This survey asks a series of questions dealing with common risks from pesticides to water quality. The survey is divided into different sections to help you identify the specific practices or conditions on your farmstead or acreage that should be addressed to reduce risk of water contamination.

The results of this survey are intended to provide general information and recommendations regarding practices and potential risks to water quality. Keep this survey as your private record and use it as a guide to taking action to reduce these risks.
For each question circle the answer that best describes your situation. At the end of each section add together the numbers that correspond to each answer. When you have completed the survey, add together the section totals for the total risk assessment score.

**Mixing and Loading Practices**

1. Where do you get the water that you mix with pesticide?
   - a water tank (1)
   - directly from well (3)

2. What is the minimum distance between any pesticide mixing or loading area and a well or surface water?
   - greater than 100 feet (1)
   - between 20 and 100 feet (2)
   - less than 20 feet (3)

3. Are all pesticide mixing/loading areas downslope from existing wells?
   - Yes (1)
   - No (3)

4. What precautions do you take to prevent back-siphoning?
   - permanent air gap (3)
   - water tank separate from well (3)
   - anti-backflow devices (2)
   - none of the above (1)

5. Have you ever dropped a water supply hose below the fluid level in a mixing tank?
   - No (1)
   - Yes (3)

6. Is someone present during pesticide mixing/loading operations to watch for spills, mishaps and to take corrective action?
   - present entire time (1)
   - present most of the time (2)
   - start filling, leave and return after set time (3)

7. Have you ever had a spill that you did not clean up?
   - No (1)
   - Yes (3)

8. Are there signs such as dead vegetation that indicate chemical movement away from the mixing/loading area?
   - no signs, vegetation healthy (1)
   - some patches of dead vegetation (2)
   - permanent dead vegetation (3)

Mixing and Loading Practices section total _________

9. What is the condition of the mixing/loading area?
   - concrete pad with curbs / no cracks, or sealed cracks (1)
   - concrete pad / no curbs, no cracks (2)
   - no pad, soil or gravel surface (3)

Storage

10. Are most of your pesticides stored within 100 feet of a well?
    - No (1)
    - Yes (3)

11. Are most of your pesticides stored within 100 feet of surface water?
    - No (1)
    - Yes (3)

12. Is your pesticide storage locked to prevent accidental valve opening or vandalism?
    - Yes (1)
    - No (3)

13. What type of floor does your pesticide storage have?
    - sealed concrete floor (1)
    - unsealed concrete floor (2)
    - soil or gravel floor (3)
14. Are there inside drains in the pesticide storage area?
   No (1)
   Yes, drain has sump (1)
   Yes, drain runs out back of building (3)
   Yes, drain runs to city sewer (3)

15. Do you store any canceled or banned pesticides?
   No (1)
   Yes, store in its own secondary containment
      (a can in another can to catch leaks) (1)
   Yes, not stored in any special manner (3)

16. In case of a fire, is your fire department informed on
    the location of your pesticide storage area, and do they
    know it could be better to allow the fire to burn rather
    using water?
    Yes (1)
    No (3)

Storage section total _________

---

**Cleanup and Container Disposal**

17. Where do you apply the rinsate from pesticide
    sprayers?
    field (1)
    farmyard, more than 100 feet from well (2)
    farmyard, less than 100 feet from well (3)

18. Where do you clean pesticide application equipment?
    field (1)
    farmyard, more than 100 feet from well (2)
    farmyard, less than 100 feet from well (3)

19. Do you triple rinse pesticide containers prior to
    disposal?
    always (1)
    sometimes (2)
    never (3)

20. Where do you dispose of pesticide containers?
    recycle or take to appropriate landfill (1)
    farm dump or burn pile on farm (3)

Cleanup and Container Disposal section total _________

Total number of Yes answers: __________
Total number of No answers: __________

If you had all Yes answers, your score is 0. If you had
more Yes answers than No, your score is 1. If you had
more No answers, then your score is 3.
Locate your total risk score on the spectrum above to get a general idea of the risk pesticide are posing to water sources on your farmstead or acreage.

Next, compare your risk scores for each section with the ratings (Low, Moderate, and High) for the individual sections to determine the practices where your risk is moderate to high.

For these sections go back into the survey and look at the questions for which you marked a low scoring choice. These are the areas you should address first to reduce risk of water contamination.

**SURVEY 2 TOTAL SCORE**

- **Mixing and Loading Practices section total** _____ x 3 = ______
- **Storage section total** _____ x 3 = ______
- **Cleanup and Container Disposal section total** _____ x 5 = ______
- **Other Management section total** _____ x 10 = ______

**TOTAL RISK LEVEL**

- **Low**
- **Moderate**
- **High**
