>
<td>CI Theories of Speech Communication</td>
<td>3</td>
<td>Social, scientific, and humanistic inquiry into the process of human communication. Multi-theoretical approach, including perspectives and research on interpersonal, persuasive, organizational, intrapersonal, group, and intercultural communication. (Sp)</td>
</tr>
<tr>
<td>SPCH 5250</td>
<td>Environmental Rhetoric</td>
<td>3</td>
<td>Study of persuasive tactics and strategies as used by social advocates. Focuses on environmental issues and organizations. Analysis of environmental messages with an emphasis on the development of writing and critical thinking skills. (Sp)</td>
</tr>
<tr>
<td>SPCH 5280</td>
<td>Communication Education Theory*</td>
<td>3</td>
<td>Study of contemporary theories and research in communication education. Emphasis on communication competency development, communication apprehension, critical thinking, communication assessment, development of communication ethics, freedom of speech, instructional communication, and history of communication education. (Sp)</td>
</tr>
<tr>
<td>SPCH 5370</td>
<td>Methods in Teaching Speech Communication</td>
<td>3</td>
<td>Development of materials and strategies for teaching secondary school speech communication. Prerequisite: Admission to teacher education. (F)</td>
</tr>

Course Descriptions

SPED 3030 Educational and Multicultural Foundations 3
Explores historical and cultural aspects of schooling and the inclusion of students with disabilities and bilingual students in general education classrooms. Examines how schooling practices change from elementary to high school and commonalities that bind the teaching profession. (Sp)

SPED 4000 Education of Exceptional Individuals 2
Characteristics of all types of exceptional children with emphasis on the educational and psychological implications of these conditions to the development of the child. (F,Sp,Su)

SPED 4790 Special Topics 1-4
Individually directed study at the undergraduate level. Graded Pass/Fail only. Permission of instructor required. (F,Sp,Su)

SPED 4970H Honors Thesis 1-6
Provides an opportunity for honors students in the Department of Special Education and Rehabilitation to interact with other honors students in the College of Education and Human Services and explore an interdisciplinary area of interest. A written paper will be required. (F,Sp,Su)

SPED 5010 QI Applied Behavioral Analysis 1: Principles, Assessment, and Analysis 3
Covers topics related to collecting data, using data to make decisions, analyzing data, graphing data, and applying principles of behavior management and instruction to children and youth. Prerequisite: Admission to special education major or permission of instructor. (F)

SPED 5040 Foundations of Effective Assessment and Instructional Practices 3
Principles of standardized and curriculum-based assessment. Foundations for designing effective instructional programs to help students achieve mastery and proficiency. Prerequisite: Admission to special education major and SPED 5010 or permission of instructor. (F)

SPED 5050 Applied Behavioral Analysis 2: Applications 3
Expands knowledge of basic applied behavior analysis principles. Develops skills for remediating behavior problems using functional behavioral assessment. Prerequisite: Admission to special education major or permission of instructor. (Sp)

SPED 5060 Consulting with Parents and Teachers 3
Provides strategies for communicating with parents and teachers, as members of a multidisciplinary team, to assist parents and other teachers in collaborative problem solving. Prerequisite: Admission to special education major or permission of instructor. (Sp)

SPED 5070 Policies and Procedures in Special Education 1-3
Provides an understanding of federal and state laws for persons with disabilities and procedures for organizing a special education classroom and auxiliary staff. Prerequisite: Admission to special education major or permission of instructor. (F)

SPED 5200 CI Student Teaching in Special Education 3-15
Graded Pass/Fail only. Prerequisite: Admission to special education major or permission of instructor. (F,Sp,Su)

SPED 5210 CI Student Teaching in Special Education: Dual Majors 3-15
Undergraduate student teaching for dual majors. Graded Pass/Fail only. (F,Sp,Su)

SPED 5220 Special Education Student Teaching Seminar 3
Weekly seminar taken concurrently with student teaching (SPED 5200 or 5210). Focuses on problems arising during student teaching and the development of a teaching portfolio. Prerequisites: Admission to teacher education and completion of the SPED sequence. (F,Sp,Su)

SPED 5230 Student Teaching in Special Education: Alternative Preparation 3-15
Student teaching for students in alternative teacher preparation programs. Graded Pass/Fail only. (F,Sp,Su)

SPED 5300 Orientation to Teaching Students with Mild/Moderate Disabilities 2
Provides preservice teachers with overview of information and resources, examples, and practice in applying effective instructional and behavior management strategies in their classrooms. Emphasizes knowledge/skills first day and first week of school. (Su)

SPED 5310 Teaching Reading and Language Arts to Students with Mild/Moderate Disabilities 2-4
Covers curriculum, instructional methods, assessment, and data-based decision making related to teaching reading and language arts to students with mild/moderate disabilities. (F)

SPED 5320 Teaching Content Areas and Transition to Students with Mild/Moderate Disabilities 3
Students learn to teach content area material, learning strategies, and transition-related skills to students with mild/moderate disabilities. Also includes assessment and decision making strategies related to these curricular areas. (Sp)

SPED 5330 Eligibility Assessment for Students with Mild/Moderate Disabilities 1
Covers topics in choosing and administering eligibility assessment tests for students who may have mild/moderate disabilities. Interpretation of test results and applying results to decisions regarding students' eligibility for special education services. Graded Pass/Fail only. (F)

SPED 5340 Teaching Math to Students with Mild/Moderate Disabilities 3
Explains procedures for teaching mathematics to students with mild/moderate disabilities, so that each progresses as fast as his or her capabilities will allow. Prerequisite: Admission to special education major or permission of instructor. (Sp)

SPED 5350 Teaching Students with Mild/Moderate Disabilities I 3
Provides students with information and skills in the area of classroom and individual behavior management procedures. Emphasizes research-validated strategies that students will apply to everyday instructional situations. Prerequisite: Admission to the Alternative Teacher Preparation Licensure Program. (F)

SPED 5360 Teaching Students with Mild/Moderate Disabilities II 3
Provides students with instructional and management skills. Through case studies and classroom simulations, students learn research-validated instructional and management skills. Prerequisite: Admission to the Alternative Preparation Licensure Program. (Sp)

SPED 5400 Orientation to Teaching Students with Severe Disabilities 2
Provides preservice teachers with overview of information, resources, examples, and practices in applying effective instructional and behavior management strategies to students with severe disabilities. (F)

SPED 5410 Practicum: Direct Instruction Reading and Language Arts for Students with Mild/Moderate Disabilities 1-3
Students learn to use Direct Instruction techniques, positive management, curriculum-based assessment, and data-based decision-making to teach reading and language arts to children with mild/moderate disabilities. Students are placed in a classroom, where they teach a group of children daily. (F)

SPED 5420 Practicum: Teaching Mathematics to Students with Mild/Moderate Disabilities 4
Covers use of effective instructional techniques, positive management, curriculum-based assessment, and data-based decision making to teach mathematics content to children with mild/moderate disabilities. Students placed in a classroom, where they teach one or more group(s) of children daily. (Sp)
## Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPED 5430</td>
<td>Field-Based Applications for Students with Mild/Moderate Disabilities</td>
<td>3</td>
<td>Designed to help students acquire and consistently demonstrate effective teaching practices to aid students with mild/moderate disabilities. Teaches students to analyze and solve instructional and management problems. Graded Pass/Fail only. Prerequisite: Admission to the Alternative Teacher Preparation Licensure Program. (F)</td>
</tr>
<tr>
<td>SPED 5510</td>
<td>Curriculum for Students with Severe Disabilities</td>
<td>3-4</td>
<td>Provides information about commercially available curricular materials, as well as how to plan for and design functional academic curricula, for persons with severe disabilities. Prerequisite: Admission to Special Education major or permission of instructor. (F)</td>
</tr>
<tr>
<td>SPED 5520</td>
<td>Curriculum for Secondary-Level Students with Severe Disabilities</td>
<td>3</td>
<td>Provides information on developing and implementing secondary-level classroom, community, domestic, leisure, and transition instructional programs. Prerequisite: Admission to Special Education major or permission of instructor. (Sp)</td>
</tr>
<tr>
<td>SPED 5530</td>
<td>Technology for Teaching Exceptional Learners</td>
<td>3</td>
<td>Familiarizes students with existing technology (IT and AT), federal and state technology legislation, and resources to fund technology in the classroom. Teaches methods for evaluating technology needs of individuals with disabilities. Prerequisite: Admission to Special Education major or permission of instructor. Taught on campus during spring semester only. Occasionally offered off campus during fall semester. (F,Sp)</td>
</tr>
<tr>
<td>SPED 5540</td>
<td>Assessment of Persons with Severe Disabilities</td>
<td>1</td>
<td>Provides students with knowledge and skills necessary for conducting assessment activities with pupils having severe disabilities. Covers norm-referenced/standardized, criterion-referenced, and alternative assessment instruments. Students complete assignments in administering, interpreting, and communicating results of each type of assessment. (Sp)</td>
</tr>
<tr>
<td>SPED 5550</td>
<td>Field-Based Applications for Students with Severe Disabilities</td>
<td>3</td>
<td>Designed to help students acquire and consistently demonstrate effective teaching practices to aid students with severe disabilities. Teaches students to analyze and solve instructional and management problems. Prerequisite: Admission to Severe Alternative Teacher Preparation Program. (Sp)</td>
</tr>
<tr>
<td>SPED 5560</td>
<td>Practicum in Improving School System Programs</td>
<td>1-4</td>
<td>Practicum or seminar providing information/experience in public school instruction. Permission of instructor required. (F)</td>
</tr>
<tr>
<td>SPED 5570</td>
<td>Advanced Field-Based Applications for Students with Severe Disabilities</td>
<td>3</td>
<td>Designed to help students become competent in various effective teaching practices with students who have severe disabilities. Prerequisites: Admission to Severe Alternative Teacher Preparation Program and completion of SPED 5550. (F)</td>
</tr>
<tr>
<td>SPED 5600</td>
<td>Practicum: Introduction to Instruction of Students with Severe Disabilities</td>
<td>3</td>
<td>A field-based class providing experience in observing and teaching functional academic curricula to students with severe disabilities. Prerequisite: Permission of instructor. (F)</td>
</tr>
<tr>
<td>SPED 5610</td>
<td>Practicum: Advanced Systematic Instruction of Students with Severe Disabilities</td>
<td>4</td>
<td>Provides opportunity to assess students' needs and to design programs for community, domestic, leisure, and transitional skills. Prerequisite: Permission of instructor. (Sp)</td>
</tr>
<tr>
<td>SPED 5710</td>
<td>Young Children with Disabilities: Characteristics and Services</td>
<td>3</td>
<td>Provides information about young children with disabilities, including historical development of services, skill areas, family involvement, teaming, and the array of service environments. Prerequisite: Admission to Special Education major or permission of instructor. (Sp)</td>
</tr>
<tr>
<td>SPED 5720</td>
<td>Behavior Analysis Practicum</td>
<td>3</td>
<td>Students receive supervised training in applying behavior analysis principles in community, school, and institutional settings. Either SPED 5050 or PSY/SPED 5720 fulfill part of practicum requirement for Behavior Analysis track. Prerequisite: Permission of instructor. Also taught as PSY 5720.</td>
</tr>
<tr>
<td>SPED 5730</td>
<td>Intervention Strategies for Young Children with Disabilities</td>
<td>3</td>
<td>Provides information on curricula, instructional strategies, service environments, and staffing roles for teachers of young children (0-5) with disabilities. (F)</td>
</tr>
<tr>
<td>SPED 5790</td>
<td>Special Topics</td>
<td>1-4</td>
<td>(F,Sp,Su)</td>
</tr>
<tr>
<td>SPED 5810</td>
<td>Seminar and Field Experiences with Infants and Families</td>
<td>4</td>
<td>Participation with an infant and family in both the home and early intervention setting. Seminar topics include infant medical issues, health, safety, syndromes, and low incidence characteristics. (Sp)</td>
</tr>
<tr>
<td>SPED 5820</td>
<td>Preschool Practicum with Young Children with Disabilities in Community Environments</td>
<td>1-4</td>
<td>Students participate in a variety of environments serving preschoolers with disabilities, assist in developing a family service plan, and teach other staff to implement techniques. (F)</td>
</tr>
<tr>
<td>SPED 5830</td>
<td>Seminar Working with Peers on Multidisciplinary Teams</td>
<td>1</td>
<td>Seminar for discussion of topics pertaining to how teams work with children, with and without disabilities, in a practicum. Students are assigned to a team for planning and problem solving throughout the semester. (F,Sp)</td>
</tr>
<tr>
<td>SPED 5840</td>
<td>Seminar: Preschool Practicum with Young Children with Disabilities</td>
<td>2</td>
<td>Students participate in a variety of environments, problem solving and learning about their experiences. Must be taken concurrently with SPED 5820. (F)</td>
</tr>
<tr>
<td>SPED 5900</td>
<td>Independent Study</td>
<td>1-3</td>

<td>Independent Research</td>
<td>1-3</td>
<td>(F,Sp,Su)</td>
</tr>
<tr>
<td>SPED 6010</td>
<td>Interventions for Parents and Families</td>
<td>2</td>
<td>Special challenges faced by parents and families of at-risk students and students with disabilities. Emphasizes intervention strategies, supportive resources, and parent programs.</td>
</tr>
<tr>
<td>SPED 6020</td>
<td>Design and Evaluation of Instruction</td>
<td>3</td>
<td>Presents curriculum in which diagnosis and instruction are welded as a unit into the regular teaching procedures. (Sp)</td>
</tr>
<tr>
<td>SPED 6030</td>
<td>Clinical Practicum: Student Teaching</td>
<td>2-12</td>
<td>Supervised practicum in a clinical teaching setting. Graded Pass/Fail only. Prerequisite: Permission of instructor.</td>
</tr>
<tr>
<td>SPED 6040</td>
<td>Functional and Augmentative Communication Approaches and Technology</td>
<td>3</td>
<td>Theory and methods of symbolic and nonsymbolic communication acquisition, especially for students with dual sensory impairments. Application of instruction and systems within natural routines. (F)</td>
</tr>
<tr>
<td>SPED 6050</td>
<td>Issues with the Delivery of Services for Students with Dual Sensory Impairments</td>
<td>2</td>
<td>In-depth presentation of best practices for educational services for students with dual sensory impairments. (F)</td>
</tr>
<tr>
<td>SPED 6060</td>
<td>Legal Issues in Special Education</td>
<td>3</td>
<td>Provides knowledge of a wide range of legal issues concerning the provision of special education services to students with disabilities. (F,Sp,Su)</td>

</table>

| **SPED 6080** | Collaboration and Management of Services for Students with Dual Sensory Impairments | 2 |
| Reviews methods of planning and coordination of services for students with dual sensory impairments (e.g., transition, lifestyle planning, transition team coordination). Service management addressing issues of scheduling, monitoring, and training of staff and peers. (Sp) |

| **SPED 6090** | Curriculum and Environmental Variations and Management | 2 |
| Presents instructional and curricular strategies to promote utilization of residual vision or hearing skills. Overviews tactile cuing and movement-based approaches, with emphasis on integration within natural context and functional activities. Review of model delivery methods. (Sp) |

| **SPED 6110** | Social and Psychological Implications of Visual Impairments | 2 |
| Explores attitudes and beliefs related to visual impairment and blindness. Emphasizes impact of vision loss on the psychosocial functioning of individuals and their families. Studies self-concept, self-esteem, and strategies to enhance these areas in visually impaired children. (Su) |

| **SPED 6120** | Ocular Disorders and Examination Techniques of Low Vision | 4 |
| Students demonstrate the ability to identify the important parts of the visual system, to understand and interpret eye reports, and to translate the information into an educational plan. Participants also conduct and supervise vision screening clinics. In addition, participants demonstrate a basic understanding of approaches and practices of low-vision services. Includes low-vision aids, optics, and environmental modifications. (F) |

| **SPED 6130** | Literary Braille Codes and Technologies | 4 |
| Focuses on reading and writing literary braille. Includes literary braille contractions, short-form words, punctuation, and rules of usage for basic Grade 2 braille, using the Perkins Braille Writer. Emphasizes accuracy, beginning formatting, and ability to apply the rules. Using a slate and stylus, as well as computerized braille writers, students learn to write literary braille. (F) |

| **SPED 6140** | Nemeth Braille Codes and Braille Technologies | 3 |
| Transcription of print mathematical symbols into appropriate formats, using Nemeth Braille Code of Mathematics. Computation skills using adapted abaci for basic mathematical operation. Explores braille music, foreign language braille, computer braille, and Grade 3 braille. Emphasizes literary braille in more extended writing projects. (Sp) |

| **SPED 6150** | Teaching Children with Dual Sensory Impairments (Deaf/Blind) | 3 |
| Provides basic understanding of the needs of learners (ages 0-22) having sensory impairments with multiple disabilities. Includes role and characteristics of the transdisciplinary team, learning environments, resources, assessment procedures, and instructional strategies. Identifies inclusion procedures, transitional issues, and methods of encouraging parental involvement. (Su) |

| **SPED 6160** | Introduction to Orientation and Mobility | 2 |
| Introduces students to orientation and mobility, as well as basic assessment techniques. Students learn to use the results of these assessments, along with specific teaching techniques in pre-cane orientation and mobility skills, in teaching children with visual impairments. Students also become familiar with basic indoor (non-cane) mobility techniques, learn to identify and teach orientation cues in the environments, and develop lesson plans to teach concepts necessary for future cane travel. (Su) |

| **SPED 6170** | Instructional Management for Students with Visual Impairments (0-21) | 4 |
| Emphasizes best practices for instructional management of children with visual impairments in early intervention settings, preschool programs, and early elementary grades. Also addresses practices for older students in upper elementary through high school grades. Explores strategies for development of basic concepts, socialization skills, emergent literacy, effective braille reading and writing, daily living skills, career understanding, and recreational and leisure skills. Focuses on understanding agency and community resources, family involvement, and adaptation of materials and environments, and adapted technology. (Sp) |

| **SPED 6180** | Field Studies in Visual Impairments | 1 |
| Participants work with visually impaired students in a variety of educational sites. Emphasizes use of adapted technology, implementation of teaching activities, student assessment, and modification of educational materials. Corequisite: SPED 6130 or 6170. (F,Sp) |

| **SPED 6220** | Characteristics of Children with Emotional and Behavioral Disorders | 3 |
| Explores characteristics of children and youth with emotional and behavioral disorders. Covers definitions, prevalence and incidence, classification, causal factors, and facets of disordered behavior. (3 cr) |

| **SPED 6230** | Education of Students with Emotional and Behavioral Disorders | 2 |
| Methods of teaching students with emotional and behavioral disorders, including educational strategies and behavioral treatments. |

| **SPED 6260** | Intervention Strategies for Young (dual listing 5730) Children with Disabilities | 3 |
| Provides information on curricula, instructional strategies, service environments, and staffing roles for teachers of young children (0-5) with disabilities. (F) |

| **SPED 6280** | Instructional Leadership for At-Risk Students | 3 |
| Examines theories and practices of instructional leadership for at-risk students. Instructs students in services and programs available for at-risk students. (Sp,Su) |

| **SPED 6290** | Teaching Social Skills, Self-Management, and Values | 3 |
| Discussion of current research and practices related to teaching social skills, self-management, and values. Explores teaching procedures and curriculum programs. (Sp) |

| **SPED 6300** | Collaboration Skills for Classroom Teachers | 3 |
| Emphasizes knowledge, attitudes, and skills which special educators must possess to effectively collaborate with parents and professionals. (F) |

| **SPED 6320** | Seminars in Learning Characteristics of Students with Dual Sensory Impairments | 2 |
| Investigates characteristics of dual sensory impairment, learning styles, and environmental demands. Awareness of eye and ear anatomy. Interpretation of formal assessments. Development of instructional strategies. (Su) |

| **SPED 6410** | Field Studies I: Analysis of Service for Students with Dual Sensory Impairments | 2 |
| First of three field experiences for students in the DSI program. Emphasizes team-based review and analysis of services. (F) |

| **SPED 6420** | Field Studies II: Analysis of Service for Students with Dual Sensory Impairments | 2 |
| Practicum in integrated programs for students with dual sensory impairments within the context of the model classroom. Emphasizes transdisciplinary methods for assessment, instructional design, and planning skills. |

| **SPED 6430** | Field Studies III: Analysis of Service for Students with Dual Sensory Impairments | 2 |
| Advanced practicum in integrated programs for students with dual sensory impairments. Emphasizes an overall management of instructional environment and services. |

| **SPED 6500** | Interdisciplinary Workshop | 1-3 |
| Series of self-instructional modules and videos and a variety of elective training. Module topics include developmental disabilities, legal aspects and issues, assessment, intervention, assistive technology, transition, and prevention/intervention for aggression and violence. (F,Sp,Su) |

<tr>
<td>SPED 7710</td>
<td>Advanced Single-Subject Research Methods and Design</td>
<td>3</td>
<td>Explores advanced concepts and procedures in within-subject research methods. Builds on knowledge and skills acquired in SPED 7700 regarding scientific questions, measures, research designs, data analysis, and inference. Students analyze research and design, conduct, and report a scientific study. Prerequisite: SPED 7700. (Sp)</td>
</tr>
<tr>
<td>SPED 7720</td>
<td>Advanced Behavior Analysis in Education (dual listing 6720)</td>
<td>3</td>
<td>Discussion of advanced topics and issues in behavior analysis, including rule-governed behavior, stimulus control, setting events, functional analysis, and verbal behavior. Topics integrated into educational practice. (Sp)</td>
</tr>
<tr>
<td>SPED 7800</td>
<td>Seminar: Issues in Special Education and Rehabilitation</td>
<td>1-3</td>
<td>Critical analysis of variety of special education and rehabilitation issues and trends. Empirical and theoretical information presented in a seminar format. (F,Sp,Su)</td>
</tr>
<tr>
<td>SPED 7810</td>
<td>Research Seminar in Special Education and Rehabilitation</td>
<td>1-3</td>
<td>Identification of research problems and discussion of research strategies and methods. Applications of research, data analysis, and statistical concepts. (F,Sp,Su)</td>
</tr>
<tr>
<td>SPED 7820</td>
<td>Seminar: Special Topics</td>
<td>1-3</td>
<td>In-depth study of special topics in special education and rehabilitation. Seminars examine historical aspects, relevant research, and theoretical positions on selected topics. (F,Sp,Su)</td>
</tr>
<tr>
<td>SPED 7830</td>
<td>Special Education Personnel Preparation Methods</td>
<td>2</td>
<td>Focuses on critical issues in preparing special education teachers. Includes teaching, supervision, and overall program development. Students demonstrate supervision and teaching competencies. (Sp)</td>
</tr>
<tr>
<td>SPED 7900</td>
<td>Independent Study</td>
<td>1-3</td>
<td>Prerequisite: Permission of instructor. (F,Sp,Su)</td>

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Course Descriptions

Statistics (STAT)

See Department of Mathematics and Statistics, pages 394-405

STAT 1040 QL Introduction to Statistics 3
Descriptive and inferential statistical methods. Emphasis on conceptual understanding and statistical thinking. Examples presented from many different areas. Prerequisite: C- or better in MATH 1010 or Math ACT score of at least 23 (Math SAT score of at least 540) within the Math prerequisite acceptability time limit; or satisfactory score on Math Placement Test. (F,Sp,Su)

STAT 2000 QI Statistical Methods 3
Introduction to statistical concepts, graphical techniques, probability, distributions, estimation, one and two sample testing, chi-square tests, and simple linear regression. Prerequisite: C- or better in MATH 1050. (F,Sp)

STAT 2250 Internship and Cooperative Studies 1-6
Lower-division internship/cooperative work experience in statistics. (F,Sp,Su)

STAT 2300 QL Business Statistics 4
Descriptive and inferential statistics, probability sampling, estimation, tests of hypotheses, linear regression and correlation, chi-square tests, analysis of variance, and multiple regression. Prerequisite: C- or better in MATH 1050. (F,Sp,Su)

STAT 2950 Directed Reading and Conference 1-3
Prerequisite: Prior arrangement with specific instructor. (F,Sp,Su)

STAT 3000 QI Statistics for Scientists 3
Introduction to statistical concepts, graphical techniques, discrete and continuous distributions, parameter estimation, hypothesis testing, and chi-square tests. Prerequisite: C- or better in MATH 1100 or 1210. (F,Sp,Su)

STAT 4250 Advanced Internship/Co-op 1-6
Advanced educational work experience in statistics. Prerequisite: Approval of instructor. (F,Sp,Su)

STAT 4500 Methods of Teaching Statistics in Secondary and Middle School 3
Teaching methods course required for all prospective mathematics and statistics composite teaching majors. (F,Sp)

STAT 4950 Directed Reading and Conference 1-3
Prerequisite: Prior arrangement with specific instructor. (F,Sp,Su)

STAT 5100 CI/QI Linear Regression and Time Series 3
Methods for prediction and hypothesis testing in multiple linear regression models, including analysis of variance and covariance, logistic regression, introduction to time series, and signal processing. Prerequisite: C- or better in STAT 2000 or 3000. (F)

STAT 5120 Categorical Data Analysis 3
Analysis of categorical data, contingency tables, goodness of fit, random sampling, log-linear and logistic regression models, and sampling for proportions, as well as stratified and cluster sampling. Prerequisite: C- or better in STAT 5100. (F)

STAT 5200 Design of Experiments 3
Design, analysis, and interpretation of experiments, split plots, incomplete blocks, confounding, fractional factorials, nested designs, two- and three-way analysis of variance, covariance, and multiple regression. Prerequisite: C- or better in STAT 2000 or 3000. (Sp)

STAT 5300 QI Statistical Process Control 3
Techniques and applications of statistics in modern management of industrial processes. Control charts, acceptance sampling, design of industrial experiments, and analysis of process failures. Prerequisite: C- or better in STAT 2000 or 3000. This course is not currently being offered. For information about when it may be offered, contact the department.

STAT 5410 Applied Spatial Statistics 3
(dual listing 6410)
Explores spatial point patterns, spatially continuous data, area (grid) data, nearest neighbor distances, K function, complete spatial randomness, variogram, kriging, correlogram, and Moran’s I. For graduate (6000-level credit), a major project is required. Prerequisite: C- or better in STAT 3000. Knowledge of a statistical package (e.g., S-Plus, R, SAS, etc.) or any programming language (e.g., C/C++, FORTRAN, etc.) is strongly recommended. (F)

STAT 5570 Statistical Bioinformatics 3
Explores the bioconductor project. Discusses the following topics in gene expression analysis: microarray experiments, data normalization, sources of variability, testing for differential expression, multiple testing issues, and cluster analysis. Also explores the following sequence analysis topics: scoring alignments, hidden Markov models, and phylogenetic trees. Considers databases and ontologies. Prerequisite: C- or better in STAT 5100 or 5200. (Sp)

STAT 5600 CI Applied Multivariate Statistics 3
Introduction to multivariate statistical procedures for data analysis. Topics include MANOVA, principal component analysis, factor analysis, clustering, and classification. Prerequisite: C- or better in STAT 5100. (Sp)

STAT 5720 Advanced Regression Analysis 1-3
Examines means and effects models, estimability, and type I-IV hypotheses. Prerequisite: Prior arrangement with specific instructor. (F,Sp,Su)

STAT 5780 Problems and Projects 3
A capstone project is required. Prerequisite: C- or better in STAT 5100, MATH 5720. This course is not currently being offered. For information about when it may be offered, contact the department.

STAT 5900 Seminar 1-3
Review of current literature and developments in the field of statistics. (F,Sp)

STAT 6100 Advanced Regression Analysis* 3
Explores the following topics in the theory of linear models: least squares estimation, the general linear hypothesis, regression diagnostics for multicollinearity, outliers, and influential points. Also includes discussion of robust regression, nonlinear regression, generalized linear models, ACE, generalized additive models, and regression models for survival data. Prerequisites: C- or better in MATH 5720 and STAT 5100. (F)

STAT 6105 Time Series 3
The domain and frequency domain time series analysis, including Box-Jenkins methods, spectral analysis and filtering, introduction to state space methodology. Prerequisites: C- or better in STAT 5100, MATH 5720. This course is not currently being offered. For information about when it may be offered, contact the department.

STAT 6140 Wavelet Methods for Time Series** 3
Explores time series models, time and frequency domain analysis, discrete wavelet transform, and wavelet ANOVA, as well as applications in physics and finance. Prerequisites: C- or better in MATH 5720 and STAT 5100. (Sp)

STAT 6200 Analysis of Unbalanced Data and Complex Experimental Designs* 3

STAT 6250 Graduate Internship/Co-op*** 1-8
Educational work experience at the graduate level. Prerequisite: Permission of instructor.

STAT 6410 Applied Spatial Statistics 3
Explores spatial point patterns, spatially continuous data, area (grid) data, nearest neighbor distances, K function, complete spatial randomness, variogram, kriging, correlogram, and Moran’s I. For graduate (6000-level credit), a major project is required. Prerequisite: C- or better in STAT 3000. Knowledge of a statistical package (e.g., S-Plus, R, SAS, etc.) or any programming language (e.g., C/C++, FORTRAN, etc.) is strongly recommended. (F)
Course Descriptions

statistical package (e.g., S-Plus, R, SAS, etc.) or any programming language (e.g., C/C++, FORTRAN, etc.) is strongly recommended. (F)

STAT 6530 Modern Nonparametric Statistics** 3
Examines topics in resampling methods including: the jackknife and the bootstrap, bias, variance, and confidence intervals. Also explores the following topics in smoothing methods: histograms, kernel density estimates, and local polynomial regression. Includes testing procedures using ranks and empirical cumulative distribution functions. Prerequisites: C- or better in MATH 5710 and STAT 3000. (Sp)

STAT 6550 Statistical Computing*** 3
Survey of algorithms and tools for modern statistical computing. Topics include simulation design and implementation, algorithms for linear regression and subset selection, smoothing algorithms, fast fourier transform, EM algorithm, numerical methods for maximum likelihood estimation, and neural networks. Prerequisites: C- or better in STAT 5110, MATH 5720, and knowledge of a programming language. (Sp)

STAT 6560 Graphical Methods*** 3
Statistical graphics and scientific visualization of one, two, and higher dimensional data. Well-chosen and designed graphics are vital in exploratory data analysis, model diagnostics, and data presentation. Includes specific methods and general principles, such as effective use of color and motion. Prerequisites: C- or better in STAT 3000 and programming experience. (F)

STAT 6600 Multivariate Analysis 3
Statistical methods for analyzing multivariate data and the theory behind them. Topics include multivariate normal distribution and multivariate distributions derived from it, multivariate t-tests, regression, MANOVA, principal components and factor analysis, multidimensional scaling, classification, and cluster analysis. Prerequisites: C- or better in MATH 5720 and concurrent enrollment in STAT 5110. This course is not currently being offered. For information about when it may be offered, contact the department.

STAT 6650 Statistical Learning: Multivariate Statistical Analysis for Bioinformatics, Data Mining, and Machine Learning*** 3
Explores supervised learning, linear methods for regression and classification, model assessment and selection, model inference and averaging, additive models, boosting, neural networks, support vector machines, and unsupervised learning. Prerequisites: C- or better in MATH 5720 and STAT 5100. Programming experience in R or a related language is strongly recommended. (F)

STAT 6710 Mathematical Statistics I 3
Modes of convergence of random variables, laws of large numbers, characteristic functions, and the central limit theorem. Prerequisite: C- or better in MATH 5720. (F)

STAT 6720 Mathematical Statistics II 3
Consistency, loss functions, risk, and notions of optimality of estimations. Hypothesis testing and confidence regions. Large sample theory, notions of robustness. Prerequisite: C- or better in STAT 6710. (Sp)

STAT 6810 Topics in Statistics (Topic)*** 3*
STAT 6820 Topics in Statistics (Topic)*** 3*
Prerequisite: Permission of instructor. (F) (Sp)

STAT 6890 Practical Statistical Consulting*** 1-3*
Introduction to statistical consulting for graduate students, for faculty in other research departments, and for business, industry, and government. Prerequisite: Permission of instructor. (F,Sp,Su)

STAT 6910 Seminar in Statistics*** 1-3*
Review of current literature and developments in statistics. Prerequisite: Permission of instructor. (F,Sp)

STAT 6950 Directed Reading and Conference*** 1-4*
Prerequisite: Prior arrangement with specific instructor. (F,Sp,Su)

STAT 6970 Thesis and Research 1-6*
Outlining and conducting research in statistics. Thesis preparation. Graded Pass/Fall only. (F,Sp,Su)

STAT 6990 Continuing Graduate Advisement 1-9*
Graded Pass/Fail only. (F,Sp,Su)

STAT 7110 Linear Models (Topic)*** 3*
STAT 7120 Linear Models (Topic)*** 3*
(F) (Sp)

STAT 7180 Time Series Analysis (Topic)*** 3*
STAT 7190 Time Series Analysis (Topic)*** 3*
(F) (Sp)

STAT 7210 Experimental Design (Topic)*** 3*
STAT 7220 Experimental Design (Topic)*** 3*
(F) (Sp)

STAT 7310 Business and Industrial Statistics (Topic)*** 3*
STAT 7320 Business and Industrial Statistics (Topic)*** 3*
(F) (Sp)

STAT 7510 Nonparametric Statistics (Topic)*** 3*
STAT 7520 Nonparametric Statistics (Topic)*** 3*
(F) (Sp)

STAT 7550 Computational and Graphical Statistics (Topic)*** 3*
STAT 7560 Computational and Graphical Statistics (Topic)*** 3*
(F) (Sp)

STAT 7610 Multivariate Statistics (Topic)*** 3*
STAT 7620 Multivariate Statistics (Topic)*** 3*
(F) (Sp)

STAT 7710 Mathematical Statistics (Topic)*** 3*
STAT 7720 Mathematical Statistics (Topic)*** 3*
(F) (Sp)

STAT 7730 Bayesian Statistics and Decision Theory (Topic)*** 3*
STAT 7740 Bayesian Statistics and Decision Theory (Topic)*** 3*
(F) (Sp)

STAT 7810 Topics in Statistics (Topic) 1-3*
STAT 7820 Topics in Statistics (Topic) 1-3*
(F) (Sp)

STAT 7970 Dissertation Research 1-15*
Graded Pass/Fail only. (F,Sp,Su)

STAT 7990 Continuing Graduate Advisement 1-9*
Graded Pass/Fail only. (F,Sp,Su)

Social Work (SW)

See Department of Sociology, Social Work and Anthropology, pages 505-516

SW 1010 Introduction to Social Welfare 3
(formerly SW 1050)
Foundation course to facilitate development of an approach to thinking about social welfare. Explores broad common base of social work professional values, knowledge, skills, social policies, and programs. (F,Sp)
## Course Descriptions

### SW 2100 Human Behavior in the Social Environment 3
* Formerly SW 2500*
Interrelatedness of social, cultural, and environmental factors that combine with biological and psychological components to mold human behavior. Relevance of these factors to generalist social work practice. Prerequisite: SW 1010. (Sp)

### SW 2400 Social Work with Diverse Populations 3
Examines characteristics of various populations, including patterns, dynamics, and consequences of discrimination, economic deprivation, and oppression. Emphasis placed on empowerment of groups and individuals, as well as the accumulation of multicultural competence. Prerequisite: SW 1010. (Sp)

### SW 3050 Practice I 3
Introduction of generalist social work framework as an integrative tool, with special attention shown to strengths and empowerment perspective. Individuals as targets for change. Prerequisite: Admission to advanced standing in social work bachelor’s program, SW 1010, 2100, 2400. (F)

### SW 3350 Child Welfare 3
Developments in programs for meeting such needs of children as substitute parental care, adoptions, delinquency problems, mental retardation, and unmarried motherhood. Prerequisites: SW 1010, 2100, 2400.

### SW 3360 Adolescents: Theories, Problems, and Issues 3
Focuses on major social problems confronting youth today: teenage pregnancy, substance abuse, unemployment, education, and mental health. Investigation of theories explaining these problems and society’s efforts to resolve these problems. Prerequisites: SW 1010, 2100, 2400.

### SW 3450 School Social Work* 3
Overview of social work practice in an educational setting.

### SW 3550 Social Gerontology* 3
Overview of field of aging and its connection to the practice of social work.

### SW 3650 Mental Health* 3
Services offered for the prevention and treatment of mental illness and the feasibility of social action programs on a community level. Prerequisites: SW 1010, 2100, 2400.

### SW 3750 Medical Social Services* 3
Introduction to role of social worker in health settings. Emphasizes definition of health and disease, patient rights, and consumer participation. Examination of basic health programs, major trends in health planning, and alternate models of health delivery. Prerequisites: SW 1010, 2100, 2400.

### SW 3850 Spirituality and Social Work* 3
Provides a framework of knowledge, values, skills, and experiences for spiritually sensitive social work practice.

### SW 3950 Occupational and Environmental Health* 3
Overview of the issues of occupational and environmental health from a public policy and psychosocial perspective. Presents issues concerning industrial and environmental hazards relating to occupational injury and illness. Explores policies addressing these issues, as well as legislation and social problems.

### SW 4100 Social Work Research 3
Survey of qualitative and quantitative scientific methods of research in social work. Articulation of research with practice and policy. Prerequisites: SW 1010, 2100, 2400. (F)

### SW 4150 Practice II 3
Introduction to generalist social work practice at the micro level. Emphasizes study of skills from a strengths and empowerment perspective with individuals, families, and small groups. Special attention paid to ethical issues and working with diverse population. Prerequisite: SW 3050. (Sp)

### SW 4160 Practice III 3
Introduction to generalist social work practice at the macro level. Emphasizes study of skills from a strengths and empowerment perspective with groups, organizations, and community systems. Special attention paid to ethical issues and working with diverse populations. Prerequisite: SW 4150. (Sp)

### SW 4870 Beginning Field Practicum 6* (F)
Practical experience in a social service agency. Seminar integrates field work experiences and academic knowledge. Emphasizes use of self and integration of knowledge, values, skills, and methods of practice, with special emphasis given to the code of ethics. Prerequisite: Instructor’s permission and by application. (F)

### SW 4900 Topical Issue Seminar 3-6 (F)
Advanced seminar, designed as a forum for students from varied social science disciplines. Seminars may include issues involved in social work values and ethics, diversity, promotion of social and economic justice, and/or populations-at-risk. Prerequisites: SW 1010, 2100, 2400, and permission of instructor.

### SW 4950 Directed Readings 1-5 (Sp)*
Independent readings in various areas of social work: practice, policy, HBSE, research, populations-at-risk, values and ethics, social and economic justice, and diversity. Prerequisite: Instructor’s permission and a plan for study. (F,Sp)

### SW 5350 CI Social Welfare Policy 3
Introduction to policy making in social welfare. Principles of social and economic justice used to analyze selected social policies and programs within a historical and contemporary context. Attention given to differential impact on at-risk populations. Prerequisites: SW 1010, 2100, 2400. (F)

### SW 5870 Advanced Field Practicum 6 (F)
Supervised social work practice and projects. Provides opportunities for advanced social work students to apply classroom learning in a field setting. Minimum of 240 hours in a social service agency required. Prerequisite: Instructor’s permission and SW 4870. (Sp)

*This course is taught alternating years. Check with department for information about when course will be taught.

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

## Theatre Arts (THEA)

See Department of Theatre Arts, pages 528-538

### THEA 1000 Theatre Orientation for Majors 1
Departmental policies, procedures, requirements, and philosophy. Introduction to fundamental audition and portfolio presentation techniques. (F)

### THEA 1013 BCA Understanding Theatre (formerly THEA 1010 BCA) 3
Survey of dramatic principles and structure, genre, and conventions for nonmajors. Functions and contributions of theatre artists and practices of the contemporary stage. (F,Sp,Su)

### THEA 1023 BCA Introduction to Film (formerly THEA 1020 BCA) 3
Study of elements of film narrative in fictional and nonfictional movies to provide a deeper understanding of content and film form. (F)

### THEA 1030 BHU Exploring Performance Through Aesthetic Texts 3
Introduces concepts and practices of performance studies and oral language arts. Integrates interpretation, analysis, and performance of major literary genres and oral forms of communication that contain aesthetic qualities. Students learn theatre techniques to create original performance pieces. (F,Sp,Su)

### THEA 1033 Beginning Acting (formerly THEA 1400) 3
Demonstration of skills in actor awareness (personal and group), organic acting techniques, scene study with partners, and monologue preparation. Provides understanding of theories and methodologies. Skilled demonstrated in areas of body movement, diction, observation, concentration, imagination, and “action.” (F,Sp)

### THEA 1113 Beginning Voice (formerly THEA 1450) 3
Training in basic vocal principles (Rodenburg, Linklater). Covers proper breath placement and support, physical alignment, projection, and resonance. Students learn basic warm-up to prepare the voice for performance. (F)

**THEA 1223 Stage Makeup**

Emphasizes one-dimensional and three-dimensional illusional work, focusing on knowledge and skills in "corrective" aging and period makeup, with introductions to related areas, such as hair, hands, and prosthetics. Enrollment restricted to students who are theatre arts majors or who have received departmental authorization. (F,Sp)

**THEA 1430 Movement for Actors I**

Introductory, experiential course in movement, including Laban Movement Analysis, Alexander Technique, and authentic movement. Emprovisation will be developed to a creative approach to character, emotion, and action through movement. (F,Sp)

**THEA 1513 Stage and Costume Crafts**

Introduction to different physical theatre forms, standard stage equipment, and methods of staging plays. Basic practices in set construction, stage lighting, sound, and costume construction. Enrollment limited to Theatre Arts majors and to students receiving departmental permission. (F,Sp)

**THEA 1713 Introduction to Playscript Analysis**

Introductory course focusing on plot, character, language, and thematic analysis of varied historical and modern performance texts in the context of contemporary staging practice. Enrollment limited to theatre majors and minors only. (F,Sp)

**THEA 2410 Directing**

Provides instruction and practice in play selection, script analysis, research, blocking, leadership, communication skills, conduct of rehearsals, self-awareness, production organization and operation, and personal organization for stage direction. Principles apply in professional, civic, and educational settings. Prerequisite: THEA 1033 (F,Sp)

**THEA 2420 Intermediate Acting: Scene Study**

Scene study from the modern and contemporary theatre using the principles studied in THEA 1033. Prerequisite: THEA 1033. (F,Sp)

**THEA 2430 Movement for Actors II**

Theory and practice in physical theatre movement styles, including Grotowski, Mime, Commedia dell’Arte, and others. Emphasis on creative approach for projecting character, emotion, and action through use of the body. History and practical experience in advanced movement styles. Prerequisite: THEA 1430. (F,Sp)

**THEA 2440 Introduction to Dance for Theatre: Jazz, Ballet, and Tap**

Offers an introduction to the three most influential styles of dance in musical theatre: jazz, ballet, and tap. Enables dancers to learn new steps quickly by utilizing the appropriate techniques. Time steps and turns are mastered. (F)

**THEA 2470 Movement: Stage Combat**

Techniques in stage combat. Prerequisite: THEA 1430. (F,Sp)

**THEA 2480 Intermediate Voice for Theatre**

Training in vocal technique, incorporating breath support, vocal range, power, and projection. Training in speech and articulation. Work in various vocal theories (Berry, Linklater, Hart). Instruction in the International Phonetic Alphabet. Prerequisite: THEA 1113. (Sp)

**THEA 2490 Intermediate Acting: Shakespeare**

Exploring language and techniques of playing Shakespeare through scene study and monologues. Prerequisite: THEA 1033. (F,Sp)

**THEA 2510 Scene Painting/Properties**

Instruction in scene painting techniques. Construction and alteration of stage properties. For theatrical technicians and designers. Demonstration and lab work included. Prerequisite: THEA 1513. (F,Sp)

**THEA 2540 Lighting Design**

Introduction to basic elements of lighting design. Demonstration of techniques used to create a specific lighting design. Provides basic understanding of light energy, angle, color, and technology available for designing with this medium. (F,Sp)

**THEA 2550 Stage Management**

Provides problem-solving environment for students to acquire knowledge and skills necessary for becoming a competent stage manager. Discussion of organization, delegation, scheduling, and personnel management. Prerequisite: Permission of instructor. (F,Sp)

**THEA 2555 Production Practicum**

Specialized crew work in ongoing Theatre Arts Department productions. Assignments made upon meeting with technical director. (F,Sp, Su)

**THEA 2556 Production Run Crew**

Specialized crew work for Theatre Arts Department productions. Assignments made upon meeting with technical director. (F,Sp, Su)

**THEA 2560 Theatre and Studio Sound**

Sound recording, reinforcement, and control operation skills for theatrical production. (F,Sp)

**THEA 2666 Performance Practicum I**

Performance work in ongoing Theatre Arts Department productions, upon casting by the director. (F,Sp)

**THEA 2667 Performance Practicum II**

Performance work in ongoing Theatre Arts Department productions, upon casting by the director. (F,Sp)

**THEA 3050 DHA Period Styles/Historic Interiors**

Intensive instruction in architecture, furniture, and interior design of major Western European periods from Egyptian to the present. Taught through lectures, slide presentations, and student-compiled source book with examples of major styles. (F,Sp)

**THEA 3230 DHA Survey of Western Theatre**

History of performance traditions, theatre architecture, management systems, personnel, and written drama in the West from ancient Egypt to mid-20th Century. (F)

**THEA 3300 Clinical Experience in Teaching I**

Clinical apprenticeship consisting of teaching theatre in local schools. Includes observation, tutorial work, small group discussions, whole class instruction, and lesson/unit planning. Graded Pass/Fail only. (F,Sp)

**THEA 3400 DHA Mask Building and Performance**

History and practical experience in mask building and performance, including neutral mask, commedia, alternative identities, human, animal, phantasmagoric, and other mask techniques. Emphasizes expressing emotion and developing character through gesture and posture. Prerequisite: THEA 1430. (F,Sp)

**THEA 3410 Dance for Theatre: Tap**

Builds on tap skills learned in the introductory course, emphasizing mastery of single and double tap sounds and ensuring a solid foundation for elementary and intermediate tap steps commonly used in theatre productions. Prerequisite: THEA 2440. (F,Sp)

**THEA 3420 Dance for Theatre: Jazz**

Builds on jazz skills learned in the introductory course, incorporating contemporary jazz styles, jazz techniques, and routines used in musical theatre repertory. Prerequisite: THEA 2440. (F,Sp)

**THEA 3430 Period Dance Styles**

Dances learned from different periods then "rechoreographed" for stage practice. Prerequisite: THEA 1430. (F,Sp)

**THEA 3440 Dance for Theatre: Ballet**

Designed for an in-depth experience in ballet, focusing on technique and learning ballet choreography. Builds on ballet skills learned in the introductory course. Prerequisite: THEA 2440. (F,Sp)

## Course Descriptions

**THEA 5360**  
Drama in the Secondary Education  
(dual listing 6360)  
Classroom: Grades 7-12  
3  
Practical teaching strategies, tools, and performance and production techniques for meeting core curriculum requirements in the secondary education classroom. Prerequisite: Sophomore-level or higher. (Sp)

**THEA 5370**  
Methods in Teaching Theatre and Speech  
3  
Development of materials and strategies for teaching secondary school speech and theatre, and managing secondary theatre drama programs. Prerequisite: Admission to Secondary Teacher Education Program (STEP). (F)

**THEA 5390**  
Student Teaching Seminar  
2  
Focuses on problems arising during student teaching. Includes plans, procedures, adaptive classroom strategies, and evaluation. Graded Pass/Fail only. (F,Sp)

**THEA 5400**  
Advanced Acting: Turn of the Twentieth Century  
3  
Scene study from turn of the century playwrights, including Ibsen, Chekhov, Shaw, and Wilde. Prerequisites: THEA 1033; and THEA 2420 or 2490. (F,Sp)

**THEA 5410**  
(dual listing 6410)  
Advanced Directing  
3  
Provides instruction and practice in advanced techniques of script analysis, research outside the discipline, review of literature, awareness of thinking styles and values, and preparation for studio directing assignments. Prerequisites: THEA 2410 and permission of instructor. (F,Sp)

**THEA 5420**  
Advanced Acting: Absurdist  
3  
Theatre absurdist: nontraditional acting approaches to nontraditional texts. Includes scene study from the plays of Pinter, Mamet, Brecht, and Ionesco. Prerequisites: THEA 1033; and THEA 2420 and 2490. (F,Sp)

**THEA 5430**  
Advanced Acting: Acting for the Camera  
3  
Acting for the camera. Prerequisite: THEA 1033. (F,Sp)

**THEA 5440**  
Advanced Acting: Musical Theatre Auditions  
3  
Introduction to techniques of musical theatre auditions. Prerequisites: THEA 1033; and THEA 2420 or 2490. (F,Sp)

**THEA 5450**  
Advanced Acting: Restoration and Greek  
3  
Scene study from the Restoration and Greek playwrights, including Congreve, Euripides, Sophocles, and Vanbrugh. Prerequisites: THEA 1033; and THEA 2420 or 2490. (F,Sp)

**THEA 5470**  
Advanced Acting: Modern Methods  
3  
Twentieth Century acting techniques, methodologies, and theories. Prerequisites: THEA 1033; and THEA 2420 or 2490. (F,Sp)

**THEA 5510**  
Computer-Aided Design for Theatre  
3  
Computer-aided design applications for theatre. Drafting and rendering on computer for set, light, and costume design. Prerequisites: THEA 2540, 3510, and 3520. (F)

**THEA 5590**  
Design Studies for Theatre  
2  
Actualization of a design from conception through completion with faculty supervision. Creation of all drafting, renderings, and/or models for portfolio development. (F,Sp)

**THEA 5740**  
(dual listing 6740)  
Repertory Theatre Performance  
2-8  
Rehearsals, crew, and staff assignments. Performance of four plays in repertory. Company members selected through audition, based on ability and commitment to theatre. For 6740 credit, graduate students fulfill mentoring assignments and/or additional assignments in community service. Enrollment limited and by permission of Theatre Arts Department staff. (Su)

**THEA 5750**  
(dual listing 6750)  
Repertory Theatre Production  
2-8  
Rehearsal, crew, and staff assignments. Performance of four plays in repertory. For 6750 credit, graduate students work with undergraduate students in mentoring situations. (Su)

**THEA 5900**  
Special Projects I  
1-4  
Directed individual research studies or creative projects in theatre. (F,Sp,Su)

**THEA 5910**  
Senior Project  
2  
Culminating project and/or recital in student’s specified program. (F,Sp)

**THEA 5920**  
Special Projects II  
1-4  
Directed individual research, advanced design, or creative projects in theatre. (F,Sp,Su)

**THEA 5930**  
Special Projects III  
1-4  
Directed individual advanced design or creative projects in theatre. (F,Sp)

**THEA 5950**  
Rendering and Painting for the Theatre  
3  
Hands-on experience for theatrical technicians and designers using a variety of drawing techniques commonly used in theatrical design. Primary method of instruction is demonstration and experience through lab work. (F,Sp)

**THEA 6010**  
Introduction to Graduate Study in Theatre  
3  
Bibliography, research methods, and writing. (F)

**THEA 6030**  
(dual listing 4030)  
Storytelling  
3  
Reviews background and techniques of traditional telling. Explores psychological, educational, therapeutic, historical, and folkloric aspects of storytelling. For 6030 credit, graduate students must participate in microteaching sessions in areas of expertise, with additional storytelling research or service. (F,Sp,Su)

**THEA 6180**  
Theatre Production Portfolio  
3  
Prepares graduate students for the workplace using portfolio presentation techniques, job applications, resumes, interview techniques, and the creation of a design portfolio. (Sp)

**THEA 6240**  
(dual listing 5240)  
Contemporary Theatre  
3  
History and theory of a theatre movement since the 1980s, primarily in the English-speaking world, leading to a study of the theatrical world and its practices today. For 6240 credit, graduate students must participate in microteaching sessions with additional reading or writing assignments. Prerequisite: THEA 3230. (F,Sp)

**THEA 6250**  
Playwriting  
3  
Advanced study in playwriting. Course culminates in the performance of original works. Enrollment is contingent on permission of instructor. Theatre Arts majors and students who have completed THEA/ENGL 4250 will have priority. (Sp)

**THEA 6270**  
(dual listing 5270)  
Performance Theory and Criticism  
3  
Topics in dramatic theory, including traditional Aristotelian analysis, comedy, tragedy, and modern performance theory. Includes preparation for review and adjudication of performance. For 6270 credit, graduate students must participate in microteaching sessions with additional research or writing assignments. (Sp)

**THEA 6290**  
(dual listing 5290)  
Special Topics in Theatre  
3  
Specialized topics in theatre history, performance, and dramatic literature. Sample topics include Classical Theatre of Greece and Rome, Golden Age Spanish Theatre, Elizabethan Theatre, Musical Theatre, Asian Theatre, and others. For 6290 credit, graduate students must participate in microteaching sessions with additional research or writing assignments. Prerequisite: THEA 3230. (F,Sp)

**THEA 6330**  
(dual listing 4330)  
Drama and Theatre for Youth: Grades K-6  
3  
Practical teaching strategies, tools, and performance techniques for integrating drama and theatre in the classroom and beyond, with special emphasis on language arts curriculum. For graduate credit, students must participate in microteaching sessions with additional research, writing, and/or service assignments. (F,Sp,Su)
THEA 6360  Drama in the Secondary Education (dual listing 5360)  Classroom: Grades 7-12  3
Practical teaching strategies, tools, and performance and production techniques for meeting core curriculum requirements in the secondary education classroom. Prerequisite: Sophomore-level or higher. (Sp)

THEA 6410  Advanced Directing (dual listing 5410)  3
Provides instruction and practice in advanced techniques of script analysis, research outside the discipline, review of literature, awareness of thinking styles and values, and preparation for studio directing assignments. Prerequisites: THEA 2410 and permission of instructor. (F,Sp)

THEA 6480  Theatre Leadership and Management (dual listing 4480)  3
Explores legal and financial choices, market research and marketing plans, physical plant and season operations, consideration of union and management relationships, and various planning and budget control procedures. For 6480 credit, graduate students must participate in microteaching sessions with additional practicum, writing, or problem solving assignments. (Sp)

THEA 6510  Advanced Scene Design (dual listing 4510)  3
Preparation for graduate school or a career in design. Advanced instruction in drafting, rendering, model-making, technical skills, research, design principles, and portfolio development. For 6510 credit, graduate students must participate in microteaching sessions with additional rendering assignments. Prerequisites: THEA 1513 and 3510. (F,Sp)

THEA 6520  Advanced Costume Design (dual listing 4520)  3
Advanced theory and practice in the design and selection of costumes for nonrealistic, historical, and modern plays. For 6520 credit, graduate students must participate in microteaching sessions with additional research or practicum assignments. Prerequisite: THEA 3520. (F,Sp)

THEA 6540  Advanced Lighting Design (dual listing 4540)  3
Advanced training in elements of lighting design. Exploration of advanced techniques used to create and execute a lighting design. For 6540 credit, graduate students must participate in microteaching sessions with additional research or practicum assignments. Prerequisite: THEA 2540. (Sp)

THEA 6740  Repertory Theatre Performance (dual listing 5740)  2-8
Rehearsal, crew, and staff assignments. Performance of four plays in repertory. Company members selected through audition, based on ability and commitment to theatre. For 6740 credit, graduate students fulfill mentoring assignments and/or additional assignments in community service. Enrollment limited and by permission of Theatre Arts Department staff. (Su)

THEA 6750  Repertory Theatre Production (dual listing 5750)  2-8
Rehearsal, crew, and staff assignments. Performance of four plays in repertory. For 6750 credit, graduate students work with undergraduate students in mentoring situations. (Su)

THEA 6790  Seminar in Drama  1-4
Flexible service topics course covering a range of topics according to individual student need and/or visiting instructors, independent study, etc. (F,Sp)

THEA 6800  Graduate Studies in Theatre  1-6
Research and preparation for graduate practicum projects in theatre. (F,Sp)

THEA 6900  Research Studies  1-4
Directed individual research studies or creative projects in theatre. (F,Sp,Su)

THEA 6920  Graduate Projects in Theatre  2-3
Studio practicum in support of projects in stage directing, design, and technical practice. (F,Sp)

THEA 6970  Thesis  1-4
Graded Pass/Fail only. (F,Sp)

THEA 6990  Continuing Graduate Advisement  1-2
Graded Pass/Fail only. (F,Sp)

Repeatability for credit. Check with major department for limitations on number of credits that can be counted for graduation.

Course Descriptions

University Studies (USU)

See General Education Requirements, pages 49-52
Also see University Studies Depth Education Requirements, pages 53-59

USU 1000  Introduction to Computers and Information Literacy  1
Introduction to basic concepts of computers and information literacy. Preparation for USU Computer and Information Literacy (CIL) test. For students having some familiarity with computers, but needing additional instruction. Graded Pass/Fail only. Taught during the first seven weeks of fall or spring semester. Note: USU 1000 cannot be counted toward the breadth requirements. (F,Sp)

USU 1010  University Connections  1-3
Provides an environment of challenge and support to help new students make a successful transition to USU. Class curriculum and activities provide an environment wherein students become familiar with the broad academic, social, and cultural opportunities offered by USU and the surrounding community. Note: USU 1010 cannot be counted toward the breadth requirements. (F,Sp)

USU 1100  First-Year Seminar  3
Characterized by investigation of a topic that is most likely a research, scholarly, or artistic specialty of the faculty member. Topic presented in pedagogically interesting ways. May include fieldwork or trips to enhance study of the topic. Note: USU 1100 cannot be counted toward the breadth requirements.

USU 1300  BAI U.S. Institutions  3
Provides basic understanding of the history, principles, form of government, and economic system of the United States. Emphasis on ideas and critical thinking, rather than dates, names, and places. (F,Sp,Su)

USU 1320  BHU Civilization: Humanities  3
Provides basic understanding of a broad range of themes, which cut across human history and continue to be important in contemporary society. (F,Sp,Su)

USU 1330  BCA Civilization: Creative Arts  3
Students will explore questions such as: What is Art? How is it judged? How does artistic expression vary across cultures? Course will cover several forms of art, and students will attend concerts, visit galleries, and attend theatrical performances. (F,Sp,Su)

USU 1340  BSS Social Systems and Issues  3
Examines debates in the social sciences about contexts which shape human experience. Compares experiences between life stages, individuals, groups, societies, and/or historical periods. Contrasts different social science disciplines. (F,Sp,Su)

USU 1350  BLS Integrated Life Science  3
Interdisciplinary course focusing on basic concepts of life science. Demonstrates role of modeling, prediction, and observation in the process of scientific discovery, which occurs within an historical and social context. (F,Sp,Su)

USU 1360  BPS Integrated Physical Science  3
Interdisciplinary course focusing on basic concepts of physical science, including structure of matter and magnitude and character of the forces of nature. Demonstrates role of modeling, prediction, and observation in the process of scientific discovery, which occurs within an historical and social context.

USU 3330  DHA Arts Symposium  1-2
Students attend a number of cultural events offered at USU and in the community, as well as write critiques of the events. Prerequisite: Completion of at least 30 credits. Note: USU 3330 may be applied to the depth requirements, but not to the breadth requirements. Two credits of USU 3330 are needed to fulfill the DHA requirement.
Course Descriptions

UTAH STATE UNIVERSITY 2007-2009 GENERAL CATALOG

Watershed Sciences (WATS)

See Department of Watershed Sciences, pages 540-545

WATS 1020 Watershed Sciences Professional Orientation 1
Introduction and orientation to natural resource/environmental disciplines and related professional careers for Watershed Sciences majors. Discussion of education, curricula, faculty, professional societies, and employment opportunities. Graded Pass/Fail only. (F)

WATS 1200 BLS Biodiversity: Its Conservation and Future 3
Today, species extinctions are occurring at an unprecedented rate. People in developed countries are concerned with this loss. Solving this problem requires knowledge of what determines biodiversity, how it is being threatened, and how its loss can be countered. (Sp)

WATS 2250 Introductory Internship/Co-op 1-3\(^\circ\)
Introductory-level educational experience in internship/cooperative education position approved by department. Prerequisite: Permission of department. (F, Sp, Su)

WATS 3000 DSC Oceanography 3
Examines fundamental interrelationships between physical environment of the oceans and the life forms they support. Suitable for nonbiologists. (Sp)

WATS 3100 DSC/CI Fish Diversity and Conservation 3
Systematics, physiology, ecology, evolution, and conservation of major groups of marine and freshwater fishes. Stresses functional morphology, physiological ecology, and community interactions explaining fish abundance and distribution. Prerequisite: BIOL 1010 or 1610 or 1620. (F)

WATS 3110 Fish Diversity Laboratory 1
Focuses on field collection, identification, and habitat relationships of freshwater fishes in North America. Prerequisite: WATS 3100 (may be taken concurrently). (F)

WATS 3600 Geomorphology 4
Geomorphic processes, origin of landforms and surficial deposits. Emphasizes fluvial and hillslope landscape elements, and surficial geologic mapping. Three one-hour lectures and one three-hour lab per week. Prerequisite: GEO 1010 or 1110 or GEOG 1000. Also taught as GEO 3600. (F)

WATS 3700 CI Fundamentals of Watershed Science 3
Study of water movement, hillslope processes, and nutrient movement in catchments, and its relevance to the properties, land use, and management of watersheds as natural resource units. (Sp)

WATS 3820 DSC/QI Climate Change 3
Emphasizes physical basis of climate (climate dynamics), as well as the mechanisms and processes for its fluctuations on sub-seasonal to interannual time scales (climate variations) and on regional to hemispheric/global time scales. Prerequisite: BMET 2000 or GEOG 1000. Also taught as BMET 3820. (Sp)

WATS 4250 Advanced Internship/Co-op 1-9\(^\circ\)
Internship/cooperative education work experience; increased complexity to help student gain a more professional level of experience. Prerequisite: Permission of department. (F, Sp, Su)

WATS 4490 Small Watershed Hydrology*** 4
(dual listing 5490)
Detailed exploration of concepts of hydrologic processes in small, wildland watersheds. Concentrates on recent research findings concerning key hydrologic processes. Particular attention paid to study of partitioning of water in the hydrologic cycle, sources for runoff generation, snow and snowmelt, and erosion. Features process modeling and parameter estimation techniques as related to wildland systems. Prerequisites: MATH 1210, WATS 3700. (F)

WATS 4500 Limnology: Ecology of Inland Waters 3
Ecosystem analysis of physical, chemical, and biological interactions in lakes and streams. Application of these concepts for managing aquatic system. Prerequisite: CHEM 1210. (Sp)

WATS 4510 Aquatic Ecology Practicum 3
Integration of limnological theory and methods of conducting field and laboratory analyses of physical, chemical, and biological parameters. Students will design and conduct their own research project within the framework of a general water quality or fishery issue addressed by the class. Development of analytical, statistical, and writing skills. Field trips required. Prerequisites: WATS 4500; STAT 3000 (may be taken concurrently). (F)

WATS 4530 Water Quality and Pollution 3
(dual listing 6350)
Reviews biological and social problems caused by point and nonpoint source water pollution; toxicology; abiotic and biotic water quality parameters; and use criteria of the Clean Water Act. Graduate-level class will require additional readings of the peer-reviewed literature and an additional class meeting to have in-depth discussions of those readings. Each graduate student will be responsible for making a presentation at the beginning of class, and leading the discussion. (F)

WATS 4650 Principles in Fishery Management 3
(dual listing 6650)
Emphasizes management of fish populations within context of community and ecosystem dynamics. Stresses use of simulation models to assess effects of growth, recruitment, and mortality on age-structured populations. (Sp)

WATS 4750 Fundamentals of Remote Sensing Science 3
(dual listing 6740)
Develops the scientific principles behind remote sensing. Examines the basic physics of electromagnetic radiation and the interactions of radiation with the surface and the atmosphere. Prerequisites: MATH 1060, 1210; PHYS 2210. (F)

WATS 4930 Geographic Information Systems 4
(dual listing 6920)
Examines structure and operation of Geographic Information Systems (GIS). Explores design, theory, and implementation of GIS software, digitizing, fundamentals of vector and raster GIS processing, georeferencing, map accuracy, and site location. To receive graduate-level credit, students must complete a more rigorous final project directed toward their thesis or dissertation. To qualify for enrollment in WATS 4930, students must have achieved a class rank of junior or senior, or must receive permission from the instructor. (F)

WATS 4950 Special Topics 1-3\(^\circ\)
Individual study and research upon selected watershed sciences problems. (F, Sp, Su)

WATS 4960 Directed Readings 1-3\(^\circ\)
Provides one-on-one interaction between student and instructor. Prerequisite: Permission of department. (F, Sp, Su)

WATS 4970 Undergraduate Research 1-3\(^\circ\)
Individual or team research. Prerequisite: Permission of department. (F, Sp, Su)

WATS 4980 Watershed Sciences (dual listing 6800 and 7800) 1
Departmental Seminar
Exposes students to new developments in research and management in the fields of watershed sciences. Features participation by students, faculty, and
WATS 5550 Freshwater Invertebrates 3
Ecology, collection, and systematics of freshwater aquatic invertebrates. Focuses on insects, but also covers crustaceans, molluscs, and annelids. Several weekend field trips and a collection are required. Prerequisite: One year of general biology or zoology, or permission of instructor. Also taught as BIOL 5550. (Sp)

WATS 5600 Surface Hydrologic Field Methods 3
Hydrologic concepts and terminology taught through collection, analysis, and interpretation of hydrologic data. Emphasizes principles and practice of several hydrologic measurements and water sampling in natural and manmade environments. Prerequisite: SOIL 3000 or instructor’s permission. Also taught as SOIL 5600/6600. Not currently being taught. Contact department for further information.

WATS 5640 Riparian Ecology and Management 3
(dual listing 7640)
Explores structure and function of riparian ecosystems and management options for maintaining sustainable ecological function. Prerequisite: NR/BIOL 2220, WATS 3700. (Sp)

WATS 5650 Watershed and Stream Restoration 2
Overview of the current theory and practice of watersheds and streams. Emphasizes field visits with restoration projects and specialists. Prerequisites: WATS/WILD 5490/4490, WATS/GEOS 5150, WILD 5610 (or equivalent). Currently taught through Continuing Education as a summer short course. (Su)

WATS 5670 Watersheds and Stream Restoration Practice 2
Capstone experience. Development of a restoration plan for a site, involving site planning and design. Currently taught through Continuing Education as a summer short course. (Su)

WATS 5680 Paleoclimatology* 3
Covers climate through the past four billion years of geologic time. Explores driving forces behind climate changes. Examines data and methods used in paleoclimatic research. Includes discussion of literature and stresses local paleoclimatic records. Three lectures per week, along with field trips. Prerequisite: GEO/WATS 3600 or permission of instructor. Also taught as GEO 5680/6680 and BMET 5680/6680. (Sp)

WATS 5760 Remote Sensing: Modeling and Analysis 3
Advanced techniques in the analysis of the earth’s surface using remotely-sensed imagery and data in a digital format. Projects employ and/or develop research models. (Sp)

WATS 5930 Geographic Information Analysis 4
(dual listing 6930)
Prerequisites: MATH 1100 or 1210; and PHYS 2110 or 2210. Also taught as GEO 5930/6930. Three lectures per week, along with field trips. Prerequisite: STAT 2000 or higher; GEO 4930 or ENV 3500, or instructor’s permission. (Sp)

WATS 6120 Aquatic Production Biology** 2
(dual listing 7120)
Review of current literature on bacterial, algal, invertebrate, and fish production in lakes, rivers, and the sea. Particular emphasis is placed on whole-ecosystem productivity studies. (Sp)

WATS 6150 Fluvial Geomorphology 3
(dual listing 5150)
Prerequisites: MATH 1100 or 1210; and PHYS 2110 or 2210. Also taught as GEO 6150/5150. Focused on constituents participating in modern management of large river basins, including water developers, irrigators, municipalities, power consumers, recreationists, environmentalists, and scientists. Primary examples drawn from Colorado, Columbia, Rio Grande, and Missouri river basins. (Sp)

WATS 6160 Hillslope and Landscape Geomorphology* 3
Includes basics of hillslope weathering, transport, and hydrologic processes. Surveys classic and recent literature on hillslope-scale and landscape-scale geomorphic research. Three lectures and several Saturday field trips. Prerequisite: GEO/WATS 3600. Also taught as GEO 6160. (Sp)

WATS 6170 Fluvial Geomorphology Lab 2
(dual listing 5170)
Field analysis focuses on physical processes in streams which control their shape, plan form, slope, bed material, and distribution of channel bars. Application of geomorphology to aquatic ecology and environmental restoration. Prerequisite: GEO/WATS 3600. Also taught as GEO 6170/5170. (F)

WATS 6200 Watershed Analysis** 2
Explores watershed analysis, which is a procedure used to characterize the human, aquatic, riparian, and upland features, conditions, processes, and interactions within a watershed. Watershed analysis includes ecosystem analysis at the watershed level, providing a systematic way to understand and organize system information for the purpose of understanding the consequences of management actions prior to implementation. (Sp)

WATS 6230 Fish Ecology** 2
(dual listing 7230)
Reviews current literature on physiological, behavioral, population, and the community ecology of fishes. Particular emphasis placed on current literature relevant to management of sport and endangered freshwater species. (Sp)

*Available as a summer short course.

Lectures, laboratory exercises, and field-based projects introduce students to the concepts, strategies, and analytical methods of natural resource and...
Course Descriptions

environmental inventory and assessment. Prerequisites: BIOL/NR 2220; MATH 1100 or higher; STAT 2000 or 3000; and passing score on the University Studies Computer and Information Literacy (CIL) exam. (F)

WILD 3710 Monitoring and Assessment in Natural Resource and Environmental Management 3 Lectures, case studies, laboratory exercises, and field-based projects introduce students to the concepts, strategies, and analytical methods of science-based assessment of natural resources. Prerequisite: WILD 3700 or permission of instructor. (Sp)

WILD 3800 Wildland Ecosystems 3 Structure, function, and dynamics of terrestrial ecosystems in response to natural and anthropogenic impacts, with emphasis on the Intermountain West and Great Plains. Prerequisites: NR/Biol 2220; and SOIL 3000 (or concurrent enrollment). (Sp)

WILD 3810 Plant and Animal Populations 3 Basics of plant and animal population ecology, including population regulation, life histories, single and multiple-species interactions, and metapopulations. Case studies will cover topics of both management and conservation concern. Prerequisites: NR/Biol 2220, MATH 1100 or higher. (Sp)

WILD 3850 Vegetation and Habitat Management 3 Applying ecological principles and concepts to manipulate the composition, structure, and productivity of wildland vegetation for a range of objectives, including the creation and maintenance of wildlife habitat, using biological, chemical, and mechanical methods, as well as fire. Prerequisites: SOIL 3000; WILD 3650 (may be taken concurrently). (F)

WILD 3900 Managing Dynamic Ecological Systems 3 Emphasizes how people from diverse natural resource disciplines benefit from integrating Eastern and Western philosophical and cultural beliefs with behavioral principles and processes to manage dynamic systems with due consideration for the ecological, cultural, and economic values of societies. (Sp)

WILD 4000 Principles of Rangeland Management 3 Modern principles of rangeland management, including history of the profession, ecology, plant physiology, impacts of grazing on individual plants and plant communities, grazing management, range animal nutrition, rangeland watersheds, and the economics and planning of rangeland practices. Also introduces range-wildlife relations and vegetation manipulation. (Sp)

WILD 4050 Urban Fish and Wildlife Management 3 Concentrates on: understanding of impacts of urbanization on wildlife and habitat, developing basic understanding of wildlife needs; completing urban wildlife habitat inventory; and preparing urban wildlife conservation and management plan. (F,Sp,Su)

WILD 4250 Advanced Internship/Co-op 1-9* Advanced-level educational experience in internship/cooperative education position approved by department. Prerequisite: Departmental signature. (F,Sp,Su)

WILD 4500 Principles of Wildlife Management 3 Provides students with a working knowledge of the application of basic concepts in ecology and animal behavior to the management of wildlife resources to achieve diverse objectives of conservation, control, or culling. Prerequisites: WILD 3610 and 3810. (Sp)

WILD 4520 Wildland Fire Behavior 3 Comprehensive examination of fuels, weather, and topography and how they interact to determine wildland fire behavior, including rate of spread, energy release, and intensity. This course is being offered in WebCT format. For information, contact the department. (F,Sp,Su)

WILD 4540 Forest Harvest and Utilization 2 Elements of timber harvest systems, including policies and practices for minimizing biophysical impacts. Utilization of wood resources. (F)

WILD 4600 Conservation Biology 3 Patterns and processes creating biological diversity. Causes and consequences of diversity losses from genes to ecosystems, including habitat fragmentation and exotic invasion. Conservation laws and organizations. Approaches to conserving diversity loss, including reserve design, corridors, and species reintroductions. Prerequisite: NR/Biol 2220. (Sp)

WILD 4700 Ecological Foundations of Restoration 3 Explores meanings of "restoration," use of reference communities, restoration of processes versus structure, species reintroductions, managing natural processes to meet restoration goals, and fundamentals of physiological, population, community, and ecosystem ecology from a restoration perspective. Prerequisites: NR/Biol 2220, WILD 3850. (Sp)

WILD 4810 Directed Reading in Wildlife Damage Management 2* Focuses on wildlife damage management, especially as it reflects on both positive and negative human-wildlife interactions. For this reading course, students work with instructor to develop independent and rigorous reading program. (F,Sp,Su)

WILD 4880 Genetics in Conservation and Management 3 Introduces principles of modern genetics, with applications, examples, and assignments related to ecology and management issues. Emphasizes genetic marker systems, gene flow, genetic drift, and adaptation. Prerequisites: CHEM 1110 or 1220; BIOL 1210. (F)

WILD 4950 Special Topics 1-3* Individual study and research upon selected problems. Prerequisite: Departmental permission. (F,Sp,Su)

WILD 4960 Directed Readings 1-3* Individual directed reading research on forest, range, and wildlife science readings. Prerequisite: Departmental approval. (F,Sp,Su)

WILD 4970 Undergraduate Research 1-3* Individual or team research. Prerequisite: Departmental permission. (F,Sp,Su)

WILD 4980 Undergraduate Seminar 1* Intended to bring upperclassmen up-to-date on topics in forest, range, and wildlife sciences. Graded Pass/Fail only. (F,Sp)

WILD 5000 Predator Ecology and Management* 3 Reviews biology, ecology, theory, management, and policy issues involving large vertebrate predators. Uses case histories to explore predation theory, population ecology, natural history, and management strategies. (Sp)

WILD 5070 Range Wildlife Relations 3 Explores interactions on rangelands between wild and domestic ungulates, as well as other wildlife forms around the world, but with emphasis on western North America. Prerequisite: WILD 3610 or permission of instructor. (F)

WILD 5100 Wildlife Management Laboratory 3 Familiarizes students with variety of wildlife management and research techniques and strategies, including techniques to catch, mark, and restrain wild animals; monitoring wildlife populations; measuring physiological parameters; measuring habitat variables; assessing and preventing wildlife damage; and interpreting and analyzing biological data. (F)

WILD 5220 Community-based Conservation Partnerships 3 Seeks to infuse ecology with applied conservation and management approaches. Conservation and management of natural resources requires an understanding of ecological relationships and strategies for working with diverse stakeholders. PhD-level students present their research. (Sp)

WILD 5300 Wildlife Damage Management Principles 3 Explains current legal, ethical, and biological principles for the control and/or management of problem vertebrate species. (Sp)

WILD 5350 Wildland Soils 3 Application of basic principles of soil science to wildland ecosystems. Effects of disturbance and land use on wildland soil properties. Role of soils in natural resource management. Prerequisites: CHEM 1110; SOIL 3000, and one additional upper-division Soils course, or permission of instructor. Also taught as SOIL 5350/6350. (Sp)

WILD 5420 CI Forest and Shade Tree Pathology 3 Nature, cause, and management of forest diseases. Also taught as BIOL 5420 and PLSC 5420. (Sp)
Course Descriptions

WILD 5430  Advanced Forest Pathology  2
In-depth exploration of forest pathology issues, focusing on ecosystem-level processes. (Sp)

WILD 5460  Avalanche and Snow Dynamics  2
Fundamentals of snow and avalanche dynamics. Avalanche safety, forecasting, hazard evaluation, and control. (Sp—first half)

WILD 5510  Forest Entomology  2
Basic insect taxonomy, life histories, structure, and function. Ecological relationships, recognition, and management of insects of economic importance to forestry. This course is not currently being offered. For information about when it may be offered, contact the department.

WILD 5650  Urban/Community Forestry  3
Social, biological, and administrative aspects of managing urban/community forests, including field and classroom exercises and a management planning project. Also taught as PLSC 5650. (Sp)

WILD 5700  Forest Assessment and Management  3
Detailed analysis of forest stand structure and growth. Development of silvicultural prescriptions to meet specific objectives. Analysis of costs and benefits of alternative forest management strategies. Emphasizes forest management to achieve a broad range of objectives. (Sp)

WILD 5710  Wildland Disturbance: Ecology and Management  3
Examines causes, effects, and management options for selected biotic and abiotic agents of disturbance in wildland ecosystems. (F)

WILD 5750  Applied Remote Sensing  3
(dual listing 6750)
Covers the application of remote sensing to landcover mapping and resource monitoring at a quantitative level. Students instructed on the effects of atmosphere and surface interaction on the reflectance collected by electro-optical sensors, as well as on the proper use and interpretation of various calibration and classification algorithms. (F)

WILD 5860  Poisonous Range Plants Affecting Livestock**  3
Poisonous plants of rangelands and their effects on grazing animals, especially livestock. Management practices to reduce or prevent poisoning. Also taught as ADVS 5860. (Sp)

WILD 6000  Grazing Systems**  2
Overview and analysis of various strategies for managing grazing on rangelands. Special attention given to ecological mechanisms by which a particular grazing system may benefit livestock production or the sustainability of rangeland resources. (Sp)

WILD 6050  Rangeland Fire Ecology and Fire Prescription Development  3
Provides understanding of the role prescribed and natural fires have in western U.S. rangeland plant communities, and when fire can be used to achieve a specific plant community. Students learn basics of fire behavior and ignition techniques, and how to write prescribed fire use plans. This course is not currently being offered. For information about when it may be offered, contact the department.

WILD 6070  Range Wildlife Relations  3
(dual listing 5070)
Explores interactions on rangelands between wild and domestic ungulates, as well as other wildlife forms around the world, but with emphasis on western North America. Prerequisite: WILD 3610 or permission of instructor. (F)

WILD 6200  Biogeochemistry of Terrestrial Ecosystems**  3
Inputs, outputs, and cycling patterns of major nutrients. Emphasis on mechanisms for transformations, factors influencing process rates, and the impacts of management and global change on nutrient cycles and air and water quality. Prerequisites: BIOL 1220, SOIL 3000, CHEM 2300 or 2310, or permission of instructor. Also taught as BIOL 6200 and SOIL 6200. (F)

WILD 6240  Graduate Internship/Co-op  1-9*
Graduate-level educational experience in internship/cooperative education position approved by department. (F,Sp,Su)

WILD 6270  Advanced Silviculture  3
In forestry, there is a trend toward more complex silviculture to implement increasingly complex stand-level objectives. This course covers important techniques used in the development and implementation of silvicultural prescriptions for this sort of stand management. Prerequisite: Permission of instructor. (Sp)

WILD 6350  Wildland Soils (dual listing 5350)  3
Application of basic principles of soil science to wildland ecosystems. Effects of disturbance and land use on wildland soil properties. Role of soils in natural resource management. Prerequisites: CHEM 1110; SOIL 3000, and one additional upper-division Soils course, or permission of instructor. Also taught as SOIL 5350/5350. (Sp)

WILD 6400  Ecology of Animal Populations*  4
Growth, fluctuation, balance, and control of animal populations. Prerequisite: NR/BIOL 2220 or equivalent. (F)

WILD 6420  Vegetation Sampling Design  4
Advanced instread vegetation sampling design and elementary (nonmultivariate) between stand comparisons, primarily for research purposes. Prerequisites: STAT 5200; WILD 6770. (Su)

WILD 6500  Biometry: Design and Analysis of Ecology Research  4
Examines research design from a statistical perspective, showing how data analysis is largely determined by research design and its implementation. Reviews statistical tools for analysis of ecological data in the context of design. Prerequisite: Graduate standing. (F)

WILD 6510  Topics in Spatial Ecology**  1-3*
Seminars on analysis and interpretation of spatially explicit ecological data. Topics vary yearly, and range from spatial statistics to assessing uncertainty in environmental information systems to spatial analyses of plant and animal populations. Prerequisites: Graduate-level course in statistics and permission of instructor. (Sp)

WILD 6610  Regional Terrestrial Ecosystems  4
Synthesis of structural functional and regulatory processes and their interactions with humans in terrestrial ecosystems found in the Intermountain West and Great Plains. Prerequisites: NR/BIOL 2220, SOIL 3000, or equivalent courses. This course is not currently being offered. For information about when it may be offered, contact the department.

WILD 6710  Landscape Ecology  3
(dual listing 7710)
Focuses on landscape-scale patterns and processes, and ways of understanding ecological complexity. Explores conceptual underpinnings of larger-scale ecology, Emphasizes understanding of current peer-reviewed literature. (Sp)

WILD 6720  Advanced Conservation Biology*  3
Examines cases and consequences of population and species declines, including activities such as habitat fragmentation and introduction of exotic species, as well as natural causes due to genetics and demography. (Sp)

WILD 6740  Physical Processes in Remote Sensing  3
Assures that students are well-versed in the science and technology of remote sensing. Covers various algorithms and their ability to extract biophysical information from remotely sensed images. Helps students gain firm knowledge of the capabilities and limitations of these algorithms and their use in understanding landscape level biophysical interactions. (Sp)

WILD 6750  Applied Remote Sensing  3
(dual listing 5750)
Covers the application of remote sensing to landcover mapping and resource monitoring at a quantitative level. Students instructed on the effects of atmosphere and surface interaction on the reflectance collected by electro-optical sensors, as well as on the proper use and interpretation of various calibration and classification algorithms. (F)

WILD 6770  Plant Community Ecology*  3
Theory and concepts of plant community ecology. Plant community composition, distribution in space, and dynamics in time. Species environmental response
models, competition theory, statistical predictive models, and concepts of multivariate analysis in plant ecology. Prerequisites: NR/BIOL 2220 or equivalent; and ecology core courses (may be taken concurrently). (Sp)

WILD 6800 Forest, Range, and Wildlife Sciences Departmental Seminar 1* Review of current research by graduate students and faculty. Graded Pass/Fail only. (F,Sp)

WILD 6850 Population Ecology 3 Using framework of mathematical modeling, reviews basic ecological processes (e.g., competition, predation, and environmental stresses) that determine numbers of individuals in plant and animal populations. This course is not currently being offered. For information about when it may be offered, contact the department.

WILD 6870 Ecology Seminar 1* The Ecology Center schedules regular seminars throughout the school year with ecological scientists from other institutions participating. Ecology majors are required to attend a minimum of 10 such lectures. Students should register for fall semester, but attend through spring semester. Also taught as BIOL 6870, ENVS 6870, and WATS 6870. (F,Sp)

WILD 6880 Current Issues in Conservation (dual listing 7880) Genetics and Management* 2 Reviews variety of topics in fast-moving field of conservation genetics. Explores management applications and implications, with particular emphasis on current primary literature. Recommended prerequisite: Prior course in genetics. (Sp)

WILD 6900 Graduate Special Topics 1-6* Offers credit for special assignments, reading, and seminars beyond regularly scheduled courses. (F,Sp,Su)

WILD 6910 Directed Study 1-6* Offers credit for special assignments, reading, and seminars beyond regularly scheduled courses. (F,Sp,Su)

WILD 6960 Graduate General Ecology 5 General concepts, history, and issues in all major areas of the science of ecology including: environmental biophysics; and physiological, behavioral, evolutionary, community, ecosystem, and applied ecology in both terrestrial and aquatic environments. Also taught as BIOL 6960, ENVS 6960 and WATS 6960. (F)

WILD 6970 Thesis Research 1-12* Original research for MS degree on a problem in rangeland resources. Graded Pass/Fail only. (F,Sp,Su)

WILD 6990 Continuing Graduate Advisement 1-9* Graded Pass/Fail only. (F,Sp,Su)

WILD 7000 Theory and Applications of Rangeland Ecosystem Management 3 Application of range management principles, new theory, and public policy to on-the-ground decision-making in public and private lands. Field trips required. (F)

WILD 7030 Plant-Herbivore Interactions* 3 Emphasizes principles of self-organization as applied to plant (tolerance and avoidance of herbivory) and herbivore (food and habitat selection) behavior. Stresses importance of history and ongoing interactions with the environment in understanding the dynamics of plant-herbivore interactions. (Sp)

WILD 7200 Plant Physiological Ecology** 3 Plant response to environmental factors; includes environmental biophysics, physical and physiological factors influencing productivity, water use, resistance to stress, reproduction, establishment of plants, and competition with neighboring plants. (F)

WILD 7220 Community-based Conservation (dual listing 5220) Partnerships** 3 Seeks to infuse ecology with applied conservation and management approaches. Conservation and management of natural resources requires an understanding of ecological relationships and strategies for working with diverse stakeholders. PhD-level students present their research. (Sp)

WILD 7300 Wildlife Damage Management Principles (dual listing 5300) 3 Explains current legal, ethical, and biological principles for the control and/or management of problem vertebrate species. (Sp)

WILD 7400 Plant Population Ecology* 3 Dynamics of plant populations as influenced by interactions with their abiotic and, especially, biotic environments. Topics include dormancy and germination strategies, intra- and interspecific competition, facilitation, disturbance, herbivory, pathogenic and mutualistic fungi, pollination, seed dispersal, and vegetative reproduction. (F)

WILD 7420 Analysis of Ecological Communities** 5 Advanced treatment of classification and ordination of ecological communities, emphasizing ecological data structures and methods of common use in ecological research. Prerequisite: STAT 3000 or WILD 6900 or consent of instructor. (Sp)

WILD 7710 Landscape Ecology (dual listing 6710) 3 Focuses on landscape-scale patterns and processes, and ways of understanding ecological complexity. Explores conceptual underpinnings of larger-scale ecology. Emphasizes understanding of current peer-reviewed literature. (Sp)

WILD 7720 Advanced Conservation Biology* 3 Emphasizes understanding of current peer-reviewed literature. (Sp)

WILD 7800 Forest, Range, and Wildlife Sciences Departmental Seminar 1* Review of current research by graduate students and faculty. Graded Pass/Fail only. (F,Sp)

WILD 7850 Population Ecology 3 Using framework of mathematical modeling, reviews basic ecological processes (e.g., competition, predation, and environmental stresses) that determine numbers of individuals in plant and animal populations. This course is not currently being offered. For information about when it may be offered, contact the department.

WILD 7880 Current Issues in Conservation (dual listing 6880) Genetics and Management* 2 Reviews variety of topics in fast-moving field of conservation genetics. Explores management applications and implications, with particular emphasis on current primary literature. Recommended prerequisite: Prior course in genetics. (Sp)

WILD 7900 Graduate Special Topics 1-6* Offer credit for special assignments, reading, and seminars beyond regularly scheduled courses. (F,Sp,Su)

WILD 7910 Directed Study 1-6* Offers credit for special assignments, reading, and seminars beyond regularly scheduled courses. (F,Sp,Su)

WILD 7970 Dissertation Research 1-12* Original research and study for PhD degree. Graded Pass/Fail only. (F,Sp,Su)

WILD 7990 Continuing Graduate Advisement 1-9* Graded Pass/Fail only. (F,Sp,Su)

*Repeatable for credit. Check with major department for limitations on number of credits that can be counted for graduation.

©This course is also offered by online correspondence and/or CD through Independent and Distance Education.
