FACULTY SENATE EXECUTIVE COMMITTEE

August 29, 2016

3:00 – 4:30 p.m.

Champ Hall

Agenda

3:00 Call to Order Vince Wickwar

Introduction of Faculty Senate Executive Committee members

<https://usu.box.com/s/cr3h7lme213dmj2us13d4v1wg6b8ulzl>

Approval of Minutes April 11, 2016

<https://usu.box.com/s/tkg8k0dxkfaw7l165gjomdew1i7nswjg>

3:10 University Business Stan Albrecht, President
Noelle Cockett, Provost

3:50 Information Items

1. Broadcast all FSEC and FS meeting Michele Hillard
2. Calendar <https://usu.box.com/s/l9jqobrmyn2v927w1x1q72rm2pkb87fw> Michele Hillard
3. Faculty Forum - November 14, 2016
<https://usu.box.com/s/3mraj473oy8p5cfdg9a3rh4ckczv0agu> Vince Wickwar
4. Brown Bag Lunches Vince Wickwar
September 26, 2016
October 24, 2016
November 29, 2016
5. Progress on Presidential Search Ronda Callister

4:00 Executive Committee Orientation Vince Wickwar

1. FSEC Role <https://usu.box.com/s/q1a9q46fl4yhj5vmmysp1irrqn8sh3w>

4:05 Reports

1. Research and Graduate Studies Mark McLellan
<https://usu.box.com/s/53uk5rxuyujkn140xh0otbox4mhx27ox>

4:15 Unfinished Business

1. Financial integrity: Section 406.1 through 406.6: Program Discontinuance,
Financial Exigency and Financial Crisis Vince Wickwar
<https://hr.usu.edu/files/policies/406.pdf>
<https://usu.box.com/s/za376fblbhvo4q03porpttyzb16jjg5g>
2. Where do we stand with left over items at PRPC? Jerry Goodspeed
405.6.2(2) and 405.8.2 both had changes related to the Promotion
Advisory Committee (PAC) formation and meeting. They were returned
to PRPC by the FS on April 11, 2016 after the first reading.

402.12.1 – 402.12.8 on FS Committee sizes. PRPC is working on the wording for
these changes <https://usu.box.com/s/5ysl7pfp3kn2b5ybgwn9mail8k495jgg>

4:20 New Business

1. Modification of Policy 369.2.3. under proposed change, this will affect
non-tenured faculty..... Chris Nelson

FACULTY SENATE EXECUTIVE COMMITTEE MINUTES

April 11, 2016 3:00 P.M.

Champ Hall Conference Room

Present: Ronda Callister (Chair), Paul Barr, Britt Fagerheim, Dennis Garner, Betty Hassell, Vijay Kannan, Kimberly Lott, Mark McLellan, Dan Murphy, Jeanette Norton, Michael Pace, Robert Schmidt (excused), Juan Villabla (sub), Charles Waugh, Vincent Wickwar, Lindsey Shirley (President Elect), Doug Jackson-Smith (Past President), President Stan Albrecht (Ex-Officio), Provost Noelle Cockett (Ex-Officio), Joan Kleinke (Exec. Sec.), Marilyn Atkinson (Assistant)

Guests: Larry Smith, Andi McCabe, Sheri Haderlie

Ronda Callister called the meeting to order at 3:00 p.m.

Approval of Minutes

The minutes of March 21, 2016 were not included in the agenda packet. They will be circulated by email and approved electronically.

University Business - President Albrecht and Provost Cockett.

Provost Cockett updated the committee on the search for the Dean of CHaSS. Three individuals will be notified and invited to on-campus interviews. One of the three candidates is internal. A recommendation is expected to be made before the end of the semester.

Seventy-two candidates, the largest group ever have been put forward for promotion, 30 of those receiving tenure. A reception will be held in their honor later this month.

President Albrecht announced that Mark A. Emmert, President of the NCAA will be on campus Wednesday and Thursday to talk about how the NCAA continues to progress in its mission to provide higher education opportunities through sport.

Graduation and Commencement ceremonies are coming up soon. Ceremonies will be held the week of April 26 for many of the distance education sites. Logan campus ceremonies will be May 7, 2016. New this year will be a Convocation for Associate Degree recipients.

Information Items

HR Policy 350 Educational Benefits code change – Ronda Callister. This policy was not presented at the last full senate meeting. A motion is needed to place this item on the agenda for the next meeting.

A motion was made to place this idea on the agenda as an information item by Mark McLellan. A second was received and the motion passed unanimously.

Reports

Calendar Committee Report – Andi McCabe. The Calendar Committee has approved the holidays and academic calendar for 2019. Christmas that year falls on a Wednesday; the holiday break days will be Tuesday, Wednesday and Thursday. The Committee is trying to work with the local school districts to align the spring break holidays.

EPC Items for April – Larry Smith. The Curriculum sub-committee processed R401's from the English, PSC, and WATS departments. EPC Curriculum Subcommittee also elected a new chair, Vijay Kannan.

Committee on Committees – Sheri Haderlie. The committee oversaw elections for many of the committees. Doug Jackson-Smith commented that there are many openings on committees for the upcoming year, but they are working on over lapping the membership and smaller committee sizes to make it easier and more efficient to fill vacancies.

Robert Schmidt made a motion to place the report on the agenda and Jake Gunther seconded. The motion passed unanimously.

Unfinished Business

Code Search & Replace to remove “and Distance Education” – Ronda Callister To make the code reflect current practices, Distance Education is being dropped from the Regional Campus designation, as it now reflects method, not location.

Doug Jackson-Smith made a motion to suspend the rules and allow Joan and Larry to work together to make these editorial changes. Mark McClellan seconded and the motion passed unanimously.

402.12.7(1) Name Change for Undergraduate Faculty Advisor of the Year (Second Reading) – Ronda Callister. This proposal will change the name of the award to Faculty Mentor of the Year.

Doug Jackson-Smith made a motion to put this item on the agenda as a second reading, Paul Barr seconded and the motion passed unanimously.

New Business

Faculty Senate President & President-Elect Coverage for 2016 – 2017. Lindsey Shirley is leaving the university at the end of this academic year. The Senate presidents have discussed many options. Vince Wickwar, a former Senate President, is willing to step and help however there are questions about his eligibility to serve another year as his time in the senate is expiring. They are considering the possibility that Ronda would serve a second term or split the year with Kimberly, or find someone else who can step in and take over for the year.

FS needs to caucus for Executive Committee Member election – Ronda Callister. Colleges will need to caucus after the next senate meeting to elect FSEC members to fill their vacancies.

Other Items

Sustainability Council Proposal – Charles Waugh. Charles would like to find a good way to inform prospective employees and new hires about sustainability and transportation options in the valley before they arrive here and rent or purchase homes. Provost Cockett suggested that he talk to Human Resources and include a flyer in the new hire information packet. New students could be informed through the SOAR.

Interstate Passport Changes – Charles Waugh. Charles had questions about the new Passport that students can earn at cooperating universities to cover their general education requirements, especially concerning writing courses as the Passport requires only one writing course, but USU has always required two courses. Provost Cockett responded that all USU requirements have to be met for graduation and the second course is required as a DEPTH course. She will look into the USHE requirements further. It was felt by the committee that more information and clarity on what exactly the requirements are is needed before bringing the issue for discussion before the full senate.

Proposal 405.12.2 referring to the Annual Performance Review was not passed by the Executive Council. The Provost informed the committee that there were concerns about the 3 year rule, that faculty would have to review and approve the policy every three years and was voted down. This item has not been returned to the FS Presidents from the President Albrecht's office yet.

Adjournment

The meeting adjourned at 5:00 p.m.

Minutes Submitted by: Joan Kleinke, Faculty Senate Executive Secretary, 797-1776

Updated: 08/18/16

The Executive Committee shall perform the following duties:

- (a) prepare Senate meeting agendas;
- (b) propose such standing and special committees of the Senate as may be needed;
- (c) examine the work of the Senate committees to discourage duplication of effort and to ensure that all committee assignments are carried out;
- (d) act as a steering committee to direct problems to the proper committees;
- (e) act as a liaison to harmonize the work of all committees;
- (f) transact such business as may be referred to it by the Senate;

Activities of the Graduate Council	53
By the numbers	55
RGS division reports	69

Executive Summary

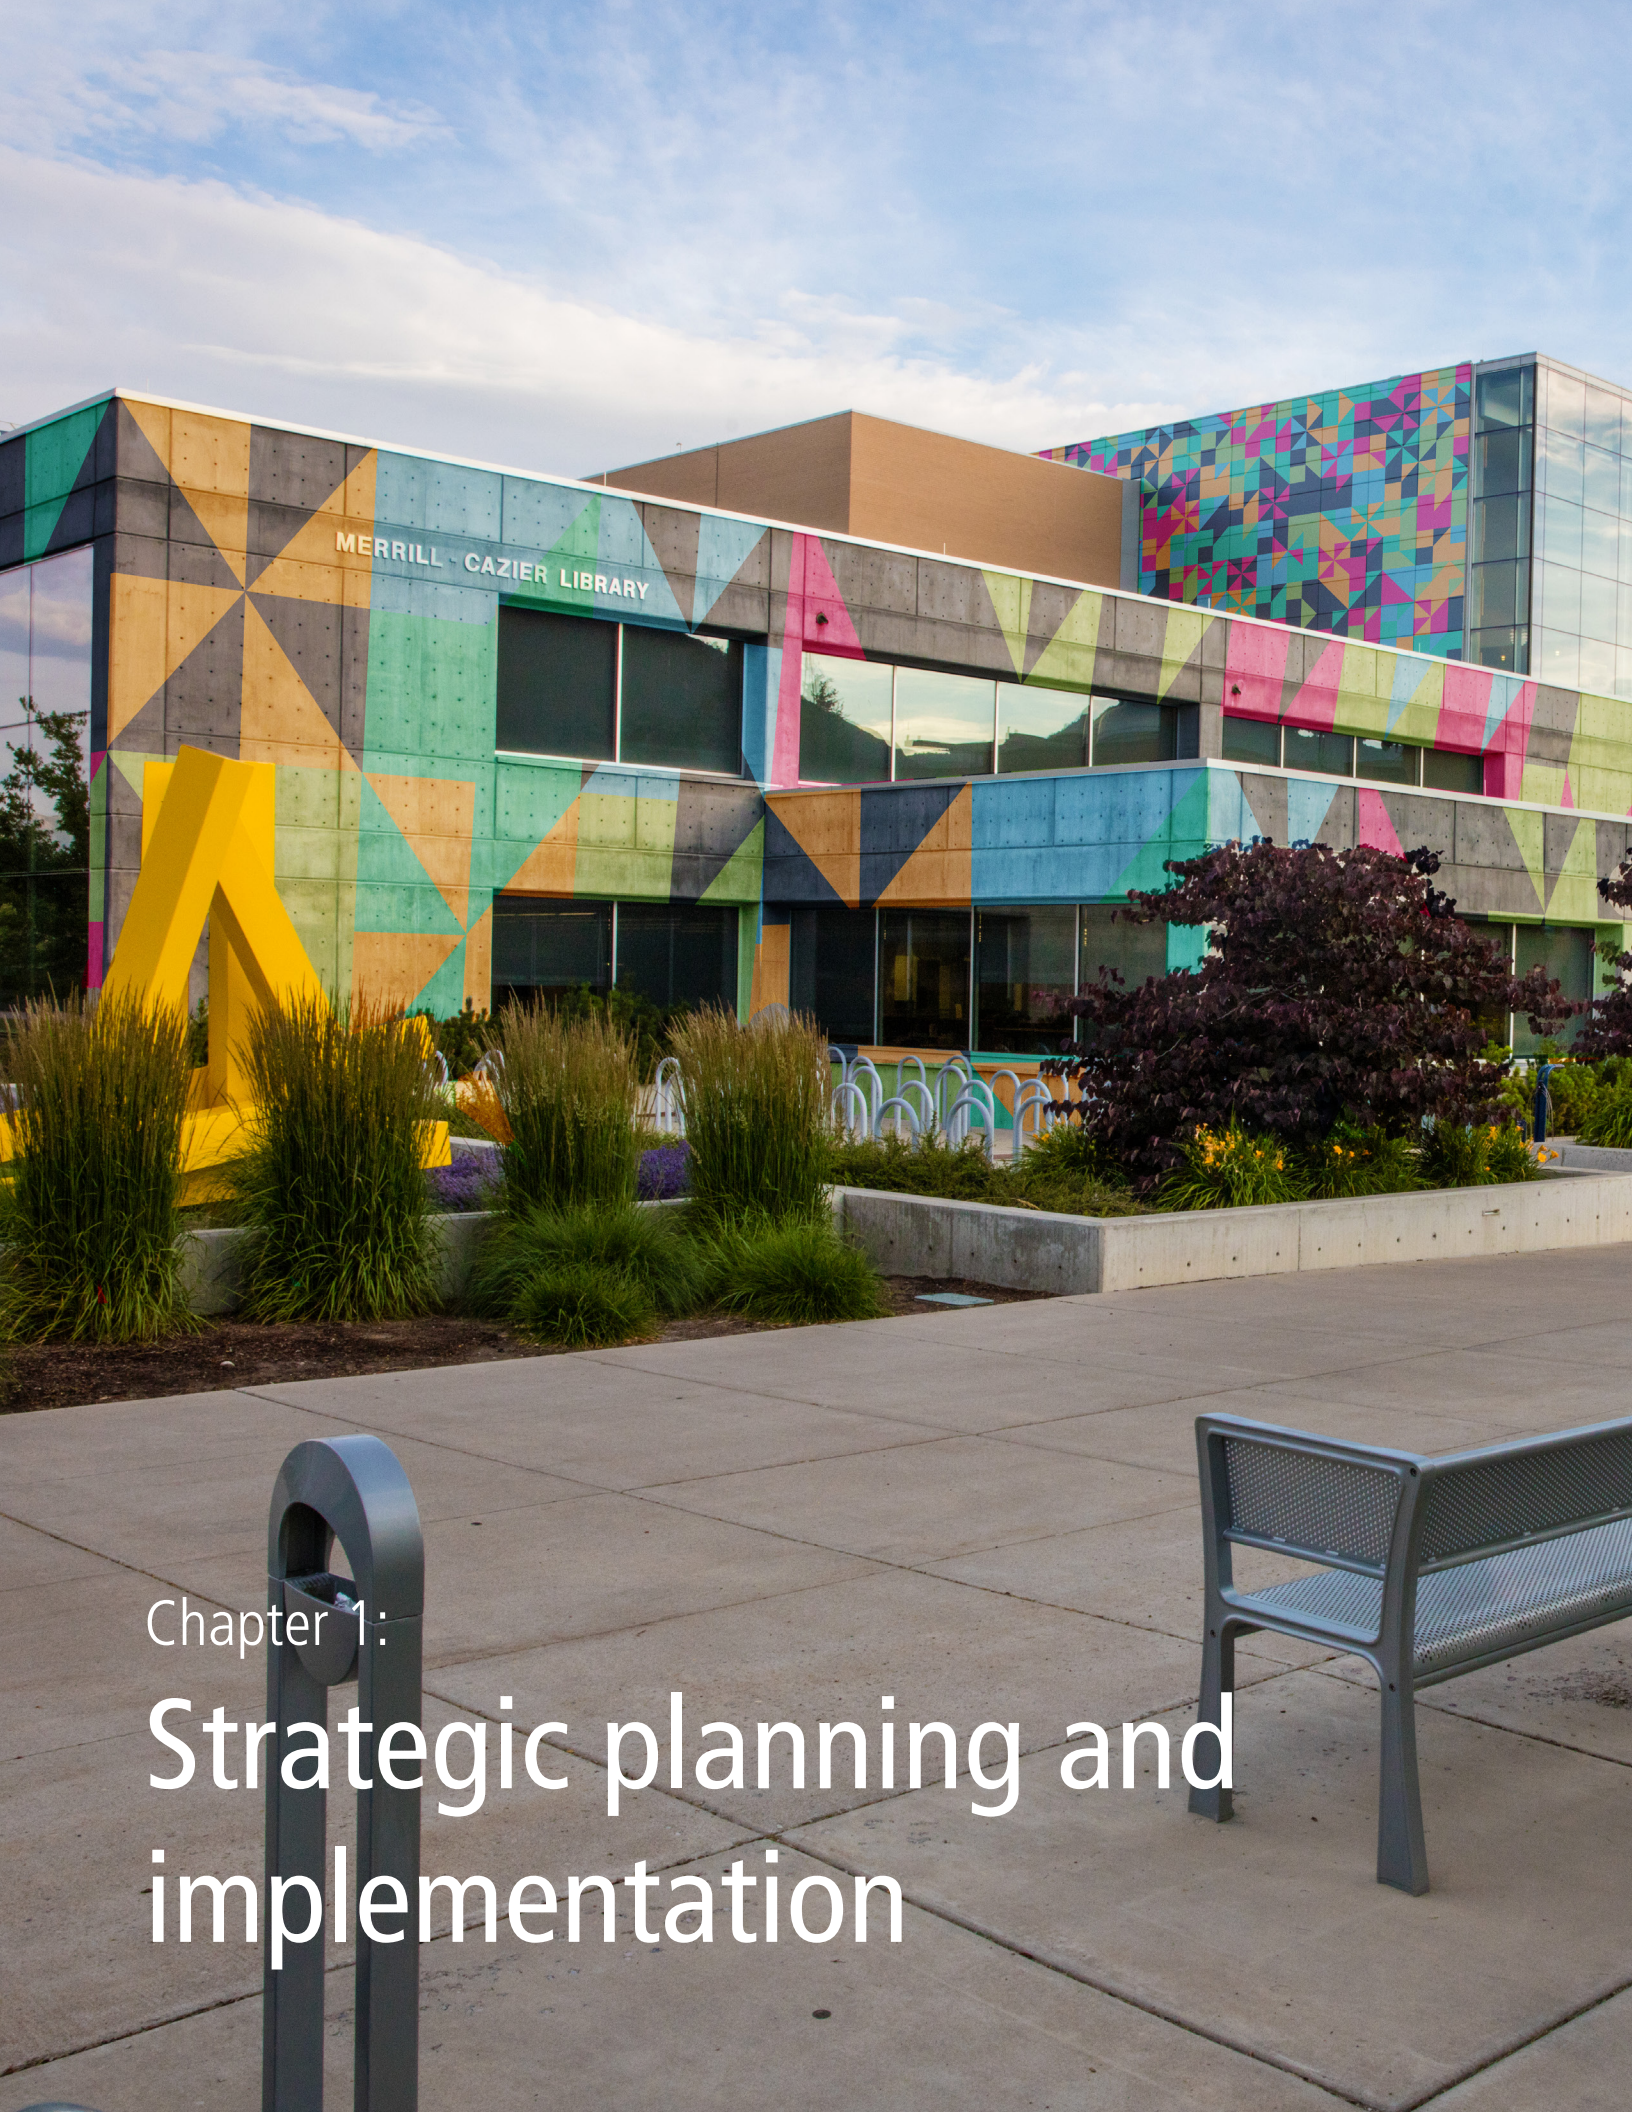

It has been five years since USU's Research Office merged with the School of Graduate Studies. Over that time, we've worked to develop strategies and programs that capitalize on the strengths of both sides of our mission.

In fiscal year 2015-2016, we've continued that effort, focusing on enhancing the efficiency and efficacy of recently implemented initiatives.

RGS training programs have continued to grow in popularity and success; both our monthly workshop series (Training for Research Faculty and Graduate Training Series) grew in scope and attendance this year. Interest in our DC trip for new faculty to visit

federal funding agencies also increased. We've continued to implement ideas and initiatives to streamline our processes and relieve effort from campus faculty and staff. Recruit by Ellucian has simplified the graduate student application process, and Kual Research will make the grant proposal process a one-stop effort.

The future holds opportunities and challenges for RGS: fluctuations in F&A funding and proposal submissions will put pressure on the RGS budget for the next few years. Additionally, the transformation of Technology Transfer to an RGS division will require significant effort to build up as a key service for faculty and students on campus.

Chapter 1:

Strategic planning and implementation

Office Overview

Mission statement

The mission of USU's Office of Research and Graduate Studies is to facilitate a culture of excellence in research, scholarship and creative activity that spans the lifecycle of faculty and students through operational, training, funding and compliance support.

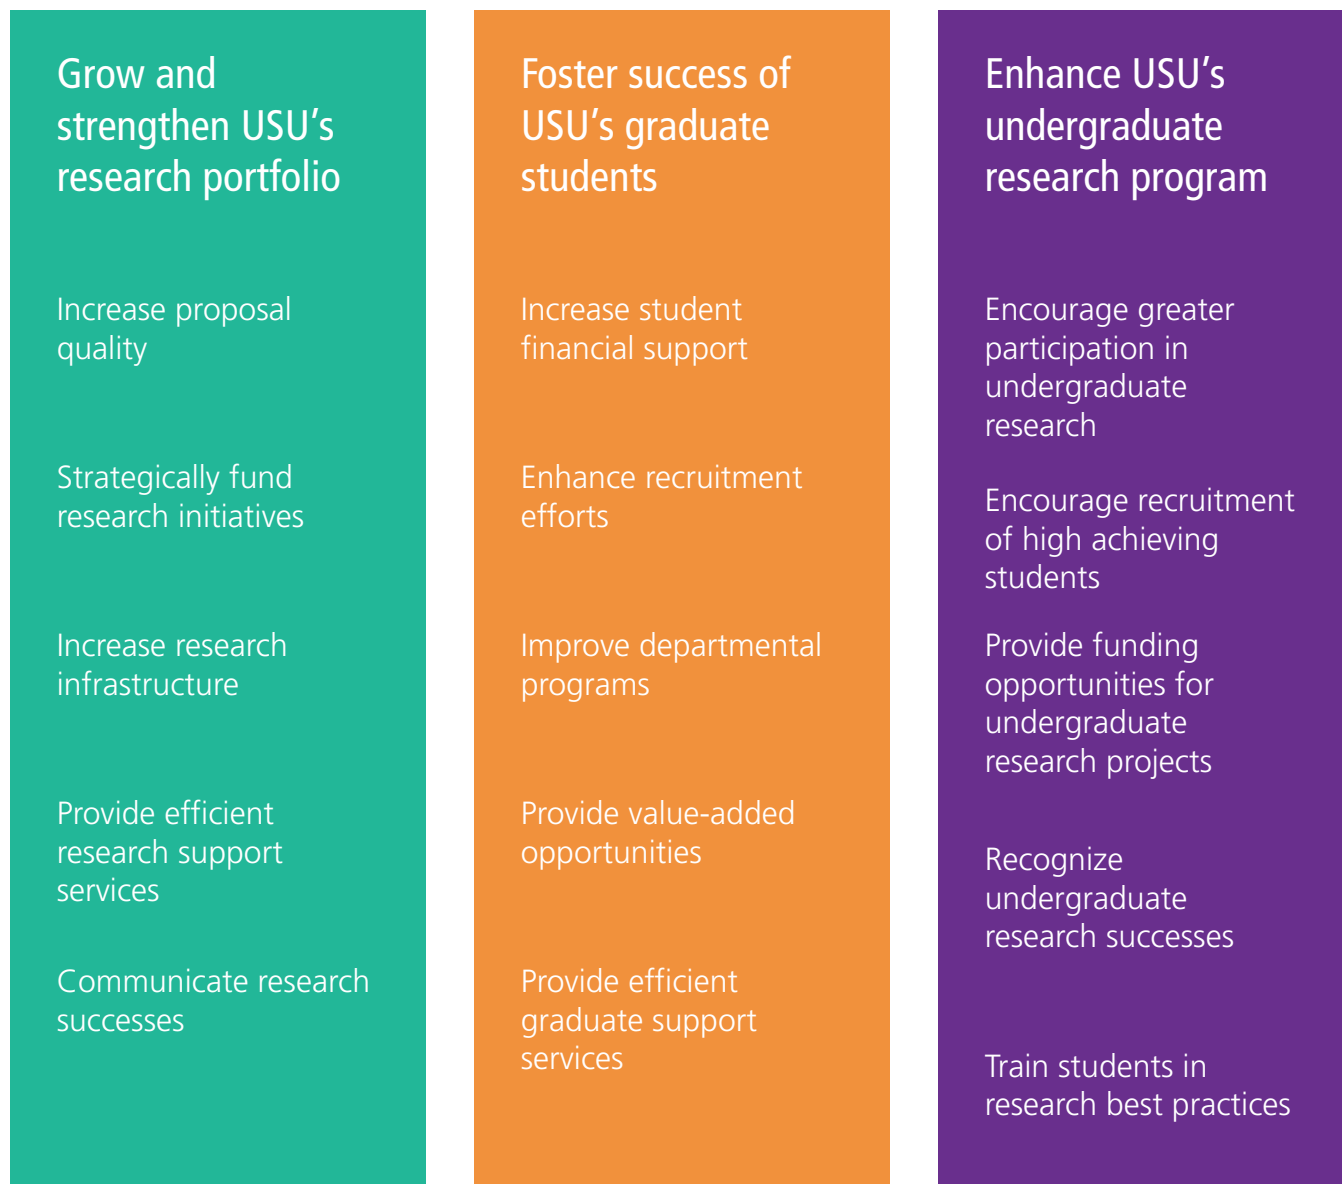

Values

Six core values guide the way in which RGS executes its mission and formulates its key strategic goals and strategies. In the way a mission statement informs *what* RGS does, the values define how it is best accomplished. Those values are listed below.

RGS Values

Value	Belief Statement
Individual capacity development	Faculty and graduate students should continue to grow their understanding of how to best propose, conduct and report research and scholarly activities.
Integrity and safety	Scholarship should be conducted with top consideration toward exceeding moral and regulatory standards.
Student engagement	Students are a core focus of a land-grant institution. They can have better educational experiences when they engage in research opportunities.
Interdisciplinary integration	Research should not live within silos; all scholars can benefit from interdisciplinary relationships.
Application	Research and scholarship should embrace the land-grant mission of providing meaningful impact for the state, nation and world.
Innovation	All activities should undergo constant evaluation for improvement in effectiveness and efficiency, and those opportunities should be implemented whenever possible.

RGS goals and strategies

Three main goals have been established to execute the mission of Research and Graduate Studies. For each of those goals, five strategies have been agreed upon to accomplish the goals, as well as further the RGS values. All initiatives undertaken by RGS fall under one of these strategies.

RGS organizations and divisions

The Office of Research and Graduate Studies oversees eight divisions: the School of Graduate Studies, Sponsored Programs, the Institutional

Review Board, Research Development, Animal Care and Use, Integrity and Compliance, Environmental Health and Safety, and Graduate and Undergraduate Research. Each of these divisions works to support the RGS mission and strategic goals. In total, RGS has 55 full-time employees. The office also coordinates the USU Research and Graduate Councils. As of July 1, 2016 an additional division was added to RGS, Technology Transfer Services. This change will fundamentally affect RGS goals and strategies in the coming year.

USU Office of Research and Graduate Studies

Alexa Sand, associate professor in the Department of Art and Design, is the first faculty fellow in the Office of Research and Graduate Studies. Her perspective helps assist the direction of decisions and initiatives made by the RGS executive team.

RGS staff changes

Alexa Sand joined the Office of Research and Graduate Studies in January 2016. As Faculty Fellow, she sits on the RGS executive team, bringing a perspective from the arts and humanities to bear on issues ranging from grant-writing to graduate funding. The view the fellowship offers onto the wider operations of USU as a research

university is invaluable, and the opportunity to work across disciplinary and college lines helps build institution-wide networks of collaborative scholarship and learning. Ultimately, the goal of the Faculty Fellow is to help integrate humanistic and creative scholarship with USU's mission to build a socially and intellectually vibrant campus research community.

Strategic goal 1: Grow and strengthen USU's research portfolio

Strategy: Increase proposal quality

Washington DC, funding agency trip

In October 2015, RGS took 18 faculty members on the third annual Washington, DC funding agency trip. Participants included representatives from 7 colleges, the largest contingent of faculty to participate in the trip. In addition to the one faculty member from each college that was supported by RGS, each college funded travel for one or two additional faculty. This support from college deans is evidence that they are convinced of the value of having their faculty meet with program officers from a broad range of funding agencies and foundations.

Training for Research Faculty

Each year, RGS holds a luncheon for faculty who are new to Utah State. The luncheon includes an introduction to RGS resources through a "speed-networking" format, focused on creating personal

connections with the individual RGS division directors. Additionally, in December 2015, as part of the RGS Office's continuing efforts to provide top-quality assistance and resources to new faculty, we held a brief, low-key refresher regarding RGS divisions and the services and support they provide.

Training for all faculty, especially new faculty members, continues throughout the year with Training for Research Faculty. TRF is a workshop series that features training on topics of special interest to USU researchers, helping to enhance individual capacity development of USU faculty. In July 2015, RGS sent out a survey to all faculty members requesting feedback of requested topics for the workshops in 2015-2016. Based on those requests, a year-long schedule was compiled and implemented and included the following topics: components of an outstanding sabbatical, tools for mentoring graduate students, maximizing proposal chances, making tenure and promotion and including broader impacts in proposals.

Training for Research Faculty workshops are held on a monthly basis in the Merrill-Cazier Library for faculty members interested in improving their research and mentoring.

Training for Research Faculty (TRF) 2015-2016 Schedule

Components of an Outstanding Sabbatical (Sept. 9)

Presenters

JR Dennison (PHYX)
Nancy Hills (THEA)
David Koons (WILD)
Jennifer Sinor (ENGL)
Barton Smith (MAE)

Announcement

Now is the time to start planning your next sabbatical opportunity, and there are a lot of important choices to be made early on. Learn the ropes of USU's sabbatical policy, and then hear recently returned faculty members discuss their thoughts on the sabbatical experience and the choices they made.

Tools for Mentoring Graduate Students (Oct. 7)

Presenters

Sean Johnson (CHEM)
Karen Munoz (COMD)
Bethany Neilson (CEE)
Gretchen Peacock (PSYCH)
Matthew Sanders (LPCS)

Announcement

As a researcher, a key responsibility is recruiting and mentoring graduate students. Students come with diverse backgrounds, organization styles, and a spectrum of skills. How do you manage these differences and have both positive and productive relationships with your students? We'll look at three case studies and provide tools to elevate your student to the next level.

Lessons Learned in DC: How to Maximize my Proposal Chances (Nov. 11)

Presenters

Trisha Atwood (WATS)
Zachariah Gompert (BIOL)
Peter Howe (ENVS)
Mark Koven (ART)
Silvana Martini (NDFS)
Sydney Schaefer (HPER)

Announcement

Each year the Office of Research and Graduate Studies takes a core group of faculty to Washington DC to build relationships with program officers from NSF, FDA, and NIH. A panel of experienced members will inform you of how they were able to be selected for this opportunity, as well as walk you through the trip itself. Crucial to the success of researchers is the acceptance and funding of federal grants and proposals. This group of faculty will pass on the lessons gained to you.

An Insider's Perspective to Making Tenure and Promotion (Feb. 17)

Presenter

Mark McLellan (RGS)

Announcement

The promotion and tenure process is an integral part of a researcher's professional standing. At this training, you'll learn about how you'll be evaluated, what's important to the committee and how to set yourself up for success. Learn about annual reviews, preparing your dossier, and the hierarchy of recommendations in the review process.

Broader Impacts: How to Include them on my Proposal (Mar. 16)

Presenters

David Francis (4-H)
Denise Stewardson (Extension)
Brian Higginbotham (eXtension)
Dave Feldon (STE2M center)
Al Savitzky and Katie Weglarz
(Blanding Summer Program)
Nancy Huntly (Science Unwrapped)

Announcement

Funding agencies are increasingly requiring PIs to demonstrate how their results will impact their communities (sometimes called "broader impacts"). A clear and effective plan will strengthen your proposal, and it's easier to come up with than you think. Rather than creating your own outreach plan, you can partner with resources at the university to share your research. Join us at TRF, and you'll learn about these programs and some unexpected ways to integrate them with your research.

College Specialists

The Research Development division is comprised of a network of proposal development staff located in units (colleges/departments/research centers) across campus. Proposal developers report jointly to their unit directors (deans/department heads/research center directors) and to the centrally located Director of Research Development, who reports to the Associate Vice President for Research in the Office of Research and Graduate Studies.

The goal of network staff is to relieve researchers of the logistics of proposal development to allow them more time to focus on their technical writing. To achieve this, network staff can help researchers from beginning to end of the proposal development process, or at any point throughout the process depending on the researcher's needs and/or wants.

Two proposal specialists were added in the Research Development division in 2015-2016. One specialist is assigned to work specifically with Extension faculty and the other will be working with faculty from the College of Science.

Strategy: Strategically fund research initiatives

Seed grants

RGS continues to support three different seed grant programs that carry unique missions/goals and expected outcomes. In FY2016, a total of 29 applications (3 GEM, 21 RC and 5 SPARC) were submitted, 18 of which were awarded. Each seed grant supports RGS' belief that interactions and collaborations between junior and more senior faculty and across disciplines enhances the success of gaining extramural support. A full explanation of the grants is included on page 74 in the Research Development division report and a table of awards is included on page 64.

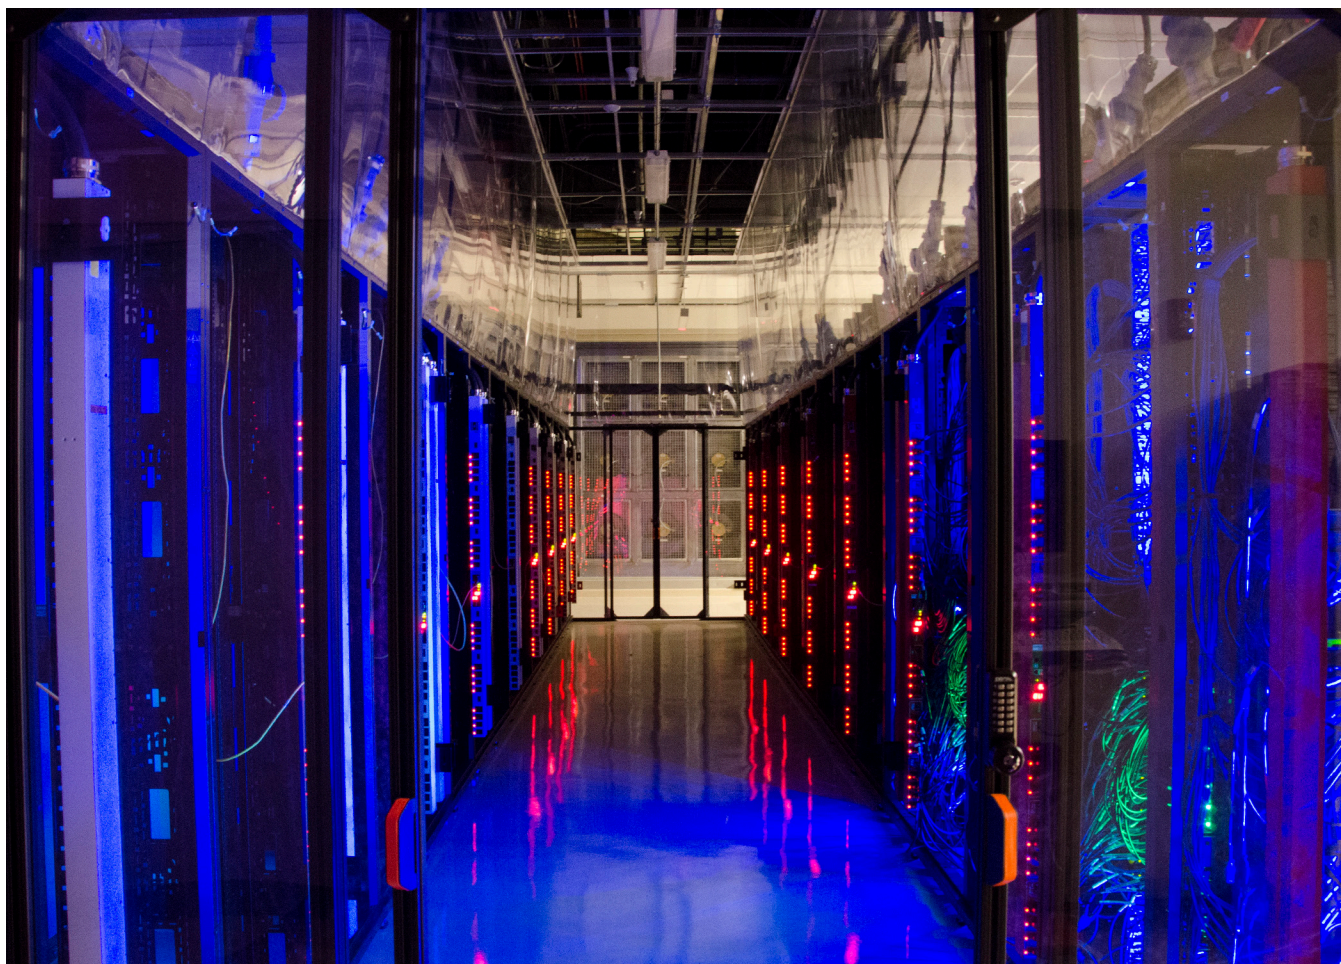

Strategy: Increase research infrastructure

Greater access to high performance computing

USU faculty and students are now able to make use of high performance computing resources at the University of Utah's Center for High Performance Computing (CHPC). Access to the CHPC is the result of a partnership between USU and UU that

Carly Cummings (above) is a new proposal development specialist for the College of Science, added to the grant writers' network this year. Janee' Livingston was also added to Extension's staff as a proposal specialist.

USU faculty and students are now able to make use of high performance computing resources at the University of Utah's Center for High Performance Computing (CHPC).

was created by the Research Vice President at each institution, with support from the two university presidents. Through this agreement, USU faculty and students are provided with the same CHPC access as their counterparts at the University of Utah, including the option of purchasing hardware to ensure uninterrupted access for computing jobs that require long run times. What was the most heavily used cluster in the USU HPC was relocated to the CHPC in spring 2016, where the hardware remains accessible to the faculty who purchased nodes that made up the cluster.

Microscopy core facility

The microscopy core facility housed in SER 005 provides microscopy services, project consultation, and user training for scanning electron microscopy and laser dissection microscopy. Core operations are guided by leadership from a core director and

12-member faculty advisory board (FAB). Growing interest in the core brought several new members to the FAB in FY16, and a change in director. Dr. John Shervais concluded his two-year term, and was replaced on July 1, 2016 by Dr. Anhong Zhou from the Biological Engineering department.

For a very modest \$300 annual membership fee, USU faculty, staff, and students are able to access the facility and receive assistance and training on core instruments from a full-time and highly experienced operator, Dr. Fen-Ann Shen. Scholarship support is also available to graduate students who are not on funded research projects yet wish to explore microscopy in their research program. Researchers outside USU can also obtain access to the core on a fee-for-service basis. Membership in the core grew nearly 20% FY16, and the facility provided training and demonstrations to 527 students. Total usage of the

core instruments was 1293 hours. To learn how you can access this state-of-the-art facility to support your research, visit www.mcf.usu.edu.

Annual equipment matching fund

RGS offered another round of internal capital equipment grants with a 50% (1:1) matching funds requirement. The total budget for this program was increased from \$200,000 in FY15 to \$400,000 for FY16. Once again, applications were accepted from individual USU researchers, teams of researchers, or by departments or colleges. 19 applications with requests totaling over \$1.2 million were received. RGS staff and college associate deans for research performed merit review of those applications and awarded the full \$400,000 across 15 proposals. A table of all the equipment purchased with these grants is included on page 66.

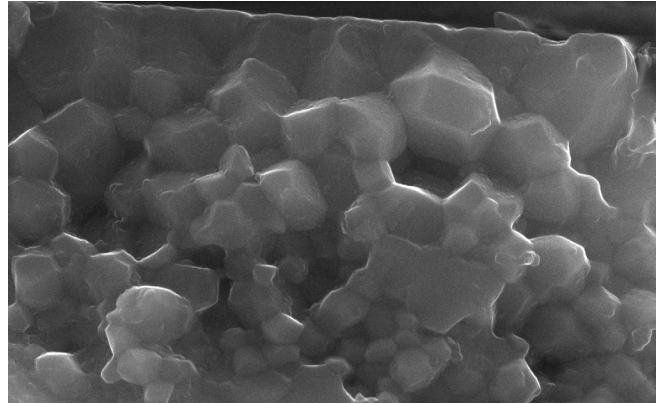

Strategy: Provide efficient research support services

Safety policy

Utah State University is committed to creating a safe environment and a culture of institutional safety, and develops and implements safety and health programs consistent with the best practices for activities and institutions of this type. Realization of a safe and healthy work environment requires attention and responsibility at every level, and all employees are required to fully follow all procedures relating to safety rules.

To this end, in 2015, USU ratified a new university policy on safety. The policy establishes a new representative form of safety communication and guidance at USU. It emphasizes that it's a core responsibility of faculty and staff to develop and implement safety practices, protocols, and rules that best assure safety in their classrooms, laboratories, field sites and other workspaces within their purview. Full text of this policy can be found on page 47.

To further support this effort, the Environmental Health and Safety division of RGS has implemented an online system, EHS Assistant, to better track safety trainings of all USU faculty and staff. The system can be accessed from the EHS homepage: rgs.usu.edu/ehs. Additionally, RGS implemented

A routine user of the core, Dr. Alexis Ault relies on microscopy for research and student training on earthquake physics and other seismic hazards. Images like this one have proved critical in her group's discovery of new fault zone textures and development of a technique to directly date when small earthquakes happened in the past on Utah's Wasatch fault. Knowing the past history of earthquakes is essential to understanding how those same faults may be acting today.

USU Office of Research and Graduate Studies

a program to provide a 1/3 match on all fees associated with bringing a necessary external safety training to campus.

Kuali software implementation

Sponsored Programs implemented Kuali Researcher in October and has been using the module internally. Sponsored Programs staff have been training with Kuali Researcher, developing training materials, and conducting focus groups in preparation of a campus-wide roll out beginning in Fall 2016. Kuali Researcher offers campus-wide authentication and routing. Using Kuali, researchers will be able to complete proposal applications and all required proposal materials electronically, replacing the need for paper copies of the Proposal Approval Form (SP-01) and budget template.

IRB grant for translation

Both abroad and at home, USU researchers are working with an increasingly diverse participant population. Not surprisingly, this has resulted in a growing need for high-quality translations of informed consent documents. In April 2016, the IRB Director was awarded an internal grant to assist researchers in defraying the cost of obtaining certified translations. Full details of the awarded grant can be found on page 72 in the IRB division report.

Data management, storage and implementation

In FY15, representatives from RGS, the Library, Central IT, and the Information Security Office formed a Data Management Group to address the pending open access requirements for research publications and data by all federal funding agencies. That process is now in a near-final draft stage, and it leverages the strong keyword search capacity of the libraries catalog system, the unlimited storage available through Digital Commons and Box.com, and the new RGS sponsored awards database, Kuali.

The Library will serve as the main point-of-contact to assist researchers in making their publications and data publicly available, and walk them through the resources USU has established to satisfy the new federal requirements. The RGS Sponsored Programs Division will notify researchers when an

award requires public access, and send periodic reminders over the course of the award to remind them of this requirement.

The Data Management Group anticipates this process will allow USU to meet the new federal open access rules, but it will continue to stay abreast of this rapidly changing issue.

Strategy: Communicate research success

Website update

In 2014, Utah State University Central IT made the decision to discontinue support for its proprietary content management system, EZ Plug. Throughout that year, RGS personnel evaluated other website options, including OU Campus, a new vendor solution provided by Utah State, and decided to migrate RGS website to WordPress Multisite. Since WordPress is an open-source platform, it has a robust support community and suite of pre-programmed themes and plugins to assist the RGS team of student employees who manage the website.

Throughout 2015, those student employees worked to migrate 4,500 website pages to WordPress and launched the new site in December, with content and aesthetic changes continuing to be made through 2016 and beyond.

TEDxUSU

RGS organized its fourth TEDxUSU, an independently organized TED-like event dedicated to sharing “ideas worth spreading.” Given the high demand of the event, held in the Caine Performance Hall, tickets were awarded based on a lottery system as opposed to a first-come first-served basis. Ten participants—including Luciana Borio, the acting chief scientist of the FDA and Brady Parks, of the National Parks, along with USU faculty and students—gave talks or performances on the theme “Duality” during this three-part event, including an interactive second session.

As in past years, the preparation process was treated as a training experience to hone their communication and presentation skills to a wider audience than their peers. After a competitive nomination and audition process, speakers were coached and supported by RGS staff for more

Johan DuToit shares his research experiences in Africa as he compares the generous nature of his research subjects to sometimes less benevolent actions of humans.

TEDxUSU 2016 Speakers

Presenter	College	Department	Title
Mark Damen	College of Humanities and Social Sciences	History	The Indo-European dual
Johan du Toit	SJ and Jessie E. Quinney College of Natural Resources	Wildland Resources	An idea for humanity, from a considerate elephant
Beth Fauth	Emma Eccles Jones College of Education and Human Services	Family Consumer and Human Development	Finding joy in an Alzheimer's reality
Rob Gillies Rob Davies	College of Agriculture and Applied Sciences, Utah Climate Center	Plant, Soils and Climate	Another #\$\$@%! climate talk

Lynne McNeill	College of Humanities and Social Sciences	English	Folklore doesn't meme what you think it memes

Regan Zane presents about his research on wireless car battery charging at the January 2016 Sunrise Session, held at Little America in Salt Lake City.

than five months as they prepared their talks and performances.

Over four years, TEDxUSU talks have been viewed over 450,000 times. Links to the talks can be found at tedx.usu.edu.

Sunrise Sessions

Now in its tenth year, Sunrise Sessions bring USU research presentations to our Salt Lake constituents on a quarterly basis. This year RGS took on full responsibility of Sunrise Sessions after a long-term partnership with the USU Advancement Office. The program continues to be supported by Regence.

For FY16, three faculty and four students presented their research. In April 2016, four students from USU's Ignite lineup presented at a Sunrise Session for the first time. About 100-150 people attend each Sunrise Session, and all talks were recorded and posted as podcasts at sunrise.usu.edu/sunrise for additional listening.

Sunrise Session 2015-16 Presenters

Name	College	Department	Title
Jeannie Johnson	College of Humanities and Social Science	Political Science	US blind spots in foreign policy
Tony Lowry	College of Science	Geology	Water tectonics and the roots of Utah's earthquakes
Regan Zane	College of Engineering	Electrical and Computer Engineering	Electrification: Towards a sustainable future for our transportation system
Ignite USU Presenters			
Daisha Cummins	Education and Science	HPER and Biology	Simple Tools for Complex Questions about Autism
CJ Guadarrama	College of Humanities and Social Sciences	History	Why I Trespassed in the Intermountain Indian School

Amy Moser	College of Science	Geology	All I Do is Rocks Rocks Rocks No Matter What

Research Week

On April 11-15, RGS hosted USU's 11th annual Research Week, showcasing the best of the best in undergraduate, graduate and faculty research.

Research Week gave student researchers center stage through events such as Ignite USU and the Student Research Symposium, and celebrated faculty research at the annual Awards Gala and the D. Wynne Thorne Lecture. Throughout Research Week, the Office of Research and

Graduate Studies formally recognized more than 50 college awardees: Faculty Researchers of the Year, Graduate Researchers of the Year, Graduate Instructors of the Year, Undergraduate Researchers of the Year, and Undergraduate Research Faculty Mentors. Two university awards, the D. Wynne Thorne Career Research Award and the Graduate Mentor of the Year, were also given. Hundreds of other students and faculty were recognized on a more informal basis throughout the week.

Research Week events included a faculty author exhibition (presenter Sherry Marx pictured top left), Research Awards Gala (D. Wynne Thorne Career Research Awardee Bruce Bugbee pictured top right), and Ignite speaking event and closing reception (bottom).

Goal: Grow and strengthen USU's research portfolio.

Strategies	Before 2014	2014-15	2015-16	2016-17

Strategic goal 2: Foster success of USU's graduate students

Increase student financial support

Funding for graduate student support

For the third year in a row, the Utah legislature allocated new funding targeted at enhancing graduate education at USU. Part of the new recurring funds that were allocated for FY17 will help meet critical graduate student support needs in each of the colleges, with the specific uses for those funds being determined by each college. Other new funding will support new faculty hires in areas that will contribute to graduate education, including a new emphasis on Data Science that is being developed by the colleges of Science, Engineering, and the Huntsman College of Business. The Library was the final recipient of a portion of the new funding, in recognition of

the critical role that the library plays in supporting graduate education and research.

Supplemental language tuition

In recognition of the important role that facility in a foreign language can play in some fields of study, the Office of Research and Graduate Studies established a limited fund to cover tuition for foreign language coursework. Limiting funding to coursework that is included on a graduate Program of Study will ensure that the student's supervisory committee has determined that the language study will contribute to the student's graduate program.

PDRF expansion

In FY16, the final 13 fellowship slots were allocated to departments. From this point forward, the total

The Library received a portion of allocated funding from the state legislature, in recognition of the critical role that the library plays in supporting graduate education.

USU Office of Research and Graduate Studies

of 51 fellowships slots (allocated to colleges based on proportion of PH.D. enrollments) will become open when a current Fellow “Graduates” from their slot.

The nature of the award remains the same: a \$20,000 minimum income for students, with an average of \$10,000 per student per year coming in the form of a fellowship stipend from RGS, the rest funded by students’ home departments. In addition, RGS covers 100% of tuition (excluding differential tuition) for the Fellows during their four years of fellowship funding.

In addition, this year the Presidential Doctoral Research Fellowships program graduated its first two fellows: Troy Munro and Maureen Frank.

First ArtSTEM fellow graduated

Matt Fiske, the first graduate student to be supported by an ART-STEM Fellowship, completed his degree in spring 2016 and has accepted a prestigious 1-year residency at the Red Lodge Clay Center in Red Lodge, MT. Matt completed his MFA degree in the Department of Art and Design,

working with Professor of Ceramics John Neely. The STEM components of Matt’s graduate program included both geology and material science. His integration of those STEM fields with his focus on ceramics is an outstanding example of the goal of the ART-STEM fellowship, which was created to encourage collaboration across traditional disciplinary boundaries.

Enhance recruitment efforts

The Graduate Student Recruitment Team aims to recruit an increased quality, quantity and diversity of students by supporting projects, processes and initiatives that produce measurable changes.

These recruitment efforts fall under one of two categories: department support and central recruitment.

Department support, when enacted systematically and efficiently, is a crucial component of graduate student recruitment as contact with potential students often occurs on the department level.

Central recruitment consists of projects and initiatives supporting faculty and department

Having obtained both his Bachelors and Masters from USU, Troy Munro was encouraged by his major advisor, Heng Ban, to pursue his PhD in Engineering. Munro was quickly identified as an ideal candidate for the first cohort of the PDRF program. Not only was he highly engaged in the program, taking on mentorship roles and always willing to review undergraduate research programs, Munro exemplified the best of a Utah State education. As a new PhD, Munro currently holds an Assistant Professorship of Mechanical Engineering at Brigham Young University.

Maureen Frank serves as another success story. As the first PDRF fellow for the department of Wildland Resources, Frank’s research focused on the migratory and dietary patterns of phalaropes, a type of bird that utilizes the Great Salt Lake as a migration stop over. In addition to pursuing her research, Frank participated in other training and speaking opportunities, such as Ignite, USU’s premiere student research showcase. Upon receipt of her PhD, Frank accepted a position as an Extension Wildlife Specialist and Assistant Professor at her undergraduate alma matter, Texas A&M.

2015-2016 New Presidential Doctoral Research Fellows

Fellow	College	Department	Advisor
Tatiana Drugova	College of Agriculture and Applied Sciences	Applied Economics	Kynda Curtis
Idowu Atoloye	College of Agriculture and Applied Sciences	Plants, Spoils and Climate	Jennifer Reeve
Beth Shirley	College of Humanities and Social Sciences	English	Jared Colton

Randall Reese	College of Science	Mathematics and Statistics	Chris Corcoran

USU Office of Research and Graduate Studies

recruitment needs. Centralized projects and resources have the potential to improve graduate school recruitment throughout all programs and fall into one of these three areas: branding, lead generation and evaluation.

Three tactics were identified FY16 to aid in departmental recruitment:

Gradschoolmatch

In June 2016, the recruitment team invested in a membership with Gradschoolmatch. Gradschoolmatch, is an online hub where an advanced algorithm uses each program's profile information to generate a list of students that would be a good fit for the program. Currently, all USU programs are on Gradschoolmatch giving faculty another tool to find students and allow them to directly message students who are currently making a short list of programs.

The recruitment team recognizes that Gradschoolmatch is a new tool, and is dedicated to increasing awareness of the tool and training on how to best utilize it to faculty throughout FY17.

Recruitment weekend

RGS knows that visiting a prospective institution makes a difference in a student's decision. Because of this, in FY17, RGS will support departments interested in bringing students who have been made offers to USU for campus visits. RGS support will come in providing programming for weekend

visits and covering the cost of the programming provided. Departments will still be responsible for covering the travel costs of visiting students.

Ellucian Recruit

The new industry standard in graduate student recruitment is that students make decisions based on the personal attention and immediate service that they get.

To better track graduate student information requests and prospective students' progression in the graduate admission process, the recruitment team has employed Ellucian Recruit, which is already being used to process student applications. FY17 will bring further development of workflows and tools to aid in recruitment tactics.

Strategy: Provide value-added opportunities

Graduate Training Series (GrTS)

Now in its third year, the Graduate Training Series (GrTS) provides monthly opportunities for graduate students to augment their studies with professional development that will prepare them for the next steps in their career paths. Drawing from experts across campus, GrTS provides graduate students from across disciplines skillsets that will set them apart as strong professionals in their fields.

In addition to the workshops, resources were made available online (grts.usu.edu) to those who were not able to attend.

Events like Graduate Training Series (GrTS) and Graduate Student Orientation (pictured left) help provide skills and social opportunities that aren't as readily available in day-to-day research or classwork.

Graduate Training Series (GrTS) 2015-2016 Schedule

What I wish I knew (September 23, 2015)

Presenters

Christy Glass (SSWA)
Jarod Raithel (Grad, WILD)
Ty Aller (Grad, USUSA)

Announcement

In a lot of ways, graduate school is like a marathon; you've spent a lot of time training and preparing and now race time is here. You've looked at your map and have an idea of what's ahead, but there might still be some unexpected obstacles along the way. There are a lot of people you'll work with along the way, but ultimately, you are running your own race. You are in charge; you can listen to suggestions and take others' advice, but this is your race. September's edition of GrTS focused on the tips and advice incoming students need to be successful.

3 most effective tactics to improve your teaching (October 14, 2015)

Presenters

Scott Bates (PSYCH)
Fran Titchener (HIST)

Announcement

Teaching has a similar reputation as parenting: "People have been doing this for a long time, so everyone knows what they're doing." There's a sense that no training is involved, but when graduate school includes a teaching context, it could be your first exposure to teaching. That can be intimidating. Graduate Training Series featured asked students to compare teaching to parenting (or being parented).

Prepare for your career in academia (November 18, 2015)

Presenters

Suzanne Sumsion
Jared Woolstenhulme

Announcement

The road to a career in academia begins with thoughtful planning. November's GrTS, led by USU Career Services, featured tips to help you jump-start that planning by focusing on how to strengthen your academic presence, so when the opportunity comes, you'll be ready.

3 Essential steps to beautify your graphs and data plots (January 20, 2016)

Presenter

Abby Benninghoff (ADVS)

Announcement

Abby Benninghoff, associate professor in the Animal, Dairy and Veterinary Science Department, discussed how students can best present their graphs and data plots. Benninghoff discussed the best ways to create graphs and data and how to be clear, concise and powerful with your information.

3 Merrill-Cazier library resources that will make your life easier (February 24, 2016)

Presenters

Becky Thoms
Betty Rozum
Britt Fagerheim

Announcement

Librarians Becky Thoms, Betty Rozum and Britt Fagerheim discussed the importance of literature reviews, citations and data storage.

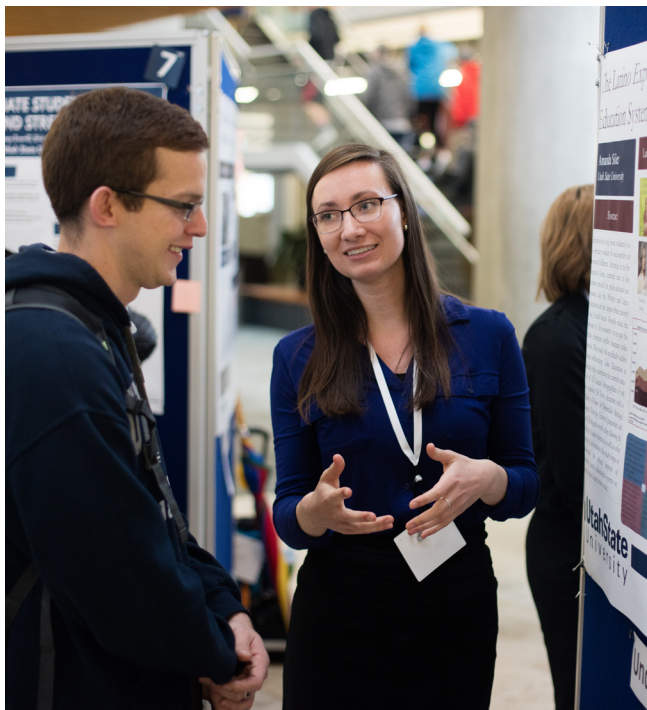

Getting smart about posters and slides (March 23, 2016)

Presenters

Anna McEntire (RGS)

Announcement

Anna McEntire, communications director for the Office of Research and Graduate Studies, discussed what makes an engaging and visually appealing poster or slide. Become an expert on slide and poster design.

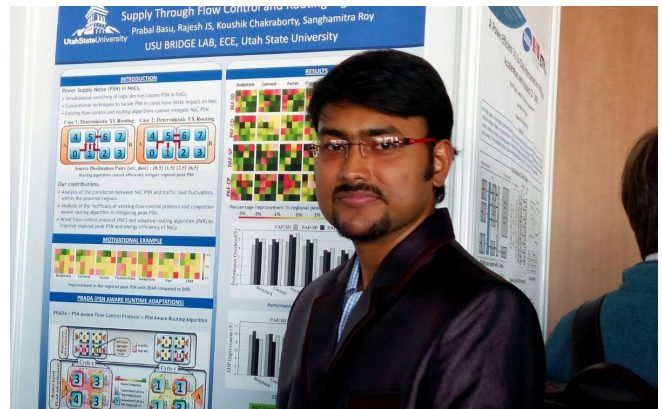

Student Research Symposium

Student Research Symposium (SRS), one of Research Week's most attended events, is USU's largest showcase of student research. Intended to give students a platform to share their research with their peers, faculty judges, and the campus community, SRS features over 300 graduate and undergraduate researchers.

To refine the goals of SRS, the Project Management and Communication division issued a survey to past participants and results indicated that students highly valued SRS as a training opportunity to improve their presentation skills. For the second year, students could submit their posters and slides to PMC prior to SRS to receive evaluation of their work based on a best practices rubric. This feedback was emailed back to students and submissions demonstrating best practices were awarded "Excellent Communicator" badges that students could display during their poster or oral session. As in previous years, students presented

More than 300 students participated in USU's Student Research Symposium and this year's expanded training opportunities in association with it.

Graduate Student travel awards continue to support travel to professional conferences by USU students, including Tyler King (left), Samantha Wilden (top right), Ana Caballero (middle right), and Prabal Basu (bottom right).

in discipline specific sessions where they received email feedback from some of the 60 faculty judges.

Graduate Student Travel Awards

The Graduate Student Travel Fund promotes student involvement in their disciplines by partially funding travel costs associated with professional presentations at regional, national, and international conference. The travel fund is a dollar-for-dollar matching grant between RGS

and an applicant's department. Depending on if an applicant is attending a region, national, or international conference, RGS will provide up to \$200, \$300 or \$400, respectively.

This year RGS received 367 applications for travel funding, awarding 313 (85.3%) of applicants. For FY16, RGS awarded \$88,600 worth of travel fund grants, which were matched by \$88,600 in department funds.

USU Office of Research and Graduate Studies

Strategy: Provide Graduate support services

Ellucian Recruit

Ellucian Recruit was implemented in fall 2015 as the new software platform for undergraduate and graduate applications. Recruit automates a number of processes that were previously done by Graduate School admission processors such as facilitate communication with applicants, allow departments and programs to customize their

applications if they require additional application materials, and provide a web-based interface through which applicants can monitor the status of their applications. One notable outcome of this transition to Recruit is a reduction in the number of admission processors that the Graduate School employs to deal with the large number of applications that are submitted from November through February (over 1,900 applications this past year).

Goal: Foster success of USU's graduate students.

Strategies	Before 2013	2013-14	2014-15	2015-16
Increase student financial support.	Tuition awards, fellowships, scholarships			
		Non-resident research waiver (PhD and thesis master's degrees)		
		Non-resident excellence waiver		
	Subsidized insurance	(moved to Student Services)		
	Tuition award pool (decentralized, two-year cycle, backstop with F&A)			
	Require tuition be included on grant proposals			
	PhD conversion			
	One-time state funding: PDRF expansion, dissertation enhancement			
	Recurring state funding: X-STEM, RGS assistantships			
Enhance recruitment efforts.	Recruitment grants (augmented)			
	Grad school recruiting email campaign			
	Presidential Doctoral Research Fellows program, profiles, posters			
	Western Regional Graduate Program			
	Recruitment online toolkit, workshop, panels			
	Web enhancement			
			Recruit CRM software	
			New strategic plan	
Improve dept programs.	Program reviews (Self studies, 5-year plans)		(mid-term reviews)	
	Restructuring programs and degrees; conversion of MS/C to professional degrees			
	Graduate faculty process: department review			
Provide value-added opportunities.	Thesis and dissertation workshops			
	Graduate Research Symposium		(symposium training)	(combined with UG)
	Responsible conduct of research training		(mandatory for doctoral)	
	Social media			
	Grant-writing workshops each semester			
	Travel funding moved to RGS			
	Ignite speaking event			
	Graduate Student Training Series (7 workshops per year)			
	Graduate student awards moved to RGS			
			Teaching Assistant training	
Provide efficient graduate support services.	New student orientation		(grad orientation fair)	
	Graduate catalog		(RGS ownership)	(Acalog system)
	Graduate faculty forums			
	DocuSign form routing			
	Data summaries: college/dept demographics			

Strategic goal 3: Enhance USU's undergraduate research program

Strategy: Encourage greater participation in undergraduate research

This past year our efforts in USU's first-year experience (USU Connections) was significantly expanded in an effort to broaden and encourage greater participation in undergraduate research. Connections reaches a significant majority of Logan-campus incoming freshman, and, last year, students received UR-related materials as a part of their welcome packet, an invitation (using the Aggie Passport system) to the Fall Undergraduate Research Orientation and fall poster-symposium. Scott Bates also presented to all four sections of Honors Connections on the value of undergraduate

research and how to get involved. Further, Bates presented a brief orientation of undergraduate research to hundreds of Connections students across the four-day event. In addition, the Division of Graduate and Undergraduate Research participated in Day on the Quad, in an effort to publicize the orientation.

The Fall Undergraduate Research Orientation was held on September 11, 2015. Bates provided an introduction to undergraduate research, guidance on "how to get involved," and information about programming (URCO, Research on Capitol Hill). Directly after the orientation, a poster session was

The Fall Undergraduate Research Poster Session provided students the opportunity to share the results of their summer research projects while generating interest for students who were just becoming familiar with undergraduate research at the UR Orientation.

held outside on a major campus thoroughfare in an effort to continue to capture attention of new and current students.

The division has also spent resources and supported a number of college, department, and program-level undergraduate research presentation opportunities, including: Hansen Life Science Retreat, the Fall Undergraduate Research Symposium (led by Dr. Travis Dorsch, FCHD), the Spring Runoff Conference, the LPSC Annual Spring Student Research Symposium, the Sagebrush Ecosystems Convention, the research day in the Caine College of the Arts, and the Animal, Dairy, and Veterinary Science annual student research symposium.

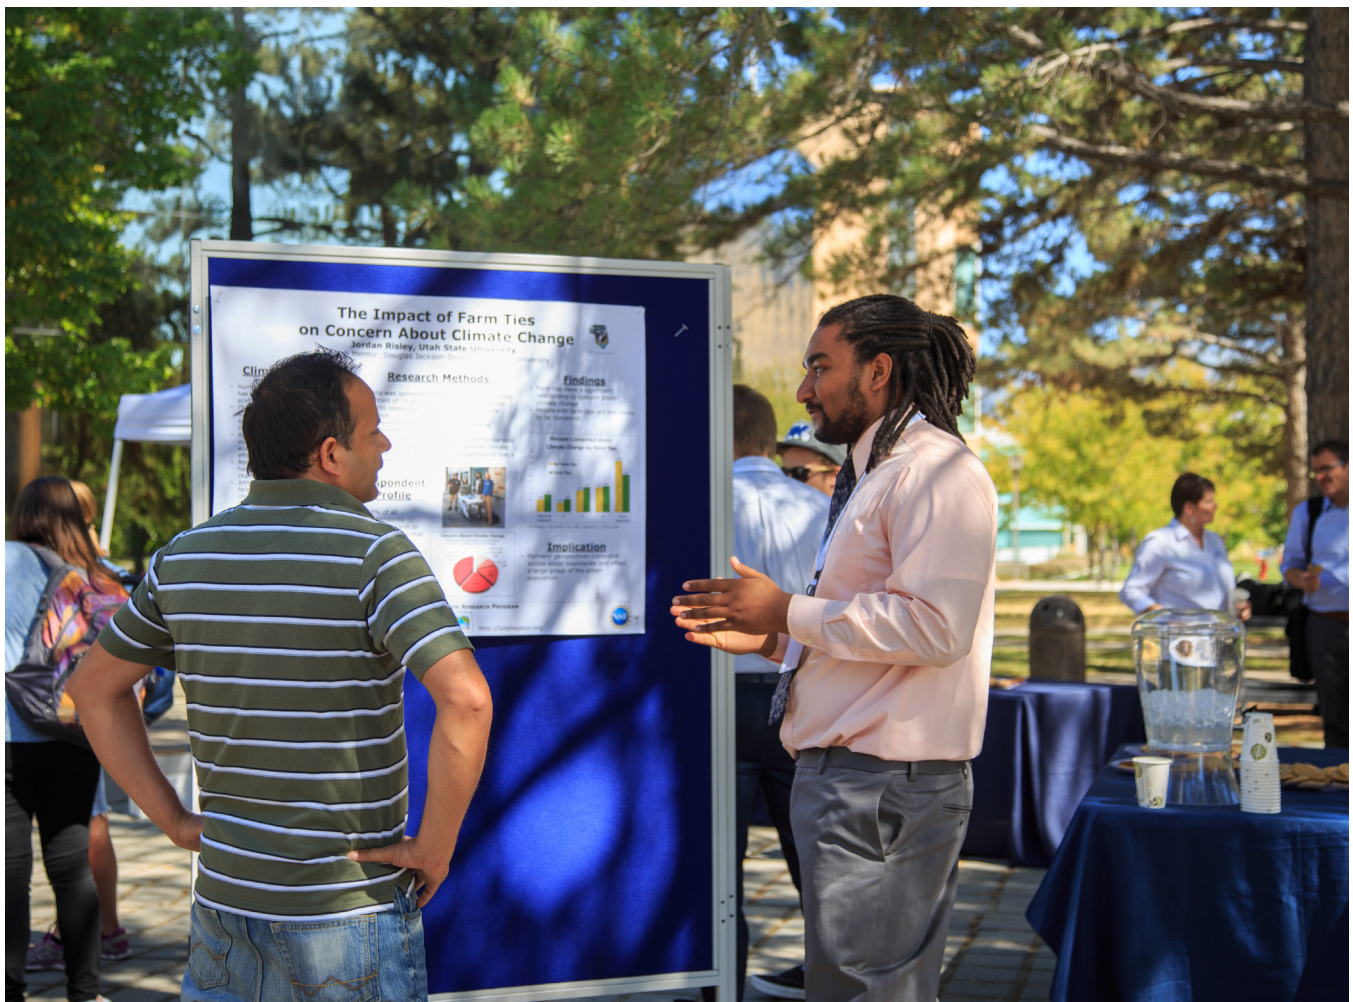

Each of these strategies were designed to encourage greater participation in undergraduate research.

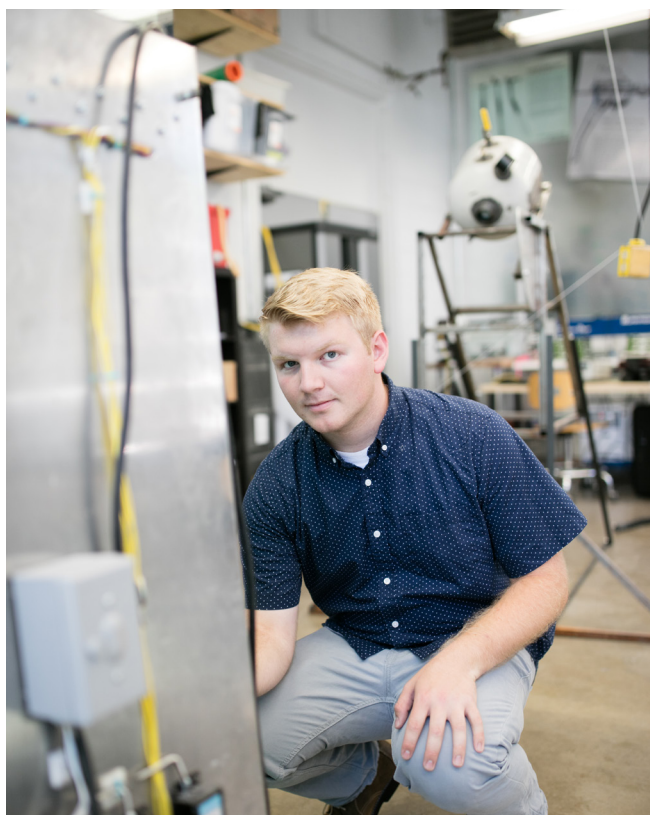

Strategy: Encourage recruitment of high achieving students

Scholars' Day

For the second year, RGS participated in a refocused Scholars' Day during May, in coordination with the Honors program and Admissions, with a focus on recruiting high ability high school juniors, as opposed to committed seniors after scholarship and application deadlines.

This year, selected student Ignite speakers were asked to present their talks in front of the audience of high-ability high-school juniors and many of their parents. The high-school students were then provided the opportunity to explore campus research opportunities from all ends of campus, from the Animal Diagnostic Lab, to ASSERT—the program that supports children with autism spectrum disorder and their families—to the spider-

This year, enhancements were made to the Undergraduate Research Fellows program, USU's flagship opportunity for high-achieving students. Recruitment was streamlined through the Honors program, and sophomores were considered for the fellowship as well. Current Undergraduate Research Fellows include Gianna Patchett (top) Hunter Klein (bottom left) and Morgan Sanford (bottom right).

silk lab, to a session on the philosophical underlings of Star Wars.

Undergraduate Research Fellows

Finally, the undergraduate research program and the Honors program continued to work together to identify high-achieving students for the Undergraduate Research Fellows program. This year, all students who applied for Honors were reviewed for the Undergraduate Research Fellows program. The result was a much more diverse incoming class of Undergraduate Research Fellows. In addition, for the first time, sophomore students were invited into the Undergraduate Research Fellows program. The first cohort of ten sophomores was selected in June and will begin as Research Fellows in fall 2016.

Strategy: Provide funding opportunities for undergraduate research

Changes to URCO policies

The requirements for URCO remain the same: students must submit a proposal, attend budget training session, and present the results of their grant at a university-sponsored, or professional conference.

This year, 75 proposals were submitted for funding in FY16, and 53 were awarded. The table below shows rates for college, and departments.

28 faculty reviewers, and 9 doctoral student reviewers participated in the review process and a total of \$64,313 were awarded (these dollars were matched with \$36,063 of other department funds).

This year brought a few change as to the center piece of the undergraduate research and creative opportunities grant program. First, a summer deadline was established. The new, June 15, deadline is for students who are interested in being funded during the fall semester. The October 15 deadline remains for students who wish to be funded in the spring, and the February 15 deadline remains for students who wish to be funded in the summer.

The nature of the award has also shifted. The total award available remains \$2000 (this includes a \$750 match from another University source). \$1000

of this award is in the form of a scholarship, and the remaining \$1000 is for equipment, supplies, and research related travel. Groups of students, too, can be awarded scholarships (although the amount is reduced for groups).

Undergraduate travel funding

In January of 2016, RGS launched a new program designed to support undergraduate researchers. The RGS Undergraduate Student Travel Award promotes student involvement in their disciplines by partially funding travel costs associated with professional presentations at regional, national, and international conferences. The ongoing program has a budget of \$20,000. Allocation decisions are made on a first-come/first-served basis.

In FY16, a total of 54 awards were made (60 requests were submitted) and the total dollars distributed was \$13,550. Students from all 8 colleges (and 20 departments) participated in the program. Students traveled to regional, national, and international conferences.

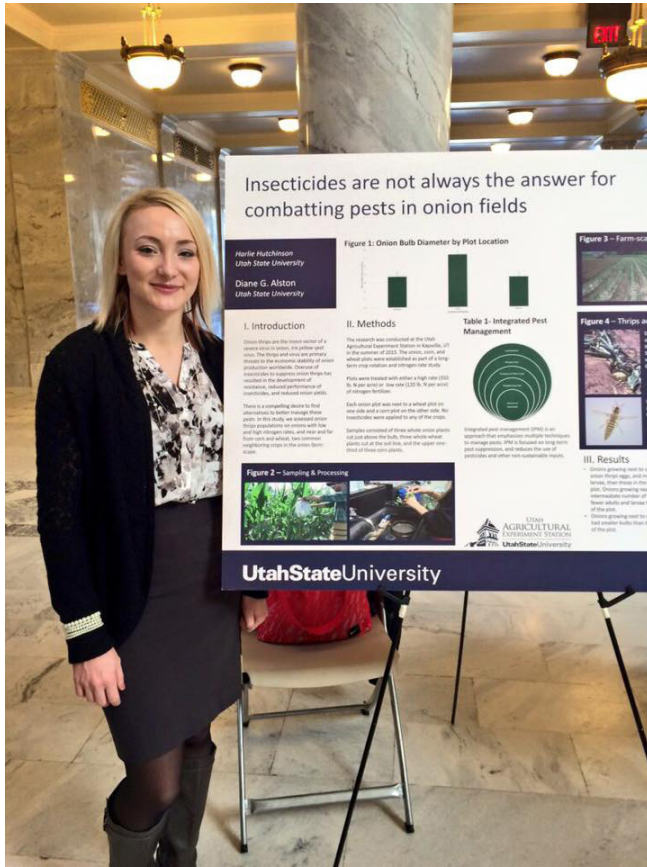

Fifty-four students attended conferences, including:

- National Conference on Undergraduate Research
- Experimental Biology
- American Geophysical Union
- 37th Annual Southwest Popular/American Culture Association Conference
- Institute of Biological Engineering (IBE)
- Society for the Quantitative Analyses of Behavior
- Cognitive Neuroscience Society
- International Symposium on Society and Resource Management

Strategy: Recognize undergraduate research success

Research on Capitol Hill

Utah Research on Capitol Hill is a collaboration with the University of Utah to highlight the best of undergraduate research from Utah's state research institutions. On January 26, 2016, 50 students, 25 from the University of Utah and 25 from Utah State

Students from Utah State University (including Harlie Hutchinson, pictured above) and the University of Utah presented their work at Research on Capitol Hill in January 2016.

University presented their research to the state legislator.

This year, students were trained on poster design (a process that included basic skills, and an iterative feedback process), as well as scholarly communication. Experts in university/governmental relations provided an hour-long training session on science communication skills, given the audience, which included the general public, Utah legislators, staff, and the news media.

Utah Conference on Undergraduate Research

Based on the National Conference on Undergraduate Research, the Utah Conference on Undergraduate Research celebrates academic, professional and personal achievements resulting from undergraduate research projects or creative endeavors across disciplines. In 2016 USU had 42 undergraduate students give presentations.

Strategy: Train students on research best practices

URF Boot Camp

High-ability students in the Undergraduate Research Fellowships program were required to attend a four-hour "boot camp" session where they learned about identifying and getting involved in undergraduate research. Undergraduate Research Fellows are required to be "vigorously involved in undergraduate research," and the boot camp was the training session designed to facilitate their early engagement.

Undergraduate Research Guidebook

The Undergraduate Research Guidebook was expanded in an effort to provide addition training to students. New expanded sections on identifying undergraduate research opportunities, responsible conduct of research, and safety were written to provide a base document for undergraduate researchers and their faculty mentors.

Graduate Student Workshops

Advanced undergraduate researchers were also invited to participate in the Graduate Training Series (GrTS), as well as the RGS-funded graduate student grant writing seminar called "Getting Started as a Successful Proposal Writer." Those

This year's Ignite student speakers were (pictured left to right): Matt Fiske, Jeannie Woller, Danielle Christensen, Daisha Cummins, Amy Moser, CJ Guadarrama, Enjie Li, Brett Hurst and Antra Boca. Their talks can be viewed online at ignite.usu.edu.

opportunities provided advanced students access to best practices in scholarly writing, communication, and research skills.

Student Research Symposium

Student Research Symposium (SRS) gives undergraduate researchers the opportunity to present their research in a conference like setting. As part of the SRS preparation materials, students have access to a series of training videos, that coach them on best practices in formatting posters and slides for conference presentations. Additionally, students can submit their work to the Project Management and Communications team prior to SRS to be evaluated for an "Outstanding Communicator" badge. Built into the symposium

are both faculty and peer evaluations, to which the standard of measure is provided prior to the event.

Ignite

Also, as part of Research Week, students continue to receive training on how to effectively present their undergraduate (and graduate) research at Ignite, a speaking series designed to showcase student research interests in an engaging way. Attendance at this event continued to grow in 2016, with nine total speakers who received more than three months of intensive training.

New this year, four Ignite student presenters were selected to give their talks at the spring 2016 Sunrise Session in Salt Lake, as well as at the Scholars' Day program for high school students.

Goal: Enhance USU's undergraduate research program.

Strategies	Before 2013	2013-14	2014-15	2015-16
Encourage greater participation in undergraduate research.	Undergraduate Research Advisory Board			
	Day on the Quad promotion			
	Social media			
	List serve			
	Fall undergraduate research orientation		(summer research symposium)	
	Spring undergraduate research orientation			
		Erevna UR String Quartet		Connections content
Encourage recruitment of high achieving students.	Undergraduate Research Fellows program communication			
	Coordination with Honors			
	Scholars' Experience recruiting event		(May event)	
	Overhaul URF application process	(Combine process with Honors)		
Provide funding opportunities for undergraduate research projects.	Undergraduate Research and Creative Opportunity (URCO) grants			
	Undergraduate Research Fellow program			
	Travel Funding (UCUR, NCUR, POTH, ROCH)			
	SURCO program for summer research			
		Changes to URCO policies		
		Combine URCO with SURCO		
		UR Travel Award		
Recognize undergraduate research successes.	Research on Capitol Hill			+U/U partnership
	UR transcript designation			
	Undergraduate research awards			
	Research Fellow activities			
	Faculty mentor reception			
Train students in research best practices.	Student Showcase		(Student Research Symposium)	
		SRS badging, training, feedback, partnerships		
	Utah Conference on Undergraduate Research			
	National events: NCUR/POTH			
	URF guidebook		(UR guidebook)	
	Student Showcase training			
	Ignite speaking event			
		URCO training		URF boot camp

Chapter 2:

Research Council and Graduate Council

Activities of the Research Council

The Research Council provides advice and recommendations to the Vice President for Research and Dean of the School of Graduate Studies. Additionally, members of the council provide direct and important channels of communication between researchers and those who make decisions affecting research at USU.

Actions of Research Council in FY 2015

September 2015

The Research Council reviewed and discussed revisions to USU Policy #584, Human Participants in Research, to implement guidelines for identification and management of institutional conflicts of interest (ICOI). Policy on ICOI for Human Participants in Research is required for renewal of USU's accreditation by the Association for the Accreditation of Human Research Protection Programs (AAHRPP). AAHRPP accreditation represents acknowledgement that the research

infrastructure at USU provides strong and effective protections for human participants. Research Council voted unanimously to support the policy revisions. The policy advanced through all subsequent administrative steps and was presented and approved at the March 4, 2016 USU Board of Trustees meeting. The full text of the policy is included on page 37.

October 2015

Vice President McLellan provided the Research Council with an update on revisions to policy # 337, Safety and Health, which the Council had supported in FY15. There are two fundamental changes to the existing policy; 1) Formalization of USU Safety Committee and university representation to assure better communication about safety issues, and 2) Identified safety responsibilities for university administrators and personnel. Dr. McLellan noted that language within the proposed revision addressed input

Research Council FY 2015 Roster

Representative	College
Mark McLellan	Chair, Vice President for Research and Dean of Graduate Studies
Noelle Cockett (Andi McCabe)	Provost
Larry Walther (Jeff Doyle)	Jon M. Huntsman School of Business
Beth Foley (Jamison Fargo)	Emma Eccles Jones College of Education and Human Services
Maura Hagan	College of Science
Christine Hailey (Jagath Kaluarachchi)	College of Engineering
John Allen	College of Humanities and Social Sciences
Mac McKee	Utah Water Research Laboratory
Craig Jessop (Chris Terry)	Caine College of the Arts
Nancy Huntly (Jodi Costa)	Ecology Center
Ken White (DeeVon Bailey)	College of Agriculture and Applied Sciences
Brad Cole (Betty Rozum)	Libraries
Rylish Moeller	Faculty Senate Representative
Chris Luecke	S.J. and Jessie E. Quinney College of Natural Resources
Judith Holt (John Copenhaver)	Center for Persons with Disabilities

from USU's Safety Committee, Risk Management, college faculty and campus administration, campus units, as well as employee committees, and that the tone within the policy had been broadened to better capture how the university functions as a whole. The policy advanced through all subsequent administrative steps and was presented and approved at the May 6, 2016 USU Board of Trustees meeting. The full text of the policy is included on page 47.

January 2016

The Research Council reviewed and discussed revisions to USU Policy #586, Open Access to Scholarly Articles, to incorporate greatly expanded federal agency requirements for open access to publications. The Research Council voted unanimously to add language to section 4.1 paragraph 1 of Policy 586 as follows:

"All employees during their employment with the University grant to the University a

nonexclusive license to exercise any and all rights under copyright relating to each of their scholarly articles, in any medium, provided that the articles are not sold for profit, and to authorize others to do the same. These articles will also be deposited in the University's Open Access Institutional Repository to ensure the widest possible dissemination. The nonexclusive license will be waived at the sole discretion of the author, except in cases where a funder mandate requires article deposit, and will be administered on behalf of the Provost's Office by the Library."

The revised policy was subsequently presented for review and discussion to the Faculty Senate, Business Finance and Welfare Committee, the Council of Deans, and finally to the USU Executive Committee, where it was approved. The policy will go forward for final approval from the USU Board of Trustees in Fall 2016.

Policy Number 584

Human Participants in Research

584.1 PURPOSE

The purpose of this policy is to govern the involvement of human participants in the conduct of research at Utah State University. The University is committed to safeguarding the rights and welfare of human participants, and complies with the regulations of the U.S. federal government and the State of Utah.

584.2 DEFINITIONS

2.1 Research

For the purposes of this policy, research is defined in harmony with 45 Code of Federal Regulations (CFR) 46 as a systematic investigation, including research development, testing and evaluation designed to develop or contribute to generalizable knowledge.

For the purpose of this policy, a systematic investigation is defined as a process that involves

the formulation of a hypothesis or research question and the collection and/or analysis of data that will lead to a conclusion that either supports or disproves the hypothesis or that answers the research question. Generalizable knowledge is any result of research that is intended to be extended (or generalized) beyond the population or program being investigated. Such extension shall include public disclosure of such results either in public settings, through publication of a thesis or dissertation, or through other dissemination or publication.

The USU Institutional Review Board (IRB) shall have the sole responsibility, through interaction with the Principal Investigator and review as set forth in this policy, to determine whether an investigation to be conducted constitutes research in accordance with 45 CFR 46, as illustrated in Decision Chart #1, published as guidance by the Office of Human Research Protections (OHRP), available at: <http://>

USU Office of Research and Graduate Studies

www.hhs.gov/ohrp/humansubjects/guidance/decisioncharts.htm.

2.2 Human Participant

A human participant ("participant") in research is a living individual, about whom an investigator (whether professional or student) conducting research obtains:

1. Data through intervention or interaction with the individual; or
2. Identifiable private information.

The terms "human participant" and "participant" are equivalent to the terms "human subject" and "subject" as used in the "Common Rule," 45 CFR 46.

2.3 Human Research

Human research, or research involving human participants, is any research, as defined above, that involves human participants in accordance with 45 CFR 46 and as illustrated in Decision Chart #1, published as guidance by the OHRP, available at: <http://www.hhs.gov/ohrp/humansubjects/guidance/decisioncharts.htm>.

The USU IRB shall have the sole responsibility of determining whether an investigation constitutes human research, under the above definition. The following activities, which may be found to be exempt from Common Rule (45 CFR 46) requirements, shall nonetheless be included among those to be submitted for IRB review: quality improvement programs and program evaluations carried out for other than exclusive use by the organization sponsoring the evaluation, classroom exercises that are associated with research methodologies courses, public health activities, and innovative health care.

2.4 Investigator

Investigator is a person or entity affiliated with USU, whether as an employee, student or otherwise, whose role statement, job description, employment assignment, and/or function within the University is, either in whole or in part, to carry out research. Such investigators shall include, but not be limited to, USU faculty, professional researchers, research assistants, laboratory and

clinical staff, and others as may be designated by the Vice President for Research.

Principal Investigator (PI) is an investigator who is an employee of the University and is authorized by his/her unit and college, or by the Vice President for Research, to take responsibility for research involving human participants. This individual shall have primary responsibility for submitting research protocols and carrying out research programs that protect the health and well-being of Human Participants, as set forth in this policy.

2.5 Intervention

Intervention includes both physical procedures, by which data are gathered (for example, venipuncture), and manipulations of the participant or the participant's environment that are performed for research purposes.

2.6 Interaction

Interaction includes communication or interpersonal contact between investigator and participant.

2.7 Vulnerable Populations

The IRB gives special consideration to protecting the welfare of particularly vulnerable populations, such as children, prisoners, pregnant women, mentally disabled persons, or economically or educationally disadvantaged persons.

1. A child is a person under the age of 18 who is not able to legally consent to treatments or procedures involved in the research (see Utah Code Annotated 75-1-201 [29]).
2. A child's guardian, according to U.S. Department of Health and Human Services (DHHS) regulations, is an individual authorized to consent on behalf of the child to general medical care.
3. A guardian of an incapacitated adult shall be a person who has qualified as such pursuant to testamentary or court appointment.

2.8 Private Information

Private information includes information about behavior that occurs in a context in which an individual can reasonably expect that no

observation or recording is taking place, and information which has been provided for specific purposes by an individual and which the individual can reasonably expect will not be made public (e.g., a medical record). Private information must be individually identifiable (i.e., the identity of the subject is or may be ascertained by the investigator or associated with the information) in order for the obtaining of the information to qualify as research involving human participants.

2.9 Minimal Risk

Minimal risk means that the probability and magnitude of harm or discomfort anticipated in the research are not greater, in and of themselves, than those ordinarily encountered in daily life, or during the performance of routine physical or psychological examinations or tests.

2.10 Conflict of Interest

An individual conflict of interest is a situation in which a University employee owes a professional obligation to the University, which is or can be compromised by the pursuit of outside interests. Conflicts of interest are further defined and discussed in USU Policy 307 Conflicts of Interest.

An Institutional Conflict of Interest (ICOI) exists whenever the financial or other interests of the University, or of an Institutional Leader acting within his or her authority on behalf of the university, conflict with - or have the potential to conflict with - obligations to University research participants or others.

Unaddressed ICOI can give rise to bias entering into the decision making of the university, which could raise questions regarding the integrity of the research.

Examples of such biases might be:

- Special handling of issues addressed by University departments or oversight committees, such as the Institutional Review Board (IRB).
- Management decisions that:
 - Affect data ownership or sequestration of data.

- Restrict publication or dissemination of research results.
- Restrict intellectual property rights.
- Influence research agendas within the University.

For purposes of the Human Research Protection Program, Institutional Leaders are those senior leaders who are in a position to directly influence salaries, appointments, resource allocation or oversight of human participant research. This will include the president, vice presidents, associate vice presidents, deans, administrative directors, center directors and department heads. Members of the USU Board of Trustees have their own disclosure requirements, and USU shall coordinate with the Board of Trustees to identify any financial interests they may hold that would be considered to create an Institutional Conflict of Interest.

2.11 Confidentiality

Confidentiality is the withholding of certain information as specified under an agreement between USU and another individual or entity (e.g., a collaborating institution) wherein the entities agree to maintain as confidential all private information regarding the research, protocol, investigational process, and information discovered during the investigation. Also, the right of a human participant to have private information protected from disclosure except as allowed under the Privacy Rule (42 CFR 160, 164).

584.3 POLICY

USU investigators must adhere to strict ethical standards when involving human participants in their research. These standards are in place to protect the basic rights of participants. Any research that departs from the spirit of these standards violates University policy. All research performed under the auspices of USU, including collaborative research conducted with one or more public or private entities, in which human participants are involved must be reviewed and approved by the Institutional Review Board (IRB) appointed by the Vice President for Research, or

USU Office of Research and Graduate Studies

by such other review body as shall be designated by the IRB. USU, through its Human Research Protection Program, its IRB and other review processes, works together with investigators, sponsors and research participants to uphold ethical standards and practices in its research.

The IRB review and approval process shall be conducted in accordance with all U.S. federal government and state laws, and all University policies and regulations that govern the use of human participants in research, including the IRB Handbook and the IRB Standard Operating Procedures current at the time of the review. The requirement for IRB review and approval applies to all human research involving USU Investigators or human participants in all locations, whether funded or not, and whether conducted by faculty, students, or other employees. It also applies to persons unaffiliated with the University who wish to investigate participants who are under the protection of the University, such as students and patients. No such study shall begin before it has been approved by the IRB. No other official of the University may approve human research that has not been approved by the IRB. Investigators are encouraged to consult with the IRB Administrator, or the IRB Chair, during preparation of an early draft of proposals to be submitted, at which time concise and current details concerning human research can be obtained.

The IRB web site at www.usu.edu/research/irb is made available to principal investigators, investigators, human participants and others in order to provide ready access to USU's Policies, Standard Operating Procedures, the IRB Handbook, and associated information. Interested parties should make use of the information provided electronically, and whenever appropriate they may contact the IRB Administrator or Chair for additional assistance with the preparation, approval, and execution of protocols involving human participants.

Investigators are referred to the following documents and regulations, hereby made a part of this policy by reference:

1. Ethical Principles and Guidelines for the Protection of Human Subjects of Research

(The Belmont Report).

2. 45 Code of Federal Regulations (CFR) 46 "Protection of Human Subjects," (The "Common Rule").
3. 45 CFR 160 and 164A,E "Standards for Privacy of Individually Identifiable Health Information," ("The Privacy Rule").
4. 42 CFR 50, Subpart F, "Responsibility of Applicants for Promoting Objectivity in Research for which PHS Funding is Sought."
5. Department of Health and Human Services guide document: "Financial Relationships and Interests in Research Involving Human Subjects: Guidance for Human Subjects Protection."

If an investigator is unsure of the interpretation of the federal and state statutes and guidelines as listed, or has other questions regarding the applicability or effect of federal, state, or local laws or regulations, he/she shall contact University Counsel for advice and direction.

The USU IRB is authorized to approve research protocols involving human participants through the Federal-Wide Assurance # 00003308, dated September 6, 2002. This assurance is on file with the Office of Human Research Protections, U.S. Department of Health and Human Services. USU delegates to the IRB the responsibility for reviewing research protocols primarily for the purpose of ensuring that human research is carried out in accordance with ethical principles, as outlined in the Belmont Report, and for protecting the welfare and rights of human participants. The IRB shall act independently in this capacity, but shall coordinate its review with other USU review bodies – including the Sponsored Programs Office, the Conflicts of Interest Committee, the RGS Division of Research Integrity and Compliance, and the Office of the Vice President for Research – whose responsibilities under USU policy include review of the scientific and scholarly validity of the proposed research study, and its freedom from bias introduced because of unmanaged conflicts of interest. The IRB is authorized to:

1. Approve, require modification to secure approval, or disapprove all human research activities overseen or conducted at USU;

2. Suspend or terminate approval of human research not being conducted in accordance with the IRB's requirements or that has been associated with unexpected serious harm to participants;
3. Observe, or have a third party observe, the consent process;
4. Observe, or have a third party observe, the conduct of the research.
5. Authorize a separate IRB or other review body that has a current Federal-Wide Assurance to provide oversight of a multi-site or specialized study under an authorization agreement, as allowed by federal statute.

584.4 PROCEDURES

4.1 Principles

Principles that IRB members consider during their reviews are set forth in the IRB Review Checklist document (available at: <http://rgs.usu.edu/irb/resources/forms-for-reference-only>) current at the time of application. These principles include:

1. Minimizing the risks to participants.
2. Balancing of risks with the potential benefits from the study.
3. Obtaining informed consent from the participant or permission from a legal guardian before participation. Such consent or permission must be in writing unless waived by the IRB.
4. Providing adequate detail about the study in language that is understood by the participant so the participant can make an informed decision.
5. Maintaining participants' privacy and confidentiality.
6. Informing participants that their participation is voluntary and that they are free to withdraw from the study at any time without consequence.

4.2 Protocols

Protocols submitted to the IRB are categorized as follows:

- (1) Exempt from further review

Determination of exempt status shall be made in accordance with the standard operating procedures of the IRB, and shall in no case be made by an individual who might have a conflict of interest concerning the study. All research adjudged to be exempt shall nonetheless be subject to monitoring and continued review by the institution through the IRB so that the health, well-being and privacy of human participants involved in such research are adequately protected. Such review shall require an annual update confirming that the then-current activities qualify for exemption, outlining any changes made in the protocol or indicating that the project has been completed and/or terminated.

Certain human research may be exempt from review under certain circumstances, in accordance with 45 CFR 46.101(b), subsections a-f. These may include the following: certain educational settings; certain tests, surveys, certain interviews and public behavior observations; certain existing data, documents, records, and specimens; certain public benefit or service programs and certain food taste/acceptance studies.

These exemptions must be arrived at by analyzing the decision charts referred to at HHS.gov under Policies and noted as "Checklists & Decision Trees" located currently at <http://www.hhs.gov/ohrp/policy/checklists/index.html>.

- (2) Subject to expedited review

If the IRB Administrator finds that a protocol involves no more than minimal risk, expedited review may be conducted by a limited number of experienced board members who possess expertise in the research activity being conducted. Selection of IRB members to conduct expedited reviews shall be by the IRB Chair, and expedited reviews shall be performed in accordance with the standard operating procedures of the USU IRB. This process

USU Office of Research and Graduate Studies

generally requires a period of four to six weeks to complete.

(3) Subject to full review

In cases where more than minimal risk is involved, and where expedited review is deemed by the IRB Administrator to be insufficient or inappropriate, the protocol is subject to review by the full board. Such reviews typically require a period of four to six weeks to complete.

4.3 Protocols submitted to the IRB for review

Protocols submitted to the IRB for review shall be presented by a principal investigator, and shall consist of three components. (Forms and information can be found at <http://www.usu.edu/research/irb>)

(1) IRB Application Form

Completion of this form will allow the IRB Administrator to quickly place the protocol in the appropriate review category (exempt, expedited, or full board review). These forms have been developed to minimize the response time of the IRB. All sections of the application must be completed in order for the IRB to begin its review. Information should be written in lay language, avoiding jargon and acronyms.

(2) Copy of the grant, thesis, or dissertation upon which the project is based

If a project has none of the above documentation, a description of methods and objectives, and a clear, concise description of procedures to be used in the project shall be submitted.

(3) Informed Consent Form

This document must conform to the requirements of the IRB standard operating procedures as reflected in the Informed Consent Checklist (available at: <http://rgs.usu.edu/irb/resources/informed-consent-samples>) and be approved for use in the study by the IRB. It contains the following elements as required under 45 CFR 46.116:

- A statement that the study involves research.

- A statement of the research to be performed and the purpose of the research.
- A description of reasonably foreseeable risks or discomforts.
- A description of reasonably foreseeable benefits to participants and others.
- Appropriate alternatives to the study that may benefit the participant.
- A statement of confidentiality.
- Availability of compensation or treatment for injury.
- Contact information for:
 - Answers to pertinent questions about the research.
 - Answers to pertinent questions about the research participants' rights.
 - Reporting of research related injuries or harms.
 - The research team (if not provided above) for questions, concerns, or complaints.
 - Someone independent of the research team for problems, concerns, questions, information or input.
- A statement explaining that participation is voluntary and that there is no penalty or loss of benefit to which the participant was entitled if the participant withdraws or refuses to participate.
- When appropriate:
- The consequences of a participant's decision to withdraw from the research.
- An approximate number of participants involved in the study.
- The informed consent form shall contain adequate information, written in plain language familiar to the participant, so that he/she can make an informed decision regarding participation.

4.4 Protocol Process

IRB applications shall be completed on line in accordance with the IRB standard operating procedures. Incomplete packages will be returned to the investigator without review. The IRB Administrator and staff work with Investigators to verify completeness of submissions and identify concerns or needed clarifications. Reviews are then conducted as described above. If full board review is required, the investigator will provide ample copies of packets for each board member (as directed by the IRB administrator) no later than two weeks before the monthly IRB meeting.

Upon completion of the IRB review, notification of decision regarding the protocol is sent by the IRB Administrator to the investigator. Revisions are sometimes needed, and when the protocol is considered to meet acceptable standards, the research protocol will be approved for one year (beginning on the date the protocol was approved), or such other term (never greater than one year) as shall be determined by the IRB.

For those protocols that require an extension beyond the one-year limitation of the IRB approval, a status report will be mailed to the investigator by the IRB Office one month before the anniversary approval date. The investigator will have ten working days from the date of receipt to submit the Status Report form. A memo shall be attached to the Status Report form stating the investigator's intention to continue the research and document any modification to the experimental protocol. The memo shall contain a concise overview of the research to date (i.e., current copy of the informed consent, number of subjects involved, summary of any recent significant findings, adverse events, etc.). If the protocol is acceptable, an approval letter will be sent to the investigator, extending the project for an additional year. Continuing review may occur more than once a year depending on the level of risk.

The investigator will maintain a current file for each protocol he/she submits and have a copy of all records relating to the research protocol (IRB application form, data derived from the study/case report forms/computer data/adverse events, correspondence with the IRB/sponsor/

funding sources/FDA/others, sponsor's protocol—if applicable, original informed consent and assent forms).

4.5 Retention of Records

Records shall be retained by the PI for all protocols for three years from the date the study is completed, terminated, or discontinued. Federally-funded research may require a longer record retention period.

The IRB shall retain for at least three years after the completion of the research (or for protocols which are cancelled without participant enrollment, for at least a three-year period after cancellation) the following records in accordance with 45 CFR 45 Section 115:

1. Minutes of IRB meetings.
2. Protocols.
3. Scientific evaluations.
4. Department of Health and Human Services-approved sample consent documents and protocols, when they exist.
5. Reports of injuries to participants.
6. Records of continuing review activities including continuing review status reports submitted to the investigator.
7. Other progress reports submitted by investigators.
8. Statements of significant new findings provided to participants.
9. For initial and continuing review of research by expedited procedure;
 - a. The specific permissible category.
 - b. A description of action taken by the reviewer.
 - c. Any findings required under regulations.
10. For exemption determinations, the specific category of exemption.
11. Unless documented in the IRB minutes, determinations required by the regulations and protocol-specific findings supporting those determinations for:
 - a. Waiver or alteration of the consent process.

USU Office of Research and Graduate Studies

- b. Research involving pregnant women, fetuses, and neonates.
 - c. Research involving prisoners.
 - d. Research involving children.
12. For each protocol's initial and continuing review, the frequency for the next continuing review.
 13. Copies of all correspondence between the IRB and investigators.
 14. A list of IRB members to be maintained on a continuous basis.
 15. The standard operating procedures of the IRB to be maintained on a continuous basis.

Investigators will notify the IRB office if they either leave the University before the research is completed, or complete the research and leave the institution before the end of the three-year record retention date. If the investigator desires to take copies of the research records to another institution, additional issues may need to be resolved related to the Health Insurance Portability and Accountability Act (HIPAA; 45 CFR 160).

4.6 IRB Training in the Protection of Human Participants in Research

USU requires Investigators, co-investigators, and any research personnel who interact with participants in research to be trained in the ethical protection of human participants. Certification achieved by completion of prescribed training shall be valid for three years from the date that training was completed.

4.7 Conflicts of Interest

The IRB Application Form shall include questions designed to identify any potential individual conflicts of interest that may arise in connection with the study. Positive disclosures of individual conflicting interests shall be referred by the IRB Administrator to USU's Federal Compliance Manager so that the conflict of interest can be fully disclosed and managed or eliminated, as required under federal guidelines and in accordance with USU Policy 307 "Conflicts of Interest." No research for which a conflict of interest has been disclosed shall be conducted under an IRB-approved protocol

until a Conflict of Interest Management Plan has been approved for the work by the USU Conflict of Interest Committee. In addition, members of the IRB shall be queried at the beginning of each IRB review meeting concerning potential conflicts of interest they may have in connection with protocols to be reviewed. Members of the IRB who disclose such conflicts may provide information to the Board as requested, but shall recuse themselves from voting for approval or disapproval of the protocol in question.

Outside interests of USU or its Institutional Leaders that are related to USU research, and that could give rise to Institutional Conflicts of Interest (ICOI) shall be identified through two mechanisms which shall trigger initiation of an ICOI assessment procedure conducted under RGS Procedure 532:

1. A screening process conducted by the Sponsored Programs Division. All sponsored projects for which there is an external, non-governmental sponsor shall trigger an ICOI assessment.
2. A screening process conducted directly by the IRB. All projects in which a product or service is to be used, but which are not directly sponsored by the outside entity providing the product or service (and therefore not subject to Sponsored Programs review) shall trigger initiation of an ICOI assessment.

The ICOI assessment identifies matches between outside interests identified through the above screening processes with financial interests held by USU or its Institutional Leaders. Each match identified under these assessments shall be provided by the Federal Compliance Manager to the Institutional Conflict of Interest Committee along with any proposed management plan and/or review of existing internal controls that would provide adequate management of the ICOI. After its review and action the ICOI Committee shall forward to the IRB any approved plan or recommendation. Copies of this document shall also be provided to the department head and dean of the affected unit(s). The IRB shall have final authority to accept and have the management plan

implemented, to alter the management plan, or to deny the management plan and reject the study.

The Conflict of Interest Committee, appointed by the University President to oversee the implementation of Policy # 307 "Conflicts of Interest", shall, with the addition of a member deemed independent by the President, be constituted as the Institutional Conflict of Interest Committee, and shall have oversight of the implementation of the ICOI procedures contained herein.

The Conflict of Interest Committee will consist of:

1. the Provost or an authorized designee of the Provost (Committee Chair);
2. a representative from the Office of the Vice President for Research;
3. a representative of the Institutional Review Board;
4. a representative of the Faculty Senate;
5. a representative of the Intellectual Property Services Office; and
6. a member external, unaffiliated to the University.

Others may be added as the President deems appropriate. The Federal Compliance Manager and general counsel serve as ex officio members of the Committee.

The Institutional Conflict of Interest Committee shall meet as required to review all disclosed Institutional Conflicts of Interest related to Human Subjects Research; shall review for approval all Institutional Conflict of Interest management plans; shall recommend elimination of conflicts as it deems necessary; and shall monitor all active management plans.

4.8 Researcher Noncompliance: Allegations, Investigations, and Disposition

The purpose of this section of the policy is to ensure, consistent with Utah State University's Federal Wide Assurance, that human subjects research is conducted in accordance with applicable regulations, USU Policies governing human subjects

research, IRB Standard Operating Procedures (SOPs), and determinations of the USU IRB.

Non-compliance is any situation, incident, or process during the conduct of human subjects research that is inconsistent with any of the following: applicable local, state, federal laws, regulations or policies; USU Policies; IRB SOPs; approved IRB protocols; or any directive from the USU IRB. Non-compliance may be minor and/or infrequent, or serious and/or continuing. USU's IRB works in collaboration with USU's RIC, University Counsel, and other USU units in receiving allegations of, evaluating, and taking corrective action with respect to non-compliance related to human subjects research. Definitions and terms regarding non-compliance, and processes carried out with regard to non-compliance shall be as set forth in the IRB SOPs, Section II.B.10.

Non-compliant activities may be identified through IRB oversight, self-reporting, or reporting from employees, human participants or others. Allegations of non-compliance may be presented to the IRB Chair or Administrator, the Federal Compliance Manager at the RIC office, USU's Internal Audit Services (IAS) either through the hotline or with a representative of IAS, or to University Counsel. Any report of alleged non-compliant behavior involving human subjects research shall be reported to the IRB chair at the earliest opportunity. Utah State University does not tolerate retaliation against individuals who come forward in good faith with allegations of non-compliance. In instances where non-compliance is determined, notifications will be made to the appropriate department head(s) and dean(s).

The IRB Chair shall make the initial determination of whether the substance of the non-compliance allegation would constitute non-compliance involving human subjects research. If so the IRB Chair shall follow the steps set forth in IRB SOPs, Section II.B.10, to initiate an investigation into the alleged non-compliance.

The IRB Chair or the Institutional Official may suspend the research pending investigative outcomes and determinations by the convened IRB if there is cause to believe that the allegations may constitute serious or continuing non-compliance,

USU Office of Research and Graduate Studies

or if the allegations otherwise contain information that would constitute an elevation in the risk to participants.

Investigative findings shall be presented to the IRB at its next convened meeting. The IRB shall review the documentation and evidence as required in the IRB SOPs. If the convened IRB determines that serious or continuing non-compliance has occurred, it shall require a corrective action plan as deemed appropriate for the circumstances. The IRB is authorized to suspend or terminate its approval of human subjects research. Other actions may be required, including but not limited to: more frequent review of approved research presented by the researcher, increased monitoring of the consent process or of the research, informing participants of aspects of the non-compliance that may have increased their risks, or impacted their willingness to participate in the research, or requiring additional training for researchers and research staff involved.

4.9 Unanticipated Problems

Investigators shall follow the procedures contained in the IRB standard operating procedures, Chapter 9.j whenever an unanticipated problem arises having to do with risks to human participants or others. The PI shall have responsibility for identifying and reporting unanticipated risks as set forth in the SOPs, Chapter 4.f, submitting information to the chair of the IRB in sufficient detail for the Chair to draft the report as required in 4.11, below, and otherwise as required by the SOPs. If the unanticipated risk is life-threatening, emergency services shall be summoned and all reasonable steps shall be taken to ensure the safety and well-being of the participants or any others affected.

4.10 Suspensions and Terminations of Previously Approved Research

The IRB is authorized to suspend (defined as temporarily discontinuing) or terminate (defined as permanently discontinuing) research in order

to protect the rights and welfare of research participants and others.

The determination of the appropriate action shall be made by the IRB chair, based on non-compliance with the IRB-approved protocol for the research, or on the association of the research with an unexpected serious harm to participants or others. Determinations shall be ratified by the membership of the IRB, and shall be reported to the USU Office of Compliance Assistance, Research Integrity Officer, University Counsel, and the appropriate funding agency as set forth in 4.11, below.

Suspensions may be lifted if an investigation determines that the harm was not associated with the research, or if compliance with the approved protocol is re-established, and is determined to be sufficient to protect the rights and welfare of human participants.

When a termination or suspension involves the withdrawal of current participants from a study:

1. Enrolled participants will be notified by the IRB.
2. Participants to be withdrawn will be informed by the IRB of any unexpected risks to which they may have been subjected, and shall be provided with support in understanding and ameliorating those risks.
3. Participants to be withdrawn will be informed by the IRB of any follow-up that is required or offered, and will be informed that any adverse event or unanticipated problems involving risks to them or others should be reported to the IRB and others as appropriate.

4.11 Reports of Unanticipated Problems

Reports of unanticipated problems involving risks to participants or others, terminations, suspensions and serious or continuing non-compliance shall be submitted to federal agencies in compliance with applicable regulations. The Institutional Official shall ensure that all required reportings are completed within 15 business days.

The IRB Chair shall have responsibility for coordinating with the principal investigator,

gathering any additional required information and writing the initial report, which shall include:

1. The nature of the event or problem.
2. The findings of USU.
3. The action taken by the IRB and USU.
4. The reasoning underlying the actions taken.
5. Any plans or recommendations for a continuing inquiry or investigation.

The IRB chair shall submit the draft report in a timely manner to the RGS Division of Research Integrity and Compliance and the Research Integrity Officer for review. The Research Integrity Officer shall have responsibility for final approval and signature of the report, and for its submission to the appropriate agency. Copies of the reports shall be distributed to the IRB, Office of Human Research Protections (OHRP) when the research is covered by U.S. Department of Health and Human Services regulations, and other federal agencies when research is overseen by those agencies and such agencies required reporting separate from that to OHRP.

Policy Number 337 Safety and Health

337.1 POLICY

Utah State University is committed to creating a safe environment and a culture of institutional safety, and develops and implements safety and health programs consistent with the best practices for activities and institutions of this type. The University takes safety extremely seriously and will work diligently to provide the necessary safeguards required to assure the safety and health of employees, students, and the public, as well as facilities, equipment, and other property.

These programs strive to continuously reduce worker risk and improve the prevention of illnesses

584.5 CONTINUOUS IMPROVEMENT OF THE HUMAN RESEARCH PROTECTION PROGRAM

The IRB and the RGS Division of Research Integrity and Compliance shall work together to measure and report the performance of the Human Research Protection Program to USU's administration. Annual and unannounced reviews of the IRB's operating and review procedures shall be carried out in order to assess the effectiveness and quality of the processes; and to assure compliance with USU's policies and procedures, and with applicable federal, state and local laws and guidelines.

USU Investigators, other USU employees, human participants and sponsors of research are encouraged to bring forward concerns and suggestions regarding improvement of the program, including the IRB review process.

584.6 RECRUITMENT PROHIBITIONS

The following activities shall not be permitted:

1. Payments to professionals in exchange for referrals of potential participants (finder's fees).
2. Payments designed to accelerate recruitment that are tied to the rate of timing of enrollment (bonus payments).

and injuries in all work environments including but not limited to offices, laboratories, farms and field sites, and driving for work. To accomplish these tasks, all employees (faculty, benefited staff and wage/hourly) are required to fully cooperate with University safety guidelines and to fully follow all procedures relating to safety rules.

Realization of a safe and healthy work environment requires attention and responsibility at every level, including the President, Provost, Chancellor and Vice Chancellors, Deans and Vice Presidents, Department Heads and Directors, lab supervisors, unit supervisors, and all employees. If investigation

USU Office of Research and Graduate Studies

shows that an employee has failed to follow this policy, appropriate action will be taken in accordance with University policies.

337.2 PROVISIONS

2.1 University Programs

The University subscribes to recognized standards for health, safety, and fire protection. Such standards are published by the Environmental Protection Agency, the Occupational Safety and Health Administration, the National Institutes of Health, the American Conference of Governmental Industrial Hygienists, the Nuclear Regulatory Commission, the National Fire Protection Association, the Uniform Building Code, the American National Standards Institute, and other recognized safety standard-making bodies. In accordance with these rules and USU institutional policies, it is the responsibility of employees, supervisors, administrators, and all other persons in authority to provide for safety in the environment and operations under their control.

The University reserves the right to require examinations, testing, and training of employees as mandated by federal and state rules, laws, and regulations for purposes of this and other institutional policies.

2.2 USU Safety Committees.

2.2.1 The USU University Safety Committee.

This committee is named by the President, and consists of the following representatives: 1) the Directors, or their designees, of USU's Environmental Health and Safety Division (EHS); 2) the chairs from the University Safety Committees (USU Biohazards Committee, Institutional Biosafety Committee, Chemical Hygiene Committee, and Radiological Safety Committee), who are appointed by the Vice President for Research; 3) the chair of the Risk Control Committee, who is appointed by the Vice President for Business and Finance; 4) each of the eight academic College Safety Committees; 5) the President of the Classified Employees Association or their designee; 6) the USU Police Chief; 7) a representative chosen by the Regional Campus/Eastern Administrative Council; and 8) other appropriate university units that participate in an ad hoc capacity as necessary. The Vice President

for Business and Finance shall appoint individuals to represent USU's auxiliary services as appropriate.

The University Safety Committee meets at least two times each year and has responsibility to review and approve institutional procedures that relate to radiation, biohazards, chemical safety, recombinant DNA, risk control and occupational safety at the university, and make recommendations for new policy as needed. Additionally, the committee oversees activities of the USU's Biohazards Committee, Chemical Hygiene Committee, Institutional Biosafety Committee, Radiation Safety Committee and the Risk Control Committee.

2.2.2 College/Unit Safety Committees.

These committees are established by deans or campus unit administrators and are comprised of Departmental or Campus Unit Safety Representatives. The dean or unit administrator shall have flexibility to appoint committee members as needed, and student representation is encouraged. The chair serves as a member of USU's University Safety Committee and serves as liaison between the University Safety Committee and his/her campus unit. The committee meets at least once each quarter, and has responsibility to review accident reports and make appropriate recommendations to the dean/unit administrator regarding proposed changes in safety procedures. It also provides regular updates on safety-related issues, including copies of EHS reports, to college dean/unit administrator.

2.2.3 Departmental Safety Representative.

This individual is identified by the department head, and serves on the College Safety Committee. The departmental safety representative acts as a liaison between the College Safety Committee, EHS, and his/her campus unit. He or she has responsibility to: 1) reviews all safety incident reports and makes appropriate recommendations, in conjunction with EHS, to the department head regarding proposed changes in workplace procedures. Copies of these recommendations must be provided to the department head and dean or unit director; 2) work with the department head to ensure, within reason, that identified deficiencies and recommended corrective actions are addressed; and 3) provide regular updates on safety-related issues to department head and faculty.

2.3 Specific Requirements

Certain departments may have specific job safety requirements, for example health providers must have certain inoculations, and food service workers must have a food handler's permit. These requirements are included in job descriptions.

The Environmental Health and Safety Division (EHS) has the authority and responsibility to promote compliance with all University, state, and federal health and safety regulations by interpreting standards and promulgating procedures and policies to assure University compliance. EHS employees are responsible for monitoring compliance, evaluating potential health hazards, and investigating accidents and injuries.

EHS employees partner with administrators, faculty, and researchers to support a strong, positive safety culture. They offer collaboration and support in meeting the responsibilities of this policy.

USU Risk Management is responsible for filing and managing all Workers Compensation claims and assisting employees in returning to work after an injury. Risk Management offers collaboration and support to all employees in implementing USU's Return to Work program.

2.3.1 In the event of a condition immediately dangerous to life or health, or otherwise determined to present an unacceptable safety risk, EHS has authority to immediately mitigate the unsafe condition. EHS must notify the University Safety Committee any time such action is taken.

2.3.2 In a more enduring safety concern, EHS will engage university leadership to review and ameliorate the unsafe condition.

2.3.3 If faculty or administrators believe actions taken by EHS to ameliorate safety are unwarranted, they may appeal to the Vice President for Research.

2.4 Hazardous Areas

All employees working in areas exposing them to substances or conditions that could be hazardous to health, as determined by state and federal laws, are required to participate in the University's health monitoring and health surveillance program. Any questions regarding substances or conditions that are questionable should be addressed to EHS.

Any questions or concerns regarding employees traveling to hazardous areas in the states or world should be addressed to the University's Risk Management office.

2.5 Workplace Violence

Refer to Policy #342, Violence in the Workplace.

337.3 RESPONSIBILITY

Realization of a safe workplace and a culture of safety requires attention and responsibility at every level of the organization. Core responsibilities include, but are not limited to:

University President

- Establishes a safety policy (USU policy 337) that supports the administration's commitment to faculty, staff, and student safety.
- Assigns responsibility for implementation and oversight of the safety policy and the institution's safety program to the Vice President for Research and other senior administrators as indicated by the safety policy.
- Provides resources and financial support for the institution's safety program, according to the recommendations of the Vice President for Research and other senior administrators who are responsible for oversight of the program.
- Communicates to the entire institution the importance of safety and expectations to establish and maintain a strong safety program that continually improves and protects all faculty, staff, students, and guests.
- Ensures, within reason, that rapid and effective response is taken to remediate any serious safety issues/incidents on the campus.
- Supports Return to Work programs throughout the University.

Provost, Vice Presidents, Chancellor, or Vice Chancellors

- Allocates necessary resources, as deemed appropriate, for implementation of the

USU Office of Research and Graduate Studies

institution's safety policy, programs, and committees (e.g., University Safety Committee and related sub-committees for Biohazards, Chemical Hygiene, Radiation Safety, Recombinant DNA, Risk Control, and Dual Use Research).

- Communicates responsibilities to deans and other administrators for safety programs within their areas of oversight.
- Supports safety training within the institution.
- Ensures, within reason, that effective systems are established to identify and address institutional safety concerns.
- Ensures, within reason, that the President is notified if there are serious safety issues/incidents on the campus.
- Supports Return to Work programs throughout the University

Deans and other Campus Unit

Administrators, i.e. Executive Directors

- Works with department heads/directors and faculty, supervisors or foreman to identify and allocates resources as deemed appropriate and needed for implementation and maintenance of safety programs for each department or unit within their area of responsibility.
- Communicates to department heads the responsibility for incorporation of risk management and safety into the curriculum for each department or unit with their area of responsibility as appropriate.
- Deans establish a College Safety Committee comprised of Departmental Safety Representatives.
- Supports safety training for managers and supervisors within their unit that emphasizes health and safety leadership responsibilities.
- Deans review reports from the College Safety Committee, Environmental Health and Safety Office (EHS), department heads or other unit directors about the status of safety programs in each department or unit within their area of responsibility.
- Identified deficiencies and recommended corrective actions are addressed.
- Ensures, within reason, that the Provost, Vice President, Chancellor, or Vice Chancellor is notified if there are serious safety issues/incidents within their area of responsibility.
- Supports Return to Work programs within their units.
- Where the setting is a Regional Campus/Eastern, the academic dean, vice chancellor, and executive director/dean have a shared responsibility to ensure the elements in this section.

Department Head/Directors

- Works with dean/unit director and faculty, supervisors or foreman to identify and allocates resources as deemed appropriate and needed for implementation and maintenance of departmental safety programs.
- Ensures, within reason, that faculty and staff members understand and implement responsibilities as listed and assumes responsibility for work and laboratory space, including field sites, and safe operations.
- Identifies a Departmental Safety Representative.
- When applicable, establishes curricular goals for safety education of students.
- Ensures, within reason, that the development and implementation of safety practices, safety protocols, and safety rules for undergraduate and graduate teaching laboratories and work space, including field sites, as well as affiliated shops, storerooms, stockrooms, and corridors within their purview.
- Reviews EHS-documented safety training for faculty and staff to ensure, within reason, that it is complete and up to date.
- Ensures, within reason, that all safety practices, protocols, and safety rules are

fully and regularly discussed by faculty and staff.

- Includes discussion of safety training and goals in regular annual reviews of faculty and staff.
- Works with EHS to respond to regular inspections of both teaching and research laboratories.
 - After receipt of the laboratory/work space inspection report meets with faculty members to discuss cited violations and to ensure, within reason, that timely actions to protect personnel and facilities and that the department remains in compliance with all applicable federal, state, university, local, and departmental codes and regulations.
- Ensures, within reason, that the health and safety of departmental personnel, authorized visitors (including student volunteers, visiting scholars, vendors, and contractors), and students any time there is a change in use of departmental space.
- Develops and maintains a list of Return to Work options within their department or unit with the assistance of faculty members, principal investigators, and supervisors as appropriate.

Faculty Member/Principal Investigator

- Works with dean and department head to identify and allocate resources as deemed appropriate and needed for implementation and maintenance of laboratory or field safety needs.
- Ensures, within reason, that supervisors and lab personnel understand and implement responsibilities as listed and assumes responsibility for workplace and/or laboratory space, including field sites, and safe operations.
- Participates in appropriate safety training.
- Implements the curricular goals for safety education of students.

- Ensures, within reason, that principle-based safety education and specific safety training relating to their areas of research is provided to students, lab personnel, and staff within their workplace and/or laboratories.
- Regularly reviews EHS-documented safety training of workplace and/or laboratory members to confirm it is complete and up to date.
- Safety is regularly discussed during research group meetings.
- Develops a Chemical Hygiene Plan that is specific to the activities occurring in the laboratory or work area.
- Serves as safety advisor and mentor for students, staff, and laboratory personnel who work and study under their supervision, and encourages group discussion of “near misses”.
- Sets clear expectations that laboratory personnel, students, and staff under his or her direction must understand and follow safety practices and protocols.
 - Sets an example by following all pertinent safety rules when working in the laboratory or work area.
 - Always wears personal protective equipment (PPE) that is compatible to the degree of hazard.
- Promotes good housekeeping practices in the laboratory or work area.
- Safety needs will vary according to the activities, materials and equipment present in the work area. The faculty member/PI develops specific standard operating procedures (SOPs) for activities, materials and equipment that present particular hazards, and incorporates the SOPs into the chemical hygiene plan or other safety plan for the program

USU Office of Research and Graduate Studies

- Enforces all health and safety practices, protocols, and rules within his or her laboratory space, including field sites. Institutes disciplinary measures for students, staff, and laboratory personnel who repeatedly violates these rules.
- Ensures, within reason, that the appropriate personal protective equipment is available and used by all personnel in the laboratory.
- Responsible to conduct periodic hazard analysis of all program activities to identify potential risks or areas in need of additional safety measures or training.
- Conducts periodic formal safety, chemical hygiene, and housekeeping inspections, including review of the Chemical Hygiene Plan and SOPs, for laboratories and work areas under their purview.
- Ensures, within reason, that all approved visitors (including student volunteers, visiting scholars, vendors, and contractors) follow the safety rules.
- Ensures, within reason, that all laboratory incidents are rapidly and properly reported. Any incidents of a safety matter including those that involve medical attention, property damage, or have a high probability of becoming a liability claim must be reported immediately to EHS or Risk Management.
- Reports promptly any safety related facility problem or improperly functioning safety equipment that present a safety risk to the Departmental Safety Representative and department head.
- Reports all safety-related incidents to the Departmental Safety Representative.
- Develops and maintains a list of Return to Work options within their areas of responsibility with the assistance of the workplace supervisor.

Laboratory/Workplace Supervisor or Foreman

- Works with their immediate supervisor (faculty member, department head or director) to identify and allocate resources as deemed appropriate and needed for

implementation and maintenance of laboratory or field safety needs.

- Receives appropriate safety training.
- Reads, understands, and follow all safety rules and regulations that apply to their work area.
- Develops safe practices, safety protocols, and safety rules for areas under their purview.
- Sets clear expectations that students, staff, and other personnel under his or her direction must understand and follow safety practices and protocols.
 - Sets an example by following all pertinent safety rules when working in the laboratory or work area.
 - Always wears personal protective equipment (PPE) that is compatible to the degree of hazard.
 - Promotes good housekeeping practices in the laboratory or work area.
- Works with their immediate supervisor to rapidly address unresolved, unsafe practices, hazardous conditions, and safety equipment malfunctions.
- Immediately responds to all safety-related incidents - call 911 in emergency.
- Any incidents of a safety matter including those that involve medical attention, property damage, or have a high probability of becoming a liability claim must be reported immediately to EHS or Risk Management.
- Directly participates in the investigations for all incidents and near-misses.
- Ensures, within reason, that new safety measures are implemented within the lab and/or workplace safety program.
- Works with their immediate supervisor to conduct periodic hazard analysis of lab and/or workplace practices to identify areas in need of additional safety measures or

training.

- Develops and maintains a list of Return to Work options within their area of responsibility. Works directly with injured employees to get them working again within the employee's medical restrictions.

Employees/Laboratory workers (laboratory personnel and staff)

Receive appropriate safety training.

- Read, understands, and follows all safety rules and regulations that apply to the work area.
- Conduct each operation in accordance with the work area specific chemical hygiene procedures and implements new safety measures as appropriate.
 - Develops good personal work area safety habits, including use of PPE as appropriate for each procedure that involves hazards

and promoting good housekeeping practices in the laboratory or work area.

- Report all safety incidents to managing supervisor and faculty member.
 - Immediately reports any job-related illness or injury or property damage to the supervisor and faculty member.
- Report unresolved, unsafe practices or hazardous conditions to the work area supervisor and faculty member.
- Participate in periodic safety inspections of work areas.
- Participates in Return to Work program.

Student safety expectations are outlined in SECTION V-3. University Standards of Student Conduct.

Activities of the Graduate Council

The Graduate Council advises the Vice President and Dean for Research and Graduate Studies, providing a forum for considering major graduate program and student issues, as well as approving changes in programs.

Catalog changes to reflect policy

Five changes were made to the catalog to better reflect university policy:

1. Thesis/Dissertation submission

Review of these documents within the Graduate School is now being done electronically. As of June 1, 2016, submission of theses and dissertations to the Merrill-Cazier Library is also electronic, with a bound copy of the document being required only if the document is embargoed.

2. Inclusion of undergraduate coursework on a graduate Program of Study

Consistent with an underlying philosophy that a student's supervisory committee should be best

able to identify coursework required to support the student's graduate program, a student's supervisory committee may now include undergraduate coursework on a graduate program of study. Rather than specifying a maximum number of credits that may be included at the 5000 level or below, the catalog now states that a Master's degree must include at least 15 semester credits at the level of 6000 or above, a doctoral degree must include at least 30 credits at the 6000 level or above if the student does not have a Master's degree, and at least 15 credits at the 6000 level or above if the student has a Master's degree.

3. Authorship of papers included in a thesis or dissertation

Students may include multi-author papers in a thesis or dissertation if the student's supervisory committee determines that the student made a substantial intellectual contribution to the work. Order of authorship on a paper does not determine if a paper may be included in a thesis or dissertation.

USU Office of Research and Graduate Studies

4. Full time status

Graduate students who have completed all coursework on an approved Program of Study will now be considered full time if registered for at least 3 credits.

5. Portfolio Option

The Masters of Accounting program was approved to accept a portfolio in place of a graduate admission test score.

Graduate Council FY 2016 Roster

Member	Representing	End of Term

Chapter 3:

By the numbers

USU Office of Research and Graduate Studies

Utah State University is Utah's land-grant and space grant institution. Its Carnegie classification is RU/H, a research university with high research activity. USU consists of the Logan Campus, a regional college (USU-Eastern) and three regional campuses (Brigham City, Tooele, Uintah Basin).

USU has eight academic colleges: Caine College of the Arts, College of Agriculture and Applied Sciences, Jon M. Huntsman School of Business, Emma Eccles Jones College of Education and Human Services, College of Engineering, College of Humanities and Social Sciences, S.J. and Jessie E. Quinney College of Natural Resources, and the College of Science. USU also has a highly productive Extension.

USU ranks second in the nation in aerospace and aeronautical research funding and third in the nation in external funding for a college of education. USU also consistently is ranked highly as a high value university for graduate students and undergraduates.

FY16 (over)/under allocated	\$111.0	1.25	\$(324.6)	-3.5%

Chapter 4:
RGS division reports

Environmental Health and Safety

Biosafety, Industrial Hygiene, Occupational Safety

Select agent program renewal

USU underwent a select agent program compliance inspection. The inspection was conducted by two USDA inspectors. The program review lasted four days and included select agent facilities, review of all select agent documentation and interviews with select agent personnel. The inspection was closed out with full compliance status after a few questions were addressed.

Successful LARC and USTAR select agent lab shutdowns

The USTAR building was shut down in November 2015 and the LARC was shut down in May 2016. The shutdown included conducting refresher training for all select agent personnel, plan specific exercises, certification of all equipment and HEPA filters, and maintenance of all building mechanical, plumbing and electrical systems.

Each lab was re-certified by World BioHazTec. This certification included HVAC system failure testing which is required by the select agent program.

During the LARC shutdown the security system was upgraded to new thumb readers on the shower room doors and anteroom door. Two independent number pad locks were replaced by two prox-card readers that communicate through the USU i-net system.

Biosafety level 2 & 3 oversight

EHS conducted inspections of BSL-2 & 3 labs and provided BSL-2 & 3B Blood Borne Pathogens training for approximately 225 faculty, staff and students.

USU Eastern environmental health and safety program

Frequent trips were made to the USU Eastern Campus to provide safety training, establish OSHA safety programs and address safety concerns. Safety training was conducted on Blood Borne Pathogens, Hazard Communication, Lock Out/

Tag Out, Fork Lift Operations, Aerial (Scissor) Lift Operations, Confined Space Entry, Respiratory Protection and Ergonomics. There have been approximately 150 people trained these areas.

Oversight has been provided to establish a LO/TO Program, Confined Space Program, Hazard Communication Program, Aerial Lift Operator Program and Fork Lift Operator Program.

Several Safety Concerns were raised by a few USU Eastern Employees. These concerns were investigated and addressed with the individuals and the appropriate USU Eastern administration.

Asbestos, hazardous material projects

Building renovations and demolitions require identification and removal of hazardous materials.

EHS has been involved in over 50 hazardous material projects of varying sizes in last 12 months. These projects have been on the Logan Campus, USU Eastern Campus and Tooele Campus. This averages approximately one project every week. These projects include identifying the material and the location of the material; scheduling and conducting a bid walk with contractors for the project; and overseeing the removal (abatement) of the hazardous material.

Ongoing occupational safety oversight for facilities, Housing, Food Services, Regional Campuses

There was continued oversight and training for OSHA required occupational safety programs. Training was conducted in forklift operation, LOTO, Confined Space, Electrical Safety.

Additional EHS officers

Two additional Environmental Health and Safety Officers will be hired. One will be located at the Logan Campus and a second located at USU Eastern Campus.

Radiation safety

Continued application of radioactive waste volume reduction resulted in reducing the amount

of waste to ship off-site for disposal by 128 pounds.

Environmental management

Hazardous Waste

1,566 containers totaling 77,894 pounds received, half the waste received last year.

Administration

EHS continued to complete general administrative duties including a yearly supply assessment and purchasing, attendance at the College and University Hazardous Waste Conference, improving On-Site Systems to improve waste pick up, developed a plan to deal with Nitric acid release in EL203 and a waste management plan specific for the UWRL. EHS completed and submitted the Biennial Report for Disposal of Hazardous Waste including summation of all waste generated by USU. Notably, USU had a successful Air Quality Inspection by Utah DAQ.

Shipping dangerous goods

- Dangerous goods shipments to New Jersey for the Anti-Viral Group
- Developed a plan for a 500-gallon waste water sample transported from Mississippi to USU for remediation studies
- Working with the University of Utah to develop a Program for controlling the shipping of Dangerous Goods across campus

Emergency response/clean ups

- Accidental explosive neutralization of Nitric Acid/KOH in EL203
- Diesel fuel spill at the Fine Arts Building
- Repairs to the silver recovery units in the Fine arts
- "Unknown" spill at Veterinary Science

Phase I site assessments

- Blanding Campus Building Trades Lots
- Caine Dairy
- Blanding Heavy Equipment
- New Science Building in Tooele for Hazardous Waste Management

GIS/IT/Emergency Management

- Created 241 specialty maps
- Created 26 evacuation plans
- Created 16 assembly point maps
- Created 127 computer fixes
- Created 30 asbestos abatement drawings
- Went "live" with the new Emergency Response Information submittal website
- Assisted/trained the Facilities Department in creating a GIS project/database for "Building Insurance Policies" for all USU buildings in the State of Utah
- Attended 2 EOC training classes

Chemical hygiene training

EHS personnel provided safety training for 1,080 people in 25 safety training course offerings, as well as were involved in responding to numerous indoor air quality (IAQ) concerns throughout the campus community. Most issues were identified and dealt with at the time of the call. A few of the issues were not immediately obvious and more intensive investigation was conducted.

APLU National Laboratory Safety Task Force

Mark McLellan, vice president and dean of graduate studies, sat as the co-chair of the APLU National Laboratory Safety Task Force on which Steve Bilbao participated. Over the course of more than a year the task force developed "A guide to implement a safety culture in our universities." The document included 20 recommendations for a safety culture drawn from expertise from many resources, along with tools and resources for implementation. As a result, Mark was awarded CSHEMA's top safety award for administration, the "Administrator Who Cares" award.

USU safety and health policy #337

EHS worked with Mark McLellan, Jeff Broadbent, and other campus leaders and faculty to revise USU Policy #337. This was approved by the Board of Trustees in May 2016. Primary changes included specific responsibilities for all levels of the campus community from the President to laboratory worker. Reorganized university committee structure to improve communication channels for safety related concerns.

Institutional Review Board

Landmark year for protocols reviewed

The 2015-2016 academic year was a landmark year for the Institutional Review Board. More research applications (protocols) were submitted and reviewed than any year in the IRB's history – 1,181 total reviews took place. Along with the increase in protocols came an increase in the complexity of USU's human subjects research portfolio, with more than 30 protocols filed for research to be conducted in international locations.

IRB receives grant to translate informed consent documents

Both abroad and at home, USU researchers are working with an increasingly diverse participant population. Not surprisingly, this has resulted in a growing need for high-quality translations of informed consent documents. In April 2016, the IRB Director was awarded an internal grant to assist researchers in defraying the cost of obtaining certified translations. Awarded by the Utah State University Diversity Council, the terms of the grant allow for the translation of up to two pages of consent documents if 1) the document will receive a relatively wide distribution; 2) the population also receives an advertisement or information about a service or organization that is relevant to the population of study; and 3) the study is not otherwise funded or supported. This initiative aligns with the strong social justice values that the Utah State University IRB incorporates in each of its protocol reviews.

The USU IRB hopes that in addition to learning something of value about the population of study, researchers can work to provide support and information that is relevant to the day-to-day lives of the individuals giving their time to the research project. For example, a study seeking Hispanic and Latino teenagers as participants might provide information about college scholarships directed toward Latino youth along with a translated consent form, so that parents receiving the form will also learn about a potential opportunity for their children.

Maintaining AAHRP accreditation

In March of 2016, the IRB worked with the Office of Compliance Assistance to finalize the AAHRPP accreditation narrative for the second reaccreditation of USU's Human Research Protection Program. Accreditation by the Association for the Accreditation of Human Research Protection Programs (AAHRPP) is an assurance to the research community, participants included, that USU units diligently work to maximize protections to human participants in research. Among the initiatives highlighted in the reaccreditation narrative are USU's new Institutional Conflict of Interest policy, the increase in staffing levels to the IRB, and changed Standard Operating Procedures to better effectuate human subjects research protections.

IRB now fully staffed

The IRB received feedback from researchers during the last academic year that one of the biggest hurdles faced by researchers included long review times. The USU IRB finally achieved full staffing in November 2015, with the addition of Johanna Phelps-Hillen as IRB Coordinator. Phelps-Hillen is a Ph.D. candidate at the University of South Florida whose technical communication coursework focuses on public policy; specifically, how IRBs effectuate the human subjects research protections laid out in federal regulations. Her addition to the IRB office has contributed expertise in qualitative research, in-depth knowledge of regulatory policy, and increased efficiency in protocol review. With full and expert staffing, the IRB has been able to decrease exempt and expedite protocol review timeframes by ten days from the previous reporting year.

Looking ahead

During the upcoming academic year, IRB staff look forward to wrapping up development of a new online protocol management system with Kuali to replace the current Protis system. The USU IRB also expects to significantly revise its policies and procedures in alignment with release of a Final Rule for the Protection of Human Subjects in

Research by the Department of Health and Human Services and fifteen other federal departments and agencies. The Rule, expected to be released this fall, contains substantial changes to the regulatory

framework governing human subjects protections and is intended to decrease administrative burden while strengthening protections for research participants.

Laboratory Animal Research Center and Institutional Animal Care and Use Committee

Transition in rates for animal care

Following final approval from the Office of Naval Research, the LARC has completed a transition in the method of charging per diem rates for animal care. Consistent with the majority of academic research institutions, the LARC now charges animal care fees on a per cage rather than per animal basis for most species. The transition was successful and smooth due to the support and cooperation from the LARC staff, Administrative Staff within the Office of Research and Graduate Studies, and from the University researchers.

Funding for additional equipment

The LARC Director has received a Facilities Improvement Grant from the National Institutes of Health to purchase and install an additional autoclave in the 650 Bioinnovations building to support the infectious disease research facilities housed there. This autoclave will be in addition to existing decontamination equipment and will expand the capabilities of the facility to ensure ongoing safe operation of vital infectious disease research activities at USU.

Maintaining accreditation

The IACUC and LARC at USU continue in their dedication to high quality animal care and welfare. In March 2016, the LARC at USU participated in a triennial site visit with representatives from the

Association for the Assessment and Accreditation for Laboratory Animal Care International (AAALAC). The site visit is a vital component of maintaining accreditation of the animal care program with AAALAC. The site visitors identified areas in which they believed USU could improve its program. The LARC is currently acting on those recommendations and remains committed to maintaining AAALAC accreditation and excellence in laboratory animal care.

LARC director receives national recognition

In 2015 Dr. Aaron Olsen, the LARC Director, was appointed as the chair of the Animal Handling and Welfare Review Panel with the United States Department of Agriculture Agricultural Research Services (USDA-ARS). The panel was established in response to a news article alleging abuse and misuse of animals at a USDA-ARS research facility. The review panel visited multiple USDA-ARS research sites and provided feedback and recommendations to the USDA on animal use and welfare oversight practices at its research facilities. The panel submitted a final report to the USDA in July 2015. Subsequent to the panel's efforts it has been selected to receive the Abraham Lincoln Honor Award from the USDA. This award will be formally presented to the panel members by the Secretary of Agriculture in a ceremony in Washington D. C. in September 2016.

Research Development

New Research Development staff

In FY16, Research Development (RD) partnered with Extension to hire a proposal development specialist. This individual began working with Extension faculty and staff in December 2015.

Additionally, a proposal development specialist was hired into the College of Science. This individual will begin working with Science faculty in July 2016.

The RD Division now consists of a director, a part-time program assistant, and 5 proposal development specialists (Agriculture, Education, Engineering, Extension, Science).

Grantsmanship Training Program

Faculty

The grant writing seminar tailored specifically to faculty and focused on “writing to the review process” was offered once in the FY16:

- 1 seminar—fall semester
- 49 faculty and research staff attended

In addition, a grant writing seminar specifically tailored to the arts and humanities faculty was offered in FY16:

- 1 seminar—fall semester
- 12 faculty attended

Graduate Students

Grant writing seminars tailored specially to the needs of graduate students were offered twice in FY16:

- 1 seminar—fall semester
- 1 seminar—spring semester
- 159 graduate students and/or postdocs attended

All seminars were presented by Grant Writers’ Seminars and Workshops (www.grantcentral.com). Research and Graduate Studies covered all seminar expenses for participants, including material costs, lunch, and breaks.

Proposal Writing Institute

The Proposal Writing Institute completed training its eighth cohort in FY16. Twelve faculty members were selected via a competitive application process to participate in this 4-week, intensive proposal writing training opportunity.

Including this most recent cohort, the Proposal Writing Institute has trained 98 faculty over the years. At the end of FY16, those faculty submitted 109 proposals worth \$62 million that can be tied directly to the projects worked on during the Institute. Of those submitted proposals, Institute faculty have received 21 awards worth \$9 million.

Funding Finder

The Funding Finder database is the primary USU-provided resource for faculty to find funding opportunities. The database includes federal agency and private foundation/organization funding opportunities; limited submission opportunities; internal seed funding opportunities; undergraduate/graduate funding opportunities; faculty prize/recognition opportunities; and funding agency notifications regarding changes to policy/procedures, funding priorities, agency-specific training/educational opportunities, etc.

All faculty are encouraged to sign up for the weekly Funding Finder Newsletter, which can be done by visiting the main page (<https://fundingfinder.usu.edu/>) and clicking the Sign Up button. There are currently 517 newsletter subscribers (450 faculty, 46 staff, 21 graduate students).

RGS seed grant program

The Grant-writing Experience through Mentorship (GEM) program provides funding to enhance the professional development of new investigators through one-on-one research and grant-writing interactions with successful research mentors. The purpose of this program is to build USU’s research capability and increase extramural funding for

scholarly activities by enhancing the proposal development skills of newly hired USU researchers.

The Research Catalyst (RC) program provides funding to help applicants develop new initiatives or directions in their discipline that will lead to new externally funded grants. The purpose of this program is to build USU's research capability and increase external funding for scholarly activities from government agencies and private sources. The Seed Program to Advance Research Collaborations (SPARC) program provides funding to catalyze development of interdisciplinary research teams and projects that involve scholarly research in more than one department, research center, college, or institution. Successful SPARC proposals require mutual effort by researchers from multiple disciplines. They must also provide outcomes that enhance USU faculty success in securing new,

large-scale, interdisciplinary, externally-funded grants.

GEM, RC, and SPARC awardees are required to develop and submit at least one proposal to an external funding agency within three months of project completion. Because proposal submission deadlines vary widely among different agencies, funding for RGS seed grant programs is offered twice yearly, with start dates of January 1 or July 1.

For FY16, the RGS seed grant program received 29 applications and made 18 awards through its biannual competition cycles:

- GEM—3 applicants, 2 awards
- RC—21 applicants, 12 awards
- SPARC—5 applicants, 4 awards

Research Integrity and Compliance

Response to regulations

During FY16 Research Integrity & Compliance (RIC) responded to five regulatory actions.

1. The Office of Management & Budget promulgated Uniform Guidance which combines eight circulars into one document. This has had some impact on USU's systems, and RIC plays a coordinating role among administrative units to make sure internal control systems are responsive to the new guidance. During the coming year, additional elements of the regulations will be implemented, and RIC will continue to monitor USU's progress.
2. The Office of Human Research Protections (OHRP) in the Department of Health and Human Services issued a Notice of Proposed Rule Making that has potentially far reaching impacts on USU's Human Research Protection Program (HRPP). USU, along with many institutions of higher education and academic medical centers, provided comments and participated in forums to alert OHRP of the negative consequences that would follow from many of the regulatory changes being proposed. During the current year, a Final Rule may be issued, and compliance with the new regulations may require significant effort by USU.
3. The Export Control regulations overseen within the Departments of Commerce and State have been under review for the last several years. During FY16, a major effort to harmonize the two sets of regulations came to fruition, and USU has been developing training and internal controls to achieve compliance with the harmonized rule. We have established a partnership with Sponsored Programs to identify and negotiate terms and conditions that are related to export control regulations, and we provide support in meeting requirements under the regulations and monitoring compliance with teams conducting export controlled projects.
4. The Office of Science & Technology Policy (OSTP) promulgated rules during FY15 that required all federal agencies to develop rules regarding the sharing of data that is acquired under federal funding. Those

USU Office of Research and Graduate Studies

agency-specific policies became available during FY16, and USU has been developing policy, procedures and systems to respond to data sharing requirements. RIC has been playing a collaborative role in developing a new Research Data policy, which will likely be adopted in the coming year.

5. Policies related to Information Security and treatment of Protected Health Information related to the Health Insurance Portability and Accountability Act (HIPAA) are also being developed at USU, and RIC is representing RGS in the development of these policies.

Management of compliance systems

In addition to its governance role at the university, RIC also manages several systems that support research compliance activities. The following compliance systems developed and implemented by RIC are now overseen and maintained by the division:

Research Financial and Administrative Training Series (RFAST)

RFAST is an online system used to provide training to all individuals within the university that conduct sponsored research. The training consists of modules that provide baseline training in areas including budgeting, grant preparation, post-award administration and regulatory compliance. The system provides evidence that USU's researchers

have been trained to utilize its internal control systems to apply best practices to its portfolio of grants and contracts.

Responsible Conduct of Research (RCR) Training

RCR training is gaining increasing emphasis among federal funding agencies. USU's RCR training is delivered to students through USU 6900, "Research Integrity," which is a zero-credit course offered every semester that exposes students to key topics in research ethics such as research collaboration, mentor/trainee relationships, and conflicts of interest. In addition to RCR training for students, RIC also coordinates an annual New Faculty Mentoring Workshop to help incoming faculty establish mentoring practices that integrate RCR topics.

Conflicts of Interest (COI)

Responsibility for disclosure and management of conflicts of interest resides with RIC. We maintain a system known as iComply to support faculty members in disclosing financial interests that may represent conflicts of interest, and we assess whether disclosed interest give rise to COIs that require management, reduction or elimination. During FY16, we also developed and prepared to implement a system for identification of potential institutional conflicts of interest (ICOI). These types of conflicts arise when the university or its leadership have financial interests that may also be related to research being conducted at USU. This new system is being implemented during FY17.

Sponsored Programs

New centralized granting processing system

Beginning in Fall 2016, a new centralized granting system, Kualu Research, will be utilized by the campus community. Sponsored Programs implemented Kualu Researcher in October and has been using the module internally. Sponsored Programs staff have been training with Kualu Researcher, developing training materials, and

conducting focus groups in preparation of a campus-wide roll out.

Kualu Researcher offers campus-wide authentication and routing. Using Kualu, researchers will be able to complete proposal applications and all required proposal materials electronically, replacing the need for paper copies of the Proposal Approval Form (SP-01) and budget template.

Proposals and awards

Sponsored Programs staff continued to work with faculty on proposal preparation, proposal review, proposal submission, award set up, award monitoring, and award close out. During FY16, Sponsored Programs processed 1080 award actions for \$98.5 million in award funding and submitted 1157 proposals in FY16 for \$261.7 million.

Expanding Sponsored Programs presence

Sponsored Programs staff represented Utah State University at over 9 regional or national research administration meetings during FY16. Two Sponsored Programs staff received certification from the Research Administrators Certification Council, the highest certification in research administration.

POLICY MANUAL

FACULTY

Number 406

Subject: Program Discontinuance, Financial Exigency and Financial Crisis

Effective Date: July 1, 1997

Revision: July 1, 1999, March 6, 2009, August 21, 2009

Date of Last Revision: July 8, 2011

406.1 INTRODUCTION

This section of the policy manual specifies the procedures for (1) discontinuing a program for academic reasons; (2) suspending enrollment; (3) determining whether at a particular moment the university faces a state of financial exigency; (4) responding to a financial exigency; (5) determining whether the university faces a major financial crisis not definable as financial exigency; (6) responding to a major financial crisis; and (7) terminating or reducing in status of faculty members due to program discontinuance, bona fide financial exigency, or major financial crisis. Reduction in status of tenured faculty members shall only occur for reasons of program discontinuance, financial crisis, or bona fide financial exigency.

406.2 PROGRAM DISCONTINUANCE FOR ACADEMIC REASONS

2.1 Definitions

(1) Program discontinuance.

Program discontinuance for academic reasons under this policy means the cessation of a program, center, institute, school, department, college, campus, or site based upon educational and academic considerations. For the purposes of Policy 406.2, educational and academic considerations do not include cyclical or temporary variations in enrollment and/or budgets, but must reflect long-range judgments that the basic teaching, research, and extension mission of the university will be strengthened by the discontinuance of the program, center, institute, school, department, college, campus, or site. Program discontinuance does not preclude the reallocation of resources to other academic programs with higher priority based on academic and educational reasons.

(2) Academic program.

An academic program is a unit within the university with an identifiable teaching, research, or other academic mission. For purposes of this code, an academic program operates within one or more academic units and includes, but is not limited to, an academic center, institute, school, department, college, campus or site. An academic program is to be determined by existing academic standards, and academic programs are never to be declared with the aim of singling out individual faculty members. An academic program must be designated as such by decision of the Educational Policies Committee and the decision must be ratified by the Faculty Senate, and approved by the president, the Board of Trustees, and the Board of Regents. For a unit to be designated as a “program,” it must fulfill one or more of these criteria: (a) offer or administer a degree, certificate, or some other credential; (b) have an identifiable curriculum or be formally described in current university catalogs or other publications; or (c) be designated a “program” by specific faculty decision and have an identified group of one or more faculty.

2.2 Decision-Making Process

(1) Initiation.

Consideration of the possible discontinuance of an academic program may be initiated at any time by the faculty or a duly appointed faculty committee of that program; the faculty or an appropriate committee of the center, institute, school, department, college, or other academic unit of that program; the Graduate Council; the appropriate department head, academic dean or vice president for extension and agriculture, or, where appropriate, chancellor or regional campus dean; or by the provost or president of the university. If a program discontinuance may result in the termination of faculty, the person or group initiating the consideration of discontinuance shall prepare, and submit to the provost, a memorandum which (a) clearly identifies the program; (b) states explicit criteria by which faculty are identified with the program, (c) states the reasons, with respect to the university’s mission and goals, for recommending discontinuance; (d) assesses the probable consequences for faculty, related programs, and the university in general; and (e) suggests a timetable for accomplishing discontinuance.

(2) Distribution.

The provost shall distribute copies of the memorandum, embodying an initial or an amended proposal for program discontinuance, to (a) the faculty members and faculty committee most directly involved in the academic program proposed for discontinuance; (b) the appropriate department head, academic dean or vice president for extension and agriculture, and, where appropriate, chancellor or regional campus dean; (c) relevant departments and colleges; (d) relevant college committees or councils; (e) the Educational Policies Committee; (f) the Budget and Faculty Welfare Committee; and (g) the relevant student college senators.

(3) Consultation.

The groups above shall forward comments and recommendations to the appropriate academic dean, or to the vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean. He/she shall forward the comments and a recommendation to the provost, and, where appropriate, to the Graduate Council; the Graduate Council may review this material and make a recommendation to the provost. After receiving and considering the recommendations and comments, the provost shall submit the proposal, the comments, and a recommendation to the Educational Policies Committee. The Educational Policies Committee's recommendation shall be subject to review and debate by the Faculty Senate [Policy 402.12.6(1)]. All comments, recommendations, and supporting material shall be available to faculty senators for their perusal.

(4) Final recommendation.

The Faculty Senate's recommendations shall be forwarded to the president for consideration. The president shall submit a final recommendation in writing to the Board of Trustees and the Board of Regents and shall attach the written comments and recommendations of the Faculty Senate.

2.3 Terminations; Reductions in Status

(1) Notice of program discontinuance.

After the Board of Regents has approved a proposal by the university to discontinue a program, the appropriate academic dean or vice president of the program, center, institute, school, department, college, campus, or site shall give written notice of the discontinuance to all persons, including, students in the program, center, institute, school, department, college, campus, or site. A minimum of one full year, beginning July 1, shall pass from the time a final decision is made to close an academic program to the actual program discontinuance.

(2) Definition of termination and reduction in status.

Termination means the ending of employment of a tenured faculty member (or one with a term appointment) for medical incapacity, program discontinuance, financial crisis, or financial exigency [see also Policy 407.2.1(5)]. Reduction in status means a decrease in annual time the faculty member is contracted to the university.

(3) Notice of termination or reduction in status.

In addition to the general notice in Policy 406.2.3(1), the president shall give tenured and tenure-track faculty members in the discontinued program, center, institute, school, department, college, campus, or site formal notice of termination or reduction in status as follows: (a) if the appointee is untenured and in the first year of service, notice shall be given at least three months prior to termination or reduction in status; (b) if the appointee is untenured and in the second year of service, notice shall be given at least six months prior to termination or reduction in status; (c) if the appointee is tenured or is untenured but in the third or subsequent years of service, notice shall be given at least 12 months prior to

termination or reduction in status; (d) the length of notice for faculty with term appointments as defined in Policy 401.4 shall be parallel to that for the untenured faculty described above, with the exception of those term appointees with research or federal research ranks; termination of these faculty is coincident with and contingent upon the termination date of their extramural funding; if their funding extends beyond that of a discontinued program, they may be reassigned to another program and (e) appointees with specialized functions as defined in Policy 401.6 shall be parallel to that for the tenured and tenure-eligible faculty described above.

(4) Relocation.

During a grace period of three years, and with the assistance of the appropriate administrators (e.g., academic deans, department heads or supervisors, vice president for extension and agriculture, and, where applicable, chancellor or regional campus dean) and the consent of the receiving department, every reasonable and good faith effort will be made to enable the affected faculty members who wish to do so to obtain suitable positions for which they are qualified elsewhere in the university. Tenured faculty members terminated through program discontinuance shall, for a period of three years following the date of their final salary payment, receive special consideration among candidates with comparable qualifications for any vacant and funded university position for which they apply and are qualified.

(5) Faculty employment after program reinstatement.

If a terminated program or position is reinstated, tenured faculty members terminated through program discontinuance shall have the right of immediate reinstatement for a period of three years following the final salary payment.

(6) Appeal.

Within 30 calendar days of receiving notice from the president of termination or reduction in status, a faculty member who intends to appeal must notify, in writing, the president and the Academic Freedom and Tenure Committee of the intent to appeal. The formal appeal, with supporting documentation, must be filed with the Academic Freedom and Tenure Committee within 60 calendar days of receipt of notice from the president. A hearing will then be conducted in a timely manner by the Academic Freedom and Tenure Committee, in accordance with procedures established by that committee.

406.3 SUSPENSION OF ENROLLMENT

3.1 Definition

Suspension of enrollment is an action short of discontinuance which if not reversed will lead to discontinuance, and which refers to the suspension of enrollment in a major subject, a minor subject where there is no corresponding major, a certificate program, or program

awarding a credential certifying completion. Suspension of enrollment does not lead to reduction in status or termination of faculty in the program.

3.2 Procedure

(1) Initiation.

A department that plans to suspend enrollment must notify the Educational Policies Committee as soon as the departmental decision has been made and approved by the dean.

(2) Review.

The Educational Policies Committee will review the proposed suspension of enrollment for its effect on other academic programs of the university. The committee will hold hearings at which all constituencies affected, including students, faculty, and representatives from other departments affected by the proposed action, have the opportunity to testify. At the conclusion of its deliberations, the Educational Policies Committee will recommend approval or disapproval of suspension of enrollment to the Faculty Senate. The Faculty Senate shall make a recommendation to the president. This process shall be concluded within 90 days following notification of the Educational Policies Committee. Suspension is granted by the president subject to the legal obligation, if any, of the university to permit students already enrolled in the program to complete their course of study.

(3) Time limitation.

At any time up to three years after suspension has been granted, a suspension of enrollment may be reversed by the department, upon approval of the Educational Policies Committee, the academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean, and the president. If suspension has not been reversed within this three year period, program discontinuance must be initiated.

406.4 FINANCIAL EXIGENCY

4.1 Definitions

(1) Financial exigency.

Financial exigency is an existing or imminent financial crisis which threatens the mission/role of the institution as a whole, which requires programmatic reductions or closings which may entail faculty reductions or dismissals to enable the institution to accomplish its mission/role, and which cannot be alleviated by less drastic means.

(2) Academic program.

See Policy 406.2.1(2).

(3) Serious distortion of an academic program.

A serious distortion of an academic program shall be deemed to occur when the faculty remaining in the program would not be qualified to meet generally accepted program standards (Section 406.4.4(1)).

4.2 Declaration of Financial Exigency

(1) Board of Trustees; Board of Regents.

The president may, in accordance with the procedures below and with the approval of the Board of Trustees and the advice of the Faculty Senate, the Professional Employees Association, and the Classified Employees Association, recommend to the Board of Regents that a state of financial exigency be declared. A financial exigency may also be initiated by the Board of Regents. A financial exigency exists only after it has been declared by the Board of Regents.

(2) Initiation.

When the president of the university identifies a possible financial exigency, he/she shall inform the Budget and Faculty Welfare Committee, the Faculty Senate, the Professional Employees Association, and the Classified Employees Association concerning the causes and possible consequences of the crisis. The president shall also identify the measures considered by the university up to that point for dealing with the crisis, including a possible declaration of financial exigency, possible strategies that may be alternative to program reduction or program elimination, reasons why the university's financial circumstances may necessitate academic program reduction or elimination, and the time frame by which decisions must be made by those entitled to participate in the consultative process.

Time considerations will be critical when the university must judge whether or not a financial exigency exists. To the extent that such a judgment must be made in a brief time frame for a given situation, the time periods for the consultative process provided for in this policy shall be specified by written notice from the president giving those for whom the consultative processes were provided the fullest possible amount of time under the circumstances. In that regard, the president shall use his/her best efforts to secure the fullest period of time possible for consideration of these matters and the responses hereto.

(3) Consultation.

Within the time period established by the President the Faculty Senate shall receive and consider the comments and advice of the Budget and Faculty Welfare Committee, as well as timely presented views of any other faculty, administrative body, or individual faculty members, and shall make a recommendation to the president concerning financial exigency.

Within the time period established by the president and before making a recommendation to the Board of Regents, the president shall receive and consider the comments and advice presented on the matter by the Budget and Faculty Welfare Committee, the Faculty Senate, the Professional Employees Association, and the Classified Employees Association.

(4) Recommendation.

The president shall submit his/her final recommendation on the declaration of financial exigency in writing to the Board of Trustees prior to submitting it to the Board of Regents. He/she shall attach the written comments and recommendations of the Faculty Senate, the Professional Employees Association, and the Classified Employees Association. The president shall also send a copy of his/her final recommendations to the Faculty Senate, the Professional Employees Association, and the Classified Employees Association.

4.3 Program Elimination or Reduction Because of Financial Exigency

(1) Iterative process.

After declaration of financial exigency by the Board of Regents, an iterative process of university program elimination or reduction may begin. The intent of this process is to ensure the continuing integrity of academic programs and the overall mission of the university. The first step in this process shall be for every administrative, academic, nonacademic, and structural component of the university to assess its programs with regard to legal mandate, essentiality to the mission/role of the university, and quality. During subsequent steps, support services shall be reduced to the extent feasible while preventing significant impairment of the university's ability to fulfill its mission/role.

(2) Administrative and support services.

The president will ask the provost and the appropriate vice presidents to develop reduction and/or elimination plans in the areas of university-wide support services and non-academic programs. Such plans will be reviewed by the president's executive committee, the Council of Deans, the Budget and Faculty Welfare Committee, and the relevant committees of the Professional Employees Association and the Classified Employees Association, and will be integrated with academic elimination or reduction plans (see Section 406.4.3 (3)) in light of the overall academic mission of the university.

If a non-academic program has been reduced or eliminated, university-wide support services must be re-evaluated and reduced as appropriate. These reductions shall precede further reductions in or elimination of academic programs.

(3) Academic program elimination or reduction.

The president, after consultation with the Executive Committee, the Council of Deans, and the Budget and Faculty Welfare Committee, shall direct the provost to develop plans for

academic program elimination or reduction. These plans shall include a timetable for their implementation.

The development of academic program elimination or reduction plans must involve consultation among departmental and college faculties to identify areas under consideration for academic program eliminations or reductions. The following criteria and information sources shall be considered by those making judgments about which programs should be eliminated or reduced because of financial exigency: (a) legal mandate; (b) the general academic quality of the program with regard to scholarship, teaching, and service; (c) the extent of importance that the program has for the mission of the university; (d) the mission and goals of the university; (e) Graduate Council review; (f) findings by national accreditation bodies; (g) reports by appropriate national ranking sources; (h) such other systematically derived information, based on long-term considerations of program quality, as may be available; (i) the capacity of the program to generate external funding; (j) faculty/student ratios; (k) cost effectiveness when compared to similar programs at other universities; and (l) relationship to the Board of Regents Master Plan for Higher Education in the State of Utah. The above list is not ranked and is not inclusive.

If an academic program is eliminated or reduced, those support services and administrative oversight associated with it shall be re-evaluated and reduced if appropriate. Any reductions in support services shall precede further reduction or elimination of academic programs.

(4) Review.

If a plan calls for the elimination or reduction of a specific program, center, institute, school, department, college, campus, or site, that element of the plan shall be reviewed by the Budget and Faculty Welfare Committee; the Educational Policies Committee; the Graduate Council, where appropriate; the faculty members and/or faculty committee most directly involved in the program; the appropriate department head or supervisor, academic dean, vice president for extension and agriculture, and, where applicable, chancellor and regional campus dean; relevant college committees or councils; relevant committees of the Professional Employees Association and the Classified Employees Association; and relevant student advisory committees. The views of these bodies shall be forwarded to the Faculty Senate for its consideration within the time periods prescribed by the president. The conclusions of the above bodies and the Faculty Senate shall be forwarded to the provost who shall consider them and forward them, along with his/her own recommendation, to the president. When the president's recommendations are submitted to the Board of Trustees and the Board of Regents, they shall be accompanied by the Faculty Senate's recommendations. After the Board of Trustees and the Board of Regents has approved the plan by the university to eliminate a program, the appropriate academic or regional campus dean, vice president, or chancellor of the program, center, institute, school, department, college, campus, or site shall give written notice of the elimination to all persons, including students, in the program, center, institute, school, department, college, campus, or site.

(5) Timetable.

Once financial exigency has been declared, the president shall submit to the Faculty Senate a timetable for relieving the state of exigency. Further, he/she shall report progress in this endeavor to the Faculty Senate on a quarterly basis.

4.4 Terminations; Reductions in Status

(1) Plan for faculty reduction.

As the process described in Policy 406.4.3 is taking place, the academic dean of each college, in consultation, where appropriate, with the chancellor and regional campus deans, shall, in consultation with the departments, department heads, and appropriate college committees, devise an orderly sequence of steps which shall constitute the college's faculty reduction plan. Included in such a plan will be explicit criteria by which individual faculty will be identified with the various programs under consideration for reduction or elimination. Program reductions are never to be declared with the aim of singling out a specific faculty member.

Insofar as feasible, the plan will emphasize the creation of various incentives such as voluntary retirement, early retirement, resignation, reduction in status, salary reduction, severance pay, or similar actions that will result in immediate or eventual cost savings for the university, and that are voluntarily entered into by individual faculty members rather than imposed by university authority.

When non-voluntary faculty reductions are necessary, unless explicitly stated and compelling academic reasons exist to the contrary, consideration will be given first to not filling existing faculty vacancies and not filling vacancies from resignations, retirements, or deaths. Consideration should next be given to the termination of instructional positions occupied by teaching assistants and faculty with special appointments (adjunct, visiting, and temporary). Next, consideration should be given to the termination of faculty with term appointments. Finally, consideration should be given to the termination of tenure-eligible or tenured faculty members. The integrity of the tenure system will be respected. Within an academic program, the appointment of a faculty member with tenure will not be terminated in favor of retaining a faculty member without tenure, except in extraordinary circumstances where a serious distortion of the specific academic program would otherwise result. The question of serious distortion shall be decided by the Educational Policies Committee and the Faculty Senate, with the approval of the president and the Board of Trustees. The finding of serious distortion shall be based on criteria which include, but are not limited to, essentiality of service and work, field of specialization, and maintenance of necessary programs or services.

Termination or reduction in status of tenured, tenure-eligible, or term appointment faculty members shall follow the procedures below.

(2) Review procedure.

Proposed faculty reduction plans shall be reviewed by affected department and college faculties in light of the future strength, balance, quality of teaching, research, extension, and mission of the department and college, tempered by concern for individual circumstances.

Faculty response to such reduction plans shall be forwarded in a timely manner to the appropriate department heads, academic deans, vice president for extension and agriculture, and, where appropriate, to the chancellor or regional campus deans.

The academic dean shall notify, in writing, any faculty member who is the subject of a recommendation for reduction. A faculty member who is so identified may respond in writing at any point in the review with his/her comments becoming part of the record to be forwarded to the next level of review. Academic deans, shall consider such a response in consultation, where appropriate, with the chancellor and regional campus deans, shall add his/her separate recommendations and forward the complete file to the provost or the appropriate vice president.

The provost or any appropriate vice provost shall review the recommendations of the academic dean and any timely faculty response, as well as any appeals filed as in Policy 406.4.4(3).

(3) Appeal to the provost.

If a faculty member chooses to formally appeal to the provost, the faculty member must submit, within 30 days of his/her receipt from the academic dean of a notice of a recommendation for termination or reduction in status, a written notice of intent to appeal with the provost. A faculty member who has submitted notice of intent to appeal must file a formal written appeal with the provost within 90 days of receipt of the notice of proposed termination.

(4) Notice of termination or reduction in status.

The provost shall forward the complete file with a recommendation to the president. The provost shall also notify any affected faculty members in writing of his/her recommendation to the president. Written notice from the president or from the president's designee will be given to a faculty member who is terminated due to program elimination or reduction because of financial exigency as follows: (a) if the appointee is untenured and in the first year of service, notice shall be given at least three months prior to termination or reduction in status; (b) if the appointee is untenured and in the second year of service, notice shall be given at least six months prior to termination or reduction in status; (c) if the appointee is tenured or is untenured but in the third or subsequent year of service, notice shall be given at least 12 months prior to termination or reduction in status.

The notice must include the following: (a) the effective date of termination; (b) a statement of the reasons for the declaration of financial exigency; (c) the basis, the procedures, and the criteria used for termination; (d) opportunities for appeal, including access to appropriate documentation, and the appealable issues as set forth in Policy 406.4.4(5) below; and (e) the reinstatement rights.

(5) Appeal and hearing.

A faculty member may appeal a termination only for: (a) violation of his/her academic freedom, legal, statutory, or constitutional rights; (b) failure to comply with this policy, the Board of Regents policy, or with the plan for personnel reduction approved by the Board of Regents; or (c) arbitrary or capricious action. Within 30 days of receiving a notice from the president for termination or reduction in status, a faculty member who intends to appeal must notify, in writing, the president and the Academic Freedom and Tenure Committee of the intent to appeal. The formal appeal, with supporting documentation, must be filed with the Academic Freedom and Tenure Committee within 45 days of receipt of notice from the president. A hearing will then be conducted in a timely manner by the Academic Freedom and Tenure Committee, in accordance with procedures in Policy 407.

(6) Relocation.

During the grace period of three years, and with the assistance of the appropriate administrators (e.g., academic deans, department heads, vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus deans), and with the consent of the receiving unit, every reasonable and good faith effort will be made to enable the affected faculty members who wish to do so to obtain suitable positions elsewhere in the university if qualified.

406.5 REINSTATEMENT RIGHTS

5.1 For Tenured Faculty

In cases of termination of tenured faculty members, the position concerned may not be filled by replacement within a period of three years from the effective date of the termination unless the tenured faculty member has been offered a return to employment in that position and has not accepted the offer within 30 calendar days after the offer was extended.

5.2 For Non-Tenured Faculty

In cases of termination of non-tenured faculty members, the position concerned may not be filled by replacement within a period of one year from the effective date of the termination unless the person terminated has been offered a return to employment in that position and the person terminated has not accepted the offer within 30 calendar days.

5.3 Termination of Offer of Reinstatement

If an offer of reinstatement is not accepted within the timelines stated above, the university and the Board of Regents have no further obligation to the person terminated. After the expiration of the applicable reinstatement period as provided herein, the institution and the Board of Regents have no further obligation to the affected faculty.

5.4 Faculty Status and Benefits after Reinstatement

A faculty member who has been terminated and who accepts reinstatement in the same position will resume the rank and tenure status held at the time of termination, be credited with any sick leave accrued prior to the date of the termination, be paid a salary commensurate with the rank and length of previous service, and will be credited with any annual leave which the faculty member had accrued prior to the date of termination and for which the faculty member has not received payment.

406.6 MAJOR FINANCIAL CRISIS

6.1 Definitions

(1) Major financial crisis.

To constitute a major financial crisis, a situation facing the university shall: (a) be significantly and demonstrably more than a minor, temporary, and/or cyclical fluctuation in operating funds; and (b) involve substantial risk to the survival of departments, colleges, or other major academic components of the university. A substantial risk to survival is considered one where a substantial reduction occurs in (1) the ability to fulfill the mission of the academic unit, (2) the number of students served by the academic unit, or (3) the number and quality of course offerings.

(2) Academic program.

See Policy 406.2.1(2).

6.2 Declaration of Major Financial Crisis

(1) Initiation.

If the president of the university identifies a possible major financial crisis, he/she shall inform the Budget and Faculty Welfare Committee, the Faculty Senate, the Professional Employees Association, and the Classified Employees Association concerning the causes and possible consequences of the crisis. The president shall also identify the measures considered by the university up to that point for dealing with the crisis, including a possible declaration of financial exigency, strategies that may be alternatives to program reduction or program elimination, reasons why the university's financial circumstances may necessitate academic program reduction or elimination, and the time frame by which decisions must be made by those entitled to participate in the consultative process. The president shall use his/her best efforts to secure the fullest period of time possible for consideration of these matters and the responses hereto.

(2) Consultation.

The Faculty Senate shall receive and consider the comments and advice of the Budget and Faculty Welfare Committee, the Professional Employees Association, and the Classified

Employees Association, as well as timely presented views of any other faculty or administrative body, on whether the president should declare the existence of a major financial crisis. The Faculty Senate shall then express its views in writing to the president. The Professional Employees Association and the Classified Employees Association shall also have the opportunity to express their views in writing to the president.

(3) Implementation.

The president, with the approval of the Board of Trustees, may declare the existence of a major financial crisis after following (1) and (2) above. The university's actions in response to the crisis shall be governed by Policies 406.4.3 and 4.4.

6.3 Program Elimination or Reduction Because of Major Financial Crisis

(1) Strategies.

When the president has declared the existence of a major financial crisis, he/she shall consult the president's executive committee, the Council of Deans, the Graduate Council, appropriate directors of non-academic programs, the Budget and Faculty Welfare Committee, and the Educational Policies Committee concerning strategies for dealing with the crisis. These shall include examination of feasibility of all of the following: restrictions on enrollment, reductions or elimination of non-academic programs, across-the-board budget reductions, phased reductions, attrition, reductions in supplies, and, reduction or elimination of academic programs. The president will then outline to the Faculty Senate the strategies he/she proposes to follow in developing a specific plan for coping with the crisis. After receiving input from the groups above, the Faculty Senate will make whatever recommendations it deems appropriate concerning such strategies.

The policies below apply when, after receipt of the recommendations of the Faculty Senate, the president has concluded that a declared major financial crisis entails academic program reduction or elimination.

(2) Iterative process.

After declaration of a major financial crisis by the president an iterative process of university program elimination or reduction may begin. This process should be carried out in a manner that best insures the continuing integrity of academic programs. The first step in this process shall be for every administrative, academic, non-academic, and structural component of the university to assess its programs with regard to quality and essentiality to the mission of the university. During subsequent steps, support services shall be reduced to the extent feasible to prevent significant impairment of the university's ability to fulfill its mission/role.

(3) Administrative and support services.

The president will ask the provost and the appropriate vice presidents to develop reduction and/or elimination plans in the areas of university-wide support services and nonacademic

programs. Such plans will be reviewed by the president's executive committee, the Council of Deans, the Budget and Faculty Welfare Committee, the Professional Employees Association, and the Classified Employees Association, and will be integrated with academic elimination or reduction plans in light of the overall mission/role of the university.

If a non-academic program has been reduced or eliminated, university-wide support services must be re-evaluated and reduced as appropriate. Any reductions in support services or administrative oversight shall precede further reductions in or elimination of academic programs.

(4) Academic program elimination or reduction.

The president shall direct the provost to assist academic departments in developing plans to implement academic program elimination or reduction. The individual academic departments of the university shall be asked to evaluate their programs, consider alternatives to program reduction or elimination, and examine possible time frames (including multiyear) for accomplishing possible budget reductions. The academic dean of each college, and, where appropriate, the chancellor and regional campus deans shall review the departmental reports and comment upon them. The departmental reports and comments from the academic deans, and, where appropriate the chancellor and regional campus deans shall be forwarded to the president's executive committee, the Council of Deans, the Graduate Council, where appropriate, and the Educational Policies Committee for their review and statement of reactions.

The following criteria and information sources shall be considered by those making judgments about which programs should be eliminated or reduced because of a major financial crisis: (a) legal mandate; (b) the general academic quality of the program with regard to scholarship, teaching, and service; (c) the extent of importance that the program has for the mission of the university; (d) the mission and goals of the university; (e) Graduate Council review where appropriate; (f) findings by national accreditation bodies; (g) reports by appropriate national ranking sources; (h) such other systematically derived information, based on long-term considerations of program quality, as may be available; (i) the capacity of the program to generate external funding; (j) faculty/students ratios; (k) cost effectiveness when compared to similar programs at other universities; and (l) relationship to the Board of Regents' Master Plan for Higher Education in the State of Utah. The above list is not ranked and is not inclusive.

If an academic program is eliminated or reduced, those support services associated with it shall be re-evaluated and reduced if appropriate. These reductions shall precede further reductions or elimination of academic programs. Unless financial exigency is declared, tenured faculty members may not be terminated because their program was reduced, except when program elimination has occurred.

(5) Review.

If a plan calls for the elimination or reduction of a specific program, center, institute,

school, department, college, campus, or site that element of the plan shall be reviewed by the Budget and Faculty Welfare Committee; the Educational Policies Committee; the Graduate Council; the faculty members and/or faculty committee most directly involved in the program; the appropriate department head, academic dean, vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean; relevant college committees or councils; and relevant student advisory committees. The views of these bodies shall be forwarded to the Faculty Senate for its consideration within the time periods prescribed by the president. The conclusions of the above bodies and the Faculty Senate shall be forwarded to the president who shall consider them in his/her review of the proposed plan. The views of the Faculty Senate on the plans shall be forwarded to the Board of Trustees and/or to such other body as may be required by state law or university policy.

(6) Timetable.

Once a major financial crisis has been declared, the president shall submit to the Faculty Senate, the Professional Employees Association, and the Classified Employees Association a timetable for relieving the crisis. Further, he/she shall report progress in this endeavor to the Faculty Senate, the Professional Employees Association, and the Classified Employees Association on a quarterly basis.

6.4 Terminations; Reductions in Status

The procedures described in Policy 406.4.4 shall apply, except that the appointment of a faculty member with tenure will not be terminated in favor of retaining a faculty member without tenure unless program elimination has occurred.

Suggested Revisions to Section 406 of the Code Report from the Special Task Force

November 12, 2012; Revised August 24, 2015

Charge to the Task Force to Recommend Code Changes to Sections 406 and 407 of the USU Policy Manual (January 2012)

Last year, in 2011, to facilitate the integration of the College of Eastern Utah into the Utah State University system, a thorough review and update was completed on Sections 401 through 405 of the USU Policy Manual (commonly called “the faculty code”). In the course of that review, it became clear that Sections 406 and 407 — those parts dealing with program discontinuance, financial crisis, and financial exigency; and academic due process involving sanctions and hearing procedures — were also in need of an update. As a starting point, several years ago a committee chaired by former President of the Faculty Senate, John Kras, raised a number of pertinent questions about these sections that have not yet been addressed. More recently, the Academic Freedom and Tenure (AFT) committee, based on its experiences, has suggested some changes. This task force was created to make this review and to suggest updates.

The charge to this task force is to make this review, suggest updates, and follow through, as need be, on their revision for final adoption by the Faculty Senate. The time frame is this spring semester, with a possibility that some questions about the suggested updates will occur this coming fall semester.

Task Force Members (As constituted in 2012)

Vincent Wickwar	Former President, Faculty Senate; Science; Co-Chair
Ray Coward	Provost & Executive Vice President; Co-Chair
Ed Heath	Former President, Faculty Senate; Ed. & Human Services
Glenn McEvoy	Past President, Faculty Senate; Business
Scott Budge	AFT Committee; Engineering
John Elswailer	PRPC; Library
Rhonda Miller	BFW Committee; Agriculture
Larry Smith	Executive Senior Vice Provost, Committee Staff
Kim Doyle	Committee Staff

Task Force Meetings (15 meetings, each two to four hours long)

February 3, 2012
February 15, 2012
February 29, 2012
March 23, 2012
March 28, 2012
April 4, 2012
April 13, 2012
April 25, 2012

May 30, 2012
July 9, 2012
July 17, 2012
August 2, 2012
September 4, 2012
September 26, 2012
October 23, 2012

What the Task Force Did

By the second meeting, it became clear that the 406 section of the code, having to do with suspension of enrollment, program discontinuance, financial crisis, and financial exigency were a mess. For instance, the most severe problem, financial exigency, was discussed before the less severe financial crisis. The description and response to each problem were discussed in very different ways, making it unclear what the intentions were. The steps involved in declaring and handling a financial crisis were so involved that a financial crisis would never be invoked. For instance, when the first severe budget cuts from the legislature occurred in 2008/2009, there was about a three-month period in which to act, whereas the steps under financial crisis would have taken more than a year.

In a series of 15 meetings in the spring, summer, and fall of 2012 (listed above), the committee essentially reorganized and rewrote Section 406 and developed flow charts to outline the steps for a financial crisis and for a financial exigency. The changes were so many and so significant that you are being given the old (current) Section 406 and the new (proposed) Section 406. They are attached. An indication of the most substantial changes is given in the next section.

The effort put into Section 406 was extensive enough that the Task Force did not work on Section 407. That will have to be examined by another Task Force.

Significant Changes to Section 406

- Sections of 406 describing major actions by the university to address financial situations of varying scale and severity have been reordered. The new order in the revised 406 is: suspension of enrollment, program discontinuance, financial crisis, then lastly, financial exigency.
- Definitions of terms scattered throughout section 406 have now been compiled into one new section near the beginning of 406 (406.2).
- Sections addressing financial crisis (406.5) and financial exigency (406.6) have been substantially revised to add clarity and transparency to these complex and important processes. A new committee, the Financial Crisis Advisory Committee (FCAC), has been added in the process for addressing a financial crisis.
- Two flow charts have been created and included to make clear steps in the procedures for financial crisis and financial exigency.

- Redundancy of language has been eliminated throughout section 406. For example, the current section on reinstatement (406.5) has been revised and placed first now in program discontinuance (406.4.3) and reference made to it thereafter in financial crisis and financial exigency.
- Clarity of language has been made throughout. For example, “university president” has been used instead of simply “president” to eliminate confusion with the president of the faculty senate. Words such as “discontinuance”, “reduction”, and “termination” have been used in proper contexts to mitigate confusion and differences in interpretation.
- Spelling out the abbreviations for committees has been included to add clarity to the language.
- The involvement of the Board of Trustees or Board of Regents in processes in 406 has been verified and revised to reflect actual policy and practice.
- Timelines for processes have been revised to allow the institution to address financial crisis or financial exigency effectively.

What next? (Revised August 2015)

You, the Faculty Senate Executive Committee (FSEC), are being given the suggested revisions to Section 406 of the code for you to decide what steps to take next. Because of the extensive nature of the changes, a multistep procedure is proposed:

- (1) Send the suggested revisions to Section 406 to two of the Faculty Senate (FS) standing committees — the Academic Freedom and Tenure Committee (AFT) and the Budget and Faculty Welfare Committee (BFW) — for their review and comments. While this was done in 2012, these committees have many new members who should be given a chance to review and comment.
- (2) Send their comments back to the remaining members of the special committee (aka, the Special Task Force) for their consideration and possible modifications to the suggested revisions.
- (3) Bring these modified revisions back to the FSEC for discussion. The suggestion being that the FSEC will send these revisions to the FS with the intent that the FS will send them to the Professional Responsibilities and Procedures Committee (PRPC) for review.
- (4) After the PRPC review, the FS would hear and vote on the suggested revisions to Section 406 of the code.
- (5) If the vote is negative, the problems that are identified should be collected and the approval procedure returned to Step (2).

The goal of this procedure is to produce both a thorough review of the suggested revisions to Section 406 and to adopt them in a timely manner.

POLICY MANUAL

FACULTY

Number 406

Subject: **Suspension of Enrollment**, Program Discontinuance, Financial Crisis and Financial Exigency

Effective Date: July 1, 1997

Revision: July 1, 1999, March 6, 2009, August 21, 2009

Date of Last Revision: July 8, 2011

406.1 INTRODUCTION

This section of the policy manual specifies the procedures for **suspending enrollment**, discontinuing a program for academic reasons; **suspending enrollment**, determining whether **the university faces a major** financial crisis **not definable as financial exigency**; responding to a major financial crisis; determining whether **at a particular moment** the university faces **a state of** financial **exigency**; responding to financial **exigency**; and reducing the status **of, or terminating** faculty members due to program discontinuance, major financial crisis, or **bona fide** financial exigency. **Reduction in status of tenured faculty members shall only occur for reasons of program discontinuance, financial crisis, or bona fide financial exigency.** In all of the decision making processes described in this section, all parties will act in a **timely** manner that is respectful of both the principle of shared governance and the need for the institution to take strategic and timely actions to fulfill its mission. The timetable for processes described in this section will be set by the university president.

406.2 DEFINITIONS

2.1 Academic Program.

An academic program has an identifiable teaching, research, or other academic mission and may operate within one or more academic units. An academic program must fulfill one or more of these criteria: (a) offer or administer a degree, certificate, or some other credential; (b) have an identifiable curriculum or be formally described in current university catalogs or other publications; or (c) be designated a “program” by specific faculty decision and have an identified group of one or more faculty.

2.2 Suspension of Enrollment.

Suspension of enrollment is an action short of program discontinuance that, if not reversed, will lead to discontinuance, and which refers to the suspension of enrollment in a major subject, a minor subject where there is no corresponding major, a certificate program, or a program awarding a credential certifying completion. Suspension of enrollment does not lead to reduction in status or termination of faculty in the program.

2.3 Program Discontinuance.

Program discontinuance for academic reasons ~~under this policy~~ means the cessation of a program, center, institute, school, department, academic college, or regional campus ~~or site~~ based upon educational and academic considerations. For the purposes of Policy 406.2, educational and academic considerations do not include cyclical or temporary variations in enrollment and/or budgets; but must reflect long-range judgments that the basic teaching, research, and extension mission of the university will be strengthened by the discontinuance. Program discontinuance does not preclude the reallocation of resources to other academic programs with higher priority based upon educational and academic considerations. Program discontinuance may entail the reduction in status or termination of faculty.

2.4 Major Financial Crisis.

To constitute a major financial crisis, a situation facing the university shall ~~(a) be significantly and demonstrably~~ substantially more than a minor, temporary, and/or cyclical fluctuation in operating funds; and ~~(b)~~ involve substantial risk to the survival of departments, colleges, or other major academic components of the university. A substantial risk to survival is considered one where a substantial reduction occurs in: ~~(1, a)~~ the ability to fulfill the mission of the academic unit, ~~(2, b)~~ the number of students served by the academic unit, or ~~(3, c)~~ the number and quality of course offerings. A major financial crisis may entail the reduction in status or termination of faculty.

2.5 Financial Exigency.

Financial exigency is an existing or imminent ~~very~~ severe financial crisis that: (a) threatens the mission of the institution as a whole, ~~that~~ (b) requires programmatic reductions or closings that may entail reductions in status or termination of faculty to enable the institution to accomplish its mission, and ~~that~~ (c) that cannot be alleviated by less drastic means.

2.6 Reduction in Status.

Reduction in status is a decrease in the length of the contract period and/or the percentage of time that a faculty member is employed by the university.

~~2.7 Serious Distortion of an Academic Program.~~

~~A serious distortion of an academic program shall be deemed to occur when the faculty remaining in the program would not be qualified to meet generally accepted program standards (Section 406.4.1(3)).~~

406.3 SUSPENSION OF ENROLLMENT

3.1 Procedure

(1) Initiation.

After full consultation with the department faculty and approval by the academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean, a department head that decides to suspend enrollment, must notify the Educational Policies Committee (EPC) as soon as the decision has been made.

(2) Review.

The Educational Policies Committee (EPC) will review the proposed suspension of enrollment for its effect on other academic programs of the university. The committee will hold hearings at which all constituencies affected, including students, faculty, and representatives from other departments affected by the proposed action, ~~once notified,~~ have the opportunity to testify. At the conclusion of its deliberations, the Educational Policies Committee (EPC) will recommend approval or disapproval of suspension of enrollment to the Faculty Senate. The Faculty Senate shall make a recommendation to the ~~university president~~ provost who shall consult the university president. This process shall be concluded within 90 days following notification of the Educational Policies Committee (EPC). Suspension is granted by the university president subject to the legal obligation, if any, of the university to permit students already enrolled in the program to complete their course of study.

(3) Time limitation.

At any time up to three years after a suspension of enrollment has been granted, it may be reversed by approval of the provost ~~following the~~ after receiving the recommendation of the academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean. If suspension has not been reversed within this three-year period, program discontinuance must be initiated.

406.4 PROGRAM DISCONTINUANCE FOR ACADEMIC REASONS

4.1 Decision-Making Process

(1) Initiation.

Consideration of the possible discontinuance of an academic program may be initiated at any time by the faculty or a duly appointed faculty committee of that program; the faculty or an appropriate committee of the center, institute, school, department, college, or other academic unit of that program; ~~the~~ Graduate Council; the appropriate department head, academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean-or by the provost or president of the university. **Steps toward the discontinuance of a program do not require a prior suspension of enrollment in that program.** If a program discontinuance ~~may~~ results in the **reduction in status or termination** of faculty, the person or group initiating the consideration of discontinuance shall prepare, and submit to the provost, a memorandum ~~which that~~: (a) clearly identifies the program; (b) states explicit criteria by which faculty are identified with the program, (c) states the reasons, with respect to the university's mission and goals, for recommending discontinuance; (d) assesses the probable consequences for faculty, related programs, and the university in general; and (e) suggests a timetable for accomplishing discontinuance. **Program discontinuance is never to be declared with the aim of singling out a specific faculty member.**

(2) Distribution.

The provost shall distribute copies of the memorandum, embodying an initial or an amended proposal for program discontinuance, to: (a) the faculty members most directly involved in the academic program proposed for discontinuance; (b) the appropriate department head, academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean; (c) relevant members of departments and colleges; (d) members of relevant college committees or councils; (e) ~~the Educational Policies Committee (EPC)~~ ~~(f)~~ the members of Budget and Faculty Welfare Committee (BFW); and ~~(g f)~~ the relevant student college senators.

(3) Consultation.

The groups above shall forward comments and recommendations to the appropriate academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean. He or she shall forward the comments and a recommendation to the provost, and, where appropriate, to the Graduate Council. **The Graduate Council may review this material and make a recommendation to the provost. After receiving and considering the recommendations and comments, the provost shall submit the proposal, the comments, and a recommendation to the Educational Policies Committee (EPC). The Educational Policies Committee's (EPC) recommendation shall be subject to review and debate by the Faculty Senate [Policy 402.12.6(1)]. All comments, recommendations, and supporting material shall be available to the Faculty Senate for its perusal.**

(4) Final recommendation.

The Faculty Senate's recommendations shall be forwarded to the university president for consideration. The university president shall submit a final recommendation in writing to the

Board of Trustees and the Board of Regents ~~and shall attach the written comments and recommendations of the Faculty Senate.~~

(5) Notice of program discontinuance.

After the Board of Regents has approved a proposal by the university to discontinue a program, the appropriate academic dean, vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean ~~of the program, center, institute, school, department, academic college, or regional campus, or site~~ shall give written notice of the discontinuance to all persons in the ~~program, center, institute, school, department, academic college, or regional campus~~ academic unit. A minimum of one full year, beginning July 1, shall pass from the time a final decision is made to close an academic program to the actual program discontinuance.

4.2 Faculty Reduction in Status or Termination due to Program Discontinuance

(1) Notice of reduction in status or termination.

In addition to the general notice ~~of program discontinuance~~ in Policy 406.4.1(5), if the program discontinuance results in reduction in status or termination ~~of faculty, then~~ the university president shall give tenured and tenure-track faculty members in the discontinued ~~program, center, institute, school, department, academic college, or regional campus, or site~~ ~~academic program~~ formal notice of reduction in status or termination as follows: (a) if the appointee is untenured and in the first year of service, notice shall be given at least three months prior to reduction in status or termination; (b) if the appointee is untenured and in the second year of service, notice shall be given at least six months prior to reduction in status or termination; (c) if the appointee is tenured or is untenured but in the third or subsequent years of service, notice shall be given at least 12 months prior to reduction in status or termination; ~~(d) the length of notice for faculty with term appointments (Policy 401.4) shall be parallel to that for the untenured faculty described above, with the exception of those term appointees with research or federal research ranks; termination of these faculty is coincident with and contingent upon the termination date of their extramural funding; if their funding extends beyond that of a discontinued program, they may be reassigned to another program;~~ and (e) appointees with specialized functions as defined in Policy 401.5 shall be parallel to that for the tenured and tenure-eligible faculty described above.

~~(2) Relocation~~

~~During a grace period of three years, and with the assistance of the appropriate administrators (e.g., academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean, and the provost) and the consent of the receiving department, every reasonable and good faith effort will be made to enable affected faculty members to obtain suitable positions for which they are qualified elsewhere in the university for which they are qualified. Tenured faculty members terminated through program discontinuance shall, for a period of three years following the date of their final salary~~

payment, receive preferential consideration among candidates with comparable qualifications for any vacant and funded university position for which they apply and are qualified.

~~(3) Faculty employment after program reinstatement.~~

~~If a terminated program or position is reinstated, tenured faculty members terminated through program discontinuance shall have the right of immediate reinstatement for a period of three years following the final salary payment.~~

4.3 Reinstatement

(1) Tenured Faculty.

Tenured faculty members terminated through program discontinuance shall, for a period of three years following the date of their final salary payment, receive preferential consideration among candidates with comparable qualifications for any vacant and funded university position ~~for which they apply and are qualified.~~ Upon request of the affected faculty member, ~~during a grace period of three years,~~ with the assistance of the appropriate administrators (e.g., academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean, and the provost) ~~and with the consent of the receiving department unit,~~ every a reasonable ~~and good faith~~ effort will be made to enable affected faculty members to obtain suitable positions ~~for which they are qualified~~ elsewhere in the university for which they are qualified. The receiving department or academic unit must consent to the appointment before it is made.

~~In cases of termination of tenured faculty members, the position concerned may not be filled by replacement within a period of three years from the effective date of the termination unless the tenured faculty member has been offered a return to employment in that position and has not accepted the offer within 30 calendar days after the offer was extended.~~

(2) Non-Tenured Faculty.

In cases of termination of non-tenured faculty members, the position concerned may not be filled by replacement within a period of one year from the effective date of the termination unless the person terminated has been offered a return to employment in that position and the person terminated has not accepted the offer within 30 calendar days.

(3) Termination of Offer of Reinstatement.

If an offer of reinstatement is not accepted within the timelines stated above, the university and the Board of Regents have no further obligation to the person terminated. ~~After the expiration of the applicable reinstatement period as provided herein, the institution and the Board of Regents have no further obligation to the affected faculty.~~

(4) Faculty Status and Benefits after Reinstatement.

A faculty member who has been terminated and who accepts reinstatement in the same position will resume the rank and tenure status held at the time of termination, be credited with any sick leave accrued prior to the date of the termination, be paid a salary commensurate with the rank and length of previous service, ~~and will be credited with any annual leave which that the faculty member had accrued prior to the date of termination and for which the faculty member has not received payment.~~

406.5 MAJOR FINANCIAL CRISIS

5.1 Procedures

(1) Initiation.

If the president of the university identifies a possible major financial crisis, he or she shall inform and consult with the Budget and Faculty Welfare Committee (BFW), the Faculty Senate, the Professional Employees Association (PEA), and the Classified Employees Association (CEA) concerning the causes and the possible consequences of this financial crisis. The university president shall also identify possible solutions and the time frame by which decisions must be made by those entitled to participate in the consultative process [Flow Chart 406.X Boxes 1 and 2].

(2) Declaration

Having informed and consulted with the above bodies, the university president will seek the approval of the Board of Trustees to declare a major financial crisis [Flow Chart 406.X Box 3].

The university president, with the approval of the Board of Trustees, may declare the existence of a major financial crisis and set the time frame for developing a plan [Flow Chart 406.X Box 4].

(3) Guiding principles and “targets”

The university president will then develop a set of over-arching principles to guide the university’s response to the major financial crisis and establish “target” cuts for each academic and administrative unit. The university president will share these principles and “targets” with the university community [Flow Chart 406.X Box 5]. When establishing target reductions for each academic and administrative unit, the university president shall seek to minimize the negative consequences to the core missions of the university.

(4) Financial Crisis Advisory ~~Reduction~~ Committee

~~Concurrently~~ The university president will activate the Financial Crisis ~~Reduction~~ Advisory Committee (FCAC), which will consist of two Faculty Senate presidents appointed by the current Faculty Senate President; two faculty members appointed by the Budget and Faculty Welfare Committee (BFW) upon consultation with the current Faculty Senate President; four administrators appointed by the university president; a Professional Employees Association (PEA) employee; and a Classified Employees Association (CEA) employee. ~~The university president will appoint the four administrators.~~ The respective presidents of the Professional Employees Association (PEA) and Classified Employees Association (CEA) will appoint representatives from their organizations [Flow Chart 406.X Box 6].

Following the over-arching principles established by the university president, ~~the academic colleges,~~ and administrative units will prepare plans to meet these “targets” [Flow Chart 406.X Box 7].

The Financial Crisis Advisory Committee (FCAC) will hold hearings with each dean or vice president and selected colleagues to review the plans submitted for their units. The intent of these hearings is to make sure the plans follow the over-arching principles and consider possible impacts on other academic or administrative units. If needed, the Financial Crisis Advisory Committee (FCAC) will ask the academic college or administrative unit to revise its plans and to return for another session [Flow Chart 406.X Boxes 8 and 9].

After meeting with all the academic and administrative units, the Financial Crisis Advisory Committee (FCAC) will formulate recommendations and present them to the university president [Flow Chart 406.x Box 10].

(5) University president’s plan

Considering these recommendations, the university president will formulate his or her own plan. The university president will then present this plan to the Faculty Senate, the Professional Employees Association (PEA), the Classified Employees Association (CEA), and the USU Executive Committee, and may revise the plan taking into account recommendations from those organizations. [Boxes 11 and 12]

(6) Board of Trustees

The university president will then present the final plan to the Board of Trustees for its ~~recommendations and~~ approval [Flow Chart 406.X Box 13].

(7) University community

With the approval of the Board of Trustees, the university president will announce the plan to the university community [Flow Chart 406.X Box 14].

5.2 Reduction in Status or Termination of Faculty due to a Major Financial Crisis

(1) ~~Plan for faculty reduction.~~ Plans to reduce in status or terminate faculty due to a major financial crisis.

As the process described in Policy 406.5.1 is taking place, the academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean, and the provost, shall, in consultation with the departments, department heads, and appropriate college committees, devise an orderly sequence of steps ~~which~~ that shall constitute ~~the college's faculty reduction~~ an academic unit's plan to reduce the status of, or terminate faculty. Included in such a plan will be explicit criteria by which individual faculty will be identified within the various programs under consideration for reduction or discontinuance. Program reductions or discontinuance are never to be declared with the aim of singling out a specific faculty member.

Insofar as feasible, the plan will emphasize the creation of various incentives such as voluntary retirement, early retirement, phased retirement, resignation, reduction in status, salary reduction, severance pay, or similar actions that will result in immediate or eventual cost savings for the university, and that are voluntarily entered into by individual faculty members rather than imposed by university authority.

When non-voluntary faculty reductions are necessary, unless explicitly stated and compelling academic reasons exist to the contrary, consideration will be given first to not filling existing faculty vacancies and not filling vacancies from resignations, retirements, or deaths. Consideration should next be given to the termination of instructional positions occupied by teaching assistants and faculty members with special appointments (adjunct, visiting, and temporary). Next, consideration should be given to the termination of faculty with term appointments. Finally, consideration should be given to the termination of tenure-eligible or tenured faculty members. Ideally, within an academic program, the appointment of a faculty member with tenure will not be terminated in favor of retaining a faculty member without tenure, unless program elimination has occurred. The integrity of the tenure system will be respected unless ~~overwhelming~~ compelling evidence for strategic reductions is in the best interest of the university precludes this basic tenet.

Reduction in status or termination of tenured, tenure-eligible, or term appointment faculty members shall follow the procedures below.

(2) Review procedure.

Proposed faculty reduction plans shall be reviewed by faculty in affected ~~department and college faculties~~ academic units in light of ~~the~~ that unit's future strength, balance, quality of teaching, research, extension, and mission ~~of the department and college, tempered by concern for individual circumstances.~~ Faculty response to such reduction plans shall be forwarded in a timely manner to the appropriate department heads, academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean, and the provost.

The academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean, shall notify, in writing, any faculty member who is the subject of a recommendation for reduction in status or termination. A faculty member who is so identified may respond in writing ~~at any point in~~ to the review with his or her comments becoming part of the record to be forwarded to the next level of review. Academic deans or the vice president for extension and agriculture, and where appropriate, the chancellor and regional campus deans, shall consider such a response ~~in consultation~~, and shall add ~~his/her~~ their separate recommendations and forward the complete file to the provost. ~~or the appropriate vice president.~~

The provost ~~or any appropriate vice provost~~ shall review the recommendations of the academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean and any timely faculty response, as well as any appeals filed as in Policy 406.5.2(5).

(3) Appeal of recommendation for reduction in status or termination to the provost.

If a faculty member chooses to formally appeal to the provost, the faculty member must submit, within 5 days of his or her receipt from the academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean, a notice of a recommendation for reduction in status or termination, a written notice of intent to appeal with the provost. A faculty member who has submitted notice of intent to appeal must file a formal written appeal with the provost within 10 days of receipt of the notice of proposed reduction in status or termination. This written appeal must contain new relevant information not already considered in the review procedure (Policy 406.5.2(2)). The provost must respond in writing to the formal written appeal within 10 days.

(4) Notice of reduction in status or termination.

The provost shall forward the complete file with a recommendation to the university president. The provost shall also notify any affected faculty members in writing of his or her recommendation to the university president. Written notice from the university president or from the university president's designee will be given to a faculty member whose status is reduced or is terminated due to program elimination because of financial crisis as follows: (a) if the appointee is untenured and in the first year of service, notice shall be given at least three months prior to reduction in status or termination (b) if the appointee is untenured and in the second year of service, notice shall be given at least six months prior to reduction in status or termination; (c) if the appointee is tenured or is untenured but in the third or subsequent year of service, notice shall be given at least 12 months prior to reduction in status or termination; (d) the length of notice for faculty with term appointments (Policy 401.4) shall be parallel to that for the untenured faculty described above, with the exception of those term appointees with research or federal research ranks; termination of these faculty is coincident with and contingent upon the termination date of their extramural funding; if their funding extends beyond that of a discontinued program, they may be reassigned to another program. If the

president deems that circumstances warrant shorter times of notification of faculty reduction in status or termination, he or she may do so.

The notice must include the following: (a) the effective date of termination; (b) a statement of the reasons for the declaration of financial crisis; (c) the basis, the procedures, and the criteria used for termination; (d) opportunities for appeal, including access to appropriate documentation, and the appealable issues as set forth in Policy 406.5.2(5) below; and (e) the reinstatement rights.

(5) Appeal and hearing for termination.

A faculty member may appeal a termination only for: (a) violation of his or her academic freedom, legal, statutory, or constitutional rights; (b) failure to comply with this policy, ~~the Board of Regents policy,~~ or with the plan for personnel reduction approved by the Board of ~~Regents~~ Trustees, or (c) arbitrary or capricious action. Within 10 days of receiving a notice from the university president for reduction in status or termination, a faculty member who intends to appeal must notify, in writing, the university president and the Academic Freedom and Tenure Committee (AFT) of the intent to appeal. The formal appeal, with supporting documentation, must be filed with the Academic Freedom and Tenure Committee (AFT) within 30 days of receipt of notice from the university president. A hearing will then be conducted in a timely manner by the Academic Freedom and Tenure Committee (AFT), in accordance with procedures in Policy 407. Because of the need to address the financial crisis, the appeal process shall follow the steps in 407.6 except that it must be completed before the termination date of the faculty member. ~~this appeal process will be used in lieu of grievance proceedings in 407 except for the timeline contained in that policy~~

~~(6) Relocation.~~

~~During the grace period of three years, and with the assistance of the appropriate administrators (e.g., academic dean or vice president for extension and agriculture, or where appropriate, the chancellor or regional campus dean, and the provost) and with the consent of the receiving unit, every reasonable and good faith effort will be made to enable the affected faculty members who wish to do so to obtain suitable positions elsewhere in the university if qualified.~~

5.3 Reinstatement

Reinstatement of tenured and non-tenure track faculty members terminated as a result of financial crisis shall follow procedures in Section 406.4.3.

406.6 FINANCIAL EXIGENCY

The university president may, in accordance with the procedures below and with the approval of the Board of Trustees, and ~~with~~ the advice of the Faculty Senate, the Professional

Employees Association (PEA), and the Classified Employees Association (CEA), recommend to the Board of Regents that a state of financial exigency be declared. Alternatively, a state of financial exigency may also be initiated declared unilaterally by the Board of Regents. In either case, a state of financial exigency exists only after it has been declared by the Board of Regents.

The procedures for responding to a financial exigency are organized into three stages. Stage 1 includes procedures for declaring a financial exigency. Stage 2 involves planning for program elimination or reduction. Stage 3 includes plans for implementing reductions and/or program eliminations.

6.1 Stage 1. Procedures for Declaring Financial Exigency (Flow chart 406.Y)

(1) Initiation and consultation.

~~When~~ If the president of the university identifies a possible financial exigency, he or she shall inform the Budget and Faculty Welfare Committee (BFW), the Faculty Senate, the Professional Employees Association (PEA), and the Classified Employees Association (CEA) and the USU Executive Committee of the causes and the possible consequences of the declaration. The university president shall also identify ~~the measures considered by the university up to that point for dealing with the crisis, including a possible declaration of financial exigency, possible strategies that may be alternative to program reduction or program elimination, reasons why the university's financial circumstances may necessitate academic program reduction or elimination,~~ possible solutions and the time frame by which decisions must be made by ~~those entitled to participate in the consultative process, i.e., the~~ Budget and Faculty Welfare Committee (BFW), the Faculty Senate, the Professional Employees Association (PEA), the Classified Employees Association (CEA) and the USU Executive Committee [Flow chart 406.Y Boxes 1 and 2].

Time considerations will be critical when ~~the university must judge whether or not~~ a financial exigency exists. To the extent that such a judgment must be made in a brief time frame for a given situation, the time periods for the consultative process provided for in this policy [Flow Chart 406.Y Box 2] shall be specified by written notice from the university president giving those ~~for whom the consultative processes were provided~~ in the consultative process the ~~fullest~~ longest possible amount of time ~~under the circumstances~~. In that regard, the university president shall use his or her best efforts to secure the ~~fullest~~ longest period of time possible for consideration of these matters and the responses hereto.

(2) ~~Consultation~~ Receipt and consideration of recommendations.

Within the time period established by the university president and before making a recommendation to the Board of Regents, the university president shall receive and consider the comments and advice presented ~~on the matter~~ by the Budget and Faculty Welfare Committee (BFW), the Faculty Senate, the Professional Employees Association (PEA), the Classified Employees Association (CEA), and the USU Executive Committee. The Faculty

Senate shall receive and consider the comments and advice of the Budget and Faculty Welfare Committee (BFW) as well as timely presented views by any other faculty or administrative body, or individual faculty members, and shall make its recommendation to the university president concerning a declaration of financial exigency [Flow chart 406.Y Box 3].

(3) Declaration.

The university president shall submit ~~his or her~~ final recommendation on the declaration of financial exigency in writing to the Board of Trustees prior to submitting it to the Board of Regents [Flow chart 406.Y Boxes 4 and 5]. ~~The university president~~ shall attach the written comments and recommendations of the Faculty Senate, the Professional Employees Association (PEA), ~~and~~ the Classified Employees Association (CEA) ~~and the USU Executive Committee~~. The university president shall also send a copy of ~~his or her~~ final recommendations to the Faculty Senate, the Professional Employees Association (PEA), ~~and~~ the Classified Employees Association (CEA) ~~and the USU Executive Committee~~.

Upon consideration of the university president's recommendation, the Board of Regents shall make a final decision regarding ~~declare~~ the declaration of financial exigency [Flow chart 406.Y Box 6].

6.3 2 Financial Exigency: Stage 2. Planning for Program Reduction or Elimination (Flow chart 406.Y)

(1) ~~Iterative-process~~ Plan Development.

After a declaration of financial exigency by the Board of Regents, ~~an iterative~~ process of university program elimination or reduction ~~planning may~~ shall begin. The intent of this process is to ensure the ~~continuing~~ integrity of ~~academic programs~~ and the overall mission of the university (see Policy 103).

(2) ~~Administrative and support services.~~

The university president will ask the provost and the appropriate vice presidents to develop reduction and/or elimination plans in ~~both academic and administrative~~ ~~the~~ areas of ~~the~~ university ~~wide support services and administrative programs~~ [Flow chart 406.Y Box 7]. The development of plans for academic program reduction or elimination ~~plans~~ must involve consultation among departmental and college faculties to identify areas under consideration for academic program reduction or elimination. The following criteria and information sources shall be considered by those making judgments about which programs should be reduced or eliminated because of financial exigency: (a) legal mandate; (b) the general academic quality of the program with regard to scholarship, teaching, and service; (c) the extent of importance that the program has for the mission of the university; (d) the mission and goals of the university; (e) ~~Graduate Council review~~; (f) ~~findings~~ reports by national accreditation bodies; (f) reports by appropriate national ranking sources; (g) ~~such~~ other systematically-derived information, based on long-term considerations of program quality, as may be available; (h) the capacity of the program to generate external funding; (i)

~~faculty/student student/faculty ratios; (j) student credit hours generated/faculty FTE; (k) cost effectiveness when compared to similar programs at other universities; and (l) relationship to the Board of Regents Master Plan for Higher Education in the State of Utah. The above list is not ranked and is not inclusive-all encompassing.~~

~~The first step in the planning process shall be for every academic and administrative unit of the university to assess its programs operations with regard to legal mandate, essentiality to the mission/role of the university, and quality. During subsequent steps, support services shall be reduced to the extent feasible while preventing significant impairment of the university's ability to fulfill its mission/role~~

~~Such Plans will be reviewed by the Budget and Faculty Welfare Committee (BFW), the Council of Deans, the Faculty Senate, relevant committees of the Professional Employees Association (PEA) and the Classified Employees Association (CEA), and the USU Executive Committee, and will be integrated with academic elimination or reduction plans (see Section 406.6.3 (3)) in light of the overall academic mission of the university. If a plan calls for the reduction or elimination of a specific academic unit, associated administrative units university-wide support services must be re-evaluated and reduced as appropriate. Any reduction, or elimination of an academic unit program, center, institute, school, department, college, or regional campus, or site, shall be reviewed by the Budget and Faculty Welfare Committee (BFW); the Educational Policies Committee (EPC); the Graduate Council, where appropriate; the faculty members and/or faculty committee most directly involved in the program; the appropriate department head or supervisor, academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean; relevant college committees or councils; relevant committees of the Professional Employees Association (PEA) and the Classified Employees Association (CEA); and relevant student advisory committees.~~

~~The views of these bodies shall be forwarded to the Faculty Senate for its consideration within the time periods prescribed by the university president. The conclusions of the above bodies and the Faculty Senate and all of the groups, committees, and individuals listed above shall be forwarded to the provost who shall consider them and forward them, along with his or her own recommendation, to the university president. When the university president's recommendations are submitted to the Board of Trustees and the Board of Regents, they shall be accompanied by the Faculty Senate's recommendations. After the Board of Trustees and the Board of Regents has have approved the plan by the university to eliminate a program, the appropriate academic or regional campus dean, vice president, or chancellor responsible for the academic unit of the program, center, institute, school, department, college, or regional campus, or site shall give written notice of the elimination to all persons, including students, in the program, center, institute, school, department, college, or regional campus, or site.[Flow chart 406.Y Box 8].~~

~~The university president will take into consideration recommendations for revisions to the proposed plan for the reduction and/or elimination plans in of academic the areas of university-wide support services and administrative units programs received from the, the Council of Deans, Budget and Faculty Welfare Committee (BFW), the Faculty Senate, the~~

relevant committees of the Professional Employees Association (PEA) and the Classified Employees Association (CEA), and the USU Executive Committee [Flow chart 406.Y, Box 9].

If the university president makes revisions to the reduction and elimination plans based on recommendations by the Faculty Senate, the Budget and Faculty Welfare Committee (BFW), relevant committees of the Professional Employees Association (PEA) and the Classified Employees Association (CEA), and the USU Executive Committee, then the revised plan will be reviewed by the affected committees or associations. The university president will then consider recommendations from this review. ~~Revised plans will be reviewed by appropriate committees or associations and an opportunity for additional recommendations for revisions provided~~ [Flow chart 406.Y, Box 10].

Once plans for the reduction and/or elimination of programs in academic and administrative units ~~program~~ have been finalized, the university president will recommend the final plan to the Board of Trustees and then the Board of Regents for approval [Flow chart 406.Y, Box 11]. The Board of Trustees and the Board of Regents, in that order, will consider approval of the recommended plans for reduction and/or elimination in academic and administrative programs the university president submitted [Flow chart 406.Y, Box 12] .

Once plans for program reduction and/or elimination in academic and administrative units areas have been approved by the Board of Regents, the university president will deliver written notice to all affected by the plan [Flow chart 406.Y, Box 13].

~~(3) Academic program elimination or reduction:~~

~~The university president, after consultation with the USU Executive Committee, the Council of Deans, the Faculty Senate, and the Budget and Faculty Welfare Committee (BFW), shall direct the provost to develop plans for implementation of academic program elimination or reduction. These plans shall include a timetable for their implementation [Flow chart 406.Y Box 7].~~

~~The development of plans for academic program elimination or reduction plans must involve consultation among departmental and college faculties to identify areas under consideration for academic program eliminations or reductions. The following criteria and information sources shall be considered by those making judgments about which programs should be eliminated or reduced because of financial exigency: (a) legal mandate; (b) the general academic quality of the program with regard to scholarship, teaching, and service; (c) the extent of importance that the program has for the mission of the university; (d) the mission and goals of the university; (e) Graduate Council review; (f) findings reports by national accreditation bodies; (gf) reports by appropriate national ranking sources; (hg) such other systematically derived information, based on long-term considerations of program quality, as may be available; (ih) the capacity of the program to generate external funding; (ji) faculty/student student/faculty ratios; (kj) cost effectiveness when compared to similar programs at other universities; and (lj) relationship to the Board of Regents Master Plan for Higher Education in the State of Utah. The above list is not ranked and is not inclusive.~~

(4) Review.

If a plan calls for the elimination or reduction of a specific program, center, institute, school, department, college, or regional campus, or site, that element of the plan shall be reviewed by the Budget and Faculty Welfare Committee (BFW); the Educational Policies Committee (EPC); the Graduate Council, where appropriate; the faculty members and/or faculty committee most directly involved in the program; the appropriate department head or supervisor, academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean; relevant college committees or councils; relevant committees of the Professional Employees Association (PEA) and the Classified Employees Association (CEA); and relevant student advisory committees. The views of these bodies shall be forwarded to the Faculty Senate for its consideration within the time periods prescribed by the university president. The conclusions of the above bodies and the Faculty Senate shall be forwarded to the provost who shall consider them and forward them, along with his or her own recommendation, to the university president. When the university president's recommendations are submitted to the Board of Trustees and the Board of Regents, they shall be accompanied by the Faculty Senate's recommendations. After the Board of Trustees and the Board of Regents has approved the plan by the university to eliminate a program, the appropriate academic or regional campus dean, vice president, or chancellor of the program, center, institute, school, department, college, or regional campus, or site shall give written notice of the elimination to all persons, including students, in the program, center, institute, school, department, college, or regional campus, or site.

6.3 Stage 3. Implementation of Plans for Reduction and/or Program Elimination (Flow chart 406.Y).

(1) Development of Implementation Plans.

The university president will direct the provost and vice presidents to develop a plan with a timetable for the implementation of the plan to reduce and/or eliminate academic or administrative units programs [Flow chart 406.Y, Box 14].

The development of implementation plans for reduction and/or elimination of academic and administrative programs will include consultation with affected deans, departments, and faculty [Flow chart 406.Y, Box 15].

(2) Review of Implementation Plans.

The university president will provide an opportunity to review implementation plans for the reduction and/or elimination of academic or administrative units programs by all employees affected by the plan [Flow chart 406.Y, Box 16].

Recommendations from reviews of affected employees who wish to respond will be sent to the Faculty Senate, Professional Employee Association (PEA), and the Classified Employees Association (CEA) [Flow chart 406.Y, Box 17].

The Faculty Senate, Professional Employee Association (PEA), and the Classified Employees Association (CEA) will submit recommendations for revisions to implementation plans to the provost and those, together with all other previous recommendations, will be submitted together with the provost's recommendations to the university president [Flow chart 406.Y, Boxes 18 and 19].

(§ 3) Timetable.

~~Once financial exigency has been declared,~~ The university president shall submit to the Faculty Senate, Professional Employee Association (PEA), and the Classified Employees Association (CEA) a timetable for relieving the state of financial exigency. ~~Further, he or she and shall periodically report progress in this endeavor to these same bodies and the Trustees and Regents [Flow chart 406.Y, Box 20]. Faculty Senate on a quarterly basis.~~

6.4 Reductions in Status; Terminations

~~The procedures described in Policy 406.5.2 shall apply, . except that the appointment of a faculty member with tenure will not be terminated in favor of retaining a faculty member without tenure except in extraordinary circumstances where a serious distortion (see Section 406.2.7) of the specific academic program would otherwise result. The question of serious distortion shall be decided by the Educational Policies Committee (EPC) and the Faculty Senate, with the approval of the university president and the Board of Trustees. The finding of serious distortion shall be based on criteria which include, but are not limited to, essentiality of service and work, field of specialization, and maintenance of necessary programs or services.~~

6.5 Reinstatement

Reinstatement of tenured and non-tenure track faculty members terminated as a result of financial exigency shall follow procedures in Section 406.4.3.

406.75 REINSTATEMENT RIGHTS

75.1 For Tenured Faculty

~~Tenured faculty members terminated through program discontinuance shall, for a period of three years following the date of their final salary payment, receive preferential consideration among candidates with comparable qualifications for any vacant and funded university position for which they apply and are qualified. Upon request of the affected faculty member, during a grace period of three years, with the assistance of the appropriate administrators (e.g., academic dean or vice president for extension and agriculture, and, where appropriate, the chancellor or regional campus dean, and the provost) and with the consent of the receiving department unit, every a reasonable and good faith effort will be made to enable affected~~

~~faculty members who wish to do so, to obtain suitable positions for which they are qualified elsewhere in the university for which they are qualified during a grace period of three years.~~

~~In cases of termination of tenured faculty members, the position concerned may not be filled by replacement within a period of three years from the effective date of the termination unless the tenured faculty member has been offered a return to employment in that position and has not accepted the offer within 30 calendar days after the offer was extended.~~

~~75.2 For Non-Tenured Faculty~~

~~In cases of termination of non-tenured faculty members, the position concerned may not be filled by replacement within a period of one year from the effective date of the termination unless the person terminated has been offered a return to employment in that position and the person terminated has not accepted the offer within 30 calendar days.~~

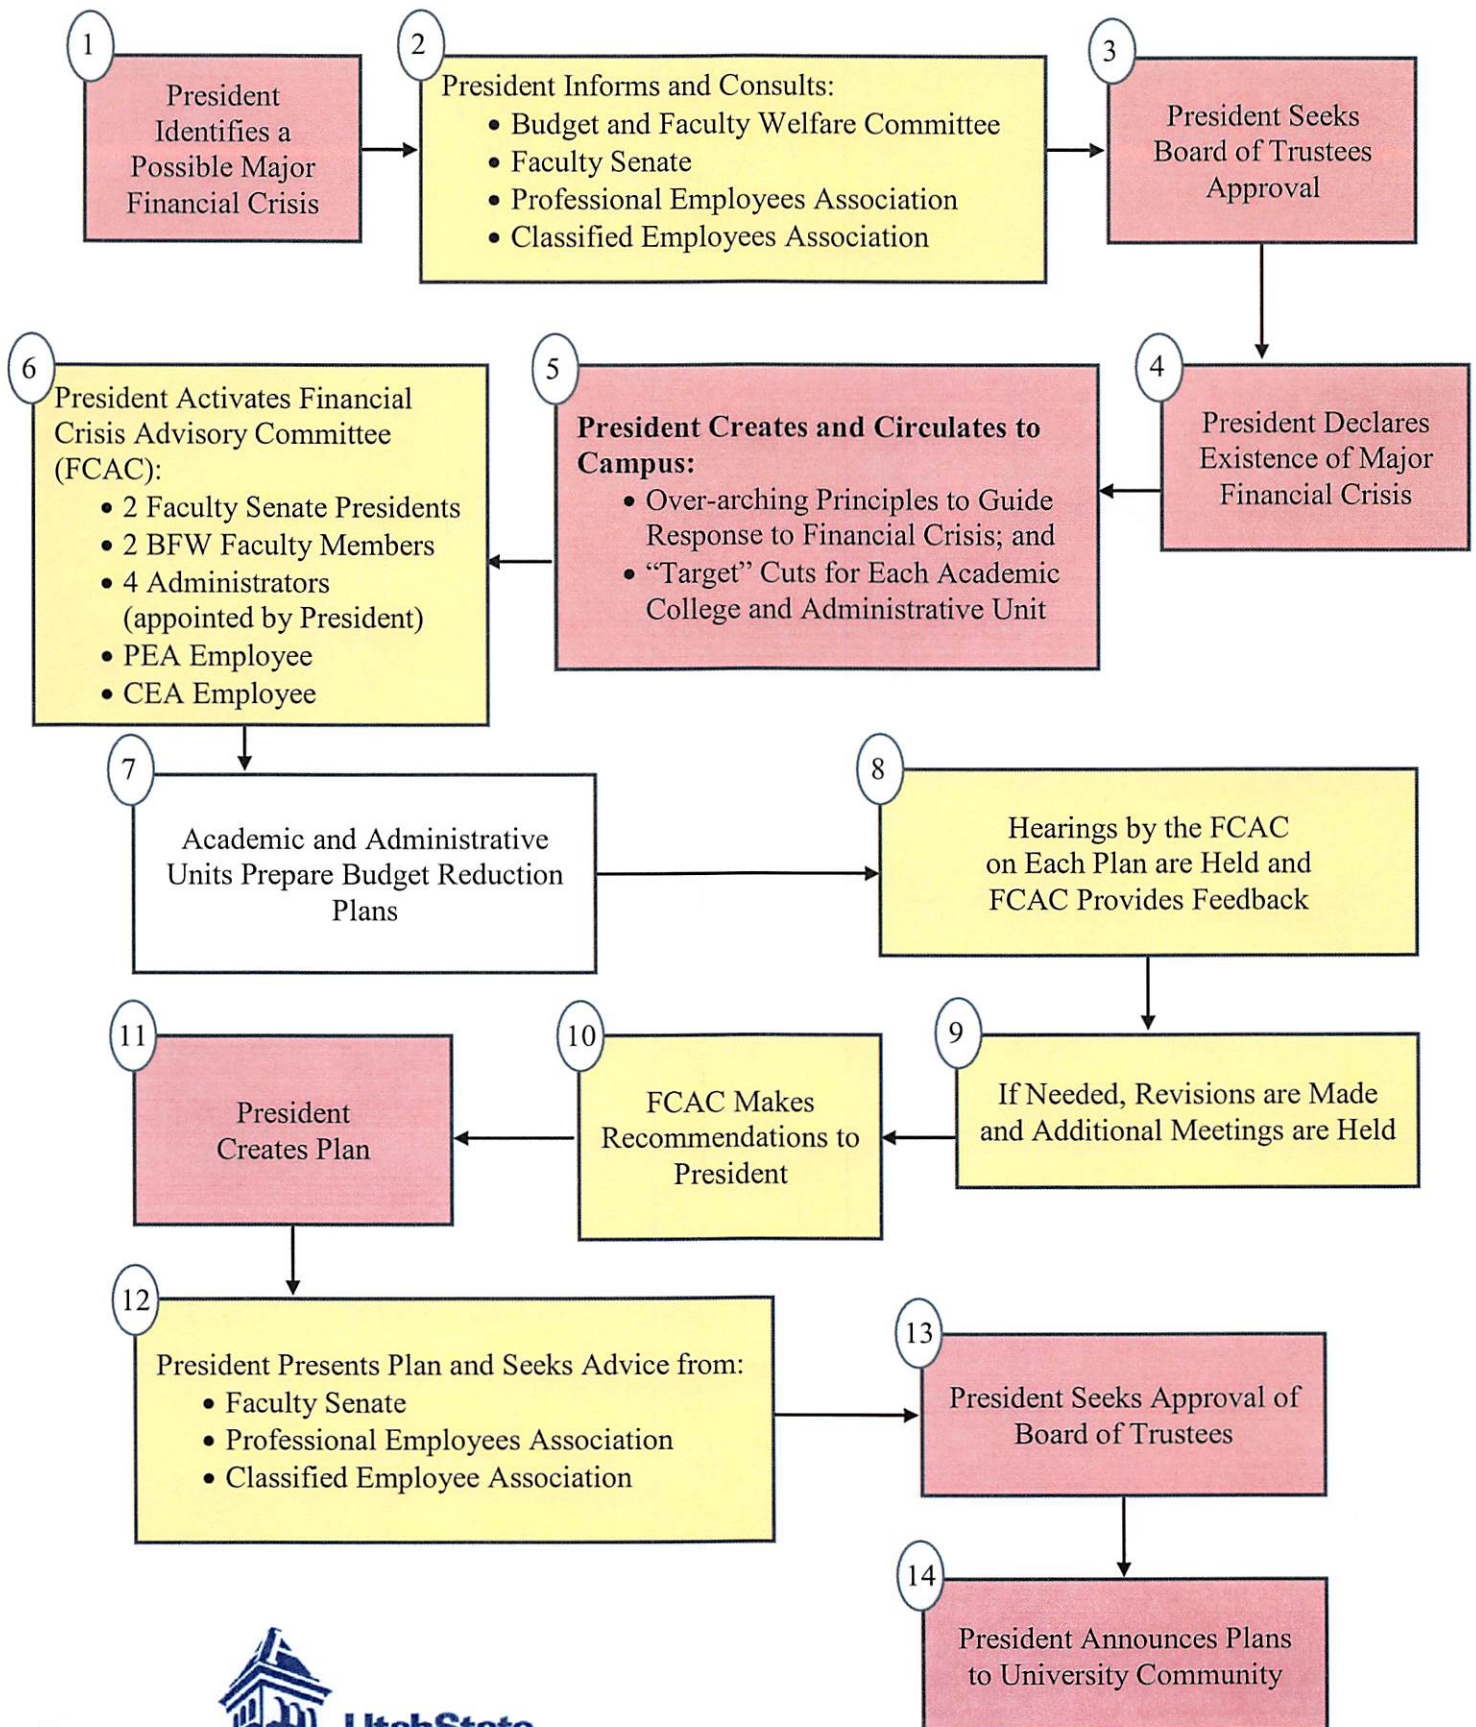

~~75.3 Termination of Offer of Reinstatement~~

~~If an offer of reinstatement is not accepted within the timelines stated above, the university and the Board of Regents have no further obligation to the person terminated. After the expiration of the applicable reinstatement period as provided herein, the institution and the Board of Regents have no further obligation to the affected faculty.~~

~~75.4 Faculty Status and Benefits after Reinstatement~~

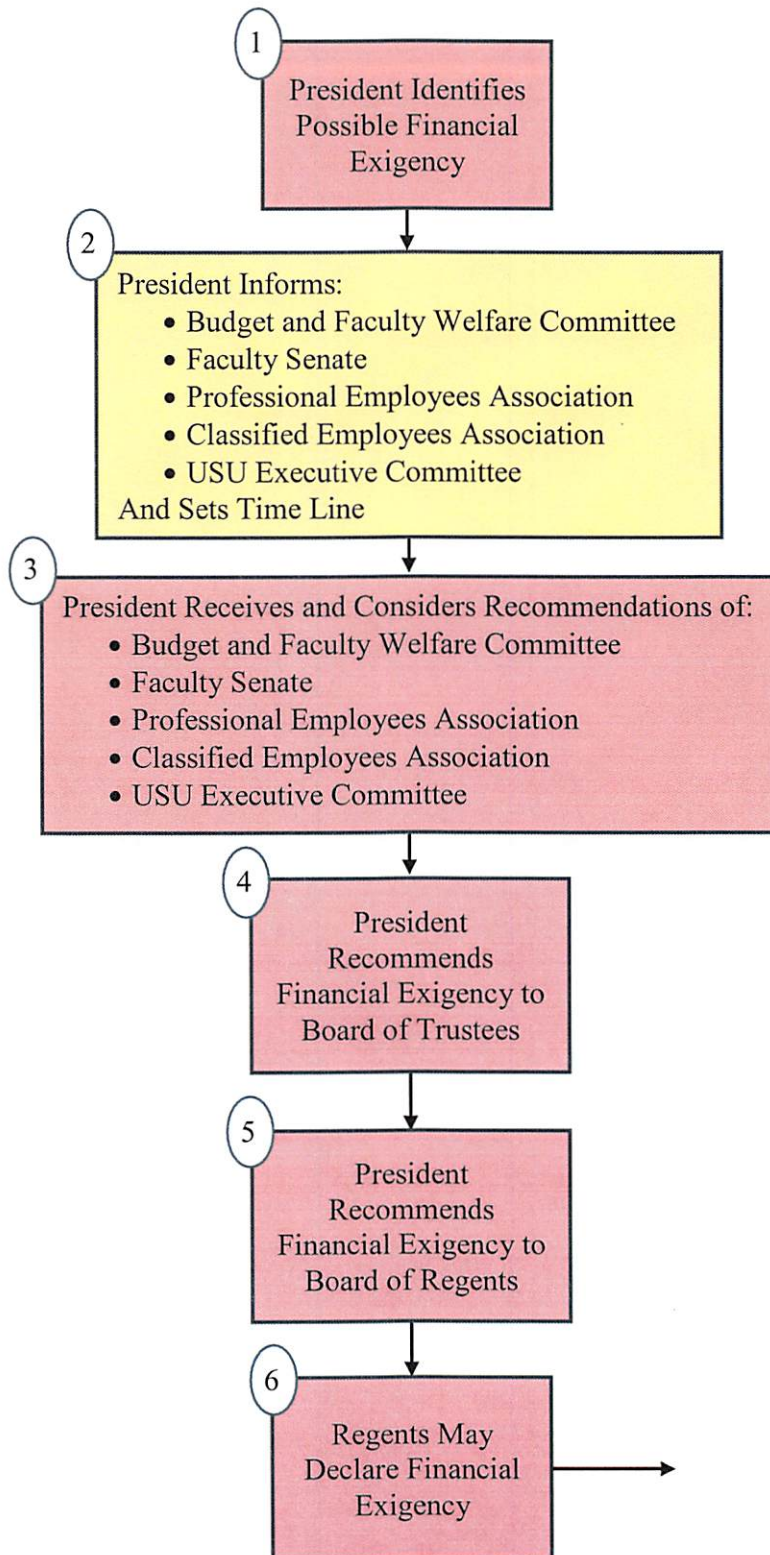

~~A faculty member who has been terminated and who accepts reinstatement in the same position will resume the rank and tenure status held at the time of termination, be credited with any sick leave accrued prior to the date of the termination, be paid a salary commensurate with the rank and length of previous service, and will be credited with any annual leave which that the faculty member had accrued prior to the date of termination and for which the faculty member has not received payment.~~

Outline of Process For Financial Crisis

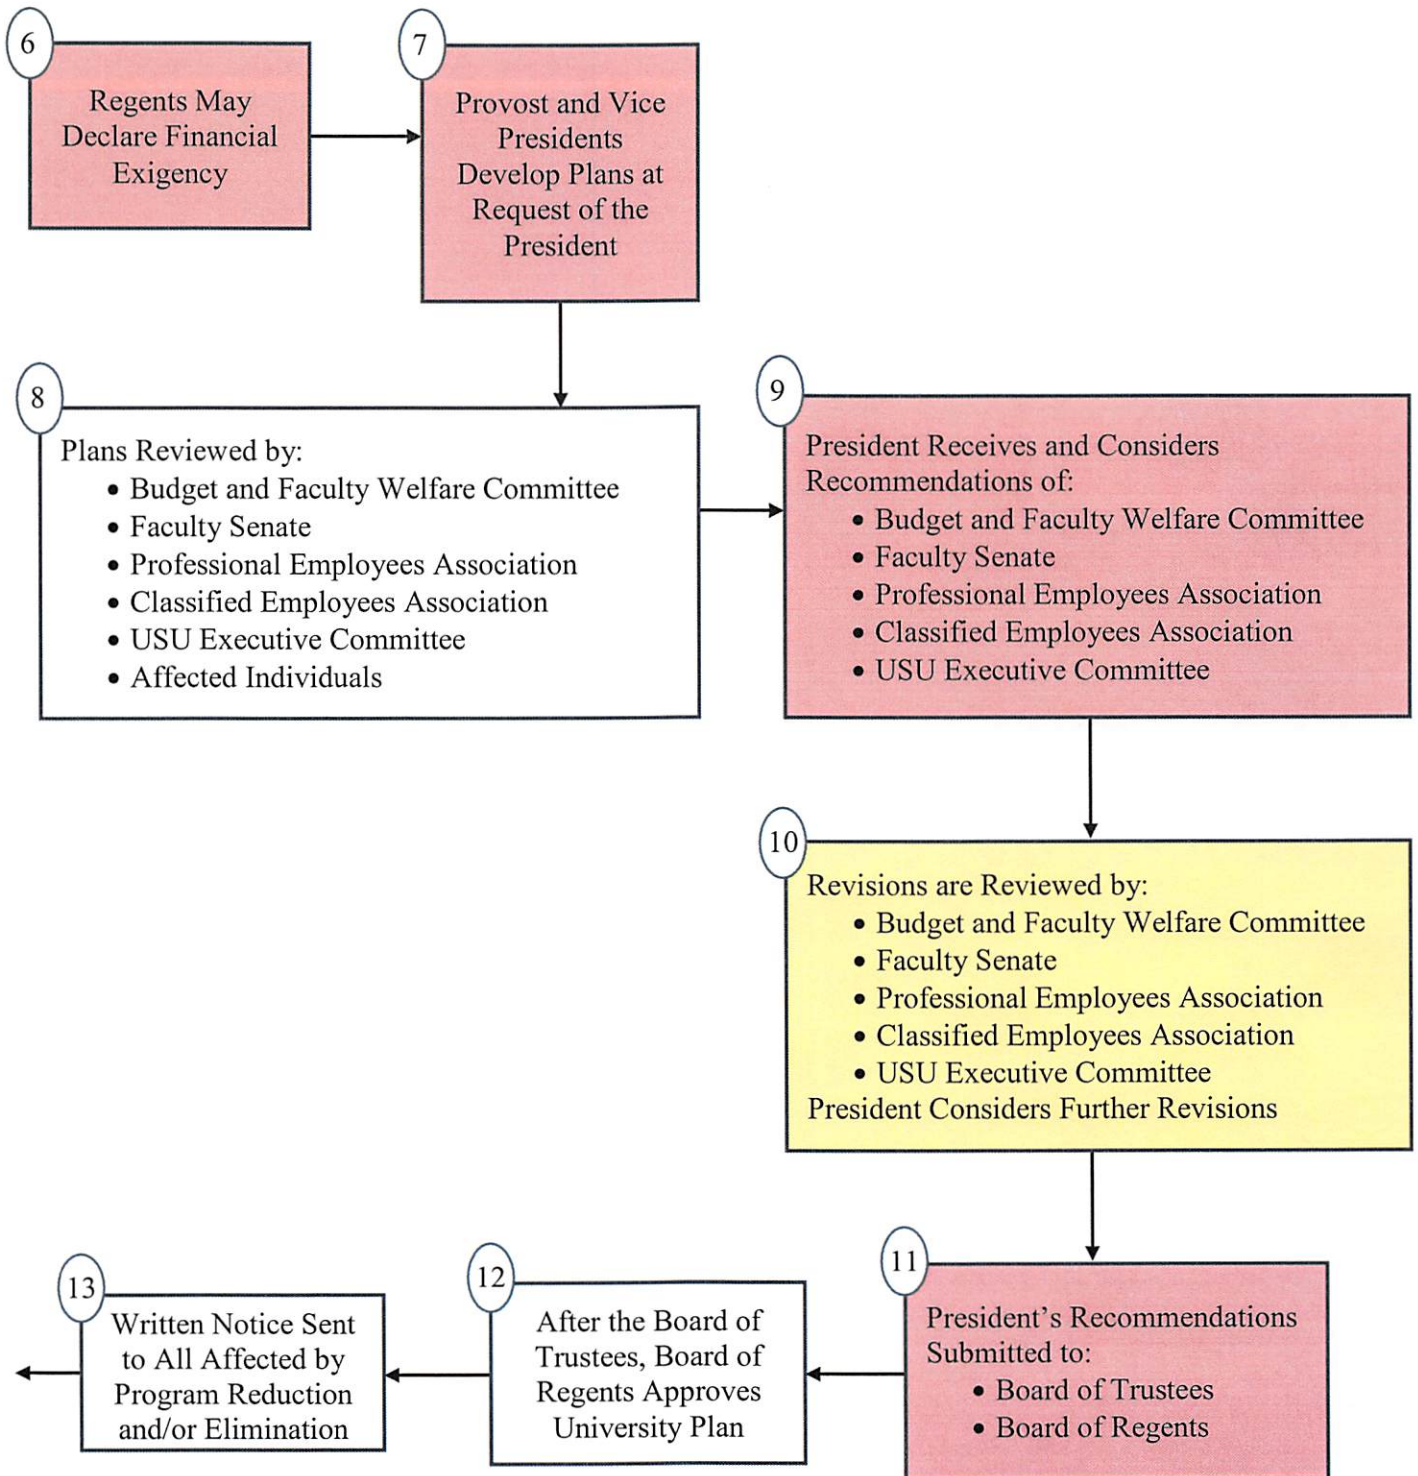

Outline of Process for Financial Exigency

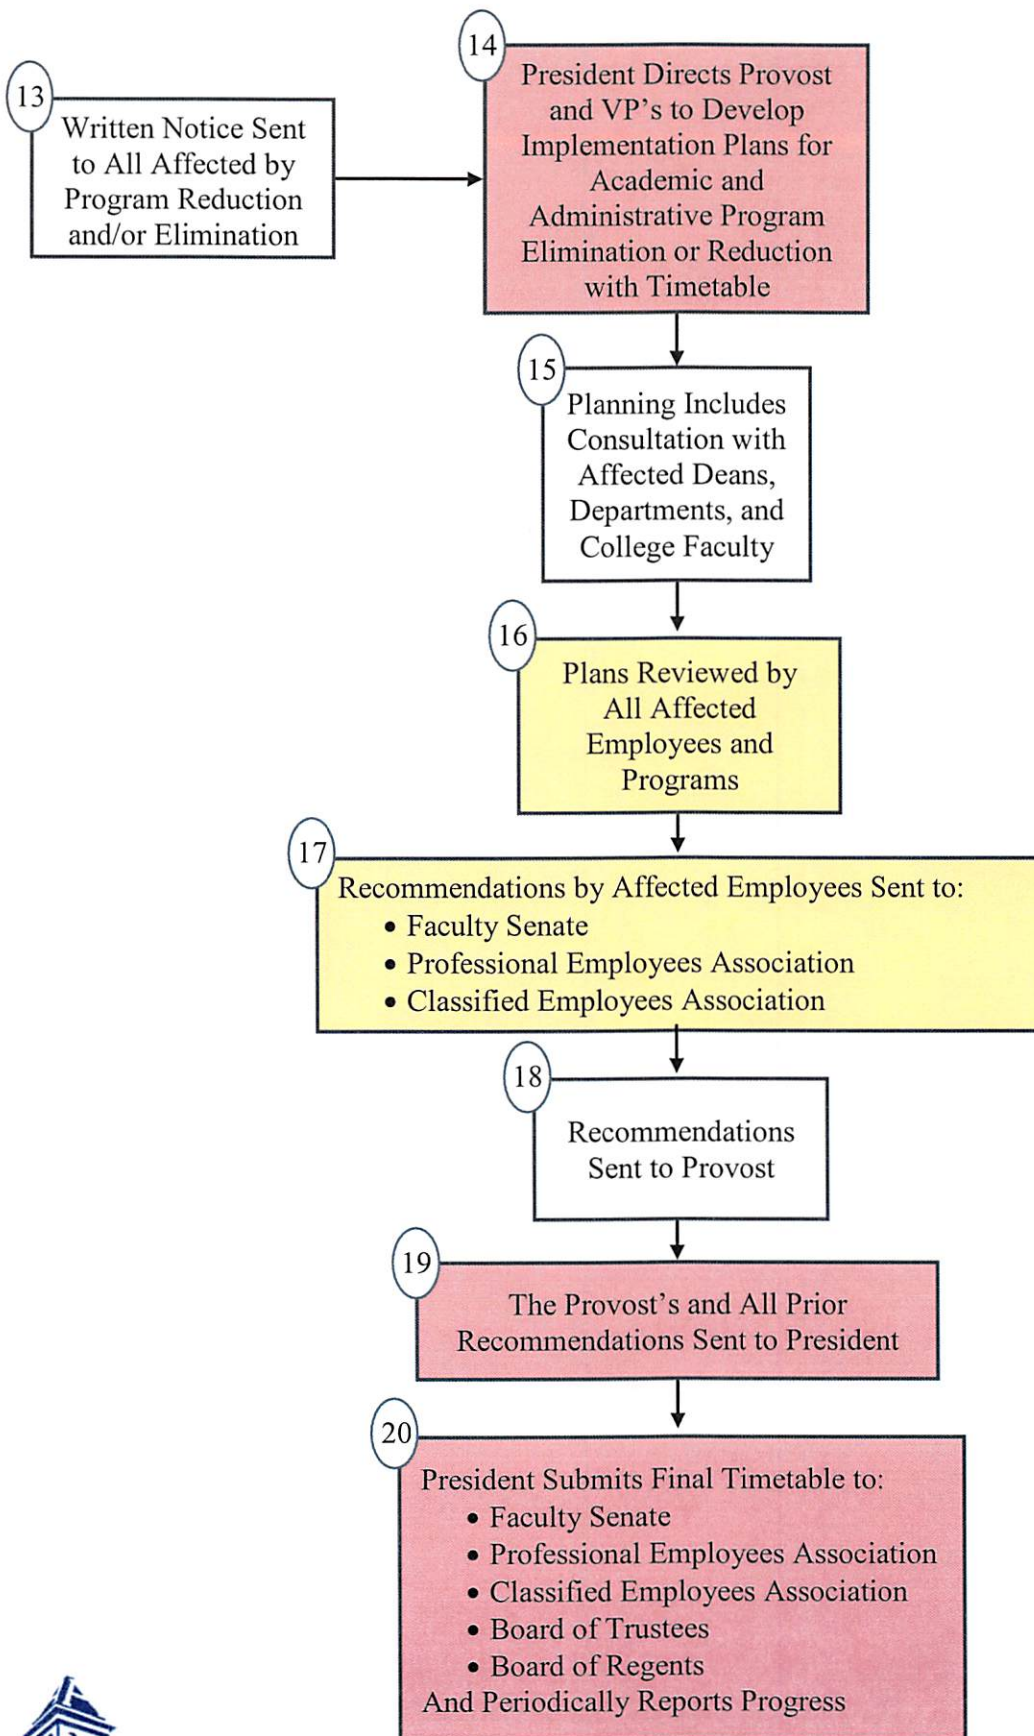

Stage 1. Procedure for Declaring Financial Exigency (Section 406.6.1)

Stage 2. Planning (Section 406.6.2)

Stage 3. Implementation (Section 406.6.3)

Federal and State Cooperator Faculty Positions

Currently, Faculty Code (401.4.2(4) designates a non-tenure, term appointment faculty rank of "Federal Cooperator." It is described as:

"Faculty members who are federal employees, who are paid by agencies of the federal government, whose primary function at the university is equivalent to core faculty, and who serve as faculty under cooperative agreements between the university and the federal government (e.g., U.S. Department of the Interior, Fish and Wildlife Service) may be appointed to one of the following ranks: instructor (FC), assistant professor (FC), associate professor (FC), or professor (FC), after full consultation between the department head and the faculty of the department that grants credit in this area. Appointments to federal cooperator ranks are made only in academic units where such cooperative agreements exist."

In the Quinney College of Natural Resources, we have had Federal Cooperators working as our faculty for decades. More recently (2013), we have entered into a similar relationship with a state employee of the Utah Division of Wildlife Resources. This employee (with a PhD) performs duties similar in academic responsibility to our federal cooperators under a cooperative agreement.

I recommend that we amend the Faculty Code to allow state employees whose primary function at the university is equivalent to core faculty, and who serve as faculty under cooperative agreements between the university and the state government (e.g., Utah Division of Wildlife Resources), to receive this term appointment faculty rank as well.

Robert Schmidt, PhD
Certified Wildlife Biologist ®
Distinguished Associate Professor of Honors Education

Faculty Senate Committee Change Proposal 402. 12

A tremendous amount of faculty time is used on committee service. Listed below are the committees that are staffed by faculty senate. There are many, many other committees including college, department and program committees. Some of these Faculty Senate committees would function much better if they were smaller.

	Current # of Faculty Required	Proposed # Faculty	# of Senators	Δ in Senators
Faculty Senate Executive Committee (nc)	15	15	15	0
Committee on Committees (nc)	3	3	3	0
Academic Freedom and Tenure	15	12	3	0
Benefits and Faculty Welfare	15	12	3	0
Faculty Evaluation Committee (nc)	12	12	0	0
PRPC (Change to all 7 senators)	15	7	7	+6
Faculty Development Diversity & Equity	15	7	0	0
Educational Policy (No senators)	<u>13</u>	<u>13</u>	<u>3</u>	+3
	103	81	34	

Proposed: 22 fewer Faculty Senate committee assignments

Non Faculty Senate Committees Staffed by the Senate (but not required to be senators):

1. Athletic Council - 3 men & 3 women
2. Facilities Naming Committee - 2
3. Calendar Committee - 4
4. Graduate Council - 1
5. Honorary Degrees & Awards Screening Committee – 3
6. Honors Program Advisory Board - 1
7. Research Council - 1
8. Parking/Transportation Advisory Committee – 2
9. Department Teaching Excellence Award Committee - 2
10. University Assessment Coordinating Council - 2
11. Student Conduct Hearing Board - 4

Total 32

Most of these committee assignments are currently required by Faculty Code. No changes are proposed at this time in these non-Senate committees, although this is something to assess in the future.

Date of Origin: January 24, 1997 Bereavement Leave, Jury and Witness Leave, and Special Development Leave

July 1, 2004 Organ Donor Leave

Date of Last Revision(s): March 6, 2015, [October 21, 2016](#)

[Effective Date: October 21, 2016](#)

369.1 PURPOSE

The University offers benefit eligible employees the following additional leave benefits: Bereavement Leave, Jury and Witness Leave, Special Development Leave, and Organ or Bone Marrow Donor Leave.

369.2 POLICY

2.1 Bereavement Leave

The University provides up to three work days paid time off due to the death of an immediate family member. For this policy, immediate family is defined as: employee's spouse or domestic partner, son, daughter, son-in-law, daughter-in-law, foster child, parents, parents-in-law, brother, sister, brother-in-law, sister-in-law, grandparent, grandparent-in-law, grandchildren, and step-relative.

2.2 Jury and Witness Leave

For the period during which an employee is absent from work for compliance with an official requirement to appear for jury service or a subpoena to appear as a witness at a trial, deposition, or other official proceeding, the employee will receive full salary. Time allowance for jury and witness service covers only time lost while actually engaged in jury service or in attendance as a witness and reasonable travel to and from the place of jury duty.

Employees are expected to report daily to work before and after jury service or jury attendance when feasible. Any funds received for jury duty remain with the employee.

This policy does not apply to employees who appear in court on their own behalf. Expert Witness Services is covered by Policy 376 Extra-Service Compensation and Policy 377 Consulting Service.

2.3 Special Development Leave

~~The University may grant Exempt (faculty and non-faculty) and non-exempt staff may request~~ a special leave with pay for developmental purposes. Special Development leave is not a right, but a privilege. This leave must be requested in writing. The leave approval, pay, and terms of the leave are at the discretion of the Department Head, Director, or Dean/Vice President. Any leave agreement should stipulate the length of the leave and the agreed rate of pay. The length of leave may not exceed one year, nor can the rate of pay exceed as stated in Policy 365 Sabbatical Leave. The negotiated agreement must be approved by the appropriate Dean or Vice President and forwarded to the President for approval.

2.4 Bone Marrow or Organ Donor Leave

The University grants special paid leave to employees who are temporarily disabled while serving as a bone marrow or human organ donor. Employees who donate bone marrow shall be granted up to seven (7) calendar days of paid leave. Employees who donate a human organ shall be granted up to thirty (30) calendar days of paid leave. Additional leave required for donor disability beyond the specified days may be taken under Policy 363 Sick Leave and Policy 351 Family and Medical Leave (FMLA). In cases in which this leave also qualifies as Family and Medical Leave, the FMLA leave will run concurrently with this leave. Donor leave must be requested in writing, including documentation from a medical practitioner authenticating the donation.

~~The Genetic Information Nondiscrimination Act of 2008 (GINA) prohibits employers and other entities from requesting or requiring genetic information from an individual or family member, except as specifically allowed by this law. Employees must not provide any genetic information when responding to requests for medical information. GINA defines "genetic information" as family medical history, the results of an individual or family genetic testing, information about any genetic services sought by the individual or family member, genetic information of a fetus carried by an individual or family member, or an embryo lawfully held by an individual or family member receiving assistive reproductive services.~~

369.3 RESPONSIBILITIES

3.1 Office of Human Resources

Commented [CN1]: This section has nothing to do with various leave benefits and should be removed.

In addition, after speaking with Marla, she indicated that State Risk management recommended removing the GINA statement from policies where it had been inserted when everyone believed it had to be and yet it had nothing to do with GINA and the principle involved.

Responsible for assisting in the implementation of this policy in accordance with the University's insurance providers and making the information available.

3.2 Employees

Responsible for notifying his/her supervisor, working with the Office of Human Resources when the above leaves are requested, and complying with the requests for documentation.
