AGGIES DEFEAT GRANITE

FIRST GAME OF SEASON RESULTED IN 77 TO 0 VICTORY FOR A. C.

The Aggie gridiron warriors won from Coach Lowell Romney's Granite aggregation in the first game of the 1917 season for both schools to the tune of 77 to 0.

The game was one-sided throughout, the Blue and White goal never being in danger, while on the other hand the Granite boys were unable to stop the progress of our fast back field men. For the initial fray of the year every man on the A. C. squad showed real class both in the backfield and on the line. Stiefel at quarterback proved to be the star of the game in offensive play, while the work of Mohr and Twitchel on the line would be hard to beat in the art of defense.

It was only a High School team of new men that we played and their defense was extremely weak but they put up fight enough to make one big fact crystal clear and that fact is: we have real material, material capable of doing big things for our school this year. With these prospects and the good hearty co-operation between this material, our capable coaches Jack Watson and Joe Jensen and above all the strong support of the student body the Aggies have the best chance to bring home the Rocky Mountain conference title they have had in years. As a Graduate Manager Jack Coburn puts it, the Aggies have possibilities.

It is rumored that our spirit, that good old A. C. spirit which was sick and in a critical condition last Saturday on Adams Field, is now rapidly recovering and will be better by next Saturday. And believe me Saturday will not be a minute too

Rowe Made Football Manager

OTHER IMPORTANT APPOINTMENTS MADE

At a meeting of the Executive committee of the Student Body held yesterday, Louie Rowe was appointed football manager to succeed Howard Christiansen, who was ordered to report at Camp Lewis, American Lake, the last of last week. Mose Stiefel and Florence Chipman were appointed to vacancies on the Executive Committee. A new committee on entertainment of visitors was organized with Student Body President Meeks as chairman. Lowry Nelson was named a member of this committee, while a third member is to be named soon by Mr. Meeks. This committee will have in charge the reception and entertainment of all visiting athletic and debating teams, as well as opera and dramatic companies from other institutions.

soon for then our fighting gridiron warriors will meet the much talked of team of the First Field Artillery of Utah and will need every ounce of support in the student body to help win this battle.

The Battery team is composed of all star men from the A. C., U. of U. and other schools and it is the general opinion around Salt Lake that they can clean up about anything in the country, so let's all be there Saturday without exception to do our bit in changing the opinion of the said Battery team.

A few of the men on the soldier's eleven are Fletcher, Olsen, Scott, King, Caffey and Kilpatrick, former U. of U. stars; Judd, our own captain of last year, and Clawson, Coburn and Pennington, all men with experience.

Glee Club Ready For Year

SUCCESSFUL SEASON EXPECTED BY FAMOUS U. A. C. SINGERS

The famous U. A. C. Glee Club of last year has maintained its organization despite unusual conditions and under the management of Mr. Kirkham expects to out-do its able efforts of last season. At a meeting held last Monday a start was made for this year's work. While several good voices will not be back, there are many new students of ability eager to join the club. Membership is competitive.

Blackner, lyric tenor of last year, will be back at school next week. He is now busy sacking potatoes.

Practice House To Open House

MUCH ENTHUSIASM SHOWN OVER THE WORK OFFERED

Every effort is being made to open the home economics practice house on October 25th. The house is being painted and papered throughout, and otherwise being put in first class condition. The girls to whom this course is open are enthusiastic over the early opening of the home.

That the practice house idea is workable is evidenced by the following quotation appearing in the student paper of one of the progressive agricultural colleges of this country, describing a practice house course in operation:

"No Domestic Science senior student can afford to miss this course. It is a test and seal on the work of the three previous years. Her re-

The First Dance Successful

STUDENT BODY HAS GOOD TIME AT ITS FIRST PARTY

The splendid debut of the Freshmen and the mingling joy of old students are the factors that made the first student body dance of the season a real success.

The football boys from the Granite High were the guests of the student body. They appeared to enjoy themselves. We hope they did. We shall be very glad to have them as our guests again.

The students are to be congratulated upon their splendid attendance as it shows an interest in the activities of the school. These functions are for the students and should be given just as often as the students desire them.

The music was fine, but we suggest to the musicians that the time between dances could reasonably be cut down fifty percent, to the great pleasure of the dancers.

Judging from the party Saturday night this year the Thomas Smart gymnasium will be the scene of many delightful hours. Ever let good old Aggie spirit prevail—the spirit of social democracy.

turns from this course are manifold; she learns co-operation in working with others, she develops confidence and ingenuity, promptness is forced upon her, for meals must be served upon scheduled time. Besides this and the wide general knowledge of how to manage a home, she learns to know what she herself knows and is brought to realize her own capacity. There is a social life present in the house unlike any other obtained in college life. The students of the house say in unison, 'You cannot afford to miss it for it is certainly (Continued on Page Four)

New Equipment Installed

EXPERIMENT STATION NOW HAS A COMPLETE METEOROLOGICAL STATION

The Experiment Station of the Utah Agricultural College has just had installed all the equipment necessary to a most complete meteorological station. This station, which has been installed in the Chemistry building, will be under the direction of Professor F. L. West, head of the department of physics at the College. The equipment includes, aside from the various wind and moisture measuring devices installed upon the roof of the building, a number of recording instruments electrically connected with the devices above. One recording instrument keeps a record on a revolving drum of the duration of the sunshine, the direction and velocity of the wind, and the amount and rate of the precipitation. A hygrograph records the relative humidity of the atmosphere, a barograph gives the barometric pressure, and a thermograph keeps accurate record of temperature changes and gives the maximum and minimum temperature for any one day.

The importance of these records in connection with experimental data cannot be over-estimated. It is absolutely essential, before any sure conclusions can be drawn from experimental material having to do with plant development, that every climatic factor be definitely known. Experiments carried on from year to year cannot be carried on under identical climatic conditions, and it is necessary that complete climatic records be available in order that proper allowance may be made for changed weather conditions. While the Experiment Station has kept such records in the past, the installation of the present equipment will make them much more complete.

LEARN TO WALK AND TO TALK!

If over half of the applicants for commissions at the Reserve Officers' Training Camp at the Presidio, San Francisco, failed to secure commissions because they did not have the walk and bearing of "an officer and a gentleman" and because they could not "articulate clearly" and impart their ideas "in clear distinct language with sufficient volume of voice to be heard reasonably far," it surely is time for some of us—most of us—to sit up and take notice!

Ask yourself: "How do I walk? Is my chest up, head high; a free play of muscles that gives an easy swinging gait? Or do I 'mince' or 'slouch' along? And how do I talk? Do I articulate clearly—open my mouth with a free play of lips and jaw, or do I 'slur' and 'blur' and 'swallow' my words? Is my voice normal and resonant with a good carrying power, or do I 'rasp' or 'squeak' or 'burr' so that I can scarcely be heard a yard away?"

If you have any defects in walk or in talk the U. A. C. is prepared to help you overcome them. An intelligent use of the gymnasium under the intelligent supervision of able instructors will help you to overcome defects in carriage and bearing—military drill will take the 'slouch' out of a man more quickly perhaps than any other physical training and we're mighty glad drill is a requirement in this school. The Department of Public Speaking has several excellent courses that are designed especially to help you overcome defects in speech and train you to "talk." Work in Public Speaking has a double value—not only does it train you in the mechanics of correct speech; articulation, enunciation, voice control, etc.; but it trains you to think clearly and to organize your ideas into clear and forceful language that makes public speaking effective. It's too bad that this work isn't a requirement in every school in the land, as it certainly ought to be in view of the almost universal defective 'speech' and 'speaking' of students and professional speakers alike.

If you are not registered for work in both Public Speaking and Physical Education there's something wrong with your schedule and you'd better revise it at once.

LET'S GO SLOW

The Aggies whipped Granite High last Saturday. Some students saw the game. Even some faculty members witnessed it. The spirit of the occasion was remarkable. Even cheers were given, and one unruly rooter actually stood up on his seat and waved his hat when a touchdown was made from the kick-off. Such tremendous demonstrations of student enthusiasm cannot fail but hearten a team wonderfully. When we consider that the boys on the squad do nothing more than work strenuously with head and body for thirty hours each week, we cannot help but suggest that the great support furnished them at such games as last Saturday's contest is entirely out of proportion. Let's calm down. Don't you think a postal card with a college yell on would be more to the point?

A GOOD SUGGESTION

The suggestion has been made, and it's a good one, that the Agricultural Club should get going. One of the biggest and most representative clubs of the Institution, and the one having possibly more outside high school connections than any other, it is very important that it perfect its organization at once. The important thing right now is that a capable, wide-awake man be secured for president. The club will then rapidly and easily again take its prominent place in school activities.

Uniform Dress, as Recommended by the Board of Trustees

BY THEIR DRESS YE SHALL KNOW THEM

The new uniform dress for the women students of the U. A. C. that was adopted upon a recommendation from the Board of Trustees of the institution to meet a need for more democracy, greater economy and better taste in dress, would seem to meet this threefold need most admirably. We think the girls look charming and altogether "up to the minute" in their fresh white "mid-dies" or in their serviceable "nifty" serges—and what a comfortable feeling it gives us to see their sensible low-heeled shoes! We aren't always on the qui vive expecting to rescue some fair damsel from an attempted ankle or neck breaking stunt in hallway or on stairway, because she is wearing a pair of silly unhuman looking high heeled shoes!

We note with particular pride that the new uniform has almost to a girl been adopted by the upper class women and the sorority girls and we hope that it will be only a matter of time until the newly entering students will fall into line, and the entire student body, femininely speaking, be sensibly and suitably dressed in the recommended "mid-dy" or "one-piece serge."

There'll be all sorts of occasions girls to wear your chifony "glad rags." School isn't the place for them—to wear "fluffy-ruffles" in business hours is a breach of good taste, so relegate them to band-boxes and closet pegs until the proper occasion calls and then our "middy-maid" may with perfect propriety rival the lilies of the field!

WANTED

Wanted—a student body—by a very capable and hard-working football team. Will secure victories and even championships for the right kind of organization. Now in possession of a sickly, spiritless bunch suffering from throat trouble. In case no other student bodies are available, any remedies that can put life, vim, spirit, pep, ginger, any old thing that means action, into a worn-out, enervated body, will be appreciated. Communicate with the Aggie football team, College Hill.

FRESHMEN ELECT OFFICERS

Hayward Is Named President
At a class election held last Tuesday, Clem Hayward from Fielding Academy, Paris, Idaho, was elected president of the Freshman class. Mary Hansen was made vice-president and Ray Silvers was elected secretary and treasurer. A big vote was cast.

MANY MEN IN SERVICE

The Sigma Alpha Fraternity has compiled a partial list of its members now in some branch of the army service. From the information now available it appears that there are twenty-seven in actual service or in training. Of these, eight are now commissioned officers and seven others have reason to expect commissions in the near future. The list is as follows: Captain Eugene Santschi; First Lieutenant Booker Preston, Second Lieutenant Eugene Merrill, Second Lieutenant Bryant Bullen, Second Lieutenant Lynn Andrus, Second Lieutenant Mose Cowley, Second Lieutenant Eastman Hatch, Second Lieutenant James White; Elmer Jonsson, W. L. Snow and David Stoddard, in the aviation service; A. J. Taylor, Charles West and Kenneth Cannon at the second Reserve Officers' Training Camp, the Presidio, San Francisco; First Sergeant Waldo Riter, Sergeant Reuben Jonsson, Corporal Preston Budge, Harry Halton, Lee Dean, Howard Hudman, Chester Knudson, Cannon Lund, Ralph A. Smith, Ivor Sharp, Larry Evans and Bill Goodspeed. J. C. Odell is a cadet at West Point.

PERIWIGGERS AWAKE

The Periwig Club held its first meeting of the school year on Monday evening to discuss the "opening of the dramatic season" with a campus play as has been the custom in past years. There was a unanimous affirmative. We are not stating the question but keep your eyes and ears open for what's coming. With the following "stars" answering to roll-call it ought to be a decidedly stellar performance: Mae Edwards, Claire Cardon, Eleonora Amussen, Lowry Nelson, Irving Poulter, Berward Nichols and Milton Mathewson.

Locals

Cy Price, formerly a student here, stopped off at Logan for a few hours last week on his way to American Lake.

Mrs. S. J. Quinney, nee Jesse Eccles, a graduate in 1917, is entering Radcliffe this fall. Her husband, S. J. Quinney, '16, is spending his second year in the Harvard Law School.

Howard Christiansen, football manager, was called away from school last week by the selective draft. Howard is now on his way to Camp Lewis at American Lake, Washington.

Miss Emma Eccles, formerly a U. A. C. student, left last week for Cambridge, Massachusetts where she will attend Radcliffe College.

The Registrar's office serves as a lost and found bureau for the institution. All students who find articles on the campus should leave them at this office and all who have lost anything should inquire there.

Samuel Morgan, a representative of the College last year in inter-collegiate debating and this year a member of the Student Body Executive Committee, discontinued school last week to accept a position as principal of the Rich County High School, Randolph.

Lola Spencer is back at school. Football prospects are still looking bright.

Edith Hayball, a member of the Student Body Executive Committee of last year, registered for this school year last Monday.

Ralph A. Smith, for the past few years a student of this institution, left the fore part of this week for Camp Lewis, American Lake, Washington.

The Periwig Club held its first annual meeting Monday evening at the home of the director of the club, Miss Huntsman, who afterward played the part of chaperone in a merry making act, staged at the "Bluebird."

Registration is steadily mounting. Every day sees many new names added to the enrollment. Germany is now among the foreign countries represented at the College. If enrollment for the second term meets expectations, the record breaking registration of last year will be reached.

Suggested as a yell for the U. A. C. student body, to be given as vigorously as is compatible with perfect rest and quiet. (The arms may be stretched at convenient points throughout, if strenuous exercise is not objected to)—Snore-yawn, snore yawn; snore-yawn; snore-yawn snore; z-z-z-z-z-z (giving an imitation of deep sleep).

The business men of Logan are to be congratulated upon the support they gave the Aggie football team in its initial game last Saturday. A live delegation from town attended despite the fact that Saturday afternoon is a busy one for the townspeople. It is regrettable that the game was late in starting because many had to leave before the game was over.

The sororities have put in a strenuous week of rushing. With canyon parties, slumber parties, dinner parties, dancing parties, and parties comprising all of the above in one, the pretty co-ed has been kept very busy the past few days. Meanwhile the fraternities are keeping their organizations going with a few men at school, while the larger part are off training for war service.

Jack Wright, '16, class debater, logician and general good fellow, writes from the "Suicide Brigade," at American Lake, Washington, begging to have Student Life sent to him and have all his friends, ladies and gentlemen greeted appropriately. Jack in company with Hugh Jay Harvey, song leader elect, and five hundred other Utah boys who heeded the request to join the "Army of Liberty" arrived at Camp Lewis September 22nd.

Characteristic of college exhibits, the displays at the State Fair were in readiness for the first visitors last Saturday. The college exhibits are very forceful this year, centering around the two important problems of the country today—increased production and greater conservation. Next week's Student Life will contain a writeup of the College at the Fair.

A communication from Second Lieutenant Bryant Bullen, a graduate of the Utah Agricultural College in 1914, now located at American Lake, Washington, states that Bill Goodspeed, an alumnus of the institution, football hero of former days, and later a member of the faculty, has just arrived at Camp Lewis with a group of drafted men from southern California.

The Cafeteria is booming. Manager Cooley has made his slogan "Better Meals at Lower Prices," a real one. When students compare prices and food values with menus

ORGANIZATION OF ROCKY MOUNTAIN CONFERENCE

The following article, taken from the "Constitution and Rules of the Rocky Mountain Faculty Athletic Conference," should prove interesting to Aggie supporters. In it is described the history of the organization, and some of the more important rules are given.

ORGANIZATION

This Conference was organized January 30, 1909, under the name of the Colorado Faculty Athletic Conference and with the following membership: University of Colorado, Colorado College and the Colorado Agricultural College. On this date a set of eligibility rules and a constitution were formally adopted. The first rules were chiefly a codification of the generally accepted unwritten rules under which intercollegiate contests in the Rocky Mountain Region had been held up to this time. The Colorado School of Mines joined the Conference November 4, 1909. The University of Utah was admitted March 26, 1910; Denver University May 7, 1910; the Utah Agricultural College Feb. 28, 1914; and the Montana State College Jan. 6, 1917. The Conference has an understanding with the Universities of Wyoming and New Mexico by which those institutions may schedule games with the institutions of the Conference, complying with all conference rules except the half-year rule (Rule 2. Division 1) Representatives from the Mines and D. U. had been admitted to the Conference sessions as guests from the beginning, while a representative from U. of U. was present at the holiday meeting of 1909 and one from U. A. C. at the holiday meetings of 1911-12-13. The name of the Conference was changed to its present title, The Rocky Mountain Faculty Athletic Conference, on May 7, 1910.

Accordingly the Conference now embraces the following members: University of Colorado, Colorado College, Colorado Agricultural College, Colorado School of Mines, Denver University, Utah University, Utah Agricultural College, and Montana State College. The Universities of Wyoming and New Mexico are affiliated as stated above.

CONFERENCE RULES (In Part)

(In effect January first, 1917.)

Division 1. Eligibility

Art. 1. Residence and Scholarship.

A student to be eligible to participate in any intercollegiate contest must meet the following conditions:

RULE 1. He must have completed fifteen units of preparatory credit as accepted by the North Central Association of College and Secondary Schools.

RULE 11. He must have been in residence for at least one-half of a college year.

RULE 111. He must have been registered in person and regularly at work within two weeks of the beginning of the semester in which he is to participate.

RULE IV. He must be earning passing grades in at least two-thirds of what is considered full work in his institution, these not to include physical training or military drill.

RULE V. He must have made passing grades in at least two thirds

of what is considered full work in his institution, excluding physical training and military drill, in the semester of his residence preceding the one in which he participates. (Grades made up or completed after the close of the semester as scheduled in the various catalogues shall not count. His absence if for at least a year shall not count against his eligibility, provided he was not registered and started work in another institution of at least collegiate rank in the interim. A student's work during a summer session shall not be considered in either his residence or scholastic requirements.)

RULE VI. He shall not participate more than four years in the aggregate and participation in any part of an intercollegiate athletic contest shall be considered as participating for that year.

RULE VII. He must, if he enters one Conference institution directly from another institution in which he participated in athletics, not participate until he shall have been in residence one year, and in case he has not participated, he shall have been in residence one half year and shall have fulfilled the conditions of Rule V.

RULE VIII. In case a student enters a conference institution after a year has elapsed since he took part in intercollegiate sports in another institution, his case shall be treated according to Rule V.

PRACTICE HOUSE TO OPEN SOON

(Continued from page one)

worth while."

"This course is proving to be one of the most popular and valuable courses in the school. It is giving not only valuable experience to the young women who are electing the work, but it is affording the Domestic Science staff an excellent opportunity to come in closer personal contact with the students, from which much is to be gained. Through this course the department is better able to estimate the girl's ability to apply her knowledge in a practical way, to manage, to co-operate, and to meet emergencies; her judgment, honesty of purpose, and ideals can be judged much more fairly than is possible from her record in any other course in the school."

The Senior class entertained at a most informal party last Friday evening. Old Dobin and Nellie were hitched to the hayrack and the class jogged along hilariously to the canyon. After finding a beautiful nook close by the river a crackling bonfire was built, where roasting corn and hot dogs served as part of the evening's entertainment as well as refreshments.

Leland Heiner, freshman of last year, writes from Camp Lewis, American Lake, Washington, asking that student Life be sent to him to brighten his spare moments, and those of several other Aggies with him.

Through Using a

NEW DE LAVAL

PATRIOTIC DUTY as well as dollars-and-cents self-interest now demands of every cow owner the saving of every ounce of cream and butter-fat.

Likewise the saving of time that is possible through a cream separator of ample capacity, that is easily turned and always in order. There was never a time in the history of the country when both these considerations were of as great importance to the nation as well as to the individual producer of cream and butter.

Under present circumstances, a modern De Laval Cream Separator will save its cost every few months. Every cow owner owes it to himself and his fellow countrymen to effect this saving.

This is true whether you have no separator or have an inferior or half-worn-out machine, even if it be an old De Laval model.

It is important to remember, too that if you cannot pay cash for a new De Laval machine, you can buy one on such liberal terms that it will pay for itself while you are using it. Why not see the nearest De Laval agent at once? If you do not know him, write to the nearest office for new catalog or any desired information.
