LOGAN, UTAH, SATURDAY, SEPTEMBER 25, 1915.

NUMBER 1.

## VAUGHAN HAWS SUDDENLY TAKEN

To the U. A. C. Student Body, Faculty and all friends, the news of the sudden death of Vaughan Haws is received with deepest sorrow. Just at the opening of a new school year which would graduate him from College, and in possession of excellent health, he met with the fatal accident. It occurred Monday the 13th of this month, at 10:30 a. m., while he was hauling grain from their farm in Newton to the elevator at Trenton. On descending a hill, the sack upon which he was sitting slipped off the wagon, taking him with it and the wheels passed over his chest, severely crushing him, and death came four hours later at the home. Consciousness remained till an hour before the last.

Funeral services were conducted in the Fifth ward, Friday the 17th. Beautiful tributes of praise and appreciation of his excellent scholarship and manly character were paid him by Dr. Thomas and Dr. Harris. The house was filled to overflowing with friends and relatives. The student body, and particularly the fraternities, were well represented. The flower contribution was abundant and beautiful. Interment followed the services in the Logan cemetery.

Vaughan's character may suggestively be pictured by the word Radiance. His personality was radiant with Sincerity, Work, Honesty, Broadness, Big Motives, Unselfish Service, Family Devotion and most striking of all was his smile and his clean countenance. To know him was to appreciate him; to see him only, his smile would thrill one with cheer.

Though we sense deeply his loss, yet under the control of the unknown, but wise order of things, we are forced to submit.

The pride we possess for having had the fellowship of such a man and the stimulus his character leaves, causes us to express sincerest appreciation of him and to declare that his was a life well filled, though short.

MOSES F. COWLEY.

### OUR ADVERTISERS

The business men, whose advertisements you find in your school paper, are your friends. So are the business men who have not contracted for advertising space yet. They help to make the paper possible and deserve your trade.

## ADDITIONS TO THE FACULTY

In the coming of Dr. Clarke Edwin Davis to the institution, the teaching force of the Chemistry Department receives considerable strength. Judging from the past record of Dr. Davis, there is no room for skepticism regarding his future career here.

He was graduated from the Burdicks High School in 1904. In the fall of 1905 he entered the Michigan State Normal school, receiving a life certificate in 1908, the degree of Bachelor of Pedagogics in 1909 and the degree of Bachelor of Arts in 1912. During the years 1907-1912 he was instructor in chemistry at that institution. In the summer of 1912, he entered Columbia University, where he has been since, continuously engaged in doing graduate work.

He was granted the degree of Bachelor of Arts in 1913 and during the year 1913-1914 was the holder of the Goldschmidt Fellowship in Chemistry. In 1915 he received the degree of Doctor of Philosophy from Columbia.

Another valuable addition to the faculty is Miss Vera Gammette, who will assist Miss Johnson in the women's department of physical education. Miss Gammette has completed all the courses at the State University, and has specialized in Tennis and outdoor play. She was for three years superintendent of the Salt Lake City playgrounds, which indicates a rather broad and valuable experience along that course of work.

Four new courses are outlined for women in the Physical Education department. A course in athletics, baseball, basketball, volley ball, cross country running, tennis, water polo, and swimming will be given. There will also be a course in field hockey, one in outdoor plays, and one in social dancing. For the last course, there will be no credit given. One period a week will be devoted to teaching men and women to dance.

This department of instruction is growing rapidly and this year is receiving an unusual impetus, that forecasts a very pleasant and successful year.

### CHAPEL

During the coming year chapel will be held on Wednesday instead of Tuesday. President Widtsoe is attending the Irrigation Congress in San Francisco, but will be here for chapel exercises next Wednesday,

## HORDES FLOCK TO CHAPEL

First Student Body Meeting Attended by Large Crowd of Students. Dr. Hill Speaks

Once more the old halls resound with the lusty call of an enthusiastic band of Aggies. Once more the freshmen are given opening instructions. Once more Coach Teetzel takes the stand to give the "prospects" and make a stirring appeal for support, and is greeted with the deafening din of yells and applause. Never before was such enthusiasm manifest at the first student body meeting. Although the piping voices of the "green caps" are scarcely in tune, yet it is only a matter of time until they shall become atuned to the call of the U. A. C.

Dr. Hill's very interesting talk on the traditions of Cornell had the desired effect of putting "ginger" and new life into every student present. There were a few freshmen, we have learned since, who were not present at the meeting but who will be expected to report next Friday at the accustomed hour, in the Chapel room, which they will find by entering the west door and walking straight ahead without making any turns. Such lectures as Dr. Hill gave, contain important instructions for freshmen and none can afford to miss them. Don't forget the meeting next Friday.

## MEN WANTED

"Now is the time for every good man to come to the aid of his country," is the phrase most used in warring Europe today, but in a peaceful country and a college town it should read: "Now is the time for every good man to come to the aid of his Alma Mater."

This year our athletic prospects are as good, and we think a great deal better, than they were ever before. What we need to make winning teams, is loyal support. You can't support our teams by just yelling for the team, somebody has to make up the various teams. We want every man who is physically able, to come out and try for the athletic teams. If you haven't the physique that is needed for football, come out and the good wholesome training under Coach Teetzel will build up your body.

Our football prospects are better than ever before. Every night there are about three squads of huskies out, learning the rudiments of football, and with all the new plays and  
(Continued on page two)

## SUMMER MILITARY ENCAMPMENT

The American people as a whole have in the past given little or no attention to the great and vital problem of national defense. The great European war has caused an awakening, and with a genius characteristically American the question of adequate defense has made its appeal to the College man. As a result of this there has sprung up a demand for some form of military training. Manifestly it is impossible for the college man to devote two or three years to gaining a military education and the sentiment of the U. S. has not yet reached a stage where compulsory military training for all males is desirable. As a result of these considerations there has sprung into existence a plan whereby for five weeks in the summer time, a course of intensive military education is given to college men. This work is done under the supervision of the War Department, and is conducted by army officers especially selected for that duty. The movement has the unqualified endorsement of President Wilson, ex-Presidents Taft and Roosevelt, President Hadley of Yale, President Drinker of Lehigh, President Benton of Vermont, and scores of other prominent educators and public men.

The object of the course is to give to college men desirous of accepting it a short course in military training which will better enable them to discharge their military duty to the country should it ever stand in need of their service.

In addition to the above patriotic motive, there are certain physical benefits to be derived from a summer of healthful, active outdoor life under military regulation and systematic control. Habits of obedience, discipline and self control, fostered by a military regime mean a gain in economic value due to increased business efficiency. In this day and age the really efficient man in any line of endeavor can name his own salary.

In general the course outlined includes the theoretical principles of tactics, including advance and rear guards patrols, outposts combat (offensive and defensive) tactical works, demonstrations of cavalry, field artillery, and sanitary units.

The camp held at the Presidio at San Francisco was attended by some 250 students representing 28 institutions. The A. C. had a delegation of eight.

The routine was about as follows:

Reveille—5:55.

Drill—5:55 to 6:15.

### GREETING

To all those who are making their initial calls upon Dr. Thomas, Mr. Coburn, etc., and are experiencing their first journey over the "Registration Route" trailing their long "mileage" tickets through the halls, and to those who have in years past, been initiated into the Aggie fraternity and are renewing their membership; to the new and the old, we extend a hearty welcome.

We invite the students to become acquainted with each other and ask the old students to take the initiative in the get-acquainted campaign. The Aggie spirit is the spirit of fellowship and home as well as the spirit of earnest endeavor. The sooner we come to realize this fact, and let that influence dominate our lives, the sooner will we be prepared to work, and work unitedly, for the attainment of the coveted goal: Success.

The future is glittering with promise and we anticipate a banner year in the history of the institution.

### OUR CREED

We believe in the Agricultural College of Utah, a school that recognizes the dignity of the common classes, that seeks to extend its service to those whose opportunities are few, and aims to train men and women to live properly.

We believe in the faculty of the

institution, a body of men and women devoted to human service, earnestly seeking to extend a helping hand to those who are in need.

We believe in the students and their organizations, a body of aspirants for the good there is in the world.

We believe in those who make the College possible, the nation, state and parents.

We believe in student government, that college students are capable of managing the affairs of their own organization.

### OUR POLICY

To represent and fight for the best interests of the Utah Agricultural College.

### STUDENTS:

Student Life needs your support. Not only your moral support; but real material aid. Passive support is not enough. Activity is the thing that counts. One man can't make a paper. Neither can a half dozen men. It requires the co-operative effort of all the students to make the paper truly representative. The staff contemplates indexing of this volume, that is, a record is to be kept of contributions with names of contributors. In the final issue the number of articles each man has contributed will be published.

### PAINT

It is quite astonishing what paint will do. In many of the rooms a liberal coat of clean paint has been applied and the effect is striking. In the first place it looks clean and inviting and you enter the room not afraid of getting all dusty. Then again, the rooms seem lighter, fresher, and it smells clean. All these qualities of the newly painted room produce a certain psychological effect. The bright, clean room makes the student desirous of being in it and then it stimulates his mind to clear, concise, bright thinking. Thus may the cost of painting a school room be repaid many times.

Probably the best example of what a fresh coat of paint can do is in the gymnasium. The men's locker room is rather dark and, located as it is, it very readily can become musty and uninviting. But just now, because of the new paint, none of this dark dankness is noticeable. The place is light and smells clean and wholesome, suggesting to each man who enters that the gymnasium, locker rooms, shower rooms and swimming pool are all fulfilling their purpose of keeping men well, healthy and clean.

It would be an excellent principle to adopt to keep everything about the U. A. C. painted clean and fresh, for the effect of suggestion is great and far reaching.

### MEN WANTED

(Continued from page one)  
Tricks Coach Teetzel is ready to give the team, we can only feel confident of a winning team. Browning, Berntson, Croff, Ellsworth, Everton, Freedman, Hatch, Helm, Halton, Jensen, Judd, Lund, Lindquist, Murray, McDonald, Poulter, Peterson, Spencer, Turman, Quinney, Twitchell, Willey, Young, have already

been out on the field.

A man never knows his own possibilities until he gives himself a fair trial, so every man get out in a football suit and help build up a winning team.

Our football schedule is as follows:

October 9—Granite High School at Logan.

October 16—University of Nevada at Logan.

October 23—Colorado Aggies at Fort Collins.

October 27—University of Wyoming at Laramie, Wyoming.

November 6—University of Montana at Logan.

November 13—Montana Aggies at Logan.

Thanksgiving Day—University of Utah at Logan.

### SUMMER MILITARY ENCAMPMENT

(Continued from page one)

Breakfast—6:35.

Drill—7:30 to 11:30.

Inspection—11:45.

Dinner—12:00.

Supper—6:00.

Taps—11:00.

In addition to the general instruction outlined above, work was given in demolitions, entrenching, pack train work, machine guns, explosives, sea coast defense, including firing of 10 and 12 inch rifles and mortars throwing projectiles weighing from 1200 to 1600 lbs. over a distance of eight miles and destroying a target 20x20 feet.

Men were required to live in tents, make their own beds and take care of the surrounding grounds. Regular soldier fare was served and relished.

The last three days of instruction were utilized in practice march carrying the 40 lb. pack, during which period, the student battalion repulsed an invading force of cavalry in a running engagement fought over six miles of rugged territory and in a dense fog.

All students participating expressed themselves as pleased with the work and desirous of repeating it.

To engage in healthy, vigorous exercise, in association with men

from all parts of the United States incidentally preparing to better defend home and country from a possible enemy, surely no vacation could be put to a better or more patriotic use.

## Locals

Snookums Cahoon is back to finish up.

Miss Gamette will assist Miss Johnson in Physical Ed.

Tura Aldous has lost his "hairlip". Good judgment Tura.

The Cafeteria will be open hereafter from 11 a. m. to 1.30 p. m.

Manager Wilson is now working hard on a schedule of games for the Freshman team.

Married: William Starley, Walstein Hendricks, Dr. Carroll, Edgar Brossard. Congratulations boys!

It is gratifying to note that most all of Granite's and Jordan's last year graduates are registered at the U. A. C.

Dr. Greaves is working on an antitoxin that will render people immune from the matrimonial fever. The object is to protect the students from further attacks.

From the constant broad smile that Coach Teetzel is carrying around, we can only conclude that he has a big bunch of new dope to put into practice on the football field this fall. Coach spent the summer at the University of Wisconsin, where he picked up all the new points of physical education and coaching.

Miss Glenna Ballantyne has been bidding good-bye to old friends prior to her departure on her matrimonial journey. Mr. Burns Crookston, the husky bachelor who is to accompany Miss Ballantyne will be home within the next few days. "Crook" will be remembered as the full-back on the victorious team of 1912. Their many friends extend the well-wishing hand.

Dr. E. G. Peterson has returned from the International Irrigation Congress where he gave an important discussion in that part of the Congress devoted to the consideration of Irrigation Practice. President Widtsoe was chairman of the committee in charge of Irrigation practice, and gave some important discussions on that subject. He is expected home within the next few days. L. M. Winsor was the third delegate from the college and figured prominently in irrigation discussions.

The Sophs are requested to show the Freshies the Chapel.

"Elder" Roy Becraft, the long lost, is back at school again.

Miss Louise Ogden, a prominent student of last year, will be in Preston the coming winter, engaged in teaching at the Oneida Stake Academy.

Dr. Davis has been working out on the gridiron the past few evenings. One evening a freshman accosted him and said:

"Tryin' to make the team?"

"Yes, I'm working out."

"Freshman?"

"Yes."

"Full fledged?"

"Yes."

"That's the stuff. We want to make things hum this year."

### THE CAFETERIA

For the convenience of the students, the College maintains a Cafeteria where hot lunch is served daily. This is run solely for the benefit of the students and is not a money-making scheme or even a profitable business. Only the best and most wholesome foods are served and only the most courteous treatment is accorded the students by the manager, Mr. Cooley, and his associates.

The Cafeteria is located on the basement floor of the Main building. You will discover it to be the source of those appetizing odors of roast beef, etc., that permeate the halls about eleven o'clock.

### ANNOUNCEMENT TO FRESHMEN

The organization of the freshman class will take place today at 1:30 in room 280. All freshmen are expected to be there and elect officers for the coming school year.

The customary freshman hats will be worn by all Freshmen this year as usual, but owing to delay in shipping, the hats are not available. Exact date for the appearance of freshmen in these hats will be announced later.

### GLEE CLUB

Later on a meeting will be called to organize a glee club. You singers watch for the date.

### Mistaken Identity

First Student.—Who in the world is that fleshy man? (as Mr. Howell passed through the hall.)

Second Student.—I don't know; I guess it's Dr. Titus.

## INTER-MURAL SPORTS

In order to avoid the old cry that the men who don't need the development and training are getting all the attention in our colleges, Coach Teetzel has this year added a new phase to athletics, namely, Inter-Mural sports.

This branch gives every man of the College a chance to participate in the various branches of athletics. Class series for inter-class championship will be held in the various sports.

This fall a championship series will be held in Soccer ball, tennis, cross-country running and an outdoor track meet will be held.

These series not only give every student good, wholesome exercise, but gives us a lineup on each man for future college teams.

Soccer ball practice will be started as soon as everything can be arranged.

Tura Aldous will be the director of intra-mural sports for this school year.

### A New Label's in Town

### GERMANY'S GREAT LESSON—SYSTEM

The European struggle has brought to light, with powerful emphasis, the supreme lesson Germany teaches the world. A contemporary writer sums it up thus: "How wonderfully even was the First Line in this forty-year march of the German Nation! Scientists, City-Builders, Surgeons, Teachers, Sanitary Experts, Soldiers, Literary Men, Inventors, Ship-builders, Engineers, Business-men all strode shoulder to shoulder toward the tag. Each had his work to do; each did it. Such oneness of purpose, such discipline, such endurance was never before."

"Permit me to name for you the elements of German Kultur that are already distributed as seed to grow up and flower in other nations: Foresight, Thoroughness, Team-Work, Endurance, Initiative, Economy, Simplicity, Thrift, Ability, Inventive Genius, Modernity, Application, Boldness, Loyalty to each other and to a cause—Unselfishness."

May not these lessons be applied and inculcated into the smallest organization, yet the essential one, the Individual? As school commences we are confronted with the perplexing question of System. We want system in our course of study, our athletics, our social functions, our clubs and sub-organizations. But first of all each of us must systematize himself, in relation to all of these activities. It is folly to want recognition or achievement in all of them. Choose the ones for which you are best fitted by native ability and ambition. Then specialize, concentrate and get there.

The result will be excellence in classes, victory in athletics, supremacy in debating and theatricals, success for Student Life and the highest standard of pleasure in our socials. And if you must get out on the campus in a military uniform—smile, it's painless. All of these factors will inevitably combine to develop a school organization hard to excel. And don't forget the paramount idea, Unselfish Service and Loyalty to the Institution which alone will obtain for us the abundance of mental, physical and moral development for which we have enlisted.

Whether Germany's cause is right or wrong matters little so far as her merit as a great organization is concerned. Mark Twain once said: "Heaven goes by favor, not merit. If merit won, your dog would go in and you would remain outside." Does he think we all believe that? **MOSES F. COWLEY.**

#### COLLEGE AT THE FAIR

The College has a very unique exhibit of shop and art work at the Cache county Fair. Several pieces of furniture made by students, a case of iron and machine work, and some art work, particularly sign painting, are attracting the attention of the many fair visitors. A feature of the exhibit is the complete wagon made by students in the U. A. C. shops.

YOU know as well as we do, that a fellow has simply got to have good clothes before he can get any where in this old world.

### Also That

There is something about a good Overcoat that makes it one of the most worthwhile investments a man can make.

### Therefore

We cordially invite you to call and see the new Kuppenheimer Fall and Winter Suits and Overcoats just unpacked.

## DE LAVAL SEPARATORS

Are by far the most Economical

REAL economy is never short-sighted. It never confuses PRICE with VALUE.

PRICE is what you pay for an article.

VALUE depends upon the amount and quality of service the article gives you.

You get by far the greatest actual value for your money when you buy a De Laval—BECAUSE a De Laval will give you much better and longer SERVICE than any other cream separator.

From the standpoint of its greater durability alone the De

Laval is the most economical cream separator to buy, and when you also take into consideration its cleaner skimming, easier running, greater capacity and less cost for repairs, the price of the "cheapest" machine on the market is most exorbitant compared with that of the De Laval.

And there is no reason why you should let its FIRST COST stand in the way either, because the De Laval may be purchased on such liberal terms that it will actually pay for itself out of its own savings.

A De Laval catalog to be had for the asking tells more fully why the De Laval is the most economical cream separator, or the nearest local De Laval agent will be glad to explain this and many other points of De Laval superiority. If you don't know the nearest local agent, simply write the nearest De Laval main office as below.

**The De Laval Separator Co.** 165 Broadway, New York
