Helping Your Children Love Vegetables

Carrie Durward, PhD, RD, and Chelsea Feller

If you want your child to like and eat vegetables: offer them early and often! Feed your child a variety of fruit and vegetable purees as soon as you introduce solid food (5-7 months) (Schwartz, 2011).

Both children and adults like and eat foods they are familiar with. The best way to get your children to like vegetables is to keep offering them. In one study, children had to taste a new vegetable up to 15 times before it was accepted (Maier, 2007).

It is normal for young children to be wary of new foods. If your child rejects a new vegetable or refuses to try it, don’t give up! Just try again another day.

Try to avoid showing a negative reaction like frustration if your child refuses their vegetables. Never pressure your children to finish food or force them to clean their plate. Pressure to eat may alter your child’s enjoyment of eating food causing them to eat those foods less often in the future (Jansen, 2012). Encourage your child to try a bite, but don’t force the issue (Galloway, 2006).

Why Are Vegetables So Good for Us?

A diet high in vegetables is associated with a lower risk of obesity and diet-related disease such as diabetes, cancer, and heart disease (Li, 2014; Boeing, 2012; Bazzano, 2006).

Vegetables are generally low in calories, high in fiber, and increase satiety (fullness) after a meal.

Vegetables also contain vital nutrients that everyone needs to be happy and healthy, including potassium, dietary fiber, folate (folic acid), vitamin A, vitamin C, and many more!

<th>Health Benefits</th>
<th>Sources</th>
</tr>
</thead>
<tbody>
<tr>
<td>Potassium</td>
<td>Keeps muscles and nervous system working properly.</td>
<td>Potatoes (sweet &amp; white with skin), legumes (white beans), tomato paste (canned), spinach</td>
</tr>
<tr>
<td>Fiber</td>
<td>Helps reduce constipation and makes you feel full.</td>
<td>Beans (any kind), lentils, potatoes with skin, celery</td>
</tr>
<tr>
<td>Folate (folic acid)</td>
<td>Red blood cell formation.</td>
<td>Dark leafy greens, beans and peas</td>
</tr>
<tr>
<td>Vitamin A</td>
<td>Keeps eyes and skin healthy and protects against infection</td>
<td>Bell peppers (red/orange), carrots, dark leafy greens</td>
</tr>
<tr>
<td>Vitamin C</td>
<td>Heals cuts and wounds. Keeps teeth and gums healthy.</td>
<td>Bell peppers, tomatoes, broccoli, kale</td>
</tr>
</tbody>
</table>
How Much Is Enough?

Most children in the United States don’t eat enough vegetables, but how much is enough? It depends on how old your children are, whether they are boys or girls, and how active they are.

To get a personalized recommendation for you or your child, check out: www.supertracker.usda.gov

On this website you can nutritional facts on products and track diet intake. Super Tracker allows you to create meal plans based off of MyPlate recommendations.

*These amounts are appropriate for individuals who get less than 30 minutes per day of moderate physical activity, beyond normal daily activities. Those who are more physically active may be able to consume more while staying within calories needs.

10 Ways to Help Your Child Eat More Vegetables

1. Be a good example. Keep vegetables in the house, serve them at every meal, and let your child see you eating and enjoying them (Blissett, 2013).

2. Offer vegetables first, when children are hungry. Try vegetables as an after-school snack or have a salad or soup at the beginning of dinner (Roe, 2013).

3. Take your child shopping and let them pick out the vegetables or let your child choose between two different vegetables to have with dinner (Rohlfs, 2013).

4. Get your child involved in cooking. If children help prepare a vegetable, they will be more likely to try it (Heath, 2011).

5. Growing a vegetable garden, visiting a farmers market, or a trip to a local farm can be fun ways to help your child explore new foods (Heath, 2011).

6. Make eating vegetables fun by playing with your food. Try ants on a log, rainbow salad, or pizza faces (Heath, 2011).

7. Try preparing vegetables in different ways: raw, steamed, roasted, etc. (Bongoni, 2015).

8. Try a small reward, like a sticker or praise to help convince your child to taste vegetables. Don’t use food as a reward or punishment (Cooke, 2011).

9. Use marketing in your favor! Put stickers of your child’s favorite book or TV characters on containers of vegetables to encourage intake (Keller, 2012).

10. Offer vegetables with a low-calorie dip or use a small amount of sugar when cooking to help your child be more willing to taste and eat vegetables. This will help your children become more familiar with the taste of vegetables, and they will learn to like the flavor more, even without the dip or sugar (Fisher, 2012).

Utah State University is committed to providing an environment free from harassment and other forms of illegal discrimination based on race, color, religion, sex, national origin, age (40 and older), disability, and veteran’s status. USU’s policy also prohibits discrimination on the basis of sexual orientation in employment and academic related practices and decisions. Utah State University employees and students cannot, because of race, color, religion, sex, national origin, age, disability, or veteran’s status, refuse to hire; discharge; promote; demote; terminate; discriminate in compensation; or discriminate regarding terms, privileges, or conditions of employment, against any person otherwise qualified. Employees and students also cannot discriminate in the classroom, residence halls, or in on/off campus, USU-sponsored events and activities. This publication is issued in furtherance of Cooperative Extension work, acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture, Kenneth L. White, Vice President for Extension and Agriculture, Utah State University.

SNAP and FDPIR State or local agencies, and their subrecipients, must post the following Nondiscrimination Statement: In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, sex, religious creed, disability, age, political beliefs, or reprisal or retaliation for prior civil rights activity in any program or activity conducted or funded by USDA. Persons with disabilities who require alternative means of communication for program information (e.g. Braille, large print, audiotape, American Sign Language, etc.), should contact the Agency (State or local) where they applied for benefits. Individuals who are deaf, hard of hearing or have speech disabilities may contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English. To file a program complaint of discrimination, complete the USDA Program Discrimination Complaint Form, (AD-3027) found online at http://www.ascr.usda.gov/complaint_filing_cust.html, and at any USDA office, or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture Office of the Assistant Secretary for Civil Rights 1400 Independence Avenue, SW Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov. This institution is an equal opportunity provider.
