Programs/Initiatives

- The Salt Lake City Budget for fiscal year 1998-99 totals \$130,722,800.⁴
- Salt Lake Area Gang Project was established to identify, control, and prevent criminal gang activity and to provide intelligence data and investigative assistance to law enforcement agencies. The Project also provides youths with information on viable alternatives to gang membership and educates the public about the destructiveness of the gang lifestyle.⁵
- The University of Utah, Neighborhood Action Coalition, Salt Lake City, Utah, was a 1998 Drug Free Communities Support Program recipient. The coalition will target the use of illegal drugs and inhalants, as well as alcohol and tobacco use, among youth in two high-risk neighborhoods, Taylorsville and West Valley City.⁶
- Salt Lake City is a Weed and Seed site that includes the west-side neighborhoods of Poplar Grove, Glendale, and Fairpark. These neighborhoods are among Salt Lake's most ethnically diverse communities. The availability of low-income rental housing has attracted a steady immigration of Vietnamese, Laotian, Hispanic and Pacific Islander families. In addition, it is a refugee relocation site for Eastern Europe, causing a rapid increase in refugee populations from Russia, Bosnia, Serbia, etc. Ethnic parents in the target neighborhoods are reportedly extremely concerned by their children's rejection of traditional values, rate of school dropouts, and gang affiliations.⁷

*Notable Weed and Seed Programs:*⁸

- The Neighborhood Mediation Center provides conflict resolution/mediation services directly in the neighborhoods.
- Outreach to New Americans developed by the city and the national Crime Prevention Council is designed to increase levels of cooperation, trust and communication between minority communities, the city and law enforcement.
- Community Action Teams serve the Weed and Seed target area. There are two multi-disciplinary problem-solving groups that meet weekly to case manage chronic offenders.

Drugs¹⁴

- Salt Lake City police Department indicates that marijuana continues to be the most widely abused drug in their area. However, its use does not present the same problems as the use of other drugs, such as methamphetamine.
- According to Utah State DSA statistics, 57% clients were admitted in Salt Lake City for methamphetamine use as their primary substance of abuse for fiscal year 1998.
- According to the DEA-Metro Narcotics Task Force in Salt Lake City, in 1998 the task force responded to and/or investigated 225 clandestine methamphetamine laboratory cases. Of those 225, all but 14 were “box” or “suitcase” type labs. In addition, recent statistics provided by the DEA, show the Salt Lake City metropolitan area as number two in the nation for methamphetamine labs, second only behind St. Louis, Missouri.
- The Salt Lake City Police Department reports that cocaine remains the predominant drug of choice. However, methamphetamine distribution, production, and consumption are at an all time high in the Salt Lake metro area.
