# STUDENT LIFE

Published Weekly by the Students of the Utah Agricultural College.

VOLUME XV.

LOGAN, UTAH, FRIDAY, SEPTEMBER 22, 1916.

NUMBER 1.

## DR. PETERSON GREET'S STUDENTS

Reviewing the relation that has existed between the Utah Agricultural College and the people of Utah in the past, interpreting the tremendous influence for good that this institution has had upon educational development in the West, and forecasting the trend of educational advancement in the future, President E. G. Peterson delivered a telling address before the assembled students of the Utah Agricultural College this morning, at their first chapel exercises. President Peterson spoke as follows:

"By federal and state law and with due regard to the orderly development of the state's education in all its departments the Utah Agricultural College occupies exclusively four distinctive divisions of education in Utah: First, Agriculture; second, Home Economics; third, Agricultural Engineering and Mechanic Arts, and fourth, Commerce and Business Administration.

"These are the pillars upon which the College rests. These courses differentiate the College from the other important divisions of the state's education and admit of the College co-operating with sister institutions in a most cordial way in the development of the whole business of education of Utah.

"The history of the College is a history full of initiative and educational foresight. From the time of President Sanborn to the time of President Widtsoe the College has been a leader in education in the West. To President Sanborn we are indebted for the wise and broad foundations which have made the College such a moving factor in its sphere. Under Presidents Paul and Fanner the Institution maintained and developed its particular leadership. President W. J. Kerr developed the Institution tremendously during the seven years he held office. Under him the courses were broadened, the plant much enlarged, and the Institution given a new and vigorous spirit. President Widtsoe contributed as much or possibly more than all others, except Sanborn, in giving the Institution that high position of influence which it now occupies. He increased the scholarship of the faculty to the point where it compared favorably with any similar institution in existence.

"It is the desire of the College to build upon the records of these broad visioned men who have led it in the past by magnifying its particular field of agriculture, home economics, agricultural engineering, mechanic arts, and commerce and business administration—the field which it has come to occupy after an interesting development. To the other higher institution is delegated work in medicine, law, liberal arts,

and technical engineering.

"One of the most important developments of the near future will be along the line of making even more practical the work of the College. The time will come in the very near future when there will be in yearly attendance here not hundreds but, in the aggregate, thousands of the creamery men, wool growers, stock feeders, carpenters, blacksmiths, mechanics, canal managers, housewives, fruit growers, beet growers, gardeners, hog raisers and the many other practical workers of the state for a few months of each winter for extended laboratory work designed to perfect them in their vocations which have come, under stress of our industrial development, to be so tremendously important.

(Continued on Page Four)

## WATSON HAS FAST SQUAD

No man on the campus is busier these days than Coach Watson. Full of enthusiasm and hope for the football season of 1916, he is drilling his husky pupils in a manner which spells victory next month.

And why shouldn't our jolly coach be full of optimism? With six veterans and some speedy youngsters to work with, Watson should have few fears for his reputation as a new coach.

Students who have watched the ten men who reported the first day for practice are predicting a hard fight this season for all Rocky Mountain teams.

Captain Judd is here with his two hundred pounds of dash; Twitchell and Kapple are both fit as fiddlers; Curtis, Church and that fighting "Swede" Lindquist are back on the line.

What promises to be the find of the season is young Bennion, a former student of the A. C. Preparatory School. "Teddy" is lightning fast, and Coach Watson predicts a bright future for him on the gridiron.

Gardner, a husky lad of little experience should make a lineman of no mean ability and Tom Hughes, of last year's Freshman team is a good prospect.

We have forgotten someone. Who is it? We can hear him but where is he? It's little Harry Halton. Yes; Harry is there at quarter. We can hear his "Come on boys, get that pepper," and we know our team will not lack life this year.

Go on Coach Watson. We are with you to a man. We want that winning team.

### NEW OFFICERS MUST BE CHOSEN

Miss Gene Cannon, who was elected Vice President of the Student Body, has found it impossible to be at the College this year. As a result

of her absence, it will be necessary for the Executive Committee to choose someone to act in her stead.

One more important position has been left vacant by the failure of Mr. John E. Russell to return to Logan. Mr. Russell was elected by the Sophomores of last year to edit the Buzzer and he had already begun his work on the year book before school closed in June. The Juniors will find it necessary to hold a new election immediately to choose a man to take charge of their book. The Buzzer editor should soon be at his work in earnest.

### DRILL UNIFORMS

All men who are registered for drill and have not been measured for their uniforms should go to Thatcher's Clothing Store and have their measurements taken at once.

## NEW FACES ON FACULTY

When the members of the faculty take their seats on the rostrum, in chapel, the students will see many new faces, for nearly twenty additions have been made to the ranks of the instructors since last year.

We cannot publish photographs of our new faculty members, nor can we undertake a description of each. The students will have to become acquainted with them as the school year advances. They are: O. W. Israelson, Professor of Irrigation and Drainage; R. O. Porter, Professor of Physiology and Medical Supervisor; J. W. Watson, Athletic Coach; C. R. Johnson, Assistant Professor of Music; Johanna Moen, Assistant Professor of Home Economics; D. Earle Robinson, Assistant Professor of English; M. H. Green, State Farm Management Demonstration Agent; Georgia B. Johnson, Instructor in Physical Education; George D. Casto, Instructor in Economics; David Hughes, Assistant in Woodwork; H. P. Anderson, Assistant Bacteriologist, Experiment Station; Alma Wilson, Instructor in Botany; C. W. Stephens, Assistant Professor of Irrigation and Drainage; T. M. Aldous, Fellow in Zoology; Bervard Nichols, Fellow in Botany; Lowry Nelson, Secretary to the President; W. W. Owen, County Agent, Sevier; Clyde Lindsay, County Agent, Utah; Alma Esplin, County Agent, Iron.

### EXECUTIVE COMMITTEE MEETS

At the first meeting of the Executive Committee, held in room 197 yesterday it was decided that Student Life be made a four page, five column paper. This change in the size of Student Life is made necessary on account of the advanced price of paper. The change was recommended by the manager and editor of Student Life.

Student Life wants some journalistic talent.

## REGISTRATION SHOWS INCREASE

At the close of the third day of registration at the College indications are that two or three hundred more students will be enrolled than during any previous year in the history of the Institution. Already the registration of Freshmen outnumbered that of any past year.

Enrollment in the department of Home Economics shows a remarkable increase. Never before have so many girls appeared on College Hill during the first week of school. Obviously the Agricultural College is no longer a school for men only. Many students holding degrees from other colleges have applied for graduate work here.

"Every county in Utah is already well represented at the College. A surprisingly large number is coming from remote towns and communities. The small town of Blanding, one hundred and fifty miles from the nearest railroad, sent a dozen odd, while Bishop Magleby brought a large delegation with him from Monroe. The various western states have added materially to the registration. California is represented, as are Oregon, Idaho, Colorado, New Mexico, Wyoming, Nevada and Arizona, while the South, Alabama, Tennessee and Virginia, send us students. From foreign countries come students from Armenia, India, Persia, South Africa, Russia and Canada."

Class recitation is now well under way and everything at the College is moving nicely toward a successful year's work.

### THE PI ZETA PI FRATERNITY HOUSE

Is again a scene of activity. Several of the fellows are already back and the rest are expected in a few days.

Of last year's Seniors, Tura Aldous is the only one back. He spent the summer in the Forest Service. This year he will act as an assistant in the Zoology department. Andy Anderson, is now a Benedict; he was farming during the summer, and is now teaching in the High School at Afton, Wyoming. Bill Starley, is at Roosevelt, Utah, teaching in the High School. He is the father of a fine baby girl. LeRoy Hillam is connected with the Extension Division, carrying on milk testing work. Glen Voorhees spent the summer in Colorado selling knit goods. He is now teaching in the Richfield High School. Stan Madsen is farming at Manti, Ed. Morris is in the mercantile business at Rockland, Idaho. Earl Jones, '15, was married Sept. 14th. He is entomologist for the Utah-Idaho Sugar company at Idaho Falls.

Why not see yourself in print?

### WELCOME, FRESHMEN

Student Life, on behalf of the upper classmen of the College, extends a hearty welcome to the Freshmen. We desire to see you effect a lively organization soon and become an active part of the Student Body Organization.

### THAT COLLEGE CAREER

College life is what in its nature, being composed of study and social intercourse. It is important that one beginning his "college career" give to each of these aspects of college life its proper consideration; that he pursue his studies with diligence, at the same time not neglecting to take advantage of the broadening influence of a contact with many minds.

Scholarship in its highest form

**HOLSTEIN  
CATTLE**

The "Dairy Belt of the Northern States," so called in the past by various writers, has vanished. Holstein-Friesian cattle will thrive anywhere, and they are thriving and adding to the fortunes of mankind all over the nation, north, south, east and west. Big, hardy, healthy, consuming enormous quantities of feed and roughage, and transmuting it into large quantities of milk, Holsteins have proven to be all the world that they are the dairy breed in all ways best suited to serve man, wherever he calls his home. There's big money in the big "Black and White" Holsteins.

Box 280 Brattleboro, Vt.

should be encouraged, but it is questionable whether the so-called grind represents the highest type of scholar. We are strongly of the opinion that the wise freshman will determine now to be a "mixer," to take a live part in Student Body activities, not to let his "studier" interfere with his college career."

### STUDENT LIFE STAFF

The editor of Student Life is now undertaking the organization of an editorial staff. In conjunction with the English Department, he hopes to be able to obtain the help of the best writers in the College. The organization of a staff has been purposely postponed until the present, in order that every student who is desirous of attempting journalistic work may be given an opportunity to prove his ability and win a place on the staff.

Student Life goes out as the representative of the Utah Agricultural College and it is fitting that the contents thereof should be the work of the most able students in the institution. The best talent in the College should be represented in every issue of Student Life. An invitation is hereby extended to all who desire to obtain positions on the staff to contribute to the next two issues. All contributions should be in Student Life office by next Tuesday. All articles submitted should be signed.

It is hoped that an active interest will be taken in this work and that an enthusiastic and able staff may be selected.

### OUR AIMS

As the fifteenth volume of Student Life makes its appearance, it seems proper that a word be said concerning the object of the paper and the part it hopes to play in the affairs of the College during the coming year.

Student Life is primarily the organ of the Student Body Organization, a means through which the members of that organization may express themselves and work for the advancement of the U. A. C. As such, the columns of the paper will be ever open to every member of the Student Body, that any question of importance may be justly placed before the students.

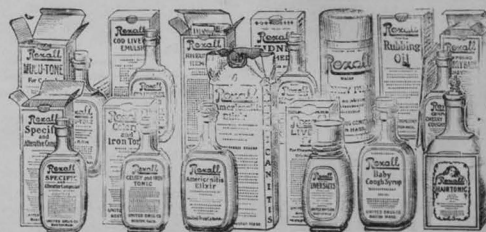

As the representative of the College, Student Life will carry an account of our activities to the world beyond Cache valley; it will let our friends know of our progress and our ambitions.

Courageously and justly to discuss all questions that arise during the year and to work unceasingly for all needed improvements is the object of Student Life. As the organ of a united and enthusiastic Student Body we hope to bring lasting benefit to the U. A. C.

### STUDENT LIFE IN NEW OFFICE

Student Life finds itself in a new office this year. Room 107, "a roomy room," has been set aside as an office for the Student Body organization, the Buzzer, and Student Life. There is space enough for several more desks in room 107, but not light enough for anything but an owl.

The Beta Delta girls are moving into the house formerly occupied by the Delta Nu bunch.

Our Guarantee of Satisfaction goes with each and every article.

## DE LAVAL

## Cream Separator Supremacy

38 Years of De Laval Leadership

### Supreme in Skimming Efficiency

Over 38 years of experience and thousands of tests and contests the world over have demonstrated the De Laval to be the only thoroughly clean skimming cream separator, under all the varying actual use conditions, favorable as well as unfavorable.

### Supreme in Construction

This applies to every part of the machine—to the bowl, the driving mechanism, the frame and the tinware. The De Laval patent protected Split-Wing Tubular Shaft Feeding Device makes possible greater capacity, cleaner skimming and a heavier cream than can be secured with any other machine.

### Supreme in Durability

The De Laval is substantially built. The driving mechanism is perfectly oiled and the bowl runs at slow speed, all of which are conducive to durability and the long life of the machine. While the life of the other cream separators averages from three to five years, a De Laval will last from fifteen to twenty years.

### Supreme in Improvements

This has been the greatest factor in De Laval success. Not a year goes by but what some improvement is made in De Laval machines. Some of the best engineers in America and Europe are constantly experimenting and testing new devices and methods, and those which stand the test are adopted.

### Supreme in Service

With its worldwide organization and with agents and representatives in almost every locality where cows are milked, no stone is left unturned by the De Laval Company to insure that every De Laval user shall get the very best and the greatest possible service from his machine.

De Laval users are satisfied users, not only when the machine is new, but during the many years of its use.

### Supreme in Sales

Because they are supreme in efficiency, construction, durability, improvements, service and satisfaction, more De Laval Cream Separators are sold every year than all other makes combined.

one whit of our leadership as an institution of higher learning.

"We will absorb the best from the great German system of education which has made Germany the world's master in the arts of peace, the world's master manufacturer, chemist, builder, merchant, technician and tradesmen all down the line, and the world's master likewise in much that has to do with pure intellectual vigor and resourcefulness. We will fashion after the great schools of Denmark which have made in one generation this modest little nation the best educated and the most prosperous in the world. And we will draw from all other rich sources—Australia, New Zealand, England and France. We will continue to do our share toward making Utah what it is, without boasting, her practical opportunity to lead the world in building a rural civilization on the highest grounds of intelligence, morality, efficiency in the necessary arts of man and genuine up-standing democracy.

"Education in the state is thriving. All the institutions are in peace—counsel planning a bigger and more prosperous and enlightened Utah, and not primarily bigger educational institutions. We want a greater Utah first. The College gladly joins with all to build in harmony the civilization of the state, having full faith that those who have built Utah from a dry, barren waste—the Mormon Pioneers—and those who are now coming in increasing numbers to build the state represent the advance guard of the world's citizenship."

### BETA DELTAS

Thus far Eunice Robinson, Salt Lake, and Ellen Holmes of Raymond, Alberta, are the only two members at the house of the Beta Deltas. Of last year's members the following are in the teaching profession: Anna Edmunds, Blanding High School; Florence E. Dinamore, Junior High School, Smithfield; Alta Calvert, Junior High School, Ogden; Viola Gedhill, Nephi High School; Grace Edmunds, Fairview, Utah; Rae Lefgren, Plain City; LaRue Thomas, Big Horn Academy, Cowley, Wyoming.

A. D. Egbert, Instructor in Poultry Husbandry, has left the College.

Miss Helen Bacon has sent in a subscription to Student Life from Los Angeles.

Kathleen Bagley, '16, has begun her teaching career at the Granite High School.

William J. Snow, county assessor of Wayne County, registered at the A. C. Tuesday.

"Joe" Quinney, '16, left yesterday for Harvard where he will pursue the study of law.

A new room, with lockers, has been provided for the members of the football squad.

O. W. Jarvis is still peddling knit goods. He expects to be back on the hill in about two months.

Jimmie Minor, '16, writes from Grace, Idaho, that he is making \$4.75 a day doing carpentry work.

Helen Cannon has charge of the departments of music and English in the Bountiful High School.

Coach Watson desires all candidates for the Freshman football team to report at the gym Saturday afternoon to get their suits.
