AGGIES SCOUT HIGH TEAM

Game is Snappy; Old Timers, Captain Jarvis, Mohr, Nelson Show Well; First Game Feb. 8 With B. Y. C.

Aggies cut away to a good start in basketball Tuesday afternoon when they defeated B. Y. C. C. High by the top-scored score of 45 to 13 in the Smart gym. Coach Jensen used about twenty men and each showed good advantage. Especially true is this of Mohr, Capt. Jarvis and Nelson of last year's state championship team. Others who showed well were "Burr" Berenson, Stan Anderson, Harris, Cyril Hammond and "Dave" Watkins, the latter a freshman last year with Box Elder High. Aggie men who promise to do well is "Joe" Maughan, former B. Y. C. star.

These with Morg. Kay, center two years ago, and Dave Cox should make anything in the world look easy when they get going good. Just how good they really are will be shown when they clash with Coach Chapman's B. Y. C. team a week from Saturday in the Smart gym.

In preparation for the game, practice will continue nightly with Coach Lowell Romney's freshman crew, which he expects to have rounded into form as fast as coaches men appear. For them games will be arranged with good local teams throughout the State.

The game Tuesday was snappy through, the high school boys putting up a fight which augurs well for them in the high school league. For them Parkins and Jensen played cleverly while Aggie boys had already been given.

DR. GARDNER NEW MAN EXP. STATION

Among the late acquisitions to the faculty is Dr. Willard Gardner of the department of physics. Dr. Gardner is an old graduate of the U. C. A. He received his B. S. in 1912. After graduating here he received his physics and chemistry at the B. Y. C. for a time. He enrolled in the University of California at Berkeley where he received his master's degree and later his degree of Doctor of Philosophy. While at Berkeley he worked mainly in physics. At present Dr. Gardner is working with the aid of Mr. Ewing of the department on "The Movement of the Earth in the Soil." In this work they hope to formulate some law by which this movement is governed. Dr. Gardner states that the work is proceeding satisfactorily and expresses great satisfaction in the results of his work so far.

No Sorority Rush Parties

Faculty and town rumors preventing such gatherings have effected sorority rushings to the extent that no rush parties will be held by the Greek Goddesses. Instead of parties by the individual parties may be given by one or two members of an organization to three members from three prospective members.

The rushing season will close Saturday; letters will be sent Sunday and the final parties of the year made Tuesday, February 4.

Services Held For Able Professor

L. A. Merrill Buried; Died of Pneumonia January 25; Long Associated With Extension Work

Funeral services were held yesterday for Professor Lorin A. Merrill of the Extension Division, who died Saturday January 25th from the effects of influenza—pneumonia.

Professor Merrill was born April 4, 1874 at Richmond, Cache County, Utah, and spent his boyhood there. In 1892 he registered at the A. C. in Agriculture. Four years later he received his B. S. For a year after graduation he assisted in the dairy department at the College. The next two years of his life were spent in an educational mission to California, after which he practiced dairy farming at Murray.

On August 1, 1912 he was put in the employ of the Extension division as county agent in Sevier county. From here he was transferred to assistant county agent leader on June 1, 1915, which position he held until the time of his death.

Mr. Merrill was held in high esteem both by his professional and church associates for the vigor and loyalty with which he did his work. A peculiar feature of the funeral services was that no flowers were present, due to an expressed wish by Mr. Merrill that there be none.

MILITARY WORK STUDENT UNION

Status of Returned Officers For Present Same as Others; Question To Be Settled By Congress.

The R. O. T. C. will be organized at the College this year on the same basis that it was formerly. Active work will be commenced as soon as the work of demobilizing the 15th United Field Artillery is finished. The paper work will soon be ready for the War Department and the Quartermaster Department will ship within the next few days to Fort Douglas two carloads of supplies consisting of 1000 coats, blankets, mess kits, rifles, etc.

The Committee of Education and Special Training at Washington which had charge of the S. A. C. T. will have charge of the R. O. T. C. with the unit here coming under the District Inspector at San Francisco. It is expected that the Committee of Education and Special Training will act immediately upon the future of the R. O. T. C., so that definite procedure can be taken.

The future of the R. O. T. C. will be influenced to a greater or less degree by the action taken by Congress when it discusses the question of universal military training and the size of our standing army.

As yet there is no definite information given out by the war department as to the step that will be taken toward men who have seen service at home or abroad. This question will be one to arise at every institution at which an R. O. T. C. unit is established, and undoubtedly will be one of the first to be acted upon by the committee in charge. For the present, however, their status is the same as that of any other individual.

FRESHMAN

His year turn to next year Freshman, he prepared. See Coach Robinson, A. 9.

REVENUES MADE TO INFLUENCE THE

Everyone Must Wear a Mask And Have Daily Temperature Reading—Delinquents Will Be Dealt With

To save guard the health of the students against an outbreak of influenza the College authorities have made two rulings which must be lived up to. All students must have their temperature taken daily between the hours of 7:30 and 12:30, and everybody must wear a gauze mask.

Temperatures are taken in room 113. Masks are for sale at the entrance to the main building. Strict compliance with the rules of the institution in this matter of health protection will make for results in combating influenza. As the authorities have the rulings place themselves liable to some drastic action by the faculty. A point is kept of all high temperature readings and all delinquent students are noted.

145th F. A. Souvenir Edition Planned For By Student Life

A magazine edition of Student Life, commemorating the visit of the 145th Field Artillery to Logan, and the College will be issued about February 15 if present plans carry. The proposed pamphlet will contain cuts of the 145th, the College and the town as well as news stories of the regiment during its trip overseas and after arrival here.

The work will be under the supervision of professor Earl Robinson, acting for the College, the regular Student Life staff and a committee of town people.

Copies will be distributed to all students, to the 145th, to the State legislature and townspeople desiring them.

Freshies—Here is your chance to show your ability. Show up in the gym at 4 o'clock each night and see how to do it.

Library Regulations

The Library is open during college hours from 9 a. m. to 5 p. m. until 5:00 p. m. On Saturdays from 9 a. m. until 1:00 p. m. The faculty have direct access to the books on the shelves and students may borrow books by special permission. Every book taken from the desk must be signed for.

Books may be drawn from the Library for home use with the permission of the Library assistants. The books must be signed for and not kept longer than two weeks. Those who keep books longer, the privilege of taking books from the Library will be denied.

Reference books, such as dictionaries, encyclopedias, magazines, and S. C. Public Documents, must not be taken from the Library.

Reference books for classes may be taken by a student in the class at 4:30 p. m. but must be returned to the Library book before 9:20 a. m. the following day. After reading a book from the Library, return the book to the desk.

Five cents a day is charged on all overdue books. Twenty-five cents a day is charged on all "reserve books" kept after 9:20 a. m. Any student taking a book from the Library without permission may be held to suspension from school.

SENTENCE IN THE LIBRARY MUST BE MAINTAINED.

FRATERNITIES MAY NOT PLEDGE TILL SPRING

As a result of a meeting yesterday of the Fraternity Pan-Hellenic Council, there may be no pledging of new registrants this year till spring. A desire has been put on the part of some members of the council to have no men eligible for fraternities till their sophomore years. The practice of this principle has been interfered with in the past by a feeling that an injustice would be done fraternities running houses. But this year since only one fraternity, Delta Nu, is now running a house this objectionable feature does not exist. Formal action will be taken Monday when the Council again convenes.

Other rules already established, which provide that a rushing season ending with the sending out of bidding letters February 15 to be answered not later than February 17, will be enforced if no action is taken on the matter of delaying the season. The present rules also provide that any man admitted to full College standing by the College, and who has completed registration by February 1 will be eligible for fraternity membership.

Health regulations provide that no public parties be held so far fraternity rushing starts before spring it is very likely be of the same nature as that being done by the sororities—individual rushing.

SUGAR GROWERS MEET

Men From Whole U. S. Gather At A. C.; Faculty Men Give Addresses; Town and College Unite in Entertaining Visitors

Utah can produce better sugar beet seed, with higher germinating powers, and at lower cost than can Europe. This fact was the most salient one that developed from the discussion of the experts in the beet sugar industry who met at the College January 28, 29 and 30, in the initial session of the American Association of Sugar Beet Agriculturists. This information should prove particularly gratifying to Utahans, because it was due to the efforts of the Utah Agricultural Experiment Station, which has been having direct access more than to any other agency that the production of sugar beet seed was made a commercial possibility.

The convention was a remarkable success, according to officials in charge. Representatives attended from the four big sugar beet producing sections comprising Michigan and Ohio, the Rocky Mountain section, the Intermountain section and California.

During the sessions of the association addresses were given by Dr. E. K. Smith, formerly superintendent of the College, who spoke on the sugar beet nematode; and Dr. George R. Hill, head of the school of Agriculture, who spoke on sugar beet diseases, besides other eminent men as Mark Austin of Utah-Ishii Sugar Co., W. K. Winterhalter of the United States Beet Seed Company and L. A. Moorhouse of the U. S. Department of Agriculture.

Entertainment was provided the visitors, who included farmers from the whole western country as well as the eastern notables, by the Commercial Boosters club of Logan and by the College authorities.

NUMBER 3.

COLLEGE AGGIES OPEN THEIR DOORS

Many Returned Soldiers Register; Interest in Home Ec. and Tractors; Full Year's Work May Be Had.

The Utah Agricultural College has again opened its doors for school work with a registration expressing all expectations. An exceptionally large number of returned soldiers have registered, bringing the number of new students, that is, those entering for the first time this year, almost up to the number of returned students.

Great interest is being manifested in Agriculture and in farm tractor courses. The courses in Home Economics are well attended, while a surprisingly large registration is to be noted in the School of Commerce and Business Administration. In general, Science, both the scientific and the cultural subjects have heavy registration.

Many students expect to take advantage of the opportunity offered by the College to secure a full year's work by attending the Summer quarter. Practically the entire College faculty will be in attendance during Summer school and a full list of courses will be offered.

By intensive work, seniors are being allowed to complete the degree in 1919 upon the completion of two quarters' work.

WINSOR RICHES FOR NEW TURK

Graduate Goes to South America For Guggenheim—Has Had a Wide Experience in Irrigation

Mr. L. M. Winsor, Irrigation Engineer in charge of the U. S. Department of Agriculture, who has been cooperating with the College, has left on a three months leave of absence, for Chile, South America, where he will be chief engineer on an immense irrigation project of the Guggenheim, the internationally known mining engineers and promoters of New York City. This position will command a large salary and it will also confer a signal honor on Mr. Winsor and the U. C. A., his alma mater.

The exact nature of the work will be to divert mountain streams of this particular section into such a position that they will be available for irrigation of these towns. In Chile, there have several miles of work in this section. Their mining towns have no agricultural support, and these towns have no food used by these towns has to be carried long distances, by water. This is, naturally, a costly procedure. The land is fertile, but the water is not available for farming if water could be brought to it. The climate in this particular region, like that in Utah, is very dry, there being barely one inch of rainfall in some sections. Mr. Winsor's problem is, then, to bring the water down from the region of eternal snow to the dry soil in order that food may be grown for the masses of the region.

"Lost" Winsor, as he is popularly known among his friends, was born at Enterprise, Utah, in 1895. Until he was thirteen he spent his time alternately on a farm and in school.

Not a Military Post

Right now is a good time as any to express the sentiment of students on the matter of bringing the Utah members of the 91st division to the College for demobilization. The plan should be discouraged from now until nothing further is heard of it.

It was very fitting and proper that the 145th Field Artillery be brought here for demobilization. School was not running and the facilities of the Institution were available. But now that school has started it is folly to talk of bringing the men of the 91st here to be mustered out. In order to handle the men school would of necessity have to be discontinued. Enough time has been lost already this year without wasting any more.

The school and town were advertised sufficiently by the coming of the 145th and can stand to do without the benefits which would come from the presence of the 91st. The original purpose in building these buildings was to have them used as halls of study and not as barrack rooms and mess halls. All due honors be given to the Utah men in the 91st, but let the A. C. be used as it was originally intended not as a military post.

Greetings Coach

The "glad hand" to you Coach Romney and success to you! With your coming we look forward to results in athletics. If the Aggies don't turn out a "world beater" of a football team next year it won't be because of an improperly coached team. Of our track team we say the same.

Lowell Romney, recently appointed coach of football and assistant in the other branches of sports, comes of the family of athletes whose names shine so brilliantly on the University of Utah records. Coach Romney has taken part in every branch of athletics and has shone in each. Since graduating from our sister school he has coached at Granite High school and has been an instructor at Camp Taylor, Kentucky, where he was rated by his commanding officer as the best in his regiment. A year ago last fall he played

a star game at half back for the Camp Lewis football team.

In taking over the burden of your new position Coach Romney, you have the support of every loyal student of the Institution. We are with you to turn out winners. You may and perhaps will institute changes in system but we're with you to put them thru and "clean up on" everybody—your alma mater included most of all.

Welcome Assistance

To all students who have literary ambitions an invitation is extended to write for Student Life. Just make your presence known and you will be given a chance to write for the paper.

Students especially interested can get further work in newspaper work from Professor Arnold's course in Journalism, given Tuesday and Thursdays at 9:00 o'clock.

"Buzzer"?—Sure!

Cry shame upon those who are discouraging the publishing of a "Buzzer" this year! A "Buzzer" most certainly should be issued! The issuing of the College Annual is about the only remaining bit of school tradition that can be carried out. If the Junior class does not feel able to finance the proposition as usual, let the school help them—but by all means, have a "Buzzer."

Momentous things have happened this year even tho school has not been running. A record should be kept of them and their effect upon the Institution. Juniors, get your staff lined up for a "Buzzer!"

Goodbye-Barn—You're Thru

A prayer for the destruction of the old horse barn south of the Chemistry building should be offered up to the Gods of wind and fire if man's hand doesn't see fit to remove it soon. The structure has long since filled its days of usefulness and is now a blot on the otherwise beautiful campus of the College. Why leave it?

Jordan to Handle Sports

Ralph Jordan, former University of Utah student, will act as sporting editor of Student Life. Mr. Jordan has been connected with Salt Lake papers the past five years and promises to keep sports alive at the A. C. Besides writing them Jordan will play most sports he being a good man in football, basketball and baseball.

A Scrap Book

Old students who have lived their college days properly have a record of what they did while there. They all have scrap books and they gain no more pleasure from anything than looking over the pictures from the "good old days." Not one of them regrets the minutes spent in collecting and recording the events of the happiest days of their lives.

Better start a scrap book yourself and enjoy your old age.

Great talkers, little doers—Poor Richard's Almanac.

Utah Power Offers Jobs

The following communication has been received by President Peterson from the Utah Light and Power company.

President E. G. Peterson,
Agricultural College,
Logan, Utah.

My Dear Sir:

In reference to the steps being taken to find employment for men being discharged from the military and naval service of the United States, I wish to advise that we will in the very near future have several vacancies at our hydro-electric generating plants for bright young men, preferably high school or college graduates who desire to enter the practical electrical field. The wages for beginners will be \$30.00 per month, and we would like to secure applications from a few young men of proper qualifications who can be fully endorsed and recommended by you for such work. Therefore, I am taking the liberty of enclosing to you a supply of application forms which I should appreciate very much if you will have filled out by the applicants and forwarded to me.

Very truly yours,
(Signed) COOPER ANDERSON,
Superintendent of Power,

Thomas Made Chairman of Student Affairs

Professor J. C. Thomas, head of the chemistry department, has been made chairman of the Students' Affairs committee to fill the vacancy caused by the death of Professor Walter E. Brooks.

Professor Thomas' duties will be to frown on the delinquent and smile on the meek. His smiles will be cherished by all, but beware of his frowns!

KAPPLE REPORTED TO BE IN HOSPITAL

Captain "Dick" Kapple, '17, famed as an athlete at the College, is reported to be a casualty in France. According to the reports he is now languishing in a hospital in France suffering from the results of gas and shell shock, with a possibility of losing the use of one arm and leg.

"Dick" was one of the Aggies to go to the second officers' training camp at the Presidio. From here he was commissioned second lieutenant in infantry and sent to Camp Lewis. He left this camp in June with the 91st division and at the time of his injuries was in command of company F of the 362 Infantry in the Argonne.

'P' Hansen Stars

"Perce" Hansen, halfback on the Aggie championship football team of 1917, created quite a little "rep" as a footballer at the University of Idaho this fall.

While there in the capacity of a Lieutenant instructing in the S. A. T. C. he played football for diversion. University chroniclers record that in every game he played he starred. In one, against Gonzaga University, he made the score which was the cause of a 12-7 victory over them, when he intercepted a forward pass and speeded away 42 yards for a touchdown.

And Other Small Towns

Practically every town along the line celebrated. Ogden went wild. Pocatello was bughouse, and even staid old fatherly Washington got into its high heeled boots—Franklin County Citizen.

BULLETIN TELLS STORY IN PICTURES

A new bulletin that promises to be a distinctive and highly interesting thing in Experiment Station work is being published by the Utah Experiment Station and will be ready for distribution in the near future.

The bulletin, which will contain about sixty pages will give a history of the Station, its work, its problems, its Directors, almost entirely in pictures. In fact, everything that the Station has done that could possibly be told in pictures will be told that way. Pictures of all the Directors will be included, as well as a list of all the Station publications.

Dr. Merrill of the Horticultural Department is chairman of the committee on the bulletin. Professors Alder and Isaacson are working with him.

Little Theatre at "U" of Utah

A novel feature of the work in dramatic art at the University of Utah is the establishing in conjunction with it of a "little theater," after the type of those in Chicago and New York. Interested in the enterprise with Miss Babcock, the instructor of Dramatic Art at the "U," are Maurice Brown and Ellen Van Valkenburg, seen here last year with Madam Hammer in the Ibsen plays, "The Master Builder" and "Hedda Gabler."

WINSOR IN CHILE FOR NEW YORKER

(Continued from page one)

He then served an apprenticeship for two years in the contracting and building trade. The following four years he worked in practical railroad construction on new roads in Utah, Idaho, Nevada, California, Montana and Colorado. This gave him much valuable experience and a wide acquaintance among engineers. The young man decided that this practical experience was all very well but that to really advance and "carry on" his beloved work in engineering he would have to get a college training. The next year he entered the high school department of the U. A. C. While at the A. C. he "scored a hit" both as a scholar and a good fellow. In the spring of 1912 he graduated with the B. S. degree in Irrigation and Drainage. It was during the summer of 1909 that, while he was working in the State Engineering Department, he completed a hydrographic survey of Logan river and its canal system. When he graduated he became Farm Adviser in the Utah Basin. Then in 1913 he was made farm agent of the San Luis Valley, Colorado. Later, in the same year, he came back to Utah and became assistant Irrigation Engineer at the U. A. C. One year later he became U. S. D. A. Irrigation Engineer cooperating with the Utah Experiment Station and Irrigation and Drainage Specialist for the Extension Division. He wrote circular 6 of the Utah Experiment Station on the "Measurement of Water."

The College and the State have, fortunately, not definitely lost Professor Winsor. As stated above, he is on a leave of absence and, in all probability, he will return in June.

TWO MEALS A DAY AT COLLEGE NOW

Two meals a day are now being served at the College, the noon meal served between 12:00 and 1:00 o'clock at the old cafeteria with Mr. Cooley in charge and the evening meal between 5:00 and 6:00 o'clock in the Women's building with Miss Hunter in charge.

At these places students may secure at a nominal cost, food of the very best. It is the plan in operating the two places to solve the question of board which is often so perplexing to students.

The cafeteria in the Main building will continue throughout the year as it has in past years. That in the Women's building will continue through out the winter quarter regardless of its patronage; and the full year if profitable.

Miss Hunter says that in order to make her enterprise pay 75 meals a day will have to be served. During the winter quarter the meals there will be prepared twice a week by the students in Miss Hunter's course in institutional cookery.

The success of the enterprise depends upon the support given by students. In other institutions it has met with success. Here it will also if students become aware of the real advantages of eating home cooked food, in a variety with a clean place to eat it in.

Alumna Dies

Nettie Peterson Succumbs to Influenza. Was Popular Member of Sigma Theta Phi.

Funeral services were held Tuesday for Miss Nettie Peterson who died Saturday Jan. 25th. Miss Peterson was a former student of the College. While at school she established an enviable record in scholarship. She was very popular among the students of the school, a member of Sigma Theta Phi Sorority and an active member of many of the school's organizations. Since her graduation she has taught school with success.

Student Life extends its sincerest sympathies to the family and friends of Miss Peterson.

"Doc" Fordham Writes

"Doc" Fordham, former track man of Aggie fame, writes the following from France:

Sept. 21st, 1918.

Editor "Student Life":
U. A. C., Logan, Utah.
My Dear Sir: I am inclosing a 5 franc bill for which please send me "Student Life" for the school year of 1918-19.

I often wonder how everything is at the College and I know of no better means to keep in touch with you than to subscribe for the College paper.

We are all having strange experiences in this world's war, which few of us that we would have when we bid farewell to our Alma Mater in June, 1916. Some have the advantage in being directly in the lines, and seeing the Hun go down to defeat before the indomitable, undefeated spirit of the U. S. army. It's certainly a joy and an inspiration to watch and be with the men when they go "over the top"—cool, determined, and filled to overflowing with the spirit of fight. No doubt there will be many men who never will return, but we never worry about the final result. It is going to be settled just one way—the Hun is going to be licked and licked completely. And I hope to give a good account of myself, as I hope I have in the past. I hope that when everything is said and done, that my God, country, home and college will be proud of me, for doing my "bit" during this big fight.

Wishing Student Life, and all activities associated with the College a successful school year, I hope to remain.

G. ALBERT FORDHAM.

Hdq. Co. 26th Inf.

A. E. F., France,

via New York.

LOCALS

"Jim" White '17, wearing the silver of a 1st Lieut. has been about the halls during the week. He has just returned from Camp Grant, Illinois, from where he was discharged from the army. "Jim" expects to engage in the fruit business with his father in Utah and Weber counties. He expresses great relief at being a civilian again.

Pearl Oberhansley, one of last year's most popular students is teaching school at Payson.

A lengthy letter from Floyd Hamand '16 tells of his travels in France and also of visits to four hospitals for treatment for gas. Floyd was in the Argonne and went over the top several times, with Australian, French and English troops. He says he would have traveled all over France but the francs ran out.

Orson Pratt a former university of Utah student is one of the new registrants who promises well for Student Life staff. He has had some experience on Salt Lake papers.

Miss Alice Ravenhill is ill in Denver with the "flu". She was returning from a trip to Boston in interest of the Home Ec. school when taken ill. During her absence Prof. Saxer is acting as head of the school of Home Economics.

Doctor Titus, formerly professor of entomology at the College is attending the sugar beet congress now in session at the College.

Professor Arnold's latest journalistic endeavor is to write up the convention of sugar beet growers held here for "Sugar" the national magazine in interest of sugar.

Asa Taylor '15 was on the Campus Wednesday. He has been discharged from the army where he held a commission in the artillery.

Lorenzo Hatch, president of the Student Body organization, is on the scene, ready for business. Hatch was away from school the first part of the year because of war duties at the University of Montana.

Ameen Khan, alias "Duke" the popular tennis star, is in New York City preparing to enroll in Columbia University.

A. G. ("Twitche") Twitcheil was in town the first of the week with his Boxelder High school basketball team to play the B. Y. C.

Georgias Avedlan, a former student who hails from Armenia is again at school after a year's absence on the farm.

"Joe" Reed, popular Delta Nu man has returned from the aviation camp to the U. A. C. to continue his work so rudely interrupted by the kaiser.

"Bob" Pixton '17 dropped into Student Life office Thursday on his way to Salt Lake from Idaho.

Page Everet True!

Doesn't he give you a tired feeling?—the boob who hangs at the window of the bookstore and smiles and says, "well, yes," and still hangs on while you wait to buy your pencil and "chaw" your finger-nails.

CHAFF

"There's a little chaff in
every thrashing"—
I. M. Cornfed.

"Whiskey Anderson of taffing fame had his thermometer taken four times yesterday. No doubt this was due to the fact that the thermometer was dipped in alcohol after each offense.

There is no doubt now about school running full blast as our esteemed President Lorenzo "Shave-tail" Hatch has promised to register.

Hereafter it will cost 25c an inch for a write up in this column. Of course its to be paid in advance.

The senior girls can't see how the class can have any good parties this year as six of the eight made members are married stiffs.

It is with great delight that we hail this entrance of "Pesty" Shave-tail! Jarvis into the ranks of the fusers; Pesty bids fair to wear Jazz Hansen's crown this year. "Pesty" is staying with Andy now as he would rather walk home with Andy than alone.

"Curley" Bowen is busy compiling a list of chicken coops for publication in book form. It is the only authorized and official book on the subject and is entitled "Bowen's Guide to the Hen Houses of Logan and Vicinity".

Prof. "Smiles" Saxer is wearing a broader smile than ever. He doesn't have to shave for at least a week now. He will have a hard time curling his upper lip tho when he takes his nose bag off.

Sneezes

You are sure to make a hit if you buy a mask from Helen.

It takes a deuce of a long time for some of us to learn just where "flu" masks should be applied.

I opened the door and Influenza—(new.)

MASKS

To wear 'em or not to wear 'em that is the question.

"Snail" Harris insists on having a hole one inch square in his mask through which to breathe.

Such Is Life

By "Sorabrah"

Yes the affair had reached a Critical Stage. It had even gone so far that They would Kiss each other in Public or in the Presence of the Kid Brother without Bribing him not to Tell. Of course She wore his Frat Pin, and His X club Pin, and His Z Club Pin, and His Z sweater with the Big Green 'on it and so on Ad Infinitum. He would go down to See Her every Night and with Great Gobs of feeling in His Manly voice He would ask Her if She loved Him Still. Then She would say, as Follows: "Raoul, you know I love you. I'll always love you." Then would ensue a long pause of what is commonly Designated as Rapture. Then Raoul would manage to Choke Out these Pregnant Words, "Shall We plan the Kitchen now Dear?" And She would say in this Wise, "Yes. Let's. Let us have it in White Enamel."

Yes It Had Reached A Critical Stage.

Then one Particularly Fine night, a night when the Moon Shone like it Used to when you were a Kid and were out Playing "Run My Shoes, Run." The Stars, too, were Twinkling in Rare Form. Of course our Hero drove down to see his Dearly on such a night as this. It was a Habit with Him.

It seemed like She met Him with

Modest A. E. F. Vet. Enrolls at College

Adren Aitken Carries Wound
Stripe With Modesty; Was
Gassed in Battle of Argonne
Forest

Adrien Aitken is a modest young man. He is an extremely modest young man, for although he has passed through the Argonne which would make the ordinary man green with envy, and although his experiences make anything that most of us have experienced seem like a quiet game of croquet on a Sunday afternoon, yet he won't talk. And that's where the rub comes; he won't talk. He seems to have the idea that his little adventures are commonplace and although he has been in the trenches, "over the top, with the best o' luck" several times, and gassed in the bargain, still he won't talk.

Aitken was a student here in the 1916-17 school year, in the School of General Science. We are extremely glad that he was registered in the School of G. S., because that proves the mettle of the G. S. students. On June 20, 1917, Aitken joined the colors. After some training here, he went over. He was connected with the 347th Machine Gun Company of that famous division known as the 91st. As every Utahn knows, the 91st has seen some fierce fighting.

They were in the action that many authorities claim was the turning point of the war, Chateau Thierry. Well Aitken was with them. According to his brief description, he "went over" several times to get a crack at the pride of the Fatherland. He claims that fighting with the Kaiser's hordes is like unto the old style Indian fighting, ambuscade. They were supporting the 86th Infantry; Aitken's battery charged, and Aitken charged with them. That action is somewhat muddled in his mind, the whole thing is as clear as mud. A day and a half later he was picked up, gassed. Phosgene was responsible. He was placed in a French hospital and was there from September 28 until he came home on the Leviathan. He was at Camp Funston for awhile and then was "honorably released" with a beautiful little wound stripe which he wears very unassumingly.

Mr. Aitken is glad to get back home, and especially back to the U. A. C. He states that he saw several A. C. men "over there," all making names for themselves. He doesn't say what he thinks of the French girls.

a Cold Hand on this night in question. She did not Respond to His Embrace as Per Usual. All right, if you insist, have it your way. She Was like an Iceberg on a Cloudy Day.

"Good Evening," She said Frozenly.

She Yawned Six Times in the Half Hour He stayed. At Nine O'clock He Mumbled something about his Lessons and Left without even saying "Au Revoir."

His usual Hours were from Eight-Thirty—on. As He left Her Palatial Residence He stole one Backward Glance. (Just for luck, of course). Three to one you don't know what He Saw. There was HIS beloved in the Arms of Another. He was a Tall Roman. The Private with a Pug Nose and an Overseas Cap Perched Jauntily on His Curley Locks.

And they say He Never Spoke to His Dearly Again.

DE LAVAL Separators

Save in
7 Ways

QUANTITY of cream that no other separator will recover completely, particularly under the harshest conditions of every day use.

QUALITY of cream as evidenced by De Laval butter always scoring highest in every important contest.

LABOR in every way over any gravity system, and also over any other separator, by turning easier, being simpler, easier to clean and requiring no adjustment.

TIME by hours over any gravity system, and as well over any other separator by reason of greater capacity and the same reasons that save labor.

Easy to prove these savings

These are all facts every De Laval local agent is glad of the opportunity to prove to any prospective buyer. If you don't know, the nearest De Laval agent write the nearest De Laval office, as below.

COST since while a De Laval Cream Separator may cost a little more than a poor one to begin with, it will last from ten to twenty years, while other separators wear out and require to be replaced in from one to five years.

PROFIT in more and better cream, with less labor and effort, every time milk is put through the machine, twice a day, or 130 times a year for every year the separator lasts.

SATISFACTION which is no small consideration, and can only come from knowing you have the best separator, and being sure you are at all times accomplishing the best possible results.
