- Recruiting of students for career positions
- Ability to use research specialists on projects
Benefits for Utah State University

- Research opportunities for faculty
- Ability to leverage limited funding
- Design courses that include field work
- Provide students with state-of-the-art technology
Funding 1995 - 2010

- Over $2 million
- About 25% of my salary
- All student salaries
- Trucks, computers, GPS, radio-telemetry gear
- Indirect costs ~ 20%
Internship Details

- BLM
  - Challenge Cost-share
  - Colorado Plateau Cooperative Ecosystem Studies Unit

- USU – UB
  - Faculty Salaries for Internships
  - Equipment
  - Indirect Cost Waivers
Greasewood Control in Book Cliffs

- Four student interns
- Cooperation between USU, UDWR, BLM, Uintah County
- Wide area applications
Browns Park Deer Studies

- Annual deer counts
- Deer movements study from 1980s
GPS/GIS Training

- Trimble GPS
- Arc GIS
- Project-oriented training
- Pariette Wetlands
- Red Mountain
Pariette Wetlands Internship

- Started in 1997
- Fifteen student interns
- Wetlands management
Black-footed Ferret Reintroduction

- Started in 1999
- Faculty support
- 40 student interns
- Project coordination
- Project evaluation
- Prairie dog work
Disease Monitoring

- 30 student interns
- Volunteer and paid
- Small mammal trapping
- Disease screening
Range Improvement Monitoring

- GPS of improvements
- Digital and film images of improvements
- Evaluation of condition
The Future

- Distance Delivered Wildlife Science Degree
- US Forest Service – Youth Conservation Corps Internships
- Pariette Wetlands Field Station
Outcomes?

- Agencies are more productive
- USU and faculty have been successful
- 100% of students have career positions!
Keys To Success

- Personal Relationships
- Communications
- Long-term goals
- Student Recruiting
