VOLUME XIII.

LOGAN, UTAH, FRIDAY, MAY 21, 1915.

NUMBER 33.

## A HISTORICAL PAGEANT OF U.A.C.

THE BIGGEST EVENT IN THE HISTORY OF THE COLLEGE

Everybody around the College is busy either talking about the coming pageant, or working on the coming pageant. Soon everybody will be doing both.

There will be no room on the College bill for anybody who is not busy both working and talking for this great event which is to commemorate the twenty-fifth anniversary of the Utah Agricultural College. This is a celebration; for the College has reached its quarter-century mark.

A pageant? Webster says that a pageant is "a theatrical exhibition,—a spectacle." He further says that it is "any elaborate spectacular exhibition or display." It will be all of this and more. It will surely be a theatrical exhibition, for certain periods in the early history of Utah, and of the Agricultural College will be acted out by real men, real oxen, and most of all with the same stage scenery, the mountains and valleys, that witnessed the great events of long ago.

This pageant will also be an "elaborate spectacular exhibition." It is to take place upon the College Campus. The ground will be plowed again by the same plow and the same man that first broke ground in the State of Utah. A barbecue will be pulled off as part of the program. There will be ox-teams, prairie-schooners, hand-carts pioneers, and Indians. The good spirits of the mountains will be there, too, dancing on the hills and fields, proving their friendship for the brave pioneers.

In short, we shall have during the day a complete picture of the main events which go to make up our history. The way in which College Hill was chosen as a site will be lived over again by the same men who showed such wonderful sagacity and fore-sight in their choosing, for most of them are still living.

Some Surprises in Store, Too

Plenty of surprises are being kept up the sleeves of the Author and Producer, Miss Huntsman. She is holding back some fine trump cards. Do you know anything of the first student activities? If not, see the pageant.

Student and Faculty Support

Miss Huntsman's office is crowded all day long by stud-

ents and faculty seeking parts in the pageant. Such is proof of the loyal student backing which our celebration is to have. Nor is the faculty to be outdone. They are back of it with their support to a man (or a woman.) They have voted to excuse from final examinations all students who take part in the pageant provided they do not need an excuse to make a passing grade. Thus, the way to Miss Huntsman's room has become well-known and popular.

The Pageant, a Utah Product

Don't overlook the fact that this pageant has been written by a member of the College English Department. It is therefore a "Utah Product," and will get the loyal patronage of the people.

### LIST OF GRADUATES ALMOST COMPLETE

Although there are a few names yet to be passed on for graduation, the list is fairly complete. The list as it now stands in the Registrar's office, subject to correction, includes sixty seven candidates for the degree of Bachelor of Science. The department of Home Economics leads with eighteen graduates, while the Agronomy department comes second with fifteen.

Following is the list as it now stands:

#### Agricultural Engineering

J. L. Jones ..... Monroe  
Rupert Morrill ..... Circleville  
Olof H. Nelson ..... Logan  
L. G. Nuttall ..... Logan

#### Agronomy

G. L. Barron ..... Logan  
A. E. Darley ..... Wellsville  
John F. Finley ..... Springville  
R. V. Huffaker ..... Tooele  
F. W. Lee ..... Hoysville  
D. F. Olson ..... Murray  
Jesse S. Robinson ..... Paragonah  
Ross T. Rowe ..... Spanish Fork  
David L. Sargent ..... Hoysville  
Albert E. Sells ..... Nephi  
David W. Smith ..... Salt Lake City  
G. L. Tanner ..... Whitney, Idaho  
Asael J. Taylor ..... Willard  
F. D. Thatcher ..... Logan  
Lloyd W. Tuttle ..... Manti

#### Animal Husbandry

Homer P. Christensen ..... American Fork  
Archibald D. Egbert ..... Logan  
Ben R. Eldredge ..... Salt Lake City  
Wilford E. Nielsen ..... Richfield  
Stephen C. Perry ..... Ogden

#### Botany

Alfonzo L. Cook ..... Logan

#### Chemistry

John P. Benson ..... Newton  
N. W. Christensen ..... Mayfield  
Clarence E. Cotter ..... Lehi

Edwin S. Smith ..... Logan  
Entomology

Leonard Davidson ..... Ogden  
Earl T. Jones ..... Lehi

Horticulture

J. F. Knudson ..... Brigham  
Hugh Williams ..... Salt Lake City

Commerce

J. G. Allemen ..... Springville  
Orba Ellsworth ..... Rigby, Idaho  
Eli F. Lee ..... Brigham

David R. Packard ..... Springville  
Verne B. Thorpe ..... Cardston, Canada

General Science

Alonzo T. Barrett ..... Logan  
George D. Casto ..... Manti

Annette Godwin ..... Logan  
R. V. Larsen ..... Smithfield

Ruel D. Merrill ..... Richmond  
Etta Nelson ..... Logan

Barbara Pace ..... Price  
John Karl Wood ..... Logan

Home Economics

Nellie Barker ..... Ogden  
Hedvig Benson ..... Logan

Christine Clayton ..... Salt Lake City  
Veda Cooper ..... Brigham

Ethel Cutler ..... Preston, Idaho  
Lillian Elder ..... Salt Lake City

Hortense Hansen ..... Salt Lake City  
Inez Maughan ..... Logan

Lavinia Maughan ..... Logan  
Lottie Kunz ..... Logan

Alice Morrison ..... Brigham  
Emma Moursiten ..... Logan

Othella Peterson ..... Logan  
Lovinia Richardson ..... Smithfield

Rosina Skidmore ..... Richmond  
Ella Webb ..... St. George

Etelka White ..... Beaver  
Hettie White ..... Beaver

Mechanic Arts

Edward J. Passey ..... Logan  
John H. Pendton ..... Parowan

Dan A. Swenson ..... Logan

### MRS. DAVIS LECTURES IN CHAPEL

The celebrated temperance lecturer, Mrs. Edith Smith Davis, spoke to the students of the Agricultural College at their chapel exercises on Tuesday, and delivered a very forceful and interesting address. She pointed out that men should not seek efficiency so much in making a living as in making a life, and that in order to do this, the functions of the body should not be interfered with by the devastating influences of alcohol.

Rome, feeling secure in her military power, had carelessly drifted into the vices of her age, and their excesses had resulted in a weakness that rendered her unable to repel the invasion of the abominable Gauls when their hordes overran the Roman Empire. What was true of Rome was also true of Greece. In their hour of victory they had forgotten the necessity of keeping their bodies

(Continued on Page Four)

## A. C. PROFESSORS RECEIVE DEGREES

DR. PORTER AND DR. SAXER SUCCESSFUL

Drs. Porter and Saxer have recently returned from the University of California at Berkeley, where they had conferred upon them the highest scholastic degree obtainable, Doctor of Philosophy.

We wish to congratulate both these men for they have not only honored themselves, but have brought honor to this institution inasmuch as both received their B. S. degrees here and both are members of the faculty. Their scholastic records are listed in the announcement, as follows: Charles Walter Porter, B. S. (Utah Agricultural College, '05); M. A. (Harvard University, '09); Ph. D. University of California, 1915. Arthur Herbert Saxer, B. S. (Utah Agricultural College, '10); M. S. University of California, '12 and Ph. D. University of California 1915.

Dr. Porter is head of the Home Economics department and has been off on furlough this year taking advanced work for his Doctor's degree.

Dr. Saxer is head of the department of Mathematics and left Logan May 1st for Berkeley, where he went to pass examinations for his Doctor's degree.

### 1915 BUZZER TO APPEAR AT NOON ON TUESDAY

The 1915 Buzzers will be distributed, starting at noon on Tuesday, May 25. Students who have subscribed should bring the amount that they owe and get their copies immediately. Copies will be held only a reasonable length of time. Those who have not subscribed may be able to get copies if they apply early. Five hundred copies have been published, nearly all of which are already spoken for.

For the benefit of students who expect to leave Logan before Tuesday we wish to state that they may have their copies mailed to them by making necessary arrangements with the Buzzer management. No Buzzers will be mailed or given out except on receipt of the full payment of \$2.50.

The Junior-Senior class party was postponed Monday on account of the rain.

# ALUMNI DEPARTMENT

All aboard! the train for Logan leaves in one minute. And before the fourth of June next, all members of the Alumni Association see that you heed this call. Be at the train early and get a good comfortable seat, for after you reach Logan you will be kept busy every minute.

Already nearly three (300) hundred students have been assigned parts in the historical pageant. Various dignitaries who have been prominent during the past 25 years will be impersonated. Come and behold them; live again in the days of the past.

There will be something new and something to remind you of the old, going on continuously. The College Kommers (accent on last syllable) will remind you of a real cabaret.

Do you remember Prof. E. J. MacEwan? He was at the A. C. for ten years and is now at Kalamazoo, Michigan, but will be here to join in the festivities, and will deliver the address to the graduates.

You will also be privileged to hear Pres. Anthon H. Lund. A man whose kind and lovable disposition has won for him thousands of friends. He will deliver the baccalaureate sermon.

The Honorable John Dern, one of our trustees, will also speak at the commencement exercises.

Now is the time to make definite preparations to help your Alma Mater celebrate its twenty fifth birthday.

## TO THE CLASS OF 1912

As this is the 25th year of service of our Alma Mater, it has been decided to have a general celebration of all who have been associated with the Institution in any way.

Although it is only three years since we left the old school we think it will be worth while for all to meet again to talk over some of the old occurrences of past years and to renew our friendship once more.

There is a strenuous effort being made on the part of all other classes to be present during part of this time at least,

so we feel that every member of the class of 1912 should be here.

As the program is now planned there are many interesting events to happen from the morning of June 4th to the evening of June 8th, and a special evening, Saturday, June 5th, has been set aside for class socials and reunions. An entertainment is being planned for our class. Kindly let us know if it will be possible for you to join us.

Sincerely yours,  
GEORGE B. CAINE,  
L. R. HUMPHERYS,  
BYRON ALDER,  
Committee for Class of 1912.

## TO THE CLASS OF 1914

This the 25th successful year for the Utah Agricultural College is nearing an end as you probably know a fitting celebration is planned. Every effort is being made to have all the classes return to our Alma Mater and renew old acquaintances.

It is almost a year now since we shook hands and said goodbye and we have longed many times to see each other since then.

Come back for the reunion this June and you will meet not only all the members of your class, but the members of the classes that graduated before.

Our reunion will be held in the Woman's building Saturday June 5th, at 8 p. m.

Sincerely yours,  
JOHN A. SHARP,  
For the Committee.

A book on Practical Irrigation and Pumping, written by B. E. Fleming, has just been published by the well known London and New York house of John Wiley and Sons. Mr. Fleming, who is now professor of mechanical engineering in the State University of Iowa, will be remembered as a member of the class of 1900 of the U. A. C.

## FROM THE OTHER POINT OF VIEW.

A woman of philanthropic tendencies was paying a visit to a lower East Side school. She was particularly interested in a group of poor pupils and asked permission to question them.

"Children, which is the greatest of all virtues?"

No one answered.

"Now, think a little. What is it I am doing when I give up time and pleasure to come and talk with you for your own good?"

A grimy hand went up in the rear of the room.

"Please, ma'am, youse are buttin' in."—The Delineator.

## A PRACTICAL COURSE FOR BUSINESS MEN.

Commercial Houses Co-operate  
With N. Y. University to  
Train High Executives

New York University has just announced a new series of business fellowships for college graduates which are designed to combine business study and actual business practice. The university has arranged to co-operate with important business organizations under plans adapted to individual cases. The openings are available for men who have specialized in any one of several different lines as some of the companies such as the United States Steel Corporation prefer men who have been trained in mechanical or chemical engineering, while others like the City National Bank, the American Telephone and Telegraph Company and the Ingersoll Watch Company, prefer a thorough training in economics, mathematics, and commercial geography. Most houses which are engaged in building up their foreign trade wish men who possess a knowledge of languages. This field extends to Russia, China, India, and South America.

It is said that the companies who will employ men under this plan will allow a sum sufficient to cover living expenses and tuition, or between \$60 and \$75 a month. This sum, which will be payable monthly throughout the year, will be offered as a university scholarship, and the recipient will divide his time for the college year between practical work and study. It is hoped that in this way students may qualify for important executive places. The whole of the summer vacation will be devoted to practical work.

The contract as now designed will last a year, but it may be renewed for another year, with an increase in pay. The opportunity is thought to be a most unusual one for young men planning a business career, as the participating organizations are among the biggest in the United States. The university has already received applications from seniors who wish to obtain such fellowships. Dr. Jeremiah W. Jenkins of the School of Commerce, Accounts and Finance of the university, is Chairman of the committee on the new business fellowships.

## Her Diagnosis.

Betsy, an old colored cook, was moaning around the kitchen one day, when her mistress asked her if she were ill.

"No, ma'am, not 'zactly," said Betsy. "But the fac' is, I don't feel ambition 'nough to git outer my own way."—Exchange.

## SENIOR CANYON TRIP

Probably the most enjoyable class affair of the season was that in which thirty five or forty seniors participated on Thursday of last week. The fellows and girls were about even in number, and the four rigs used as conveyances were well loaded with "lunch and seniors." Afternoon classes and laboratories, dancing practices and the like were a secondary consideration to the jolly bunch which left the campus at two o'clock. The drive up the canyon was so filled with thrills, such as races and the experiences common to meeting teams on a road only wide enough for one rig, that no one was in a hurry to discontinue this part of the day's enjoyment. Camp after camp was passed. The happy bunch did not even wish to stop at the forks, but continued up the left fork some three miles before a camping place was selected. At last the horses were relieved, but the jolly seniors walked on up to the large cave so full of mysteries. A lack of proper torches made a thorough exploration of the cave impossible, but the "time exposures" taken by "Veenie" and elevating of Lillian to the upper cave were the features of this stop. These same two were the innocent sufferers as a result of a water fight which added interest and discomfort to the return to camp. "Hot dogs," roasted over the camp fire on the end

of sharpened sticks, were sandwiched into rolls and made an excellent supper for the tired seniors. Oranges and candy (what was left of the candy, after its being in wagon No. 2), completed the repast. Games were then enjoyed until it was too dark to play any more. The fifteen mile drive down the canyon was made in absolute darkness, but no wagons were met on narrow roads and no one was tipped into the river. Singing was the feature of the return trip.

## WASHINGTON REPORT

Twenty-four cattle out of a total bunch of four hundred were lost by a community of permittees on the Wasatch forest last year, due, it is believed, to the eating of oak brush. It is known that the leaves, as well as bark of oak brush, are rich in tannic acid, the astringent properties of which are well known and utilized in the tanning of leather. It also seems to operate injuriously on the alimentary system of animals. It has not been definitely determined whether it really acts as a poison or is merely conducive to constipation. This will be more fully investigated by Dr. C. D. Marsh, of the Bureau of Plant Industry, in co-operation with Forest officers.

The subject is important because oak brush constitutes a large proportion, as high as 10 to 25 per cent in some cases, of the forage on some Utah forests. Losses probably from oak brush have been reported from time to time though not of so large a proportion as on the Wasatch. In the spring the tender leaves and shoots of oak brush are eaten in large quantities than later in the season unless other feed disappears or becomes dry. When eaten together with succulent grasses and weeds there is usually no trouble and it is found also that regular salting or provision of continuous supply of salt is highly beneficial. On the Manti forest in particular, grazing permittees place large tubs of salt on the cattle ranges, fastening the tub securely to the ground with stakes. This is filled with fine, crystallized salt, such as is used in freezing ice cream, and a storage supply is cached nearby that the forest ranger may replenish the tub when needed. Tubs are necessary in order that the frequent rains may not wash away the salt and that it be not pawed into the ground. On high mountain ridges, however, which form the natural ranges for the horses, it is not practicable to place salt in this way since the horses destroy the tubs by pawing.

While a liberal supply of fine salt is recommended for cattle accustomed to regular salting, care must be exercised that it is

Volume XIII. Number 33.  
Friday, May 21, 1915.

The final score was of course a disappointment. We had expected, or at least hoped for, a small margin victory. The close competition in several of the events shows that there was not a great deal of difference in the strength of the two leading teams. We are not, however, dissatisfied with the outcome, nor with the work of our team. We developed a team, largely from new material, which at least had our opponents in serious doubt, and we lost by a small margin to a team which was at least a shade stronger. The records made, including two state records, are proof that we have nothing for which to make excuses. We take pride in adding one more state record to our school's records. Not only have we this pride in our own team, but we are glad to congratulate Utah's wonderful sprinter, on his success in covering the 220 in world's record time.

Everyone is inclined to give the industrious, honest man a fair show.

## ATHLETICS AND PROFESSIONALISM

There has been a great deal of criticism indulged in by some of our students, regarding the debarring of certain of our athletes from athletic teams for professionalism. This sentiment, however, does not seem to be universal among the students. There must be regulation in all contest or athletic work, and for this reason conference regulations have been made. The A. C. joined the conference with full knowledge of the regulations, and as long as we are members, we must be frank and open in strictly following all rules of the conference. The thing which the students should do, is not to complain at or try to evade the regulations of the conference, but to learn what these regulations are and to impress upon the athletes their duty to the school which has honored them by allowing them to represent the school.

### MRS. DAVIS LECTURES IN CHAPEL.

(Continued from page one)

pure, and had fallen before the powers that assailed them. Great Britain herself was beginning to recognize that "King Alcohol" was sadly interfering with her manhood, and efforts were being made to induce her population to give up the use of strong drink. A marvelous transformation had also taken place in the history of Russia and a wave of temperance had swept over that great empire.

She referred to an experiment which had been made as to the effect of alcohol on four puppy dogs out of a litter of eight. The gentlemen who conducted the experiment, introduced alcohol in small quantities into the food of these four puppies, with the result that the dogs became extremely nervous and showed signs of fear at the least disturbance, whereas the other four were bright, intelligent and brave. The experiment was carried far enough to test the vitality of the dogs and while the normal dogs were able to bring a ball 922 times out of 1400 throws the dogs fed partly on alcohol were able to bring it back only 478 times.

The speaker stated that in the great brewing city of Milwaukee, every employer of labor would question applicants for situations as to whether or not they were drinkers of beer and users of tobacco, and although beer was being advertised as a poor man's liquid food, the applicants who used it were turned down in favor of the abstainer in every case.

She told of a visit she had paid to a school in St. Louis, where every student was men-

tally weak, so weak in fact, that the little ones were unable to tell their teacher that one and one were two. She was informed that these children belonged to the best of families were well born, well fed, and well sheltered and yet were the victims of alcohol inherited through the drinking habit of their parents.

Mrs. Davis exhibited some very interesting charts showing the effects of tobacco upon young men, and how it affected the mental efficiency of students.

The Catholic spirit in which the lady dwelt with matters of efficiency was very clearly shown by a reference to the prize-fighting ring, and she very clearly expressed her opinion that when Jefferies failed in his contest with Johnson, that he was the victim of alcohol rather than that of the black man, and what was true of Jefferies was true of most of the beaten prize-fighters of the past.

She cited that in a hospital in New York, where a speciality was made of pulmonary diseases, that out of every one hundred men who were addict-

**H**ere in the Live Store we give every man full credit for the possession of good business judgment, we know that a low price without high quality offers no inducement to purchase and that to make claims in our advertisement that are not substantiated by our merchandise is rank folly.

ed to strong drink, only ten per cent were saved from attacks of pneumonia, whereas eighty per cent of abstainers and non-smokers survived the dread disease.

Her lecture was very attentively listened to, and the students showed their appreciation of it by very spirited applause at its conclusion.

It quite often follows that the boy who only goes to Sunday School because he has to is compelled later in life to go to some other place he doesn't want to.

A specialist gave up as hopeless a case being treated for blindness and presented his bill. That opened the patient's eyes, but he hasn't "seen" the specialist yet.

Many a young man who has hiked away from the farm has had reason to be glad that dad hung onto the old place and put away enough to feed another mouth during the winter.

We have just discovered how woman got her name. When the Creator made her he said, "woe man." In the transition of languages the "e" has been dropped.

## WASHINGTON REPORTS

## NO SHORTAGE OF FOOD-STUFFS LIKELY

The 1914 wheat crop of the United States was estimated to be 891,000,000 bushels. The estimated surplus carried over from the 1913 crop was about 76,000,000 bushels. There was, therefore, a total available supply of 967,000,000 bushels. As the normal annual per capita consumption of wheat in the United States is about 5.3 bushels, 520,000,000 bushels should meet our normal domestic requirements for food; in addition 90,000,000 bushels are required annually for feeding. 610,000,000 bushels therefore, should supply the normal domestic demand. This would leave a surplus of 357,000,000 bushels. Of this surplus about 210,000,000 bushels were exported by January 30. This left 147,000,000 bushels, or 40,000,000 bushels more than our average annual export for the past five years, for export between February 1 and the appearance of the new crop, or for carrying over into the next crop year. The amount is sufficient to permit the export of nearly 1,000,000 bushels a day until July 1, before which time the new crop will begin to be available. This is about the average recent exportation.

The large demand for our wheat arises from the fact that there was an estimated world's shortage of over 400,000,000 bushels outside of the United States; from the fact that the Russian exportable surplus of

100,000,000 bushels is not available generally, and from the fact that the belligerent nations are eager to secure food supplies. If it were not for these things we should be discussing ways and means of disposing of out tremendous surplus of food products.

As has been stated, the new American crop will begin to appear before July. The Argentine crop is now coming on the market. It is estimated that from that source there will be available 100,000,000 bushels. A surplus of 75,000,000 bushels or more from India will be available in May and June. The increase in the fall sown wheat acreage of the United States in 1914 was 11.1 per cent, or over 4,000,000 acres; in the northern hemisphere generally the acreage of winter wheat shows an increase of from three to thirty three per cent, as follows:

Denmark, .....	3 per cent
Italy, .....	5 per cent
Switzerland, .....	10 per cent
United Kingdom, .....	10 per cent
United States, .....	11 per cent
India, .....	22 per cent
Canada, .....	33 per cent.

But suppose a shortage in wheat should develop in the next three months, what would be the situation? There is a great surplus in other food crops in the United States, a number of which can be used as substitutes. Wheat does not constitute more than 12% of the normal diet, about the same as poultry and eggs. Meat and dairy products constitute 48%; vegetables 11%; fruits, nuts, sugar, fish and other items, the remaining 19%. There are larger supplies of corn and other grains, meat animals, dairy products, potatoes, and fruit at the opening of 1915 than for many years. The most important competing products are corn and potatoes. This is shown by the fact that while the normal consumption of wheat is 5.3 bushels in Maine it is only 4.7 bushels, and in Michigan 5. In the wheat growing states where wheat is abundant, such as Minnesota, the average is 7.2, whereas in the South, where corn is much used, the average is 4 bushels. Normally about 3 per cent of the corn crop is consumed as food. Of our total crop, about 80 millions would be used for food, the remainder for other purposes. The remainder could be used for foods and substitutes used for animals. The potato production in the United States averages 3.8 bushels per capita. This year the available supply is 4.1 bushels. The average price of meat animals was 7% cheaper in January than a year ago, butter 2% lower, the price of chickens slightly lower, of potatoes 35% lower; and of apples it was 37% lower.

It would seem that the United States is not likely to be threatened with a shortage of foodstuffs.

## SAPARATORS

are by far the  
most economical

**R**EAL economy is never shortsighted. It never confuses PRICE with VALUE.

PRICE is what you pay for an article.

VALUE depends upon the amount and quality of service the article gives you.

You get by far the greatest actual value for your money when you buy a De Laval—BECAUSE a De Laval will give you much better and longer SERVICE than any other cream separator.

From the standpoint of its greater durability alone the

De Laval is the most economical cream separator to buy, and when you also take into consideration its cleaner skimming, easier running, greater capacity and less cost for repairs, the price of the "cheapest" machine on the market is most exorbitant compared with that of the De Laval.

And there is no reason why you should let its FIRST COST stand in the way either, because the De Laval may be purchased on such liberal terms that it will actually pay for itself out of its own savings.

A De Laval catalog to be had for the asking tells more fully why the De Laval is the most economical cream separator, or the nearest local De Laval agent will be glad to explain this and many other points of De Laval superiority. If you don't know the nearest local agent, simply write the nearest De Laval main office as below.

## SHALL WE FIGHT FOR THE BIRDS?

College Students Urged to Help in "Saving America First," by Dr. J. H. Paul, formerly President of the A. C. U.

Sir: In answer to a request by one of your staff, I take pleasure in contributing a few items on the lack of adequate protection to the bird life of Northern Utah.

### Field Rats in Cache County.

In the first place it appears that in Cache Valley there are fewer hawks and owls and more gophers, field mice, and other rodents than in any other well-cultivated tract of the same area in the state. This is the more remarkable when we consider that the Agricultural College has for years been urging the preservation of the larger birds of prey as a means of combating the burrowing hordes. I have investigated but little in Cache valley for many years, and speak mainly from hearsay. Many of your readers will be better able than I am to judge of the actual conditions there as to the scarcity of hawks and owls. If it is true that these larger allies of the farmer are relatively scarcer in Cache county than elsewhere, it is an illustration of the old proverb that the children of the shoemaker are known by their poor shoes.

### What About the Hawks?

Have you heard that the College has waged an active campaign throughout the valley, looking to the preservation of native bird life? I suppose it has done what it could in the matter. But it cannot be too frequently brought to the attention of the intelligent farmers there that whatever else they kill, they must not kill any of the large sailing and soaring hawks. Especially should they save the Marsh Hawk, which soars and sails, and rises and falls over the meadow lands, taking so many mice that its presence to the farmer is simply indispensable. The chicken hawks, they should be informed, are very difficult to get a shot at, since they do not soar and sail as all the useful hawks do; neither do they approach in the open, but come skulking through the trees. Having located the chicken yard, the real chickenhawks dart with the swiftness of an arrow and make off with their prey before anyone can shoot, unless he is standing there right at the moment.

### Never Kill an Owl.

As to the owls, they are all more or less beneficial, and should never be killed. The two large owls, the Western Horned and the Snow species sometimes take chickens that roost out at night, but they do quite as much good as harm and should not be destroyed, while all the other owls are so useful in destroying field mice, rats, and gophers that it is a great mistake to kill one

of them. The fight for saving the remnant of the owls should be begun at once and carried on with great vigor; otherwise, most of our valleys will be plagued with a veritable scourge of burrowing animals that destroy the crops.

### All Songs Birds Valuable

All the native song birds are entitled to every form of protection that it is possible to devise for them. Even the robin, which takes some cherries, makes amends by destroying large numbers of earthworms, which injure our dry soil and interfere with irrigation. The Bluebird is very valuable and can be induced to nest freely in the towns by providing it with nesting boxes. The Chickadee has a value so great that it cannot well be estimated. It is probable that many of the forest trees would perish but for its destruction of the eggs of moths, especially those of the canker worms. The Woodpeckers have a similar value in saving the forest trees.

### The Vanishing Game Birds

The game birds of northern Utah and Western Wyoming are already near to the point of actual extermination. Fifteen years ago the pine hens were frequently encountered in the mountains between Cache and Bear Lake valleys. Now they are very rarely seen. They have probably been shot to death, all the young coveys being exterminated, most likely while yet unable to fly. Such is the quality of the "sportmanship" in the West. The sage grouse, also, the finest game bird in America next to the wild turkey (which is practically extinct) is now threatened with speedy extermination. It is making its last stand in the mountains of northern Utah and Western Wyoming. Mr. Hornaday thinks it now depends upon Utah as to whether or not the remnants of the former untold millions of this magnificent and harmless species shall be saved to our country or shall perish miserably, as most of the other game has already done. If the students of the Agricultural College should make a united and determined appeal to the gunners of the north, these fine birds could probably be saved. All the birds named above are protected by law; but the law is a nullity to some men, and its enforcement will require the united efforts of practically all the young men of the State. My query is: Are the students of the College ready and willing to stand by the sorry remnant of wild game fowl and other forms of wild life, upon which so much of the romance beauty, interest, and prosperity of the West depend? If they are, now is their time to do something about the situation.

Very truly yours,

J. H. PAUL,  
University of Utah.

### SUMMER COURSE IN AGRICULTURE

Twenty-four new courses have been added to those given during the regular summer term of the state college of agriculture at Cornell, according to an announcement which has just been made. The new term starts on June 7 and ends on September 22.

As stated in the announcement, "the primary purpose of the summer term is to take advantage of the growing season in teaching subjects to students regularly registered in either graduate or undergraduate classes." Opportunity is also provided for advance students, teachers, and for persons otherwise occupied during the winter months, to take long periods of special work.

### Many Departments Offer Courses.

Eighteen departments will offer instruction during the summer. Those which will be open, and the number of classes offered in each, are as follows:

Botany, 9; dairy industry, 1; drawing, 1; nature study, 12; farm crops, 4; farm management, 1; farm practice, 1; floriculture, 5; forestry, 8; landscape art, 1; plant breeding, 1; plant pathology, 4; pomology, 5; poultry husbandry, 8; rural education, 1; rural engineering, 5; soil technology, 5; vegetable gardening, 4; a total of seventy-six courses.

The department of forestry offering eight courses will give special instruction with accent on work in the field. The first six weeks' work in the department will be in Ithaca. The remainder of the term will be spent in camp on a large forest tract in the Adirondacks.

### WHAT'S A MAN?

A little girl wrote the following composition on men:

"Men are what women marry. They drink, and smoke, and swear, but they don't go to church. Perhaps if they wore bonnets they would. They are more logical than women, and also more zoological. Both men and women sprung from monkeys, but the women sprung further than the men."—Inland Printer.

### U. OF U. WINS STATE TRACK MEET

#### TWO STATE RECORDS BROKEN—AGGIES' DOPE SHEET UPSET

U. OF U. 52  
U. A. C. 44  
B. Y. U. 28  
B. Y. C. 2

More than 3000 people gathered on the A. C. campus last Saturday to watch the best track and field meet ever held in Logan. The weather was ideal and the track in excellent condition, enabling very fast time in many of the races. Two State records were broken and several equaled. In the 220 yard dash Haymond of the U. of U. not only broke the State record, but tied the world's record of 21 and 1-5 seconds. Joe Snow set a new mark of 120 feet and 3 inches with the discus.

A. C. students, not only had their dope sheet miserably upset, but were very much surprised when the U. of U. finished eight points in the lead. Anderson furnished the greatest disappointment of the day when he slowed up within two yards of the tape and allowed Hales of Provo to step ahead, winning first in the mile. Andy came back strong, however, in the half and won by a safe margin, totaling him eight points. Snow was the highest point winner of the meet, taking three firsts in the weights which earned him fifteen points.

Hugh Peterson completed his very successful athletic career at the A. C. Although he lost to Haymond in both sprints, he was one of the high joint winners for his team, with two seconds, one third and the relay. Pete has worked consistently all track season and was in the best of condition two weeks ago when he defeated Haymond in the 100 yard dash in ten seconds. He has participated four years in athletics at the A. C., and has been a very reliable man, having taken part in football, basketball and track work.

Joe Snow also finished his athletic career at the A. C. and his loss will be felt in future track meets, as he has been an

important point winner in the weights.

The summary:

100-yard dash—Haymond, U. first; Petersen, A., second; Cooper, B. Y. U., third. Time, 10 seconds.

220-yard dash—Haymond, U., Petersen, Voorhees, A. Time 21 1-5.

440-yard run—Eyre, B. Y. U., first; Teasdale, U., second; Romney, U., third. Time, 53 seconds.

Half-mile—Anderson, A., first; Hales, B. Y. U., second; Price, B. Y. C., third. Time, 2:03 4-5.

Mile run—Hales, B. Y. U., first; Anderson, A. second; Berry, U., third. Time, 4:46.

120-yard hurdles—Van Pelt, U., first; Parry, U., second; Brossard, A., third. Time, 26 2-5.

220 hurdles—Hopkins, U., first; Cooper, B. Y. U., second; Gunn, B. Y. U., third. Time, 26 1-5.

Shot-put—Snow, A., first; Twitchell, A., second; Smith, U. third. Distance, 38 feet three inches.

Hammer throw—Snow, A., first; Blazzard, B. Y. U. second; McIntyre, U., third. Distance, 133 and 95-100 feet.

Discus—Snow, first; Brockmeyer, U., second; Petersen, A., third. Distance, 120 and 3-10 feet.

Pole vault—Van Pelt, U., 1st; Madsen, A., second; Dorton, U., third. Height, 10 feet 10 inches.

Broad jump—Luke, B. Y. U., first; Kapple, A., second; Sheffield, B. Y. C., third. Distance, 21 feet 8½ inches.

High jump—Parry, U., first; Reed, U., second; Barkdell, B. Y. U., third. Height, 6 feet and one-half inch.

Relay race won by Utah, Aggies, second. Time, 1:34.

#### AGGIES DEFEAT B. Y. U. IN BASEBALL

U. A. C. 4  
B. Y. U. 3

Last Friday afternoon our baseball team won its first victory against the B. Y. U. by a score of 4 to 3. The first part of the game was filled with errors, and in the second inning

Provo brought in three runs. The game looked easy for the visitors until the sixth, when the Aggies made 4. Perkins pitched a good, consistent game for the A. C., allowing only a few safe hits. Burridge, for Provo, showed excellent form, but was unable to hold out after the game with Utah the day before. The line-up:

A. C.	B. Y. U.
Owen..... c	Thomas
Perkins..... p	Burridge
Holmstead..... 1b	Davis
Jones..... 2b	Huish
Acord..... 3b	Curtis
Taylor..... ss	Mathews
Greener..... lf	Baxter
Tanner..... cf	Mortison
Stott..... rf	Baird
Umpire—Harry Stoney.	

U. A. C. 10  
U. OF U. 11

The Aggie baseball team lost its second game to the U. of U. in Salt Lake last Monday in ten innings. The game was close throughout with each team having the lead at times. McDonald and Perkins each pitched five innings for the A. C. and McIntyre and Udy pitched for Utah.

Don't forget to speak to Miss Huntsman this week if you want to get out of your exams.

#### CAMERA CLUB EXHIBITION

The U. A. C. Camera club is offering to every student in the college a chance to win a big prize by entering pictures in the "snap shot" exhibition.

This exhibition is to take place soon and Camera club would like to list any pictures of interest. The snap shots may be views, scenes, pictures of people, etc., just so they are interesting and well printed.

Students, if you have such pictures and wish to exhibit them, hand them to Le Roy Hillam or Mr. Boberg.

Last Tuesday the Camera club held its weekly meeting and the following members were elected to office:

Mr. Boberg, president.  
Le Roy Hillam, vice president.  
Mr. Cragun, secretary and treasurer.

Any one interested in kodaks is welcome to come to any of the meetings.

A man who says little is quite often given a reputation for wisdom—but that is probably because he says little to expose his ignorance.

Nearly every family has a kin that they refer to with a kind of awe and others that they don't refer to at all if they can help it.
