CARMICHAEL ON "U" TRACK MEET

MANY SURPRISES

Aggies do Good Work

Another one was slipped over on us in Salt Lake by the U. of U. in the dual track meet Saturday. The score was 48 to 72 and every event was won by a very small margin.

There were many surprises such as Emerson winning the shot put over Snow and the High jump over Robinson and Goss of the U. Another surprise came when Robinson of the U. won the High hurdles over Emmer son.

The Aggies received quite a disappointment in the mile when Clayton with a fifty yard lead caught a glimmer in his shoe on the third lap and in attempting to kick it out fell headlong into the sand. He received quite a shake.

A. C. Men Will Win Saturday

REPORT OF THE "U" TRACK MEET

WHY CLYTON MISSED THE MILE—WHY AGGIES WILL WIN ON SATURDAY

The track meet held last Saturday between the U. A. C. and the U. of U. was decided in interesting fashion. The score was rather close. The Aggies were exceptionally strong in some of the events and with the exception of the pole vault, the 220 yard dash and broad jump the contest was very close.

The Aggies had the advantage in many events and would win with the exception of the pole vault, the 220 yard dash and broad jump. The contest was very close.

Snow put the shot about 39 feet—3 feet over the winner. Why can't Snow put the shot out as far during meet as after? At Salt Lake right after the official measurements were taken, Snow put the shot about 29 feet.

Mike would easily have won the 100 yards had he not been set back 1 yard.

Wyatt lost a sure chance to win the quarter in the "U" meet, by Fliegel getting a start of 10 feet before the gun went off. The officials couldn't see this false start, but they readily set our men back for a similar error in the 1/2 mile.

Hendricks shows remarkable advancement this year, winning the half mile by good margin from both Provo and the "U."

The events which the A. C. have won in both the Track meets at Salt Lake and Provo are:

Low hurdles—Aldons and Emerson.

Hammer throw—Snow and Elinson.

Half mile — Hendricks and Clayton.

The events in which the A. C. won over Provo are:

High hurdles—Emerson.

CARMICHAEL ON "U" TRACK MEET

ANNUAL STATE TRACK MEET

The big annual State Track meet to take place Saturday afternoon will be the closest ever held in Utah.

No one school has the meet clinched, but rather all three schools, B. Y. U. U. A. C. and U. U. have a chance at winning.

The meet is expected to be ex- (Continued on page five.)
LATIN AND GREEK
NEED AT U. A. C.

THE NOMENCLATURE
OF SCIENCE

Ladies and Gentlemen and
College Professors:

One course of study sadly (if
tor badly) needed here at the A. C.
is a course in scientific Latin and Greek.

Every science has its nomenclature and this is invariably
Latin and Greek. If the
student were taught the Latin
root words and prefixes, he could
often correlate the long names—
insidiously long, one thinks
with some character or part of
the organism studied. Thus could
he understand and remember
more easily the necessary nomen-
clature.

Now, in order to point out
clearly the difficulty students meet in the scientific terms we refer to specific examples.

In Entomology Dr. Titus has
divided the whole insect world
in order of insects, the Hymen-
eptera, including the bees. The
bees remind the student again
that the subjects of science carry considerable homey, still
they leave their sting behind in
the unconsolable nomenclature
he has to learn to forget.

Geology delights the eager
neophyte with the Archaeozoic
Paleozoic and Cenozoic eras
with their vulcanism and di-
strphism.

And in fact Prof. Wm.
Peter-
son never fails to back up the
liberal Latin jargon of Geology
with very generous selections from the poly syllable (almost
hieratic) vocabulary of Zoology.

Hence the unsuspecting seeker
after a minimum of knowledge
and a maximum of fraternity
slang and pretty girls to wear his
fraternity pins, is taken entirely
off his guard. He submits
without protest to a resurrection of
his
former friends, the phylia of
Zoology, which he thought
now
safely buried and perma
rently forgotten.

Again he meets the radiolaria
and the brachiopoda, pteropods,
are not nick names for new boys,
but are said to be vital in kidney

Botany calls a pretty form a
Peridiphyte, and the moss on the
mos covered bucket is now sung
of as a Bryophyta. Broom mold
is a phycomyete, while the ana-
thermum placed upon the feared
peach leaf curl is Exo-caus de-
ferens. Dr. Jones has whole
volumes of similar impressions
in the whole dangerous race of
Phytopathogenic life.

Therefore, in face of the stub-
born facts above mentioned, we
draw our conclusion as proved,
viz: a course badly and sadly
needed both here at the A. C.
and in every school of science is
as a course to acquaint the student
with the Latin and Greek root
words used most extensively in
the sciences.

Then, as the words arise in
pursuit of the sciences let the
student be required to look up
again the etymology. He
would feel a little more friendly
towards his present terrors in this line.
I. B. B.

Jupiter Pluv has been Properly Propiti-
ed. Fair Sky for the Meet Tomorrow Sure.

into apterus and periferous
forms. An insect may bear a
head and a separate thorax; an
other may have the mere mak-
eshift, cephalothorax; some have
compound eyes with thousands
of compound eyes; others pass life
in dusky twilight with only a
single ocelli. Antennae, the Dp-
points out, are at times beautiful
bizarrely ornate or monomorphic;
other less favored creatures bear
but one utilitarian feelers, a clavate,
lanulate, or merely capitate.

The dorsal portion of the tor-
acie segment, Dr. Titus, Caesari-
like, would divide into 4 parts
named however, quite unlike the
simple Gallie provinces; their full
christian names being the scutum
and the prescutum, followed
very naturally by the scutelum
and the post scutelum.

Then the insects ungaseful
legs with their ugly skinny shanks are mercifully covered by a mist
of right smart Latin slang. As
to function some legs are sal-
tatorial, others merely flossorial
and mastatorial, while some poor
souls are blessed with only hu-
man-like ambulatory pedal ap-
pendages.

And so the revival of Latin
and Greek is continued to the

GEOLOGY STUDENTS GO WALKING

Monday, May 13 about twenty students of Geology accompanied by Professors Petersen and Porter took a trip to Greenville canyen for the purpose of making a study of the rock formations and structure of that section. Interesting practical observations were made, and each student had the privilege of seeing the wonderful work of nature through an incomprehensible period of time, in giving to the earth's crust its present form and texture.

Prof. Porter had his camera along and took a number of pictures of noteworthy scenes and formations, in most of which the class was included.

Thanks to the good will and foresight of the three girls of the supper they all chatted informally, Misses Madsen, Cowley and Hyder for we should have gone hungry but for their generosity. Having walked several hours and feeling tired the party halted at a delightful place to be cheered by the girls who served tasty sandwiches and a good share of divinity and fudge.

The Aggies must win the State track meet.

DR. WEST ENTERTAINS

Last Friday evening Dr. West entertained the members of his class in advanced Physics and Meteorology. The guests assembled at Dr. West's home at eight o'clock and after playing games for a while went to the Crystal Theatre after which supper was served at Murdocks. During the reception, after he had presented a check to the school for $1000, he entertained the party with interesting stories of his travels and experiences in scientific work. The party adjourned to the dormitory where refreshments were served.

Every Student who doesn't take a girl tomorrow must bring a Faculty Member Along. Come Everybody!

MILITARY INSPECTION

Wednesday, May 15, at 2:50 p.m., all men of the military department, dressed in full uniform for inspection, Capt. Simmons, General Staff U. S. A., was present to inspect and review the work of the boys. The good work of the band in furnishing the music necessary to make the event complete and stir and enliven the cadets, was as much appreciated and enjoyed by the students assembled to witness the event.

It is the general criticism that the work was excellent and shows the result of careful and persistent training. Lieutenant Binford may justly feel proud that he heads such an organization.

The weather, too, was grand and even nature which is now at the height of its splendor, contributed liberally to the martial air.

PRESIDENT TO ENTERTAIN SENIORS

The Senior Class is to be entertained by Pre. T. and Mrs. Waldron at the Woman's Building Friday evening, May 17th at 6 o'clock. Married men's wives invited.

QUEEN OF THE DAIRY WORLD

One thousand fifty eight and 34-hundredths pounds of butter fat produced in one year by Bamostine Belle De Kola, five year old Holstein Friesian cow owned by Dan Dimmick and brother of Ohio.

This cow produced in 365 days 2740.44 pounds of milk which tested 3.56 per cent fat. This is ever nine gallons of milk per day or enough to supply thirty six families each with one quart of milk daily, or if made into butter would produce 1322.92 lbs. of butter (80% fat) or over three and one half pounds per day of 365 days. No other cow in the world has ever produced such an enormous amount of butter fat in a yearly test and only one other has ever exceeded Bamostine's milk record.

Bamostine Belle De Kol is without doubt the greatest milk producing machine in the world. She is a fine example of what can be done in the dairy line by careful selection and breeding.

A delightful party was given by Alta Hammond at her home Saturday evening. The rooms were generously adorned with decorations. "GI" was played—prizes were won by Myrtle Johnson and George Fister, while Leila Taylor and Roy Smith received consolation. An attractive, delicious luncheon was served. Those participating were, Miss Eta Nelson, Alta Hammond, Leila Taylor, Mable Holmgren, Lenaugh Ure, Myrtle Johnson, Vera Weiler, and Mccars. All Caine, Roy Smith, Elmer Brossard, Ed Holmgren, Les Smith, Ray Waters, George Fister.

The student senate at Stanford fined a pupil ten hours extra work for cribbing in an examination, besides expelling him from the course of study in which he cheated. A steam whistle is used at Kansas University to announce the beginning and close of classes.

We MUST win the state track meet.
Clayton, the Mile is Yours. Snow, Get Under That Shot

Reel was indulged in. Several hundred-yard dashes and a relay race completed the events of the day at camp and after a few pictures were taken, the drive homeward commenced. The fish hatchery was visited and finally the Telluride Power Plant was inspected. The weather continued ideal throughout the day. The wild flowers were out in abundance so that every girl had as large a bouquet as she wished to carry home.

**PROFESSORS’ SLIPS**

Heard in the Class Room

"My class last year only wrote one."

"The question must have come to you, how is these ideas working out in real practice?"

"It isn’t any place I don’t think."

"The black end seems to be the NORTH end don’t it."

"Boyle’s law only holds when the temperature is constant."

---

Prof. (after reading two themes for comparison) — "Class I would like you to notice the first one. "Limestone can be formed only under water. If you don’t believe that call around sometime else."

"The only thing this student has to live up to is what are has to live up to is what are true."

---

**FRESHIES OUT AGAIN**

What class has more good times than the Freshies?

Yes, we were out again. Last Monday about twenty of our wide-awake classmates surrounded and captured a good-natured driver, four white horses, a bridle bull-dog and a large hayrack. Our girls put up the daintiest of luncheons, sufficient for all (even the dog) and away we drove up the canyon.

On the journey, many points of interest were viewed, notably Professor Arnold’s Orchard and the site of the A. C. Power Plant. In the orchard we observed the "Lieber Professor" himself hard at work and stopped the team to give him three lusty cheers of encouragement.

Camp was pitched on one of the Hyde-Dewitt flats about eight miles up the canyon.

In the afternoon games were played and a good old Virginia

**DE LAVAL CREAM SEPARATORS**

Are in a Class by Themselves

They cost but a little more than the cheapest, while they save twice as much and last five times as long as other separators.

They save their cost every six months over gravity setting systems and every year over other separators, while they may be bought for cash or on such liberal terms that they will actually pay for themselves.

Every assertion thus briefly made is subject to demonstrative proof to your own satisfaction by the nearest DE LAVAL local agent, or by writing to the company direct.

Why then, in the name of simple common sense, should anyone who has use for a Cream Separator go without one, buy other time the use of an inferior se
Locals

Dr. Thomas will also be there.

John Sharp has been taking voice tablets all week.

Minor has promised not to wear his uniform on the 18th.

Dr. E. G. Peterson will wear his new straw hat on Saturday.

Prof. Pulley will be present at the track meet Saturday. He is very enthusiastic.

Prof. Arnold has already sent his order for a ready supply of ice cream cones.

Fred Brossard is in Logan again after attending school at the U. of California for the past reason.

The track meet at Salt Lake last Saturday was attended by several U. A. C. alumni who happened to be in the city.

Kirby has sent his blue shirt to the laundry in preparation for the track meet. His shoes have been shined for a week.

Notice to the language students—Prof. Arnold has kindly consented to take a holiday next Saturday. Hurrah!!! Perhaps his oracular needs attention. We wish it did every day.

Miss Smart in Elocution—"Reading is not taught enough in the earlier grades: that is why so many of our seniors are such poor readers."

Ams, "Don't you think that applies to the Faculty members also?"

Esperanto, the new world language, is offered in the curriculm of Leland Stanford this year.

The speed limit signs on the college grounds will be taken down while they run the hundred yard dash. More red tape.

Freeman Martinian, an old A. C. student, is back for commencement. He has been out of school this winter doing essay work at Brigham. Mr. Martinian expects to be back next winter.

Dr. Thomas in Ec. II: A man cannot sell his real estate, but he can sell his personal property without his wife's consent.

Barlett: "I've known cases where a wife prevented her husband from selling his personal property."

Thomas: "Well, you'll find that there are other kinds of law in this world besides legal law."

300"U" Students at the Meet last Saturday twice 300 Aggies out tomorrow

There will be no slivers on the bleachers as they were all carried off at the last baseball game.

Snow, at the Cafe just after he had devoured a large "T" bone steak. Water coming in, "How's the meat?" Snow, quite eating long enough to reply, "Why, it was pretty good, some of the events were very close, especially the relay race. We didn't have a man to enter the pole vault and Clayton fell down on the mile."

Dr. Thomas in Ec. II: "What is a bill of exchange?"

Harvey: "Why, a bill of exchange is a bill!"—Thomas. "That's like saying that a married man is a married man."
Physiology, but it ought to be given fully and frankly and to the sexes separate. More ignorance is tolerated along these lines than any others. And no study needs the light of knowledge more than the A.U. C shall. We study animal culture, and treat human culture thru chapel talks alone!

Fifth: Courses in Philosophy ought to be offered. The student bears much of Kant and Berkeley, but never gets the opportunity to understand, even in good outline, the systems of Philosophy they stand for. Maybe this is property given in more advanced work. But an introductory course might well be offered, we opine.

P.S.—In reading over the above again, we fear our case has been put over strong mayhap. So let the President and Faculty rush these recommendations thru "indoctrinately" with undue care. We wish to advise cool deliberation first.—(Ed).

COLLEGE COUNSEL

CHALLENGED

Seniors Play Faculty Class Day

The star game of the season will be played on the college campus May 27, when the married men of the senior class play the College Counsel. The Senior team challenged the Faculty to a game of base ball, but the married men of the class not being represented on this team made up a nine of their own. The wise men of the faculty who have always been ready for a fray, gladly accepted the challenge. (Hans Wimmer) Arnold and (Ty Cobb) Larson (C) have been practicing for this game for several weeks past. Last evening Capt. (Don) Wimmer attended to his great courage in facing a German class every day, that Hans Wimmer was the only faculty member that could play short stop. La Joe has got the wind-up down, so that he will make Harrison jump when he puts the ball over the plate. We are all looking forward to the most lively game of the season. The line up is as follows.

(La Joe) Drew p Ball B. (Colley) e Breathwaite (Dad) Thomas 1 b Humphreys (Don) Widdows 2 b Peters (Ty Cobb) Larson (C) 3 b Alder B (Hans Winner) Arnold s s Arnold

Hall

(Rue) Thatcher e Beakley

(Tony) Bat 1 f Harrison (Pa) Cain c f Freleacon

In order that the public may be insured a game, the Senior team will play the All Stars of the Faculty. It is thought that the seniors of the class will not be able to play a full game so that following line up has been arranged. 

Prof. Larson (Wm) e Beers

Colburn p Switzer

Dr. Ball 1 b Caine (Geo) Dr. Petersen (E.A.) 2 b Andrew

Dr. West 1 f Jones

Prof. Turpin 3 b Left

Dr. Titus 3 s Ellison

Dr. Harris e f Christensen

Prof. Bowman 1 f Merrill (L)

The mathematical class at the U. of N. has computed that if the depth of the ocean was two miles at the spot where the Titanic sank, it would take 5 minutes for the vessel after it had completely submerged to reach the bottom.
