

# Muses: Finding Women's Voices

Highlighting the historical consequences of  
sexism in different art forms

Megan Codling -Presenter - Utah State University  
Elise Willmore - Presenter - Utah State University  
Matt Omasta - Mentor- Utah State University

# Muse:

A person or personified force who is the source of inspiration for a creative artist.

How has the historical  
over-sexualization of women in  
different art forms affect the  
lack of women in the role of  
creator today?

Our original research of surrealistic female artists was inspired by the *Women, Surrealism, and Abstraction* exhibit at the Nora Eccles Harrison Museum of Art.

“There were seven women that were the most important women in Picasso’s life, two killed themselves and two went mad. Another died of natural causes only four years into their relationship. Yet while Picasso had affairs with dozens, perhaps hundreds of women, and was true to none of them – except possibly the last – each of these seven women shines out as a crucial catalyst in his development as an artist. Each stands for a different period in his career, ”- Mark Hudson

To further our exploration of women's experiences in their own fields, we invited an acting major and art major from USU not only share these historical artists stories but their own as well.
