Utah State University
School Health Emphasis- BS Health Education and Promotion & Minor
09/23/2014

Section I: Request

Discontinuation of the School Health Emphasis within the BS Health Education and Promotion degree and the School Health Teaching Minor. This will result in Utah State University no longer offering teacher education preparation for the Health endorsement.

Section II: Need

In the past three years the School Health emphasis at USU has averaged three graduates and this trend has been declining for the past decade. With the growth of the Community Health and Health Sciences emphases (approximate doubling from 70 to 145 students) within the BS Health Education and Promotion degree present resources make it extremely difficult to serve all three emphases. At present Weber State University offers the School Health Teaching Major while BYU, the U of U, and SUU offers the School Health Teaching Minor. These programs have the capacity to provide sufficient graduates to meet future state demand for licensed School Health teachers.

Section III: Institutional Impact

This discontinuation will also impact the School Health Minor as the HPER faculty will remove school health curriculum from academic courses and will no longer be offering supervisory services for teacher education in School Health. The School Health Emphasis at present has 15 students enrolled in the program while there are no students currently enrolled in the School health Teaching Minor. All remaining students who desire to earn the School Health Emphasis will be alerted to a schedule where the required courses will be offered in order for them to complete the program. No request for new faculty, staff or physical facilities will be submitted. No negative impact on other undergraduate programs is anticipated.

Section IV: Finances

No new funds are requested and there are no new budgetary impacts on the department or college.

Section V: Program Curriculum

All Program Courses

The current courses for the School Health Emphasis program will continue to be offered as part of the Community Health and Health Sciences emphases within the BS Health Education and Promotion degree with the following exceptions:
