BASED ON YOUR ANNUAL HOUSEHOLD INCOME, DO YOU KNOW THE AMOUNT OF MORTGAGE YOU CAN QUALIFY FOR? *This chart simplifies the qualification process by using figures based on principal and interest (PI) equaling 25% of your gross income. This means your taxes and insurance are not included. Since most lenders qualify buyers whose total housing expenses include taxes and insurance (PITI =28% or 29% of gross income), this chart will give you a fairly accurate answer on how much house you can afford. (Circle one.)*

Calculate Your Payment

The amount of your mortgage will depend on how much you borrow, the term (repayment period) of the loan, and the interest rate. If you know how much you need to borrow (the purchase price minus your down payment) and what the interest rate will be, you can use this chart to find what your monthly payment will be if you get a standard 30-year fixed-rate mortgage. Note that this chart includes only principal and interest payments, not property taxes and hazard insurance.
