NUMBER 1.

FOOTBALL TEAM SHOWS FORM

LOSS OF STARS OF LAST
YEAR LEAVES BIG GAPS
IN LINE-UP.

New Men Showing Up Well.
Prospects Fair.

With the opening of school, now three days past, football practice is well under way. Every afternoon sees many new men up on the field working out under the direction of Coach Teetzel and Captain Jones. Jones will be at his old position of left end this year. His work last year was of good quality and he comes back to us in excellent condition to better his already excellent record.

Of last year's team but few of the old men will be back. Crookston and Caine will be here and

JENK JONES, 12.
Captain Football Team.

Martineau will be in about a week late. Fred Brossard will be at Berkley this winter, leaving the position of right end open. West Lindsay will not return, having been called to missionary work by the Mormon church.

With many positions to fill, Coach Teetzel is trying out many likely candidates and from all appearances the competition will be keen. A number of men with football experience are registering this fall but because of the one semester ruling, they will not be eligible this season. Next

SMART GYM WILL BE READY EARLY

TWO FLOORS WILL BE FIN-
ISHED BY FEBRUARY,
ONE BY JANUARY

Alterations in Main Building Add
To Efficiency

During the summer extensive improvements have been made at the College. These include first, the Smart Gymnasium, on the construction of which a large force of men is at present engaged. Most of the preliminary work has been done and the actual construction of the building has begun. Students will recall that the contract was let to a Salt Lake contractor, Mr. Curley, who will construct the building in accordance with plans drawn up by Salt Lake architects, Cannon and Fetzer. The building will be finished in concrete.

Plans of the building include everything connected with a modern gymnasium. There will be training quarters for women as well as for men, with a large swimming pool and ample locker accommodations. The building will occupy the site formerly occupied by the residence of the Director of the Experiment Station. This residence has been moved to Eighth East street and

(Continued on Page Five)

JOHN T. CAINE, SR., ANSWERS CALL

John T. Caine of Salt Lake City, father of our registrar and grandfather of John T. Caine III was called by death last Wednesday morning at 9:15. Old age, he was 83 years old, coupled with the shock caused by his wife's death which occurred the 20th of last July, are the principal causes of his death. Mr. Caine has long been one of the prominent and influential men of Utah representing this state in congress in 1896.

The funeral will probably be held next Sunday at the eighteenth ward chapel in Salt Lake City.

HEAVY COLLEGE ENROLLMENT

THREE DAYS REGISTRATION
SHOW MARKED INCREASE
IN ATTENDANCE

Most Noticeable Growth in High-
er Classes.

The figures from the Registrar's office at the end of the third day indicate that there will be a marked increase in College attendance over preceding years. Most noticeable, and gratifying to the administration is the large number of High School graduates who have applied for admission. These represent all the larger High Schools of the State, particularly Salt Lake, Ogden, Park City, and Brigham.

The influence of the alumni is very distinctly felt in registration this year, many of the candidates coming directly from A. C. graduates who are principals and superintendents throughout the State.

THE WHOLE STATE IS THE CAMPUS

AGGRESSIVE EXTENSION
WORK COVERS LARGE
FIELD.

The Extension Department has been extremely busy during the summer. Immediately after the close of school, one party consisting of Prof. L. A. Merrill, Dr. E. D. Ball, Prof. W. W. McLaughlin and Mr. L. M. Winsor made a trip through the Uintah Reservation and outlined a series of co-operative experiments with the homesteaders there. Later a party made up of Prof. J. C. Hogenson, Dr. Robert Stewart, Dr. L. D. Batchelor Prof. W. E. Carroll, Mrs. Blanche Cooper and Mr. L. M. Winsor held a series of Institutes at Vernal and Roosevelt. In June Prof. L. A. Merrill spent some weeks in Southern Utah in co-operation with Mr.

FACULTY AN EMINENT ONE

ELEVEN DOCTORATES FROM
LEADING COLLEGES OF
AMERICA REPRESENTED.

Alumni Contribute to Brilliance
of 1911 Roster.

More changes are made in the faculty of the College this year than in any other single year. Along with these changes has come a raise in academic standards, changes greater than the College has ever before experienced. The faculty as is now stands, it is conservative to say, represents a higher standard of technical training than any similar institution in the West. The number of Doctorates on the faculty is now eleven, these representing the greatest universities and colleges of America and Europe. The present faculty is especially fortunate in its cosmopolitan nature. The institutions most heavily represented are Harvard, Cornell, Columbia, Illinois, University of Chicago and the Iowa State College. Harvard is most heavily represented with four heads of departments and five assistant professors. Cornell is second with four heads of departments, then follow the other institutions mentioned in addition to which there are representatives from Ohio University, Bowdoin, West Point, Michigan and others of the large institutions of the country.

Prominent among the additions to the faculty this year is Dr. E. G. Titus who returns from Harvard University after a year's work in Zoology and Eugenics. Prof. Titus is eminent in the field of Entomology, is a member of many scientific societies and has been at different times on the faculties of the Agricultural College of Colorado, University of Illinois and was for a time in charge of one branch of Entomological investigations in the U. S. Department of Agriculture.

Dr. F. L. West of the Univer-

GRADUATES TO HELP COACH TEETZEL

Logan, Sept. 20.—Coach Teetzel announced today a new system of coaching at the Agricultural College. He has modified the eastern graduate system of coaching to his special conditions and has secured Archie Egbert, the quarter of 1908, who since that time has played on the University of Ohio eleven. Egbert has consented to take charge of the quarterback coaching. William Peterson, an old line man, will aid in line coaching. The coach is also in correspondence with E. Crawford, the famous end of 1903-4, and it is expected that he will be able to return to the college for a week to coach the ends. Crawford received considerable training under Dave Campbell, the famous Harvard captain. Other graduates will be pressed into service as their time permit.

This move of Coach Teetzel's is a continuation of his efforts to keep athletics at the college as free from professionalism as possible. He says.

"The ultimate aim of college athletics is physical training. I am endeavoring, therefore, to eliminate as much as possible, the professional element from the work. I expect that the return of the old graduates as assistant coaches will have a double effect. It will impress upon the new men a higher ideal of athletic work, and at the same time will main-

tain among the old graduates an active interest in their Alma Mater."

A large squad of football men reported for work Monday under Captain Jones and Coach Teetzel. Among the new men was Schweitzer, an old player; Batt, an eligible this year, who has played a year on the college eleven; Martineau, last year's center, and Crookston, fullback. Leatham and Walker, promising line men, have reported for work.

Price, the phenomenal Springfield high school sprinter, reported for registration today, and may be utilized at the quarterback position.—Herald-Republican.

EXHIBIT OF U. A. C. AT STATE FAIR.

The Utah Agricultural College will make, as usual, an extensive exhibit at the Utah State Fair this fall. The Department of Animal Husbandry will show a large number of pure bred animals recently purchased for the college in the East. This should be of especial interest to the stockmen of the state. From the Department of Agronomy will come a large exhibit of field crops. This exhibit will be very comprehensive in its nature. The value of the different Utah wheats as bread makers will be shown by the chemistry Department. Dr. Stewart has spent much time investigating this subject the past year and has

an exhibit to offer that will be of unusual value, not only to the farmers but to the millers of Utah. Few departments of the A. C. have done more practical work for the state than has the Entomological Department. This year an extensive exhibit will be made showing the various insect pests of Utah and giving the most successful methods of combatting them. The school of Home Economics will have its usual interesting and valuable exhibit, both the Department of Domestic Science and that of Domestic Arts being fully represented. The School of Mechanic Arts will exhibit work from all of its departments. Work from the machine, forge and carpentry shops will be exhibited as well as special work in wood carving.

Football prospects are daily growing brighter. It is now announced that "Willis" Batt and "Scenic" Nelson will be in their old places this year.

Library Notes

As the library has grown from year to year the stack room has become more and more crowded until this year it was found necessary to provide additional shelf space. A room in the basement, just east of the cafeteria has been fitted with shelves and will be known hereafter as the "Documents Room." All unclassified documents will be bound in this room. It is the librarian's intention to provide study tables and chairs so that this stack room may be used by our college debaters as a place in which to work over their debating material. All who have ever had occasion to represent the college upon any debating teams will readily see what great assistance this privacy will add.

Taking the hundreds of volumes of documentary material from the regular stack room necessitated a complete rearrangement of the volumes remaining. Because of this old students may find themselves puzzled when trying to locate books. The same method has been retained in the arrangement of books, however, and a few minutes search will set them right.

Many new reference books have been added to the library, one deserving particular mention being Webster's New International Dictionary. This edition of Webster's has been completely revised and greatly enlarged. One feature added is that of the "double alphabet." Those words in greatest use are arranged alphabetically in the old Webster type on the upper part of each page while below, in smaller type, the uncommon words are listed.

The most valuable acquisition made to the library in late years is an almost complete set of the geological and geographical surveys of Hayden, King, Powell, and Wheeler. These sets, which are government documents, are very scarce and much sought after.

Much work has been done, by those connected with the library during the summer just passed to complete the files of the publications of the Smithsonian Institute and the United States National Museum.

Many additional volumes have been added to the library this year in all of the departments,

including fiction.

No one, upon entering the library, can help but notice the great improvement that has been made in the general appearance of the room. The walls have been freshly painted, new oil paintings have been hung and the tables newly varnished.

Mrs. Day has been retained as a sistant librarian this year, additional help having been found necessary.

FOOTBALL TEAM SHOWS FORM

(Continued from page 1)

year, however, it will be possible to use them.

Colorado Aggies Oct. 9th.

Our first game occurs on the ninth of October upon our campus. It is with the Colorado Aggies. Reports say that the Colorado team has been practicing some four weeks already, while Coach Teetzel does not hope to have more than two weeks team practice before the game. The advantage, at first glance at least, is decidedly with Colorado.

Candidates! Get Out.

At present it seems as if the team would be represented upon the gridiron this season by an almost entirely new aggregation of football material. Many of last year's warriors were members of the graduating class and hence will not return. Others for various reasons will not be back. This does not mean, however, that our team this year will not be a strong one, one not capable of upholding our honor upon the field. Coach Teetzel has already demonstrated what he can do with a hard schedule and a bunch of green material; and with the proper co-operation on the part of the candidates for football honors, and the Student body we should see a group of men wearing the blue this fall with a fighting chance at least of carrying off the State Championship. It should be remembered that co-operation is absolutely demanded, however. Hard work is needed to make a winning football team, and it is imperative that every man, who has any desire whatever, don a football suit, and get out to practice at once. At once means today—not tomorrow—not next week—but today.

Many students, far too many, hesitate about entering such a competition. They are afraid that the other fellow whose shoulders are perhaps a little broader or who has had a little more experience will get the position they want. They fear that because the other fellow can say in a familiar way "Hello Coach," that the Coach will give him preference when the first team is chosen.

This is wrong, all wrong. The football team is selected with one end in view—to get the man who plays the game. Many a new man, physically weaker than his opponent, a man new to the game, has developed into a star player simply because he would not admit the possibility of failure but was willing to work to gain the position he sought. In fact the spirit shown by such men is worth more in a real contest, football or any other kind, than mere physical strength or fitness. Every man in school has a chance to represent the College upon the football field and every man who is inclined should work that chance for all it is worth. Remember that work—faithful work is what counts; so get in and help the Coach and Captain.

INTENSIFIED GARDENING

A little patch for onions.
A little patch for peas.
A patch for early lettuce
And hardy radishes;
A place for corn, a place for beets
Not over two feet wide,
My gardening this year you see,
Must be intensified.

A place for carrots, too, I need,
For cabbages a plot;
A foot or two for butter beans,
For cauliflower a spot.
Tomato plants will need some space
But where, I can't decide,
The garden I am planning now
Will be intensified

The problem of the back yard is,
I state it for a fact,
To make it put to shame, for work,
A forty acre tract,
I'm crowding vegetables in,
I've jammed 'em side by side,
My garden, you can bet your life,
Will be intensified.—Ex.

VOL. 10.

NO. 1.

Friday, September 22, 1911.

The regular editor of Student Life, Ivan L. Hobson, is among those who will be absent from College this year. He has been engaged by the Ogden High School as instructor. Last year's editor, assisted by an old graduate who happened to be hanging around, is responsible for the sheet today. Our fingers are a little stiff from disuse and it's a little more difficult to use the superlative than it once was.

Otherwise it isn't half bad.

The Agricultural College is the home of a bunch of ideas—some new, some as old as the Nile. If the man arriving for the first time will gently listen he will gradually become possessed of the Things of which the College is proud.

The first is this. Utah Agricultural College men are all Last Ditchers. They don't go down in any fight until the last word is said and then they hit just once more, hard and square and to the point.

From the time when grand old Prexy Sanborn said, "Gentlemen and Ladies, you are a College" to the time (which was yesterday), when Captain Jones of the football team said, "We're going to fight some," the world-old thrill of honest conflict has been here. It has covered this little College with glory.

College men are jealous of this spirit. They welcome the new

comer who is willing to pay tribute by the best he has to Alma Mater. They are not slow to show an active concern when somebody begins to go wrong. The new man and woman will find here opportunity for an ample expression of the best they have.

This Last Ditch spirit has found expression in athletics, debating, and in other activities of College in which man comes in conflict with man. It has found expression in that fiercer and more extensive competition—Life itself. Here, U. A. C. men have made good.

We are cultivating the habit of success. Last year was a year of notable achievement by the Student Body. In track athletics and in debating highest State honors were ours. The year ahead will be one of hard fighting; but we have a good chance of victory.

The athletic look-out this year is not especially brilliant, but it is promising. The Coach and captain must whip into shape a lot of new material if a successful season results. They are at work. They should, and we know they will, receive the support they deserve.

THE WHOLE STATE IS THE CAMPUS

(Continued from page one)

Douglas White, Industrial Agent of the Salt Lake Route, going over the various projects and giving encouragement and advice to the new settlers. This trip was made in an automobile and many sections never before visited by members of the Agricultural College faculty were inspected. Practically all of the south-western counties were visited in this way and Prof. Merrill predicts a good future in an agricultural way for this section of the state.

The Extension Division has been called upon to furnish judges at practically all of the County fairs held throughout the State this year. Professors Merrill, Caine, Hogenson, and Carroll did the judging at Washington, Beaver, Sevier, Boxelder, Summit, Morgan, Wasatch and Cache Counties. The Department pro-

poses next year to assist the counties in preparing their premium lists and hopes in this way to create an interest in better farming methods and improved live stock.

The Extension Division of the Agricultural College now has permanent quarters in the Vermont Building at Salt Lake City. Three members of the Staff, Professors L. A. Merrill, J. C. Hogenson and Mrs. Hazel L. Dunford all members of the College faculty, spend their entire time in the field. The Department will be glad to have members of the faculty and student body makes these offices their headquarters while in the city.

On The Branch Line.

Stranger—But, hang it, man, if you don't know whether there'll be another train today who in thunder does?"

Native—Ye might try old Hank Henders over yonder. They do say he's a kind o' fortune teller.—Ex.

SMART GYM. WILL BE READY EARLY

(Continued from Page One)
placed with the row of cottages there.

Laboratories.

A marked improvement will be noted by the returning students in some of the important laboratories of the College. The Department of Agronomy has been renovated under the direction of Dr. Harris and more room supplied for regular courses as well as research work. In the laboratory of Bacteriology marked improvements have been made and additional courses added. The improvements include a sterilizing table which contains appliances for sterilization by live steam, dry heat and steam under pressure. More lockers have been added to accommodate the increasing number of students and additions have been made to the equipment along the lines of microscopes and accessories. Among the new courses announced are work in Soil, Dairy, Household, and Pathogenic Bacteriology. Research courses, especially along the lines of agricultural application are announced.

Art Rooms.

The removal of the gymnasium from its old quarters to the new building has thrown open the large room on the third floor. Sky lights have been placed in this room which make it a most excellent studio. Here the Department of Art will be amply accommodated for its work. The drill hall has been divided by partitions into a number of rooms which will be used for department libraries and some laboratory facilities will be afforded here, especially for work in Agronomy.

New Courses.

In line with the policy of the College to keep abreast of the times in educational methods and in harmony with its fundamental policy of applying science to life, two announcements have been made during the spring and summer which materially effect the course of study at the institution. The administration has established a course in Agricultural Engineering to include work in irrigation and drainage, rural surveying, hydraulics, construction of farm buildings, the manipulation of farm machinery, and road building. This course is a

magnificent organization and adaptation of engineering science to agriculture. It is a pioneer in its way and has been established in direct response to the industrial need of the inter-mountain country. It promises to solve in an admirable way the question of western agricultural reclamation. Its popularity has been almost instantaneous. Correspondence has reached the office from all over the west regarding the nature of the course. Other western states, notable the State of Washington, has began an agitation for the establishment of the same course in the Agricultural College at Pullman. It has elicited words of praise from governmental officials who see in it the solution of much of the work in reclamation.

Industrial Management.

The school of Commerce has announced to be given this year for the first time a course in Industrial Management which will be an innovation in educational methods. The course has never before been given in an American institution. It will be a combination course of science and business and will be given jointly by the Department of Economics and Chemistry. The details of the science end of the course are being worked out by the Department of Chemistry. The course will include a fundametal scientific knowledge of all of Utah's principle industries, such as sugar manufacture, cement manufacture, smelting, and mining processes in general, as well as all the science associated with agricultural industry.

A unique phase from the economic side will be the introduction of a practical method of education. Students will be forced to go into the banks, large merchantile establishments, factories, and other large commercial concerns of the State and spend there a part of their College course under the direct supervision of the managers of these enterprises. College credit will be given for the work.

Alumni Notes

The Class of 1911.

The largest class ever graduated from our Alma Mater is that of 1911, numbering sixty-four members. It is very significant that the great majority of these Alumni are engaged in high schools. The following is a partial list of the 1911 teachers.

Clarence E. Jones, Cedar City, Utah.

Junius J. Andrews, Lewiston High School.

A. E. Bowman, Assistant Agonomist, U. A. C.

Ivan R. Egbert, Smithfield High School.

Wm. LeRoy Jones, Fillmore High School.

James W. Sessions, Manti High School.

Charles Snow, Jr. San Luis Stake Academy, Colorado.

Harry P. Barrows, Brigham High School.

LeRoy Beagley, Wellsville High School.

Abram C. Cooley, Sandy High School.

Alma J. Knapp, Fielding Academy, Paris Idaho.

Mathew A. Nelson, Instructor in Zoology, U. A. C.

William J. Quayle, Instructor in Chemistry, U. A. C.

Alfred E. Stratford, Grace High School, Idaho.

George L. Zundel, Instructor in Botany, U. A. C.

Merrill P. Maughan, Millard Stake Academy.

Ephraim T. Ralph, Lehi High School.

Lars S. Christensen, L. D. S. Business College.

Newel H. Connish, Snowflake Stake Academy, Arizona.

Canute Peterson, Instructor in Stenography and Typewriting, U. A. C.

James A. Armstrong, Mt. Pleasant High School.

Henry Thomas Plant, Richmond High School.

Ira A. Cole, Logan City Schools

August L. Hansen, Instructor in Woodwork, U. A. C.

Sara Huntsman, Instructor in English, U. A. C.

Walter A. Lindsay, Hyrum High School.

Robert L. Wrigley, Branch Normal Cedar.

D. Earl Robinson, Instructor in History, U. A. C.

Diamond Wendelboe, Park City High School.

Vern C. Woolley, L. D. S. High School, Salt Lake City.

Anna C. Christensen, Manti High School.

V. Elizabeth Frazee, Logan City Schools.

Elda Havenor, Salt Lake City Schools.

Lucile Jensen, Brigham High School.

Coral Kerr, Instructor in Domestic Arts, U. A. C.

Clara Parrish, L. D. S. High School, Salt Lake City.

Georgiana Smurthwaite, Salt Lake City Schools.

ALUMNI VISITORS.

Among the prominent alumni visitors at the College during the summer was W. M. Jardine '04, Professor of Agronomy in the Kansas Agricultural College. Mr. Jardine spent two weeks in Logan.

Mr. F. D. Farrell '07 was at the College in August on his way to Washington D. C., where he is at present employed as investigator in charge of crop rotation and cultivation experiments in the office of Grain Investigations of the Bureau of Plant Industry. He resigned the directorship of Idaho sub-stations to accept the federal appointment.

Mr. J. T. Jardine '05 of the Division of Forestry of the Department of Agriculture spent a day in Logan visiting his parents during the summer. Mr. Jardine is at present engaged in range investigations in the department. Much of his field work is done in Oregon, Idaho, Colorado and Utah.

Ed. Brossard '11, is visiting the college this week.

SUMMER SCHOOL SUCCESSFUL

The Summer School held at the College during June and July of this year was in many respects a very successful session. The attendance was larger than at any previous session, and the special lectures were more noteworthy.

Dr. Curtis, the national authority on Play Grounds and an advocate of reform in school methods so as to provide more opportunity for outdoor work by the students, was the principal special lecturer. His series of talks included a demonstration of

school games which are being introduced into the grades.

Professor Bishop of Iowa, gave a series of lectures on Nature Study which were of special interest to College people in that he advocated very strongly the introduction of Agricultural education into all the schools. He maintained that all grade training in the rural districts should centre around agricultural problems.

The session was marked by the attendance of a large number of school principals from Salt Lake City who were preparing along industrial lines.

Foolish Fletcherizer.

The teacher was giving a lesson in natural history.

"And now, children," she said, "what animal do you think shows the least amount of intelligence."

Johnnie Jones, you may answer."

"Please, ma'am, the cow."

"And why the cow?"

"Because, ma'am, it eats first and Fletcherizes afterward."—Ex.

DE LAVAL

The Cream Separator by Which all others are Judged

For more than thirty years the DE LAVAL has been acknowledged as the World's Standard.

You may hear it said of some separator that "It's as good as a DE LAVAL;" or if some competing salesman wants to make his argument particularly strong he'll say "It's better than a DE LAVAL." The concern with a cheaply and poorly constructed machine says "Just as good as a DE LAVAL and costs less."

But everywhere the DE LAVAL is recognized by experienced creamerymen and dairymen and even by makers of would-be competing machines as the

World's Standard

The cream separator is more frequently used than any other machine on the farm, and for that reason, if for no other, only the very best should be purchased, and that's the DE LAVAL.

The more you come to know about cream separators the more certain you will be to buy a DE LAVAL.

The DE LAVAL SEPARATOR COMPANY

NEW YORK CHICAGO SAN FRANCISCO SEATTLE

Locals

Captain Jones looks as good as ever in football togs.

The "Lacern" out-off is already becoming well defined.

Miss Kyle recently returned from a delightful summer spent in Europe.

Kirby and Schweitzer are two new football men who are showing up well in practice.

Don't forget that every minute idled away is irrevocably lost. Proceed to work at once.

Joe Olson, manager of the football team for this season will not be back at the A. C. this year.

Prof. J. S. Powell of the Art Department, accompanied by Mrs. Powell, left two weeks ago for Paris where he will continue his studies.

There is certainly one good resulting from a military training. The ninety degree turn made by the cadet is the only thing that will prevent a fall upon our well oiled floors.

Students intending to take History 5 (History of the American West) or Political Science 11a (Municipal Government) should see Professor Dale in Room 105, Saturday between 8:30 and 11:00.

The cafeteria is now furnishing meals to students daily. One important feature of the management this year's cafeteria is the plan of dividing profits. A record is kept of the purchase of every student and at the end of the year the profits, if there be any, will be divided among the students according to their purchase. Ticket this fall in the city campaign.

Athletics will occupy considerable attention during the next month. The discerning young man will find, however, that the Agricultural College places the highest premium on brains—Which isn't saying that you don't use the collateral mentioned on the athletic field. Go out some afternoon and forget to think; it will take you about ten minutes to land on the third team.

Don't tell everyone that you are a Freshman, they can see it.

Lemon and Orange Peel have not yet reported for College work.

It certainly looks good to see the gym actually in process of construction.

If you are registered, then get busy. If you are not registered, then register.

!!!!!! Zounds! Is it possible? The first team will have new football suits this season.

Owen, Latham, Aldous and Frew, last year's football men, are now out every evening.

Dave Stoddard, appointed Manager of this year's Buzzer, will not return to school this fall.

Dr. George Thomas, head of our School of Commerce, was chosen at a mass meeting last Wednesday to head the Citizens' Ticket this fall.

Prof. Dale has been kept busy since his return from his recent Bear Lake trip, explaining how and where he became possessed of such a brilliant proboscis.

Henry V. Hubbard of the Department of Landscape Gardening of Harvard University, was at the College last week drawing up campus plans for future buildings. Prof. Hubbard was brought here specially for this purpose. While here he was the guest of the Harvard Club of the College.

The contract has finally been let for the State power plant to be located at the mouth of Logan canyon. Already considerable work has been done and the plant will be rushed to completion. M. W. Moran, an Ogden contractor, has secured the contract, his bid being \$17,000. This plant will develop one hundred horse-power and will furnish power for the State Agricultural College, the University of Utah, the State Industrial School, School for the Deaf and Blind and the new Capitol. The Telluride lines will carry the power from Logan to Ogden and Salt Lake City.

FIRST CHAPEL.

The first chapel of this school year was held yesterday, the main floor of the hall was well filled. The exercises opened with a solo by Prof. Thatcher. President Widtsoe addressed the students for a short time advising the entering students to begin earnest work early. He maintained that an early and vigorous start was half the battle in College work as elsewhere. He welcomed the new and old student and promised hearty cooperation on the part of the faculty for a successful year.

Sure of One.

He—You refuse me, then. Oh, well there are others!
She—I know there are. I accepted one of them this afternoon.—Ex.

UP AND DOING

Not all city folks are as ignorant of the farmers' surroundings as the farmers sometimes suppose. This was evidenced by an incident in the stay of a young New Yorker on a New England farm.

"Well, young man," said the farmer to his city boarder, who was up early and looking round, "been out to hear the haycock crow, I suppose" And the sly old chap winked at his hired man.

The city man smiled. "No," said he, suavely; "I've been out tying a knot in a cord of wood."—Ex.

Get'ting up in the World.

"That fellow is making money hand over fist."
"How is he doing it?"
"Climbing a circus trapeze."—Ex.

FACULTY AN

EMINENT ONE

(Continued From Page One)

sity of Chicago returns this year to head the Department of Physics. Dr. West has been at the institution before and was a graduate, of the class of '04. After graduation he spent some time in Stanford University and was later a professor of Physics in the B. Y. University. Aside from his regular university work he has attained some distinction in athletics being awarded, at the University of Chicago, the championship prize in gymnastic work. He announces in his department this year additional courses in the application of Physics to Agriculture and household industry. He is a member off Sigma Xi, and refused appointment to Columbia University to take charge of the department here.

Dr. E. G. Peterson returns from Cornell University to take the chair of Physiology and Bacteriology. He is a graduate of this institution with the class of '04. He has taken the master's degree in addition to the doctorate from Cornell. He is a member of the society of American Bacteriologists and served as instructor in Cornell University one year in the Department of Bacteriology.

F. S. Harris Ph. D. (Cornell) has been elected to the chair of Agronomy and to the position of Agronomist in the Experiment Station. His work will cover both the instructing and experimental part of this subject, much of his time being spent in agricultural investigations especially relating to field crops. Prof. Harris is a graduate of the B. Y. University and served as assistant in the chemical laboratory here before leaving for his eastern work. He has rather extensively reorganized the Department of Agronomy, adding additional courses in th subject and adding extensively to the equipment.

Prof. C. N. Jensen, at present in

the department of Plant Pathology in Cornell University will return at the end of the first term to take the chair of Botany and Plant Pathology. In addition to his work in Cornell University he has spent a year as a special investigator in the University of California. He has taken the master's degree in Agriculture at Cornell and will have completed by the middle of the year all the work for a doctor's degree.

Prof. Jos. E. Greaves M. S. (Illinois) Ph. D. (University of California) has been employed as assistant professor of Physiological Chemistry. His work will be largely confined to investigation in connection with the Experiment Station. Prof. Greaves will give in addition a course in Chemistry.

Prof. W. E. Carroll, a graduate of the University of Illinois with the degree of Master of Science, a graduate also of this institution in the class of '09, will take this year work in Animal Husbandry, being elected to the Assistant Professorship in that Department. The work of Prof. Caine III, head of that department, will be largely in the Extension Division this year as a result of which much of the teaching will devolve upon Prof. Carroll.

STUDENT BODY ORGANIZATION.

An explanation is possibly due to those entering the U. A. C. for the first time this year, so that they may know why they must pay a five dollar membership fee to the Student Body Organization. This organization is made up of the students of the school and has charge of all the student activities of the college. At its head is a president elected by the Student Body. The president, assisted by an executive committee elected by the students, acting in conjunction with a faculty committee appointed for this purpose, forms the executive head of the organization.

ization.

Not only does the membership card entitle the holder to vote at the school elections but it admits him to all athletic contests, theatricals, operas, lyceum numbers, dances, etc., of which the Student Body has charge as well as to subscription to Student Life. Last year the cost of the membership card was returned twice over in this manner.

Following are the Student Body officers elected last fall to have charge of the organization this year.

President of Student Body—L. A. Stevens.

Vice-President — Irene Hendrickson.

Secretary—Anna Mathison.

Executive Committee—I. B. Ball, G. B. Caine, V. L. Martineau

Editor of Student Life—Ivan Hobson.

Manager of Student Life—Elmer Brossard.

Song Leader—M. F. Ensign.

Cheer Master—John Sharp.

Standard Bearer—A. D. Ellison
Debating Manager — Hervin Bunderson.

Manager of Theatricals and Socials—W. L. Smith.

Track Manager—N. A. Peterson.

Basket Ball Manager—Ed. Lawrence.

Base Ball Manager—Jenk Jones.

Johnny Knew.

"Now, Johnny," said the Sunday school suprintendent, "can you tell me what it was that caused the prophet Elijah to go up?" "Yeth, thir," said Johnny. "It wath the Payne tariff bill."—Ex.

Their Only Use.

"Do you enjoy your meals, old man?"

"Do I enjoy my meals?" snorted the indignant dyspeptic. "My meals are merely guide-posts to take medicine before or after."—Ex.
