

# Call for Associate Editors

## Interested in serving as an associate editor for *Human–Wildlife Interactions*?

**HUMAN–WILDLIFE INTERACTIONS** (HWI) is the only peer-reviewed open access journal dedicated to reporting new science, management case studies, commentaries, and related works to resolve human–wildlife conflicts and enhance human–wildlife interactions. As human populations continue to grow and per capita consumption of natural resources increases, human–wildlife interactions will become more commonplace.

To better serve HWI readers, human–wildlife conflict management practitioners, and the wildlife management profession, HWI editors are interested in recruiting associate editors in the areas of human dimensions; wildlife management; wildlife damage management; wildlife toxicology, forensics, and diseases; public education and outreach; public communication and engagement; predation management; and big game and carnivore ecology. Associate editors would typically be asked to process 3–4 manuscripts annually through the HWI double-blind review process. This process includes reviewing manuscripts submitted for HWI publication consideration through our digital platform (<https://digitalcommons.usu.edu/hwi/>), reviewing comments and recommendations received from peer reviews, and making a recommendation to the HWI editor-in-chief regarding publication status.

All associate editors are eligible to receive a small honorarium and page charge waivers for manuscripts submitted to HWI and selected for publication. HWI's current impact factor is 2.119.

For more information or to express interest, please contact Terry Messmer, HWI editor-in-chief, at [terry.messmer@usu.edu](mailto:terry.messmer@usu.edu). In the email, please include a recent CV or resume and a brief description of your professional interests, topic areas, or specializations.

Assess submissions or manage special issues for  
*Human–Wildlife Interactions*.
