Career Readiness

There are endless career choices. Whatever career we choose to pursue, we need to begin to develop skills that will prepare us for the future.

There is a lack of technical and workplace skills in today’s workplace. According to the 2015 Manpower Group Talent Shortage Survey,

U.S. EMPLOYERS

33% One in three U.S. employers have a hard time filling positions due to potential employee’s talent shortage.

48% of U.S. employers acknowledge that talent shortages have an impact on their business.

Despite this lack of know-how in today’s workplace, more youth than ever are graduating high school and pursuing postsecondary education. However, youth are still lacking the critical expertise that will help them succeed in their careers. America has a very real career readiness gap (Career Readiness Framework).

4-H is the nation’s largest youth development organization. The 4-H program and its project areas are proven to develop those critical skills needed in today’s workplace. This is achieved by allowing youth to explore, learn, practice, and experience possible careers.

1. Identify your area of interest and match it with a 4-H project area.

2. Contact your local Extension office to find a club in your area.

3. Learn new skills and have fun! Invite your friends to participate in 4-H activities!

Get Involved with 4-H!

Utah State University is an affirmative action/equal opportunity institution.
