In a quiet room on the third floor of the University Center, Muslims from an assortment of Middle East nations meet each Friday at 2 p.m. The Imam calls the groups to prayer and for the next thirty minutes these members of the world’s second largest religion are transported from their surroundings, and united in Islam. The worship is a mixture of assorted postures, silent and oral recitation, individually and in group fashion following the Imam. A portion of the meeting is used by the Imam to deliver a lesson from the Qur’an.

**Five Prayers**

The five-times-a-day formal act of prayer surprises most Christians and would undoubtedly frustrate potential employers accustomed to employees who do their praying in an undetectable fashion, or on their own time.

Food in our country is a major problem, with so much pork offered (a meat Muslims are prohibited to eat) and with other meat improperly killed and therefore "unclean." Utah State students have been able to overcome the meat situation with the help of a supplier in Smithfield who allows them to butcher their own.

Here are some basics of Islam presented by The Muslim Students Association.

**Islam Means Peace**

Islam in Arabic means peace, purity, obedience and submission, and in the religious sense, Islam is submission to the will of God. Muslim is one who accepts His sovereignty and completely surrenders himself to His law.

A Muslim believes in the unit of God, all His messengers, all His messages or Books, His angels as His creatures and functionaries, the Day of Judgment, man’s accountability for his deeds and actions, and life after death.

**Word of God**

Qur’an is the last revealed work of God and the basic source of Islamic injunctions and laws. Qur’an deals with the bases of Creeds, morality, history and humanity, worship, knowledge, wisdom, God-man relationship, and man-to-man relationships in all its spheres. Comprehensive basis on which sound systems of social justice, economics, politics, legislation, jurisdiction and law and international relationships can be built, are the important contents of Qur’an.

**Islam’s ideals reflect spirit of Internatl week**

Muhammad himself was a simple unlettered man who could not read or write. Yet, Qur’an was committed to memory and writing by his followers. Qur’an is still available in the complete and original Arabic (the language in which it was revealed).

MUSLIM traditions are not easy to keep in a country where there are so few muslims as in the United States. Yet, the Muslims lead here by Shah Wali Khan regularly conduct their five-times-a-day formal prayer. (Photo by John Flannery)
President in Utah

Nixon's efforts may boost GOP chances

(1P) Republican Laurence Burton, pulling out all stops in efforts to unseat Sen. Frank Moss, D-Utah, will get a campaign boost from President Nixon on Halloween night, only three days before the Nov. 3 general election.

Burton, who is vacating his congressional seat to challenge Moss, announced Friday that Nixon will arrive in Salt Lake City the night of Oct. 31 and will speak at 7:30 p.m. at the 13,000-seat Special Events Center at the University of Utah. The public will be invited, Burton said, but other details, including the topic of the address, were not available.

To arrive by plane

It had not been determined whether or not the President, who will be greeted by an airport rally upon arrival, planned to stay overnight in the state.

Nixon visits, his second to Utah, will be part of a Western swing that also will take him also to Las Vegas and Phoenix. The President stopped off in Salt Lake City July 24 and attended the final night of the "Days of '47" rodeo at the Salt Palace.

President Nixon believes his kind of campaigning may prove persuasive with vital, undecided voters in the Nov. 3 elections, and he is testing that judgment in 22 states, urging "the great silent majority to stand up and be counted" for Republican candidates.

Political gamble

It is a major political gamble. The President's late campaign sprint makes his own prestige one of the issues. It puts him out front, as Vice President Spiro T. Agnew had been, as the visible symbol of the GOP.

As Agnew put it, "I'm tremendously vulnerable" to the blame if Republicans fare badly. So, now, is Nixon himself.

White House officials say Nixon decided early in October to plunge actively into the campaign in Columbus, Ohio. The undecided voters are going to determine it. And that is why these appearances that all of us are making in the last two weeks may have some effect.

Crowds large

Nixon's crowds generally have been big ones; an estimated 60,000 in Columbus, Ohio; throngs along the streets and at a campus rally in Johnson City, Tenn. In Asheville, N.C., some 15,000 people stood in a driving rain to listen to Nixon. One exception: his Saturday appearance in the industrial, blue-collar Baltimore suburb of Dundalk, Md. In those conservative but Democratic precincts, the crowds were relatively sparse. Democratic campaign posters fascinated the front of the union hall where Nixon spoke.

One administration politician acknowledged GOP Senate victories are unlikely in some of the states Nixon is visiting, among them Illinois and Minnesota. But whatever the outcome, this man said, Nixon's campaigning now will stand him in good stead in 1972. Agnew said Nixon's campaign entry has not led to any change in his own style or tactics.

"All we do is try not to interfere with each other geographically," the vice president said.

USU BRIEFS

The department of Engineering at USU has received a grant from Northrop Corporation, Los Angeles-based aircraft. The grant consists of $2,500 per year for five years to the engineering department. The grant acknowledges the excellence of USU's program in manufacturing engineering curricula.

Financial aid for the Indians has been boosted by the Walker Bank Foundation. Fred H. Thompson, vice president presented $1,000 to USU for aid to the Indian students. This money will help the students program in language help, tutoring and counseling services.

The Air University's Air Force Reserve Officer Training Corps at USU is accepting applications from women students as well as men this year. Men and women qualifying must have two years of graduate or undergraduate work to complete. A written exam and medical evaluation are required. Students completing the program will be commissioned second lieutenant in the U.S. Air Force in flying or non-flying categories.

The Federal Government has announced a new "Vacation Work" and study program for students who have completed one year in the engineering and physical sciences. Those appointed would receive on-the-job training assignments in Washington, D.C. in various engineering and scientific occupations.

More than 40 outstanding paintings by professional Utah artists will be displayed in the USU library Oct. 25 through Nov. 13. The exhibit is the first showing of the art outside of Salt Lake City. "The new show will feature a wide range of different styles, mediums, and techniques," said Dr. Twain Tippetts, gallery curator.

Full-time undergraduate students are eligible for one of six cash prizes to be awarded for a poem by Hallmark, one of four contest sponsors. This is the eighth annual Kansas City, Mo., Poetry Contest, announced by Hallmark Cards, Inc. Prizes include a cash advance on royalties for a book-length poetry manuscript from the Devins Award. The Kansas City Star, another sponsor is offering four cash prizes for poems. All entries are judged anonymously. For complete contest rules, send an envelope to Kansas City Poetry Contests, Box 533, Kansas City, Mo. 64144.

Commentary

Higher, higher then crash

Editor's Note: Indian student Hiro Chhatpar delves into the medical questions surrounding the use of drugs and narcotics in this second column in a series of four.

Although much can be said about the medical significance of drug use in general, this section will be confined to a discussion of the medical aspects of psychedelic drugs.

Hallucinogenic substances produce few unpleasant physical side effects. The physiological reactions to drugs such as marijuana, peyote, LSD, etc. include slight increase in blood pressure and pulse rate, dilation of the pupils, and tremors.

The psychological experiences vary greatly from person to person, depending on the expectation, personality, and mental status of the user; the physical setting; the presence of other persons, etc.

However, general effects of hallucinogenic drug usage may include:

1. Immense changes in perception — sensations become more intense and the subject experiences synesthesia (see glossary).
2. Slowing down or complete stoppage of time.

(3) Speeding up of thoughts or ideas
(4) Dissolution of the self or ego
(5) Rippling movement of inanimate objects such as walls and pictures
(6) Alteration of depth relationships
(7) Diminished care about the outside world and increased forms on introspective meanings.

The most widely used psychedelic drug is marijuana, a preparation of the Indian hemp plant (Cannabis sativa). Although persons who use marijuana continually are likely to become psychologically dependent on it, the drug is not physically addictive. It has been well-established, however, that the drug often increases feelings of anxiety, depression, and paranoia.

The majority of marijuana users do not subsequently turn to narcotics, such as heroin, even though surveys show a high percentage of opiate addicts who had previously taken marijuana.

Often, studies have failed to show any cause and effect relationship between marijuana use and crime.

Efforts to discover medical uses for cannabis preparations are now underway. However, attempts to find therapeutic uses for marijuana compounds have so far proven fruitless.

Per dose administered, the most potent of the hallucinogens is lysergic acid diethylamide (LSD), a semi-synthetic drug derived from the ergot fungus of rye.

Although physicians and psychologists find it difficult to secure LSD for legitimate medical experiments adverse reactions to the drug have been noted. Medical researchers have discovered that LSD is capable of causing chromosomal damage in humans (Dr. Alpert denies this. I got the feeling, he was not quite sure of this himself). The significance of these findings, is not definitely known, but chromosomal damage in other situations has been linked to cancer, leukemia, and birth defects.

Other research seems to indicate that LSD may be causally related to epileptic seizures, organic brain damage, and a variety of psychological reactions, and chronic withdrawal symptoms.

Some potential scientific and therapeutic uses for the drug have been found. LSD has been used in the treatment of homosexuality, female frigidity, alcoholism, certain psychoses and neuroses, and as an analgesic in the treatment of terminal cancer patients.

Hiro Chhatpar

Elections are always entertaining as long as you aren't running for office. This election year, there is excitement in the air similar to static electricity. There are always out unbreakable records of Spiro Agnew asking for contributions. Do you know why the records are unbreakable?

The Republicans say the Democrats caused a "do nothing" Congress, and the Democrats say the Republicans gave them little to do. The rest of us wonder what anyone did in Washington the past year.

Vietnam is not much of a political issue this year — in other words, it is a "dead" issue. Casualties are down from around 150 to 70 Americans, this killed each week. From the considerable amount of public drug use has increased, and the newspapers have been full of articles about the vice versa. There have been a lot of stories about the deaths and illnesses caused by drug use.

The most notable death was that of Richard Nixon's son, Tricia. It was reported that he died of an apparent drug overdose. The Nixon family was devastated by the news.

(4) It would be good if the amendment did pass since 1966 was not a good year for constitutions, especially in Utah.

In 1970, the Utah state lottery drew a lot of attention. It was a new form of gambling and it quickly became popular. The lottery was estimated to bring in $1 million in revenue per year.

(5) It is not surprising that Richard Nixon is a lot of people are afraid of him, just what Richard Nixon has got to do with anything.

In 1970, a lot of Utahns voted for the lottery. The lottery was estimated to bring in $1 million in revenue per year.

(6) But Burton is trying to cover himself which is going to be very thorny.

While Burton is trying to cover his spending record, the Democrats are drawing the unemployment checks.

Isn't it amazing that after eight years in Congress and being elected by huge margins that Rep. Burton still cannot ride a horse, especially on television.

(7) And Burton is trying to cover his spending record which is becoming very thorny.

While Moss is criticizing Burton's voting record on pollution. Moss is spreading a lot of it. In the interest of fair play, there is no doubt that Burton is matching him at least pollutant for pollutant.

The American Independent Party's Senate candidate, Clyde Freeman, is very articulate. It doesn't matter what question is asked him, he always has the same answer. That's not easy.

Campaign '70 has been remarkable. No one has been opposed to law and order, or in favor of crime. With the issue oriented campaigns, it will be a tough decision for voters to choose between God, mom, and apple pie.

That is this analyst's observations of the election in 1970. The only accurate political observation to be made is that all eligible persons should vote.

Miles Jensen
Marijuana-A
Attitude study

Editors:

Canda, about 90 percent of they would damage. kidnappers, murderers have criticized the for arsons, bombers, I for the Quebec murderers. Lock up bombers

October 26, 1970

REPORTING:

Netanne Larsen 'Life Writer

A student's previous attitude toward marijuana is better predicts his actions than the affects of extreme social pressure, according to a study conducted by Dr. Stan Albrecht, sociology dept.

With 70 percent accuracy, Dr. Albrecht, through his studies, could determine whether or not a student had tried marijuana only from knowing his attitude toward the drug. When the influences of his reference groups (those persons he considered to have been most influential in his life), were combined with the attitude of the student, Albrecht could predict 88 percent of the time whether the student had used marijuana.

Study At WSU

The study took place among 600 freshmen and sophomores at Washington State University in Pullman.

These students were given a survey designed to measure the background characteristics of each individual, and attitudes toward marijuana and its legalization.

Students who responded most favorably to marijuana and those students who responded least favorably were later introduced to us. In each of the groups, one student was placed in one of 204 groups with two other persons who were aware of the objectives of the experiment. The student was submitted to a kind of social pressure for several minutes during which time the other two persons supported the disadvantages or advantages of marijuana, depending on the student's previously tested attitude toward the drug. At the end of the period, a petition for the legalization of marijuana was given to ten students and each person was asked to sign it. The purpose was to see if the student would submit to social pressure or act according to his attitudes. The already formed attitude of the student usually won out.

Attitude Rejection

Now the question was whether or not the student's attitude and his relationship with reference groups would predict accurately his actual use of marijuana.

Dr. Albrecht asked a sample of those students who had participated in the lab experiment to participate in a polling study. They had no knowledge that this new experiment had any connection with the previous experiments.

Each student was asked whether or not he had ever used marijuana. His answer was returned anonymously to the interviewer in a sealed envelope.

Had Used

Dr. Albrecht said that only four persons out of 40 who had been predicted to have used marijuana, had actually not tried the drug. Dr. Albrecht indicated that these four students had probably never had the opportunity to try marijuana. One person had used marijuana among 22 students who had been predicted not to have used it.

"If you combine attitude with norms you have an excellent indicator of what behavior is likely to be," concluded Dr. Albrecht.

Results of the study show that there is a wide gap between the attitudes of society as a whole toward marijuana and those of college students. The belief that societal norms were unfavorable towards marijuana was felt by 81 percent of the students surveyed, while 81 percent thought that their immediate family was unfavorable.

Percentage on Responses

In the same study, another survey was conducted in regard to prevalence of marijuana use among the students. Students gave the following responses.

I have never seen it used 36 percent
I have seen it used but not 36 percent
I tried it once as an experiment 8 percent
I have tried it several times 12 percent
I used it often but stopped 9 percent
I use marijuana regularly 3 percent

Older Not Tried

A similar survey among juniors and seniors showed a considerably higher percentage who had not tried marijuana.

Dr. Albrecht said these findings concerning marijuana use corresponded very closely to two other studies conducted at different universities around the country.

Dr. Albrecht is preparing to do a similar study at USU or BYU to compare the results with students conducted at more liberal schools in the country.

Early this month, Dr. Albrecht presented the findings of the study to the American Sociological Association. Many are interested in conducting similar surveys on their campuses.

Lock up bombers

Editor:

You (Sterne McMullen) have criticized the Canadian government on its suspension of liberties for the Quebec murderers. I hope that I am not being prudishly arachile Mr. McMullen, but it is my belief that the proper place for arsons, bombers, kidnappers, murderers and the like is locked away from the society which they would damage.

In the U.S. today, as in Canda, about 90 percent of the people work for a wage. I'm one of them. When a small minority of persons go crazy and begin infringing upon the rights, freedoms and wishes of the majority, they suspend their own liberties by their own choice. They can expect to receive the same freedoms they administer, because we are a capitalist state, not a workers state. Oh, if only we could appreciate the liberties enjoyed by minorities in the workers states of Czechoslovakia and Red China.

You claim to speak for the worker. Why don't you go over to the construction area and talk to the hard hats. Let them tell you of their appreciation for the contributions to the general peace and welfare which groups such as the SDS or YSA have already so generously offered.

Anarchism and terrorism do nothing to advance anything but anarchism and terrorism. Is this what the dream of our time is about?

Oh, if only we could appreciate the liberties enjoyed by minorities in the workers states of Czechoslovakia and Red China.

Volunteer Organization for Involvement in Community and Environment (VOICE), is supported by Sue Brown, USU coed from California.

"I work with Earth People," Sue says, "I think they will be active on positive programs concerning the environment. We're the longhairs wearing grubbies, because Earth People aren't really concerned with attire. We're just against consumer-oriented industries. Our aim is to simplify our own needs, to spend less on food, clothing and housing... to spend less on our needs so that we extract less from our environment.

"Our philosophy is based much on Thoreau, Whitman, Emerson and the American Indian, who understood how to live with the land."

"It's important that the Logan community understands we're not a bunch of freaks. We're trying to help through our form of living."

"VOICE is based on the premise that all groups must help in the Logan area: the Ear­

r. people the townspeople, the fraternity, the sororities, the faculty, the farmers and the "straight" students. It is a carefully thought out plan and not a spur of the moment idea."

Sue Brown is the chairman for the Volunteer Organization for Involvement in Community and Environment.

An office has been opened in the University Center so that individual participants can find out what needs to be done on a day-to-day basis and so that organized efforts can be coordinated. Information on ecological, economic, social and political problems involving the community will be available, but VOICE will not represent any particular political party or partisan group.

New Projects

Proposed projects include providing manpower to assist with a number of established community services; and to supply some services which already do not exist. Examples are tutoring and language assistance, fine arts and cultural enrichment for disadvantaged children, crisis center.

Also, summer camp corps to give underprivileged children a chance in the outdoors, com­munify health corps to assist the elderly, relocation service to find and upgrade housing for the poor and homeless, a big brother and big sister program and assistance to Job Corps, In­dermountain Indian School and the State Industrial School providing these students an opportunity to become involved in a variety of programs at USU.

student life means... YOU

Halloween planned for University Center

The "Halloween Haunt" is the first big function sponsored by the University Center this year. The "Haunt" is part of the fall carnival and will start at 8:30 p.m. Friday in the UC.

The main event of the Haunt, the 12-block long "Nightclub Atmosphere," will feature a dance celebrating "Moose," formerly "The Affection Collection." There will be also be a spook alley, a pumpkin carving contest, and other fun activities.

Barlow said even the Utah anti-war demonstrations were designed to embarrass President Nixon. He said when Sen. Moss sent the Utah protestors a telegram saying, "your cause is just" he was in effect binding the President of the United States in his conduct of foreign affairs.

"Transcendental Meditation is a mechanical technique, just as a push-up is a mechanical technique. It has nothing to do with beliefs."

Leon Welmer, instructor of Transcendental Meditation, (TM) made these remarks last Friday night in a lecture entitled "Principles and Techniques of Transcendental Meditation." This was the second of a series of two lectures on the subject.

"You must place the mind in a situation which pulls it through the more subtle aspects of the mind. We use only about 10 percent of our brain for our thinking. You must use the other 90 percent for the utmost in efficiency, and TM allows us to do this."

In order to accomplish this, "you should not hold the mind on one thought or concept. Pick a word or sound which has no meaning, but the sound of which resonates with the central nervous system, as a particular sound resonates with a crystal chandelier and causes it to vibrate. Then you allow the mind, through its own tendency, to travel through and experience all of the subtler and subtler states of the mind."

"But Senator Moss voted one way in Washington and another way in Utah."

Barlow said even the Utah anti-war demonstrations were designed to embarrass President Nixon. He said when Sen. Moss sent the Utah protestors a telegram saying, "your cause is just" he was in effect binding the President of the United States in his conduct of foreign affairs.

How to listen; course offered

A course in learning the ability to listen will be conducted next Tuesday and Thursday.

Registration for the course begins today through Friday in the UC basement from 11:30 a.m. - 5 p.m., or by calling the psychology department, ext. 7254 or the USU Learning and Improvement Center, Ext. 7544. The hours for the four hour course are 3:30 or 7:30 p.m. of both days. The course is free and an instruction manual will be required.

Utah State's freshman football team hold a good chance to gain a little revenge on Brigham Young University this Friday, when the Ramsers host the Kittens in their first home game of the season.

Coach Skip Davis' greenlings, like the Ramsers to Snow College and Idaho State, will be underdogs in this contest. The Kittens, who have dropped their opening game of the season to Rick's last Saturday.

Davis, adding lead coach, Garth Hall this season, will continue his time with Arnie Zimmerman of McDermitt, Nev., and Logan's Craig Sorensen for the quarterback spot. Sorensen has seen only limited action this year so far and may be switched to defensive back of split end.

Craig Clark and Doug Poherson have both been very impressive for the Ramsers, handling most of the running attack. Clark is the twosome Gives the Utag off an offense some wide-open threats. Lund and Bob Garcia have all been very impressive back of split end.

Clark and Doug Poherson have both been very impressive for the Ramsers, handling most of the running attack. Clark is the twosome gives the Utag offense some wide-open threats. Lund and Bob Garcia have all been very impressive back of split end.

The Kittens will start Charles LeDuc of Boise, Idaho, at quarterback with Mark Kinkead of Ohio State and Oaks, Idaho, at strong back of Auburn, Calif., in the running back spots. Ogden's Brian Glavadel will be the wingback. Former Utah all-state stars Steve Price, Joe Bailey and Garry Reeve will be on the offensive line for the Kittens.

Defensively the lineup will consist of former Logan High ace Bob Larsen at one end spot, Grant Wells of Salt Lake City and Grant Toomer of Ravsten at the inbacking posts.

Following the BYU game, the Ramsers will prepare for a Nov. 15 game in Logan against the Utah Papooses.

Utah harriers gain revenge over Weber

OGDEN — Utah State's cross-country team gained sweet revenge here Saturday, with a 24-13 win over Weber State harriers.

In the year, WSC traveled to Logan for the opening meet of the season and dropped to the Aggies with an easier evening. Later coach Ralph Maughan said that he now was an easier victory over the season got older.

Said Maughan after Saturday's win: "We finally got in shape. Craig Lewis and Mark Bingoham ran real well for us and with Ron Fler's background includes the biggest challenge of the season got older."

The next home cross-country meet is set for November 7 against Idaho State.

Welcome mat out for Ags in CSU homecoming game

USU finds the welcome mat out again this week in its homecoming opponent of CSU. However, the Ags last win at Ft. Collins was a 41-20 thrashing of the Ramsers in 1965.

In the two games Mills has lost by more than 45 points to any team. The senior quarterback-halfback in Scott Bringhurst, who will travel to Salt Lake where they'll meet Utah’s Redhkins in another country team gained sweet revenge here Saturday, with a 24-13 win over Weber State harriers.

Although the championship has yet to be decided, the Fraternity all-league team for flag football has been chosen by the Intramural staff and team managers of the participating squads.

A near unanimous selection as 1970’s Outstanding Player, was Sigma Phi Epsilon's Doug Cranney. Although the SPS were eliminated in quarter-final play, it was Cranney who was the most inspirational for the team. The junior quarterback-halfback was a one-man wrecking crew for the most part and had to be very impressive to gain the award over such standouts as Paul Jeppesen of Pi Kappa Alpha, Bob Fuhrihan of Pi Kappa Alpha, Bones Jones of Sigma Alpha Epsilon and Brent Hollingsworth of Sigma Chi.

DEFENSIVE CHOICES

Rusher: Doug Eyre

Rusher: Don Andrews

Linebacker: Randy Nelson

Corner: Brent Hollingsworth

Corner: Howard Allen

Safety: Steve Watts

Safety: Fred Behm

OFFENSIVE CHOICES

End: Bob Fuhrihan

End: Bones Jones

Guard: Clyde Jackson

Guard: Wes Garnett

Center: Craig Harrison

Halfback: Doug Cranney

Quarterback: Paul Jeppesen

The voting was extremely close at most places, making it necessary to list an honorable mention team as well.

The following are the Honorable Mention selections: Tyler McNeil, Kirk Jasper, Blake Martinson and Scott Tilley all of Sigma Chi; Dennis Moen and Greg Hanger of Sigma Alpha Epsilon; Gary Glenn, Dusty Fonesback, Stan Paxton and Gary Madsen of Pi Kappa Alpha.

Others in honorable mention are John McGough of Delta Sigma Phi; Tom Reading and Kent McClellan of Sigma Gamma Chi; Steve Skinner and Terry Hodges of Delta Phi Kappa; Mike Holtz and Jim Evans of Alpha Gamma Rho and Tom Copeland of Sigma Nu plus Larry Hay and Jim Weston of Sigma Phi Spallon.

The championship game between Sigma Chi and Sigma Gamma Nu will take place this week.

Registration cards due

Many students have forms from the Office of picked up winter quarter Admissions and Records pre-registration forms in Main 4 a little later than the ballroom of the UC. p.m., Nov. 3.

Those who have not pre-registered may do so by returning to the office on or obtaining the necessary before Nov. 6.

Mills claims strong call aided BYU

By THE ASSOCIATED PRESS

Utah State football coach Chuck Mills says a crucial clipping penalty handed USU in this weekend's game should have gone to its opponent, Brigham Young University.

BYU downed Utah State 27-20 at Provo. In other state contests, Utah crushed Arizona 24-0, while Idaho State tripped up Weber State 30-14.

Mills says game films show that Golden Richards of BYU clipped Tyrone Couey of USU, rather than the other way around, as the officials ruled.

The 15-yard penalty moved the ball to the Aggie 35, with the Cougars in possession. From there, BYU drove to a touchdown. From there, BYU drove to a touchdown.

But, said Mills, "I want to point out that the ruling did not beat us. BYU beat us." Mills, a former BYU quarterback who had never played in a college game, broke a five-game losing streak with their victory Saturday.

The performance of inexperienced sophomore quarterback Brian Gunderson was matched by that of another BYU sophomore, running back Pete Van Valkenberg, who set a school record by carrying 38 times, for 179 yards rushing.

"We had an excellent performance from a bunch of real young kids," BYU head coach Tom Hudspeth said. "It was a complete team effort."

Hudspeth said the turning point of the game came when BYU's Ron Tree grabbed a fumbled USU kickoff and ran in from the 22-yard line for a touchdown. That score made it 21-14 for BYU, and Utah State never overcame the deficit.

Following his team's victory, jubilant Utah head coach Bill Meek said: "This is the best all around performance we've had. Our offense has worked, and we've done our defense has worked, but this time we put it all together."

Leading 26-6, Utah exploded for three touchdowns in the second half of a snow Homecoming game. The strong Ute defense held listless Arizona to 22 yards rushing and 48 yards passing. Utah is now 5-3 overall, and 3-1 in Western Athletic Conference standings. It ranks third, behind unbeaten Arizona State and New Mexico.

"I think we're back in the conference race now," Meek said. "Somebody is going to get Arizona State, and it might have to be us again.

Weber State head coach Sark Arslanian said his team's Homecoming defeat at the hands of Idaho State was "destiny." "Destiny said that those folks were going to win that game," he said.

BYU's Joe Lilenquist kicked two field goals of 28 and 27 yards that put the pressure on the Aggies.

With three minutes left the Aggies started their last drive that kept the cold crowd glued to their seats. The Aggies drove from their 29 to the BYU 31 before time and Chris Farasopoulos ended the game with seconds remaining.

During the drive the Aggies were hurt by penalties that were not called. The key call was a penalty that cost the Aggies a key down because of an illegal procedure call. Another time an Aggie receiver was knocked around as he moved down field and no penalty was called. This hurt because it cost the Aggies yardage and a down.

Pete Van Valkenberg set a new record with 36 carries for 178 yards. This was an important statistic because he literally carried BYU to the win. But as one person in the press box said, "Wait till basketball."
'Heavy' music night expected tomorrow

If you like the song "Green-Eyed Lady", you'll want to hear the song presented by several campus organizations.

Each member of "Sugarloaf" has been working within the rock idiom for more than a decade. Each has achieved genuine mastery of his instrument and uses every song as an opportunity to express his personal freedom. Together they form a very cohesive and resourceful musical organization which grows in creativity day by day. The people of the Rocky Mountains are fortunate to have such an accomplished group in their midst."

Each series will host Gene Fullmer, former middle-weight boxing champion of the world, Friday Oct. 30 time is 12:30 p.m., in the East Chapel of the LDS Institute.
