

Market Hog Nutrition - Quick Tips

Joshua J. Dallin, M.S. -USU Extension Assistant Professor

Cody Zesiger, M.S. -USU Extension Assistant Professor

Balanced Market Hog Feed Recommendations:

crude
protein/lysine

&

Metabolizing
Energy (Fat)

Self-Feeder

PRO: Plenty of feed in front of the hog at all times

Hand Feeding

PRO: Requires Morning/Evening Feeding, Allows for more control

*Fresh
water*

Free Choice

Always

Available

Trace Minerals
specific to hogs

*This is an average suggested feed amount. Amounts should be adjust based upon target end weight.

Target Weight

It is important that your animal is on a regular deworming schedule

Box Elder County holds the largest livestock show in the State of Utah. The 2018 Average Daily Gain for Market Hogs was 1.5 pounds per day

Minimum weight is required at most fairs and ranges from 220-240 Pounds

Ideal Weight ≈ 270 Pounds

$(\text{Number of Days until Fair}) \times (\text{average gain}) + (\text{current weight}) = \text{Predicted Weight}$

$(\text{Current Weight}) - (\text{Initial Weight}) / (\text{number of days}) = \text{Average Daily Gain}$
