Mr. A. P. Stover,

University of California,

Berkeley, Cal.

My dear Sir:—I am preparing my report to the Board of Trustees relative to next year's work. There will be a large increase in the number of students in the School of Engineering. There may be an opening for a good man as assistant professor in civil and irrigation engineering, with the opportunity of promotion to a professorship within a year, should his work prove to be successful. We want a man who will be especially strong in irrigation work, and who can maintain a position of leadership in that work throughout the inter-mountain region.

I shall appreciate it if you will kindly write me at your earliest convenience, and let me know whether you care to consider a proposition from this institution. I shall be glad also to have you indicate about what compensation you would expect for the first year, and what work you would be interested in aside from the irrigation subjects.

Very truly yours,

President.
