# Mount Logan Middle School Students Test Electric Cart | Utah State University Power Electronics Lab

aechols

06/16/2015

On June 12th, students from Mount Logan Middle School test out their electric cart on the EVR (Electric Vehicle & Roadway) track. They will be participating this fall in a Green Power competition at the Bonneville Salt Flats to see how far their car can go on a charge using just two 12 volt batteries. Last we counted, they were over 40 laps and the cart was still going!

[A video of the cart in action can be found here.](#)
