NUMBER 9.

BIG CLOCK FOR COLLEGE FINANCIAL CONDITION OF STUDENT BODY

To Be Set in Center of Tower. Mechanic Arts
Department to Demonstrate
Handiwork.

Treasurer Coburn Renders Report For The
Year 1910.

A gigantic clock to be placed in the center tower of the A. C. U. Such is the present plan and if all goes well the college will soon be equipped with one of the best and biggest timepieces in the state.

What is of greater interest is to be made here at the school. Professor Drew, head of the Mechanic Arts department is now preparing plans for the big clock. It will consist of three parts: time, striking and chimes. The dial will be ten or twelve feet in diameter and will be uncovered, thus permitting the position of the hands to be seen at a distance. This latter provision is deemed advisable in order to eliminate the reflection which would be caused by the sun if glass faces were used.

The minute hand will be sixty-six inches long which should make it possible to detect the time from main street in Logan. The pendulum will beat the seconds. It will be forty four inches long and will be compensated with zinc and steel rods to make it synchronous to heat and cold. In addition to the pendulum massive weights are to be suspended on one-fourth inch steel cables to insure unerring accuracy.

The time part will require winding but once in eight days while the striking and chimes machinery will require but five minutes of the tender's time every twenty-four hours.

BURNS CROOKSTON CAPTAINS TEAM

OLD FULL-BACK WILL HANDLE FOOTBALL BOYS.

Basketball and Other Athletics.

The football team met the latter part of last week at Rabe's studio where the team picture

(Continued on Page Four)

A seven thousand pound bell struck by the hammer under ordinary conditions can be heard for a distance of three miles. The chiming bells are to be of a very high grade and will not be put in for some time. The weights of the clock minus the bells will be about fifteen hundred pounds. Fifty complicated wheels and pinions ranging in size from eighteen inches to less than one-half inch will be used in the mechanism.

The advanced students of the Mechanic Art Department will get a chance to develop unerring accuracy and skill on this wonderful piece of machinery, as it furnishes pattern making for the wood worker, work in making weights, hands and pendulum, for the smiths, while the machinists will make wheels, cogs pinions etc. Clocks are delicate mechanisms and only the nicest kind of work can go into them.

We hope to keep the students in touch with this splendid piece of work throughout the various stages of its development.

Every student of the College is vitally interested in the financial report below. It explains where the five dollars you pay as Student Body Fee goes. Is it expended as you think best? Look over the report carefully and thoughtfully, weighing each item. Then if you have anything to suggest, or criticism to make, hand a copy of it to the editor of Student Life. We want the students to feel satisfied with the way things are handled for them by the Executive Committee, and we believe they will be. But let's be free in discussing any and all matters. Use the columns of Student Life for this purpose.

We note with satisfaction that the Football activities more than paid for themselves and left a credit of \$47.54. This year we will sadly miss the big profits from a Thanksgiving game with the U. of U. at Salt Lake.

Basketball cost \$115.20 and Baseball cost \$215.25, while Track team cost \$118.20. Here Baseball cost nearly as much as the other two activities together.

Lycium course cost \$418.25. This is a surprise, since we thought the towns-people would patronize better. We wonder if better advertising methods would not pay here.

Dramatics were altogether too expensive, costing \$595.46. The Salt Lake trip and exchange with U. of U. were costly ventures.

SENIORS CONDUCT CHAPEL

Buzzer of Last Year Discussed.

The Seniors had charge of the chapel exercises last Friday and used them in a telling way in the interest of the Buzzer. President George Caine presided and after a few introductory remarks called upon former Manager Good-

(Continued on Page Five)

They will not occur this year, we hope.

Student Life cost \$653.59. This item is higher than we had expected. Haven't heard from other schools, but other papers seem to carry a higher percentage of "ad" matter than we.

Debating cost \$268.25. If we had more debating societies that were getting wider benefits, this sum would seem small, but considering the few engaged in the work it looks rather high. Still for its cultural value, we hope it will not be restricted more.

The item for "A" sweaters for the athletic team was \$223.55. The boys deserve the best we can do to reward them, but this item will appear surprisingly high to many.

General Expense of \$84.17 might be itemized to advantage. An addition to sinking fund of \$500.00 was made.

All in all it is a creditable report and much credit is due to the very capable treasurer, Mr. Coburn.

(Continued on Page Two)

NEW SECRETARY TO PRESIDENT

A. C. CARRINGTON GETS THE POSITION

Is a Utah Boy and a Booster

Yes he's a Utah boy born and reared in our own State. The report was current that A. C. Carrington who is the new private secretary to President Widtsoe was a Californian and that it had actually been necessary to go to another state to secure a man to fill the position made vacant by the leaving of J.D. Van Wagoner. Such, however, is not the case. Mr. Carrington first saw the light of day in Salt Lake City and has spent nearly all his life there. He

NEW SECRETARY

TO PRESIDENT
—+—

(Continued from Page One)
finished the commercial work in the Salt Lake High School in 1906 and immediately thereafter entered the employ of the D. & R. G. Railway company, becoming the private secretary to the General Road Master. He remained in this position two years filling it with distinction and credit. He next entered the office of the Salt Lake and Ogden R. R. company with offices at Salt Lake but remained there only a few months when he was selected as private secretary to the General traffic manager on the San Pedro, Salt Lake, and Los Angeles R. R. As the head office of this company are in Los Angeles he was thus compelled to leave Utah which he did early in 1909. He was serving with distinction in this last position when he was secured by our own esteemed President to act as his private secretary.

Mr. Carrington seems to be a gentleman in every respect. He is courteous and free and makes one feel perfectly at home in his presence. He is interested in our school, in its policies and in its students and will undoubtedly contribute greatly to our continued onward progress. We bespeak for him success in his work and the support of the entire student body of the U. A. C.

MEETING OF EXECUTIVE
COMMITTEE.

The Executive Committee held their weekly meeting during chapel hour Wednesday. The manager of Basketball submitted an estimate of expense of about \$210.00. This was allowed, Coach Teetzel recommended that the U. of U. offer for a game on November 25 be declined, and this action was taken.

Prof. Fletcher appeared before the committee and recommended that the Student Body buy \$100

worth of copies of old masters from the Ellson Art company of Boston to present to the College. This company is to bring an exhibit of 200 carbon reproductions of old masters to the A. C. If \$100 worth of these pictures is purchased no admission charge need be made for the exhibit. Action was deferred one week.

It was voted to pay \$15.00 on a \$35 doctor's bill of Ed. Lawrenson, who had his leg broken last year while incidentally trying the pole vault.

Upon request of the Benedict Club married men's tickets were made transferable with their wives for the recital Thursday.

Question of enlarging the size of "Student Life" was deferred one week.

SECOND YEARS

HOLD PARTY

The Second Year class party was held last Saturday evening in the Woman's Building, which was altogether too small. We need our gym. Professors N. A. Peterson and Harris, with their wives, chaperoned, and the class had an enjoyable time in spite of the shuffling.

BURNS CROOKSTON TO CAPTAIN TEAM

(Continued from page one)
was taken. While there they elected Burns Crookston as captain for next year.

"Crook" is known to every one as a good steady hard hitting full-back and can be counted on to put life and ginger into the team next year for another successful season.

Manager Lawrenson called a meeting of all prospective candidates for this season's basketball team, and was agreeably surprised at the amount of good material to be had.

Besides our usual year's first team men back with us, namely: E. Bro sard, Burns Crookston, and V. Peterson, we have among last year's second team men, a number who will, without a doubt, make good this year. Hugh Peterson, Ray Peterson, Ellison, Owens, Izatt, B. Martineau, Aidous and Ratcliffe are the most promising.

We are fortunate this year in having with us several new men from other schools who look promising.

Snow comes with a reputation as a crackerjack center from Murdock Academy; Taylor has a record as a good guard while at Baker City High School, while Roskelley, Wainsguard and Price are said to be good men.

Arrangements are being made to hire the B. Y. C. gymnasium four nights per week. An hour or two each night, and practice is expected to start this week.

The prospective men will be divided into squads for practice, and gradually eliminated as their good and bad qualities are known until two full-teams are left to work with.

CLASS GAMES.

Inter-class games are being played off this year in good style. The Prep. school championship is practically decided with the 3rd years on top. Scores:

First game—First years 42; Second years 3.

Second game—First years 0; Third years 11.

In the college classes the class championship is still in doubt.

The Juniors defeated the seniors in a hard fought game, 5 to 14, while the Sophomores defeated the Freshmen 16 to 0. This leaves one game to be played between the Sophs and the Juniors for the school championship.

"CONFUSIONS"

Fifth Ward Sunday School
Present Comedy.

Friday and Saturday Nov. 24 and 25 the Fifth ward Sunday School, under the direction of Prof. N. A. Pedersen, will present "Confusions" in the 5th ward amusement hall. This play is an entirely new, original, and rapid farce comedy in three acts. Many in the east are well known U. A. C. student actors whose work on the stage has never failed to please. Rumor has it that

WHAT THE SCHOOLS ARE DOING

AGRICULTURE

With Doctor Harris at the head of this department it is progressing rapidly. Some new courses have been added, and with the aid of Dr. Widtsoe, Dr. Stewart, and Mr. Bowman this is one of the strongest departments we have in our school.

Dr. Widtsoe is teaching a course in Dry-Farming. This course takes up the nature of the soil in dry farm regions, the amount of rain-fall, temperature and the proper methods of cultivation to preserve the moisture that is precipitated, water being the essential element in plant production in our dry farm districts.

Dr. Stewart teaches a course in Soil Fertility and Permanent Agriculture. In this course students are made familiar with the chemical composition of the most common soils, and the elements of plant food, their abundance or scarcity is discussed, and the fact is brought out that by continually eroding your land and not returning any of the plant food elements back the soil will soon be exhausted of its fertility.

Mr. Bowman is teaching a course in crops. The text used is "Cereals in America." This course deals with the best depths of planting and the most suitable temperature for the production of our field crops, and the relative importance of the different cereals is discussed.

In connection with this department is our Experiment Station Farm at Greenville, this farm is doing some very valuable experimenting with different crops, breeding up some good varieties, and discarding others which are not adapted to the conditions.

Also the Sub-Station at Nephi is doing good work in connection with the U. S. Bureau of Plant Industry. They are experimenting with different dry farm crops and their adaptability to different dry farm sections. This branch of Agriculture is working continually for the improvement of our crops and the reclamation of our arid lands.

SENIORS CONDUCT CHAPEL

(Continued from page 1)
win, who explained some of the difficulties that had been met in getting the book out.

J. W. Peters was the next speaker and he appealed to

GENERAL SCIENCE

Department of Physics

The Physics laboratories are now among the best equipped of any in the school. Every piece of apparatus necessary for complete and thorough laboratory courses has been provided and it is no longer necessary for students to work in groups of two or three on the same experiment. Moreover the equipment is new and strictly modern which makes it possible to do much more accurate and efficient work.

Physics has become a very popular course during recent years.

At present there are 120 students registered in elementary physics. Three advanced courses are being given this year with an enrollment of 20 students. This is probably the largest number of students that has ever applied for advanced work in physics during any one year but the indications are that this number will be greatly increased next year due to the fact that elementary physics which has heretofore been given in the freshman year, is now given in the third year high-school. This rapid growth in the physics department should recommend itself to students desiring work in science.

Art

The students in the pottery courses have just completed several very interesting designs for heavy vases. The forms are now ready for casting in the clay which is a very interesting process. The indications are that some fine pottery will result.

The home crafts students are just completing some interesting work in stenciling and are now designing for modeled leather. These are new courses elective to those who have had one year of design or equivalent. Seven students are pursuing the work and there is little doubt as it becomes better known the members will greatly increase.

A college student called at the studio not long since and was greatly surprised. He said he didn't know the department was anything more than a class room devoted to instruction in elementary freehand work. Pay us a visit and see for yourself.

Dr. Harris in a recent chapel talk called your attention to the efforts being put forth aiming at bringing more joy into rural life.

the students to purchase a Buzzer. He explained that while the class of 1912 had assumed the responsibility of publishing it, yet the book was not for this particular class, or any other one class, but was a Year Book for the entire school and as such should receive the loyal support of every student in the institution.

Prof. N. A. Pedersen in his usual convincing way reminded the students of the desirability of procuring souvenirs of events of importance that occur in life. He said we are all prone to forget

The appreciation of nature's art and the development in beauty of the house and its appointments and environments is one of the greatest factors that will bring joy to the rural person and this applies doubly strong to the woman within the house. We often forget how greatly we are influenced by our environment.

Have any of you been troubled with being compelled to study in a room that seems distracting to the nerves? You may not know what is the matter and may think you are ill. Just take a look at your light. If it is placed high in the room and without a good shade, it may be the source of your trouble. Try bringing it low in the room and get a good shade—one of a semi-opaque material that excludes the direct light from the upper part of the room. You can make a good one in a few minutes. Make a wire frame and cover it with a green silk or green wrapping paper. Improper adjustment of light can mar the effect of the best of rooms as well as irritate the best of nerves.

and that without some reminder we soon lose sight of pleasant past occurrences. The Buzzer he said would bring back as no other thing would the college life of every student and furnish joyous meditations in years to come.

Lon J. Haddock, of the Juniors, after a brief but forceful appeal to the students, asked those who were willing to subscribe for the Buzzer to arise, to which one hundred and fifteen responded.

It thus proved that the meeting was a most profitable one.

HOME ECONOMICS

The Utah Branch of Home Economics will meet in Salt Lake City, November 28-29. The program is as follows:

Nov. 28.—2:00 p. m.—Report of Secretary and Treasurer—Lottie M. Harris.

2:30 p. m.—Report of committee on course of study for the 7th and 8th grades—Miss Lizzie O. McKay, chairman.

4:00 p. m.—Ellen H. Richards' Memorial Fund—Mrs. Leah D. Widtsoe.

4:30 p. m. Two minute reports from each member.

Nov. 29.—9:00 a. m.—Report of the committee on school lunches.

10:15 a. m.—Discussion—Mrs. C. T. Van Winkle.

10:45 a. m.—Correlation of work with Home Economics work—Mrs. V. S. Stephens.

11:15 a. m.—Election of Officers. Miscellaneous business

DE LAVAL

CREAM SEPARATOR

Saves Its Cost Every Year

Occasionally the intending buyer of a cream separator who has but a small amount of ready cash to invest is tempted to put his money into one of the so-called "cheap" machines which are being largely advertised.

Why pay your hard earned money for a "cheap" trashy machine when you can buy a reliable DE LAVAL upon such liberal terms that

It will more than earn its cost while you are paying for it.

When you buy a DE LAVAL you have positive assurance that your machine will be good for at least twenty years of service, during

which time it will save every possible dollar for you and earn its original cost over and over again.

If you purchase the so-called "cheap" separator you must pay cash in advance and then take the chance of the machine becoming worthless after a year or two of use, to say nothing of the cream it will waste while it does last—all of which means that you have virtually thrown away the money invested in the cheap separator and wasted your time, labor and product in the bargain.

The DE LAVAL separator pays for itself. It runs easier, skims cleaner and lasts longer than any other cream separator.

Be sure to see the local DE LAVAL agent and try a DE LAVAL before you buy any cream separator.

Locals

Prep. at registrar's office: I want to register for Public Speaking.

Mr. Heber Bennion was called home about two weeks ago, but is again back at school.

Prof. Arnold, in German 1: Mr. Holmgren, proceed to read.

Ed. H.: Shall I read in German script?

Grind: "In what course will you graduate?"

Flunker: "In the course of time."

Prof. Larson—"I would like to say a few words to the absent students"—applause from the multitude.

Would it not be a good idea for the faculty to give a student reception about now before the money is needed on the farms of Professors Arnold and Larsen?

Vickers: I just love poetry. I wish I had a volume of nothing but compiled poems.

Evans. Buy the last year's Buzzer.

Prof. Porter, in Chem. 1: What is steam?

Miss Peterson, hesitatingly: Why, I think it's water gone crazy with the heat.

You can lead a horse to water
But you can't make it drink.
You can use a German pony
But you can't make it think.

Mr. Turpin to class in Poultry Husbandry: Why does a hen lay an egg?

Zam, thoughtfully: I guess if she dropped it, it would break.

Miss Stewart: Hoy many assistants are there in Physics?

Miss Bowen: O, I don't know.
Mr. Christensen: and I never ask the assistants.

Uneasy lies the head that tells a good many of them.

A knocker is something that hangs on the outside of a door.

Mr. A. M. Gurjar, '11, is working for a lumber company in Mexico. His address is, Madera Hotel, Madera.

Comment on a returned theme from Miss Huntsman's class in Eng. 6: Three mistakes in one theme IS too much.

Prof. Pederson in Eng. 5a: "Hugh Peterson, what is a geyser?"

Hugh: "A squirt of water that shoots up."

"Sure an' what the devil is a chafin'-dish?" asked Pat.

"Whist, man," answered Nora. "it's a fryin'-pan got into society."

Edith: Will you help me with my Sociology, Sunday, Earl. Mother will be off and you may come at twelve o'clock.

Earl: Yes, but after seven I refuse to study.

"Why, what's the matter, dear?" his mother asked comfortingly.

"Boohoo-er-p-picture" fell on papa's toes.

"Well, dear, that's too bad, but you musn't cry about it you know."

"I d-d-didn't. I l-laughed. Boohoo! Boohoo!"

Eleda and Clara are running opposition to the elevator. They'll tell you how. Eleda: "All you have to do is to slip on your heel, trip Clara and down you go."

Clara: "Yes, but it isn't so pleasant to have Eleda, on top."

Eleda: "It would be fine if it were smooth instead of so bumpy."

Prep.: This college has already made me a Doctor of Literature.
Senior: What did you ever write?

Prep.: Well I wrote 'em a very large check.

VOLUME 10
NO. 9**Editorial Page of Student Life**Friday, November 17
1911**FOR AN
ALMA MATER
DAY!**Hurrah for an Alma
Mater Day!
Why not?

The time has arrived when our college has outgrown its students. That is to say, the College has grown so big, and its departments so varied, that it is almost impossible for an individual student to keep in touch with the work it is doing.

In conversation with some of the students during the past week we became acquainted with the following facts: That there were some young women who had been attending the college for three and four years, who had never been inside of the Woman's Building; That only about one student out of five could say where the Poultry Building was located; That some of the Agricultural students knew where the commerce department of the school was located, but that the vast majority were not quite sure; That scarcely one out of ten had ever visited the new Art rooms. A few knew where the Geological laboratory was located; and still others had seen one or more of the Agronomy laboratories. Hardly any of the Commerce or General Science scholars had visited the Mechanic Arts Building, and so we might go on, ad infinitum ad libitum, and ad valorem.

The fact is we don't know our own College! How astonished many of us would be to learn that the A. C. U. has the finest assortment of sheep, cattle, and swine to be found anywhere in the West. How many of our girls have seen the various electrical devices now in use in the Woman's Building? What is the Experiment Station for? and what is in it? Where is the Bacteriology laboratory? How did the Agricultural College come into existence? What law made it possible? How many of us can answer these questions?

Now it is a fact, that a man learns to

love that which he studies. And if we are to begin a campaign of boosting for the A. C. U. we must learn to love it. And if we are to love it, we must begin at once to study it. How then, shall we proceed? and this brings us back to our text:

Let the faculty set aside a certain day as an annual Alma Mater Day. Let the regular classes be held up to chapel time, then let the chapel exercises be devoted to a brief history of the college, and the purpose for which it was established. Then let the Student Body and any visitors who may chance to take advantage of the occasion—be separated into suitable companies and with a member of the faculty or one of the advanced students for a guide let them make a complete detour of the college, thereby becoming acquainted with every department of it.

Such a plan inaugurated about the second week of the Winter Course would be a valuable advertisement for the College, and would serve to inspire each student with a keener appreciation of what our own dear state—Utah—is doing for every one of us.

By all means let us have an Alma Mater Day! And—let it be soon.

**NOW
BOOST
IT!**

The Agricultural College of Utah is growing. Growing—and at such a pace that it is almost impossible for us to keep up with it. Pick up an old catalogue of the institution, or scan one of the pictures of the Faculty's of the past, as they hang in solemn dignity on the walls of the Library, and then size up the names and degrees of the faculty members as listed in the present catalogue. What an increase in teachers, and what an array of talent! But if the faculty is growing it follows necessarily that the

Student Body is also growing and in direct ratio to the faculty.

Now, Student Life desires to keep pace with the rest of the institution, and so we have requested the Executive Committee to grant us permission to get out a larger paper for the students every week. If granted it will mean that each member of the staff will have to assume a little more responsibility. But the work doesn't count, it is results we are after. We desire at once to inaugurate a Students' page, a page upon which will appear the contributions turned in from week to week by YOU. It will mean that YOUR contributions of the future must exceed those of the past and this paper is supposed to show just what you can do along literary lines. If there are any Stevensons, Burroughs, Keats, Byrons, Kiplings, Bill Nyes, Mark Twains, Darwins, Lambs (not the wooly varieties), Jane Austins, or Bacons (not the smoked kind) around this college, we want to know it. How do we know you can write? We're from Mis-ouri. Now show us.

Essays, Poems, Short and Serial stories, Scientific dissertations, College Songs, Episodes, Preachments, Puns, all are welcome. With such an English department as we have the main difficulty should be not what can we get to print but how can we print all of it.

Get ready now for the big edition and begin to send in your material. All contributions should be signed by the author. The name will be withheld when you request it. This is addressed to every student in the College and also to the faculty and Alumni. Thanksgiving Day is coming. Who will give us a good Thanksgiving story, or poem? English 7, can't you do something? You Bacteriologists, what have you learned? Come Scientists, Business men, Agriculturists, Economists, Musicians, Artists, Poets and Literati, get busy with your little "write ups."

WOMEN ENTERTAIN**THE FACULTY**

On November eight "The A. C. Faculty Women's League" entertained the members of the faculty in the college library. A musical program consisting of vo-

cal selections by Miss Ethel Jensen and Mr. L. Haddock, a violin solo by Mrs. Wm. Spicker and a piano solo by Mrs. Sloan was greatly enjoyed. Miss Huntsman read in her charming manner two humorous Scotch selections. The

refreshment committee, with Miss Brown as chairman had no small share in the success of the evening.

Don't let your toes turn in or they'll go to sleep.

An Unexpected Proposal.

Prof. Arnold, in French 1, clasped his hands and said to Miss Goodwin: If I get down on my knees, what will I do?

Miss Goodwin, stammering: Why! Why! I don't know.
