Pulpwood Production in the Lake States, 1993

Ronald J. Piva¹

ABSTRACT.—Pulpwood production in the Lake States increased from 8.8 million cords in 1992 to 9.4 million cords in 1993. Michigan, Minnesota, and Wisconsin pulpwood production is shown by county and species group.

KEY WORDS: Residue, roundwood, whole tree chips, Minnesota, Michigan, Wisconsin.

Pulpwood production² in the Lake States—Michigan, Minnesota, and Wisconsin—increased to 9.4 million cords in 1993 from 8.8 million cords in 1992.³ Wisconsin produced 3.3 million cords, Michigan produced 3.2 million cords, and Minnesota produced 3.0 million cords in 1993 (table 1). Ninety-three percent of the pulpwood produced came from roundwood (including chips from roundwood); the remainder came from mill residues such as slabs, edgings, veneer cores, and chips from these materials (fig. 1).

Figure 1.—Pulpwood production, Lake States, 1982-1993.

ROUNDWOOD

Roundwood production totaled 8.7 million cords and was equally distributed among the three Lake States. More than three-fourths of the harvested species were hardwoods. Aspen accounted for more than half of the total production (4.5 million cords). The other major species were pine (1.2 million cords), maple (1.1 million cords), spruce-fir (0.6 million cords), and birch (0.5 million cords) (fig. 2).

¹ RONALD J. PIVA is a Forester with the North Central Forest Experiment Station, St. Paul, Minnesota.

² Includes logs, bolts, and wood residue used in manufacturing particleboard, waferboard, oriented strand board, and medium density fiberboard.

³ Previous year's data are from "Pulpwood Production in the Lake States, 1992," Research Note NC-365, 1994.

Figure 2.—Distribution of roundwood production by major species group, Lake States, 1993.

In 1993, whole tree chips (WTC) supplied 603 thousand cords or 7 percent of the roundwood production, an 8-percent increase over 1992. Michigan was the major WTC producer with 377 thousand cords, followed by Minnesota with 136 thousand cords and Wisconsin with 90 thousand cords.

Counties harvesting more than 150 thousand cords each were Delta, Iron, and Marquette in Michigan; Beltrami, Cass, Itasca, Koochiching, and St. Louis in Minnesota; and Bayfield, Marinette, Oneida, and Vilas in Wisconsin. These 12 counties contributed 38 percent of the pulpwood production from roundwood in the Lake States in 1993.

MILL RESIDUES

Pulpwood production from mill residues amounted to 690 thousand cords in 1993, a 13-percent increase over 1992. Production from softwood and hardwood residues by State was:

State	Softwood (Thousand standard cords, unpeeled)	Hardwood
Michigan	72	174
Minnesota	36	76
Wisconsin	68	264

Table 1.--Lake States pulpwood production from roundwood by county and species group, 1993

(In standard cords, unpeeled)
